AN ACT Relating to journey level electrician certifications of competency; amending RCW 19.28.191; repealing RCW 19.28.195; and providing an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

Sec. 1. RCW 19.28.191 and 2020 c 153 s 26 are each amended to read as follows:

(1) Upon receipt of the application, the department shall review the application and determine whether the applicant is eligible to take an examination for the master journey level electrician, journey level electrician, master specialty electrician, or specialty electrician certificate of competency.

(a) To be eligible to take the examination for a master journey level electrician certificate of competency, the applicant must have possessed a valid journey level electrician certificate of competency for four years.

(b) To be eligible to take the examination for a master specialty electrician certificate of competency, the applicant must have possessed a valid specialty electrician certificate of competency, in the specialty applied for, for two years.

(c) To be eligible to take the examination for a journey level certificate of competency, the applicant must have (successfully)
(i) Successfully completed ((an)) the work experience and education requirements of an 8,000 hour electrical construction trade apprenticeship program approved under chapter 49.04 RCW ((or equivalent apprenticeship program approved by the department for the electrical construction trade in which the applicant worked in the electrical construction trade for a minimum of eight thousand hours)). Four thousand of the hours shall be new electrical installations in industrial or commercial ((electrical installation)) facilities under the supervision of a master journey level electrician or journey level electrician and not more than a total of ((four thousand)) 4,000 hours in all specialties under the supervision of a master journey level electrician, journey level electrician, master specialty electrician working in that electrician's specialty, or specialty electrician working in that electrician's specialty. Specialty electricians with less than a ((four thousand)) 4,000 hour work experience requirement cannot credit the time required to obtain that specialty towards qualifying to become a journey level electrician. The holder of a specialty electrician certificate of competency with a ((four thousand)) 4,000 hour work experience requirement shall be allowed to credit the work experience required to obtain that certificate towards apprenticeship requirements for qualifying to take the examination for a journey level electrician certificate of competency.

(ii) Successfully completed an 8,000 hour electrical construction trade apprenticeship program in another jurisdiction equivalent to an apprenticeship program approved under chapter 49.04 RCW. Four thousand of the hours shall be new electrical installations in industrial or commercial facilities;

(iii) At least 16,000 hours experience in the electrical construction trade installing and maintaining electrical wiring and equipment in another jurisdiction. Eight thousand of the hours shall be new electrical installations in industrial or commercial facilities; or

(iv) Eight thousand hours of experience in the electrical construction trade while serving in a construction battalion in the armed forces of the United States.

(d) To be eligible to take the examination for a specialty electrician certificate of competency, the applicant must have:

(i) Worked in the residential (as specified in WAC 296-46B-920(2)(a)), pump and irrigation (as specified in WAC 296-46B-920(2)(a)), pump and irrigation (as specified in WAC
296-46B-920(2)(b)), sign (as specified in WAC 296-46B-920(2)(d)), limited energy (as specified in WAC 296-46B-920(2)(e)), nonresidential maintenance (as specified in WAC 296-46B-920(2)(g)), or other new nonresidential specialties as determined by the department in rule under the supervision of a master journey level electrician, journey level electrician, master specialty electrician working in that electrician's specialty, or specialty electrician working in that electrician's specialty for a minimum of ((four thousand)) 4,000 hours;

(ii) Worked in the appliance repair specialty as determined by the department in rule, restricted nonresidential maintenance as determined by the department in rule, the equipment repair specialty as determined by the department in rule, the pump and irrigation specialty other than as defined by (d)(i) of this subsection or domestic pump specialty as determined by the department in rule, or a specialty other than the designated specialties in (d)(i) of this subsection for a minimum of the initial ninety days, or longer if set by rule by the department. The restricted nonresidential maintenance specialty is limited to a maximum of 277 volts and 20 amperes for lighting branch circuits and/or a maximum of 250 volts and 60 amperes for other circuits excluding the replacement or repair of circuit breakers. The department may alter the scope of work for the restricted nonresidential maintenance specialty by rule. The initial period must be spent under one hundred percent supervision of a master journey level electrician, journey level electrician, master specialty electrician working in that electrician's specialty, or specialty electrician working in that electrician's specialty. After this initial period, a person may take the specialty examination. If the person passes the examination, the person may work unsupervised for the balance of the minimum hours required for certification. A person may not be certified as a specialty electrician in the appliance repair specialty or in a specialty other than the designated specialties in (d)(i) of this subsection, however, until the person has worked a minimum of ((two thousand)) 2,000 hours in that specialty, or longer if set by rule by the department;

(iii) Successfully completed an approved apprenticeship program under chapter 49.04 RCW for the applicant's specialty in the electrical construction trade; or

(iv) In meeting the training requirements for the pump and irrigation or domestic pump specialties, the individual shall be...
allowed to obtain the experience required by this section at the same

time the individual is meeting the experience required by RCW
18.106.040(1)(d). After meeting the training requirements provided in
this section, the individual may take the examination and upon
passing the examination, meeting additional training requirements as
may still be required for those seeking a pump and irrigation, or a
domestic pump specialty certificate as defined by rule, and paying
the applicable fees, the individual must be issued the appropriate
certificate. The department may include an examination for specialty
plumbing certificate defined in RCW 18.106.010(14)(c) with the
examination required by this section. The department, by rule and in
consultation with the electrical board, may establish additional
equivalent ways to gain the experience requirements required by this
subsection. The department shall establish a single document for
those who have received both an electrical specialty certification as
defined by this subsection and have also met the certification
requirements for the specialty plumber as defined by RCW
18.106.010(14)(c), showing that the individual has received both
certifications. No other experience or training requirements may be
imposed.

(e) Any applicant for a journey level electrician certificate of
competency who has successfully completed a two-year program in the
electrical construction trade at public community or technical
colleges, or not-for-profit nationally accredited technical or trade
schools licensed by the workforce training and education coordinating
board under chapter 28C.10 RCW, may substitute up to two years of the
technical or trade school program for two years of work experience
under a master journey level electrician or journey level electrician
required under the apprenticeship program. The applicant shall obtain
the additional two years of work experience required in industrial or
commercial electrical installation prior to the beginning, or after
the completion, of the technical school program. Any applicant who
has received training in the electrical construction trade in the
armed service of the United States may be eligible to apply armed
service work experience towards qualification to complete an
apprenticeship and take the examination for the journey level
electrician certificate of competency.

(f) An applicant for a specialty electrician certificate of
competency who, after January 1, 2000, has successfully completed a
two-year program in the electrical construction trade at a public
community or technical college, or a not-for-profit nationally accredited technical or trade school licensed by the workforce training and education coordinating board under chapter 28C.10 RCW, may substitute up to one year of the technical or trade school program for one year of work experience under a master journey level electrician, journey level electrician, master specialty electrician working in that electrician's specialty, or specialty electrician working in that electrician's specialty. Any applicant who has received training in the electrical construction trade in the armed services of the United States may be eligible to apply armed service work experience towards qualification to take the examination for an appropriate specialty electrician certificate of competency.

(g) The department must determine whether hours of training and experience in the armed services or school program are in the electrical construction trade and appropriate as a substitute for hours of work experience. The department must use the following criteria for evaluating the equivalence of classroom electrical training programs and work in the electrical construction trade:

(i) A two-year electrical training program must consist of three thousand or more hours.

(ii) In a two-year electrical training program, a minimum of twenty thousand four hundred hours of student/instructor contact time must be technical electrical instruction directly related to the scope of work of the electrical specialty. Student/instructor contact time includes lecture and in-school lab.

(iii) The department may not allow credit for a program that accepts more than one thousand hours transferred from another school's program.

(iv) Electrical specialty training school programs of less than two years will have all of the above student/instructor contact time hours proportionately reduced. Such programs may not apply to more than fifty percent of the work experience required to attain certification.

(v) Electrical training programs of less than two years may not be credited towards qualification for journey level electrician unless the training program is used to gain qualification for a four thousand hour electrical specialty.

(h) No other requirement for eligibility may be imposed.

(2) The department shall establish reasonable rules for the examinations to be given applicants for certificates of competency.
In establishing the rules, the department shall consult with the board. Upon determination that the applicant is eligible to take the examination, the department shall so notify the applicant, indicating instructions for taking the examination.

(3) No noncertified individual may work unsupervised more than one year beyond the date when the trainee would be eligible to test for a certificate of competency if working on a full-time basis after original application for the trainee certificate. For the purposes of this section, "full-time basis" means two thousand hours.

NEW SECTION. Sec. 2. RCW 19.28.195 (Examination—Exception for equivalent training and experience) and 2018 c 249 s 4 are each repealed.

NEW SECTION. Sec. 3. Section 1 of this act takes effect July 1, 2023.

--- END ---
