

CERTIFICATION OF ENROLLMENT
ENGROSSED SUBSTITUTE HOUSE BILL 2247

69th Legislature
2026 Regular Session

Passed by the House March 11, 2026
Yeas 95 Nays 0

**Speaker of the House of
Representatives**

Passed by the Senate March 6, 2026
Yeas 30 Nays 18

President of the Senate

Approved

Governor of the State of Washington

CERTIFICATE

I, Bernard Dean, Chief Clerk of the House of Representatives of the State of Washington, do hereby certify that the attached is **ENGROSSED SUBSTITUTE HOUSE BILL 2247** as passed by the House of Representatives and the Senate on the dates hereon set forth.

Chief Clerk

FILED

**Secretary of State
State of Washington**

ENGROSSED SUBSTITUTE HOUSE BILL 2247

AS AMENDED BY THE SENATE

Passed Legislature - 2026 Regular Session

State of Washington 69th Legislature 2026 Regular Session

By House Health Care & Wellness (originally sponsored by Representatives Parshley, Lekanoff, Reed, Leavitt, Zahn, Gregerson, Berg, and Fosse)

READ FIRST TIME 01/27/26.

1 AN ACT Relating to veterinarian-client-patient relationships;
2 amending RCW 18.92.015; adding a new section to chapter 18.92 RCW;
3 and providing an effective date.

4 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

5 NEW SECTION. **Sec. 1.** A new section is added to chapter 18.92
6 RCW to read as follows:

7 (1) A veterinarian-client-patient relationship is the basis for
8 interaction between veterinarians and their clients and patients. A
9 veterinarian-client-patient relationship exists when all of the
10 following conditions have been met:

11 (a) The veterinarian has assumed responsibility for making
12 clinical judgments regarding the health of the animal and need for
13 medical treatment, and the client has agreed to follow the
14 instructions of the veterinarian;

15 (b) The veterinarian has sufficient knowledge of the animal to
16 initiate, at a minimum, a general or preliminary diagnosis of the
17 medical conditions of the animal. To establish this knowledge, the
18 veterinarian must:

19 (i) Have physically examined the animal within the last year, or
20 sooner if medically appropriate. In cases where a veterinarian cannot

1 physically examine the animal, such knowledge may be established
2 using telehealth when:

3 (A) The animal cannot access clinical veterinary care due to
4 substantial challenges including, but not limited to, substantial
5 transportation challenges for the client or animal or the
6 unavailability of in-person appointments for a significant amount of
7 time; or

8 (B) The animal has an urgent condition that could result in
9 suffering, and it is not medically reasonable for the veterinarian or
10 client to delay care;

11 (ii) In cases involving operations with several animals, such as
12 encountered at farms, laboratories, or in shelters, be personally
13 acquainted with the keeping and care of the animals by virtue of an
14 examination of the animals or by medically appropriate and timely
15 visits to the premises where the animals are kept; and

16 (iii) In cases where a veterinarian-client-patient relationship
17 has been established through (b) (i) (A) or (B) of this subsection:

18 (A) Enter in the medical record detailed information regarding
19 the nature of the substantial challenge or urgent condition that
20 generated the need for every such telehealth consultation; and

21 (B) Refrain from treating that animal for a period exceeding one
22 year following the initial consultation unless that animal has had a
23 physical examination during that year by a veterinarian licensed
24 pursuant to this chapter. Evidence of the physical examination must
25 be noted in the records of the veterinarian that is treating the
26 animal pursuant to (b) (i) (A) or (B) of this subsection; and

27 (c) The veterinarian is readily available for follow-up
28 evaluation or has arranged for emergency coverage and continuing care
29 and treatment.

30 (2) Once a veterinarian-client-patient relationship has been
31 established, ongoing care may be provided via telemedicine; however,
32 it is the responsibility of the examining veterinarian to determine
33 if an additional physical examination is medically appropriate based
34 on available information regardless of when the last physical
35 examination was performed.

36 (3) Once a veterinarian-client-patient relationship has been
37 established, the relationship extends to all veterinarians employed
38 or practicing at the same premises or same mobile practice entity as
39 the veterinarian who established the most current veterinarian-
40 client-patient relationship. The veterinarian-client-patient

1 relationship may not be extended to other veterinarians based solely
2 on the accessibility of the medical records.

3 (4) In the absence of an established veterinarian-client-patient
4 relationship, allowable telehealth services are limited to the
5 following:

6 (a) Teleadvice;

7 (b) Triage in an emergency situation. A licensed veterinarian
8 who in good faith engages in the practice of veterinary medicine by
9 rendering or attempting to render emergency care to a patient when a
10 client cannot be identified, or where a veterinarian-client-patient
11 relationship is not established, is not subject to discipline based
12 solely on the veterinarian's inability to establish a veterinarian-
13 client-patient relationship;

14 (c) Telemedicine for the purpose of prescribing sedation, other
15 than a controlled substance, prior to an in-person visit, to
16 facilitate transportation to, examination by, or treatment by a
17 veterinarian, or as provided in subsection (5)(d) of this section;

18 (d) Dispensing drugs prescribed by another veterinarian licensed
19 under this chapter, in compliance with RCW 18.92.012, if:

20 (i) Failure to dispense the drug could interrupt a therapeutic
21 regimen or cause a patient to suffer; and

22 (ii) The prescribing veterinarian has ascertained information
23 necessary to fill the requested prescription; and

24 (e) Poison control services.

25 (5) A veterinarian providing care for animal patients under the
26 telehealth exceptions for subsection (1)(b)(i) of this section:

27 (a) May deny treatment because in their medical opinion a
28 physical examination is necessary to adequately diagnose, prognose,
29 and prescribe adequate care for the patient;

30 (b) Must be licensed as a veterinarian in the state of
31 Washington;

32 (c) Must, to the extent practicable, have or establish an
33 association with practices that are registered in the state of
34 Washington to which the patient can be referred for an in-person
35 examination;

36 (d) Must notify the client that prescription drugs or medications
37 may be available at a pharmacy and, if requested, the veterinarian
38 must submit a prescription to a pharmacy that the client chooses;

39 (e) Must provide the client with the veterinarian's identity and
40 clinic address; and

1 (f) Must encourage the owner of the animal or the qualified
2 individual to schedule an in-person follow-up examination of the
3 animal to occur not later than 90 days after the date of the
4 examination through telehealth if the veterinarian, the owner of the
5 animal, or the qualified individual has concerns about the animal's
6 health that cannot be addressed through telehealth.

7 (6) Once a veterinarian-client-patient relationship has been
8 established, all forms of telehealth may be used at the discretion of
9 the veterinarian.

10 (7) The veterinarian-client-patient relationship may be
11 terminated under the following conditions:

12 (a) The termination does not constitute patient abandonment as
13 described in board rules;

14 (b) If there is an ongoing medical or surgical condition, the
15 client is offered a patient referral at the time of termination to
16 another veterinarian for diagnosis, care, and treatment; or

17 (c) Clients may terminate the veterinarian-client-patient
18 relationship at any time.

19 (8) For animals or animal products used in commercial operations,
20 including food consumption, medical testing, and livestock commercial
21 breeding:

22 (a) There must be a written agreement between the client and a
23 veterinarian of record who is accountable for drug use and treatments
24 administered to the animals on the commercial operation;

25 (b) The veterinarian of record is the responsible party for
26 providing appropriate oversight of drug use on the commercial
27 operation. Oversight includes establishment of diagnostic and
28 treatment protocols, training of personnel, review of treatment
29 records, monitoring drug inventories, assuring appropriate labeling
30 of drugs, monitoring compliance and outcomes, and, in cases where
31 telehealth is used in between in-person exams, at least one annual
32 in-person visit following an initial in-person examination of the
33 commercial operation where the animals are kept. Veterinary oversight
34 of drug use must include all drugs used on the commercial operation
35 regardless of the distribution of the drugs to the client;

36 (c) Provision of drugs or drug prescriptions must be for specific
37 time frames appropriate to the scope and type of operation involved
38 and only for the management groups within the operation that the
39 veterinarian of record has direct involvement and oversight;

1 (d) A veterinarian issuing a veterinary feed directive must
2 comply with applicable federal laws and regulations, including 21
3 C.F.R. 558.6.

4 (9) Medical records must be maintained pursuant to board rules.

5 (10)(a) A veterinarian may use or prescribe drugs only within the
6 context of a veterinarian-client-patient relationship except as
7 outlined in subsection (4) of this section. Veterinary prescription
8 drugs may only be used by or on the order of a licensed veterinarian
9 and in compliance with federal law, as required under 21 U.S.C. Sec.
10 353(f), federal regulations, as required under 21 C.F.R. 530.3(i),
11 and RCW 18.92.012.

12 (b) A veterinarian providing care through telehealth may not
13 prescribe a drug to the animal patient for a period longer than three
14 months from the date of issuing a prescription unless a veterinarian
15 has examined the animal patient in person. The veterinarian may not
16 issue another prescription to the animal patient for the same drug
17 unless they have conducted an in-person examination of the animal
18 patient.

19 (c) A veterinarian providing care through telehealth may not
20 prescribe an antimicrobial or anti-inflammatory drug to the animal
21 patient for a period longer than 14 days of treatment. The
22 veterinarian may not issue any further antimicrobial or anti-
23 inflammatory drug prescription, including a refill, to treat the
24 condition of the animal patient unless the veterinarian has conducted
25 an in-person examination of the animal patient.

26 (11) A veterinarian providing care for patients using telehealth
27 shall inform the client about the use and potential limitations of
28 telehealth and obtain consent from the client to use telehealth,
29 including acknowledgment of all of the following:

30 (a) The same standards of care apply to veterinary medicine
31 services via telehealth and in-person veterinary medical services;

32 (b) The client has the option to choose an in-person visit from a
33 veterinarian at any time; and

34 (c) The client has been advised how to receive follow-up care or
35 assistance in the event of failure to respond or declining clinical
36 condition; or of an adverse reaction to the treatment; or in the
37 event of an inability to communicate resulting from technological or
38 equipment failure or failure to be able to reconnect for a follow-up
39 conversation.

1 (12) A veterinarian who practices veterinary medicine through
2 telehealth must do all of the following:

3 (a) Certify with the board of at least 14 days, with a minimum of
4 105 total hours, a year of practice in a clinic setting with hands-on
5 animal experience unless telehealth medicine is less than 90 percent
6 of the veterinarian's annual practice, unless the veterinarian has
7 over 20 years of practicing veterinary experience. Hands-on animal
8 experience in a clinic setting includes but is not limited to
9 volunteering at clinics, animal shelters, or emergency facilities.
10 The board may exempt individual veterinarians otherwise precluded
11 from in-person practice from the requirements of this subsection;

12 (b) Ensure that the technology, method, and equipment used to
13 provide veterinary medicine services through telehealth complies with
14 all current applicable privacy protection laws;

15 (c) Have historical knowledge of the animal patient by obtaining,
16 if available, and reviewing the animal patient's relevant medical
17 history, and, if available, medical records including any diagnostic
18 data. If medical records exist from a previous in-person visit and
19 are in possession of the client, the client may transmit those
20 records, including any diagnostic data contained therein, to the
21 veterinarian electronically;

22 (d) Employ sound professional judgment to determine whether using
23 telehealth is an appropriate alternative method from in-person
24 evaluation for delivering medical advice or treatment to the animal
25 patient and providing quality of care consistent with prevailing
26 veterinary medical practice;

27 (e) As required by subsection (5)(c) of this section, be familiar
28 with available medical resources, including emergency resources near
29 the animal patient's location, be able to provide the client with a
30 list of nearby veterinarians who may be able to see the animal
31 patient in person upon the request of the client, and keep, maintain,
32 and make available a summary of the animal patient record;

33 (f) Provide the client with the veterinarian's name, contact
34 information, and license number that has undertaken the telehealth
35 appointment;

36 (g) Secure an alternative means of contacting the client if the
37 electronic means is interrupted; and

38 (h) Not claim to be a specialist unless the veterinarian is
39 certified in such specialty by a board recognized by the American
40 veterinary medical association.

1 **Sec. 2.** RCW 18.92.015 and 2013 c 19 s 43 are each amended to
2 read as follows:

3 The definitions in this section apply throughout this chapter
4 unless the context clearly requires otherwise.

5 (1) "Animal patient" means any animal under the care and
6 treatment of a veterinarian.

7 (2) "Board" means the Washington state veterinary board of
8 governors.

9 ~~((2))~~ (3) "Client" means the animal patient's owner, owner's
10 agent, or other person presenting the animal patient for care.

11 (4) "Commercial operation" means any business, facility, or
12 agricultural activity involved in the production, testing, livestock
13 breeding, or sale of animals and materials derived from them for
14 economic gain.

15 (5) "Department" means the department of health.

16 ~~((3))~~ (6) "Livestock" means horses, mules, donkeys, cattle,
17 bison, sheep, goats, swine, rabbits, llamas, alpacas, ratites,
18 poultry, waterfowl, game birds, and other species so designated by
19 statute.

20 (7) "Secretary" means the secretary of the department of health.

21 ~~((4))~~ (8) "Teleadvice" means the provision of any health
22 information, opinion, guidance, or recommendation concerning prudent
23 future actions that are not specific to a particular animal patient's
24 health, illness, or injury.

25 (9) "Telehealth" means the overarching term that encompasses all
26 uses of technology geared to remotely deliver health information or
27 education. Telehealth encompasses a broad variety of technologies and
28 tactics to deliver virtual medical, health, and education services.
29 Telehealth is not a specific service, but a collection of tools which
30 allow veterinarians to enhance care and education delivery.
31 Telehealth encompasses teleadvice, telemedicine, and teletriage.

32 (10) "Veterinary medication clerk" means a person who has
33 satisfactorily completed a board-approved training program developed
34 in consultation with the pharmacy quality assurance commission and
35 designed to prepare persons to perform certain nondiscretionary
36 functions defined by the board and used in the dispensing of legend
37 and nonlegend drugs (except controlled substances as defined in or
38 under chapter 69.50 RCW) associated with the practice of veterinary
39 medicine.

1 (~~(5)~~) (11) "Veterinary technician" means a person who is
2 licensed by the board upon meeting the requirements of RCW 18.92.128.

3 NEW SECTION. **Sec. 3.** This act takes effect July 1, 2027.

--- END ---
