

RCW 89.12.200 Columbia Basin project—Intent—Allocation of conserved waters to deep well irrigated lands. It is the intent of the legislature that the department of ecology enter into agreements with the United States and Columbia Basin project irrigation districts regarding the allocation of water conserved from within areas currently served by project waters to deep well irrigated lands within the federal Columbia Basin project and for other authorized project beneficial uses. The department may provide the irrigation districts data identifying areas with the most serious groundwater depletions. The irrigation districts shall consider and may rely on the department's data and recommendations in making allocation decisions to offset groundwater withdrawals consistent with the operational constraints of the distribution system. [2004 c 195 § 2.]
