Chapter 463-14 WAC POLICY AND INTERPRETATION

WAC	
463-14-010	Purpose of this chapter.
463-14-020	Need for energy—Legislative intent binding.
463-14-030	Public hearings policy.
463-14-040	County, city and port district representatives—Segmentation of hearings and issues.
463-14-050	Preemption.
463-14-060	Open meetings with full discussion.
463-14-070	Integration of council activities with federal agency activities.
463-14-080	EFSEC deliberative process.

WAC 463-14-010 Purpose of this chapter. The purpose of this chapter is to publicize significant policy determinations and interpretations by which the council is guided in implementing chapter 80.50 RCW and this title.

[Order 104, § 463-14-010, filed 11/4/76.]

WAC 463-14-020 Need for energy—Legislative intent binding. RCW 80.50.010 requires the council "to recognize the pressing need for increased energy facilities." In acting upon any application for certification, the council action will be based on the policies and premises set forth in RCW 80.50.010 (1), (2), and (3).

[Order 104, § 463-14-020, filed 11/4/76.]

WAC 463-14-030 Public hearings policy. RCW 80.50.090 requires a minimum of two public hearings concerning each site for which certification is sought. The first of these is the local public hearing described in RCW 80.50.090 (1) and (2) where the council is obligated to determine whether or not the proposed use of the site is consistent and in compliance with county or regional land use plans or zoning ordinances at the time of application. However, in order to foster general public comment on the proposed site, the council will allow general public comment at such local public hearings, wherever possible. The council must also conduct a second public hearing as a contested case proceeding under chapter 34.04 RCW. Although all persons desirous of participating may not be accorded "party" status in this proceeding, upon compliance with reasonable procedures, any person desiring to be heard shall be allowed

[Title 463 WAC—p 7]

to speak in favor of or in opposition to the proposed facility after the close of the evidentiary hearing but prior to preparation of any recommendation to the governor. The council views the provisions of RCW 80.50.090(4) as authorizing it to conduct additional public hearings of either the "local public hearing" or "contested case proceeding" variety.

[Order 104, § 463-14-030, filed 11/4/76.]

WAC 463-14-040 County, city and port district representatives--Segmentation of hearings and issues. RCW 80.50.030 (4), (5) and (6) necessitate segmentation of hearings and issues in instances where proposed energy facilities would extend beyond the boundaries of a single county, city and/or port district.

[Statutory Authority: RCW 80.50.040(1). 78-09-078 (Order 78-5), § 463-14-040, filed 8/28/78; Order 104, § 463-14-040, filed 11/4/76.]

WAC 463-14-050 Preemption. Chapter 80.50 RCW operates as a state preemption of all matters relating to energy facility sites. Chapter 80.50 RCW certification is given in lieu of any permit, certificate, or similar document which might otherwise be required.

[Order 104, § 463-14-050, filed 11/4/76.]

WAC 463-14-060 Open meetings with full discussion. All council proceedings are to be conducted in a manner consistent with the spirit of the state Open Meetings Act, and not merely according to the letter of that law. To this same end, full and open discussion between council members themselves, as well as between council members, members of the staff and persons appearing before the council, shall be fostered and encouraged at all regular and special meetings.

[Order 104, § 463-14-060, filed 11/4/76.]

WAC 463-14-070 Integration of council activities with federal agency activities. In consonance with RCW 80.50.040(12), the council hereby adopts a policy of holding joint hearings, whenever practical and desirable, with federal agencies having jurisdiction over matters affecting certification under chapter 80.50 RCW.

[Order 104, § 463-14-070, filed 11/4/76.]

WAC 463-14-080 EFSEC deliberative process. RCW 80.50.100 requires the council to report to the governor its recommendation as to the approval or rejection of an application for certification. In order for the council to develop such a recommendation it shall utilize a deliberative process for analysis and evaluation of an application to determine compliance with the intent and purpose of chapter 463-42 WAC. The council will contract for an independent consultant study of the application. An environmental impact statement also will be adopted.

The council during the deliberative process will conduct an extensive public hearing as a contested case for the presentation of evidence on the application. The council will conduct sessions for the taking of public testimony concerning the proposed project. The council will

evaluate public comments received as part of the environmental review. The council throughout all of the deliberative process will consider any laws or ordinances, rules or regulations which may be preempted by certification. The council in open session, when fully satisfied that all issues have been adequately discussed will consider and by majority decision will act on the question of approval or rejection of an application.

[Statutory Authority: RCW 80.50.040(1). 81-20-028 (Order 81-4), § 463-14-080, filed 9/30/81.]

Such notice must be delivered personally or by mail at least twenty-four hours before the time of such meeting as specified in the notice. The

call and notice shall specify the time and place of the special meeting and the business to be transacted. Final disposition shall not be taken on any other matter at such meetings. Such written notice may be dispensed with as to any member who at or prior to the time the meeting convenes files with the executive secretary a written waiver of notice. Such waiver may be given by telegram. Such written notice may also be dispensed with as to any member who is actually present at the meeting at the time it convenes. The notices provided in this section may be dispensed with in the event a special meeting is called to deal with an emergency involving injury or damage to persons or property or the likelihood of such injury or damage, when time requirements of such notice would make notice impractical and increase the likelihood of such injury or damage.

[Order 105, § 463-18-050, filed 11/4/76.]

WAC 463-18-060 Procedure in the absence of the chairman. Pursuant to RCW 80.50.030 the chairman may designate a member of the council to serve as acting chairman in the event of the chairman's absence.

463-28-090 Governing rules.

WAC 463-28-010 Purpose and scope. This chapter sets forth procedures to be followed by the council in determining whether to recommend to the governor that the state preempt local land use plans or zoning ordinances for a site or portions of a site for an energy facility.

[Statutory Authority: RCW 80.50.040(1). 78-07-036 (Order 78-3), § 463-28-010, filed 6/23/78.]

WAC 463-28-020 Authority of council--Preemption by state. The authority of the council is contained in RCW 80.50.040(1) and 80.50.110(2) which provides that the state preempts the regulation and certification of the location, construction, and operational conditions of certification of energy facilities.

[Statutory Authority: RCW 80.50.040(1). 78-07-036 (Order 78-3), § 463-28-020, filed 6/23/78.]

WAC 463-28-030 Determination of noncompliance--Procedures. If the council determines during the hearing required by RCW 80.50.090 that the site of a proposed energy facility or any portion of a site is not consistent and in compliance with existing land use plans or zoning ordinances in effect at the date of the application, the following procedures shall be observed:

(1) As a condition necessary to continue processing the application, it shall be the responsibility of the applicant to make the necessary application for change in, or permission under, such land use plans or zoning ordinances, and make all reasonable efforts to resolve the noncompliance.

(2) All council proceedings on the application for certification may be stayed at the request of the applicant during the period when the plea for resolution of noncompliance is being processed by local authorities.

(3) The applicant shall submit regular reports to the council regarding the status of negotiations with local authorities on noncompliance issues.

[Statutory Authority: RCW 80.50.040(1). 78-07-036 (Order 78-3), § 463-28-030, filed 6/23/78.]

WAC 463-28-040 Inability to resolve noncompliance. Should the applicant report that efforts to resolve noncompliance issues with local authorities have not been successful, then, if applicant elects to continue processing the application, the applicant shall file a written request for state preemption as authorized in WAC 463-28-020 within ninety days after completion of the public hearing required by RCW 80.50.090, or later if mutually agreed by the applicant and the council. The request shall address the following:

(1) That the applicant has demonstrated a good faith effort to resolve the noncompliance issues.

(2) That the applicant and the local authorities are unable to reach an agreement which will resolve the issues.

(3) That alternate locations which are within the same county and city have been reviewed and have been found unacceptable.

(4) Interests of the state as delineated in RCW 80.50.010.

[Statutory Authority: RCW 80.50.040(1), 78-07-036 (Order 78-3), § 463-28-040, filed 6/23/78.]

WAC 463-28-050 Failure to request preemption. Where noncompliance is at issue, failure of the applicant to file the written request as required in WAC 463-28-040 within the time permitted shall be sufficient grounds for the council to recommend to the governor denial of certification.

[Statutory Authority: RCW 80.50.040(1), 78-07-036 (Order 78-3), § 463-28-050, filed 6/23/78.]

WAC 463-28-060 Request for preemption--Contested case. Should applicant elect to continue processing the application and file a request with the council for state preemption, the council will schedule a contested case hearing on the application as specified under chapter 463-30 WAC. The council shall determine during the contested case proceeding whether to recommend to the governor that the state should preempt the local land use plans or zoning ordinances for a site or portions of a site for the energy facility proposed by the applicant. The factors to be evidenced under this issue are those set forth in WAC 463-28-040. The determination of preemption shall be by council order, and shall be included in its recommendation to the governor pursuant to RCW 80.50.100.

[Statutory Authority: RCW 80.50.040(1), 83-08-031 (Order 83-2), § 463-28-060, filed 3/31/83; 78-07-036 (Order 78-3), § 463-28-060, filed 6/23/78.]

WAC 463-28-070 Certification--Conditions--State/local interests. If the council approves the request for preemption it shall include conditions in the draft certification agreement which give due consideration to state or local governmental or community interests affected by the construction or operation of the energy facility and the purposes of laws or ordinances, or rules or regulations promulgated thereunder that are preempted or superseded pursuant to RCW 80.50.110(2).

[Statutory Authority: RCW 80.50.040(1), 78-07-036 (Order 78-3), § 463-28-070, filed 6/23/78.]

WAC 463-28-080 Preemption--Failure to justify. During the contested case hearing, if the council determines that the applicant has failed to justify the request for state preemption, the council shall do so by issuance of an order accompanied by findings of fact and conclusions of law. Concurrent with the issuance of its order, the council shall report to the governor its recommendation for rejection of certification of the energy facility proposed by the applicant.

[Statutory Authority: RCW 80.50.040(1), 78-07-036 (Order 78-3), § 463-28-080, filed 6/23/78.]

WAC 463-28-090 Governing rules. Applications for certification of the energy facilities made prior to July 15, 1977 shall continue to be governed by the applicable

rules in effect on the day immediately preceding July 15, 1977.

[Statutory Authority: RCW 80.50.040(1), 78-07-036 (Order 78-3), § 463-28-090, filed 6/23/78.]

Intervenor status may also be conditioned upon allowance of other parties to act as lead parties, where appropriate. The council reserves the right to prescribe other limitations and conditions, where appropriate.

(e) Any more stringent legal applicable requirements necessary to comply with a plan approved pursuant to section 208(d) of the act; and

(f) Prior to promulgation by the administrator of applicable effluent standards and limitations pursuant to sections 301, 302, 306 and 307 of the act, such conditions as the council determines are necessary to carry out the provisions of the act.

(2) In any case where an issued NPDES permit applies the effluent standards and limitations described in paragraph 1 of this section, the council shall make a finding that any discharge authorized by the permit will not violate applicable water quality standards and will have prepared some explicit verification of that fact. In any case where an issued NPDES permit applies any more stringent effluent limitation, based upon applicable water quality standards, a waste load allocation shall be prepared to ensure that the discharge authorized by the permit is consistent with applicable water quality standards.

(3) In the application of effluent standards and limitations, water quality standards and other legally applicable requirements pursuant to paragraphs (1) and (2) hereof, each issued NPDES permit shall specify average and maximum daily quantitative or other appropriate limitations for the level of pollutants in the authorized discharge. The average and maximum daily quantities must be made by weight except where the parameters are such that other measures are appropriate.

WAC 463-38-054 Schedules of compliance. (1) In addition to the application of the effluent standards and limitations, water quality standards, and other legally applicable requirements, all pursuant to WAC 463-38-053 (1), (2), the council shall establish schedules in NPDES permit conditions to achieve compliance with applicable effluent standards and limitations, water quality standards, and other legally applicable requirements.

With respect to any discharge which is found by the council not to be in compliance with applicable effluent standards and limitations, applicable water quality standards, or other legally applicable requirements listed in WAC 463-38-053 (1)(d)(e), the permittee shall be required to take specific steps to achieve compliance with the following:

(a) Any legally applicable schedule of compliance contained in:

(i) Applicable effluent standards and limitations;

(ii) If more stringent, water quality standards; or

(iii) If more stringent, legally applicable requirements listed in WAC 463-38-053 (1)(d)(e); or

(b) In the absence of any legally applicable schedule of compliance, in a reasonable period of time, such period to be consistent with the guidelines and requirements of the act.

(2) In any case where the period of time for compliance specified in paragraph (1)(a) of this section exceed nine months, a schedule of compliance shall be specified in the permit which will set forth interim requirements and the dates for their achievement; however, in no event shall more than nine months elapse between interim dates. If the time necessary for completion of the interim requirement (such as construction of a treatment facility) is more than nine months and is not readily divided into stages of completion, interim dates shall be specified for the submission of reports of progress toward completion of the interim requirement. For each NPDES permit schedule of compliance, interim dates and the final date of compliance shall, to the extent practicable, fall on the last day of the months of March, June, September and December.

(3) Either before or up to 14 days following each interim date and the final date of compliance, the permittee shall provide the council with written notice of the permittee's compliance or noncompliance with the interim or final requirement.

WAC 463-38-055 Other terms and conditions. In addition to the requirements of WAC 463-38-051, 463-38-052 and 463-38-053, each issued NPDES permit shall require that:

(1) All discharges authorized by the NPDES permit shall be consistent with the terms and conditions of the permit; any facility expansions, production increases or process modifications which would result in new or increased discharges of pollutants must be reported to the council by submission of a new NPDES application or supplement thereto or, if such discharge does not violate effluent limitations specified in the NPDES permit, by submission to the council of notice of such new or increased discharges of pollutants; any discharge of any pollutant more frequent than or at a level in excess of that identified and authorized by the NPDES permit shall constitute a violation of the terms and conditions of the NPDES permit;

(2) The permit may be modified, suspended or revoked in whole or in part during its terms for cause including, but not limited to, the following:

(a) Violation of any term or condition of the NPDES permit;

(b) Obtaining an NPDES permit by misrepresentation or failure to disclose fully all relevant facts; and

(c) A change in any condition that requires either a temporary or permanent reduction or elimination of the permitted discharge.

(3) The permittee shall allow the council or its authorized representative upon the presentation of credentials and at reasonable times:

(a) To enter upon permittee's premises in which an effluent source is located or in which any records are required to be kept under terms and conditions of the NPDES permit;

(b) To have access to and copy at reasonable cost any records required to be kept under terms and conditions of the NPDES permit;

(c) To inspect any monitoring equipment or method required in the NPDES permit; or

(d) To sample any discharge of pollutants.

(4) The permittee shall at all times maintain a good working order and operate as efficiently as possible any facilities or systems of control installed by the permittee to achieve compliance with the terms and conditions of the NPDES permit.

(5) If a toxic effluent standard or prohibition (including any schedule of compliance specified in such effluent standard or prohibition) is established under section 307(a) of the act for a toxic pollutant which is present in the permittee's discharge and such standard or prohibition is more stringent than any limitation upon such pollutant in the NPDES permit, the council shall revise or modify the NPDES permit in accordance with the toxic effluent standard of prohibition and so notify the permittee.

WAC 463-38-061 Reissuance of NPDES permits.

(1) Any permittee shall make application for reissuance of NPDES permits or continuation of discharges after the expiration date of his NPDES permit by filing with the council an application for reissuance of his permit at least 180 days prior to its expiration. The filing requirement for reissuance shall be satisfied in the first instance by a simply written request for reissuance by the permittee to the council, except that the council in its discretion may require any and/or all permittees to request a reissuance by submitting to the council all then applicable NPDES forms.

(2) The scope and manner of any review of an application for reissuance of an NPDES permit by the council shall be sufficiently detailed as to insure the following:

(a) That the permittee is in compliance with or has substantially complied with all of the terms, conditions, requirements and schedules of compliance of the expired NPDES permit;

(b) That the council has up-to-date information on the permittee's production levels, permittee's waste treatment practices, nature, content and frequencies of permittee's discharge, either pursuant to the submission of new forms and applications or pursuant to monitoring records and reports resubmitted to the council by the permittee and;

(c) That the discharge is consistent with applicable effluent standards and limitations, water quality standards, and other legally applicable requirements listed in WAC 463-38-053 (1)(2), including any additions to, or revisions or modifications of such effluent standards and limitations, water quality standards, or other legally applicable requirements during the term of the permit.

(3) The notice and procedures specified in WAC 463-38-041 and 463-38-042 are applicable to each request for reissuance of an NPDES permit.

(4) Notwithstanding any other provision any point source of a discharge having a thermal component the construction of which is commenced after the date of enactment of the Federal Water Pollution Control Act Amendments of 1972 and which is so constructed as to meet all applicable standards of performance shall not be subject to any more stringent standard of performance with respect to the thermal component of its discharge during a ten year period beginning on the date of completion of such construction or during the period of depreciation or amortization of such facility for the purposes of section 167 or 169 (or both) of the Internal Revenue Code of 1954, whichever period ends first.

WAC 463-38-062 Modification of NPDES permit.

(1) After notice and opportunity for a public hearing,

[Title 463 WAC—p 27]

any permit issued under the NPDES can be modified, suspended or revoked for cause, in whole or in part during its term.

(2) The council may, upon request of a permittee, revise or modify a schedule of compliance in an issued NPDES permit if the council determines good and valid cause exists for such revision and if within 30 days following receipt of notice from the council, the regional administrator does not object in writing.

(3) Any such modifications shall be executed by the council and the permittee in the same manner as the NPDES permit was executed, including full compliance with the requirements of WAC 463-38-041, 463-38-042 and 463-38-043.

WAC 463-38-063 Appeal. (1) The approval, rejection, or modification of an NPDES permit shall be subject to judicial review pursuant to the provisions of chapter 34.04 RCW.

(2) No appeal shall be taken under paragraph (1) until such time as the council makes its recommendations to the governor pursuant to RCW 80.50.100(2).

WAC 463-38-064 Transmission to regional administrator of proposed NPDES permit. (1) Each proposed NPDES permit will be transmitted to the regional administrator in accordance with the following procedures:

(a) A copy of the proposed NPDES permit, including any and all terms, conditions, requirements or documents which are a part of the proposed permit or which affect the authorization by the proposed permit of the discharge of pollutants except as to classes, types or sizes within any category of point sources waived in writing by the regional administrator.

(b) The regional administrator shall be provided a ninety day period in which to comment upon, make recommendations with respect to, or object in writing to the issuance of the proposed permit pursuant to any right to object provided the administrator in section 402 (d)(2) of the act. No permit shall be issued if the regional administrator objects in writing to the issuance of such permit pursuant to any such right within said period, unless such objection is waived or withdrawn by the regional administrator in writing. Should no such objection be received within said period, it shall be presumed that the administrator has no objection to the issuance of the proposed permit.

(2) A copy of every issued NPDES permit immediately following execution by the applicant and the state, along with any and all terms, conditions, requirements or documents which are a part of such NPDES permit or which will affect the authorization of the discharge of pollutants will be sent to the regional administrator.

WAC 463-38-065 Monitoring and enforcement. The council hereby delegates to the DOE the monitoring activities of water discharges under a certification agreement which incorporates the NPDES permit. As a result of said monitoring activities, DOE shall report to the council any activity by a permittee which in its judgment requires the initiation of appropriate enforcement activities by the council including those in WAC 463-38-055, pursuant to RCW 80.50.150. The council shall then take or initiate action to enforce the terms of any certification agreement and the incorporated NPDES permit. This in no way shall restrict any enforcement by other public agencies and officials under existing law. If DOE determines that immediate action is needed to enforce the act or any statute or regulation derived therefrom, it is delegated the enforcement authority and responsibility to carry out such immediate action as it deems necessary and shall report such actions to the council. Such action shall remain in effect until confirmed or modified by the council.

WAC 463-38-080 Transmittal of data to regional administrator. (1) Copies of NPDES forms received by the council as outlined below shall be transmitted to the regional administrator:

- (a) Upon receipt by the council;
- (b) A complete copy, or relevant portions thereof, of any appropriate NPDES form received by the council;
- (2) The regional administrator may object in writing to deficiencies in any NPDES application or reporting form received by him and to have such deficiency corrected so long as he acts to inform by written letter the council within twenty days after his receipt of the NPDES application or reporting form. If the regional administrator's objection relates to an NPDES application, the regional administrator will be sent any information necessary to correct the deficiency. If the regional administrator so requests, the council will not issue the NPDES permit until they receive notice from the regional administrator that the deficiency has been corrected, which notice shall not be withheld for more than 30 days.

(3) For all minor discharges, the council may require the operator of such a discharge to submit NPDES application forms or such other information as may be requested by the regional administrator.

(1) For the purposes of this section, the term "member" includes any individual who has or shares authority to approve permit applications or portions thereof, either in the first instance or on appeal.

(2) For the purpose of this section, the term "permit holders or applicants for a permit" shall not include any department or agency of a state government.

(3) For the purposes of this section, the term "significant portion of his income" shall mean ten percent of gross personal income for a calendar year, except that it shall mean fifty percent of gross personal income for a calendar year if the recipient is over 60 years of age and is receiving such portion pursuant to retirement pension or similar arrangement.

(4) For the purposes of this section, the term "income" includes retirement benefits, consultant fees and stock dividends.

(5) For the purposes of this section, income is not received "directly or indirectly from permit holders or applicants for a permit" if it is derived from mutual fund payments or from other diversified investments over which the recipient does not know the identity of the primary source of income.

WAC 463-39-010 Purpose. The energy facility site evaluation council, under the authority vested in it by chapter 80.50 RCW is charged with responsibilities for the conduct of a state-wide program of air pollution prevention and control for energy facilities. This regulation provides the basic framework for carrying out the council's responsibilities for such a program through the establishment of standards for maximum permissible emissions, the implementation of registration and notice requirements, provision for monitoring and reporting, and the identification of regulatory actions which may be taken to enforce standards. This chapter is designed to operate within the statutory framework for the distribution of responsibilities between state, regional and local units of government in dealing with problems of air pollution.

[Statutory Authority: RCW 80.50.040(1). 79-09-006 (Order 79-1), § 463-39-010, filed 8/6/79.]

WAC 463-39-020 Applicability. The provisions of this chapter shall apply state-wide for those sources under the jurisdiction of the energy facility site evaluation council.

[Statutory Authority: RCW 80.50.040(1). 79-09-006 (Order 79-1), § 463-39-020, filed 8/6/79.]

WAC 463-39-030 Definitions. Unless a different meaning is plainly required by context, the following words and phrases, as hereinafter used in this chapter, shall have the following meanings:

(1) "Abnormal operation" means a process operation other than a normal operation which may result in emissions that exceed the standards. An abnormal operation can be anticipated and planned.

(2) "Air contaminant" means dust, fumes, mist, smoke, other particulate matter, vapor, gas, odorous substance, or any combination thereof. "Air pollutant" means the same as "air contaminant."

(3) "Air pollution" means the presence in the outdoor atmosphere of one or more air contaminants in sufficient quantities, and of such characteristics and duration as is, or is likely to be, injurious to human health, plant or animal life, or property, or which unreasonably interferes with enjoyment of life and property.

(4) "Allowable emissions" means the emission rate calculated using the maximum rated capacity of the source (unless the source is subject to enforceable permit conditions which limit the operating rate or hours of operation, or both) and the most stringent of the following:

(a) Applicable standards as set forth in 40 CFR Part 60 and Part 61,

(b) The applicable state implementation plan emission limitation, or

(c) The emission rate specified as a permit condition.

(5) "Ambient air" means the surrounding outside air.

(6) "Ambient air quality standard" means an established concentration, exposure time and frequency of occurrence of a contaminant or multiple contaminants in the air which shall not be exceeded.

(7) "Best available control technology" means an emission limitation (including a visible emission standard) based on the maximum degree of reduction for each pollutant subject to this regulation which would be emitted from any proposed stationary source or major modification which the council on a case-by-case basis, taking into account energy, environmental, and economic impacts and other costs, determines is achievable for such source or modification through application of production processes or available methods, systems, and techniques, including fuel cleaning or treatment or innovative fuel combustion techniques for control of such pollutant. In no event shall application of the best available control technology result in emissions of any pollutant which would exceed the emissions allowed by any applicable standard under 40 CFR Part 60 and Part 61. If the council determines that technological or economic limitations on the application of measurement methodology to a particular class of sources would make the imposition of an emission standard infeasible, it may instead prescribe a design, equipment, work practice or

operational standard, or combination thereof, to require the application of best available control technology. Such standard shall, to the degree possible, set forth the emission reduction achievable by implementation of such design, equipment, work practice or operation and shall provide for compliance by means which achieve equivalent results. The requirement of RCW 70.94.152 that a new source should provide "all known available and reasonable methods of emission control" is assumed to mean the same as best available control technology.

(8) "Capacity factor" means the ratio of the average load on a machine or equipment for the period of time considered to the capacity rating of the machine or equipment.

(9) "Combustion and incineration sources" means sources using combustion for waste disposal, steam production, chemical recovery or other process requirements; but excludes open burning.

(10) "Commenced construction" means that an owner or operator has undertaken a continuous program of construction or modification or that an owner or operator has entered into a contractual obligation to undertake and complete, within a reasonable time, a continuous program of construction or modification.

(11) "Compliance schedule" means a schedule of steps to be taken to comply with emission requirements including a description of the specific steps and the date when each step will be completed.

(12) "Concealment" means any action taken to reduce the observed or measured concentrations of a pollutant in a gaseous effluent while, in fact, not reducing the total amount of pollutant discharge.

(13) "Council" means the energy facility site evaluation council.

(14) "Chairman" means the chairman of the energy facility site evaluation council or his duly authorized representative.

(15) "Emission" means a release of contaminants into the ambient air.

(16) "Emission standard" means a regulation (or portion thereof) setting forth an allowable rate of emissions, level of opacity, or prescribing equipment or fuel specifications that result in control of air pollution emission.

(17) "Excess emissions" means emissions of an air pollutant in excess of an emission standard.

(18) "Facility" means an identifiable process or activity that emits contaminants to the ambient air.

(19) "Fossil fuel-fired steam generator" means a furnace or boiler used in the process of burning fossil fuel for the primary purpose of producing steam by heat transfer.

(20) "Fugitive dust" means a type of particulate emission made airborne by forces of wind, man's activity, or both, such as unpaved roads, construction sites, or tilled land. Two major categories are anthropogenic sources (those which result directly from and during human activities) and wind erosion sources (those resulting from erosion of soil by wind). Fugitive dust is distinguished from fugitive emissions.

(21) "Fugitive emissions" means contaminants which are generated by industrial or other activities not covered by the fugitive dust definition and which are released to the atmosphere through openings such as windows, vents, doors, or ill-fitting oven closures rather than through primary exhaust systems or are reentrained from unenclosed material handling operations. Aggregate storage operations and active tailing piles are included in this category of sources.

(22) "General process sources" means sources using a procedure or a combination of procedures for the purpose of causing a change in material by either chemical or physical means excluding combustion.

(23) "Incinerator" means a furnace used for primarily the destruction of waste.

(24) "Lowest achievable emission rate" means for any source, that rate of emissions which reflects:

(a) The most stringent emission limitation which is contained in the implementation plan of any state for such class or category of source, unless the owner or operator of the proposed source demonstrates that such limitations are not achievable; or

(b) The most stringent emission limitation which is achieved in practice by such class or category of source, whichever is more stringent.

In no event shall the application of this term permit a proposed new or modified source to emit any pollutant in excess of the amount allowable under applicable new source standards of performance.

(25) "Major source" means any stationary source which is subject to the jurisdiction of the energy facility site evaluation council under chapter 80.50 RCW and which is included in section 169(a)(i) of the Federal Clean Air Act.

(26) "Masking" means the mixing of a chemically nonreactive control agent with a malodorous gaseous effluent to change the perceived odor, usually to a less offensive odor.

(27) "Materials handling" means the handling, transporting, loading, unloading, storage, and transfer of material with no significant alteration of the chemical or physical properties of the material.

(28) "New source" means a source constructed, installed or established after the effective date of this chapter. Addition to or enlargement or replacement of a source or any major alteration or any change in a source which has the potential to increase emissions shall be construed as construction or installation or establishment of a new source.

(29) "New source performance standards (NSPS)" means the federal regulations set forth in 40 CFR Part 60.

(30) "Nonattainment area" means a clearly delineated geographic area which has been designated by EPA promulgation as exceeding a National Ambient Air Quality Standard for one or more of the criteria pollutants.

(31) "Opacity" means the degree to which an object seen through a plume is obscured, stated as a percentage.

(32) "Open burning" means the combustion of material in an open fire or in an outdoor container, without providing for the control of combustion or the control of the emissions from the combustion.

(33) "Particulate matter" means small discrete masses of liquid or solid, exclusive of uncombined water.

(34) "Person" means an individual, firm, public or private corporation, association, partnership, political subdivision, municipality or government agency.

(35) "Potential emissions" means the emissions of a pollutant from a source operated at maximum capacity in the absence of air pollution control equipment. Air pollution control equipment includes control equipment which is not, aside from air pollution control laws and regulations, vital to production of the normal product of the source or to its normal operation. Annual potential shall be based on the maximum annual rated capacity of the source, unless the source is subject to enforceable permit conditions which limit the annual hours of operation. Enforceable permit conditions on the type or amount of materials combusted or processed may be used in determining the potential emission rate of a source.

(36) "Reasonably available control technology (RACT)" means the lowest emission limit that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility. RACT is determined on a case-by-case basis for an individual source or source category, taking into account the impact of the source upon air quality, the availability of additional controls, the emission reduction to be achieved by additional controls, the impact of additional controls on air quality and the capital and operating costs of the additional controls. RACT requirements for any source or source category may be adopted as an order or regulation after public hearing.

(37) "Source" means one or more processes or operations which emit or may emit any contaminants to the ambient air. A stationary source is composed of one or more pollutant emitting facilities.

(38) "Source category" means all sources of the same type or classification.

(39) "Standard conditions" means a temperature of 60°F (15.6°C) and a pressure of 29.92 inches (760mm) of mercury.

(40) "Upset" means an unexpected sudden occurrence which may result in emissions in excess of the emission requirements.

[Statutory Authority: RCW 80.50.040(1), 79-09-006 (Order 79-1), § 463-39-030, filed 8/6/79.]

WAC 463-39-040 General standards for maximum permissible emissions. All sources are required to use reasonably available control technology to control emissions from point sources. In cases where current controls are determined to be less than reasonably available control technology (RACT), the council shall, on a case-by-case basis, define RACT for each source and issue a regulatory order to the source for installation of RACT. The order will contain a schedule for installation, with

intermediate benchmark dates and a final completion date. All sources in nonattainment areas shall be in compliance by December 31, 1982 with RACT requirements for nonattainment pollutants which have been defined by July 1, 1981. For RACT requirements defined after July 1, 1981 sources will be placed on a compliance schedule which will be completed as soon as practicable.

(1) Visible emissions. No person shall cause or permit the emissions for more than three minutes, in any one hour, of an air contaminant from any source which at the emission point, or within a reasonable distance of the emission point, exceeds twenty percent opacity except as follows:

When the owner or operator of a source supplies valid data to show that the opacity is in excess of twenty percent as the result of the presence of condensed water droplets.

(2) Preventing particulate matter from being deposited. No person shall cause or permit the emission of particulate matter from any source to be deposited beyond the property under direct control of the owner or operator of the source in sufficient quantity to interfere unreasonably with the use and enjoyment of the property upon which the material is deposited.

(3) Fugitive emissions. The owner or operator of any source involving materials handling, construction, demolition or any other operation which is a source of fugitive emission:

(a) If located in an attainment area and not impacting any nonattainment area, shall take reasonable precautions to prevent the release of air contaminants from the operation.

(b) If the source has been identified as a significant contributor to the nonattainment status of a designated nonattainment area, shall be required to use reasonably available control technology to control emissions. Significance will be determined by an EPA interpretive ruling for PSD and offsets on file with the council.

(4) Odors. Any person who shall cause or allow the generation of any odor from any source which may unreasonably interfere with any other property owner's use and enjoyment of his property must use recognized good practice and procedure to reduce these odors to a reasonable minimum.

(5) Emission of air contaminants detrimental to persons or property. No person shall cause or permit the emission of any air contaminant from any source, including any air contaminant whose emission is not otherwise prohibited by this regulation, if the air contaminant causes detriment to the health, safety, or welfare of any person, or causes damage to property or business.

(6) Sulfur dioxide.

(a) No person shall cause or permit the emission of a gas containing sulfur dioxide from any source in excess of 1,000 parts per million (ppm) of sulfur dioxide.

(b) All concentrations of sulfur dioxide referred to above are by volume, dry, and, for combustion emissions the exhaust gas volume shall be corrected to seven percent oxygen.

(7) Concealment and masking. No person shall cause or permit the installation or use of any means which, conceals or masks an emission of an air contaminant which would otherwise violate any provisions of this chapter.

(8) Fugitive dust sources.

(a) The owner or operator of a source shall take reasonable precautions to prevent fugitive dust from becoming airborne and shall maintain and operate the source to properly minimize emissions.

(b) The council may issue a regulatory order to the person responsible for a fugitive dust source and require measures to be used for control.

(9) The owner or operator of any existing fugitive dust source that has been identified as a significant contributor to the nonattainment status of a designated nonattainment area shall be required to use reasonably available control technology to control emissions. Significance will be determined by an EPA interpretive ruling for PSD and offsets on file with the council.

(10) All sources of fugitive dust required to use reasonably available control technology shall be in compliance by July 1, 1981 or on a compliance schedule which will be completed by December 31, 1982. Sources required to use RACT after July 1, 1981 shall be placed on a compliance schedule which will be completed as soon as practicable.

(11) The development of specific requirements for a nonattainment area shall include consultation with local government in the area and an opportunity shall be provided for public comment on the measures.

(12) Whenever reasonably available control technology has been defined for a source or category of sources in any area, the council shall issue a regulatory order to the source or sources requiring that the defined measures be implemented and establishing a date when the implementation will be completed.

[Statutory Authority: RCW 80.50.040(1). 79-09-006 (Order 79-1), § 463-39-040, filed 8/6/79.]

WAC 463-39-050 Minimum emission standards for combustion and incineration sources. (1) Combustion and incineration sources must meet all requirements of WAC 463-39-040 and, in addition, no person shall cause or permit emissions of particulate matter in excess of 0.10 grain per standard dry cubic foot.

(2) For all incinerator sources, no person shall cause or permit emissions in excess of 100 ppm of total carbonyls as measured by procedures on file at the department of ecology. Incinerators shall be operated only during daylight hours unless written permission to operate at other times is received from the council.

(3) Measured concentrations for combustion and incineration sources shall be adjusted for volumes corrected to seven percent oxygen.

If other sources are added to the effluent from the combustion source, the seven percent correction shall be made for the combined effluent unless the volume and concentration of the combustion effluent can be determined separately.

(4) Other wood waste burners.

(a) Wood waste burners not specifically provided for in this section shall meet all provisions of WAC 463-39-040.

(b) Such wood waste burners shall utilize equipment, facilities and practices which represent practical current state of technology. All facilities shall be operated and maintained to minimize emissions.

(c) The council may establish additional requirements for such wood waste burners located in or proposed for location in sensitive areas. These requirements may include but shall not be limited to a requirement to eliminate all visible emissions.

WAC 463-39-060 Minimum emission standards for general process sources. General process sources shall be required to meet all applicable provisions of WAC 463-39-040 and, in addition, no person shall cause or permit the emission of particulate material from any general process operation in excess of one-tenth grain per standard cubic foot of dry exhaust gas.

[Statutory Authority: RCW 80.50.040(1). 79-09-006 (Order 79-1), § 463-39-060, filed 8/6/79.]

WAC 463-39-080 Compliance schedules. (1) Whenever a source is found to be in violation of the provisions of this chapter, the council may issue a regulatory order which will include a schedule of compliance to bring the source into compliance with this chapter. Opportunity for a public hearing on each proposed compliance schedule shall be provided by prominent advertisement of a notice identifying the proposal and announcing its availability for public inspection in at least one location in the county in which the source is located. No public hearing on a proposed compliance schedule shall be held before thirty days after the publication of the above notice.

(2) A source shall be considered to be in compliance with this chapter if all the provisions of its individual compliance schedule included within a regulatory order issued hereunder are being met.

WAC 463-39-100 Registration. The owner or operator of each stationary source subject to chapter 80.50 RCW shall register the source with the council.

Registration shall be on forms to be supplied by the council within the time specified thereon.

A report of closure shall be filed with the council whenever operations producing emissions are permanently ceased at any source within the above categories.

[Statutory Authority: RCW 80.50.040(1). 79-09-006 (Order 79-1), § 463-39-100, filed 8/6/79.]

WAC 463-39-110 New source review. Whenever the construction of a new stationary source subject to chapter 80.50 RCW is contemplated the owner or operator thereof is required to file a notice of construction with the council including a description of the source,

the control equipment to be used and the estimated emissions from the proposed source. For purposes of simplicity and elimination of duplication, the "notice of construction" may be incorporated into the application required to be filed pursuant to chapter 80.50 RCW.

(1)(a) The addition to or enlargement or replacement of or alteration in any energy facility source already existing which is undertaken pursuant to any approved variance which includes a compliance schedule for the reduction of emissions therefrom shall be exempt from the requirements of this section provided the specific variance is an approved part of the SIP.

(b) The enlargement, modification, replacement, or alteration of any process or source which will increase potential emissions or ambient concentrations of any contaminant for which a federal or state standard has been set, will require the filing of a notice of construction.

(c) The replacement or modification of air pollution control equipment which will not increase emissions or ambient concentrations will not require the filing of a notice of construction.

(2) Following the initial review of a notice of construction the council may require plans, specifications and such other information as deemed necessary for the review of the proposed project shall be submitted for review and approval prior to construction.

(3) The council shall review notices of construction and plans, specifications and other information associated therewith in order to determine that:

(a) The proposed project will be in accord with applicable rules and regulations in force pursuant to chapter 70.94 RCW, including a determination that the operation of the new stationary source at the location proposed will not result in any applicable federal or state ambient air quality standard being exceeded.

(b) The proposed project will utilize best available control technology (BACT) for emission control. If the source is a major source and is located in a nonattainment area it will comply with the lowest achievable emission rate (LAER) for emissions of the contaminants for which nonattainment has been designated. Compliance with department of ecology emission standards for hazardous air pollutants, sources of volatile organic compounds in nonattainment areas, and new source performance standards (NSPS) when applicable to the source will be required.

(c) The proposed project meets all requirements of prevention of significant deterioration regulations if applicable.

(d) The proposed project will not violate the requirements for reasonable further progress established by the implementation plan. If the new source is a major source and is located in a nonattainment area, the total allowable emissions from existing sources and the new source, of the contaminants for which nonattainment has been designated, must be less than allowable emissions from existing sources at the time the application for approval was filed.

(e) The emissions from the proposed source will not delay the attainment date for any nonattainment area.

(4) After receipt of all information required by it, the council shall:

(a) Make preliminary determinations on the matters set forth in WAC 463-39-110(3);

(b) Make available in at least one location in the county or counties in which the proposed project is located, a copy of the preliminary determination and copies of or a summary of the information considered in making such preliminary determinations; and

(c) Publish notice to the public of the opportunity for written comment on the preliminary determinations. The period for taking public comments shall be thirty days from the date such notice is made.

(5) If, after review of all information received including public comment with respect to any proposed project, the council makes the determination of subdivisions (3)(a), (b), (c), (d) or (e) in the negative, an order approving the construction, installation or establishment of the new stationary source shall not be issued.

(6) If, after review of all information received, including public comment with respect to any proposed project, the council makes the determinations of subdivisions (3)(a), (b), and where applicable, (c), (d) and (e) in the affirmative, it shall issue an order of approval of the construction, installation or establishment of the new stationary source. The order of approval may provide such conditions of operation as are reasonably necessary to assure the continuous compliance with chapter 70.94 RCW and the applicable rules and regulations in force pursuant thereto.

(7) For sources which locate temporarily (one year or less) at particular sites, the owner or operator shall be permitted to operate at a temporary location without filing a notice of construction, providing that the owner or operator notifies the council of intent to operate at the new location at least thirty days prior to starting the operation, and supplies sufficient information to enable the council to determine that the operation will comply with the emission standards for a new source and with the applicable ambient air standards. The permission to operate shall be for a limited period of time and the council may set specific conditions for operation during said period. A temporary source shall be required to comply with all applicable emission standards.

(8) The owner or operator of a proposed new source shall not construct, install, establish or commence operations until written permission to proceed has been granted by the council and a valid energy facility site certification agreement is extant.

WAC 463-39-115 Standards of performance for new stationary sources. Subparts A, D, Da, GG, J, K and Y of Title 40, code of federal regulations, part 60 (standards of performance for new stationary sources), as promulgated prior to May 1, 1982 are by this reference adopted and incorporated herein with the exception of sections 60.5 (determination of construction or modification) and 60.6 (review of plans). For the purpose of state administration of the federal regulations adopted

by reference hereby, the term "administrator" as used therein shall refer to the council.

Sections 60.5 and 60.6 of Title 40, code of federal regulations, are not incorporated herein because they provide for preconstruction review of new stationary sources only on request. By virtue of WAC 463-39-110, such review under the state program is mandatory and an order of approval is required before the construction, installation or establishment of a new stationary source may commence.

WAC 463-39-120 Monitoring and special report.

(1) **Monitoring.** The department of ecology shall conduct a continuous surveillance program to monitor the quality of the ambient atmospheres to concentrations and movements of air contaminants.

As a part of this program, the director of the department of ecology or his authorized representative may recommend that any source under the jurisdiction of the council conduct stack and/or ambient air monitoring, and to report the results to the council and department of ecology.

(2) **Investigation of conditions.** For the purpose of investigating conditions specific to the control, recovery, or release of air contaminants into the atmosphere, the council, or its authorized representative, shall have the power to enter at reasonable times upon any private or public property, excepting nonmultiple unit private dwellings housing one or two families. No person shall refuse entry or access to the council, or its authorized representative when entry is requested for the purpose of inspection, and when appropriate credentials are presented; nor shall any person obstruct, hamper, or interfere with any such inspection.

(3) **Source testing.** In order to demonstrate compliance with this regulation the council may require that a test be made of the source using a method on file with the department of ecology. The operator of a source may be required by the council to provide the necessary platform and sampling ports for the department of ecology personnel to perform a test of the source. The department of ecology shall be allowed to obtain a sample from any source. The operator of the source shall be given an opportunity to observe the sampling and to obtain a sample at the same time.

(4) **Abnormal operations or upset conditions.**

(a) **Upset conditions** which may result in emissions in excess of the standards set by this chapter must be reported to the council within one working day. Abnormal operations can be anticipated and must be reported in advance of the occurrence of the abnormal operation if it may result in emissions in excess of standards.

(b) Any period of excess emissions is presumed to be a violation unless and until the owner or operator demonstrates and the council finds that:

- (i) The incident was reported as required, and
- (ii) Complete details were furnished the council, and
- (iii) Appropriate remedial steps have been taken, and

(iv) The incident was unavoidable.

(c) If the conditions of subdivision (b) of this subsection are met, the incident is excusable and a notice of violation will not be issued.

(d) If any of the conditions of subdivision (b) of this subsection are not met, the incident is not excusable and a notice of violation will be issued and a penalty may be assessed.

(e) For the council to find that an incident of excess emissions is unavoidable, the following conditions must be met:

(i) The process equipment and the air pollution control equipment were at all times maintained and operated in a manner consistent with minimizing emissions.

(ii) Repairs or corrections were made in an expeditious manner when the operator knew or should have known that emission limitations were being or would be exceeded. Expeditious repairs or corrections require off-shift or overtime labor if such utilization will reduce the extent of excess emission.

(iii) The incident is not one in a recurring pattern which is indicative of inadequate design, operation or maintenance.

(iv) The amount and duration of the excess emissions as well as the impact of the emissions on ambient air quality were minimized by taking all reasonable steps.

(5) **Continuous monitoring and recording.** Owners and operators of the following categories of stationary sources shall install, calibrate, maintain and operate equipment for continuously monitoring and recording those emissions specified.

(a) Fossil fuel-fired steam generators.

(i) Opacity, except where:

(A) Steam generator capacity is less than 250 million BTU per hour heat input, or

(B) Only gaseous fuel is burned, or

(C) Only oil or a mixture of oil and gas is burned and opacity and particulate regulations can be met without using particulate collection equipment; and, the source has never, through any administrative or judicial procedure, been found in violation of any visible emission standard.

(ii) Sulfur dioxide, except where:

(A) Steam generator capacity is less than 250 million BTU per hour heat input; or

(B) Sulfur dioxide control equipment has not been installed.

(iii) Percent oxygen or carbon dioxide where such measurements are necessary for the conversion of sulfur dioxide continuous emission monitoring data.

(iv) **General exception.** These requirements do not apply to a fossil fuel-fired steam generator with an annual average capacity factor of less than thirty percent, as reported to the Federal Power Commission for calendar year 1974, or as otherwise demonstrated to the council by the owner or operator.

(b) Fluid bed catalytic cracking units catalyst regenerators at petroleum refineries.

Opacity where fresh feed capacity is more than 20,000 barrels per day.

(c) Owners and operators of those sources required to install continuous monitoring equipment under this regulation shall demonstrate to the council compliance with the equipment and performance specifications, and observe the reporting requirements, contained in Title 40, code of federal regulations, part 51, appendix P, sections 3, 4 and 5, promulgated on October 6, 1975, which is by this reference adopted and incorporated herein.

(d) All sources subject to this regulation shall procure and install equipment and commence monitoring and recording activities no later than eighteen months after adoption of this regulation by the council. Any extension to this time requirement shall be negotiated through the variance procedure of WAC 463-39-150.

(e) Special considerations. If for reason of physical plant limitations or extreme economic situations, the council determines that continuous monitoring is not a reasonable requirement, alternative monitoring and reporting procedures will be established on an individual basis. These will generally take the form of stack tests conducted at a frequency sufficient to establish the emission levels over time and to monitor deviations in these levels.

(f) Exemptions. This subsection (5) does not apply to any source which is:

- (i) Subject to a new source performance standard.
- (ii) Not subject to an applicable emission standard.
- (iii) Monitoring system malfunctions. A source may be temporarily exempted from the monitoring and reporting requirements of this regulation during periods of monitoring system malfunctions provided that the source owner or operator shows to the satisfaction of the council that the malfunction was unavoidable and is being repaired as expeditiously as practicable.

(6) Emission inventory. The owner or operator of any air contaminant source shall submit an inventory of emissions from the source each year upon a form and according to instructions received from the council. The inventory shall include stack and fugitive emissions of particulates, sulfur dioxide, carbon monoxide, total reduced sulfur compounds (TRS), fluorides, lead, volatile organic compounds, and other contaminants, and shall be submitted when required no later than forty-five days after the end of the calendar year. The inventory shall include total emissions for the year in tons per year and an estimate of the percentage of the total emitted each quarter. An estimate shall be made of the maximum design emission rate for a one hour period and a twenty-four hour period during the year. The report shall include the average sulfur content of any fuel or raw material used which will result in emissions of more than twenty-five tons per year of sulfur dioxide.

(7) Change in raw materials or fuels. Any change or series of changes in raw material or fuel which will result in a cumulative increase in emissions of sulfur dioxide of fifty tons per year or more over that stated in the initial inventory required by WAC 463-39-120(6) shall require the submittal of sufficient information to the council to determine the effect of the increase upon

ambient concentrations of sulfur dioxide. The council may require controls to reduce the effect of such increases. Cumulative changes in raw material or fuel of less than 0.5 percent increase in average sulfur content over the initial inventory shall not require such notice.

WAC 463-39-130 Regulatory actions. The council may take any of the following regulatory actions to enforce this chapter:

(1) Notice of violation. Whenever the council has reason to believe that any provision of this chapter has been violated, it may cause written notice to be served on the alleged violator or violators. The notice shall specify the provision of this chapter alleged to be violated and the facts alleged to constitute a violation thereof, and may include an order that necessary corrective action be taken within a reasonable time.

(2) Civil penalty. Whenever any person violates any of the provisions of this chapter, he shall be subject to a penalty in the form of a fine in an amount not to exceed two hundred fifty dollars per day for each violation. Each such violation shall be separate and distinct and, in case of a continuing violation, each day's continuance shall be a separate and distinct violation. The penalty shall be imposed by a notice in writing from the chairman, or his authorized representative, describing the violation with reasonable particularity.

(3) Assurance of discontinuance. The chairman, or his authorized representative, may accept an assurance of discontinuance of any act or practice deemed in violation of this chapter. Any such assurance shall specify a time limit during which discontinuance is to be accomplished. Failure to perform the terms of any such assurance shall constitute prima facie proof of a violation of this chapter which makes the alleged act or practice unlawful for the purpose of securing an injunction or other relief from the superior court.

(4) Restraining orders, injunctions. Whenever any person has engaged in, or is about to engage in, any acts or practices which constitute or will constitute a violation of any provision of this chapter, the council, after notice to such person and an opportunity to comply, may petition the superior court of the county wherein the violation is alleged to be occurring or to have occurred for a restraining order or a temporary or permanent injunction or another appropriate order.

(5) Emergency episodes. The council may issue such orders as authorized by chapter 80.50 RCW, whenever an air pollution episode is forecast.

WAC 463-39-135 Criminal penalties. Persons in violation of this chapter may be subject to the provisions of chapter 80.50 RCW.

WAC 463-39-150 Variance. (1) Any person who owns or is in control of a plant, building, structure, establishment, process, or equipment may apply to the council for a variance from provisions of this chapter governing the quality, nature, duration, or extent of discharges of air contaminants. The application shall be accompanied by such information and data as the council may require. The council may grant such variance, but only after public hearing or due notice if it finds that:

(a) The emissions occurring or proposed do not endanger public health or safety; and

(b) Compliance with the rules or regulations from which variance is sought would produce serious hardship without equal or greater benefits to the public.

(2) No variance shall be granted pursuant to this section until the council has considered the relative interests of the applicant, other owners of property likely to be affected by the discharges, and the general public.

(3) Any variance or renewal thereof shall be granted within the requirements of subsection (1) of this section and for time periods and under conditions consistent with the reasons therefor, and within the following limitations:

(a) If the variance is granted on the ground that there is no practicable means known or available to the adequate prevention, abatement or control of the pollution involved, it shall be only until the necessary means for prevention, abatement or control become known and available, and subject to the taking of any substitute or alternate measures that the council may prescribe.

(b) If the variance is granted on the ground that compliance with the particular requirement or requirements from which variance is sought will require the taking of measures which, because of their extent or cost, must be spread over a considerable period of time, it shall be for a period not to exceed such reasonable time as, in the view of the council is requisite for the taking of the necessary measures. A variance granted on the ground specified herein shall contain a timetable for the taking of action in an expeditious manner and shall be conditioned on adherence to such timetable.

(c) If the variance is granted on the ground that it is justified to relieve or prevent hardship of a kind other than that provided for in subdivisions (a) and (b) of this subsection, it shall be for not more than one year.

(4) Any variance granted pursuant to this section may be renewed on terms and conditions and for periods which would be appropriate on initial granting of a variance. If complaint is made to the council on account of the variance, no renewal thereof shall be granted unless following a public hearing on the complaint on due notice the council finds that renewal is justified. No renewal shall be granted except on application therefor. Any such application shall be made at least sixty days prior to the expiration of the variance. Immediately upon receipt of an application for renewal, the council shall give public notice of such application in accordance with its rules and regulations.

(5) A variance or renewal shall not be a right of the applicant or holder thereof but shall be granted at the

discretion of the council. However, any applicant adversely affected by the denial or terms and conditions of the granting of an application for a variance or renewal of a variance by the council may obtain judicial review thereof under the provisions of chapter 34.04 RCW as now or hereafter amended.

(6) Nothing in this section and no variance or renewal granted pursuant hereto shall be construed to prevent or limit the application of the emergency provisions and procedures of RCW 70.94.415 to any person or his property.

(7) An application for a variance, or for the renewal thereof, submitted to the council pursuant to this section shall be approved or disapproved by the council within sixty-five days of receipt unless the applicant and the council agree to a continuance.

(8) No variance or renewal shall be construed to set aside or delay any requirements of the federal clean air act except with the approval and written concurrence of the federal environmental protection agency.

[Statutory Authority: RCW 80.50.040(1). 79-09-006 (Order 79-1), § 463-39-150, filed 8/6/79.]

WAC 463-39-170 Conflict of interest. No member of the council shall have received, or has during the previous two years received, a significant portion of his income directly or indirectly from permit holders or applicants for a permit under the jurisdiction of this council.

(1) For the purposes of this section, the term "member" includes any individual who has or shares authority to approve permit applications or portions thereof, either in the first instance or on appeal.

(2) For the purpose of this section, the term "permit holders or applicants for a permit" shall not include any department or agency of a state government.

(3) For the purposes of this section, the term "significant portion of his income" shall mean ten percent of gross personal income for a calendar year, except that it shall mean fifty percent of gross personal income for a calendar year if the recipient is over sixty years of age and is receiving such portion pursuant to retirement pension or similar arrangement.

(4) For the purposes of this section, the term "income" includes retirement benefits, consultant fees and stock dividends.

(5) For the purposes of this section, income is not received "directly or indirectly from permit holders or applicants for a permit" if it is derived from mutual fund payments or from other diversified investments over which the recipient does not know the identity of the primary source of income.

The council will contract with the department of ecology (DOE) for the monitoring activities for dangerous wastes regulated by this chapter under a certification agreement. As a result of said monitoring activities, DOE shall report to the council any activity by a permittee which in its judgment requires the initiation of appropriate enforcement activities by the council. The council shall then take or initiate action to enforce the terms of any certification agreement. This in no way shall restrict any enforcement by other public agencies and officials under existing law. If DOE determines that immediate action is needed to enforce the act or any statute or regulation derived therefrom, it shall report immediately to the chairman who shall initiate such immediate enforcement action as may be necessary. Such action shall remain in effect until confirmed or modified by the council.

WAC 463-43-010 Purpose and scope. This chapter sets forth requirements for preparation of applications for energy facility site certification which qualify for expedited processing and delineates certain abbreviated procedures for processing eligible applications pursuant to RCW 80.50.075.

[Statutory Authority: RCW 80.50.071, 78-05-054 (Order 78-2), § 463-43-010, filed 4/26/78.]

WAC 463-43-020 Standard application required. An applicant seeking expedited processing shall:

(1) Make application pursuant to chapter 463-42 WAC. The application must address all sections of chapter 463-42 WAC in sufficient detail so the council can determine the impacts under WAC 463-43-030,

(2) Submit those fees for independent consultant review and application processing pursuant to RCW 80.50.071 (1)(a) and (b) and chapter 463-58 WAC with the understanding that any unexpended portions thereof shall be returned to the applicant at the completion of application processing, and

(3) Submit a request for expedited processing to the council at the time of application which shall be accompanied by a completed environmental checklist as delineated in WAC 463-46-365.

[Statutory Authority: RCW 80.50.071, 78-05-054 (Order 78-2), § 463-43-020, filed 4/26/78.]

WAC 463-43-030 Eligible proposals. An application may be expedited when the council finds that the following are not significant enough to warrant a full review of the application for certification under the provisions of chapter 80.50 RCW:

(1) The environmental impact of the proposed energy facility,

(2) The area potentially affected,

(3) The cost and magnitude of the proposed energy facility, and

(4) The degree to which the proposed energy facility represents a change in use of the proposed site.

[Statutory Authority: RCW 80.50.071, 78-05-054 (Order 78-2), § 463-43-030, filed 4/26/78.]

WAC 463-43-040 Prior to making a determination of eligibility for expedited processing. The council prior to making a determination of eligibility for expedited processing shall:

(1) Conduct a public informational meeting in the county of the proposed site within 60 days of receipt of an application to provide information to the public concerning the nature and purpose of the energy facility and the review process to be undertaken by the council and to provide an opportunity for the public to present its views,

(2) Determine at a public hearing within 60 days of receipt of an application if the proposed site is consistent and in compliance with city, county or regional land use plans or zoning ordinances,

(3) Review the application pursuant to WAC 463-43-030; in making its review the council may engage pursuant to RCW 80.50.071 (1)(a) an independent consultant to provide an assessment of the application and environmental checklist and to conduct any special study deemed necessary by the council, and

(4) Initiate processing of the applicant's NPDES application, if required, in accordance with chapter 463-38 WAC.

[Statutory Authority: RCW 80.50.071. 78-05-054 (Order 78-2), § 463-43-040, filed 4/26/78.]

WAC 463-43-050 Expedited processing determination. Following the review of an application and land use hearing and within 120 days of receipt of an application or such later time as is mutually agreed by the applicant and the council, the council at a regular or special meeting and by order will grant expedited processing for an application when it has found that:

(1) The proposed site is consistent and in compliance with city, county or regional land use plans or zoning ordinances, and

(2) The environmental impact, area potentially affected, cost and magnitude, and degree of change in use caused by the proposed energy facility are not significant enough to warrant a full review of an application for certification under the provisions of chapter 80.50 RCW.

[Statutory Authority: RCW 80.50.071. 78-05-054 (Order 78-2), § 463-43-050, filed 4/26/78.]

WAC 463-43-060 Effect of expedited processing. For an application granted expedited processing under WAC 463-43-050 the council shall not:

(1) Conduct any further review of an application by an independent consultant, and

(2) Hold a contested case hearing under chapter 34.04 RCW.

[Statutory Authority: RCW 80.50.071. 78-05-054 (Order 78-2), § 463-43-060, filed 4/26/78.]

WAC 463-43-070 Expedited application processing. The council will prescribe the form, content and necessary supporting documentation for site certification during regular or special meetings of the council. All interested persons and the counsel for the environment shall be afforded an opportunity to make presentations on the matters herein.

[Statutory Authority: RCW 80.50.071. 78-05-054 (Order 78-2), § 463-43-070, filed 4/26/78.]

WAC 463-43-080 Recommendation--Transmittal to governor. Within 60 days following the granting of expedited processing or such later time as is mutually agreed by the applicant and the council, the council shall forward its recommendation for approval with a copy of the draft site certification agreement to the governor.

[Statutory Authority: RCW 80.50.071. 78-05-054 (Order 78-2), § 463-43-080, filed 4/26/78.]

- (1) "Office" means the offices of the energy facility site evaluation council.
- (2) "Agency" should be read as synonymous of council.
- (3) "Council" means the energy facility site evaluation council.
- (4) "Final decision" means the recommendation to the governor required under RCW 80.50.100.

[Statutory Authority: RCW 80.50.040(1). 84-19-031 (Order 84-2), § 463-47-040, filed 9/14/84.]

WAC 463-47-050 Designation of decisionmaker. Within the energy facility site evaluation council the decisionmaker is the council.

[Statutory Authority: RCW 80.50.040(1). 84-19-031 (Order 84-2), § 463-47-051, filed 9/14/84.]

WAC 463-47-060 Additional timing considerations.

(1) The council will determine when it receives an application whether the proposal is an "action" and, if so, whether it is "categorically exempt" from SEPA. If the proposal is an action and is not exempt, the council will request the applicant to complete an environmental checklist. A checklist is not needed if the council and applicant agree an EIS is required, SEPA compliance has been completed, SEPA compliance has been initiated by another agency, or a checklist is included with the application. The applicant should also complete an environmental checklist if the council is unsure whether the proposal is exempt.

(2) The council when it receives an application and environmental checklist will determine whether the council or another agency is SEPA lead agency (see WAC 197-11-050 and 197-11-922 through 197-11-940) within five working days. If the council is not the lead agency, the council shall send the completed environmental checklist, a copy of the permit application, to the lead agency, and an explanation of the determination to the identified lead agency.

(3) The council may initiate a contested case hearing required by RCW 80.50.100 prior to completion of the draft EIS. The council shall initiate and conclude a contested case hearing required by RCW 80.50.100 prior to issuance of the final EIS.

[Statutory Authority: RCW 80.50.040(1). 84-19-031 (Order 84-2), § 463-47-060, filed 9/14/84.]

WAC 463-47-070 Threshold determination process—Additional considerations. When reviewing a completed environmental checklist to make the threshold determination, the council will:

- (1) Independently evaluate the responses of the applicant and note comments, concerns, corrections, or new information in the right margin of the checklist.
- (2) Conduct the initial review of the checklist and any supporting documents without requiring additional information from the applicant.

[Statutory Authority: RCW 80.50.040(1). 84-19-031 (Order 84-2), § 463-47-070, filed 9/14/84.]

WAC 463-47-080 Mitigated DNS. (1) An applicant may ask the council whether issuance of a DS is likely for a proposal. This request for early notice must:

- (a) Be written;
- (b) Follow submission of an application and environmental checklist for a nonexempt proposal for which the council is lead agency; and
- (c) Precede the council's actual threshold determination for the proposal.

(2) The council shall respond to the request within ten working days of receipt of the letter; the response shall:

- (a) Be written;
- (b) State whether the council is considering issuance of a DS;
- (c) Indicate the general or specific area(s) of concern that led the council to consider a DS; and
- (d) State that the applicant may change or clarify the proposal to mitigate the impacts indicated in the letter,

revising the environmental checklist as necessary to reflect the changes or clarifications.

(3) The council shall not continue with the threshold determination until after receiving a written response from the applicant changing or clarifying the proposal or asking that the threshold determination be based on the original proposal.

(4) If the applicant submits a changed or clarified proposal, along with a revised environmental checklist, the council will make its threshold determination based on the changed or clarified proposal.

(a) If the council's response to the request for early notice indicated specific mitigation measures that would remove all probable significant adverse environmental impacts, and the applicant changes or clarifies the proposal to include all of those specific mitigation measures, the council shall issue a determination of nonsignificance and circulate the DNS for comments as in WAC 197-11-350(2).

(b) If the council indicated general or specific areas of concern, but did not indicate specific mitigation measures that would allow it to issue a DNS, the council shall determine if the changed or clarified proposal may have a probable significant environmental impact, issuing a DNS or DS as appropriate.

(5) The council may specify mitigation measures that would allow it to issue a DNS without a request for early notice from an applicant. If it does so, and the applicant changes or clarifies the proposal to include those measures, the council shall issue a DNS and circulate it for review under WAC 197-11-350(2).

(6) When an applicant changes or clarifies the proposal, the clarifications or changes may be included in written attachments to the documents already submitted. If the environmental checklist and supporting documents would be difficult to read and/or understand because of the need to read them in conjunction with the attachment(s), the council may require the applicant to submit a new checklist.

(7) The council may change or clarify features of its own proposals before making the threshold determination.

(8) The council's written response under subsection (2) of this section shall not be construed as a determination of significance. In addition, preliminary discussion of clarification of or changes to a proposal, as opposed to a written request for early notice, shall not bind the council to consider the clarifications or changes in its threshold determination.

(9) When an applicant submits a changed or clarified proposal pursuant to this section, it shall be considered part of the applicant's application for a permit or other approval for all purposes, including enforcement of the permit or other approval. Unless the council's decision expressly states otherwise, when a mitigated DNS is issued for a proposal, any decision approving the proposal shall be based on the proposal as changed or clarified pursuant to this section.

[Statutory Authority: RCW 80.50.040(1), 84-19-031 (Order 84-2), § 463-47-080, filed 9/14/84.]

WAC 463-47-090 EIS preparation. (1) Preparation of draft and final EISs and SEISs is the responsibility of the application review committee or its successor. Before the council issues an EIS, the responsible official shall be satisfied that it complies with these rules and chapter 197-11 WAC.

(2) The council normally will prepare its own draft and final EISs. It may require an applicant to provide information that the council does not possess, including specific investigations. However, the applicant is not required to supply information that is not required under these rules.

(3) If the council would be unable to prepare a draft and/or final EIS due to its commitments or other constraints or when a local agency transfers lead agency status to the council under WAC 197-11-940, the council may allow an applicant the following option for preparation of the draft and/or final EIS for the applicant's proposal:

(a) The council retains a mutually agreed upon and independent outside party to prepare the document.

(b) The applicant and the council agree upon a method of funding in which the applicant will bear the expense of the EIS preparation, but the consultant will work directly for the council.

(c) The outside party will prepare the document under the supervision of the application review committee, or its successor, and the responsible official.

(d) Normally, the council will have the documents printed and distributed.

(4) Whenever someone other than the council prepares a draft or final EIS, the council shall:

(a) Direct the areas of research and examination to be undertaken and the content and organization of the document.

(b) Initiate and coordinate scoping, ensuring that the individual preparing the EIS receives all substantive information submitted by any agency or person.

(c) Assist in obtaining information on file with another agency that is needed by the person preparing the EIS.

(d) Allow the person preparing the EIS access to council records relating to the EIS (under chapter 42.17 RCW—Public disclosure and public records law).

[Statutory Authority: RCW 80.50.040(1), 84-19-031 (Order 84-2), § 463-47-090, filed 9/14/84.]

WAC 463-47-100 Public notice requirements. (1) The council shall give public notice when issuing a DNS under WAC 197-11-350(2), a scoping notice under WAC 173-802-090, or a draft EIS under WAC 197-11-455.

(2) Whenever possible, the council shall integrate the public notice required under this section with existing notice procedures for the council's review of an application.

(a) When more than one permit required from the council has public notice requirements, the notice procedures that would reach the widest audience should be used, if possible.

(b) If the public notice requirements for the permit or certification must be completed at a specific time in the permitting process and that timing does not coincide with the timing requirements for SEPA public notice, the council must use one or more public notice methods in subsection (4) of this section.

(c) If there are no public notice requirements for any of the permits required for a proposal, the council must use one or more public notice methods in subsection (4) of this section.

(3) The council may require an applicant to perform the public notice requirement at his or her expense.

(4) The council shall use one or more of the following methods of public notice, taking into consideration the geographic area affected by the proposal, the size and complexity of the proposal, the public notice requirements for the permit or certification required from the council and, public interest expressed in the proposal:

(a) Mailing to persons or groups who have expressed interest in the proposal, that type of proposal, or proposals in the geographic area in which the proposal will be located, constructed and operated if approved;

(b) Publication in a newspaper of general circulation in the area in which the proposal will be located, constructed and operated; and/or

(c) Posting the property, for site specific proposals.

[Statutory Authority: RCW 80.50.040(1). 84-19-031 (Order 84-2), § 463-47-100, filed 9/14/84.]

WAC 463-47-110 Policies and procedures for conditioning or denying permits or other approvals. (1)(a) The overriding policy of the council is to avoid or mitigate adverse environmental impacts which may result from the council's decisions.

(b) The council shall use all practicable means, consistent with other essential considerations of state policy, to improve and coordinate plans, functions, programs, and resources to the end that the state and its citizens may:

(i) Fulfill the responsibilities of each generation as trustee of the environment for succeeding generations;

(ii) Assure for all people of Washington safe, healthful, productive, and aesthetically and culturally pleasing surroundings;

(iii) Attain the widest range of beneficial uses of the environment without degradation, risk to health or safety, or other undesirable and unintended consequences;

(iv) Preserve important historic, cultural, and natural aspects of our national heritage;

(v) Maintain, wherever possible, an environment which supports diversity and variety of individual choice;

(vi) Achieve a balance between population and resource use which will permit high standards of living and a wide sharing of life's amenities; and

(vii) Enhance the quality of renewable resources and approach the maximum attainable recycling of depletable resources.

(c) The council recognizes that each person has a fundamental and inalienable right to a healthful environment and that each person has a responsibility to

contribute to the preservation and enhancement of the environment.

(d) The council shall ensure that presently unquantified environmental amenities and values will be given appropriate consideration in decision making along with economic and technical considerations.

(2)(a) When the environmental document for a proposal shows it will cause significant adverse impacts that the proponent does not plan to mitigate, the council shall consider whether:

(i) The environmental document identified mitigation measures that are reasonable and capable of being accomplished;

(ii) Other local, state, or federal requirements and enforcement would mitigate the significant adverse environmental impacts; and

(iii) Reasonable mitigation measures are sufficient to mitigate the significant adverse impacts.

(b) The council may:

(i) Condition the approval or recommendation for approval for a proposal if mitigation measures are reasonable and capable of being accomplished and the proposal is inconsistent with the policies in subsection (1) of this section.

(ii) Reject or recommend rejection of the application if reasonable mitigation measures are insufficient to mitigate significant adverse environmental impacts and the proposal is inconsistent with the policies in subsection (1) of this section.

(c) The procedures in WAC 197-11-660 must also be followed when conditioning, denying or recommending permits or rejection of applications.

A consultant shall not be hired or retained by the council if upon examination by the council, a significant conflict of interest is found with regard to the applicant or other parties involved or potentially involved in the contested case proceedings.

[Order 110, § 463-50-030, filed 11/16/76.]

WAC 463-50-040 Duties to be performed. The independent consultant shall be primarily responsible for the review and evaluation of information provided by the applicant to determine areas of possible omissions or assignments or studies as may be specified or provided for by the contract with the council. The independent consultant may be contracted to:

- (1) Review and analyze the site certification application and supporting documents for compliance with the topical guidelines and for technical veracity,

WAC 463-50-050 Basis for compensation. The basis for compensation to be specified in contracts with independent consultants shall generally be as follows:

- (1) For applications for site certification, where the total scope and/or volume of work is variable and acts to prevent advance determination of total project cost, the consultant shall be compensated on the basis of actual cost plus a net fee for profit,
- (2) For potential site studies, where the total scope and/or volume of work to be performed can be specified in advance, the consultant shall be compensated on the basis of a lump sum payment.

All payments to independent consultants shall be subject to audit.

(c) The reference of matters to the attorney general for appropriate enforcement action for violations of site certification agreements and NPDES or other permits issued by the council.
