Background: Competitive examinations for public employment or at private companies or agencies contracting with the state are on a 100-point scale. An honorably discharged veteran receives an added percentage to their score based on the veteran's status. A veteran who served during a period of war or armed conflict and does not receive military retirement is eligible for a 10 percent increase. A veteran who did not serve during a period of war or armed conflict or who served during a period of war or armed conflict, but is receiving military retirement, is eligible for a 5 percent increase. A veteran who is called to active military service from employment with the state is eligible for a 5 percent increase until the first promotion.

Summary of Bill: The percentage benefit for veterans applying for public employment is converted to a point benefit. A veteran who served during a period of war or armed conflict and does not receive military retirement is eligible for a ten-point increase. A veteran who

A veteran who is called to active military service from employment with the state is eligible for a five-point increase until the veteran's first promotion.

Appropriation: None.

Fiscal Note: Available.

Committee/Commission/Task Force Created: No.

Effective Date: Ninety days after adjournment of session in which bill is passed.

Staff Summary of Public Testimony: PRO: This is a good common-sense bill that simplifies things by taking away some of the risk in manual calculation. The bill encourages veteran employment. The current percentage-based method is inefficient and increases likelihood of error. The federal government and most other states use a points-based system.

Persons Testifying: PRO: Senator Bailey, prime sponsor; Arlen Harris, Dept. of Enterprise Services.
