

RCW 70A.15.2280 Source categories not required to have a permit
—Recommendations. The department shall prepare recommendations to reduce air emissions for source categories not generally required to have a permit under RCW 70A.15.2260. Such recommendations shall not require any action by the owner or operator of a source and shall be consistent with rules adopted under chapter 70A.214 RCW. The recommendations shall include but not be limited to: Process changes, product substitution, equipment modifications, hazardous substance use reduction, recycling, and energy efficiency. [2020 c 20 § 1096; 1991 c 199 § 304. Formerly RCW 70.94.163.]

Finding—1991 c 199: See note following RCW 70A.15.1005.
