

FINAL BILL REPORT

SHB 2664

C 169 L 18
Synopsis as Enacted

Brief Description: Extending existing telecommunications authority to all ports in Washington state in order to facilitate public-private partnerships in wholesale telecommunications services and infrastructure.

Sponsors: House Committee on Technology & Economic Development (originally sponsored by Representatives Dye, Doglio, Jenkin, Chapman, Vick, Stonier, Wylie and Walsh).

House Committee on Technology & Economic Development
Senate Committee on Energy, Environment & Technology

Background:

A rural port district in existence on June 8, 2000, may acquire and operate telecommunications facilities both for its own internal telecommunications needs within and outside of the district and to provide wholesale telecommunications services within the district limits.

Rural port districts providing wholesale services must:

- ensure that their rates, terms, and conditions are not unduly or unreasonably discriminatory or preferential;
- keep accountings of revenues and expenditures of their wholesale telecommunications activities separate from their internal telecommunications operations;
- dedicate the revenues from the wholesale activities to paying off the costs incurred in building and maintaining the telecommunications facilities; and
- charge themselves the true and full value of telecommunications services provided by their separate telecommunications functions to the district.

A rural port district may not charge preferential or discriminatory rates to its non-telecommunications operations or exercise powers of eminent domain to acquire telecommunications facilities or contractual rights to such facilities.

The Utilities and Transportation Commission (UTC) is authorized to regulate in the public interest the rates, services, facilities, and practices of all persons supplying a utility service within the state. A recipient of wholesale telecommunications services from a rural port

district may petition the UTC if it believes the district's rates, terms, and conditions are unduly or unreasonably discriminatory or preferential.

A rural port district is one that is located in a county with an average population density of less than 100 persons per square mile.

Summary:

The authority of rural port districts to acquire and operate telecommunications facilities for: (1) the district's own use; and (2) the provision of wholesale telecommunications services within the district limits, is extended to all port districts in existence on June 8, 2000.

A port district exercising telecommunications authorities for the first time after the effective date of the act must first develop a business case plan.

Votes on Final Passage:

House	98	0	
Senate	48	0	(Senate amended)
Senate	49	0	(House concurred)

Effective: June 7, 2018
