with or without trawl doors, and may employ warps or cables to direct fish. Otter trawl nets are restricted to the following three categories:

(a) "Bottom trawl" means an otter trawl in which the otter boards or the footrope of the net contact the seabed, and includes Danish and Scottish seine gear.

(b) "Roller trawl" or "bobbin trawl" are identical, and mean an otter trawl with footropes equipped with rollers or bobbins made of wood, steel, rubber, plastic, or other hard material which protects the net during fishing on the seabed.

(c) "Pelagic trawl" means an otter trawl in which the otter boards may be in contact with the seabed but the footrope of the net remains above the seabed. Pelagic trawl nets may not have footropes protected at the trawl mouth with rollers, bobbins, or discs.

(2) "Beam trawl" shall be defined as a bag-shaped trawl net not utilizing weighted otter frames or otter doors when operated. The minimum mesh size for beam trawl nets is four and one-half inches in a food fish fishery and one and one-half inches in a shrimp fishery, unless otherwise provided.

(3) "Shrimp trawl" shall be defined as a tapered, funnel-shaped trawl net in which the mesh size is two inches or less in the intermediate and codend sections of the trawl. Otter doors or boards are used to spread the mouth of the net horizontally as it is towed. The mouth of the net is formed on the upper edge by a line to which floats are attached (headrope) and on the lower edge by a line which is usually weighted (footrope). Additional webbing is frequently attached to the codend section to prevent the net from chafing.

(4) "Scallop dredge" shall be defined as trawl gear with interlocking metal ring meshes, which is legal gear for harvest of scallops.

(5) "Codend" shall be defined as the terminal, closed end of a trawl net.

(a) Single-walled codend is a codend constructed of a single wall of webbing knitted with single-ply mesh, or with double-ply mesh (double twine tied into a single knot).

(b) Double-walled codend is a codend constructed of two walls of webbing. The double-walled portion of the codend must be tied knot-to-knot to the trawl net, and may not be longer than twenty-five trawl meshes or twelve feet, whichever is greater. The use of double-walled codends is unlawful in pelagic trawls, roller trawls, and bobbin trawls.

(6) "Chafing gear" shall be defined as webbing or other material attached to the bottom (underside) or around the codend of a trawl net to protect the codend from wear. Chafing gear must not be connected to the terminal (closed) end of the codend.

(7) "Trawl riblines" shall be defined as heavy ropes or lines that run down the sides, top or underside of a trawl net from the mouth of the net to the terminal end of the codend to strengthen the net during fishing.

(8) "Trawl mesh size" shall be defined as the distance between the inside of one knot and the inside of the opposite vertical knot in trawl mesh. Minimum trawl mesh size requirements are met if a wedge of legal size can be

passed without undue force through sixteen of twenty sets of two meshes each of wet mesh in the codend.

WAC 220-20-040 General provisions--Rearing and planting food fish.

(1) It shall be unlawful for any person, group, corporation, association, or governmental entity to plant or release any food fish into the waters of the state of Washington without first obtaining a permit from the department of fisheries. No permit shall be issued unless the following time periods are observed, and the following information provided the department prior to planting.

(a) Thirty days prior to obtaining food fish or food fish eggs, fry, or fingerlings, or importing the same with the eventual intent to plant in the waters of the state of Washington, the person, group, corporation, association, or governmental entity so intending to plant shall provide the department information as to the source of the food fish or food fish eggs, fry, or fingerlings, species, race, and time and place for the proposed release or other disposition and the size of the food fish to be planted.

(b) Thereafter, the department shall examine the provided information and determine if a permit for the planting of the food fish should be issued. If a proposed plant presents an important conflict or competition to the established stocks in the waters to be planted, conflicts with the department's overall management plan for the waters to be planted, would cause a significant decrease in the abundance of stocks already present, or would significantly inhibit the ability to harvest existing stocks, a permit for planting shall not be issued.

(c) Thirty days prior to planting, and within ten days of the actual plant, the food fish to be released must be made available to the department for inspection for disease. If the department's representative so inspecting is not satisfied the food fish are disease-free, or otherwise

in a condition specified in paragraph (b) of this regulation, the food fish shall not be released in the waters of the state, and any prior departmental approval for such planting is automatically withdrawn. The department will consider a certification by department-approved pathologists that the food fish to be released are disease-free in lieu of actual department inspection.

(d) Any person, group, corporation, association or governmental entity intending to release food fish in the waters of the state, shall report immediately to the department the outbreak of any disease among the food fish, food fish eggs, fry or fingerlings intended to be released. If such outbreak presents a threat to such fishery resource of the state, the department may immediately order such action necessary to protect the state's fisheries, including quarantine or destruction of stocks, sterilization of closures and facilities, cessation of activities, and disposal of the infected fish in a manner satisfactory to the department.

(e) No food fish covered by a permit issued under this regulation shall be branded, tattooed, tagged, fin-clipped or otherwise marked for identification without prior approval by the department.

(f) No facilities shall be constructed or operated for the purpose of food fish propagations or rearing without first obtaining a permit from the department. No permit shall be issued unless the following information is provided the department prior to beginning construction of such facility:

(i) The person, group, corporation, association, or governmental entity so intended to construct such facility shall provide the department information as to the species to be produced in the facility or otherwise affected by the facility, and a general plan of times and places for the proposed releases or other disposition and the size, age, and maturity of the food fish to be released. Functional plans for construction of such facility shall also be provided to the department.

(ii) Thereafter, the department shall examine the provided information and determine if the permit for construction of the facility shall be issued. If the proposed planting, release, or operational scheme presents an important conflict or competition to established stocks of food fish, conflicts with the department's overall management plan for the waters or areas to be planted, would cause a significant decrease in the abundance of stocks already present, or will significantly inhibit the ability to harvest existing stocks, a permit for construction will not be issued.

(iii) A permit for construction or operation of a propagation facility will be revoked if any food fish are planted, released, or otherwise disposed of by any person, group, corporation, association or governmental entity which is the holder of a construction or operation permit under this paragraph if the holder does not, prior to planting or releasing, provide the department with the additional information and secure the additional permits required by this regulation.

(g) An advisory committee of potentially affected groups will be established to provide technical input.

[Order 76-96, § 220-20-040, filed 9/23/76.]

WAC 220-20-045 Scientific permits. (1) It shall be unlawful for any person, group, corporation, association, or governmental entity to conduct any scientific study involving the handling, collection, or release of food fish or shellfish on the beaches or in the waters of the state of Washington without first obtaining a permit from the department of fisheries, and it shall be unlawful to fail to comply with any of the provisions of the permit.

(a) A request for such a permit must be received 30 days prior to the date such study, collection, release, or research is started.

(b) Each request for a permit must be accompanied by the following information:

(i) A study title.

(ii) An introduction describing the management problems to be addressed and why resolution is necessary.

(iii) An objective(s) for the proposed project including defining an identifiable end point or conclusion toward which efforts are to be directed.

(iv) A justification which identifies the user(s) of the information and indicates how the findings will be used.

(v) A procedure which explains the approach or plan of action and which provides the organizational framework and logical sequence of events that will lead to the attainment of the study objectives.

(vi) A location of the study area.

(vii) An identification of supervisory and technical personnel responsible for the study.

(c) A final report must be submitted to the department upon completion of the study, research, collection, or release, and interim reports will be required.

(d) Permits will normally be granted for requests which increase the data base, increase or maximize the fishery resource, avoid damage to the various resources and do not unnecessarily duplicate previous research.

(e) Continuing studies or research or other scientific projects may be extended annually by concurrence of the director.

(f) An advisory committee of potentially affected groups will be established to provide technical input.

(5) It shall be unlawful to take from any building, scow, boat, live-box, container, trap, net or vehicle any caught or impounded shellfish with intent to deprive the rightful owner of such shellfish.

(6) All geoduck and mechanical clam harvester vessels shall be issued an identification number. This number will be placed in a visible location on each side of the vessel and on the top of the cabin or deck awning to be visible from the air. A sign board or banner arranged so the numbers can be seen at all times from directly overhead may be substituted if the vessel does not have a fixed roof. WAC 220-52-018 Clams—Gear. It shall be unlawful to take, dig for or possess clams, geoducks, or mussels taken for commercial purposes from any of the tidelands in the state of Washington except with a pick, mattock, fork or shovel operated by hand, except that permits for the use of mechanical clam digging devices to take clams other than geoducks may be obtained from the director of fisheries subject to the following conditions:

(1) Any or all types of mechanical devices used in the taking or harvesting of shellfish must be approved by the director of fisheries.

(2) A separate permit shall be required for each and every device and the permit shall be attached to the specific unit at all times.

(3) All types of clams to be taken for commercial use must be of legal size and in season during the proposed operations unless otherwise provided in specially authorized permits for the transplanting of seed to growing areas or for research purposes.

(4) The holder of a permit to take shellfish from tidelands by mechanical means shall limit operations to privately owned or leased land.

(5) The taking of clams from bottoms under navigable water below the level of mean lower low water by any mechanical device shall be prohibited except as authorized by the director of fisheries. Within the enclosed bays and channels of Puget Sound, Strait of Juan de Fuca, Grays Harbor and Willapa Harbor, the operators of all mechanical devices shall confine their operations to bottoms leased from the Washington department of natural resources, subject to the approval of the director of fisheries. The harvesting of shellfish from bottoms of the Pacific Ocean westward from the western shores of the state shall not be carried out in waters less than two fathoms deep at mean lower low water. In said waters more than two fathoms deep the director of fisheries may reserve all or certain areas thereof and prevent the

taking of shellfish in any quantity from such reserves established on the ocean bottoms.

(6) Noncompliance with any part of these regulations or with special requirements of individual permits will result in immediate cancellation of and/or subsequent nonrenewal of all permits held by the operator.

(7) Applications must be made on the forms provided by the department of fisheries and permits must be in the possession of the operator before digging commences.

(8) All permits to take or harvest shellfish by mechanical means shall expire on December 31 of the year of issue.

(9) All mechanical clam harvesting machines must have approved instrumentation that will provide deck readout of water pressure.

(10) All clam harvest machines operating on intertidal grounds where less than ten percent of the substrate material is above 500 microns in size must be equipped with a propeller guard suitable for reducing the average propeller wash velocity at the end of the guard to approximately twenty-five percent of the average propeller wash velocity at the propeller. The propeller guard must also be positioned to provide an upward deflection to propeller wash.

(11) Clam harvest machines operating in fine substrate material where less than ten percent of the substrate material is above 500 microns in size, shall have a maximum harvest head width of 3 feet (overall) and the maximum pump volume as specified by the department of fisheries commensurate with the basic hydraulic relationship of 828 gpm at 30 pounds per square inch, pressure to be measured at the pump discharge.

(12) Clam harvest machines operating in coarser substrate material where more than ten percent of the substrate material is above 500 microns in size, shall have a maximum harvest head width of 4 feet (overall) and a maximum pump volume as specified by the department of fisheries commensurate with a basic hydraulic relationship of 1,252 gpm at 45 pounds per square inch, pressure to be measured at the pump discharge.

(13) All clam harvest machine operators must submit accurate performance data showing revolutions per minute, gallons per minute, and output pressure for the water pump on their machine. In addition, they shall furnish the number and sizes of the hydraulic jets on the machines. If needed, the operator shall thereafter modify the machine (install a sealed pressure relief valve) as specified by the department of fisheries to conform with values set forth in either WAC 220-52-018 (11) or (12) of this section. Thereafter, it shall be illegal to make unauthorized changes to the clam harvester water pump or the hydraulic jets. Exact description of the pump volume, maximum pressure and number and size of the hydraulic jet for each harvester machine shall be included in the department of fisheries' clam harvest permit.

(14) All clam harvest machines shall be equipped with a 3/4-inch pipe thread tap and valve that will allow rapid coupling of a pressure gauge for periodic testing by enforcement personnel.

(15) Each mechanical clam harvester must have controls so arranged and situated near the operator which will allow the operator to immediately cut off the flow of water to the jet manifold without affecting the capability of the vessel to maneuver.

[Statutory Authority: RCW 75.08.080, 78-09-071 (Order 78-66), § 220-74-015, filed 8/25/78.]

WAC 220-74-020 Priorities. (1) It is the duty of the department to assure that egg requirements for state hatcheries and natural spawning escapements are satisfied. Once these requirements have been met, eggs surplus to these requirements will be provided to voluntary cooperative salmon culture programs under the supervision of the department, to qualified transferees and to qualified exchangees. Once these requirements are satisfied, the eggs may be made available for sale under chapter 220-74 WAC.

Qualified transferees are governmental hatcheries in Washington and Oregon or hatcheries of federally approved tribes in Washington to whom eggs are moved, not sold, under the Interlocal Cooperation Act, chapter 39.34 RCW, for release or experiments designed to benefit the citizens of the state and private or other governmental laboratories to whom eggs are moved, not sold, for experiments designed to benefit the citizens of the state. Qualified exchangees are governmental entities who are provided eggs by the department and from whom the department obtains eggs on a mutually agreeable basis and for the benefit of the citizens of the state.

(2) To encourage the use of surplus live salmon eggs available for sale for the optimum benefit of the citizens

of the state, the following priorities will be followed, within practical limitations, in distributing surplus live salmon eggs resulting from returns to artificial production facilities:

(a) Sales to in-state aquaculturists when the eggs would be hatched, the resulting fry reared, by a person or corporation engaged in the fish industry in this state.

(b) Sales to private Oregon sea ranchers where fish are to be released for migration from Oregon sites to the Pacific Ocean and thus subject to the public capture fisheries of the state of Washington.

(c) Sales to the hatcheries located in California and Alaska where the fish are to be released at sites located in those states for migration to the Pacific Ocean for harvest by public capture fisheries and thus subjected to public capture by fishermen of the state of Washington.

(d) Sales to other state, federal and private aquaculture programs which neither qualify as qualified transferees or exchangees nor meet the requirements of the first three priorities.

(e) Sales to foreign governmental entities which are not qualified transferees or exchangees and to other foreign entities (corporations).

[Statutory Authority: RCW 75.08.080, 79-10-013 (Order 79-75), § 220-74-020, filed 9/7/79; 78-09-071 (Order 78-66), § 220-74-020, filed 8/25/78.]

WAC 220-74-022 Certain sales disallowed. (1) Sales of surplus eggs as described in WAC 220-74-020 shall not be allowed where the person or corporation seeking to buy said eggs has not paid all fees and taxes due and owing to the state of Washington.

(2) Notwithstanding the provisions of chapter 220-74 WAC, the department reserves the right to refuse to sell surplus salmon eggs to any purchaser for good cause.

[Statutory Authority: RCW 75.08.080, 84-05-046 (Order 84-11), § 220-74-022, filed 2/21/84; 79-10-013 (Order 79-75), § 220-74-022, filed 9/7/79.]

WAC 220-74-025 Purchases. Purchases of surplus salmon eggs will occur within the following framework:

(1) The price of eggs sold during a spawning season will be determined by the director after reviewing the results of an annual assessment of existing marketing conditions. The price will be the same for all purchases.

(2) Within priority 1, requests for available eggs will be satisfied in accordance with the earliest date of receipt of the application for a salmon aquaculture permit by the department (WAC 220-76-010): *Provided*, That a firm request for eggs is received prior to September 1. All firm requests for eggs received after September 1 will be satisfied in order of their receipt on an eggs-available basis.

(3) Within priority 1, up to one million eggs will be offered to the first qualified applicant before selling eggs to the next applicant. If eggs are still available after each applicant has had an opportunity to buy one million eggs, the procedure will be repeated until all requests within this priority have been satisfied.

(4) Within priorities 2 and 3, requests for eggs will be satisfied in accordance with the firm requests that have

the greatest likelihood of contributing to the public capture fisheries of the state of Washington.

(5) Within priorities 4 and 5, requests for eggs will be satisfied in accordance with the earliest firm requests for eggs received.

(c) Use the vessel as a commercial or charter salmon fishing vessel or as a salmon delivery vessel with the intent to deliver fish in another state, in waters outside the three mile limit off the Washington coast in an area from the southern jetty at the mouth of the Columbia River north to the United States/Canadian border.

(2) Failure to comply with the provisions of subsection (1) of this section will cause the state substantial damage and the amount of damage will be difficult to ascertain precisely. The vessel owner will pay to the department of fisheries as liquidated damages, in addition to all other sums payable hereunder, two hundred

(3) The department shall have relief by injunction to prevent the operation of the vessel for the purposes prohibited in subsection (1) of this section, together with any other relief provided by law. (4) The vessel owner and any subsequent transferee assigns to the department any and all rights to enforce the provisions of subsection (1) of this section. At any time the department may inspect the vessel for the limited purpose of ascertaining whether the vessel is being used for any purpose or use in violation of subsection (1) of this section. If any subsequent transferee is a treaty Indian, the department will require proof of treaty status prior to approving a transfer of vessel ownership or use. Nonapplicability of use restrictions to treaty Indians will not affect imposition of use restrictions to non-Indian transferees, owners or users of any vessel.

WAC 220-100-010 Definitions. The definitions of the words and terms of WAC 197-11-700 through 197-11-799 are made a part of this chapter along with the following addition: Fisheries means Washington department of fisheries.

[Statutory Authority: RCW 75.08.080. 84-19-053 (Order 84-144), § 220-100-010, filed 9/18/84; Order 76-40, § 220-100-010, filed 5/25/76.]

WAC 220-100-020 Impact of SEPA on fisheries. Fisheries fully endorses the intent and purpose of SEPA and will make every effort to implement and fulfill the intent and requirements of SEPA and the SEPA rules. The capacity of fisheries to provide full service to the public and other agencies is limited by funds and manpower. Fisheries will make every effort to implement SEPA in the best manner possible with the resources available.

[Statutory Authority: RCW 75.08.080. 84-19-053 (Order 84-144), § 220-100-020, filed 9/18/84; 78-05-029 (Order 78-17), § 220-100-020, filed 4/17/78; Order 76-40, § 220-100-020, filed 5/25/76.]

WAC 220-100-030 Purpose. (1) The purpose of this chapter is to implement chapter 197-11 WAC, SEPA rules, as applicable to fisheries.

(2) These policies and procedures are developed to implement SEPA in a manner which reduces duplication, establishes effective and uniform guidelines, encourages public involvement, and promotes certainty with respect to the requirements of the act.

(3) These policies and procedures are not intended to cover compliance by fisheries with respect to the National Environmental Policy Act of 1969 (NEPA). In those situations where fisheries is required by federal law or regulations to perform some element of compliance with NEPA, compliance will be governed by the applicable federal statute and regulations.

[Statutory Authority: RCW 75.08.080. 84-19-053 (Order 84-144), § 220-100-030, filed 9/18/84; Order 76-40, § 220-100-030, filed 5/25/76.]

WAC 220-100-040 Scope and coverage of this chapter. (1) It is the intent of fisheries that compliance with this chapter shall constitute complete procedural compliance with SEPA for all actions as defined in WAC 197-11-704.

(2) This chapter applies to all actions as defined in WAC 197-11-704 and applies to all activities of fisheries. Furthermore, although these guidelines normally do

not apply to actions of fisheries exempted under WAC 197-11-800 and 197-11-835, fisheries accepts the responsibility of attempting to follow the intent of SEPA and its decision making process for exempt actions.

(3) To the fullest extent possible, fisheries shall integrate procedures required by this chapter with existing planning and licensing procedures. These procedures should be initiated early, and undertaken in conjunction with other governmental operations to avoid lengthy time delays and unnecessary duplication of effort.

[Statutory Authority: RCW 75.08.080. 84-19-053 (Order 84-144), § 220-100-040, filed 9/18/84; 78-05-029 (Order 78-17), § 220-100-040, filed 4/17/78; Order 76-40, § 220-100-040, filed 5/25/76.]

WAC 220-100-045 Agency policy--Substantive authority and mitigation. (1) The overriding policy of fisheries is to avoid or mitigate adverse environmental impacts which may result from its decisions. This policy results from:

(a) The legislated duty of fisheries to preserve, protect and perpetuate the food fish and shellfish resources of the state in a manner that does not impair the resource (RCW 75.08.012); and

(b) Recognition of the fact that each person has a fundamental and inalienable right to a healthful environment and that each person has a responsibility to contribute to the preservation and enhancement of the environment (RCW 43.21C.020(31)).

(2) If an action is subject to SEPA, including an activity or activities requiring a permit from fisheries, and is reasonably likely to have an adverse environmental impact as identified in an environmental document, fisheries will:

(a) Require reasonable alternatives to the action and/or proven measures which will mitigate or eliminate the identified potential adverse impact, and make such alternatives and/or proven mitigation measures conditions of fisheries approval; or

(b) Deny the proposal if significant adverse impacts as identified in a final or supplemental environmental impact statement prepared under chapter 197-11 WAC are not satisfactorily avoided or mitigated by proven techniques.

[Statutory Authority: RCW 75.08.080. 84-19-053 (Order 84-144), § 220-100-045, filed 9/18/84; 78-05-029 (Order 78-17), § 220-100-045, filed 4/17/78.]

WAC 220-100-055 Timing of the SEPA process.

(1) The environmental review process will normally begin upon receipt of a determination of nonsignificance (DNS), determination of significance (DS), scoping notice, or draft environmental impact statement (DEIS) when another agency is the lead agency. When fisheries is the lead agency for nonagency actions, review will normally begin upon receipt of a complete permit application and a complete environmental checklist. For agency actions, environmental review will normally begin when the proposed action is sufficiently developed to allow preliminary decisions.

(2) Upon written request of an applicant, preliminary environmental review will be conducted prior to receipt

of detailed project plans and specifications. In such instances, the applicant shall submit information judged by fisheries to be sufficient to make a preliminary review.

(3) The preliminary review will be advisory only and not binding upon fisheries. Final review and determination will be made only upon receipt of detailed project plans and specifications.

[Statutory Authority: RCW 75.08.080. 84-19-053 (Order 84-144), § 220-100-055, filed 9/18/84.]

WAC 220-100-060 Summary of information which may be required of a private applicant. (1) The applicant for each project for which fisheries is the lead agency shall submit a complete environmental checklist along with a complete application for the required approval.

(2) After review of the environmental checklist, fisheries may require the applicant to submit additional information necessary to properly evaluate the potential environmental impacts of the project. Field investigation or research may be required of the applicant or conducted by fisheries at the applicant's cost.

(3) A draft and final EIS is required for each project for which a determination is made that the proposal will have a probable significant adverse impact on the environment. The applicant may prepare the EIS if judged by fisheries to be qualified, have fisheries develop the EIS, or hire a consultant to do so. In any case, the EIS shall be prepared under the direction of the responsible official at the expense of the applicant and final approval is that of the responsible official. Cost of preparing the EIS shall be paid by the applicant and shall include fees of the consultant, fisheries consultation time and cost of any required materials. If the applicant chooses to hire a consultant to prepare the EIS, the consultant shall be chosen from a list of consultants provided by fisheries. A performance bond in an amount specified by fisheries may be required of the applicant to ensure payment of fisheries' expenses. Private applicants are encouraged to be involved in the EIS preparation process.

(4) A supplemental EIS shall be prepared as an addition to either the draft or final EIS if fisheries decides that:

(a) There are substantial changes to a proposal which will have a probable significant adverse environmental impact; or

(b) There is significant new information relative to the probable significant environmental impact of a proposal.

(c) Its written comments on the DEIS warrant additional discussion for the purposes of its action than that found in the lead agency's FEIS.

The provisions of subsection (3) of this section except for the first sentence, also pertain to a supplemental EIS or addendum.

(5) Upon the written request of an applicant for a project for which fisheries is the lead agency, fisheries will consider initiating environmental review and preparation of an EIS at the conceptual stage as opposed to the final detailed design stage.

[Statutory Authority: RCW 75.08.080. 84-19-053 (Order 84-144), § 220-100-060, filed 9/18/84; 78-05-029 (Order 78-17), § 220-100-060, filed 4/17/78; Order 76-40, § 220-100-060, filed 5/25/76.]

WAC 220-100-065 Assumption of lead agency status. (1) Whenever fisheries feels that a DNS issued by another lead agency is inappropriate and that the proposal in question could cause significant harm to the resources under its jurisdiction, fisheries will assume lead agency status per WAC 197-11-948.

(2) Within ten days of assuming lead agency status, fisheries will notify the proponent of the proposal in writing as to the reasons for its assumption of lead agency status.

(3) Prior to preparation of an EIS for the proposal, fisheries will consult with the proponent and give the proponent an opportunity to modify or change the proposal in such a way that an EIS may not be necessary as outlined in WAC 197-11-360(4).

[Statutory Authority: RCW 75.08.080. 84-19-053 (Order 84-144), § 220-100-065, filed 9/18/84.]

WAC 220-100-070 Designation of responsible official. Under normal circumstances, the responsible official is the habitat management division chief. The responsible official shall carry out duties and functions for the purpose of assuring fisheries compliance with SEPA and SEPA guidelines. The responsible official may delegate duties and functions assigned under this chapter and chapter 197-11 WAC; the responsible official alone, however, is wholly responsible for proper accomplishment of such duties and functions. When significant involvements of fisheries converge at a level higher than the habitat management division chief, the deputy director or director may assume the role of responsible official.

[Statutory Authority: RCW 75.08.080. 84-19-053 (Order 84-144), § 220-100-070, filed 9/18/84; Order 76-40, § 220-100-070, filed 5/25/76.]

WAC 220-100-075 Mitigated DNS. (1) An applicant may ask fisheries whether issuance of a DS is likely for a proposal. This request for early notice must:

- (a) Be written;
- (b) Follow submission of a permit application and environmental checklist for a nonexempt proposal for which fisheries is lead agency; and
- (c) Precede fisheries actual threshold determination for the proposal.

(2) The responsible official shall respond to the request within ten working days of receipt of the letter; the response shall:

- (a) Be written;
- (b) State whether fisheries is considering issuance of a DS;
- (c) Indicate the general or specific area(s) of concern that led fisheries to consider a DS; and

(d) State that the applicant may change or clarify the proposal to mitigate the impacts indicated in the letter, revising the environmental checklist as necessary to reflect the changes or clarifications.

(3) Fisheries shall not continue with the threshold determination until receiving a written response from the applicant changing or clarifying the proposal or asking that the threshold determination be based on the original proposal.

(4) If the applicant submits a changed or clarified proposal, along with a revised environmental checklist, fisheries will make its threshold determination based on the changed or clarified proposal.

(a) If fisheries response to the request for early notice indicated specific mitigation measures that would remove all probable significant adverse environmental impacts, and the applicant changes or clarifies the proposal to include all of those specific mitigation measures, fisheries shall issue a DNS and circulate the DNS for comments as in WAC 197-11-340(2).

(b) If fisheries indicated general or specific areas of concern, but did not indicate specific mitigation measures that would allow it to issue a DNS, fisheries shall determine if the changed or clarified proposal may have a probable significant environmental impact, issuing a DNS or DS as appropriate.

(5) Fisheries may specify mitigation measures that would allow it to issue a DNS without a request for early notice from an applicant. If it does so, and the applicant changes or clarifies the proposal to include those measures, fisheries shall issue a DNS and circulate it for review under WAC 197-11-340(2).

(6) When an applicant changes or clarifies the proposal, the clarifications or changes may be included in written attachments to the documents already submitted. If the environmental checklist and supporting documents would be difficult to read and/or understand because of the need to read them in conjunction with the attachment(s) fisheries may require the applicant to submit a new checklist.

(7) Fisheries may change or clarify features of its own proposals before making the threshold determination.

(8) Fisheries' written response under subsection (2) of this section shall not be construed as a determination of significance. In addition, preliminary discussion of clarification of or changes to a proposal, as opposed to a written request for early notice, shall not bind fisheries to consider the clarification or changes in the threshold determination.

(9) When an applicant submits a changed or clarified proposal pursuant to this section, it shall be considered part of the applicant's application for a permit or other approval for all purposes. Unless fisheries' decision expressly states otherwise, when a mitigated DNS is issued for a proposal, any decision approving the proposal shall be based on the proposal as changed or clarified pursuant to this section.

(b) Notifying individuals with known interest in a certain proposal or in the type of proposal being considered;

Except as modified by this chapter, fisheries adopts the SEPA guidelines as adopted by the department of ecology (chapter 197-11 WAC) and as modified or amended from time to time. Substantial compliance with these guidelines shall constitute compliance with this chapter.

WAC 220-110-010 Purpose. This chapter establishes regulations for the construction of any form of hydraulic project or other work that will use, divert, obstruct, or change the natural flow or bed of any river or stream, or that will utilize any of the salt or fresh waters of the state, or materials from the stream beds and require approval under RCW 75.20.100, and establishes procedures for obtaining a hydraulic project approval. This chapter incorporates criteria the departments have developed for the protection of fish life which are used for project review and conditioning hydraulic project approvals. It is not intended that the following regulations will automatically apply to each hydraulic project approval. The regulations are intended to provide notice of the criteria and guidelines generally utilized to administer RCW 75.20.100. This chapter shall be administered by the department of fisheries and the department of game as required under RCW 75.20.100.

(9) "Extreme low tide" means the lowest level reached by a receding tide.

(10) "Filter blanket" means a layer or combination of layers of pervious materials (mineral or man-made) designed and installed in such a manner as to provide drainage, yet prevent the movement of soil particles due to flowing water.

(11) "Fish life" means all fish species, including but not limited to food fish, shellfish, and game fish.

(12) "Food fish" means those species of the classes Osteichthyes, Agnatha, and Chondrichthyes that shall not be fished for except as authorized by rule of the director of fisheries. The term "food fish" includes all stages of development and the bodily parts of food fish species.

(13) "Freshwater area" means those state waters and associated beds below the ordinary high water line that are upstream of river mouths including all lakes, ponds, and streams.

(14) "Game fish" means those species of the class Osteichthyes that shall not be fished for except as authorized by rule of the state game commission.

(15) "General provisions" means those provisions that are contained in every hydraulic project approval.

(16) "Hydraulic project" means construction or other work that will use, divert, obstruct, or change the natural flow or bed of any river or stream, or that will utilize any of the salt or fresh waters of the state, or materials from the stream beds.

(18) "Hydraulic project approval" (HPA) means a written approval signed by the director of the department of fisheries or the director of the department of game, or employees designated and authorized to do so.

(19) "Mean lower low water" or "MLLW" means the 0.0 tidal elevation. It is determined by averaging each days' lowest tide at a particular location over a period of 18.6 years. It is the datum base for tide levels and vertical references in the saltwater area.

(20) "Mitigation" means:

(a) Avoiding the impact altogether by not taking a certain action or parts of an action and/or;

(b) Minimizing impacts by limiting the degree or magnitude of the action and its implementation and/or;

(c) Rectifying the impact by repairing, rehabilitating, or restoring the affected environment and/or;

(d) Reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action and/or;

(e) Compensating for the impact by replacing, enhancing, or providing substitute resources or environments; and/or

(f) Monitoring the impact and taking appropriate corrective measures.

(21) "Natural conditions" means those conditions which arise in or are found in nature. This is not meant to include artificial or manufactured conditions.

(22) "Ordinary high water line" means the mark on the shores of all waters that will be found by examining

the bed and banks and ascertaining where the presence and action of waters are so common and usual and so long continued in ordinary years, as to mark upon the soil a character distinct from that of the abutting upland, in respect to vegetation: *Provided*, That in any area where the ordinary high water line cannot be found the ordinary high water line adjoining saltwater shall be the line of mean higher high water and the ordinary high water line adjoining freshwater shall be the line of mean high water.

This also includes any natural watercourses which have been altered by man. This definition is not meant to include irrigation ditches, canals, storm water run-off devices, or other entirely artificial watercourses except where they exist in a natural watercourse which has been altered by man.

(25) "Saltwater area" means those state waters and associated beds below the ordinary high water line and downstream of river mouths.

(26) "Shellfish" means those species of marine and freshwater invertebrates that shall not be taken except as authorized by rule of the director of fisheries. The term "shellfish" includes all stages of development and the bodily parts of shellfish species.

(27) "Special provisions" means those conditions that are a part of the hydraulic project approval, but are site or project specific, and are used to supplement or amend the technical provisions.

(28) "Technical provisions" means those conditions that are a part of the hydraulic project approval and apply to most projects of that nature.

(29) "Watercourse" means any portion of a channel, bed, bank, or bottom within the ordinary high water line of waters of the state. (2) If a person commences construction on any hydraulic project or other work subject to chapter 220-110 WAC without having first obtained written approval of the appropriate department as to the adequacy of the means proposed for the protection of fish life or if any person fails to follow or carry out any of the requirements or provisions as are made a part of such approval, the person is guilty of a gross misdemeanor.

(3) A person seeking hydraulic project approval shall submit to the department having jurisdiction of the site general plans for the overall project, complete plans and specifications of the proposed construction or work within the mean higher high water line in salt water or within the ordinary high water line in fresh water and complete plans and specifications for the proper protection of fish life.

(4) Application for hydraulic project approval shall be submitted to the appropriate department listed below. The department having jurisdiction over a particular site will cooperate with the other department in order to protect all species of fish. If a department receives the application concerning a site not in its jurisdiction, it will transmit the application to the appropriate department within three days, and the applicant will be notified.

(a) For projects located in the following areas, an application shall be submitted to the Department of Fisheries, Habitat Management Division, 115 General Administration Building, Olympia, WA 98504, (206) 753-6650:

(i) Western Washington, which includes all lands lying west of the summit of the Cascade Mountains;

(ii) All mainstem Snake River projects and all mainstem Columbia River projects downstream from Chief Joseph Dam.

(b) For projects located in the following areas, an application shall be submitted to the Department of Game, Habitat Management Division, 600 North Capitol Way, Olympia, WA 98504, (206) 753-5897:

Eastern Washington, which includes all lands lying east of the summit of the Cascade Mountains, including Klickitat County except those areas in WAC 220-110-030 (4)(a)(ii).

(c) The departments reserve the right to exchange jurisdiction on individual projects.

(d) Receipt of any one of the following documents at the addresses listed in (a) and (b) of this subsection constitutes application for a hydraulic project approval:

(i) A completed hydraulic project application submitted to the appropriate department;

(ii) A completed forest practice application submitted to the department of natural resources, if the hydraulic project is part of a forest practice as defined in WAC 222-16-010(19); or

(iii) A section 10 or 404 public notice circulated by the Army Corps of Engineers.

(5) The appropriate department shall grant or deny approval within forty-five calendar days of the receipt of a complete application and notice of compliance with any applicable requirements of the State Environmental

Policy Act. The departments shall strive to process hydraulic applications in less than thirty days. The forty-five day requirement shall be suspended if:

(a) An incomplete application is received;

(b) The site is physically inaccessible for inspection;

(c) After ten working days of receipt of the application, the applicant remains unavailable or unable to arrange for a timely field evaluation of the proposed project;

(d) The applicant requests delay.

(6) Immediately upon determination that the forty-five day period is suspended, the appropriate department shall notify the applicant in writing of the reasons for the delay.

(7) Verbal applications may be accepted in lieu of written applications for emergency work to repair existing structures, move obstructions, restore banks, or protect property that is subject to immediate danger by weather, flow, or other natural conditions.

(8) The departments may accept written or verbal requests for time extensions, renewals, or alterations of an existing approval.

(9) Each approval is specific to a watercourse, stating the exact location of the project site, and consists of general, technical, and special provisions.

(10) The hydraulic project approval or exact copy, except verbal approvals, shall be on the project site when work is being conducted and shall be immediately available for inspection.

(11) Approvals may be granted for a period of up to five years. The permittee must demonstrate substantial progress on construction of that portion of the project relating to the hydraulic approval within two years of the date of issuance.

(12) A hydraulic project application will be denied when, in the judgment of the department having jurisdiction over the site, the project is directly or indirectly harmful to fish life unless adequate mitigation can be assured by conditioning the approval or modifying the proposal. If approval is denied the appropriate department will provide the applicant, in writing, a statement of the specific reason(s) why and how the proposed project would adversely effect fish life.

(13) Hydraulic project approvals may have specific time limitations on project activities to protect fish life.

(14) Hydraulic project approvals do not exempt the applicant from obtaining the appropriate permits and following the rules or regulations of other local, state, and federal agencies.

(15) Administration of this chapter shall be conducted in compliance with the State Environmental Policy Act, chapter 43.21C RCW, chapter 197-10, 220-100 or 232-18 WAC.

(16) In addition to hydraulic project approval, placing rock, concrete, tires, or other materials on the beds in the saltwater area for the purpose of improving fish habitat requires a permit under WAC 220-20-040 for artificial reef construction.

(17) In addition to hydraulic project approval, mechanical or hydraulic clam harvesters shall be governed by the provisions of WAC 220-52-018 and shall obtain

and comply with the provisions of the department of fisheries' permit to operate a clam harvesting machine.

(18) The hydraulic code does not apply to the actual exercise of water rights (e.g. the amount of diversion or stream flow) which matters are generally regulated by the Washington department of ecology and hydraulic project approvals will not be used to limit the amount of water diverted under a water right. However, construction of structures or placement of devices or other work within waters of the state which will use, divert, obstruct or change the natural flow or bed of any river or stream, or that will utilize any of the waters of the state in order to take water allowed by a water right require hydraulic project approval. Regulation of water flow from a permanent irrigation structure by operating valves, or manipulating stop logs, check boards or head boards, does not require hydraulic project approval.

(19) Each approval shall contain the following general provisions:

(a) This approval is to be available on the job site at all times and its provisions followed by the permittee and operator performing the work.

(b) The person(s) to whom this approval is issued may be held liable for any loss or damage to fish life or habitat which results from failure to comply with the provisions of this approval.

(c) Failure to comply with the provisions of this approval is a gross misdemeanor, possibly punishable by fine and/or imprisonment.

(d) The departments reserve the right subject to the holders opportunity to a hearing to contest agency actions as provided by the Administrative Procedure Act, chapter 34.04 RCW, to make additional restrictions or conditions or revoke the approval when new information shows such action is necessary by the departments for the protection of fish life.

(e) These departments cannot be held liable for any property damage which might occur as a result of this project, except where damages are proximately caused by actions of the departments.

(f) This approval pertains only to the provisions of the fisheries and game codes. Additional authorization from other public agencies may be necessary for this project.

(20) Cleaning, adjusting, operation and maintenance of existing irrigation diversion structures by use of hand-held tools may be accomplished without first securing a written hydraulic project approval. For these purposes, this subsection, or the latest edition of the *Irrigation and Fish* pamphlet issued by the departments of fisheries and game, shall serve as the hydraulic project approval. This does not include the use of equipment as defined in WAC 220-110-020(8). If adverse impacts to fish life occur, the project shall immediately cease, and an application for approval shall be made in accordance with WAC 220-110-030 (1), (2), (3), (4).

(21) Aquatic weed control by hand pulling or hand tools does not require hydraulic project approval. This does not include the use of equipment as defined in WAC 220-110-020(8).

General fish screening criteria are applicable to rotary drum screens, traveling screens, belt screens and stationary flat plate screens.

Screens shall be designed, constructed and located as follows:

(1) Structure placement—flowing waters (rivers and creeks):

(a) Where physically practical, the screen shall be constructed at the diversion entrance parallel to the flow with the screen face continuous with the adjacent

bankline. The bankline shall be altered, if necessary, to prevent eddies and maintain parallel velocities past the screen; or

(b) Where site or hydraulic conditions make installation of fish screens at the diversion entrance physically impractical, screens may be located in the conduit or diversion canal at a more suitable location. Such screens shall be provided with bypass systems to efficiently collect juvenile fish and safely transport them back to the flowing water body. Such screens shall also be constructed at an angle not to exceed 45° (degrees) from the approaching flow with the downstream end of the screen terminating at the bypass system entrance.

(2) Structure placement—nonflowing waters (lakes and reservoirs):

In nonflowing waters, diversion structures and associated fish screens will be constructed offshore to minimize fish contact.

(3) Approach velocity (local velocity component perpendicular to the screen face) shall not exceed:

(a) 0.5 feet/second for chinook and coho salmon fry and all fingerling salmon (fingerling minimum length: 60 mm); or

(b) 0.2 feet/second for pink, chum and sockeye salmon and gamefish fry;

(c) When screens are not readily accessible for cleaning, the screens shall be designed with an approach velocity of 0.05 feet/second.

(4) Wetted screen area, excluding area blocked to flow by structural components, required at ordinary low water shall be calculated by dividing maximum diverted flow by the allowable approach velocity.

(5) In flowing water, the velocity component parallel and adjacent to the screen face shall be at least two times the approach velocity. Screen faces shall be placed flush with adjacent screen bay piers or walls.

(6) Screen openings shall not exceed 1/4 (0.25) inch measured horizontally. Where fish less than 60 mm in length are present the screen openings shall not exceed 1/8 (0.125) inch.

(7) The long axis of slot or rectangular screen openings shall be vertical.

(8) Screens may be constructed of any rigid material, woven or perforated, that physically excludes fish provided that structural integrity and cleaning effectiveness are not impaired.

(9) Screens shall be removed only by written permission of the departments.

(10) Alteration or disturbance of banks or bank vegetation shall be held to a minimum, and all disturbed slopes shall be revegetated or otherwise protected from erosion.

(b) The inability of fish to freely pass through a fishway or other device provided to assist their passage.

(c) The absence of a fishway or other device to assist the passage of fish.

The controversy must be raised at the time official notice is requested if the request is made orally. If the request is made in pleadings the controversy shall appear in response to the pleading, or in the brief or notice in which the request is made or suggested. If any decision is stated to rest in whole or in part upon official notice of a material fact which the parties have not had prior opportunity to contest, any party may contest such fact by appropriate exceptions if such notice is taken in an initial or intermediate decision or by petitioning for reconsideration if the notice of such fact be taken in a final report.
