Finding—2008 c 198: "The legislature finds that it is in the public interest for public utility districts to develop renewable energy projects to meet requirements enacted by the people in Initiative Measure No. 937 and goals of diversifying energy resource portfolios. By developing more efficient and cost-effective renewable

energy projects, public utility districts will keep power costs as low as possible for their customers. Consolidating and clarifying statutory provisions governing various aspects of public utility district renewable energy project development will reduce planning time and expense to meet these objectives."
