

2SHB 2338 - H AMD 839

By Representative Dye

1 On page 3, beginning on line 21, after "fuels" strike all
2 material through "fuels" on line 24 and insert "directly attributable
3 to the combustion of the fuel"

EFFECT: Requires rules adopted by the department of ecology for the clean fuels program to measure the greenhouse gas emissions of fuels based on their direct combustion emissions, rather than upon the lifecycle emissions associated with the fuels' production, storage, transportation, and combustion.
