ENGROSSED HOUSE BILL 2575

State of Washington 69th Legislature 2026 Regular Session

By Representatives Hall, Doglio, Parshley, Stearns, and Duerr

Read first time 01/19/26. Referred to Committee on Environment & Energy.

AN ACT Relating to reducing certain reporting obligations under environmental or energy laws; amending RCW 19.285.070, 43.21F.045, 23.86.405, 24.06.605, 35.21.302, 54.16.285, 57.08.081, 80.28.010, and 87.03.015; and repealing RCW 19.280.060.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

Sec. 1. RCW 19.285.070 and 2007 c 1 s 7 are each amended to read as follows:

(1)(a) On or before June 1, 2012, and ((~~annually~~)) biennially thereafter, each qualifying utility shall report to the department on its ((~~progress in the preceding year~~)) compliance in meeting the targets established in RCW 19.285.040, including ((~~expected~~)):

(i) Expected electricity savings from the biennial conservation target((~~, expenditures~~));

(ii) Expenditures that were made on conservation((~~, actual~~));

(iii) Actual electricity savings results((~~, the~~));

(iv) The utility's annual load for the prior two years((~~, the~~));

(v) The amount of megawatt-hours that were needed to meet the annual renewable energy target((~~, the~~));

(vi) The amount of megawatt-hours of each type of eligible renewable resource that were acquired((~~, the~~));

(vii) The type and amount of renewable energy credits ((~~acquired,~~)) that were retired; and ((~~the~~))

(viii) The percent of its total annual retail revenue requirement that was invested in the incremental cost of eligible renewable resources and the cost of renewable energy credits.

(b) For each year that a qualifying utility elects to demonstrate alternative compliance under RCW 19.285.040(2) (d) or (i) or 19.285.050(1), it must include in its annual report relevant data to demonstrate that it met the criteria in that section. A qualifying utility may submit its report to the department in conjunction with its annual obligations in chapter 19.29A RCW.

(2) A qualifying utility that is an investor-owned utility shall also report all information required in subsection (1) of this section to the commission, and all other qualifying utilities shall also make all information required in subsection (1) of this section available to the auditor.

(3) A qualifying utility shall also make reports required in this section available to its customers.

(4) A qualifying utility is encouraged to use any savings resulting from the decreased reporting requirements in this act for low-income energy assistance.

Sec. 2. RCW 43.21F.045 and 2023 c 124 s 5 are each amended to read as follows:

(1) The department shall supervise and administer energy-related activities as specified in RCW 43.330.904 and shall advise the governor and the legislature with respect to energy matters affecting the state.

(2) In addition to other powers and duties granted to the department, the department shall have the following powers and duties:

(a) Prepare and update contingency plans for securing energy infrastructure against all physical and cybersecurity threats, and for implementation in the event of energy shortages or emergencies. The plans shall conform to chapter 43.21G RCW and shall include procedures for determining when these shortages or emergencies exist, the state officers and agencies to participate in the determination, and actions to be taken by various agencies and officers of state government in order to reduce hardship and maintain the general welfare during these emergencies. The department shall coordinate the

activities undertaken pursuant to this subsection with other persons. The components of plans that require legislation for their implementation shall be presented to the legislature in the form of proposed legislation at the earliest practicable date. The department shall report to the governor and the legislature on probable, imminent, and existing energy shortages, and shall administer energy allocation and curtailment programs in accordance with chapter 43.21G RCW.

(b) Establish and maintain a central repository in state government for collection of existing data on energy resources, including:

(i) Supply, demand, costs, utilization technology, projections, and forecasts;

(ii) Comparative costs of alternative energy sources, uses, and applications; and

(iii) Inventory data on energy research projects in the state conducted under public and/or private auspices, and the results thereof.

(c) Coordinate federal energy programs appropriate for state-level implementation, carry out such energy programs as are assigned to it by the governor or the legislature, and monitor federally funded local energy programs as required by federal or state regulations.

(d) Develop energy policy recommendations for consideration by the governor and the legislature.

(e) Provide assistance, space, and other support as may be necessary for the activities of the state's two representatives to the Pacific northwest electric power and conservation planning council. To the extent consistent with federal law, the director shall request that Washington's councilmembers request the administrator of the Bonneville power administration to reimburse the state for the expenses associated with the support as provided in the Pacific Northwest Electric Power Planning and Conservation Act (P.L. 96-501).

(f) Cooperate with state agencies, other governmental units, and private interests in the prioritization and implementation of the state energy strategy elements and on other energy matters.

(g) Serve as the official state agency responsible for coordinating implementation of the state energy strategy.

(h) No later than December 1, ((~~1982, and by December 1st of each even-numbered year thereafter~~)) 2024, and no later than four years after the completion of a review of the state energy strategy under RCW 43.21F.090(1), prepare and transmit to the governor and the appropriate committees of the legislature a report on the implementation of the state energy strategy and other important energy issues, as appropriate.

(i) Provide support for increasing cost-effective energy conservation, including assisting in the removal of impediments to timely implementation.

(j) Provide support for the development of cost-effective energy resources including assisting in the removal of impediments to timely construction.

(k) Adopt rules, under chapter 34.05 RCW, necessary to carry out the powers and duties enumerated in this chapter.

(l) Provide administrative assistance, space, and other support as may be necessary for the activities of the energy facility site evaluation council, as provided for in RCW 80.50.030.

(m) Appoint staff as may be needed to administer energy policy functions and manage energy facility site evaluation council activities. These employees are exempt from the provisions of chapter 41.06 RCW.

(3) To the extent the powers and duties set out under this section relate to energy education, applied research, and technology transfer programs they are transferred to Washington State University.

(4) To the extent the powers and duties set out under this section relate to energy efficiency in public buildings they are transferred to the department of enterprise services.

Sec. 3. RCW 23.86.405 and 2023 c 105 s 1 are each amended to read as follows:

(1) As used in this section, any locally regulated utility as defined in RCW 23.86.400 may not effect, due to lack of payment, an involuntary termination of electric utility service to any residential user, including tenants of metered apartment buildings and residents of mobile homes, on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat

advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located.

(2)(a) A residential user at whose dwelling electric utility service has been disconnected for lack of payment may request that the locally regulated utility reconnect service on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located. The locally regulated utility shall inform all customers in the notice of disconnection of the ability to seek reconnection and provide clear and specific information on how to make that request, including how to contact the utility.

(b) Upon receipt of a request made pursuant to (a) of this subsection, the locally regulated utility shall promptly make a reasonable attempt to reconnect service to the dwelling. The locally regulated utility, in connection with a request made pursuant to (a) of this subsection, may require the residential user to enter into a payment plan prior to reconnecting service to the dwelling. If the locally regulated utility requires the residential user to enter into a repayment plan, the repayment plan must comply with subsection (3) of this section.

(3) A repayment plan required by a locally regulated utility pursuant to subsection (2)(b) of this section will be designed both to pay the past due bill by the following May 15th, or as soon as possible after May 15th if needed to maintain monthly payments that are no greater than six percent of the customer's monthly income, and to pay for continued utility service. The plan may not require monthly payments in excess of six percent of the customer's monthly income. A customer may agree to pay a higher percentage during this period, but will not be in default unless payment during this period is less than six percent of the customer's monthly income. If assistance payments are received by the customer subsequent to implementation of the plan, the customer shall contact the locally regulated utility to reformulate the plan.

((~~(4) On an annual basis, each locally regulated utility with more than 25,000 retail electric customers in Washington must submit a report to the department of commerce that includes the total number of disconnections that occurred on each day for which the national weather service issued, or announced that it intended to issue, a~~

~~heat-related alert. Locally regulated utilities with fewer than 25,000 retail electric customers in Washington must provide similar information upon request by the department.~~

~~(a) Subject to availability, each locally regulated utility must provide any other information related to utility disconnections that is requested by the department.~~

~~(b) The information required in this subsection must be submitted in a form, timeline, and manner as prescribed by the department.~~))

(4) Each locally regulated utility is encouraged to use any savings resulting from the removal of reporting requirements in this act for low-income energy assistance.

Sec. 4. RCW 24.06.605 and 2023 c 105 s 2 are each amended to read as follows:

(1) As used in this section, any locally regulated utility as defined in RCW 24.06.600 may not effect, due to lack of payment, an involuntary termination of electric utility service to any residential user, including tenants of metered apartment buildings and residents of mobile homes, on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located.

(2)(a) A residential user at whose dwelling electric utility service has been disconnected for lack of payment may request that the locally regulated utility reconnect service on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located. The locally regulated utility shall inform all customers in the notice of disconnection of the ability to seek reconnection and provide clear and specific information on how to make that request, including how to contact the utility.

(b) Upon receipt of a request made pursuant to (a) of this subsection, the locally regulated utility shall promptly make a reasonable attempt to reconnect service to the dwelling. The locally regulated utility, in connection with a request made pursuant to (a) of this subsection, may require the residential user to enter into a payment plan prior to reconnecting service to the dwelling. If the

locally regulated utility requires the residential user to enter into a repayment plan, the repayment plan must comply with subsection (3) of this section.

(3) A repayment plan required by a locally regulated utility pursuant to subsection (2)(b) of this section will be designed both to pay the past due bill by the following May 15th, or as soon as possible after May 15th if needed to maintain monthly payments that are no greater than six percent of the customer's monthly income, and to pay for continued utility service. The plan must not require monthly payments in excess of six percent of the customer's monthly income. A customer may agree to pay a higher percentage during this period, but will not be in default unless payment during this period is less than six percent of the customer's monthly income. If assistance payments are received by the customer subsequent to implementation of the plan, the customer shall contact the locally regulated utility to reformulate the plan.

((~~(4) On an annual basis, each locally regulated utility with more than 25,000 retail electric customers in Washington must submit a report to the department of commerce that includes the total number of disconnections that occurred on each day for which the national weather service issued, or announced that it intended to issue, a heat-related alert. Locally regulated utilities with fewer than 25,000 retail electric customers in Washington must provide similar information upon request by the department.~~

~~(a) Subject to availability, each locally regulated utility must provide any other information related to utility disconnections that is requested by the department.~~

~~(b) The information required in this subsection must be submitted in a form, timeline, and manner as prescribed by the department.~~))

(4) Each locally regulated utility is encouraged to use any savings resulting from the removal of reporting requirements in this act for low-income energy assistance.

Sec. 5. RCW 35.21.302 and 2023 c 105 s 3 are each amended to read as follows:

(1) A city or town, including a code city, that owns or operates an electric or water utility may not effect, due to lack of payment, an involuntary termination of utility service to any residential user, including tenants of metered apartment buildings and residents of mobile homes, on any day for which the national weather service

has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located.

(2)(a) A residential user at whose dwelling utility service has been disconnected for lack of payment may request that the utility reconnect service on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located. The utility shall inform all customers in the notice of disconnection of the ability to seek reconnection and provide clear and specific information on how to make that request, including how to contact the utility.

(b) Upon receipt of a request made pursuant to (a) of this subsection, the utility shall promptly make a reasonable attempt to reconnect service to the dwelling. The utility, in connection with a request made pursuant to (a) of this subsection, may require the residential user to enter into a payment plan prior to reconnecting service to the dwelling. If the utility requires the residential user to enter into a repayment plan, the repayment plan must comply with subsection (3) of this section.

(3) A repayment plan required by a utility pursuant to subsection (2)(b) of this section will be designed both to pay the past due bill by the following May 15th, or as soon as possible after May 15th if needed to maintain monthly payments that are no greater than six percent of the customer's monthly income, and to pay for continued utility service. The plan may not require monthly payments in excess of six percent of the customer's monthly income. A customer may agree to pay a higher percentage during this period, but will not be in default unless payment during this period is less than six percent of the customer's monthly income. If assistance payments are received by the customer subsequent to implementation of the plan, the customer shall contact the utility to reformulate the plan.

((~~(4) On an annual basis, each city or town, including a code city, that owns or operates an electric or water utility with more than 25,000 retail electric customers or 2,500 water customers in Washington must submit a report to the department of commerce that includes the total number of disconnections that occurred on each day for which the national weather service issued, or announced that it~~

~~intended to issue, a heat-related alert. Utilities with fewer than 25,000 retail electric customers or 2,500 water customers in Washington must provide similar information upon request by the department.~~

~~(a) Subject to availability, each utility must provide any other information related to utility disconnections that is requested by the department.~~

~~(b) The information required in this subsection must be submitted in a form, timeline, and manner as prescribed by the department.~~))

(4) Each city or town that owns and operates an electric utility is encouraged to use any savings resulting from the removal of reporting requirements in this act for low-income energy assistance.

Sec. 6. RCW 54.16.285 and 2023 c 105 s 4 are each amended to read as follows:

(1) A district providing utility service for residential space heating shall not terminate such utility service between November 15 through March 15 if the customer:

(a) Notifies the utility of the inability to pay the bill. This notice should be provided within five business days of receiving a payment overdue notice unless there are extenuating circumstances. If the customer fails to notify the utility within five business days and service is terminated, the customer can, by fulfilling the requirements of this section, receive the protections of this chapter;

(b) Provides self-certification of household income for the prior 12 months to a grantee of the department of commerce which administers federally funded energy assistance programs. The grantee shall determine that the household income does not exceed the maximum allowed for eligibility under the state's plan for low-income energy assistance under 42 U.S.C. 8624 and shall provide a dollar figure that is seven percent of household income. The grantee may verify information provided in the self-certification;

(c) Has applied for home heating assistance from applicable government and private sector organizations and certifies that any assistance received will be applied to the current bill and future utility bills;

(d) Has applied for low-income weatherization assistance to the utility or other appropriate agency if such assistance is available for the dwelling;

(e) Agrees to a payment plan and agrees to maintain the payment plan. The plan will be designed both to pay the past due bill by the following October 15 and to pay for continued utility service. If the past due bill is not paid by the following October 15, the customer shall not be eligible for protections under this chapter until the past due bill is paid. The plan shall not require monthly payments in excess of seven percent of the customer's monthly income plus one-twelfth of any arrearage accrued from the date application is made and thereafter during November 15 through March 15. A customer may agree to pay a higher percentage during this period, but shall not be in default unless payment during this period is less than seven percent of monthly income plus one-twelfth of any arrearage accrued from the date application is made and thereafter. If assistance payments are received by the customer subsequent to implementation of the plan, the customer shall contact the utility to reformulate the plan; and

(f) Agrees to pay the moneys owed even if the customer moves.

(2) The utility shall:

(a) Include in any notice that an account is delinquent and that service may be subject to termination, a description of the customer's duties in this section;

(b) Assist the customer in fulfilling the requirements under this section;

(c) Be authorized to transfer an account to a new residence when a customer who has established a plan under this section moves from one residence to another within the same utility service area;

(d) Be permitted to disconnect service if the customer fails to honor the payment program except on the days indicated in subsection (5) of this section. Utilities may continue to disconnect service for those practices authorized by law other than for nonpayment as provided for in this section. Customers who qualify for payment plans under this section who default on their payment plans and are disconnected can be reconnected and maintain the protections afforded under this chapter by paying all amounts that would have been due and owing under the terms of the applicable payment plan, absent default, on the date on which service is reconnected; and

(e) Advise the customer in writing at the time it disconnects service that it will restore service if the customer contacts the utility and fulfills the other requirements of this section.

(3) All districts providing utility service for residential space heating shall offer residential customers the option of a budget billing or equal payment plan. The budget billing or equal payment plan shall be offered low-income customers eligible under the state's plan for low-income energy assistance prepared in accordance with 42 U.S.C. 8624(C)(1) without limiting availability to certain months of the year, without regard to the length of time the customer has occupied the premises, and without regard to whether the customer is the tenant or owner of the premises occupied.

(4) An agreement between the customer and the utility, whether oral or written, shall not waive the protections afforded under this chapter.

(5) A district providing electric or water utility service to residential customers may not effect, due to lack of payment, an involuntary termination of utility service to any residential user, including tenants of metered apartment buildings and residents of mobile homes, on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located.

(6)(a) A residential user at whose dwelling utility service has been disconnected for lack of payment may request that the district reconnect service on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located. The district shall inform all customers in the notice of disconnection of the ability to seek reconnection and provide clear and specific information on how to make that request, including how to contact the district.

(b) Upon receipt of a request made pursuant to (a) of this subsection, the district shall promptly make a reasonable attempt to reconnect service to the dwelling. The district, in connection with a request made pursuant to (a) of this subsection, may require the residential user to enter into a payment plan prior to reconnecting service to the dwelling. If the district requires the residential user to enter into a repayment plan, the repayment plan must comply with subsection (7) of this section.

(7) A repayment plan required by a district pursuant to subsection (6)(b) of this section will be designed both to pay the past due bill by the following May 15th, or as soon as possible after May 15th if needed to maintain monthly payments that are no greater than six percent of the customer's monthly income, and to pay for continued utility service. The plan may not require monthly payments in excess of six percent of the customer's monthly income. A customer may agree to pay a higher percentage during this period, but will not be in default unless payment during this period is less than six percent of the customer's monthly income. If assistance payments are received by the customer subsequent to implementation of the plan, the customer shall contact the district to reformulate the plan.

((~~(8) On an annual basis, each district with more than 25,000 retail electric customers or 2,500 water customers in Washington must submit a report to the department of commerce that includes the total number of disconnections that occurred on each day for which the national weather service issued, or announced that it intended to issue, a heat-related alert. Districts with fewer than 25,000 retail electric customers or 2,500 water customers in Washington must provide similar information upon request by the department.~~

~~(a) Subject to availability, each district must provide any other information related to utility disconnections that is requested by the department.~~

~~(b) The information required in this subsection must be submitted in a form, timeline, and manner as prescribed by the department.~~))

(8) Each district with retail electric customers is encouraged to use any savings resulting from the removal of reporting requirements in this act for low-income energy assistance.

Sec. 7. RCW 57.08.081 and 2023 c 105 s 5 are each amended to read as follows:

(1) Subject to RCW 57.08.005(7), the commissioners of any district shall provide for revenues by fixing rates and charges for furnishing sewer and drainage service and facilities to those to whom service is available or for providing water, such rates and charges to be fixed as deemed necessary by the commissioners, so that uniform charges will be made for the same class of customer or service and facility. Rates and charges may be combined for the furnishing of more than one type of sewer or drainage service and facilities.

(2) In classifying customers of such water, sewer, or drainage system, the board of commissioners may in its discretion consider any or all of the following factors: The difference in cost to various customers; the location of the various customers within and without the district; the difference in cost of maintenance, operation, repair, and replacement of the various parts of the system; the different character of the service furnished various customers; the quantity and quality of the service and facility furnished; the time of its use; the achievement of water conservation goals and the discouragement of wasteful practices; capital contributions made to the system including but not limited to assessments; and any other matters which present a reasonable difference as a ground for distinction. Rates shall be established as deemed proper by the commissioners and as fixed by resolution and shall produce revenues sufficient to take care of the costs of maintenance and operation, revenue bond and warrant interest and principal amortization requirements, and all other charges necessary for efficient and proper operation of the system. Prior to furnishing services, a district may require a deposit to guarantee payment for services. However, failure to require a deposit does not affect the validity of any lien authorized by this section.

(3) The commissioners shall enforce collection of connection charges, and rates and charges for water supplied against property owners connecting with the system or receiving such water, and for sewer and drainage services charged against property to which and its owners to whom the service is available, such charges being deemed charges against the property served, by addition of penalties of not more than ten percent thereof in case of failure to pay the charges at times fixed by resolution. The commissioners may provide by resolution that where either connection charges or rates and charges for services supplied are delinquent for any specified period of time, the district shall certify the delinquencies to the auditor of the county in which the real property is located, and the charges and any penalties added thereto and interest thereon at the rate of not more than the prime lending rate of the district's bank plus four percentage points per year shall be a lien against the property upon which the service was received, subject only to the lien for general taxes.

(4) The district may, at any time after the connection charges or rates and charges for services supplied or available and penalties

are delinquent for a period of 60 days, bring suit in foreclosure by civil action in the superior court of the county in which the real property is located. The court may allow, in addition to the costs and disbursements provided by statute, attorneys' fees, title search and report costs, and expenses as it adjudges reasonable. The action shall be in rem, and may be brought in the name of the district against an individual or against all of those who are delinquent in one action. The laws and rules of the court shall control as in other civil actions.

(5) In addition to the right to foreclose provided in this section, the district may also cut off all or part of the service after charges for water or sewer service supplied or available are delinquent for a period of 30 days, except on the days indicated in subsection (8) of this section.

(6) A district may determine how to apply partial payments on past due accounts.

(7) A district may provide a real property owner or the owner's designee with duplicate bills for service to tenants, or may notify an owner or the owner's designee that a tenant's service account is delinquent. However, if an owner or the owner's designee notifies the district in writing that a property served by the district is a rental property, asks to be notified of a tenant's delinquency, and has provided, in writing, a complete and accurate mailing address, the district shall notify the owner or the owner's designee of a tenant's delinquency at the same time and in the same manner the district notifies the tenant of the tenant's delinquency or by mail. When a district provides a real property owner or the owner's designee with duplicates of tenant utility service bills or notice that a tenant's utility account is delinquent, the district shall notify the tenant that it is providing the duplicate bills or delinquency notice to the owner or the owner's designee. After January 1, 1999, if a district fails to notify the owner of a tenant's delinquency after receiving a written request to do so and after receiving the other information required by this subsection (7), the district shall have no lien against the premises for the tenant's delinquent and unpaid charges.

(8) A district providing water utility service to residential customers may not effect, due to lack of payment, an involuntary termination of utility service to any residential user, including tenants of metered apartment buildings and residents of mobile homes,

on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located.

(9)(a) A residential user at whose dwelling utility service has been disconnected for lack of payment may request that the district reconnect service on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located. The district shall inform all customers in the notice of disconnection of the ability to seek reconnection and provide clear and specific information on how to make that request, including how to contact the district.

(b) Upon receipt of a request made pursuant to (a) of this subsection, the district shall promptly make a reasonable attempt to reconnect service to the dwelling. The district, in connection with a request made pursuant to (a) of this subsection, may require the residential user to enter into a payment plan prior to reconnecting service to the dwelling. If the district requires the residential user to enter into a repayment plan, the repayment plan must comply with subsection (10) of this section.

(10) A repayment plan required by a district pursuant to subsection (9)(b) of this section will be designed both to pay the past due bill by the following May 15th, or as soon as possible after May 15th if needed to maintain monthly payments that are no greater than six percent of the customer's monthly income, and to pay for continued utility service. The plan may not require monthly payments in excess of six percent of the customer's monthly income. A customer may agree to pay a higher percentage during this period, but will not be in default unless payment during this period is less than six percent of the customer's monthly income. If assistance payments are received by the customer subsequent to implementation of the plan, the customer shall contact the district to reformulate the plan.

((~~(11) On an annual basis, each district with more than 2,500 water customers in Washington must submit a report to the department of commerce that includes the total number of disconnections that occurred on each day for which the national weather service issued, or announced that it intended to issue, a heat-related alert.~~

~~Districts with fewer than 2,500 water customers in Washington must provide similar information upon request by the department.~~

~~(a) Subject to availability, each district must provide any other information related to utility disconnections that is requested by the department.~~

~~(b) The information required in this subsection must be submitted in a form, timeline, and manner as prescribed by the department.~~))

Sec. 8. RCW 80.28.010 and 2025 c 263 s 4 are each amended to read as follows:

(1) All charges made, demanded or received by any gas company, electrical company, wastewater company, water company, or thermal energy company for gas, electricity, water, or thermal energy, or for any service rendered or to be rendered in connection therewith, shall be just, fair, reasonable and sufficient. Reasonable charges necessary to cover the cost of administering the collection of voluntary donations for the purposes of supporting the development and implementation of evergreen community management plans and ordinances under RCW 80.28.300 must be deemed as prudent and necessary for the operation of a utility.

(2) Every gas company, electrical company, wastewater company, water company, and thermal energy company shall furnish and supply such service, instrumentalities and facilities as shall be safe, adequate and efficient, and in all respects just and reasonable.

(3) All rules and regulations issued by any gas company, electrical company, wastewater company, water company, or thermal energy company, affecting or pertaining to the sale or distribution of its product or service, must be just and reasonable.

(4) Utility service for residential space heating shall not be terminated between November 15 through March 15 if the customer:

(a) Notifies the utility of the inability to pay the bill. This notice should be provided within five business days of receiving a payment overdue notice unless there are extenuating circumstances. If the customer fails to notify the utility within five business days and service is terminated, the customer can, by fulfilling the requirements of this section, receive the protections of this chapter;

(b) Provides self-certification of household income for the prior twelve months to a grantee of the department of commerce, which administers federally funded energy assistance programs. The grantee

shall determine that the household income does not exceed the maximum allowed for eligibility under the state's plan for low-income energy assistance under 42 U.S.C. 8624 and shall provide a dollar figure that is seven percent of household income. The grantee may verify information provided in the self-certification;

(c) Has applied for home heating assistance from applicable government and private sector organizations and certifies that any assistance received will be applied to the current bill and future utility bills;

(d) Has applied for low-income weatherization assistance to the utility or other appropriate agency if such assistance is available for the dwelling;

(e) Agrees to a payment plan and agrees to maintain the payment plan. The plan will be designed both to pay the past due bill by the following October 15th and to pay for continued utility service. If the past due bill is not paid by the following October 15, the customer is not eligible for protections under this chapter until the past due bill is paid. The plan may not require monthly payments in excess of seven percent of the customer's monthly income plus one-twelfth of any arrearage accrued from the date application is made and thereafter during November 15 through March 15. A customer may agree to pay a higher percentage during this period, but shall not be in default unless payment during this period is less than seven percent of monthly income plus one-twelfth of any arrearage accrued from the date application is made and thereafter. If assistance payments are received by the customer subsequent to implementation of the plan, the customer shall contact the utility to reformulate the plan; and

(f) Agrees to pay the moneys owed even if the customer moves.

(5) The utility shall:

(a) Include in any notice that an account is delinquent and that service may be subject to termination, a description of the customer's duties in this section;

(b) Assist the customer in fulfilling the requirements under this section;

(c) Be authorized to transfer an account to a new residence when a customer who has established a plan under this section moves from one residence to another within the same utility service area;

(d) Be permitted to disconnect service if the customer fails to honor the payment program except on the days indicated in subsection

(8) of this section. Utilities may continue to disconnect service for those practices authorized by law other than for nonpayment as provided for in this subsection. Customers who qualify for payment plans under this section who default on their payment plans and are disconnected can be reconnected and maintain the protections afforded under this chapter by paying all amounts that would have been due and owing under the terms of the applicable payment plan, absent default, on the date on which service is reconnected; and

(e) Advise the customer in writing at the time it disconnects service that it will restore service if the customer contacts the utility and fulfills the other requirements of this section.

(6) A payment plan implemented under this section is consistent with RCW 80.28.080.

(7) Every gas company, electrical company, and thermal energy company shall offer residential customers the option of a budget billing or equal payment plan. The budget billing or equal payment plan shall be offered low-income customers eligible under the state's plan for low-income energy assistance prepared in accordance with 42 U.S.C. 8624(C)(1) without limiting availability to certain months of the year, without regard to the length of time the customer has occupied the premises, and without regard to whether the customer is the tenant or owner of the premises occupied.

(8)(a) Every electrical company, water company, and thermal energy company must have and must abide by the terms of a tariff approved by the commission that prohibits the electrical company, water company, or thermal energy company from effecting, due to lack of payment, an involuntary termination of electric, water, or thermal energy utility service to any residential user, including tenants of metered apartment buildings and residents of mobile homes, on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located.

(b) Nothing in this subsection (8) limits the authority of the commission to prohibit an electrical company, water company, or thermal energy company from terminating electric, water, or thermal energy utility service in accordance with an approved tariff, rule, or order, in circumstances independent of the weather.

(9)(a) A residential user at whose dwelling electric, water, or thermal energy utility service has been disconnected for lack of payment may request that the utility reconnect service on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located. The utility shall, through a process approved by the commission, inform all customers in the notice of disconnection of the ability to seek reconnection and provide clear and specific information on how to make that request, including how to contact the utility.

(b) Upon receipt of a request made pursuant to (a) of this subsection, the utility shall promptly make a reasonable attempt to reconnect service to the dwelling. The utility, in connection with a request made pursuant to (a) of this subsection, may require the residential user to enter into a payment plan prior to reconnecting service to the dwelling. If the utility requires the residential user to enter into a repayment plan, the repayment plan must comply with subsection (10) of this section.

(10) A repayment plan required by a utility pursuant to subsection (9)(b) of this section will be designed both to pay the past due bill by the following May 15th, or as soon as possible after May 15th if needed to maintain monthly payments that are no greater than six percent of the customer's monthly income, and to pay for continued utility service. The plan may not require monthly payments in excess of six percent of the customer's monthly income. A customer may agree to pay a higher percentage during this period, but will not be in default unless payment during this period is less than six percent of the customer's monthly income. If assistance payments are received by the customer subsequent to implementation of the plan, the customer shall contact the utility to reformulate the plan.

(11) Every gas company, electrical company, wastewater company, water company, and thermal energy company shall construct and maintain such facilities in connection with the manufacture and distribution of its product, or provision of its services, as will be efficient and safe to its employees and the public.

(12) An agreement between the customer and the utility, whether oral or written, does not waive the protections afforded under this chapter.

(13) In establishing rates or charges for water service, water companies as defined in RCW 80.04.010 may consider the achievement of water conservation goals and the discouragement of wasteful water use practices.

((~~(14) On an annual basis, each utility must submit a report to the commission that includes the total number of electric, water, or thermal energy disconnections that occurred on each day for which the national weather service issued, or announced that it intended to issue, a heat-related alert.~~))

(14) Each electrical company is encouraged to use any savings resulting from the removal of reporting requirements in this act for low-income energy assistance.

Sec. 9. RCW 87.03.015 and 2023 c 105 s 7 are each amended to read as follows:

(1) Any irrigation district, operating and maintaining an irrigation system, in addition to other powers conferred by law, shall have authority:

(a) To purchase and sell electric power to the inhabitants of the irrigation district for the purposes of irrigation and domestic use; to finance, acquire, construct, own, and lease dams, canals, plants, transmission lines, and other power equipment and the necessary property and rights therefor and to operate, improve, repair, and maintain the same, for the generation and transmission of electrical energy for use in the operation of pumping plants and irrigation systems of the district and for sale to the inhabitants of the irrigation district for the purposes of irrigation and domestic use; and, as a further and separate grant of authority and in furtherance of a state purpose and policy of developing hydroelectric capability in connection with irrigation facilities, to construct, finance, acquire, own, lease, operate, improve, repair, and maintain, alone or jointly with other irrigation districts, boards of control, municipal or quasi-municipal corporations or cooperatives authorized to engage in the business of distributing electricity, electrical companies subject to the jurisdiction of the utilities and transportation commission, private commercial or industrial entities that construct or operate electric power generation or transmission facilities, or private commercial or industrial entities that acquire electric power for their own use or resale, hydroelectric facilities including but not limited to dams, canals, plants, transmission lines, other power

equipment, and the necessary property and rights therefor, located within or outside the district, for the purpose of utilizing for the generation of electricity, water power made available by and as a part of the irrigation water storage, conveyance, and distribution facilities, waste ways, and drainage water facilities which serve irrigation districts, and to sell any and all the electric energy generated at any such hydroelectric facilities or the irrigation district's share of such energy, to municipal or quasi-municipal corporations or cooperatives authorized to engage in the business of distributing electricity, electrical companies subject to the jurisdiction of the utilities and transportation commission, private commercial or industrial entities that acquire electric power for their own use or resale, or other irrigation districts, and on such terms and conditions as the board of directors shall determine. No contract entered into under this subsection (1)(a) by the board of directors of any irrigation district for the sale of electrical energy from such hydroelectric facility for a period longer than forty years from the date of commercial operation of such hydroelectric facility shall be binding on the district until ratified by a majority vote of the electors of the district at an election therein, called, held, and canvassed for that purpose in the same manner as that provided by law for district bond elections.

(b) To construct, repair, purchase, maintain, or lease a system for the sale or lease of water to the owners of irrigated lands within the district for domestic purposes.

(c) To construct, repair, purchase, lease, acquire, operate and maintain a system of drains, sanitary sewers, and sewage disposal or treatment plants as herein provided.

(d) To assume, as principal or guarantor, any indebtedness to the United States under the federal reclamation laws, on account of district lands.

(e) To maintain, repair, construct, and reconstruct ditches, laterals, pipe lines, and other water conduits used or to be used in carrying water for irrigation of lands located within the boundaries of a city or town, or for the domestic use of the residents of a city or town where the owners of land within such city or town shall use such works to carry water to the boundaries of such city or town for irrigation, domestic, or other purposes within such city or town, and to charge to such city or town the pro rata proportion of the cost of such maintenance, repair, construction, and reconstruction work in

proportion to the benefits received by the lands served and located within the boundaries of such city or town, and if such cost is not paid, then and in that event said irrigation district shall have the right to prevent further water deliveries through such works to the lands located within the boundaries of such city or town until such charges have been paid.

(f) To acquire, install, and maintain as a part of the irrigation district's water system the necessary water mains and fire hydrants to make water available for firefighting purposes; and in addition any such irrigation district shall have the authority to repair, operate, and maintain such hydrants and mains.

(g) To enter into contracts with other irrigation districts, boards of control, municipal or quasi-municipal corporations or cooperatives authorized to engage in the business of distributing electricity, electrical companies subject to the jurisdiction of the utilities and transportation commission, private commercial or industrial entities that construct or operate electric power generation or transmission facilities, or private commercial or industrial entities that acquire electric power for their own use or resale, to jointly finance, acquire, lease, construct, own, operate, improve, repair, and maintain irrigation water, domestic water, drainage and sewerage works, and electrical power works to the same extent as authorized by (a) of this subsection, or portions of such works. If an irrigation district enters into a contract or agreement under this subsection (1)(g) to create a legal entity or undertaking with an investor-owned utility or a private commercial or industrial entity, that contract or agreement must provide that the irrigation district be severally liable only for its own acts and not jointly or severally liable for the acts, omissions, or obligations of an investor-owned utility or a private commercial or industrial entity. No money or property supplied by any irrigation district for the planning, financing, acquisition, construction, operation, or maintenance of any common facility may be credited or otherwise applied to the account of any investor-owned utility or private commercial or industrial entity therein, nor may the undivided share of any irrigation district in any common facility be charged, directly or indirectly, with any debt or obligation of any investor-owned utility or private commercial or industrial entity or be subject to any lien as a result thereof. No action in connection with

a common facility may be binding upon any irrigation district unless authorized or approved by resolution of its board.

(h) To acquire from a water-sewer district wholly within the irrigation district's boundaries, by a conveyance without cost, the water-sewer district's water system and to operate the same to provide water for the domestic use of the irrigation district residents. As a part of its acceptance of the conveyance the irrigation district must agree to relieve the water-sewer district of responsibility for maintenance and repair of the system. Any such water-sewer district is authorized to make such a conveyance if all indebtedness of the water-sewer district, except local improvement district bonds, has been paid and the conveyance has been approved by a majority of the water-sewer district's voters voting at a general or special election.

(i) To approve and condition placement of hydroelectric generation facilities by entities other than the district on water conveyance facilities operated or maintained by the district.

(2) An irrigation district providing electric or water utility service to residential customers may not effect, due to lack of payment, an involuntary termination of utility service to any residential users, including tenants of metered apartment buildings and residents of mobile homes, on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located.

(a)(i) A residential user at whose dwelling electric or water utility service has been disconnected for lack of payment may request that the irrigation district reconnect service on any day for which the national weather service has issued or has announced that it intends to issue a heat-related alert, such as an excessive heat warning, a heat advisory, an excessive heat watch, or a similar alert, for the area in which the residential user's address is located. The irrigation district shall inform all customers in the notice of disconnection of the ability to seek reconnection and provide clear and specific information on how to make that request, including how to contact the irrigation district.

(ii) Upon receipt of a request made pursuant to (a)(i) of this subsection, the irrigation district shall promptly make a reasonable attempt to reconnect service to the dwelling. The irrigation

district, in connection with a request made pursuant to (a)(i) of this subsection, may require the residential user to enter into a payment plan prior to reconnecting service to the dwelling. If the irrigation district requires the residential user to enter into a repayment plan, the repayment plan must comply with (b) of this subsection.

(b) A repayment plan required by an irrigation district pursuant to (a)(ii) of this subsection will be designed both to pay the past due bill by the following May 15th, or as soon as possible after May 15th if needed to maintain monthly payments that are no greater than six percent of the customer's monthly income, and to pay for continued utility service. The plan may not require monthly payments in excess of six percent of the customer's monthly income. A customer may agree to pay a higher percentage during this period, but will not be in default unless payment during this period is less than six percent of the customer's monthly income. If assistance payments are received by the customer subsequent to implementation of the plan, the customer shall contact the irrigation district to reformulate the plan.

((~~(c) On an annual basis, each irrigation district with more than 25,000 retail electric customers or 2,500 water customers in Washington must submit a report to the department of commerce that includes the total number of disconnections that occurred on each day for which the national weather service issued, or announced that it intended to issue, a heat-related alert. Irrigation districts with fewer than 25,000 retail electric customers or 2,500 water customers in Washington must provide similar information upon request by the department.~~

~~(i) Subject to availability, each irrigation district must provide any other information related to utility disconnections that is requested by the department.~~

~~(ii) The information required in this subsection (2)(c) must be submitted in a form, timeline, and manner as prescribed by the department.~~))

(3) Each irrigation district with retail electric customers is encouraged to use any savings resulting from the removal of reporting requirements in this act for low-income energy assistance.

(4) This section shall not be construed as in any manner abridging any other powers of an irrigation district conferred by law.

NEW SECTION. **Sec. 10.** RCW 19.280.060 (Department's duties—Report to the legislature) and 2015 3rd sp.s. c 19 s 10, 2013 c 149 s 4, & 2006 c 195 s 6 are each repealed.

--- END ---
