Background: Budget Stabilization Account. In 2007, the voters ratified a constitutional amendment that created the Budget Stabilization Account (BSA). Each year, the state

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not a part of the legislation nor does it constitute a statement of legislative intent.

treasurer must deposit 1 percent of general state revenues into the constitutionally created BSA. The term "general state revenues" is defined in the constitution and is largely equivalent to the statutory state general fund. Appropriations from the BSA require a three-fifths majority in each chamber of the Legislature, but in the case of a catastrophic event or low employment growth, the Legislature may appropriate from the BSA with a constitutional majority vote of each chamber.

Disaster Response Account. The Disaster Response Account (DRA) is an account in the state treasury. Money may be placed in the DRA from legislative appropriations and transfers, federal appropriations, and other lawful sources. Expenditures from the DRA are used to support state agency and local government disaster response and recovery efforts.

Legislative Balanced Budget Requirement. Legislation enacted in 2012, established requirements for the Legislature to pass a state operating budget that is balanced over a four-year period comprising the current biennium and the next ensuing biennium. The legislative balanced budget requirement applies to revenues and expenditures from the general fund and related funds. The requirement to balance in the ensuing biennium does not apply in any fiscal biennium in which money is appropriated from the BSA.

Coronavirus Disease 2019. COVID-19 is a respiratory illness that can be transmitted from person-to-person. Reported cases have resulted in mild to severe illness as well as death. Symptoms, such as fever, cough, and shortness of breath, may appear 2 to 14 days after exposure. There is currently no vaccine or treatment for COVID-19, but medical care can relieve the symptoms. On January 30, 2020, the World Health Organization declared the recent outbreak of COVID-19 to be a public health emergency of international concern. On January 31, 2020, the federal Department of Health and Human Services declared a public health emergency for the United States. On February 29, 2020, the Governor issued a proclamation to declare a state of emergency in all counties of Washington and directed state agencies to take all reasonable measures to assist affected local governments to respond to and recover from the COVID-19 outbreak.

Nursing Facility Rate Methodology. Medicaid rates paid to nursing facilities are unique to each facility and reflect each facility's mix of Medicaid payors and resident acuity levels. The nursing facility payment rate system consists of three primary components—direct care, indirect care, and capital. The direct care component represents nursing and related care provided to residents, including food, laundry, and dietary services. The indirect care rate component includes administrative expenses, maintenance costs, tax reimbursements, and housekeeping services. Rates are based on cost reports submitted by nursing facilities to the Department of Social and Health Services (DSHS) at the end of each calendar year. The direct and indirect care rate components are rebased in odd-numbered state fiscal years using cost reports submitted by nursing facilities for the period two calendar years previous. The statewide weighted average daily rate is identified in the operating budget and is also known as the budget dial. DSHS is authorized to reduce rates proportionally to all nursing facilities if the budget dial is exceeded in a fiscal year.

Summary of Amended Bill: The sum of \$100 million is appropriated from the Budget Stabilization Account to the Disaster Response Account. The Office of Financial Management (OFM) is appropriated \$100 million from the Disaster Response Account and

\$25 million from General Fund-Federal for allotment to state agencies and distribution to local governments and federally recognized tribes for response to the COVID-19 outbreak pursuant the Governor's declaration of emergency on February 29, 2020. The appropriation does not alter requirements to balance the budget.

OFM must provide monthly updates to the fiscal committees of the Legislature on spending from the appropriation. The funding may not supplant existing federal, state, or local funds for services and activities to assist in the response to COVID-19. State agencies, federally recognized tribes and local governments must maximize federal funds for COVID-19 response and recovery before seeking funds from the state appropriation and must remit to the state treasurer any federal payments received after having spent state funds. By July 1, 2021, OFM must certify to the state treasurer the amount of unobligated funds related to the appropriation and the state treasurer must transfer the money back to the Budget Stabilization Account.

Until June 30, 2021, DSHS may determine nursing facility payments to adequately resource facilities that are responding to a state of emergency declared by the Governor for the COVID-19 outbreak. The Medicaid payments must be determined by DSHS, as appropriate to respond to this state of emergency, and are exempt from the state's Medicaid methodology. Such nursing facility payments may not be included in the calculation of the annual statewide weighted average nursing facility payment rate.

Until June 30, 2021, an individual under quarantine or isolation during the novel coronavirus outbreak does not need to meet the requirement that an individual be able and available to work in order to be eligible to receive unemployment insurance benefits.

Appropriation: \$100 million from the Budget Stabilization Account is appropriated into the Disaster Response Account for spending by OFM.

Fiscal Note: Not requested.

Creates Committee/Commission/Task Force that includes Legislative members: No.

Effective Date: The bill contains an emergency clause and takes effect immediately.
