SENATE BILL REPORT HB 1020

As Passed Senate - Amended, April 12, 2023

Title: An act relating to the state dinosaur.

Brief Description: Designating the Suciasaurus rex as the official dinosaur of the state of Washington.

Sponsors: Representatives Morgan, Callan, Ryu, Simmons, Reed, Gregerson, Thai and Ormsby.

Brief History: Passed House: 2/20/23, 88-5.

Committee Activity: State Government & Elections: 3/17/23, 3/24/23 [DPA, DNP,

w/oRec].

Floor Activity: Passed Senate - Amended: 4/12/23, 39-10.

Brief Summary of Bill (As Amended by Senate)

• Establishes the *Suciasaurus rex* as the Washington State dinosaur.

SENATE COMMITTEE ON STATE GOVERNMENT & ELECTIONS

Majority Report: Do pass as amended.

Signed by Senators Hunt, Chair; Valdez, Vice Chair; Wilson, J., Ranking Member; Hasegawa and Kuderer.

Minority Report: Do not pass.

Signed by Senator Fortunato.

Minority Report: That it be referred without recommendation.

Signed by Senator Dozier.

Staff: Megan Tudor (786-7478)

Senate Bill Report - 1 - HB 1020

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not part of the legislation nor does it constitute a statement of legislative intent.

Background: Mesozoic Era. In a land before time, between approximately 245 and 66 million years ago dinosaurs thrived on Earth. This time was designated as the Mesozoic Era and is divided into three distinct periods; Triassic, Jurassic and Cretaceous. During the Cretaceous period, between approximately 145 to 66 million years ago, dinosaur diversity increased rapidly to include one of the most well-known theropods, the Tyrannosaurus rex. Theropods are two-legged carnivores such as Tyrannosaurus and Velociraptor that likely paved the way for modern birds.

The Suciasaurus and Washington. On April 10, 2012, a dinosaur fossil was discovered by two Burke Museum research associates on the shores of Sucia Island State Park in the San Juan Islands. This fossil was identified as a partial femur bone from a theropod dinosaur that lived approximately 80 million years ago, in the late Cretaceous period. It took almost a year to fully excavate the section of fossil from the surrounding rock and re-attach the pieces. The fossil is 16.7 inches long, which the Burke Museum estimates would have been part of a femur measuring more than three feet in length. The area of Sucia Island where the fossil was recovered is from shallow marine rocks of the Cedar District Formation. Presence of fossilized clams lead scientists to estimate the approximate location of where the theropod died to be between Baja California, Mexico, or Northern California. The exact designation of theropod is unknown, yet evidence suggests it may be a species similar to Daspletosaurus. The theropod fossil has been nicknamed the *Suciasaurus rex* in recognition of the island where it was discovered.

Washington is the 37th state to have found a dinosaur fossil. Twelve states and Washington D.C. have designated official state dinosaurs.

Summary of Amended Bill: The *Suciasaurus rex* is the state dinosaur of Washington.

Appropriation: None.

Fiscal Note: Not requested.

Creates Committee/Commission/Task Force that includes Legislative members: No.

Effective Date: Ninety days after adjournment of session in which bill is passed.

Staff Summary of Public Testimony on House Bill: The committee recommended a different version of the bill than what was heard. PRO: A group of 4th grade students from Elmhurst Elementary contacted the sponsor's office with a proposal based on their research, asking that the Suciasaurus rex officially become a state symbol. This bill has run in the past with bipartisan support. It is important to engage students in the civic process and incorporate learning how to connect with decision makers. These students have testified on the bill and stayed interested in its progress since 2020. It is important we show everything we can be proud of that comes from and represents Washington State. This bill has no fiscal impact, would increase tourism, and could help bring dollars back to the state. The

Suciasaurus rex project taught students about flexibility and research, and shows that hard work can pay off. Students were able to meet with and learn directly from the Burke Museum as part of this process. The passage of this bill will show other people and children that anything is possible.

Persons Testifying: PRO: Representative Melanie Morgan, Prime Sponsor; Miles Garver; zanual king, NORTH MASON SCHOOL DISTRICT MIDDLE SCHOOL STUDENT; Jennifer Loughrey; Athena Tauscher; Amy Cole, Elmhurst Elementary; Owen Rowe, Washington State Parks and Recreation Commission, Policy and Governmental Affairs Director.

Persons Signed In To Testify But Not Testifying: No one.
