(1) The director is authorized to enter into grazing leases when the director determines that a grazing lease will benefit wildlife management programs and will be in the public interest. Except for temporary permits, each grazing lease shall first be submitted to the commission, which may review the lease to determine whether it will benefit wildlife or improve public hunting, fishing or recreation without adverse impact on wildlife. If, within 30 days, the commission has not disapproved the lease, the director shall be deemed authorized to enter into that lease.

(2) The director shall advertise and sell a license to use department lands for grazing at public auction to the highest bidder. The director is authorized to reject any and all bids if it is determined to be in the best interest of the department to do so. The director shall retain the right to alter provisions of the plan to reduce acreage available or the number of animals using the area when such change is, in the judgment of the director, required to benefit fish or wildlife management, public hunting and fishing, or other recreational uses. The director may not enter into any grazing lease not accompanied by a grazing management plan unless the commission has approved it.

(6) The director may cancel a lease (1) for noncompliance with the terms and conditions of the lease, or (2) if the area described in the lease is included in a land use plan determined by the agency to be a higher and better use, or (3) if the property is sold or conveyed, or (4) if damage to wildlife or wildlife habitat occurs.

WAC 232-12-271 Criteria for planting aquatic plants and releasing wildlife. (1) Release by persons other than the director. It is unlawful for persons other than the director to plant aquatic plants or release any species, subspecies, or hybrids of animals which do not already exist in the wild in Washington. If such species, subspecies, or hybrid does already exist in the wild in Washington, it may be released within its established range by persons other than the director, but only after obtaining a permit from the director.

(a) Application for a permit must be made on a form provided by the department. It must be submitted at least thirty days prior to acquisition of the wildlife or aquatic plants intended for release or planting, and must provide all information indicated.

(b) Permits will only be issued if the director determines there will be no adverse impact on the wildlife or wildlife habitat of the state.

(c) Each permit shall require that at least thirty days prior to planting or release of wildlife or aquatic plants they must be made available for inspection by the director. It shall be the responsibility of the applicant to show that the wildlife will not pose a disease threat. If the director is not satisfied that the wildlife or aquatic plants do not pose a disease threat, they shall not be released or planted in the state. Director approval for release or planting may be withdrawn for cause.

(d) Each permit shall require that an applicant intending to release wildlife in the state shall report immediately to the director the outbreak of any disease among the wildlife intended to be released. If the director determines that such outbreak presents a threat to the wildlife of the state, the director may immediately order such action as necessary including quarantine or destruction of stock, sterilization of enclosures and facilities, cessation of activities, and disposal of wildlife in a manner satisfactory to the director.

(e) Each permit shall require that wildlife to be released shall not be branded, tattooed, tagged, fin clipped or otherwise marked for identification without approval of the director.

(2) Release by the director. The director may plant aquatic plants or release animal species, subspecies, or hybrids which have been planted or released previously in Washington if they do not pose a disease threat and if planting or release will not cause adverse impact on the wildlife or wildlife habitat of the state. Before releasing any species, subspecies, or hybrid of animal not already

existing in the wild in Washington, the director shall report to the commission on the planned release, stating the basis for determining that the planned release fulfills the criteria set forth herein. The director may release nonnative species, subspecies, or hybrids not previously released in Washington only if the director in his or her sole discretion has determined that:

(a) There is no reasonable expectation of adverse impact on the wildlife or wildlife habitat of the state and there is an adequate plan for evaluating such impact following the release;

(b) The commission has classified the species, subspecies, or hybrids to be released pursuant to RCW 77.12.020;

(c) Suitable habitat is available;

(d) The nonnative species, subspecies, or hybrids to be released are free of exotic pathogens;

(e) The release serves the public interest.

WAC 232-12-292 Bald eagle protection rules

PURPOSE

1.1 The purpose of these rules is to protect the habitat and thereby increase and maintain the population of the bald eagle so that the species no longer is classified as threatened or endangered in Washington state. The "delisting" of the bald eagle for Washington state is a realistic goal which can best be accomplished by promoting cooperative efforts to manage for site-specific eagle habitat needs through a process which is sensitive to the site-specific landowner goals as well. The following rules are designed to promote such cooperative management.

AUTHORITY

2.1 These rules are promulgated pursuant to RCW 77.12.655.

DEFINITIONS

3.1 "Communal roost site" means all of the physical features surrounding trees used for night roosting that are important to the suitability of the roost for eagle use. These features include flight corridors, sources of disturbance, trees in which eagles spend the night, trees used for perching during arrival or departure and other trees or physical features, such as hills, ridges, or cliffs that provide wind protection.

3.2 "Cultural activities" means activities conducted to foster the growth of agricultural plants and animals.

3.3 "Delist" means to remove a species from the state special species list by action of the game commission or from the federal endangered species list by action of the secretary of the interior.

3.4 "Department" means department of game.

3.5 "Endangered" means a species which is seriously threatened with extirpation throughout all or a significant portion of its range within Washington.

3.6 "Government entities" means all agencies of federal, state and local governments.

3.7 "Landowner" means any individual, private, partnership, nonprofit, municipal, corporate, city, county, or state agency or entity which exercises control over a bald eagle habitat whether such control is based on legal or equitable title, or which manages or holds in trust land in Washington state.

3.8 "Nest tree" means any tree that contains a bald eagle nest or has contained a nest.

3.9 "Nest site" means all of the physical features surrounding bald eagle nests that are important to normal breeding behavior. These features include

alternate and potential nest trees, perch trees, vegetative screening, foraging area, frequently used flight paths, and sources of disturbance.

- 3.10 "Perch tree" means a tree that is consistently used by eagles. It is often close to a nest or feeding site and is used for resting, hunting, consumption of prey, mating display and as a sentry post to defend the nest.
- 3.11 "Predicides" means chemicals used to kill or control problem wildlife.
- 3.12 "Region" means an ecological/geographic area that forms a unit with respect to eagles, e.g., Hood Canal, lower Columbia River, outer coast and south Puget Sound.
- 3.13 "Site management plan" means a legal agreement between the department and the landowner for management of a bald eagle nest or roost site.
- 3.14 "Threatened" means a species that could become endangered within Washington without active management or removal of threats.

APPLICABILITY AND OPERATION

- 4.1 The department of game shall make available to other governmental entities, interest groups, landowners and individuals information regarding the location and use pattern of eagle nests and communal roosts.
- 4.2 The department of game shall itself and through cooperative efforts (such as memoranda of understandings) work with other government agencies and organizations to improve the data base for nest and roost site activity and productivity. The department regularly shall confer with other governmental entities to improve the preliminary nest site management information and its accessibility and useability.
- 4.3 The department's goal shall be to identify, catalog and prioritize eagle nesting or roost sites. The department shall facilitate landowner notification that nesting or roost sites exist on their property and work with landowners to develop a nesting or roost site description.
- 4.4 When a proposed land-use activity involves land containing or adjacent to an eagle nest or communal roost, the permitting agency shall immediately notify the department of game of the permit application.
- 4.5 When the department determines that a proposed activity would adversely impact eagle habitat, a department representative shall meet on-site with the landowner and, where applicable, a representative of the permitting agency to discuss management options for the protection of eagle habitat. The purpose of these discussions shall be to reach agreement on a site management plan for bald eagle habitat protection.

- 4.6 It is recognized that normal on-going agricultural activities of land preparation, cultivating, planting, harvesting, other cultural activities, grazing and animal-rearing activities in existing facilities do not have significant adverse consequences for eagles and therefore do not require a site management plan. New building construction, conversion of lands from agriculture to other uses, application of preacides and aerial pesticide spraying, may, following a conference with the department of game, be subject to the site management planning process described in these rules.
- 4.7 Emergency situations, such as insect infestation of crops, requires immediate action on the site management plan or special permission to address the impending crisis by the department of game.

SITE MANAGEMENT PLAN FOR BALD EAGLE HABITAT PROTECTION

- 5.1 The purpose of the site management plan is to provide for the protection of specific bald eagle habitat in such a way as to recognize the special characteristics of the site and the landowner's property rights, goals and pertinent options. To this end, every land owner shall have fair access to the process including available incentives and benefits. Any relevant factor shall be considered, including, but not limited to, the following:
- 5.1.1 The status of the eagle population in the region.
- 5.1.2 The useful life of the nest or roost trees and condition of the surrounding forest; the topography; accessibility and visibility; and existing and alternative flight paths, perch trees, snags and potential alternative nest and roost trees.
- 5.1.3 Eagle behavior and historical use patterns, available food sources, and vulnerability to disturbance.
- 5.1.4 The surrounding land-use conditions, including degree of development and human use.
- 5.1.5 Land ownership, landowner ability to manage, and flexibility of available landowner options.
- 5.1.6 Appropriate and acceptable incentive mechanisms such as conservation easements, transfer or purchase of development rights, leases, mutual covenants, or land trade or purchase.
- 5.1.7 Published recommendations for eagle habitat protection of other government entities such as the U.S. Fish and Wildlife Service.

- 5.2 The site management plan shall provide for
- 5.2.1 Tailoring the timing, duration or physical extent of activities to minimize disturbance to the existing eagle habitat and, where appropriate, identifying and taking steps to encourage and create alternative eagle habitat; and
- 5.2.2 Establishing a periodic review of the plan to monitor whether:
- The plan requires amendment in response to changing eagle and landowner circumstances
 - The terms of the plan comply with applicable laws and regulations,
 - The parties to the plan are complying with its terms.
- 5.3 The site management plan may also provide for implementing landowner incentive and compensation mechanisms through which the existing eagle habitat can be maintained or enhanced.

GUIDELINES FOR ACQUISITION OF BALD EAGLE HABITAT

- 6.1 Real property interests may be acquired and agreements entered into which could enhance protection of bald eagle habitat. These include fee simple acquisition, land trades, conservation easements, transfer or purchase of development rights, leases, and mutual covenants. Acquisition shall be dependent upon having a willing seller and a willing buyer. Whatever interest or method of protection is preferable will depend on the particular use and ownership characteristics of a site. In discussing conservation objectives with private or public landowners, the Department shall explore with the landowner the variety of protection methods which may be appropriate and available.
- 6.2 The following criteria and priorities shall be considered by the department when it is contemplating acquiring an interest in a bald eagle habitat.
- 6.2.1 Site considerations:
- Relative ecological quality, as compared to similar habitats
 - Ecological viability—the ability of the habitat and eagle use to persist over time
 - Defensibility—the existence of site conditions adequate to protect the eagle habitat from unnatural encroachments
 - Manageability—the ability to manage the site to maintain suitable eagle habitat
 - Proximity to food source
 - Proximity to other protected eagle habitat

- Proximity to department land or other public land
- Eagle population density and history of eagle use in the area
- The natural diversity of native species, plant communities, aquatic types, and geologic features on the site.

6.2.2 Other considerations

- Ownership
- Degree of threat
- Availability of funding
- Existence of willing donor or seller and prior agency interest
- Cost

In general, priority shall be given to the most threatened high quality eagle habitats with associated natural values which require the least management.

RESOLUTION OF SITE MANAGEMENT PLAN DISPUTES

- 7.1 The department, the landowner and the permitting agency shall work to develop a mutually agreeable site management plan within 30 days of the original notice to the department of game. This plan shall become a part of the application for a permit.
- 7.2 Should agreement not be reached, the landowner may refer the site management plan to the bald eagle oversight committee (paragraph 8). The committee shall have 30 days from the date contacted to bring about agreement among the department, the landowner, and the permitting agency. The committee may use conciliation, mediation and factfinding, or any other method they deem appropriate to bring about a mutually acceptable resolution of the issues.
- 7.3 If the landowner chooses not to use the services of the bald eagle oversight committee or if resolution is not reached, the department of game shall within 15 days provide a site management plan to the landowner and permitting agency.
- 7.4 The landowner may initiate a formal appeal of the department of game's decision. Formal appeal procedures appear in WAC 232-12-197.

BALD EAGLE OVERSIGHT COMMITTEE

- 8.1 The director of the department of game shall appoint a five-member bald eagle oversight committee with two members representing landowner interests, two members representing wildlife interests and one nonvoting member from the department of game. Members are appointed for three year terms, with the initial terms for one, two or three years so that committee appointments will be staggered over time. The committee shall meet at

least quarterly, and as needed, to accomplish the following:

- 8.1.1 Monitor the progress of cooperative bald eagle management processes under these regulations and make recommendations to the department and other interested parties to improve the effectiveness of these processes.
 - 8.1.2 Undertake resolution of site management plan disputes under paragraph 7.2 above.
 - 8.1.3 Coordinate joint efforts on Washington bald eagle protection.
- 8.2 The members of the committee shall not receive compensation but shall be reimbursed under RCW 43.03.050 and 43.03.060 for travel expenses incurred while attending official meetings of the committee.

AUTOMATIC REVIEW PROCESSES

- 9.1 The bald eagle oversight committee will report to the department of game annually regarding its activities under paragraph 8.1. The department of game will conduct an initial review of the bald eagle regulatory process after 3 years which will include a public hearing, and then every five years thereafter.

PENALTIES

- 10.1 Failure to comply with the processes set forth in these rules or with the provisions of a site management plan constitutes a misdemeanor as set forth in RCW 77.21.010.

WAC 232-12-807 Operations and procedures. The department of game is a public service agency whose statutory responsibility is to preserve, protect, and perpetuate all forms of wildlife in the state of Washington and to serve the public by providing the maximum amount of wildlife-oriented recreation consistent with sound biological management.

The state game commission consists of six members appointed by the governor. They serve a term of six years each. Terms are arranged so that appointments of two members expire every two years. By law, three commissioners are appointed from eastern Washington and three from western Washington. The game commission establishes regulations, sets overall policies to guide the department, and appoints the director of game. The director is responsible for all activities of the department of game and reports directly to the game commission.

Organization of the department of game is one of decentralized management. A deputy director and two assistant directors aid in the operation and administration of the department. The Olympia staff consists of seven division administrators who head up areas of program planning and coordination. Completing the staff is a planning section and a special assistant to the director for federal affairs.

The fisheries management division is responsible for research, program development, planning and coordination of management for all fish classified as game fish.

The wildlife management division is responsible for research, planning, program development, and coordination of management for all wildlife in the state other than fish. Major activities of this division relate to big game species, a variety of small game including birds, non-hunted wildlife, and management of wildlife areas.

The habitat management division is responsible for research, planning, program development and coordination for protection, restoration, and enhancement of wildlife and fish habitat areas through the use of environmental laws and public education. A major portion of this program is related to cooperative contractual agreements with other land managers and private landholders.

The enforcement division is responsible for planning, program development, and coordination of enforcement and wildlife control activities.

The engineering and lands division is responsible for engineering and design, construction, maintenance, surveying, land acquisition, and property management services. The division also prepares and implements the department's capital budget.

The management services division has responsibility for the budget development, accounting, federal aid coordination, payroll, printing, mailing, purchasing, vendor payments, warehouse services, safety, maintenance of archives, department's license management, and data processing.

The information and education division is responsible for planning and program development of the hunter education and safety training, project WILD for school children, various publications, trapper training, interpretive displays, newsletters, news releases, and radio and television public service announcements.

The department of game has six administrative regions in the state; three on the eastside, three on the westside. Each region is administered by a regional supervisor who is responsible for all department programs within his assigned region. They are assisted by program managers for the key areas of enforcement, habitat, wildlife, and fisheries. Program implementation is carried out primarily by field agents and biological or production staff.

The game commission, through the public meeting process, establishes all rules and regulations that govern departmental activities. This includes establishment of hunting and fishing seasons; approval of land acquisitions or exchanges; coordination with other federal, state, county, or city programs; and adjudication of requests for license reinstatements when individual privileges have been revoked in accordance with RCW's.

The game commission holds four statutory meetings each year in January, April, July, and October, and other special meetings as necessary to conduct its business.

Reviser's note: The text of the gold and fish rules adopted by the department of game has been omitted from publication in the Washington Administrative Code under the authority of RCW 34.05.210(4) as being unduly cumbersome to publish. Copies of these rules may be obtained from the main office of the Department of Game, 600 North Capitol Way, Olympia, Washington 98504, and are available in pamphlet form from the department, its six regional offices, and at numerous drug and sporting goods stores throughout the state.

TEMPORARY REGULATIONS**

WAC
232-24-120 Temporary regulation.

Reviser's note: Rules on game and game fish open and closed areas and seasons and bag and catch limits are ordinarily adopted by the game commission on an emergency basis as temporary rules and filed with code reviser's office. Such rules are also printed in pamphlet form and are made available to the public at all places where hunting and fishing licenses are sold. Because of the transitory nature of these rules and the wide distribution of them, such rules are omitted from the Washington Administrative Code by authority of RCW 34.05.210(4). Copies of the pamphlets may also be obtained by writing to the Department of Game, 600 N. Capitol Way, Olympia. The original orders may be inspected in the office of the Code Reviser, Legislative Building, Olympia 98504.

Published each season in pamphlet form are:

1. Hunting seasons and game bag limits.
2. Upland and migratory game bird hunting seasons and bag limits.
3. Game management unit descriptions.

WAC 232-32-020 Definitions. (1) "Volunteer group" means any person or group of persons interested in or party to an agreement with the department of game relating to a cooperative wildlife project.

(2) "Cooperative wildlife project" means a project conducted by a volunteer group that will benefit the game fish, game bird, game animal, or nongame wildlife resources of the state and for which the benefits of the project, including wildlife reared and released, are available to all citizens of the state.

[Statutory Authority: 1984 c 72. 84-18-065 (Order 237), § 232-32-020, filed 9/5/84.]

WAC 232-32-030 Information required from volunteer groups. The following information should be furnished by volunteer groups when applying for a cooperative wildlife project.

(1) Date of application.

(2) Name of volunteer group or person proposing cooperative project. If a group, give the name, address, and telephone number of one person in that group who will serve as contact person and project leader.

(3) General description of proposed project, including title, project objectives (how the proposed project will benefit the wildlife resource), methods for achieving objectives, and criteria for measuring achievement of objectives.

(4) Location and physical size of project, as specific as possible, including county, legal description, street

address (if applicable), property ownership, township, range, section, and acreage.

(5) Estimated beginning and ending date of project.

(6) Estimated cost of project in terms of money and man-days for required materials and labor. Include estimate of supervision or assistance that will be required of department of game personnel.

(7) If the project is to plant or rear fish or wildlife, the following additional information should be developed, unless exempted by the department: (a) Species to be produced; (b) proposed source of eggs, broodstock, or juveniles; including how these would be obtained, used, and transferred to and from the project; (c) type of incubation or rearing facilities available; (d) qualitative and quantitative information about water to be used for the project, including volume (high and low flows), temperature, acidity, alkalinity, dissolved oxygen, dissolved solids (for fish projects); (e) number and size(s) of fish, wildlife, or eggs proposed to be incubated, reared, or released, as well as the timing of all phases of these activities; (f) proposed release sites; (g) statement about the volunteer groups' knowledge of culture and pathology of the species proposed to be produced; and (h) availability of professional or technical expertise; i.e., local veterinarian, hatchery nearby, etc.

(8) A list of permits or agreements (other than those needed to raise or release game birds and game fish) needed to accomplish the proposed project, if known; included here would be cooperative landowner agreements, water rights, hydraulic project approval (HPA), building permit, shorelines permit, zoning variance, etc.

[Statutory Authority: 1984 c 72. 84-18-065 (Order 237), § 232-32-030, filed 9/5/84.]

WAC 232-32-040 Review and selection process. The following steps are included in the process of reviewing and selecting cooperative wildlife projects:

(1) Applications will be made available to anyone interested in conducting a cooperative project. Application forms will be available at any time at the Olympia headquarters and all regional offices of the department of wildlife.

(2) Applications for projects may be submitted at any time.

(3) The department will send each applicant, within 45 days of receipt of each application, a written acknowledgement of the receipt of the application and give the applicant a date when notification of acceptance or rejection of the proposal can be expected. The written acknowledgement will also provide the department's selection criteria and a general description of the review and selection process. Final decisions and notification of acceptance or rejection of proposals where funding is requested will be made only after the biennial budget is passed by the legislature and signed by the governor.

(4) The department will determine when a proposed project might affect the management programs of federal, other state, and local agencies and of treaty Indian tribes and will make contact with these entities, when the department determines it is appropriate to do so,

during the review and selection process. If the department determines that ongoing coordination between a volunteer group and another agency or tribe would be appropriate, it may be required as a condition of the permit, when issued.

(5) Each approved agreement will include the following, when determined by the department to be necessary or appropriate: (a) Permit for release of fish or wildlife; (b) procedures for applying for a hydraulic project approval (HPA), and (c) description of methods that will be used to provide the volunteer group with fish, bird, or animal food or other available supplies.

[Statutory Authority: RCW 75.52.050. 88-17-030 (Order 317), § 232-32-040, filed 8/12/88. Statutory Authority: 1984 c 72. 84-18-065 (Order 237), § 232-32-040, filed 9/5/84.]

WAC 232-32-050 Criteria used in selecting cooperative wildlife projects. The following criteria will be considered by the department in ranking project proposals for funding. These criteria are not rigid but are intended to guide the department in selecting projects that are feasible, cost effective, and complementary with other department programs.

(1) Game commission policy: The game commission policies, adopted in 1980, as amended, will be used, along with other criteria, to rank project proposals. Policies include the following: (a) The first management priority will be to establish and perpetuate the highest quality wildlife habitat, with the second priority being to provide recreation opportunity in the form of hunting, fishing, and wildlife enjoyment; and (b) within habitat capabilities, wildlife will be managed according to the following priorities: Natural reproduction rather than stocking; native species of wildlife; and species which provide the most recreational opportunities for hunting, fishing, and wildlife viewing.

(2) Program goals, objectives, and priorities: Project proposals will be ranked according to their adherence to program goals, objectives, and priorities, as outlined in department species plans and regional operational plans. When production or rearing projects are considered, potential conflicts or competition with other species of fish and wildlife, including food fish and shellfish, will be considered.

(3) Costs versus benefits: Project proposals will be evaluated and ranked according to expected ratio of costs to public benefits. Costs will include both money and man-days; benefits may include direct benefits to wildlife or habitat and benefits to the public in terms of recreational opportunities or increased knowledge about wildlife.

(4) Educational value. Consideration will be given to a project's value in educating and informing the public about the life history and needs of wildlife.

(5) Capabilities of volunteer groups. When considering the renewal or refunding of projects, the relative success of that project and the overall capability of a particular volunteer group in managing cooperative projects and producing results will be considered; this will include the amount of department supervision or assistance required to accomplish the project.

[Statutory Authority: 1984 c 72. 84-18-065 (Order 237), § 232-32-050, filed 9/5/84.]

WAC 232-32-060 Procedures for revocation of a cooperative wildlife project. The following criteria and procedures will be followed when the department considers revocation or actually revokes a cooperative wildlife project:

(1) The department may revoke a cooperative project agreement for the following reasons: (a) A violation of agreement provisions; (b) unavailability of adequate biological or financial resources to continue participation by the department; and (c) the development of unacceptable biological or resource management conflicts.

(2) When the department decides that a cooperative project is in danger of being revoked, a certified letter will be sent to the contact person, with the volunteer group responsible for the project advising him or her of the problem and either setting conditions for continuation of the project, or attempting to arrange a meeting to discuss ways of bringing the cooperative agreement into compliance or resolving other problems that might result in revocation.

(3) When the department decides that a cooperative project should be terminated, a certified letter to that effect will be sent to the contact person within the volunteer group responsible for the project. The exact termination date will be determined by the severity of the problem which requires revocation.

[Statutory Authority: 1984 c 72. 84-18-065 (Order 237), § 232-32-060, filed 9/5/84.]

WAC 232-32-070 Priority for eggs, seed, juveniles, broodstock, and department facilities. The following priorities will be followed in allocating eggs, seed, juveniles, broodstock, or using rearing space at department hatcheries and other facilities:

- (1) Needs of the department of game
- (2) Needs of other public agencies in Washington
- (3) Cooperative wildlife projects
- (4) Exchange agreements with agencies outside Washington
- (5) Sales.
