

SB 6423 - DIGEST

Establishes the net neutrality act.

Finds that the federal communications commission has repealed net neutrality rules intended to protect consumers and to ensure fair and reasonable access to the internet.

Declares an intent to: (1) Ensure that corporations do not impede competition or engage in deceptive consumer practices and that they offer service to customers on a nondiscriminatory basis; and

(2) Ensure certain principles are met in the provision of internet services.

Requires the director of the consolidated technology services agency to: (1) Adopt guidelines that identify and specify the state government's role as an internet customer;

(2) Use that customer power to ensure implementation of this act; and

(3) Establish sample master contracts for public entities to be used as an incentive for internet service providers to comply with the net neutrality standards.

Creates the internet consumer access account.
