Finding—Intent—1996 c 192: "The legislature finds that initial construction of a marina and some maintenance activities change the natural flow or bed of the salt or freshwater body in which the marina is constructed. Because of this disturbance, it is appropriate that plans for initial marina construction as well as some maintenance activities undergo the hydraulic project review and approval process established in chapter 75.20 RCW.

It is the intent of the legislature that after a marina has received a hydraulic project approval and been constructed, a renewable, five-year hydraulic project approval be issued, upon request, for regular maintenance activities within the marina." [1996 c 192 § 1.]
