

RCW 52.02.170 Ambulance service as public utility—Limitations—

Definition. (1) A fire protection district may establish an ambulance service to be operated as a public utility. However, the fire protection district may not provide for the establishment of an ambulance service utility that would compete with any existing private ambulance service unless the fire protection district determines that the area served by the fire protection district, or a substantial portion of that area, is not adequately served by an existing private ambulance service.

(2) In determining the adequacy of an existing private ambulance service, the fire protection district must take into consideration objective generally accepted medical standards and reasonable levels of service, which must be published by the fire protection district. If a fire protection district makes a preliminary conclusion that an existing private ambulance service is inadequate, the fire protection district must allow a minimum of sixty days for the private ambulance service to meet the generally accepted medical standards and accepted levels of service. If the fire protection district makes a second preliminary conclusion of inadequacy within a twenty-four month period, the fire protection district may immediately issue a call for bids or establish its own ambulance service utility and is not required to afford the private ambulance service another sixty-day period to meet the generally accepted medical standards and reasonable levels of service.

(3) A private ambulance service that is not licensed by the department of health, or has had its license denied, suspended, or revoked, is not entitled to a sixty-day period to demonstrate adequacy, and the fire protection district may immediately issue a call for bids or establish an ambulance service utility.

(4) A private ambulance service that abandons service in the area served by the fire protection district, or a substantial portion of the area served by the fire protection district, is not entitled to a sixty-day period to demonstrate adequacy, and the fire protection district may immediately issue a call for bids or establish an ambulance service utility. If a fire protection district becomes aware of an intent to abandon service at a future date, the fire protection district may immediately issue a call for bids or establish an ambulance service utility to avoid an interruption in service.

(5) For purposes of this section, "fire protection district" means a fire protection district established by the legislative authority of a city or town pursuant to RCW 52.02.160. [2017 c 328 § 2.]
