

SENATE BILL REPORT

SB 5653

As of January 10, 2022

Title: An act relating to changing the name of the commission on pesticide registration to the commission on integrated pest management.

Brief Description: Changing the name of the commission on pesticide registration to the commission on integrated pest management.

Sponsors: Senator Rolfes.

Brief History:

Committee Activity: Agriculture, Water, Natural Resources & Parks: 1/11/22.

Brief Summary of Bill

- Changes the name of the Commission on Pesticide Registration to the Commission on Integrated Pest Management.

SENATE COMMITTEE ON AGRICULTURE, WATER, NATURAL RESOURCES & PARKS

Staff: Karen Epps (786-7424)

Background: In 1995, the Commission on Pesticide Registration (Commission) was created to conduct studies concerning the registration of pesticides for minor crops and minor uses and the availability of pesticides for emergency uses, and establish a program for tracking the availability of pesticides for such crops and uses. Minor crops and minor uses are for crops and uses considered to be minor in the national context of registering pesticides. The Commission also assists agricultural organizations in providing funding, in-kind services, or materials for research, implementation, and demonstration of any aspect of integrated pest management and pesticide resistance management programs.

The Commission is made up of 12 voting members appointed by the director of the

Department of Agriculture. The Commission includes eight members from various agricultural industries, including tree fruit growers, hop growers, potato growers, wheat growers, vegetable and seed growers, berry growers, wine grape growers, and the nursery and landscape industry. The Commission also includes members from the forest protection industry, food processors, agricultural chemical industry, and professional pesticide applicators. There are also five non-voting members on the Commission representing state agencies including the Washington State departments of Agriculture, Health, Ecology, and Labor and Industries as well as Washington State University.

Integrated pest management is a strategy that uses various combinations of pest control methods, biological, cultural, and chemical, in a compatible manner to achieve satisfactory control and ensure favorable economic and environmental consequences.

Summary of Bill: The name of the Commission is changed to the Commission on Integrated Pest Management.

Appropriation: None.

Fiscal Note: Not requested.

Creates Committee/Commission/Task Force that includes Legislative members: No.

Effective Date: Ninety days after adjournment of session in which bill is passed.
