

SENATE BILL REPORT

SB 5138

As of February 5, 2019

Title: An act relating to aircraft registration.

Brief Description: Concerning aircraft registration.

Sponsors: Senators Honeyford and Wagoner.

Brief History:

Committee Activity: Transportation: 2/04/19.

Brief Summary of Bill

- Requires state registration of commercial drones
- Exempts certain non-residents from the aircraft registration fee.

SENATE COMMITTEE ON TRANSPORTATION

Staff: Hayley Gamble (786-7452)

Background: Aircraft Registration in Washington. Aircraft must be registered with the Washington State Department of Transportation (DOT) in January of each calendar year in which the aircraft is operated or based within Washington. The state registration fee is \$15 and is deposited into the Aeronautics Account. The Aeronautics account is used by the DOT Aviation Division for aviation related grants and activities. Aircraft that are specifically exempt from registration include:

- most commercial aircraft
- government aircraft
- foreign aircraft
- certain non-resident owned aircraft, and
- large private airplanes in Washington for repair, alteration, reconstruction, or storage for more than a year.

Unmanned aircraft, also know as drones, are not required to register in Washington.

Federal Registration. Aircraft must be registered with the Federal Aviation Authority (FAA). Renewals are required every three years and cost \$5. Federal regulations relating to drone

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not a part of the legislation nor does it constitute a statement of legislative intent.

registration have been in place in some form since 2015. Federal law requires drones used for recreation and weighing over 0.55 pounds to be registered with the FAA. Registration is \$5 for three years. Drones used for commercial purposes must also be registered and operators must hold a remote pilot certificate. In 2018, there were over 5000 non-hobbyist drones registered with the FAA and listed with a Washington address.

Airport Governance. The Pullman-Moscow Regional Airport is operated under a joint agreement with the city of Pullman, Washington and the city of Moscow, Idaho. The Dalles Municipal Airport is owned by the city of The Dalles, Oregon and Klickitat County, Washington.

Summary of Bill: Registration of Commercial Drones. Commercial unmanned aircraft must be registered with DOT and pay a \$15 annual fee. In the aeronautics chapter of the Revised Code of Washington "commercial" means an aircraft, manned or unmanned, that is used for compensation or hire.

Registration Exemption. Nonresident owners of aircraft kept at certain Washington airports are exempt from paying the Washington registration fee, if they provide proof of payment that all taxes, licenses, and registration fees required in their home-state have been paid. This registration exemption applies only to aircraft based at an airport jointly owned or operated by a municipal corporation or other governmental entity within Washington and another state.

Appropriation: None.

Fiscal Note: Available.

Creates Committee/Commission/Task Force that includes Legislative members: No.

Effective Date: Ninety days after adjournment of session in which bill is passed.

Staff Summary of Public Testimony: PRO: This adds drones to the list. For safety reasons it would be good to register commercial drones. WPA is in support of the changes to registration and the clarification on non-resident exemptions.

Persons Testifying: PRO: Senator Jim Honeyford, Prime Sponsor; John Dobson, Washington Pilots Association.

Persons Signed In To Testify But Not Testifying: No one.
