

HOUSE BILL REPORT

EHB 1188

As Reported by House Committee On: Transportation

Title: An act relating to the use of child passenger restraint systems.

Brief Description: Concerning the use of child passenger restraint systems.

Sponsors: Representatives Bergquist, Harmsworth, Fey, Hayes, Jinkins and Hudgins.

Brief History:

Committee Activity:

Transportation: 1/26/17, 2/8/17 [DP], 1/17/18 [DPS].

Brief Summary of Substitute Bill

- Requires a child to be properly secured in a rear-facing child restraint system until the age of 2 or until he or she reaches the seat manufacturer-set weight and height limits.
- Requires a child not secured in a rear-facing seat who is under the age of 4 to be properly secured in a forward-facing child restraint system until he or she reaches the seat manufacturer-set weight or height limits.
- Requires a child not secured in a forward- or rear-facing child restraint system who is under the age of 10 or under 4 feet 9 inches tall to be properly secured in a child booster seat until he or she reaches the seat-manufacturer-set weight or height limits.
- Mandates that the Washington Traffic Safety Commission produce and distribute informational and educational material on child restraint systems.

HOUSE COMMITTEE ON TRANSPORTATION

Majority Report: The substitute bill be substituted therefor and the substitute bill do pass. Signed by 18 members: Representatives Clibborn, Chair; Wylie, Vice Chair; Orcutt, Ranking Minority Member; Harmsworth, Assistant Ranking Minority Member; Chapman, Gregerson, Hayes, Kloba, Lovick, McBride, Morris, Ortiz-Self, Pellicciotti, Riccelli, Rodne, Stambaugh, Tarleton and Valdez.

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not a part of the legislation nor does it constitute a statement of legislative intent.

Minority Report: Do not pass. Signed by 5 members: Representatives Hargrove, Assistant Ranking Minority Member; Irwin, Shea, Van Werven and Young.

Minority Report: Without recommendation. Signed by 1 member: Representative Pike.

Staff: Jennifer Harris (786-7143).

Background:

Proper Usage.

A child must be restrained in a child restraint system until the child is 8 years old or taller than 4 feet 9 inches, provided a passenger seating position equipped with a safety belt system allows sufficient space for installation. A child who is 8 years old or older or taller than 4 feet 9 inches must be properly restrained using a motor vehicle's safety belt or an appropriately fitting child restraint system. A child who is under 13 years old must be transported in the back seat of the vehicle where it is practical to do so.

The child restraint system used must comply with federal law, which mandates manufacturers meet specific performance standards while carrying a child up to specified weight and height maximums for rear-facing car seats, forward-facing car seats, and booster seats. Child restraint system manufacturers set maximum child weights and heights for usage in compliance with federal performance standard requirements for each product. Federal law does not set manufacturer performance standards in terms of age restrictions.

Child restraint system laws apply when a child is being transported in a motor vehicle that is required to be equipped with a safety belt system in a passenger seating position and when a child is being transported in a neighborhood electric vehicle or medium-speed electric vehicle, with several exceptions. These laws do not apply to any seating position where there is only a lap belt available and the child weighs more than 40 pounds. These laws also do not apply to: (1) for-hire vehicles; (2) vehicles operated by auto transportation companies that are designed to transport 16 or fewer passengers, including the driver; (3) vehicles providing customer shuttle service between parking, convention, hotel facilities, and airport terminals; and (4) school buses.

Enforcement.

Enforcement may be carried out by law enforcement personnel, who are authorized to visually inspect the usage of a child restraint system to determine whether its use is appropriate for the child's individual height, weight, and age based on guidance provided by the vehicle and child restraint system manufacturers.

Individuals who violate child restraint system laws may be issued a notice of traffic infraction. The fine for this traffic infraction is \$136. If an individual has not previously had a violation of child restraint system laws dismissed, he or she may present proof of acquisition of an approved child restraint system or child booster seat, whichever is appropriate under the circumstances, within seven days to the jurisdiction that issued the notice.

Failure to comply with child restraint system laws does not constitute negligence by a parent or legal guardian and is inadmissible as evidence of negligence in a civil action.

Safety Technician Immunity.

A person who has a current national certification as a child passenger safety technician and who provides inspection, adjustment, or educational services for the use of child restraint systems in good faith is not liable for civil damages resulting from any act or omission in providing these services other than acts or omissions that constitute gross negligence or willful or wanton misconduct.

This immunity from civil damages does not apply to a certified child passenger safety technician who is employed by a retailer of child passenger restraint systems and who provides inspection, adjustment, or educational services for child passenger restraint systems during his or her hours of employment while being compensated for providing these services.

Washington Traffic Safety Commission.

The Washington Traffic Safety Commission (WTSC) oversees efforts to improve safety on Washington's public highways. The WTSC is the federally recognized highway safety office in Washington. It collects fatal and serious-injury crash data, engages in research, and oversees highway safety pilot projects.

Summary of Substitute Bill:

Proper Usage.

A child must be properly secured in a rear-facing child restraint system until the child is 2 years old or reaches the weight or height limit of the child restraint system set by the manufacturer. A child 2 years of age or older may continue to be properly secured in a rear-facing child restraint system until the child reaches the weight or height limits as set by the manufacturer.

If a child under the age of 4 years is not secured in a rear-facing child restraint system, he or she must be properly secured in a forward-facing child restraint system with a harness until the child reaches the weight or height limit of the child restraint system set by the manufacturer. A child 4 years of age or older may continue to be properly secured in a forward-facing child restraint system with a harness until the child reaches the weight or height limits as set by the manufacturer.

If a child under the age of 10 years or under 4 feet 9 inches tall is not secured in a forward- or rear-facing child restraint system, he or she must be properly secured in a child booster seat until the child reaches the weight or height limit of the booster seat as set by the manufacturer. The child booster seat must be used in accordance with vehicle and booster

seat manufacturer instructions to elevate a child to sit properly in a federally approved safety seat belt system.

The WTSC is required to produce and distribute informational and educational materials that explain the proper use of child restraint systems, the safety risks of not properly using the child restraint systems, where assistance of proper installation and use can be obtained, and the penalties for not properly using child restraint systems.

Substitute Bill Compared to Engrossed Bill:

The substitute bill moves the effective date of the bill from January 1, 2018, to January 1, 2019.

Appropriation: None.

Fiscal Note: Available.

Effective Date of Substitute Bill: The bill takes effect on January 1, 2019.

Staff Summary of Public Testimony:
