AN ACT Relating to certain traffic safety improvements; amending 1
RCW 46.61.415, 46.61.405, 46.63.170, and 46.63.170; reenacting and 2
amending RCW 46.61.250; providing an effective date; and providing an 3
expiration date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

Sec. 1. RCW 46.61.415 and 2013 c 264 s 1 are each amended to 6
read as follows:

(1) Whenever local authorities in their respective jurisdictions 7
determine on the basis of an engineering and traffic investigation 8
that the maximum speed permitted under RCW 46.61.400 or 46.61.440 is 9
greater or less than is reasonable and safe under the conditions 10
found to exist upon a highway or part of a highway, the local 11
authority may determine and declare a reasonable and safe maximum 12
limit thereon which 13

(a) Decreases the limit at intersections; or 14

(b) Increases the limit but not to more than ((sixty)) 60 miles 15
per hour; or 16

(c) Decreases the limit but not to less than ((twenty)) 20 miles 17
per hour.

(2) Local authorities in their respective jurisdictions shall 20
determine by an engineering and traffic investigation the proper
maximum speed for all arterial streets and shall declare a reasonable
and safe maximum limit thereon which may be greater or less than the
maximum speed permitted under RCW 46.61.400(2) but shall not exceed
((sixty)) 60 miles per hour.

(3)(a) ((Cities and towns)) Local authorities in their respective
jurisdictions may establish a maximum speed limit of ((twenty)) 20
miles per hour on a nonarterial highway((r)) or part of a nonarterial
highway((r), that is within a residence district or business
district)).

(b) A speed limit established under this subsection by a ((city
or town)) local authority does not need to be determined on the basis
of an engineering and traffic investigation if the ((city or town))
local authority has developed procedures regarding establishing a
maximum speed limit under this subsection. Any speed limit
established under this subsection may be canceled within one year of
its establishment, and the previous speed limit reestablished,
without an engineering and traffic investigation. This subsection
does not otherwise affect the requirement that ((cities and towns))
local authorities conduct an engineering and traffic investigation to
determine whether to increase speed limits.

(c) When establishing speed limits under this subsection,
((cities and towns)) local authorities shall consult the manual on
uniform traffic control devices as adopted by the Washington state
department of transportation.

(4) The secretary of transportation is authorized to establish
speed limits on county roads and city and town streets as shall be
necessary to conform with any federal requirements which are a
prescribed condition for the allocation of federal funds to the
state.

(5) Any altered limit established as hereinbefore authorized
shall be effective when appropriate signs giving notice thereof are
erected. Such maximum speed limit may be declared to be effective at
all times or at such times as are indicated upon such signs; and
differing limits may be established for different times of day,
different types of vehicles, varying weather conditions, and other
factors bearing on safe speeds, which shall be effective when posted
upon appropriate fixed or variable signs.

(6) Any alteration of maximum limits on state highways within
incorporated cities or towns by local authorities shall not be
effective until such alteration has been approved by the secretary of transportation.

Sec. 2. RCW 46.61.405 and 1987 c 397 s 3 are each amended to read as follows:

(1) Whenever the secretary of transportation shall determine upon the basis of an engineering and traffic investigation that any maximum speed hereinbefore set forth is greater than is reasonable or safe with respect to a state highway under the conditions found to exist at any intersection or upon any other part of the state highway system or at state ferry terminals, or that a general reduction of any maximum speed set forth in RCW 46.61.400 is necessary in order to comply with a national maximum speed limit, the secretary may determine and declare a reasonable and safe lower maximum limit or a lower maximum limit which will comply with a national maximum speed limit, for any state highway, the entire state highway system, or any portion thereof, which shall be effective when appropriate signs giving notice thereof are erected. The secretary may also fix and regulate the speed of vehicles on any state highway within the maximum speed limit allowed by this chapter for special occasions including, but not limited to, local parades and other special events. Any such maximum speed limit may be declared to be effective at all times or at such times as are indicated upon the said signs; and differing limits may be established for different times of day, different types of vehicles, varying weather conditions, and other factors bearing on safe speeds, which shall be effective (a) when posted upon appropriate fixed or variable signs or (b) if a maximum limit is established for auto stages which is lower than the limit for automobiles, the auto stage speed limit shall become effective thirty days after written notice thereof is mailed in the manner provided in subsection (4) of RCW 46.61.410(4), as now or hereafter amended.

(2) The secretary of transportation may establish a maximum speed limit of 20 miles per hour on a nonarterial state highway, or part of a nonarterial state highway, without a determination made on the basis of an engineering and traffic investigation, subject to the conditions described in RCW 46.61.415(3).

Sec. 3. RCW 46.61.250 and 2019 c 403 s 9 and 2019 c 214 s 14 are each reenacted and amended to read as follows:
(1) Where sidewalks are provided and are accessible, it is unlawful for any pedestrian to walk or otherwise move along and upon an adjacent roadway. Where sidewalks are provided but wheelchair access is not available, persons with disabilities who require such access may walk or otherwise move along and upon an adjacent roadway until they reach an access point in the sidewalk.

(2) Where sidewalks are not provided or are inaccessible, a pedestrian walking or otherwise moving along and upon a highway, and any personal delivery device moving along and upon a highway, shall:

(a) When shoulders are provided and are accessible, walk or move on the shoulder of the roadway as far as is practicable from the edge of the roadway, facing traffic when a shoulder is available in this direction; or

(b) When shoulders are not provided or are inaccessible, walk or move as near as is practicable to the outside edge of the roadway facing traffic, and when practicable, move clear of the roadway upon meeting an oncoming vehicle.

(3) A pedestrian traveling to the nearest emergency reporting device on a one-way roadway of a controlled access highway is not required to travel facing traffic as otherwise required by subsection (2) of this section.

(4) When walking or otherwise moving along and upon an adjacent roadway, a pedestrian shall exercise due care to avoid colliding with any vehicle upon the roadway.

(5) Subsections (1) and (2) of this section do not apply when the roadway is duly closed to vehicular traffic by placement of official traffic control devices for the sole purposes of pedestrian and bicyclist use of the roadway.

Sec. 4. RCW 46.63.170 and 2020 c 224 s 1 are each amended to read as follows:

(1) The use of automated traffic safety cameras for issuance of notices of infraction is subject to the following requirements:

(a) Except for proposed locations used solely for the pilot program purposes permitted under subsection (6) of this section, the appropriate local legislative authority must prepare an analysis of the locations within the jurisdiction where automated traffic safety cameras are proposed to be located: (i) Before enacting an ordinance allowing for the initial use of automated traffic safety cameras; and (ii) before adding additional cameras or relocating any existing
camera to a new location within the jurisdiction. Automated traffic safety cameras may be used to detect one or more of the following: Stoplight, railroad crossing, or school speed zone violations and speed violations on any roadway identified in a school walk area as defined in RCW 28A.160.160; speed violations subject to (c) of this subsection; or violations included in subsection (6) of this section for the duration of the pilot program authorized under subsection (6) of this section. At a minimum, the local ordinance must contain the restrictions described in this section and provisions for public notice and signage. Cities and counties using automated traffic safety cameras before July 24, 2005, are subject to the restrictions described in this section, but are not required to enact an authorizing ordinance. Beginning one year after June 7, 2012, cities and counties using automated traffic safety cameras must post an annual report of the number of traffic accidents that occurred at each location where an automated traffic safety camera is located as well as the number of notices of infraction issued for each camera and any other relevant information about the automated traffic safety cameras that the city or county deems appropriate on the city's or county's website.

(b) Except as provided in (c) of this subsection and subsection (6) of this section, use of automated traffic safety cameras is restricted to the following locations only: (i) Intersections of two or more arterials with traffic control signals that have yellow change interval durations in accordance with RCW 47.36.022, which interval durations may not be reduced after placement of the camera; (ii) railroad crossings; and (iii) school speed zones and roadways identified in a school walk area as defined in RCW 28A.160.160.

(c) Any city west of the Cascade mountains with a population of more than (one hundred ninety-five thousand)) 195,000 located in a county with a population of fewer than (one million five hundred thousand)) 1,500,000 may operate an automated traffic safety camera to detect speed violations subject to the following limitations:

(i) A city may only operate one such automated traffic safety camera within its respective jurisdiction; and

(ii) The use and location of the automated traffic safety camera must have first been authorized by the Washington state legislature as a pilot project for at least one full year.

(d) Automated traffic safety cameras may only take pictures of the vehicle and vehicle license plate and only while an infraction is
occurring. The picture must not reveal the face of the driver or of
passengers in the vehicle. The primary purpose of camera placement is
to take pictures of the vehicle and vehicle license plate when an
infraction is occurring. Cities and counties shall consider
installing cameras in a manner that minimizes the impact of camera
flash on drivers.

(e) A notice of infraction must be mailed to the registered owner
of the vehicle within ((fourteen)) 14 days of the violation, or to
the renter of a vehicle within ((fourteen)) 14 days of establishing
the renter's name and address under subsection (3)(a) of this
section. The law enforcement officer issuing the notice of infraction
shall include with it a certificate or facsimile thereof, based upon
inspection of photographs, microphotographs, or electronic images
produced by an automated traffic safety camera, stating the facts
supporting the notice of infraction. This certificate or facsimile is
prima facie evidence of the facts contained in it and is admissible
in a proceeding charging a violation under this chapter. The
photographs, microphotographs, or electronic images evidencing the
violation must be available for inspection and admission into
evidence in a proceeding to adjudicate the liability for the
infraction. A person receiving a notice of infraction based on
evidence detected by an automated traffic safety camera may respond
to the notice by mail.

(f) The registered owner of a vehicle is responsible for an
infraction under RCW 46.63.030(1)(d) unless the registered owner
overcomes the presumption in RCW 46.63.075, or, in the case of a
rental car business, satisfies the conditions under subsection (3) of
this section. If appropriate under the circumstances, a renter
identified under subsection (3)(a) of this section is responsible for
an infraction.

(g) Notwithstanding any other provision of law, all photographs,
microphotographs, or electronic images, or any other personally
identifying data prepared under this section are for the exclusive
use of law enforcement in the discharge of duties under this section
and are not open to the public and may not be used in a court in a
pending action or proceeding unless the action or proceeding relates
to a violation under this section. No photograph, microphotograph, or
electronic image, or any other personally identifying data may be
used for any purpose other than enforcement of violations under this
section nor retained longer than necessary to enforce this section.
(h) All locations where an automated traffic safety camera is used must be clearly marked at least thirty (30) days prior to activation of the camera by placing signs in locations that clearly indicate to a driver that he or she is entering a zone where traffic laws are enforced by an automated traffic safety camera. Signs placed in automated traffic safety camera locations after June 7, 2012, must follow the specifications and guidelines under the manual of uniform traffic control devices for streets and highways as adopted by the department of transportation under chapter 47.36 RCW.

(i) If a county or city has established an authorized automated traffic safety camera program under this section, the compensation paid to the manufacturer or vendor of the equipment used must be based only upon the value of the equipment and services provided or rendered in support of the system, and may not be based upon a portion of the fine or civil penalty imposed or the revenue generated by the equipment.

(2) Infractions detected through the use of automated traffic safety cameras are not part of the registered owner's driving record under RCW 46.52.101 and 46.52.120. Additionally, infractions generated by the use of automated traffic safety cameras under this section shall be processed in the same manner as parking infractions, including for the purposes of RCW 3.50.100, 35.20.220, 46.16A.120, and 46.20.270(2). Except as provided otherwise in subsection (6) of this section, the amount of the fine issued for an infraction generated through the use of an automated traffic safety camera shall not exceed the amount of a fine issued for other parking infractions within the jurisdiction. However, the amount of the fine issued for a traffic control signal violation detected through the use of an automated traffic safety camera shall not exceed the monetary penalty for a violation of RCW 46.61.050 as provided under RCW 46.63.110, including all applicable statutory assessments.

(3) If the registered owner of the vehicle is a rental car business, the law enforcement agency shall, before a notice of infraction being issued under this section, provide a written notice to the rental car business that a notice of infraction may be issued to the rental car business if the rental car business does not, within eighteen (18) days of receiving the written notice, provide to the issuing agency by return mail:
(a) A statement under oath stating the name and known mailing address of the individual driving or renting the vehicle when the infraction occurred; or

(b) A statement under oath that the business is unable to determine who was driving or renting the vehicle at the time the infraction occurred because the vehicle was stolen at the time of the infraction. A statement provided under this subsection must be accompanied by a copy of a filed police report regarding the vehicle theft; or

(c) In lieu of identifying the vehicle operator, the rental car business may pay the applicable penalty.

Timely mailing of this statement to the issuing law enforcement agency relieves a rental car business of any liability under this chapter for the notice of infraction.

(4) Nothing in this section prohibits a law enforcement officer from issuing a notice of traffic infraction to a person in control of a vehicle at the time a violation occurs under RCW 46.63.030(1) (a), (b), or (c).

(5)(a) For the purposes of this section, "automated traffic safety camera" means a device that uses a vehicle sensor installed to work in conjunction with an intersection traffic control system, a railroad grade crossing control system, or a speed measuring device, and a camera synchronized to automatically record one or more sequenced photographs, microphotographs, or electronic images of the rear of a motor vehicle at the time the vehicle fails to stop when facing a steady red traffic control signal or an activated railroad grade crossing control signal, or exceeds a speed limit as detected by a speed measuring device.

(b) For the purposes of the pilot program authorized under subsection (6) of this section, "automated traffic safety camera" also includes a device used to detect stopping at intersection or crosswalk violations; stopping when traffic obstructed violations; public transportation only lane violations; and stopping or traveling in restricted lane violations. The device, including all technology defined under "automated traffic safety camera," must not reveal the face of the driver or the passengers in vehicles, and must not use any facial recognition technology in real time or after capturing any information. If the face of any individual in a crosswalk or otherwise within the frame is incidentally captured, it may not be made available to the public nor used for any purpose including, but
not limited to, any law enforcement action, except in a pending action or proceeding related to a violation under this section.

(6)(a)(i) A city with a population greater than ((five hundred thousand)) 500,000 may adopt an ordinance creating a pilot program authorizing automated traffic safety cameras to be used to detect one or more of the following violations: Stopping when traffic obstructed violations; stopping at intersection or crosswalk violations; public transportation only lane violations; and stopping or traveling in restricted lane violations. Under the pilot program, stopping at intersection or crosswalk violations may only be enforced at the twenty intersections where the city would most like to address safety concerns related to stopping at intersection or crosswalk violations. At a minimum, the local ordinance must contain the restrictions described in this section and provisions for public notice and signage.

(ii) Except where specifically exempted, all of the rules and restrictions applicable to the use of automated traffic safety cameras in this section apply to the use of automated traffic safety cameras in the pilot program established in this subsection (6).

(iii) As used in this subsection (6), "public transportation vehicle" means any motor vehicle, streetcar, train, trolley vehicle, ferry boat, or any other device, vessel, or vehicle that is owned or operated by a transit authority or an entity providing service on behalf of a transit authority that is used for the purpose of carrying passengers and that operates on established routes. "Transit authority" has the meaning provided in RCW 9.91.025.

(b) Use of automated traffic safety cameras as authorized in this subsection (6) is restricted to the following locations only: Locations authorized in subsection (1)(b) of this section; and midblock on arterials. Additionally, the use of automated traffic safety cameras as authorized in this subsection (6) is further limited to the following:

(i) The portion of state and local roadways in downtown areas of the city used for office and commercial activities, as well as retail shopping and support services, and that may include mixed residential uses;

(ii) The portion of state and local roadways in areas in the city within one-half mile north of the boundary of the area described in (b)(i) of this subsection;
(iii) Portions of roadway systems in the city that travel into and out of (b)(ii) of this subsection that are designated by the Washington state department of transportation as noninterstate freeways for up to four miles; and

(iv) Portions of roadway systems in the city connected to the portions of the noninterstate freeways identified in (b)(iii) of this subsection that are designated by the Washington state department of transportation as arterial roadways for up to one mile from the intersection of the arterial roadway and the noninterstate freeway.

(c) However, automated traffic safety cameras may not be used on an on-ramp to an interstate.

(d) From June 11, 2020, through December 31, 2020, a warning notice with no penalty must be issued to the registered owner of the vehicle for a violation generated through the use of an automated traffic safety camera authorized in this subsection (6). Beginning January 1, 2021, a notice of infraction must be issued, in a manner consistent with subsections (1)(e) and (3) of this section, for a violation generated through the use of an automated traffic safety camera authorized in this subsection (6). However, the penalty for the violation may not exceed $75.

(e) For infractions issued as authorized in this subsection (6), a city with a pilot program shall remit monthly to the state 50 percent of the noninterest money received under this subsection (6) in excess of the cost to install, operate, and maintain the automated traffic safety cameras for use in the pilot program. Money remitted under this subsection to the state treasurer shall be deposited in the Cooper Jones active transportation safety account created in RCW 46.68.480. The remaining 50 percent retained by the city must be used only for improvements to transportation that support equitable access and mobility for persons with disabilities.

(f) A transit authority may not take disciplinary action, regarding a warning or infraction issued pursuant to this subsection (6), against an employee who was operating a public transportation vehicle at the time the violation that was the basis of the warning or infraction was detected.

(g) A city that implements a pilot program under this subsection (6) must provide a preliminary report to the transportation committees of the legislature by June 30, 2022, and a final report by January 1, 2023, on the pilot program that includes the locations
chosen for the automated traffic safety cameras used in the pilot program, the number of warnings and traffic infractions issued under the pilot program, the number of traffic infractions issued with respect to vehicles registered outside of the county in which the city is located, the infrastructure improvements made using the penalty moneys as required under (e) of this subsection, an equity analysis that includes any disproportionate impacts, safety, and on-time performance statistics related to the impact on driver behavior of the use of automated traffic safety cameras in the pilot program, and any recommendations on the use of automated traffic safety cameras to enforce the violations that these cameras were authorized to detect under the pilot program.

Sec. 5. RCW 46.63.170 and 2015 3rd sp.s. c 44 s 406 are each amended to read as follows:

(1) The use of automated traffic safety cameras for issuance of notices of infraction is subject to the following requirements:

(a) The appropriate local legislative authority must prepare an analysis of the locations within the jurisdiction where automated traffic safety cameras are proposed to be located: (i) Before enacting an ordinance allowing for the initial use of automated traffic safety cameras; and (ii) before adding additional cameras or relocating any existing camera to a new location within the jurisdiction. Automated traffic safety cameras may be used to detect one or more of the following: Stoplight, railroad crossing, or school speed zone violations and speed violations on any roadway identified in a school walk area as defined in RCW 28A.160.160; or speed violations subject to (c) of this subsection. At a minimum, the local ordinance must contain the restrictions described in this section and provisions for public notice and signage. Cities and counties using automated traffic safety cameras before July 24, 2005, are subject to the restrictions described in this section, but are not required to enact an authorizing ordinance. Beginning one year after June 7, 2012, cities and counties using automated traffic safety cameras must post an annual report of the number of traffic accidents that occurred at each location where an automated traffic safety camera is located as well as the number of notices of infraction issued for each camera and any other relevant information about the automated traffic safety cameras that the city or county deems appropriate on the city's or county's website.
(b) Except as provided in (c) of this subsection, use of automated traffic safety cameras is restricted to the following locations only: (i) Intersections of two arterials with traffic control signals that have yellow change interval durations in accordance with RCW 47.36.022, which interval durations may not be reduced after placement of the camera; (ii) railroad crossings; and (iii) school speed zones and roadways identified in a school walk area as defined in RCW 28A.160.160.

(c) Any city west of the Cascade mountains with a population of more than \((\text{one hundred ninety-five thousand}) \ 195,000\) located in a county with a population of fewer than \((\text{one million five hundred thousand}) \ 1,500,000\) may operate an automated traffic safety camera to detect speed violations subject to the following limitations:

(i) A city may only operate one such automated traffic safety camera within its respective jurisdiction; and

(ii) The use and location of the automated traffic safety camera must have first been authorized by the Washington state legislature as a pilot project for at least one full year.

(d) Automated traffic safety cameras may only take pictures of the vehicle and vehicle license plate and only while an infraction is occurring. The picture must not reveal the face of the driver or of passengers in the vehicle. The primary purpose of camera placement is to take pictures of the vehicle and vehicle license plate when an infraction is occurring. Cities and counties shall consider installing cameras in a manner that minimizes the impact of camera flash on drivers.

(e) A notice of infraction must be mailed to the registered owner of the vehicle within \((\text{fourteen}) \ 14\) days of the violation, or to the renter of a vehicle within \((\text{fourteen}) \ 14\) days of establishing the renter's name and address under subsection (3)(a) of this section. The law enforcement officer issuing the notice of infraction shall include with it a certificate or facsimile thereof, based upon inspection of photographs, microphotographs, or electronic images produced by an automated traffic safety camera, stating the facts supporting the notice of infraction. This certificate or facsimile is prima facie evidence of the facts contained in it and is admissible in a proceeding charging a violation under this chapter. The photographs, microphotographs, or electronic images evidencing the violation must be available for inspection and admission into evidence in a proceeding to adjudicate the liability for the
infraction. A person receiving a notice of infraction based on evidence detected by an automated traffic safety camera may respond to the notice by mail.

(f) The registered owner of a vehicle is responsible for an infraction under RCW 46.63.030(1)(d) unless the registered owner overcomes the presumption in RCW 46.63.075, or, in the case of a rental car business, satisfies the conditions under subsection (3) of this section. If appropriate under the circumstances, a renter identified under subsection (3)(a) of this section is responsible for an infraction.

(g) Notwithstanding any other provision of law, all photographs, microphotographs, or electronic images prepared under this section are for the exclusive use of law enforcement in the discharge of duties under this section and are not open to the public and may not be used in a court in a pending action or proceeding unless the action or proceeding relates to a violation under this section. No photograph, microphotograph, or electronic image may be used for any purpose other than enforcement of violations under this section nor retained longer than necessary to enforce this section.

(h) All locations where an automated traffic safety camera is used must be clearly marked at least thirty (30) days prior to activation of the camera by placing signs in locations that clearly indicate to a driver that he or she is entering a zone where traffic laws are enforced by an automated traffic safety camera. Signs placed in automated traffic safety camera locations after June 7, 2012, must follow the specifications and guidelines under the manual of uniform traffic control devices for streets and highways as adopted by the department of transportation under chapter 47.36 RCW.

(i) If a county or city has established an authorized automated traffic safety camera program under this section, the compensation paid to the manufacturer or vendor of the equipment used must be based only upon the value of the equipment and services provided or rendered in support of the system, and may not be based upon a portion of the fine or civil penalty imposed or the revenue generated by the equipment.

(2) Infractions detected through the use of automated traffic safety cameras are not part of the registered owner's driving record under RCW 46.52.101 and 46.52.120. Additionally, infractions generated by the use of automated traffic safety cameras under this section shall be processed in the same manner as parking infractions,
including for the purposes of RCW 3.50.100, 35.20.220, 46.16A.120, and 46.20.270(2). The amount of the fine issued for an infraction generated through the use of an automated traffic safety camera shall not exceed the amount of a fine issued for other parking infractions within the jurisdiction. However, the amount of the fine issued for a traffic control signal violation detected through the use of an automated traffic safety camera shall not exceed the monetary penalty for a violation of RCW 46.61.050 as provided under RCW 46.63.110, including all applicable statutory assessments.

(3) If the registered owner of the vehicle is a rental car business, the law enforcement agency shall, before a notice of infraction being issued under this section, provide a written notice to the rental car business that a notice of infraction may be issued to the rental car business if the rental car business does not, within ((eighteen)) 18 days of receiving the written notice, provide to the issuing agency by return mail:

(a) A statement under oath stating the name and known mailing address of the individual driving or renting the vehicle when the infraction occurred; or

(b) A statement under oath that the business is unable to determine who was driving or renting the vehicle at the time the infraction occurred because the vehicle was stolen at the time of the infraction. A statement provided under this subsection must be accompanied by a copy of a filed police report regarding the vehicle theft; or

(c) In lieu of identifying the vehicle operator, the rental car business may pay the applicable penalty.

Timely mailing of this statement to the issuing law enforcement agency relieves a rental car business of any liability under this chapter for the notice of infraction.

(4) Nothing in this section prohibits a law enforcement officer from issuing a notice of traffic infraction to a person in control of a vehicle at the time a violation occurs under RCW 46.63.030(1) (a), (b), or (c).

(5) For the purposes of this section, "automated traffic safety camera" means a device that uses a vehicle sensor installed to work in conjunction with an intersection traffic control system, a railroad grade crossing control system, or a speed measuring device, and a camera synchronized to automatically record one or more sequenced photographs, microphotographs, or electronic images of the

p. 14  SB 5687
rear of a motor vehicle at the time the vehicle fails to stop when facing a steady red traffic control signal or an activated railroad grade crossing control signal, or exceeds a speed limit as detected by a speed measuring device.

NEW SECTION.  Sec. 6.  Section 4 of this act expires June 30, 2023.

NEW SECTION.  Sec. 7.  Section 5 of this act takes effect June 30, 2023.
