

employee or agent thereof) established pursuant to this act or the assets thereof. The commission, and its agents and employees, shall not be held responsible individually in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as principal, agent, person, or employee, except for their own individual acts of dishonesty or crime. No such person or employee shall be held responsible individually for any act or omission of any other commission, member of the commission, or other person. The liability of the members of the commission shall be several and not joint and no member shall be liable for the default of any other member.

[Statutory Authority: 1991 c 67. 91-14-055, § 244-12-070, filed 6/27/91, effective 7/1/91.]

**WAC 244-12-080 Effective time.** This order shall become effective on and after July 1, 1991.

[Statutory Authority: 1991 c 67. 91-14-055, § 244-12-080, filed 6/27/91, effective 7/1/91.]

**WAC 244-12-090 Separability.** If any provisions hereof are declared invalid, or the applicability thereof to any person, circumstances, or thing is held invalid, the validity of the remainder hereof or of the applicability thereof to any other person, circumstances, or thing shall not be affected thereby.

[Statutory Authority: 1991 c 67. 91-14-055, § 244-12-090, filed 6/27/91, effective 7/1/91.]

**Title 246 WAC  
DEPARTMENT OF HEALTH**

**Chapters**

- 246-03 State Environmental Policy Act--Guidelines.
- 246-08 Practice and procedure.
- 246-100 Communicable and certain other diseases.
- 246-110 Contagious disease--School districts and day care centers.
- 246-130 Human immunodeficiency virus (HIV) infection treatment.
- 246-132 Class IV HIV health insurance eligibility.
- 246-170 Tuberculosis--Control, prevention, and treatment.
- 246-171 Tuberculosis--Financial responsibility.
- 246-203 General sanitation.
- 246-205 Contractor certification for decontamination of illegal drug manufacturing or storage sites.
- 246-220 Radiation protection--General provisions.
- 246-221 Radiation protection standards.
- 246-222 Radiation protection--Worker rights.
- 246-224 Radiation protection--Machine assembly and registration.
- 246-225 Radiation protection--X-rays in the healing arts.
- 246-228 Radiation protection--Analytical x-ray equipment.

- 246-229 Radiation protection--Particle accelerators.
- 246-232 Radioactive material--Licensing applicability.
- 246-233 Radioactive materials--General licenses.
- 246-235 Radioactive materials--Specific licenses.
- 246-239 Radiation protection--Nuclear medicine.
- 246-240 Radiation protection--Medical therapy.
- 246-243 Radiation protection--Industrial radiography.
- 246-244 Radiation protection--Wireline services.
- 246-249 Radioactive waste--Use of the commercial disposal site.
- 246-250 Radioactive waste--Licensing land disposal.
- 246-252 Radiation protection--Uranium and/or thorium milling.
- 246-254 Radiation protection--Fees.
- 246-260 Water recreation facilities.
- 246-262 Recreational water contact facilities.
- 246-264 Water safety teaching stations.
- 246-270 Sewer systems--Certification of necessity for water district involvement.
- 246-271 Public sewage.
- 246-272 On-site sewage system.
- 246-280 Recreational shellfish beaches.
- 246-282 Sanitary control of shellfish.
- 246-290 Public water supplies.
- 246-310 Certificate of need.
- 246-314 Facility construction review.
- 246-316 Boarding homes.
- 246-318 Hospitals.
- 246-321 Hospice care center.
- 246-323 Residential treatment facilities for psychiatrically impaired children and youth.
- 246-325 Adult residential rehabilitation centers and private adult treatment homes.
- 246-326 Alcoholism treatment facilities.
- 246-327 Home health agencies.
- 246-329 Childbirth centers.
- 246-331 Hospice agencies.
- 246-333 Approval of eye banks.
- 246-334 Disposition of human remains.
- 246-336 Home care agency rules.
- 246-338 Medical test site rules.
- 246-340 Second trimester abortion facilities.
- 246-360 Transient accommodations.
- 246-366 Primary and secondary schools.
- 246-374 Outdoor music festivals.
- 246-376 Camps.
- 246-378 Mobile home parks.
- 246-380 State institutional survey program.
- 246-388 Rural health care facility licensing rules.
- 246-430 Cancer reporting.
- 246-453 Hospital charity care.
- 246-490 Vital statistics.
- 246-491 Vital statistics--Certificates.
- 246-510 Standards for community health clinics.
- 246-520 Kidney centers.
- 246-560 Rural health system project.
- 246-650 Newborn screening.

|         |   |         |   |
|---------|---|---------|---|
| 246-760 | Auditory and visual standards--School districts.                            | 246-891 | Pharmacy--Prophylactics.  |
| 246-790 | Special supplemental food program for women, infants, and children (WIC).   | 246-893 | Pharmacy--Public records access pursuant to Initiative 276.         |
| 246-800 | General provisions--Professionals.  | 246-895 | Pharmacy--Good manufacturing practice for finished pharmaceuticals. |
| 246-802 | Acupuncturists.   | 246-897 | Pharmacy--Drug availability.  |
| 246-806 | Chiropractic, doctors of--Board of chiropractic examiners.                  | 246-899 | Pharmaceutical--Drug product substitution.                          |
| 246-807 | Chiropractic, doctors of--Chiropractic disciplinary board.                  | 246-901 | Pharmacy assistant.   |
| 246-815 | Dental hygienists.  | 246-903 | Nuclear pharmacies and pharmacists.                                 |
| 246-816 | Dentists--Dental disciplinary board.  | 246-905 | Pharmacy--Home dialysis program.                                    |
| 246-818 | Dentists--Board of dental examiners.  | 246-907 | Pharmaceutical licensing periods and fees.                          |
| 246-822 | Dietitians or nutritionists.  | 246-915 | Physical therapists.  |

| 246-826 | Health care assistants.   | 246-918 | Physicians assistants--Board of medical examiners.                  |
| 246-828 | Hearing aid fitters and dispensers.   | 246-920 | Physicians and surgeons--Medical disciplinary board.                |
| 246-830 | Massage practitioners.  | 246-922 | Podiatric physicians and surgeons.                                  |
| 246-834 | Midwives.   | 246-924 | Psychologists.  |
| 246-836 | Naturopathic physicians.  | 246-928 | Respiratory care practitioners.                                     |
| 246-838 | Practical nurses.   | 246-930 | Sex offender treatment provider.                                    |
| 246-839 | Registered nurses.  | 246-933 | Veterinarians--Veterinary board.                                    |
| 246-841 | Nursing assistants.   | 246-935 | Veterinary animal technicians.                                      |
| 246-842 | Nursing assistants--Addendum for nursing homes.                             | 246-975 | Ambulances.   |
| 246-843 | Nursing home administrators.  |         |   |
| 246-845 | Nursing pool.   |         |   |
| 246-847 | Occupational therapists.  |         |   |
| 246-849 | Ocularists.   |         |   |
| 246-851 | Optometrists.   |         |   |
| 246-853 | Osteopathic physicians and surgeons.  |         |   |
| 246-854 | Osteopathic physicians' assistants.   |         |   |
| 246-855 | Osteopathic physicians' acupuncture assistants.                             |         |   |
| 246-857 | Pharmacists--Practice and procedure.  |         |   |
| 246-858 | Pharmacists--Internship requirements.                                       |         |   |
| 246-861 | Pharmacists--Professional pharmaceutical education.                         |         |   |
| 246-863 | Pharmacists--Licensing.   |         |   |
| 246-865 | Pharmaceutical services--Extended care facility.                            |         |   |
| 246-867 | Impaired pharmacist rehabilitation.   |         |   |
| 246-869 | Pharmacy licensing.   |         |   |
| 246-871 | Pharmaceutical--Parenteral products for nonhospitalized patients.           |         |   |
| 246-873 | Pharmacy--Hospital standards.   |         |   |
| 246-875 | Pharmacy--Patient medication record systems.                                |         |   |
| 246-877 | Pharmaceutical--Sales prohibited.   |         |   |
| 246-879 | Pharmaceutical wholesalers.   |         |   |
| 246-881 | Pharmacy--Prescription drug price advertising.                              |         |   |
| 246-883 | Pharmaceutical--Sales requiring prescriptions.                              |         |   |
| 246-885 | Pharmacy--Identification, imprints, markings, and labeling of legend drugs. |         |   |
| 246-886 | Animal control--Legend drugs.   |         |   |
| 246-887 | Pharmacy--Regulations implementing the Uniform Controlled Substances Act.   |         |   |
| 246-889 | Pharmaceutical--Precursor substance control.                                |         |   |

## Chapter 246-03 WAC

STATE ENVIRONMENTAL POLICY ACT--  
GUIDELINES

## WAC

|            |  |
|------------|--|
| 246-03-030 | Timing and procedures for specified major actions.     |
| 246-03-050 | Determination of lead agency and responsible official. |
| 246-03-140 | SEPA committee.  |

**WAC 246-03-030** Timing and procedures for specified major actions. (1) Regulations and licenses relating to radioactive material.

(a) Scope of major action.

(i) Regulations relating to radioactive material shall include the adoption or amendment by the department of any regulations incorporating general standards for issuance of licenses authorizing the possession, use and transfer of radioactive material pursuant to RCW 70.98.080, and 70.121.030.

(ii) The issuance, revocation or suspension of individual licenses under RCW 70.98.080 shall be exempt. However, the following licenses shall not be exempt: Licenses to operate low level waste burial facilities or licenses to operate or expand beyond design capacity mineral processing facilities, or their tailings areas, whose products, or byproducts, have concentrations of naturally occurring radioactive materials in excess of exempt concentrations as specified in WAC 246-232-010.

(b) Timing of SEPA requirements for regulations for radioactive material.

(i) A final EIS or determination of nonsignificance, whichever is determined appropriate by the lead agency's responsible official, shall be completed for proposed

regulations relating to radioactive material prior to the hearing preceding final adoption of such regulations.

(ii) The responsible official shall mail to the department of ecology headquarters office in Olympia for listing in the "SEPA register" (see WAC 197-11-508) a copy of any determination of nonsignificance, a copy of the draft EIS, and a copy of the final EIS. Copies of the draft EIS shall also be mailed to those agencies identified in WAC 197-11-455, and of the final EIS to those agencies identified in WAC 197-11-460. The responsible official shall also give public notice in the form and manner specified in RCW 43.21C.080 of the determination of nonsignificance or final EIS.

(c) Timing of SEPA requirements for licenses for uranium or thorium mills or radioactive waste burial facilities.

(i) The applicant shall be responsible for completing an environmental checklist, furnishing additional information needed by the department to make the threshold determination, and preparing an environmental report regarding the environmental impact of proposed activities for independent evaluation by the department, prior to issuance of a draft EIS by the responsible official. The environmental report shall be submitted within ninety days following determination of significance. The following material presents a more detailed description of the responsibilities of the private applicant as well as of the responsible official.

(ii) The applicant shall be responsible for contacting the responsible official during the early stages of the applicants planning activities to obtain an outline of SEPA requirements.

(iii) Thereafter the private applicant shall be responsible for preparation of an environmental checklist. The responsible official shall review each environmental checklist and, within fifteen days of the responsible official's receipt of the checklist, shall prepare and issue either a determination of nonsignificance as per WAC 197-11-340 or a determination of significance as per WAC 197-11-360.

(iv) When the responsible official has issued a determination of nonsignificance, the official shall send the determination and environmental checklist to the applicant and to all agencies with jurisdiction for review and comment as per WAC 197-11-340.

(v) When the responsible official makes a determination of significance, the preparation of an environmental report shall be completed in a manner consistent with the requirements for a draft EIS and shall be the responsibility of the private applicant. If the applicant desires, he may contract with an outside consultant for the preparation of the environmental report. The department may also contract with an outside consultant for the preparation of a draft or final EIS. The department or the department's contracted consultant will independently evaluate the environmental report and be responsible for the reliability of any information used in the draft or final EIS. Unless the scope or complexity of the proposal indicates otherwise, the final EIS shall be issued as described in WAC 197-11-460(6).

(vi) The responsible official shall request review of the draft EIS from the agencies listed in WAC 197-11-455 and from such other agencies as he determines.

(vii) The responsible official shall mail a copy of the draft EIS to the department of ecology headquarters in Olympia for listing in the "SEPA register" (see WAC 197-11-508) and also to those agencies listed in WAC 197-11-455.

(viii) When the responsible official determines that substantial changes are needed or that new information has become available, the preparation of an amended or new environmental report is the responsibility of the private applicant.

(ix) The responsible official shall mail a copy of the final EIS to the department of ecology headquarters office in Olympia for listing in the "SEPA register" (see WAC 197-11-508). The responsible official shall also mail copies of the final EIS to those agencies specified in WAC 197-11-460 and shall give public notice of the completion of the final EIS in the form and manner specified in RCW 43.21C.080.

**(2) Water system plans for public water systems as per WAC 246-290-100 and RCW 70.116.050.**

(a) Scope of major action. Water system plans are plans developed and submitted to the department for review and approval pursuant to WAC 246-290-100 and RCW 70.116.050.

(b) Timing and procedures for water system plans prepared by private applicants.

(i) In general, when a private applicant has prepared a water system plan for review and approval by the department, the private applicant shall be responsible for completing an environmental checklist, furnishing additional information needed by the department to make the threshold determination, and preparing the draft and final EIS under the direction of the responsible official. The following material presents a more detailed description of the responsibilities of the private applicant as well as the responsible official.

(ii) Follow steps outlined in subsection (1)(c)(ii) through (iv) of this section.

(iii) When the responsible official makes a determination of significance, the preparation of a draft and final EIS shall be in compliance with WAC 197-11-400 through 197-11-620 and shall be the responsibility of the private applicant. If the applicant desires, he may contract with an outside consultant for preparation of the draft or final EIS. Unless the scope or complexity of the proposal indicates otherwise, the final EIS shall be completed within sixty days of the end of the comment period for the draft EIS.

(iv) See subsection (1)(c)(vi) and (vii) of this section.

(v) When the responsible official determines that substantial changes are needed or that new information has become available, the preparation of an amended or a new draft EIS is the responsibility of the private applicant.

(vi) See subsection (1)(c)(ix) of this section.

(vii) Every water system plan submitted by a private applicant to the department for review and approval

shall be accompanied by either a determination of non-significance or a final EIS.

(c) Timing and procedure for water system plans prepared by agencies. Every water system plan submitted by an agency to the department for review and approval shall be accompanied by either a determination of non-significance or a final EIS.

**(3) New public water supply systems and major extensions of existing public water supply systems.**

(a) Scope of major action. The approval of engineering reports or plans and specifications pursuant to chapter 246-290 WAC for all surface water source development, all water system storage facilities greater than one-half million gallons, new transmission lines longer than one thousand feet and larger than eight inches in diameter located in new rights of way and major extensions to existing water distribution systems involving use of pipes greater than eight inches in diameter, which are designed to increase the existing service area by more than one square mile.

(b) Timing and procedures for projects proposed by private applicants.

(i) In general, when a private applicant seeks the approval of the department for a new public water supply or a major extension to an existing public water supply, the private applicant shall be responsible for completing an environmental checklist, furnishing additional information needed by the department to make the threshold determination, and preparing the draft and final EIS under the direction of the responsible official. The following material presents a more detailed description of the responsibilities of the private applicant as well as of the responsible official.

(ii) Follow steps outlined in subsection (1)(c)(ii) through (iv) of this section.

(iii) See subsection (2)(b)(iii) of this section.

(iv) See subsection (1)(c)(vi) and (vii) of this section.

(v) See subsection (2)(b)(v) of this section.

(vi) See subsection (1)(c)(ix) of this section.

(vii) Whenever preliminary engineering reports, or plans and specifications for a new public water supply system or a major extension to an existing public water supply system are submitted by a private applicant to the secretary for review and approval pursuant to chapter 246-290 WAC, these reports, plans and specifications shall be accompanied by a determination of non-significance or a final EIS.

(c) Timing and procedures for projects proposed by an agency. Whenever preliminary engineering reports, plans and specifications for a new public water supply system or a major extension to an existing public water supply system are submitted by an agency to the secretary for review and approval pursuant to chapter 246-290 WAC, these reports, plans and specifications shall be accompanied by a determination of non-significance or a final EIS.

**(4) Certificates of need.**

(a) Scope of major action. Certificate of need applications are subject to SEPA requirements whenever the applicant proposes to construct a new hospital or to construct major additions to the existing service capacity of

such an institution: *Provided*, That such applications are not subject to SEPA requirements when the proposed construction consists of additions which provide less than twelve thousand square feet of floor area and with associated parking facilities designed for forty automobiles or less: *Provided further*, That certificate of need applications for "substantial acquisitions" are not subject to SEPA requirements.

(b) Timing and procedures for hospital certificates of need. Where a state or local agency other than the department is lead agency for hospital construction, the department shall not issue a certificate of need approving this hospital construction until the applicant has supplied it with a determination of non-significance or a final EIS, and until seven days after the issuance by the lead agency of any final EIS. Nothing in this subsection shall preclude the department from making a commitment to issue a certificate of need to an applicant subject to the timely receipt of an appropriate environmental impact statement or determination of non-significance.

**(5) Approval of sewerage general plans and/or water general plans described in RCW 36.94.010.**

(a) Scope of major action. Sewerage general plans and water general plans shall mean and include those described in RCW 36.94.010.

(b) Timing and procedures for water general plans. Every water general plan submitted by a county to the department for review and approval shall be accompanied by either a determination of non-significance or a final EIS.

**(6) Plans and specifications for new sewage treatment works or for major extensions to existing sewage treatment works pursuant to chapter 246-271 WAC.**

Scope of major action. Plans and specifications for new sewage treatment works or for major extensions to existing sewage treatment works are those which are reviewed and approved by the department pursuant to WAC 246-271-050.

**(7) Construction of any building, facility or other installation for the purpose of housing department personnel or for prisons or for fulfilling other statutorily directed or authorized functions.**

(a) Scope of major action. The construction of buildings, facilities or other installations for the purpose of housing department personnel or for other authorized functions shall be subject to SEPA requirements, but such construction shall not be subject to SEPA requirements when it consists of additions which provide less than twelve thousand square feet of floor area and with associated parking facilities designed for forty automobiles or less.

(b) Timing and procedures.

(i) The responsible official shall, prior to the request for construction bids, prepare an environmental checklist for each construction project of the type described in (a) of this subsection.

(ii) Within fifteen days of the request for construction bids, the responsible official shall make (A) a written declaration of non-significance where the responsible official determines that the proposed construction will not

have a significant adverse environmental impact or (B) a written declaration of significance where the responsible official determines that the proposed construction will have a significant adverse environmental impact.

(iii) Where the responsible official has made a determination of significance, the preparation of the draft and final EIS shall be in compliance with WAC 197-11-400 through 197-11-620, and shall be the responsibility of the responsible official. Unless the scope or complexity of the proposal indicates otherwise, the final EIS shall be completed within sixty days of the end of the comment period for the draft EIS.

(iv) See subsection (1)(c)(vi) of this section.

(v) The responsible official shall mail to the department of ecology headquarters office in Olympia for listing in the "SEPA register" a copy of any determination of nonsignificance, a copy of the draft EIS, and a copy of the final EIS. Copies of the draft EIS shall also be mailed to those agencies identified in WAC 197-11-455, and of the final EIS to those agencies identified in WAC 197-11-460. The responsible official shall also give public notice in the form and manner specified in RCW 43.21C.080 of the determination of nonsignificance or final EIS.

**(8) Approval of final plans for construction of a private psychiatric hospital pursuant to WAC 246-322-020, or construction of an alcoholism treatment facility pursuant to WAC 246-326-020.**

(a) Scope of major action. The approval of final plans for construction of a private psychiatric hospital pursuant to WAC 246-322-020, or construction of an alcoholism treatment center pursuant to WAC 246-326-020 shall be subject to SEPA requirements: *Provided*, That such construction shall not be subject to SEPA requirements when it consists of additions which provide less than twelve thousand square feet of floor area and with associated parking facilities designed for forty automobiles or less.

(b) Timing and procedures for construction of the type described. Where a state or local agency other than the department is lead agency for construction of the type described in (a) of this subsection, the department shall not approve final plans for construction of a private psychiatric hospital or alcoholism treatment center until the applicant for such approval has supplied the department with a final declaration of nonsignificance or a final EIS for the construction in question, and until seven days after the issuance by the lead agency of any final EIS.

[Statutory Authority: RCW 43.21C.120. 92-02-018 (Order 224), § 246-03-030, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-050 (Order 122), § 246-03-030, filed 12/27/90, effective 1/31/91.]

**WAC 246-03-050 Determination of lead agency and responsible official.** (1) The department shall be the lead agency for the following actions:

(a) Adoption or amendment of regulations relating to radioactive source materials; proposals to construct, operate, or expand any uranium or thorium mill, or any tailings areas generated by uranium or thorium milling,

or any low level radioactive waste burial facilities. The responsible official would be the division director, division of radiation protection, environmental health programs. Lead agency determination for other mineral processing proposals should be made in accordance with WAC 197-11-924 through 197-11-948;

(b) Approval of comprehensive plans for public water supply systems when such plans are developed by private applicants and unless indicated otherwise by WAC 197-11-932, 197-11-934 and 197-11-936, and approval of new public water supply systems or major extensions of existing public water supply systems when such systems are being proposed by a private applicant unless indicated otherwise by WAC 197-11-932, 197-11-934, and 197-11-936. The responsible official would be the section head, water supply and waste section, division of environmental health;

(c) Construction of any building, facility, or other installation for the purpose of housing department personnel or for fulfilling other statutorily directed or authorized functions. The responsible official would be a capital programs representative from the management services division, comptroller's office;

(2) Determination of the lead agency for department major actions not listed above shall be made in accordance with the procedures and requirements of WAC 246-03-140 (4)(c) and 197-11-922 through 197-11-948.

[Statutory Authority: RCW 43.21C.120. 92-02-018 (Order 224), § 246-03-050, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-050 (Order 122), § 246-03-050, filed 12/27/90, effective 1/31/91.]

**WAC 246-03-140 SEPA committee.** (1) There is hereby created a SEPA committee to oversee the department's SEPA activities.

(2) The SEPA committee shall be composed of:

(a) One representative from the division of drinking water, environmental health programs;

(b) One representative from the facility licensing and certification section;

(c) One capital programs representative from the comptroller's office, management services division; and

(d) One representative from the division of radiation protection, environmental health programs.

(3) A representative from the office of the attorney general will provide legal support to the committee.

(4) The SEPA committee shall:

(a) Oversee the department's SEPA activities to ensure compliance with these agency guidelines, the state SEPA guidelines, and the policies and goals set forth in the State Environmental Policy Act;

(b) Oversee the future revision of these agency guidelines so as to reflect:

(i) Future amendment of SEPA or the state SEPA guidelines;

(ii) The creation of new department programs.

(c) Designate the responsible official for any major action for which the department is lead agency when such designation has not occurred elsewhere in these agency guidelines.

[Statutory Authority: RCW 43.21C.120, 92-02-018 (Order 224), § 246-03-140, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-050 (Order 122), § 246-03-140, filed 12/27/90, effective 1/31/91.]

**WAC 246-08-001 Application of chapter 246-08 WAC.** (1) Scope. This chapter applies to adjudicative proceedings, begun on or after July 1, 1989, in programs administered by the department of health except those professional licensing programs for which the secretary is not the disciplinary authority as defined under RCW 18.130.040 (2)(b). The definition of the word "begun" is the department's receipt of the application for an adjudicative proceeding. Proceedings begun before July 1, 1989, are governed by the procedural rules in effect on June 30, 1989. Legal authority for adopting this chapter is RCW 34.05.220 (1)(a).

(2) Conflict in rules. If a provision in this chapter conflicts with a provision in the chapter containing the program's substantive rules, the provision in the chapter containing the program's substantive rules governs.

(3) Physical and mailing addresses. The presiding officer is generally an administrative law judge from the office of administrative hearings. Presiding officer administrative and field office addresses are listed under WAC 10-04-020. The reviewing officer is generally the secretary or the secretary's designee. The reviewing officer's address is the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851.

[Statutory Authority: RCW 34.05.220, 92-02-018 (Order 224), § 246-08-001, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-08-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 34.05.220, 90-06-018 (Order 038), § 248-08-410, filed 2/28/90, effective 3/1/90; Regulation 08.410, effective 3/11/60.]

**WAC 246-08-020 Application for an adjudicative proceeding.** (1) Uniform Disciplinary Act application. A person contesting a decision or statement of charges under the Uniform Disciplinary Act shall file a written application for an adjudicative proceeding with the administrative hearings unit. The application must be filed within twenty days of the person's receipt of the decision or statement of charges.

(2) Other program application. A person contesting a department decision in a program not governed by the

Uniform Disciplinary Act shall file a written application for an adjudicative proceeding by a method showing proof of receipt with the administrative hearings unit within twenty-eight days of receipt of the decision.

(3) Application contents. The application must include or have attached:

(a) A specific statement of the issue or issues and law involved;

(b) The grounds for contesting the department decision or statement of charges; and

(c) A copy of the contested department decision or statement of charges.

[Statutory Authority: RCW 34.05.220, 92-02-018 (Order 224), § 246-08-020, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-08-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 34.05.220, 90-06-018 (Order 038), § 248-08-413, filed 2/28/90, effective 3/1/90.]

**WAC 246-08-030 Administrative law judge—Authority—Application of law—Assignment—Disqualification.** (1) Authority. The administrative law judge shall:

(a) Hear and decide the issue anew (de novo);

(b) Determine the order of presentation of evidence;

(c) Administer oaths and affirmations;

(d) Issue subpoenas;

(e) Rule on procedural matters, objections, and motions;

(f) Rule on offers of proof and receive relevant evidence;

(g) Interrogate witnesses called by the parties in an impartial manner to develop any facts deemed necessary to fairly and adequately decide the matter;

(h) Call additional witnesses and request additional exhibits deemed necessary to complete the record and receive such evidence subject to full opportunity for cross-examination and rebuttal by all parties;

(i) Take any appropriate action necessary to maintain order during the hearing;

(j) Permit or require oral argument or briefs and determine the time limits for submission thereof;

(k) Permit photographic and recording equipment at hearings subject to conditions imposed by the administrative law judge to preserve confidentiality or to prevent disruption;

(l) Permit a person to waive any right conferred upon that person by chapter 34.05 RCW and/or chapter 246-08 WAC, except to the extent precluded by another provision of law; and

(m) Take any other action necessary and authorized by any applicable rule.

(2) Application of law. The administrative law judge shall:

(a) Apply as the first source of law governing an issue the rules of the department as adopted in the Washington Administrative Code (WAC);

(b) If there is no department rule governing the issue, resolve the issue on the basis of the best legal authority and reasoning available, including that found in federal and Washington Constitutions, statutes and regulations, and court decisions;

(c) Not declare any department rule invalid;  
 (d) If the validity of any department rule is raised as an issue at any proceeding, permit arguments to be made on the record concerning that issue for subsequent review purposes; and

(e) If the sole issue is one of federal or state law requiring adjustments for classes of people the department serves or regulates, dismiss the application without permitting argument to be made on the record regarding the validity of the law.

(3) Assignment of administrative law judge. If the notice of hearing does not state the name of the presiding administrative law judge, the chief administrative law judge of the office of administrative hearings shall:

(a) Make such assignment five days or more before the hearing; and

(b) Disclose the assignment to any party or representative making inquiry.

(4) Motion of prejudice.

(a) A motion of prejudice with a supporting affidavit under RCW 34.12.050 shall be filed at least three days before the hearing or any earlier stage of the adjudicative proceeding when the administrative law judge may be required to issue a discretionary ruling.

(b) The chief administrative law judge or designee shall rule upon subsequent motions of prejudice filed by the same party in the same proceeding.

(5) Petition for disqualification. An individual petitioning to disqualify an administrative law judge under RCW 34.05.425 shall file such petition with the administrative law judge assigned to preside over the proceeding.

[Statutory Authority: RCW 34.05.220, 92-02-018 (Order 224), § 246-08-030, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-08-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 34.05.220, 90-06-018 (Order 038), § 248-08-425, filed 2/28/90, effective 3/1/90.]

**WAC 246-08-070 Filing and service of papers.** (1) Service required when filing. A party filing a pleading, brief, or other paper, except an application for an adjudicative proceeding, with the administrative hearings unit, or the administrative law judge shall serve a copy of the paper upon:

(a) Every other party; or

(b) If the other party is represented or has an agent, the other party's representative or agent.

(2) Filing and service made by. Unless otherwise provided by law, filing and service shall be made by:

(a) Personal service;

(b) First class, registered, or certified mail;

(c) Telegraph;

(d) Electronic telefacsimile transmission and same-day mailing of copies; or

(e) Commercial parcel delivery company.

(3) Filing complete. Filing with the administrative hearings unit shall be complete upon actual receipt during office hours at the appropriate office. Filing with the administrative law judge shall be complete upon actual receipt during office hours at the office of the administrative law judge.

(4) Service complete. Service shall be complete when:

(a) Personal service is made;

(b) Mail is properly stamped, addressed, and deposited in the United States mail;

(c) A properly addressed telegram is deposited with a telegraph company with charges prepaid;

(d) An electronic telefacsimile transmission produces proof of transmission; or

(e) A commercial parcel is delivered to the parcel delivery company with charges prepaid.

(5) Proof of service. Where proof of service is required by statute or rule, filing the papers with the department or the administrative law judge, together with one of the following, shall constitute proof of service:

(a) An acknowledgement of service;

(b) A certificate of service including the date the papers were served upon all parties and the signature of the serving party indicating service was completed by:

(i) Personal service;

(ii) Mailing a copy properly addressed with postage prepaid to each party to the proceeding, or the party's representative or authorized agent;

(iii) Telegraphing a copy properly addressed with charges prepaid to each party to the proceeding, or the party's representative or authorized agent; or

(iv) Transmitting a copy by electronic telefacsimile device and, on the same day, mailing a copy to each party to the proceeding, or the party's representative or authorized agent; or

(v) Depositing a copy properly addressed with charges prepaid with a commercial parcel delivery company.

[Statutory Authority: RCW 34.05.220, 92-02-018 (Order 224), § 246-08-070, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-08-070, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 34.05.220, 90-06-018 (Order 038), § 248-08-437, filed 2/28/90, effective 3/1/90.]

**WAC 246-08-080 Vacating an order of dismissal for reason of default or withdrawal.** (1) Right to request. A party against whom a dismissal for reason of default or withdrawal is entered shall have the right to file a written petition requesting that the order be vacated.

(2) Contents. The request shall state the grounds relied upon.

(3) Filed at. The request shall be filed at the administrative hearings unit for other programs within twenty-one days from the date the dismissal order was served.

(4) Grounds to vacate an order of dismissal. If, in the reasoned opinion of the administrative law judge, good cause to grant the relief is shown, the administrative law judge shall vacate the order of dismissal and reinstate the application.

[Statutory Authority: RCW 34.05.220, 92-02-018 (Order 224), § 246-08-080, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-08-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 34.05.220, 90-06-018 (Order 038), § 248-08-440, filed 2/28/90, effective 3/1/90; Regulation 08.440, effective 3/11/60.]

**WAC 246-08-100 Teleconference hearing.** (1) When authorized. The administrative law judge may

conduct all or part of the hearing by telephone, television, or other electronic means if each participant in the hearing has an opportunity to participate in, to hear, and, if technically and economically feasible, to see the entire proceeding while it is taking place.

(2) Documentary evidence. When the hearing is conducted by electronic means, documentary evidence shall be submitted in advance as provided under WAC 246-08-110(2).

[Statutory Authority: RCW 34.05.220, 92-02-018 (Order 224), § 246-08-100, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-08-100, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 34.05-220, 90-06-018 (Order 038), § 248-08-449, filed 2/28/90, effective 3/1/90.]

**WAC 246-08-130 Petition for review--Response to petition--Disqualification of review judge.** (1) Initial orders that may become final orders.

(a) If a petition for review is not filed within twenty-one days from service of the initial order, the initial order shall, subject to the provisions of this section, become the final order.

(b) An initial order shall not become the final order in proceeding governed by the Uniform Disciplinary Act. Each party shall have the right to file a petition for review of the administrative law judge's order. Whether a petition for review is or is not filed, the secretary or designee shall enter the final order.

(2) Who may petition. Each party has the right to file a petition for review of an order entered by an administrative law judge.

(3) Petition contents. The petition for review shall:

(a) Specify the portions of the order to which exception is taken; and

(b) Refer to the evidence of record relied upon to support the petition.

(4) Petition time limits.

(a) The period to timely file a petition for review is twenty-one days from the date the initial decision was served.

(b) The secretary or designee shall extend the twenty-one day period to file a petition for review upon request of a party when:

(i) The request is made during the twenty-one day period; and

(ii) Good cause for the extension is shown.

(c) The secretary or designee shall waive the twenty-one day limit for filing a petition for review when:

(i) A petition for review is filed within thirty days of the date the initial order becomes final; and

(ii) The petitioner demonstrates good cause for failure to file a timely petition. Good cause includes:

(A) A mistake, inadvertence, or excusable neglect on the part of the petitioner; or

(B) An unavoidable casualty or misfortune preventing the petitioner from timely filing a petition for review.

(5) Petition filing and service. The petition for review shall be in writing and filed with the secretary or designee. The petitioner shall serve copies of the petition upon the other parties or their representative at the time the petition is filed. A petition in a proceeding governed by

the Uniform Disciplinary Act and/or a petition in other programs shall be filed on the secretary or designee at the administrative hearings unit.

(6) Notice of petition. When a petition for review is filed, the secretary or designee shall send a copy of the petition to the nonpetitioning party or, if represented, to the representative with a notice of the right to file a response.

(7) Response time limit, filing, service.

(a) The nonpetitioning party shall file any response with the secretary or designee within seven days of the date that office served a copy of the petition on the nonpetitioning party or representative.

(b) The nonpetitioning party shall serve a copy of the response upon the petitioner and any other party or, if represented, on the representative at the time the response is filed.

(c) A secretary or designee may extend the period to file a response upon request of a party showing good cause.

(8) Disqualification. The secretary or designee shall disclose the assignment of the reviewing officer to any party or representative making inquiry. An individual petitioning to disqualify a reviewing officer under RCW 34.05.425 shall file such petition with the reviewing officer assigned to the proceeding.

[Statutory Authority: RCW 34.05.220, 92-02-018 (Order 224), § 246-08-130, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-08-130, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 34.05-220, 90-06-018 (Order 038), § 248-08-464, filed 2/28/90, effective 3/1/90.]

**WAC 246-08-140 Reconsideration.** Within ten days of service of a review order, any party may file a petition for reconsideration. The petition shall state the specific grounds upon which relief is requested. A petition for reconsideration shall be filed at the administrative hearings unit.

[Statutory Authority: RCW 34.05.220, 92-02-018 (Order 224), § 246-08-140, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-08-140, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 34.05-220, 90-06-018 (Order 038), § 248-08-470, filed 2/28/90, effective 3/1/90; Regulation 08.470, effective 3/11/60.]

**WAC 246-08-200 Judicial review of final adjudicative order.** (1) Right to judicial review; exclusive remedy. An appellant or intervener aggrieved, as described under RCW 34.05.530, by the final decision or order in a department of health adjudicative proceeding may appeal the decision or order to court. Judicial review shall only be obtained under chapter 34.05 RCW. Judicial review may not be obtained through any other procedure. Chapter 34.05 RCW contains the pertinent provisions of law.

(2) Instituting judicial review; filing and serving the petition. As described under RCW 34.05.542(2), within thirty days after the secretary or designee mails the final decision, the petitioner shall file the petition for judicial review with the court and serve a copy of the petition on the department of health, the office of the attorney general, and all parties of record.

(a) A petition shall be filed in the superior court, at the petitioner's option, for:

- (i) Thurston County;
- (ii) The county of the petitioner's residence or principal place of business; or
- (iii) Any county where property affected by the decision is located.

(b) Service of a copy of the petition for judicial review on the department of health may be had by personally serving a copy of the petition on the administrative hearings unit.

(c) Service of a copy of the petition for judicial review on the office of the attorney general may be had by mailing a copy of the petition, postage prepaid, to the Office of the Attorney General, Highway-Licenses Building, P.O. Box 40109, Olympia, WA 98504-0109.

(d) Service of a copy of the petition for judicial review on other parties of record may be had by mailing the copy of the petition to the other parties, properly addressed and postage prepaid.

[Statutory Authority: RCW 34.05.220, 92-02-018 (Order 224), § 246-08-200, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-08-200, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 34.05-220, 90-06-018 (Order 038), § 248-08-575, filed 2/28/90, effective 3/1/90.]

- 246-100-236 Duties of laboratories—Reporting of laboratory results indicative of certain reportable diseases.

**WAC 246-100-011 Definitions.** The following definitions shall apply in the interpretation and enforcement of chapter 246-100 WAC:

(1) "Acquired immunodeficiency syndrome (AIDS)" means an illness characterized by the diseases and conditions defined and described by the Centers for Disease Control, U.S. Public Health Services, Morbidity and Mortality Weekly Report (MMWR), August 14, 1987, Volume 36, Number 1S.

(2) "AIDS counseling" means counseling directed toward:

(a) Increasing the individual's understanding of acquired immunodeficiency syndrome; and

(b) Assessing the individual's risk of HIV acquisition and transmission; and

(c) Affecting the individual's behavior in ways to reduce the risk of acquiring and transmitting HIV infection.

(3) "Board" means the Washington state board of health.

(4) "Carrier" means a person harboring a specific infectious agent and serving as a potential source of infection to others, but who may or may not have signs and/or symptoms of the disease.

(5) "Case" means a person, alive or dead, having been diagnosed to have a particular disease or condition by a health care provider with diagnosis based on clinical or laboratory criteria or both.

(6) "Category A disease or condition" means a reportable disease or condition of urgent public health importance, a case or suspected case of which must be reported to the local or state health officer immediately at the time of diagnosis or suspected diagnosis.

(7) "Category B disease or condition" means a reportable disease or condition of public health importance, a case of which must be reported to the local health officer no later than the next working day following date of diagnosis.

(8) "Category C disease or condition" means a reportable disease or condition of public health importance, a case of which must be reported to the local health officer within seven days of diagnosis.

(9) "Child day care facility" means an agency regularly providing care for a group of children for less than twenty-four hours a day and subject to licensing under chapter 74.15 RCW.

(10) "Communicable disease" means an illness caused by an infectious agent which can be transmitted from one person, animal, or object to another person by direct or indirect means including transmission via an intermediate host or vector, food, water, or air.

(11) "Contact" means a person exposed to an infected person, animal, or contaminated environment which might provide an opportunity to acquire the infection.

(12) "Department" means the Washington state department of social and health services.

(13) "Detention" or "detainment" means physical restriction of activities of an individual by confinement, consistent with WAC 246-100-206(8), for the purpose of monitoring and eliminating behaviors presenting imminent danger to public health and may include physical plant, facilities, equipment, and/or personnel to physically restrict activities of the individual to accomplish such purposes.

(14) "Food handler" means any person preparing, processing, handling, or serving food or beverages for people other than members of his or her household.

(15) "Food service establishment" means any establishment where food or beverages are prepared for sale or service on the premises or elsewhere, and any other establishment or operation where food is served or provided for the public with or without charge.

(16) "Health care facility" means:

(a) Any facility or institution licensed under chapter 18.20 RCW, boarding home, chapter 18.46 RCW, maternity homes, chapter 18.51 RCW, nursing homes, chapter 70.41 RCW, hospitals, or chapter 71.12 RCW, private establishments, clinics, or other settings where one or more health care providers practice; and

(b) In reference to a sexually transmitted disease, other settings as defined in chapter 70.24 RCW.

(17) "Health care provider" means any person having direct or supervisory responsibility for the delivery of health care or medical care who is:

(a) Licensed or certified in this state under Title 18 RCW; or

(b) Is military personnel providing health care within the state regardless of licensure.

(18) "HIV testing" means conducting a laboratory test or sequence of tests to detect the human immunodeficiency virus (HIV) or antibodies to HIV performed in accordance with requirements to WAC 246-100-207.

(19) "Infection control measures" means the management of infected persons, persons suspected to be infected, and others in such a manner as to prevent transmission of the infectious agent.

(20) "Isolation" means the separation or restriction of activities of infected persons, or of persons suspected to be infected, from other persons to prevent transmission of the infectious agent.

(21) "Laboratory director" means the director or manager, by whatever title known, having the administrative responsibility in any medical laboratory.

(22) "Local health department" means the city, town, county, or district agency providing public health services to persons within the area, as provided in chapter 70.05 RCW and chapter 70.08 RCW.

(23) "Local health officer" means the individual having been appointed under chapter 70.05 RCW as the health officer for the local health department, or having been appointed under chapter 70.08 RCW as the director of public health of a combined city-county health department.

(24) "Medical laboratory" means any facility analyzing specimens of original material from the human body for purposes of patient care.

(25) "Nosocomial infection" means an infection acquired in a hospital or other health care facility.

(26) "Outbreak" means the occurrence of cases of a disease or condition in any area over a given period of time in excess of the expected number of cases.

(27) "Post-test counseling" means counseling after the HIV test when results are provided and directed toward:

(a) Increasing the individual's understanding of human immunodeficiency virus (HIV) infection;

(b) Affecting the individual's behavior in ways to reduce the risk of acquiring and transmitting HIV infection;

(c) Encouraging the individual testing positive to notify persons with whom there has been contact capable of spreading HIV;

(d) Assessing emotional impact of HIV test results; and

(e) Appropriate referral for other community support services.

(28) "Pretest counseling" means counseling provided prior to HIV testing and aimed at:

(a) Helping an individual to understand:

(i) Ways to reduce the risk of human immunodeficiency virus (HIV) transmission;

(ii) The nature, purpose, and potential ramifications of HIV testing;

(iii) The significance of the results of HIV testing; and

(iv) The dangers of HIV infection; and

(b) Assessing the individual's ability to cope with the results of HIV testing.

(29) "Principal health care provider" means the attending physician or other health care provider recognized as primarily responsible for diagnosis and treatment of a patient or, in the absence of such, the health care provider initiating diagnostic testing or therapy for a patient.

(30) "Quarantine" means the separation or restriction on activities of a person having been exposed to or infected with an infectious agent, to prevent disease transmission.

(31) "Reportable disease or condition" means a disease or condition of public health importance, a case of which, and for certain diseases, a suspected case of which, must be brought to the attention of the local health officer.

(32) "School" means a facility for programs of education as defined in RCW 28A.31.102 (preschool and kindergarten through grade twelve).

(33) "Sexually transmitted disease (STD)" means a bacterial, viral, fungal, or parasitic disease or condition which is usually transmitted through sexual contact, including:

(a) Acute pelvic inflammatory disease;

(b) Chancroid;

(c) Chlamydia trachomatis infection;

(d) Genital and neonatal herpes simplex;

(e) Genital human papilloma virus infection;

(f) Gonorrhea;

(g) Granuloma inguinale;

- (h) Hepatitis B infection;
- (i) Human immunodeficiency virus infection (HIV) and acquired immunodeficiency syndrome (AIDS);
- (j) Lymphogranuloma venereum;
- (k) Nongonococcal urethritis (NGU); and
- (l) Syphilis.

(34) "State health officer" means the person designated by the secretary of the department to serve as statewide health officer, or, in the absence of such designation, the person having primary responsibility for public health matters in the state.

(35) "Suspected case" means a person whose diagnosis is thought likely to be a particular disease or condition with suspected diagnosis based on signs and symptoms, laboratory evidence, or both.

(36) "Unusual communicable disease" means a communicable disease which is not commonly seen in the state of Washington but which is of general public health concern including, but not limited to, Lassa fever, smallpox, typhus, and yellow fever.

(37) "Veterinarian" means an individual licensed under provisions of chapter 18.92 RCW, veterinary medicine, surgery, and dentistry and practicing animal health care.

[Statutory Authority: RCW 43.20.050 and 70.24.130. 92-02-019 (Order 225B), § 246-100-011, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-100-011, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.24 RCW. 89-07-095 (Order 325), § 248-100-011, filed 3/22/89; 88-17-057 (Order 317), § 248-100-011, filed 8/17/88. Statutory Authority: RCW 43.20.050. 88-07-063 (Order 308), § 248-100-011, filed 3/16/88; 87-11-047 (Order 302), § 248-100-011, filed 5/19/87.]

**WAC 246-100-016 Confidentiality.** Identifying information about any individual with a reportable disease or condition pursuant to chapter 246-100 WAC shall be protected by persons with knowledge of such identity.

(1) Health care providers, employees of a health care facility or medical laboratory, and other individuals with knowledge of a person with sexually transmitted disease, following the basic principles of health care providers, which respect the human dignity and confidentiality of patients:

(a) May disclose identity of a person or release identifying information only as specified in RCW 70.24.105; and

(b) Shall establish and implement policies and procedures to maintain confidentiality related to a patient's medical information.

(2) For the purpose of RCW 70.24.105(6), customary methods for exchange of medical information shall be limited as follows:

(a) Health care providers may exchange confidential medical information related to HIV testing, HIV test results, and confirmed HIV or confirmed STD diagnosis and treatment in order to provide health care services to the patient. Meaning:

(i) The information shared impacts the care or treatment decisions concerning the patient; and

(ii) The health care provider requires the information for the patient's benefit.

(b) "Health care services to the patient" means personal interaction, treatment, consultation, or intervention for patient care.

(c) Health care facility administrators are authorized to permit access to medical information as necessary to fulfill professional duties. Health care facility administrators shall advise those persons permitted access under this section of the requirement to maintain confidentiality of such information as defined under this section and chapter 70.24 RCW. Professional duties means the following or functionally similar activities:

- (i) Medical record or chart audits;
- (ii) Peer reviews;
- (iii) Quality assurance;
- (iv) Utilization review purposes;
- (v) Research review board reviews under chapter 42.48 RCW;
- (vi) Risk management; and
- (vii) Reviews required under federal or state law or rules.

(d) Health care facility administrators and health care providers responsible for office management are authorized to permit access to a patient's medical information and medical record by health care facility and medical staff or office staff to carry out duties required for care and treatment of a patient and the management of medical information and the patient's medical record.

(e) Health care facility administrators are authorized to permit exchange of medical information for training and teaching of health care providers and students when exchange of confidential medical information is necessary for such training and specifically related to the care of the patient.

(3) Health care providers, employees of a health care facility or medical laboratory, and other individuals with knowledge of a person with a reportable disease or condition, other than those specified in subsections (1) and (2) of this section, shall release identifying information only to other individuals responsible for protecting the health and well being of the public through control of communicable and certain other diseases.

(4) Local and state health department personnel shall maintain individual case reports as confidential records consistent with WAC 246-100-091.

(5) The Washington state public health laboratory, other laboratories approved as public health referral laboratories, and any persons, institutions, or facilities submitting specimens or records containing patient-identifying information shall maintain the identifying information accompanying submitted laboratory specimens as confidential records.

(6) Statistical summaries and epidemiologic studies based on individual case reports may be public information provided no individual is identified.

[Statutory Authority: RCW 43.20.050 and 70.24.130. 92-02-019 (Order 225B), § 246-100-016, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-100-016, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.24.105. 90-07-033 (Order 043), § 248-100-016, filed 3/14/90, effective 4/14/90. 17-057 (Order 317), § 248-100-016, filed 8/17/88. Statutory Authority: RCW 43.20.050. 87-11-047 (Order 302), § 248-100-016, filed 5/19/87.]

**WAC 246-100-021 Responsibilities and duties—Health care providers.** Every health care provider, as defined in chapter 246-100 WAC, shall:

(1) Provide adequate, understandable instruction in control measures designed to prevent the spread of disease to:

(a) Each patient with a communicable disease under his or her care,

(b) Family of a patient with a communicable disease,

(c) Contacts and others as appropriate to prevent spread of disease.

(2) Ensure notification of the local health officer or local health department regarding:

(a) Cases of reportable diseases and conditions. See WAC 246-100-071, 246-100-076, and 246-100-081;

(b) Outbreaks or suspected outbreaks of disease. See WAC 246-100-071, 246-100-076, and 246-100-081;

(c) Known barriers which might impede or prevent compliance with orders for infection control or quarantine; and

(d) Name, address, and other pertinent information for any case or carrier refusing to comply with prescribed infection control measures.

(3) Cooperate with public health authorities during investigation of:

(a) Circumstances of a case or suspected case of a reportable disease or condition or other communicable disease, and

(b) An outbreak or suspected outbreak of illness.

Comply with requirements in WAC 246-100-206, 246-100-211, and 246-100-217.

[Statutory Authority: RCW 43.20.050, 70.24.130 and 70.104.055. 92-02-019 (Order 225B), § 246-100-021, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-100-021, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.104 RCW. 90-10-036 (Order 049), § 248-100-021, filed 4/26/90, effective 5/27/90. Statutory Authority: RCW 43.20.050. 87-11-047 (Order 302), § 248-100-021, filed 5/19/87.]

**WAC 246-100-026 Responsibilities and duties—Veterinarians.** (1) Veterinarians shall:

(a) Notify the local health officer of any human case, suspected case, outbreak, or suspected outbreak of reportable disease listed in WAC 246-100-076;

(b) Notify the state veterinarian, Washington state department of agriculture, within one working day of any animal case, suspected case, outbreak, or suspected outbreak of:

(i) Anthrax,

(ii) Brucellosis,

(iii) Equine encephalitis,

(iv) Plague,

(v) Rabies,

(vi) Psittacosis, and

(vii) Tuberculosis.

(2) Upon receipt of a report of human disease, the state health officer shall immediately notify the state veterinarian of reports of:

(a) Anthrax,

(b) Brucellosis,

(c) Psittacosis,

(d) Equine encephalitis,

(e) Plague,

(f) Rabies, and

(g) Tuberculosis in an animal handler.

(3) Upon receipt of a report of animal disease, the state veterinarian shall notify the state health officer of reports of:

(a) Anthrax,

(b) Brucellosis excluding Strain 19 disease,

(c) Psittacosis,

(d) Equine encephalitis,

(e) Plague,

(f) Rabies, and

(g) Tuberculosis.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-026, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-026, filed 12/27/90, effective 1/31/91; 88-07-063 (Order 308), § 248-100-026, filed 3/16/88.]

**WAC 246-100-031 Responsibilities and duties—Laboratory directors.** The director of each medical laboratory in the state shall:

(1) Register the laboratory with the department as described in WAC 246-100-221.

(2) Submit microbiologic cultures or subcultures or appropriate clinical material to the Washington state public health laboratory or other laboratory designated by the state health officer, as described in WAC 246-100-231.

(3) Report to the local health officer or state health officer certain positive test results, as described in WAC 246-100-236.

(4) Cooperate with local and state health department personnel in the investigation of an outbreak, suspected outbreak, case, suspected case, carrier, or contact of a communicable disease or reportable disease or condition, as described in WAC 246-100-241.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-031, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-031, filed 12/27/90, effective 1/31/91; 87-11-047 (Order 302), § 248-100-031, filed 5/19/87.]

**WAC 246-100-036 Responsibilities and duties—Local health officers.** (1) The local health officer shall review and determine appropriate action for:

(a) Each reported case or suspected case of a reportable disease or condition;

(b) Any disease or condition considered a threat to public health;

(c) Each reported outbreak or suspected outbreak of disease, requesting assistance from the department in carrying out investigations when necessary; and

(d) Instituting disease prevention and infection control, isolation, detention, and quarantine measures necessary to prevent the spread of communicable disease, invoking the power of the courts to enforce these measures when necessary.

(2) Local health officers shall:

(a) Submit reports to the state health officer as required in chapter 246-100 WAC;

(b) Establish a system at the local health department for maintaining confidentiality of written records and written and telephoned disease case reports consistent with WAC 246-100-016;

(c) Notify health care providers within the health district regarding requirements in this chapter;

(d) Distribute appropriate report forms to persons responsible for reporting;

(e) Notify the principal health care provider, if possible, prior to initiating a case investigation by the local health department;

(f) Make HIV testing, AIDS counseling, and pretest and post-test counseling, as defined in this chapter, available for voluntary, mandatory, and anonymous testing and counseling as required by RCW 70.24.400;

(g) Make information on anonymous HIV testing, AIDS counseling, and pretest and post-test counseling, as described under WAC 246-100-208 and 246-100-209, available;

(h) Use identifying information on HIV-infected individuals provided according to WAC 246-100-072 only:

(i) For purposes of contacting the HIV-positive individual to provide test results and post-test counseling; or

(ii) To contact sex and injection equipment-sharing partners; and

(i) Destroy documentation of referral information established in WAC 246-100-072 and this subsection containing identities and identifying information on HIV-infected individuals and at-risk partners of those individuals immediately after notifying partners or within three months, whichever occurs first.

(3) Each local health officer has the authority to:

(a) Carry out additional steps determined to be necessary to verify a diagnosis reported by a health care provider;

(b) Require any person suspected of having a reportable disease or condition to submit to examinations required to determine the presence of the disease or condition; and

(c) Investigate any case or suspected case of a reportable disease or condition or other illness, communicable or otherwise, if deemed necessary.

(4) Local health officers shall conduct investigations and institute control measures consistent with those indicated in the fifteenth edition 1990 of *Control of Communicable Diseases in Man*, edited by Abram S. Benenson, published by the American public health association, except:

(a) When superseded by more up-to-date measures, or

(b) When other measures are more specifically related to Washington state.

[Statutory Authority: RCW 43.20.050 and 70.24.130. 92-02-019 (Order 225B), § 246-100-036, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-100-036, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.24 RCW. 89-02-008 (Order 324), § 248-100-036, filed 12/27/88. Statutory Authority: RCW 43.20.050. 88-07-063 (Order 308), § 248-100-036, filed 3/16/88.]

**WAC 246-100-041 Responsibilities and duties-- State health officer.** (1) The state health officer shall have authority to:

(a) Require reporting of cases and suspected cases of disease and conditions in addition to those required in WAC 246-100-076 for a period of time less than thirty-six months when:

(i) The disease or condition is newly recognized or recently acknowledged as a public health concern, and

(ii) Epidemiologic investigation based on reports of cases may contribute to understanding of the disease or condition, and

(iii) Written notification is provided to all local health officers regarding:

(A) Additional reporting requirements, and

(B) Rationale or justification for specifying the disease or condition as reportable.

(b) Require laboratories to submit specimens indicative of infections in addition to those required in WAC 246-100-231 for a period of time less than thirty-six months, provided:

(i) The infection is of public health concern, and

(ii) Written notification is provided to all local health officers and all directors of medical laboratories registered as described in WAC 246-100-221 explaining:

(A) Actions required, and

(B) Reason for the addition.

(2) The state health officer's authorization to require reporting of cases or submission of laboratory specimens, other than those specified in WAC 246-100-076 and 246-100-231, shall expire thirty-six months from the date of written notification of local health officers and laboratory directors unless amended rules are adopted by the state board of health.

(3) The state health officer shall distribute periodic epidemiologic summary reports and an annual review of public health issues to local health officers and local health departments.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-041, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-041, filed 12/27/90, effective 1/31/91; 87-11-047 (Order 302), § 248-100-041, filed 5/19/87.]

**WAC 246-100-046 Responsibilities and duties-- Cases, suspected cases, carriers, contacts, and others.** (1) Persons shall cooperate with public health personnel during:

(a) Investigation of the circumstances of a case, suspected case, outbreak, or suspected outbreak of a communicable or other disease or condition; and

(b) Implementation of infection control measures, including isolation and quarantine measures.

(2) Individuals having knowledge of a person with a reportable disease or condition may notify the local health officer as described in WAC 246-100-071.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-046, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-046, filed 12/27/90, effective 1/31/91; 87-11-047 (Order 302), § 248-100-046, filed 5/19/87.]

**WAC 246-100-071 Responsibility for reporting to and cooperating with the local health department.** (1) A

principal health care provider in attendance on a case of any reportable disease or condition shall report the case to the local health department as required in this chapter.

(2) Other health care providers in attendance on a case of a reportable disease or condition shall report the case to the local health department unless the case has already been reported.

(3) Health care facilities where more than one health care provider may be in attendance on a case of a reportable disease or condition may establish administrative procedures to assure forwarding of reports to the local health department without duplication. Neither the submission of a specimen to a public health laboratory as required in WAC 246-100-231 nor the laboratory reporting a positive test result as required in WAC 246-100-236 relieves the principal health care provider or health care facility from responsibility for reporting to the local health department.

(4) Individuals knowing about a person suspected to have any reportable disease or condition may report the name, other identifying information, and other known information described in WAC 246-100-081 to the local health department.

(5) School principals, school nurses, and day care center operators knowing of a case or suspected case of a reportable disease or condition in the school or center shall notify the local health department.

(6) Each school teacher and day care worker knowing of a case or suspected case of a reportable disease or condition shall report the name and other identifying information to the principal, school nurse, or day care center operator.

(7) Medical laboratories shall report laboratory evidence of certain reportable diseases to the local or state health department as described in WAC 246-100-236.

(8) Health care providers, health care facilities, laboratory directors, and individuals shall cooperate with the local health officer in the investigation of a case or suspected case of a reportable disease or condition, and shall, when requested by the local health officer, provide in a timely manner any information related to the clinical, laboratory, and epidemiologic circumstances of the case or suspected case.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-100-071, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-071, filed 12/27/90, effective 1/31/91; 87-11-047 (Order 302), § 248-100-071, filed 5/19/87.]

**WAC 246-100-072 Rules for notification of partners at-risk of HIV infection.** (1) A health care provider may consult with the local health officer or an authorized representative about an HIV-infected individual without identifying the individual.

(2) Only under the specific circumstances listed below, a principal health care provider shall report the identity of sex or injection equipment-sharing partners of an HIV-infected individual to the local health officer or an authorized representative:

(a) After being informed of the necessity to notify sex and injection-equipment sharing partners, the HIV-infected individual either refuses or is unable to notify partners that partners:

(i) May have been exposed to and infected with HIV; and

(ii) Should seek HIV-pretest counseling and consider HIV testing; and

(b) The HIV-infected individual neither accepts assistance nor agrees to referral to the local health officer or an authorized representative for assistance in notifying partners.

(3) Only in the specific circumstances listed below, a principal health care provider shall report the identity of an individual with a positive HIV test result to the local health officer or an authorized representative:

(a) The principal health care provider provided pretest counseling as described in WAC 246-100-209(1) before the individual was tested; and

(b) The principal health care provider made efforts, but was unable to meet face-to-face with the individual to notify the individual of the HIV-test result and to provide post-test counseling as required in WAC 246-100-209 in order to assure partner notification.

(4) A health care provider shall not disclose the identity of an HIV-infected individual or the identity of sex and injection equipment-sharing partners at risk of HIV infection, except as authorized in RCW 70.24.105, WAC 246-100-072, or 246-100-076.

(5) Local health officers and authorized representatives shall:

(a) Confirm conditions in subsections (2) and (3) of this section were met prior to initiating partner notification or receiving referral of identity of an HIV-infected individual; and

(b) Use identifying information, provided according to this section, on HIV-infected individuals only for contacting the HIV-infected individual to provide post-test counseling or to contact sex and injection equipment-sharing partners; and

(c) Destroy documentation of referral information established under this subsection, containing identities and identifying information on the HIV-infected individual and at-risk partners of that individual, immediately after notifying partners or within three months of the date information was received, whichever occurs first.

[Statutory Authority: RCW 43.20.050 and 70.24.130, 92-02-019 (Order 225B), § 246-100-072, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050, 91-02-051 (Order 124B), recodified as § 246-100-072, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.24 RCW, 89-02-008 (Order 324), § 248-100-072, filed 12/27/88.]

**WAC 246-100-076 Reportable diseases and conditions.** (1) The following diseases and conditions shall be reported as individual case reports to the local health department in accordance with requirements and procedures described throughout chapter 246-100 WAC:

(a) Category A diseases require an immediate report at the time a case is suspected or diagnosed and include:

(i) Anthrax,

(ii) Botulism (including food-borne, infant, and wound),

(iii) Cholera,

(iv) Diphtheria, noncutaneous,

(v) Measles (rubeola),

(vi) Paralytic shellfish poisoning,

(vii) Plague,

(viii) Poliomyelitis, and

(ix) Rabies.

(b) Category B diseases or conditions require a case report within one day of diagnosis and include:

(i) Brucellosis,

(ii) Gastroenteritis of suspected food-borne or water-borne origin,

(iii) Hemophilus influenzae invasive disease (excluding otitis media) in children age five years and under,

(iv) Hepatitis A and B, acute,

(v) Leptospirosis,

(vi) Listeriosis,

(vii) Meningococcal disease,

(viii) Paratyphoid fever (see salmonellosis),

(ix) Pertussis,

(x) Rubella, including congenital,

(xi) Salmonellosis, including paratyphoid fever and typhoid fever,

(xii) Shigellosis,

(xiii) Syphilis—primary, secondary, or congenital (for other, see Category C),

(xiv) Typhoid fever, including carrier (see salmonellosis),

(xv) Unusual communicable disease (see definition WAC 246-100-011).

(c) Category C diseases or conditions require a case report within seven days of diagnosis and include:

(i) Acquired immunodeficiency syndrome (AIDS) and class IV human immunodeficiency virus (HTLV III or LAV diseases classified by centers for disease control, United States public health service, MMWR, 5/23/86),

(ii) Amebiasis,

(iii) Campylobacteriosis,

(iv) Chancroid,

(v) Chlamydia trachomatis infection,

(vi) Ecoli 0157:H7 infection,

(vii) Encephalitis, viral,

(viii) Giardiasis,

(ix) Gonorrhea,

(x) Granuloma inguinale,

(xi) Herpes simplex, initial genital infection,

(xii) Herpes simplex, neonatal,

(xiii) Hepatitis non-A, non-B, and unspecified,

(xiv) Kawasaki syndrome,

(xv) Legionellosis,

(xvi) Leprosy (Hansen's disease),

(xvii) Lyme disease,

(xviii) Lymphogranuloma venereum,

(xix) Malaria,

(xx) Mycobacteriosis, including tuberculosis,

(xxi) Mumps,

(xxii) Nongonococcal urethritis,

(xxiii) Pelvic inflammatory disease, acute,

(xxiv) Pseudomonas folliculitis of suspected water-borne origin,

(xxv) Psittacosis,

(xxvi) Q fever,

(xxvii) Relapsing fever (borreliosis),

(xxviii) Reye Syndrome,

(xxix) Rheumatic fever,

(xxx) Rocky mountain spotted fever,

(xxxi) Syphilis—other (see also Category B),

(xxxii) Tetanus,

(xxxiii) Tick paralysis,

(xxxiv) Toxic shock syndrome,

(xxxv) Trichinosis,

(xxxvi) Tuberculosis,

(xxxvii) Tularemia,

(xxxviii) Vibriosis,

(xxxix) Yersiniosis, and

(xxxx) Severe adverse reaction to immunization.

(2) Any cluster or pattern of cases, suspected cases, deaths, or increased incidence of any disease or condition beyond that expected in a given period which may indicate an outbreak, epidemic, or related public health hazard shall be reported immediately by telephone to the local health officer. Such patterns include, but are not limited to, suspected or confirmed outbreaks of food borne or waterborne disease, chickenpox, influenza, viral meningitis, nosocomial infection suspected due to contaminated products or devices, or environmentally related disease.

(3) Local health officers may require reporting of additional diseases and conditions.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-076, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-076, filed 12/27/90, effective 1/31/91; 87-11-047 (Order 302), § 248-100-076, filed 5/19/87.]

#### **WAC 246-100-081 Reports--Content--Time--Hospital monthly report permitted for certain diseases.**

(1) Health care providers, health care facilities, and others as required in chapter 246-100 WAC shall report each case of a reportable disease or condition (Category A, B, and C), to the local health officer including the following information:

(a) Name,

(b) Address,

(c) Age,

(d) Sex,

(e) Diagnosis or suspected diagnosis of disease or condition,

(f) Identity of the principal health care provider (minimally first and last name), and

(g) Name and address or telephone number of the person providing the report.

(2) Local health officers may require other information of epidemiologic or public health value including but not limited to:

(a) Immunization status,

(b) History and circumstances of possible exposure or source,

(c) Identity of contacts at risk for disease, if known,

(d) Occupation, school, or day care of case,

- (e) Date of onset of disease or condition, and
- (f) Race.

(3) Health care providers, health care facilities, and others required in chapter 246-100 WAC to report cases of disease or conditions shall:

(a) Immediately telephone the report of each case or suspected case of Category A disease or condition, WAC 246-100-076, to the local health department,

(b) Telephone a report of Category B disease or condition, WAC 246-100-076, to the local health department no later than one working day following diagnosis,

(c) Submit a written report of each Category C disease or condition, WAC 246-100-076, to the local health department within seven days of diagnosis including:

(i) Completion of an individual case report form provided or approved by the local health department, or

(ii) A telephone report if:

(A) Telephone reports are approved by the local health officer, and

(B) The local health officer assumes responsibility for completion of the written case report form.

(4) Hospitals may:

(a) Elect a monthly reporting system only for certain category C diseases or conditions including:

(i) Chlamydia trachomatis infection;

(ii) Kawasaki syndrome;

(iii) Leprosy (Hansen's disease);

(iv) Mumps;

(v) Mycobacteriosis, excluding tuberculosis;

(vi) Pelvic inflammatory disease, acute including those diseases classified as pelvic inflammatory disease in international classification of diseases, 9th revision, clinical modification, volume I and II, 1980;

(vii) Reye syndrome; and

(viii) Toxic shock syndrome.

(b) Be waived from requirements to report:

(i) Initial genital herpes simplex infection,

(ii) Nongonococcal urethritis, and

(iii) Pseudomonas folliculitis of suspected waterborne origin.

(5) Hospitals shall:

(a) Report immediately by telephone any outbreak or suspected outbreak (see WAC 246-100-076).

(b) Include in monthly reports permitted only for certain diseases specified in subsection (4) of this section, at least:

(i) Name of case,

(ii) Date of admission or outpatient visit, and

(iii) Name of principal health care provider.

(6) Principal health care providers shall report each case of disease or condition, including those listed in subsection (4) of this section within seven days of diagnosis and as specified in subsection (3) of this section.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-100-081, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-081, filed 12/27/90, effective 1/31/91; 87-11-047 (Order 302), § 248-100-081, filed 5/19/87.]

**WAC 246-100-086 Reporting diseases and conditions directly to department.** (1) Health care providers

and health care facilities shall telephone reports directly to the department for diseases and conditions under WAC 246-100-076 when:

(a) A local health department is closed at the time a case or suspected case of a category A reportable disease occurs, and

(b) A local health department is closed at the time an outbreak or suspected outbreak occurs (see WAC 246-100-076).

(2) The twenty-four hour department telephone number for reporting diseases or conditions under WAC 246-100-076 is (206) 361-2914 or SCAN 245-2914.

(3) Health care providers and health care facilities shall telephone reports of pesticide poisoning cases or suspected pesticide poisoning cases under RCW 70.104-.055 directly to the department of health by dialing the twenty-four hour toll-free telephone number 1-800-356-2323.

[Statutory Authority: RCW 43.20.050 and 70.104.055, 92-02-019 (Order 225B), § 246-100-086, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050, 91-02-051 (Order 124B), recodified as § 246-100-086, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.104 RCW, 90-10-036 (Order 049), § 248-100-086, filed 4/26/90, effective 5/27/90. Statutory Authority: RCW 43.20.050, 87-11-047 (Order 302), § 248-100-086, filed 5/19/87.]

**WAC 246-100-166 Immunization of day care and school children against certain vaccine-preventable diseases.** (1) Definitions for purposes of this section:

(a) "Certificate of immunization status (CIS) form" means a form provided by the department labeled DOH 348-013, including data entry spaces for immunization information including:

(i) Name of child or student,

(ii) Birth date,

(iii) Sex,

(iv) Type of vaccine,

(v) Date of each dose of vaccine received specifying day, month, and year,

(vi) Signature of parent, legal guardian, or adult in loco parentis, and

(vii) Documented exemptions, if applicable and as specified in subsection (5) of this section.

(b) "Chief administrator" means:

(i) The person with the authority and responsibility for the immediate supervision of the operation of a school, day care center, or

(ii) A designee of the chief administrator assigned in writing to carry out the requirements of RCW 28A.210.160 through the statutory or corporate board of directors of the school district or school, or

(iii) Person or persons with the authority and responsibility for the general supervision of the operation of the school district or school.

(c) "Child" means any person regardless of age admitted to any day care center, preschool, kindergarten, or grades one through twelve program of education in:

(i) Any public school district, or

(ii) Any private school or private institution subject to approval by the state board of education or described in RCW 28A.305.130 and 28A.195.010 through 28A.195.060, or

(iii) Any licensed day care facility which regularly provides care for a group of thirteen or more children for periods of less than twenty-four hours subject to licensure by the department of social and health services as described in chapter 74.15 RCW.

(d) "Full immunization" means vaccinated in accordance with schedules and immunizing agents approved by the state board of health in WAC 246-100-166 against:

- (i) Diphtheria,
- (ii) Tetanus,
- (iii) Pertussis or whooping cough,
- (iv) Measles or rubeola,
- (v) Rubella,
- (vi) Mumps,
- (vii) Poliomyelitis, and
- (viii) Haemophilus influenzae type b disease.

(e) "Immunizing agents" means any vaccine or other biologic licensed and approved by the bureau of biologics, United States Food and Drug Administration (FDA), or meeting World Health Organization (WHO) requirements, for immunization of persons against:

- (i) Diphtheria, tetanus, pertussis (DTP, DT, Td);
- (ii) Measles;
- (iii) Mumps;
- (iv) Poliomyelitis, types I, II, and III (TOPV, IPV);
- (v) Rubella; and
- (vi) Haemophilus influenzae type b vaccine (Hib);
- (f) "National immunization guidelines" means schedules for immunization described in:

(i) 1991 American Academy of Pediatrics *Report of the Committee on Infectious Diseases* (Red Book); or

(ii) Immunization Practices Advisory Committee (ACIP) on General Recommendations on Immunization, April 7, 1989; and

(iii) Immunization Practices Advisory Committee (ACIP) on Haemophilus b Conjugate Vaccines for Prevention of *Haemophilus Influenzae* Type b Disease Among Infants and Children Two Months of Age and Older, January 11, 1991.

(g) "Parent" means a person who is:

(i) The mother, father, legal guardian, or any adult in loco parentis of a child seventeen years of age or younger; or

(ii) A person eighteen years of age or older; or

(iii) An emancipated minor.

(h) "Transfer student" means a student previously enrolled in grades kindergarten through twelve moving from one school district or system to another at any time during the school year, excluding students transferring within a district or system when the school transfers records within the district.

(2) Full immunization schedule. Each day care, preschool, and school shall establish and maintain requirements for full immunization of children attending day care and preschool through grade twelve.

(3) For day care and preschool children, full immunization means a child received vaccines as follows:

| Age at Entry                  | Requirement(*)               |
|-------------------------------|------------------------------|
| between 2-3 months            | 1-DTP/DT,1-OPV/IPV,1-Hib     |
| between 4-5 months            | 2-DTP/DT,2-OPV/IPV,2-Hib     |
| between 6-14 months           | 3-DTP/DT,2-OPV/IPV,3-Hib(**) |
| between 15 months and Hib(†), | 4-DTP/DT,3-OPV/IPV,1-Hib(†), |
| kindergarten entry            | 1-MMR(††)                    |

(\*) Children who do not meet the requirements for their age group must initiate or continue a schedule of immunization prior to day care or preschool entry and must be notified by the day care/preschool administrator of additional doses of vaccine as those doses come due.

(\*\*) Children immunized with Hib vaccine from Merck Sharp and Dohme (PedvaxHIB) should receive vaccine at 2 months, 4 months, and 12 months of age.

(†) Those children entering day care or preschool after 15 months of age must have received one dose of Hib vaccine at or after 15 months of age (not required of those receiving three doses of Merck Sharp and Dohme vaccine). Hib vaccine is not required of children 60 months (5 years) and older.

(††) Children who have had measles, rubella, or mumps disease, respectively, must show proof of past infection with the disease by providing an acceptable measles, rubella, or mumps antibody titer result and appropriate immunization against the remaining disease(s).

(4) For a child entering kindergarten or first grade (school entry level), full immunization means a child received vaccines as follows:

(a) A minimum of four doses of either DTP, DT, or Td (not tetanus toxoid alone) with last dose after four years of age consistent with national immunization guidelines defined in subsection (1) of this section, or

(b) Three doses of Td (not tetanus toxoid alone) if the series began at seven years of age or older, and

(c) A minimum of three doses of trivalent oral poliomyelitis vaccine (TOPV) or enhanced trivalent inactivated poliomyelitis vaccine (IPV) with last dose received after four years of age and consistent with national immunization guidelines defined in subsection (1) of this section, and

(d) One dose of live virus measles vaccine at or after one year of age unless a child provides proof of past infection with measles virus (an acceptable measles virus antibody titer result), and

(e) One dose of live virus rubella vaccine at or after one year of age unless a child provides proof of past infection with rubella virus (an acceptable rubella antibody titer result), and

(f) One dose of live virus mumps vaccine administered at or after one year of age unless a child provides proof of past infection with mumps virus (an acceptable mumps virus antibody titer result).

(5) For transfer students and those above kindergarten or first grade, full immunization means a child received vaccines as follows:

(a) A minimum of three doses of either DTP, DT, or Td, (not tetanus toxoid alone) with the last dose after four years of age consistent with national immunization guidelines defined in subsection (1) of this section; or

(b) Three doses of Td, (not tetanus toxoid alone) if the series began at seven years of age or older; and

(c) A minimum of three doses of trivalent oral poliomyelitis vaccine (TOPV), or enhanced trivalent inactivated poliomyelitis vaccine (IPV) with the last dose received after four years of age and consistent with national immunization guidelines defined in subsection (1) of this section (not required of persons eighteen years of age and older); and

(d) One dose of live virus measles vaccine at or after one year of age unless a child provides proof of past infection with measles virus (an acceptable measles virus antibody titer result); and

(e) One dose of live virus rubella vaccine at or after one year of age unless a child provides proof of past infection with rubella virus (an acceptable rubella antibody titer result); and

(6) For transfer students in grades 1 or 2 through 12 enrolling on or after August 1, 1991, one dose of live virus mumps vaccine administered at or after one year of age unless a child provides proof of past infection with mumps virus (an acceptable mumps virus antibody titer result).

(7) For a child entering sixth grade or reaching age thirteen years, whichever occurs first, full immunization means a child received the following vaccines (in addition to those listed in subsection (5) of this section):

(a) A second dose of live virus measles vaccine administered at or after one year of age and separated by at least one month between first and second dose, unless a child provides proof of past infection with measles virus (an acceptable measles virus antibody titer result); and

(b) One dose of live virus mumps vaccine administered at or after one year of age unless a child provides proof of past infection with mumps virus (an acceptable mumps virus antibody titer result).

(8) A second dose of measles vaccine and one dose of mumps vaccine is recommended, but not required, of currently enrolled students above sixth grade.

(9) Conditions for day care, preschool, and school attendance when a child is not fully immunized:

(a) When a child lacks full immunization, the day care, preschool, or school shall require satisfactory progress toward full immunization (conditional status) as a condition of school attendance including:

(i) Documented proof of start or continuance of child's schedule of immunization;

(ii) Assurance the scheduled immunization is consistent with the national immunization guidelines defined in subsection (1) of this section;

(iii) Notification of child's parent(s) of when the schedule must be completed; and

(iv) Exclusion of child from attendance as described in subsection (13) of this section if child has not received required immunizations on schedule and if sufficient time has elapsed (one month from date due) for completion of next dose.

(10) Schools, preschools, and day care centers shall require documented proof related to immunization including:

(a) Completion of a certificate of immunization status (CIS) form by a parent as documented proof of:

(i) Full immunization, or

(ii) Initiation or continuation of a schedule (conditional status), or

(iii) Exemption.

(b) Information from a written personal immunization record, as the source of the immunization data entered on the CIS form (substitution of a personal immunization record for a CIS form is prohibited);

(c) Acceptance of only the CIS form (no other state or local immunization forms) from new enrollees registering in kindergarten through grade twelve;

(d) In addition to current CIS form, acceptance of previous CIS forms, or locally developed forms approved by the department indicating the month and year of each immunization as the official immunization status for children enrolled prior to September 1, 1979.

(11) Schools, preschools, and day care centers shall accept medical exemptions and:

(a) Require a signature of a licensed medical doctor (M.D.), doctor of osteopathy (D.O.), physician assistant, or nurse practitioner practicing within the limits of the medical or nurse practice acts to certify medical reasons to defer one or more immunizations on the CIS form;

(b) Admit children and keep on file a CIS form for children with:

(i) Temporary exemption from immunization for medical reasons if the required immunizations are received upon expiration of the exemption, or

(ii) Permanent exemptions.

(c) Include a statement on the CIS form informing the parent that should an outbreak of vaccine preventable disease for which the child is exempted occur, the child may be excluded from school or day care for the duration of the outbreak by order of the local health department as described in subsection (13) of this section; and

(d) Keep on file a list of children so exempted and transmit the list to the local health department if requested.

(12) Schools, preschools, and day care centers shall:

(a) Allow a parent to exempt his/her child from the required immunizations for religious, philosophical, or personal objections when the CIS form indicates:

(i) Type or exemption, and

(ii) Signature of parent.

(b) Keep on file a CIS form for each child so enrolled;

(c) Include a statement on the CIS form informing the parent that should an outbreak of vaccine preventable disease for which the child is exempted occur, the child may be excluded from school for the duration of the outbreak by order of the local health department as described in subsection (13) of this section; and

(d) Keep on file a list of children so exempted and transmit the list to the local health department if requested.

(13) Schools, preschools, and day care centers shall exclude children from school as follows:

(a) Exclude any child from school for failure to provide a completed CIS form as defined in subsection (1)

of this section before or on the child's first day of attendance consistent with procedures required by the state board of education, Title 180 WAC;

(b) Exclude from attendance any child in a day care center for failure to provide a completed CIS form as defined in subsection (1) of this section before or on the child's first day of attendance;

(c) The chief administrator shall retain records on excluded children for at least three years including:

- (i) Name,
- (ii) Address, and
- (iii) Date of exclusion.

(d) A health officer may exclude children from school, preschool, and day care attendance in the event of a child's exposure to a disease according to chapter 246-110 WAC, including children presenting proof of:

- (i) Initiation of a schedule of immunization,
- (ii) Medical exemption,
- (iii) Religious exemption,
- (iv) Philosophical exemption, or
- (v) Personal exemption.

(14) Schools, preschools, and day care centers shall maintain records and require:

(a) A completed CIS form retained in the files for every child enrolled;

(b) Return of original CIS form or a legible copy to the parent in the event of the child's withdrawal or transfer from school (withholding a record for any reason, including nonpayment of school, preschool, or day care fees is prohibited).

(c) Access to immunization records by agents of the state or local health department for each child enrolled.

(15) Persons or organizations administering immunizations, either public or private, shall:

(a) Furnish each person immunized, or his or her parent, with a written record of immunization containing information required by the state board of health; and

(b) Provide immunizations and records in accordance with chapter 246-100 WAC.

(16) Chief administrators of schools, preschools, and day care centers shall forward a written annual report to the department and local health department on the immunization status of children as follows:

(a) For schools: By November 1 of each year on forms provided by the department (except in the event of a late school opening when the report is due thirty days after the first day of school);

(b) For preschools and day care centers: By February 1 of each year on forms provided by the department.

[Statutory Authority: RCW 28A.210.140 and 43.20.050. 91-15-066 (Order 182B), § 246-100-166, filed 7/22/91, effective 8/22/91. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-100-166, filed 12/27/90, effective 1/31/91; 88-07-063 (Order 308), § 248-100-166, filed 3/16/88.]

**WAC 246-100-171 Special settings--Food service establishments.** (1) Food handlers with communicable disease in an infectious or carrier state shall not handle food or beverages if the infectious agent can be transmitted through food or beverages.

(2) Employers or persons in charge of food service establishments shall prohibit persons from work as food

handlers with a known disease, condition, and/or carrier state including, but not limited to:

- (a) Amebiasis;
- (b) B hemolytic streptococcal infection;
- (c) Campylobacter;
- (d) Cholera;
- (e) Hepatitis A and Hepatitis unspecified;
- (f) Salmonellosis, including typhoid and paratyphoid;
- (g) Shigellosis;
- (h) Staphylococcal infections; and
- (i) Signs of undiagnosed infection including:

(A) Diarrhea (with episodes of over forty-eight hours requiring approval by a health care provider or local health officer prior to return to work);

- (B) Skin lesions;
- (C) Vomiting; or
- (D) Fever.

(3) Work restrictions, control measures, and removal of work restrictions on food handlers and food service establishments shall be consistent with:

(a) *Control of Communicable Diseases in Man*, 15th edition, Abram S. Benenson (editor), American public health association, 1990;

(b) Chapter 246-215 WAC food service sanitation, rules, and regulations of the Washington state board of health; and

(c) Chapter 69.06 RCW, food and beverage establishments, workers permits.

(4) Employers and persons in charge of food service establishments shall:

(a) Require notification or approval of removal of work restriction by a health care provider or local health officer for persons working with diseases, carrier states, conditions and signs listed in subsection (2) of this section; and

(b) Cooperate with public health officials investigating cases, outbreaks, or suspected outbreaks.

(5) The local health department has authority to:

(a) Require an examination of a person or persons to determine presence of infection,

(b) Adopt more stringent rules for excluding a food handler from work, and

(c) Protect public safety consistent with chapter 246-215 WAC by ordering food items to be:

- (i) Placed under a hold order,
- (ii) Destroyed immediately,
- (iii) Surrendered,
- (iv) Sampled, and
- (v) Submitted for laboratory testing.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-171, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-171, filed 12/27/90, effective 1/31/91; 88-07-063 (Order 308), § 248-100-171, filed 3/16/88.]

**WAC 246-100-176 Special settings--Schools.** Private and public schools, vocational schools, colleges, and universities shall cooperate with local and state health officers in carrying out requirements in chapters 246-110 and 246-100 WAC.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-176, filed 12/23/91, effective 1/23/92; 91-02-051 (Order

124B), recodified as § 246-100-176, filed 12/27/90, effective 1/31/91; 88-07-063 (Order 308), § 248-100-176, filed 3/16/88.]

**WAC 246-100-181 Special settings--Child day care facilities.** Child day care facilities shall:

(1) Establish policy and procedures for prevention and control of communicable diseases in employees, voluntary staff, and children that:

(a) Are consistent with "child health care plan guidelines" available from division of health, office of licensing and certification, personal care facilities survey section, ET-33, Olympia, Washington 98504; and/or

(b) Are consistent with additional or more stringent recommendations of the local health department; and

(c) Include a provision for reporting illness to the local health department when required in chapter 246-100 WAC and WAC 388-73-056.

(2) Consult with a health care provider or the local health department for information about infectious or communicable disease, as necessary.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-181, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-181, filed 12/27/90, effective 1/31/91; 88-07-063 (Order 308), § 248-100-181, filed 3/16/88.]

**WAC 246-100-196 Animal bites--Report to local health department.** Health care providers shall:

(1) Report all cases of humans exposed to secretions or bitten by domestic or wild animals, especially bats and carnivores, to the local health department or designated local authority;

(2) Report bites of rodents and lagomorphs only when an animal exhibits unusual behavior; and

(3) Use protocols established in *Communicable Diseases in Man*, 15th edition, Abram S. Benenson, editor, 1990, when treating wounds caused by animal bites.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-196, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-196, filed 12/27/90, effective 1/31/91; 88-07-063 (Order 308), § 248-100-196, filed 3/16/88.]

**WAC 246-100-201 Birds--Measures to prevent psittacosis.** (1) Definitions specific to this section:

(a) "Breeder" means a person or persons propagating birds for purpose of sale, trade, gift, or display;

(b) "Displayer" means a person, owner, or entity other than a public or private zoological park showing, exhibiting, or allowing a person or persons to handle or access a bird in a place open to the public or in a health care facility;

(c) "Leg band" means a smooth plastic or metal cylinder, either open (seamed) or closed (seamless), designed to be used to encircle a leg of a bird including permanent inscription of identification indicating:

(i) Code for individual bird, and

(ii) Code for breeder source except when open bands identify vendor rather than breeder.

(d) "Psittacine bird" or "bird" means all birds commonly known as:

(i) Parrots,

(ii) Macaws,

(iii) Cockatoos,

(iv) Lovebirds,

(v) Parakeets, and

(vi) All other birds of the order psittaciformes.

(e) "Vendor" means a person or entity selling, trading, or giving a bird to another person or entity.

(2) A person selling, trading, or otherwise transferring a bird shall identify each bird by:

(a) A coded and closed (seamless) leg band;

(b) A United States department of agriculture open (seamed) leg band; or

(c) An open (seamed) leg band only in cases where an original and closed (seamless) leg band was lost or required replacement due to injury or potential injury to the bird.

(3) A vendor transferring a bird to other than the general public shall maintain a record of transfer including acquisition, sales, and trade of a bird, for at least one year and including:

(a) Date of transaction;

(b) Name and address of the recipient and source;

(c) Number and type, including the common name of the bird transferred; and

(d) Leg band codes, including breeder or vendor and individual bird codes, omitting individual bird code only upon initial transfer of a bird propagated by the breeder.

(4) A vendor transferring a bird to the general public shall provide each buyer or recipient with:

(a) A sales slip or written document including all information required in subsection (3)(a), (b), (c), and (d) of this section; and

(b) A written warning or caution notice including:

(i) Information about possible human infection or disease caused by birds, especially psittacosis, parrot fever, and ornithosis;

(ii) Signs of infection or a sick bird including:

(A) Nasal discharge,

(B) Sneezing,

(C) Coughing,

(D) Ruffled feathers,

(E) Lethargy, and

(F) Diarrhea.

(iii) Signs and symptoms of an illness in a human including, but not limited to:

(A) Chills,

(B) Fever,

(C) Headache,

(D) Cough, and

(E) Muscle aches.

(iv) Information that nasal discharge and droppings of an infected or sick bird may cause illness in humans; and

(v) Advice to consult veterinarian or health care provider, as appropriate, if signs or symptoms occur.

(5) A vendor shall post a readable sign in a public area with a warning described in subsection (4)(b) of this section.

(6) When investigation of a human case of psittacosis indicates probable infection from a bird, the local health officer shall:

(a) Order collection of blood or other appropriate samples from the suspect bird or birds for appropriate laboratory tests to rule out disease; or

(b) Use protocols established in *Communicable Diseases in Man*, 15th edition, Abram S. Benenson, editor, 1990; and

(c) Have authority to enforce requirements of this section on a nongrouped bird or birds when:

- (i) There is suspected exposure to an infected bird, or
- (ii) There is evidence a bird caused a disease.

(7) When a local health officer orders a quarantine of a bird or birds, the vendor shall:

- (a) Cooperate with the local health officer, and
- (b) Assume costs associated with action.

(8) Upon confirmation of psittacosis, vendors shall follow directions issued by the local health officer to:

(a) Place the birds under antibiotic treatment with environmental cleaning and sanitizing; or

(b) Destroy all birds on the premises followed by environmental cleaning and sanitizing; and

(c) Assume costs associated with psittacosis prevention and control action ordered by local and state health officer;

- (d) Prohibit sale or addition of birds to inventory; and
- (e) Prevent contact of any bird with the public.

(9) A person exhibiting or displaying a bird or birds in a place or area used or occupied by the public shall exhibit the bird or birds in a manner preventing human exposure to the birds and bird discharges except:

- (a) In single-purpose pet shops and aviaries, and
- (b) At bird shows if:

(i) A room containing a bird or birds is separated from other areas and activities, and

(ii) The room entrance has a sign warning a person about potential exposure to psittacosis.

(10) Shipment and embargo of birds.

(a) Any person or entity receiving a psittacine bird or birds from points outside Washington state shall:

(i) Comply with Title 9 CFR, parts 92.3 and 92.8(b);

(ii) Refuse receipt of any bird originating from premises where psittacosis infection is suspected or known; and

(iii) Refuse receipt of any bird from a premise quarantined for psittacosis.

(b) The state health officer is authorized to:

(i) Order placement and removal of an embargo upon shipment of a live bird or birds into Washington state, and

(ii) Order any action necessary to control an outbreak or potential outbreak of psittacosis in Washington state.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-100-201, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-201, filed 12/27/90, effective 1/31/91; 88-07-063 (Order 308), § 248-100-201, filed 3/16/88.]

**WAC 246-100-206 Special diseases--Sexually transmitted diseases. (1) Definitions.**

(a) "Behaviors presenting imminent danger to public health (BPID)" means the following activities, under conditions specified below, performed by an individual with a laboratory confirmed HIV infection:

(i) Anal or vaginal intercourse without a latex condom; or

(ii) Shared use of blood-contaminated injection equipment;

(iii) Donating or selling HIV-infected blood, blood products, or semen; and

(iv) Under the following specified conditions:

(A) The infected individual received post-test counseling as described in WAC 246-100-209 prior to repeating activities in subsection (1)(a)(i) and (ii) of this section; and

(B) The infected individual did not inform the persons, with whom activities described in subsection (1)(a)(i) and (ii) of this section occurred, of his or her infectious status.

(b) "Behaviors presenting possible risk" means:

(i) Actual actions resulting in "exposure presenting a possible risk" limited to:

(A) Anal, oral, or vaginal intercourse excluding conjugal visits; or

(B) Physical assault; or

(C) Sharing of injection equipment or sharp implements; or

(D) Throwing or smearing of blood, semen, or vaginal fluids; or

(ii) Threatened action if:

(A) The threatening individual states he or she is infected with HIV; and

(B) The threatened behavior is listed in subsection (1)(b)(i)(A), (B), (C), and (D) of this section; and

(C) The threatened behavior could result in "exposure presenting a possible risk."

(c) "Conduct endangering public health" means:

(i) Anal, oral, or vaginal intercourse for all sexually transmitted diseases;

(ii) For HIV and Hepatitis B:

(A) Anal, oral, or vaginal intercourse; and/or

(B) Sharing of injection equipment; and/or

(C) Donating or selling blood, blood products, body tissues, or semen; and

(iii) Activities described in subsection (1)(d)(i) and (ii) of this section resulting in introduction of blood, semen, and/or vaginal fluids to:

(A) Mucous membranes;

(B) Eyes;

(C) Open cuts, wounds, lesions; or

(D) Interruption of epidermis.

(d) "Exposure presenting possible risk" means one or more of the following:

(i) Introduction of blood, semen, or vaginal fluids into:

(A) A body orifice or a mucous membrane;

(B) The eye; or

(C) An open cut, wound, lesion, or other interruption of the epidermis.

(ii) A needle puncture or penetrating wound resulting in exposure to blood, semen, and/or vaginal fluids.

(e) "Reasonably believed" or "reason to believe," in reference to a sexually transmitted disease, means a health officer's belief which:

(i) For the purpose of investigating the source and spread of disease, is based upon a credible report from an identifiable individual indicating another person is

likely to have a sexually transmitted disease (STD) or to have been exposed to a STD; and

(ii) For the purpose of issuing a written order for an individual to submit to examination, counseling, or treatment is based upon:

(A) Laboratory test results confirming or suggestive of a STD; or

(B) A health care provider's direct observation of clinical signs confirming an individual has or is likely to have a STD; or

(C) Obtaining information directly from an individual infected with a STD about the identity of his or her sexual or needle-sharing contacts when:

(I) Contact with the infected individual occurred during a period when the disease may have been infectious; and

(II) The contact was sufficient to transmit the disease; and

(III) The infected individual is, in the health officer's judgment, credible and believable.

(f) "Substantial exposure" means physical contact resulting in exposure presenting possible risk, limited to:

(i) A physical assault upon the exposed person involving blood or semen;

(ii) Intentional, unauthorized, nonconsensual use of needles or sharp implements to inject or mutilate the exposed person;

(iii) An accidental parenteral or mucous membrane or nonintact skin exposure to blood, semen, or vaginal fluids.

(2) Health care providers shall:

(a) Report each case of sexually transmitted disease as required in chapter 246-100 WAC, and

(b) Instruct each patient regarding:

(i) Communicability of the disease, and

(ii) Requirements to refrain from acts that may transmit the disease to another.

(c) Ensure completion of a prenatal serologic test for syphilis in each pregnant woman pursuant to RCW 70.24.090 including:

(i) Submission of a blood sample for syphilis to a laboratory approved to perform prenatal serologic tests for syphilis, as required in RCW 70.24.090, at the time of the first prenatal visit, and

(ii) Decide whether or not to omit the serologic test for syphilis if the test was performed elsewhere during the current pregnancy.

(3) Laboratories, health care providers, and other persons shall deny issuance of a certificate or statement implying an individual is free from sexually transmitted disease.

(4) Local health officers, health care providers, and others, in addition to requirements in chapter 246-100 WAC, shall comply with the provisions in chapter 70.24 RCW.

(5) Prevention of ophthalmia neonatorum.

(a) Health care providers diagnosing or caring for a patient with gonococcal or chlamydial ophthalmia neonatorum shall report the case to the local health officer or local health department in accordance with the provisions of this chapter.

(b) The principal health care provider attending or assisting in the birth of any infant or caring for an infant after birth, shall ensure instillation of a department-approved prophylactic ophthalmic agent into the conjunctival sacs of the infant within the time frame established by the department in policy statement of ophthalmia agents approved for the prevention of ophthalmia neonatorum in the newborn, issued June 19, 1981.

(6) State and local health officers or their authorized representatives shall:

(a) Have authority to conduct or cause to be conducted an interview and investigation of persons infected or reasonably believed to be infected with a sexually transmitted disease; and

(b) Use procedures and measures described in WAC 246-100-036(4) in conducting investigations.

(7) State and local health officers and their authorized representatives shall have authority to:

(a) Issue written orders for medical examination, testing, and/or counseling under chapter 70.24 RCW, only after:

(i) All other efforts to protect public health have failed, including reasonable efforts to obtain the voluntary cooperation of the person to be affected by the order; and

(ii) Having sufficient evidence to "reasonably believe" the individual to be affected by the order:

(A) Has a sexually transmitted disease; and

(B) Is engaging in "conduct endangering public health"; and

(iii) Investigating and confirming the existence of "conduct endangering public health" by:

(A) Interviewing sources to assess their credibility and accuracy; and

(B) Interviewing the person to be affected by the order; and

(iv) Including in a written order all information required in RCW 70.24.024.

(b) Issue written orders for treatment under RCW 70.24.022 only after laboratory test results, or direct observation of clinical signs or assessment of clinical data by a physician, confirm the individual has, or is likely to have, a sexually transmitted disease;

(c) Issue written orders to cease and desist from specified activities, under RCW 70.24.024 only after:

(i) Determining the person to be affected by the order is engaging in "conduct endangering public health"; and

(ii) Laboratory test results, or direct observation of clinical signs or assessment of clinical data by a physician, confirm the individual has, or is likely to have, a sexually transmitted disease; and

(iii) Exhausting procedures described in subsection (7)(a) of this section; and

(iv) Enlisting, if appropriate, court enforcement of the orders described in subsections (7)(a) and (b) of this section; and

(d) Seek court orders for detainment under RCW 70.24.034, only for persons infected with HIV and only after:

(i) Exhausting procedures described in subsection (7)(a), (b), and (c) of this section; and

(ii) Enlisting, if appropriate, court enforcement of orders to cease and desist; and

(iii) Having sufficient evidence to "reasonably believe" the person is engaging in "behaviors presenting an imminent danger to public health."

(8) Conditions for detainment of individuals infected with sexually transmitted disease.

(a) A local health officer may notify the state health officer if he or she determines:

(i) The criteria for "behaviors presenting imminent danger to public health (BPID)" are met by an individual; and

(ii) Such individual fails to comply with a cease and desist order affirmed or issued by a court.

(b) A local or state health officer may request the prosecuting attorney to file an action in superior court to detain an individual specified in subsection (8)(a) of this section.

(c) The requesting local or state health officer or authorized representative shall:

(i) Notify the department prior to recommending the detainment setting where the individualized counseling and education plan may be carried out consistent with subsections (8)(d), (e), and (f) of this section;

(ii) Make a recommendation to the court for placement of such individual consistent with subsections (8)(d) and (f) of this section; and

(iii) Provide to the court an individualized plan for education and counseling consistent with subsection (8)(e) of this section.

(d) State board of health requirements for detainment of individuals demonstrating BPID:

(i) Sufficient number of staff, caregivers, and/or family members to:

(A) Provide round-the-clock supervision, safety of detainee, and security; and

(B) Limit and restrict activities to prevent BPID; and

(C) Make available any medical, psychological, or nursing care when needed; and

(D) Provide access to AIDS education and counseling; and

(E) Immediately notify the local or state health officer of unauthorized absence or elopement; and

(ii) Sufficient equipment and facilities to provide:

(A) Meals and nourishment to meet nutritional needs; and

(B) A sanitary toilet and lavatory; and

(C) A bathing facility; and

(D) Bed and clean bedding appropriate to size of detainee; and

(E) A safe detention setting appropriate to chronological and developmental age of detainee; and

(F) A private sleeping room; and

(G) Prevention of sexual exploitation.

(iii) Sufficient access to services and programs directed toward cessation of BPID and providing:

(A) Linguistically, socially, culturally, and developmentally appropriate ongoing AIDS education and counseling; and

(B) Psychological and psychiatric evaluation and counseling; and

(C) Implementation of court-ordered plan for individualized counseling and education consistent with subsection (8)(e) of this section.

(iv) If required, provide access to isolation and/or restraint in accordance with restraint and seclusion rules in WAC 275-55-263 (2)(c);

(v) Maintain a safe, secure environment free from harassment, physical danger, and sexual exploitation.

(e) Washington state board of health standards for an individualized counseling and education plan for a detainee include:

(i) Consideration of detainee's personal and environmental characteristics, culture, social group, developmental age, and language;

(ii) Identification of habitual and addictive behavior and relapse pattern;

(iii) Identification of unique risk factors and possible cross-addiction leading to behavior presenting imminent danger to public health;

(iv) Identification of obstacles to behavior change and determination of specific objectives for desired behavior;

(v) Provision of information about acquisition and transmission of HIV infection;

(vi) Teaching and training of individual coping skills to prevent relapse to BPID;

(vii) Specific counseling for chemical dependency, if required;

(viii) Identification of and assistance with access to community resources, including social services and self-help groups appropriate to provide ongoing support and maintenance of behavior change; and

(ix) Designation of a person primarily responsible for counseling and/or education who:

(A) Completed pretest and post-test counselor training approved by the office on AIDS; and

(B) Received training, as approved by the office on AIDS, focused on facilitating behavior change related to preventing BPID; and

(C) Has a post-graduate degree in social work, psychology, counseling, psychosocial nursing, or other allied profession; and

(D) Completed at least one year clinical experience after post-graduate education with a primary focus on individualized behavior change; and

(E) Is a certified counselor under chapter 18.19 RCW.

(x) Designation and provision of a qualified counselor under WAC 275-19-145 when the detainee is assessed to have a drug or alcohol problem.

(f) The state board of health designates the following settings appropriate for detainment provided a setting meets requirements in subsection (8)(d)(i), (ii), (iii), (iv), and (v) of this section:

(i) Homes, care facilities, or treatment institutions operated or contracted by the department;

(ii) Private homes, as recommended by the local or state health officer;

(iii) Boarding homes licensed under chapter 18.20 RCW;

(iv) Nursing homes licensed under chapter 18.51 RCW;

(v) Facilities licensed under chapter 71.12 RCW, including:

(A) Psychiatric hospitals, per chapter 246-322 WAC;  
 (B) Alcoholism treatment centers if certified for substance use under chapter 275-19 WAC;

(C) Adult residential rehabilitation centers, per chapter 246-325 WAC;

(D) Private adult treatment homes, per chapter 246-325 WAC;

(E) Residential treatment facilities for psychiatrically impaired children and youth, per chapter 246-323 WAC;

(vi) A hospital licensed under chapter 70.41 RCW.

(9) Jail administrators may order pretest counseling, post-test counseling, and HIV testing of persons detained in jail according to RCW 70.24.360 only under the following conditions:

(a) The jail administrator documents and reports to the local health officer, within seven days after the incident, any incident perceived to be actual or threatened "behaviors presenting possible risk"; and

(b) The local health officer:

(i) Determines the documented behavior or behaviors meet the criteria established in the definition of "behaviors presenting a possible risk"; and

(ii) Interviews the detained individual to evaluate the factual basis for alleged actual or threatened behavior; and

(iii) Makes a fact determination, based upon the documented behavior, the interview with the detained individual, and/or independent investigation, that sufficient factual evidence exists to support the allegation of actual or threatened "behaviors presenting possible risk"; and

(iv) Arranges for testing of the individual who is the source of the behavior to occur within seven days of the request from the jail administrator; and

(v) Reviews with the detained individual who is the source of the behavior the documentation of the actual or threatened behavior to try to assure understanding of the basis for HIV testing; and

(vi) Provides written approval of the jail administrator's order prior to HIV testing in accordance with subsection (7)(a)(i) of this section.

(c) The jail administrator maintains HIV test results and identity of the tested individual as a confidential, nondisclosable record, as provided in RCW 70.24.105.

(10) When an individual experiences a substantial exposure to another individual's body fluids and requests HIV testing of that other individual, the state and local health officers have authority to order pretest counseling, HIV testing, and post-test counseling of that other individual providing:

(a) The alleged exposure occurred when the individual was employed or acting as an authorized volunteer in one of the following employment categories:

(i) Law enforcement officer;

(ii) Firefighter;

(iii) Health care provider;

(iv) Staff of health care facilities; and

(b) The alleged substantial exposure occurred on the job; and

(c) The request to the health officer for testing and counseling of the individual was made within seven days of the occurrence of the alleged exposure; and

(d) The local health officer:

(i) Determines that the alleged exposure meets the criteria established in the definition of "substantial exposure"; and

(ii) Ensures that pretest counseling of the individual to be tested, or a legal representative, occurs; and

(iii) Arranges for testing of the individual who is the source of the exposure to occur within seven days of the request from the person exposed; and

(e) The exposed individual agrees to be tested for HIV if such testing is determined appropriate by the health officer; and

(f) Records on HIV testing ordered by a health officer are maintained only by the ordering health officer.

(11) For the purpose of RCW 49.60.172 concerning the absence of HIV infection as a bona fide occupational qualification only, "significant risk" means a job qualification which requires person-to-person contact likely to result in direct introduction of blood into the eye, an open cut or wound, or other interruption of the epidermis, when:

(a) No adequate barrier protection is practical; and

(b) Determined only on case-by-case basis consistent with RCW 49.60.180.

[Statutory Authority: RCW 43.20.050 and 70.24.130. 92-02-019 (Order 225B), § 246-100-206, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-100-206, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.24 RCW. 89-07-095 (Order 325), § 248-100-206, filed 3/22/89; 88-21-093 (Order 322), § 248-100-206, filed 10/19/88; 88-17-056 (Order 316), § 248-100-206, filed 8/17/88. Statutory Authority: RCW 43.20.050. 87-11-047 (Order 302), § 248-100-206, filed 5/19/87.]

**WAC 246-100-207 Human immunodeficiency virus (HIV) testing--Ordering--Laboratory screening--Interpretation--Reporting.** (1) Any person ordering or prescribing an HIV test for another, except for seroprevalent studies under chapter 70.24 RCW or provided under subsections (2) and (3) of this section, shall:

(a) Provide or refer for pretest counseling described under WAC 246-100-209;

(b) Obtain or ensure informed specific consent of the individual to be tested separate from other consents prior to ordering or prescribing an HIV test, unless excepted under provisions in chapter 70.24 RCW; and

(c) Provide or refer for post-test counseling described under WAC 246-100-209 if HIV test is positive for or suggestive of HIV infection.

(2) Blood banks, tissue banks, and others collecting or processing blood, sperm, tissues, or organs for transfusion/transplanting shall:

(a) Obtain or ensure informed specific consent of the individual prior to ordering or prescribing an HIV test, unless excepted under provisions in chapter 70.24 RCW;

(b) Explain that the reason for HIV testing is to prevent contamination of the blood supply, tissue, or organ bank donations; and

(c) At the time of notification regarding a positive HIV test, provide or ensure at least one individual counseling session.

(3) Persons subject to regulation under Title 48 RCW and requesting an insured, subscriber, or potential insured or subscriber to furnish the results of an HIV test for underwriting purposes, as a condition for obtaining or renewing coverage under an insurance contract, health care service contract, or health maintenance organization agreement shall:

(a) Before drawing blood to perform an HIV test, provide written information to the individual tested explaining:

- (i) What an HIV test is;
- (ii) Behaviors placing a person at risk for HIV infection;
- (iii) The purpose of HIV testing in this setting is to determine eligibility for coverage;
- (iv) The potential risks of HIV testing; and
- (v) Where to obtain HIV pretest counseling.

(b) Obtain informed specific written consent for an HIV test. The written informed consent shall include:

(i) An explanation of confidential treatment of test result reports limited to persons involved in handling or determining applications for coverage or claims for the applicant or claimant; and

(ii) Requirements under subsection (3)(c) of this section.

(c) Establish procedures to inform an applicant of the following:

(i) Post-test counseling specified under WAC 246-100-209(4) is required if an HIV test is positive or indeterminate;

(ii) Post-test counseling is done at the time any positive or indeterminate HIV test result is given to the tested individual;

(iii) The applicant is required to designate a health care provider or health care agency to whom positive or indeterminate HIV test results are to be provided for interpretation and post-test counseling; and

(iv) When an individual applicant does not identify a designated health care provider or health care agency and the applicant's HIV test results are positive or indeterminate, the insurer, health care service contractor, or health maintenance organization shall provide the test results to the local health department for interpretation and post-test counseling.

(4) Laboratories and other places where HIV testing is performed shall demonstrate complete and satisfactory participation in an HIV proficiency testing program approved by the Department Laboratory Quality Assurance Section, Mailstop K17-9, 1610 N.E. 150th, Seattle, Washington 98155.

(5) The department laboratory quality assurance section shall accept substitutions for EIA screening only as approved by the United States Food and Drug Administration (FDA) and a published list or other written FDA communication.

(6) Medical laboratories testing for the presence of HIV shall:

(a) Send an HIV test prevalence results report by telephone or in writing to the department office on AIDS ( Mailstop K17-9, 1610 N.E. 150th, Seattle, Washington 98155), quarterly or more often; and

(b) Include in the report:

(i) Number of samples tested;

(ii) Number of samples repeatedly reactive by enzyme immuno assay (EIA);

(iii) Number of samples tested by western blot assay (WBA) or other confirmatory test as approved by department office on AIDS;

(iv) Number of positive test results by WBA or other confirmatory test as approved by department office on AIDS;

(v) Number of specimens tested by viral culture; and

(vi) Number of positive test results from viral cultures.

(7) Persons informing a tested individual of positive laboratory test results indicating HIV infection shall do so only when:

(a) HIV is isolated by viral culture technique; or

(b) HIV antibodies are identified by a sequence of tests which are reactive and include:

(i) A repeatedly reactive screening test such as the enzyme immunoassay (EIA); and

(ii) An additional, more specific, assay such as a positive western blot assay (WBA) or other tests as defined and described in the AIDS office manual, April, 1988, Department of Health, Office on AIDS, P.O. Box 47840, Olympia, Washington 98504-7840.

(c) Such information consists of relevant, pertinent facts communicated in such a way that it will be readily understood by the recipient.

[Statutory Authority: RCW 43.20.050 and 70.24.130. 92-02-019 (Order 225B), § 246-100-207, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-100-207, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.24 RCW and RCW 70.24.130. 89-20-006 (Order 334), § 248-100-207, filed 9/22/89, effective 10/23/89. **WAC 246-100-208 Counseling standard--AIDS counseling.** (1) Principal health care providers shall counsel or ensure AIDS counseling for:

(a) Each pregnant woman; and

(b) Each patient seeking treatment of a sexually transmitted disease.

(2) Drug treatment programs under chapter 70.96A RCW shall provide or ensure provision of AIDS counseling for each person in a drug treatment program.

(3) Health care providers, persons, and organizations providing AIDS counseling shall:

(a) Assess the behaviors of each individual counseled for risk of acquiring and transmitting human immunodeficiency virus (HIV);

(b) Maintain a nonjudgmental environment during counseling which:

(i) Considers the individual's particular circumstances; and

(ii) Is culturally, socially, linguistically, and developmentally appropriate to the individual being counseled.

(c) Focus counseling on behaviors increasing the risk of HIV acquisition and transmission;

(d) Provide or ensure provision of personalized risk reduction education to individuals who:

(i) Are men who had sex with other men at any time since 1977;

(ii) Used intravenous substances at any time since 1977;

(iii) Engaged in sex for money or drugs at any time since 1977;

(iv) Have had sexual and/or injection equipment-sharing contact with persons listed in subsection (3)(d)(i), (ii), and (iii) of this section;

(v) Have been exposed to or known to have had a sexually transmitted disease at any time since 1977;

(vi) Are at increased risk of HIV infection by definition of United States Public Health Service, Centers for Disease Control;

(vii) Are enrolled in a drug treatment program under chapter 69.54 RCW; or

(viii) Received multiple transfusions of blood, plasma, or blood products from 1977 to 1985.

(e) Encourage individuals assessed to be at other than virtually no risk of HIV infection to:

(i) Receive AIDS risk reduction counseling;

(ii) Consider information about the nature, purpose, and potential ramifications of HIV testing;

(iii) Receive pretest counseling;

(iv) Consider confidential or anonymous voluntary HIV testing if appropriate; and

(v) "Virtually no risk of HIV infection" means persons with medical histories absent of and reporting none of the following factors:

(A) Transfusion with blood or blood products at any time since 1977;

(B) Residence at any time in countries where HIV is considered endemic since 1977;

(C) Unprotected sex between men at any time since 1977;

(D) Use of intravenous substances at any time since 1977, especially when sharing injection equipment;

(E) Engagement in sex for money or drugs at any time since 1977;

(F) Sexual and/or injection equipment-sharing contacts at any time since 1977 with persons listed in subsection (3)(e)(iii)(C), (D), and (E) of this section;

(G) Exposure to a sexually transmitted disease; and

(H) Increased risk of HIV infection by definition of United States Public Health Service, Centers for Disease Control.

(4) Persons and organizations providing AIDS counseling may provide additional or more comprehensive counseling than required in this section.

Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-100-208, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.24 RCW. 88-17-058 (Order 318), § 248-100-208, filed 8/17/88.]

**WAC 246-100-209 Counseling standards--Human immunodeficiency virus (HIV) pretest counseling--HIV post-test counseling.** (1) Health care providers and other persons providing pretest counseling shall:

(a) Assess the individual's risk of acquiring and transmitting HIV by evaluating information about the individual's possible risk-behaviors;

(b) Provide at least one individual counseling session prior to HIV testing;

(c) Inform any individual planning to be tested for HIV that:

(i) If the test result is positive, the tested individual needs to notify sex and injection equipment-sharing partners that partners:

(A) May have been exposed to and infected with HIV; and

(B) Should seek HIV pretest counseling and consider HIV testing; and

(ii) Unless HIV testing is anonymous, the principal health care provider is required to refer identities of at-risk partners to the local health officer or authorized representative if:

(A) The HIV-infected individual either refuses or is unable to notify partners of exposure, possible infection, and need for pretest counseling and HIV testing; or

(B) The HIV-infected individual neither accepts assistance nor agrees to referral to the local health officer or an authorized representative for assistance in notifying partners; and

(iii) Unless HIV testing is anonymous, the principal health care provider is required to refer the identify of the individual testing positive to the local health officer or an authorized representative if the principal health care provider made efforts, but was unable to meet face-to-face with the individual to:

(A) Notify the individual of the HIV test result; and

(B) Provide post-test counseling, as required in this section, to assure partner notification.

(2) When an individual is assessed by a counselor or health care provider as "virtually no risk of HIV infection," as defined in WAC 246-100-208 (3)(e)(v) a counselor or the health care provider shall, in addition to subsection (1)(a) of this section:

(a) Maintain a nonjudgmental environment during counseling which:

(i) Considers the individual's particular circumstances; and

(ii) Is culturally, socially, linguistically, and developmentally appropriate to the individual being counseled.

(b) Explain the nature, purpose, value, and reason for the HIV tests;

(c) Explain the possible effect of HIV testing and a positive HIV test result related to employment, insurance, housing, and other potential legal, social, and personal consequences;

(d) Develop and maintain a system of referral and make referrals that:

(i) Are accessible and confidential for those counseled;

(ii) Are acceptable to and supportive of those counseled;

(iii) Provide assistance to those counseled in maintaining risk reduction behaviors.

(e) Provide at least one individual counseling session at the time HIV test results are disclosed to individuals testing positive; and

(f) Maintain disclosure and confidentiality requirements in WAC 246-100-016.

(3) If the individual is assessed by a health care provider to be other than "virtually no risk of HIV infection," as defined in WAC 246-100-208 (3)(e)(v), the person providing pretest counseling shall maintain requirements in subsection (1) and (2) of this section and:

(a) Focus counseling on behaviors increasing the risk of HIV acquisition and transmission;

(b) Provide personalized risk reduction education to individuals who:

(i) Are men engaging in unprotected intercourse with other men at any time since 1977;

(ii) Used intravenous substances at any time since 1977, especially those sharing injection equipment;

(iii) Engaged in sex for money or drugs at any time since 1977;

(iv) Have had sexual and/or injection equipment-sharing contacts at any time since 1977 with persons listed in subsection (3)(b)(i), (ii), and (iii) of this section;

(v) Have been exposed to or diagnosed with a sexually transmitted disease;

(vi) Are at increased risk of HIV infection by definition of United States Public Health Services, Centers for Disease Control;

(vii) Are required by RCW 70.24.095 and 70.24.340 to receive HIV counseling and testing.

(c) Inform any individual planning to be tested for HIV of the need to notify sexual and injection equipment-sharing partners if test results are positive;

(d) Advise individuals listed in subsection (3)(b)(i), (ii), and (iii) of this section not to donate or sell blood, blood products, semen, organs, or other body tissues; and

(e) Emphasize or reemphasize the following counseling messages:

(i) The following will eliminate or decrease the risk of HIV infection:

(A) Sexual abstinence;

(B) A mutually monogamous relationship between uninfected people; and

(C) Following safer sex guidelines.

(ii) Do not share intravenous drugs and injection equipment;

(iii) Do not engage in behaviors in which blood, vaginal fluid, or semen is exchanged;

(iv) Condoms, even if used properly, do not supply absolute protection from HIV infection;

(v) Condoms may reduce risk of HIV infection if the condom is:

(A) Latex and used with a water-based lubricant rather than an oil-based lubricant, if a lubricant is used;

(B) Used in conjunction with spermicide during vaginal or anal intercourse; and

(C) Worn from start to finish of vaginal, oral, and anal intercourse.

(vi) Dental dams may reduce risk of HIV infection if the dental dam is:

(A) Latex; and

(B) Used from start to finish of oral intercourse.

(vii) The sexual behaviors having highest risk for HIV infection are those involving the exchange of blood or semen, especially receptive anal and vaginal intercourse;

(viii) Anal intercourse may increase the risk of condom failure and HIV infection;

(ix) Infected women should postpone pregnancy until more is known about how to prevent prenatal and perinatal transmission of HIV infection;

(x) Sexual negotiation skills can be learned to enhance risk reduction; and

(xi) Other sexually transmitted diseases, especially those causing genital ulcers, may increase the risk of acquiring or transmitting HIV infection.

(f) Make those counseled aware HIV retesting at a later date may be necessary or recommended.

(4) Persons providing post-test counseling shall:

(a) Follow requirements in subsection (1) of this section;

(b) Provide at least one individual counseling session at the time HIV test results are disclosed for individuals:

(i) Testing positive for HIV; or

(ii) Reporting practice of behaviors listed in (3)(b)(i), (ii), and (iii) of this section.

(c) If the individual being counseled tested positive for HIV infection:

(i) Provide assistance to persons in notifying partners; and/or

(ii) Offer to refer individuals to the local health officer as necessary for assistance in notifying partners; and/or

(iii) Offer to refer partners for counseling and testing; and

(iv) Develop or adopt a system to avoid documenting the names of referred partners in the permanent record of the individual being counseled; and

(v) Offer referral for alcohol and drug and mental health counseling, including suicide prevention, if appropriate; and

(vi) Refer for tuberculosis screening.

[Statutory Authority: RCW 43.20.050 and 70.24.130. 92-02-019 (Order 225B), § 246-100-209, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-100-209, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.24 RCW. 89-02-008 (Order 324), § 248-100-209, filed 12/27/88; 88-17-058 (Order 318), § 248-100-209, filed 8/17/88.]

**WAC 246-100-217 Special condition--Pesticide poisoning.** (1) Definitions. For the purposes of this section, the following words and phrases have the following meanings unless the context clearly indicates otherwise:

(a) "Case of pesticide poisoning" means a person, alive or dead, having been diagnosed as poisoned by any pesticide with the diagnosis based on clinical and/or laboratory evidence.

(b) "Pesticide" means any pesticide defined in RCW 70.104.020, as now stated and as may be amended in the future.

(c) "Pesticide applicator" means any person applying pesticides under the authority of the licensing provisions of chapter 15.58 RCW, as a pesticide applicator and/or operator and any person applying pesticides to more than one acre of land in a calendar year.

(d) "Pesticide poisoning" means the disturbance of function, damage to structure, or illness in humans resulting from the inhalation, absorption, ingestion of, or contact with any pesticide.

(e) "PIRT" means the pesticide incident reporting and tracking review panel established under the provisions of RCW 70.104.080 with responsibilities as described in RCW 70.104.090.

(f) "Suspected case of pesticide poisoning" means a case in which the diagnosis is thought more likely than not to be pesticide poisoning.

(2) Any attending physician or other health care provider recognized as primarily responsible for the diagnosis and treatment of a patient or, in the absence of a primary health care provider, the health care provider initiating diagnostic testing or therapy for a patient shall:

(a) Notify the department of any case or suspected case of pesticide poisoning, using the toll-free pesticide reporting telephone number (1-800-356-2323), within the following time limits:

(i) Immediately, when:

(A) A hospital admission is due to pesticide poisoning or suspected pesticide poisoning;

(B) A death is due to pesticide poisoning or suspected pesticide poisoning; or

(C) A threat to public health, such as multiple cases, is perceived;

(ii) Within four days for all other cases or suspected cases;

(b) Within seven days, submit to the department on a department-approved form, an individual case report for each case or suspected case of pesticide poisoning (unless the department of health waives the requirement to submit an individual case report because pertinent information was provided by phone);

(c) Comply with the same confidentiality requirements established for other reportable diseases or conditions in WAC 246-100-016; and

(d) Respond to department inquiries regarding reported cases.

(3) Health care providers notifying the department shall provide:

(a) Name of patient;

(b) Patient's home and/or mailing address;

(c) Patient's home and/or work telephone number;

(d) Age;

(e) Sex;

(f) Race/ethnicity;

(g) Diagnosis or suspected diagnosis, including:

(i) Name of pesticide, if known;

(ii) Date of exposure; and

(iii) Date of onset;

(h) Name, address, and telephone number of the principal health care provider;

(i) Name, address, and telephone number of the person reporting; and

(j) Occupation and employer's name and address, if occupational exposure.

(4) The department shall:

(a) Initiate an investigation of each report of a case or suspected case of pesticide poisoning and such cases of suspected pesticide poisoning of animals that may relate to human illness to document the incident within the following time limits:

(i) Immediately after notification is received from the health care provider of:

(A) A hospital admission due to pesticide poisoning or suspected pesticide poisoning;

(B) A death due to pesticide poisoning or suspected pesticide poisoning; or

(C) A threat to public health, such as multiple cases;

(ii) Within forty-eight hours after notification is received for all other cases;

(b) Supply case report forms to health care providers for purposes of reporting cases or suspected cases of pesticide poisoning;

(c) Document the known environmental, human, and/or other variables associated with the case or suspected case of pesticide poisoning;

(d) Report the results of the pesticide investigation to the principal health care provider named in the case report form and to the local health officer in whose jurisdiction the exposure has occurred;

(e) Provide a monthly report of cases or suspected cases of pesticide poisoning to the PIRT panel, as required under RCW 70.104.055; and

(f) Complete case investigations within ninety days unless extenuating circumstances or surveillance needs require a longer investigation time.

[Statutory Authority: RCW 43.20.050 and 70.104.055. 92-02-019 (Order 225B), § 246-100-217, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-100-217, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.104 RCW. 90-10-036 (Order 049), § 248-100-217, filed 4/26/90, effective 5/27/90.]

#### **WAC 246-100-226 Duties of laboratories--Approval of laboratories to perform prenatal serologic tests for syphilis.**

(1) Laboratories performing prenatal serologic tests for syphilis shall request approval by the department in accordance with the following:

(a) Apply by registering intent with the department,

(b) Provide personnel specifically trained in the serological procedures in use,

(c) Establish test methods approved by the department based on current recommendations of the United States public health service (USPHS) and consistent with the United States health care financing administration (HCFA) 42 CFR 82.27,

(d) Perform tests consistent with the manufacturer's recommendations,

(e) Establish quality control procedures consistent with the manufacturer's recommendations, and

(f) Maintain records of quality control results and patient's test results for at least two years.

(2) Approved laboratories shall:

(a) Subscribe to a proficiency testing program approved by the department based on recommendations by USPHS and acceptable to United States HCFA,

(b) Request the testing service to send a report of results to the department,

(c) Demonstrate satisfactory performance by maintaining a score of seventy percent on each shipment of test samples.

(3) Written department certification of approval depends upon:

(a) Satisfactory performance in a proficiency testing program for syphilis serology demonstrated for two consecutive sets of samples, and

(b) Continuous satisfactory performance in a proficiency testing program for syphilis serology.

(4) The department may:

(a) Perform on-site reviews of laboratories to determine compliance with WAC 246-100-226, and

(b) Decertify laboratories when conditions described in WAC 246-100-226 are not met.

(5) The department shall:

(a) Provide a list of department-approved laboratories to certified laboratories, local health departments, and others upon request, and

(b) Decertify any laboratory failing to perform satisfactorily on proficiency testing as described in subsection (2)(c) of this section.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-226, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-226, filed 12/27/90, effective 1/31/91; 87-11-047 (Order 302), § 248-100-226, filed 5/19/87.]

**WAC 246-100-231 Duties of laboratories--Submission of specimens by laboratories.** (1) The director of every medical laboratory shall:

(a) Submit microbiologic cultures, subcultures, or appropriate clinical material as specified in subsection (2) of this section to the Washington state public health laboratory or other laboratory designated by the state health officer for diagnosis, confirmation, or further testing;

(b) Identify each specimen on a form provided or approved by the department including:

(i) The patient's name, and, if available,

(ii) Age, sex, date of onset of illness, first and last name of principal health care provider.

(2) When test results indicate possible infection with any of the following, laboratory action shall include:

(a) Brucellosis (*Brucella* species): Submit suspicious subcultures for confirmation and final identification;

(b) Cholera (*Vibrio cholerae*): Submit subcultures for confirmation and final identification;

(c) Diphtheria (*Corynebacterium diphtheriae*): Submit subcultures for identification and for toxin study when indicated;

(d) Malaria (*Plasmodium* species): Laboratories are encouraged to submit thick and thin stained smears for conformation, final identification, and forwarding for international epidemiologic surveillance;

(e) Meningococcal infection of blood or spinal fluid (*Neisseria meningitidis*): Submit subcultures for confirmation and final identification;

(f) Plague (*Yersinia pestis*): Submit subcultures or appropriate clinical material for confirmation;

(g) Salmonellosis, including typhoid fever (*Salmonella* species): Submit subcultures for confirmation and serotyping;

(h) Shigellosis (*Shigella* species): Submit subcultures for confirmation and serotyping;

(i) Syphilis (*Treponema pallidum*): Submit reactive or weakly reactive serologic specimens for confirmation and further definitive testing;

(j) Mycobacteriosis, including tuberculosis (*Mycobacterium* species): Submit subcultures of initial isolates for:

(i) *Mycobacterium tuberculosis*,

(ii) *Mycobacterium bovis*, and

(iii) Other mycobacterial species when isolate is suspected of causing disease.

(k) Tularemia (*Francisella tularensis*): Submit subcultures or appropriate clinical material for confirmation.

(3) When clinical impression and epidemiologic circumstances indicate a possible case of botulism, laboratory action shall include the following:

(a) Infant botulism: Submit stool for clostridium botulinum identification and toxin typing,

(b) Food borne botulism:

(i) Submit serum and stool for *C. botulinum* identification and toxin typing, and

(ii) If available, submit suspect foods (ideally in original containers).

(c) Wound botulism: Submit subculture or serum, debrided tissue, or swab sample from wound for *C. botulinum* identification.

(4) The state health officer may require submission of specimens for other infections of public health concern as described in WAC 246-100-041.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-231, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-231, filed 12/27/90, effective 1/31/91; 88-07-063 (Order 308), § 248-100-231, filed 3/16/88; 87-11-047 (Order 302), § 248-100-231, filed 5/19/87.]

**WAC 246-100-236 Duties of laboratories--Reporting of laboratory results indicative of certain reportable diseases.** (1) By December 31, 1987, medical laboratories shall:

(a) Report each positive culture or other suggestive test results to the local health officer by phone, written report, or submission of specimen within two working days, unless specified otherwise, for:

(i) Anthrax (*Bacillus anthracis*),

(ii) Botulism (*Clostridium botulinum*),

(iii) Cholera (*Vibrio cholerae*),

(iv) Diphtheria (*Corynebacterium diphtheriae*) - toxigenic strains,

(v) Gonorrhea (*Neisseria gonorrhoeae*) (report within seven days),

(vi) Measles (rubeola) (measles virus),

(vii) Plague (*Yersinia pestis*),

- (viii) Rabies (rabies virus),
  - (ix) Brucellosis (*Brucella* species),
  - (x) Leptospirosis (*Leptospira interrogans*),
  - (xi) *Listeria* infection of blood or spinal fluid (*Listeria monocytogenes*),
  - (xii) Meningococcal infection of blood or spinal fluid (*N. meningitidis*),
  - (xiii) Pertussis (*Bordetella pertussis*),
  - (xiv) Salmonellosis (*Salmonella* species),
  - (xv) Shigellosis (*Shigella* species), and
  - (xvi) Hepatitis A (positive anti-HAV IgM).
- (b) Send a copy of the state form accompanying specimen submitted as required in WAC 246-100-231 or identifying information including:

- (i) Type of specimen tested (e.g., serum or sputum),
- (ii) Test result,
- (iii) Name of reporting laboratory,
- (iv) Date of report,
- (v) Name of requesting health care provider or health care facility, and
- (vi) Name of patient.

(2) By December 31, 1987, medical laboratories shall report positive cultures or other suggestive test results for chlamydial infection (*chlamydia trachomatis*) to local health departments monthly including either:

(a) Identifying information specified in subsection (1)(b)(i-vi) of this section, or

(b) Aggregate numbers of positive tests including age, sex, and site of infection when known.

(3) Medical laboratories shall label or stamp reports appropriately with information indicating "reportable disease" and the telephone number of the local health department, if such labels or stamps are provided by the local health department.

(4) State and local health officers and health departments receiving reports from medical laboratories shall:

(a) Allow time for the laboratory to notify the principal health care provider prior to contact if:

- (i) Delay is unlikely to jeopardize public health, and
- (ii) The laboratory requests a delay.

(b) Try to contact the principal health care provider and discuss circumstances prior to contact of a patient when possible.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-100-236, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-100-236, filed 12/27/90, effective 1/31/91; 88-07-063 (Order 308), § 248-100-236, filed 3/16/88; 87-11-047 (Order 302), § 248-100-236, filed 5/19/87.]

### Chapter 246-110 WAC

#### CONTAGIOUS DISEASE--SCHOOL DISTRICTS AND DAY CARE CENTERS

##### WAC

246-110-001 Purpose.  
246-110-020 Control of communicable (contagious) disease.

**WAC 246-110-001 Purpose.** The following regulations are adopted by the board of health for the purpose of governing the presence on or about any school or day care center premises of susceptible persons who have, or

have been exposed to, a communicable disease. These regulations are in addition to other requirements imposed by chapter 246-100 WAC.

In furtherance of the purpose and intent of the law and these regulations, it is recommended that parents of students whose medical supervision seems inadequate should be encouraged to obtain the services of a physician for the child. When the economic situation warrants, the parents should be guided to the appropriate source of community-sponsored medical care. These regulations are not intended to imply that any diagnosis or treatment will be performed by school or day care center personnel.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-110-001, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-110-001, filed 12/27/90, effective 1/31/91; 90-21-056 (Order 095), § 248-101-011, filed 10/15/90, effective 10/15/90.]

**WAC 246-110-020 Control of communicable (contagious) disease.** (1) When there is an outbreak of a contagious disease, as defined in WAC 246-110-010, such that there is the potential for a case or cases within a school or day care center, the local health officer, if appropriate, after consultation with the secretary of health or designee shall take all medically appropriate actions deemed to be necessary to control or eliminate the spread of the disease, including, but not limited to:

(a) Closing the affected school(s) or day care center(s), or part(s) thereof;

(b) Closing other schools or day care centers in the local health officer's jurisdiction;

(c) Causing the cessation of selected school or day care center activities or functions;

(d) Excluding from schools or day care centers in the local health officer's jurisdiction any students, staff, and volunteers who are infected with, or deemed to be susceptible to, the disease.

(2) Prior to taking action the health officer shall:

(a) Consult with and discuss the ramifications of action with the superintendent of the school district, or the chief administrator of the day care center or their designees on the proposed action; and

(b) Provide the board of directors and the superintendent of the school district or the chief administrator of the day care center a written decision in the form and substance of an order directing them to take action;

(3) Where these actions have been taken, the local health officer shall, in addition:

(a) Set the terms and conditions permitting schools or day care centers to reopen; activities and functions to resume; and excluded students, staff and volunteers to be readmitted; and

(b) Pursue, in consultation with the secretary of health or designee and school and/or day care officials, the investigation of the source of disease, or order those actions necessary to the ultimate control of the disease.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-110-020, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-110-020, filed 12/27/90, effective 1/31/91; 90-21-056 (Order 095), § 248-101-221, filed 10/15/90, effective 10/15/90.]

**Chapter 246-130 WAC**  
**HUMAN IMMUNODEFICIENCY VIRUS (HIV)**  
**INFECTION TREATMENT**

## WAC

|             |                        |
|-------------|------------------------|
| 246-130-010 | Definitions.           |
| 246-130-030 | Reimbursements.        |
| 246-130-040 | Financial eligibility. |

**WAC 246-130-010 Definitions.** The following words and phrases have the following meaning in chapter 246-130 WAC unless the context clearly indicates otherwise:

- (1) "AIDS" means acquired immunodeficiency syndrome.
- (2) "APDP" means AIDS prescription drug program.
- (3) "Department" or "DOH" means the Washington state department of health.
- (4) "HIV" means human immunodeficiency virus.
- (5) "NPIG" means National Poverty Income Guidelines as under sections 652 and 673 (2) of the Omnibus Budget Reconciliation Act of 1981 (Public Law 9735) and as updated annually in the Federal Register on February 16.
- (6) "Patient share" means the amount of cost borne by the patient.

[Statutory Authority: RCW 43.70.120. 92-02-018 (Order 224), § 246-130-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-130-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 43.70.120. 90-17-087 (Order 071), § 248-168-015, filed 8/17/90, effective 9/17/90.]

**WAC 246-130-030 Reimbursements.** Individuals desiring reimbursement for APDP approved drugs and treatments must provide evidence of financial eligibility as established by WAC 246-130-040. The department will make reimbursement, reduced by the patient share computed in accordance with WAC 246-130-070, to eligible participants who, in the department's judgment, demonstrate the greatest need or the most likely benefit from the treatments.

[Statutory Authority: RCW 43.70.120. 92-02-018 (Order 224), § 246-130-030, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-130-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 43.70.120. 90-17-087 (Order 071), § 248-168-030, filed 8/17/90, effective 9/17/90. Statutory Authority: RCW 43.20A.550. 87-22-012 (Order 2549), § 248-168-030, filed 10/26/87.]

**WAC 246-130-040 Financial eligibility.** (1) The department will consider a patient eligible if he or she:

- (a) Has resources at or below the exemptions listed under subsection (3) of this section; and
- (b) Is not eligible for any other resources providing similar benefits to meet the costs of the treatment; and
- (c) Has gross monthly income at or below three hundred seventy percent of the NPIG; and
- (d) The total cost of program covered medications is in excess of the patient's share as computed in accordance with WAC 246-130-070.

(2) The department shall consider the following in determining resources:

- (a) Savings, property, and other assets;
- (b) Government and private medical insurance programs, including Medicaid, providing partial or full coverage for drug and treatments needed in the treatment of infection with HIV; and
- (c) Local funds raised for the purpose of providing financial support for a specified patient.

(3) The following exemptions shall not be considered in determining a patient's resources to pay for treatments covered by these regulations:

- (a) A home, defined as real property owned by a patient as a principal place of residence, together with the property surrounding and contiguous thereto not to exceed five acres; and
- (b) Commercial property, or property used for the purpose of producing income, except to the extent that its value exceeds the sum of ten thousand dollars;
- (c) Household furnishings;
- (d) An automobile; and
- (e) Savings, property, or other liquid assets, to the extent the value thereof does not exceed the sum of ten thousand dollars.

[Statutory Authority: RCW 43.70.120. 92-02-018 (Order 224), § 246-130-040, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-130-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 43.70.120. 90-17-087 (Order 071), § 248-168-040, filed 8/17/90, effective 9/17/90. Statutory Authority: RCW 43.20A.550. 87-22-012 (Order 2549), § 248-168-040, filed 10/26/87.]

**Chapter 246-132 WAC**  
**CLASS IV HIV HEALTH INSURANCE**  
**ELIGIBILITY**

## WAC

|             |  |
|-------------|--|
| 246-132-020 | Class IV human immunodeficiency virus (HIV) insurance program. |
|-------------|--|

**WAC 246-132-020 Class IV human immunodeficiency virus (HIV) insurance program.** Definitions of program covered by the department of health.

(1) "Class IV HIV insurance program" means the program authorized by chapter 70.24 RCW and financed by state funds to assure health insurance coverage for an individual with Class IV HIV infection as defined by the state board of health meeting eligibility requirements established by the department.

(2) "Class IV HIV infection" means an illness characterized by the diseases and conditions defined and described by the state board of health in WAC 246-100-011(1) and 246-100-076.

[Statutory Authority: RCW 70.24.130 and 70.24.440. 92-02-018 (Order 224), § 246-132-020, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-132-020, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.24 RCW and 1989 c 260 § 3. 90-03-052 (Order 020), § 248-180-010, filed 1/16/90, effective 2/16/90.]

## Chapter 246-170 WAC

## TUBERCULOSIS--CONTROL, PREVENTION, AND TREATMENT

## WAC

|             |   |
|-------------|---|
| 246-170-001 | Purpose.                                  |
| 246-170-010 | Definitions.                              |
| 246-170-030 | Local health department responsibilities. |
| 246-170-080 | Case monitoring.                          |

**WAC 246-170-001 Purpose.** (1) These regulations are adopted for the purpose of establishing standards necessary to assure the effective and adequate care and treatment of persons suffering from tuberculosis in hospitals, nursing homes, and other organized living groups, or outpatient settings, including patient homes.

(2) Outpatient treatment should be given the highest priority in personnel and services. A high degree of success must be achieved, requiring the dedicated service of physicians and nurses who can identify with every type of patient and a provision of a full range of type of service, including office, clinic, home visit and special clinics.

(3) These regulations are adopted pursuant to section 2, chapter 213, Laws of 1973 1st ex. sess., and RCW 70.33.020, and the requirements of these regulations shall be in addition to the requirements of WAC 246-170-080, now or as hereafter amended.

[Statutory Authority: RCW 70.33.020, 92-02-018 (Order 224), § 246-170-001, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-170-001, filed 12/27/90, effective 1/31/91; Order 848, § 248-99-010, filed 8/23/73.]

**WAC 246-170-010 Definitions.** (1) "Primary physician" shall mean the physician who assumes the day-to-day medical care of a tuberculosis patient.

(2) "Chest clinic" shall mean an outpatient medical activity provided for persons suffering from or suspected to be suffering from disease primarily affecting the lungs.

(3) "Inpatient" shall mean medical care furnished in a hospital, nursing home or other organized living group in which the patient is a resident.

(4) "Outpatient" shall mean medical care furnished to patients who are residents in their homes or other places of residence.

(5) "Surveillance" shall mean an organized system of medical observation of persons at risk of developing active disease.

(6) "Suspect" shall mean a person who may possibly have a disease condition.

(7) "Epidemiological investigation" shall mean those specific actions taken by physicians or nurses which are taken to determine the extent of spread of infection from an active case of tuberculosis.

(8) "Register" shall mean the listing of all tuberculosis patients as required by WAC 246-170-080, now or as hereafter amended.

(9) "UV generator" shall mean a properly mounted fluorescent tube which electrically produces ultraviolet radiation with bacteriocidal properties.

(10) "Slide microscopy" shall mean the diagnostic test in which body fluids such as sputum are examined for the presence of pathogenic bacteria.

(11) "Prophylaxis" shall mean either primary treatment to prevent infection in an uninfected person or secondary treatment to treat disease in an infected person.

(12) "Infectious" shall mean the state of being the possible transmitter of tuberculosis infection to other persons.

[Statutory Authority: RCW 70.33.020, 92-02-018 (Order 224), § 246-170-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-170-010, filed 12/27/90, effective 1/31/91; Order 848, § 248-99-020, filed 8/23/73.]

**WAC 246-170-030 Local health department responsibilities.** (1) Each health department shall staff and provide a chest clinic under the supervision of a physician specializing in pulmonary diseases. Sufficient nursing and clerical personnel shall be provided to furnish supervision of post-inpatient treatment, post-treatment surveillance, suspect evaluation, epidemiological investigation, contact workup and prophylaxis. A health department unable to provide these services shall contract for such services.

(2) A register must be kept of all known cases of tuberculosis within the jurisdiction in accordance with WAC 246-170-080, now or as hereafter amended. Reports of all newly discovered cases of tuberculosis must be made promptly to the department of social and health services.

(3) One or more physicians qualified to treat tuberculosis as determined by the local health officer with the advice of the state tuberculosis advisory committee shall be secured to assume the primary inpatient and/or outpatient care of patients. A tuberculosis clinical consultant, similarly endorsed, shall be available to provide review in case conferences of diagnoses, plans of management and dates of discharge.

(4) The health department shall also provide by contract appropriate inpatient care. Public health nursing services sufficient to meet the needs of outpatients including home care programs shall be available. Social service is necessary, and if not available within the department, shall be arranged.

[Statutory Authority: RCW 70.33.020, 92-02-018 (Order 224), § 246-170-030, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-170-030, filed 12/27/90, effective 1/31/91; Order 848, § 248-99-040, filed 8/23/73.]

**WAC 246-170-080 Case monitoring.** From the time of diagnosis every patient shall be monitored by the local health department for the purpose of assuring that treatment is continuous, appropriately reviewed and completed. The case register shall be kept in sufficient detail to allow recording of accomplishment of periodic diagnostic studies, clinical progress and changes in state of disease. Quarterly status reports on each diseased patient will be furnished to the department of health tuberculosis control program. Business and financial

records including contracts and accounts shall be maintained by an administrative clerk.

[Statutory Authority: RCW 70.33.020, 92-02-018 (Order 224), § 246-170-080, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-170-080, filed 12/27/90, effective 1/31/91; Order 138, § 248-99-090, filed 2/7/77; Order 848, § 248-99-090, filed 8/23/73.]

**Chapter 246-171 WAC**

**TUBERCULOSIS--FINANCIAL RESPONSIBILITY**

**WAC**

- 246-171-050 Financial ability--Determination.
- 246-171-120 Liability of estate.

**WAC 246-171-050 Financial ability--Determination.** Upon the filing of a financial statement as provided for under WAC 246-171-020 through 246-171-040, it shall be the duty of the local health officer to determine the financial ability of such patient, or the person responsible therefor, to contribute in whole or in part to the cost of care in such facility.

[Statutory Authority: RCW 70.33.020 and 70.30.072, 92-02-018 (Order 224), § 246-171-050, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-171-050, filed 12/27/90, effective 1/31/91; Order 31, § 248-118-030, filed 8/18/69.]

**WAC 246-171-120 Liability of estate.** The unpaid portion of any patient's share of charges for hospitalization shall be a liability of the estate which, while there is a surviving spouse, shall be considered as capital assets of the responsible person and subject to depletion according to WAC 246-171-100(5).

[Statutory Authority: RCW 70.33.020 and 70.30.072, 92-02-018 (Order 224), § 246-171-120, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-171-120, filed 12/27/90, effective 1/31/91; Order 31, § 248-118-090, filed 8/18/69.]

**Chapter 246-203 WAC  
GENERAL SANITATION**

**WAC**

- 246-203-060 Water sold to the public for drinking purposes in bottles or other containers.
- 246-203-070 Ice sold for public use.
- 246-203-080 Pollution of ground water prohibited.
- 246-203-090 Stream pollution.
- 246-203-100 Disposal of human excreta.
- 246-203-160 Sanitation of public buildings.
- 246-203-170 Objectionable establishments and industrial wastes.

**WAC 246-203-060 Water sold to the public for drinking purposes in bottles or other containers. (1) Quality.** No water shall be sold, offered for sale or rendered available for drinking purposes in bottles or other containers unless such water is of a sanitary quality approved by the secretary of the department of health.

(2) **Inspection.** All plants for the preparation of water for sale in bottles or other containers for drinking purposes and the sources of the water supply shall be inspected as frequently as necessary by a representative of

the department of health, and samples of water collected for sanitary analyses at the department of health laboratories.

(3) **Sterilizing containers.** Bottles or other containers in which water is sold for drinking purposes shall be sterilized before refilling. The method of sterilization shall be approved by the secretary of the department of health.

(4) **Water purification.** Processes of purification of waters that are to be sold for drinking purposes shall be approved by the secretary of the department of health before the water can be sold or offered for sale.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-203-060, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-203-060, filed 12/27/90, effective 1/31/91; Regulation .50.060, effective 3/11/60.]

**WAC 246-203-070 Ice sold for public use. (1) Quality.** No ice shall be sold, offered for sale or rendered available for use to the public unless such ice is of a sanitary quality approved by the secretary of the department of health.

(2) **Information.** Any company, corporation, city or individual selling artificial ice for public consumption shall submit to the department of health complete information concerning the source of water supply used for the manufacture of the ice and a detailed description of the manufacturing processes involved.

Any company, corporation, city or individual harvesting natural ice shall file full information with the department of health with regard to the source of the ice and method of storage.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-203-070, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-203-070, filed 12/27/90, effective 1/31/91; Regulation .50.070, effective 3/11/60.]

**WAC 246-203-080 Pollution of ground water prohibited. (1)** No privy contents, drainage from a building, or the effluent from any sewage treatment device shall be discharged directly into any well, either abandoned or constructed for that purpose, that is carried to such a depth as to penetrate the water-bearing strata.

(2) No privy contents, drainage from a building, or the effluent from any sewage treatment device shall be discharged into any crevice, sink-hole, or other opening, either natural or artificial, in a rock formation which will or may permit the pollution or contamination of ground water, except with the approval of the secretary of the department of health.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-203-080, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-203-080, filed 12/27/90, effective 1/31/91; Regulation .50.080, effective 3/11/60.]

**WAC 246-203-090 Stream pollution.** If, after investigation by the state department of health of any stream, lake, or other body of water within the state or forming the boundaries thereof, it is found that the entrance of sewage or industrial wastes are contributing sufficient pollution to endanger the public health and welfare, and the correction thereof is both possible and

practicable, the secretary of the department of health will issue and enforce such special orders as may be necessary for the protection of the public health and welfare.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-203-090, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-203-090, filed 12/27/90, effective 1/31/91; Regulation .50.090, effective 3/11/60.]

**WAC 246-203-100 Disposal of human excreta.** (1) **Waters of the state defined.** For the purpose of this regulation, the term "waters of the state" wherever used, shall include all streams and springs, and all bodies of surface and of ground water, whether natural or artificial, within the boundaries of the state.

(2) **Privies shall be fly-proof.** No privy, cesspool, septic tank, or other receptacle for human excrement shall be constructed, maintained or used so that flies have or may have access to the excrementitious matter contained therein.

(3) **Privies shall not drain in any waters of the state.** No privy, urinal, cesspool, septic tank or other receptacle for human excrement shall be constructed, maintained or used which directly or indirectly drains or discharges over or upon the surface of the ground, or into any waters of the state either directly or indirectly; unless the contents of such urinal, cesspool, septic tank or receptacle for human excrement are subjected to some recognized sterilization treatment approved by the department of health.

(4) **Privies shall be kept clean.** All privies, urinals, cesspools, septic tanks or other receptacles for human excrement shall be cleansed at sufficiently frequent intervals to prevent the contents from overflowing.

(5) **Treating excreta on watersheds of public water supplies.** All schools, hamlets, villages, towns or industrial settlements which are now located or may be hereafter located on the watershed of any public water supply, not provided with a sewerage system, shall provide and maintain a reasonable system approved by the state director of health for collecting and disposing of all accumulations of human excrement within their respective jurisdiction or control.

(6) **Connection with sewer.** No privy, cesspool, septic tank or similar receptacle for human excrement shall be constructed, maintained or used on premises where a sewer is at all accessible which is part of a sewerage system from which sewage is lawfully discharged into the waters of the state.

(7) **Use of human excreta for fertilizer prohibited.** The contents of privies, cesspools, septic tanks or other receptacles for human excrement shall not be placed upon the surface of the ground or be used for fertilizing purposes for crops or gardens.

(8) **No privy near foodstuffs.** No privy, urinal, toilet or other receptacle for human excrement shall be constructed, maintained or used in any room, or have direct connection with any room wherein any kind of exposed foods or foodstuffs are prepared, stored or handled.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-203-100, filed 12/23/91, effective 1/23/92; 91-02-051 (Order

124B), recodified as § 246-203-100, filed 12/27/90, effective 1/31/91; Regulation .50.100, effective 3/11/60.]

**WAC 246-203-160 Sanitation of public buildings.**

(1) **Definition.** A public building shall be construed to mean any theater, show-house, public hall, public meeting place, public transportation terminal, or any other public building not covered by specific regulations: *Provided*, That a public building shall not be construed to include any store, market, supermarket, or other commercial establishment open to the general public for commercial purposes which does not cater to an audience.

(2) **Lighting and ventilation.** All public buildings shall be properly lighted and ventilated according to the type of said building and the uses to which it is put.

(3) **Water supply.**

(a) Any public place supplied with water under pressure shall be equipped with sanitary drinking fountains of an approved type.

(b) Where water supplied for drinking is not obtained from a public water supply, such water shall be of a quality approved by the secretary of the department of health. When not under pressure, drinking water shall be stored in a covered container of an approved type.

(c) The use of the common drinking cup is prohibited.

(4) **Toilet facilities.** Every public building shall be provided with adequate sanitary toilet facilities for each of the sexes; and such facilities shall be convenient and accessible. Every public building which must provide adequate sanitary toilet facilities shall provide at least one free sanitary toilet facility for each of the sexes. Where toilet facilities are voluntarily provided by any store, market, supermarket, or other commercial establishment for use by customers of such establishment or the general public, there shall be at least one free sanitary toilet facility provided for each of the sexes. It shall be the duty of the owner, manager, or other responsible person in charge to see that the toilet system is properly installed and maintained in a usable and sanitary condition at all times.

The method of sewage disposal for all public buildings shall comply with the rules and regulations of the state board of health.

(5) **Cleaning.** All public buildings shall be kept at all times in a clean and sanitary condition and the cleaning shall be carried on under proper sanitary conditions. All rooms used for public meetings shall be cleaned after each meeting held in them, such cleaning to consist of thorough sweeping of the floors and wiping of the woodwork, together with proper airing of the rooms. No room shall be swept without the use of a proper dust-laying substance. Dry dusting is prohibited. In construing this regulation all meetings held during the course of a single day shall be regarded as one meeting.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-203-160, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-203-160, filed 12/27/90, effective 1/31/91; Order 98, § 248-50-160, filed 4/5/74; Order 89, § 248-50-160, filed 10/3/73; Regulation .50.160, effective 3/11/60.]

**WAC 246-203-170 Objectionable establishments and industrial wastes.** (1) No person, partnership, firm or corporation maintaining a slaughter house, rendering works, depository of dead animals, glue works, tannery, wool washing establishment, paper mill, by-product coke oven, dye works, oil refinery, dairy, creamery, cheese factory, milk station or similar establishment; or engaged in the manufacture of gas, chemicals, explosives, fertilizers, or similar products; or in the business of soap making, fish oil extraction, bone boiling or similar occupation, shall allow any noxious exhalation, odors or gases that are deleterious or detrimental to public health to escape into the air, or any substance that is deleterious or detrimental to public health to accumulate upon the premises; or be thrown or allowed to discharge into any street, roadway or public place; or be thrown or allowed to discharge into any stream or other waters of the state.

(2) All slaughter houses, rendering works, bone boiling establishments, depositories for dead animals, garbage disposal works, piggeries and similar establishments handling organic matter shall have an adequate water supply for the purpose of keeping the place clean and sanitary. All floors shall be constructed of concrete or other impervious material and shall have adequate provision for drainage to a sewer or treatment works approved by the department of health.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-203-170, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-203-170, filed 12/27/90, effective 1/31/91; Regulation .50.170, effective 3/11/60.]

**WAC 246-205-001 Purpose.** (1) The purpose of this chapter is to establish department standards and procedures for the certification of contractors and their employees authorized to perform decontamination of illegal drug manufacturing or storage sites. This chapter is adopted jointly by the state board of health and the department of health to implement RCW 64.44.060.

(2) Chapter 246-205 WAC applies:

(a) When an illegal drug manufacturing or storage site is identified; and

(b) To persons involved with the decontamination of illegal drug manufacturing or storage sites including, but not limited to:

- (i) The department;
- (ii) Local health officers;
- (iii) Authorized contractors and their employees;
- (iv) Property owners;
- (v) Law enforcement agencies.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-001, filed 1/24/91, effective 4/1/91.]

**WAC 246-205-010 Definitions.** For the purposes of this chapter, the following words and phrases shall have the following meanings unless the content clearly indicates otherwise.

(1) "Authorized contractor" means any person or persons:

(a) Registered under chapter 18.27 RCW; and

(b) Certified by the department to decontaminate, demolish, or dispose of contaminated property as required by chapter 64.44 RCW and this chapter.

(2) "Basic course" means a training course which has been sponsored or approved by the department for workers and supervisors who perform or supervise decontamination on illegal drug manufacturing or storage sites.

(3) "Certificate" means a department issued written approval under this chapter.

(4) "Certified" means a person who has department issued written approval under this chapter.

(5) "Contaminated" or "contamination" means polluted by hazardous chemicals so that the property is unfit for human habitation or use due to immediate or long-term hazards. Property that at one time was contaminated but has been satisfactorily decontaminated according to procedures established by the state board of health is not "contaminated."

(6) "Decontamination" means the process of reducing levels of known contaminants to the lowest practical level using currently available methods and processes.

(7) "Department" means the Washington state department of health.

(8) "Disposal of contaminated property" means the disposition of contaminated property under the provisions of chapter 70.105 RCW.

(9) "Hazardous chemicals" means the following substances used in the manufacture of illegal drugs:

(a) Hazardous substances as defined in RCW 70.105D.020; and

(b) Precursor substances as defined in RCW 69.43-.010 which the state board of health, in consultation with the state board of pharmacy, has determined present an immediate or long-term health hazard to humans.

(10) "Illegal drug manufacturing or storage site" means any property where the manufacture or storage of controlled substances occurred or there are reasonable

grounds to believe it occurred in violation of chapter 69-43 or 69.50 RCW.

(11) "Initial site assessment" means the first evaluation of a property to determine the nature and extent of observable damage and contamination.

(12) "List of contaminated properties" means a list of properties contaminated by illegal drug manufacturing or the storage of hazardous chemicals.

(13) "Local department" means the jurisdictional local health department or district.

(14) "Local health officer" means a health officer or authorized representative as defined under chapters 70-05, 70.08, and 70.46 RCW.

(15) "Person" means an individual, firm, association, copartnership, political subdivision, government agency, municipality, industry, public or private corporation, or other entity.

(16) "Property" means any site, structure, or part of a structure involved in the illegal manufacture of drugs or storage of hazardous chemicals including but not limited to:

- (a) Single-family residences;
- (b) Units or multiplexes;
- (c) Condominiums;
- (d) Apartment buildings;
- (e) Motels and hotels;
- (f) Boats;
- (g) Motor vehicles;
- (h) Trailers;
- (i) Manufactured housing;
- (j) Any ship, booth, or garden; or
- (k) Any site, structure, or part of a structure that may have been contaminated by previous use.

(17) "Refresher course" means a department sponsored or approved biennial training course for decontamination workers and supervisors. An approved refresher course:

- (a) Reviews the subjects taught in the initial training course; and
- (b) Includes updated information on emerging decontamination technology.

(18) "Storage site" means any property that has been used for the storage of hazardous chemicals.

(19) "Subcontractor" means a person hired by an authorized contractor for the purpose of providing on-site services.

(20) "Supervisor" means a person employed by an authorized contractor who is on site during the decontamination of an illegal drug manufacturing or storage site and who is responsible for the activities performed.

(21) "Worker" means a person employed by an authorized contractor who performs decontamination of an illegal drug manufacturing or storage site.

[Statutory Authority: RCW 64.44.060 and 64.44.070. 92-02-017 (Order 223SB), § 246-205-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-010, filed 1/24/91, effective 4/1/91.]

#### **WAC 246-205-020 Authorized contractor services.**

(1) Persons performing or causing to be performed any

decontamination, demolition, or disposal of contaminated property shall use the services of an authorized contractor.

(2) Persons advertising or offering to undertake or perform any work necessary to decontaminate properties shall first comply with these rules and secure a certificate from the department under RCW 64.44.060 and this chapter.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-020, filed 1/24/91, effective 4/1/91.]

#### **WAC 246-205-030 Courses for training workers and supervisors.** The department shall:

(1) Train, test, or approve courses to train and test the authorized contractor's workers and supervisors on the essential elements in assessing and decontaminating property used as an illegal drug manufacturing or storage site;

(2) Require a biennial refresher course.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-030, filed 1/24/91, effective 4/1/91.]

#### **WAC 246-205-040 Training course approval.** (1)

Persons having department approval may sponsor basic and refresher worker and supervisor training courses.

(2) Training course approval shall be contingent on department evaluation of:

- (a) The breadth of knowledge and experience required to properly train workers or supervisors;
- (b) Adequacy and accuracy of content; and
- (c) Training techniques.

(3) Department approved training courses shall provide at a minimum, information on:

- (a) Rules and regulations:
  - (i) Chapters 69.43 and 69.50 RCW;
  - (ii) Federal Occupational Health and Safety Act and Washington Industrial Safety and Health Act requirements.

(b) Chemical terminology and classifications:

- (i) Definitions, physical and chemical properties, class characteristics and hazards, special cases;
- (ii) Equipment such as heating mantle, condenser, glassware;

(iii) Concepts such as acid, base, and pH;

(iv) Solvents;

(v) Metals and salts;

(vi) Corrosives;

(vii) Precursor substances;

(viii) By-products and contaminants;

(ix) Poisons such as cyanide and phosphine.

(c) Surface properties of chemicals:

(i) Absorption;

(ii) Adsorption;

(iii) Chemical bonding;

(iv) Specific chemicals such as 1-phenyl-2-propanone and phenylacetic acid.

(d) Illegal drug laboratories:

(i) Laboratory types including:

(A) Methamphetamine/Amphetamine;

- (B) Hallucinogens;
- (C) Others such as cocaine and opiates.
- (ii) Chemicals;
- (iii) Equipment;
- (iv) An overview of synthetic processes used; and
- (v) Booby traps.
- (e) Health effects:
  - (i) General:
    - (A) Effects of exposure to classes of chemicals;
    - (B) Use of literature such as *Material Safety Data Sheet* and *Chemical Hazards Handbook*.
  - (ii) Toxicology:
    - (A) Routes of exposure; and
    - (B) Exposure limits such as time weighted averages and threshold limit value.
  - (iii) Symptomatology; and
  - (iv) First aid.
  - (f) Incompatibility of chemicals related to clean-up:
    - (i) General concepts such as heat generation and poisonous gas formation; and
    - (ii) Specific hazards such as lithium, aluminum hydride and water, phosphorous and air.
  - (g) Decontamination:
    - (i) Structures and vehicles including cars and boats, covering:
      - (A) Different techniques and required equipment;
      - (B) Applications of specific clean-up techniques using hypothetical case examples and correlating site status with appropriate techniques; and
      - (C) Decision making about and prioritization of techniques based upon case-specific information.
    - (ii) Contents, specifically removal vs. cleaning; and
    - (iii) Personal decontamination of crew members prior to leaving a decontamination site.
    - (h) Handling of contaminated materials:
      - State/federal requirements for dealing with hazardous chemicals specific to:
        - (i) Disposal;
        - (ii) Transportation; and
        - (iii) Storage.
      - (i) Reporting requirements.
      - (j) Site characterization which shall be required for supervisors only:
        - How to acquire and review existing site specific information including:
          - (i) Source of data from health department, property owner, law enforcement, or ecology department;
          - (ii) Site walk-through and assessment;
          - (iii) Sampling before and after cleanup including:
            - (A) Who;
            - (B) When;
            - (C) What;
            - (D) How; and
            - (E) Where.
        - (k) Recordkeeping and reporting which shall be required for supervisors only:
          - (i) Initial site assessment;
          - (ii) Obtaining necessary information;
          - (iii) Initial site testing;
          - (iv) Workplan including:
            - (A) Scope;

- (B) Content; and
- (C) Format.
- (v) Final site testing;
- (vi) Report completion;
- (vii) Other responsibilities of authorized contractors;
- (viii) Penalties and liability.
- (4) Sponsors of basic and refresher training courses proposed for department approval shall submit:
  - (a) Course location and fees;
  - (b) Copies of course handouts;
  - (c) A detailed description of course content and the amount of time allotted to each major topic;
  - (d) A description of teaching methods to be utilized and a list of all audio-visual materials;
  - (e) A list of all personnel involved in course preparation and presentation and a description of their qualifications;
  - (f) When specifically requested by the department, copies of all audio-visual materials proposed for utilization; and
  - (g) A list of two hundred questions for development of an examination.
- (5) Sponsors seeking initial and renewal department approval of training courses shall:
  - (a) Apply on forms provided by the department;
  - (b) Submit to the department completed application with the required fee as specified under WAC 246-205-990;
  - (c) Ensure initial course approval applications are received by the department sixty or more days before the requested approval date; and
  - (d) Ensure training course renewal applications are received by the department thirty or more days before expiration of the current approval.
  - (6) The department shall:
    - (a) Approve basic and refresher training courses;
    - (b) Issue the course sponsor an approval valid for two years from the date of issuance;
    - (c) Require additional subjects to be taught to update information on new technology and determine the amount of time to be allotted to adequately cover these subjects;
    - (d) Provide a detailed outline of subject matter developed by the department to the sponsor for required incorporation into the training course.
    - (7) The course sponsor shall provide the department with a list of the names, addresses, and Social Security numbers of all persons completing a basic or refresher training course ten days or less after a course is completed.
    - (8) The course sponsor shall:
      - (a) Notify the department in writing thirty or more days before a training course is scheduled to begin; and
      - (b) Include the date, time, and address of the locations where training will be conducted; and
      - (c) Obtain department approval in advance for any changes to a training course.
    - (9) A department representative may, at the department's discretion, attend a training course as an observer to verify the course sponsor conducts the training course

in accordance with the program approved by the department.

(10) Course sponsors conducting training outside the state of Washington shall:

(a) Reimburse the department at current state of Washington per diem and travel allowance rates for travel expenses associated with department observance of the training courses; and

(b) Submit reimbursement to the department within thirty days of receipt of the billing notice.

(11) The training course sponsor shall limit each class to a maximum of thirty participants.

(12) The department may terminate the training course approval if in the department's judgment the sponsor fails to:

(a) Maintain the course content and quality as initially approved;

(b) Make changes to a course as required by the department.

[Statutory Authority: RCW 64.44.060 and 64.44.070. 92-02-017 (Order 223SB), § 246-205-040, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-040, filed 1/24/91, effective 4/1/91.]

**WAC 246-205-050 Worker and supervisor certification.** (1) Applicants seeking an initial certificate as a decontamination worker shall submit to the department:

(a) A completed application on a form provided by the department;

(b) A fee as prescribed in WAC 246-205-990; and

(c) Evidence of successful completion of:

(i) Eighty or more hours of hazardous material training satisfying the requirements of WAC 296-62-3040; and

(ii) A department sponsored or approved decontamination worker training course.

(2) Applicants seeking an initial certificate as a decontamination supervisor shall submit to the department:

(a) Evidence of a valid and current Washington state decontamination worker certificate;

(b) Evidence of forty or more hours of on-site experience in hazardous material or illegal drug manufacturing or storage site decontamination projects;

(c) A completed application on a form provided by the department;

(d) A fee as prescribed in WAC 246-205-990; and

(e) Evidence of successful completion of a department sponsored or approved decontamination supervisor training course.

(3) Applicants for department certification shall:

(a) Ensure the completed application is received by the department sixty or less days after the completion of the course; or

(b) Pass an examination administered by the department with a score of seventy percent or more.

(4) Persons shall supervise and perform decontamination work only following issuance of the certificate, valid for two years from the date of issuance.

(5) Persons shall make certificates available for inspection at all times during an illegal drug manufacturing or storage site decontamination project.

(6) The department may deny, suspend, or revoke a person's certificate as described under WAC 246-205-110.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-050, filed 1/24/91, effective 4/1/91.]

**WAC 246-205-060 Worker and supervisor certificate renewal.** (1) Certified workers and supervisors seeking a renewal certificate shall submit to the department:

(a) A completed application for certificate renewal on a form provided by the department;

(b) A fee as prescribed in WAC 246-205-990;

(c) Evidence of successful completion of a department sponsored or approved refresher training course. Refresher training shall include:

(i) A thorough review of the subjects required under WAC 246-205-030;

(ii) Update of information on state-of-the-art procedures and equipment;

(iii) Review of regulatory changes and interpretation; and

(iv) Other subjects if required by the department to update information on new technology and procedures.

(2) Workers whose certificates have been expired for more than two years shall retake the entire basic course. Supervisors whose certificates have been expired for more than two years shall retake the entire basic supervisor's course.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-060, filed 1/24/91, effective 4/1/91.]

**WAC 246-205-070 Authorized contractor certification.** (1) A contractor may perform decontamination, demolition, or disposal work at an illegal drug manufacturing or storage site only after the department issues the contractor a certificate.

(2) The department shall not require companies and persons providing only initial site assessment, sample collection, transportation, and testing services for drug laboratory decontamination contractors to be certified or trained under this chapter.

(3) Applicants for department certification as an authorized contractor, shall submit to the department:

(a) Evidence of being licensed, bonded, and insured as a general contractor under the provisions of chapter 18-.27 RCW.

(b) Evidence of successful completion of specialized training for each employee who will do work on an illegal drug manufacturing or storage site;

(c) Documentation that the contractor has at least one department certified supervisor;

(d) A completed application on a form provided by the department; and

(e) A fee as prescribed in WAC 246-205-990.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-070, filed 1/24/91, effective 4/1/91.]

**WAC 246-205-080 Reciprocity.** (1) The department may provide reciprocal certification for contractors, supervisors, and workers trained and certified in another state if standards and training are substantially equivalent to those of this chapter.

(2) Applicants for reciprocity shall submit to the department:

(a) A completed application on a form provided by the department;

(b) Documentation of specialized training for illegal drug manufacturing or storage site decontamination;

(c) Evidence of successful completion of training required by Federal Occupational Safety and Health Act, Washington Industrial Safety and Health Act regulations, and WAC 296-62-3040; and

(d) A fee as prescribed in WAC 246-205-990.

(3) After reviewing the application, the department may issue the applicant a certificate or require:

(a) Additional information;

(b) A refresher course; or

(c) A department-administered examination.

[Statutory Authority: RCW 64.44.060 and 64.44.070. 92-02-017 (Order 223SB), § 246-205-080, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-080, filed 1/24/91, effective 4/1/91.]

**WAC 246-205-090 On-site supervision.** (1) During decontamination, demolition, or disposal of contaminated property at illegal drug manufacturing or storage sites, a contractor employed supervisor meeting the qualifications required in this chapter shall be on site and responsible for the activities performed.

(2) The contractor employed supervisor shall, while on site, make available for inspection, department provided certification attesting to the supervisor's training and credentials.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-090, filed 1/24/91, effective 4/1/91.]

**WAC 246-205-100 Performance standards.** Authorized contractors and their employees working at a decontamination site shall, at a minimum, meet the following performance standards:

(1) File a workplan with and obtain approval of the local health department;

(2) Perform work in accordance with the approved workplan;

(3) Perform work meeting the requirements of state and local building codes;

(4) Comply with applicable Federal Occupational Safety and Health Act and Washington Industrial Safety and Health Act regulations and requirements;

(5) Comply with the requirements of chapter 70.105 RCW and chapter 173-303 WAC;

(6) Comply with the requirements of applicable department of ecology and Environmental Protection Agency regulations;

(7) Comply with applicable contractor regulations;

(8) Notify the state and local jurisdictional health department of all work performed within ten days after completion of the project;

(9) Perform all decontamination work only with department certified workers and supervisors; and

(10) Comply with all other applicable laws and regulations.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-100, filed 1/24/91, effective 4/1/91.]

**WAC 246-205-110 Denial, suspension, revocation of certification, and civil penalties.** (1) The department shall deny an initial, renewal, or reciprocal illegal drug manufacturing or storage site decontamination worker, supervisor, or contractor certificate if the applicant fails to meet the requirements of this chapter.

(2) The department may take disciplinary action against a worker, supervisor, or contractor if the following occurs:

(a) Failure to comply with the requirements of chapter 64.44 RCW to include the performance standards or any rule adopted under chapter 64.44 RCW and this chapter;

(b) Failure of a worker or supervisor to make certificates available for inspection on site; or

(c) Committing fraud or misrepresentation in:

(i) Applying for certification;

(ii) Seeking approval of a workplan; or

(iii) Documenting completion of the work to the local health department.

(3) The department may take disciplinary action against a decontamination worker, supervisor, or contractor including, but not limited to, denial, suspension, or revocation of certification.

(4) The department may impose against a contractor a civil penalty not to exceed five hundred dollars, for each violation in addition to or in lieu of certification denial, suspension, or revocation pursuant to this rule. Each day the violation continues shall be considered a separate violation.

(5) Adjudicative proceedings are governed by chapter 34.05 RCW, the Administrative Procedure Act, chapter 246-08 WAC, and this chapter.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-110, filed 1/24/91, effective 4/1/91.]

**WAC 246-205-120 Authorized contractor certification list.** The department shall maintain a list of authorized illegal drug manufacturing or storage site decontamination contractors. The department's authorized contractor list shall be made available to local health officials and other appropriate agencies semi-annually, and to the public upon request.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-120, filed 1/24/91, effective 4/1/91.]

**WAC 246-205-990 Fees.** (1) The department shall charge fees for issuance and renewal of certificates. The department shall set the fees by rule.

(2) The fees shall cover the cost of issuing certificates, filing papers and notices, and administering this chapter.

The costs shall include reproduction, travel, per diem, and administrative and legal support costs.

(3) Fees are nonrefundable and shall be in the form of check or money order made payable to the department.

(4) The department shall require payment of the following fees upon receipt of application:

(a) Twenty-five dollars shall be assessed for each initial, renewal, or reciprocal worker certificate application.

(b) Twenty-five dollars shall be assessed for each initial, renewal, or reciprocal supervisor certificate application.

(c) Five hundred dollars shall be assessed for each initial, renewal, or reciprocal authorized contractor certificate application. The applicant's certificate shall expire annually on the expiration date of the contractor's license issued under the provisions of chapter 18.27 RCW.

(d) Two hundred dollars shall be assessed for each initial application and fifty dollars shall be assessed for each renewal application for illegal drug manufacturing or storage site decontamination training course approval.

[Statutory Authority: RCW 64.44.060 and chapter 64.44 RCW. 91-04-007 (Order 125SB), § 246-205-990, filed 1/24/91, effective 4/1/91.]

### Chapter 246-220 WAC

#### RADIATION PROTECTION--GENERAL PROVISIONS

##### WAC

|             |   |
|-------------|---|
| 246-220-007 | Statement of philosophy.                            |
| 246-220-010 | Definitions.  |
| 246-220-050 | Exemptions.   |
| 246-220-090 | Communications.                                     |
| 246-220-130 | Appendix C--The international system of units (SI). |

**WAC 246-220-007 Statement of philosophy.** In accordance with the recommendations of the Environmental Protection Agency, formerly the Federal Radiation Council, approved by the president of the United States of America, persons engaged in activities under licenses issued by the Washington state department of health pursuant to the Atomic Energy Act of 1954, as amended, shall, in addition to complying with the requirements set forth in chapter 246-221 WAC, make every reasonable effort to maintain radiation exposures, and releases of radioactive materials in effluents to unrestricted areas, as low as is reasonably achievable. Such persons should make particular efforts to keep the radiation exposure of an embryo or fetus as low as is reasonably achievable during the entire gestation period as recommended by the National Council on Radiation Protection and Measurements. The term "as low as is reasonably achievable" means as low as is readily achievable taking into account the state of technology, and the economics of improvements in relation to benefits to the public health and safety and in relation to the utilization of nuclear energy, ionizing radiation, and radioactive materials in the public interest.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-220-007, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-220-007, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-10-010, filed 12/8/80; Order 1095, § 402-10-010, filed 2/6/76.]

**WAC 246-220-010 Definitions.** As used in these regulations, these terms have the definitions set forth below. Additional definitions used only in a certain part will be found in that part.

(1) "A<sub>1</sub>" means the maximum activity of special form radioactive material permitted to be transported in a Type A package. "A<sub>2</sub>" means the maximum activity of normal form radioactive material permitted to be transported in a Type A package. A<sub>1</sub> and A<sub>2</sub> values are assigned to individual radionuclides and are tabulated in Appendix A of WAC 246-220-110. Methods of calculating values are also given.

(2) "Accelerator produced material" means any material made radioactive by exposing it in a particle accelerator.

(3) "Act" means Nuclear energy and radiation, chapter 70.98 RCW.

(4) "Agreement state" means any state with which the United States Nuclear Regulatory Commission has entered into an effective agreement under section 274 b. of the Atomic Energy Act of 1954, as amended (73 Stat. 689).

(5) "Airborne radioactive material" means any radioactive material dispersed in the air in the form of dusts, fumes, mists, vapors, or gases.

(6) "Airborne radioactivity area" means (a) any room, enclosure, or operating area in which airborne radioactive material exists in concentrations in excess of the amounts specified in Appendix A, Table I, Column 1 of chapter 246-221 WAC; or (b) any room, enclosure, or operating area in which airborne radioactive material exists in concentrations which, averaged over the number of hours in any week during which individuals are in the area, exceed twenty-five percent of the amounts specified in WAC 246-221-290, Appendix A, Table I, Column 1.

(7) "Brachytherapy" means a method of radiation therapy in which sealed sources are utilized to deliver a radiation dose at a distance of up to a few centimeters, by surface, intracavitary, or interstitial application.

(8) "Byproduct material" means: (a) Any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material, and (b) the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content.

(9) "Calendar quarter" means not less than twelve consecutive weeks nor more than fourteen consecutive weeks. The first calendar quarter of each year shall begin in January and subsequent calendar quarters shall be so arranged such that no day is included in more than one calendar quarter and no day in any one year is

omitted from inclusion within a calendar quarter. No licensee or registrant shall change the method of determining calendar quarters for purposes of these regulations except at the beginning of a calendar year.

(10) "Calibration" means the determination of (a) the response or reading of an instrument relative to a series of known radiation values over the range of the instrument, or (b) the strength of a source of radiation relative to a standard.

(11) "CFR" means Code of Federal Regulations.

(12) "Controlled area." See "Restricted area."

(13) "Curie" means a unit of measurement of radioactivity. One curie (Ci) is that quantity of radioactive material which decays at the rate of  $3.7 \times 10^{10}$  transformations per second (tps). Commonly used submultiples of the curie are the millicurie and the microcurie. One millicurie (mCi) = 0.001 curie =  $3.7 \times 10^7$  tps. (Formerly referred to as disintegrations per seconds or dps.) One microcurie (uCi) = 0.000001 curie =  $3.7 \times 10^4$  tps. One picocurie (pCi) =  $10^{-12}$  Ci. One nanocurie (nCi) =  $10^{-9}$  Ci. One tps = 60 dpm.

(14) "Department" means the department of health, division of radiation protection, which has been designated as the state radiation control agency.

(15) "Depleted uranium" means the source material uranium in which the isotope Uranium-235 is less than 0.711 percent by weight of the total uranium present. Depleted uranium does not include special nuclear material.

(16) "dpm" means disintegrations per minute. See also "curie."

(17) "Dose" as used in these regulations shall mean absorbed dose or dose equivalent as appropriate.

(a) "Absorbed dose" is the energy imparted to matter by ionizing radiation per unit mass of irradiated material at the place of interest. The special unit of absorbed dose is the rad. (See rad.)

(b) "Dose equivalent" is a quantity that expresses on a common scale for all radiation a measure of the postulated effect on a given organ. It is defined as the absorbed dose in rads times certain modifying factors. The unit of dose equivalent is the rem. (See rem.)

(18) "Dose commitment" means the total radiation dose to a part of the body that will result from retention in the body of radioactive material. For purposes of estimating the dose commitment, it is assumed that from the time of intake the period of exposure to retained material will not exceed fifty years.

(19) "Exposure" means the quotient of  $dQ$  by  $dm$  where " $dQ$ " is the absolute value of the total charge of the ions of one sign produced in air when all the electrons (negatrons and positrons) liberated by photons in a volume element of air having " $dm$ " are completely stopped in air. (The special unit of exposure is the roentgen (R).)\*

Note: \*When not underlined as above the term 'exposure' has a more general meaning in these regulations.

(20) "Exposure rate" means the exposure per unit of time, such as R/min., mR/h, etc.

(21) "Former United States Atomic Energy Commission (AEC) or United States Nuclear Regulatory Commission (NRC) licensed facilities" means nuclear reactors, nuclear fuel reprocessing plants, uranium enrichment plants, or critical mass experimental facilities where AEC or NRC licenses have been terminated.

(22) "Healing arts" means the disciplines of medicine, dentistry, osteopathy, chiropractic, podiatry, and veterinary medicine.

(23) "High radiation area" means any area, accessible to individuals, in which there exists radiation at such levels that a major portion of the body could receive in any one hour a dose in excess of 100 millirems.

(24) "Highway route controlled quantity" means a quantity of radioactive material in a single package which exceeds:

(a) 3,000 times the  $A_1$  or  $A_2$  quantity as appropriate; or

(b) 30,000 curies, whichever is least.

(25) "Human use" means the intentional internal or external administration of radiation or radioactive material to human beings.

(26) "IND" means investigatory new drug for which an exemption has been claimed under the United States Food, Drug and Cosmetic Act (Title 10 CFR).

(27) "Individual" means any human being.

(28) "Inspection" means an official examination or observation by the department including but not limited to, tests, surveys, and monitoring to determine compliance with rules, regulations, orders, requirements and conditions of the department.

(29) "Irretrievable source" means any sealed source containing licensed material which is pulled off or not connected to the wireline downhole and for which all reasonable effort at recovery, as determined by the department, has been expended.

(30) "Interlock" means a device arranged or connected such that the occurrence of an event or condition is required before a second event or condition can occur or continue to occur.

(31) "License" means a license issued by the department in accordance with the regulations adopted by the department.

(32) "Licensee" means any person who is licensed by the department in accordance with these regulations and the act.

(33) "Licensing state" means any state with regulations equivalent to the suggested state regulations for control of radiation relating to, and an effective program for, the regulatory control of NARM.

(34) "Major processor" means a user processing, handling, or manufacturing radioactive material exceeding Type A quantities as unsealed sources or material, or exceeding four times Type B quantities as sealed sources, but does not include nuclear medicine programs, universities, industrial radiographers, or small industrial programs. Type A and B quantities are defined in Section 71.4 of 10 CFR Part 71.

(35) "NARM" means any naturally occurring or accelerator-produced radioactive material except source material.

(36) "Natural radioactivity" means radioactivity of naturally occurring nuclides.

(37) "NDA" means a new drug application which has been submitted to the United States Food and Drug Administration.

(38) "Normal form radioactive material" means radioactive material which has not been demonstrated to qualify as "special form radioactive material."

(39) "Nuclear waste" as used in WAC 246-232-090(5) means any quantity of source or byproduct material, (not including radiography sources being returned to the manufacturer) required to be in Type B packaging while transported to, through, or across state boundaries to a disposal site, or to a collection point for transport to a disposal site. Nuclear waste, as used in these regulations, is a special classification of radioactive waste.

(40) "Occupational dose" means exposure of an individual to radiation in a restricted area; or in the course of employment in which the individual's duties involve exposure to radiation: *Provided*, That occupational dose shall not be deemed to include any exposure of an individual to radiation for the purpose of diagnosis or therapy of such individual.

(41) "Ore refineries" means all processors of a radioactive material ore.

(42) "Particle accelerator" means any machine capable of accelerating electrons, protons, deuterons, or other charged particles in a vacuum and of discharging the resultant particulate or other radiation into a medium at energies usually in excess of 1 MeV.

(43) "Permittee" means a person who has applied for, and received, a valid site use permit for use of the low-level waste disposal facility at Hanford, Washington.

(44) "Person" means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency, political subdivision of this state, any other state or political subdivision or agency thereof, and any legal successor, representative, agent or agency of the foregoing.

(45) "Personal supervision" means supervision such that the supervisor is physically present at the facility and in such proximity that contact can be maintained and immediate assistance given as required.

(46) "Personnel monitoring equipment" means devices (e.g., film badges, pocket dosimeters, and thermoluminescent dosimeters) designed to be worn or carried by an individual for the purpose of estimating the dose received by the individual.

(47) "Pharmacist" means an individual licensed by this state to compound and dispense drugs, and poisons.

(48) "Physician" means an individual licensed by this state to prescribe and dispense drugs in the practice of medicine.

(49) "Practitioner" means an individual licensed by the state in the practice of a healing art (i.e., physician, dentist, podiatrist, chiropractor, etc.).

(50) "Qualified expert" means an individual who has demonstrated to the satisfaction of the department possession of knowledge and training to measure ionizing radiation, to evaluate safety techniques, and to advise

regarding radiation protection needs. The department reserves the right to recognize the qualifications of an individual in specific areas of radiation protection.

(51) "Rad" means the special unit of absorbed dose. One rad equals one-hundredth of a joule per kilogram of material; for example, if tissue is the material of interest, then 1 rad equals 100 ergs per gram of tissue.

(52) "Radiation" means ionizing radiation, i.e., gamma rays and x-rays, alpha and beta particles, high speed electrons, and other nuclear particles.

(53) "Radiation area" means any area, accessible to individuals, in which there exists radiation at such levels that a major portion of the body could receive in any one hour a dose in excess of 5 millirems, or in any five consecutive days a dose in excess of 100 millirems.

(54) "Radiation machine" means any device capable of producing ionizing radiation except those which produce radiation only from radioactive material.

(55) "Radiation safety officer" means one who has the knowledge, authority, and responsibility to apply appropriate radiation protection regulations and measures.

(56) "Radiation source." See "Source of radiation."

(57) "Radioactive material" means any material (solid, liquid, or gas) which emits radiation spontaneously.

(58) "Radioactive waste" means any radioactive material which is no longer of use and intended for disposal or treatment for the purposes of disposal.

(59) "Radioactivity" means the transformation of unstable atomic nuclei by the emission of radiation.

(60) "Registrable item" means any radiation machine except those exempted by RCW 70.98.180 or exempted by the department pursuant to the authority of RCW 70.98.080.

(61) "Registrant" means any person who is registered by the department in accordance with these regulations and the act.

(62) "Registration" means registration with the department in accordance with the regulations adopted by the department.

(63) "Regulations of the United States Department of Transportation" means the regulations in 49 CFR Parts 170-189, 14 CFR Part 103, and 46 CFR Part 146.

(64) "Rem" means a measure of the dose of any radiation to body tissue in terms of its estimated biological effect relative to a dose received from an exposure to one roentgen (R) of x-rays. (One millirem (mrem) = 0.001 rem.) For the purpose of these regulations, any of the following is considered to be equivalent to a dose of one rem:

(a) An exposure of 1 R of x, or gamma radiation;

(b) A dose of 1 rad due to x, gamma, or beta radiation;

(c) A dose of 0.05 rad due to particles heavier than protons and with sufficient energy to reach the lens of the eye;

(d) A dose of 0.1 rad due to neutrons or high energy protons.\*

(e) A dose of 0.4 rad due to thermal neutrons.

Note: \*If it is more convenient to measure the neutron flux, or equivalent, than to determine the neutron absorbed dose in

rads, one rem of neutron radiation may, for purposes of these regulations, be assumed to be equivalent to fourteen million neutrons per square centimeter incident upon the body; or, if there exists sufficient information to estimate with reasonable accuracy the approximate distribution in energy of the neutrons, the incident number of neutrons per square centimeter equivalent to one rem may be estimated from the following table:

Neutron Flux Dose Equivalents

| Neutron energy (MeV) | Number of neutrons per square centimeter for a dose equivalent of 1 rem (neutrons/cm <sup>2</sup> ) | Average flux density to deliver 100 millirems in 40 hours (neutrons/cm <sup>2</sup> per second) |
|----------------------|---|---|
| Thermal              | 970 x 10 <sup>6</sup>   | 670   |
| 0.0001               | 720 x 10 <sup>6</sup>   | 500   |
| 0.005                | 820 x 10 <sup>6</sup>   | 570   |
| 0.02                 | 400 x 10 <sup>6</sup>   | 280   |
| 0.1                  | 120 x 10 <sup>6</sup>   | 80  |
| 0.5                  | 43 x 10 <sup>6</sup>  | 30  |
| 1.0                  | 26 x 10 <sup>6</sup>  | 18  |
| 2.5                  | 29 x 10 <sup>6</sup>  | 20  |
| 5.0                  | 26 x 10 <sup>6</sup>  | 18  |
| 7.5                  | 24 x 10 <sup>6</sup>  | 17  |
| 10.0                 | 24 x 10 <sup>6</sup>  | 17  |
| 10 to 30             | 14 x 10 <sup>6</sup>  | 10  |

(65) "Research and development" means: (a) Theoretical analysis, exploration, or experimentation; or (b) the extension of investigative findings and theories of a scientific or technical nature into practical application for experimental and demonstration purposes, including the experimental production and testing of models, devices, equipment, materials, and processes. Research and development does not include the internal or external administration of radiation or radioactive material to human beings.

(66) "Restricted area" (controlled area) means any area the access to which is controlled by the licensee or registrant for purposes of protection of individuals from exposure to radiation and radioactive material. "Restricted area" shall not include any areas used for residential quarters, although a separate room or rooms in a residential building may be set apart as a restricted area.

(67) "Roentgen" (R) means the special unit of exposure. One roentgen equals 2.58 x 10<sup>-4</sup> coulombs/kilogram of air (see "Exposure").

(68) "Sealed source" means radioactive material that is permanently bonded or fixed in a capsule or matrix designed to prevent release and dispersal of the radioactive material under the most severe conditions which are likely to be encountered in normal use and handling.

(69) "Source material" means: (a) Uranium or thorium, or any combination thereof, in any physical or chemical form, or (b) ores which contain by weight one-twentieth of one percent (0.05 percent) or more of (i) uranium, (ii) thorium, or (iii) any combination thereof. Source material does not include special nuclear material.

(70) "Source of radiation" means any radioactive material, or any device or equipment emitting or capable of producing ionizing radiation.

(71) "Source container" means a device in which radioactive material is transported or stored.

(72) "Source material milling" means any activity that results in the production of byproduct material as defined in subsection (8)(b) of this section.

(73) "Special form radioactive material" means radioactive material which satisfies the following conditions:

(a) It is either a single solid piece or is contained in a sealed capsule that can only be opened by destroying the capsule;

(b) The piece or capsule has at least one dimension not less than five millimeters (0.197 inch); and

(c) It satisfies the test requirements of 10 CFR 71.75.

(74) "Special nuclear material in quantities not sufficient to form a critical mass" means uranium enriched in the isotope U-235 in quantities not exceeding three hundred fifty grams of contained U-235; Uranium-233 in quantities not exceeding two hundred grams; Plutonium in quantities not exceeding two hundred grams; or any combination of them in accordance with the following formula: For each kind of special nuclear material, determine the ratio between the quantity of that special nuclear material and the quantity specified above for the same kind of special nuclear material. The sum of such ratios for all of the kinds of special nuclear material in combination shall not exceed "1" (i.e., unity). For example, the following quantities in combination would not exceed the limitation and are within the formula:

$$\begin{array}{r}
 175(\text{grams contained U-235}) \\
 \hline
 350 \\
 50(\text{grams U-233}) \\
 \hline
 200 \\
 50(\text{grams Pu}) \\
 \hline
 200 < 1
 \end{array}$$

(75) "State" as used in WAC 246-232-090(5) means the several states of the union, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

(76) "Survey" means an evaluation of the production, use, release, disposal, and/or presence of sources of radiation under a specific set of conditions to determine actual or potential radiation hazards. When appropriate, such evaluation includes, but is not limited to, tests, physical examinations and measurements of levels of radiation or concentration of radioactive material present.

(77) "Test" means (a) the process of verifying compliance with an applicable regulation, or (b) a method for determining the characteristics or condition of sources of radiation or components thereof.

(78) "These regulations" mean all parts of the rules for radiation protection of the state of Washington.

(79) "Type A packaging" means packaging designed to retain its integral containment and shielding under normal conditions of transport as demonstrated by tests

described in 49 CFR 173.465 or 173.466 as appropriate. The contents are limited to A<sub>1</sub> or A<sub>2</sub> quantities. The package does not require competent authority approval.

(80) "Type A quantity" means a quantity of radioactive material less than the A<sub>1</sub> or A<sub>2</sub> value for a single radionuclide, or for which the sum of the fractions does not exceed unity for a mixture of radionuclides.

(81) "Type B packaging" means packaging approved by the United States nuclear regulatory commission for the transport of quantities of radioactivity in excess of A<sub>1</sub> or A<sub>2</sub>. It is defined in detail in 10 CFR 71.4.

(82) "Type B quantity" means a quantity of radioactive material in excess of a Type A quantity. It requires Type B packaging for transportation.

(83) "Uncontrolled area." See "Unrestricted area."

(84) "United States Department of Energy" means the Department of Energy established by Public Law 95-91, August 4, 1977, 91 Stat. 565, 42 U.S.C. 7101 et seq., to the extent that the department exercises functions formerly vested in the United States Atomic Energy Commission, its chairman, members, officers and components and transferred to the United States Energy Research and Development Administration and to the administrator thereof pursuant to sections 104 (b), (c) and (d) of the Energy Reorganization Act of 1974 (Public Law 93-438, October 11, 1974, 88 Stat. 1233 at 1237, effective January 19, 1975) and retransferred to the Secretary of Energy pursuant to section 301(a) of the Department of Energy Organization Act (Public Law 95-91, August 4, 1977, 91 Stat. 565 at 577-578, 42 U.S.C. 7151, effective October 1, 1977).

(85) "Unrefined and unprocessed ore" means ore in its natural form prior to any processing, such as grinding, roasting, beneficiating, or refining.

(86) "Unrestricted area" (uncontrolled area) means any area access to which is not controlled by the licensee or registrant for purposes of protection of individuals from exposure to radiation and radioactive material, and any area used for residential quarters.

(87) "Waste handling licensees" mean persons licensed to receive and store radioactive wastes prior to disposal and/or persons licensed to dispose of radioactive waste.

(88) "Worker" means an individual engaged in work under a license or registration issued by the department and controlled by a licensee or registrant, but does not include the licensee or registrant. If students of age eighteen years or older are subjected routinely to work involving radiation, then the students are considered to be occupational workers. Individuals of less than eighteen years of age shall meet the requirements of WAC 246-221-050.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-220-010, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-220-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-12-050, filed 12/11/86; 83-19-050 (Order 2026), § 402-12-050, filed 9/16/83. Statutory Authority: Chapter 70.121 RCW. 81-16-031 (Order 1683), § 402-12-050, filed 7/28/81. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-12-050, filed 12/8/80; Order 1095, § 402-12-050, filed 2/6/76; Order 708, § 402-12-050, filed 8/24/72;

Order 1, § 402-12-050, filed 7/2/71; Order 1, § 402-12-050, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-220-050 Exemptions.** (1) The department may, upon application therefor or upon its own initiative, grant such exemptions or exceptions from the requirements of these regulations as it determines are authorized by law and will not result in undue hazard to public health and safety or property.

(2) Any U.S. Department of Energy contractor or subcontractor and any U.S. Nuclear Regulatory Commission contractor or subcontractor of the following categories operating within this state is exempt from these regulations to the extent that such contractor or subcontractor under the applicable contract receives, possesses, uses, transfers or acquires sources of radiation:

(a) Prime contractors performing work for the Department of Energy at U.S. government-owned or controlled sites, including the transportation of sources of radiation to or from such sites and the performance of contract services during temporary interruptions of such transportation;

(b) Prime contractors of the Department of Energy performing research in, or development, manufacture, storage, testing or transportation of, atomic weapons or components thereof;

(c) Prime contractors of the Department of Energy using or operating nuclear reactors or other nuclear devices in a United States government-owned vehicle or vessel; and

(d) Any other prime contractor or subcontractor of the Department of Energy or of the Nuclear Regulatory Commission when the state and the Nuclear Regulatory Commission jointly determine (i) that the exemption of the prime contractor or subcontractor is authorized by law, and (ii) that under the terms of the contract or subcontract, there is adequate assurance that the work thereunder can be accomplished without undue risk to the public health and safety.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-220-050, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-220-050, filed 12/27/90, effective 1/31/91. **WAC 246-220-090 Communications.** All communications and reports concerning these regulations, and applications filed thereunder, should be addressed to the Department of Health, Division of Radiation Protection, Mailstop LE-13, Olympia, Washington 98504. The emergency telephone number in Seattle, is 206-682-5327 or 206 (NUCLEAR).

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-220-090, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-220-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-12-160, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-12-160, filed 12/8/80; Order 1095, § 402-12-160, filed 2/6/76.]

**WAC 246-220-130 Appendix C--The international system of units (SI).** This appendix does not contain any

regulations, but is included for informational purposes only.

The Metric Conversion Act of 1975 (PL 94-168) urges the increasing awareness and use of the International System of Units (SI). This appendix is included to acquaint licensees and/or registrants with selected terms of SI units. Future revisions to chapters 246-220 through 246-255 WAC may use these units.

(1) *Absorbed dose.* The unit of absorbed dose is the gray (Gy) which is equal to 1 joule per kilogram. One rad is equal to  $1 \times 10^{-2}$  gray. A submultiple is the milligray (mGy).

(2) *Dose equivalent.* The unit of dose equivalent is the sievert (Sv) which is equal to 1 joule per kilogram as modified by the quality factor. One rem is equal to  $1 \times 10^{-2}$  sievert. A submultiple is the millisievert (mSv).

(3) *Exposure.* The unit of exposure is the coulombs per kilogram (C/kg). One roentgen is equal to  $2.58 \times 10^{-4}$  coulombs per kilogram of dry air. Multiples of this unit are the millicoulomb per kilogram (mC/kg) and the microcoulomb per kilogram (uC/kg) of dry air at standard temperature and pressure.

(4) *Radioactivity.* The unit of measurement of radioactivity is the becquerel (Bq) and is equal to one transformation per second. One curie is equal to  $3.7 \times 10^{10}$  becquerels. Multiples are megabecquerel (MBq) and gigabecquerel (GBq).

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-220-130, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-220-130, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-12-250, filed 12/8/80.]

**Chapter 246-221 WAC  
RADIATION PROTECTION STANDARDS**

|             |   |
|-------------|---|
| WAC         |   |
| 246-221-001 | Purpose and scope.  |
| 246-221-010 | Radiation dose to individuals in restricted areas.*                                     |
| 246-221-020 | Determination of prior accumulated dose.  |
| 246-221-030 | Requirements for exceeding occupational radiation doses.                                |
| 246-221-040 | Exposure of individuals to concentrations of radioactive materials in restricted areas. |
| 246-221-050 | Exposure of minors.*  |
| 246-221-060 | Permissible levels of radiation from external sources in unrestricted areas.*           |
| 246-221-070 | Concentration in effluents released to unrestricted areas.                              |
| 246-221-080 | Leak tests.   |
| 246-221-110 | Surveys.  |

| 246-221-130 | Exceptions from posting and labeling requirements.                                      |
| 246-221-140 | Instruction of personnel.   |
| 246-221-160 | Procedures for picking up, receiving, and opening packages.                             |
| 246-221-170 | Waste disposal, general requirement.  |
| 246-221-190 | Disposal by release into sanitary sewerage systems.                                     |
| 246-221-200 | Disposal by burial in soil.   |
| 246-221-210 | Disposal by incineration.   |
| 246-221-220 | Disposal of specific wastes.  |
| 246-221-230 | Records of surveys, radiation monitoring, and disposal.                                 |
| 246-221-240 | Reports of theft or loss of radiation sources.  |
| 246-221-250 | Notification of incidents.  |

|             |   |
|-------------|---|
| 246-221-260 | Reports of overexposures and excessive levels and concentrations. |
| 246-221-280 | Notifications and reports to individuals.                         |
| 246-221-300 | Appendix B—Quantities exempt from labeling.                       |

**WAC 246-221-001 Purpose and scope.** This chapter establishes standards for protection against radiation hazards. Except as otherwise specifically provided, this chapter applies to all licensees or registrants. Nothing in this chapter shall be interpreted as limiting the intentional exposure of patients to radiation for the purpose of medical diagnosis or therapy. The definitions contained in WAC 246-220-010 also apply to this chapter. WAC 246-220-007, Statement of philosophy, is directly applicable to this chapter.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-001, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-001, filed 12/27/90, effective 1/31/91; Order 1095, § 402-24-010, filed 2/6/76; Order 1, § 402-24-010, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-010 Radiation dose to individuals in restricted areas.\*** (1) Except as provided in subsection (2) of this section no licensee or registrant shall possess, use, store, receive, or transfer sources of radiation in such a manner as to cause any individual in a restricted area to receive in any period of one calendar quarter from all sources of radiation in the licensee's or registrant's possession a dose in excess of the limits specified in the following table:

|  |                          |
|--|--------------------------|
|  | REM PER CALENDAR QUARTER |
| Whole body; head and trunk; active blood-forming organs; lens of eyes; or gonads . . . . . | 1.25                     |
| Hands and forearms; feet and ankles . . . . .  | 18.75                    |
| Skin of whole body . . . . .   | 7.5                      |

Note: \*For determining the doses specified in this section a dose from x- or gamma rays up to 10 MeV may be assumed to be equivalent to the exposure measured by a properly calibrated appropriate instrument in air at or near the body surface in the region of the highest dose rate.

(2) A licensee or registrant may permit an individual in a restricted area to receive a dose to the whole body greater than that permitted under subsection (1) of this section, provided that:

(a) During any calendar quarter the dose to the whole body from sources of radiation in the licensee's or registrant's possession shall not exceed three rems; and

(b) The dose to the whole body, when added to the accumulated occupational dose to the whole body, shall not exceed 5(N-18) rems when "N" equals the individual's age in years at the individual's last birthday; and

(c) The licensee or registrant has determined the individual's accumulated occupational dose to the whole body on department Form RHF-4 or on a clear and legible record containing all the information required in that form and has otherwise complied with the requirements of WAC 246-221-020. As used in subsection (2) of this section "dose to the whole body" shall be deemed to include any dose to the whole body, gonads, active blood-forming organs, head and trunk, or lens of the eye; and

(d) The licensee or registrant has determined that the predicted dose to the whole body is as low as is reasonably achievable and consistent with the statements in WAC 246-220-007. The licensee or registrant shall perform an evaluation of the expected whole body dose before permitting any individual to receive a whole body dose in excess of the limits specified in subsection (1) of this section.

A written record of the prior evaluation of this exposure shall be retained for inspection by the department.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-010, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-24-020, filed 12/11/86. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-020, filed 12/8/80; Order 1095, § 402-24-020, filed 2/6/76; Order 1, § 402-24-020, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-020 Determination of prior accumulated dose.** Determination of prior dose. Each licensee or registrant shall require any individual, prior to first entry of the individual into the licensee's or registrant's restricted area during each employment or work assignment under such circumstances that the individual will receive or is likely to receive in any period of one calendar quarter an occupational dose in excess of 25 percent of the applicable standards specified in WAC 246-221-010(1) and 246-221-050 to disclose and verify in a written, signed statement, either:

(1) That the individual had no prior occupational dose during the current calendar quarter; or

(2) The nature and amount of any occupational dose which the individual may have received during that specifically identified current calendar quarter from sources of radiation possessed or controlled by other persons. Each licensee shall maintain records of such statements until the department authorizes their disposition.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-020, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-024, filed 12/8/80; Order 1095, § 402-24-024, filed 2/6/76.]

**WAC 246-221-030 Requirements for exceeding occupational radiation doses.** (1) Before permitting, pursuant to WAC 246-221-010(2), any individual in a restricted area to receive an occupational radiation dose in excess of the standards specified in WAC 246-221-010(1) each licensee or registrant shall:

(a) Obtain a certificate on state of Washington occupational external radiation exposure history (Form RHF-4) or on a clear and legible record containing all the information required in that form, signed by the individual, showing each period of time after the individual attained the age of 18 in which the individual received an occupational dose of radiation; and

(b) Calculate on Form RHF-4 in accordance with the instructions appearing therein, or on a clear and legible record containing all the information required in that

form, the previously accumulated occupational dose received by the individual and the additional dose allowed for that individual under WAC 246-221-010(2).

In the preparation of Form RHF-4, or a clear and legible record containing all the information required in that form, the licensee or registrant shall make a reasonable effort to obtain reports of the individual's previously accumulated occupational dose. For each period for which the licensee or registrant obtains such reports, the dose shown in the report shall be used in preparing the form. In any case where a licensee or registrant is unable to obtain reports of the individual's occupational dose for a previous complete calendar quarter, it shall be assumed that the individual has received the occupational dose specified in whichever of the following columns apply:

| Part of Body   | Column 1  | Column 2   |
|--|---|--|
|  | Assumed Dose in Rems for Calendar Quarters Prior to January 1, 1961 | Assumed Dose in Rems for Calendar Quarters Beginning on or After January 1, 1961 |
| Whole body, gonads, active blood-forming organs, head and trunk, lens of eye | 3.75  | 1.25   |

(2) The licensee or registrant shall retain and preserve records used in preparing Form RHF-4 until the department authorizes their disposition. If calculation of the individual's accumulated occupational dose for all periods prior to January 1, 1961, yields a result higher than the applicable accumulated dose value for the individual as of that date, as specified in WAC 246-221-010 (2)(b) the excess may be disregarded.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-030, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-027, filed 12/8/80.]

**WAC 246-221-040 Exposure of individuals to concentrations of radioactive materials in restricted areas.**

(1) Requirements for exposures to individuals.

(a) No licensee shall possess, use, or transfer radioactive material in such a manner as to permit any individual in a restricted area to inhale a quantity of radioactive material in any period of one calendar quarter greater than the quantity which would result from inhalation for 40 hours per week for 13 weeks at uniform concentrations of radioactive material in air specified in WAC 246-221-290, Appendix A, Table I, Column 1<sup>1, 2, 3</sup>. If the radioactive material is of such form that intake by absorption through the skin is likely, individual exposures to radioactive material shall be controlled so that the uptake of radioactive material by any organ from either inhalation or absorption or both routes of intake<sup>4, 5</sup> in any calendar quarter does not exceed that which would result from inhaling such radioactive material for 40 hours per week for 13 weeks at uniform concentrations specified in WAC 246-221-290, Appendix A, Table I, Column 1.

(b) No licensee shall possess, use, or transfer mixtures of U-234, U-235, and U-238 in soluble form in such a

manner as to permit any individual in a restricted area to inhale a quantity of such material in excess of the intake limits specified in Appendix A, Table I, Column 1 of this part. If such soluble uranium is of a form such that absorption through the skin is likely, individual exposures to such material shall be controlled so that the uptake of such material by any organ from either inhalation or absorption or both routes of intake<sup>4</sup> does not exceed that which would result from inhaling such material at the limits specified in WAC 246-221-290, Appendix A, Table I, Column 1 and footnote 4 thereto.

(c) For purposes of determining compliance with the requirements of this section the licensee shall use suitable measurements of concentrations of radioactive materials in air for detecting and evaluating airborne radioactivity in restricted areas and in addition, as appropriate, shall use measurements of radioactivity in the body, measurements of radioactivity excreted from the body, or any combination of such measurements as may be necessary for timely detection and assessment of individual intakes of radioactivity by exposed individuals. It is assumed that an individual inhales radioactive material at the airborne concentration in which he or she is present unless he or she uses respiratory protective equipment pursuant to this section. When assessment of a particular individual's intake of radioactive material is necessary, intakes less than those which would result from inhalation for 2 hours in any one day or for 10 hours in any one week at uniform concentrations specified in Appendix A, Table I, Column 1 need not be included in such assessment, provided that for any assessment in excess of these amounts the entire amount is included.

(2) (a) The licensee shall, as a precautionary procedure, use process or other engineering controls, to the extent practicable, to limit concentrations of radioactive materials in air to levels below those which delimit an airborne radioactivity area as defined in WAC 246-220-010.

(b) When it is impracticable to apply process or other engineering controls to limit concentrations of radioactive material in air below those defined in WAC 246-220-010, other precautionary procedures, such as increased surveillance, limitation of working times, or provision of respiratory protective equipment, shall be used to maintain intake of radioactive material by any individual within any period of seven consecutive days as far below that intake of radioactive material which would result from inhalation of such material for 40 hours at the uniform concentrations specified in Appendix A, Table I, Column 1 as is reasonably achievable. Whenever the intake of radioactive material by any individual exceeds this 40-hour control measure, the licensee shall make such evaluations and take such actions as are necessary to assure against recurrence. The licensee shall maintain records of such occurrences, evaluations, and actions taken in a clear and readily identifiable form suitable for summary review and evaluation.

(3) When respiratory protective equipment is used to limit the inhalation of airborne radioactive material pursuant to subsection (2)(b) of this section, the licensee

may make allowance for such use in estimating exposures of individuals to such materials provided that such equipment is used as stipulated in Regulatory Guide 8.15, "Acceptable Programs for Respiratory Protection."<sup>6</sup>

(4) Notwithstanding the provisions of subsections (2) and (3) of this section, the department may impose further restrictions:

(a) On the extent to which a licensee may make allowance for use of respirators in lieu of provision of process, containment, ventilation, or other engineering controls, if application of such controls is found to be practicable; and

(b) As might be necessary to assure that the respiratory protective program of the licensee is adequate in limiting exposures of personnel to airborne radioactive materials.

(5) The licensee shall notify, in writing, the department at least 30 days before the date that respiratory protective equipment is first used under the provisions of this section.

Notes: <sup>1</sup>Since the concentration specified for tritium oxide vapor assumes equal intakes by skin absorption and inhalation, the total intake permitted is twice that which would result from inhalation alone at the concentration specified in H-3(s) in Appendix A, Table I, Column 1 for 40 hours per week for 13 weeks.

<sup>2</sup>For radioactive materials designated "sub" in the "isotope" column of the table, the concentration value specified is based upon exposure to the material as an external radiation source. Individual exposures to these materials may be accounted for as part of the limitation on individual dose in WAC 246-221-010. These materials shall be subject to the precautionary procedures required by subsection (2)(a) of this section.

<sup>3</sup>Multiply the concentration values specified in Appendix A, Table I, Column 1 by  $6.3 \times 10^8$  ml to obtain the quarterly quantity limit. Multiply the concentration value specified in Appendix A, Table I, Column 1 of this part by  $2.5 \times 10^9$  ml to obtain the annual quantity limit for Rn-222.

<sup>4</sup>Significant intake by ingestion or injection is presumed to occur only as a result of circumstances such as accident, inadvertence, poor procedure, or similar special conditions. Such intakes must be evaluated and accounted for by techniques and procedures as may be appropriate to the circumstances for the occurrence. Exposures so evaluated shall be included in determining whether the limitation on individual exposures in subsection (1)(a) of this section has been exceeded.

<sup>5</sup>Regulatory guidance on assessment of individual intakes of radioactive material is given in Regulatory Guide 8.9, "Acceptable Concepts, Models, Equations and Assumptions for a Bioassay Program," single copies of which are available from the Office of Standards Development, United States Nuclear Regulatory Commission, Washington, D.C. 20555, upon written request.

<sup>6</sup>Single copies of Regulatory Guide 8.15 are available from the Office of Standards Development, United States Nuclear Regulatory Commission, Washington, D.C. 20555, upon written request.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-040, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-030, filed 12/8/80; Order 1095, § 402-24-030, filed 2/6/76; Order 1, § 402-24-030, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-050 Exposure of minors.\*** (1) No licensee or registrant shall possess, use, or transfer sources of radiation in such a manner as to cause any individual within a restricted area, who is under 18 years of age, to receive in any period of one calendar quarter from all sources of radiation in such licensee's or registrant's possession a dose in excess of 10 percent of the limits specified in the table in WAC 246-221-010(1).

(2) No licensee shall possess, use, or transfer radioactive material in such a manner as to cause any individual within a restricted area, who is under 18 years of age, to be exposed to airborne radioactive material in an average concentration in excess of the limits specified in WAC 246-221-290, Appendix A, Table II, of this chapter. For purposes of this paragraph, concentrations may be averaged over periods not greater than a week.

(3) The provisions of WAC 246-221-040 (2)(b) and (3) shall apply to exposures subject to subsection (2) of this section except that the references in WAC 246-221-040 (2)(b) and (3) to Appendix A, Table I, Column 1 shall be deemed to be referenced to Appendix A, Table II, Column 1.

Note: \*For determining the doses specified in this section, a dose from x- or gamma rays up to 10 MeV may be assumed to be equivalent to the exposure measured by a properly calibrated appropriate instrument in air at or near the body surface in the region of the highest dose rate.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-050, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-24-040, filed 12/11/86. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-040, filed 12/8/80; Order 1095, § 402-24-040, filed 2/6/76; Order 1, § 402-24-040, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-060 Permissible levels of radiation from external sources in unrestricted areas.\***

Note: \*It is the intent of this section to limit radiation levels so that it is unlikely that individuals in unrestricted areas would receive a dose to the whole body in excess of 0.5 rem in any calendar year. If in specific instances, it is determined by the department that this intent is not met, the department may, pursuant to WAC 246-220-100, impose such additional requirements on the licensee or registrant as may be necessary to meet the intent.

(1) Except as authorized by the department pursuant to subsection (2) of this section, no licensee or registrant shall possess, use, or transfer sources of radiation in such a manner as to create in any unrestricted area from such sources of radiation in that person's possession:

(a) Radiation levels which, if an individual were continuously present in the area, could result in the individual's receiving a dose in excess of two millirems in any one hour; or

(b) Radiation levels which, if an individual were continuously present in the area, could result in the individual's receiving a dose in excess of one hundred millirems in any seven consecutive days.

(2) Any person may apply to the department for proposed limits upon levels of radiation in unrestricted areas in excess of those specified in subsection (1) of this section resulting from the applicant's possession or use of sources of radiation. Such applications should include

information as to anticipated average radiation levels and anticipated occupancy times for each unrestricted area involved. The department may approve the proposed limits if the applicant demonstrates to the satisfaction of the department that the proposed limits are not likely to cause any individual to receive a dose to the whole body in any period of one calendar year in excess of 0.5 rem and that the proposed limits are consistent with WAC 246-220-007.

(3) In addition to other requirements of this part, licensees engaged in uranium fuel cycle operations subject to the provisions of 40 CFR Part 190, "Environmental Radiation Protection Standards for Nuclear Power Operation," shall comply with that part.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-060, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-24-040, filed 12/11/86. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-040, filed 12/8/80; Order 1095, § 402-24-040, filed 2/6/76; Order 1, § 402-24-040, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-070 Concentration in effluents released to unrestricted areas.** (1) A licensee shall not possess, use, or transfer licensed material so as to release to an unrestricted area radioactive material in concentrations which exceed the limits specified in WAC 246-221-290, Appendix A, Table II, except as authorized pursuant to subsection (2) of this section. For purposes of this section concentrations may be averaged over a period not greater than one calendar year.

(2) An application for a license or amendment may include proposed limits higher than those specified in subsection (1) of this section. The department will approve the proposed limits if the applicant demonstrates:

(a) That the applicant has made a reasonable effort to minimize the radioactivity contained in effluents released to unrestricted areas; and

(b) That it is not likely that radioactive material discharged in the effluent would result in the exposure of an individual to concentrations of radioactive material in air or water exceeding the limits specified in WAC 246-221-290, Appendix A, Table II.

(3) An application for higher limits pursuant to subsection (2) of this section shall include information demonstrating that the applicant has made a reasonable effort to minimize the radioactivity discharged in effluents to unrestricted areas, and shall include, as pertinent:

(a) Information as to flow rates, total volume of effluent, peak concentration of each radionuclide in the effluent, and concentration of each radionuclide in the effluent averaged over a period of one calendar year at the point where the effluent leaves a stack, tube, pipe, or similar conduit;

(b) A description of the properties of the effluents, including:

(i) Chemical composition,

(ii) Physical characteristics, including suspended solids content in liquid effluents, and nature of gas or aerosol for air effluents,

(iii) The hydrogen ion concentrations (pH) of liquid effluents, and

(iv) The size range of particulates in effluents released into air;

(c) A description of the anticipated human occupancy in the unrestricted area where the highest concentration of radioactive material from the effluent is expected, and, in the case of a river or stream, a description of water uses downstream from the point of release of the effluent;

(d) Information as to the highest concentration of each radionuclide in an unrestricted area, including anticipated concentrations averaged over a period of one calendar year:

(i) In air at any point of human occupancy, or

(ii) In water at points of use downstream from the point of release of the effluent;

(e) The background concentration of radionuclides in the receiving river or stream prior to the release of liquid effluent;

(f) A description of the environmental monitoring equipment, including sensitivity of the system, and procedures and calculations to determine concentrations of radionuclides in the unrestricted area and possible reconcentrations of radionuclides; and

(g) A description of the waste treatment facilities and procedures used to reduce the concentration of radionuclides in effluents prior to their release.

(4) For the purposes of this section, the concentration limits in WAC 246-221-290, Appendix A, Table II of this part shall apply at the boundary of the restricted area. The concentration of radioactive material discharged through a stack, pipe or similar conduit may be determined with respect to the point where the material leaves the conduit. If the conduit discharges within the restricted area, the concentration at the boundary may be determined by applying appropriate factors for dilution, dispersion, or decay between the point of discharge and the boundary.

(5) In addition to limiting concentrations in effluent streams, the department may limit quantities of radioactive material released in air or water during a specified period of time if it appears that the daily intake of radioactive material from air, water, or food by a suitable sample of an exposed population group, averaged over a period not exceeding one calendar year, would otherwise exceed the daily intake resulting from continuous exposure to air or water containing one-third the concentration of radioactive material specified in WAC 246-221-290, Appendix A, Table II.

(6) In addition to the limits set in subsection (1) of this section all radioactive emissions to the atmosphere must meet the requirements of chapter 246-247 WAC.

(7) The provisions of this section do not apply to disposal of radioactive material into sanitary sewerage systems, which is governed by WAC 246-221-190.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-070, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-070, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-24-050, filed

12/11/86; Order 1095, § 402-24-050, filed 2/6/76; Order 1, § 402-24-050, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-080 Leak tests.** (1) Each sealed radioactive source possessed under the provisions of a specific license, other than hydrogen-3 (tritium), with a half-life greater than thirty days and in any form other than gas, shall be tested and results obtained for leakage and/or contamination prior to initial use and at six-month intervals or as specified by the license. If there is reason to suspect that a sealed source might have been damaged, it shall be tested for leakage and results obtained before further use.

(2) Leak tests shall be capable of detecting the presence of 0.005 microcurie of removable contamination. The results of leak tests made pursuant to subsection (1) of this section shall be recorded in units of microcuries and shall be maintained for inspection by the department. Any test conducted pursuant to subsection (1) which reveals the presence of 0.005 microcurie or more of removable contamination shall be considered evidence that the sealed source is leaking. The licensee shall immediately withdraw the source from use and shall cause it to be decontaminated and repaired or to be disposed in accordance with WAC 246-232-080. If a sealed source shows evidence of leaking, a report shall be filed with the department within five days of the test, describing the equipment involved, the test results, and the corrective action taken. Where sealed sources are permanently mounted in devices or equipment, tests for contamination and leakage may be made by wiping appropriate accessible surfaces and measuring these wipes for transferred contamination.

(3) Leak tests are required for sealed radioactive sources that are greater than 100 microcuries for beta and gamma emitters and greater than 10 microcuries for alpha emitters.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-080, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-24-060, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-060, filed 12/8/80; Order 1095, § 402-24-060, filed 2/6/76; Order 1, § 402-24-060, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-110 Surveys.** Each licensee or registrant shall make or cause to be made such surveys, as defined in WAC 246-220-010, as may be necessary for the licensee or registrant to establish compliance with these regulations and are reasonable under the circumstances to evaluate the extent of radiation hazards that may be present. Records of such surveys shall be preserved as specified in WAC 246-221-230. Information on performing surveys may be found in the United States Nuclear Regulatory Commission's Regulatory Guide 8.23.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-110, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-110, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-24-085, filed 12/11/86; 83-19-050 (Order 2026), § 402-24-085, filed 9/16/83.

Statutory Authority: RCW 70.98.050, 81-01-011 (Order 1570), § 402-24-085, filed 12/8/80; Order 1095, § 402-24-085, filed 2/6/76.]

**WAC 246-221-120 Caution signs, labels, and signals. (1) General.**

(a) Except as otherwise authorized by the department, symbols prescribed by this section shall use the conventional radiation caution colors (magenta or purple on yellow background). The symbol prescribed by this section is the conventional three-blade design: Radiation symbol

- (i) Cross-hatch area is to be magenta or purple.
- (ii) Background is to be yellow.

(b) The conventional radiation symbol as described in (a) of this subsection shall be used only for:

(i) Instructing individuals to be cognizant of a potential radiation hazard as prescribed in (c) through (j) of this subsection.

(ii) Indicating that information presented pertains to the topic of radiation.

(c) In addition to the contents of signs and labels prescribed in this section, a licensee or registrant may provide on or near such signs and labels any additional

information which may be appropriate in aiding individuals to minimize exposure to radiation.

(d) Each radiation area and entrance thereto shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: CAUTION\* - RADIATION AREA. However, in an exceptionally large room where other activities of a nonradiological nature are conducted the entrance need not be posted provided a conspicuous barricade with an appropriate number of signs is established to delineate the radiation area.

Note: \*The word "DANGER" may be substituted for "CAUTION" on signs required by (d) through (h) of this subsection.

**(e) High radiation areas.**

(i) Each high radiation area and all entrances thereto shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: CAUTION\* - HIGH RADIATION AREA.

(ii) Each entrance or access point to a high radiation area shall be:

(A) Equipped with a control device which shall cause the level of radiation to be reduced below that at which an individual might receive a dose of one hundred millirems in one hour upon entry into the area; or

(B) Equipped with a control device which shall energize a conspicuous visible or audible alarm signal in such a manner that the individual entering the high radiation area and the licensee or a supervisor of the activity are made aware of the entry; or

(C) Maintained locked except during periods when access to the area is required, with positive control over each individual entry.

(iii) The controls required by (e)(ii) of this subsection shall be established in such a way that no individual will be prevented from leaving a high radiation area.

(iv) In the case of a high radiation area established for a period of thirty days or less, direct surveillance to prevent unauthorized entry may be substituted for the controls required by (e)(ii) of this subsection. Direct surveillance requires the continuous physical presence of an individual capable of taking all necessary precautions to prevent unwarranted exposure of individuals.

(v) Any licensee or registrant may apply to the department for approval of methods not included in (e)(ii) and (iv) of this subsection for controlling access to high radiation areas. The department will approve the proposed alternatives if the licensee or registrant demonstrates that the alternative methods of control will prevent unauthorized entry into a high radiation area, and that the requirement of (e)(ii) of this subsection is met.

**(vi) Very high radiation areas:**

(A) Each area in which there may exist radiation levels in excess of five hundred rems in one hour at one meter from a sealed radioactive source<sup>7</sup> that is used to irradiate materials shall:

(I) Have each entrance or access point equipped with entry control devices which shall function automatically to prevent any individual from inadvertently entering the area when such radiation levels exist; permit deliberate entry into the area only after a control device is actuated

that shall cause the radiation level within the area, from the sealed source, to be reduced below that at which it would be impossible for an individual to receive a dose in excess of one hundred mrem in one hour; and prevent operation of the source if the source would produce radiation levels in the area that could result in a dose to an individual in excess of one hundred mrem in one hour. The entry control devices required by (e)(vi)(A) of this subsection shall be established in such a way that no individual will be prevented from leaving the area.

(II) Be equipped with additional control devices such that upon failure of the entry control devices to function as required by (e)(vi)(A)(I) of this subsection the radiation level within the area, from the sealed source, shall be reduced below that at which it would be possible for an individual to receive a dose in excess of one hundred mrem in one hour; and visible and audible alarm signals shall be generated to make an individual attempting to enter the area aware of the hazard and the licensee or at least one other individual who is familiar with the activity and prepared to render or summon assistance, aware of such failure of the entry control devices;

(III) Be equipped with control devices such that upon failure or removal of physical radiation barriers other than the source's shielded storage container the radiation level from the source shall be reduced below that at which it would be possible for an individual to receive a dose in excess of one hundred mrem in one hour; and visible and audible alarm signals shall be generated to make potentially affected individuals aware of the hazard and the licensee or at least one other individual, who is familiar with the activity and prepared to render or summon assistance, aware of the failure or removal of the physical barrier. When the shield for the stored source is a liquid, means shall be provided to monitor the integrity of the shield and to signal, automatically, loss of adequate shielding. Physical radiation barriers that comprise permanent structural components, such as walls, that have no credible probability of failure or removal in ordinary circumstances need not meet the requirements of (e)(vi)(A)(III) of this subsection;

(IV) Be equipped with devices that will automatically generate visible and audible alarm signals to alert personnel in the area before the source can be put into operation and in sufficient time for any individual in the area to operate a clearly identified control device which shall be installed in the area and which can prevent the source from being put into operation;

(V) Be controlled by use of such administrative procedure and such devices as are necessary to assure that the area is cleared of personnel prior to each use of the source preceding which use it might have been possible for an individual to have entered the area;

(VI) Be checked by a physical radiation measurement to assure that prior to the first individual's entry into the area after any use of the source, the radiation level from the source in the area is below that at which it would be possible for an individual to receive a dose in excess of one hundred mrem in one hour;

(VII) Have entry control devices required in (e)(vi)(A)(I) of this subsection which have been tested

for proper functioning prior to initial operation with such source of radiation on any day that operations are not uninterruptedly continued from the previous day or before resuming operations after any unintended interruption, and for which records are kept of the dates, times, and results of such tests of function. No operations other than those necessary to place the source in safe condition or to effect repairs on controls shall be conducted with such source unless control devices are functioning properly. The licensee shall submit an acceptable schedule for more complete periodic tests of the entry control and warning systems to be established and adhered to as a condition of the license;

(VIII) Have those entry and exit portals that are used in transporting materials to and from the irradiation area, and that are not intended for use by individuals, controlled by such devices and administrative procedures as are necessary to physically protect and warn against inadvertent entry by any individual through such portals. Exit portals for processed materials shall be equipped to detect and signal the presence of loose radiation sources that are carried toward such an exit and to automatically prevent such loose sources from being carried out of the area.

(B) Licensees with, or applicants for, licenses for radiation sources that are within the purview of (e)(vi)(A) of this subsection, and that must be used in a variety of positions or in peculiar locations, such as open fields or forests, that make it impracticable to comply with certain requirements of (e)(vi)(A) of this subsection, such as those for the automatic control of radiation levels, may apply to the department for approval, prior to use of safety measures that are alternative to those specified in (e)(vi)(C) of this subsection, and that will provide at least an equivalent degree of personnel protection in the use of such sources. At least one of the alternative measures must include an entry-preventing interlock control based on a physical measurement of radiation that assures the absence of high radiation levels before an individual can gain access to an area where such sources are used.

(f) *Airborne radioactivity areas.* Each airborne radioactivity area shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: CAUTION\* - AIRBORNE RADIOACTIVITY AREA.

(g) *Additional requirements.*

(i) Each area or room in which any radioactive material, other than natural uranium or thorium, is used or stored in an amount exceeding 10 times the quantity of radioactive material specified in Appendix B of this part shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: CAUTION\* - RADIOACTIVE MATERIAL.

(ii) Each area or room in which natural uranium or thorium is used or stored in an amount exceeding one hundred times the quantity specified in Appendix B of this part shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: CAUTION\* - RADIOACTIVE MATERIAL.

(h) *Containers and articles.*

(i) Except as provided in this section, each container of radioactive material shall bear a durable, clearly visible label identifying the radioactive contents.

(ii) A label required pursuant to (h)(i) of this subsection shall bear the radiation caution symbol and the words: CAUTION\* - RADIOACTIVE MATERIAL. It shall also provide sufficient information to permit individuals handling or using the containers, or working in the vicinity thereof, to take precautions to avoid or minimize exposures.

As appropriate, the information will include radiation levels, kinds of material, estimate of activity, date for which activity is estimated.

(i) Where containers are used for storage, the labels required in this subdivision shall state also the quantities and kinds of radioactive materials in the containers and the date of measurement of the quantities.

(j) All radiation machines shall be labeled in a manner which cautions individuals that radiation is produced when the machine is being operated.

**(2) Notwithstanding the provisions of subsection (1)(h), (i) of this section labeling is not required:**

(a) For laboratory containers, such as beakers, flasks, and test tubes, used transiently in laboratory procedures when the person using such containers is present. For such containers a label identifying the radioactive contents is not required.

(b) For containers that do not contain radioactive material in quantities greater than the applicable quantities listed in WAC 246-221-300, Appendix B.

(c) For containers containing only natural uranium or thorium in quantities no greater than ten times the applicable quantities listed in WAC 246-221-300, Appendix B.

(d) For containers that do not contain radioactive material in concentrations greater than the applicable concentrations listed in WAC 246-221-290, Column 2, Table I, Appendix A.

(e) For containers when they are attended by an individual who takes the precautions necessary to prevent the exposure of any individual to radiation or radioactive material in excess of the limits established by the regulations in this part;

(f) For containers when they are in transport and packaged and labeled in accordance with regulations published by the United States Department of Transportation;

(g) For containers which are accessible only to individuals authorized to handle or use them\* or to work in the vicinity thereof, provided that the contents are identified to such individuals by a readily available written record;

Note: \*For example, containers in locations such as water-filled canals, storage vaults, or hot cells.

(h) For manufacturing and process equipment such as piping and tanks.

(3) Each licensee, prior to disposal of an empty container which previously held radioactive material shall properly survey for contamination and remove or deface

the radioactive material label or otherwise clearly indicate that the container no longer contains radioactive materials.

<sup>7</sup>This paragraph does not apply to radioactive sources that are used in teletherapy, in radiography, or in completely self-shielded irradiators in which the source is both stored and operated within the same shielding radiation barrier and, in the designed configuration of the irradiator, is always physically inaccessible to any individual and cannot create high levels of radiation in an area that is accessible to any individual. This paragraph also does not apply to sources from which the radiation is incidental to some other use nor to nuclear reactor generated radiation other than radiation from byproduct, source, or special nuclear materials that are used in sealed sources in nonself-shielded irradiators.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-15-112 (Order 184), § 246-221-120, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as 246-221-120, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-24-090, filed 12/11/86. Statutory Authority: RCW 70.98.050, 81-01-011 (Order 1570), § 402-24-090, filed 12/8/80; Order 1095, § 402-24-090, filed 2/6/76; Order 1, § 402-24-090, filed 1/8/69; Rules (part), filed 10/26/66.]

**Reviser's note:** RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules, and deems ineffectual changes not filed by the agency in this manner. The bracketed material in the above section does not appear to conform to the statutory requirement.

**WAC 246-221-130 Exceptions from posting and labeling requirements.** (1) A room or area is not required to be posted with a caution sign because of the presence of a sealed source, provided the radiation level 30.5 centimeters from the surface of the source container or housing does not exceed five millirem per hour.

(2) Rooms or other areas in hospitals are not required to be posted with caution signs, and control of entrance or access thereto pursuant to WAC 246-221-120 (1)(c) is not required, because of the presence of patients containing less than 30 millicuries of radioactive material provided that there are personnel in attendance who will take the precautions necessary to prevent the exposure of any individual to radiation or radioactive material in excess of the limits established in the regulations in this chapter.

(3) Caution signs are not required to be posted in areas or rooms containing radioactive material for periods of less than eight hours provided that:

(a) The material is constantly attended during such periods by an individual who shall take the precautions necessary to prevent the exposure of any individual to radiation or radioactive material in excess of the limits established in this part; and

(b) Such area or room is subject to the licensee's or registrant's control.

(4) A room or other area is not required to be posted with a caution sign, and control is not required for each entrance or access point to a room or other area which is used solely for the storage of radioactive material prepared for transport and packaged and labeled in accordance with regulations of the United States Department of Transportation.

(5) Rooms with x-ray equipment may not be required to be posted with caution signs provided that access is controlled.

(6) The interior of a teletherapy room is not required to be posted with caution signs provided such posting is conspicuously placed at the entrance(s) to the rooms.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-130, filed 7/24/91, effective 8/24/91. **WAC 246-221-140 Instruction of personnel.** Instructions required for individuals working in or frequenting any portion of a restricted area are specified in WAC 246-222-020, 246-222-030, and 246-222-040.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-140, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-140, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-24-110, filed 9/16/83; Order 1095, § 402-24-110, filed 2/6/76; Order 708, § 402-24-110, filed 8/24/72; Order 1, § 402-24-110, filed 7/2/71; Order 1, § 402-24-110, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-160 Procedures for picking up, receiving, and opening packages.** (1)(a) Each licensee or registrant who expects to receive a package containing quantities of radioactive material in excess of the Type A<sub>1</sub> or A<sub>2</sub> quantities specified in WAC 246-220-110 shall:

(i) If the package is to be delivered to the licensee's or registrant's facility by the carrier, make arrangements to receive the package when it is offered for delivery by the carrier; or

(ii) If the package is to be picked up by the licensee or registrant at the carrier's terminal, make arrangements to receive immediate notification from the carrier of the arrival of the package.

(b) Each licensee or registrant who picks up a package of radioactive material from a carrier's terminal shall pick up the package expeditiously upon receipt of notification from the carrier of its arrival.

(2)(a) Each licensee or registrant, upon receipt of a package of radioactive material, shall monitor the external surfaces of the package for radioactive contamination caused by leakage of the radioactive contents, except:

(i) Packages containing less than one hundred times the quantity of nuclide(s) specified in WAC 246-232-120, Schedule B;

(ii) Packages containing no more than 10 millicuries of radioactive material consisting solely of tritium, carbon-14, sulfur-35, or iodine-125;

(iii) Packages containing only radioactive material as gases or in special form;

(iv) Packages containing only radioactive material in other than liquid form (including Mo-99/Tc-99m generators) and not exceeding the Type A<sub>1</sub> or A<sub>2</sub> quantity limit specified in WAC 246-220-110; and

(v) Packages containing only radionuclides with half-lives of less than 30 days and a total quantity of no more than 100 millicuries.

The monitoring shall be performed as soon as practicable after receipt, but no later than three hours after the package is received at the licensee's facility if received during the licensee's normal working hours, or no later than three hours from the beginning of the next working day if received after normal working hours.

(b) If removable radioactive contamination in excess of 0.01 microcurie (22,200 transformations per minute) per one hundred square centimeters of package surface is found on the external surfaces of the package, the licensee shall immediately notify by telephone, telegraph, mailgram or facsimile, the final delivering carrier, shipper and the department.

(3)(a) Each licensee or registrant, upon receipt of a package containing quantities of radioactive material in excess of the Type A<sub>1</sub> or A<sub>2</sub> quantities specified in WAC 246-220-110, other than those transported by exclusive use vehicle, shall monitor the radiation levels external to the package. The package shall be monitored as soon as practicable after receipt, but no later than three hours after the package is received at the licensee's facility if received during the licensee's normal working hours, and no later than three hours from the beginning of the next working day if received after normal working hours.

(b) If radiation levels are found on the external surface of the package in excess of two hundred millirem per hour, or at one meter from the external surface of the package in excess of ten millirem per hour, the licensee or registrant shall immediately notify, by telephone, telegraph, mailgram or facsimile, the shipper, the final delivering carrier and the department.

(4) Each licensee or registrant shall establish and maintain procedures for safely opening packages in which radioactive material is received, and shall assure that such procedures are followed and that due consideration is given to instructions for the type of package being opened and the monitoring of potentially contaminated packaging material (including packages containing radioactive material in gaseous form) to assure that only background levels of radiation are present prior to disposal of such material as nonradioactive waste. In addition, this shall include a wipe sample of the outside of any inner package which contains a liquid or dispersible radionuclide (radioactive wastes shall be exempted). Copies of such written procedures shall be retained for inspection by the department.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-160, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-160, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-24-125, filed 12/11/86; 83-19-050 (Order 2026), § 402-24-125, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-125, filed 12/8/80; Order 1095, § 402-24-125, filed 2/6/76.]

**WAC 246-221-170 Waste disposal, general requirement.** No licensee shall dispose of any radioactive material except:

(1) By transfer to an authorized recipient as provided in WAC 246-232-080, or

(2) As authorized pursuant to WAC 246-221-070, 246-221-180, 246-221-190, or 246-221-200.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-170, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-170, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-130, filed 12/8/80; Order 1095, § 402-24-130, filed 2/6/76; Order 1, § 402-24-130, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-190 Disposal by release into sanitary sewerage systems.** No licensee shall discharge radioactive material into a sanitary sewerage system unless:

(1) It is readily soluble or dispersible in water;  
 (2) The quantity of any radioactive material released into the system by the licensee in any one day does not exceed the larger of:

(a) The quantity which, if diluted by the average daily quantity of sewage released into the sewer by the licensee, will result in an average concentration not greater than the limits specified in WAC 246-221-290, Appendix A, Table I, Column 2; or

(b) Ten times the quantity of such material specified in WAC 246-221-300, Appendix B of this part;

(3) The quantity of any radioactive material released in any one month, if diluted by the average monthly quantity of water released by the licensee, will not result in an average concentration exceeding the limits specified in WAC 246-221-290, Appendix A, Table I, Column 2; and

(4) The gross quantity of all radioactive material except hydrogen-3 and carbon-14 released into the sewerage system by the licensee does not exceed one curie (1Ci) per year. The amount released into the sewerage system for hydrogen-3 shall not exceed 5 curies per year and for carbon-14 shall not exceed 1 curie per year.

Excreta from individuals undergoing medical diagnosis or therapy with radioactive material shall be exempt from any limitations contained in this section: *Provided*, That the licensee provides for appropriate radiological monitoring whenever any waste line in the licensee's installation which may carry such excreta is opened.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-190, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-190, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-24-140, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-140, filed 12/8/80; Order 1095, § 402-24-140, filed 2/6/76; Order 1, § 402-24-140, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-200 Disposal by burial in soil.** No licensee shall dispose of radioactive material by burial in soil except as specifically approved by the department pursuant to WAC 246-221-180.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-200, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-200, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-150, filed 12/8/80; Order 1095, § 402-24-150, filed 2/6/76; Order 1, § 402-24-150, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-210 Disposal by incineration.** No licensee shall incinerate radioactive material for the purpose of disposal or preparation for disposal except as specifically approved by the department pursuant to WAC 246-221-070 and 246-221-180.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-210, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-210, filed 12/27/90, effective 1/31/91; Order 1095, § 402-24-160, filed 2/6/76; Order 1, § 402-24-160, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-220 Disposal of specific wastes.** Any licensee may dispose of the following licensed material without regard to its radioactivity:

(1) 0.05 microcuries or less of hydrogen-3 or carbon-14, per gram of medium, used for liquid scintillation counting; and

(2) 0.05 microcuries or less of hydrogen-3 or carbon-14, per gram of animal tissue averaged over the weight of the entire animal: *Provided however*, Tissue may not be disposed under this section in a manner that would permit its use either as food for humans or as animal feed; and

(3) Nothing in this section, however, relieves the licensee of maintaining records showing the receipt, transfer and disposal of such byproduct material as specified in WAC 246-220-020; and

(4) Nothing in this section relieves the licensee from complying with other applicable federal, state and local regulations governing any other toxic or hazardous property of these materials.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-220, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-220, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-24-165, filed 9/16/83.]

**WAC 246-221-230 Records of surveys, radiation monitoring, and disposal.** (1) Each licensee or registrant shall maintain records showing the radiation exposures of all individuals for whom personnel monitoring is required under WAC 246-221-090. Such records shall be kept on state of Washington current occupational external radiation exposure (Form RHF-5), in accordance with the instructions contained in that form, or on clear and legible records containing all the information required by Form RHF-5. The doses entered on the forms or records shall be for periods of time not exceeding one calendar quarter.

(2) Each licensee or registrant shall maintain records in the same units used in this part, showing the results of surveys required by WAC 246-221-110 monitoring required by WAC 246-221-160, and disposals made under WAC 246-221-180, 246-221-190, 246-221-200, 246-221-210, and 246-221-220.

(3)(a) Records of individual exposure to radiation and to radioactive material which must be maintained pursuant to the provisions of subsection (1) of this section and records of bioassays, including results of whole body counting examinations made pursuant to WAC 246-

221-100, shall be preserved indefinitely or until the department authorizes their disposal.

(b) Records of the results of surveys and monitoring which must be maintained pursuant to subsection (2) of this section shall be preserved for two years after completion of the survey except that the following records shall be maintained until the department authorizes their disposition:

(i) Records of the results of surveys to determine compliance with WAC 246-221-040;

(ii) In the absence of personnel monitoring data, records of the results of surveys to determine external radiation dose;

(iii) Records of the results of surveys used to evaluate the release of radioactive effluents to the environment.

(4) Records of disposal of licensed material made pursuant to WAC 246-221-180, 246-221-190, 246-221-200, 246-221-210, or 246-221-220 shall be maintained until the department authorizes their disposition.

(5) Records which must be maintained pursuant to this part may be the original or a reproduced copy or microform if such reproduced copy or microform is duly authenticated by authorized personnel and the microform is capable of producing a clear and legible copy after storage for the period specified by department regulations.

(6) If there is a conflict between the department's regulations in this part, license condition, or other written department approval or authorization pertaining to the retention period for the same type of record, the retention period specified in the regulations in this part for such records shall apply unless the department, pursuant to WAC 246-220-050, has granted a specific exemption from the record retention requirements specified in the regulations in this part.

(7) The discontinuance or curtailment of activities does not relieve the licensee or registrant of responsibility for retaining all records required by this section. A licensee or registrant may, however, request the department to accept such records. The acceptance of the records by the department relieves the licensee or registrant of subsequent responsibility only in respect to their preservation as required in this section.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-230, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-230, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-24-170, filed 12/11/86; 83-19-050 (Order 2026), § 402-24-170, filed 9/16/83. **WAC 246-221-240 Reports of theft or loss of radiation sources.** Each licensee and/or registrant shall report immediately by telephone, 206/682-5327) and confirm promptly by letter to the State Department of Health, Division of Radiation Protection, Mailstop LE-13, Olympia, Washington 98504, the actual or attempted theft or loss as soon as such theft or loss becomes known to the licensee and/or registrant of:

(1) Any radiation-producing machine; or

(2) Any quantity of radioactive material in excess of a quantity exempted under WAC 246-221-300, Appendix B, or any item not exempted in chapter 246-232 WAC.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-240, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-240, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-24-180, filed 12/11/86; 83-19-050 (Order 2026), § 402-24-180, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-180, filed 12/8/80; Order 1095, § 402-24-180, filed 2/6/76; Order 708, § 402-24-180, filed 8/24/72; Order 1, § 402-24-180, filed 7/2/71; Order 1, § 402-24-180, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-250 Notification of incidents. (1) Immediate notification.** Each licensee and/or registrant shall immediately notify the State Department of Health, Division of Radiation Protection, Mailstop LE-13, Olympia, Washington 98504, by telephone 206/682-5327) and confirming letter of any incident involving any radiation source which may have caused or threatens to cause:

(a) A dose to the whole body of any individual, or any dosimetry device assigned to any individual, of twenty-five rems or more of radiation; a dose to the skin of the whole body of any individual or any dosimetry device assigned to any individual of one hundred fifty rems or more of radiation; or a dose to the feet, ankles, hands, or forearms of any individual, or any dosimetry device assigned to any individual, of three hundred seventy-five rems or more of radiation; or

(b) The release of radioactive material in concentrations which, if averaged over a period of twenty-four hours, would exceed five thousand times the limits specified for such materials in WAC 246-221-290, Appendix A, Table II.

(2) **Twenty-four hour notification.** Each licensee and/or registrant shall within twenty-four hours notify the State Department of Health, Division of Radiation Protection, Mailstop LE-13, Olympia, Washington 98504, by telephone 206/682-5327) and confirming letter of any incident involving any radiation source possessed which may have caused or threatens to cause:

(a) A dose to the whole body of any individual, or any dosimetry device assigned to any individual, of five rems or more of radiation; a dose to the skin of the whole body of any individual or any dosimetry device assigned to any individual of thirty rems or more of radiation; or a dose to the feet, ankles, hands, or forearms or any dosimetry device assigned to any individual, of seventy-five rems or more of radiation; or

(b) The release of radioactive material in concentrations which, if averaged over a period of twenty-four hours, would exceed five hundred times the limits specified for such materials in WAC 246-221-290, Appendix A, Table II.

(3) For each occurrence, requiring notification pursuant to this section, a prompt investigation of the situation shall be initiated by the licensee/registrant. A written report of the findings of the investigation shall be sent to the department within thirty days.

Any report filed with the department pursuant to this section shall be prepared in the manner described in WAC 246-221-260(2). Telephone notifications that do not involve immediate or twenty-four hour notification shall not be made to the emergency number (Seattle 206/682-5327). Routine calls should be made to the Olympia office (206/753-3468).

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-250, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-250, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-24-190, filed 12/11/86; 83-19-050 (Order 2026), § 402-24-190, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-190, filed 12/8/80; Order 1095, § 402-24-190, filed 2/6/76; Order 708, § 402-24-190, filed 8/24/72; Order 1, § 402-24-190, filed 7/2/71; Order 1, § 402-24-190, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-260 Reports of overexposures and excessive levels and concentrations.** (1) In addition to any notification required by WAC 246-221-250, each licensee or registrant shall make a report in writing within 30 days to the department of each exposure of an individual to radiation level or concentrations of radioactive material in excess of any applicable limit as set forth in this part or as otherwise approved by the department.

(2) Each report required by subsection (1) of this section shall describe:

(a) The extent of exposure of individuals to radiation or to radioactive material, including estimates of each individual's dose as required by subsection (3) of this section;

(b) Levels of radiation and concentrations of radioactive material involved;

(c) The cause of exposure, levels or concentrations; and

(d) Corrective steps taken or planned to assure against a recurrence.

(3) Any report filed with the department pursuant to this section shall include for each individual exposed the name, social security number, and date of birth, and an estimate of the individual's dose. The report shall be prepared so that this information is stated in a separate part of the report.

(4) Individuals shall be notified of reports in accordance with the requirements of WAC 246-222-040.

(5) In addition to any notification required by WAC 246-221-250, each licensee shall make a report in writing within 30 days to the department of levels of radiation or releases of radioactive material in excess of limits specified by 40 CFR Part 190, "Environmental radiation protection standards for nuclear power operations," or in excess of license conditions related to compliance with 40 CFR Part 190. Each report required under this paragraph shall describe the extent of exposure of individuals to radiation or to radioactive material; levels of radiation and concentrations of radioactive material involved; the cause of the exposure, levels of concentrations; and corrective steps taken or planned to assure against a recurrence.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-260, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-260, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-24-200, filed 12/8/80; Order 1095, § 402-24-200, filed 2/6/76; Order 708, § 402-24-200, filed 8/24/72; Order 1, § 402-24-200, filed 7/2/71; Order 1, § 402-24-200, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-221-280 Notifications and reports to individuals.** (1) Requirements for notification and reports to individuals of exposure to radiation or radioactive material are specified in WAC 246-222-040.

(2) When a licensee or registrant is required pursuant to WAC 246-221-260 to report to the department any exposure of an individual or dosimetry device assigned to any individual to radiation from any source, the licensee or registrant shall also notify the individual. Such notice shall be transmitted at a time not later than the transmittal to the department, and shall comply with the provisions of WAC 246-222-040(1).

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-221-280, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as 246-221-280, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-24-215, filed 12/11/86; Order 1095, § 402-24-215, filed 2/6/76.]

| Any radionuclide other than alpha emitting radionuclides, not listed above or mixtures of beta emitters of unknown composition | 0.1         |

Note: For purposes of WAC 246-221-120 and 246-221-190, where there is involved a combination of isotopes in known amounts, the limit for the combination should be derived as follows: Determine, for each isotope in the combination, the ratio between the quantity present in the combination and the limit otherwise established for the specific isotope when not in combination. The sum of such ratios for all the isotopes in the combination may not exceed "1" (i.e., "unity"). Example: For purposes of WAC 246-221-120 (1)(g), if a particular batch, room, or area contains 200 µCi of Au-198 and 500 µCi of C-14, it may also contain not more than 3 µCi of I-131 and remain unposted. This limit was determined as follows:

200 µCi Au-198/1,000 µCi + 500 µCi C-14/1,000 µCi + 3 µCi I-131/10 µCi = 1  
 The denominator in each of the above ratios was obtained by multiplying the figure in the table by 10 as provided in WAC 246-221-120 (1)(g).

| 246-222-070 | Requests by workers for inspections.   |
| 246-222-080 | Inspections not warranted—Informal review.   |

**WAC 246-222-001 Purpose and scope.** This chapter establishes requirements for notices, instructions and reports by licensees or registrants to individuals engaged in work under a license or registration and options available to such individuals in connection with department inspections of licensees or registrants to ascertain compliance with the provisions of the act and regulations, orders and licenses issued thereunder regarding radiological working conditions. The regulations in this chapter apply to all persons who receive, possess, use, own or transfer a source of radiation licensed by or registered with the department pursuant to the regulations in chapters 246-224, 246-232, and 246-235 WAC. The definitions contained in WAC 246-220-010 also apply to this chapter.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-222-001, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-222-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-48-010, filed 12/11/86. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-48-010, filed 12/8/80; Order 1084, § 402-48-010, filed 1/14/76.]

**WAC 246-222-020 Posting of notices to workers.**  
 (1) Each licensee or registrant shall post current copies of the following documents:  
 (a) The regulations in this chapter and in chapter 246-221 WAC;  
 (b) The license, certificate of registration, conditions or documents incorporated into the license by reference and amendments thereto;  
 (c) The operating procedures applicable to work under the license or registration;

(d) Any notice of noncompliance involving radiological working conditions, proposed imposition of civil penalty, order issued pursuant to chapter 246-220 WAC, or any response from the licensee or registrant.

(2) If posting of a document specified in subsection (1)(a), (b), or (c) of this section is not practicable, the licensee or registrant may post a notice which describes the document and states where it may be examined.

(3) Each licensee or registrant shall conspicuously post pertinent emergency procedures when emergency procedures are required by the department.

(4) Properly completed department Form RHF-3 "Notice to employees," shall be posted by each licensee or registrant wherever individuals work in or frequent any portion of a restricted area.

(5) Documents, notices or forms posted pursuant to this section shall appear in a sufficient number of places to permit individuals engaged in work under the license or registration to observe them on the way to or from any particular work location to which the document applies, shall be conspicuous, and shall be replaced if defaced or altered.

(6) Department documents posted pursuant to subsection (1)(d) of this section shall be posted as specified by subsection (5) of this section within five working days after receipt of the documents from the department; the licensee's or registrant's response, if any, shall be posted for a minimum of five working days after dispatch from the licensee or registrant. Such documents shall remain posted for a minimum of five working days or until action correcting the item(s) of noncompliance has been completed, whichever is later.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-222-020, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-222-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-48-020, filed 12/11/86. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-48-020, filed 12/8/80; Order 1084, § 402-48-020, filed 1/14/76.]

**WAC 246-222-030 Instructions to workers.** (1) All individuals working in or frequenting any portion of a restricted area:

(a) Shall be kept informed of the storage, transfer, or use of sources of radiation in such portions of the restricted area;

(b) Shall be instructed in the health protection considerations associated with exposure to radiation or radioactive material, in precautions or procedures to minimize exposure, and in the purposes and functions of protective devices employed;

(c) Shall be instructed in, and instructed to observe, to the extent within the worker's control, the applicable provisions of these regulations, department form RHF-3 "Notice to employees," and license conditions for the protection of personnel from exposures to radiation or radioactive material occurring in such areas;

(d) Shall be instructed that any worker or representative of workers who believes that a violation of the regulations, license conditions, or unnecessary exposure to radiation exists or occurred, may request an inspection

by the department by oral or written notification. The notification shall set forth specific grounds for the complaint. Any such notification to the department is confidential;

(e) Shall be instructed of their right to notify the department if the individual suspects improper actions by a licensee/registrant, or conditions which may lead to a violation of these regulations, the license/registration, or unnecessary exposure to radiation or radioactive materials;

(f) Shall be instructed that employment discrimination by a licensee/registrant against an employee because of actions described in this chapter is prohibited;

(g) Shall be instructed as to their responsibility to report promptly to the licensee or registrant any condition which may lead to or cause a violation of the act, these regulations, and licenses or unnecessary exposure to radiation or radioactive material;

(h) Shall be instructed in the appropriate response to warnings made in the event of any unusual occurrence or malfunction that may involve exposure to radiation or radioactive material; and

(i) Shall be advised as to the radiation exposure reports which workers shall be furnished pursuant to WAC 246-222-040.

(2) By July 1, 1984, records of these instructions described in subsection (1) of this section, for all individuals working in, or frequenting any portion of a restricted area shall be maintained for inspection by the department until further notice. These records shall include a copy of this section, or all the information contained in this section, along with a dated verification signature by the employee stating that the individual is satisfied with the explanation of the instructions contained in this section.

(3) The extent of these instructions shall be commensurate with potential radiological health protection considerations in the restricted area.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-222-030, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-222-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-48-030, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-48-030, filed 12/8/80; Order 1084, § 402-48-030, filed 1/14/76.]

**WAC 246-222-040 Notifications and reports to individuals.** (1) Radiation exposure data for an individual and the results of any measurements, analyses, and calculations of radioactive material deposited or retained in the body of an individual shall be reported to the individual as specified in this section. The information reported shall include data and results obtained pursuant to these regulations, orders, and license conditions, as shown in records maintained by the licensee or registrant pursuant to these regulations. Each notification and report shall:

(a) Be in writing;

(b) Include appropriate identifying data such as the name of the licensee or registrant, the name of the individual, and the individual's Social Security number;

- (c) Include the individual's exposure information; and  
 (d) Contain the following statement:

"This report is furnished to you under the provisions of the Washington state department of health, division of radiation protection, rules and regulations for radiation protection. You should preserve this report for further reference."

(2) Upon request of the worker, each licensee or registrant shall advise each worker annually of the worker's current and accumulated exposure to radiation or radioactive material as shown in records maintained by the licensee or registrant pursuant to WAC 246-221-230 (1) and (3).

(3) At the request of a worker formerly engaged in work controlled by the licensee or the registrant, each licensee or registrant shall furnish to each worker or former worker a report of the worker's exposure to radiation or radioactive material upon termination. For the purposes of this section, termination means the end of employment with the licensee or the end of a work assignment in the licensee's restricted area(s) in a given calendar quarter without expectation, or specific scheduling, of reentry into such restricted area(s) during the remainder of that calendar quarter. Such report shall be furnished within thirty days from the time the request is made, or within thirty days after the exposure of the individual has been determined by the licensee or registrant, whichever is later; shall cover, within the period of time specified in the request, each calendar quarter in which the worker's activities involved exposure to radiation from radioactive material licensed by, or radiation machines registered with the department; and shall include the dates and locations of work under the license or registration in which the worker participated during this period.

(4) When a licensee or registrant is required pursuant to WAC 246-221-260 to report to the department any exposure of an individual to radiation or radioactive material, the licensee or the registrant shall also provide the individual a written report on the individual's exposure data included therein. Such reports shall be transmitted at a time not later than the transmittal to the department.

(5) In addition to the requirements of subsection (3) of this section, at the request of a worker who is terminating employment in a given calendar quarter with the licensee or registrant in work involving radiation exposure, or of a worker who, while employed by another person, is terminating assignment to work involving radiation exposure in the licensee's facility in that calendar quarter, each licensee or registrant shall provide to each such worker, or to the worker's designee, at termination, a written report regarding the radiation dose received by that worker from operations of the licensee or registrant during that specifically identified calendar quarter or fraction thereof, or provide a written statement of that dose if the finally determined personnel monitoring results are not available at that time. Estimated doses shall be clearly indicated as such.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-222-040, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-222-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-48-040, filed 12/11/86; 83-19-050 (Order 2026), § 402-48-040, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-48-040, filed 12/8/80; Order 1084, § 402-48-040, filed 1/14/76.]

**WAC 246-222-050 Presence of representatives of licensees or registrants and workers during inspection.**

(1) Each licensee or registrant shall afford to the department at all reasonable times opportunity to inspect materials, machines, activities, facilities, premises, and records pursuant to these regulations.

(2) During an inspection, department inspectors may consult privately with workers as specified in WAC 246-222-060. The licensee or registrant may accompany department inspectors during other phases of an inspection.

(3) If, at the time of inspection, an individual has been authorized by the workers to represent them during department inspections, the licensee or registrant shall notify the inspectors of such authorization and shall give the workers' representative an opportunity to accompany the inspectors during the inspection of physical working conditions.

(4) Each workers' representative shall be routinely engaged in work under control of the licensee or registrant and shall have received instructions as specified in WAC 246-222-030.

(5) Different representatives of licensees or registrants and workers may accompany the inspectors during different phases of an inspection if there is no resulting interference with the conduct of the inspection. However, only one workers' representative at a time may accompany the inspectors.

(6) With the approval of the licensee or registrant and the workers' representative an individual who is not routinely engaged in work under control of the licensee or registrant, for example, a consultant to the licensee or registrant or to the workers' representative, shall be afforded the opportunity to accompany department inspectors during the inspection of physical working conditions.

(7) Notwithstanding the other provisions of this section, department inspectors are authorized to refuse to permit accompaniment by any individual who deliberately interferes with a fair and orderly inspection. With regard to any area containing proprietary information, the workers' representative for that area shall be an individual previously authorized by the licensee or registrant to enter that area.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-222-050, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-222-050, filed 12/27/90, effective 1/31/91; Order 1084, § 402-48-050, filed 1/14/76.]

**WAC 246-222-060 Consultation with workers during inspections.** (1) Department inspectors may consult

privately with workers concerning matters of occupational radiation protection and other matters related to applicable provisions of department regulations and licenses to the extent the inspectors deem necessary for the conduct of an effective and thorough inspection.

(2) During the course of an inspection any worker may bring privately to the attention of the inspectors, either orally or in writing, any past or present condition which the worker has reason to believe may have contributed to or caused any violation of the act, these regulations, or license condition, or any unnecessary exposure of an individual to radiation from licensed radioactive material or a registered radiation machine under the licensee's or registrant's control. Any such notice in writing shall comply with the requirements of WAC 246-222-070(1).

(3) The provisions of subsection (2) of this section shall not be interpreted as authorization to disregard instructions pursuant to WAC 246-222-030.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-222-060, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-222-060, filed 12/27/90, effective 1/31/91; Order 1084, § 402-48-060, filed 1/14/76.]

**WAC 246-222-070 Requests by workers for inspections.** (1) Any worker or representative of workers who believes that a violation of the act, of these regulations, or of license conditions exists or has occurred in work under a license or registration with regard to radiological working conditions in which the worker is engaged, may request an inspection by giving notice of the alleged violation to the Washington state department of health, division of radiation protection. Any such notice shall be in writing, shall set forth the specific grounds for the notice, and shall be signed by the worker or representative of the workers. A copy shall be provided to the licensee or registrant by the office of radiation protection no later than at the time of inspection except that, upon the request of the worker giving such notice, his or her name and the name of individuals referred to therein shall not appear in such copy or on any record published, released, or made available by the department, except for good cause shown.

(2) If, upon receipt of such notice, the inspector for the office of radiation protection determines that the complaint meets the requirements set forth in subsection (1) of this section, and that there are reasonable grounds to believe that the alleged violation exists or has occurred, the inspector shall cause an inspection to be made as soon as practicable, to determine if such alleged violation exists or has occurred. Inspections pursuant to this section need not be limited to matters referred to in the complaint.

(3) No licensee or registrant shall discharge or in any manner discriminate against any worker because such worker has filed any complaint or instituted or caused to be instituted any proceeding under these regulations or has testified or is about to testify in any such proceeding or because of the exercise by such worker on behalf of the worker or other workers of any option afforded by this chapter.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-222-070, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-222-070, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-48-070, filed 12/11/86; Order 1084, § 402-48-070, filed 1/14/76.]

**WAC 246-222-080 Inspections not warranted--Informal review.** (1) If the department of health, division of radiation protection determines, with respect to a complaint under WAC 246-222-070 that an inspection is not warranted because there are no reasonable grounds to believe that a violation exists or has occurred, the office of radiation protection shall notify the complainant in writing of such determination.

(a) If the complaint resulted from activities concerning naturally occurring or accelerator produced radioactive materials and/or radiation producing machines: The complainant may obtain review of such determination by submitting a written statement of position to the Assistant Director, Division of Industrial Safety and Health, Mailstop HC-402, Olympia, Washington 98504. Such request for informal review will be processed according to the provisions of WAC 296-350-460 and the provisions of the interagency agreement between the department of labor and industries and the department of health, division of radiation protection, if any.

(b) If the complaint resulted from activities concerning byproduct material, source material, and/or special nuclear material: The complainant may obtain review of such determination by submitting a written statement of position with the Department of Health, Division of Radiation Protection, Mailstop LE-13, Olympia, Washington 98504 (206/753-3468), who will provide the licensee or registrant with a copy of such statement by certified mail, excluding, at the request of the complainant, the name of the complainant. The licensee or registrant may submit an opposing written statement of position with the department of health, division of radiation protection, who will provide the complainant with a copy of such statement by certified mail. Upon the request of the complainant, the department of health may hold an informal conference in which the complainant and the licensee or registrant may orally present their views. An informal conference may also be held at the request of the licensee or registrant, but disclosure of the identity of the complainant will be made only following receipt of written authorization from the complainant. After considering all written or oral views presented, the department of health shall affirm, modify, or reverse the determination of the division of radiation protection and furnish the complainant and the licensee or registrant a written notification of the decision and the reason therefor.

(2) If the division of radiation protection determines that an inspection is not warranted because the requirements of WAC 246-222-070(1) have not been met, it shall notify the complainant in writing of such determination. Such determination shall be without prejudice to the filing of a new complaint meeting the requirements of WAC 246-222-070(1).

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-222-080, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-222-080, filed 12/27/90, effective 1/31/91. **WAC 246-224-001 Purpose and scope.** (1) This chapter provides for the registration of radiation machine facilities.

(2) For purposes of chapter 246-224 WAC of these regulations, "facility" means the location at which one or more radiation machines are installed, manufactured, tested, and/or located within one building, vehicle, or in one physical complex.

(3) In addition to the requirements of this chapter, all registrants are subject to the applicable provisions of other parts of these regulations.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-224-001, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-224-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-16-210, filed 12/8/80; Order 1084, § 402-16-210, filed 1/14/76. Formerly WAC 402-16-010.]

**WAC 246-224-020 Application for registration of radiation machine facilities.** Each person having a radiation machine facility shall apply for registration of such facility with the department within fifteen calendar days after the initial operations of a radiation machine facility. Application for registration shall be completed on forms furnished by the department or on similar forms and containing all the information required by the department form and accompanying instructions. Each application shall be accompanied by fees in accordance with WAC 246-254-053.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-224-020, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-224-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-16-230, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-16-230, filed 12/8/80; Order 1084, § 402-16-230, filed 1/14/76. Formerly WAC 402-16-020 and 402-16-040.]

**WAC 246-224-030 Issuance of certificate of registration.** Upon a determination that an application meets WAC 246-224-020 of the registration regulations, and

requirements of WAC 246-254-053, "Radiation machine facility registration fees," the department shall issue a notice of registration.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-224-030, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-224-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-16-232, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-16-232, filed 12/8/80.]

**WAC 246-224-040 Expiration of certificate of registration.** Except as provided by WAC 246-224-050(2) each certificate of registration shall expire at the end of the day on the date stated therein.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-224-040, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-224-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-16-234, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-16-234, filed 12/8/80.]

**WAC 246-224-050 Renewal of certificate of registration.** (1) Application for renewal of registration shall be filed in accordance with WAC 246-224-020 and 246-254-053 at least thirty days prior to the expiration date.

(2) In any case in which a registrant not less than thirty days prior to the expiration of his existing certificate of registration has filed an application in proper form for renewal, such existing certificate of registration shall not expire until the application status has been determined by the department.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-224-050, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-224-050, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-16-238, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-16-238, filed 12/8/80.]

**WAC 246-224-060 Separate locations.** Geographically separate facilities must be registered separately and pay full fees as described under WAC 246-254-053, even if these geographically separate facilities are under one administrative control. Where, as a routine part of the normal conduct of business, registrable items are moved between or among such locations, the registrant will so indicate at the time of registration. Each registrant shall name one or more designated persons, preferably one for each location where the registrant is not normally present, who may be contacted by the department with respect to the requirements for registration.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-224-060, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-224-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-16-240, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-16-240, filed 12/8/80; Order 1084, § 402-16-240, filed 1/14/76. Formerly WAC 402-16-050.]

**WAC 246-224-070 Report of changes.** The registrant shall notify the department in writing when making any change which would render the information contained in the application for registration and/or certificate of registration no longer accurate. Notifications shall be sent to X-Ray Control Section, Department of Health, Mailstop LE-13, Olympia, WA 98504. Notification shall be sent no later than thirty days after such change in the registration information.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-224-070, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-224-070, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-16-250, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-16-250, filed 12/8/80; Order 1084, § 402-16-250, filed 1/14/76. Formerly WAC 402-16-060.]

**WAC 246-224-080 Approval not implied.** A person shall neither refer, in any advertisement, to the fact that a facility is registered with the department pursuant to the provisions of WAC 246-224-020, nor imply that any activity under such registration has been approved by the department.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-224-080, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-224-080, filed 12/27/90, effective 1/31/91; Order 1084, § 402-16-260, filed 1/14/76. Formerly WAC 402-16-070.]

**WAC 246-224-090 Repair person, assembler, or installer obligation.** (1) Any person who sells, leases, transfers, lends, disposes, assembles, or installs radiation machines in this state shall notify the department within fifteen calendar days of:

(a) The name and address of persons who have received these machines;

(b) The manufacturer, model, and serial number of the master control of each radiation machine transferred; and

(c) The date of transfer of each radiation machine.

(2) No person shall make or install radiation machines, accessories used in connection with such machines or any components of such machines unless:

(a) Such machines, accessories, or components meet the requirements of these regulations.

(b) The registrant or transferee using such machines, accessories, or components has met the requirements of WAC 246-225-030, when applicable, prior to the date of transfer.

(c) Shielding and/or construction requirements, as determined pursuant to WAC 246-225-030 when applicable, have been completed prior to the date of transfer of such machines, accessories, or components.

(3) When requested by the registrant to make repair on an x-ray system that has malfunctioned in such a manner to have caused, or possibly caused an unintentional radiation exposure to patients, operator or member of the public, the assembler, transferor or installer, is required to notify the department of such work within twenty-four hours, or before repair is effected, whichever comes first. See WAC 246-225-010 for definition

of accidental radiation exposure and electronic product defect.

(4) Certified x-ray systems (21 CFR, subchapter J) shall be assembled in such a manner that manufacturer's specifications and intended performance designs are met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-224-090, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-224-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-16-270, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-16-270, filed 12/8/80; Order 1084, § 402-16-270, filed 1/14/76. Formerly WAC 402-16-090.]

**WAC 246-224-100 Out-of-state radiation machines.** (1) Whenever any radiation machine is to be brought into the state, for any temporary use, the person proposing to bring such machine into the state shall give written notice to the department at least three working days before such machine is to be used in the state. The notice shall include the type of radiation machine; the nature, duration, and scope of use; and the exact location(s) where the radiation machine is to be used. If for a specific case the three working-day period would impose an undue hardship, the person may, upon application to the department, obtain permission to proceed sooner.

(2) In addition the out-of-state person shall:

(a) Comply with all applicable regulations of the department.

(b) Supply the department such other information as the department may reasonably request.

(3) X-ray machines not intended for patient diagnosis and treatment may operate within the state without registration and fee payment if such operation is less than or equal to sixty days per calendar year. If operation in excess of sixty calendar days is desired, standard registration and fee procedures are required (see WAC 246-224-020 and 246-254-053).

(4) Standard registration and fee payment are required for all medical and dental x-ray machine operation within the state regardless of number of days of such operation.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-224-100, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-224-100, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-16-280, filed 12/8/80; Order 1084, § 402-16-280, filed 1/14/76. Formerly WAC 402-16-110.]

**WAC 246-225-010 Definitions.** As used in this chapter, the following definitions apply:

(1) "Accessible surface" means the external surface of the enclosure or housing provided by the manufacturer.

(2) "Accidental radiation exposure incident" means an exposure to a patient, an operator, or a member of the public that was unintentional.

(3) "Added filter" means the filter added to the inherent filtration.

(4) "Aluminum equivalent" means the thickness of aluminum (type 1100 alloy) affording the same attenuation, under specified conditions, as the material in question. (The nominal chemical composition of type 1100 aluminum alloy is 99.00 percent minimum aluminum, 0.12 percent copper.)

(5) "Assembler" means any person engaged in the business of assembling, replacing, or installing one or more components into an x-ray system or subsystem. An assembler may be the practitioner, his/her employee, an outside contractor, or an employee of an outside firm.

(6) "Attenuation block" means a block or stack, having dimensions 20 cm by 20 cm by 3.8 cm, of type 1100 aluminum alloy or other aluminum alloys having equivalent attenuation.

(7) "Automatic exposure control" means a device which automatically controls one or more technique factors in order to obtain at a preselected location(s) a required quantity of radiation (see also "phototimer").

(8) "Barrier" (see "protective barrier").

(9) "Beam axis" means a line from the source through the centers of the x-ray fields.

(10) "Beam-limiting device" means a device which provides a means to restrict the dimensions of the x-ray field.

(11) "Beam monitoring system" means a system designed to detect and measure the radiation present in the useful beam.

(12) "C-arm x-ray system" means an x-ray system in which the image receptor and x-ray tube housing assembly are connected by a common mechanical support system in order to maintain a desired spatial relationship. This system is designed to allow a change in the projection of the beam through the patient without a change in the position of the patient.

(13) "Cephalometric device" means a device intended for the radiographic visualization and measurement of the dimensions of the human head.

(14) "Certified components" means components of x-ray systems which have been certified by the manufacturer as meeting the requirements of the federal performance standard for x-ray equipment.

(15) "Certified system" means any x-ray system which has one or more certified component(s).

(16) "Changeable filters" means any filter, exclusive of inherent filtration, which can be removed from the useful beam through any electronic, mechanical or physical process.

(17) "Coefficient of variation (C)" means the ratio of the standard deviation to the mean value of a population of observations. It is estimated using the following equation:

$$C = \frac{s}{\bar{X}} = \frac{1}{\bar{X}} \left[ \sum_{i=1}^n \frac{(X_i - \bar{X})^2}{n-1} \right]^{1/2}$$

where

s = Estimated standard deviation of the population.

$\bar{X}$  = Mean value of observations in sample.

$X(i)$  =  $i^{\text{th}}$  observation sampled.

n = Number of observations in sample.

(18) "Contact therapy system" means an x-ray system wherein the x-ray tube port is put in contact with or within 5 centimeters of, the surface being treated.

(19) "Control panel" means that part of the x-ray control upon which are mounted the switches, knobs, pushbuttons, and other hardware necessary for manually setting the technique factors.

(20) "Cooling curve" means the graphical relationship between heat units stored and cooling time.

(21) "Date of transfer." See installation date.

(22) "Dead-man switch" means a switch so constructed that a circuit closing contact can be maintained only by continuous pressure on the switch by the operator.

(23) "Department" means the department of health which has been designated as the state radiation control agency.

(24) "Detector" (see "radiation detector").

(25) "Diagnostic source assembly" means the tube housing assembly with a beam-limiting device attached.

(26) "Diagnostic x-ray system" means an x-ray system designed for irradiation of any part of the human or animal body for the purpose of recording or visualization for diagnostic purposes.

(27) "Direct scattered radiation" means that scattered radiation which has been deviated in direction only by materials irradiated by the useful beam (see also "scattered radiation").

(28) "Electronic product defect" means an error in design, manufacture, or performance of an x-ray system such that unintentional radiation exposure to a patient, an operator, or a member of the public has occurred.

(29) "Entrance exposure rate" means the exposure measured free-in-air per unit time where the useful beam enters the patient.

(30) "Equipment" (see "x-ray equipment").

(31) \*"Exposure" means the quotient of  $dQ$  divided by  $dm$  where  $dQ$  is the absolute value of the total charge of the ions of one sign produced in air when all the electrons (negatrons and positrons) liberated by photons in a volume element of air having mass  $dm$  are completely stopped in air. (The special unit of exposure is the roentgen.)

Note: \*When the word, exposure, is used in this part to mean one or more irradiations of a person for a healing arts purpose, or in a more general sense, it will not be underlined [italicized].

(32) "Field emission equipment" means equipment which uses an x-ray tube in which electron emission from the cathode is due solely to the action of an electric field.

(33) "Filter" means material placed in the useful beam to absorb preferentially selected radiations.

(34) "Fluoroscopic imaging assembly" means a component which comprises a reception system in which x-ray photons produce a fluoroscopic image. It includes equipment housings, electrical interlocks if any, the primary protective barrier, and structural material providing linkage between the image receptor and the diagnostic source assembly.

(35) "Focal spot" means the area on the anode of the x-ray tube bombarded by the electrons accelerated from the cathode, and from which the useful beam originates.

(36) "Full beam detector" means a radiation detector of such size that the total cross section of the maximum size useful beam is intercepted.

(37) "General purpose radiographic x-ray system" means any radiographic x-ray system which, by design, is not limited to radiographic examination of specific anatomical regions.

(38) "Gonad shield" means a protective barrier for the testes or ovaries.

(39) "Half-value layer (HVL)" means the thickness of specified material which attenuates the beam of radiation to an extent such that the exposure rate is reduced to one-half of its original value. In this definition the contribution of all scattered radiation, other than any which might be present initially in the beam concerned, is deemed to be excluded.

(40) "Healing arts screening" means the testing of an asymptomatic population using x-ray machines for the detection or evaluation of health indications when such tests are not specifically and individually ordered by a licensed practitioner of the healing arts legally authorized to prescribe such x-ray tests for the purpose of diagnosis or treatment.

(41) "Heat unit" means a unit of energy equal to the product of the peak kilovoltage, milliamperes, and seconds, i.e.,  $kVp \times mA \times second$ .

(42) "Image intensifier" means a device consisting of an image intensifier tube installed in its housing which instantaneously converts an x-ray pattern into a light image of higher energy density.

(43) "Image receptor" means any device, such as a fluorescent screen or radiographic film, which transforms incident x-ray photons either into a visible image or into another form which can be made into a visible image by further transformations.

(44) "Image receptor support" means that part of a mammographic system designed to support the image receptor in a plane perpendicular to the x-ray beam during mammography.

(45) "Inherent filtration" means the filtration of the useful beam provided by the permanently installed components of the tube housing assembly.

(46) "Installation date" means the earliest date that a machine, accessory, or component is able to be used by a registrant or transferee but no later than the date of the first human exposure made using the machine, accessory, or component that has been installed.

(47) "Interlock" means a device arranged or connected such that the occurrence of an event or condition is required before a second event or condition can occur or continue to occur.

(48) "Irradiation" means the exposure of matter to ionizing radiation.

(49) "Kilovolts peak (kVp)" (see "peak tube potential").

(50) "kV" means kilovolts.

(51) "kWs" means kilowatt second which is equal to the product of peak kilovolts, amperes, and seconds or  $10^{-3} \times kV \times mA \times sec$ .

(52) "Lead equivalent" means the thickness of lead affording the same attenuation, under specified conditions, as the material in question.

(53) "Leakage radiation" means radiation emanating from the diagnostic or therapeutic source assembly except for:

(a) The useful beam and

(b) Radiation produced when the exposure switch or timer is not activated.

(54) "Leakage technique factors" means the technique factors associated with the tube housing assembly which are used in measuring leakage radiation. They are defined as follows:

(a) For capacitor energy storage equipment, the maximum rated peak tube potential and the maximum rated number of exposures in an hour for operation at the maximum rated peak tube potential with the quantity of charge per exposure being 10 milliamperes seconds, or the minimum obtainable from the unit, whichever is larger.

(b) For field emission equipment rated for pulsed operation, the maximum rated peak tube potential and the maximum rated number of x-ray pulses in an hour for operation at the maximum rated peak tube potential.

(c) For all other equipment, the maximum rated peak tube potential and the maximum rated continuous tube current for the maximum rated peak tube potential.

(55) "Light field" means that area of the intersection of the light beam from the beam-limiting device and one of the set of planes parallel to and including the plane of the image receptor, whose perimeter is the locus of

points at which the illumination is one-fourth of the maximum in the intersection.

(56) "Line-voltage regulation" means the difference between the no-load and the load line potentials expressed as a percent of the load line potential; that is,

$$\text{Percent line-voltage regulation} = 100 (V_n - V_l) / V_l$$

where:

$$V_{(n)} = \text{No-load line potential}$$

$$V_{(l)} = \text{Load line potential}$$

(57) "mA" means tube current in milliamperes.

(58) "mAs" means milliamperere second or the product of the tube current in milliamperes and the time of exposure in seconds.

(59) "Maximum line current" means the root mean squared current in the supply line of an x-ray machine operating at its maximum rating.

(60) "Mobile equipment" (see "x-ray equipment").

(61) "Modified installation" means a room, building, office, or facility in which structural parameters which affect radiation safety are being changed; these parameters include such things as reconstruction or moving of walls, replacement of the x-ray machine with one of higher kVp or mA, a change in the direction of the beam, replacement of the control panel so that operator protection is adversely affected, a change in occupancy of adjacent areas, workload changes, etc.

(62) "New installation" means a room, building, office, or facility newly built, or in which previously there has been no radiation machine.

(63) "Peak tube potential" means the maximum value of the potential difference across the x-ray tube during an exposure.

(64) "Phantom" means a volume of material similar to tissue with respect to attenuation and scattering of x-ray photons. This requires that the atomic number (Z) and the density of the material be similar to those of tissue.

(65) "Phototimer" - means a device which controls radiation exposure to the image receptor by detecting the total amount of radiation reaching the device. The radiation monitoring device(s) is part of an electronic circuit which controls the time the tube is activated (see also "automatic exposure control").

(66) "Portable equipment" (see "x-ray equipment").

(67) "Position indicating device (PID)" means a device, on dental x-ray equipment which indicate the beam position and establishes a definite source-surface (skin) distance. The device may or may not incorporate or serve as a beam-limiting device.

(68) "Positive beam limitation" means the automatic or semi-automatic adjustment of an x-ray beam to the selected image receptor size, whereby exposures cannot be made without such adjustment.

(69) "Primary protective barrier" (see "protective barrier").

(70) "Protected area" means a shielded area in which attenuation of x-radiation is sufficient to meet the exposure limits of WAC 246-221-010 and the principles of

WAC 246-220-007 and "ALARA" for individuals in that area.

(71) "Protective apron" means an apron made of radiation absorbing materials, used to reduce radiation exposure.

(72) "Protective barrier" means a barrier of radiation absorbing material(s) used to reduce radiation exposure.

(a) "Primary protective barrier" means the material, excluding filters, placed in the useful beam, to protect anyone other than the patient from radiation exposure.

(b) "Secondary protective barrier" means a barrier sufficient to attenuate the stray radiation to the required degree.

(73) "Protective glove" means a glove made of radiation absorbing materials used to reduce radiation exposure.

(74) "Quality assurance" is a program designed to produce high quality radiographs at minimal cost and minimal patient exposure.

(75) "Quality control" is the routine measurement of the performance of the diagnostic x-ray imaging system, from x-ray beam output to the viewing of radiographs, and the continual adjustment of that performance to an optimal and consistent level.

(76) "Radiation detector" means a device which in the presence of radiation provides by either direct or indirect means, a signal or other information suitable for use in measuring one or more quantities of incident radiation.

(77) "Radiation safety" means efforts directed at occupational exposure reduction, patient exposure reduction, image quality improvement, diagnostic imaging system quality assurance, radiation measurements, dose evaluations, compliance with state and federal regulations, and related issues.

(78) "Radiation therapy simulation system" means a fluoroscopic or radiographic x-ray system intended for localizing the volume to be exposed during radiation therapy and confirming the position and size of the therapeutic irradiation field.

(79) "Radiograph" means an image receptor on which the image is created directly or indirectly by an x-ray pattern and results in a permanent record.

(80) "Radiographic imaging system" means any system whereby a permanent or temporary image is recorded on an image receptor by the action of ionizing radiation.

(81) "Rating" means the operating limits of an x-ray system or subsystem as specified by the component manufacturer.

(82) "Recording" means producing a permanent form of an image resulting from x-ray photons (e.g., film, video tape).

(83) "Response time" means the time required for an instrument system to reach 90 percent of its final reading when the radiation-sensitive volume of the instrument system is exposed to a step change in radiation flux from zero sufficient to provide a steady state midscale reading.

(84) "Scattered radiation" means radiation that, during passage through matter, has been deviated in direction (see also "direct scattered radiation").

(85) "Secondary protective barrier" (see "protective barrier").

(86) "Shutter" means a device attached to the tube housing assembly which can totally intercept the entire cross sectional area of the useful beam and which has a lead equivalency at least that of the tube housing assembly.

(87) "SID" (see "source-image receptor distance").

(88) "Source" means the focal spot of the x-ray tube.

(89) "Source-image receptor distance (SID)" means the distance from the source to the center of the input surface of the image receptor.

(90) "Source-to-skin-distance (SSD)" means the distance between the source and the skin entrance plane of the patient.

(91) "Special purpose x-ray equipment" means that which is designed for radiographic examination of one specific area of the body.

(92) "Spot check" means an abbreviated calibration procedure which is performed to assure that a previous calibration continues to be valid.

(93) "Spot film device" means a device intended to transport and/or position a radiographic image receptor between the x-ray source and fluoroscopic image receptor, including a device intended to hold a cassette over the input end of an image intensifier for the purpose of making a radiograph.

(94) "Spot film" means a radiograph which is made during a fluoroscopic examination to record permanently conditions which exist during that fluoroscopic procedure.

(95) "Stationary equipment" (see "x-ray equipment").

(96) "Stray radiation" means the sum of leakage and scattered radiation.

(97) "Technique factors" means the conditions of operation. They are specified as follows:

(a) For capacitor energy storage equipment, peak tube potential in kV and quantity of charge in mAs.

(b) For field emission equipment rated for pulsed operation, peak tube potential in kV and number of x-ray pulses.

(c) For all other equipment, peak tube potential in kV and:

(i) Either tube current in mA and exposure time in seconds,

(ii) Or the product of tube current and exposure time in mAs.

(98) "Transmission detector" means a radiation detector through which the useful beam or part of the useful beam passes.

(99) "Treatment volume" means the region, in the patient, to which a specified dose is to be delivered.

(100) "Tube" means an x-ray tube, unless otherwise specified.

(101) "Tube housing assembly" means the tube housing with tube installed. It includes high-voltage and/or

filament transformers and other appropriate elements when they are contained within the tube housing.

(102) "Tube rating chart" means the set of curves which specify the rated limits of operation of the tube in terms of the technique factors.

(103) "Useful beam" means the radiation which passes through the tube housing port and the aperture of the beam-limiting device when the exposure switch or timer is activated.

(104) "Variable-aperture beam-limiting device" means a beam-limiting device which has capacity for stepless adjustment of the x-ray field size.

(105) "Visible area" means that portion of the input surface of the image receptor over which incident x-ray photons produce a visible image.

(106) "Wedge filter" means an added filter with changing radio-opacities used to achieve more uniform optical densities on the image receptor when a body part of varying absorption characteristics is radiographed.

(107) "X-ray control" means a device which controls input power to the x-ray high-voltage generator and/or the x-ray tube. It includes equipment which controls the technique factors of an x-ray exposure.

(108) "X-ray equipment" means an x-ray system, subsystem, or component thereof. Types of x-ray equipment are as follows:

(a) 'Mobile' means x-ray equipment mounted on a permanent base with wheels and/or casters for moving while completely assembled.

(b) 'Portable' means x-ray equipment designed to be hand-carried.

(c) 'Stationary' means x-ray equipment which is installed in a fixed location.

(109) "X-ray field" means that area of the intersection of the useful beam and any one of the set of planes parallel to and including the plane of the image receptor, whose perimeter is the locus of points at which the exposure rate is one-fourth of the maximum in the intersection.

(110) "X-ray high-voltage generator" means a device which transforms electrical energy from the potential supplied by the x-ray control to the tube operating potential. The device may also include means for transforming alternating current to direct current, filament transformers for the x-ray tube(s), high-voltage switches, electrical protective devices, and other appropriate elements.

(111) "X-ray system" means an assemblage of components for the controlled production of x-rays. It includes minimally an x-ray high-voltage generator, an x-ray control, a tube housing assembly, a beam-limiting device, and the necessary supporting structures. Additional components which function with the system are considered integral parts of the system.

(112) "X-ray subsystem" means any combination of two or more components of an x-ray system for which there are requirements specified in this part.

(113) "X-ray tube" means any electron tube which is designed to be used primarily for the production of x-rays.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-010, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-28-020, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-28-020, filed 12/8/80; Order 1084, § 402-28-020, filed 1/14/76; Order 1, § 402-28-020, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-225-020 General requirements—Administrative controls.** (1) No person shall make, sell, lease, transfer, lend, or install x-ray equipment or the accessories used in connection with such equipment unless such accessories and equipment, when properly placed in operation and properly used, shall meet the requirements of this chapter.

(2) The registrant in control of the x-ray machines shall be responsible for directing the operation of the x-ray machines. The registrant or registrant's agent shall assure the following provisions are met in the operation of the x-ray machine or machines:

(a) The registrant shall not operate an x-ray machine for diagnostic or therapeutic purposes when the x-ray machine:

- (i) Does not meet the provisions of this chapter; or
- (ii) Is malfunctioning and threatens the health or safety of the patient, operator, or general public.

(b) Individuals operating the x-ray equipment shall be adequately instructed in safe operating procedures and shall be able to demonstrate competence, upon request from the department, in the correct use of the equipment. Required areas of competence are listed in Appendix II. The department may determine compliance with subsection (2)(b) of this section by observation, interview, or testing;

(c) At each x-ray system's control panel, a chart shall be provided which specifies for the examinations performed by that system the following information:

- (i) Patient's anatomical size versus technique factors utilized;
- (ii) Source to image receptor distance used;
- (iii) Type and placement of patient shielding used, for example, gonad, thyroid, lap apron;
- (iv) If applicable, settings for automatic exposure devices; and
- (v) Type and size of film or screen-film combination to be used.

(d) When required by the department, a registrant shall create and provide to operators of the x-ray system, radiation safety procedures which address patient and occupationally-exposed personnel safety. These procedures shall define restrictions of the operating technique required for safe operation of the particular x-ray system;

(e) Except for patients who cannot be moved out of the room and the patient being examined, only the staff and ancillary personnel required for the medical procedure or training shall be present in the room during the radiographic exposure. Other than the patient being examined:

- (i) All individuals shall be positioned such that no part of the body including the extremities not protected

by 0.5 mm lead equivalent will be struck by the useful beam;

(ii) The x-ray operator, other staff and ancillary personnel shall be protected from the direct scatter radiation by protective aprons or whole body protective barriers of not less than 0.25 mm lead equivalent;

(iii) Patients who cannot be removed from the room shall be:

(A) Protected from the direct scatter radiation by whole body protective barriers of not less than 0.25 mm lead equivalent; or

(B) Positioned so the nearest portion of the body is at least 2 meters from both the tube head and the nearest edge of the image receptor.

(iv) The department may require additional protective devices when a portion of the body of staff or ancillary personnel is potentially subjected to stray radiation which may result in that individual receiving one quarter of the maximum permissible dose defined under WAC 246-221-010.

(f) Gonad shielding of not less than 0.5 mm lead equivalent shall be used for patients of reproductive age during radiographic procedures in which the gonads are in the direct (useful) beam, except for cases when gonad shielding may interfere with the diagnostic procedure;

(g) Persons shall not be exposed to the useful beam except for healing arts purposes. Only a licensed practitioner of the healing arts shall authorize an exposure to the useful beam. This requirement prohibits deliberate exposure for the following purposes:

(i) Exposure of an individual for training, demonstration, or other purposes unless there are also healing arts requirements and proper prescription is provided;

(ii) Except for mammography performed by registered facilities on self-referred patients, the exposure of an individual for the purpose of healing arts screening without prior written approval of the state health officer; and

(iii) Exposure of an individual for the sole purpose of satisfying a third party's prerequisite for reimbursement under any health care plan, except for exposure required under Medicare provisions.

(h) When a patient or film must be provided with auxiliary support during a radiation exposure:

(i) Mechanical holding devices shall be used when the technique permits. The safety rules, when required under subdivision (d) of this subsection, shall list individual projections where holding devices cannot be utilized;

(ii) Written safety procedures, when required under subdivision (d) of this subsection, shall indicate the requirements for selecting a holder and the procedure the holder shall follow;

(iii) The human holder shall be protected as required under subdivision (e)(i) of this subsection. The holder occupationally exposed to radiation shall be provided with a personnel monitoring device, worn at the collar outside the lead apron, and records of exposures shall be maintained;

(iv) No person shall be used routinely to hold film or patients;

(v) When the patient must hold the film, the portion of the body other than the area of clinical interest struck by the useful beam shall be protected by not less than 0.5 mm lead equivalent material;

(vi) Holding the film or the patient shall be permitted only in very unusual and rare situations; and

(vii) When a holder is occupationally exposed to radiation, a record shall be made of the examination and shall include:

- (A) Patient identification;
- (B) Name of the human holder;
- (C) Date of the examination;
- (D) Number of exposures; and
- (E) Technique factors utilized for the exposures.

(i) Personnel dosimetry. All persons associated with the operation of an x-ray system are subject to both the occupational exposure limits and the requirements for the determination of the doses stated under WAC 246-221-020. In addition, when protective clothing or devices are worn on portions of the body and a dosimeter is required, at least one such dosimeter shall be utilized as follows:

(i) When an apron is worn, the monitoring device shall be worn at the collar outside of the apron; and

(ii) The dose to the whole body based on the maximum dose attributed to the most critical organ shall be recorded on the reports required under WAC 246-221-230. If more than one device is used or a record is made of the data, each dose shall be identified with the area where the device was worn on the body.

(iii) Personnel monitoring of an operator shall be required where:

(A) Exposure switch cords are utilized that allow the operator to stand in an unprotected area during exposures; and

(B) Worst-case measurements by the department show twenty-five percent of the exposure limits as specified under WAC 246-221-010 may be exceeded.

(iv) All persons involved in the operation of a fluoroscope and working within the fluoroscopy room during its operation shall wear a personnel dosimeter required under WAC 246-221-090 and subsection (2)(i)(i) of this section. If extremities are in or near the primary beam, extremity dosimeters are also required;

(j) Healing arts screening utilizing radiation. Any person proposing to conduct a healing arts screening program, with the exception of a mammography program, shall not initiate such a program without prior approval of the state health officer. When requesting such approval, that person shall submit the information outlined under Appendix III of this part. If information submitted becomes invalid or outdated, the state health officer shall be notified immediately;

(k) When using scatter suppressing grids, the grids shall be:

(i) Clearly labelled with the focal distance for which they are designed to be used; and

(ii) Of the proper focal distance for the source-to-image distances used.

(l) Procedures and auxiliary equipment designed to minimize patient and personnel exposure commensurate with the needed diagnostic information shall be utilized.

(i) Film cassettes without intensifying screens shall not be used for any routine diagnostic radiological imaging.

(ii) Portable or mobile x-ray equipment shall be used only for examinations where it is impractical to transfer the patient(s) to a stationary x-ray installation.

(m) Patient log. Each facility shall keep a patient log and indicate the following information as a minimum:

(i) Identification of the patient, including name, age, and sex;

(ii) Date of x-ray examination;

(iii) Examination or treatment given, technique factors used, and number of exposures. Where fluoroscopy is involved, the total fluoroscopic on-time shall also be recorded;

(iv) Any deviation from the standard procedure or technique (including repeat exposures) as denoted in the technique chart required under subdivision (c) of this subsection;

(v) When applicable, the x-ray system used; and

(vi) Name or cross index of individuals who performed the exam.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-020, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-28-031, filed 12/11/86; 83-19-050 (Order 2026), § 402-28-031, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-28-031, filed 12/8/80; Order 1084, § 402-28-031, filed 1/14/76. Formerly WAC 402-28-030 (part).]

**WAC 246-225-030 General requirements—Plan review.** (1) Before construction, the floor plans and equipment arrangement of medical installations (new or modifications of existing installations) utilizing x-rays for diagnostic or therapeutic purposes shall be submitted to:

(a) A qualified expert for determination of shielding requirements using National Council on Radiation Protection and Measurements Report No. 49, or equivalent; and

(b) The department for subsequent review. Review shall not imply approval.

(2) The review of such plans shall not preclude the requirement of additional modifications should a subsequent analysis of operating conditions indicate the possibility of an individual receiving a dose in excess of the limits required under WAC 246-221-010, 246-221-050, and 246-221-060.

(3) Diagnostic veterinary, podiatric, and dental facilities shall be exempt from submitting shielding calculations and floor plans.

(4) In order for the department to provide an evaluation, technical advice, and official review of the shielding requirements for a medical radiation installation, a floor plan drawn to scale and the following data are required:

(a) The normal location of the x-ray tube, along with an indication of anode-cathode orientation to the cassette holders;

(b) The limits of the tube travel;

(c) The directions in which the tube is pointed;

(d) Window locations;

(e) The location of the control booth or operator's position;

(f) The exposure switch location;

(g) The position of the viewing window, if any;

(h) The composition and thickness of the walls;

(i) If more than one story, the height floor-to-floor;

(j) If more than one story, the composition and thickness of materials in the ceiling or floor;

(k) The make and model of the x-ray machine;

(l) The maximum kVp and mA;

(m) The types of examinations or treatments (for example, chest, cephalometric, general x-ray, or therapy);

(n) The identification and occupancy of areas adjacent to the x-ray room;

(o) The anticipated x-ray workload expressed in number of patients and exposures per week including:

(i) Technique factors used, or milliampere-seconds or milliampere-minutes per week; and

(ii) Estimates of the percentage of the workload expected to occur for a particular beam direction.

(5) For new and modified installations only, the following are minimum design requirements for medical x-ray machine operator booths. These requirements do not apply to dental, podiatry, and veterinary installations. See subsection (7) of this section for dental panoramic and cephalometric.

(a) The operator shall be allotted 7.5 square feet or more of unobstructed floor space in the x-ray booths.

(i) The 7.5 square feet of minimum space specified under subsection (5)(a) of this section shall be a geometric configuration where no dimension is less than two feet.

(ii) The allotted space shall exclude an encumbrance by the console, such as an overhang, cables, or other similar encroachment.

(iii) An extension of a straight line drawn between any point on the edge of the booth shielding and the nearest vertical edge of a chest cassette holder or corner of the examination table shall not impinge on the unobstructed space.

(iv) The booth walls shall be seven feet high or more and shall be permanently fixed to the floor or other structure as may be necessary.

(v) When a door or moveable panel is used as the integral part of the booth structure, it must have a permissive device which will prevent an exposure when the door or panel is not closed.

(b) Switch placement. The operator's switch for the radiographic machine shall be fixed within the booth. The switch shall:

(i) Be at least 102 centimeters (forty inches) inside the protected area; and

(ii) Allow the operator to use the available viewing windows.

(c) Viewing system requirements.

(i) Each booth shall have at least one viewing device which shall:

(A) Be placed so the operator can view the patient during exposure; and

(B) Be placed so the operator can have full view of the entries into the room.

(ii) When the viewing system is a window, the following requirements also apply:

(A) The window shall have a visible area of one square foot or more; and

(B) The glass shall have the same lead equivalence or more as that required in the booth's wall where the glass is mounted.

(iii) When the viewing system is by mirrors, the mirrors shall be located to accomplish the general requirements under subdivision (i) of this subsection.

(iv) When the viewing system is by electronic means (for example, TV):

(A) The camera shall be located to accomplish the general requirements under subdivision (i) of this subsection; and

(B) There shall be an alternate viewing system as a backup for electronic failure.

(d) New or modified facilities shall maintain a copy of the floor plan and shielding calculations required under subsection (1) of this section.

(6) Dimensions of primary beam shielding (chest, cephalometer) shall exceed the largest possible beam size by 30.5 centimeters (one foot) or more in every direction. Cephalometric primary beam shielding shall be deemed adequate if, for a maximum workload of twenty films a week, two-pound lead is installed (for occupied areas).

(7) A viewing device shall be present in dental panoramic and cephalometric x-ray installations, so the requirements of subsection (5)(c) of this section are met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-030, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-28-032, filed 12/11/86; 83-19-050 (Order 2026), § 402-28-032, filed 9/16/83; Order 1084, § 402-28-032, filed 1/14/76. Formerly WAC 402-28-030 (part).]

**WAC 246-225-040 General requirements for diagnostic x-ray systems.** In addition to other requirements of this chapter, diagnostic x-ray systems shall meet the following requirements:

(1) *Warning label.* The control panel containing the main power switch shall bear the warning statement, legible and accessible to view: "WARNING: This x-ray unit may be dangerous to patient and operator unless safe exposure factors and operating instructions are observed."

(2) *Battery charge indicator.* On battery-powered generators, visual means shall be provided on the control panel to indicate the battery is in a state of charge adequate for proper operation.

(3) *Leakage radiation from the diagnostic source assembly.* The leakage radiation from the diagnostic source assembly, measured at a distance of 1 meter in

any direction from the source, shall not exceed 100 milliroentgens in one hour when the x-ray tube is operated at its leakage technique factors. Compliance shall be determined by measurements averaged over an area of one hundred square centimeters with no linear dimension greater than twenty centimeters.

(4) *Radiation from components other than the diagnostic source assembly.* The radiation emitted by a component other than the diagnostic source assembly shall not exceed 2 milliroentgens in one hour at 5 centimeters from an accessible surface of the component when it is operated in an assembled x-ray system under conditions for which it was designed. Compliance shall be determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(5) *Beam quality.*

(a) The half-value layer (HVL) of the useful beam for a given x-ray tube potential shall not be less than the values shown in this section, Table I. If it is necessary to determine such half-value layer at an x-ray tube potential which is not listed in Table I, linear interpolation or extrapolation shall be made.

WAC 246-225-040 TABLE I

| Design operating range (kilovolts peak) | Measured potential (kilovolts peak) | Half-value layer (milli-meters of aluminum equivalent) | Half-value layer (milli-meter of aluminum equivalent for dental units) |
|---|-------------------------------------|--|--|
| Below 51 —                              | 30                                  | 0.3  | N/A  |
|   | 40                                  | 0.4  | N/A  |
|   | 50                                  | 0.5  | 1.5  |
| 51 to 70 —                              | 51                                  | 1.2  | 1.5  |
|   | 60                                  | 1.3  | 1.5  |
|   | 70                                  | 1.5  | 1.5  |

|   | 150                                 | 4.1  | 4.1  |

(b) For capacitor energy storage equipment, compliance shall be determined with neither the minimum nor the maximum quantity of charge per exposure.

(c) The required minimal half-value layer shall include the filtration contributed by materials permanently in position between the focal spot of the tube and the patient. (for example, a table top when the tube is mounted "under the table" and inherent filtration of the tube)

(d) Filtration control. For x-ray systems with variable kVp and variable filtration for the useful beam, a device

shall link the kVp selector with the filters and shall prevent an exposure unless the minimum amount of filtration required by subdivision (a) of this subsection is in the useful beam for the selected kVp.

(6) *Multiple tubes.* Where two or more radiographic tubes are controlled by one exposure switch, the tube or tubes selected shall be clearly indicated prior to initiation of the exposure. Such indication shall be both on the x-ray control panel and near or on the selected tube housing assembly.

(7) *Mechanical support of tube head.* The tube housing assembly supports shall be adjusted such that the tube housing assembly remains stable during an exposure unless the tube housing movement during exposure is a designed function of the x-ray system.

(8) *Technique indicators.*

(a) The technique factors used during an exposure shall be indicated before the exposure begins, except when automatic exposure controls are used, in which case the technique factors set prior to the exposure shall be indicated.

(b) On equipment having fixed technique factors, the requirement, under subdivision (a) of this subsection may be met by permanent markings. Indication of technique factors shall be visible from the operator's position except in the case of spot films made by the fluoroscopist.

(9) Certified units. All diagnostic x-ray systems certified to comply with 21 CFR 1020 shall meet the requirements of that certification.

(10) Linearity. The difference between the ratio of exposure to mAs at one mA or mAs setting and the ratio at another mA or mAs setting shall not exceed 0.10 times the sum of the ratios. This is written as:

$$X_1 - X_2 \leq 0.10 (X_1 + X_2)$$

Where  $X_1$  and  $X_2$  are the ratios (mR/mAs) for each mA or mAs station.

The test shall be performed at any selections of mA or mAs without regard to focal spot size, provided neither focal spot size is less than 0.45 millimeter.

(11) kVp accuracy. The difference between the indicated and actual kVp of an x-ray machine shall not be greater than ten percent of the indicated kVp, or, alternatively, if available, the accuracy specifications of the control panel manufacturer must be met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-040, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-28-035, filed 12/11/86; 83-19-050 (Order 2026), § 402-28-035, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-28-035, filed 12/8/80; Order 1084, § 402-28-035, filed 1/14/76. Formerly WAC 402-28-030 (part).]

**WAC 246-225-050 Fluoroscopic x-ray systems.** Fluoroscopic x-ray systems shall meet the following requirements:

- (1) Limitation of useful beam.

(a) The fluoroscopic tube shall not produce x-rays unless the primary barrier is in position to intercept the entire useful beam at all times.

(b) The entire cross section of the useful beam shall be intercepted by the primary protective barrier of the fluoroscopic image assembly at any source-to-image-distance (SID).

(c) Nonimage-intensified fluoroscopic equipment shall not be used.

(d) For image-intensified fluoroscopic equipment without a spot film device, neither the length nor the width of the fluoroscopic x-ray field in the plane of the image receptor shall exceed that of the visible area of the image receptor by more than three percent of the SID. The sum of the excess length and the excess width shall be no greater than four percent of the SID. Measurements shall be made at the minimum SID available but at no less than eight inches table top to image receptor distance.

(e) For uncertified image-intensified fluoroscopic equipment with a spot film device, the fluoroscopic x-ray beam with the shutters wide open (during either fluoroscopy itself or spot films) shall be no larger than the dimensions of the largest spot film size for which the device is designed. Measurements shall be made at the minimum SID available, but at no less than eight inches table top to the film plane distance.

(f) For certified (21 CFR 1020) image-intensified fluoroscopic equipment with a spot film device, neither the length nor the width of the fluoroscopic x-ray field in the plane of the image receptor shall exceed that of the visible area of the image receptor by more than three percent of the SID. The sum of the excess width shall be no greater than four percent of the SID. Measurements shall be made at the minimum SID available, but at no less than eight inches table top to film plane distance.

(g) Fluoroscopic equipment beam limitation:

(i) Means shall be provided to reduce the beam size at the plane of the image receptor to 125 square centimeters or less; and

(ii) The minimum field size at the greatest SID shall be equal to or less than 5 centimeters by 5 centimeters.

(2) *Activation of the fluoroscopic tube.* X-ray production in the fluoroscopic mode shall be controlled by a deadman switch.

(3) *Entrance exposure rate allowable limits.*

(a) For equipment with or without automatic brightness control, the exposure rate measured at the point where the center of the useful beam enters the patient shall not exceed ten roentgens per minute, except during film recording of fluoroscopic images or when an optional high level control (HLC) is activated.

(b) For equipment provided with HLC, the equipment shall not be operable at a combination of tube potential and current which will result in an exposure rate in excess of 5 roentgens per minute at the point where the center of the useful beam enters the patient, unless the HLC is activated.

(i) Special means of activation of high level controls, such as additional pressure applied continuously by the operator, shall be required to avoid accidental use.

(ii) A continuous signal audible to the fluoroscopist shall indicate the high level control is employed.

(c) Measuring compliance of entrance exposure rate limits. Compliance with subsection (3) of this section shall be determined as follows:

(i) Movable grids and compression devices shall be removed from the useful beam during the measurement;

(ii) If the source is below the table, exposure rate shall be measured 1 centimeter above the table top or cradle;

(iii) If the source is above the table, the exposure rate shall be measured at 30 centimeters above the table top with the end of the beam-limiting device or spacer positioned as closely as possible to the point of measurement;

(iv) In a C-arm type of fluoroscope, the exposure rate shall be measured 30 centimeters from the input surface of the fluoroscopic imaging assembly, with the source positioned at any available SID, provided the end of the beam-limiting device or spacer is no closer than 30 centimeters from the input surface of fluoroscopic imaging assembly; and

(v) In a lateral-type fluoroscope, the exposure rate shall be measured at a point 15 centimeters from the center line of the x-ray source with the end of the beam-limiting device or spacer positioned as closely as possible to the point of measurement. If the table top is movable, the table top shall be positioned as closely as possible to the lateral x-ray source, with the end of the beam-limiting device or spacer no closer than 15 centimeters to the center line of the x-ray table.

(d) Periodic measurement of entrance exposure rate limits.

(i) Periodic measurements of the exposure rate shall be made. An adequate period for such measurements shall be annually or after maintenance of the system affecting the exposure rate.

(ii) Results of exposure rate measurements shall be available where the fluoroscopist has ready access to the measurements while using that fluoroscope. Results of the measurements shall include:

(A) The maximum possible R/minute, as well as the physical factors used to determine data;

(B) The name of the person performing the measurements;

(C) The last two dates the measurements were performed; and

(D) The type of device used in making the measurements.

(iii) Conditions of measurement:

(A) The kVp shall be adjusted to that which will produce the maximum entrance exposure rate;

(B) The high level control, if present, shall not be activated;

(C) The x-ray systems that incorporate automatic exposure rate control (automatic brightness control) shall have sufficient material, for example, lead or lead equivalence, placed in the useful beam to produce the maximum output of the x-ray system; and

(D) X-ray systems not incorporating automatic exposure rate control shall utilize the maximum

milliamperage of the x-ray system. Materials, for example, an attenuation block, may be placed in the useful beam to protect the imaging system, as long as the material does not affect the measurement of the exposure rate.

(4) *Barrier transmitted radiation rate limits.*

(a) The exposure rate due to transmission through the primary protective barrier with the attenuation block in the useful beam, combined with radiation from the image intensifier, if provided, shall not exceed 2 milliroentgens per hour for each roentgen per minute of entrance exposure rate. The barrier transmission measurement shall be made at 10 centimeters from an accessible surface of the fluoroscopic imaging assembly beyond the plane of the image receptor.

(b) Measuring compliance of barrier transmission.

(i) The exposure rate due to transmission through the primary protective barrier combined with radiation from the image intensifier shall be determined by measurements averaged over an area of 100 square centimeters with no linear dimension greater than 20 centimeters.

(ii) If the source is below the table top, the measurement shall be made with the input surface of the fluoroscopic imaging assembly positioned 30 centimeters above the table top.

(iii) If the source is above the table top and the SID is variable, the measurement shall be made with the end of the beam-limiting device or spacer as close to the table top as it can be placed, provided the beam-limiting device or spacer shall not be closer than 30 centimeters.

(iv) Movable grids and compression devices shall be removed from the useful beam during the measurement.

(5) *Indication of potential and current.* During fluoroscopy and cinefluorography, x-ray tube potential and current shall be continuously indicated.

(6) *Source-skin distance (SSD).* The source to skin distance shall not be less than:

(a) 38 centimeters on stationary fluoroscopes;

(b) 30 centimeters on mobile fluoroscopes; and

(c) 20 centimeters for image intensified fluoroscopes used for specific surgical application. The user must provide precautionary measures for the use of the fluoroscope due to its short SSD.

(7) *Fluoroscopic timer.*

(a) Means shall be provided to preset the cumulative on-time of the fluoroscopic tube. The maximum cumulative time of the timing device shall not exceed five minutes without resetting.

(b) A signal audible to the fluoroscopist shall indicate the completion of a preset cumulative on-time. Such signal shall continue to sound while x-rays are produced until the timing device is reset. Alternatively, the timing device may terminate exposures at the end of the preset time.

(8) *Control of scattered radiation.*

(a) Fluoroscopic table designs when combined with normal operating procedures shall be such that no unprotected part of staff or ancillary person's body shall be exposed to unattenuated scattered radiation which originates from under the table. The attenuation required shall be not less than 0.25 mm lead equivalent.

(b) Equipment configuration when combined with procedures shall be such that no portion of staff or ancillary person's body, except the extremities, shall be exposed to the unattenuated scattered radiation emanating from above the table top unless:

(i) The radiation has passed through not less than 0.25 mm lead equivalent material, for example, drapes, Bucky-slot cover-sliding or folding panel, or self-supporting curtains, in addition to lead equivalency provided by the protective apron referred to under WAC 246-225-020 (2)(e); and

(ii) Exceptions to subdivision (b) of this subsection may be made in some special procedures where a sterile field will not permit the use of the normal protective barriers. Where the use of prefitted sterilized covers for the barriers is practical, the department shall not permit such exception.

(9) *Radiation therapy simulation systems.* Radiation therapy simulation systems shall be exempt from the requirements of subsections (3), (4), and (7) of this section: *Provided, That:*

(a) Such systems are designed and used in such a manner that no individual other than the patient is in the x-ray room when the system is producing x-rays; and

(b) The systems not meeting the requirements of subsection (7) of this section are provided with a means of indicating the cumulative time during which an individual patient has been exposed to x-rays. The timer shall be reset between examinations in such cases.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-15-083 (Order 183), § 246-225-050, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-225-050, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-28-040, filed 12/11/86; 83-19-050 (Order 2026), § 402-28-040, filed 9/16/83. Statutory Authority: RCW 70.98.050, 81-01-011 (Order 1570), § 402-28-040, filed 12/8/80; Order 1084, § 402-28-040, filed 1/14/76; Order 1, § 402-28-040, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-225-060 Radiographic systems other than fluoroscopic, dental intraoral, or veterinary systems--Beam limitation.** The useful beam shall be limited to the area of clinical interest and show evidence of collimation. This shall be deemed to have been met if a positive beam limiting device has been properly used or if evidence of collimation is shown on at least three sides or three corners of the film, (for example, projections from the shutters of the collimator, cone cutting at the corners or a border at the film's edge).

(1) *General purpose stationary and mobile x-ray systems.*

(a) There shall be provided a means for stepless adjustment of the size of the x-ray field such that at least two dimensions of the x-ray field are independently variable. The minimum field size at a SID of 100 centimeters shall be equal to or less than ten by ten centimeters.

(b) Adequate means shall be provided for visually defining the perimeter of the x-ray field. The total misalignment of the edges of the visually defined field with the respective edges of the x-ray field along either the

length or width of the visually defined field shall not exceed 2 percent of the distance from the source to the center of the visually defined field when the surface upon which it appears is perpendicular to the central axis of the x-ray beam.

(2) *In addition to the requirements of WAC 246-225-060(1) above all stationary x-ray systems shall meet the following requirements:*

(a) Means shall be provided to indicate when the axis of the x-ray beam is perpendicular to the plane of the image receptor and to align the center of the x-ray field with respect to the center of the image receptor to within 2 percent (5 percent for equipment manufactured prior to August 1974) of the SID. Dental lateral jaw examinations shall be excluded from this requirement;

(b) The beam-limiting device shall numerically indicate the field size in the plane of the image receptor to which it is adjusted;

(c) Indication of field size dimensions and SID's shall be specified in inches and/or centimeters;

(d) Indication of field size dimensions shall be such that aperture adjustments result in x-ray field dimensions in the plane of the image receptor to within 2 percent of the SID when the beam axis is perpendicular to the plane of the image receptor.

(3) *Radiographic equipment designed for only one image receptor size at a fixed SID shall be provided with means to limit the field at the plane of the image receptor to dimensions no greater than those of the image receptor, and to align the center of the x-ray field with the center of the image receptor to within 2 percent of the SID.*

(4) *Special purpose x-ray systems.*

(a) These systems shall be provided with means to limit the x-ray field in the plane of the image receptor so that such field does not exceed each dimension of the image receptor by more than 2 percent of the SID when the axis of the x-ray beam is perpendicular to the plane of the image receptor.

(b) These systems shall be provided with means to align the center of the x-ray field with the center of the image receptor to within 2 percent (5 percent for equipment manufactured prior to August 1974) of the SID.

(c) The above WAC 246-225-060 (4)(a) and 246-225-060 (4)(b) may be met with a system that meets the requirements for a general purpose x-ray system as specified in WAC 246-225-060(1) or, when alignment means are also provided, may be met with either:

(i) An assortment of removable, fixed-aperture, beam-limiting devices sufficient to meet the requirement for each combination of image receptor size and SID for which the unit is designed (each such device shall have clear and permanent markings to indicate the image receptor size and SID for which it is designed); or

(ii) A beam-limiting device having multiple fixed apertures sufficient to meet the requirement for each combination of image receptor size and SID for which the unit is designed. Permanent, clearly legible markings shall indicate the image receptor size and SID for which each aperture is designed and shall indicate which aperture is in position for use.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-060, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-28-051, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-28-051, filed 12/8/80; Order 1084, § 402-28-051, filed 1/14/76. Formerly WAC 402-28-050 (part).]

**WAC 246-225-070 Radiographic systems other than fluoroscopic, dental intraoral, or veterinary systems—Radiation exposure control devices.** (1) *Timers.*

Means shall be provided to terminate the exposure at a preset time interval, preset product of current and time, a preset number of pulses, or a preset radiation exposure to the image receptor. In addition, it shall be impossible to make an exposure when the timer is set to a zero or off position if either position is provided.

(2) *X-ray control (exposure switch):*

(a) A control which shall be the equivalent of a dead-man switch, shall be incorporated into each x-ray system such that an exposure can be terminated at any time except for:

(i) Exposure of one-half second or less, or

(ii) During serial radiography when means shall be provided to permit completion of any single exposure of the series in process.

(b) Each x-ray control shall be located in such a way as to meet the following requirements:

(i) Stationary x-ray systems shall be required to have the x-ray exposure switch permanently mounted in a protected area so that the operator has no choice but to remain in that protected area during the entire exposure;

(ii) Mobile and portable x-ray systems shall have:

(A) An exposure cord which can extend for a minimum of 12 feet from the patient; or

(B) A protective barrier of 0.25 millimeter lead equivalent between the patient and the operator.

(c) Each x-ray control shall provide visual evidence to the operator that x-rays are being produced and an audible signal that the exposure has terminated.

(3) *Automatic exposure controls (phototimers).* When an automatic exposure control is provided:

(a) Indication shall be made on the control panel when this mode of operation is selected;

(b) When the x-ray tube potential is equal to or greater than 50 kVp, the minimum exposure time for field emission equipment rated for pulsed operation shall be equal to or less than the interval equivalent to two pulses;

(c) The minimum exposure time for all equipment other than that specified in WAC 246-225-070 (3)(b) shall be equal to or less than 1/60 second or a time interval required to deliver 5 mAs, whichever is greater.

(4) *Timer reproducibility.* With a timer setting of 0.5 seconds or less, the difference between the maximum exposure time ( $T_{max}$ ) and the minimum exposure time ( $T_{min}$ ) shall be less than or equal to 10% of the average exposure time ( $T$ ), when four timer tests are performed:

$$(T_{max} - T_{min}) \leq 0.1T$$

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-070, filed 7/23/91, effective 8/23/91. Statutory

Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-070, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-28-052, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-28-052, filed 12/8/80; Order 1084, § 402-28-052, filed 1/14/76. Formerly WAC 402-28-050 (part).]

**WAC 246-225-090 Radiographic systems other than fluoroscopic and dental intraoral—Exposure reproducibility.** The exposure produced shall be reproducible to within the following criterion: When all technique factors are held constant, the coefficient of variation shall not exceed 0.05.

(1) For manual exposure control mode, this shall be deemed to have been met if when four exposures at identical technique factors are made, the difference between the maximum exposure value ( $E_{max}$ ) and the minimum exposure value ( $E_{min}$ ) shall be less than or equal to 10% of the average exposure (E):

$$(E_{max} - E_{min}) \leq 0.10E$$

(2) For phototimed exposure control mode, this shall be deemed to have been met if when four exposures at identical technique factors are made, the difference between the maximum exposure value ( $E_{max}$ ) and the minimum exposure value ( $E_{min}$ ) shall be less than or equal to 10% of the average exposure (E):

$$(E_{max} - E_{min}) \leq 0.1E$$

The four exposures are to be made under the following conditions in phototimed mode:

- (a) The kV is held constant.
- (b) The mA, if selectable, is held constant.
- (c) The selected density, if selectable, is held constant.
- (d) Selection of phototimer radiation detectors (single or multiple detectors selected), if available, is varied for each of the four exposures.
- (e) The same attenuator is placed in the x-ray field between the selected phototimer radiation detectors (photocells) and the radiation detector used to determine the four exposure values.
- (f) The selected phototimer radiation detectors (photocells) are within the x-ray field during each exposure measurement and are covered completely by the attenuator.

(3) Systems employing deliberately mismatched phototimed cells are permitted, providing written specifications for the mismatch are available for inspection.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-090, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-28-054, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-28-054, filed 12/8/80; Order 1084, § 402-28-054, filed 1/14/76. Formerly WAC 402-28-050 (part).]

**WAC 246-225-110 Intraoral dental radiographic systems.** In addition to the provisions of WAC 246-225-020, 246-225-030, and 246-225-040 the requirements of this section apply to x-ray equipment and associated facilities used for dental radiography. Criteria for extraoral dental radiographic systems are covered in WAC 246-225-060, 246-225-070, and 246-225-080.

(1) *Source-to-skin distance (SSD).* X-ray systems designed for use with an intraoral image receptor shall be provided with means to limit source-to-skin distance to not less than:

- (a) 18 centimeters if operable above 50 kilovolts peak, or
- (b) 10 centimeters if operable only at 50 kilovolts peak.

(2) *Field limitation.*

(a) Radiographic systems designed for use with an intraoral image receptor shall be provided with means to limit the x-ray beam such that:

- (i) If the minimum source-to-skin distance (SSD) is 18 centimeters or more, the x-ray field, at the minimum SSD, shall be containable in a circle having a diameter of no more than 7 centimeters; and
- (ii) If the minimum SSD is less than 18 centimeters, the x-ray field, at the minimum SSD, shall be containable in a circle having a diameter of no more than 6 centimeters.

(b) An open ended position indicating device shall be used. The shielding shall be equivalent to that required for the diagnostic source assembly (WAC 246-225-040(3)).

(3) *Timers.* Means shall be provided to terminate the exposure at a preset time interval, preset product of current and time, a preset number of pulses, or a preset radiation exposure to the image receptor. In addition,

- (a) Termination of exposure shall cause automatic resetting of the timer to its initial setting or to zero.
- (b) It shall not be possible to make an exposure when the timer is set to a zero or off position if either position is provided.

(4) *X-ray control exposure switch:*

(a) A control, which shall be the equivalent of a dead-man switch, shall be incorporated into each x-ray system.

(b) Each x-ray control shall be located in such a way as to meet the following criterion:

- (i) For stationary x-ray systems it shall be required that the control switch be permanently mounted in a protected area (e.g., corridor outside the room) so that the operator has no choice but to remain in that protected area during the entire exposure.
- (ii) Permanently mounted in a protected area shall be interpreted as meaning that the exposure switch is fixed in position no less than 36 inches from access to the direct scatter radiation field.

(c) The x-ray control shall provide a visual or audible indication of x-ray production or termination at the operator's protected position.

(5) *Exposure reproducibility.* The co-efficient of variation shall not exceed 0.05 when all technique factors are held constant. This requirement shall be deemed to have been met if, when four exposures are made at identical technique factors, the difference between the maximum exposure ( $E_{max}$ ) and the minimum exposure ( $E_{min}$ ) shall be less than or equal to 10% of the average exposure (E):

$$(E_{max} - E_{min}) < 0.1E$$

(6) No diagnostic dental x-ray machine with a fixed, nominal kVp of less than 50 shall be permitted.

(7) *Operating controls.*

(a) Patient and film holding devices shall be used when the techniques permit.

(b) Neither the tube housing nor the position indicating device shall be hand held during an exposure. The tube housing shall remain stable during exposure.

(c) The x-ray system shall be arranged and operated in such a manner that the useful beam at the patient's skin does not exceed the dimensions specified in WAC 246-225-110 (2)(a).

(d) Dental fluoroscopy without image intensification shall be prohibited.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-15-083 (Order 183), § 246-225-110, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-225-110, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 83-19-050 (Order 2026), § 402-28-080, filed 9/16/83. Statutory Authority: RCW 70.98.050, 81-01-011 (Order 1570), § 402-28-080, filed 12/8/80; Order 1084, § 402-28-080, filed 1/14/76; Order 1, § 402-28-080, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-225-120 Therapeutic x-ray installations less than 1 MeV. (1) Equipment requirements.**

(a) *Leakage radiation.* When the tube is operated at its leakage technique factors, the leakage radiation shall not exceed the value specified at the distance specified for the classification of that x-ray system:

(i) Contact therapy systems. Leakage radiation shall not exceed 100 milliroentgens per hour at five centimeters from the surface of the tube housing assembly;

(ii) Zero to one hundred fifty kVp systems. Systems shall have a leakage radiation which does not exceed one roentgen in one hour at one meter from the source;

(iii) One hundred fifty-one to nine hundred ninety-nine kVp systems. The leakage radiation shall not exceed one roentgen in one hour at one meter from the source except systems that operate in excess of 500 kVp may have a leakage radiation at one meter from the source equivalent to the exposure within one hour of the useful beam at one meter from the source multiplied by a factor of 0.001.

(b) *Permanent beam limiting devices.* Permanent fixed diaphragms or cones used for limiting the useful beam shall provide the same or higher degree of protection as that required by the tube housing assembly.

(c) *Removable and adjustable beam limiting devices.*

(i) Removable beam limiting devices shall, for the portion of the useful beam to be blocked by these devices, transmit not more than one percent of the original x-ray beam at the maximum kilovoltage and maximum treatment filter;

(ii) Adjustable beam limiting devices installed after the effective date of this section shall meet the requirements of (c)(i) of this subsection;

(iii) Adjustable beam limiting devices installed before the effective date of this section shall, for the portion of the x-ray beam to be blocked by these devices, transmit not more than five percent of the original x-ray beam at

the maximum kilovoltage and maximum treatment filter.

(d) *Filter and wedge systems.* Filter systems shall meet the following requirements:

(i) Filters cannot be accidentally displaced from the useful beam at any possible tube orientation;

(ii) Each filter is marked as to its material of construction and its thickness or wedge angle for wedge filters;

(iii) It shall be possible for the operator to determine the presence or absence of each filter in the useful beam when the operator is at the control panel, either by display at the control panel or by direct observation; and

(iv) The filter insertion slot opening shall be covered with an attenuator equivalent to four-pound lead under operating conditions.

(e) *Tube immobilization.* The tube housing assembly shall be capable of being immobilized during stationary treatments.

(f) *Focal spot marking.* The tube housing assembly shall be so marked that it is possible to determine the location of the focal spot to within five millimeters, and such marking shall be readily accessible for use during calibration procedures.

(g) *Timer.*

(i) A timer shall be provided which has a display at the treatment control panel. The timer shall be graduated in minutes and fractions of minutes. The timer shall have a preset time selector and a means of determining elapsed time;

(ii) The timer shall be a cumulative timer which activates with radiation and retains its reading after irradiation is interrupted or terminated;

(iii) The timer shall terminate irradiation when a pre-selected time has elapsed;

(iv) The timer shall permit accurate presetting and determination of exposure times as short as 1 second;

(v) The timer shall terminate irradiation when set to zero;

(vi) The timer shall not activate until the shutter is opened, when patient irradiation is controlled by a shutter mechanism.

(h) *Control panel functions.* The control panel, in addition to the displays required in other provisions of this chapter, shall have:

(i) An indication of whether x-rays are being produced;

(ii) Means for indicating kV and x-ray tube current;

(iii) The means for terminating an exposure at any time;

(iv) A locking device which will prevent unauthorized use of the x-ray system; and

(v) For x-ray equipment manufactured after the effective date of this section, a positive display of specific filter(s) in the beam.

(i) *Source-to-patient distance.* There shall be means of determining the source-to-patient distance to within five millimeters.

(j) *Shutters.* Unless it is possible to bring the x-ray output to the prescribed exposure parameters within five seconds, the entire useful beam shall be automatically

attenuated by a shutter having a lead equivalency not less than that of the tube housing assembly. In addition:

(i) After the unit is at operating parameters, the shutter shall be controlled electrically by the operator from the control panel;

(ii) An indication of shutter position shall appear at the control panel.

(k) *Low filtration x-ray tubes.* Each x-ray system equipped with a beryllium or other low-filtration window shall be clearly labeled as such upon the tube housing assembly and at the control panel;

(l) *Alignment.* When the therapy x-ray system is equipped with a light field indicating the x-ray field, the misalignment of one field edge to the other shall not exceed one percent of any source-to-treatment distance.

(2) *Facility design requirements for systems capable of operating above 50 kVp.*

In addition to shielding adequate to meet requirements of chapters 246-235 and 246-221 WAC and the shielding plan review provisions of WAC 246-225-030, the treatment room shall meet the following design requirements:

(a) *Warning lights.* Treatment rooms to which access is possible through more than one entrance shall be provided with warning lights, in a readily observable position near the outside of all access doors, which will indicate when the useful beam is "on." Or, as an alternative, entrances other than the main one shall be equipped with interior locks, activated for the period of exposure, and the main entrance shall be under control of the operator.

(b) *Voice communication.* Provision shall be made for two-way aural communication between the patient and the operator at the control panel; however, where excessive noise levels make aural communication impractical, other methods of communication shall be used.

(c) *Viewing systems.* Windows, mirrors, closed-circuit television, or an equivalent system shall be provided to permit continuous observation of the patient during irradiation and shall be so located that the operator can observe the patient from the control panel. When the primary viewing system is by electronic means (e.g., television), an alternate viewing system shall be available for use in the event of electronic failure or treatment must be discontinued until repair is made. If treatment is to be discontinued, this policy shall be included in the written safety procedures. A copy of the safety procedures shall be provided to the operator.

(d) *Additional requirements.* Treatment rooms which contain an x-ray system capable of operating above 150 kVp shall meet the following additional requirements:

(i) All necessary shielding, except for any beam interceptor, shall be provided by fixed barriers;

(ii) The control panel shall be outside the treatment room;

(iii) All doors of the treatment room shall be electronically connected to the control panel such that x-ray production cannot occur unless all doors are closed;

(iv) When the doors referred to in (d)(iii) of this subsection are opened while the x-ray tube is activated:

(A) X-ray production shall terminate within one second; or

(B) The radiation at a distance of one meter from the source shall be reduced to less than 100 milliroentgens per hour within one second.

(v) After the radiation output of the x-ray tube has been affected by the opening of any door referred to in (d)(iii) of this subsection, it shall be possible to restore the x-ray system to full operation only upon:

(A) Closing the door; and subsequently

(B) Reinitiating the exposure at the control panel.

(e) *Calibrations.*

(i) The calibration of an x-ray system shall be performed at intervals not to exceed one year and after any change or replacement of components which could cause a change in the radiation output.

(ii) The calibration of the radiation output of the x-ray system shall be performed by a qualified expert who is physically present at the facility during such calibration.

(iii) Calibration of the radiation output of an x-ray system shall be performed with a calibrated instrument. The calibration of such instrument shall be traceable to a national standard. The instrument shall have been calibrated within the preceding two years.

(iv) The calibrations made pursuant to (e)(i) of this subsection shall be such that the dose at a reference point in soft tissue can be calculated to within  $\pm$  five percent.

(v) The calibration of the x-ray system shall include, but not be limited to, the following determinations:

(A) The exposure rates for each combination of field size, technique factors, filter, and treatment distance used;

(B) The degree of alignment between the radiation field and the field indicated by the localizing device if such device is present; and

(C) An evaluation of the uniformity of the radiation field symmetry for the field sizes used and any dependence upon tube housing assembly orientation.

(vi) Records of calibration performed pursuant to (e) of this subsection shall be maintained by the registrant for two years after completion of the calibration.

(vii) A copy of the most recent x-ray system calibration shall be available for use by the operator at the control panel.

(f) *Operating procedures.*

(i) When a patient must be held in position for radiation therapy, mechanical supporting or restraining devices shall be used;

(ii) The tube housing assembly shall not be held by an individual during exposures;

(iii) No individual other than the patient shall be in the treatment room unless such individual is protected by a barrier sufficient to meet the requirements of chapter 246-221 WAC. No individual other than the patient shall be in the treatment room during exposures when the kVp exceeds 150;

(iv) The x-ray system shall not be used in the administration of radiation therapy unless the requirements of (e) of this subsection have been met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-120, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-120, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-28-091, filed 12/11/86; 83-19-050 (Order 2026), § 402-28-091, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-28-091, filed 12/8/80.]

**WAC 246-225-130 X-ray and electron therapy systems with energies of one MeV and above.** Chapter 246-229 WAC except WAC 246-229-100 (3) and (4) shall apply to medical facilities using therapy systems with energies 1 MeV and above.

(1) *Definitions.* In addition to the definitions provided in WAC 246-225-010, the following definitions shall be applicable to this section.

(a) "Applicator" means a structure which indicates the extent of the treatment field at a given distance from the nominal source and which may or may not incorporate an additional beam-limiting device.

(b) "Beam scattering foil" means a device which scatters and flattens a beam of electrons.

(c) "Central axis of the beam" means a line passing through the origin of the source and the center of the plane figure formed by the edge of the secondary collimating jaws when in a symmetric mode.

(d) "Dose monitoring system" means a system of devices for the detection and display of quantities of radiation.

(e) "Dose monitor unit" means a unit from which the absorbed dose can be calculated.

(f) "Existing equipment" means therapy systems subject to this section which were manufactured on or before the effective date of these regulations.

(g) "Field flattening device" means an absorber used to homogenize the dose rate over the area of a useful beam of x-rays.

(h) "Field size" means the dimensions of an area in a plane perpendicular to the specified direction of the beam of incident radiation at a maximum dose depth. Determine dimensions by fifty percent decrement lines.

(i) "Gantry" means that part of the system supporting and allowing possible movements of the radiation head.

(j) "Interruption of irradiation" means the stopping of irradiation with the possibility of continuing irradiation without resetting of the operating conditions at the control panel.

(k) "Isocenter" means a fixed point in space located at the intersection of the rotation axes of the principal movements of the therapy system.

(l) "Moving beam therapy" means radiation therapy with relative displacement of the useful beam and the patient during irradiation.

(m) "New equipment" means systems subject to this section which were manufactured after effective date of these regulations.

(n) "Nominal source" means a point from which radiation originates.

(o) "Normal treatment distance" means the distance between the virtual source and a reference point on the

central axis of the beam. The reference is located at a position on the central axis at a specified distance from the nominal source.

(p) "Patient" means an individual subjected to examination and treatment.

(q) "Phantom" means a volume of material behaving in a manner similar to tissue with respect to the attenuation and scattering of radiation.

(r) "Primary dose monitoring system" means a system which will monitor the quantity of radiation produced during irradiation and which will terminate irradiation when a preselected number of dose monitor units have been acquired.

(s) "Radiation treatment prescription" means the absorbed dose which is intended to be delivered to the treatment volume.

(t) "Radiation head" means the structure from which the useful beam emerges.

(u) "Redundant dose monitoring combination" means a combination of two dose monitoring systems in which both systems are arranged to terminate irradiation in accordance with a preselected number of dose monitor units.

(v) "Secondary dose monitoring system" means a system which will terminate irradiation in the event of failure of the primary system.

(w) "Shadow tray" means a device attached to the radiation head to support auxiliary beam limiting material.

(x) "Stationary beam therapy" means radiation therapy without relative displacement of the useful beam and the patient during irradiation.

(y) "Target" means that part of a radiation source which intercepts a beam of accelerated particles with subsequent emission of other radiation.

(z) "Termination of irradiation" means the stopping of irradiation in a fashion which will not permit continuance of irradiation without the resetting of operating conditions at the control panel.

(aa) "Treatment field" means the cross-sectional area of the patient's tissue which is to be irradiated.

(bb) "Treatment volume" means that portion of the patient's body which is to be irradiated.

(2) *Requirements for equipment.*

(a) *Leakage radiation to the patient area.*

(i) New equipment shall meet the following requirements:

(A) For all operating conditions, the dose equivalent in rem due to leakage radiation, including x-ray and electrons, but excluding neutrons, at any point in a circular plane of two meters radius centered on and perpendicular to the central axis of the beam at the normal treatment distance and outside the maximum useful beam, shall not exceed 0.1 percent of the maximum dose equivalent in rem of the unattenuated useful beam measured at the point of intersection of the central axis of the beam and the plane surface. Measurements shall be averaged over an area up to but not exceeding one hundred square centimeters at the positions specified; and

(B) For each system the registrant shall determine, or obtain from the manufacturer, the leakage radiation existing at the positions specified in (a)(i)(A) of this subsection for specified operating conditions. Records for leakage radiation shall be maintained at the installation for inspection by the department.

(ii) Existing equipment (that installed prior to the effective date of the regulations) shall meet the following requirements:

(A) The leakage radiation, excluding neutrons, at any point in the area specified by (a)(i)(A) of this subsection, where such area intercepts the central axis of the beam one meter from the nominal source, shall not exceed 0.1 percent of the maximum dose equivalent in rems of the unattenuated useful beam measured at the point of intersection of the central axis of the beam and the surface of the reference circular plane. Measurements shall be averaged over an area up to but not exceeding one hundred square centimeters at the positions specified.

(B) For each system, the registrant shall determine, or obtain from the manufacturer, the leakage radiation existing at the positions specified in (a)(ii)(A) of this subsection for specified operating conditions. Records for radiation leakage shall be maintained at the installation for inspection by the department.

(b) *Leakage radiation outside the patient area.*

(i) The dose equivalent in rem due to leakage radiation, except in the area specified in (a) of this subsection, when measured at any point one meter from the path of the charged particle, before the charged particle strikes the target or window, shall not exceed 0.1 percent for x-ray leakage of the maximum dose equivalent in rems of the unattenuated useful beam measured at the point of intersection of the central axis of the beam and the circular plane specified in (a) of this subsection.

(ii) The registrant shall determine, or obtain from the manufacturer, the actual leakage radiation existing at the positions specified in (a) of this subsection for specified operating conditions. Measurements shall be averaged over an area up to but not exceeding one hundred square centimeters at the positions specified.

(c) *Beam-limiting devices.* Secondary beam-limiting devices shall be provided and such devices shall transmit no more than two percent of the useful beam for the portion of the useful beam attenuated by the beam-limiting device. The neutron component of the useful beam shall not be included in this requirement.

(d) *Beam-modifying devices.*

(i) When the absorbed dose rate information required by subsection (2)(q) of this section is dependent on operation with a beam-flattening or beam-scattering device in place, the device shall be removable from the machine only by the use of tools.

(ii) In systems using interchangeable beam-flattening devices or beam-scattering foils:

(A) Irradiation shall not be possible until a selection of beam-modifying device is made and verified at the treatment control panel;

(B) An interlock system shall be provided to prevent irradiation when the beam-modifying device selected is not in the correct position; and

(C) A display at the control panel shall indicate what beam-modifying device is selected.

(e) *Wedges.*

(i) Presence of wedges in the beam shall be indicated at the control panel, by direct observation or by electronic means.

(ii) Each wedge removable from the system shall be clearly identified as to that wedge's material of construction, thickness, and wedge angle.

(iii) An interlock shall be provided to prevent irradiation when a wedge selection carried out in the treatment room does not agree with the wedge selection indicated at the control panel.

(f) *Beam quality.* The registrant shall obtain from the therapy x-ray system manufacturer, and have available, the following information:

(i) At various beam energies, the x-ray absorbed dose expressed as a fraction of maximum absorbed dose;

(ii) At various beam energies, the absorbed dose at the surface of the skin as a fraction of the maximum absorbed dose; and

(iii) The maximum percentage absorbed dose due to stray neutrons in the useful beam at specified operating conditions.

(g) *Beam monitors.* Therapy systems shall be provided with radiation detectors in the radiation head.

(i) New equipment shall be provided with two or more radiation detectors. The detectors shall be incorporated into two monitoring systems arranged either as a primary/primary combination or as a primary/secondary combination.

(ii) Existing equipment shall be provided with one or more radiation detectors. The detector shall be incorporated into a primary system.

(iii) The detectors and system where the detector is incorporated shall meet the following requirements:

(A) Each primary system shall have a detector which is a transmission full-beam detector placed on the patient side of beam-modifying devices;

(B) The detectors shall be removable only with tools and shall be interlocked to prevent incorrect positioning;

(C) Each detector shall be capable of independently monitoring and controlling the useful beam;

(D) Each detector shall form part of a dose-monitoring system from whose readings in dose monitor units the absorbed dose, at a reference point in the treatment volume can be calculated;

(E) For new equipment, the design of the dose-monitoring systems of subsection (2)(i) of this section shall assure the malfunctioning of one system shall not affect the correct functioning of the second system. In addition, the failure of an element common to both systems shall terminate irradiation.

(F) Each dose monitoring system shall have a legible display at the treatment control panel. Each display shall:

(I) Maintain a reading until intentionally reset to zero;

(II) Have only one scale and no scale multiplying factors in new equipment; and

(III) Utilize a design so increasing dose is displayed by increasing numbers and shall be designed so, in the event of an overdosage of radiation, the absorbed dose may be accurately determined under normal conditions of use or foreseeable failures.

(G) In the event of power failure, the dose-monitoring information required in subsection (2)(i) of this section displayed at the control panel at the time of failure shall be retrievable in one or more systems.

(h) *Beam symmetry.*

(i) A therapy machine installed after the effective date of these regulations shall have the capability of comparing the dose rates in each of the four quadrants of the central eighty percent of the useful beam.

(ii) Beam symmetry information shall be displayed at the treatment control panel making possible the following differential between quadrants:

(A) Five percent for straight-through accelerators; and

(B) Three percent for bending-magnet accelerators.

(iii) Beam asymmetry in excess of a ten percent quadrant differential shall cause treatment to terminate, or shall prevent irradiation.

(i) *Selection and display of dose monitor units.*

(i) Irradiation shall not be possible until a selection of a number of dose monitor units is made at the treatment control panel.

(ii) After useful beam termination, it shall be necessary manually to reset the preselected dose monitor units before treatment is reinitiated.

(iii) The preselected number of dose monitor units shall be displayed at the treatment control panel until reset manually for the next irradiation.

(j) *Termination of irradiation by the dose monitoring system.*

(i) Each of the required monitoring systems shall be capable of independently terminating an irradiation. Provision shall be made to test the correct operation of each system.

(ii) Each primary system shall terminate irradiation when the preselected number of dose monitor units is detected by the system.

(iii) Each secondary system shall terminate irradiation when a maximum of the preselected number of dose monitor units plus forty is detected by the system.

(iv) For new equipment, indicators on the control panel shall show which monitoring system terminated the beam.

(k) *Interruption switches.* It shall be possible to interrupt irradiation and equipment movements at any time from the operator's position at the treatment control panel. Following any interruption, it shall be possible to restart irradiation by operator action without any reselection of operating conditions. If any change is made of a preselected value during an interruption, the equipment shall go to termination condition.

(l) *Termination switches.* It shall be possible to terminate irradiation and equipment movements, or go from an interruption condition to termination conditions, at

any time from the operator's position at the treatment control panel.

(m) *Timer.*

(i) A timer shall be provided which has a display at the treatment control panel. The timer shall be graduated in minutes and decimals of minutes. The timer shall have a preset time selector and an elapsed time indicator.

(ii) The timer shall be a cumulative timer which switches on and off with the radiation and retains its reading after irradiation is interrupted or terminated. It shall be necessary to zero and subsequently reset the elapsed time indicator and the preset time selector after irradiation is terminated before irradiation shall again be possible.

(iii) The timer shall terminate irradiation when a preselected time has elapsed if the dose monitoring systems fail to terminate irradiation.

(n) *Selection of radiation type.* Equipment capable of both x-ray therapy and electron therapy shall meet the following requirements:

(i) Irradiation shall not be possible until a selection of radiation type is made at the treatment control panel;

(ii) An interlock system shall be provided to insure that the equipment can emit only the selected radiation type;

(iii) An interlock system shall be provided to prevent irradiation if selected operations carried out in the treatment room do not agree with the selected operations carried out in the treatment control panel;

(iv) With the exception of a specified number of dose monitor units for the purpose of portal film exposures, an interlock system shall be provided to prevent irradiation with x-rays when electron applicators are in place and to prevent irradiation with electrons when accessories for x-ray therapy are in place; and

(v) The radiation type selected shall be displayed at the treatment control panel before and during irradiation.

(o) *Selection of energy.* Equipment capable of generating radiation beams of different energies shall meet the following requirements:

(i) Irradiation shall not be possible until a selection of energy is made at the treatment control panel;

(ii) An interlock system shall be provided to insure the equipment can emit only the energy of selected radiation;

(iii) An interlock system shall be provided to prevent irradiation if selected operations carried out in the treatment room do not agree with the selected operations carried out at the treatment control panel; and

(iv) The energy selected shall be displayed at the treatment control panel before and during irradiation.

(p) *Selection of stationary beam therapy or moving beam therapy.* Equipment capable of both stationary beam therapy and moving beam therapy shall meet the following requirements:

(i) Irradiation shall not be possible until a selection of stationary beam therapy or moving beam therapy is made at the treatment control panel;

(ii) An interlock system shall be provided to insure the equipment can operate only in the selected mode;

(iii) An interlock system shall be provided to prevent irradiation when any selected operations carried out in the treatment room do not agree with the selected operations carried out at the treatment control panel;

(iv) An interlock system shall be provided to terminate irradiation when the movement stops during moving beam therapy;

(v) Moving beam therapy shall be controlled so the required relationship between the number of dose monitor units and movement is obtained; and

(vi) The mode of operation shall be displayed at the treatment control panel.

(q) *Absorbed dose rate.* For new equipment, a system shall be provided from whose readings the absorbed dose rate at a reference point in the treatment volume can be calculated.<sup>3</sup> In addition:

(i) The quotient of the number of dose monitor units by time shall be displayed at the treatment control panel; and

(ii) If the equipment can deliver, under any conditions, an absorbed dose rate at the normal treatment distance more than twice the maximum value specified by the manufacturer's anticipated dose rate for any machine parameters utilized, a device shall be provided which terminates irradiation when the absorbed dose rate exceeds a value twice the specified maximum. The value at which the irradiation is terminated shall be in a registrant-maintained record.

(r) *Location of focal spot and beam orientation.* The registrant shall determine, or obtain from the manufacturer, the location with reference to an accessible point on the radiation head of:

(i) The x-ray target or the virtual source of x-rays;

(ii) The electron window or the scattering foil;

(iii) All possible orientations of the useful beam.

(s) *System interlock checks.* Capabilities shall be provided to check radiation safety interlocks. When preselection of operating conditions requires action in the treatment room and at the treatment control panel, selection at one location shall not give a display at the other location until the requisite selected operations in both locations are completed.

(t) *Facility and shielding requirements.* In addition to chapter 246-221 WAC, the following design requirements shall apply:

(i) Except for entrance doors or beam interceptors, required barriers shall be fixed barriers;

(ii) The treatment control panel shall be located outside the treatment room;

(iii) Windows, mirrors, closed-circuit television, or other equivalent viewing systems shall be provided to permit continuous observation of the patient during irradiation and shall be located so the operator may observe the patient from the treatment control panel. When the viewing system is by electronic means, for example, by television, an alternate viewing system shall be provided for use in the event of the primary system failure, or, alternatively, treatments shall be discontinued until the viewing system is again functional;

(iv) Provision shall be made for two-way aural communication between the patient and the operator at the treatment control panel. However, where excessive noise levels make aural communications impractical, other methods of communication shall be used;

(v) Treatment rooms to which access is possible through two entrances or more shall be provided with warning lights and shall indicate when the useful beam is "on" in a readily observable position near the outside of all access doors; and

(vi) Interlocks shall be provided so entrance doors shall be closed before treatment is initiated or continued. When the radiation beam is interrupted by any door opening, it shall be possible to restore the machine to operation only by closing the door and reinitiating exposure by manual action at the control panel.

(u) *Surveys, calibrations, spot checks and operating procedures.*

(i) *Survey.*

(A) New facilities, and existing facilities not previously surveyed, shall have a survey made by, or under the direction of, a qualified expert. Such surveys shall also be done after a change in the facility or equipment causing a significant increase in radiation hazard.

(B) The registrant shall obtain a written report of the survey from the qualified expert and the registrant shall transmit a copy of the report to the department.

(C) The report shall indicate instances where the installation, in the opinion of the qualified expert, is in violation of applicable regulations and shall cite the section violated.

(ii) *Calibrations.*

(A) The calibration of systems subject to this section shall be performed before the system is first used for irradiation of patient and thereafter at time intervals which do not exceed twelve months and after any change which significantly alters the calibration, spatial distribution, or other characteristics of the therapy beam.

(B) The calibration shall be performed by a qualified expert.

(C) Calibration of the dose equivalent of the therapy beam shall be performed with a measurement instrument of which the calibration is traceable to national standards of exposure or absorbed dose and which shall have been calibrated within the preceding two years.

(D) Calibrations made under subsection (2)(u)(ii) of this section shall require the dose at a reference point in soft tissue be calculated within  $\pm 5$  percent.

(E) The calibration of the therapy beam shall include, but not be limited to, the following determinations:

(I) Verification that the equipment is operating in compliance with the design specifications concerning the light localizer, the side light and back-pointer alignment with the isocenter, when applicable, variation in the axis of rotation for the table, gantry and jaw system, and beam flatness and symmetry at specified depths;

(II) The output factors in terms of dose per monitor unit or dose per minute at a specific depth in a phantom for the range of field sizes used, for each effective energy, and for each treatment distance used for radiation therapy;

(III) The congruence between the radiation field and the field indicated by the localizing device; and

(IV) The uniformity of the radiation field and its dependency upon the direction of the useful beam.

(F) Records of the calibration performed under subsection (2)(u)(ii) of this section shall be maintained by the registrant for two years after completion of the calibration.

(G) A copy of the latest calibration performed under subsection (2)(u)(ii) of this section shall be available for operator use.

(iii) Spot checks. Spot checks shall be performed on the system subject to this section. Such spot checks shall meet the following requirements:

(A) A qualified expert shall develop, in writing, spot check procedures;

(B) The measurements taken during spot checks shall demonstrate the degree of consistency of the operating characteristics affecting the radiation output of the system or the radiation delivered to a patient during a therapy procedure;

(C) The spot check procedures shall specify the frequency of tests or measurements performed;

(D) For systems where beam quality can vary significantly, spot checks shall include quality checks;

(E) Where a system has built-in devices which provide a self-check of any parameter during irradiation, the spot check procedures shall require the parameter be independently verified at specific time intervals;

(F) Erratic spot checks or inconsistent spot checks of calibration data shall be promptly investigated and corrected before the system is used for patient irradiation;

(G) When a spot check indicates a significant change in the operating characteristics of a system, as specified in the qualified expert's spot check procedures, the system shall be recalibrated as required under subsection (2)(u)(ii) of this section;

(H) Records of spot check measurements performed under subsection (2)(u)(iii) of this section shall be maintained by the registrant for a period of one year or for twice as long as the spot check cycle, whichever is greater;

(I) Operating procedures.

(I) No individual other than the patient shall be in the treatment room during treatment of a patient.

(II) If a patient must be held in position during treatment, mechanical supporting or restraining devices shall be used.

(III) The system shall not be used in the administration of radiation therapy unless subsection (2)(u)(i), (ii), and (iii) of this section are met.

<sup>3</sup>The radiation detectors specified under subsection (2)(g) of this section may form part of this system.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-130, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-130, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-28-101, filed 12/11/86. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-28-101, filed 12/8/80.]

#### WAC 246-225-140 Veterinary medicine radiographic installations. (1) *Equipment.*

(a) The protective tube housing shall be of diagnostic type.

See WAC 246-225-040(4).

(b) Diaphragms, cones, or a stepless adjustable collimator shall be used for collimating the useful beam to the area of clinical interest and shall provide the same degree of protection as is required of the housing. Cones or diaphragms, if used, shall be marked with their field size and the distance at which they are to be used.

(c) The half-value layer (HVL) of the useful beam shall not be less than as shown in the following table:

| Measured Potential (kilovolts peak) | Half-value Layer (millimeters of aluminum equivalent) |
|-------------------------------------|---|
| 70 and below                        | 1.5   |
| 71                                  | 2.1   |
| 80                                  | 2.3   |
| 90                                  | 2.5   |
| 100                                 | 2.7   |
| 110                                 | 3.0   |
| 120                                 | 3.2   |

(d) A device shall be provided to terminate the exposure after a preset time or exposure. It must not be possible for the device to allow an exposure when preset at "zero" or "off."

(e) A dead-man type of exposure switch shall be provided, together with an electrical cord of sufficient length, so that the operator can stand out of the useful beam and at least two meters from the animal during all x-ray exposures.

(f) Reproducibility requirements as described under WAC 246-225-090.

(2) *Structural shielding.* All wall, ceiling, and floor areas shall be equivalent to or provided with applicable protective barriers as required in WAC 246-225-030(1).

(3) *Operating procedures.*

(a) In any application in which the operator is not located behind a protective barrier, clothing consisting of a protective apron having a lead-equivalent of not less than 0.25 millimeters shall be worn by the operator and any other individuals in the room during exposures.

(b) No individual other than the operator shall be in the x-ray room while exposures are being made unless such individual's assistance is required.

(c) When an animal or film must be held in position during radiography, mechanical supporting or restraining devices should be used. If the animal must be held by an individual, that individual shall be protected with appropriate shielding devices, such as protective gloves and apron, and that individual shall be so positioned that no part of that individual's body will be struck by the useful beam. The requirements of WAC 246-221-090, Personnel monitoring, and WAC 246-225-020 (2)(h)(iv) apply to such individuals.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-140, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-140, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-28-110, filed 9/16/83. **WAC 246-225-150 X-ray film developing requirements.** Compliance with this section is required of healing arts registrants and is designed to ensure the patient and operator exposure is minimized, and to produce optimum image quality and diagnostic information.

(1) Manual processing of films:

(a) The following relationship between temperature of the developer and development time must be used (standard chemistry only):

| THERMOMETER READINGS<br>(DEGREES) |    | MINIMUM DEVELOPING<br>TIMES<br>(MINUTES) |
|-----------------------------------|----|--|
| C                                 | F  |  |
| 27                                | 80 | 2  |
|                                   | 79 | 2  |
|                                   | 78 | 2 1/2                                    |
|                                   | 77 | 2 1/2                                    |
| 24                                | 76 | 3  |
|                                   | 75 | 3  |
|                                   | 74 | 3 1/2                                    |
|                                   | 73 | 3 1/2                                    |
| 22                                | 72 | 4  |
|                                   | 71 | 4  |
|                                   | 70 | 4 1/2                                    |
|                                   | 69 | 4 1/2                                    |
| 20                                | 68 | 5  |
|                                   | 67 | 5 1/2                                    |
|                                   | 66 | 5 1/2                                    |
|                                   | 65 | 6  |
| 18                                | 64 | 6 1/2                                    |
|                                   | 63 | 7  |
|                                   | 62 | 8  |
|                                   | 61 | 8 1/2                                    |
| 16                                | 60 | 9 1/2                                    |

(b) *Processing of film.* All films shall be processed to achieve adequate sensitometric performance. This criterion shall be adjudged met if:

(i) Film manufacturer's published recommendations for time and temperature are followed; or

(ii) Each film is developed in accordance with the time-temperature chart as required under subdivision (a) of this subsection.

(c) Devices shall be available giving:

(i) The actual temperature of the developer; and

(ii) An audible or visible signal indicating the termination of a preset time (in minutes).

(d) Chemical-film processing control.

(i) Chemicals shall be mixed in accordance with the chemical manufacturer's recommendations.

(ii) Developer replenisher shall be periodically added to the developer tank based on the recommendations of

the chemical or film manufacturer. Solution may be removed from the tank to permit the addition of an adequate volume of replenisher.

(iii) All processing chemicals shall be completely replaced at least every two months.

(2) Automatic film processors shall be set up and maintained so radiographic density and contrast are optimal. This criterion shall be adjudged met if:

(a) Film manufacturer's published specifications for time and temperature are followed. In the absence of such specifications, the film shall be developed using the following chart:

| MINIMAL REQUIRED<br>DEVELOPER TEMPERATURE | PROCESSOR DEVELOPER<br>IMMERSION TIME* |         |
|---|--|---------|
| °C  | °F                                     | Seconds |
| 35  | 95                                     | 20      |
| 34.5                                      | 94                                     | 21      |
| 34  | 93                                     | 22      |
| 33.5                                      | 92                                     | 23      |
| 33  | 91                                     | 24      |
| 32  | 90                                     | 25      |
| 31.5                                      | 89                                     | 26      |
| 31  | 88                                     | 27      |
| 30.5                                      | 87                                     | 28      |
| 30  | 86                                     | 29      |
| 29.5                                      | 85                                     | 30      |

\*Immersion time only, no cross-over time included.

The specified developer temperature and immersion time shall be posted in the dark room or on the automatic processor; and

(b) Replenishment of the developer chemistry is optimal:

(i) The processor shall deliver an adequate rate of developer replenishment; and

(ii) For facilities with a low x-ray workload, standby replenishment, flood replenishment, or periodically sending blank films through the processor may be necessary.

(c) Sensitometric tests of processor performance demonstrate the processor is achieving radiographic density and contrast equal to other processor models operating at equivalent developer immersion time and developer temperatures and using comparable chemistry.

(3) *Darkrooms.* Darkrooms shall be constructed so film being processed, handled, or stored will be exposed only to light passed through a safelight filter. The filter shall be of the type specified by the film manufacturer. Bulb wattage in the safelight shall be no greater than fifteen watts. The safelight shall be mounted at least four feet above work areas.

(4) The department shall make x-ray film development and darkroom tests as necessary to determine compliance with this section.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-150, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-150, filed 12/27/90, effective 1/31/91. Statutory Authority:

RCW 70.98.080. 83-19-050 (Order 2026), § 402-28-990, filed 9/16/83; Order 1084, Appendix C (codified as WAC 402-28-990), filed 1/14/76.]

**WAC 246-225-99910 Appendix I--Good practices.**

The following are included in this handbook of regulations as suggested good practices and are not intended to be a regulation. The topics presented in these good practices may, however, become incorporated into the Washington Administrative Code at a future date.

(1) Exchange of information. Because patient exposure to diagnostic x-rays is the most predominant source of exposure to artificially produced ionizing radiation, radiographs should be exchanged among the practitioners of the various healing arts. Such exchange can only benefit patients by reducing the unnecessary repeated exposures of patients who are referred to, or change to, other practitioners.

(2) Patient exposure guidelines. The following patient exposure values should be achievable with high speed image receptor systems, proper filtration, a reasonable radiographic density preference, proper choice of kVp, and proper film development. State radiation safety surveyors can provide registrants with results of measurements of patient exposure values upon request.

**Dental Bitewing (D-Speed Film)\***

| KVP Range Utilized | Upper Limit of Skin Entrance Exposure, mR |
|--------------------|---|
| 50 - 64            | 350                                       |
| 65 - 70            | 300                                       |
| 71 - 80            | 250                                       |
| 81 - 90            | 200                                       |

**Medical (400 Speed Imaging System)\***

| Exam*               | Upper Limit of Skin Entrance Exposure, mR |
|---------------------|---|

\*On average-size adult patients

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-99910, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-99910, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-28-99001, filed 9/16/83; Order 1084, Appendix D (codified as WAC 402-28-99001), filed 1/14/76.]

**WAC 246-225-99920 Appendix II--Determination of competency.** The following are areas in which the department considers it important that an individual have expertise for the competent operation of x-ray equipment.

- (1) *Familiarization with equipment.*
  - (a) Identification of controls.

- (b) Function of each control.
- (c) The use of a technique chart.
- (2) *Radiation protection.*
  - (a) Collimation.
  - (b) Filtration.
  - (c) Gonad shielding and other patient protection devices.
  - (d) Restriction of x-ray tube radiation to the image receptor.
  - (e) Personnel protection.
  - (f) Grids.
- (3) *Film processing.*
  - (a) Film speed as relates to patient exposure.
  - (b) Film processing parameters.
  - (c) Quality assurance and quality control.
- (4) *Emergency procedures.*
  - Termination of exposure in event of automatic timing device failure.
  - (5) *Proper use of personnel dosimetry, if required.*
  - (6) *Understanding units of radiation.*

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-99920, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-99920, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-28-99003, filed 9/16/83; Order 1084, Appendix F (codified as WAC 402-28-99003), filed 1/14/76.]

**WAC 246-225-99930 Appendix III--Information to be submitted by persons proposing to conduct healing arts screening using ionizing radiation.** Persons requesting that the department approve a healing arts screening program shall submit the following information and evaluation:

- (1) Name and address of the applicant and, where applicable, the names and addresses of agents within this state.
- (2) Diseases or conditions and frequency for which the x-ray examinations are to be used.
- (3) Description in detail of the x-ray examinations proposed in the screening program.
- (4) Description of the population to be examined in the screening program, i.e., age, sex, physical condition, and other appropriate information.
- (5) An evaluation of any known alternate methods not involving ionizing radiation which could achieve the goals of the screening program and why these methods are not used in preference to the x-ray examinations.
- (6) An evaluation by a qualified expert of the x-ray system(s) to be used in the screening program. The evaluation by the qualified expert shall show that such system(s) satisfy all requirements of these regulations. The evaluation shall include a measurement of patient exposures from the x-ray examinations to be performed.
- (7) A description of the diagnostic film quality control program.
- (8) A copy of the technique chart for the x-ray examination procedures to be used.
- (9) The qualifications of each individual who will be operating the x-ray system(s).
- (10) The qualifications of the individual who will be supervising the operators of the x-ray system(s). The

extent of supervision and the method of work performance evaluation shall be specified.

(11) The name and address of the individual who will interpret the radiograph(s).

(12) A description of the procedure to be used in advising the individuals screened and their private practitioners of the healing arts of the results of the screening procedure and any further medical needs indicated.

(13) A description of the procedures for the retention or disposition of the radiographs and other records pertaining to the x-ray examinations.

(14) An indication of the frequency of screening and the duration of the entire screening program.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-225-99930, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-225-99930, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-28-99004, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-28-99004, filed 12/8/80.]

## Chapter 246-228 WAC

### RADIATION PROTECTION--ANALYTICAL X-RAY EQUIPMENT

#### WAC

|             |                         |
|-------------|-------------------------|
| 246-228-030 | Facility requirements.  |
| 246-228-040 | Operating requirements. |
| 246-228-050 | Personnel requirements. |

**WAC 246-228-030 Facility requirements.** (1) *Radiation levels.* The local components of an analytical x-ray system shall be located and arranged and shall include sufficient shielding or access control such that no radiation levels exist in any area surrounding the local component group which could result in a dose to an individual present therein in excess of the dose equivalent limits given in WAC 246-221-060 of these regulations. For systems utilizing x-ray tubes, these levels shall be met at any specified tube rating.

(2) *Surveys.* Radiation surveys, as required by WAC 246-221-110 of all analytical x-ray systems, sufficient to show compliance with WAC 246-228-030(1), shall be performed:

(a) Upon installation of the equipment, and at least once every twelve months thereafter;

(b) Following any change in the initial arrangement, number, or type of local components in the system;

(c) Following any maintenance requiring the disassembly or removal of a local component in the system;

(d) During the performance of maintenance and alignment procedures if the procedures require the presence of a primary x-ray beam when any local component in the system is disassembled or removed;

(e) Any time a visual inspection of the local components in the system reveals an abnormal condition; and

(f) Whenever personnel monitoring devices required in WAC 246-228-050(2) show a significant increase over the previous monitoring period or the readings are approaching 1/10 of the hands and forearm limit specified in WAC 246-221-010.

(g) Radiation survey measurements shall not be required if a registrant or licensee can demonstrate compliance to the satisfaction of the department with WAC 246-228-030(1) in some other manner.

(3) *Posting.* Each area or room containing analytical x-ray equipment shall be conspicuously posted with a sign or signs bearing the radiation symbol and the words "CAUTION - X-RAY EQUIPMENT," or words having a similar intent.

(4) *Documentation of instruction.* Each facility shall maintain written documentation showing that compliance with WAC 246-228-050 has been met, and shall make such documentation available to the department upon request.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-228-030, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-228-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-40-040, filed 12/8/80; Order 1084, § 402-40-040, filed 1/14/76.]

**WAC 246-228-040 Operating requirements.** (1) *Procedures.* Routine operating procedures shall be written and available to all analytical x-ray equipment workers. No person shall be permitted to operate analytical x-ray equipment in any manner other than that specified in the procedures unless such person has obtained written approval of the radiation safety officer.

(2) *Bypassing.* No person shall bypass a safety device unless such person has obtained the written approval of the radiation safety officer. Such approval shall be for a specified period of time. When a safety device has been bypassed, a readily discernible sign bearing the words "SAFETY DEVICE NOT WORKING," or words having a similar intent, shall be placed on the radiation source housing. The requirements set forth in WAC 246-228-020(1) shall also be met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-228-040, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-228-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-40-050, filed 12/8/80; Order 1084, § 402-40-050, filed 1/14/76.]

**WAC 246-228-050 Personnel requirements.** (1) *Instruction.* No person shall be permitted to operate or maintain analytical x-ray equipment unless such person has received instruction in and demonstrated competence as to:

(a) Identification of radiation hazards associated with the use of the equipment;

(b) Significance of the various radiation warning and safety devices incorporated into the equipment, or the reasons they have not been installed on certain pieces of equipment and the extra precautions required in such cases;

(c) Proper operating procedures for the equipment;

(d) Symptoms of an acute localized exposure; and

(e) Proper procedures for reporting an actual or suspected exposure.

(2) *Personnel monitoring.* Finger or wrist dosimetric devices shall be provided to and shall be used by:

(a) Analytical x-ray equipment workers using systems having an open-beam configuration and not equipped with a safety device; and

(b) Personnel maintaining analytical x-ray equipment if the maintenance procedures require the presence of a primary x-ray beam when any local component in the analytical x-ray system is disassembled or removed.

(c) Reported dose values shall not be used for the purpose of determining compliance with WAC 246-221-010 of these regulations unless evaluated by a qualified expert.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-228-050, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-228-050, filed 12/27/90, effective 1/31/91; Order 1084, § 402-40-060, filed 1/14/76.]

### Chapter 246-229 WAC RADIATION PROTECTION--PARTICLE ACCELERATORS

#### WAC

|             |  |
|-------------|--|
| 246-229-001 | Purpose and scope.   |
| 246-229-010 | Registration requirements.   |

| 246-229-080 | Warning devices.   |
| 246-229-090 | Operating procedures.  |
| 246-229-110 | Ventilation systems.   |

**WAC 246-229-001 Purpose and scope.** (1) This chapter establishes procedures for the registration and the use of particle accelerators.

(2) In addition to the requirements of this chapter, all registrants are subject to the requirements of chapters 246-220, 246-224, 246-221, and 246-222 WAC. Registrants engaged in industrial radiographic operations are also subject to the requirements of chapter 246-243 WAC and registrants engaged in the healing arts are also subject to the requirements of chapter 246-225 WAC and/or chapter 246-240 WAC of these regulations. Registrants engaged in the production of radioactive material are also subject to the requirements of chapters 246-232 and 246-235 WAC.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-229-001, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-229-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-44-010, filed 12/8/80; Order 1084, § 402-44-010, filed 1/14/76.]

**WAC 246-229-010 Registration requirements.** No person shall receive, possess, use, transfer, own, or acquire a particle accelerator except as authorized in a registration issued pursuant to these regulations or as otherwise provided for in these regulations. The general procedures for registration of particle accelerator facilities are included in chapter 246-224 WAC of these regulations.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-229-010, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-229-010, filed 12/27/90, effective 1/31/91; Order 1084, § 402-44-020, filed 1/14/76.]

**WAC 246-229-020 General requirements for the issuance of a registration for particle accelerators.** (Refer to chapter 246-224 WAC.) In addition to the requirement of chapter 246-224 WAC a registration application for use of a particle accelerator will be approved only if the department determines that:

(1) The applicant is qualified by reason of training and experience to use the accelerator in question for the purpose requested in accordance with this chapter in such a manner as to minimize danger to public health and safety or property;

(2) The applicant's proposed equipment, facilities, operating and emergency procedures are adequate to protect health and minimize danger to public health and safety or property;

(3) The issuance of the registration will not be inimical to the health and safety of the public, and the applicant satisfies any applicable special requirement in WAC 246-229-030;

(4) The applicant has appointed a qualified radiation safety officer;

(5) The applicant and/or the staff has substantial experience in the use of particle accelerators and training sufficient for the intended uses;

(6) The applicant has established a radiation safety committee to approve, in advance, proposals for uses of particle accelerators, whenever deemed necessary by the department; and

(7) The applicant has an adequate training program for particle accelerator operators.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-229-020, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-229-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-44-030, filed 12/8/80; Order 1084, § 402-44-030, filed 1/14/76.]

**WAC 246-229-030 Human use of particle accelerators.** In addition to the requirements set forth in chapter 246-224 WAC a certificate of registration for use of a particle accelerator in the healing arts will be issued only if:

(1) Whenever deemed necessary by the department, the applicant has appointed a medical committee of at least three members to evaluate all proposals for research, diagnostic, and therapeutic use of a particle accelerator. Membership of the committee should include physicians expert in internal medicine, hematology, therapeutic radiology, and a person experienced in depth dose calculations and protection against radiation;

(2) The individuals designated on the application as the users have substantial training and experience in deep therapy techniques or in the use of particle accelerators to treat humans; and

(3) The individual designated on the application as the user must be a physician.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-229-030, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-229-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-44-040, filed 12/8/80; Order 1084, § 402-44-040, filed 1/14/76.]

**WAC 246-229-050 Limitations.** (1) No registrant shall permit any person to act as a particle accelerator operator until such person:

(a) Has been instructed in radiation safety and shall have demonstrated an understanding thereof;

(b) Has received copies of and instruction in this chapter and the applicable requirements of chapters 246-221 and 246-222 WAC, pertinent registration conditions and the registrant's operating and emergency procedures, and shall have demonstrated understanding thereof;

(c) Has demonstrated competence to use the particle accelerator, related equipment, and survey instruments which will be employed in the individual's assignment; and

(2) The registrant shall maintain records which demonstrate compliance with the requirements of WAC 246-229-050(1).

(3) Either the radiation safety committee or the radiation safety officer shall have the authority to terminate the operations at a particle accelerator facility if such action is deemed necessary to protect health and minimize danger to public health and safety or property.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-229-050, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-229-050, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-44-060, filed 12/8/80; Order 1084, § 402-44-060, filed 1/14/76.]

**WAC 246-229-060 Shielding and safety design requirements.** (1) A qualified expert, specifically accepted by the department, shall be consulted in the design of a particle accelerator installation and called upon to perform a radiation survey when the accelerator is first capable of producing radiation.

(2) Each particle accelerator installation shall be provided with such primary and/or secondary barriers as are necessary to assure compliance with WAC 246-221-010 and 246-221-060.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-229-060, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-229-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-44-070, filed 12/8/80; Order 1084, § 402-44-070, filed 1/14/76.]

**WAC 246-229-080 Warning devices.** (1) All locations designated as high radiation areas (except inside treatment rooms designed for human exposure) and entrances to all locations designated as high radiation areas shall be equipped with easily observable flashing or rotating warning lights that operate when, and only when, radiation is being produced.

(2) Except in facilities designed for human exposure, each high radiation area shall have an audible warning device which shall be activated for 15 seconds prior to

the possible creation of such high radiation area. Such warning device shall be clearly discernible in all high radiation areas. The registrant shall instruct all personnel in the vicinity of the particle accelerator as to the meaning of this audible warning signal.

(3) Barriers, temporary or otherwise, and pathways leading to high radiation areas shall be identified in accordance with WAC 246-221-120.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-229-080, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-229-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-44-090, filed 12/8/80; Order 1084, § 402-44-090, filed 1/14/76.]

**WAC 246-229-090 Operating procedures.** (1) Particle accelerators, when not in operation, shall be secured to prevent unauthorized use.

(2) Only a switch on the accelerator control console shall be routinely used to turn the accelerator beam off and on. The safety interlock system shall not be used to turn off the accelerator beam except in an emergency, or as required in WAC 246-229-090(3).

(3) All safety and warning devices, including interlocks, shall be checked for proper operation at intervals not to exceed three months and after maintenance on such safety and warning devices. Results of such tests shall be maintained for inspection at the accelerator facility.

(4) Electrical circuit diagrams of the accelerator, and the associated interlock systems, shall be kept current and maintained for inspection by the department and available to the operator at each accelerator facility.

(5) If, for any reason, it is necessary to bypass a safety interlock or interlocks intentionally, such action shall be:

(a) Authorized by the radiation safety committee and/or radiation safety officer;

(b) Recorded in a permanent log and a notice posted at the accelerator control console; and

(c) Terminated as soon as possible.

(6) A copy of the current operating and the emergency procedures shall be maintained at the accelerator control panel.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-229-090, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-229-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-44-100, filed 12/8/80; Order 1084, § 402-44-100, filed 1/14/76.]

**WAC 246-229-110 Ventilation systems.** (1) Means shall be provided to ensure that personnel are not exposed to airborne radioactive materials in excess of those limits specified in WAC 246-221-040, for restricted areas and WAC 246-221-070, for unrestricted areas.

(2) A registrant as required by WAC 246-221-070 shall not vent, release or otherwise discharge airborne radioactive material to an uncontrolled area which exceeds the limits specified in WAC 246-247-040 or 246-221-290 Appendix A - Table II, except as authorized pursuant to WAC 246-221-180 or 246-221-070(2). For

purposes of this paragraph, concentrations may be averaged over a period not greater than one year. Every reasonable effort should be made to maintain releases of radioactive material to uncontrolled areas, as far below these limits as practicable.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-083 (Order 183), § 246-229-110, filed 7/23/91, effective 8/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-229-110, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-44-120, filed 12/11/86. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-44-120, filed 12/8/80; Order 1084, § 402-44-120, filed 1/14/76.]

#### DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER

|             |   |
|-------------|---|
| 246-232-100 | Requirements for users of the Washington commercial low-level waste disposal site. [Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-232-100, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080 and chapter 70.121 RCW. 86-17-027 (Order 2406), § 402-19-530, filed 8/13/86. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-19-530, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-19-530, filed 12/8/80. Statutory Authority: RCW 70.98.080. 80-02-080 (Order 1481), § 402-19-530, filed 1/21/80.] Repealed by 91-15-112 (Order 184), filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 70.98.050 and 70.98.080. |
| 246-232-110 | Large volumes of naturally occurring material. [Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-232-110, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080 and chapter 70.121 RCW. 86-17-027 (Order 2406), § 402-19-540, filed 8/13/86.] Repealed by 91-15-112 (Order 184), filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 70.98.050 and 70.98.080.  |

**WAC 246-232-001 Purpose and scope.** (1) This chapter prescribes rules governing licensing of radioactive material. No person shall receive, possess, use, transfer, own or acquire radioactive material except as authorized in a specific or general license issued pursuant to chapters 246-233 or 246-235 WAC or as otherwise provided in this chapter.

(2) In addition to the requirements of this chapter, or chapters 246-233 or 246-235 WAC, all licensees are

subject to the requirements of chapters 246-220, 246-221, 246-222, 246-247, and 246-254 WAC. Licensees engaged in the practice of nuclear medicine are subject to the requirements of chapter 246-239 WAC, licensees engaged in industrial radiographic operations are subject to the requirements of chapter 246-243 WAC, licensees using sealed sources in the healing arts are subject to the requirements of chapter 246-240 WAC, licensees using radioactive material in well logging and subsurface tracer studies are subject to the requirements of chapter 246-244 WAC, licensees engaged in land disposal of radioactive waste are subject to the requirements of chapter 246-250 WAC, and licensees owning or operating uranium or thorium mills and associated mill tailings are subject to the requirements of chapter 246-252 WAC.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-232-001, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-232-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-19-010, filed 9/16/83; 79-12-073 (Order 1459), § 402-19-010, filed 11/30/79, effective 1/1/80. Formerly chapter 402-20 WAC.]

#### **WAC 246-232-010 Exemptions.** (1) *Source material.*

(a) Any person is exempt from this chapter and chapters 246-233 and 246-235 WAC to the extent that such person receives, possesses, uses, owns, or transfers source material in any chemical mixture, compound, solution or alloy in which the source material is by weight less than 1/20 of one percent (0.05 percent) of the mixture, compound, solution, or alloy.

(b) Any person is exempt from this chapter and chapters 246-233 and 246-235 WAC to the extent that such person receives, possesses, uses or transfers unrefined and unprocessed ore containing source material: *Provided*, That, except as authorized in a specific license, such person shall not refine or process such ore.

(c) Any person is exempt from this chapter and chapters 246-233 and 246-235 WAC to the extent that such person receives, possesses, uses or transfers:

(i) Any quantities of thorium contained in:

(A) Incandescent gas mantles;

(B) Vacuum tubes;

(C) Welding rods;

(D) Electric lamps for illuminating purposes provided that each lamp does not contain more than fifty milligrams of thorium;

(E) Germicidal lamps, sunlamps and lamps for outdoor or industrial lighting provided that each lamp does not contain more than two grams of thorium;

(F) Rare earth metals and compounds, mixtures, and products containing not more than 0.25 percent by weight thorium, uranium, or any combination of these; or

(G) Personnel neutron dosimeters, provided each dosimeter does not contain more than 50 milligrams of thorium;

(ii) Source material contained in the following products:

(A) Glazed ceramic tableware: *Provided*, That the glaze contains not more than twenty percent by weight source material; and

(B) Piezoelectric ceramic containing not more than two percent by weight source material;

(iii) Photographic film, negatives and prints containing uranium or thorium;

(iv) Any finished product or part fabricated of, or containing, tungsten-thorium or magnesium-thorium alloys: *Provided*, That the thorium content of the alloy does not exceed four percent by weight and that the exemption contained in this subparagraph shall not be deemed to authorize the chemical, physical or metallurgical treatment or processing of any such product or part;

(v) Depleted uranium contained in counterweights installed in aircraft, rockets, projectiles and missiles, or stored or handled in connection with installation or removal of such counterweights, provided that:

(A) The counterweights are manufactured in accordance with a specific license issued by the United States Nuclear Regulatory Commission authorizing distribution by the licensee pursuant to 10 CFR Part 40;

(B) Each counterweight has been impressed with the following legend clearly legible through any plating or other covering: "DEPLETED URANIUM"\*;

(C) Each counterweight is durably and legibly labeled or marked with the identification of the manufacturer and the statement: "UNAUTHORIZED ALTERATIONS PROHIBITED"\*; and

(D) The exemption contained in this subparagraph shall not be deemed to authorize the chemical, physical or metallurgical treatment or processing of any such counterweight other than repair or restoration of any plating or other covering;

\*Note: The requirements specified in (c)(v)(B) and (C) of this subsection need not be met by counterweights manufactured prior to December 31, 1969: *Provided*, That such counterweights are impressed with the legend, "CAUTION - RADIOACTIVE MATERIAL - URANIUM," as previously required by the regulations.

(vi) Depleted uranium used as shielding constituting part of any shipping container which is conspicuously and legibly impressed with the legend "CAUTION - RADIOACTIVE SHIELDING - URANIUM" and the uranium metal is encased in mild steel or in an equally fire resistant metal of a minimum wall thickness of 3.2 millimeters.

(vii) Thorium contained in finished optical lenses: *Provided*, That each lens does not contain more than thirty percent by weight of thorium, and that the exemption contained in this subparagraph shall not be deemed to authorize either:

(A) The shaping, grinding or polishing of such lens or manufacturing processes other than the assembly of such lens into optical systems and devices without alteration of the lens; or

(B) The receipt, possession, use or transfer of thorium contained in contact lenses, or in spectacles, or in eye-pieces in binoculars or other optical instruments;

(viii) Uranium contained in detector heads for use in fire detection units: *Provided*, That each detector head contains not more than 0.005 microcuries of uranium; or

(ix) Thorium contained in any finished aircraft engine part containing nickel-thoria alloy, provided that:

(A) The thorium is dispersed in the nickel-thoria alloy in the form of finely divided thoria (thorium dioxide); and

(B) The thorium content in the nickel-thoria alloy does not exceed four percent by weight.

(d) The exemptions in (c) of this subsection do not authorize the manufacture of any of the products described.

(2) *Radioactive material other than source material.*

(a) Exempt concentrations.

(i) Except as provided in (a)(ii) of this subsection any person is exempt from this chapter and chapters 246-233 and 246-235 WAC to the extent that such person receives, possesses, uses, transfers, owns or acquires products or materials containing radioactive material in concentrations not in excess of those listed in WAC 246-232-130, Schedule C.

(ii) No person may introduce radioactive material into a product or material, knowing or having reason to believe, that it will be transferred to persons exempt under (a)(i) of this subsection or equivalent regulations of the United States Nuclear Regulatory Commission, any agreement state or licensing state, except in accordance with a specific license issued pursuant to WAC 246-235-100(1) or the general license provided in WAC 246-232-040.

(b) Exempt quantities.

(i) Except as provided in (b)(ii) and (iii) of this subsection any person is exempt from these regulations to the extent that such person receives, possesses, uses, transfers, owns or acquires radioactive material in individual quantities each of which does not exceed the applicable quantity set forth in WAC 246-232-120, Schedule B.

(ii) This paragraph, WAC 246-232-010 (2)(b), does not authorize the production, packaging or repackaging of radioactive material for purposes of commercial distribution, or the incorporation of radioactive material into products intended for commercial distribution.

(iii) No person may, for purposes of commercial distribution, transfer radioactive material in the individual quantities set forth in WAC 246-232-120, Schedule B, knowing or having reason to believe that such quantities of radioactive material will be transferred to persons exempt under (b) of this subsection or equivalent regulations of the United States Nuclear Regulatory Commission or any agreement state or licensing state, except in accordance with a specific license issued by the United States Nuclear Regulatory Commission, pursuant to Section 32.18 of 10 CFR Part 32 or by the department pursuant to WAC 246-235-100(2) which license states that the radioactive material may be transferred by the licensee to persons exempt under (b) of this subsection or the equivalent regulations of the United States Nuclear Regulatory Commission or any agreement state or licensing state.

(c) Exempt items.

(i) Certain items containing radioactive material. Except for persons who apply radioactive material to, or persons who incorporate radioactive material into the following products, any person is exempt from these regulations to the extent that person receives, possesses, uses, transfers, owns or acquires the following products:\*

\*Note: Authority to transfer possession or control by the manufacturer, processor, or producer of any equipment, device, commodity, or other product containing source material or byproduct material whose subsequent possession, use, transfer and disposal by all other persons who are exempted from regulatory requirements may be obtained only from the United States Nuclear Regulatory Commission, Washington, D.C. 20555.

(A) Timepieces or hands or dials containing not more than the following specified quantities of radioactive material and not exceeding the following specified levels of radiation:

- 25 millicuries of tritium per timepiece;
- 5 millicuries of tritium per hand;
- 15 millicuries of tritium per dial (bezels when used shall be considered as part of the dial);
- 100 microcuries of promethium - 147 per watch or 200 microcuries of promethium - 147 per any other timepiece;
- 20 microcuries of promethium - 147 per watch hand or 40 microcuries of promethium - 147 per other timepiece hand;
- 60 microcuries of promethium - 147 per watch dial or 120 microcuries of promethium - 147 per other timepiece dial (bezels when used shall be considered as part of the dial);
- The levels of radiation from hands and dials containing promethium - 147 will not exceed, when measured through 50 milligrams per square centimeter of absorber:
- For wrist watches, 0.1 millirad per hour at 1 centimeter from any surface;
- For pocket watches, 0.1 millirad per hour at 1 centimeter from any surface;
- For any other timepiece, 0.2 millirad per hour at 10 centimeters from any surface.
- One microcurie of radium-226 per timepiece in timepieces manufactured prior to the effective date of these regulations.

(B) Lock illuminators containing not more than 15 millicuries of tritium or not more than 2 millicuries of promethium - 147 installed in automobile locks. The levels of radiation from each lock illuminator containing promethium - 147 will not exceed 1 millirad per hour at 1 centimeter from any surface when measured through 50 milligrams per square centimeter of absorber.

(C) Precision balances containing not more than 1 millicurie of tritium per balance or not more than 0.5 millicurie of tritium per balance part.

(D) Automobile shift quadrants containing not more than 25 millicuries of tritium.

(E) Marine compasses containing not more than 750 millicuries of tritium gas and other marine navigational

instruments containing not more than 250 millicuries of tritium gas.

(F) Thermostat dials and pointers containing not more than 25 millicuries of tritium per thermostat.

(G) Electron tubes: *Provided*, That each tube does not contain more than one of the following specified quantities of radioactive material:

(aa) 150 millicuries of tritium per microwave receiver protector tube or 10 millicuries of tritium per any other electron tube;

(bb) 1 microcurie of cobalt-60;

(cc) 5 microcuries of nickel-63;

(dd) 30 microcuries of krypton-85;

(ee) 5 microcuries of cesium-137;

(ff) 30 microcuries of promethium-147;

(gg) 1 microcurie of radium-226;

*And provided further*, That the levels of radiation from each electron tube containing radioactive material does not exceed 1 millirad per hour at 1 centimeter from any surface when measured through 7 milligrams per square centimeter of absorber.\*

\*Note: For purposes of this subdivision, "electron tubes" include spark gap tubes, power tubes, gas tubes including glow lamps, receiving tubes, microwave tubes, indicator tubes, pick-up tubes, radiation detection tubes, and any other completely sealed tube that is designed to conduct or control electrical currents.

(H) Ionizing radiation measuring instruments containing, for purposes of internal calibration or standardization, a source of radioactive material not exceeding 0.05 microcuries of americium-241 or the applicable quantity set forth in WAC 246-232-120, Schedule B.

(I) Spark gap irradiators containing not more than 1 microcurie of cobalt-60 per spark gap irradiator for use in electrically ignited fuel oil burners having a firing rate of at least three gallons (11.4 liters) per hour.

(ii) Self-luminous products containing radioactive material(s).

(A) Tritium, krypton-85 or promethium-147. Except for persons who manufacture, process or produce self-luminous products containing tritium, krypton-85 or promethium-147, any person is exempt from these regulations to the extent that such person receives, possesses, uses, transfers, owns or acquires tritium, krypton-85 or promethium-147 in self-luminous products manufactured, processed, produced, imported or transferred in accordance with a specific license issued by the United States Nuclear Regulatory Commission pursuant to Section 32.22 of 10 CFR Part 32, which license authorizes the transfer of the product to persons who are exempt from regulatory requirements. The exemption in (c)(ii) of this subsection does not apply to tritium, krypton-85 or promethium-147 used in products for frivolous purposes or in toys or adornments.

(B) Radium-226. Any person is exempt from these regulations to the extent that such person receives, possesses, uses, transfers or owns articles containing less than 0.1 microcurie of radium-226 which were manufactured prior to October 1983.

(iii) Gas and aerosol detectors containing radioactive material.

(A) Except for persons who manufacture, process or produce gas and aerosol detectors containing radioactive material, any person is exempt from these regulations to the extent that such person receives, possesses, uses, transfers, owns or acquires radioactive material in gas and aerosol detectors designed to protect life or property from fires and airborne hazards: *Provided*, That detectors containing radioactive material shall have been manufactured, imported, or transferred in accordance with a specific license issued by the United States Nuclear Regulatory Commission\* or an agreement state, pursuant to Section 32.26 of 10 CFR Part 32, or licensing state pursuant to WAC 246-235-100(3), which authorizes the transfer of the detectors to persons who are exempt from regulatory requirements.

\*Note: Authority to transfer possession or control by the manufacturer, processor, or producer of any equipment, device, commodity, or other product containing source material or byproduct material whose subsequent possession, use, transfer and disposal by all other persons are exempted from regulatory requirements may be obtained only from the United States Nuclear Regulatory Commission, Washington, D.C. 20555.

(B) Gas and aerosol detectors previously manufactured and distributed to general licensees in accordance with a specific license issued by an agreement state shall be considered exempt under (c)(iii)(A) of this subsection: *Provided*, That the device is labeled in accordance with the specific license authorizing distribution of the generally licensed device: *And provided further*, That they meet the requirements of WAC 246-235-100(3).

(C) Gas and aerosol detectors containing naturally occurring and accelerator-produced radioactive material (NARM) previously manufactured and distributed in accordance with a specific license issued by a licensing state shall be considered exempt under (c)(iii)(A) of this subsection: *Provided*, That the device is labeled in accordance with the specific license authorizing distribution of the generally licensed device, and provided further that they meet the requirements of WAC 246-235-100(3).

(iv) Resins containing scandium-46 and designed for sand consolidation in oil wells. Any person is exempt from these regulations to the extent that such person receives, possesses, uses, transfers, owns or acquires synthetic plastic resins containing scandium-46 which are designed for sand consolidation in oil wells. Such resins shall have been manufactured or imported in accordance with a specific license issued by the United States Nuclear Regulatory Commission or shall have been manufactured in accordance with the specifications contained in a specific license issued by the department or any agreement state to the manufacturer of such resins pursuant to licensing requirements equivalent to those in Sections 32.16 and 32.17 of 10 CFR Part 32 of the regulations of the United States Nuclear Regulatory Commission. This exemption does not authorize the manufacture of any resins containing scandium-46.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-232-010, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-232-010, filed 12/27/90, effective 1/31/91. Statutory Authority:

RCW 70.98.080. 87-01-031 (Order 2450), § 402-19-190, filed 12/11/86; 83-19-050 (Order 2026), § 402-19-190, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-19-190, filed 12/8/80. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-19-190, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-190.]

**WAC 246-232-020 Types of licenses.** Licenses for radioactive materials are of two types: General and specific.

(1) General licenses provided in chapter 246-233 WAC are effective without the filing of applications with the department or the issuance of licensing documents to the particular persons, although the filing of a certificate with the department may be required by the particular general license. The general licensee is subject to all other applicable portions of these regulations and any limitations of the general license.

(2) Specific licenses require the submission of an application to the department and the issuance of a licensing document by the department. The licensee is subject to all applicable portions of these regulations as well as any limitations specified in the licensing document. (See chapter 246-235 WAC.)

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-232-020, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-232-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-19-220, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-020.]

**WAC 246-232-040 Reciprocal recognition of licenses.** (1) Subject to these regulations, any person who holds a specific license from the United States Nuclear Regulatory Commission or any agreement state or licensing state, and issued by the agency having jurisdiction where the licensee maintains an office for directing the licensed activity and at which radiation safety records are normally maintained, is hereby granted a general license to conduct the activities authorized in such licensing document within this state for a period not in excess of one hundred eighty days in that twelve month period which commences the date approval is granted, and the appropriate fee received, by the department provided that:

(a) The licensing document does not limit the activity authorized by such document to specified installations or locations;

(b) The out-of-state licensee notifies the department in writing and pays or has paid the appropriate fee (refer to chapter 246-254 WAC), at least three days prior to each entry to the state to engage in such activity. The written notification must be sent to the Radioactive Materials Section, Department of Health, Mailstop LE-13, Olympia, Washington 98504 and the fee should be sent to Washington State Department of Health, Revenue Accounting, P.O. Box 1099, Olympia, Washington 98504. Such notification shall indicate the location, period, and type of proposed possession and use within the state, and shall be accompanied by copies of the pertinent licensing documents. If, for a specific case, the three-day period would impose an undue hardship on

the out-of-state licensee, the licensee may, upon telephone application to the department (206-753-4481), obtain permission to proceed sooner. The department may waive the requirement for filing additional written notifications during the remainder of the twelve months following the receipt of the initial notification from a person engaging in activities under the general license provided in this subsection;

(c) The out-of-state licensee complies with all applicable regulations of the department and with all the terms and conditions of the licensing document, except any such terms and conditions which may be inconsistent with applicable regulations of the department;

(d) The out-of-state licensee supplies such other information as the department may request; and

(e) The out-of-state licensee shall not transfer or dispose of radioactive material possessed or used under the general license provided in this subsection except by transfer to a person:

(i) Specifically licensed by the department or by the United States Nuclear Regulatory Commission, an agreement state or a licensing state to receive such material; or

(ii) Exempt from the requirements for a license for such material under WAC 246-232-010 (2)(a).

(2) Notwithstanding the provisions of subsection (1) of this section, any person who holds a specific license issued by the United States Nuclear Regulatory Commission, an agreement state or a licensing state authorizing the holder to manufacture, transfer, install, or service a device described in WAC 246-233-020(4) within the areas subject to the jurisdiction of the licensing body is hereby granted a general license to install, transfer, demonstrate or service a device in this state provided that:

(a) Such person shall file a report with the department within thirty days after the end of each calendar quarter in which any device is transferred to or installed in this state. Each such report shall identify each general licensee to whom such device is transferred by name and address, the type of device transferred, and the quantity and type of radioactive material contained in the device;

(b) The device has been manufactured, labeled, installed, and serviced in accordance with applicable provisions of the specific license issued to such person by the United States Nuclear Regulatory Commission, an agreement state or a licensing state;

(c) Such person shall assure that any labels required to be affixed to the device under regulations of the authority which licensed manufacture of the device bear a statement that "Removal of this label is prohibited"; and

(d) The holder of the specific license shall furnish to each general licensee to whom such device is transferred or on whose premises such device is installed a copy of the general license contained in WAC 246-233-020(4).

(3) The department may withdraw, limit, or qualify its acceptance of any specific license or equivalent licensing document issued by another agency, or any product distributed pursuant to such licensing document,

upon determining that such action is necessary in order to prevent undue hazard to public health and safety or property.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-232-040, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-232-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-19-250, filed 12/11/86; 83-19-050 (Order 2026), § 402-19-250, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-19-250, filed 12/8/80. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-19-250, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-210.]

#### **WAC 246-232-060 Termination of licenses. (1)**

Each specific licensee shall immediately notify the department in writing when the licensee decides to permanently discontinue all activities involving materials authorized under the license and request termination of the license. This notification and request for termination of the license must include the reports and information specified in subsection (3) (c) and (d) of this section. The licensee is subject to the provisions of subsections (3) and (4) of this section, as applicable.

(2) No less than thirty days before the expiration date specified in a specific license, the licensee shall either:

(a) Submit an application for license renewal under WAC 246-235-050; or

(b) Notify the department in writing if the licensee decides not to renew the license.

(3) If a licensee does not submit an application for license renewal under WAC 246-235-050, the licensee shall on or before the expiration date specified in the license:

(a) Terminate use of byproduct material;

(b) Properly dispose of byproduct material;

(c) Submit a completed departmental form "Certificate of disposition of radioactive material"; and

(d) Submit a radiation survey report to confirm the absence of radioactive materials or establish the levels of radioactive contamination, unless the department determines a radiation survey report is not necessary.

(i) If no radioactive contamination attributable to activities conducted under the license is detected, the licensee shall submit a certification that no detectable radioactive contamination was found. If the information submitted under this paragraph and subsection (3) (c) and (d) of this section is adequate, the department will notify the licensee in writing that the license is terminated.

(ii) If detectable levels of radioactive contamination attributable to activities conducted under the license are found, the license continues in effect beyond the expiration date, if necessary, with respect to possession of residual radioactive material present as contamination until the department notifies the licensee in writing that the license is terminated. During this time, the licensee is subject to the provisions of subsection (4) of this section. In addition to the information submitted under subsection (3)(c) and (d) of this section, the licensee shall submit a plan for decontamination, if necessary.

(4) Each licensee who possesses residual byproduct material under subsection (3)(d)(ii) of this section, following the expiration of the facility and/or equipment date specified in the license, shall:

(a) Be limited to actions, involving radioactive material related to decontamination and preparation for release for unrestricted use; and

(b) Continue to control entry to restricted areas until they are suitable for release for unrestricted use and the department notifies the licensee in writing that the license is terminated. The guidance contained in WAC 246-232-140, Schedule D, shall be used in making this determination.

(5) Each general licensee licensed under the provisions of WAC 246-233-020(8), shall immediately notify the department in writing when the licensee decides to discontinue all activities involving radioactive materials authorized under the general license. Such notification shall include a description of how the generally licensed material was disposed and the results of facility surveys, if applicable, to confirm the absence of radioactive materials.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-232-060, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-232-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-19-330, filed 9/16/83.]

**WAC 246-232-080 Transfer of material.** (1) No licensee shall transfer radioactive material except as authorized pursuant to this section.

(2) Except as otherwise provided in the license and subject to the provisions of this section, any licensee may transfer radioactive material:

(a) To the department. A licensee may transfer material to the department only after receiving prior approval from the department;

(b) To the United States Department of Energy;

(c) To any person exempt from the regulations in this part to the extent permitted under such exemption;

(d) To any person authorized to receive such material under terms of a general license or its equivalent, or a specific license or equivalent licensing document, issued by the department, the United States Nuclear Regulatory Commission, any agreement state or any licensing state, or to any person otherwise authorized to receive such material by the federal government or any agency thereof, the department, any agreement state or any licensing state; or

(e) As otherwise authorized by the department in writing.

(3) Before transferring radioactive material to a specific licensee of the department, the United States Nuclear Regulatory Commission, an agreement state or a licensing state, or to a general licensee who is required to register with the department, the United States Nuclear Regulatory Commission, an agreement state or a licensing state prior to receipt of the radioactive material, the licensee transferring the material shall verify that the transferee's license authorizes the receipt of the type,

form, and quantity of radioactive material to be transferred.

(4) The following methods for the verification required by subsection (3) of this section are acceptable:

(a) The transferor may obtain for possession, and read, a current copy of the transferee's specific license or registration certificate;

(b) The transferor may obtain for possession a written certification from the transferee that the transferee is authorized by license or registration certificate to receive the type, form, and quantity of radioactive material to be transferred, specifying the license or registration certificate number, issuing agency, and expiration date;

(c) For emergency shipments the transferor may accept oral certification by the transferee that the transferee is authorized by license or registration certificate to receive the type, form, and quantity of radioactive material to be transferred, specifying the license or registration certificate number, issuing agency, and expiration date: *Provided*, That the oral certification is confirmed in writing within ten days;

(d) The transferor may obtain other sources of information compiled by a reporting service from official records of the department, the United States Nuclear Regulatory Commission, the licensing agency of an agreement state or a licensing state as to the identity of licensees and the scope and expiration dates of licenses and registration; or

(e) When none of the methods of verification described in subsection (4) of this section are readily available or when a transferor desires to verify that information received by one of such methods is correct or up-to-date, the transferor may obtain and record confirmation from the department, the United States Nuclear Regulatory Commission, or the licensing agency of an agreement state or a licensing state that the transferee is licensed to receive the radioactive material.

(5) Preparation for shipment and transport of radioactive material shall be in accordance with the provisions of WAC 246-232-090.

(6) The requirements of subsection (4) of this section notwithstanding, no verification is required when returning used, unused or decayed sources of radiation to the original manufacturer, (e.g., industrial radiography sources, teletherapy sources, portable moisture/density gauge sources, fixed gauge sources, and Mo-99/Tc-99m generators).

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-232-080, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-232-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-19-400, filed 12/11/86. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-19-400, filed 12/8/80. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-19-400, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-170.]

**WAC 246-232-090 Transportation.** (1) *Transportation of radioactive material.* No person shall deliver radioactive material to a carrier for transport or transport radioactive material except as authorized in a general or

specific license issued by the department or as exempted in subsection (2) of this section.

(2) *Exemptions.*

(a) Common and contract carriers, freight forwarders, and warehousemen who are subject to the rules and regulations of the United States Department of Transportation (49 CFR Parts 170 through 189) or the United States Postal Service (Domestic Mail Manual, Section 124.3 incorporated by reference, 39 CFR 111.11 (1974)) are exempt from this section to the extent that they transport or store radioactive material in the regular course of their carriage for another or storage incident thereto. Common and contract carriers who are not subject to the rules and regulations of the United States Department of Transportation or United States Postal Service are subject to subsection (1) of this section and other applicable sections of these regulations.

(b) Physicians, as defined in WAC 246-220-010, are exempt from the requirements of this section only to the extent that they transport radioactive material for emergency use in the practice of medicine.

(c) Specific licensees are exempt from this section to the extent that they deliver to a carrier for transport packages each of which contains no radioactive material having a specific activity in excess of 0.002 microcurie per gram.

(d) Any licensee who delivers radioactive material to a carrier for transport, where such transport is subject to the regulations of the United States Postal Service, is exempt from the provisions of subsection (1) of this section.

(3) *General licenses for carriers.*

(a) A general license is hereby issued to any common or contract carrier not exempted under subsection (2) of this section to receive, possess, transport and store radioactive material in the regular course of their carriage for another or storage incident thereto, provided the transportation and storage is in accordance with the applicable requirements of the regulations, appropriate to the mode of transport, of the United States Department of Transportation.

(b) A general license is hereby issued to any private carrier to transport radioactive material, provided the transportation is in accordance with the applicable requirements of the regulations, appropriate to the mode of transport, of the United States Department of Transportation insofar as such regulations relate to the loading and storage of packages, placarding of the transporting vehicle, shipping papers, and incident reporting.<sup>1</sup>

(c) Persons who transport radioactive material pursuant to the general licenses in (a) or (b) of this subsection are exempt from the requirements of chapters 246-221 and 246-222 WAC of these regulations to the extent that they transport radioactive material.

(4) *Preparation of radioactive material for transport.* A general license is hereby issued to deliver radioactive material to a carrier<sup>2</sup> for transport provided that:

(a) The licensee complies with the applicable requirements of the regulations, appropriate to the mode of

transport, of the United States Department of Transportation insofar as such regulations relate to the packaging of radioactive material, to shipping papers, and to the monitoring, marking and labeling of those packages.

(b) The licensee has established procedures for opening and closing packages in which radioactive material is transported to provide safety and to assure that, prior to the delivery to a carrier for transport, each package is properly closed for transport.

(c) Prior to delivery of a package to a carrier for transport, the licensee shall assure that any special instructions needed to safely open the package are sent to or have been made available to the consignee.

(d) In addition to the requirements of the United States Department of Transportation, each package of Type A or Type B quantity radioactive material prepared for shipment must have the innermost container labeled as to the isotope, chemical form, number of curies or subunits thereof, and date of determination of activity and each innermost container shall be tested to assure that the container is properly sealed and that contamination which would cause undue hazard to public health and safety or property is not present prior to transportation. This requirement does not apply to properly packaged shipments of radioactive waste consigned to a commercial low level waste burial facility.

(5) *Transport of nuclear waste—Advance notification requirement.* Prior to the transport of any nuclear waste outside of the confines of the licensee's plant or other place of use or storage, or prior to the delivery of any nuclear waste to a carrier for transport, each licensee shall comply with the procedures in this subsection for advance notification to the governor of a state or the governor's designee for the transport of nuclear waste to, through, or across the boundary of the state.

(a) Where, when, and how advance notification must be sent. The notification required by subsection (5) of this section must be made in writing to the office of each appropriate governor or governor's designee and to the director of the appropriate Nuclear Regulatory Commission Regional Office. A notification delivered by mail must be postmarked at least seven days before the beginning of the seven-day period during which departure of the shipment is estimated to occur. A notification delivered by messenger must reach the office of the governor or of the governor's designee at least four days before the beginning of the seven-day period during which departure of the shipment is estimated to occur. A list of the mailing addresses of the governors and governors' designees is available upon request from the Director, Office of State Programs, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy of the notification shall be retained by the licensee as a record for one year.

(b) Information to be furnished in advance notification of shipment. Each advance notification of shipments of nuclear waste must contain the following information:

(i) The name, address, and telephone number of the shipper, carrier, and receiver of the nuclear waste shipment;

(ii) A description of the nuclear waste contained in the shipment as required by the regulations of the U.S. Department of Transportation in 49 CFR §§ 172.202 and 172.203(d);

(iii) The point of origin of the shipment, and the seven-day period during which departure of the shipment is estimated to occur;

(iv) The seven-day period during which arrival of the shipment at state boundaries is estimated to occur;

(v) The destination of the shipment, and the seven-day period during which arrival of the shipment is estimated to occur; and

(vi) A point of contact with a telephone number for current shipment information.

(c) Revision notice. A licensee who finds that schedule information previously furnished to a governor or governor's designee in accordance with (a) and (b) of this subsection will not be met, shall telephone a responsible individual in the office of the governor of the state or of the governor's designee and inform that individual of the extent of the delay relative to the schedule originally reported in writing under the provisions of (a) and (b) of this subsection. The licensee shall maintain a record of the name of the individual contacted for one year.

(d) Cancellation notice. Each licensee who cancels a nuclear waste shipment for which advance notification has been sent as required by this subsection shall send a cancellation notice to the governor of each state or the governor's designee previously notified and to the director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office. The notice shall state that it is a cancellation and shall identify the advance notification which is being cancelled. A copy of the notice shall be retained by the licensee as a record for one year.

<sup>1</sup>Any notification of incidents referred to in those requirements shall be filed with, or made to, the department.

<sup>2</sup>For the purpose of this regulation, licensees who transport their own licensed material as private carriers are considered to have delivered such material to a carrier for transport.

Notes:

<sup>1</sup> Values are given in Column I only for those materials normally used as gases

<sup>2</sup>  $\mu\text{Ci/gm}$  for solids

Note 1: Many radioisotopes disintegrate into isotopes which are also radioactive. In expressing the concentrations in Schedule C the activity stated is that of the parent isotope and takes into account the daughters.

Note 2: For purposes of WAC 246-232-010(2) where there is involved a combination of isotopes, the limit for the combination should be derived as follows: Determine for each isotope in the product the ratio between the concentration present in the product and the exempt concentration established in

Schedule C for the specific isotope when not in combination. The sum of such ratios may not exceed "1" (i.e., unity).

Example:

$$\frac{\text{Concentration of Isotope A in Product}}{\text{Exempt concentration of Isotope A}} + \frac{\text{Concentration of Isotope B in Product}}{\text{Exempt concentration of Isotope B}} \leq 1$$

Note 3: For the purpose of determining concentration in a product or device, the total quantity of radioactive material present is divided by only that weight or volume of the discrete part or component throughout which the radioactive material is relatively uniformly distributed. If the weight or volume of this part or component cannot be determined then the product or device should be evaluated on the basis of the total quantity of radioactive material present.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-232-130, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-232-130, filed 12/27/90, effective 1/31/91. **Chapter 246-233 WAC  
RADIOACTIVE MATERIALS--GENERAL  
LICENSES**

WAC

- 246-233-001 Purpose and scope.
- 246-233-010 General licenses--Source material.
- 246-233-020 General licenses\*--Radioactive material other than source material.

**WAC 246-233-001 Purpose and scope.** This chapter establishes general licenses for the possession and use of radioactive material contained in certain items and a general license for ownership of radioactive material. Chapter 246-232 WAC also contains provisions applicable to the subject matter of this part.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-233-001, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-233-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-21-010, filed 11/30/79, effective 1/1/80. Formerly chapter 402-20 WAC.]

**WAC 246-233-010 General licenses--Source material.** (1) A general license is hereby issued authorizing

use, possession, and transfer of not more than fifteen pounds of source material at any one time by persons in the following categories:

(a) Pharmacists using the source material solely for the preparation of medicinal compounds;

(b) Physicians using the source material for medicinal purposes;

(c) Persons receiving possession of source material from pharmacists and physicians in the form of medicinals or drugs;

(d) Commercial and industrial firms, and research, educational, and medical institutions, and state and local government agencies for research, development, educational, operational, or commercial purposes: *And provided*, That no such person shall, pursuant to this general license, receive more than a total of one hundred fifty pounds of source material in any one calendar year.

(2) Persons who receive, possess, use, or transfer source material pursuant to the general license issued in subsection (1) of this section are exempt from the provisions of chapters 246-221 and 246-222 WAC to the extent that such receipt, possession, use, or transfer is within the terms of such general license: *Provided, however*, That this exemption shall not be deemed to apply to any such person who is also in possession of source material under a specific license issued pursuant to chapter 246-235 WAC.

(3) A general license is hereby issued authorizing the receipt of title to source material without regard to quantity. This general license does not authorize any person to receive, possess, use, or transfer source material.

(4) Depleted uranium in industrial products and devices.

(a) A general license is hereby issued to receive, acquire, possess, use, or transfer, in accordance with the provisions of paragraphs (4)(b), (c), (d), and (e) of this section, depleted uranium contained in industrial products or devices for the purpose of providing a concentrated mass in a small volume of the product or device.

(b) The general license in paragraph (4)(a) of this section applies only to industrial products or devices which have been manufactured either in accordance with a specific license issued to the manufacturer of the products or devices pursuant to WAC 246-235-100(13) or in accordance with a specific license issued to the manufacturer by the United States Nuclear Regulatory Commission or an agreement state which authorizes manufacture of the products or devices for distribution to persons generally licensed by the United States Nuclear Regulatory Commission or an agreement state.

(c)(i) Persons who receive, acquire, possess, or use depleted uranium pursuant to the general license established by paragraph (4)(a) of this section shall file department form RHF-20 "Registration certificate - Use of depleted uranium under general license," with the department. The form shall be submitted within thirty days after the first receipt or acquisition of such depleted uranium. The registrant shall furnish on department form RHF-20 the following information and such other information as may be required by that form:

(A) Name and address of the registrant;

(B) A statement that the registrant has developed and will maintain procedures designed to establish physical control over the depleted uranium described in paragraph (4)(a) of this section and designed to prevent transfer of such depleted uranium in any form, including metal scrap, to persons not authorized to receive the depleted uranium; and

(C) Name and/or title, address, and telephone number of the individual duly authorized to act for and on behalf of the registrant in supervising the procedures identified in item (4)(c)(i)(B) of this section.

(ii) The registrant possessing or using depleted uranium under the general license established by paragraph (4)(a) of this section shall report in writing to the department any changes in information previously furnished on the "Registration certificate - Use of depleted uranium under general license." The report shall be submitted within thirty days after the effective date of such change.

(d) A person who receives, acquires, possesses, or uses depleted uranium pursuant to the general license established by paragraph (4)(a) of this section:

(i) Shall not introduce such depleted uranium, in any form, into a chemical, physical, or metallurgical treatment or process, except a treatment or process for repair or restoration of any plating or other covering of the depleted uranium.

(ii) Shall not abandon such depleted uranium.

(iii) Shall transfer or dispose of such depleted uranium only by transfer in accordance with the provision of chapter 246-232 WAC. In the case where the transferee receives the depleted uranium pursuant to the general license established by paragraph (4)(a) of this section the transferor shall furnish the transferee a copy of this regulation and a copy of department form RHF-20.

In the case where the transferee receives the depleted uranium pursuant to a general license contained in the United States Nuclear Regulatory Commission's or agreement state's regulation equivalent to paragraph (4)(a) of this section the transferor shall furnish the transferee a copy of this regulation and a copy of department form RHF-20 accompanied by a note explaining that use of the product or device is regulated by the United States Nuclear Regulatory Commission or agreement state under requirements substantially the same as those in this regulation.

(iv) Shall maintain and make available to the department upon request the name and address of the person receiving the depleted uranium pursuant to such transfer.

(v) Shall not export such depleted uranium except in accordance with a license issued by the United States Nuclear Regulatory Commission pursuant to 10 CFR Part 110.

(e) Any person receiving, acquiring, possessing, using, or transferring depleted uranium pursuant to the general license established by paragraph (4)(a) of this section is exempt from the requirements of chapters 246-221 and

246-222 WAC of these regulations with respect to the depleted uranium covered by that general license.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-233-010, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-233-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-21-030, filed 12/8/80. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-21-030, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-030.]

**WAC 246-233-020 General licenses\*--Radioactive material other than source material.**

\*Note: Different general licenses are issued in this section, each of which has its own specific conditions and requirements.

(1) **Certain devices and equipment.** A general license is hereby issued to transfer, receive, acquire, own, possess, and use radioactive material incorporated in the following devices or equipment which have been manufactured, tested and labeled by the manufacturer in accordance with a specific license issued to the manufacturer by the United States Nuclear Regulatory Commission for use pursuant to Section 31.3 of 10 CFR Part 31. This general license is subject to the provisions of WAC 246-220-020, 246-220-030, 246-220-040, 246-220-050, 246-220-060, 246-220-070, chapters 246-232, 246-221\*\* and 246-222 WAC.

(a) **Static elimination device.** Devices designed for use as static eliminators which contain, as a sealed source or sources, radioactive material consisting of a total of not more than 500 microcuries of Polonium-210 per device.

(b) **Ion generating tube.** Devices designed for ionization of air which contain, as a sealed source or sources, radioactive material consisting of a total of not more than 500 microcuries of Polonium-210 per device or a total of not more than 50 millicuries of Hydrogen-3 (tritium) per device.

\*\*Attention is directed particularly to the provisions of chapter 246-221 WAC of these regulations which relate to the labeling of containers.

(2) Reserved.

(3) Reserved.

(4) **Certain measuring, gauging or controlling devices.**

(a) A general license is hereby issued to commercial and industrial firms and research, educational and medical institutions, individuals in the conduct of their business, and state or local government agencies to own, acquire, receive, possess, use or transfer, in accordance with the provisions of (b), (c), and (d) of this subsection, radioactive material excluding special nuclear material contained in devices designed and manufactured for the purpose of detecting, measuring, gauging or controlling thickness, density, level, interface location, radiation, leakage, or qualitative or quantitative chemical composition, or for producing light or an ionized atmosphere.

(b) The general license in (a) of this subsection applies only to radioactive material contained in devices which have been manufactured and labeled in accordance with the specifications contained in a specific license issued by the department pursuant to WAC 246-

235-100(4) or in accordance with the Nuclear Regulatory Commission, an agreement state or a licensing state, which authorizes distribution of devices to persons generally licensed by the United States Nuclear Regulatory Commission, an agreement state or licensing state\*\*.

\*Note: Regulations under the Federal Food, Drug, and Cosmetic Act authorizing the use of radioactive control devices in food production require certain additional labeling thereon which is found in Section 179.21 of 21 CFR Part 179.

(c) Any person who owns, acquires, receives, possesses, uses or transfers radioactive material in a device pursuant to the general license in (a) of this subsection:

(i) Shall assure that all labels affixed to the device at the time of receipt and bearing a statement that removal of the label is prohibited are maintained thereon and shall comply with all instructions and precautions provided by such labels;

(ii) Shall assure that the device is tested for leakage of radioactive material and proper operation of the on-off mechanism and indicator, if any, at no longer than six-month intervals or at such other intervals as are specified in the label, however:

(A) Devices containing only krypton need not be tested for leakage of radioactive material; and

(B) Devices containing only tritium or not more than 100 microcuries of other beta and/or gamma emitting material or 10 microcuries of alpha emitting material need not be tested for any purpose. Devices held in storage in the original shipping container prior to initial installation need not be tested until immediately prior to use;

(iii) Shall assure that the tests required by (c)(ii) of this subsection and other testing, installing, servicing, and removing from installation involving the radioactive materials, its shielding or containment, are performed:

(A) In accordance with the instructions provided by the labels; or

(B) By a person holding a specific license from the department or from the United States Nuclear Regulatory Commission or from any agreement state or from a licensing state to perform such activities;

(iv) Shall maintain records showing compliance with the requirements of (c)(ii) and (iii) of this subsection. The records shall show the results of tests. The records also shall show the dates of performance and the names of persons performing, testing, installing, servicing, and removing from installation concerning the radioactive material, its shielding or containment. Records of tests for leakage of radioactive material required by (c)(ii) of this subsection shall be maintained for one year after the next required leak test is performed or the sealed source is transferred or disposed. Records of tests of the on/off mechanism and indicator required by (c)(ii) of this subsection shall be maintained for one year after the next required test of the on/off mechanism and indicator is performed or the sealed source is transferred or disposed. Records of other testing, installation, servicing, and removal from installation required by (c)(iii) of this subsection shall be maintained for a period of two years

from the date of the recorded event or until the device is transferred or disposed;

(v) Upon the occurrence of a failure of or damage to, or any indication of a possible failure of or damage to, the shielding of the radioactive material or the on/off mechanism or indicator, or upon the detection of 0.005 microcuries or more removable radioactive material, shall immediately suspend operation of the device until it has been repaired by the manufacturer or other person holding a specific license from the department, the United States Nuclear Regulatory Commission, or from an agreement state or a licensing state to repair such devices, or disposed by transfer to a person authorized by a specific license to receive the radioactive material contained in the device and, within thirty days, furnish to the department a written report containing a brief description of the event and the remedial action taken;

(vi) Shall not abandon the device containing radioactive material;

(vii) Except as provided in (c)(viii) of this subsection, shall transfer or dispose the device containing radioactive material only by transfer to a person holding a specific license of the department, the United States Nuclear Regulatory Commission, or an agreement state, or a licensing state whose specific license authorizes the person to receive the device and within thirty days after transfer of a device to a specific licensee shall furnish to the department a report containing identification of the device by manufacturer's name, model number and the name and address of the person receiving the device. No report is required if the device is transferred to the specific licensee in order to obtain a replacement device;

(viii) Shall transfer the device to another general licensee only:

(A) Where the device remains in use at a particular location. In such case, the transferor shall give the transferee a copy of this subsection and any safety documents identified in the label of the device and within thirty days of the transfer, report to the department the manufacturer's name, model number of device transferred, the name and address of the transferee, and the name and/or position of an individual who may constitute a point of contact between the department and the transferee; or

(B) Where the device is held in storage in the original shipping container at its intended location of use prior to initial use by a general licensee:

(ix) Shall comply with the provisions of WAC 246-221-240 and 246-221-250 for reporting radiation incidents, theft or loss of licensed material, but shall be exempt from the other requirements of chapters 246-221 and 246-222 WAC.

(d) The general license in (a) of this subsection does not authorize the manufacture, import or export of devices containing radioactive material.

(e) The general license provided in this subsection is subject to the provisions of WAC 246-220-020, 246-220-030, 246-220-040, 246-220-060, 246-220-070, 246-220-100, 246-232-050, 246-232-070, 246-232-080, and 246-232-090.

**(5) Luminous safety devices for aircraft.**

(a) A general license is hereby issued to own, receive, acquire, possess and use tritium or Promethium-147 contained in luminous safety devices for use in aircraft, provided:

(i) Each device contains not more than 10 curies of tritium or 300 millicuries of Promethium-147; and

(ii) Each device has been manufactured, assembled or imported in accordance with a specific license issued by the United States Nuclear Regulatory Commission, or each device has been manufactured or assembled in accordance with the specifications contained in a specific license issued by the department or any agreement state to the manufacturer or assembler of such device pursuant to licensing requirements equivalent to those in Section 32.53 of 10 CFR Part 32 of the regulations of the United States Nuclear Regulatory Commission.

(b) Persons who own, receive, acquire, possess or use luminous safety devices pursuant to the general license in this subsection are exempt from the requirements of chapters 246-221 and 246-222 WAC except that they shall comply with the provisions of WAC 246-221-240 and 246-221-250.

(c) This general license does not authorize the manufacture, assembly, or repair of luminous safety devices containing tritium or Promethium-147.

(d) This general license does not authorize the ownership, receipt, acquisition, possession or use of Promethium-147 contained in instrument dials.

(e) This general license is subject to the provisions of WAC 246-220-020, 246-220-030, 246-220-040, 246-220-050, 246-220-060, 246-220-070, 246-220-100, 246-232-050, 246-232-070, 246-232-080, and 246-232-090.

**(6) Ownership of radioactive material.** A general license is hereby issued to own radioactive material without regard to quantity. Notwithstanding any other provisions of this chapter, this general license does not authorize the manufacture, production, transfer, receipt, possession or use of radioactive material.

**(7) Calibration and reference sources.**

(a) A general license is hereby issued to those persons listed below to own, receive, acquire, possess, use and transfer, in accordance with the provisions of (d) and (e) of this subsection, Americium-241 in the form of calibration or reference sources:

(i) Any person who holds a specific license issued by the department which authorizes that person to receive, possess, use and transfer radioactive material; or

(ii) Any person who holds a specific license issued by the United States Nuclear Regulatory Commission which authorizes that person to receive, possess, use and transfer special nuclear material.

(b) A general license is hereby issued to own, receive, possess, use and transfer plutonium in the form of calibration or reference sources in accordance with the provisions of (d) and (e) of this subsection to any person who holds a specific license issued by the department which authorizes that person to receive, possess, use and transfer radioactive material.

(c) A general license is hereby issued to own, receive, possess, use and transfer Radium-226 in the form of

calibration or reference sources in accordance with the provisions of (d) and (e) of this subsection to any person who holds a specific license issued by the department which authorizes that person to receive, possess, use and transfer radioactive material.

(d) The general licenses in (a), (b) and (c) of this subsection apply only to calibration or reference sources which have been manufactured in accordance with the specifications contained in a specific license issued to the manufacturer or importer of the sources by the United States Nuclear Regulatory Commission pursuant to Section 32.57 of 10 CFR Part 32 or Section 70.39 of 10 CFR Part 70 or which have been manufactured in accordance with the specifications contained in a specific license issued to the manufacturer by the department or any agreement state or licensing state pursuant to licensing requirements equivalent to those contained in Section 32.57 of 10 CFR Part 32 or Section 70.39 of 10 CFR Part 70 of the regulations of the United States Nuclear Regulatory Commission.

(e) The general licenses provided in (a), (b) and (c) of this subsection are subject to the provisions of WAC 246-220-020, 246-220-030, 246-220-040, 246-220-060, 246-220-070, 246-220-100, 246-232-050, 246-232-070, 246-232-080, 246-232-090, chapters 246-221 and 246-222 WAC.

In addition, persons who own, receive, acquire, possess, use or transfer one or more calibration or reference sources pursuant to these general licenses:

(i) Shall not possess at any one time, at any one location of storage or use, more than 5 microcuries of Americium-241 and 5 microcuries of plutonium and 5 microcuries of Radium-226 in such sources;

(ii) Shall not receive, possess, use or transfer such source unless the source, or the storage container, bears a label which includes one of the following statements or a substantially similar statement which contains the information called for in the following statement:

(A) The receipt, possession, use and transfer of this source, Model \_\_\_\_\_, Serial No. \_\_\_\_\_, are subject to a general license and the regulations of the United States Nuclear Regulatory Commission or of a state with which the commission has entered into an agreement for the exercise of regulatory authority. Do not remove this label.

CAUTION - RADIOACTIVE MATERIAL - THIS SOURCE CONTAINS (AMERICIUM-241). (PLUTONIUM)\*. DO NOT TOUCH RADIOACTIVE PORTION OF THIS SOURCE

-----  
Name of manufacturer or importer

\*Note: Showing only the name of the appropriate material.

(B) The receipt, possession, use and transfer of this source, Model \_\_\_\_\_, Serial No. \_\_\_\_\_, are subject to a general license and the regulations of any licensing state. Do not remove this label.

CAUTION - RADIOACTIVE MATERIAL - THIS SOURCE CONTAINS RADIUM-226. DO NOT TOUCH RADIOACTIVE PORTION OF THIS SOURCE.

-----  
Name of manufacturer or importer

(iii) Shall not transfer, abandon, or dispose of such source except by transfer to a person authorized by a license from the department, the United States Nuclear Regulatory Commission, or an agreement state or licensing state to receive the source;

(iv) Shall store such source, except when the source is being used, in a closed container adequately designed and constructed to contain Americium-241, Plutonium, or Radium-226/Radon-222 which might otherwise escape during storage; and

(v) Shall not use such source for any purpose other than the calibration of radiation detectors or the standardization of other sources.

(f) These general licenses do not authorize the manufacture of calibration or reference sources containing Americium-241, Plutonium, or Radium-226.

(8) General license for use of radioactive material for certain *in vitro* clinical or laboratory testing.\*

(a) A general license is hereby issued to any physician, veterinarian, clinical laboratory or hospital to receive, acquire, possess, transfer or use, for any of the following stated tests, in accordance with the provisions of (b), (c), (d), (e), and (f) of this subsection the following radioactive materials in prepackaged units:

(i) Iodine-125, in units not exceeding 10 microcuries each for use in *in vitro* clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(ii) Iodine-131, in units not exceeding 10 microcuries each for use in *in vitro* clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(iii) Carbon-14, in units not exceeding 10 microcuries each for use in *in vitro* clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(iv) Hydrogen-3 (tritium), in units not exceeding 50 microcuries each for use in *in vitro* clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(v) Iron-59, in units not exceeding 20 microcuries each for use in *in vitro* clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(vi) Cobalt-57, in units not exceeding 10 microcuries each for use in *in vitro* clinical or laboratory tests not

involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(vii) Selenium-75, in units not to exceed 10 microcuries each for use in *in vitro* clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(viii) Mock Iodine-125 reference or calibration sources, in units not exceeding 0.05 microcurie of Iodine-129 and 0.005 microcurie of Americium-241 each for use in *in vitro* clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

\*Note: The new drug provisions of the Federal Food, Drug and Cosmetic Act also govern the availability and use of any specific diagnostic drugs in interstate commerce.

(b) No person shall receive, acquire, possess, use or transfer radioactive material pursuant to the general license established by (a) of this subsection until that person has received a validated copy of department Form RHF-15 "Certificate-in vitro testing with radioactive material under general license." Annual validation requires resubmittal of revised department Form RHF-15 and submittal of the annual fee to the department. The physician, veterinarian, clinical laboratory or hospital shall furnish on department Form RHF-15 the following information and such other information as may be required by that form:

(i) Name and address of the physician, veterinarian, clinical laboratory or hospital;

(ii) The location of use; and

(iii) A statement that the physician, veterinarian, clinical laboratory or hospital has appropriate radiation measuring instruments to carry out *in vitro* clinical or laboratory tests with radioactive material as authorized under the general license in (a) of this subsection and that such tests will be performed only by personnel competent in the use of such instruments and in the handling of the radioactive material.

(c) A person who receives, acquires, possesses or uses radioactive material pursuant to the general license established by (a) of this subsection shall comply with the following:

(i) The general licensee shall not possess at any one time, pursuant to the general license in (a) of this subsection at any one location of storage or use, a total amount of Iodine-125, Iodine-131, Selenium-75, Iron-59, and/or Cobalt-57 in excess of 200 microcuries.

(ii) The general licensee shall store the radioactive material, until used, in the original shipping container or in a container providing equivalent radiation protection.

(iii) The general licensee shall use the radioactive material only for the uses authorized by (a) of this subsection.

(iv) The general licensee shall not transfer the radioactive material to a person who is not authorized to receive it pursuant to a license issued by the department, the United States Nuclear Regulatory Commission, any

agreement state or licensing state, nor transfer the radioactive material in any manner other than in the unopened, labeled shipping container as received from the supplier.

(v) The general licensee shall dispose of the Mock Iodine-125 reference or calibration sources described in (a)(viii) of this subsection as required by WAC 246-221-170.

(d) The general licensee shall not receive, acquire, possess, or use radioactive material pursuant to (a) of this subsection:

(i) Except as prepackaged units which are labeled in accordance with the provision of an applicable specific license issued pursuant to WAC 246-235-100(8) or in accordance with the provisions of a specific license issued by the United States Nuclear Regulatory Commission, or any agreement state or licensing state which authorizes the manufacture and distribution of Iodine-125, Iodine-131, Carbon-14, Hydrogen-3 (tritium), Iron-59, Selenium-75, Cobalt-57, or Mock Iodine-125 to persons generally licensed under this subsection or its equivalent; and

(ii) Unless one of the following statements, as appropriate, or a substantially similar statement which contains the information called for in one of the following statements, appears on a label affixed to each prepackaged unit or appears in a leaflet or brochure which accompanies the package:

This radioactive material shall be received, acquired, possessed and used only by physicians, veterinarians, clinical laboratories or hospitals and only for *in vitro* clinical or laboratory tests not involving internal or external administration of the material, or the radiation therefrom, to human beings or animals. Its receipt, acquisition, possession, use and transfer are subject to the regulations and a general license of the United States Nuclear Regulatory Commission or of a state with which the commission has entered into an agreement for the exercise of regulatory authority.

-----  
Name of manufacturer

This radioactive material shall be received, acquired, possessed and used only by physicians, veterinarians, clinical laboratories or hospitals and only for *in vitro* clinical or laboratory tests not involving internal or external administration of the material, or the radiation therefrom, to human beings or animals. Its receipt, acquisition, possession, use and transfer are subject to the regulations and a general license of a licensing state.

-----  
Name of manufacturer

(e) The physician, veterinarian, clinical laboratory or hospital possessing or using radioactive material under the general license of (a) of this subsection shall report in writing to the department, any changes in the information previously furnished in the "Certificate - *in vitro* testing with radioactive material under general license,"

department Form RHF-15. The report shall be furnished within thirty days after the effective date of such change.

(f) This general license is subject to the provisions of WAC 246-220-020, 246-220-030, 246-220-040, 246-220-060, 246-220-070, 246-220-090 and 246-220-100. In addition, any person using radioactive material pursuant to the general license of (a) of this subsection is exempt from the requirements of chapters 246-221 and 246-222 WAC with respect to radioactive material covered by that general license, except that such persons using the Mock Iodine-125 described in (a)(viii) of this subsection shall comply with the provisions of WAC 246-221-170, 246-221-240, and 246-221-250 and of these regulations.

**(9) Ice detection devices.**

(a) A general license is hereby issued to own, receive, acquire, possess, use and transfer Strontium-90 contained in ice detection devices, provided each device contains not more than 50 microcuries of Strontium-90 and each device has been manufactured or imported in accordance with a specific license issued by the United States Nuclear Regulatory Commission or each device has been manufactured in accordance with the specifications contained in a specific license issued by the department or any agreement state to the manufacturer of such device pursuant to licensing requirements equivalent to those in Section 32.61 of 10 CFR Part 32 of the regulations of the United States Nuclear Regulatory Commission.

(b) Persons who own, receive, acquire, possess, use or transfer Strontium-90 contained in ice detection devices pursuant to the general license in (a) of this subsection:

(i) Shall, upon occurrence of visually observable damage, such as a bend or crack or discoloration from overheating to the device, discontinue use of the device until it has been inspected, tested for leakage and repaired by a person holding a specific license from the United States Nuclear Regulatory Commission or an agreement state to manufacture or service such devices; or shall dispose of the device pursuant to the provisions of these regulations;

(ii) Shall assure that all labels affixed to the device at the time of receipt, and which bear a statement which prohibits removal of the labels, are maintained thereon; and

(iii) Are exempt from the requirements of chapters 246-221 and 246-222 WAC except that such persons shall comply with the provisions of WAC 246-221-170, 246-221-240, and 246-221-250.

(c) This general license does not authorize the manufacture, assembly, disassembly or repair of Strontium-90 sources in ice detection devices.

(d) This general license is subject to the provisions of WAC 246-220-020, 246-220-030, 246-220-040, 246-220-060, 246-220-070, 246-220-100, 246-232-050, 246-232-070, 246-232-080, and 246-232-090.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-233-020, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-233-020, filed 12/27/90, effective 1/31/91. Statutory Authority:

RCW 70.98.080. 87-01-031 (Order 2450), § 402-21-050, filed 12/11/86; 83-19-050 (Order 2026), § 402-21-050, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-21-050, filed 12/8/80. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-21-050, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-040.]

**Chapter 246-235 WAC  
RADIOACTIVE MATERIALS--SPECIFIC  
LICENSES**

**WAC**

|             |   |

| 246-235-140 | Schedule B, limits for broad licenses.  |

**WAC 246-235-001 Purpose and scope.** (1) This chapter prescribes requirements for the issuance of specific licenses.

(2) The provisions and requirements of this chapter are in addition to, and not in substitution for, other requirements of these regulations. In particular the provisions of chapter 246-232 WAC apply to applications and licenses subject to this chapter.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-235-001, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-235-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-22-010, filed 11/30/79, effective 1/1/80. Formerly chapter 402-20 WAC.]

**WAC 246-235-020 General requirements for the issuance of specific licenses.** A license application will be approved if the department determines that:

(1) The applicant is qualified by reason of training and experience to use the material in question for the purpose requested in accordance with these regulations in such a manner as to minimize danger to public health and safety or property;

(2) The applicant's proposed equipment, facilities, and procedures are adequate to minimize danger to public health and safety or property;

(3) The issuance of the license will not be inimical to the health and safety of the public; and

(4) The applicant satisfies any applicable special requirements in WAC 246-235-080, 246-235-090, 246-235-095, 246-235-100, and 246-247-050.

(5) In the case of an application for a license to receive and possess radioactive material for commercial waste disposal by land burial, source material milling, or for the conduct of any other activity which the agency determines will significantly affect the quality of the environment, the department, before commencement of construction of the plant or facility in which the activity will be conducted, has concluded, after independently weighing the environmental, economic, technical and other benefits against environmental costs and considering available alternatives, that the action called for is the issuance of the proposed license, with any appropriate conditions to protect environmental values. Commencement of construction prior to such conclusion shall be grounds for denial of a license to receive and possess radioactive material in such plant or facility. As used in this paragraph the term "commencement of construction" means any clearing of land, excavation, or other substantial action that would adversely affect the environment of a site. The term does not mean site exploration, necessary borings to determine foundation conditions, or other preconstruction monitoring or testing to establish background information related to the suitability of the site or the protection of environmental values.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-235-020, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-235-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-22-040, filed 12/11/86. Statutory Authority: Chapter 70.121 RCW. 81-16-031 (Order 1683), § 402-22-040, filed 7/28/81. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-22-040, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-060.]

**WAC 246-235-040 Expiration of licenses.** Except as provided in WAC 246-235-050(2), each specific license shall expire at the end of the day, in the month and year stated therein.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-235-040, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-235-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-22-050, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-100.]

**WAC 246-235-050 Renewal of license.** (1) Applications for renewal of specific licenses shall be filed in accordance with WAC 246-235-010.

(2) In any case in which a licensee, not less than thirty days prior to expiration of the existing license, has filed an application in proper form for renewal or for a new license authorizing the same activities, such existing license shall not expire until the application has been finally determined by the department.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-235-050, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-235-050, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-22-055, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-110.]

**WAC 246-235-060 Amendment of licenses at request of licensee.** Applications for amendment of a license shall be filed in accordance with WAC 246-235-010 and shall specify the respects in which the licensee desires the license to be amended and the grounds for such amendment.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-235-060, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-235-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-22-060, filed 9/16/83; 79-12-073 (Order 1459), § 402-22-060, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-120.]

**WAC 246-235-080 Special requirements for issuance of certain specific licenses for radioactive material.**

(1) **Human use of radioactive material in institutions.** In addition to the requirements set forth in WAC 246-235-020 a specific license for human use of radioactive material in institutions will be issued if:

(a) The applicant has appointed a radiation safety committee to coordinate the use of radioactive material throughout that institution and to maintain surveillance over the institution's radiation safety program. Membership of the committee should include a specialist (where applicable a physician) from each department where radioactive material is used, a representative of the institution's management, a representative of the nursing staff, and a person trained in radiation safety. The radiation safety committee shall meet at intervals not to exceed six months. Minutes shall be taken and maintained for two years for inspection by the department;

(b) The applicant possesses adequate facilities for the clinical care of patients. The applicant is advised that construction of new radioisotope facilities and modification of existing facilities must also comply with the requirements of WAC 246-318-660 of the construction review section of the department;

(c) The physician(s) designated on the application as the individual user(s) has (or have) substantial experience in the handling and administration of radioactive material and, where applicable, the clinical management of radioactive patients; and

(d) If the application is for a license to use unspecified quantities or multiple types of radioactive material, the applicant's staff has substantial experience in the use of a variety of radioactive materials for a variety of human uses.

(2) **Licensing of individual physicians for human use of radioactive material.** In addition to the requirements set forth in WAC 246-235-020 a specific license for the human use of radioactive material will be issued to an individual physician if:

(a) The applicant has access to a hospital possessing adequate facilities to hospitalize and monitor the applicant's radioactive patients whenever it is advisable;

(b) The applicant has extensive experience in the handling and administration of radioactive material and, where applicable, the clinical management of radioactive patients;

(c) The application is for use in the applicant's practice in an office outside a medical institution; and

(d) The department will approve an application by an individual physician or group of physicians for a specific license to receive, possess or use radioactive material on the premises of a medical institution only if:

(i) The use of radioactive material is limited to the:

(A) Administration of radiopharmaceuticals for diagnostic or therapeutic purposes;

(B) Performance of diagnostic studies on patients to whom a radiopharmaceutical has been administered;

(C) Performance of in vitro diagnostic studies; or

(D) Calibration and quality control checks of radioactive assay instrumentation, radiation safety instrumentation and diagnostic instrumentation;

(ii) The physician brings the radioactive material with him or her and removes the radioactive material when he or she departs. (The institution cannot receive, possess or store radioactive material other than the amount of material remaining in the patient); and

(iii) The medical institution does not hold a radioactive material license issued pursuant to the provisions of subsection (1) of this section.

**(3) Specific licenses for certain groups of medical uses of radioactive material.**

(a) Subject to the provisions of (b), (c) and (d) of this subsection an application for a specific license pursuant to subsection (1), (2) or (4) of this section, or for any medical use or uses of radioactive material specified in one or more of Groups I to VI, inclusive, of WAC 246-235-120, Schedule A, will be approved for all of the uses within the group or groups which include the use or uses specified in the application if:

(i) The applicant satisfies the requirements of subsection (1), (2) or (4) of this section;

(ii) The applicant, or the physician designated in the application as the individual user, has adequate clinical experience in the types of uses included in the group or groups;

(iii) The applicant, or the physicians and all other personnel who will be involved in the preparation and use of the radioactive material, have adequate training and experience in the handling of radioactive material appropriate to their participation in the uses included in the group or groups;

(iv) The applicant's radiation detection and measuring instrumentation is adequate for conducting the procedures involved in the uses included in the group or groups, specifically:

(A) For Groups I through V, applicant must possess and use a calibrated and operable low-range survey instrument with a thin window (less than 7 mg/cm<sup>2</sup>) capable of detecting radiation levels of 0.05 milliroentgen per hour up to at least 20 milliroentgens per hour;

(B) For Groups III, V, and VI, applicant must possess a calibrated and operable high-range survey instrument capable of detecting radiation levels up to at least one Roentgen per hour;

(v) The applicant's radiation safety operating procedures are adequate for handling and disposal of the radioactive material involved in the uses included in the group or groups.

(b) Any licensee or registrant who is authorized to use radioactive material pursuant to one or more groups in (a) of this subsection and WAC 246-235-120, Schedule A, is subject to the following conditions:

(i) For Groups I, II, IV, and V, no licensee or registrant shall receive, possess or use radioactive material except as a radiopharmaceutical manufactured in the form to be administered to the patient, labeled, packaged and distributed in accordance with a specific license issued by the department pursuant to WAC 246-235-100(10), a specific license issued by the United States Nuclear Regulatory Commission pursuant to Section 32.72 of 10 CFR Part 32, or a specific license issued by an agreement state or a licensing state pursuant to equivalent regulations.

(ii) For Group III, no licensee or registrant shall receive, possess or use generators or reagent kits containing radioactive material or shall use reagent kits that do not contain radioactive material to prepare radiopharmaceuticals containing radioactive material, except:

(A) Reagent kits not containing radioactive material that are approved by the department, the United States Nuclear Regulatory Commission, an agreement state or a licensing state for use by persons licensed pursuant to this subsection and WAC 246-235-120, Schedule A, or equivalent regulations; or

(B) Generators or reagent kits containing radioactive material that are manufactured, labeled, packaged and distributed in accordance with a specific license issued by the department pursuant to WAC 246-235-100(11), a specific license issued by the United States Nuclear Regulatory Commission pursuant to Section 32.73 of 10 CFR Part 32, or a specific license issued by an agreement state or a licensing state pursuant to equivalent regulations.

(iii) For Group VI, no licensee or registrant shall receive, possess or use radioactive material except as contained in a source or device that has been manufactured, labeled, packaged and distributed in accordance with a specific license issued by the department pursuant to WAC 246-235-100(12), a specific license issued by the United States Nuclear Regulatory Commission pursuant to Section 32.74 of 10 CFR Part 32, or a specific license issued to the manufacturer by an agreement state or a licensing state pursuant to equivalent regulations.

(iv) For Group III, any licensee or registrant who uses generators or reagent kits shall elute the generator or process radioactive material with the reagent kit in accordance with instructions which are approved by the department, the United States Nuclear Regulatory Commission, an agreement state or a licensing state and are furnished by the manufacturer on the label attached to or in the leaflet or brochure which accompanies the generator or reagent kit.

(v) For Groups I, II and III any licensee using by-product material for clinical procedures other than those specified in the product labeling (package insert) shall comply with the product labeling regarding:

(A) Chemical and physical form;

(B) Route of administration; and

(C) Dosage range.

(c) Any licensee who is licensed pursuant to (a) of this subsection for one or more of the medical use groups in WAC 246-235-120, Schedule A, also is authorized, subject to the provisions of (c) and (d) of this subsection to receive, possess and use for calibration and reference standards:

(i) Any radioactive material authorized for use in IND/NDA products under Group I, Group II, or Group III of WAC 246-235-120, Schedule A, with a half-life not longer than one hundred days, in amounts not to exceed 15 millicuries total;

(ii) Any radioactive material authorized for use in IND/NDA products under Group I, Group II, or Group III of WAC 246-235-120, Schedule A, with half-life greater than one hundred days in amounts not to exceed 200 microcuries total;

(iii) Technetium-99m in amounts not to exceed 30 millicuries;

(iv) Any radioactive material excluding Radium-226, in amounts not to exceed three millicuries per source (except Cobalt-57, which may be possessed in amounts not to exceed 5.5 millicuries), contained in calibration or reference sources that have been manufactured, labeled, packaged, and distributed in accordance with a specific license issued by the department pursuant to WAC 246-235-100(11), a specific license issued by the United States Nuclear Regulatory Commission pursuant to Section 32.74 of 10 CFR Part 32, or a specific license issued to the manufacturer by an agreement state or a licensing state pursuant to equivalent regulations.

(d) Leak tests.

(i) Any licensee or registrant who possesses sealed sources as calibration or reference sources pursuant to (c) of this subsection shall cause each sealed source containing radioactive material, other than Hydrogen-3, with a half-life greater than thirty days in any form other than gas to be tested for leakage and/or contamination at intervals not to exceed six months. In the absence of a certificate from a transferor indicating that a test has been made within six months prior to the transfer, the sealed sources shall not be used until tested: *Provided, however,* That no leak tests are required when:

(A) The source contains 100 microcuries or less of beta and/or gamma emitting material or 10 microcuries or less of alpha emitting material;

(B) The sealed source is stored and is not being used: *Provided,* That a physical inventory of the source and wipe surveys of the storage area or storage container are conducted.

(ii) The leak test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. The test sample shall be taken from the sealed source or from the surfaces of the device in which the sealed source is mounted or stored on which contamination might be expected to accumulate. Records of leak test results shall be kept in units of microcuries and maintained for inspection by the department.

(iii) If the leak test reveals the presence of 0.005 microcurie or more of removable contamination, the licensee or registrant shall immediately withdraw the

sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with chapters 246-235 and 246-221 WAC. A report shall be filed within five days of the test with the department describing the equipment involved, the test results, and the corrective action taken.

(e) Any licensee or registrant who possesses and uses calibration and reference sources pursuant to (c)(iv) of this subsection shall:

(i) Follow the radiation safety and handling instructions approved by the department, the United States Nuclear Regulatory Commission, an agreement state or a licensing state and furnished by the manufacturer on the label attached to the source, or permanent container thereof, or in the leaflet or brochure that accompanies the source, and maintain such instruction in a legible and conveniently available form; and

(ii) Conduct a quarterly physical inventory to account for all sources received and possessed. Records of the inventories shall be maintained for inspection by the department and shall include at a minimum the quantities and kinds of radioactive material, location of sources, name of person performing the inventory, and the date of the inventory.

(4) **Human use of sealed sources.** In addition to the requirements set forth in WAC 246-235-020, a specific license for human use of sealed sources will be issued only if the applicant or, if the application is made by an institution, the individual user:

(a) Has specialized training in the diagnostic or therapeutic use of the sealed source considered, or has experience equivalent to such training; and

(b) Is a physician.

(5) **Use of sealed sources in industrial radiography.** In addition to the requirements set forth in WAC 246-235-020, a specific license for use of sealed sources in industrial radiography will be issued if:

(a) The applicant will have an adequate program for training radiographers and radiographer's assistants and submits to the department a schedule or description of such program which specifies the:

(i) Initial training;

(ii) Periodic training;

(iii) On-the-job training;

(iv) Means to be used by the licensee to determine the radiographer's knowledge and understanding of and ability to comply with department regulations and licensing requirements, and the operating and emergency procedures of the applicant; and

(v) Means to be used by the licensee to determine the radiographer's assistant's knowledge and understanding of and ability to comply with the operating and emergency procedures of the applicant;

(b) The applicant submits to the department and complies with satisfactory written operating and emergency procedures (described in WAC 246-243-140);

(c) The applicant will have a quarterly internal inspection system, to assure that license provisions, regulations, and the applicant's operating and emergency procedures are followed by radiographers and

radiographer's assistants. Records of this management control program shall be maintained for two years;

(d) The applicant submits to the department a description of the applicant's overall organizational structure pertaining to the industrial radiography program, including specified delegations of authority and responsibility for operation of the program;

(e) The applicant who desires to conduct leak tests has established adequate procedures to be followed in leak testing sealed sources for possible leakage and contamination and submits to the department a description of such procedures including:

(i) Instrumentation to be used;

(ii) Method of performing tests, e.g., points on equipment to be smeared and method of taking smear; and

(iii) Pertinent experience of the person who will perform the tests;

(f) The licensee shall conduct a program for inspection and maintenance of radiographic exposure devices and storage containers to assure proper functioning of components important to safety.

(6) **Environmentally significant licensing actions.** In addition to the requirements set forth in WAC 246-235-020, a specific license for any activity within the licensing authority of the department which the department determines will significantly affect the radiological quality of the human environment, including those specified in WAC 197-11-845(1) and 246-03-030 (1)(a)(ii) (i.e., licenses to operate low level waste burial facilities or licenses to operate or expand beyond the design capacity, mineral processing facilities or their tailings areas, whose products, or byproducts, have concentrations of naturally occurring radioactive material in excess of exempt concentrations as specified in WAC 246-232-130, Schedule C), will be issued if the following conditions are met:

(a) Environmental impact statement.

(i) The application for a license or license amendment (other than administrative amendments) is accompanied or preceded by a final environmental impact statement or final declaration of nonsignificance completed in accordance with the State Environmental Policy Act (SEPA) procedures and guidelines specified in chapters 197-11 and 246-03 WAC. For any uranium or thorium mill in operation on or before the effective date of this regulation for which an environmental impact statement has not been prepared previously, an application for license renewal must be accompanied or preceded by a final environmental impact statement or final declaration of nonsignificance completed in accordance with SEPA guidelines.

Note: No construction shall be commenced until the license has been issued or unless an emergency exemption from SEPA requirements is granted in accordance with WAC 197-11-880. For the purposes of this subsection, the term "commencement of construction" means any clearing of land, excavation or other substantial action related to a proposed activity for specific licensing that would adversely affect the natural environment of a site; this term does not include changes desirable for the temporary use of the land for public recreational use, limited borings to determine site characteristics as necessary for environmental assessment, or other preconstruction monitoring to establish background information related to suitability of a site

or to the protection of environmental values. In the case where an exemption is granted, the applicant shall assume all financial risk for construction activity; waive any claim of entitlement to the issuance of a license based solely upon the grant of the exemption or the commencement of construction pursuant thereto; and furnish, if the circumstances warrant and the department so requires, a financial surety arrangement to insure the protection of the public health, safety and the environment in the event of abandonment, default, or inability of the license applicant to meet the requirements of the act or these regulations.

(ii) In addition to the information required in chapter 197-11 WAC, the following additional areas shall be addressed in the final environmental impact statement:

(A) Alternative sites to those chosen by the applicant shall include all alternative sites, whether or not those sites are under the control or ownership of the applicant.

(B) Long term impacts shall include, but not be limited to, decommissioning, decontamination, reclamation impacts and material management associated with the proposed activities.

(C) Environmental reviews, dose assessments, ecology, construction effects on biota, impact on the environment from the use of chemicals, and socioeconomic effects shall be addressed.

(D) Alternative disposal sites and techniques for disposal shall be evaluated to determine if a site or technique is clearly superior.

(b) For uranium or thorium milling operations, a bond made payable to the department of health or other acceptable government agency, and in an amount specified by the department, shall be posted to ensure the protection of the public health and safety in the event of abandonment, default or other inability of the licensee to meet the requirements for reclamation and disposal of tailings and for decommissioning the site. The bond, or a copy thereof when the bond is made payable to another government agency, shall be received by the department prior to issuance of the license, or prior to license renewal for mills in operation on or before the effective date of this regulation. Other acceptable surety arrangements in addition to surety bonding include cash deposits, certificates of deposit, deposits of government securities, letters or lines of credit or combinations of the foregoing. The amount and mechanism of the surety arrangement may be reviewed by the department preceding each license renewal and adjustments may be required of the licensee prior to such renewal.

(c) The owner of the proposed uranium or thorium mill and tailings site(s) agrees to transfer or revert to the appropriate state or federal agency upon termination of the license, all lands, buildings and grounds, and any interest therein, necessary to fulfill the purposes of this subsection, except where the lands are held in trust for, or are owned by any Indian tribe. For any uranium or thorium mill in operation on or before the effective date of this regulation, such an agreement will be required prior to license renewal.

(d) For all uranium and thorium milling operations, the owner or operator shall arrange to pay to the department or its designee a fee in accordance with WAC 246-254-150 for a special security fund for the further

maintenance, surveillance or care which may be required after a licensee has ceased to operate.

A minimum fund of two hundred fifty thousand dollars shall be provided by the licensee payable to the state. If a shortfall exists between the amount of money in the special security fund and the two hundred fifty thousand dollars minimum amount, a surety bond, or other acceptable surety instrument as defined above shall be arranged.

(e) The application for a license includes a description of an appropriate program for effluent monitoring, environmental monitoring and data reporting. Such description shall encompass locations, frequency, and types of sampling, analytical plans and procedures, minimum detection levels, sampling equipment and quality assurance programs.

(f) All licensees or registrants required to meet the additional requirements set forth in this subsection shall establish environmental monitoring programs adequate to determine the impact of their activity on the natural environment around the site of their environmentally significant activity. The established environmental and effluent monitoring program shall address all environmentally significant radionuclide releases and external radiation sources caused or threatened to be caused by the licensee's activities.

(i) Effluent and environmental monitoring results shall include the following minimum information as pertinent:

(A) Information as to flow rates, total volume of effluent, peak concentration, concentration of each radionuclide in the effluent averaged over a period of one year at the point where the effluent leaves a stack, tube, pipe, or similar conduit;

(B) A description of the properties of the effluents, including:

(I) Chemical composition;

(II) Physical characteristics, including suspended solids content in liquid effluents, and nature of gas aerosol for air effluents;

(III) The hydrogen ion concentrations (pH) of liquid effluents; and

(IV) The size range of particulates in effluent released into air;

(C) A description of the anticipated human occupancy in the unrestricted area where the highest concentration of radioactive material from the effluent is expected, and, in the case of a river stream a description of water uses downstream from the point of release of the effluent.

(D) Information as to the highest concentration of each radionuclide in an unrestricted area, including anticipated concentrations averaged over a period of one year:

(I) In air at any point of human occupancy; or

(II) In water at points of use downstream from the point of release of the effluent;

(E) The background concentration of radionuclides in the receiving river or stream prior to the release of liquid effluent;

(F) A description of the waste treatment facilities and procedures used to reduce the concentration of radionuclides in effluents prior to their release;

(G) A written description of sampling techniques and sample analysis methods;

(H) A written description of how all calculated results were obtained from sample analysis data. This explanation shall include example calculations and estimates of the precision and sensitivity of monitoring results;

(I) A written description of the licensee's quality control program including specification of control samples and standard samples used.

(ii) The licensee shall submit in writing to the department within sixty days after January 1 and July 1 of each year, reports specifying the quantities of each of the principle radionuclides released to unrestricted areas in liquid and in gaseous effluent during the previous six months of operations. This data shall be reported in a manner that will permit the department to confirm the potential annual radiation doses to the public. All data from the radiological and nonradiological environmental monitoring program will also be submitted for the same time period and frequency as specified above. The data shall be reported in a manner which will allow the department to confirm the potential annual radiation doses to the public.

(g) For land disposal of radioactive material, the provisions of chapter 246-250 WAC must also be met.

(h) For operation of mineral processing facilities, the provisions of chapter 246-252 WAC must also be met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-235-080, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-235-080, filed 12/27/90, effective 1/31/91. Formerly WAC 402-20-070.]

**WAC 246-235-090 Special requirements for specific licenses of broad scope.** This section prescribes requirements for the issuance of specific licenses of broad scope for radioactive material ("broad licenses") and certain regulations governing holders of such licenses.\*

\*Note: Authority to transfer possession or control by the manufacturer, processor, or producer of any equipment, device, commodity or other product containing source material or byproduct material whose subsequent possession, use, transfer and disposal by all other persons who are exempted from regulatory requirements may be obtained only from the United States Nuclear Regulatory Commission, Washington, D.C. 20555.

(1) **The different types of broad licenses are set forth below:**

(a) A "Type A specific license of broad scope" is a specific license authorizing receipt, acquisition, ownership, possession, use and transfer of any chemical or physical form of the radioactive material specified in the license, but not exceeding quantities specified in the license, for any authorized purpose. The quantities specified are usually in the multicurie range.

(b) A "Type B specific license of broad scope" is a specific license authorizing receipt, acquisition, ownership, possession, use and transfer of any chemical or physical form of radioactive material specified in WAC 246-235-140 Schedule B, for any authorized purpose. The possession limit for a Type B broad license, if only one radionuclide is possessed thereunder, is the quantity specified for that radionuclide in WAC 246-235-140 Schedule B, Column I. If two or more radionuclides are possessed thereunder, the possession limit for each is determined as follows: For each radionuclide, determine the ratio of the quantity possessed to the applicable quantity specified in WAC 246-235-140 Schedule B, Column I, for that radionuclide. The sum of the ratios for all radionuclides possessed under the license shall not exceed unity.

(c) A "Type C specific license of broad scope" is a specific license authorizing receipt, acquisition, ownership, possession, use and transfer of any chemical or physical form of radioactive material specified in WAC 246-235-140 Schedule B, for any authorized purpose. The possession limit for a Type C broad license, if only one radionuclide is possessed thereunder, is the quantity specified for that radionuclide in WAC 246-235-140 Schedule B, Column II. If two or more radionuclides are possessed thereunder, the possession limit is determined for each as follows: For each radionuclide determine the ratio of the quantity possessed to the applicable quantity specified in WAC 246-235-140 Schedule B, Column II, for that radionuclide. The sum of the ratios for all radionuclides possessed under the license shall not exceed unity.

**(2) An application for a Type A specific license of broad scope will be approved if:**

(a) The applicant satisfies the general requirements specified in WAC 246-235-020.

(b) The applicant has engaged in a reasonable number of activities involving the use of radioactive material; and

(c) The applicant has established administrative controls and provisions relating to organization and management, procedures, recordkeeping, material control and accounting, and management review that are necessary to assure safe operations, including:

(i) The establishment of a radiation safety committee composed of such persons as a radiation safety officer, a representative of management, and persons trained and experienced in the safe use of radioactive material;

(ii) The appointment of a radiation safety officer who is qualified by training and experience in radiation protection, and who is available for advice and assistance on radiation safety matters; and

(iii) The establishment of appropriate administrative procedures to assure:

(A) Control of procurement and use of radioactive material;

(B) Completion of safety evaluation of proposed uses of radioactive material which take into consideration such matters as the adequacy of facilities and equipment, training and experience of the user, and the operating or handling procedures; and

(C) Review, approval, and recording by the radiation safety committee of safety evaluation of proposed uses prepared in accordance with item (2)(c)(iii)(B) of this section prior to use of the radioactive material.

**(3) An application for a Type B specific license of broad scope will be approved if:**

(a) The applicant satisfies the general requirements specified in WAC 246-235-020; and

(b) The applicant has established administrative controls and provisions relating to organization and management, procedures, recordkeeping, material control and accounting, and management review that are necessary to assure safe operations, including:

(i) The appointment of a radiation safety officer who is qualified by training and experience in radiation protection, and who is available for advice and assistance on radiation safety matters; and

(ii) The establishment of appropriate administrative procedures to assure:

(A) Control of procurement and use of radioactive material;

(B) Completion of safety evaluations of proposed uses of radioactive material which take into consideration such matters as the adequacy of facilities and equipment, training and experience of the user, and the operating or handling procedures; and

(C) Review, approval, and recording by the radiation safety officer of safety evaluations of proposed uses prepared in accordance with item (3)(b)(ii)(B) of this section prior to use of the radioactive material.

**(4) An application for a Type C specific license of broad scope will be approved if:**

(a) The applicant satisfies the general requirements specified in WAC 246-235-020.

(b) The applicant submits a statement that radioactive material will be used only by, or under the direct supervision of individuals, who have received:

(i) A college degree at the bachelor level, or equivalent training and experience, in the physical or biological sciences or in engineering; and

(ii) At least forty hours of training and experience in the safe handling of radioactive material, and in the characteristics of ionizing radiation, units of radiation dose and quantities, radiation detection instrumentation, and biological hazards of exposure to radiation appropriate to the type and forms of radioactive material to be used; and

(c) The applicant has established administrative controls and provisions relating to procurement of radioactive material, procedures, recordkeeping, material control and accounting, and management review necessary to assure safe operations.

**(5) Specific licenses of broad scope are subject to the following conditions:**

(a) Unless specifically authorized by the department, persons licensed pursuant to this section shall not:

(i) Conduct tracer studies in the environment involving direct release of radioactive material;

(ii) Receive, acquire, own, possess, use or transfer devices containing 100,000 curies or more of radioactive

material in sealed sources used for irradiation of materials;

(iii) Conduct activities for which a specific license issued by the department under WAC 246-235-080 or 246-235-100 is required; or

(iv) Add or cause the addition of radioactive material to any food, beverage, cosmetic, drug or other product designed for ingestion or inhalation by, or application to, a human being.

(b) Each Type A specific license of broad scope issued under this part shall be subject to the condition that radioactive material possessed under the license may only be used by, or under the direct supervision of, individuals approved by the licensee's radiation safety committee.

(c) Each Type B specific license of broad scope issued under this part shall be subject to the condition that radioactive material possessed under the license may only be used by, or under the direct supervision of, individuals approved by the licensee's radiation safety officer.

(d) Each Type C specific license of broad scope issued under this part shall be subject to the condition that radioactive material possessed under the license may only be used by, or under the direct supervision of, individuals who satisfy the requirements of subsection (4) of this section.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-15-112 (Order 184), § 246-235-090, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-235-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 79-12-073 (Order 1459), § 402-22-090, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-073.]

**WAC 246-235-100 Special requirements for a specific license to manufacture, assemble, repair, or distribute commodities, products, or devices which contain radioactive material.** (1) **Licensing the introduction of radioactive material into products in exempt concentrations.** In addition to the requirements set forth in WAC 246-235-020, a specific license authorizing the introduction of radioactive material into a product or material owned by or in the possession of the licensee or another to be transferred to persons exempt under WAC 246-232-010 (2)(a) will be issued if:

(a) The applicant submits a description of the product or material into which the radioactive material will be introduced, intended use of the radioactive material and the product or material into which it is introduced, method of introduction, initial concentration of the radioactive material in the product or material, control methods to assure that no more than the specified concentration is introduced into the product or material, estimated time interval between introduction and transfer of the product or material, and estimated concentration of the radioactive material in the product or material at the time of transfer; and

(b) The applicant provides reasonable assurance that the concentrations of radioactive material at the time of transfer will not exceed the concentrations in WAC 246-232-130, Schedule C, that reconstruction of the radioactive material in concentrations exceeding those in WAC 246-232-130, Schedule C, is not likely, that use

of lower concentrations is not feasible, and that the product or material is not likely to be incorporated in any food, beverage, cosmetic, drug or other commodity or product designed for ingestion or inhalation by, or application to a human being.

(c) Each person licensed under subsection (1) of this section shall file an annual report with the department which shall identify the type and quantity of each product or material into which radioactive material has been introduced during the reporting period; name and address of the person who owned or possessed the product and material, into which radioactive material has been introduced, at the time of introduction; the type and quantity of radionuclide introduced into each such product or material; and the initial concentrations of the radionuclide in the product or material at time of transfer of the radioactive material by the licensee. If no transfers of radioactive material have been made pursuant to subsection (1) of this section during the reporting period, the report shall so indicate. The report shall cover the year ending June 30, and shall be filed within thirty days thereafter.

**(2) Licensing the distribution of radioactive material in exempt quantities.\***

\*Note: Authority to transfer possession or control by the manufacturer, processor or producer of any equipment, device, commodity or other product containing source material or byproduct material whose subsequent possession, use, transfer and disposal by all other persons who are exempted from regulatory requirements may be obtained only from the United States Nuclear Regulatory Commission, Washington, D.C. 20555.

(a) An application for a specific license to distribute naturally occurring and accelerator-produced radioactive material (NARM) to persons exempted from these regulations pursuant to WAC 246-232-010 (2)(b) will be approved if:

(i) The radioactive material is not contained in any food, beverage, cosmetic, drug or other commodity designed for ingestion or inhalation by, or application to, a human being;

(ii) The radioactive material is in the form of processed chemical elements, compounds, or mixtures, tissue samples, bioassay samples, counting standards, plated or encapsulated sources, or similar substances, identified as radioactive and to be used for its radioactive properties, but is not incorporated into any manufactured or assembled commodity, product, or device intended for commercial distribution; and

(iii) The applicant submits copies of prototype labels and brochures and the department approves such labels and brochures.

(b) The license issued under paragraph (2)(a) of this section is subject to the following conditions:

(i) No more than ten exempt quantities shall be sold or transferred in any single transaction. However, an exempt quantity may be composed of fractional parts of one or more of the exempt quantity provided the sum of the fractions shall not exceed unity.

(ii) Each exempt quantity shall be separately and individually packaged. No more than ten such packaged

exempt quantities shall be contained in any outer package for transfer to persons exempt pursuant to WAC 246-232-010 (2)(b). The outer package shall be such that the dose rate at the external surface of the package does not exceed 0.5 millirem per hour.

(iii) The immediate container of each quantity or separately packaged fractional quantity of radioactive material shall bear a durable, legible label which:

(A) Identifies the radionuclide and the quantity of radioactivity; and

(B) Bears the words "radioactive material."

(iv) In addition to the labeling information required by item (2)(b)(iii) of this section, the label affixed to the immediate container, or an accompanying brochure, shall:

(A) State that the contents are exempt from licensing state requirements;

(B) Bear the words "Radioactive material—Not for human use—Introduction into foods, beverages, cosmetics, drugs, or medicinals, or into products manufactured for commercial distribution is prohibited—Exempt quantities should not be combined"; and

(C) Set forth appropriate additional radiation safety precautions and instructions relating to the handling, use, storage and disposal of the radioactive material.

(c) Each person licensed under paragraph (2)(a) of this section shall maintain records identifying, by name and address, each person to whom radioactive material is transferred for use under WAC 246-232-010 (2)(b) or the equivalent regulations of a licensing state, and stating the kinds and quantities of radioactive material transferred. An annual summary report stating the total quantity of each radionuclide transferred under the specific license shall be filed with the department. Each report shall cover the year ending June 30, and shall be filed within thirty days thereafter. If no transfers of radioactive material have been made pursuant to subsection (2) of this section during the reporting period, the report shall so indicate.

(3) **Licensing the incorporation of naturally occurring and accelerator-produced radioactive material into gas and aerosol detectors.** An application for a specific license authorizing the incorporation of NARM into gas and aerosol detectors to be distributed to persons exempt under WAC 246-232-010 (2)(c)(iii) will be approved if the application satisfies requirements equivalent to those contained in Section 32.26 of 10 CFR Part 32.

(4) **Licensing the manufacture and distribution of devices to person generally licensed under WAC 246-233-020(4).**

(a) An application for a specific license to manufacture or distribute devices containing radioactive material, excluding special nuclear material, to persons generally licensed under WAC 246-233-020(4) or equivalent regulations of the United States Nuclear Regulatory Commission, an agreement state or a licensing state will be approved if:

(i) The applicant satisfies the general requirements of WAC 246-235-020;

(ii) The applicant submits sufficient information relating to the design, manufacture, prototype testing,

quality control, labels, proposed uses, installation, servicing, leak testing, operating and safety instructions, and potential hazards of the device to provide reasonable assurance that:

(A) The device can be safely operated by persons not having training in radiological protection;

(B) Under ordinary conditions of handling, storage and use of the device, the radioactive material contained in the device will not be released or inadvertently removed from the device, and it is unlikely that any person will receive in any period of one calendar quarter a dose in excess of ten percent of the limits specified in the table in WAC 246-221-010(1); and

(C) Under accident conditions (such as fire and explosion) associated with handling, storage and use of the device, it is unlikely that any person would receive an external radiation dose or dose commitment in excess of the following organ doses:

Whole body; head and trunk; active blood-forming organs; gonads; or lens of eye 15 rems

Hands and forearms; feet and ankles; localized areas of skin averaged over areas no larger than one square centimeter 200 rems

Other organs 50 rems

(iii) Each device bears a durable, legible, clearly visible label or labels approved by the department, which contain in a clearly identified and separate statement:

(A) Instructions and precautions necessary to assure safe installation, operation and servicing of the device (documents such as operating and service manuals may be identified in the label and used to provide this information);

(B) The requirement, or lack of requirement, for leak testing, or for testing any on-off mechanism and indicator, including the maximum time interval for such testing, and the identification of radioactive material by isotope, quantity of radioactivity, and date of determination of the quantity; and

(C) The information called for in one of the following statements, as appropriate, in the same or substantially similar form:

(aa) The receipt, possession, use and transfer of this device, Model \_\_\_\_\_, Serial No. \_\_\_\_\_ Note\*, are subject to a general license or the equivalent, and the regulations of the United States Nuclear Regulatory Commission or a state with which the United States Nuclear Regulatory Commission has entered into an agreement for the exercise of regulatory authority. This label shall be maintained on the device in a legible condition. Removal of this label is prohibited.

CAUTION - RADIOACTIVE MATERIAL

-----  
(Name of manufacturer or distributor)\*

(bb) The receipt, possession, use and transfer of this device, Model \_\_\_\_\_, Serial No. \_\_\_\_\_ Note\*, are subject to a general license or the equivalent, and the regulations of a licensing state. This label shall

be maintained on the device in a legible condition. Removal of this label is prohibited.

CAUTION - RADIOACTIVE MATERIAL

-----  
 (Name of manufacturer or  
 distributor)\*

\*Note: The model, serial number, and name of the manufacturer or distributor may be omitted from this label provided the information is elsewhere specified in labeling affixed to the device.

(b) In the event the applicant desires that the device be required to be tested at intervals longer than six months, either for proper operation of the on-off mechanism and indicator, if any, or for leakage of radioactive material or for both, the applicant shall include in the application sufficient information to demonstrate that such longer interval is justified by performance characteristics of the device or similar devices and by design features which have a significant bearing on the probability or consequences of leakage of radioactive material from the device or failure of the on-off mechanism and indicator. In determining the acceptable interval for the test for leakage of radioactive material, the department will consider information which includes, but is not limited to:

- (i) Primary containment (source capsule);
- (ii) Protection of primary containment;
- (iii) Method of sealing containment;
- (iv) Containment construction materials;
- (v) Form of contained radioactive material;
- (vi) Maximum temperature withstood during prototype tests;
- (vii) Maximum pressure withstood during prototype tests;
- (viii) Maximum quantity of contained radioactive material;
- (ix) Radiotoxicity of contained radioactive material; and
- (x) Operating experience with identical devices or similarly designed and constructed devices.

(c) In the event the applicant desires that the general licensee under WAC 246-233-020(4), or under equivalent regulations of the United States Nuclear Regulatory Commission, an agreement state or a licensing state be authorized to install the device, collect the sample to be analyzed by a specific licensee for leakage of radioactive material, service the device, test the on-off mechanism and indicator, or remove the device from installation, the applicant shall include in the application written instructions to be followed by the general licensee, estimated calendar quarter doses associated with such activity or activities, and bases for such estimates. The submitted information shall demonstrate that performance of such activity or activities by an individual untrained in radiological protection, in addition to other handling, storage, and use of devices under the general license, is unlikely to cause that individual to receive a calendar quarter dose in excess of ten percent of the limits specified in the table in WAC 246-221-010(1).

(d) Each person licensed under paragraph (4)(a) of this section to distribute devices to generally licensed persons shall:

(i) Furnish a copy of the general license contained in WAC 246-233-020(4) to each person to whom the person directly or through an intermediate person transfers radioactive material in a device for use pursuant to the general license contained in WAC 246-233-020(4);

(ii) Furnish a copy of the general license contained in the United States Nuclear Regulatory Commission's, agreement state's, or licensing state's regulation equivalent to WAC 246-233-020(4), or alternatively, furnish a copy of the general license contained in WAC 246-233-020(4) to each person to whom, directly or through an intermediate person, is transferred radioactive material in a device for use pursuant to the general license of the United States Nuclear Regulatory Commission, the agreement state or the licensing state. If a copy of the general license in WAC 246-233-020(4) is furnished to such a person, it shall be accompanied by a note explaining that the use of the device is regulated by the United States Nuclear Regulatory Commission, agreement state or licensing state under requirements substantially the same as those in WAC 246-233-020(4);

(iii) Report to the department all transfers of such devices to persons for use under the general license in WAC 246-233-020(4). Such report shall identify each general licensee by name and address, an individual by name and/or position who may constitute a point of contact between the department and the general licensee, the type and model number of device transferred, and the quantity and type of radioactive material contained in the device. If one or more intermediate persons will temporarily possess the device at the intended place of use prior to its possession by the user, the report shall include identification of each intermediate person by name, address, contact, and relationship to the intended user. If no transfers have been made to persons generally licensed under WAC 246-233-020(4) during the reporting period, the report shall so indicate. The report shall cover each calendar quarter and shall be filed within thirty days thereafter.

(iv) Reports to other departments.

(A) Report to the United States Nuclear Regulatory Commission all transfers of such devices to persons for use under the United States Nuclear Regulatory Commission general license in Section 31.5 of 10 CFR Part 31.

(B) Report to the responsible department all transfers of devices manufactured and distributed pursuant to subsection (4) of this section for use under a general license in that state's regulations equivalent to WAC 246-233-020(4).

(C) Such reports shall identify each general licensee by name and address, an individual by name and/or position who may constitute a point of contact between the department and the general licensee, the type and model of the device transferred, and the quantity and type of radioactive material contained in the device. If one or more intermediate persons will temporarily possess the device at the intended place of use prior to its possession

by the user, the report shall include identification of each intermediate person by name, address, contact, and relationship to the intended user. The report shall be submitted within thirty days after the end of each calendar quarter in which such a device is transferred to the generally licensed person.

(D) If no transfers have been made to United States Nuclear Regulatory Commission licensees during the reporting period, this information shall be reported to the United States Nuclear Regulatory Commission.

(E) If no transfers have been made to general licensees within a particular state during the reporting period, this information shall be reported to the responsible department upon request of the department.

(v) Keep records showing the name, address and the point of contact for each general licensee to whom the person directly or through an intermediate person transfers radioactive material in devices for use pursuant to the general license provided in WAC 246-233-020(4), or equivalent regulations of the United States Nuclear Regulatory Commission, an agreement state or a licensing state. The records shall show the date of each transfer, the radionuclide and the quantity of radioactivity in each device transferred, the identity of any intermediate person, and compliance with the report requirements of paragraph (4)(d) of this section.

(5) **Special requirements for the manufacture, assembly or repair of luminous safety devices for use in aircraft.** An application for a specific license to manufacture, assemble or repair luminous safety devices containing tritium or promethium-147 for use in aircraft for distribution to persons generally licensed under WAC 246-233-020(5) will be approved subject to the following conditions:

(a) The applicant satisfies the general requirements specified in WAC 246-235-020; and

(b) The applicant satisfies the requirements of Sections 32.53, 32.54, 32.55, 32.56, 32.101 of 10 CFR Part 32 or their equivalent.

(6) **Special requirements for license to manufacture calibration sources containing americium-241, plutonium or radium-226 for distribution to persons generally licensed under WAC 246-233-020(7).** An application for a specific license to manufacture calibration and reference sources containing americium-241, plutonium or radium-226 to persons generally licensed under WAC 246-233-020(7) will be approved subject to the following conditions:

(a) The applicant satisfies the general requirement of WAC 246-235-020; and

(b) The applicant satisfies the requirements of Sections 32.57, 32.58, 32.59, 32.102 of 10 CFR Part 32 and Section 70.39 of 10 CFR Part 70 or their equivalent.

(7) **Manufacture and distribution of radioactive material for certain *in vitro* clinical or laboratory testing under general license.** An application for a specific license to manufacture or distribute radioactive material for use under the general license of WAC 246-233-020(8) will be approved if:

(a) The applicant satisfies the general requirements specified in WAC 246-235-020;

(b) The radioactive material is to be prepared for distribution in prepackaged units of:

(i) Iodine-125 in units not exceeding 10 microcuries each;

(ii) Iodine-131 in units not exceeding 10 microcuries each;

(iii) Carbon-14 in units not exceeding 10 microcuries each;

(iv) Hydrogen-3 (tritium) in units not exceeding 50 microcuries each;

(v) Iron-59 in units not exceeding 20 microcuries each;

(vi) Cobalt-57 in units not exceeding 10 microcuries each;

(vii) Selenium-75 in units not exceeding 10 microcuries each;

(viii) Mock Iodine-125 in units not exceeding 0.05 microcurie of iodine-129 and 0.005 microcurie of americium-241 each.

(c) Each prepackaged unit bears a durable, clearly visible label:

(i) Identifying the radioactive contents as to chemical form and radionuclide, and indicating that the amount of radioactivity does not exceed 10 microcuries of iodine-125, iodine-131, carbon-14, cobalt-57, or selenium-75; 50 microcuries of hydrogen-3 (tritium); 20 microcuries of iron-59; or Mock Iodine-125 in units not exceeding 0.05 microcurie of iodine-129 and 0.005 microcurie of americium-241 each; and

(ii) Displaying the radiation caution symbol described in WAC 246-221-120 (1)(a) and the words, "CAUTION, RADIOACTIVE MATERIAL," and "Not for internal or external use in humans or animals."

(d) One of the following statements, as appropriate, or a substantially similar statement which contains the information called for in one of the following statements, appears on a label affixed to each prepackaged unit or appears in a leaflet or brochure which accompanies the package:

(i) This radioactive material may be received, acquired, possessed and used only by physicians, veterinarians, clinical laboratories or hospitals and only for *in vitro* clinical or laboratory tests not involving internal or external administration of the material, or the radiation therefrom, to human beings or animals. Its receipt, acquisition, possession, use and transfer are subject to the regulations and a general license of the United States Nuclear Regulatory Commission or of a state with which the commission has entered into an agreement for the exercise of regulatory authority.

-----  
Name of manufacturer

(ii) This radioactive material may be received, acquired, possessed and used only by physicians, veterinarians, clinical laboratories or hospitals and only for *in vitro* clinical or laboratory tests not involving internal or external administration of the material, or the radiation

therefrom, to human beings or animals. Its receipt, acquisition, possession, use and transfer are subject to the regulations and a general license of a licensing state.

-----  
Name of manufacturer

(e) The label affixed to the unit, or the leaflet or brochure which accompanies the package, contains adequate information as to the precautions to be observed in handling and storing such radioactive material. In the case of the Mock Iodine-125 reference or calibration source, the information accompanying the source must also contain directions to the licensee regarding the waste disposal requirements set out in WAC 246-221-170 of these regulations.

(8) **Licensing the manufacture and distribution of ice detection devices.** An application for a specific license to manufacture and distribute ice detection devices to persons generally licensed under WAC 246-233-020(9) will be approved subject to the following conditions:

(a) The applicant satisfies the general requirements of WAC 246-235-020; and

(b) The criteria of Sections 32.61, 32.62, 32.103 of 10 CFR Part 32 are met.

(9) **Manufacture and distribution of radiopharmaceuticals containing radioactive material for medical use under group licenses.** An application for a specific license to manufacture and distribute radiopharmaceuticals containing radioactive material for use by persons licensed pursuant to WAC 246-235-080(3) for the uses listed in Group I, Group II, Group IV, or Group V of WAC 246-235-120, Schedule A, will be approved if:

(a) The applicant satisfies the general requirements specified in WAC 246-235-020 of this part;

(b) The applicant submits evidence that:

(i) The radiopharmaceutical containing radioactive material will be manufactured, labeled and packaged in accordance with the Federal Food, Drug and Cosmetic Act or the Public Health Service Act, such as a new drug application (NDA) approved by the United States Food and Drug Administration (FDA), a biologic product license issued by FDA or a "notice of claimed investigational exemption for a new drug" (IND) that has been accepted by the FDA; or

(ii) The manufacture, compounding and distribution of the radiopharmaceutical containing radioactive material is not subject to the Federal Food, Drug and Cosmetic Act and the Public Health Service Act;

(c) The applicant submits information on the radionuclide, chemical and physical form, packaging including maximum activity per package, and shielding provided by the packaging of the radioactive material which is appropriate for safe handling and storage of radiopharmaceuticals by group licensees; and

(d) The label affixed to each package of the radiopharmaceutical contains information on the radionuclide, quantity and date of assay, and the label affixed to each package, or the leaflet or brochure which accompanies each package, contains a statement that the radiopharmaceutical is licensed by the department for distribution to persons licensed pursuant to WAC 246-

235-080(3) and 246-235-120 Schedule A, Group I, Group II, Group IV, and Group V, as appropriate, or under equivalent regulations of the United States Nuclear Regulatory Commission, an agreement state or a licensing state. The labels, leaflets or brochures required by subsection (9) of this section are in addition to the labeling required by the Food and Drug Administration (FDA) and they may be separate from or, with the approval of FDA, may be combined with the labeling required by FDA.

(10) **Manufacture and distribution of generators or reagent kits for preparation of radiopharmaceuticals containing radioactive material.** An application for a specific license to manufacture and distribute generators or reagent kits containing radioactive material for preparation of radiopharmaceuticals by persons licensed pursuant to WAC 246-235-080(3) for the uses listed in Group III of WAC 246-235-120, Schedule A will be approved if:

(a) The applicant satisfies the general requirements specified in WAC 246-235-020;

(b) The applicant submits evidence that:

(i) The generator or reagent kit is to be manufactured, labeled and packaged in accordance with the Federal Food, Drug and Cosmetic Act or the Public Health Service Act, such as a new drug application (NDA) approved by the Food and Drug Administration (FDA), a biologic product license issued by FDA, or a "Notice of claimed investigational exemption for a new drug" (IND) that has been accepted by the FDA; or

(ii) The manufacture and distribution of the generator or reagent kit are not subject to the Federal Food, Drug and Cosmetic Act and the Public Health Service Act;

(c) The applicant submits information on the radionuclide, chemical and physical form, packaging including maximum activity per package, and shielding provided by the packaging of the radioactive material contained in the generator or reagent kit;

(d) The label affixed to the generator or reagent kit contains information on the radionuclide, quantity, and date of assay; and

(e) The label affixed to the generator or reagent kit, or the leaflet or brochure which accompanies the generator or reagent kit; contains:

(i) Adequate information, from a radiation safety standpoint, on the procedures to be followed and the equipment and shielding to be used in eluting the generator or processing radioactive material with the reagent kit; and

(ii) A statement that this generator or reagent kit (as appropriate) is approved for use by persons licensed by the department pursuant to WAC 246-235-080(3) and Group III of WAC 246-235-120, Schedule A, or under equivalent regulations of the United States Nuclear Regulatory Commission, an agreement state or a licensing state. The labels, leaflets or brochures required by subsection (10) of this section are in addition to the labeling required by FDA and they may be separate from or, with the approval of FDA, may be combined with the labeling required by FDA.

Note: Although the department does not regulate the manufacture and distribution of reagent kits that do not contain radioactive material, it does regulate the use of such reagent kits for the preparation of radiopharmaceuticals containing radioactive material as part of its licensing and regulation of the users of radioactive material. Any manufacturer of reagent kits that do not contain radioactive material who desires to have reagent kits approved by the department for use by persons licensed pursuant to WAC 246-235-080(3) and Group III of WAC 246-235-120 Schedule A may submit the pertinent information specified in subsection (10) of this section.

(11) **Manufacture and distribution of sources or devices containing radioactive material for medical use.** An application for a specific license to manufacture and distribute sources and devices containing radioactive material to persons licensed pursuant to WAC 246-235-080(3) for use as a calibration or reference source or for the uses listed in Group VI of WAC 246-235-120 Schedule A of this part will be approved if:

(a) The applicant satisfies the general requirements in WAC 246-235-020 of this part;

(b) The applicant submits sufficient information regarding each type of source or device pertinent to an evaluation of its radiation safety, including:

(i) The radioactive material contained, its chemical and physical form and amount;

(ii) Details of design and construction of the source or device;

(iii) Procedures for, and results of, prototype tests to demonstrate that the source or device will maintain its integrity under stresses likely to be encountered in normal use and accidents;

(iv) For devices containing radioactive material, the radiation profile of a prototype device;

(v) Details of quality control procedures to assure that production sources and devices meet the standards of the design and prototype tests;

(vi) Procedures and standards for calibrating sources and devices;

(vii) Legend and methods for labeling sources and devices as to their radioactive content; and

(viii) Instructions for handling and storing the source or device from the radiation safety standpoint, these instructions are to be included on a durable label attached to the source or device or attached to a permanent storage container for the source or device: *Provided*, That instructions which are too lengthy for such label may be summarized on the label and printed in detail on a brochure which is referenced on the label.

(c) The label affixed to the source or device, or to the permanent storage container for the source or device, contains information on the radionuclide, quantity and date of assay, and a statement that the named source or device is licensed by the department for distribution to persons licensed pursuant to WAC 246-235-080(3) and Group VI of WAC 246-235-120 Schedule A or under equivalent regulations of the United States Nuclear Regulatory Commission, an agreement state or a licensing state: *Provided*, That such labeling for sources which do not require long term storage (e.g., gold-198 seeds) may be on a leaflet or brochure which accompanies the source.

(d) In the event the applicant desires that the source or device be required to be tested for leakage of radioactive material at intervals longer than six months, the applicant shall include in the application sufficient information to demonstrate that such longer interval is justified by performance characteristics of the source or device or similar sources or devices and by design features that have a significant bearing on the probability or consequences of leakage of radioactive material from the source.

(e) In determining the acceptable interval for test of leakage of radioactive material, the department will consider information that includes, but is not limited to:

(i) Primary containment (source capsule);

(ii) Protection of primary containment;

(iii) Method of sealing containment;

(iv) Containment construction materials;

(v) Form of contained radioactive material;

(vi) Maximum temperature withstood during prototype tests;

(vii) Maximum pressure withstood during prototype tests;

(viii) Maximum quantity of contained radioactive material;

(ix) Radiotoxicity of contained radioactive material; and

(x) Operating experience with identical sources or devices or similarly designed and constructed sources or devices.

(12) **Requirements for license to manufacture and distribute industrial products containing depleted uranium for mass-volume applications.**

(a) An application for a specific license to manufacture industrial products and devices containing depleted uranium for use pursuant to WAC 246-233-010(4) or equivalent regulations of the United States Nuclear Regulatory Commission or an agreement state will be approved if:

(i) The applicant satisfies the general requirements specified in WAC 246-235-020;

(ii) The applicant submits sufficient information relating to the design, manufacture, prototype testing, quality control procedures, labeling or marking, proposed uses and potential hazards of the industrial product or device to provide reasonable assurance that possession, use or transfer of the depleted uranium in the product or device is not likely to cause any individual to receive in any period of one calendar quarter a radiation dose in excess of ten percent of the limits specified in WAC 246-221-010(1); and

(iii) The applicant submits sufficient information regarding the industrial product or device and the presence of depleted uranium for a mass-volume application in the product or device to provide reasonable assurance that unique benefits will accrue to the public because of the usefulness of the product or device.

(b) In the case of an industrial product or device whose unique benefits are questionable, the department will approve an application for a specific license under subsection (12) of this section only if the product or device is found to combine a high degree of utility and low

probability of uncontrolled disposal and dispersal of significant quantities of depleted uranium into the environment.

(c) The department may deny any application for a specific license under subsection (12) of this section if the end use(s) of the industrial product or device cannot be reasonably foreseen.

(d) Each person licensed pursuant to paragraph (12)(a) of this section shall:

(i) Maintain the level of quality control required by the license in the manufacture of the industrial product or device, and in the installation of the depleted uranium into the product or device;

(ii) Label or mark each unit to:

(A) Identify the manufacturer of the product or device and the number of the license under which the product or device was manufactured, the fact that the product or device contains depleted uranium, and the quantity of depleted uranium in each product or device; and

(B) State that the receipt, possession, use and transfer of the product or device are subject to a general license or the equivalent and the regulations of the United States Nuclear Regulatory Commission or of an agreement state;

(iii) Assure that the depleted uranium before being installed in each product or device has been impressed with the following legend clearly legible through any plating or other covering: "Depleted uranium";

(iv) Furnish to each person to whom depleted uranium in a product or device is transferred for use pursuant to the general license contained in WAC 246-233-010(4) or its equivalent:

(A) A copy of the general license contained in WAC 246-233-010(4) and a copy of department Form RHF-20; or

(B) A copy of the general license contained in the United States Nuclear Regulatory Commission's or agreement state's regulation equivalent to WAC 246-233-010(4) and a copy of the United States Nuclear Regulatory Commission's or agreement state's certificate, or alternatively, furnish a copy of the general license contained in WAC 246-233-010(4) and a copy of department Form RHF-20 with a note explaining that use of the product or device is regulated by the United States Nuclear Regulatory Commission or an agreement state under requirements substantially the same as those in WAC 246-233-010(4).

(v) Report to the department all transfers of industrial products or devices to persons for use under the general license in WAC 246-233-010(4). Such report shall identify each general licensee by name and address, an individual by name and/or position who may constitute a point of contact between the department and the general licensee, the type and model number of device transferred, and the quantity of depleted uranium contained in the product or device. The report shall be submitted within thirty days after the end of each calendar quarter in which such a product or device is transferred to the generally licensed person. If no transfers have been made to persons generally licensed under chapter

246-233 WAC during the reporting period, the report shall so indicate;

(vi) Provide certain other reports as follows:

(A) Report to the United States Nuclear Regulatory Commission all transfers of industrial products or devices to persons for use under the United States Nuclear Regulatory Commission general license in Section 40.25 of 10 CFR Part 40;

(B) Report to the responsible department all transfers of devices manufactured and distributed pursuant to subsection (12) of this section for use under a general license in that state's regulations equivalent to WAC 246-233-010(4);

(C) Such report shall identify each general licensee by name and address, an individual by name and/or position who may constitute a point of contact between the department and the general licensee, the type and model number of the device transferred, and the quantity of depleted uranium contained in the product or device. The report shall be submitted within thirty days after the end of each calendar quarter in which such product or device is transferred to the generally licensed person;

(D) If no transfers have been made to United States Nuclear Regulatory Commission licensees during the reporting period, this information shall be reported to the United States Nuclear Regulatory Commission;

(E) If no transfers have been made to general licensees within a particular agreement state during the reporting period, this information shall be reported to the responsible department; and

(vii) Keep records showing the name, address and point of contact for each general licensee to whom the person transfers depleted uranium in industrial products or devices for use pursuant to the general license provided in WAC 246-233-010(4) or equivalent regulations of the United States Nuclear Regulatory Commission or of an agreement state. The records shall be maintained for a period of two years and shall show the date of each transfer, the quantity of depleted uranium in each product or device transferred, and compliance with the report requirements of this section.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-235-100, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-235-100, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-22-110, filed 12/8/80. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-22-110, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-076.]

**WAC 246-235-110 Special requirements for issuance of specific licenses for source material milling.** In addition to the requirements set forth in WAC 246-235-020, a specific license for source material milling will be issued if the applicant submits to the department a satisfactory application as described herein and meets the other conditions specified below:

(1) An application for a license to receive title to, receive, possess, and use source material for milling or by-product material as defined in WAC 246-220-010 shall address the following:

(a) Description of the proposed project or action.

(b) Area/site characteristics including geology, demography, topography, hydrology and meteorology.

(c) Radiological and nonradiological impacts of the proposed project or action, including waterway and groundwater impacts.

(d) Environmental effects of accidents.

(e) Tailings disposal and decommissioning.

(f) Site and project alternatives.

(g) Description of how the provisions of chapter 246-252 WAC shall be met.

(2) Pursuant to WAC 246-235-080 (6)(a)(i) the applicant shall not commence construction of the project until the department has weighed the environmental, economic, technical, and other benefits against the environmental costs and has concluded that the issuance of the license is appropriate.

(3) Prior to issuance of a license, a public hearing shall be held. The scope shall extend to the question of license issuance and the adequacy of the reclamation, disposal, decommissioning, and decontamination plans.

(4) At least one full year prior to any major site construction, a preoperational monitoring program shall be conducted to provide complete baseline data on a milling site and its environs. Throughout the construction and operating phases of the mill, an operational monitoring program shall be conducted to measure or evaluate compliance with applicable standards and regulations; to evaluate performance of control systems and procedures; to evaluate environmental impacts of operation; and to detect potential long-term effects.

(5) Prior to issuance of the license, the mill operator shall establish financial surety arrangements consistent with the requirements of WAC 246-252-030.

(6) The applicant shall provide procedures describing the means employed to meet the following requirements during the operational phase of any project.

(a) Milling operations shall be conducted so that all effluent releases are reduced to as low as is reasonably achievable below the limits of chapter 246-221 WAC.

(b) The mill operator shall conduct at least daily inspection of any tailings or waste retention systems. Records of such inspections shall be maintained for review by the department.

(c) The mill operator shall immediately notify the department of the following:

(i) Any failure in a tailings or waste retention system which results in a release of tailings or waste into unrestricted areas; and

(ii) Any unusual conditions (conditions not contemplated in the design of the retention system) which if not corrected could lead to failure of the system and result in a release of tailings or waste into unrestricted areas.

(7) An application for a license to own, receive, possess and use byproduct material as defined in WAC 246-220-010 shall contain proposed specifications relating to the emissions control and disposition of the byproduct material to achieve the requirements and objectives set forth in the criteria listed in WAC 246-252-030.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-15-112 (Order 184), § 246-235-110, filed 7/24/91, effective 8/24/91. Statutory

Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-235-110, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-22-150, filed 12/11/86. Statutory Authority: Chapter 70.121 RCW, 81-16-031 (Order 1683), § 402-22-150, filed 7/28/81.]

**WAC 246-235-120 Schedule A groups of medical uses of radioactive material (ref. WAC 246-235-080(3) and 246-235-100(9)). (1) Group I.** Use of prepared radiopharmaceuticals for certain diagnostic studies involving measurements of uptake, dilution and excretion. This group does not include imaging or localization studies.

(a) Any radioactive material in a radiopharmaceutical and for a diagnostic use involving measurements of uptake, dilution or excretion for which a "Notice of claimed investigational exemption for a new drug" (IND) has been accepted by the Food and Drug Administration (FDA) or for which a "New drug application" (NDA) is in effect.

(b) The provisions of (a) of this subsection notwithstanding, no radioactive material in gaseous form or for use as an aerosol is permitted by this subsection except as specifically authorized in a license.

(2) **Group II.** Use of prepared radiopharmaceuticals for diagnostic imaging and localization studies.

(a) Any radioactive material in a radiopharmaceutical and for a diagnostic use involving imaging or localizing for which a "Notice of claimed investigational exemption for a new drug" (IND) has been accepted by the Food and Drug Administration (FDA) or for which a "New drug application" (NDA) is in effect;

(b) The provisions of (a) of this subsection notwithstanding, no radioactive material in gaseous form or for use as an aerosol is permitted by this subsection except as specifically authorized by a license or subsection (3)(b) of this section.

(3) **Group III.** Use of generators and reagent kits for the preparation and use of radiopharmaceuticals containing radioactive material for diagnostic imaging and localization studies.

(a) Any generator or reagent kit for preparation and diagnostic use of a radiopharmaceutical containing radioactive material for which generator or reagent kit a "Notice of claimed investigational exemption of a new drug" (IND) has been accepted by the Food and Drug Administration (FDA) or for which a "New drug application" (NDA) is in effect.

(b) The provisions of (a) of this subsection notwithstanding, no generator or reagent kit is authorized for preparation of any gaseous form or aerosol of a radioactive material, except Technetium-99m as sodium pentetate as an aerosol for pulmonary function studies when used only with an approved and shielded delivery system, and disposed in accordance with applicable requirements, or as specifically authorized in a license.

(4) **Group IV.** Use of prepared radiopharmaceuticals for certain therapeutic uses that do not normally require hospitalization for purposes of radiation safety.

(a) Iodine-131 as iodide for treatment of hyperthyroidism and cardiac dysfunction;

(b) Phosphorus-32 as soluble phosphate for treatment of polycythemia vera, leukemia and bone metastases;

(c) Phosphorus-32 as colloidal chromic phosphate for intracavitary treatment of malignant effusions;

(d) Any radioactive material in a radiopharmaceutical and for a therapeutic use not normally requiring hospitalization for purposes of radiation safety for which a "Notice of claimed investigational exemption for a new drug" (IND) has been accepted by the Food and Drug Administration (FDA) or for which a "New drug application" (NDA) is in effect.

(5) **Group V.** Use of prepared radiopharmaceuticals for certain therapeutic uses that normally require hospitalization for purposes of radiation safety.

(a) Gold-198 as colloid for intracavitary treatment of malignant effusions;

(b) Iodine-131 as iodide for treatment of thyroid carcinoma;

(c) Any radioactive material in a radiopharmaceutical and for a therapeutic use normally requiring hospitalization for radiation safety reasons for which a "Notice of claimed investigational exemption for a new drug" (IND) has been accepted by the Food and Drug Administration (FDA) or for which a "New drug application" (NDA) is in effect.

(6) **Group VI.** Use of sources and devices containing radioactive material for certain medical uses.

(a) Americium-241 as a sealed source in a device for bone mineral analysis;

(b) Cesium-137 encased in needles and applicator cells for topical, interstitial, and intracavitary treatment of cancer;

(c) Cobalt-60 encased in needles and applicator cells for topical, interstitial, and intracavitary treatment of cancer;

(d) Gold-198 as seeds for interstitial treatment of cancer;

(e) Iodine-125 as a sealed source in a device for bone mineral analysis;

(f) Gadolinium-153 as a sealed source in a device for bone mineral analysis;

(g) Iridium-192 as seeds encased in nylon ribbon for interstitial treatment of cancer;

(h) Strontium-90 sealed in an applicator for treatment of superficial eye conditions; and

(i) Iodine-125 as seeds for interstitial treatment of cancer.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-235-120, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-235-120, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-22-200, filed 12/11/86. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-22-200, filed 12/8/80. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-22-200, filed 11/30/79, effective 1/1/80. Formerly WAC 402-20-260.]

**WAC 246-235-130 Appendix--General laboratory rules for safe use of unsealed sources.** (1) In addition to the requirements set forth in WAC 246-235-020, a specific licensee who uses unsealed, unplated and/or liquid sources should possess adequate facilities including ventilation systems which are compatible with the proposed uses: and,

(2) Possess, use, and store, radioactive materials in accordance with, but not limited to, the following:

(a) Receive, handle, and store radioactive materials only at specifically designated locations within the applicant's facility. Vessels containing radioactive material must be labeled as required by chapter 246-221 WAC.

(b) Wear disposable gloves at all times when handling dispersible radioactive material or potentially contaminated items.

(c) Wear personnel monitoring devices (film badge and/or TLD), when required, at all times when working with, or in the vicinity of, radioactive materials. Extremity doses shall be considered in evaluating the need for separate extremity dosimeters. Calculations based on whole body badge results for photon emitters may be used in lieu of separate extremity dosimeters. Extremity dosimetry should be worn when working with millicurie or greater quantities of material (excluding low energy beta emitters and pure alpha emitters). Monitoring devices, when not in use, shall be stored only in a designated low-background area.

(d) Use remote tools, lead shields, lead-glass shields, and/or plexiglass shields as appropriate.

(e) Prohibit eating, chewing, drinking, smoking, and application of cosmetics in any area where radioactive material is used or stored.

(f) Do not store food, drink or personal effects in any area, container, or refrigerator designated for radioactive materials use or storage.

(g) Do not pipette radioactive materials or perform any similar operation by employing mouth suction.

(h) Use disposable absorbent material with impervious backing to cover work surfaces where spillage is possible.

(i) Properly dress and protect open wounds on exposed body surfaces before working with radioactive materials.

(j) Wear laboratory coats when working with radioactive material. Potentially contaminated laboratory coats shall not be worn outside the immediate work area.

(k) Nuclides in volatile form, or with a high potential for volatilization should be used only in areas with ventilation systems which conform to the requirements of WAC 246-221-040 and 246-221-070.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-235-130, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-235-130, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-22-240, filed 12/11/86; 83-19-050 (Order 2026), § 402-22-240, filed 9/16/83.]

**WAC 246-239-010 Definitions.** (1) "Nuclear medicine" means the intentional internal or external administration of unsealed radioactive material to human beings.

(2) "Nuclear medicine technologist" means any individual who performs nuclear medical procedures under the supervision of a physician licensed pursuant to chapter 246-235 WAC.

(3) "Training" means instruction or experience acquired under the direct supervision of a physician, a certified/registered nuclear medicine technologist, and/or a qualified expert who has the necessary knowledge and training to advise personnel on radiation protection.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-239-010, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-239-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-34-030, filed 9/16/83.]

**WAC 246-239-020 Radiation safety committee.** (1) Where required by license condition or pursuant to WAC 246-235-080(1), the radiation safety committee, shall meet at least once every six months. Where required by license condition, the committee shall meet at the frequency stated in the license or application. Such meetings shall be documented by written minutes and those minutes shall be maintained for inspection by the department for at least two years.

(2) Evaluation of the adequacy of the licensee's radiation safety program shall be conducted at least once each calendar year. Such evaluations may be performed

by the radiation safety officer, a competent outside agent, or by qualified personnel at the licensee's own facility. These evaluations shall be documented, maintained for inspection by the department, and presented to the radiation safety committee for review and approval.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-239-020, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-239-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-34-050, filed 9/16/83.]

**WAC 246-239-030 Personnel monitoring.** In addition to the requirements of WAC 246-221-090 and the conditions of the license, extremity monitoring (such as TLD ring badges) shall be provided and used on a monthly exchange basis for those personnel who elute Tc 99<sup>m</sup>/Mo 99 generators.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-239-030, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-239-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-34-090, filed 9/16/83.]

**WAC 246-239-040 Radiopharmaceuticals.** (1) Radioactive material to be administered to humans shall be the subject of an FDA-approved "new drug application" (NDA) or an FDA-accepted "notice of claimed investigational exemption for a new drug" (IND), unless otherwise stated in the license.

(2) Any licensee using radioactive material for clinical procedures other than those specified in the product labeling (package insert) shall comply with the product labeling regarding:

- (a) Chemical and physical form;
- (b) Route of administration; and
- (c) Dosage range.

(3) No licensee shall receive, possess, or use radioactive material as a radiopharmaceutical except when it has been:

(a) Manufactured in the form to be administered to the patient, and labeled, packaged, and distributed, in accordance with a specific license; or

(b) Prepared from reagent kits and/or radionuclide generators approved in accordance with WAC 246-235-080 (3)(b) and 246-235-100(10).

(4) The provisions of this part notwithstanding:

(a) No radioactive material in gaseous form or for use as an aerosol is permitted except Technetium-99m pentetate used as an aerosol for lung function studies, or as specifically authorized by license condition. Radioactive aerosols must be administered with a closed, shielded system that either is vented to the outside atmosphere through an air exhaust or provides for collection and disposal of the aerosol; and

(b) No generator or reagent kit is authorized for preparation of any gaseous form or aerosol of the radioactive material, except as specifically authorized by license condition.

(5) Radioactive material to be administered to humans shall be assayed for activity to determine the dose

within ten percent accuracy of the prescribed dose prior to being administered to patients.

(a) In the absence of a certificate from a supplier which specifies the activity of each dose, the license shall establish written procedures for the personnel to perform assays to an accuracy of ten percent of the prescribed dose prior to being administered to patients.

(b) The licensee shall maintain for inspection by the department, records of the results of each assay performed to determine the activity of each dose administered to a patient. Records shall be maintained for two years following performance of each assay.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-239-040, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-239-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-34-100, filed 9/16/83.]

**WAC 246-239-060 Laboratory safety.** In addition to those requirements found in WAC 246-235-130, the licensee shall utilize syringe shields or other shielding devices for all manipulations. Syringe shields should be used for injections whenever practicable.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-239-060, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-239-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-34-140, filed 12/11/86; 83-19-050 (Order 2026), § 402-34-140, filed 9/16/83.]

**WAC 246-239-080 Calibration and reference sources.** (1) Any licensee who owns, receives, acquires, possesses, uses, or transfers calibration reference sources pursuant to the general license authorized in WAC 246-233-020(7) shall:

(a) Maintain a file or log identifying such sources, including isotope, amount, model and serial numbers, manufacturer, date of receipt, date of transfer, and to whom transferred (where applicable);

(b) Possess at any one time, and at any one location of storage or use, no more than five uCi of Am-241 and five uCi of Pu and five uCi of Ra-226 in such sources;

(c) Store such source(s), except when the source(s) is being used, in a closed container adequately designed and constructed to contain Americium-241, Plutonium, or Radium 226 which might otherwise escape during storage; and

(d) Not use such source(s) for any purpose other than the calibration of radiation detectors or the standardization of other sources.

(2) Any licensee who receives, possesses, or uses calibration and reference standards pursuant to the group licensing provisions of WAC 246-235-080 (3)(c):

(a) Shall conduct leak tests in accordance with WAC 246-235-080 (3)(d);

(b) Shall follow the radiation safety and handling instructions approved by the department, the United States Nuclear Regulatory Commission, and agreement state or a licensing state and furnished by the manufacturer on the label attached to the source, or permanent

container thereof, or in the leaflet or brochure that accompanies the source, and maintain such instruction in a legible and conveniently available form; and

(c) Shall conduct a quarterly physical inventory to account for all sources received and possessed. Records of the inventory shall be maintained for inspection by the department, and shall include, but not be limited to, the quantities and kinds of radioactive material, location of sources, and the date of inventory.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-239-080, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-239-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-34-170, filed 9/16/83.]

**WAC 246-239-090 Instrumentation.** (1) Instrumentation used to conduct surveys shall be appropriate for the nuclide(s) and radiation levels present.

(2) Portable and stationary survey instruments shall be calibrated at least once each calendar year, and after any repair using either approved procedures or by a facility specifically licensed to perform calibrations. Records shall be maintained for inspection by the department.

(3) An operational check utilizing an appropriate check source shall be conducted.

(4) Imaging systems shall have a flood performed daily when the system is used. In addition, mobile nuclear medicine services employing imaging systems which are moved from one facility to another shall perform a flood prior to use at each location. Bar phantoms shall be performed weekly. Records of such quality assurance for imaging systems, shall be maintained for inspection by the departments.

(5) Appropriate source(s) for calibration and reference of dose calibrators shall be used. Dose calibrators shall receive:

- (a) Daily constancy checks;
- (b) Quarterly linearity tests;
- (c) Annual tests for accuracy; and
- (d) Geometry tests upon installation and following major repair.

(6) Quality assurance procedures for dose calibrators found in subsection (5) of this section, excluding daily constancy checks shall be conducted by individuals qualified to perform these tests, and shall be documented for future inspection by the department.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-239-090, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-239-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-34-190, filed 9/16/83.]

**WAC 246-239-100 Radioactive gases.** (1) Licensees utilizing radioactive gases, such as Xenon-133 or Krypton-81m, shall have and use by January 1, 1984 a ventilation system adequate for such use, including an approved trap. Radioactive gas shall be disposed only as specifically authorized by the license.

(2) Licensees utilizing radioactive gases shall maintain emissions in accordance with limits specified in

chapters 246-221 and 246-247 WAC. Verification shall be documented. Such verification may be made by calculation, air samples, or the use of constant monitoring instrumentation.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-239-100, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-239-100, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-34-210, filed 12/11/86; 83-19-050 (Order 2026), § 402-34-210, filed 9/16/83.]

## Chapter 246-240 WAC

### RADIATION PROTECTION—MEDICAL THERAPY

#### WAC

- 246-240-020 Interstitial, intracavitary and superficial applications.
- 246-240-030 Teletherapy.
- 246-240-040 Special requirements for teletherapy licensees.

**WAC 246-240-020 Interstitial, intracavitary and superficial applications.** (1) **Accountability, storage, and handling.**

(a) Except as otherwise specifically authorized by the department, each licensee shall provide accountability of sealed sources and shall keep a record of the issue and return of all sealed sources to their place of storage.

(b) Each licensee shall conduct a quarterly physical inventory to account for all sources and devices received and possessed. Records of the inventories shall be maintained for inspection by the department and shall include the quantities and kinds of radioactive material, location of sources and devices, and the date of the inventory.

(c) Each licensee shall follow the radiation safety and handling instructions approved by the department, the United States Nuclear Regulatory Commission, an agreement state or a licensing state and furnished by the manufacturer on the label attached to the source, device or permanent container thereof, or in the leaflet or brochure which accompanies the source or device, and maintain such instruction in a legible and conveniently available form.

(d) Each licensee shall assure that needles or standard medical applicator cells containing Radium-226, or Cobalt-60 as wire are not opened while in the licensee's possession unless specifically authorized by license condition.

(2) **Testing sealed sources for leakage and contamination.**

(a) All sealed sources containing more than 100 microcuries of radioactive material with a half-life greater than thirty days, except Iridium-192 seeds encased in nylon ribbon, shall be tested for contamination and/or leakage at intervals not to exceed six months or at such other intervals as are approved by the department, the United States Nuclear Regulatory Commission, an agreement state or a licensing state and described by the manufacturer on the label attached to the source, device, or permanent container thereof, or in the leaflet or brochure which accompanies the source or device. Each source or device shall be so tested prior to its first use

unless the supplier furnishes a certificate that the source or device has been so tested within six months prior to the transfer.

(b) Leak tests shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample or in the case of radium, the escape of radon at the rate of 0.001 microcurie per twenty-four hours. The test sample shall be taken from the source or from the surfaces of the device in which the source is permanently or semipermanently mounted or stored on which one might expect contamination to accumulate. Records of leak test results shall be kept in units of microcuries and maintained for inspection by the department.

(c) Any leak test conducted pursuant to (a) of this subsection which reveals the presence of 0.005 microcurie or more of removable contamination or in the case of radium, the escape of radon at the rate of 0.001 microcurie per twenty-four hours, shall be considered evidence that the sealed source is leaking. The licensee shall immediately withdraw the source from use and cause it to be decontaminated and repaired or to be disposed of in accordance with department regulations. A report shall be filed within five days of the test with the department, describing the equipment involved, the test results, and the corrective action taken.

### (3) Radiation surveys.

(a) The maximum radiation level at a distance of one meter from the patient in whom brachytherapy sources have been inserted shall be determined by measurement or calculation. This radiation level shall be entered on the patient's chart and other signs as required under subsection (4) of this section.

(b) The radiation levels in the patient's room and the surrounding area shall be determined, recorded, and maintained for inspection by the department.

(c) The licensee shall assure that patients treated with Cobalt-60, Cesium-137, Iridium-192, or Radium-226 or any other nonpermanent implants remain hospitalized until a source count and a radiation survey of the patient and the patient's room confirm that all implants have been removed and are accounted for.

### (4) Signs and records.

(a) In addition to the requirements of WAC 246-221-120, the bed, cubicle, or room of the hospital brachytherapy patient shall be marked with a sign indicating the presence of brachytherapy sources. This sign shall incorporate the radiation symbol and specify the radionuclide, the activity, date, and the individual(s) to contact for radiation safety instructions. The sign is not required provided the exception in WAC 246-221-130(2) is met.

(b) The following information shall be included for the duration of the patient's treatment in the patient's official hospital medical record/chart:

(i) The radionuclide administered, number of sources, activity in millicuries and time and date of administration;

(ii) The exposure rate at one meter, the time the determination was made, and by whom;

(iii) The radiation symbol; and

(iv) The precautionary instructions necessary to assure that the exposure of individuals does not exceed that permitted under WAC 246-221-010.

(5) Information required by subsection (4)(b)(i) and (ii) of this section shall be retained for review by the department.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-240-020, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-240-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-32-020, filed 12/11/86; 83-19-050 (Order 2026), § 402-32-020, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-32-020, filed 12/8/80; Order 1084, § 402-32-020, filed 1/14/76; Order 1, § 402-32-020, filed 1/8/69; Rules (part), filed 10/26/66.]

### WAC 246-240-030 Teletherapy. (1) Equipment.

(a) The housing shall be so constructed that, at one meter from the source, the maximum exposure rate does not exceed ten milliroentgens per hour when the beam control mechanism is in the "off" position. The average exposure rate measured at a representative number of points about the housing, each one meter from the source, shall not exceed two milliroentgens per hour.

(b) For teletherapy equipment installed after the effective date of these regulations, the leakage radiation measured at one meter from the source when the beam control mechanism is in the "on" position shall not exceed 0.1 percent of the useful beam exposure rate.

(c) Adjustable or removable beam-defining diaphragms shall allow transmission of not more than five percent of the useful beam exposure rate.

(d) The beam control mechanism shall be of a positive design capable of acting in any orientation of the housing for which it is designed to be used. In addition to an automatic closing device, the mechanism shall be designed so that it can be manually returned to the "off" position with a minimum risk of exposure.

(e) The closing device shall be so designed as to return automatically to the "off" position in the event of any breakdown or interruption of the activating force and shall stay in the "off" position until activated from the control panel.

(f) Beam control mechanisms.

(i) When any door to the treatment room is opened, the beam control mechanism shall automatically and rapidly restore the unit to the "off" position and cause it to remain there until the unit is reactivated from the control panel.

(ii) Beam control mechanisms shall be tested at intervals not to exceed three months for proper function. Records of these tests shall be maintained for inspection by the department.

(g) There shall be at the housing and at the control panel a warning device that plainly indicates whether the beam is on or off.

(h) The equipment shall be provided with a locking device to prevent unauthorized use.

(i) The control panel shall be provided with a timer that automatically terminates the exposure after a pre-set time.

(j) Provision shall be made to permit continuous observation of patients during irradiation.

(k) The treatment room shall be equipped with a permanent radiation monitor which shall:

(i) Continuously monitor the condition of the teletherapy beam;

(ii) Provide a continuous visible signal to the teletherapy unit operator and any person entering the treatment room, of a unit malfunction;

(iii) Each radiation monitor must be equipped with an emergency power supply separate from the power supply to the teletherapy unit. This emergency power supply may be a battery system;

(iv) Each radiation monitor must be tested for proper operation each day before the teletherapy unit is used for treatment of patients; and

(v) If a radiation monitor is inoperable for any reason, any person entering the teletherapy room shall use a properly operating portable survey instrument or audible alarm personal dosimeter to monitor for any malfunction of the source exposure mechanism that may have resulted in an exposed or partially exposed source. Survey instruments or dosimeters must be tested daily before use.

(2) **Operation.** Except in the emergency condition when a source fails to retract, no individual shall be in the treatment room during irradiation unless that individual is the patient. Mechanical restraining or supporting devices shall be used for positioning the patient, if necessary.

(3) **Testing for leakage and contamination.** Teletherapy sources shall be tested for leakage and contamination in accordance with the procedures described in WAC 246-240-020(2). Tests of leakage may be made by wiping accessible surfaces of the housing port or collimator while the source is in the "off" position and measuring these wipes for transferred contamination.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-240-030, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-240-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-32-030, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-32-030, filed 12/8/80; Order 1084, § 402-32-030, filed 1/14/76; Order 1, § 402-32-030, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-240-040 Special requirements for teletherapy licensees. (1) Requirement to perform full calibration requirements of teletherapy units.**

(a) Any licensee authorized under WAC 246-235-080 to use teletherapy units for treating humans shall cause full calibration measurements to be performed on each teletherapy unit:

(i) Prior to the first use of the unit for treating humans:

(A) Whenever spot-check measurements indicate that the output value differs by more than five percent from the value obtained at the last full calibration corrected mathematically for physical decay;

(B) Following replacement of the radiation source or following reinstallation of the teletherapy unit in a new location;

(C) Following any repair of the teletherapy unit that includes removal of the source or major repair of the components associated with the source exposure assembly; and

(D) At intervals not exceeding one year.

(b) Full calibration measurements required by (a) of this subsection shall include determination of:

(i) The exposure rate or dose rate to an accuracy within  $\pm 3$  percent for the range of field sizes and for the range of distances (or for the axis distance) used in radiation therapy;

(ii) The congruence between the radiation field and the field indicated by the light beam localizing device;

(iii) The uniformity of the radiation field and its dependence upon the orientation of the useful beam;

(iv) Timer accuracy; and

(v) The accuracy of all distance measuring devices used for treating humans.

(c) Full calibration measurements shall be made in accordance with the procedures recommended by the Scientific Committee on Radiation Dosimetry of the American Association of Physicists in Medicine (Physics in Medicine and Biology, Vol. 16, No. 3, 1971, pp. 379-386).<sup>1</sup>

(d) The exposure rate or dose rate values determined in (b)(i) of this subsection shall be corrected mathematically for physical decay for intervals not exceeding one month for units employing a Cobalt-60 source and six months for units employing a Cesium-137 source.

(e) Full calibration measurements required by (a) of this subsection and physical decay corrections required by (d) of this subsection shall be performed by an expert qualified by training and experience in accordance with subsection (4) of this section.

(2) **Requirement to perform periodic spot-check measurements of teletherapy units.**

(a) Any licensee authorized under WAC 246-235-080(4) to use teletherapy units for treating humans shall cause spot-check measurements to be performed on each teletherapy unit at intervals not exceeding one month.

(b) Spot-check measurements required by (a) of this subsection shall include determination of:

(i) Timer accuracy;

(ii) The congruence between the radiation field and the field indicated by the light beam localizing device;

(iii) The accuracy of all distance measuring devices used for treating humans;

(iv) The exposure rate, dose rate, or a quantity related in a known manner to these rates for one typical set of operating conditions; and

(v) The difference between the measurement made in (b) of this subsection and the anticipated output, expressed as a percentage of the anticipated output (i.e., the value obtained at last full calibration corrected mathematically for physical decay).

(c) Spot-check measurements required by (a) of this subsection shall be performed in accordance with procedures established by an expert qualified by training and

experience in accordance with subsection (4) of this section. (A qualified expert need not actually perform the spot-check measurements.) If a qualified expert does not perform the spot-check measurements, the results of the spot-check measurements shall be reviewed by a qualified expert within fifteen days.

**(3) Requirement to calibrate instruments used for full calibration and spot-check measurements.**

(a) Full calibration measurements required by subsection (1) of this section shall be performed using a dosimetry system that has been calibrated by the National Bureau of Standards or by a Regional Calibration Laboratory accredited by the American Association of Physicists in Medicine. The dosimetry system shall have been calibrated within the previous two years and after any servicing that may have affected system calibration.

(b) Spot-check measurements required by subsection (2) of this section shall be performed using a dosimetry system that has been calibrated in accordance with (a) of this subsection. Alternatively, a dosimetry system used solely for spot-check measurements may be calibrated by direct intercomparison with a system that has been calibrated in accordance with (a) of this subsection. This alternative calibration method shall have been performed within the previous one year and after each servicing that may have affected system calibration. Dosimetry systems calibrated by this alternative method shall not be used for full calibration measurements. The use of thermoluminescent dosimeter does not satisfy the requirements of this section.

**(4) Qualified expert.** The licensee shall determine if a person is an expert qualified by training and experience to calibrate a teletherapy unit and establish procedures for (and review the results of) spot-check measurements. The licensee shall determine that the qualified expert:

(a) Is certified by the American Board of Radiology in Therapeutic Radiological Physics, Radiological Physics, Roentgen-Ray and Osmin-Ray Physics, or X-ray and Radium Physics; or

(b) Has the following minimum training and experience:

(i) A master's or doctor's degree in physics, biophysics, radiological physics or health physics;

(ii) One year of full-time training in therapeutic radiological physics; and

(iii) One year of full-time experience in a radiotherapy facility including personal calibration and spot-check of at least one teletherapy unit.

Note: The requirements of subsection (4) of this section are in addition to those set forth under "Qualified expert" in WAC 246-220-010.

**(5) Records.**

The licensee shall maintain, for inspection by the department, records of the measurements, tests, corrective actions, and instrument calibrations made under subsections (1) and (2) of this section and records of the licensee's evaluation of the qualified expert's training and experience made under subsection (4) of this section.

(a) Records of (i) full calibration measurements and (ii) calibration of instruments used to make these measurements shall be preserved for five years after completion of the full calibration.

(b) Records of (i) spot-check measurements and corrective actions and (ii) calibration of instruments used to make spot-check measurements shall be preserved for two years after completion of the spot-check measurements and corrective actions.

(c) Records of the licensee's evaluation of the qualified expert's training and experience shall be preserved for five years after the qualified expert's last performance of a full calibration of the licensee's teletherapy unit.

**(6) Inspection and servicing of the source exposure mechanism.**

(a) Each teletherapy machine shall be fully inspected and serviced during source replacement or at intervals not to exceed five years, whichever comes first, to assure proper function of the source exposure mechanism. This inspection and servicing must be performed by persons specifically authorized to do so by the department, the United States Nuclear Regulatory Commission, or an agreement state, and a complete written report of the inspection and servicing must be kept on file for review by the department.

(b) The following shall be performed only by persons specifically authorized by the department, the United States Nuclear Regulatory Commission, or an agreement state to perform such services:

(i) Installation, inspection, servicing, relocation, or removal of teletherapy units containing sources.

(ii) Source exchange.

(iii) Any maintenance or repair operations on a teletherapy unit involving work on the source drawer, the shutter, or other mechanism that could expose the source, reduce the shielding around the source or compromise the safety of the unit and result in increased radiation levels.

<sup>1</sup>Licensees that have their teletherapy units calibrated by persons who do not meet these criteria for minimum training and experience may require a license amendment exempting them from the requirements of subsection (4) of this section. The request should include the name of the proposed qualified expert, a description of his or her training and experience including information similar to that specified by subsection (4) of this section and a report of at least one calibration and spot-check program based on measurements personally made by the proposed expert within the last ten years and written endorsement of the technical qualifications of the proposed expert from personal knowledge by a physicist certified by the American Board of Radiology in one of the specialties listed therein.

| 246-243-210 | Special requirements for enclosed radiography.   |
| 246-243-220 | Special requirements for permanent radiographic installation.  |

**WAC 246-243-020 Definitions.** As used in this part:

(1) "Enclosed radiography" means industrial radiography employing radiation machines conducted in an enclosed cabinet or room and includes cabinet radiography and shielded room radiography.

(a) "Cabinet radiography" means industrial radiography employing radiation machines conducted in an enclosure or cabinet so shielded that every location at the exterior meets the conditions specified in WAC 246-221-060 of these regulations.

(i) "Cabinet x-ray system" means an x-ray system with the x-ray tube installed in an enclosure (hereinafter termed "cabinet") which, independently of existing architectural structure except the floor on which it may be placed, is intended to contain at least that portion of a material being irradiated, provide radiation attenuation, and exclude personnel from its interior during generation of x radiation. Included are all x-ray systems designed primarily for the inspection of carry-on baggage at airline, railroad, and bus terminals, and in similar facilities. An x-ray tube used within a shielded part of a building, or x-ray equipment which may temporarily or occasionally incorporate portable shielding is not considered a cabinet x-ray system.

(b) "Shielded-room radiography" means industrial radiography conducted in a room so shielded that every location on the exterior meets the conditions specified in WAC 246-221-060 of these regulations.

(2) "Industrial radiography" means the examination of the macroscopic structure of materials by nondestructive methods utilizing sources of radiation. Industrial radiography as used in this chapter does not include well logging operations.

(3) "Permanent radiographic installation" means a shielded installation or structure designed or intended

for radiography employing a radiographic exposure device and in which radiography is regularly performed, regardless of ownership.

(4) "Personal supervision" means supervision by a radiographer such that the radiographer is physically present at the radiography site and in such proximity that communication can be maintained and immediate assistance given as required. When a radiographer's assistant is using or handling sources of radiation, the radiographer must maintain direct surveillance.

(5) "Radiographer" means any individual who performs or who, in attendance at the site where sources of radiation are being used, personally supervises industrial radiographic operations and who is responsible to the licensee or registrant for assuring compliance with the requirements of these regulations and all license conditions.

(6) "Radiographer's assistant" means any individual who, under the personal supervision of a radiographer, uses sources of radiation, related handling tools, or radiation survey instruments in industrial radiography.

(7) "Radiographic exposure device" means any instrument containing a sealed source fastened or contained therein, in which the sealed source or shielding thereof may be moved, or otherwise changed, from a shielded to unshielded position for purposes of making a radiographic exposure.

(8) "Shielded position" means the location within the radiographic exposure device or storage container which, by manufacturer's design, is in one proper location for storage of the sealed source.

(9) "Source changer" means a device designed and used for replacement of sealed sources in radiographic exposure devices, including those also used for transporting and storage of sealed sources.

(10) "Storage container" means a device in which sealed sources are transported or stored.

(11) Temporary job site refers to any location which is not specifically authorized and described in a license or registration.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-020, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-36-025, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-025, filed 12/8/80; Order 1084, § 402-36-025, filed 1/14/76.]

**WAC 246-243-060 Locking of radiographic exposure devices.** (1) Each radiographic exposure device shall be provided with a lock or outerlocked container designed to prevent unauthorized or accidental production of radiation or removal or exposure of a sealed source and shall be locked when returned to the shielded position at all times. In addition, during radiographic operations the sealed source assembly shall be locked in the shielded position each time the source is returned to that position.

(2) Each sealed source storage container and source changer shall have a lock or outer locked container designed to prevent unauthorized or accidental removal of

the sealed source from its shielded position. Storage containers and source changers shall be kept locked when containing sealed sources except when under the direct surveillance of a radiographer or a radiographer's assistant.

(3) Radiographic exposure devices, source changers, and storage containers, prior to being moved from one location to another and also prior to being secured at a given location, shall be locked and surveyed to assure that the sealed source is in the shielded position.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-060, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-040, filed 12/8/80; Order 1084, § 402-36-040, filed 1/14/76; Order 1, § 402-36-040, filed 1/8/69; Rules (part), filed 10/26/66.]

#### WAC 246-243-080 Radiation survey instruments.

(1) The licensee or registrant shall maintain sufficient calibrated and operable radiation survey instruments to make physical radiation surveys as required by this part and chapter 246-221 WAC. Instrumentation required by this section shall have a range such that two milliroentgens per hour through one roentgen per hour can be measured.

(2) Each radiation survey instrument shall be calibrated:

(a) At energies appropriate for use and at intervals not to exceed three months and after each instrument servicing;

(b) Such that accuracy within  $\pm 20$  percent traceable to a national standard can be demonstrated; and

(c) At two or more widely separated points, other than zero, on each scale.

(3) Records shall be maintained of these calibrations for two years after the calibration date for inspection by the department.

(4) The requirements of this section do not apply to registrants using only radiation machines in enclosed radiographic systems.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-080, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-36-060, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-060, filed 12/8/80; Order 1084, § 402-36-060, filed 1/14/76; Order 1, § 402-36-060, filed 1/8/69; Rules (part), filed 10/26/66.]

#### WAC 246-243-090 Leak testing, repair, tagging, opening, modification, and replacement of sealed sources.

(1) The replacement of any sealed source fastened to or contained in a radiographic exposure device and leak testing, repair, tagging, opening, or any other modification of any sealed source shall be performed only by persons specifically authorized to do so by the department, the United States Nuclear Regulatory Commission, or any agreement state.

(2) Each sealed source shall be tested for leakage at intervals not to exceed six months. In the absence of a certificate from a transferor that a test has been made

within the six-month period prior to the transfer, the sealed source shall not be put into use until tested and results obtained.

(3) The leak test shall be capable of detecting the presence of 0.005 microcurie of removable contamination on the sealed source. An acceptable leak test for sealed sources in the possession of a radiography licensee would be to test at the nearest accessible point to the sealed source storage position, or other appropriate measuring point, by a procedure to be approved pursuant to WAC 246-235-080 (5)(e). Records of leak test results shall be kept in units of microcuries and maintained for inspection by the department for two years after the leak test is performed.

(4) Any test conducted pursuant to subsections (2) and (3) of this section which reveals the presence of 0.005 microcurie or more of removable radioactive material shall be considered evidence that the sealed source is leaking. The licensee shall immediately withdraw the equipment involved from use and shall cause it to be decontaminated and repaired or to be disposed in accordance with regulations of the department. Within five days after obtaining results of the test, the licensee shall file a report with the department describing the involved equipment, the test results, and the corrective action taken.

(5) A sealed source which is not fastened to or contained in a radiographic exposure device shall have permanently attached to it a durable tag at least one inch square bearing the prescribed radiation caution symbol in conventional colors magenta or purple on a yellow background, and at least the instructions: "Danger - Radioactive material - Do not handle - Notify civil authorities if found."

(6) Each radiographic exposure device shall have permanently and conspicuously attached to it a durable label at least two inches square bearing the prescribed radiation caution symbol in conventional colors (magenta or purple on a yellow background), and at a minimum the instructions, "Danger - Radioactive material - Do not handle - Notify civil authorities if found."

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-090, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-36-070, filed 12/11/86; 83-19-050 (Order 2026), § 402-36-070, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-070, filed 12/8/80; Order 1084, § 402-36-070, filed 1/14/76; Order 1, § 402-36-070, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-243-110 Utilization logs.** (1) Each licensee and/or registrant shall maintain current logs, which shall be kept available for inspection by the department for two years from the date of the recorded event, at the address specified in the license showing for each radiation exposure device the following information:

(a) A description (or make and model number) of each radiation exposure device or storage container in which the sealed source is located;

(b) The identity of the radiographer to whom assigned; and

(c) Locations where used and dates of use.

(2) The requirements of subsection (1) of this section shall not apply in industrial radiography utilizing radiation machines in enclosed interlocked cabinets or rooms which are not occupied during radiographic operations, which are equipped with interlocks such that the radiation machine will not operate unless all openings are securely closed and which is so shielded that every location on the exterior meets conditions for an unrestricted area, as specified in WAC 246-221-060.

(3) A separately identified utilization log is not required if the equivalent information is available in records of the licensee or registrant and available at the address specified in the license.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-110, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-110, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-090, filed 12/8/80; Order 1084, § 402-36-090, filed 1/14/76; Order 1, § 402-36-090, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-243-120 Inspection and maintenance of radiographic exposure devices, control cables, storage containers and source changers.** (1) The licensee shall conduct a program for inspection and maintenance of radiographic exposure devices, storage containers, control units (to include cables), and source changers at intervals, not to exceed three months or prior to first use thereafter to assure proper functioning of components important to safety. Records of these inspections and maintenance shall be kept for two years.

(2) The licensee shall check for obvious defects in radiographic exposure devices, storage containers, control assemblies, and source changers prior to use each day the equipment is used.

(3) The licensee's program shall include a thorough visual inspection for corrosion, and specific maintenance procedures that address corrosion removal and prevention.

(4) If any inspection conducted pursuant to subsections (1) or (2) of this section reveals damage to components critical to radiation safety, the device shall be removed from service until proper repairs have been made.

(5) Any maintenance performed on radiographic exposure devices and accessories shall be in accordance with the manufacturer's specifications.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-120, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-120, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-36-095, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-095, filed 12/8/80; Order 1084, § 402-36-095, filed 1/14/76.]

**WAC 246-243-130 Limitations--Personal radiation safety requirements for radiographers and radiographers' assistants.** (1) No licensee or registrant shall permit any

individual to act as a radiographer as defined in this chapter until such individual:

(a) Has been instructed in the subjects outlined in WAC 246-243-230;

(b) Has received copies of and instruction in the regulations contained in chapters 246-220, 246-222, 246-221, and 246-243 WAC and the applicable sections of appropriate license(s), and the licensee's or registrant's operating and emergency procedures, and shall have demonstrated understanding thereof;

(c) Has demonstrated competence to use the source of radiation, related handling tools, and radiation survey instruments which will be employed in the individual's assignment; and

(d) Has demonstrated understanding of the instructions in this paragraph by successful completion of written test and a field examination on the subjects covered.

(2) No licensee or registrant shall permit any individual to act as a radiographer's assistant as defined in this part until such individual:

(a) Has received copies of and instruction in the licensee's or registrant's operating and emergency procedures;

(b) Has demonstrated competence to use under the personal supervision of the radiographer the sources of radiation, related handling tools, and radiation survey instruments which will be employed in the individual's assignment;

(c) Has demonstrated understanding of the instructions in this paragraph by successfully completing a written or oral test and a field examination on the subjects covered; and

(d) Records of the above training including copies of written tests and dates of oral tests and field examinations shall be maintained for three years.

(3) Each licensee or registrant shall maintain, for inspection by the department, records of training and testing which demonstrate that the requirements of subsections (1) and (2) of this section and WAC 246-235-080 (5)(a) are met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-130, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-130, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-36-100, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-100, filed 12/8/80; Order 1084, § 402-36-100, filed 1/14/76; Order 1, § 402-36-100, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-243-140 Operating and emergency procedures.** The licensee's or registrant's operating and emergency procedures shall include instructions in at least the following:

(1) The handling and use of sources of radiation to be employed such that no individual is likely to be exposed to radiation doses in excess of the limits established in chapter 246-221 WAC Standards for protection against radiation;

(2) Methods and occasions for conducting radiation surveys;

(3) Methods for controlling access to radiographic areas;

(4) Methods and occasions for locking and securing sources of radiation;

(5) Personnel monitoring and the use of personnel monitoring equipment including steps that must be taken immediately by radiography personnel in the event a pocket dosimeter is found to be off-scale;

(6) Transportation to field locations, including packing of sources of radiation in the vehicles, posting of vehicles, and control of sources of radiation during transportation;

(7) Minimizing exposure of individuals in the event of an accident;

(8) The procedure for notifying proper personnel in the event of a theft, loss, overexposure or accident involving sources of radiation;

(9) Maintenance of records; and

(10) The inspection and maintenance of radiographic exposure devices and storage containers.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-140, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-140, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-36-110, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-110, filed 12/8/80; Order 1084, § 402-36-110, filed 1/14/76; Order 708, § 402-36-110, filed 8/24/72; Order 1, § 402-36-110, filed 7/2/71; Order 1, § 402-36-110, filed 1/8/69; Rules (part), filed 10/26/66.]

#### **WAC 246-243-150 Personnel monitoring control.**

(1) No licensee or registrant shall permit any individual to act as a radiographer or as a radiographer's assistant unless, at all times during radiographic operations, each such individual shall wear a film or TLD badge and a direct reading pocket dosimeter. Pocket dosimeters shall be capable of measuring doses from zero to at least 200 milliroentgens. A film or TLD badge shall be assigned to and worn by only one individual.

(2) Pocket dosimeters shall be read and doses recorded daily. Pocket dosimeters shall be charged at the beginning of each working day. Pocket dosimeters shall be checked at periods not to exceed one year for correct response to radiation. Acceptable dosimeters shall read within plus or minus 30 percent of the true radiation exposure. A film or TLD badge shall be immediately processed if a pocket dosimeter is discharged beyond its range during normal use. The film or TLD badge reports received from the film or TLD badge processor and records of pocket dosimeter readings shall be maintained for inspection by the department until it authorizes their disposal.

(3) The requirements for use of pocket dosimeter or pocket chamber shall not apply in industrial radiography utilizing radiation machines in enclosed interlocked cabinets or rooms which are not occupied during radiographic operations, which are equipped with interlocks such that the radiation machine will not operate unless all openings are securely closed and which are so shielded that every location on the exterior meets conditions for an unrestricted area, as specified in WAC 246-221-060.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-150, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-150, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-36-120, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-120, filed 12/8/80; Order 1084, § 402-36-120, filed 1/14/76; Order 1, § 402-36-120, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-243-160 Supervision of radiographers' assistants.** Whenever a radiographer's assistant uses radiographic exposure devices, uses sealed sources or related source handling tools, or conducts radiation surveys required by WAC 246-243-190 (2), (3), or (4) to determine that the sealed source has returned to the shielded position after an exposure, he or she shall be under the personal supervision of a radiographer, as defined in WAC 246-243-020. Personal supervision shall include (1) the radiographer's personal presence at the site where the sealed sources are being used, (2) the ability of the radiographer to communicate and give immediate assistance if required, and (3) the radiographer's ability to observe the performance of his/her assistant during the operations referred to in this section.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-160, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-160, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-36-125, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-125, filed 12/8/80.]

**WAC 246-243-170 Security--Precautionary procedures in radiographic operations.** (1) During each radiographic operation, the radiographer or radiographer's assistant shall maintain a direct surveillance of the operation to protect against unauthorized entry into a high radiation area, as defined in chapter 246-220 WAC except:

(a) Where the high radiation area is equipped with a control device or alarm system as described in WAC 246-221-120 (1)(e)(ii) or

(b) Where the high radiation area is locked to protect against unauthorized or accidental entry.

(2) When not in operation or when not under direct surveillance, portable radiation exposure devices and mobile or portable radiation machines shall be physically secured to prevent removal by unauthorized personnel.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-170, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-170, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-130, filed 12/8/80; Order 1084, § 402-36-130, filed 1/14/76; Order 1, § 402-36-130, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-243-180 Posting.** Notwithstanding any provisions in paragraph WAC 246-221-130 areas in which radiography is being performed or in which a radiographic exposure device is being stored shall be conspicuously posted and access to the area shall be controlled as required by WAC 246-221-120.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-180, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-180, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-140, filed 12/8/80; Order 1084, § 402-36-140, filed 1/14/76; Order 1, § 402-36-140, filed 1/8/69; Rules (part), filed 10/26/66.]

**WAC 246-243-200 Records required at temporary job sites.** Each licensee or registrant conducting industrial radiography at a temporary site shall have the following records available at that site for inspection by the department:

- (1) Appropriate license;
- (2) Operating and emergency procedures;
- (3) Applicable regulations;
- (4) Survey records required pursuant to WAC 246-243-190 for the period of operation at the site;
- (5) Daily pocket dosimeter records for the period of operation at the site;
- (6) The latest instrument calibration and leak test record for specific devices in use at the site.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-200, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-200, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-153, filed 12/8/80.]

**WAC 246-243-210 Special requirements for enclosed radiography.** (1) Systems for enclosed radiography designed to allow admittance of individuals during x-radiation generation shall:

(a) Comply with all applicable requirements of chapter 246-243 WAC and WAC 246-221-060 of these regulations.

(b) Be evaluated at intervals not to exceed one year to assure compliance with the applicable requirements as specified in (a) of this subsection. Records of these evaluations shall be maintained for inspection by the department for a period of two years after the evaluation.

(c) Interlocks are required on all enclosed radiographic systems, such that the exposure will terminate if a door or port accessible to individuals is opened during the exposure, except for those systems employing conveyor belts or sample ports.

(2) Cabinet x-ray systems designed to exclude individuals during x-radiation are exempt from the requirements of chapter 246-243 WAC except that:

(a) Operating personnel must be provided with either a film badge or a thermoluminescent dosimeter and reports of the results must be maintained for inspection by the department.

(b) No registrant shall permit any individual to operate a cabinet x-ray system until such individual has received a copy of and instruction in the operating procedures for the unit and has demonstrated competence in its use. Records which demonstrate compliance with this subparagraph shall be maintained for inspection by the department until disposition is authorized by the department.

(c) Tests for proper operation of high radiation area control devices or alarm systems, where applicable, must be conducted at the beginning of each day of use and recorded.

(d) The registrant shall perform an evaluation, at intervals not to exceed one year, to determine conformance with WAC 246-221-060 of these regulations.

Records of these evaluations shall be maintained for inspection by the department for a period of two years after the evaluation.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-210, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-210, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-36-155, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-155, filed 12/8/80; Order 1084, § 402-36-155, filed 1/14/76.]

**WAC 246-243-220 Special requirements for permanent radiographic installation.** Permanent radiographic installations having high radiation area entrance controls of the types described in WAC 246-221-120 (1)(e)(ii) or where the high radiation area is locked to protect against unauthorized or accidental entry, shall also meet the following special requirements.

(1) Each entrance that is used for personnel access to the high radiation area in a permanent radiographic installation to which this section applies shall have both visible and audible warning signals to warn of the presence of radiation. The visible signal shall be actuated by radiation whenever the source is exposed. The audible signal shall be actuated when an attempt is made to enter the installation while the source is exposed.

(2) Both visible and audible alarm systems are required and shall be tested prior to the first use of a source in the installation and thereafter at intervals not to exceed three months. Records of the tests shall be kept for two years.

(3) The department shall review and approve, in advance of construction, plans for permanent radiographic installations whose construction had not commenced by the effective date of these regulations. Construction of the permanent facility shall be in accordance with the plans approved by the department.

(4) A physical radiation survey shall be conducted and results recorded following construction or major modification of the facility to be used in the installation. Radiography shall not be conducted if exposure levels in unrestricted areas are greater than 2 mR in any hour. Any increase in source strength will require resurvey of the installation prior to the conduct of industrial radiography.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-243-220, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-243-220, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 83-19-050 (Order 2026), § 402-36-157, filed 9/16/83. Statutory Authority: RCW 70.98.050. 81-01-011 (Order 1570), § 402-36-157, filed 12/8/80.]

## Chapter 246-244 WAC

## RADIATION PROTECTION--WIRELINE SERVICES

## WAC

|             |   |

| 246-244-240 | Notification of incidents, abandonment, and lost sources. |

**WAC 246-244-001 Purpose.** This chapter establishes radiation safety requirements for persons using sources of radiation for wireline service operations including mineral logging, radioactive markers, and/or subsurface tracers studies. The requirements of this chapter are in addition to, and not in substitution for, requirements of chapters 246-220, 246-221, 246-222, 246-232, and 246-235 WAC.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-001, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-010, filed 12/11/86.]

**WAC 246-244-030 Prohibitions.** No licensee shall perform wireline service operations with a sealed source(s) or conduct subsurface tracer studies with sources of radiation unless, prior to commencement of the operation, the licensee has a written agreement with the well operator, well owner, drilling contractor, or land owner that:

(1) In the event a sealed source is lodged downhole every reasonable effort at recovery will be made;

(2) Potentially contaminated equipment or areas will not be released until an acceptable and documented survey is performed;

(3) Specific types of recovery operations which could endanger the integrity of the sealed source encapsulation will not be permitted or conducted; and

(4) In the event a decision is made to abandon the sealed source downhole, requirements of WAC 246-244-240 shall be met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-030, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-040, filed 12/11/86.]

**WAC 246-244-040 Limits on levels of radiation.** Sources of radiation shall be used, stored, and transported in such a manner that the transportation requirements of WAC 246-232-090 and the dose limitation requirements of chapter 246-221 WAC are met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-040, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-060, filed 12/11/86.]

**WAC 246-244-060 Transport precautions.** (1) Transport containers shall be physically secured to the transporting vehicle to prevent accidental loss, tampering, or unauthorized removal.

(2) Transport of radioactive material shall be in accordance with applicable provisions of the United States Department of Transportation, as required by WAC 246-232-090.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-060, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-100, filed 12/11/86.]

**WAC 246-244-080 Leak testing of sealed sources.** Each licensee utilizing sealed sources of radioactive material shall have the sources tested for leakage and/or contamination in accordance with WAC 246-221-080.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-080, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-140, filed 12/11/86.]

**WAC 246-244-140 Training requirements.** (1) The licensee may not permit an individual to act as a logging supervisor until that person:

(a) Has completed at least forty hours of formal training in a course recognized by the department, the United States Nuclear Regulatory Commission, an agreement state, or a licensing state covering the subjects outlined in subsection (5) of this section;

(b) Has received copies of and instruction in:

(i) Washington state regulations contained in this chapter and in the applicable chapters 246-220, 246-221, and 246-222 WAC or their equivalent;

(ii) The license under which the logging supervisor will perform well-logging operations; and

(iii) The licensee's operating, recordkeeping, and emergency procedures.

(c) Has completed three months of on-the-job training and demonstrated competence in the use of licensed materials, remote handling tools, and radiation survey instruments by a field evaluation; and

(d) Has demonstrated understanding of the requirements in (a) and (b) of this subsection by successfully completing a closed book written test.

(2) The licensee may not permit an individual to act as a logging assistant until that person:

(a) Has received copies of and instruction in the licensee's operating and emergency procedures;

(b) Has demonstrated understanding of the materials listed in subsection (1)(a) and (b) of this section by successfully completing a closed book written test; and

(c) Has received instructions in the use, under the personal supervision of the logging supervisor, of tracer material, sealed sources, remote handling tools, and radiation survey instruments, as appropriate.

(3) Each licensee shall provide for documented refresher training of logging supervisors and logging assistants at intervals not to exceed twelve months.

(4) Each licensee shall maintain a record of each logging supervisor's and logging assistant's training, including copies and dates of written tests for a minimum of three years following the termination of employment.

(5) Each licensee shall include the following subjects in the formal training required by this chapter:

(a) **Fundamentals of radiation safety:**

(i) Characteristics of radiation;

(ii) Units of radiation dose and quantity of radioactivity;

(iii) Hazards of exposure to radiation;

(iv) Levels of radiation from licensed material;

(v) Methods of controlling radiation dose:

(A) Working time;

(B) Working distances;

(C) Shielding;

(D) Radiation safety practices, including prevention and contamination and methods of decontamination;

(b) **Radiation detection instrumentation to be used:**

(i) Use of radiation survey instruments:

(A) Operation;

(B) Calibration;

(C) Limitations;

(ii) Survey techniques;

(iii) Use of personnel monitoring equipment;

(c) **Equipment to be used:**

(i) Handling equipment and remote handling tools;

(ii) Licensed materials;

(iii) Storage, control, and disposal of equipment and licensed material;

(iv) Operation and control of equipment and licensed materials;

(v) Maintenance of equipment;

(d) Requirements of pertinent state and federal regulations;

(e) Case histories and potential consequences of accidents in well-logging operations.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-140, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-140, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-260, filed 12/11/86.]

**WAC 246-244-150 Operating and emergency procedures.** The licensee's operating and emergency procedures shall include instruction in at least the following:

(1) Handling and use of sources of radiation to be employed such that no individual is likely to be exposed to radiation doses in excess of the standards established in chapter 246-221 WAC;

(2) Methods and occasions for conducting radiation surveys;

(3) Methods and occasions for locking and securing sources of radiation;

(4) Personnel monitoring and the use and care of personnel monitoring equipment;

(5) Transportation of sources of radiation to temporary job sites and field stations, including the marking, labeling, packaging, and placing of sources of radiation in vehicles, shipping papers, placarding of vehicles, and physical securing of sources of radiation to transport vehicles during transportation to prevent accidental loss, tampering, or unauthorized removal;

(6) Minimizing personnel exposure, including that from inhalation and ingestion of licensed material, during well-logging operations and in the event of an accident;

(7) Procedure for notifying proper personnel in the event of an accident;

(8) Maintenance of records;

(9) Inspection and maintenance of source holders, logging tools, source handling tools, storage containers, transport containers, and injection tools;

(10) Procedures to be followed in the event a sealed source is lodged downhole or ruptured;

(11) Procedures to be used for picking up, receiving, and opening packages containing radioactive material;

(12) The procedure and the use of tools for remote handling of sealed sources and radioactive tracer material, except low activity calibration sources;

(13) The procedure to use for detecting contamination and for preventing the spread of contamination; and

(14) The procedure to be used to decontaminate the environment, equipment, and/or personnel if any or all are contaminated.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-150, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-150, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-280, filed 12/11/86.]

**WAC 246-244-160 Personnel monitoring.** (1) The licensee may not permit an individual to act as a logging supervisor or logging assistant unless that person wears, at all times during well-logging operations, either a film badge or thermoluminescent dosimeter (TLD). Each film badge or TLD must be assigned to and worn by only one individual. The film badge must be exchanged and analyzed at least monthly and TLD badges exchanged and analyzed at least every three months. The licensee shall have each badge or TLD processed in a timely fashion.

(2) The licensee shall provide appropriate bioassay services to individuals using licensed materials for subsurface tracer studies.

(3) The licensee shall keep reports received from the badge or TLD processor and from the bioassay service laboratory for inspection until the department authorizes disposition or terminates the license.

(4) Personnel monitoring devices and equipment shall monitor for beta, gamma, and neutron radiation as appropriate.

(5) Each licensee shall adhere to the requirements of the department's Regulatory Guide 8.20 *Bioassay Program Criteria for I-125 and I-131*.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-160, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-160, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-300, filed 12/11/86.]

**WAC 246-244-180 Security.** During each logging or tracer application, the logging supervisor or other designated employee shall maintain direct surveillance of the operation to protect against unauthorized and/or unnecessary entry into the restricted area (as defined in WAC 246-220-010).

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-180, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-180, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-340, filed 12/11/86.]

**WAC 246-244-220 Documents and records required at field stations.** Each licensee shall maintain for inspection by the department the following documents and records for the specific devices and sources at the field station:

- (1) Appropriate license or equivalent documents;
- (2) Operating and emergency procedures;
- (3) Applicable regulations;
- (4) Records of the latest survey instrument calibrations required pursuant to WAC 246-244-070;
- (5) Records of the latest leak test results required pursuant to WAC 246-244-080;
- (6) Records of inventories required pursuant to WAC 246-244-090;
- (7) Utilization records required pursuant to WAC 246-244-100;
- (8) Records of inspection and maintenance required pursuant to WAC 246-244-130;
- (9) Survey records required pursuant to WAC 246-244-210; and
- (10) Training records required pursuant to WAC 246-244-140.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-220, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-220, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-420, filed 12/11/86.]

**WAC 246-244-230 Documents and records required at temporary job sites.** Each licensee conducting operations at a temporary job site shall have the following documents and records available at all times at that site for inspection by the department:

- (1) Current operating and emergency procedure(s);
- (2) Survey records required pursuant to WAC 246-244-210 for the period of operation at the site;
- (3) Actual current calibration certificates (or photocopies) for the radiation survey instruments used at the site;
- (4) When operating in the state of Washington under reciprocity, a copy of the appropriate license, and the Washington state rules and regulations for radiation protection;

(5) Records of current leak tests for all sealed sources which require such tests at the job site;

(6) Use logs required pursuant to WAC 246-244-100;

(7) Current United States Department of Transportation shipping papers and transport container certifications for the material transported; and

(8) Records of spotmarker inventories made prior to arrival required pursuant to WAC 246-244-090.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-230, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-230, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-440, filed 12/11/86.]

**WAC 246-244-240 Notification of incidents, abandonment, and lost sources.** (1) Notification of incidents and sources lost in other than downhole logging operations shall be made in accordance with appropriate provisions of chapter 246-221 WAC.

(2) The licensee shall immediately notify the state of Washington division of radiation protection by telephone (206/753-3468) and subsequently within five days by confirmatory letter if:

(a) Licensed material has been lost in or near a fresh water aquifer; or

(b) A sealed source has been ruptured. This notice must designate the well or other location and describe the magnitude and extent of licensed materials, assess the consequences of the loss or rupture, and explain efforts planned or being taken to mitigate these consequences.

(3) Whenever a sealed source or device containing radioactive material is lodged downhole, the licensee shall:

(a) Monitor the surface for the presence of radioactive contamination with an appropriate radiation survey instrument (not the logging tool itself) during logging tool recovery operations; and

(b) Notify the department immediately by telephone if radioactive contamination is detected at the surface or if the source appears to be damaged.

(4) When it becomes apparent that efforts to recover the radioactive source will not be successful, the licensee shall:

(a) Advise the well operator or owner, as appropriate, of the regulations of the state of Washington regarding abandonment, and an appropriate method of abandonment. The licensee shall ensure that such abandonment procedures are implemented within thirty days after the sealed source has been classified as irretrievable. Such abandonment procedures shall include:

(i) Immobilization and sealing in place of the radioactive source with a cement plug;

(ii) The setting of a whipstock or deflection device; and

(iii) The mounting of a permanent identification plaque at the surface of the well, containing the appropriate information required by subsection (5) of this section;

(b) Immediately notify the department by telephone (206/753-3468), giving the circumstances of the loss,

and request and receive approval of the proposed abandonment procedures; and

(c) File a written report with the department within thirty days of the abandonment, setting forth the following information:

(i) Date and time of occurrence and a brief description of attempts to recover the source;

(ii) A description of the radioactive source(s) involved, including radionuclide, quantity, make, model and serial number, and chemical and physical form;

(iii) Surface location and identification of well;

(iv) Results of efforts to immobilize and seal the source in place;

(v) Depth of the radioactive source in meters or feet;

(vi) Depth to the top of cement plug in meters or feet;

(vii) Depth of the well in meters or feet; and

(viii) Information contained on the permanent identification plaque.

(5) Whenever a sealed source containing radioactive material is not recovered and is abandoned downhole, the licensee shall provide a permanent plaque at least eighteen centimeters square for posting the well or well bore (see Appendix A). This plaque shall:

(a) Be constructed of long lasting material, such as stainless steel or monel; and

(b) Contain the following information permanently and conspicuously engraved on its face:

(i) The word "CAUTION (or DANGER)";

(ii) The radiation symbol(s) with or without the conventional color requirement;

(iii) The date of abandonment (month/day/year);

(iv) The name of the well operator or well owner;

(v) The well name and well identification number(s) or other designation;

(vi) The sealed source(s) by radionuclide and quantity of activity (if more than one source is involved, information for each source shall be included);

(vii) The source depth and the depth to the top of the plug in meters or feet; and

(viii) An appropriate warning, depending on the specific circumstances of each abandonment.<sup>1</sup>

(6) The department may, at its own discretion, impose such other requirements as it may deem necessary.

<sup>1</sup> An example of a suggested plaque is shown in Appendix A of this section. Appropriate warnings may include:

(a) "Do not drill below plug back depth";

(b) "Do not enlarge casing"; and/or

(c) "Do not reenter the hole before contacting the state of Washington division of radiation protection."

#### APPENDIX A

#### Example of Plaque for Identifying Wells Containing Sealed Sources Containing Radioactive Material Abandoned Downhole

The size of the plaque should be convenient for use on active or inactive wells, and shall be at least eighteen centimeters square. Letter size of the word "CAUTION" or "DANGER" shall be approximately twice the letter size of the rest of the information, e.g., one-half inch and one-fourth inch letter size, respectively.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-15-112 (Order 184), § 246-244-240, filed 7/24/91, effective 8/24/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-244-240, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-38-500, filed 12/11/86.]

**WAC 246-249-001 Purpose and scope.** This chapter provides rules governing generators and brokers of low-level radioactive waste seeking to dispose of such waste at any commercial disposal facility in the state of Washington. These rules are in addition to applicable

requirements of the United States Nuclear Regulatory Commission (NRC), the United States Department of Transportation (DOT), and other requirements of Title 246 WAC, the requirements of the department of ecology, Title 173 WAC, and conditions of the license issued to the disposal site operator(s).

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-249-001, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-249-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-62-010, filed 12/11/86.]

**WAC 246-249-010 Definitions.** As used in this chapter, the following definitions apply:

(1) "Low-level radioactive waste" has the same meaning as in the Low-Level Radioactive Waste Policy Amendments Act of 1985, Public Law 99-240, that is, radioactive waste not classified as high-level radioactive waste, spent nuclear fuel, or by-product material as defined in section 11e.(2) of the Atomic Energy Act.

(2) "Broker" means a person who performs one or more of the following functions for a low-level radioactive waste generator:

(a) Arranges for transportation of the low-level radioactive waste;

(b) Collects and/or consolidates shipments of such low-level radioactive waste;

(c) Processes such low-level radioactive waste in some manner; provided it shall not mean a carrier whose sole function is to transport such low-level radioactive waste.

(3) "Shipper" or "consignor" means the last licensee to possess the low-level radioactive waste prior to transportation to the low-level radioactive waste disposal site, normally the generator when no broker is involved; otherwise, the broker.

(4) "Generator" means the last person who puts radioactive material to practical use, and who then declares it to be no longer of use or value.

(5) "Motor vehicle" means any vehicle, truck, tractor, semi-trailer, or trailer (or any permitted combination of these), driven by mechanical power and used upon the highways to carry property.

(6) "Motor common carrier" means a person holding itself out to the general public to provide motor vehicle transportation for compensation over regular or irregular routes, or both.

(7) "Motor contract carrier" means a person other than a common carrier providing motor vehicle transportation of property for compensation under continuing agreements with one or more persons.

(8) "Motor private carrier" means a person, other than a motor carrier, transporting property by motor vehicle when the person is the owner, lessee, or bailee of the property being transported; and the property is being transported for sale, lease, rent, or bailment, or to further a commercial enterprise.

(9) "Motor carrier" means a motor common carrier and a motor contract carrier.

(10) "Shipment" means the total low-level radioactive waste material transported in one motor vehicle.

(11) "Transuranic waste" means material contaminated with elements that have an atomic number greater than 92.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-249-010, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-249-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-62-020, filed 12/11/86.]

**WAC 246-249-020 Site use permit.** (1) Each generator and each broker of low-level radioactive waste shall possess a valid and unencumbered site use permit prior to the shipment of such waste to, or the disposal of such waste at any commercial disposal facility in the state of Washington and shall have complied with the permit requirements of the department of ecology.

(2) Suspension or revocation of permit.

(a) The failure of one or more packages in a shipment of waste to be in compliance with one or more of the requirements of the license issued to the commercial low-level radioactive waste disposal site operator, Title 246 WAC, the United States Nuclear Regulatory Commission, the United States Department of Transportation, or conditions of the disposal site operator's radioactive materials license may cause the suspension of the site use permit of the responsible generator and/or broker.

(b) The site use permit of a generator and/or broker may be suspended or revoked if any other licensed commercial low-level radioactive waste disposal site in the United States has refused to accept waste from that generator or broker.

(c) A suspended site use permit may be reinstated provided the generator and/or broker submits a quality assurance procedure designed to correct previous problems and to achieve compliance with all applicable requirements.

(3) Brokered shipments.

(a) It is the broker's responsibility to assure that a generator of waste has a valid unencumbered site use permit prior to shipment of waste for disposal.

(b) A broker, as consignor, assumes coresponsibility with a generator for all aspects of that generator's waste until it can be documented to the department's satisfaction that the broker's sphere of responsibility was limited.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-249-020, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-249-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-62-030, filed 12/11/86.]

**WAC 246-249-030 Waste shipment certification.**

(1) A low-level radioactive waste shipment certification, Form RHF-31, must accompany each shipment of radioactive waste to a licensed low-level radioactive waste burial site. All three sections of the form must be completed. The certification shall be submitted at the disposal site to the department of health or its designee, and must be judged to be properly executed prior to the acceptance of the waste by the site operator. If a broker is involved, the broker's and carrier's sections must bear

original signatures. The generator's signature need not be an original signature. If a broker is acting as the processor and/or packager of the waste, the broker may act as the agent of the generator and may sign the certification statement for the generator, provided the name and site use permit number of the original generator are identified. If no broker is involved, the generator shall so signify by entry in the broker's section of the form that no broker was involved, e.g., "no broker," and the generator and carrier's section must bear original signatures.

(2) In the case of brokered shipments from more than a single generator, information on each generator's certification shall include data clearly identifying, without reference to other documentation, each package transferred from that generator to the broker. The data shall be compatible with package identifications on the shipment manifest (RSR) from the broker, and with identification markings on the packages.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-249-030, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-249-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-62-040, filed 12/11/86.]

**WAC 246-249-040 Classification of radioactive waste for near-surface disposal.** (1) **Considerations.** Determination of the classification of waste involves two considerations. First, consideration must be given to the concentration of long-lived radionuclides (and their shorter-lived precursors) whose potential hazard will persist long after such precautions as institutional controls, improved waste form, and deeper disposal have ceased to be effective. These precautions delay the time when long-lived radionuclides could cause exposures. In addition, the magnitude of the potential dose is limited by the concentration and availability of the radionuclide at the time of exposure. Second, consideration must be given to the concentration of shorter-lived radionuclides for which requirements on institutional controls, waste form, and disposal methods are effective.

(2) **Classes of waste.**

(a) Class A waste is waste that is usually segregated from other waste classes at the disposal site. The physical form and characteristics of Class A waste must meet the minimum requirements set forth in WAC 246-249-050(1). If Class A waste also meets the stability requirements set forth in WAC 246-249-050(2), it is not necessary to segregate the waste for disposal.

(b) Class B waste is waste that must meet more rigorous requirements on waste form to ensure stability after disposal. The physical form and characteristics of Class B waste must meet both the minimum and stability requirements set forth in WAC 246-249-050.

(c) Class C waste is waste that not only must meet more rigorous requirements on waste form to ensure stability but also requires additional measures at the disposal facility to protect against inadvertent intrusion. The physical form and characteristics of Class C waste must meet both the minimum and stability requirements set forth in WAC 246-249-050.

(3) **Classification determined by long-lived radionuclides.** If the waste contains only radionuclides listed in Table 1, classification shall be determined as follows:

(a) If the concentration does not exceed 0.1 times the value in Table 1, the waste is Class A.

(b) If the concentration exceeds 0.1 times the value in Table 1, but does not exceed the value in Table 1, the waste is Class C.

(c) If the concentration exceeds the value in Table 1, the waste is not generally acceptable for near-surface disposal.

(d) For waste containing mixtures of radionuclides listed in Table 1, the total concentration shall be determined by the sum of fractions rule described in subsection (7) of this section.

Table 1

| Radionuclide   | Concentration<br>Curies/Cubic<br>Meter |
|--|--|
| C-14   | 8                                      |
| C-14 in activated metal  | 80                                     |
| Ni-59 in activated metal   | 220                                    |
| Nb-94 in activated metal   | 0.2                                    |
| Tc-99  | 3                                      |
| I-129  | 0.08                                   |
| Alpha emitting transuranic radionuclides<br>with half-life greater than five years | 100 <sup>1</sup>                       |
| Pu-241   | 3,500 <sup>1</sup>                     |
| Cm-242   | 20,000 <sup>1</sup>                    |
| Ra-226   | 100 <sup>1</sup>                       |

<sup>1</sup> Units are nanocuries per gram, to convert to becquerels (Bq) per gram multiply by 37, to convert from curies to gigabecquerels (GBq) multiply by 37. Specific approval of the department is required for disposal of these radionuclides if their concentration is greater than ten percent of the Table 1 value.

(4) **Classification determined by short-lived radionuclides.** If the waste does not contain any of the radionuclides listed in Table 1, classification shall be determined based on the concentrations shown in Table 2. If the radioactive waste does not contain any radionuclides listed in either Table 1 or 2, it is Class A.

(a) If the concentration does not exceed the value of Column 1, the waste is Class A.

(b) If the concentration exceeds the value in Column 1, but does not exceed the value in Column 2, the waste is Class B.

(c) If the concentration exceeds the value in Column 2, but does not exceed the value in Column 3, the waste is Class C.

(d) If the concentration exceeds the value in Column 3, the waste is not generally acceptable for near-surface disposal.

(e) For wastes containing mixtures of the radionuclides listed in Table 2, the total concentration shall be determined by the sum of fractions rule described in subsection (7) of this section.

Table 2

| Radionuclide   | Concentration, Curies/<br>Cubic Meter |          |          |
|--|---------------------------------------|----------|----------|
|  | Column 1                              | Column 2 | Column 3 |
| Total of all radionuclides<br>with less than 5-year<br>half-life | 700                                   | (*)      | (*)      |
| H-3  | 40                                    | (*)      | (*)      |
| Co-60  | 700                                   | (*)      | (*)      |
| Ni-63  | 3.5                                   | 70       | 700      |
| Ni-63 in activated metal   | 35                                    | 700      | 7,000    |
| Sr-90  | 0.04                                  | 150      | 7,000    |
| Cs-137   | 1                                     | 44       | 4,600    |

(\*) There are no limits established for these radionuclides in Class B or C wastes. Practical consideration such as the effects of external radiation and internal heat generation on transportation, handling, and disposal will limit the concentrations for these wastes. These wastes shall be Class B unless the concentrations of other radionuclides in Table 2 determine the waste to be Class C independent of these radionuclides. Specific approval of the department is required prior to packaging of Class B tritium waste.

(5) **Classification determined by both long-lived and short-lived radionuclides.** If the waste contains a mixture of radionuclides, some of which are listed in Table 1, and some of which are listed in Table 2, classification shall be determined as follows:

(a) If the concentration of a radionuclide listed in Table 1 is less than 0.1 times the value listed in Table 1, the class shall be that determined by the concentration of radionuclides listed in Table 2.

(b) If the concentration of a radionuclide listed in Table 1 exceeds 0.1 times the value listed in Table 1, the waste shall be Class C, provided the concentration of radionuclides listed in Table 2 does not exceed the value shown in Column 3 of Table 2.

(6) **Classification of waste with radionuclides other than those listed in Tables 1 and 2.** If the waste does not contain any radionuclides listed in either Table 1 or 2, it is Class A.

(7) **The sum of fractions rule for mixtures of radionuclides.** For determining classification for waste that contains a mixture of radionuclides, it is necessary to determine the sum of fractions by dividing each radionuclide's concentration by the appropriate limit and adding the resulting values. The appropriate limits must all be taken from the same column of the same table. The sum of the fractions for the column must be less than or equal to 1.0 if the waste class is to be determined by that column. Example: A waste contains Sr-90 in a concentration of 50 Ci/m<sup>3</sup> and Cs-137 in a concentration of 22 Ci/m<sup>3</sup>. Since the concentrations both exceed the values in Column 1, Table 2, they must be compared to Column 2 values. For Sr-90 fraction, 50/150 = 0.33; for Cs-137 fraction, 22/44 = 0.5; the sum of the fractions = 0.83. Since the sum is less than 1.0, the waste is Class B.

(8) **Determination of concentration in wastes.** The concentration of a radionuclide may be determined by

indirect methods such as use of scaling factors which relate to the inferred concentration of one radionuclide to another that is measured, or radionuclide material accountability, if there is reasonable assurance that the indirect methods can be correlated with actual measurement. The concentration of a radionuclide may be averaged over the volume of the waste, or weight of the waste if the units are expressed as nanocuries per gram.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-249-040, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-249-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-62-050, filed 12/11/86.]

#### WAC 246-249-050 Acceptable radioactive waste forms and packaging. (1) Packaging.

(a) Wastes shall be packaged in conformance with the conditions of the license issued to the site operator to which the waste will be shipped. Where the conditions of the site license are more restrictive than the provisions of these regulations, the site license condition shall govern. As a minimum, radioactive waste must be packaged in such a manner that waste containers received at the facility do not show:

- (i) Significant deformation;
- (ii) Loss or dispersal of contents;
- (iii) An increase in the external radiation levels recorded on the manifest, within instrument tolerances; or
- (iv) Significant containment degradation due to rust or other chemical actions.

(b) Wastes shall not be packaged for disposal in cardboard or fiberboard. Wood boxes are prohibited after February 28, 1987.

(c) A process control program shall be used which validates the following:

(i) Liquid waste shall be packaged in sufficient approved absorbent material to absorb twice the volume of the liquid, solidified using an approved solidification agent, or stabilized using an approved stabilization agent.

(ii) Solid wastes containing liquid shall contain as little free-standing and noncorrosive liquid as is reasonably achievable, but in no case shall the liquid exceed one percent of the volume.

(d) Waste shall not be readily capable of detonation or of explosive decomposition or reaction at normal pressures and temperatures, or of explosive reaction with water.

(e) Waste shall not contain, or be capable of generating quantities of toxic gases, vapors, or fumes harmful to persons transporting, handling, or disposing of the waste. This does not apply to radioactive gaseous waste packaged in accordance with (g) of this subsection.

(f) Pyrophoric materials contained in wastes shall be treated, prepared, and packaged to be nonflammable.

(g) Waste in gaseous form must be packaged at a pressure that does not exceed 1.5 atmospheres at 20°C. Total activity shall not exceed 100 curies (3.7 x 10<sup>12</sup>

Bqs) per container. Class A gaseous waste shall be contained within United States Department of Transportation specification cylinders. Specific approval of the department is required if the gaseous waste is Class B or C.

(h) Wastes containing hazardous, biological, pathogenic, or infectious material shall be treated to reduce the maximum extent practicable the potential hazard from the nonradiological materials. Wastes subject to regulation under Resource Conservation and Recovery Act (RCRA) are not allowed at the disposal site.

(i) Radioactive consumer products, the use and disposal of which is exempt from licensing control, may be received without regard to concentration limits of WAC 246-249-040 Table 2 provided the entire unit is received and is packaged with sufficient sorbent material so as to preclude breakage and rupture of its contents. This subsection allows the disposal of such consumer products as intact household or industrial smoke detector units containing Americium-241 foils and radium or radioactive materials incorporated into self-luminous devices and electron tubes.

(2) The following requirements are intended to provide stability of the waste. Stability is intended to ensure that the waste does not degrade and affect overall stability of the site through slumping, collapse, or other failure of the disposal unit and thereby lead to water infiltration. Stability is also a factor in limiting exposure to an inadvertent intruder, since it provides a recognizable and nondispersible waste form.

(a) Classes B, C, and A stable waste shall have structural stability. A structurally stable waste form will generally maintain its physical dimensions and its form, under the expected disposal conditions such as weight of overburden and compaction equipment, the presence of moisture, and microbial activity, and internal factors such as radiation effects and chemical changes. Structural stability can be provided by the waste form itself, processing the waste to a stable form, or placing the waste in a disposal container or structure that provides stability after disposal.

(b) Notwithstanding the provisions in subsection (1)(c) and (d) of this section, liquid waste, or waste containing liquid, shall be converted into a form that contains as little free-standing and noncorrosive liquid as is reasonably achievable, but in no case shall the liquid exceed one percent of the volume of the waste when the waste is in a disposal container designed to ensure stability, or 0.5 percent of the volume of the waste for waste processed to a stable form.

(c) Void spaces within the radioactive waste and between the waste and its package shall be reduced to the extent practicable. Unless specifically approved by the department, void spaces in Class A stable, Class B, and Class C waste packages shall be less than 15 percent of the total volume of the disposal package, provided the disposal package is not a high integrity container nor contains activated metals that are too large to put into high integrity containers. For Class B and Class C waste

packages containing activated metals, voids shall be reduced to the extent practicable, and shall be demonstrated to be structurally stable by any of the methods discussed in (a) of this subsection.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-249-050, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-249-050, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-62-060, filed 12/11/86.]

**WAC 246-249-060 Labeling.** Each package of waste must be clearly labeled to identify whether it is Class A waste, Class B waste, or Class C waste in accordance with WAC 246-249-040. This marking is in addition to any transportation markings or labeling required by the United States Nuclear Regulatory Commission or the United States Department of Transportation and shall consist of lettering one-half inch high or greater in a durable contrasting color with the background surrounding the lettering. The classification marking shall be visible on the same side as the radioactive marking or label and in close proximity (within six inches). Waste packages marked "Radioactive," "Limited Quantity" or "Radioactive LSA" need only one classification marking whereas waste packages labeled White I, Yellow II, or Yellow III shall have classification markings in close proximity (within six inches) to each label.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-249-060, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-249-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-62-070, filed 12/11/86.]

**WAC 246-249-070 Variances.** It is inevitable that a small portion of wastes cannot be treated to fully comply with the waste form requirements of this chapter consistent with the ALARA philosophy of chapter 246-220 WAC. A waste disposal site operator may apply to the department for a variance provided:

- (1) The variance requested is not for a continuing process or waste stream;
- (2) An equivalent or greater degree of protection is provided by the proposed alternative; and
- (3) All reasonable methods of complying with the existing requirement have been considered.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-249-070, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-249-070, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-62-080, filed 12/11/86.]

**WAC 246-249-080 Large volumes of naturally occurring material.** (1) In addition to requirements for a disposal site use permit contained in WAC 246-249-020, permittees and single generators of radioactive wastes shall obtain the specific approval of the department prior to offering wastes for disposal which: (a) Contain naturally occurring radioactive material, excluding source material, (b) contain an average total

concentration less than, or equal to, 0.002 microcuries per gram, and (c) total in excess of 1,000 cubic feet per year.

(2) Applications for specific departmental approval shall describe: (a) The chemical processes which produce or have produced the waste, (b) the volume of waste to be disposed per year, (c) an estimate of how long the permittee's disposal needs will continue, (d) actions which have been taken or are planned which could decrease the volume of the waste, and (e) alternative methods of disposal which have been considered by the permittee.

(3) A request for specific approval may be approved if the department finds the material to be: (a) Consistent with disposal site volume utilization, (b) in conformance with conditions of all licenses and permits issued to the disposal site operator, (c) more appropriately disposed at Hanford than by alternative means consistent with the concepts contained in P.L. 99-240 Low Level Radioactive Waste Policy Amendments Act of 1985, and (d) consistent with protection of the public health, safety and environment.

(4) Denial by the department of a request for specific approval shall not be interpreted as an approval to dispose of naturally occurring radioactive material without regard to its radioactivity.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-16-109 (Order 187), § 246-249-080, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-249-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-62-090, filed 12/11/86.]

**WAC 246-249-090 Transfer for disposal and manifests.** (1) Each shipment of waste to a licensed land disposal facility shall be accompanied by a shipment manifest that contains the name, address, and telephone number of the person generating the waste. The manifest shall also include the name, address, and telephone number of the person transporting the waste to the land disposal facility. The manifest shall also indicate as completely as practicable: A physical description of the waste; the waste volume; radionuclide identity and quantity; the total radioactivity; and the principal chemical form. The solidification, stabilization, or sorption agent shall be specified. Wastes containing more than 0.1 percent chelating agents by weight shall be identified and the weight percentage of the chelating agent estimated. Wastes classified as Class A, Class B, or Class C in WAC 246-249-040 shall be clearly identified as such in the manifest unless transferred to a waste processor who treats or repackages wastes. The total quantity of the radionuclides H-3, C-14, Tc-99 and I-129 must be shown.

(2) The manifest required in subsection (1) of this section may be shipping papers used to meet United States Department of Transportation or United States Environmental Protection Agency regulations or requirements of the receiver, provided all of the required information is included.

(3) Each manifest shall include a certification by the waste generator that the transported materials are properly classified, described, packaged, marked, and labeled and are in proper condition for transportation according to the applicable regulations of the United States Department of Transportation and the agency. An authorized representative of the waste generator shall sign and date the manifest.

(4) Any generator licensee who transfers waste to a land disposal facility or a licensed waste collector shall comply with the following requirements. Any licensee who transfers waste to a licensed waste processor who treats or repackages waste shall comply with the requirements of (d) through (h) of this subsection. A licensee shall:

(a) Prepare all wastes so the waste is classified according to WAC 246-249-040 and meets the waste characteristics requirements in WAC 246-249-050.

(b) Label each package of waste to identify whether it is a Class A waste, Class B waste or Class C waste, in accordance with WAC 246-249-040;

(c) Conduct a quality control program to assure compliance with WAC 246-249-040 and 246-249-050; the program must include management evaluation of audits;

(d) Prepare shipping manifests to meet the requirements of subsections (1) and (3) of this section;

(e) Forward a copy of the manifest to the intended recipient, at the time of shipment; or, deliver to a broker at the time the waste is collected, obtaining acknowledgement of receipt in the form of a signed copy of the manifest from the broker;

(f) Include one copy of the manifest with the shipment;

(g) Retain a copy of the manifest with documentation of acknowledgement of receipt as the record of transfer of licensed material as required by these regulations;

(h) For any shipments or any part of a shipment for which acknowledgement of receipt has not been received within the times set forth in this section, conduct an investigation in accordance with subsection (8) of this section.

(5) Any waste broker licensee who handles prepackaged waste shall:

(a) Acknowledge receipt of the waste from the generator within one week of receipt by returning a signed copy of the manifest.

(b) Prepare a new manifest to reflect consolidated shipments; the new manifest shall serve as a listing or index for the detailed generator manifests. Copies of the generator manifests shall be a part of the new manifest.

The waste broker may prepare a new manifest without attaching the generator manifests, provided the new manifest contains for each package the information specified in subsection (1) of this section. The broker licensee shall certify that nothing has been done to the waste which would invalidate the generator's certification.

(c) Forward a copy of the new manifest to the land disposal facility operator at the time of shipment;

(d) Include the new manifest with the shipment to the disposal site.

(e) Retain a copy of the manifest with documentation of acknowledgement of receipt as the record of transfer of licensed material as required by these regulations, and retain information from generator manifests as required by these regulations, and retain information from generator manifests until disposition is authorized by the agency; and

(f) For any shipments or any part of a shipment for which acknowledgement of receipt is not received within the times set forth in this section, conduct an investigation in accordance with subsection (8) of this section.

(6) Any licensed waste processor who treats or repackages wastes shall:

(a) Acknowledge receipt of the waste from the generator within one week of receipt by returning a signed copy of the manifest.

(b) Prepare a new manifest that meets the requirements of subsections (1), (2), and (3) of this section. Preparation of the new manifest reflects that the processor is responsible for the waste;

(c) Prepare all wastes so that the waste is classified according to WAC 246-249-040 and meets the waste characteristics requirement in WAC 246-249-050.

(d) Label each package of waste to identify whether it is Class A waste, Class B waste, or Class C waste, in accordance with WAC 246-249-040 and 246-249-060.

(e) A quality control program shall be conducted to assure compliance with WAC 246-249-040 and 246-249-050. The program shall include management evaluation of audits;

(f) Forward a copy of the new manifest to the disposal site operator or waste broker at the time of shipment, or deliver to a broker at the time the waste is collected, obtaining acknowledgement of receipt in the form of a signed copy of the manifest by the broker.

(g) Include the new manifest with the shipment;

(h) Retain copies of the original manifests and new manifests with documentation of acknowledgement of receipt as the record of transfer of licensed material required by these regulations.

(i) For any shipment or part of a shipment for which acknowledgement is not received within the times set forth in this section, conduct an investigation in accordance with subsection (8) of this section.

(7) The land disposal facility operator shall:

(a) Acknowledge receipt of the waste within one week of receipt by returning a signed copy of the manifest to the shipper. The shipper to be notified is the licensee who last possessed the waste and transferred the waste to the operator. The returned copy of the manifest shall indicate any discrepancies between materials listed on the manifest and materials received;

(b) Maintain copies of all completed manifests until the agency authorizes their disposition; and

(c) Notify the shipper (i.e., the generator or the broker) and the agency when any shipment or part of a shipment has not arrived within sixty days after the advanced manifest was received.

(8) Any shipment or part of a shipment for which acknowledgement is not received within the time set forth in this section must:

(a) Be investigated by the shipper if the shipper has not received notification of receipt within twenty days after transfer; and

(b) Be traced and reported. The investigation shall include tracing the shipment and filing a report with the agency. Each licensee who conducts a trace investigation shall file a written report with the agency within two weeks of completion of the investigation.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-16-109 (Order 187), § 246-249-090, filed 8/7/91, effective 9/7/91.]

### Chapter 246-250 WAC

## RADIOACTIVE WASTE--LICENSING LAND DISPOSAL

**WAC 246-250-001 Purpose and scope.** (1) The regulations in this chapter establish procedures, criteria, and terms and conditions upon which the department issues licenses for land disposal of low-level radioactive wastes received from other persons. (Applicability of the requirements in this chapter to department licenses for waste disposal facilities in effect on the effective date of this regulation will be determined on a case-by-case basis and implemented through terms and conditions of the license or by orders issued by the department.) The requirements of this chapter are in addition to, and not in substitution for, other applicable requirements of these regulations or other state regulations.

(2) The regulations in this chapter do not apply to disposal of by-product material as defined in WAC 246-220-010 (7)(b) in quantities greater than 10,000 kilograms and containing more than five millicuries of radium 226, or disposal of waste provided in WAC 246-221-070, 246-221-190, or 246-221-200.

(3) This chapter establishes procedural requirements and performance objectives applicable to any method of land disposal. It establishes specific technical requirements for near-surface disposal of radioactive waste which involves disposal in the uppermost portion of the earth.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-16-109 (Order 187), § 246-250-001, filed 8/7/91, effective 9/7/91. Statutory

Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-010, filed 12/11/86.]

**WAC 246-250-010 Definitions.** As used in this chapter, the following definitions apply:

(1) "Active maintenance" means any significant activity needed during the period of institutional control to maintain a reasonable assurance that the performance objectives of WAC 246-250-170 and 246-250-180 are met. Such active maintenance includes ongoing activities such as the pumping and treatment of water from a disposal unit or one-time measures such as replacement of a disposal unit cover. Active maintenance does not include custodial activities such as repair of fencing, repair or replacement of monitoring equipment, revegetation, minor additions to soil cover, minor repair of disposal unit covers, and general disposal site upkeep such as mowing grass.

(2) "Buffer zone" means a portion of the disposal site that is controlled by the licensee or by the United States Department of Energy and that lies under the disposal units and between the disposal units and the boundary of the site.

(3) "Chelating agent" means amine polycarboxylic acids, hydroxy-carboxylic acids, gluconic acid, and polycarboxylic acids.

(4) "Commencement of construction" means any clearing of land, excavation, or other substantial action that would adversely affect the environment of a land disposal facility. The term does not mean disposal site exploration, necessary roads for disposal site exploration, borings to determine foundation conditions, or other preconstruction monitoring or testing to establish background information related to the suitability of the disposal site or the protection of environmental values.

(5) "Custodial agency" means an agency of the government designated to act on behalf of the government owner of the disposal site.

(6) "Disposal" means the isolation of wastes from the biosphere inhabited by man and his food chains by emplacement in a land disposal facility.

(7) "Disposal site" means that portion of a land disposal facility which is used for disposal of waste. It consists of disposal units and a buffer zone.

(8) "Disposal unit" means a discrete portion of the disposal site into which waste is placed for disposal. For near-surface disposal, the unit is usually a trench.

(9) "Engineered barrier" means a man-made structure or device that is intended to improve the land disposal facility's ability to meet the performance objectives in this chapter.

(10) "Explosive material" means any chemical compound, mixture, or device which produces a substantial instantaneous release of gas and heat spontaneously or by contact with sparks or flame.

(11) "Hazardous waste" means those wastes designated as hazardous by United States Environmental Protection Agency regulations in 40 CFR Part 261.

(12) "Hydrogeologic unit" means any soil or rock unit or zone which by virtue of its porosity or permeability,

or lack thereof, has a distinct influence on the storage or movement of groundwater.

(13) "Inadvertent intruder" means a person who might occupy the disposal site after closure and engage in normal activities, such as agriculture, dwelling construction, or other pursuits in which an individual might be unknowingly exposed to radiation from the waste.

(14) "Intruder barrier" means a sufficient depth of cover over the waste that inhibits contact with waste and helps to ensure that radiation exposures to an inadvertent intruder will meet the performance objectives set forth in this chapter, or engineered structures that provide equivalent protection to the inadvertent intruder.

(15) "Land disposal facility" means the land, buildings, and equipment which are intended to be used for the disposal of wastes into the subsurface of the land.

(16) "Monitoring" means observing and making measurements to provide data to evaluate the performance and characteristics of the disposal site.

(17) "Near-surface disposal facility" means a land disposal facility in which waste is disposed within approximately the upper thirty meters of the earth's surface.

(18) "Pyrophoric liquid" means any liquid that ignites spontaneously in dry or moist air at or below 130°F (54.4°C).

(19) "Pyrophoric solid" means any solid material, other than one classed as an explosive, which under normal conditions, is liable to cause fires through friction, retained heat from manufacturing or processing, or which can be ignited readily and, when ignited, burns so vigorously and persistently as to create a serious transportation, handling, or disposal hazard. Included are spontaneously combustible and water-reactive materials.

(20) "Site closure and stabilization" means those actions that are taken upon completion of operations that prepare the disposal site for custodial care and that assure that the disposal site will remain stable and will not need ongoing active maintenance.

(21) "Stability" means structural stability.

(22) "Surveillance" means monitoring and observation of the disposal site for purposes of visual detection of need for maintenance, custodial care, evidence of intrusion, and compliance with other license and regulatory requirements.

(23) "Waste" means those low-level radioactive wastes that are acceptable for disposal in a land disposal facility. For the purposes of this definition, low-level waste has the same meaning as in the Low-Level Radioactive Waste Policy Amendments Act of 1985, Public Law 99-240, that is, radioactive waste not classified as high-level radioactive waste, spent nuclear fuel, or by-product material as defined in section 11 e.(2) of the Atomic Energy Act (uranium or thorium tailings and waste).

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-250-010, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-020, filed 12/11/86.]

**WAC 246-250-020 License required.** (1) No person may receive, possess, or dispose of waste received from other persons at a land disposal facility unless authorized by a license issued by the department pursuant to this chapter, and chapter 246-235 WAC.

(2) Each person shall file an application with the department pursuant to chapter 246-235 WAC and obtain a license as provided in this chapter before commencement of construction of a land disposal facility. Failure to comply with this requirement may be grounds for denial of a license.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-16-109 (Order 187), § 246-250-020, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-250-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-61-030, filed 12/11/86.]

**WAC 246-250-030 Content of application.** In addition to the requirements set forth in chapter 246-235 WAC, an application to receive from others, possess, and dispose of wastes shall consist of general information, specific technical information, institutional information, and financial information as set forth in WAC 246-250-040 through 246-250-080.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-16-109 (Order 187), § 246-250-030, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-250-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-61-040, filed 12/11/86.]

**WAC 246-250-050 Specific technical information.** The specific technical information shall include the following information needed for demonstration that the performance objectives and the applicable technical requirements of this chapter will be met. The specific technical information shall be in the form of an environmental report which the department can use to independently evaluate the project under the provisions of the State Environmental Policy Act (SEPA):

(1) A description of the natural and demographic disposal site characteristics as determined by disposal site selection and characterization activities. The description shall include geologic, geochemical, geotechnical, hydrologic, ecologic, archaeologic, meteorologic, climatologic, and biotic features of the disposal site and vicinity.

(2) A description of the design features of the land disposal facility and the disposal units. For near-surface disposal, the description shall include those design features related to infiltration of water; integrity of covers for disposal units; structural stability of backfill, wastes, and covers; contact of wastes with standing water; disposal site drainage; disposal site closure and stabilization; elimination to the extent practicable of long-term disposal site maintenance; inadvertent intrusion; occupational exposures; disposal site monitoring; and adequacy of the size of the buffer zone for monitoring and potential mitigative measures.

(3) A description of the principal design criteria and their relationship to the performance objectives.

(4) A description of the design basis natural events or phenomena and their relationship to the principal design criteria.

(5) A description of codes and standards which the applicant has applied to the design and which will apply to construction of the land disposal facilities.

(6) A description of the construction and operation of the land disposal facility. The description shall include as a minimum the methods of construction of disposal units; waste emplacement; the procedures for and areas of waste segregation; types of intruder barriers; onsite traffic and drainage systems; survey control program; methods and areas of waste storage; and methods to control surface water and groundwater access to the wastes. The description shall also include a description of the methods to be employed in the handling and disposal of wastes containing chelating agents or other nonradiological substances that might affect meeting the performance objectives of this chapter.

(7) A description of the disposal site closure plan, including those design features which are intended to facilitate disposal site closure and to eliminate the need for ongoing active maintenance.

(8) An identification of the known natural resources at the disposal site, whose exploitation could result in inadvertent intrusion into the wastes after removal of active institutional control.

(9) A description of the kind, amount, classification, and specifications of the radioactive material proposed to be received, possessed, and disposed of at the land disposal facility.

(10) A description of the quality control program for the determination of natural disposal site characteristics and for quality control during the design, construction, operation, and closure of the land disposal facility and the receipt, handling, and emplacement of waste. Audits and managerial controls must be included.

(11) A description of the radiation safety program for control and monitoring of radioactive effluents to ensure compliance with the performance objective in WAC 246-250-170 and occupational radiation exposure to ensure compliance with the requirements of chapter 246-221 WAC and to control contamination of personnel, vehicles, equipment, buildings, and the disposal site. Both routine operations and accidents shall be addressed. The program description must include procedures, instrumentation, facilities, and equipment.

(12) A description of the environmental monitoring program to provide data to evaluate potential health and environmental impacts and the plan for taking corrective measures if migration is indicated.

(13) A description of the administrative procedures that the applicant will apply to control activities at the land disposal facility.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-16-109 (Order 187), § 246-250-050, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-250-050, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-61-060, filed 12/11/86.]

**WAC 246-250-060 Technical analyses.** The specific technical information shall also include the following analyses needed to demonstrate that the performance objectives of this chapter will be met:

(1) Pathways analyzed in demonstrating protection of the general population from releases of radioactivity shall include air, soil, groundwater, surface water, plant uptake, and exhumation by burrowing animals. The analyses shall clearly identify and differentiate between the roles performed by the natural disposal site characteristics and design features in isolating and segregating the wastes. The analyses shall clearly demonstrate that there is reasonable assurance that the exposures to humans from the release of radioactivity will not exceed the limits set forth in WAC 246-250-170.

(2) Analyses of the protection of individuals from inadvertent intrusion shall include demonstration that there is reasonable assurance the waste classification and segregation requirements will be met and that adequate barriers to inadvertent intrusion will be provided.

(3) Analyses of the protection of individuals during operations shall include assessments of expected exposures due to routine operations and likely accidents during handling, storage, and disposal of waste. The analyses shall provide reasonable assurance that exposures will be controlled to meet the requirements of chapter 246-221 WAC.

(4) Analyses of the long-term stability of the disposal site and the need for ongoing active maintenance after closure shall be based upon analyses of active natural processes such as erosion, mass wasting, slope failure, settlement of wastes and backfill, infiltration through covers over disposal areas and adjacent soils, and surface drainage of the disposal site. The analyses shall provide reasonable assurance that there will not be a need for ongoing active maintenance of the disposal site following closure.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-250-060, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-070, filed 12/11/86.]

**WAC 246-250-070 Institutional information.** The institutional information submitted by the applicant shall include:

(1) A certification by the federal or state agency which owns the disposal site that the federal or state agency is prepared to accept transfer of the license when the provisions of WAC 246-250-140 are met and will assume responsibility for institutional control after site closure and postclosure observation and maintenance.

(2) Where the proposed disposal site is on land not owned by the federal or state government, the applicant shall submit evidence that arrangements have been made for assumption of ownership in fee by the federal or state agency before the department issues a license.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-250-070, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-070, filed 12/27/90, effective 1/31/91. Statutory Authority:

RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-080, filed 12/11/86.]

**WAC 246-250-090 Requirements for issuance of a license.** A license for the receipt, possession, and disposal of waste containing or contaminated with radioactive material will be issued by the department upon finding that:

(1) The issuance of the license will not constitute an unreasonable risk to the health and safety of the public;

(2) The applicant is qualified by reason of training and experience to carry out the disposal operations requested in a manner that protects health and minimizes danger to life or property;

(3) The applicant's proposed disposal site, disposal design, land disposal facility operations, including equipment, facilities, and procedures, disposal site closure, and postclosure institutional control are adequate to protect the public health and safety in that they provide reasonable assurance that the general population will be protected from releases of radioactivity as specified in the performance objective in WAC 246-250-170.

(4) The applicant's proposed disposal site, disposal site design, land disposal facility operations (including equipment, facilities, and procedures), disposal site closure, and postclosure institutional control are adequate to protect the public health and safety in that they will provide reasonable assurance that individual inadvertent intruders are protected in accordance with the performance objective in WAC 246-250-180.

(5) The applicant's proposed land disposal facility operations (including equipment, facilities, and procedures), are adequate to protect the public health and safety in that they will provide reasonable assurance that the standards for radiation protection set out in chapter 246-221 WAC will be met;

(6) The applicant's proposed disposal site, disposal site design, land disposal facility operations, disposal site closure, and postclosure institutional control are adequate to protect the public health and safety in that they will provide reasonable assurance that long-term stability of the disposed waste and the disposal site will be achieved and will eliminate to the extent practicable the need for ongoing active maintenance of the disposal site following closure;

(7) The applicant's demonstration provides reasonable assurance that the applicable technical requirements of this chapter will be met;

(8) The applicant's proposal for institutional control provides reasonable assurance that such control will be provided for the length of time found necessary to ensure the findings in subsections (3) through (6) of this section and that the institutional control meets the requirements of WAC 246-250-360.

(9) The financial or surety arrangements meet the requirements of this chapter.

(10) The provisions of the State Environmental Policy Act have been met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-250-090, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-090, filed 12/27/90, effective 1/31/91. Statutory Authority:

RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-100, filed 12/11/86.]

**WAC 246-250-110 Application for renewal or closure.** (1) An application for renewal must be filed at least ninety days prior to license expiration.

(2) An application for closure under WAC 246-250-120 must be filed at least one year prior to proposed closure.

(3) Applications for renewal of a license must be filed in accordance with WAC 246-250-030 through 246-250-080. Applications for closure must be filed in accordance with WAC 246-250-120. Information contained in previous applications, statements, or reports filed with the department under the license may be incorporated by reference if the references are clear, specific, and remain pertinent.

(4) In any case in which a licensee has filed an application in proper form for renewal of a license, the license shall not expire until the department has taken final action on the application for renewal.

(5) In determining whether a license will be renewed, the department will apply the criteria set forth in WAC 246-250-090.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-250-110, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-110, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-120, filed 12/11/86.]

**WAC 246-250-120 Contents of application for site closure and stabilization.** (1) Prior to final closure of the disposal site, or as otherwise directed by the department, the applicant shall submit an application to amend the license for closure. This closure application shall include a final revision and specific details of the disposal site closure plan included as part of the license application submitted under WAC 246-250-050(7) that includes each of the following:

(a) Any additional geologic, hydrologic, or other data pertinent to the long-term containment of emplaced wastes obtained during the operational period.

(b) The results of tests, experiments, or any other analyses relating to backfill of excavated areas, closure and sealing, waste migration and interaction with emplacement media, or any other tests, experiments, or analysis pertinent to the long-term containment of emplaced waste within the disposal site.

(c) Any proposed revision of plans for:

(i) Decontamination and/or dismantlement of surface facilities;

(ii) Backfilling of excavated areas; or

(iii) Stabilization of the disposal site for postclosure care.

(d) Any significant new information regarding the environmental impact of closure activities and long-term performance of the disposal site.

(2) Upon review and consideration of an application to amend the license for closure submitted in accordance with subsection (1) of this section, the department shall

issue an amendment authorizing closure if there is reasonable assurance that the long-term performance objectives of this chapter will be met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-250-120, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-120, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-130, filed 12/11/86.]

**WAC 246-250-130 Postclosure observation and maintenance.** The licensee shall observe, monitor, and carry out necessary maintenance and repairs at the disposal site until the site closure is complete and the license is transferred by the department in accordance with WAC 246-250-140. Responsibility for the disposal site must be maintained by the licensee for five years. A shorter or longer time period for postclosure observation and maintenance may be established and approved as part of the site closure plan, based on site-specific conditions.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-250-130, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-130, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-140, filed 12/11/86.]

**WAC 246-250-140 Transfer of license.** Following closure and the period of postclosure observation and maintenance, the licensee may apply for an amendment to transfer the license to the disposal site owner. The license shall be transferred when the department finds:

(1) That the closure of the disposal site has been made in conformance with the licensee's disposal site closure plan, as amended and approved as part of the license;

(2) That reasonable assurance has been provided by the licensee that the performance objectives of this chapter are met;

(3) That any funds and necessary records for care will be transferred to the disposal site owner;

(4) That the postclosure monitoring program is operational for implementation by the disposal site owner; and

(5) That the federal or state agency which will assume responsibility for institutional control of the disposal site is prepared to assume responsibility and ensure that the institutional requirements found necessary under WAC 246-250-090(8) will be met.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-250-140, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-140, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-150, filed 12/11/86.]

**WAC 246-250-150 Termination of license.** (1) Following any period of institutional control needed to meet the requirements found necessary under WAC 246-250-090, the licensee may apply for an amendment to terminate the license.

(2) This application will be reviewed in accordance with the provisions of chapter 246-235 WAC.

(3) A license shall be terminated only when the department finds:

(a) That the institutional control requirements found necessary under WAC 246-250-090(8) have been met;

(b) That any additional requirements resulting from new information developed during the institutional control period have been met; and

(c) That permanent monuments or markers warning against intrusion have been installed.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-16-109 (Order 187), § 246-250-150, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-250-150, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-61-160, filed 12/11/86.]

**WAC 246-250-160 General requirement.** Land disposal facilities shall be sited, designed, operated, closed, and controlled after closure so that reasonable assurance exists that exposures to individuals are within the requirements established in the performance objectives in WAC 246-250-170 through 246-250-200.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-16-109 (Order 187), § 246-250-160, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-250-160, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-61-170, filed 12/11/86.]

**WAC 246-250-190 Protection of individuals during operations.** After the effective date of these regulations, operations at the land disposal facility shall be conducted in compliance with the standards for radiation protection set out in chapter 246-221 WAC, except for releases of radioactivity in effluents from the land disposal facility, which shall be governed by WAC 246-250-170. Every reasonable effort should be made to maintain radiation exposures as low as is reasonably achievable.

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-16-109 (Order 187), § 246-250-190, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-250-190, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-61-200, filed 12/11/86.]

**WAC 246-250-330 Land disposal facility operation and disposal site closure.** (1) Near-surface disposal facility operation and disposal site closure.

(a) Wastes designated as Class A pursuant to chapter 246-249 WAC shall be segregated from other wastes by placing in disposal units which are sufficiently separated from disposal units for the other waste classes so that any interaction between Class A wastes and other wastes will not result in the failure to meet the performance objectives of this chapter. This segregation is not necessary for Class A wastes if they meet the stability requirements in chapter 246-249 WAC.

(b) Wastes designated as Class C pursuant to chapter 246-249 WAC shall be disposed of so that the top of the waste is a minimum of five meters below the top surface

of the cover or must be disposed of with intruder barriers that are designed to protect against an inadvertent intrusion for at least five hundred years.

(c) Except as provided in (l) of this subsection, only waste classified as Class A, B, or C shall be acceptable for near-surface disposal. All waste shall be disposed of in accordance with the requirements of (d) through (k) of this subsection.

(d) Wastes shall be emplaced in a manner that maintains the package integrity during emplacement, minimizes the void spaces between packages, and permits the void spaces to be filled.

(e) Void spaces between waste packages shall be filled with earth or other material to reduce future subsidence within the fill.

(f) Waste shall be placed and covered in a manner that limits the radiation dose rate at the surface of the cover to levels that at a minimum will permit the licensee to comply with all provisions of chapter 246-221 WAC at the time the license is transferred pursuant to WAC 246-250-140.

(g) The boundaries and locations of each disposal unit shall be accurately located and mapped by means of a land survey. Near-surface disposal units shall be marked in such a way that the boundaries of each unit can be easily defined. Three permanent survey marker control points, referenced to United States Geological Survey (USGS) or National Geodetic Survey (NGS) survey control stations, shall be established on the site to facilitate surveys. The USGS or NGS control stations shall provide horizontal and vertical controls as checked against USGS or NGS record files.

(h) A buffer zone of land shall be maintained between any buried waste and the disposal site boundary and beneath the disposed waste. The buffer zone shall be of adequate dimensions to carry out environmental monitoring activities specified in WAC 246-250-340(4) and take mitigative measures if needed.

(i) Closure and stabilization measures as set forth in the approved site closure plan shall be carried out as each disposal unit is filled and covered.

(j) Active waste disposal operations shall not have an adverse effect on completed closure and stabilization measures.

(k) Only wastes containing or contaminated with radioactive material shall be disposed of at the disposal site.

(l) Proposals for disposal of waste that is not generally acceptable for near-surface disposal because the waste form and disposal methods must be different and, in general, more stringent than those specified for Class C waste, may be submitted to the department for approval.

(2) (Reserved.)

[Statutory Authority: RCW 70.98.050 and 70.98.080, 91-16-109 (Order 187), § 246-250-330, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-250-330, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080, 87-01-031 (Order 2450), § 402-61-240, filed 12/11/86.]

**WAC 246-250-350 Alternative requirements for design and operations.** The department may, upon request

or on its own initiative, authorize provisions other than those set forth in WAC 246-250-300 through 246-250-340 for the segregation and disposal of waste and for the design and operation of a land disposal facility on a specific basis, if it finds reasonable assurance of compliance with the performance objectives of this chapter.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-250-350, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-350, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-260, filed 12/11/86.]

**WAC 246-250-600 Maintenance of records, reports, and transfers.** (1) Each licensee shall maintain any records and make any reports in connection with the licensed activities as may be required by the conditions of the license or by the rules, regulations, and orders of the department.

(2) Records which are required by these regulations or by license conditions shall be maintained for a period specified by the appropriate regulations or by license condition. If a retention period is not otherwise specified, these records must be maintained and transferred to the officials specified in subsection (4) of this section as a condition of license termination unless the department otherwise authorizes their disposition.

(3) Records which shall be maintained pursuant to this chapter may be the original or a reproduced copy or microfilm if this reproduced copy or microfilm is capable of producing copy that is clear and legible at the end of the required retention period.

(4) Notwithstanding subsections (1) through (3) of this section, copies of records of the location and the quantity of wastes contained in the disposal site must be transferred upon license termination to the chief executive of the nearest municipality, the chief executive of the county in which the facility is located, the county zoning board or land development and planning agency, the state governor, the United States Department of Energy, and other state, local, and federal governmental agencies as designated by the department at the time of license termination.

(5) Following receipt and acceptance of a shipment of waste, the licensee shall record the date of disposal of the waste, the specific location of waste in the disposal site, the condition of the waste packages as received, any discrepancies between materials listed on the manifest and those received, and any evidence of leaking or damaged packages or radiation or contamination levels in excess of limits specified in United States Department of Transportation and state of Washington regulations. The licensee shall briefly describe any repackaging operations of any of the waste packages included in the shipment, plus any other information required by the department as a license condition.

(6) Each licensee authorized to dispose of waste received from other persons shall file a copy of its financial report or a certified financial statement annually with the department in order to update the information base for determining financial qualifications.

(7)(a) Each licensee authorized to dispose of waste received from other persons, pursuant to this chapter, shall submit annual reports to the department. Reports shall be submitted by the end of the first calendar quarter of each year for the preceding year.

(b) The reports shall include:

(i) Specification of the quantity of each of the principal contaminants released to unrestricted areas in liquid and in airborne effluents during the preceding year;

(ii) The results of the environmental monitoring program;

(iii) A summary of licensee disposal unit survey and maintenance activities;

(iv) A summary, by waste class, of activities and quantities of radionuclides disposed of;

(v) Any instances in which observed site characteristics were significantly different from those described in the application for a license; and

(vi) Any other information the department may require.

(c) If the quantities of waste released during the reporting period, monitoring results, or maintenance performed are significantly different from those expected, the report must cover this specifically.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-250-600, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-250-600, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-61-320, filed 12/11/86.]

**Chapter 246-252 WAC**  
**RADIATION PROTECTION--URANIUM AND/OR**  
**THORIUM MILLING**

## WAC

|             |   |
|-------------|---|
| 246-252-001 | Reclamation and decommissioning.                                    |
| 246-252-010 | Definitions.  |
| 246-252-030 | Criteria related to disposition of uranium mill tailings or wastes. |

**WAC 246-252-001 Reclamation and decommissioning.** A specific plan for reclamation and disposal of tailings and for decommissioning the site of uranium or thorium milling operations shall be included as part of the proposed action assessed under SEPA regulations and guidelines as required by WAC 246-235-080 (6)(a) for licensing of environmentally significant operations. For any uranium or thorium mill in operation on or before the effective date of this regulation for which a plan for reclamation and disposal of tailings and decommissioning of the site has not been submitted and assessed, such a plan must be submitted to the department and a final environmental impact statement or final declaration of nonsignificance must accompany or precede the license renewal.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-252-001, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-252-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 79-12-073 (Order 1459), § 402-52-005, filed 11/30/79, effective 1/1/80.]

**WAC 246-252-010 Definitions.** The following definitions apply to the specified terms as used in this chapter.

(1) "Aquifer" means a geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs. Any saturated zone created by uranium or thorium recovery operations would not be considered an aquifer unless the zone is, or potentially is (a) hydraulically interconnected to a natural aquifer, (b) capable of discharge to surface water, or (c) reasonably accessible because of migration beyond the vertical projection of the boundary of the land transferred to long-term government ownership and care in accordance with WAC 246-252-030(11).

(2) "Closure" means the activities following operations to decontaminate and decommission the buildings and site used to produce by-product materials and reclaim the tailings and/or waste disposal area.

(3) "Closure plan" means the department approved plan to accomplish closure.

(4) "Compliance period" begins when the department sets secondary groundwater protection standards and ends when the owner or operator's license is terminated and the site is transferred to the state or federal agency for long-term care.

(5) "Dike" means an embankment or ridge of either natural or man-made materials used to prevent the movement of liquids, sludges, solids, or other materials.

(6) "Disposal area" means the area containing by-product materials to which the requirements of Criterion 6 apply.

(7) "Existing portion" means that land surface area of an existing surface impoundment on which significant quantities of uranium or thorium by-product materials had been placed prior to September 30, 1983.

(8) "Groundwater" means water below the land surface in a zone of saturation. For the purposes of this chapter, groundwater is the water contained within an aquifer as defined above.

(9) "Leachate" means any liquid, including any suspended or dissolved components in the liquid, that has percolated through or drained from the by-product material.

(10) "Licensed site" means the area contained within the boundary of a location under the control of persons generating or storing by-product materials under a department license.

(11) "Liner" means a continuous layer of natural or man-made materials, beneath or on the sides of a surface impoundment which restricts the downward or lateral escape of by-product material, hazardous constituents, or leachate.

(12) "Point of compliance" is the site specific location in the uppermost aquifer where the groundwater protection standard must be met.

(13) "Surface impoundment" means a natural topographic depression, man-made excavation, or diked area, which is designed to hold an accumulation of liquid wastes or wastes containing free liquids, and which is not an injection well.

(14) "Uppermost aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within the facility's property boundary.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-252-010, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-252-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-52-050, filed 12/11/86.]

**WAC 246-252-030 Criteria related to disposition of uranium mill tailings or wastes.** As used in this section, the term "as low as reasonably achievable" has the same meaning as in WAC 246-220-007. The term by-product material has the same meaning as WAC 246-220-010 (6)(b).

As required by WAC 246-235-110(6), each applicant for a license to possess and use source material in conjunction with uranium or thorium milling, or by-product material at sites formerly associated with such milling, is required to include in a license application proposed specifications relating to the milling operation and the disposition of tailings or waste resulting from such milling activities. This section establishes criteria relating to the siting, operation, decontamination, decommissioning, and reclamation of mills and tailings or waste systems and sites at which such mills and systems are located

and site and by-product material ownership. Applications must clearly demonstrate how these criteria have been addressed. The specifications shall be developed considering the expected full capacity of tailings or waste systems and the lifetime of mill operations. Where later expansions of systems or operations may be likely, the amenability of the disposal system to accommodate increased capacities without degradation in long-term stability and other performance factors shall be evaluated.

Licensees or applicants may propose alternatives to the specific requirements in these criteria. The alternative proposals may take into account local or regional conditions, including geology, topography, hydrology, and meteorology. The department may find that the proposed alternatives meet the department's requirements if the alternatives will achieve a level of stabilization and containment of the sites concerned, and a level of protection for public health, safety, and the environment from radiological and nonradiological hazards associated with the sites, which is equivalent to, to the extent practicable, or more stringent than the level which would be achieved by the requirements of the standards promulgated by the United States Environmental Protection Agency in 40 CFR 192, Subparts D and E.

(1) Criterion 1 – In selecting among alternative tailings disposal sites or judging the adequacy of existing tailings sites, the following site features which would contribute to meeting the broad objective of permanent isolation of the tailings and associated contaminants from man and the environment for one thousand years to the extent reasonably achievable, and in any case, for at least two hundred years without ongoing active maintenance shall be considered:

(a) Remoteness from populated areas;

(b) Hydrogeologic and other environmental conditions conducive to continued immobilization and isolation of contaminants from groundwater sources; and

(c) Potential for minimizing erosion, disturbance, and dispersion by natural forces over the long term.

The site selection process must be an optimization to the maximum extent reasonably achievable in terms of these features.

In the selection of disposal sites, primary emphasis shall be given to isolation of tailings or wastes, a matter having long-term impacts, as opposed to consideration only of short-term convenience or benefits, such as minimization of transportation or land acquisition costs. While isolation of tailings will be a function of both site characteristics and engineering design, overriding consideration shall be given to siting features given the long-term nature of the tailings hazards.

Tailings shall be disposed in a manner such that no active maintenance is required to preserve the condition of the site.

(2) Criterion 2 – To avoid proliferation of small waste disposal sites, by-product material from in-situ extraction operations, such as residues from solution evaporation or contaminated control processes, and wastes from small remote above ground extraction operations shall be

disposed at existing large mill tailings disposal sites; unless, considering the nature of the wastes, such as their volume and specific activity and the costs and environmental impacts of transporting the wastes to a large disposal site, such offsite disposal is demonstrated to be impracticable or the advantage of onsite burial clearly outweighs the benefits of reducing the perpetual surveillance obligations.

(3) Criterion 3 – The "prime option" for disposal of tailings is placement below grade, either in mines or specially excavated pits (that is, where the need for any specially constructed retention structure is eliminated).

The evaluation of alternative sites and disposal methods performed by mill operators in support of their proposed tailings disposal program (provided in applicants' environmental reports) shall reflect serious consideration of this disposal mode. In some instances, below grade disposal may not be the most environmentally sound approach, such as might be the case if a groundwater formation is relatively close to the surface or not very well isolated by overlying soils and rock. Also, geologic and topographic conditions might make full, below grade burial impracticable; for example, near-surface bedrock could create prominent excavation costs while more suitable alternate sites may be available. Where full below grade burial is not practicable, the size of the retention structures, and the size and steepness of slopes of associated exposed embankments, shall be minimized by excavation to the maximum extent reasonably achievable or appropriate, given the geologic and hydrogeologic conditions at a site. In these cases, it must be demonstrated that an above-grade disposal program will provide reasonably equivalent isolation of the tailings from natural erosional forces.

(4) Criterion 4 – The following site and design criteria shall be adhered to whether tailings or wastes are disposed of above or below grade:

(a) Upstream rainfall catchment areas must be minimized to decrease erosion potential and the size of the probable maximum flood which could erode or wash out sections of the tailings disposal area.

(b) Topographic features shall provide good wind protection.

(c) Embankment and cover slopes shall be relatively flat after final stabilization to minimize erosion potential and to provide conservative factors of safety assuring long-term stability. The broad objective should be to contour final slopes to grades which are as close as possible to those which would be provided if tailings were disposed of below grade; this could, for example, lead to slopes of about ten horizontal to one vertical (10h:1v) or less steep. In general, slopes should not be steeper than about 5h:1v. Where steeper slopes are proposed, reasons why a slope less steep than 5h:1v would be impracticable should be provided, and compensating factors and conditions which make such slopes acceptable should be identified.

(d) A fully self-sustaining vegetative cover shall be established or rock cover employed to reduce wind and water erosion to negligible levels.

Where a full vegetative cover is not likely to be self-sustaining due to climatic conditions, such as in semi-arid and arid regions, rock cover shall be employed on slopes of the impoundment system. The NRC will consider relaxing this requirement for extremely gentle slopes such as those which may exist on the top of the pile.

The following factors shall be considered in establishing the final rock cover design to avoid displacement of rock particles by human and animal traffic or by natural processes, and to preclude undercutting and piping:

(i) Shape, size, composition, gradation of rock particles (excepting bedding material, average particle size shall be at least cobble size or greater);

(ii) Rock cover thickness and zoning of particles by size; and

(iii) Steepness of underlying slopes.

(e) Individual rock fragments shall be dense, sound, and resistant to abrasion, and free from defects that would tend to unduly increase their destruction by water and frost actions. Weak, friable, or laminated aggregate shall not be used. Shale, rock laminated with shale, and cherts shall not be used.

Rock covering of slopes may not be required where top covers are on the order of ten meters or greater; impoundment slopes are on the order of 10h:1v or less; bulk cover materials have inherently favorable erosion resistance characteristics; and there is negligible drainage catchment area upstream of the pile, and there is good wind protection as described in (a) and (b) of this subsection.

(f) Impoundment surfaces shall be contoured to avoid areas of concentrated surface runoff or abrupt or sharp changes in slope gradient. In addition to rock cover on slopes, areas toward which surface runoff might be directed shall be well protected with substantial rock cover (riprap). In addition to providing for stability of the impoundment systems itself, the overall stability, erosion potential, and geomorphology of surrounding terrain shall be evaluated to assure that there are no processes, such as gully erosion, which would lead to impoundment instability.

(g) The impoundment shall not be located near a capable fault that could cause a maximum credible earthquake larger than that which the impoundment could reasonably be expected to withstand. As used in this criterion, the term "capable fault" has the same meaning as defined in Section III (g) of Appendix A of 10 CFR Part 100. The term "maximum credible earthquake" means that earthquake which would cause the maximum vibratory ground motion based upon an evaluation of earthquake potential considering the regional and local geology and seismology and specific characteristics of local subsurface material.

(h) The impoundment, where feasible, should be designed to incorporate features which will promote deposition of suspended particles. For example, design features which promote deposition of sediment suspended in any runoff which flows into the impoundment

area might be utilized; the object of such a design feature would be to enhance the thickness of cover over time.

(5) Criterion 5 - Criteria 5(a) through 5(g) and new Criterion 13 incorporate the basic groundwater protection standards imposed by the United States Environmental Protection Agency in 40 CFR Part 192, Subparts D and E (48 FR 45926; October 7, 1983) which apply during operations and prior to the end of closure. Groundwater monitoring to comply with these standards is required by Criterion 7.

(a) The primary groundwater protection standard is a design standard for surface impoundments used to manage uranium and thorium by-product material. Surface impoundments (except for an existing portion) must have a liner that is designed, constructed, and installed to prevent any migration of wastes out of the impoundment to the adjacent subsurface soil, groundwater, or surface water at any time during the active life (including the closure period) of the impoundment. The liner may be constructed of materials that may allow wastes to migrate into the liner (but not into the adjacent subsurface soil, groundwater, or surface water) during the active life of the facility, provided that impoundment closure includes removal or decontamination of all waste residues, contaminated containment system components (liners, etc.), contaminated subsoils, and structures and equipment contaminated with waste and leachate. For impoundments that will be closed with the liner material left in place, the liner must be constructed of materials that can prevent wastes from migrating into the liner during the active life of the facility.

(b) The liner required by (a) of this subsection must be:

(i) Constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrogeologic forces), physical contact with the waste or leachate to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(ii) Placed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift; and

(iii) Installed to cover all surrounding earth likely to be in contact with the wastes or leachate.

(c) The applicant or licensee will be exempted from the requirements of (a) of this subsection if the department finds, based on a demonstration by the applicant or licensee, that alternate design and operating practices, including the closure plan, together with site characteristics will prevent the migration of any hazardous constituents into groundwater or surface water at any future time. In deciding whether to grant an exemption, the department will consider:

(i) The nature and quantity of the wastes;

(ii) The proposed alternate design and operation;

(iii) The hydrogeologic setting of the facility, including the attenuative capacity and thickness of the liners

and soils present between the impoundment and groundwater or surface water; and

(iv) All other factors which would influence the quality and mobility of the leachate produced and the potential for it to migrate to groundwater or surface water.

(d) A surface impoundment must be designed, constructed, maintained, and operated to prevent overtopping resulting from normal or abnormal operations; overfilling; wind and wave actions; rainfall; runoff; from malfunctions of level controllers, alarms, and other equipment; and human error.

(e) When dikes are used to form the surface impoundment, the dikes must be designed, constructed, and maintained with sufficient structural integrity to prevent massive failure of the dikes. In ensuring structural integrity, it must not be presumed that the liner system will function without leakage during the active life of the impoundment.

(f) Uranium and thorium by-product materials must be managed to conform to the following secondary groundwater protection standard: Hazardous constituents entering the groundwater from a licensed site must not exceed the specified concentration limits in the uppermost aquifer beyond the point of compliance during the compliance period. Hazardous constituents are those constituents identified by the department pursuant to (g) of this subsection. Specified concentration limits are those limits established by the department as indicated in (j) of this subsection. The department will also establish the point of compliance and compliance period on a site specific basis through license conditions and orders. The objective in selecting the point of compliance is to provide the earliest practicable warning that the impoundment is releasing hazardous constituents to the groundwater. The point of compliance must be selected to provide prompt indication of groundwater contamination on the hydraulically downgradient edge of the disposal area. The department must identify hazardous constituents, establish concentration limits, set the compliance period, and adjust the point of compliance, if needed, when the detection monitoring established under criterion 7 indicates leakage of hazardous constituents from the disposal area.

(g) A constituent becomes a hazardous constituent subject to (j) of this subsection when the constituent:

(i) Is reasonably expected to be in or derived from the by-product material in the disposal area;

(ii) Has been detected in the groundwater in the uppermost aquifer; and

(iii) Is listed in WAC 246-252-050 Appendix A.

(h) The department may exclude a detected constituent from the set of hazardous constituents on a site specific basis if it finds that the constituent is not capable of posing a substantial present or potential hazard to human health or the environment. In deciding whether to exclude constituents, the department will consider the following:

(i) Potential adverse effect on groundwater quality, considering —

(A) The physical and chemical characteristics of the waste in the licensed site, including its potential for migration;

(B) The hydrogeological characteristics of the facility and surrounding land;

(C) The quantity of groundwater and the direction of groundwater flow;

(D) The proximity and withdrawal rates of groundwater users;

(E) The current and future uses of groundwater in the area;

(F) The existing quality of groundwater, including other sources of contamination and their cumulative impact on the groundwater quality;

(G) The potential for health risks caused by human exposure to waste constituents;

(H) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents;

(I) The persistence and permanence of the potential adverse effects.

(ii) Potential adverse effects on hydraulically-connected surface water quality, considering —

(A) The volume and physical and chemical characteristics of the waste in the licensed site;

(B) The hydrogeological characteristics of the facility and surrounding land;

(C) The quantity and quality of groundwater, and the direction of groundwater flow;

(D) The patterns of rainfall in the region;

(E) The proximity of the licensed site to surface waters;

(F) The current and future uses of surface waters in the area and any water quality standards established for those surface waters;

(G) The existing quality of surface water, including other sources of contamination and the cumulative impact on surface water quality;

(H) The potential for health risks caused by human exposure to waste constituents;

(I) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents; and

(J) The persistence and permanence of the potential adverse effects.

(i) In making any determinations under (h) and (k) of this subsection about the use of groundwater in the area around the facility, the department will consider any identification of underground sources of drinking water and exempted aquifers made by the United States Environmental Protection Agency.

(j) At the point of compliance, the concentration of a hazardous constituent must not exceed —

(i) The department approved background concentration of that constituent in the groundwater;

(ii) The respective value given in the table in subsection (5)(l) of this section if the constituent is listed in the table and if the background level of the constituent is below the value listed; or

(iii) An alternate concentration limit established by the department.

(k) Conceptually, background concentrations pose no incremental hazards and the drinking water limits in (j)(i) of this subsection state acceptable hazards but these two options may not be practically achievable at a specific site. Alternate concentration limits that present no significant hazard may be proposed by licensees for department consideration. Licensees must provide the basis for any proposed limits including consideration of practicable corrective actions, that limits are as low as reasonably achievable, and information on the factors the department must consider.

The department will establish a site specific alternate concentration limit for a hazardous constituent as provided in (j) of this subsection if it finds that the constituent will not pose a substantial present or potential hazard to human health or the environment as long as the alternate concentration limit is not exceeded. In establishing alternate concentration limits, the department will apply its as low as reasonably achievable criterion in this chapter. The department will also consider the following factors:

(i) Potential adverse effects on groundwater quality, considering —

(A) The physical and chemical characteristics of the waste in the licensed site including its potential for migration;

(B) The hydrogeological characteristics of the facility and surrounding land;

(C) The quantity of groundwater and the direction of groundwater flow;

(D) The proximity and withdrawal rates of groundwater users;

(E) The current and future uses of groundwater in the area;

(F) The existing quality of groundwater, including other sources of contamination and their cumulative impact on the groundwater quality;

(G) The potential for health risks caused by human exposure to waste constituents;

(H) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents;

(I) The persistence and permanence of the potential adverse effects.

(ii) Potential adverse effects on hydraulically-connected surface water quality, considering —

(A) The volume and physical and chemical characteristics of the waste in the licensed site;

(B) The hydrogeological characteristics of the facility and surrounding land;

(C) The quantity and quality of groundwater, and the direction of groundwater flow;

(D) The patterns of rainfall in the region;

(E) The proximity of the licensed site to surface waters;

(F) The current and future uses of surface waters in the area and any water quality standards established for those surface waters;

(G) The existing quality of surface water including other sources of contamination and the cumulative impact on surface water quality;

(H) The potential for health risks caused by human exposure to waste constituents;

(I) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents; and

(J) The persistence and permanence of the potential adverse effects.

(L) MAXIMUM VALUES FOR GROUNDWATER PROTECTION:

| Constituent or Property   | Maximum Concentration |
|---|-----------------------|
|   | Milligrams per liter  |
| Arsenic.....  | 0.05                  |
| Barium.....   | 1.0                   |
| Cadmium.....  | 0.01                  |
| Chromium.....   | 0.05                  |
| Lead.....   | 0.05                  |
| Mercury.....  | 0.002                 |
| Selenium.....   | 0.01                  |
| Silver.....   | 0.05                  |
| Endrin (1,2,3,4,10,10-hexachloro-1,7 -epoxy-1,4,4a,5,6,7,8,9a-octahydro-1, 4-endo, endo-5,8-dimethano naphthalene).....   | 0.0002                |
| Lindane (1,2,3,4,5,6-hexachlorocyclohexane, gamma isomer).....  | 0.004                 |
| Methoxychlor (1,1,1-Trichloro-2,2-bis (p-methoxyphenylethane).....  | 0.1                   |
| Toxaphene (C <sub>10</sub> H <sub>10</sub> Cl <sub>6</sub> , Technical chlorinated camphene, 67-69 percent chlorine).....   | 0.005                 |
| 2,4-D (2,4-Dichlorophenoxyacetic acid).....   | 0.1                   |
| 2,4,5-TP Silvex (2,4,5-Trichlorophenoxypropionic acid).....   | 0.01                  |
|   | Picocuries per liter  |
| Combined radium - 226 and radium - 228.....   | 5                     |
| Gross alpha - particle activity (excluding radon and uranium when producing uranium by-product material or thorium when producing thorium by-product material)..... | 15                    |

(m) If the groundwater protection standards established under (f) of this subsection are exceeded at a licensed site, a corrective action program must be put into operation as soon as is practicable, and in no event later than eighteen months after the department finds that the standards have been exceeded. The licensee shall submit the proposed corrective action program and supporting rationale for department approval prior to putting the program into operation, unless otherwise directed by the department. The objective of the program is to return hazardous constituent concentration levels in groundwater to the concentration limits set as standards. The licensee's proposed program must address removing the hazardous constituents that have entered the groundwater at the point of compliance or treating them in place. The program must also address removing or treating in place any hazardous constituents that exceed concentration limits in groundwater between the point of compliance and the downgradient facility property boundary. The licensee shall continue corrective action measures to the extent necessary to achieve and maintain compliance with the groundwater protection standard. The department will determine when the licensee may terminate corrective action measures based on data from the groundwater monitoring program and other information

that provide reasonable assurance that the groundwater protection standard will not be exceeded.

(n) In developing and conducting groundwater protection programs, applicants and licensees shall also consider the following:

(i) Installation of bottom liners (where synthetic liners are used, a leakage detection system must be installed immediately below the liner to ensure major failures are detected if they occur. This is in addition to the groundwater monitoring program conducted as provided in Criterion 7. Where clay liners are proposed or relatively thin, in-situ clay soils are to be relied upon for seepage control, tests must be conducted with representative tailings solutions and clay materials to confirm that no significant deterioration of permeability or stability properties will occur with continuous exposure of clay to tailings solutions. Tests must be run for a sufficient period of time to reveal any effects if they are going to occur (in some cases deterioration has been observed to occur rather rapidly after about nine months of exposure)).

(ii) Mill process designs which provide the maximum practicable recycle of solutions and conservation of water to reduce the net input of liquid to the tailings impoundment.

(iii) Dewatering of tailings by process devices and/or in-situ drainage systems (at new sites, tailings must be dewatered by a drainage system installed at the bottom of the impoundment to lower the phreatic surface and reduce the driving head of seepage, unless tests show tailings are not amenable to such a system. Where in-situ dewatering is to be conducted, the impoundment bottom must be graded to assure that the drains are at a low point. The drains must be protected by suitable filter materials to assure that drains remain free running. The drainage system must also be adequately sized to assure good drainage).

(iv) Neutralization to promote immobilization of hazardous constituents.

(o) Where groundwater impacts are occurring at an existing site due to seepage, action must be taken to alleviate conditions that lead to excessive seepage impacts and restore groundwater quality. The specific seepage control and groundwater protection method, or combination of methods, to be used must be worked out on a site-specific basis. Technical specifications must be prepared to control installation of seepage control systems. A quality assurance, testing, and inspection program, which includes supervision by a qualified engineer or scientist, must be established to assure the specifications are met.

(p) In support of a tailings disposal system proposal, the applicant/operator shall supply information concerning the following:

(i) The chemical and radioactive characteristics of the waste solutions.

(ii) The characteristics of the underlying soil and geologic formations particularly as they will control transport of contaminants and solutions. This includes

detailed information concerning extent, thickness, uniformity, shape, and orientation of underlying strata. Hydraulic gradients and conductivities of the various formations must be determined. This information must be gathered from borings and field survey methods taken within the proposed impoundment area and in surrounding areas where contaminants might migrate to groundwater. The information gathered on boreholes must include both geologic and geophysical logs in sufficient number and degree of sophistication to allow determining significant discontinuities, fractures, and channeled deposits of high hydraulic conductivity. If field survey methods are used, they should be in addition to and calibrated with borehole logging. Hydrologic parameters such as permeability may not be determined on the basis of laboratory analysis of samples alone; a sufficient amount of field testing (e.g., pump tests) must be conducted to assure actual field properties are adequately understood. Testing must be conducted to allow estimating chemi-sorption attenuation properties of underlying soil and rock.

(iii) Location, extent, quality, capacity and current uses of any groundwater at and near the site.

(q) Steps must be taken during stockpiling of ore to minimize penetration of radionuclides into underlying soils; suitable methods include lining and/or compaction of ore storage areas.

(6) Criterion 6 - (a) In cases where waste by-product material is to be permanently disposed, an earthen cover shall be placed over tailings or wastes at the end of the milling operations and the waste disposal area shall be closed in accordance with a design<sup>1</sup> which shall provide reasonable assurance of control of radiological hazard to:

(i) Be effective for one thousand years, to the extent reasonably achievable, and, in any case, for at least two hundred years; and

(ii) Limit releases of Radon-222 from uranium by-product materials, and Radon-220 from thorium by-product materials, to the atmosphere so as to not exceed an average<sup>2</sup> release rate of twenty picocuries per square meter per second (pCi/m<sup>2</sup>s) to the extent practicable throughout the effective design life determined pursuant to (a)(i) of this subsection. In computing required tailings cover thicknesses, moisture in soils in excess of amounts found normally in similar soils in similar circumstances shall not be considered. Direct gamma exposure from the tailings or wastes should be reduced to background levels. The effects of any thin synthetic layer shall not be taken into account in determining the calculated radon exhalation level. If nonsoil materials are proposed as cover materials, it must be demonstrated that such materials will not crack or degrade by differential settlement, weathering, or other mechanism over long term time intervals.

(b) Near surface materials (i.e., within the top three meters) shall not include mine waste or rock that contains elevated levels of radium; soils used for near surface cover must be essentially the same, as far as radioactivity is concerned, as that of surrounding soils. This is to insure that surface radon exhalation is not

significantly above background because of the cover material itself.

(c) The design requirements in this criterion for longevity and control of radon releases shall apply to any portion of a licensed and/or disposal site unless such portion contains a concentration of radium in land, averaged over areas of one hundred square meters, which, as a result of by-product material does not exceed the background level by more than:

(i) Five picocuries per gram (pCi/g) of Radium-226, or, in the case of thorium by-product material, Radium-228, averaged over the first fifteen centimeters below the surface; and

(ii) Fifteen pCi/g of Radium-226, or, in the case of thorium by-product material, Radium-228, averaged over fifteen centimeters thick layers more than fifteen centimeters below the surface.

(d) The licensee must also address the nonradiological hazards associated with the wastes in planning and implementing closure. The licensee shall ensure that disposal areas are closed in a manner that minimizes the need for further maintenance. To the extent necessary to prevent threats to human health and the environment, the licensee shall control, minimize, or eliminate post-closure escape of nonradiological hazardous constituents, leachate, contaminated rainwater, or waste decomposition products to the ground or surface waters or to the atmosphere.

Footnotes:

<sup>1</sup> The standard applies to design. Monitoring for radon after installation of an appropriately designed cover is not required.

<sup>2</sup> This average shall apply to the entire surface of each disposal area over periods of at least one year, but short compared to one hundred years. Radon will come from both uranium by-product materials and from covering material. Radon emissions from covering materials should be estimated as part of developing a closure plan for each site. The standard, however, applies only to emissions from by-product materials to the atmosphere.

(7) Criterion 7 - At least one full year prior to any major site construction, a preoperational monitoring program must be conducted to provide complete baseline data on a milling site and its environs. Throughout the construction and operating phases of the mill, an operational monitoring program must be conducted to complete the following:

(a) To measure or evaluate compliance with applicable standards and regulations;

(b) To evaluate performance of control systems and procedures;

(c) To evaluate environmental impacts of operation; and

(d) To detect potential long-term effects.

The licensee shall establish a detection monitoring program needed for the department to set the site-specific groundwater protection standards in Criterion 5 of this section. For all monitoring under this paragraph, the licensee or applicant will propose for department approval as license conditions, which constituents are to be monitored on a site-specific basis. A detection monitoring program has two purposes. The initial purpose of the program is to detect leakage of hazardous constituents

from the disposal area so that the need to set groundwater protection standards is monitored. If leakage is detected, the second purpose of the program is to generate data and information needed for the department to establish the standards under Criterion 5. The data and information must provide a sufficient basis to identify those hazardous constituents which require concentration limit standards and to enable the department to set the limits for those constituents and the compliance period. They may also need to provide the basis for adjustments to the point of compliance. For licenses in effect September 30, 1983, the detection monitoring programs must have been in place by October 1, 1984. For licenses issued after September 30, 1983, the detection monitoring programs must be in place when specified by the department in orders or license conditions. Once groundwater protection standards have been established pursuant to Criterion 5, the licensee shall establish and implement a compliance monitoring program. The purpose of the compliance monitoring program is to determine that the hazardous constituent concentrations in ground water continue to comply with the standards set by the department. In conjunction with a corrective action program, the licensee shall establish and implement a corrective action monitoring program. The purpose of the corrective action monitoring program is to demonstrate the effectiveness of the corrective actions. Any monitoring program required by this paragraph may be based on existing monitoring programs to the extent the existing programs can meet the stated objective for the program.

(8) Criterion 8 - Milling operations shall be conducted so that all airborne effluent releases are reduced to as low as is reasonably achievable. The primary means of accomplishing this shall be by means of emission controls. Institutional controls, such as extending the site boundary and exclusion area, may be employed to ensure that offsite exposure limits are met, but only after all practicable measures have been taken to control emissions at the source. Notwithstanding the existence of individual dose standards, strict control of emissions is necessary to assure that population exposures are reduced to the maximum extent reasonably achievable and to avoid site contamination. The greatest potential sources of offsite radiation exposure (aside from radon exposure) are dusting from dry surfaces of the tailings disposal area not covered by tailings solution and emissions from yellowcake drying and packaging operations. During operations and prior to closure, radiation doses from radon emissions from surface impoundments shall be kept as low as is reasonably achievable. Checks shall be made and logged hourly of all parameters (e.g., differential pressure and scrubber water flow rate) which determine the efficiency of yellowcake stack emission control equipment operation. It shall be determined whether or not conditions are within a range prescribed to ensure that the equipment is operating consistently near peak efficiency; corrective action shall be taken when performance is outside of prescribed ranges. Effluent control devices shall be operative at all times during

drying and packaging operations and whenever air is exhausting from the yellowcake stack.

Drying and packaging operations shall terminate when controls are inoperative. When checks indicate the equipment is not operating within the range prescribed for peak efficiency, actions shall be taken to restore parameters to the prescribed range. When this cannot be done without shutdown and repairs, drying and packaging operations shall cease as soon as practicable.

Operations may not be restarted after cessation due to off-normal performance until needed corrective actions have been identified and implemented. All such cessations, corrective actions, and restarts shall be reported to the department in writing, within ten days of the subsequent restart.

To control dusting from tailings, that portion not covered by standing liquids shall be wetted or chemically stabilized to prevent or minimize blowing and dusting to the maximum extent reasonably achievable. This requirement may be relaxed if tailings are effectively sheltered from wind, such as may be the case where they are disposed of below grade and the tailings surface is not exposed to wind. Consideration shall be given in planning tailings disposal programs to methods which would allow phased covering and reclamation of tailings impoundments since this will help in controlling particulate and radon emissions during operation. To control dustings from diffuse sources, such as tailings and ore pads where automatic controls do not apply, operators shall develop written operating procedures specifying the methods of control which will be utilized.

Milling operations producing or involving thorium by-product material shall be conducted in such a manner as to provide reasonable assurance that the annual dose equivalent does not exceed twenty-five millirems to the whole body, seventy-five millirems to the thyroid, and twenty-five millirems to any other organ of any member of the public as a result of exposures to the planned discharge of radioactive materials, Radon-220 and its daughters excepted, to the general environment.

Uranium and thorium by-product materials shall be managed so as to conform to the applicable provisions of Title 40 of the Code of Federal Regulations, Part 440, Ore Mining and Dressing Point Source Category: Effluent Limitations Guidelines and New Source Performance Standards, Subpart C, Uranium, Radium, and Vanadium Ores Subcategory, as codified on January 1, 1983.

The licensee shall establish a detection monitoring program needed to establish the groundwater protection standards in subsection (5)(f) of this section. A detection monitoring program has two purposes. The initial purpose of the program is to detect leakage of hazardous constituents from the disposal area so that the need to set groundwater protection standards is monitored. If leakage is detected, the second purpose of the program is to generate data and information needed for the department to establish the standards under subsection (5)(f) of this section. The data and information must provide a sufficient basis to identify those hazardous constituents

which require concentration limit standards and to enable the department to set the limits for those constituents and the compliance period. They may also need to provide the basis for adjustments to the point of compliance. For licenses in effect September 30, 1983, the detection monitoring programs must have been in place by October 1, 1984. For licenses issued after September 30, 1983, the detection monitoring programs must be in place when specified by the department in orders or license conditions. Once groundwater protection standards have been established pursuant to subsection (5)(f) of this section, the licensee shall establish and implement a compliance monitoring program. The purpose of the compliance monitoring program is to determine that the hazardous constituent concentrations in groundwater continue to comply with the standards set by the department. In conjunction with a corrective action program, the licensee shall establish and implement a corrective action monitoring program. The purpose of the corrective action monitoring program is to demonstrate the effectiveness of the corrective actions. Any monitoring program required by this paragraph may be based on existing monitoring programs to the extent the existing programs can meet the stated objective for the program.

Daily inspections of tailings or waste retention systems must be conducted by a qualified engineer or scientist and documented. The department must be immediately notified of any failure in a tailings or waste retention system which results in a release of tailings or waste into unrestricted areas, and/or of any unusual conditions (conditions not contemplated in the design of the retention system) which if not corrected could indicate the potential or lead to failure of the system and result in a release of tailings or waste into unrestricted areas.

(9) Criterion 9 - (a) Pursuant to chapter 70.121 RCW, and except as otherwise provided, financial surety arrangements for site reclamation and long-term surveillance and control which may consist of surety bonds, cash deposits, certificates of deposit, deposits of government securities, irrevocable letters or lines of credit, or any combination of the above, or other arrangements approved by the department, milling operations shall be established for source material to ensure the protection of the public health and safety in the event of abandonment, default, or other inability of the licensee to meet the requirements of the act and these regulations.

(i) The amount of funds to be ensured by such surety arrangements shall be based on department-approved cost estimates.

(ii) Self-insurance, or any arrangement which essentially constitutes self-insurance (e.g., a contract with a state or federal agency), will not satisfy the surety requirement, since this provides no additional assurance other than that which already exists through license requirements.

(b) The arrangements required in (a) of this subsection shall be established prior to commencement of operations to assure that sufficient funds will be available to carry out decontamination and decommissioning of the facility.

(c) Amendments to licenses in effect on the effective date of this regulation may be issued, providing that the required surety arrangements are established within ninety days after the effective date of this subsection.

(d) For source material milling operations, the amount of funds to be ensured by such surety arrangements shall be based on department-approved cost estimates in an approved plan for (i) decontamination and decommissioning of mill buildings and the milling site to levels which would allow unrestricted use of these areas upon decommissioning, and (ii) the reclamation of tailings and/or waste disposal areas in accordance with the technical criteria delineated in this section. The licensee shall submit this plan in conjunction with an environmental report that addresses the expected environmental impacts of the milling operation, decommissioning and tailings reclamation, and evaluates alternatives for mitigating these impacts. In addition, the surety shall cover the payment of the charge for long-term surveillance and control required by the department. In establishing specific surety arrangements, the licensee's cost estimates shall take into account total costs that would be incurred if an independent contractor were hired to perform the decommissioning and reclamation work. In order to avoid unnecessary duplication and expense, the department may accept financial sureties that have been consolidated with financial or surety arrangements established to meet requirements of other federal or state agencies and/or local governing bodies for such decommissioning, decontamination, reclamation, and long-term site surveillance, provided such arrangements are considered adequate to satisfy these requirements and that portion of the surety which covers the decommissioning and reclamation of the mill, mill tailings site and associated areas, and the long-term funding charge is clearly identified and committed for use in accomplishing these activities. The licensee's surety mechanism will be reviewed annually by the department to assure that sufficient funds will be available for completion of the reclamation plan if the work had to be performed by an independent contractor. The amount of surety liability should be adjusted to recognize any increases or decreases resulting from inflation, changes in engineering plans, activities performed, and any other conditions affecting costs. Regardless of whether reclamation is phased through the life of the operation or takes place at the end of operations, an appropriate portion of surety liability shall be retained until final compliance with the reclamation plan is determined. This will yield a surety that is at least sufficient at all times to cover the costs of decommissioning and reclamation of the areas that are expected to be disturbed before the next license renewal. The term of the surety mechanism must be open ended, unless it can be demonstrated that another arrangement would provide an equivalent level of assurance. This assurance could be provided with a surety instrument which is written for a specific period of time (e.g., five years), yet which must be automatically renewed unless the surety notifies the beneficiary (the state regulatory agency) and the principal (the licensee) some reasonable time (e.g., ninety days) prior to the renewal date of their

intention not to renew. In such a situation, the surety requirement still exists and the licensee would be required to submit an acceptable replacement surety within a brief period of time to allow at least sixty days for the department to collect.

Proof of forfeiture must not be necessary to collect the surety so that in the event that the licensee could not provide an acceptable replacement surety within the required time, the surety shall be automatically collected prior to its expiration. The conditions described above would have to be clearly stated on any surety instrument which is not open-ended and must be agreed to by all parties.

Long-term care requirements. Pursuant to chapter 70.121 RCW, and as otherwise provided in WAC 246-235-080 (6)(d), a long-term care trust fund shall be established by source material milling licensees prior to the issuance of the license.

(10) Criterion 10 - (a) A minimum charge of two hundred fifty thousand dollars (1978 United States dollars) accrued as specified in WAC 246-235-080 (6)(d) to cover the costs of long-term surveillance shall be paid by each mill operator to the agency prior to the termination of a uranium or thorium mill license. If site surveillance or control requirements at a particular site are determined, on the basis of a site-specific evaluation, to be significantly greater than those specified in (a) of this subsection (e.g., if fencing is determined to be necessary), variance in funding requirements may be specified by the department. The total charge to cover the costs of long-term surveillance shall be such that, with an assumed one percent annual real interest rate, the collected funds will yield interest in an amount sufficient to cover the annual costs of site surveillance. The charge will be adjusted annually prior to actual payments to recognize inflation. The inflation rate to be used is that indicated by the change in the consumer price index published by the United States Department of Labor, Bureau of Labor Statistics. Contributions by a licensee to the long-term care trust fund pursuant to chapter 70.121 RCW shall be transferred to cover the costs assessed under this criterion.

(11) Criterion 11 - These criteria relating to ownership of tailings and their disposal sites become effective on November 8, 1981, and apply to all licenses terminated, issued, or renewed after that date.

Any uranium or thorium milling license or tailings license shall contain such terms and conditions as the United States Nuclear Regulatory Commission determines necessary to assure that prior to termination of the license, the licensee will comply with ownership requirements of this criterion for sites used for tailings disposal.

Title to the by-product material licensed pursuant to WAC 246-252-030 and land, including any interests therein (other than land owned by the United States or by the state of Washington) which is used for the disposal of any such by-product material, or is essential to ensure the long term stability of such disposal site, shall be transferred to the United States or the state of Washington. In view of the fact that physical isolation

must be the primary means of long term control, and government land ownership is a desirable supplementary measure, ownership of certain severable subsurface interests (for example, mineral rights) may be determined to be unnecessary to protect the public health and safety and the environment. In any case, the applicant/operator must demonstrate a serious effort to obtain such subsurface rights, and must, in the event that certain rights cannot be obtained, provide notification in local public land records of the fact that the land is being used for the disposal of radioactive material and is subject to either a United States Nuclear Regulatory Commission general or specific license prohibiting the disruption and disturbance of the tailings. In some rare cases, such as may occur with deep burial where no ongoing site surveillance will be required, surface land ownership transfer requirements may be waived. For licenses issued before November 8, 1981, the United States Nuclear Regulatory Commission may take into account the status of the ownership of such land, and interests therein, and the ability of a licensee to transfer title and custody thereof to the United States or the state. If the United States Nuclear Regulatory Commission, subsequent to title transfer, determines that use of the surface or subsurface estates, or both, of the land transferred to the United States or to a state will not endanger the public health, safety, welfare or environment, the United States Nuclear Regulatory Commission may permit the use of the surface or subsurface estates, or both, of such land in a manner consistent with the provisions provided in these criteria. If the United States Nuclear Regulatory Commission permits such use of such land, it will provide the person who transferred such land with the right of first refusal with respect to such use of such land.

Material and land transferred to the United States or a state in accordance with this criterion must be transferred without cost to the United States or a state other than administrative and legal costs incurred in carrying out such transfer.

The provisions of this part, respecting transfer of title and custody to land and tailings and wastes, do not apply in the case of lands held in trust by the United States for any Indian tribe, or lands owned by such Indian tribe subject to a restriction against alienation imposed by the United States. In the case of such lands which are used for the disposal of byproduct material, as defined in this section, the licensee shall enter into arrangements with the United States Nuclear Regulatory Commission as may be appropriate to assure the long-term surveillance of such lands by the United States.

(12) Criterion 12 – The final disposition of tailings or wastes at milling sites should be such that ongoing active maintenance is not necessary to preserve isolation. As a minimum, annual site inspections must be conducted by the government agency retaining ultimate custody of the site where tailings or wastes are stored, to confirm the integrity of the stabilized tailings or waste systems, and to determine the need, if any, for maintenance and/or monitoring. Results of the inspection must be reported to the United States Nuclear Regulatory Commission

within sixty days following each inspection. The United States Nuclear Regulatory Commission may require more frequent site inspections if, on the basis of a site-specific evaluation, such a need appears necessary, due to the features of a particular tailings or waste disposal system.

(13) Criterion 13 – Secondary groundwater protection standards required by Criterion 5 of this section are concentration limits for individual hazardous constituents. The list of constituents found in Appendix A of this chapter, chapter 246-252 WAC, identifies the constituents for which standards must be set and complied with if the specific constituent is reasonably expected to be in or derived from the by-product material and has been detected in groundwater. For purposes of this criterion, the property of gross alpha activity will be treated as if it is a hazardous constituent. Thus, when setting standards under subsection (5)(j) of this section, the department will also set a limit for gross alpha activity.

[Statutory Authority: RCW 70.98.050 and 70.98.080. 91-16-109 (Order 187), § 246-252-030, filed 8/7/91, effective 9/7/91. - 246-254-058 Fees for additional service. [Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-058, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 43.20A.055. 85-13-007 (Order 2238), § 440-44-058, filed 6/7/85.] Repealed by 91-22-027 (Order 208), filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.110.
- 246-254-999 Site use permit fee. [Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-999, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.98 RCW and 1985 c 383. 85-20-021 (Order 2283), § 440-44-060, filed 9/23/85. Statutory Authority: RCW 43.20A.055. 83-12-058 (Order 1965), § 440-44-060, filed 6/1/83.] Repealed by 91-22-027 (Order 208), filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.110.

**WAC 246-254-001 Purpose and scope.** This chapter establishes fees charged for licensing, permitting, registration, and inspection services rendered by the division of radiation protection as authorized under chapters 43.70, 70.98, and 70.121 RCW. These fees apply to owners and operators of radiation generating machines, users of radioactive material, operators of low-level radioactive waste disposal facilities, owners and operators of facilities emitting airborne radioactivity, and owners and operators of certain mineral processing and uranium or thorium milling operations and their associated tailings or waste.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-001, filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-001, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-70-010, filed 12/11/86; 79-12-073 (Order 1459), § 402-70-010, filed 11/30/79, effective 1/1/80.]

**WAC 246-254-010 Definitions.** As used in this chapter, the following definitions apply:

- (1) "Application" means a completed RHF-1 or equivalent with supporting documentation requesting the department to grant authority to receive, possess, use, transfer, own or acquire radioactive material.
- (2) "Compliance inspection" means a routinely scheduled visit to the licensee's facility and/or temporary job site(s) for the purpose of determining compliance with the radioactive material license and applicable regulations. This service is covered by the annual fee for the radioactive material license.
- (3) "Department" means the department of health which has been designated as the state radiation control agency.
- (4) "Direct staff time" means all work time directly applicable to or associated with a specific radioactive material licensee and includes license file review, inspection preparation, on-site visits, report writing, review and acknowledgement of correspondence, review of license applications, renewals and amendment requests, telephone contacts, and staff or management conferences

specifically related to the license. Travel time is not considered direct staff time.

(5) "Emission unit" means the point of release of airborne emissions of radioactive material.

(6) "Environmental cleanup monitoring" means an on-site visit by the department to a licensee's facility or site of operation to determine the status of corrective actions to remove environmental radiation contamination resulting from the licensee's operation. Such a monitoring visit may include, but is not limited to, the review of the licensee's records pertaining to the environmental cleanup, observation of the licensee's cleanup work, sampling by the department for analysis, associated laboratory work, and the analysis of the information collected by the department.

(7) "Facility" means all buildings, structures and operations on one contiguous site.

(8) "Follow-up inspection" means an on-site visit to a licensee's facility to verify that prompt action was taken to correct significant items of noncompliance found by the department in a previous inspection. The first follow-up inspection is covered by the annual fee for the radioactive material license.

(9) "Inspection" means an official examination or observation by the department including but not limited to tests, surveys and monitoring to determine compliance with rules, regulations, orders, requirements and conditions of the department.

(10) "Investigation" means an on-site visit to a licensee's facility or site of operation when, in the department's judgment, it is required for the purpose of reviewing specific conditions, allegations, or other information regarding unusual conditions, operations, or practices. This service is covered by the annual fee for the radioactive material license.

(11) "License" means a license issued by the department in accordance with the regulations adopted by the department.

(12) "New license application" means a request to use radioactive material from a person not currently a licensee or from a current licensee requesting authorization to use radioactive material in a new way such that a change of fee category is required.

(13) "Perpetual care and maintenance" means further maintenance, surveillance or other care of milling or tailings impoundment sites after termination of the site operator's decommissioning responsibilities and license.

(14) "Registration" means registration with the department by any person possessing a source of ionizing radiation in accordance with regulations adopted by the department.

(15) "Sealed source and device evaluation" means a radiological safety evaluation performed by the department on the design, manufacture, and test data of any single sealed source and/or device model for the purpose of registering the sealed source or device with the United States Nuclear Regulatory Commission.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-010, filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-70-020, filed

12/11/86; 79-12-073 (Order 1459), § 402-70-020, filed 11/30/79, effective 1/1/80.]

**WAC 246-254-020 Payment of fees.** (1) Applicants, licensees, permittees, and registrants requesting or receiving licenses, permits, registrations, and actions or services by the department shall pay the applicable fee or fees for the license, permit, registration, and action or service provided by the department.

(2) The department shall charge a fee for each:

- (a) Radiation machine facility registration;
- (b) Radioactive material license;
- (c) Service or action with respect to a radioactive material licensee not otherwise covered by fees;
- (d) Cubic foot of low-level radioactive waste volume received at a commercial disposal site;
- (e) Kilogram of uranium or thorium milled from ore; and
- (f) Air emission permit.

(3) The department shall charge a fee for each radioactive material license based on the single highest fee category describing activities subject to the conditions of the license.

(4) The department shall charge the applicable license fee for each category when multiple licenses are required.

(5) The department may require multiple radioactive material licenses based upon:

- (a) Physical separation of operations;
- (b) Organizational separations within a licensee's operation;
- (c) Complexity of uses of radioactive material such that two or more fee categories would apply to the operation.

(6) Each licensee, permittee, or registrant shall:

(a) Remit the full fee (i) at the fee rate established by rule at the time such fee is paid, and (ii) at least thirty days prior to the annual anniversary date for licensees or the biennial expiration date for registrants or (iii) on a payment schedule as provided in WAC 246-254-030.

(b) Consider the annual anniversary to be the month and day of the expiration date of the existing radioactive material license.

(7) The department shall refund one-half of the fee if an application is withdrawn prior to issuance of a radioactive material license.

(8) If there is a change by the applicant, licensee, permittee or registrant resulting in a higher fee category, the applicant, licensee, permittee, or registrant shall pay an additional fee prorated for the remainder of the fee interval.

(9) Each licensee, permittee, or registrant shall remit the full amount of any quarterly billing or individual billing for licensing or compliance actions within thirty days of receipt of the bill.

(10) Fees due on or after the effective date of these regulations shall be at the rate prescribed in this chapter.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-020, filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-020, filed 12/27/90, effective 1/31/91. Statutory Authority:

RCW 70.98.080. 87-01-031 (Order 2450), § 402-70-030, filed 12/11/86; 79-12-073 (Order 1459), § 402-70-030, filed 11/30/79, effective 1/1/80.]

**WAC 246-254-030 Small business discount provision and optional fee payment schedule applicable to radioactive materials licensees.** (1) Small business may receive a twenty-five percent discount on radioactive materials license fees specified in WAC 246-254-070, 246-254-080, 246-254-090, and 246-254-100.

(2) To qualify for the discount, the business shall:

- (a) Be a corporation, partnership, sole proprietorship, or other legal entity formed for the purpose of making a profit;
- (b) Be independently owned and operated from all other businesses (i.e., not a subsidiary of a parent company); and
- (c) Have fifty or fewer employees.

(3) To receive the discount, the license applicant at the time of initial license request, or the licensee at the time of annual billing shall:

(a) Certify, on the business' letterhead or appropriate departmental form, the business meets the conditions in subsection (2) of this section;

(b) Sign the certification as the chief executive officer of the business or as an official designee;

(c) Have the certification notarized;

(d) Enclose the payment with the certification; and

(e) Submit the certification and payment in accordance with instructions provided by the department.

(4) The department may verify certifications and will suspend any radioactive materials license if the applicant/licensee:

(a) Failed to pay the required fee; or

(b) Made an invalid or false certification.

(5) Upon request of any radioactive materials licensee or license applicant, the department may accept semiannual or quarterly payments in lieu of the required annual license fee, provided:

(a) A written payment schedule setting specific due dates and payment amounts is submitted; and

(b) The total payments per the schedule equal the fee in effect at the time such fee payment schedule is accepted by the department.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-030, filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 43.20A.055. 86-12-039 (Order 2382), § 440-44-059, filed 5/30/86.]

**WAC 246-254-040 Denial, revocation, suspension, and reinstatement.** The department shall:

(1) Deny an application if the appropriate fee is not received;

(2) Suspend or revoke a license, permit, or registration if a required fee is not received;

(3) Refund no fees if a license, permit or registration is denied, revoked, or suspended;

(4) Require reapplication for a license, permit, or registration after denial or revocation including fees as required under this chapter.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-040, filed 10/29/91, effective 11/29/91.]

**WAC 246-254-050 Method of payment.** Licensees, permittees and registrants shall:

- (1) Submit fee payments by check, draft or money order made payable to the department of health; and
- (2) Include fee payment with the application for license or submit the fee by mail, in person, or by courier to the address provided in the bill or bill correspondence.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-050, filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-050, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-70-050, filed 12/11/86; 79-12-073 (Order 1459), § 402-70-050, filed 11/30/79, effective 1/1/80.]

**WAC 246-254-053 Radiation machine facility registration fees.** (1) Persons owning and/or leasing and using radiation-producing machines shall submit a sixty dollar registration fee to the department at the time of application and every two years thereafter. In addition:

- (a) For dentists, veterinarians, and podiatrists, add:
  - (i) Seventy dollars for the first tube; and
  - (ii) Twenty-five dollars for each additional tube.
- (b) For hospitals and medical or chiropractic facilities, add:
  - (i) Two hundred dollars for the first tube; and
  - (ii) Seventy dollars for each additional tube.
- (c) For industrial, research, and other uses, add:
  - (i) One hundred dollars for the first tube; and
  - (ii) Thirty dollars for each additional tube.
- (2) The department shall charge a maximum total fee of four thousand dollars for any facility or group of facilities where an in-house, full-time staff of at least two or more is devoted entirely to in-house radiation safety.
- (3) For any facility with a mammographic x-ray machine, add a biennial surcharge of two hundred dollars.
- (4) A penalty fee of sixty dollars shall be charged for late registration or re-registration.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-053, filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-053, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 43.20B.110. 89-16-064 (Order 2839), § 440-44-050, filed 7/31/89, effective 8/31/89. Statutory Authority: RCW 43.20A.055. 86-08-054 (Order 2359), § 440-44-050, filed 3/28/86. Statutory Authority: Chapter 70.98 RCW and 1985 c 383. 85-20-021 (Order 2283), § 440-44-050, filed 9/23/85. Statutory Authority: RCW 43.20A.055. 85-13-007 (Order 2238), § 440-44-050, filed 6/7/85; 83-12-058 (Order 1965), § 440-44-050, filed 6/1/83. Statutory Authority: 1982 c 201. 82-13-011 (Order 1825), § 440-44-050, filed 6/4/82.]

**WAC 246-254-057 Repealed.** See Disposition Table at beginning of this chapter.

**WAC 246-254-058 Repealed.** See Disposition Table at beginning of this chapter.

**WAC 246-254-070 Fees for specialized radioactive material licenses.** (1) Persons licensed or authorized to

possess or use radioactive material in the following special categories shall forward annual fees to the department as follows:

- (a) Eight thousand seven hundred dollars for operation of a single radioactive waste facility allowing processing, volume reduction, or waste treatment, but not permitting commercial on-site disposal.
- (b) Three thousand five hundred dollars for operation of a single nuclear pharmacy.
- (c) Six thousand dollars for operation of a single nuclear laundry.
- (d) Six thousand dollars for a license authorizing a single facility to use more than one curie of unsealed radioactive material in the manufacture and distribution of radioactive products or devices containing radioactive material.
- (e) Two thousand one hundred dollars for a license authorizing a single facility to use less than or equal to one curie of unsealed radioactive material or any quantity of previously sealed sources in the manufacture and distribution of products or devices containing radioactive material.
- (f) Four thousand dollars for a license authorizing decontamination services operating from a single facility.
- (g) One thousand nine hundred dollars for a license authorizing waste brokerage including the possession, temporary storage at a single facility, and over-packing only of radioactive waste.
- (h) Eight hundred fifty dollars for a license authorizing equipment servicing involving:
  - (i) Incidental use of calibration sources;
  - (ii) Maintenance of equipment containing radioactive material; or
  - (iii) Possession of sealed sources for purpose of sales demonstration only.
- (i) One thousand six hundred dollars for a license authorizing health physic services, leak testing, or calibration services.
- (j) One thousand dollars for a civil defense license.
- (k) Three hundred dollars for a license authorizing possession of special nuclear material as pacemakers or depleted uranium as shielding.

(2) Persons licensed or authorized to possess and use radioactive material in the following broad scope categories shall forward annual fees to the department as follows:

- (a) Twelve thousand dollars for a license authorizing possession of atomic numbers three through eighty-three with maximum authorized possession of any single isotope greater than one curie.
- (b) Five thousand five hundred dollars for a license authorizing possession of atomic numbers three through eighty-three with maximum authorized possession of any single isotope greater than 0.1 curie but less than or equal to one curie.
- (c) Four thousand five hundred dollars for a license authorizing possession of atomic numbers three through eighty-three with maximum authorized possession less than or equal to 0.1 curie.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-070, filed 10/29/91, effective 11/29/91.]

**WAC 246-254-080 Fees for medical and veterinary radioactive material licenses.** (1) Persons licensed or authorized to possess or use radioactive material in the following medical or veterinary categories shall forward annual fees to the department as follows:

(a) Three thousand two hundred dollars for operation of a mobile nuclear medicine program from a single base of operation.

(b) Two thousand two hundred dollars for a license authorizing groups II and III of WAC 246-235-120 for diagnostic nuclear medicine at a single facility.

(c) One thousand nine hundred dollars for a license authorizing groups IV and V of WAC 246-235-120 for medical therapy at a single facility.

(d) Three thousand dollars for a license authorizing groups II or III and groups IV or V of WAC 246-235-120 for full diagnostic and therapy services at a single facility.

(e) One thousand six hundred dollars for a license authorizing groups VI of WAC 246-235-120 for brachytherapy at a single facility.

(f) One thousand dollars for a license authorizing brachytherapy or teletherapy at a single facility.

(g) One thousand five hundred dollars for a license authorizing medical or veterinary possession of greater than two hundred millicuries total possession of radioactive material at a single facility.

(h) One thousand two hundred dollars for a license authorizing medical or veterinary possession of greater than thirty millicuries but less than or equal to two hundred millicuries total possession of radioactive material at a single facility.

(i) Nine hundred dollars for a license authorizing medical or veterinary possession of less than or equal to thirty millicuries total possession of radioactive material at a single facility.

(j) Eight hundred dollars for a license authorizing group I as defined in WAC 246-235-120 or in vitro uses of radioactive material at a single facility.

(k) Five hundred dollars for a license authorizing medical or veterinary possession of a sealed source for diagnostic use at a single facility.

(2) Persons with licenses authorizing multiple locations of use shall increase the annual fee by fifty percent for each additional location or base of operation.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-080, filed 10/29/91, effective 11/29/91.]

**WAC 246-254-090 Fees for industrial radioactive material licenses.** (1) Persons licensed or authorized to possess or use radioactive material in the following industrial categories shall forward annual fees to the department as follows:

(a) Three thousand seven hundred dollars for a license authorizing the use of radiographic exposure devices in one or more permanent radiographic vaults in a single facility.

(b) Four thousand seven hundred dollars for a license authorizing the use of radiographic exposure devices at temporary job sites but operating from a single storage facility.

(c) Two thousand three hundred dollars for a license authorizing well-logging activities including the use of radioactive tracers operating from a single storage facility.

(d) Five hundred dollars for a license authorizing possession of portable sealed sources including moisture/density gauges and excluding radiographic exposure devices operating from a single storage facility.

(e) Five hundred fifty dollars for a license authorizing possession of any nonportable sealed source, including special nuclear material and excluding radioactive material used in gas chromatograph at a single facility.

(f) Three hundred fifty dollars for a license authorizing possession of gas chromatograph units containing radioactive material at a single facility.

(g) Nine hundred fifty dollars for a license authorizing possession of any self-shielded or pool type irradiator with sealed source total quantity greater than one hundred curies at a single facility.

(h) Five thousand dollars for a license authorizing possession of sealed sources for a walk-in type irradiator at a single facility.

(i) Four thousand four hundred dollars for a license authorizing possession of greater than one gram of unsealed special nuclear material or greater than five hundred kilograms of source material at a single facility.

(j) One thousand four hundred dollars for a license authorizing possession of less than or equal to one gram of unsealed special nuclear material or five hundred kilograms of source material at a single facility.

(2) Persons with licenses authorizing multiple locations of permanent storage shall increase the annual fee by fifty percent for each additional location.

(3) Depleted uranium registrants required to file Form RHF-20 shall forward an annual fee of fifty dollars to the department.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-090, filed 10/29/91, effective 11/29/91.]

**WAC 246-254-100 Fees for laboratory radioactive material licenses.** (1) Persons licensed or authorized to possess or use unsealed radioactive material in the following laboratory categories shall forward annual fees to the department as follows:

(a) Two thousand four hundred dollars for a license authorizing possession at a single facility of unsealed sources in amounts greater than:

(i) One millicurie of I-125 or I-131; or

(ii) One hundred millicuries of H-3 or C-14; or

(iii) Ten millicuries of any single isotope.

(b) One thousand two hundred dollars for a license authorizing possession at a single facility of unsealed sources in amounts:

(i) Greater than 0.1 millicurie and less than or equal to one millicurie of I-125 or I-131; or

(ii) Greater than ten millicuries and less than or equal to one hundred millicuries of H-3 or C-14; or

(iii) Greater than one millicurie and less than or equal to ten millicuries of any single isotope.

(c) One thousand dollars for a license authorizing possession at a single facility of unsealed sources in amounts less than or equal to:

- (i) 0.1 millicurie of I-125 or I-131; or
- (ii) Ten millicuries of H-3 or C-14; or
- (iii) One millicurie of any other single isotope.

(2) Persons with licenses authorizing multiple locations of use shall increase the annual fee by fifty percent for each additional location.

(3) Persons registered to perform in vitro testing pursuant to Form RHF-15 shall forward an annual fee of fifty dollars to the department.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-100, filed 10/29/91, effective 11/29/91.]

**WAC 246-254-110 Fees for reciprocity.** (1) The department shall charge fees for reciprocal recognition of other agreement state, licensing state or United States Nuclear Regulatory Commission licenses based upon the actual amount of radioactive material or type of devices being transported into Washington state or the type of service to be performed involving radioactive material.

(2) The department shall charge a fee equal to one hundred percent of the fee specified under WAC 246-254-070, 246-254-080, 246-254-090, and 246-254-100.

(3) The department shall permit the reciprocally recognized licensee to possess and use radioactive material in the state of Washington up to one hundred eighty days during the twelve-month period following payment of each fee.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-110, filed 10/29/91, effective 11/29/91.]

**WAC 246-254-120 Fees for licensing and compliance actions.** (1) In addition to the fee for each radioactive material license as described under WAC 246-254-070, 246-254-080, 246-254-090, and 246-254-100, a licensee shall pay a service fee for each additional licensing and compliance action as follows:

(a) For a second follow-up inspection, and each follow-up inspection thereafter, a fee of eighty dollars per hour of direct staff time associated with the follow-up inspection, not to exceed eight hundred dollars per follow-up inspection. Hours are calculated in half-hour increments.

(b) For each environmental cleanup monitoring visit, a fee of eighty dollars per hour of direct staff time associated with the environmental cleanup monitoring visit, not to exceed two thousand dollars per visit. Hours are calculated in half-hour increments.

(c) For each new license application, the fee of one hundred fifty dollars in addition to the required annual fee.

(d) For each sealed source and device evaluation, a fee of eighty dollars per hour of direct staff time associated with each sealed source and device evaluation, not to exceed two thousand four hundred dollars per evaluation.

(2) The licensee or applicant shall pay any additional service fees at the time of application for a new license

or within thirty days of the date of the billing for all other licensing and compliance actions.

(3) The department shall process an application only upon receipt of the new application fee and the annual fee.

(4) The department may take action to modify, suspend, or terminate the license or sealed source and device registration if the licensee fails to pay the fee for additional licensing and compliance actions billed by the department.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-120, filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-120, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-70-070, filed 12/11/86; 79-12-073 (Order 1459), § 402-70-070, filed 11/30/79, effective 1/1/80.]

**WAC 246-254-140 Fees for uranium, thorium and other mineral processors.** (1) Persons licensed or authorized to receive, possess, or use natural uranium and its decay daughters for the extraction of uranium or thorium compounds or for the reclamation and disposal of the associated tailings or waste shall pay:

(a) Initial application fee of thirty-five thousand dollars; and

(b) Quarterly billings for actual costs to the department.

(2) The department shall bill the uranium or thorium milling licensee quarterly for the department's actual cost of:

(a) Reviewing and issuing a license in excess of the initial application fee;

(b) Determining the licensee's compliance with terms and conditions of the license;

(c) Reviewing license amendment requests;

(d) Maintaining a uranium mill program which is compatible with the requirements of the United States Nuclear Regulatory Commission;

(e) Determining and assuring compliance with chapter 173-11 WAC; and

(f) Reviewing and processing an application for renewal.

(3) The department shall delineate in the quarterly billing the staff, laboratory, and support service costs.

(4) The department:

(a) Shall process any initial application only upon receipt of the full fee specified; and

(b) May return an application to an applicant if no payment is received.

(5) The department shall credit the initial application fee to the applicants' quarterly billing.

(6) Mineral processors requiring licenses for naturally occurring radioactive material in excess of exempt concentrations shall pay:

(a) Initial application fee of twenty-seven thousand dollars; and

(b) Quarterly billings not to exceed forty thousand dollars.

(7) The department shall bill mineral processor licensees quarterly for the department's actual cost of:

(a) Processing and issuing a license in excess of the initial application fee;

(b) Determining the licensee's compliance with terms and conditions of the license;

(c) Reviewing and processing amendment and renewal requests; and

(d) Determining and assuring compliance with chapter 173-11 WAC.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-140, filed 10/29/91, effective 11/29/91.]

**WAC 246-254-150 Fees for perpetual care and maintenance.** (1) Persons with licenses specifically authorizing the receipt, possession, or use of natural uranium and its decay daughters for the extraction of uranium or thorium compounds or for the reclamation and disposal of the associated tailings or waste shall:

(a) Make quarterly payments of twenty cents per kilogram of uranium or thorium compound milled out of the raw ore;

(b) Remit this payment within thirty days after the end of each calendar quarter; and

(c) Pay to the department a minimum of two hundred fifty thousand dollars (1978 dollars) to cover the costs of long-term surveillance prior to the termination of a uranium or thorium mill license.

(2) Licensees under this section may make additional payments to meet the minimum, prior to the release of any surety arranged by the licensee in accordance with WAC 246-235-080 (6)(d).

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-150, filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-150, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-70-080, filed 12/11/86.]

**WAC 246-254-160 Fees for airborne emissions of radioactive materials.** (1) The department shall include fees for emission units at facilities licensed by the department, as part of the license fees specified in WAC 246-254-070, 246-254-080, 246-254-090, and 246-254-100.

(2) For emission units at all other facilities:

(a) Application. The applicant shall submit a fee of one thousand dollars for each air emission permit to the department with each application.

(i) The department shall process only those applications accompanied by the fee prescribed in (a) of this subsection. The department shall return any application submitted without the prescribed fee to the applicant.

(ii) The applicant shall pay any additional actual costs involved with processing the application upon receipt of a bill from the department on a calendar quarter basis.

(iii) The department shall credit the initial application fee to the applicant's quarterly billings.

(b) Operations. The department shall charge each emission unit operator the actual expenses incurred by the department in determining compliance with the provisions of established regulations and conditions of the air emission permit; and:

(i) Bill the operator each calendar quarter until the permit is terminated by the department.

(ii) Specify in the quarterly bill the staff, laboratory, and support service costs associated with the regulatory activities conducted by the department.

(c) Amendment. The department shall add and include the actual costs incurred by the department in reviewing and processing an amendment to an air emission permit in the department's calendar quarter charge for regulatory activities.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-160, filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-160, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.98 RCW. 88-17-061 (Order 2670), § 440-44-062, filed 8/17/88.]

**WAC 246-254-170 Failure by applicant or licensee to pay prescribed fees.** In any case where the department finds that an applicant, a permittee, a registrant, or a licensee failed to pay a prescribed fee or actual costs incurred during a calendar quarter, the department: (1) Shall not process any application and (2) may suspend or revoke any license, permit, registration, or approval involved; or (3) may issue an order with respect to licensed, permitted, or registered activities as the department determines appropriate or necessary in order to carry out the provisions of this chapter.

[Statutory Authority: RCW 43.70.110. 91-22-027 (Order 208), § 246-254-170, filed 10/29/91, effective 11/29/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-254-170, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.98.080. 87-01-031 (Order 2450), § 402-70-090, filed 12/11/86; 79-12-073 (Order 1459), § 402-70-090, filed 11/30/79, effective 1/1/80.]

**WAC 246-254-999 Repealed.** See Disposition Table at beginning of this chapter.

## Chapter 246-260 WAC

### WATER RECREATION FACILITIES

#### WAC

|             |   |
|-------------|---|
| 246-260-010 | Definitions.  |
| 246-260-040 | Operating permit.   |
| 246-260-050 | Compliance.   |
| 246-260-060 | Surveillance.   |
| 246-260-070 | Water quality standards, analysis, and sample collection. |
| 246-260-080 | Monitoring, reporting, and recordkeeping.                 |
| 246-260-090 | Swimming pool design, construction, and equipment.        |
| 246-260-100 | Operation of swimming pool facilities.                    |
| 246-260-110 | Spa pool design, construction, and equipment.             |
| 246-260-120 | Operation of spa pool facilities.                         |
| 246-260-130 | Wading pool design, construction, and equipment.          |
| 246-260-140 | Operation of wading pool facilities.                      |
| 246-260-150 | Spray pool design, construction, and equipment.           |
| 246-260-160 | Operation of spray pool facilities.                       |
| 246-260-200 | Water recreation industry requirements.                   |
| 246-260-210 | Technical advisory committee.                             |
| 246-260-240 | Substitution.   |
| 246-260-250 | Enforcement.  |
| 246-260-260 | Hearings.   |

**WAC 246-260-010 Definitions.** (1) "Abbreviations" (technical):

- (a) "DE" means diatomaceous earth;
- (b) "fps" means feet per second;
- (c) "gpm" means gallons per minute;
- (d) "mg/l" means milligrams per liter. When requirements in this regulation specify limits for liquid volume measurements using mg/l or ppm, either may be used depending on the type of testing equipment available;
- (e) "ppm" means parts per million. See notation under mg/l for use;
- (f) "TU" means turbidity unit as measured by the nephelometric method.
- (2) "ANSI" means American National Standards Institute.
- (3) "APHA" means American Public Health Association.
- (4) "Approved" means the department or local health officer has stated in writing that the design plans and specifications are in accordance with chapter 246-260 WAC.
- (5) "ARC" means American Red Cross.
- (6) "Architect" means a registered architect currently licensed under chapter 18.08 RCW in Washington state.
- (7) "ASHRAE" means American Society of Heating, Refrigeration and Air Conditioning Engineers.
- (8) "Assistant lifeguard" means a person appointed by the owner or manager meeting the training requirements of this chapter actively assisting lifeguards (under direct lifeguard supervision) for the purpose of ensuring bather safety.
- (9) "Attendant" means a person appointed by the owner or manager meeting the training requirements of this chapter, monitoring activities and conditions for the purpose of ensuring bather safety.
- (10) "Bathing beach" means a bathing place, together with buildings and appurtenances used in connection therewith, on a natural pond, lake, stream, or other body of fresh or salt water, which is open to the public for bathing by express permission of the owner, or which is operated for a fee, or openly advertised as a place for bathing by the public.
- (11) "Board" means the state board of health.
- (12) "CNCA" means Council for National Cooperation in Aquatics.
- (13) "CPSC" means Consumer Product Safety Commission (U.S.).
- (14) "Communication system" means any combination of devices permitting the passage of or exchange of messages between personnel and/or personnel and bathers. Systems can include but are not limited to two-way radios, hard wired intercoms, horns, whistles, hand signals, direct voice, signs, or equivalent.
- (15) "Contaminant" means any physical, chemical, or biological substance present in the WRF water which may adversely affect the health or safety of the bather and/or the quality of the water.
- (16) "Cross-connection" means any physical arrangement connecting a:
  - (a) Potable water system directly or indirectly, with anything other than another potable water system; or
  - (b) WRF pool to any potable or nonpotable water source capable of contaminating either the WRF pool,

its components, or potable water source as a result of backflow.

- (17) "Department" means the department of health.
- (18) "Diving envelope" means the minimum dimensions of an area within the pool necessary to provide entry from a diving board, platform, or pool decking intended for users to dive.
- (19) "Engineer" means a registered professional engineer currently licensed under chapter 18.43 RCW in Washington state.
- (20) "FINA" means Federation Internationale de Natation Amateur.
- (21) "General use pool" means any swimming, spa, wading, or spray pool regulated by this chapter not meeting the definition of a "limited use pool." If limited-use pools provide organized programs (as noted in limited use definition), the limited use pools shall conform with the general-use pool requirements during periods of such activity.
- (22) "Handhold" means a structure not over twelve inches above the water line around the perimeter of the pool wall, affording physical means for the bather to grasp the pool sides.
- (23) "Illness or injury report" means the written record of all facts regarding an injury or illness associated with the WRF.
- (24) "Lifeguard" means a person appointed by the owner or manager to maintain surveillance over the bathers on the deck or in the pool and to supervise bather safety. The lifeguard shall meet the training requirements of this chapter.
- (25) "Lifeguard station" means designated work station of a lifeguard.
- (26) "Lifesaving equipment" means emergency equipment and barrier protection.
- (27) "Limited use pool" means any swimming, spa, wading, or spray pool regulated by this chapter at an apartment, boarding home, condominium, home owners association, hotel, mobile home park, motel, recreational vehicle park, or rental housing unit and is for the use of the persons living or residing at these facilities and the resident's invited guests. If such pool provides organized programs at the facility (that is, formal instructional lessons for swimming or diving, swim meets, exercise classes, or other activities planned for users besides those specified under the limited use pool category), the pool facility shall conform with the general use pool requirements during periods of such activity.
- (28) "Local health officer" means the health officer of the city, county, or city-county department or district or a representative authorized by the local health officer.
- (29) "NSF" means National Sanitation Foundation.
- (30) "NSPI" means National Spa and Pool Institute.
- (31) "Operations" means all aspects of a WRF which must be controlled to make the facility safe, healthy, and usable for the purpose intended.
- (32) "Owner" means a person owning and responsible for a WRF or authorized agent.
- (33) "Person" means an individual, firm, partnership, copartnership, corporation, company, association, club, government entity, or organization of any kind.

(34) "Pool" means swimming pool, wading pool, spray pool, or spa pool or the like.

(35) "Plummet" means a line perpendicular to water surface and extending vertically to a point located at the front end of the diving board and at the center line directly in front of the diving board.

(36) "Primary zone of visual coverage" means the area assigned to a lifeguard or attendant for primary visual surveillance of user activity.

(37) "Radius of curvature" means the radius arc denoting the curved surface from the point of departure from the springline (vertical sidewall) of the pool to the pool bottom.

(38) "Response time" means time between bather distress and initiation of rescue assistance contact by a lifeguard in facilities providing lifeguards.

(39) "Recreational water contact facility" means an artificial water associated facility with design and operational features that provide patron recreational activity which is different from that associated with a conventional swimming pool and purposefully involves immersion of the body partially or totally in the water, and that includes but is not limited to water slides, wave pools, and water lagoons. These facilities are regulated by chapter 246-262 WAC.

(40) "RLSSC" means the Royal Life Saving Society of Canada.

(41) "Secretary" means the secretary of the department of health.

(42) "Serious injury" means any injury:

(a) Requiring emergency service response where a person requires medical treatment as determined by the emergency medical response personnel; and/or

(b) Resulting in a person seeking medical attention at a hospital emergency room or admittance to a hospital.

(43) "Spa pool" means a pool designed for relaxation or recreational use where the user is sitting, reclining, or at rest and the pool is not drained, cleaned, or refilled for each user. The spa pool may include, but not be limited to, hydrojet circulation, hot water, cold water, mineral baths, air induction bubbles in any combination.

(44) "Spray pool" means a pool or artificially constructed depression for use by bathers in which water is sprayed, but is not allowed to pond, in the bottom of the pool.

(45) "Springline" means the point where the pool wall breaks from vertical and begins its arc in the radius of curvature (for cove construction) to the bottom of the pool.

(46) "Swimming pool" means any structure, basin, chamber, or tank containing an artificial body of water for swimming, diving, relaxation, or recreational bathing and having a depth of two feet or more at any point and including all associated facilities.

(47) "Turnover time" means the minimum time necessary to circulate the entire volume of the pool facility through the treatment system.

(48) "Wading pool" means any artificial pool of water equal to or less than two feet deep and intended for wading purposes.

(49) "Walking surface" means any surface used as a direct access surface for a pool area and the walking surface's change room facilities where the user is bare foot.

(50) "Water treatment operator" means the appointed person operating the physical and mechanical equipment and performing related water quality monitoring and associated record keeping for proper operation of the physical facility.

(51) "Water recreation facility (WRF)" means any artificial basin or other structure containing water used or intended to be used for recreation, bathing, relaxation or swimming, where body contact with the water occurs or is intended to occur and includes auxiliary buildings and appurtenances. The term includes, but is not limited to:

(a) Conventional swimming pools, wading pools, and spray pools;

(b) Recreational water contact facilities as defined under RCW 70.90.110 and regulated under chapter 246-262 WAC;

(c) Spa pools and tubs using hot water, cold water, mineral water, air induction, or hydrojets; and

(d) Any area designated for swimming in natural waters with artificial boundaries within the waters.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-001, filed 3/12/90, effective 4/12/90; Regulation .98.001, effective 3/11/60.]

**WAC 246-260-040 Operating permit.** (1) No person shall operate a water recreation pool facility without a current department or local health officer-issued operating permit.

(2) To obtain an operating permit, owners of a water recreation pool facility shall provide department or local health officer information showing the WRF is in compliance with this chapter.

(3) Operating permits shall be:

(a) Valid for one year;

(b) Subject to annual renewal; and

(c) Nontransferable without written department or local health officer consent. For purposes of this section, a change in management of a corporation, partnership, association, or other nonindividual business entity shall create a new person requiring either consent to a permit transfer or issuance of a new permit upon proper application.

(4) The department or local health officer issuing the operating permit may revoke or suspend the permit if the WRF is not operated in accordance with chapter 70.90 RCW or chapter 246-260 WAC.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-040, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-015, filed 3/12/90, effective 4/12/90.]

**WAC 246-260-050 Compliance.** (1) Existing water recreation facilities which do not fully comply with the

design, construction, and equipment requirements in WAC 246-260-090, 246-260-110, 246-260-130, and 246-260-150 may be continued in use except as noted in subsections (2) and (3) of this section.

(2) Existing water recreation facilities shall be operated in continuous compliance with the provisions of this chapter as outlined in the life saving equipment requirements as defined in WAC 246-260-010(26), 246-260-070, 246-260-080, 246-260-100, 246-260-120, 246-260-140, 246-260-160, and 246-260-170, and provisions for lifesaving equipment in this chapter.

(3) Existing water recreation facilities built before the effective date of this chapter revision:

(a) Having barriers not conforming with this chapter, may maintain the barrier as it presently exists provided:

(i) Barrier is forty-eight inches or more in height;

(ii) Barrier has a maximum width opening of vertical members not exceeding six inches in width;

(iii) Each entry to the pool area has a self-closing, self-latching gate or door.

(b) Having barriers not conforming with this chapter, must upgrade the barrier to conform with this chapter if the existing barrier height is less than forty-eight inches in height.

(4) Facilities exempted from the regulations are noted under RCW 70.90.250 and the term medical therapy include facilities whose sole use is therapy provided for medical:

(a) Treatment under the supervision of licensed medical practitioners; or

(b) Rehabilitation for institutionalized patients under supervision of licensed medical practitioners.

[Statutory Authority: RCW 70.90.120, 92-02-020 (Order 226B), § 246-260-050, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050, 91-02-051 (Order 124B), recodified as § 246-260-050, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120, 90-07-010 (Order 042), § 248-98-020, filed 3/12/90, effective 4/12/90; Regulation .98.020, effective 3/11/60.]

**WAC 246-260-060 Surveillance.** (1) Owners and operators shall permit the department or local health officer to perform on-site WRF inspections or other surveillance activity as necessary in the discretion of the enforcing agency to ensure compliance with standards under chapter 70.90 RCW and chapter 246-260 WAC.

(2) Employees of the enforcing agency shall provide appropriate identification when entering a WRF for the purpose of routine inspections.

[Statutory Authority: RCW 70.90.120, 92-02-020 (Order 226B), § 246-260-060, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050, 91-02-051 (Order 124B), recodified as § 246-260-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120, 90-07-010 (Order 042), § 248-98-025, filed 3/12/90, effective 4/12/90.]

**WAC 246-260-070 Water quality standards, analysis, and sample collection.** (1) **Contaminants.** Owners shall maintain waters free from harmful levels of disease-producing organisms, toxic chemicals, or adverse physical conditions.

(2) **Bacteriological standards.** Owners shall maintain WRF pool waters to meet the following standards of bacteriological quality:

(a) Heterotrophic plate counts not to exceed two hundred bacteria per milliliter in two consecutive tests;

(b) Total coliform not to exceed an average of one coliform per sample of one hundred milliliters in two consecutive tests when using the membrane filter test; and

(c) Total coliform not to exceed one tube positive in two consecutive tests when using the MPN method.

(3) **Disinfection.** Owners shall maintain continuous and effective methods of disinfection of WRF pool waters at all times with use of:

(a) Chlorine or bromine described under Table 070.1 of this section; and/or

(b) Alternate forms of disinfection meeting the following criteria:

(i) Registered with the Environmental Protection Agency, if required;

(ii) Registered with the Washington state department of agriculture, if required;

(iii) Conformance with NSF standard 50 or equal when applicable; and

(iv) Adherence to department-established guidelines.

(c) Alternate forms of disinfection for which the department has developed board-approved standards or guidelines including:

(i) "Interim guidelines governing the use of ozone and ozonators for water recreation facilities;"

(ii) "Interim guidelines governing the use of copper/silver disinfection processes for water recreation facilities."

(4) **Chemical and physical quality.** Owners shall maintain:

(a) Physical and chemical conditions within the ranges specified under Table 070.2 of this section;

(b) Cleanliness by:

(i) Closing an affected WRF area or affected portion of a WRF area when contaminated with feces, vomit, sewage, or other hazardous or unknown material until the area is clean, disinfected, and free of the hazardous material;

(ii) Daily removal of scum or floating material on the pool water surface;

(iii) Continuous removal of scum or floating material by overflow action of pool water with flotsam screened and filtered; and

(iv) Maintaining sanitary walking surfaces.

(c) WRF spa pools which are routinely drained, cleaned, and refilled at a minimum using the formula as follows:

$$\text{Spa volume} \div 3 \div \text{average number of users/day} = \text{Number of days between draining, cleaning, and refilling.}$$

(5) **Laboratory sampling and testing.** Persons collecting laboratory analysis water samples shall:

(a) Collect and transport chemical and micro-organism samples based on the most recent published edition of standard methods for the examination of water and waste/water analysis, published jointly by the American Public Health Association/Water Pollution Control

Federation and American Waterworks Association, referred to as "standard methods" in this chapter;

(b) Have laboratory tests performed per "standard methods" at department-approved laboratories to provide such analyses;

(c) Provide adequate data for completing analyses; and

(d) Use department-approved water sample bottles for collection of samples.

(6) **Field testing.** Owners shall have field testing equipment:

(a) To provide means for measuring disinfectant residuals, pH, alkalinity, and any other chemicals routinely used in the pool water;

(b) In pools where compressed chlorine gas is used, to detect leaks using commercial strength (twenty-six degrees Baume') ammonia vapor; and

(c) With a suitable range of readings for the routinely measured parameters as noted under Table 070.3 of this section.

(7) **Chemicals in pool.** Owners shall ensure addition of chemicals or materials to WRF pool waters only when the use is approved or recognized as acceptable by the department. The department has available to WRF pool owners the current approved or acceptable material lists.

(8) **Additional tests.** Owners shall perform additional department or local health officer-directed tests.

TABLE 070.1

MINIMUM AND MAXIMUM LEVELS OF DISINFECTANTS \*

| Currently Recognized Disinfectants | Type of Residual Measured | pH Ranges |          |         | Maximum Residual ppm ** |
|------------------------------------|---------------------------|-----------|----------|---------|-------------------------|
|                                    |                           | 7.2-7.49  | 7.5-7.79 | 7.8-8.0 |                         |
| 1. Chlorine                        | Free available chlorine   | 1.0       | 1.4      | 1.8     | 6                       |
| 2. Chlorinated cyanurate           | Free available chlorine   | 1.5       | 2.0      | 2.8     | 6                       |
| 3. Bromine                         | Total available bromine   | 2.0       | 2.5      | 3.5     | 6                       |

NOTE:

\*When using spa facilities, increase minimum residuals in all categories by 1.5 ppm.

\*\*Maximum residual as noted or manufacturer's recommendations (whichever is less). In spa facilities, maximum residual may be raised to 10 ppm or manufacturer's recommendations (whichever is less).

TABLE 070.2

ACCEPTABLE RANGES OF SELECTED CHEMICAL AND PHYSICAL WATER QUALITY CONSTITUENTS

| Chemical or Physical Constituent                          | Minimum   | Maximum  |
|---|---|----------|
| 1. pH (Hydrogen ion)                                      | 7.2   | 8.0      |
| 2. Water clarity (safety)                                 | Main drain and pool bottom visible at all times | —        |
| 3. Turbidity (shielding microorganisms from disinfection) | —   | 0.5 TU*  |
| 4. Cyanuric acid or its derivatives (if used)             | 0   | 90 ppm   |
| 5. Temperature  | —   | 104 F.** |

| Chemical or Physical Constituent | Minimum | Maximum               |
|----------------------------------|---------|-----------------------|
| 6. Combined chlorine             | —       | <50% of free chlorine |
| 7. ORP***                        | 700 mv. | —                     |

NOTE:

\*In peak periods, turbidity may increase to 1.0 TU provided turbidity returns to 0.5 TU within a six-hour period following peak use. Turbidity is not a required routine analysis. Turbidity monitoring may be required by the department or local health officer if special conditions warrant turbidity monitoring.

\*\*A pool facility thermometer shall be provided when the water temperature exceeds 95 degrees Fahrenheit.

\*\*\*Oxidation-reduction potential (ORP) readings used in conjunction with chlorine and bromine may be allowed as long as values are maintained no less than 700 millivolts. ORP readings do not preclude the need for field testing of the actual mg/l residual for the specific disinfectant on at least a daily basis.

TABLE 070.3

RANGE OF ACCEPTABLE TESTING LEVELS FOR FIELD TEST KITS\*

| Chemical Test              | Minimum Range        | Minimum Accuracy                            |
|----------------------------|----------------------|---|
| 1. Free available chlorine | 0.3 to 3.0 ppm       | 0.2 ppm to 1.0 ppm<br>0.5 ppm above 1.0 ppm |
| 2. Total chlorine          | 0.3 to 3.0 ppm       | 0.2 ppm to 1.0 ppm<br>0.5 ppm above 1.0 ppm |
| 3. Total bromine           | 0.3 to 4.0 ppm       | 0.2 ppm to 1.0 ppm<br>0.5 ppm above 1.0 ppm |
| 4. pH (hydrogen ion)       | 7.0 to 8.2           | 0.2   |
| 5. Cyanuric Acid           | 0 to 100 ppm         | 10 ppm                                      |
| 6. Alkalinity              | 0 to 300 ppm         | 15 ppm                                      |
| 7. Temperature (spas)      | 60 to 110 degrees F. | 1 degree F.                                 |

NOTE:

\*Do not make a chemical condition determination based on readings at the extreme measurable limits of the scale.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-070, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-070, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-030, filed 3/12/90, effective 4/12/90; Regulation .98.030, effective 3/11/60.]

**WAC 246-260-080 Monitoring, reporting, and recordkeeping.** (1) Reporting death, injury, and illness. Owners shall:

(a) Provide department or local health officer-requested information for statewide injury and illness surveillance reports; and

(b) Within forty-eight hours, notify the department or local health officer of a drowning, near drowning, death, or serious injury or illness occurring at the water recreation facility.

(2) Incidents. Owners shall provide department or local health officer-requested information after an incident creating a potential problem of health or safety significance, for example, chlorine gas leak.

(3) Monitoring and recordkeeping. Owners shall monitor and maintain records for at least three years on the following:

(a) Water quality conditions on WRF pools including:

(i) Residual disinfectant testing often enough to determine the residual is satisfactory, and in no condition

shall residual disinfectant testing be done less than once every twenty-four hours;

(ii) Hydrogen ion (pH) concentration testing often enough to determine the concentration is satisfactory, and in no condition shall testing be done less than once every twenty-four hours;

(iii) Checking alkalinity monitored at least weekly;

(iv) Recording quantities of all chemicals added to pool water, including alum, algicides, cyanuric acid, acids, alkalinity compounds, etc.

(v) Checking gauges sufficiently to assure conformance with code requirements for turnover during the filter cycle;

(vi) Any gross water contamination, for example, vomiting, feces, etc.;

(vii) When pool temperature is over ninety-five degrees, temperature testing sufficiently often to determine temperature is in a satisfactory range at or below one hundred and four degrees Fahrenheit and in no condition shall temperature testing be done less than once every twenty-four hours; and

(viii) When cyanuric acid or its derivatives are used in a pool, cyanurate level testing to determine the cyanurate level is maintained below the maximum level of ninety mg/l, and in no condition shall cyanurate level testing be done less than once every week the pool is in use.

(b) Routine preventive maintenance provided on all hazardous equipment, for example, gas chlorination equipment;

(c) Daily estimation of number of users;

(d) Personnel credentials, training, and/or certifications required under WAC 246-260-100(5), 246-260-120(5), and 246-260-140(5).

(4) Availability. Owners shall make records required by this section available for department or local health officer review upon request.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-080, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-035, filed 3/12/90, effective 4/12/90.]

**WAC 246-260-090 Swimming pool design, construction, and equipment.** (1) **Location.** Owners shall locate pools to:

(a) Minimize pollution by dust, smoke, soot, and other undesirable substances;

(b) Eliminate pollution from surrounding surface drainage; and

(c) Ensure pump house, trees, and other structures are located fifteen feet or more from the pool or provide barriers or other means to prevent ready access from the structure. Structures shall not be construed to include:

(i) Building walkways above the second story or roofs of any building structure; or

(ii) Any barriers provided to prevent unauthorized pool access, for example fencing.

(2) **Materials.** Owners shall use only structure and equipment materials which are nontoxic, durable, inert, impervious to water, and easily cleanable.

(3) **Walking surfaces.** Owners shall design and maintain walking surfaces:

(a) Uniformly sloping away from the pool or pools a minimum of one-fourth inch per foot and a maximum of one-half inch per foot;

(b) Of a nonslip finish not presenting a tripping hazard;

(c) Equipped with sufficient drains to prevent standing water;

(d) Of easily cleanable, impervious finishes;

(e) At least six feet wide on the shallow end of pool, except for:

(i) Pools with all depths uniform at ends, at least one end six feet wide or more; or

(ii) Circular or irregular pools at least twenty-five percent of the deck six feet wide or more.

(f) Four feet or more in width on pools with an area fifteen hundred square feet or less;

(g) Six feet or more in width:

(i) On outdoor pools fifteen hundred square feet or more;

(ii) On fifty percent of the perimeter of indoor pools fifteen hundred square feet or more. Perimeter on remainder of the deck shall be four feet or more in width.

(h) A minimum of sixteen square feet per bather on pools fifteen hundred square feet or more. Determine maximum bather load as described under subsection (12) of this section. If owner provides maximum facility occupancy loading less than that of subsection (12) of this section, and such occupancy limit is posted and enforced, that loading may be used in lieu of the maximum bather load figure as described under subsection (12) of this section;

(i) In swimming pools designed for competitive use with likelihood of spectators, a minimum of six feet between spectator viewing area and the pool. Balconies shall be fifteen feet or more from the pool unless properly safeguarded from intruding into the pool area;

(j) In conformance with department-established guidelines for any resilient artificial surfaces; and

(k) General use pools shall not have sand and grass areas within the pool enclosure unless separated to prevent direct access from the pool area and means are provided for cleansing the bather's feet before re-entering the pool and deck area.

(4) **Barriers.** Owners shall provide barrier protection to prevent unauthorized access.

(a) A barrier shall be sixty inches or more in height and:

(i) Shall not allow passage of a four-inch diameter sphere;

(ii) If it has horizontal members that are spaced less than forty-five inches between the tops of the horizontal members, shall have spaces between the vertical members no greater than a width of one and three-quarter inches (see Figure 090.1); or

(iii) If it has horizontal members that are spaced at, or more than, forty-five inches between the tops of the horizontal members, shall have spaces between the vertical members no greater than a four-inch width (see Figure 090.2); and

IF HORIZONTAL MEMBERS ARE EQUAL TO OR MORE THAN 45 INCHES APART, VERTICAL SPACING SHALL NOT EXCEED 4 INCHES

(iv) Shall have lockable gates and entrances provided with a self-closing, self-latching mechanism fifty-four inches or more from the ground with a clear space fifty inches deep on the latch side of the door to position a wheelchair. When a latching mechanism is provided at any lower height, the latching mechanism shall be of a type remaining continuously locked, and only opening with the use of a key or other access control system.

(b) At outdoor facilities not a part of living facilities, such as in a municipal park, a barrier six feet or more shall be provided to prevent unauthorized access;

(c) Restricted area service entrances shall be exempt from door or gate requirements providing no public access is available;

(d) Lifeguarded pools are not required to have a self-closing, self-latching gate during the period a pool is in use. Facility gates shall be closed and locked during nonuse periods; and

(e) An entrance to the pool area which shall not serve as a required exit from another part of the building when there is a conflict with other codes or regulations.

(5) **Pool surfaces.** Owners shall ensure pool surfaces with:

(a) Materials complying with subsection (2) of this section;

(b) Water tight and nonabrasive construction; and

(c) White or light color finish not obscuring the view of objects or surfaces;

(d) Surfaces not causing cutting, pinching, puncturing, entanglement, or abrasion hazard under casual contact; and

(e) Construction tolerances conforming with current NSPI public pool standards.

(6) **Pool general floor and wall dimensional design.** Owners shall ensure pool dimensional designs for floors and walls provide for safety, circulation, and quality of the water including, but not limited to:

(a) Uniform pool floor slopes as follows:

(i) Pools fifteen hundred square feet or more providing a maximum slope of one foot drop in twelve feet of run at pool depths to five and one-half feet;

(ii) Where diving provisions are included, floor slopes not intruding into the area designated as the diving envelope; and

(iii) A slope change transition zone (breakpoint from shallow to deep areas of pool) providing warning of the break in slope into diving or deep pool areas consisting of a two-foot wide ramp sloped at twice the slope of the shallow bottom.

(b) Pool vertical walls may be curved, not to exceed allowable radius, to join the floor for minimum distance as noted under Table 050.1 of this section. Vertical means walls not greater than eleven degrees from plumb:

(i) Coving or portion of the side wall of a pool diving area shall conform as required and as described under subsection (7) of this section; and

(ii) In new construction or alterations to existing construction, ledges are prohibited.

(c) A maximum intrusion for pool walls beyond the vertical, as defined under subsection (6)(b) of this section, with any configuration not to exceed a transitional radius from wall to floor where floor slopes join walls and which has:

(i) Center of radius not less than the minimum vertical depth specified under Table 090.3 of this section below the water level;

(ii) Arc of radius tangent to the wall; and

(iii) Maximum radius of coving, or any intrusion into the pool wall/floor interface, determined by subtracting the vertical wall depth from the total pool depth.

TABLE 090.3

MAXIMUM RADIUS COVING OR POOL INTRUSION DIMENSIONS BETWEEN POOL FLOOR AND WALL\*

| Pool Depth                  | 2'0" | 3'0" | 3'6" | 5'0" | > 5'0"   |
|-----------------------------|------|------|------|------|--|
| Minimum Sidewall            | 1'6" | 2'2" | 2'6" | 3'6" | @ > 3'6"   |
| Vertical Depth (Springline) |      |      |      |      |  |
| Maximum Radius of Curvature | 6"   | 10"  | 12"  | 1'6" | **Maximum radius equals pool depth minus the vertical wall depth |

NOTE:

\*For pool depths falling between the depths listed, values can be interpolated.

\*\*Radius of coving cannot intrude into pool within diving envelope.

(7) **Specific design requirements for pools furnishing areas for diving.** Owners shall ensure provision of diving

envelopes in pools or areas of pools designated for diving activities to include a diving envelope not less than the:

(a) APHA standard configuration noted under figure 090.4 of this section in areas where user would enter from the deck level twelve inches or less from water level. This requirement is based on a standard described under APHA public pool regulations, 1981, for pool type described under D-8.01 Table 1, the section noting the requirements from deck level;

(b) CNCA standard configuration noted under figure 090.5 of this section in areas where the user would enter from the deck level over twelve inches from water level, or has a platform or diving board provided at a height of less than one-half meter (twenty inches). This requirement is based on a standard described under CNCA publication **Swimming Pools: A Guide to their Planning, Design, and Operation** 1987, Fourth Edition. Human Kinetics Publisher, Inc., Champaign, Illinois, figure 8.1; and

(c) FINA standard configuration noted under figure 090.6 of this section in areas where the user would enter from the diving board or platform at a height of one-half meter (twenty inches) or greater. This requirement is based on a standard described in FINA publication **FINA Handbook, 1986-88**, constitution and rules governing swimming, diving, water polo, and synchronized swimming, 1986-88. Edited by E. Allen Harvey, Vancouver, Canada VGN 3R6, Section D, pp. 114-115.

NOTE:

\*The department underlined areas for clarification.

FIGURE 090.4

MINIMUM DIMENSIONS FOR POOLS WITH DIVING FROM DECK LEVEL WHICH IS LESS THAN TWELVE INCHES FROM THE WATER LINE

APHA STANDARDS\*  
D-8 DIVING AREA REQUIREMENTS

D-8.01

The dimensions of the diving area on all swimming pools providing diving from deck level shall conform to the following dimensions:

Table 1. The diving area dimensions on all swimming pools providing diving from deck level.

| Heights                          | Lengths   |        |                       |         |
|----------------------------------|---|--------|-----------------------|---------|
|                                  | Water Depths  |        | Length of Diving Well | Run-Out |
| Height of Deck Above Water Level | D(0)  | D(1)   | L(1)                  | L(2)    |
| H<br>12" or less                 | 6 ft  | 8.5 ft | 12 ft                 | 10.5 ft |
| Over 12 inches                   | See standards for over twelve inches as applicable (either CNCA or FINA in inches following subsections). |        |                       |         |

Figure 090.5

Minimum dimensions for pools with boards or platforms at a height of less than 1/2 meter (20 inches)

CNCA STANDARDS

| Dimension                                    | Minimum    | Preferred or Maximum |
|--|------------|----------------------|
| A Height of board above water                |            | 20 in.               |
| B Board overhang                             | 2 ft 6 in. | 3 ft                 |
| C Depth of water at plummet                  | 9 ft       | 10 ft *              |
| D Distance from plummet to start of upslope  | 16 ft      | 18 ft *              |
| E Inclination of upslope of bottom           |            | 1:3                  |
| F Depth of water at breakpoint               | 4 ft 6 in. |                      |
| G Slope of bottom in shallow portion of pool | 1:12       | 1:15 *               |
| H Length of shallow section of pool          | 8 ft       | 14 ft *              |
| J Distance to any overhead structure         | 13 ft      | 15 ft *              |
| K Board length                               |            | 12 ft                |
| L Length of pool                             | 40 ft      | 50 ft *              |
| M Dimension not less than C minus            | 6 in.      |                      |

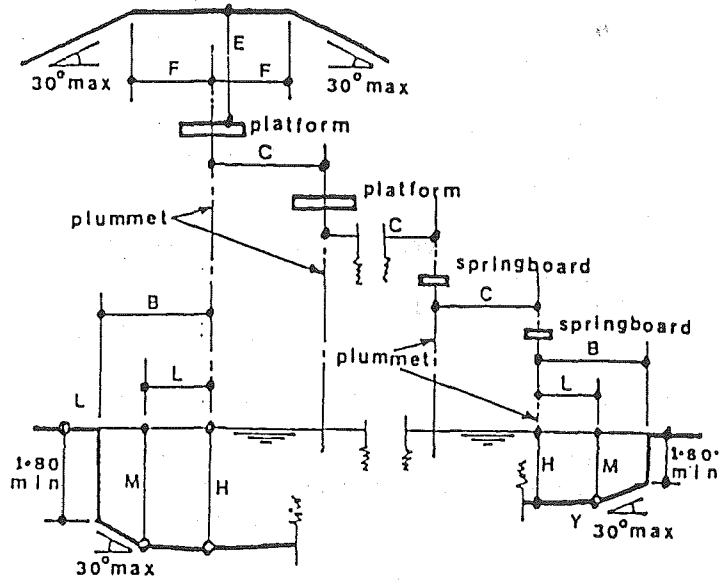

NOTE (FROM FIGURE 090.5):

- \*Values with asterisks are not to be considered as maximums.
- \*\*Warning stripe at break point may be of any contrasting color.

|   |   | MINIMUM                        | 30 degrees  |           | Dimensions C (plummets to adjacent plummets) apply for Platform with widths as detailed. For wider Platforms increase C by half the additional width(s) |             |          |            |              |         |            |      |      |      |

(8) **Pool appurtenances.** Owners shall ensure swimming pools:

(a) Have handholds around the perimeter in pools two feet or more in depth. Handholds shall be four feet or less apart and consist of any one or a combination of the following:

(i) Coping, ledges, radius flanges, or decks along the immediate top edge of the pool or suitable slip-resisting handholds located twelve inches or less above the waterline;

(ii) Ladders or steps; or

(iii) Secured rope or railing twelve inches or less above the water line.

(b) Have stairs, ladders, or stepholes with:

(i) Stairs, when provided, meeting the following construction requirements:

(A) Nonslip tread finish;

(B) Contrasting color stair tread edges clearly visible to users;

(C) Recessed in pool areas used for lap or competitive swimming to prevent intrusion into the activity areas;

(D) Handrails with the leading edge for stairs at pool entry/exit being neither eighteen inches or more beyond nor eight inches or more inside (horizontally) the vertical plane of the bottom riser;

(E) Riser treads with a minimum unobstructed, horizontal, ten-inch tread depth and a minimum two-hundred-forty-inch surface area;

(F) Riser heights, on general use pools fifteen hundred square feet or more, uniform and seven and one-half inches or less, except the bottom riser may be less than the uniform height; and

(G) Riser heights, on general use pools less than fifteen hundred square feet, and limited use pools, uniform and have a preferred seven-and-one-half-inch height, but not greater than ten inches, except the bottom riser may be plus or minus two-inches of the uniform height.

(ii) Ladders or stepholes:

(A) Spaced at a minimum of one for every seventy-five feet of pool perimeter deeper than four feet;

(B) Provided at both sides of the deep end of pools over thirty feet in width; and

(C) Equipped with a handrail at the top of both sides extending over the coping or deck edge.

(iii) Means of access at the shallow end of the pool; and

(iv) Designs permitting entry and exit for impaired or handicapped persons are encouraged.

(c) Diving boards and diving platforms, when provided, shall:

(i) Be installed according to manufacturer's instructions;

(ii) Have slip-resistant tread surfaces;

(iii) Have steps and ladders leading to diving boards which provide handrails.

(iv) Be protected with forty-two inch high guardrails extending at least to the water edge when one meter or more above the water.

(d) Starting blocks, when provided, shall:

(i) If on the shallow end of pool, be removed when not in use by the competitive swimmers trained in starting blocks proper use; and

(ii) Be firmly secured when in use.

(e) Water slides, when provided, shall:

(i) Be installed according to manufacturer's instructions and be approved by the manufacturer for general use and limited use pools; and

(ii) Conform to Part 1207 of the Consumer Product Safety Act (Sec. 7(f), P.L. 92-573, 86 Statute 1215, 15 U.S.C. 1056(f)); or

(iii) If not manufactured for general use and limited use pools, conform to requirements under chapter 246-262 WAC, Recreational water contact facilities.

(9) **Turnover.** Owners shall ensure pools turn over entire pool water volume in six hours or less. Exceptions to recirculation requirements may be made for flow-through pools in the following conditions where:

(a) Water supply is sufficient to provide the same turnover period specified for recirculation pools;

(b) The source water supply meets acceptable quality requirements and is subject to a disinfection method as described under WAC 246-260-070(3);

(c) The introduction of fresh treated pool water is accomplished by the same type of inlet and outlet design required for recirculation pools; and

(d) The pool water quality complies with WAC 246-260-070.

(10) **Pool depth markings.** Owners shall provide depth markings:

(a) Plainly marking the water depth in feet on the vertical wall at or above the water level and on the horizontal surface of the coping or deck edge;

(b) Positioned on the vertical pool wall to be read from the water side. Where markings cannot be placed above the water level, markings shall be placed in other areas and plainly visible to users in the pool;

(c) Located on the coping or deck within eighteen inches of the water edge and positioned to be read while standing on the deck facing the water;

(d) Which are slip resistant;

(e) Placed at the maximum and minimum water depths and at all points of slope change;

(f) Installed at intermediate increments of water depth not to exceed two feet, nor spaced at distances greater than twenty-five foot intervals;

(g) Uniformly arranged on both sides and ends of the pool;

(h) On irregularly shaped pools, meeting the requirements in subdivision (a) through (g) of this subsection and also designate the depths at all major deviations in shape;

(i) With a four-inch minimum height on the deck and a two-inch minimum height on the vertical pool wall; and

(j) Applied in a contrasting deck color which does not fade.

(11) **Safety line or marking line.** Owners shall provide safety (float) lines or marking lines (lines on pool sides and bottom) separating areas where the pool slope

breaks from a uniform slope leading from shallow to deeper water.

(a) Safety lines when used shall:

(i) Be kept in place at all times, except when the pool is used for a specific purpose such as lap swimming or competitive use;

(ii) Be placed one foot toward the shallow end away from the break point line. See subsection (6)(a)(iii) of this section;

(iii) Be strung tightly allowing the bather to hold onto the line for support;

(iv) Have a receptacle for receiving the safety line:

(A) Recessed in the wall; or

(B) Not constituting a safety hazard when the safety line is removed.

(v) Provide floats on the line at a minimum distance of every four feet.

(b) Markings lines when used shall:

(i) Provide a minimum three-inch wide marking line at the break point where the pool slope breaks from a uniform slope leading from shallow to deeper water; and

(ii) Be of a contrasting color to the background color of the pool sidewalls and floor.

(c) In pool facilities with uniform slopes not exceeding one foot in twelve feet to deep portions of the pool, a safety line or marking line shall not be required.

(12) **Bather load.** Owners shall ensure maximum number of bathers in the pool facility at any one time do not exceed a number determined by the formula noted under Table 090.7 of this section.

TABLE 090.7

SWIMMING POOL MAXIMUM BATHING LOAD\*  
(SPMBL)

$$\text{SPMBL} = \frac{A - S}{(30)} + \frac{S}{(15)} \quad \text{For outdoor pools}$$

$$\text{SPMBL} = \frac{A - S}{(30)} + \frac{S}{(25)} \quad \text{For indoor pools}$$

Where

A = Total area of water surface in square feet

S = Area of pool less than 5 feet deep in square feet

NOTE:

\*This formula will be used in determining certain features of pools as noted elsewhere in these rules and regulations.

(13) **Inlets.** Owners shall provide pool inlets:

(a) Submerged and located to produce uniform water and chemical circulation throughout the pool; and

(b) Located on the bottom of pools twenty-five hundred square feet or more, unless otherwise justified by the design engineer to the department's or local health officer's satisfaction.

(14) **Outlets.** Owners shall provide pool outlets with:

(a) Overflow and main drain grating systems each designed to carry one hundred percent of the total recirculation filter flow and main drain piping designed to carry fifty percent or more of total recirculation filter flow;

(b) Overflow outlets that maintain:

(i) A minimum of sixty percent of filter recirculation flow at all times; and

(ii) An overflow channel which may be used on any pool and required on pools twenty-five hundred square feet or more on the pool perimeter to promote uniform circulation and skimming action of the upper water layer with:

(A) A design preventing all matter entering the channel from returning to the pool;

(B) Dimensions minimizing the hazard for bathers, such as catching arms or feet;

(C) One one-hundredth of a foot slope per foot or more;

(D) Drains sufficiently spaced and sized to collect and remove overflow water to return line and filter, where applicable; and

(E) Size sufficient to carry one hundred percent of the recirculation flow plus the surge flow equivalent to one-fifth of the balancing tank expressed in gallons per minute.

(iii) Skimmers in lieu of pool overflow channels up to twenty-five hundred square feet if:

(A) Weir provided in skimmer has a maximum flow rate through skimmer not exceeding four gpm per inch of weir;

(B) Devices are recessed in the pool wall so no part protrudes beyond the plane of the wall into the pool;

(C) The skimmer is equipped with a device to prevent air lock in the recirculation suction line, such as, an equalizer line;

(D) The skimmer is equipped with a removable and cleanable screen designed to trap large solids;

(E) Automatically adjustable and operates freely with continuous skimming action to continue through all designed loading rates. Displacement shall be computed at fifteen gallons per bather.

(c) Main drains in all pools with:

(i) Location at the pool's low points;

(ii) A minimum of two main drains spaced:

(A) Twenty feet or less apart nor closer than six feet; or

(B) As far as possible from each other in pools seven feet or less linear floor distance.

(iii) Total open area of grates sized to prevent a suction or entrapment hazard dangerous to user;

(iv) Grates on drains with:

(A) Maximum flow of one and one-half feet per second; or

(B) Net outlet area four times or more the area of the discharge pipe.

(v) Openings not allowing a sphere over one-half inch in diameter to pass;

(vi) Grates designed to withstand forces of users;

(vii) Grates removable only with specific tool; and

(viii) Means to control flow from recirculation pump or balancing tank.

(15) **Flow.** Owners shall maintain pool recirculation flow not to exceed:

(a) Six feet per second in valved suction or discharge side of the pump; and

(b) Ten feet per second in open discharge pipes on the pressure side of the pump or filter discharge. The recirculation flow limit does not apply to the return inlet and the last two feet of pipe leading to the inlet.

(16) **Balancing tanks.** Owners with overflow channels requiring balancing tanks shall:

- (a) Maintain volume equivalent to fifteen times maximum bathing load expressed in gallons; and
- (b) Increase capacity as necessary to provide volume for make-up water and to prevent air lock in the pump suction line.

(17) **Pumps.** Owners shall have and maintain recirculation pumps with adequate capacity to:

- (a) Provide design flows and pressure for water recirculation over the entire operating filter pressure;
- (b) Allow proper back washing of filters when specified; and
- (c) Have self-priming capability when installed above pool water level.

(18) **Strainers.** Where pumps precede the filter, owners shall equip pool recirculation facilities with hair and lint strainers which shall:

- (a) Be located upstream of recirculation pumps;
- (b) Provide strainer screen sufficiently strong to prevent collapse when clogged;
- (c) Have an openable cover; and
- (d) Provide valving to isolate the strainer when located below pool water level.

(19) **Valves.** Owners shall provide valves at appropriate locations to allow isolation and maintenance of equipment.

(20) **Equipment rooms.** Owners shall provide equipment rooms:

- (a) Enclosing pumps, disinfection equipment, filters and other electrical and mechanical feed equipment and associated chemicals. Chemical storage shall conform to manufacturer requirements;
- (b) Providing work space and access to perform routine operations;
- (c) With a forty-six-square-foot minimum floor area and provide a three-foot minimum access area to service equipment;
- (d) With one floor drain or more and a floor slope to the drain at a one-fourth-inch-per-foot minimum;
- (e) Ready access if below grade;
- (f) Ventilation;
- (g) Twenty foot-candles or more of light measured thirty inches from the floor; and
- (h) Kept locked.

(21) **Make-up water.** Owners shall ensure a source of make-up water and associated piping at the pool:

- (a) Providing sufficient quantity to replace daily pool losses;
- (b) Coming from a supply conforming with chapter 246-290 WAC;
- (c) Preventing cross connections using a minimum air gap of two pipe diameters or approved backflow prevention devices between the make-up water source and the pool water or waste water; and

(d) If using a pool fill spout, not projecting greater than one inch into the space above the water surface area and shielded to not create a deck hazard.

(22) **Filters.** Owners shall equip pools with filtration equipment:

- (a) Meeting the applicable standards of NSF or equivalent;
- (b) Using acceptable type and filter rates described under Table 050.6 of this section;
- (c) Having pressure or vacuum gauges for measuring loss of head through the filter with minimum of one gauge preceding and one gauge following the filter;
- (d) Having a rate of flow indicator to measure flow which has accuracy, repeatability, and durability equivalent to flow meters meeting NSF standards; and
- (e) Having a means of discharging filter backwash to waste with:
  - (i) Discharge in a manner not creating a public nuisance;
  - (ii) Disposal in accordance with applicable local laws or regulations;
  - (iii) Minimum air gap of two pipe diameters to prevent cross-connection from waste discharge and recirculation system piping;
  - (iv) Discharge receptor and piping of sufficient size to accept backwash water and prevent flooding; and
  - (v) Ability to monitor filter effluent during backwash, that is, use of a sight glass.
- (f) Providing means to release air entering the filter tank on pressure filters;
- (g) When cartridge filters are used:
  - (i) Provide with an extra set of cartridges; and
  - (ii) Have any bypass valves in a permanently closed position.
- (h) When using pressure DE filters with separation tanks:
  - (i) Provide a means of air release or a lid providing a slow and safe release of pressure; and
  - (ii) Show a readily visible user warning that the air release must be opened before starting the circulation pump.

TABLE 090.8

TYPE AND RANGES OF FILTERS FOR SWIMMING POOLS

| Range of Acceptable Filter Rate<br>Type of Filter Media | Expressed in gpm/Square Feet  |     |         |
|---|---|-----|---------|
|   | Minimum   |     | Maximum |
| Sand  | —   |     | 3       |
|   | Rapid Sand or Pressure Sand<br>High Rate Sand Pressure<br>or Vacuum | 10  | 18*     |
| D.E.  | Continuous<br>Feed  | 1.0 | 2.0     |
|   | Pressure<br>Vacuum  | 0.8 | 1.35    |
| Cartridge**   |   |     | .375    |

## NOTE:

\*Filters which are sized at maximum application rate shall be equipped with flow control valves to maintain flow equilibrium to account for varying filter pressures and consequent flow production.

\*\*Cartridge filters shall have a nominal micron rating of twenty microns or less.

(23) **Disinfection equipment.** Owners shall provide disinfection equipment:

(a) Providing a continuous and effective disinfectant residual in the water;

(b) Using a disinfectant with an easily monitored residual;

(c) Having a design feed rate providing effective disinfection levels when the pool is in peak demand conditions;

(d) Having easily cleanable equipment and piping used to apply chemicals and with provisions to prevent undue clogging. All materials shall be resistant to action of chemicals used;

(e) Conforming to NSF standards if disinfection equipment has:

(i) Adjustable output rate chemical feed equipment for liquid solutions. The equipment shall:

(A) Feed under positive pressure in the recirculation system;

(B) Provide means for dosage adjustment;

(C) Have provisions to prevent hypochlorite solution siphoning when equipment is turned off. This applies when the disinfection equipment is above pool water level.

(ii) Flow through chemical feed for solid feed material. Solid tablets or granules shall not be placed in skimmer baskets accessible to the public.

(f) Allowing hand feeding on an emergency basis only;

(g) Meeting the following conditions when using chlorine gas:

(i) Chlorine rooms shall:

(A) Be above ground level;

(B) Be constructed so all openings or partitions with adjoining rooms are sealed;

(C) Be located with consideration of prevailing winds to dissipate leaked chlorine away from the pool facility;

(D) Have door opening outward only and to the out-of-doors;

(E) Provide a sign on the door exterior reading DANGER CHLORINE. The sign shall be large enough to be read twenty-five feet away.

(ii) Chlorine rooms shall have mechanical exhausting ventilation including:

(A) Air inlet located as far as possible from fan intake to promote good air circulation patterns;

(B) Minimum of one air change per minute in the chlorine room when fan is operating;

(C) A remote switch outside the room or a door-activated switch to turn on fan before entering;

(D) Suction for fan near the floor;

(E) Exhaust for fan and chlorinator vent located to prevent contaminating air intake and prevent undue hazard for the pool facility users; and

(F) Screened chlorinator vent.

(iii) Gas chlorine systems shall:

(A) Be vacuum injection type, with vacuum-actuated cylinder regulators;

(B) Provide integral backflow and anti-siphon protection at the injector; and

(C) Provide taring (net weight of cylinder gas) scales for determining chlorine weight.

(iv) Breathing protection available in an accessible area for the operator outside of the chlorine room including:

(A) Self-contained breathing apparatus designed for use in a chlorine atmosphere for working with chlorine leaks and maintained in accordance with department of labor and industries standards; or

(B) Provisions to substitute breathing protection at the site, if procedures can be established and documented with emergency service fire districts or other approved organization within the area for promptly responding to chlorine leaks.

(v) Means for automatic shutoff when pool flow is interrupted; and

(vi) Chlorine gas cylinders shall:

(A) Be stored only in chlorine rooms;

(B) Have approved valve-stem cylinder wrench on the valve stem to shut the system down in an emergency event;

(C) Be properly secured to prevent tipping;

(D) Be tagged to indicate cylinders are empty or full; and

(E) Not exceed one hundred fifty pounds tare weight per cylinder. If one-ton cylinder use is desired, an engineer specializing in chlorine design shall prepare a design proposal for department consideration.

(24) **Chemical feeding equipment for pH control.** Owners applying chemicals for controlling pH through chemical feed equipment shall provide equipment with:

(a) Adequate size and design to allow routine cleaning and maintenance;

(b) Materials resistant to chemical action;

(c) Means for automatic shut off when pool flow is interrupted;

(d) Chemical feed equipment for pH control on pools fifty thousand gallons volume or greater;

(e) Any pool feeding with:

(i) Caustic soda (NaOH);

(ii) Carbon dioxide (CO<sub>2</sub>); or

(iii) Other chemicals the department determines necessary to require metered and controlled feeding.

(25) **Heaters.** Where pool heating equipment is provided, owners shall:

(a) Locate equipment so any standing pilot is readily accessible; and

(b) Install equipment per NEC and UMC.

(26) **Ventilation.** Owners shall provide indoor pool facility ventilation conforming with ASHRAE pool facility standards.

(27) **Testing equipment.** Owners shall use testing equipment as noted in the water quality section under WAC 246-260-070(6).

(28) **Chemical storage.** Owners shall ensure chemical storage design and placement minimizes safety risks.

(29) **Restroom, locker room, and plumbing fixtures.** Owners shall provide restroom, locker room, and plumbing facilities at pools as follows:

- (a) General use swimming pool facilities with:
  - (i) Minimum components including:
    - (A) Dressing rooms;
    - (B) Showers;
    - (C) Toilets and urinals;
    - (D) Lavatories; and
    - (E) Hose bibs.
  - (ii) A design providing easy accessibility to toilet and shower facilities by users with minimum cross traffic of nonusers;
  - (iii) Locker rooms including:
    - (A) Separate facilities for both sexes with provisions to block line of sight into locker rooms;
    - (B) Non-slip floors with suitable drains;
    - (C) Junctions between walls and floors covered for ease of cleaning; and
    - (D) Adequate ventilation to prevent moisture build-up in the facility.
  - (iv) Plumbing fixtures as described under Table 050.7 of this section;
  - (v) Shower facilities that:
    - (A) Deliver water at a temperature range of ninety to one hundred ten degrees Fahrenheit; and
    - (B) Provide single service soap in nonglass dispensers.
  - (vi) Flush toilets and toilet tissue in dispensers;
  - (vii) Sinks provided with:
    - (A) Tempered or hot and cold running water;
    - (B) Single service soap in nonglass dispensers; and
    - (C) Single service towels or electric hand dryers.
  - (viii) Hose bibs with vacuum breakers provided:
    - (A) At a maximum spacing of one hundred fifty feet around pool deck; and
    - (B) Within the equipment room at facilities having pools fifteen hundred square feet or more.
  - (ix) Janitor sink with a vacuum breaker at pools greater than fifteen hundred square feet; and
  - (x) Sewage disposed of in a manner approved by the department or local health officer.
- (b) Limited-use swimming pool facility plumbing as described under Table 050.8 [090.10] of this section.

TABLE 090.9

PLUMBING FIXTURE MINIMUM REQUIREMENTS FOR GENERAL USE SWIMMING POOLS AMOUNT OF FIXTURES REQUIRED FOR OCCUPANCY LOAD BY SEX

| Type of Fixture  | Male  | Female |
|------------------|-------|--------|
| 1. Toilets       |       |        |
| up to 120        | 1/60  | 1/40   |
| from 121-360 add | 1/80  | 1/60   |
| over 360 add     | 1/150 | 1/100  |
| 2. Urinals       |       |        |
| up to 120        | 1/60  | NA     |
| from 121-360 add | 1/80  |        |
| over 360 add     | 1/150 |        |
| 3. Showers       |       |        |
| up to 120        | 1/40  | 1/40   |
| from 121-360 add | 1/60  | 1/60   |
| over 360 add     | 1/100 | 1/100  |
| 4. Sinks         |       |        |
| up to 200        | 1/100 | 1/100  |
| from 201-400 add | 1/200 | 1/200  |
| over 400 add     | 1/400 | 1/400  |

| Type of Fixture | Male  | Female |
|-----------------|---|--------|
| 5. Hose bibs    | One hose bib accessible to each locker room and provided with a vacuum breaker. |        |
| 6. Janitor sink | One*  |        |

NOTE:

\*Required for pools 1500 square feet or greater.

TABLE 090.10

PLUMBING FIXTURE MINIMUM REQUIREMENT FOR LIMITED USE SWIMMING POOLS

| Pools with:  | Toilets      | Showers      | Sinks        | Dress.Rm.    |
|--|--------------|--------------|--------------|--------------|
| 1. Living units within 100 feet and less than 3 stories          | -            | -            | -            | -            |
| 2. Living units >100 feet but <500 feet and less than 3 stories. | 1            | -            | 1            | -            |
| 3. Living units within 1/4 mile and/or with 3 or more stories.*  | 1(M)<br>1(F) | -            | 1(M)<br>1(F) | -            |
| 4. Living units greater than 1/4 mile.**                         | 1(M)<br>1(F) | 1(M)<br>1(F) | 1(M)<br>1(F) | 1(M)<br>1(F) |

NOTE:

\*Consideration for elevators adjacent to pool may allow variance from this requirement.

\*\*When pool bathing load for the proposed facility exceeds a capacity of 150 people, the fixture units provided at limited use facilities shall conform with the general use requirements in Table 090.9.

(c) If owners limit the number of people within their facility to a certain number and post maximum occupancy loading, the number of plumbing fixture units may be based on that maximum occupancy.

(30) **Lighting.** Owners shall design and maintain pool facility lighting to:

- (a) Illuminate indoor facilities, outdoor facilities used after dusk, and locker room facilities with a minimum lighting intensity maintained thirty inches above any walking surface, pool deck, or pool area of:
  - (i) Thirty foot-candles at indoor facilities;
  - (ii) Fifteen foot-candles at outdoor facilities;
  - (iii) Twenty foot-candles in locker rooms.
- (b) Allow lifeguards or attendants to clearly see pool areas and walking surfaces;
- (c) Meet any additional lighting requirements deemed necessary by the department or local health officer;
- (d) Provide protective shielding for all lighting fixtures above walking surfaces and pool areas; and
- (e) Provide all indoor facilities with one or more pool area emergency lights designed to turn on in the event of a power failure. The emergency lighting shall conform to requirements of UL standard 924.

(31) **Emergency equipment.** Owners shall provide first aid and emergency equipment readily available during operating hours as follows:

- (a) General use swimming pool facilities:
  - (i) A telephone within the facility with a prominently displayed list of emergency medical service response numbers;
  - (ii) Sufficient and suitable area provided to accommodate persons within the facility requiring first aid treatment and necessary first aid equipment;

(iii) A supplied first aid kit as follows:

(A) For general use pools fifteen hundred square feet or more, a standard twenty-four unit kit;

(B) For general use pools less than fifteen hundred square feet and limited use pools, a standard sixteen unit kit;

(iv) Two or more blankets reserved for emergency use;

(v) A backboard with means to secure victim to board and provide immobilization of head, neck, and back at pools requiring lifeguards;

(vi) Devices to aid victims in distress as follows:

(A) For pools with width less than twenty-four feet, rescue poles one-half the pool width or more;

(B) For pools with width twenty-four feet or more, rescue poles twelve feet or more in length;

(C) One or more of the poles with a double crook life hook in pools without lifeguards;

(D) One or more reaching poles for every fifteen hundred square feet of pool surface area;

(E) Throwing ring buoy, heaving jug, heaving line, throw-rope bag, or other similar devices with rope the width of the pool or fifty feet, whichever is less for reaching and retrieving victim;

(F) Rescue tube or rescue buoy at each lifeguard station.

(b) Limited use swimming pool facilities:

(i) During period facility is open for use, one of the following:

(A) A telephone within one minute access;

(B) Alternate means of reaching emergency medical service response numbers;

(C) Provision of an audible emergency alarm to alert others at area of need to respond.

(ii) Comply with requirements under subsection (31)(a)(iii), (iv), and (vi) of this section.

(32) **Lifeguard chairs.** Owners shall provide lifeguard chairs as follows:

(a) Where lifeguards are required and pools have depths greater than five feet, at least one lifeguard chair shall be provided adjacent to the deep area of the pool;

(b) Installed to manufacturer standards.

(33) **Signs.** Owners shall provide signs at pools which must convey the following conditions, but may be conveyed by any combination of words, pictures, or symbols:

(a) Prohibition of running or horseplay;

(b) Prohibition of use by persons with communicable diseases;

(c) Prohibition of use by persons under the influence of alcohol or drugs;

(d) Requirement for a cleansing shower before entering the pool;

(e) Warning that persons refusing to obey the regulations are subject to removal from the premises;

(f) Prohibition of food or drink in the pool water;

(g) In pools where lifeguards are not present, post requirements for facility use as described under WAC 246-260-100 (3)(b)(iii) and (c);

(h) Location of nearest telephone for emergency use or emergency notification procedure.

(34) **Food service.** When food service is provided, owners shall:

(a) At general use pool facilities, ensure food and beverage sale and consumption areas are separated from pool and deck enclosure areas. Special provisions may be made for allowing food and beverage service on the walkway provided a minimum six feet clear area is maintained between the pool edge and any tables or chairs provided for special facility functions;

(b) At limited use pool facilities, prohibit food and beverage in the pool water and maintain a minimum four foot clear area between pool edge and any tables and chairs provided for food service;

(c) At general use pool facilities, prohibit alcohol;

(d) At limited use pool facilities, when alcohol is sold within the pool facility, provide an attendant at the pool area;

(e) Provide trash containers;

(f) Prohibit glass containers in the pool facility.

(35) **Drinking fountain.** Owners shall provide an operable drinking fountain at general use swimming pools fifteen hundred square feet or more. Drinking fountains shall conform with American Standards Association requirements.

(36) **Foot baths.** Owners shall prohibit the use of foot baths at water recreation facilities. This does not preclude use of foot showers, provided the area is well drained.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-090, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-050, filed 3/12/90, effective 4/12/90; § 248-98-050, filed 10/3/67; Regulation .98.050, effective 3/11/60.]

**WAC 246-260-100 Operation of swimming pool facilities.** (1) **Operation plan.** Owners shall ensure proper operation to protect the public health, safety, and water quality by establishing practices and developing an operations manual addressing each of the following:

(a) Physical pool facility components;

(b) Personnel;

(c) Users and spectators;

(d) Environmental conditions.

(2) **Physical components.** Owners shall provide routine checks of the physical components:

(a) Ensuring all structural facilities which the users come in contact are intact and free from undue wear or fatigue and replaced as needed;

(b) Eliminating adverse affects of water ponding on walking surfaces;

(c) Ensuring preventive maintenance on equipment essential for protection of the public health, safety, and water quality;

(d) Ensuring any necessary emergency equipment is available and in good repair;

(e) Maintaining barrier protection;

(f) Ensuring common articles such as towels, bathing suits, bathing caps, etc., for patron use are sanitized before reuse if provided for patrons; and

(g) Ensuring treatment and turnover times are continuous twenty-four hours a day during seasons or periods of use and do not exceed six hours provided:

(i) Allowances shall be made for minor equipment maintenance;

(ii) Pools previously approved with turnover rates varying from subsection (2)(g)(i) of this section may continue to operate if water quality conditions conform with WAC 246-260-070.

(3) **Required personnel.** Owners shall ensure appropriate personnel at pool facilities as follows:

(a) General use pool facilities having one or more pools fifteen hundred square feet or more in surface area shall have lifeguards present at all times pools are in use, except:

(i) Pools having surface area less than twenty-five hundred square feet, four and one-half feet or less in depth, limiting use from two to ten adults in the pool are not required to have a lifeguard;

(ii) When swim teams are facility users, the owner may allow substitution of qualified coaches. See subsection (5) of this section to substitute for a lifeguard for guarding of a swim team.

(b) General use pool facilities less than fifteen hundred square feet shall provide lifeguards or attendants as follows:

(i) Lifeguards shall be present:

(A) If pool facility provides training for water safety and basic swimming instruction for children twelve years of age or under; or

(B) If pool facility provides training for safety and basic swimming instruction for adults and the pool is over four feet deep; or

(C) When pool facility provides training, practice, and/or meets for swim teams, substitution may occur as described under subsection (3)(a)(ii) of this section.

(ii) Attendants or lifeguards shall be present when organized programs are provided at the pool facility, for example, teaching of adult swimming lessons in water four feet or less, formal exercise classes, and the like;

(iii) When no lifeguard or attendant is present, the facility use shall be limited by the following conditions:

(A) When pool is used by children twelve years of age or under, a responsible adult eighteen years of age or older shall accompany the children and be at the pool or pool deck at all times the children use the facility;

(B) When used by persons seventeen years of age or under, a minimum of two people at the pool facility at all times the pool is in use;

(C) Subdivision (b)(iii)(A) and (B) of this subsection posted.

(c) When lifeguards are not provided at limited use pool facilities, within the conditions noted in the definition for a limited use pool, use of the facility shall be limited by the following conditions:

(i) When the pool is used by children twelve years of age or under, a responsible adult eighteen years of age or older shall accompany the children and be at the pool or pool deck at all times the children use the facility;

(ii) When used by persons seventeen years of age or under, a minimum of two people at the pool facility at all times the pool is in use;

(iii) Subdivision (c)(i) and (ii) of this subsection posted and ongoing provisions to notify the responsible person of conditions for use of the facility.

(d) A water treatment operator.

(4) **Personnel duties and equipment.** Owners shall ensure the specific duties and equipment of designated personnel include:

(a) Lifeguards during periods of lifeguarding, guard users of the pool facility in areas assigned;

(b) Assistant lifeguards when provided at the pool used under the following conditions:

(i) Fifty percent or more of the persons assigned to guard on the deck are lifeguards;

(ii) Assistant lifeguards limited to guarding responsibility of areas four feet or less in depth; and

(iii) One or more lifeguards on duty trained at the equivalent of "lifeguard training" as recognized by the ARC or equivalent as recognized by the department.

(c) Attendants, when provided at pools not requiring lifeguards, oversee pool use by the bathers and provide supervision and elementary rescues such as reaching assists to bathers in need. This does not mean the person is qualified or trained to make swimming rescues;

(d) Qualified swimming coaches when substituting for lifeguards, guard swimming team at the pool facility in areas assigned;

(e) Water treatment operator oversees that the water treatment components are functioning adequately to protect public health, safety, and water quality;

(f) Notification of responsible persons on the conditions for facility use at pool facilities not requiring lifeguards, and for which no lifeguards or attendants are present. A responsible person means a person having responsibility for overseeing users seventeen years of age or under including, but not limited to a person:

(i) Renting an apartment, hotel, motel, RV camp site; or

(ii) Who is an owner or member of a condominium, homeowner's association, mobile home park, or private club with a pool facility.

(g) Lifeguards, assistant lifeguards, or attendants:

(i) Wearing a distinguishing suit, uniform, or emblem; and

(ii) Equipped with a whistle or a signaling device.

(5) **Personnel training.** Owners shall require training for each type of personnel including:

(a) Lifeguards shall maintain current certificates in the following:

(i) Standard first aid and adult, single rescue CPR through ARC or the American Heart Association; and

(ii) Advanced lifesaving, advanced lifesaving review, or lifeguard training through ARC; or

(iii) YMCA lifeguarding or crossover course through the YMCA; or

(iv) Lifeguard through the National Lifeguard Service, Canadian; or

(v) Lifeguard through the National Pool and Waterpark Lifeguard Training Course; or

(vi) Basic lifeguard through advanced lifeguard training international; or

(vii) Other training the department determines equivalent; and

(viii) Thirty-six months after enactment of the personnel training provisions of this chapter, the department will no longer recognize training for lifeguards in advanced lifesaving or advanced lifesaving review through the ARC.

(b) Assistant lifeguards shall maintain current certificates and meet the requirements in the following:

(i) Adult, single rescue CPR through ARC or the American Heart Association; and

(ii) Emergency water safety with ARC; or

(iii) Bronze medallion award through the Royal Lifesaving Society of Canada;

(iv) Shallow water lifeguard through the National Pool and Waterpark Lifeguard Training; or

(v) Other training the department determines equivalent; and

(vi) Be fourteen years of age or older.

(c) Swim coaches substituting for lifeguards with swim teams shall maintain current certificates through the following:

(i) Standard first aid and adult, single rescue CPR through ARC or the American Heart Association; and

(ii) Safety training for swim coaches through ARC; or

(iii) Other training the department determines equivalent.

(d) Attendant shall maintain current certificates and meet the requirements in the following:

(i) Adult, single rescue CPR through ARC or the American Heart Association; and

(ii) Basic water safety with ARC; or

(iii) Other training the department determines equivalent; and

(iv) Be sixteen years of age or older.

(e) Water treatment operator shall have specific knowledge in provision of pool water chemistry, filtration, pumping equipment, and rules and regulations pertaining to pool facilities;

(f) When pool facility is using chlorine gas, an operator shall have specific training as follows:

(i) Proper operation of the chlorination equipment and routine maintenance procedures;

(ii) Basic understanding of physical and chemical properties of chlorine gas under pressure;

(iii) Basic understanding on use of leak detection and emergency safety equipment;

(iv) Basic knowledge of proper first-aid procedures and response for accidental inhalation of chlorine gas;

(v) Six hours or more of formal instruction once every three years or three hours or more every eighteen months with certificate of training provided.

(g) Persons shall be exempt from having current CPR or standard first-aid certificates if the persons hold current certificates in any of the following:

(i) Community CPR in the place of adult, single rescue CPR;

(ii) In the place of standard first aid:

(A) Advanced first aid;

(B) First responder;

(C) Emergency medical technician; or

(D) Paramedic.

(iii) Other training the department recognizes as equivalent or exceeding current requirements.

(6) **Emergency response plan.** Owners shall ensure emergency response provisions as follows:

(a) In pool facilities where lifeguards, assistant lifeguards, or swim coaches are required:

(i) Sufficient qualified personnel, for example, lifeguards, assistant lifeguards, or swim coaches where appropriate, located to provide a response time not to exceed thirty seconds to all pool users;

(ii) Based on, but not limited to, the following:

(A) Pool depth;

(B) Line of sight;

(C) Bather load;

(D) Training procedures;

(E) Emergency procedures, and

(F) Lifeguard rotation.

(iii) Emergency response drills to meet the response time including:

(A) Drills two or more times each year;

(B) Testing documentation.

(iv) Where SCUBA or kayaking lessons are performed at the pool, personnel guarding these activities shall be provided special in-service training.

(b) In pool facilities where no lifeguards are provided:

(i) Posting and ongoing notification and enforcement of conditions for pool use. See subsection (3)(b) and (c) of this section;

(ii) Enforcement of conditions by owner and authorized personnel;

(iii) Emergency equipment specified under WAC 246-260-090(31), readily available during operating hours.

(c) Ongoing training and evaluation of the lifeguarding skills and/or assistant, coach, or attendant skills;

(d) In facilities where chlorine gas is used:

(i) Annual emergency drills;

(ii) Identification of the location of accessible chlorine cylinder repair kits.

(7) **Bather use.** Owners shall establish rules of conduct for facility users to ensure health and safety as follows:

(a) Signage noted under WAC 246-260-090(33);

(b) Facilities used for swimming instruction courses may allow diving into water depths recognized as adequate by the organization providing the certificates, for example ARC or YMCA, provided the divers are supervised by instructors.

(8) **Environmental conditions.** Owners shall monitor various environmental conditions affecting the facility or the user and take appropriate action in response to these factors, including electrical storms, fog, wind, visibility problems, etc.

(9) **Closure.** Owners shall close the facility when the facility or portion thereof presents an unhealthful, unsafe, or unsanitary condition. These conditions include lack of compliance with the water quality or operation requirements as detailed under WAC 246-260-070 and 246-260-100.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-100, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-100, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-060, filed 3/12/90, effective 4/12/90; Regulation .98.060, effective 3/11/60.]

**WAC 246-260-110 Spa pool design, construction, and equipment.** (1) **Location.** Owners shall locate pools to:

(a) Minimize pollution by dust, smoke, soot, and other undesirable substances;

(b) Eliminate pollution from surrounding surface drainage; and

(c) Ensure pump house, trees, and other structure locations are fifteen feet or more away from the pool or provide barriers or other means to prevent ready access from any such structure. Structures shall not be construed to include:

(i) Building walkways above the second story or roofs of any building structure; or

(ii) Any barriers provided to prevent unauthorized pool access, for example, fencing.

(2) **Materials.** Owners shall use only structure and equipment materials which are nontoxic, durable, inert, impervious to water, and easily cleanable.

(3) **Walking surfaces.** Owners shall design and maintain walking surfaces:

(a) Uniformly sloping away from the pool or pools with a minimum of one-fourth inch per foot and a maximum of one-half inch per foot;

(b) Of a nonslip finish not presenting a tripping hazard;

(c) Equipped with sufficient drains to prevent standing water;

(d) Of easily cleanable impervious finishes;

(e) Providing a minimum unobstructed six feet by seven feet area adjacent to the pool;

(f) Continuous and four feet wide or more extending around the entire pool if perimeter is equal to or greater than forty feet;

(g) Forty inches or less below horizontal ledge of elevated pool. Elevated pools over twelve inches above deck level shall have a maximum ledge thickness of twelve inches, except in the area of stairs;

(h) Continuously extending, and four feet wide or more, around fifty percent or more of the pool, if the pool is over forty inches above the primary walkway; and

(i) In conformance with department-established guidelines for any resilient artificial surfaces.

(4) **Barriers.** Owners shall provide barrier protection to prevent unauthorized access.

(a) A barrier shall be sixty inches or more in height and:

(i) Shall not allow passage of a four-inch diameter sphere;

(ii) If it has horizontal members that are spaced less than forty-five inches between the tops of the horizontal members, shall have spaces between the vertical members no greater than a width of one and three-quarter inches (see Figure 110.1); or

IF HORIZONTAL MEMBERS ARE LESS THAN 45 INCHES APART, VERTICAL SPACING SHALL NOT EXCEED 1 AND 3/4 INCHES

1 AND 3/4 INCH INSIDE DIAMETER ON CHAIN LINK OR 1 AND 1/4 INCH LENGTH ON THE SQUARE

(iii) If it has horizontal members that are spaced at, or more than, forty-five inches between the tops of the horizontal members, shall have spaces between the vertical members no greater than a four-inch width (see Figure 110.2); and

IF HORIZONTAL MEMBERS ARE EQUAL TO OR MORE THAN 45 INCHES APART, VERTICAL SPACING SHALL NOT EXCEED 4 INCHES

(iv) Shall have lockable gates and entrances provided with a self-closing, self-latching mechanism fifty-four inches or more from the ground with a clear space fifty inches deep on the latch side of the door to position a wheelchair. When a latching mechanism is provided at any lower height, the latching mechanism shall be of a type remaining continuously locked, and only opening with the use of a key or other access control system.

(b) Restricted area service entrances shall be exempt from door or gate requirements providing no public access is available;

(c) Lifeguarded pools are not required to have a self-closing, self-latching gate during the period a pool is in use. Facility gates shall be closed and locked during nonuse periods; and

(d) An entrance to the pool area which shall not serve as a required exit from another part of a building when there is a conflict with other codes or regulations.

(5) **Spa pool structure.** Owners shall ensure general pool requirements include:

(a) Pool surfaces which are nontoxic, impervious, smooth, easily cleanable, and enduring. Pools one hundred square feet or more shall be a white or light color;

(b) A dimensional design providing for safety, circulation, and quality of the water including, but not be limited to:

(i) Surfaces not causing cutting, pinching, puncturing, entanglement, or an abrasion hazard under casual contact;

(ii) Construction tolerances conforming with current NSPI public spa standards;

(iii) Uniform floor slopes not exceeding one foot of drop in twelve feet of run sloped to drain;

(iv) A minimum height between the top of the pool rim and the ceiling shall be seven feet; and

(v) Maximum operational depth of four feet measured from the water line. Exceptions may be made for special purpose designed pools.

(c) Adequate means to routinely drain or otherwise remove water from the pool.

(6) **Spa pool appurtenances.** Owners shall ensure pools contain:

(a) Handholds around the pool perimeter two feet or more in depth. Handholds shall be four feet apart or less and consist of any one or a combination of the following:

(i) Coping, ledges, radius flanges, or decks along the immediate top edge of the pool or suitable slip-resisting handholds located twelve inches or less above the water line;

(ii) Ladders or steps; or

(iii) Secured rope or railing twelve inches or less above the water line.

(b) Stairs:

(i) Meeting the following construction requirements:

(A) Nonslip tread finishes;

(B) Contrasting color stair tread edges clearly visible to users;

(C) Handrails with the leading edge for stairs at pool entry/exit being neither eighteen inches or more beyond nor eight inches or more inside (horizontally) the vertical plane of the bottom riser;

(D) Less than or equal to twenty feet of any point within the spa measured at the wall at the point of entry;

(E) Riser treads with a minimum unobstructed, horizontal, ten-inch tread depth and a minimum two-hundred-forty-inch surface area;

(F) Riser heights on spa pools over forty feet in perimeter, uniform and seven and one-half inches or less, except the bottom riser may be less than uniform height; and

(G) Riser heights on spa pools of forty feet or less in perimeter, uniform and have a preferred seven and one-half inch height, but not greater than ten inches, except the bottom riser may be less than uniform height.

(7) **Spa pool bather design capacity and load.** Owners shall design and control the pool use to not exceed a maximum bather capacity and load as designated below:

(a) The maximum bather capacity is one person per four square feet. Maximum bather capacity is the maximum number of bathers at any one time; and

(b) Bather loads are designated in terms of three different loading conditions: Light, moderate, and heavy use as shown under Graph 040.1. Maximum bather load is the maximum number of bathers in a one-hour period. Interpret a single bather use to mean a bather using the pool for a fifteen minute duration. For pools with volumes greater than noted on the graph, loadings shall be based on the continued slope of the line above each use category.

GRAPH 110.3 SPA DESIGN FOR BATHER LOAD AND TURNOVER

(8) **Turnover.** Owners shall ensure pools turn over entire pool water volume at rates in accordance with designated bather load as determined from Graph 110.3 noted in subsection (7) of this section.

(a) Minimum turnover time for treatment recirculation shall be:

(i) For light use pool facilities, thirty minutes;

(ii) For moderate use pool facilities, twenty minutes;

(iii) For heavy use pool facilities, ten minutes.

(b) Exceptions to recirculation requirements may be made for flow-through pools in the following conditions:

(i) Where water supply is sufficient to provide the same turnover period specified for recirculation pools;

(ii) The source water supply meets the quality requirements and is subject to a disinfection method outlined under WAC 246-260-070(3);

(iii) The introduction of fresh treated pool water is accomplished by the same type of inlet and outlet design required for recirculation pools; and

(iv) The pool water quality complies with WAC 246-260-070.

(9) **Inlets.** Owners shall provide pool inlets:

(a) Submerged and located to produce uniform water and chemical circulation throughout the pool;

(b) Located on the bottom of pools ten thousand gallons or more, unless otherwise justified by the design engineer to either the department's or local health officer's satisfaction.

(10) **Outlets.** Owners shall provide pool outlets with:

(a) Overflow and main drain grating systems each designed to carry one hundred percent of the total recirculation filter flow, and main drain piping designed to

carry fifty percent or more of the total recirculation filter flow;

(b) Overflow outlets maintaining:

(i) A minimum of sixty percent of filter recirculation flow at all times; and

(ii) An overflow channel which may be used on any pool and required on pools ten thousand gallons or more on the pool perimeter to promote uniform circulation and skimming action of the upper water layer with:

(A) A design preventing all matter entering the channel from returning to the pool;

(B) Dimensions minimizing bather hazards, such as catching arms or feet;

(C) One one-hundredth of a foot slope per foot or more;

(D) Drains sufficiently spaced and sized to collect and remove overflow water to return line and filter, where applicable; and

(E) Size sufficient to prevent flooded suction conditions on the overflow system and to properly drain water away from the pool. Displacement shall be computed at twenty gallons per bather. Balancing tanks use is optional dependent on the overflow channel volume and design.

(iii) Skimmers in lieu of pool overflow channels up to ten thousand gallons if:

(A) Weir provided in skimmer has a maximum flow rate through skimmer not exceeding four gpm per inch of weir;

(B) Devices are recessed in the pool wall so no part protrudes beyond the plane of the wall into the pool;

(C) The skimmer is equipped with a device to prevent air lock in the recirculation suction line, such as, an equalizer line;

(D) The skimmer is equipped with a removable and cleanable screen designed to trap large solids;

(E) Automatically adjustable and operates freely with continuous skimming action to continue through all loading rates as the skimmer is designed. Displacement shall be computed at twenty gallons per bather.

(c) Main drains in all pools with:

(i) Location of one main drain or more at the lowest point of the pool floor, or means to readily drain the entire pool water readily available;

(ii) A minimum of two main drains with equivalent recirculation capacity and net surface open area; or on spa pools with fifteen hundred gallon volume or less, a large single main drain twelve inches square or more in surface area;

(iii) A design to aid in hair entrapment prevention when main drains are on vertical walls;

(iv) Total open area of grates sized to prevent a suction or entrapment hazard dangerous to user;

(v) Grates on drains with a:

(A) Maximum flow of one and one-half feet per second; or

(B) Net outlet area four times or more the area of the discharge pipe;

(vi) Openings not allowing a sphere over one-half inch in diameter to pass;

(vii) Grates designed to withstand forces of users;

(viii) Grates removable only with specific tools; and

(ix) Means to control flow from recirculation pump or balancing tank.

(11) **Flow.** Owners shall maintain pool recirculation flow not to exceed:

(a) Six feet per second in the valved suction or discharge side of the pump; and

(b) Ten feet per second in open discharge pipes on the pressure side of the pump or filter discharge. The recirculation flow limit does not apply to the return inlet and the last two feet of pipe leading to the inlet.

(c) The recirculation piping of the spa pool shall not inter-mix back with any companion swimming pool water.

(12) **Pumps.** Owners shall have and maintain recirculation pumps with adequate capacity to:

(a) Provide design flows and pressure for water recirculation over the entire operating filter pressure;

(b) Allow proper backwashing of filters when specified;

(c) Have self-priming capability when installed above the pool water level; and

(d) Ensure the recirculation pump system shall have a separate water treatment pump than that used for hydrotherapy spa action, unless automatic flow control valving is provided to limit filter flow to required design.

(13) **Strainers.** Where pumps precede the filter, owners shall equip pool recirculation facilities with hair and lint strainers which shall:

(a) Be located upstream of recirculation pumps;

(b) Provide strainer screen sufficiently strong to prevent collapse when clogged;

(c) Have an operable cover; and

(d) Provide valving to isolate the strainer when located below pool water level.

(14) **Valves.** Owners shall provide valves at appropriate locations to allow equipment isolation and maintenance.

(15) **Equipment rooms.** Owners shall provide equipment rooms for a spa pool with:

(a) Ten thousand gallons or more in water volume or for spa pools provided adjacent to a swimming pool at the same facility with:

(i) Enclosed pumps, disinfection equipment, filters, and other electrical and mechanical feed equipment and associated chemicals. Storage of chemicals shall conform to manufacturer requirements;

(ii) Working space and access to perform routine operation;

(iii) A forty-six-square-foot minimum floor area and provides a three-foot minimum access area to service equipment;

(iv) One floor drain or more and a floor slope to the drain at a one-fourth-inch-per-foot minimum;

(v) If below grade, ready access;

(vi) Ventilation;

(vii) Twenty foot candles or more of light measured thirty inches from the floor; and

(viii) Kept locked.

(b) Less than ten thousand gallons in water volume or for spa pools not provided at the same facility as a

swimming pool complying with subsection (15)(a)(i), (ii), (v), and (viii) of this section.

(16) **Make-up water.** Owners shall ensure a source of make-up water and associated piping at the pool:

(a) Providing sufficient quantity to replace daily pool water losses;

(b) Coming from a supply conforming with chapter 246-290 WAC;

(c) Preventing cross connections using a minimum air gap of two pipe diameters or approved backflow prevention devices between the make-up water source and the pool water or waste water; and

(d) If using a pool fill spout, not projecting greater than one inch into the space above the water surface area and shielded to not create a deck hazard.

(17) **Filters.** Owners shall equip pools with filtration equipment:

(a) Meeting the applicable NSF standards or equivalent;

(b) Using acceptable type and filter rates described under Table 040.2 of this section;

(c) Having pressure or vacuum gauges for measuring loss of head through the filter with a minimum of one gauge preceding and one gauge following the filter;

(d) Having a rate of flow indicator to measure a flow with accuracy, repeatability, and durability equivalent to flow meters meeting NSF standards; and

(e) Having means of discharging filter backwash to waste with:

(i) Discharge in a manner not creating a public nuisance;

(ii) Disposal in accordance with applicable local laws or regulations;

(iii) Minimum air gap of two pipe diameters to prevent cross-connection from waste discharge and recirculation system piping;

(iv) Discharge receptor and sufficient size piping to accept backwash water and to prevent flooding; and

(v) Ability to monitor filter effluent during backwash, that is, use of sight glass.

(f) Providing means to release air entering the filter tank on pressure filters;

(g) When cartridge filters are used:

(i) Provide with an extra set of cartridges; and

(ii) Have any bypass valves in a permanently closed position.

(h) When using pressure DE filters with separation tanks:

(i) Providing a means of air release or a lid providing a slow and safe release of pressure; and

(ii) Showing a readily visible user warning that the air release must be opened before starting the circulation pump.

TABLE 110.4

SPA POOL FILTER RATE APPLICATION RATES

| Type of Filter Media              | Rates in gpm/Square Feet |             |         |
|-----------------------------------|--------------------------|-------------|---------|
|                                   | Minimum                  |             | Maximum |
| Sand                              | —                        |             | 3       |
|                                   | 10                       |             | 15      |
| Rapid Sand or Pressure Sand       | —                        |             | 3       |
| High Rate Sand Pressure or Vacuum | Continuous Feed          | Manual Feed | 15      |
| DE                                | Pressure                 | 1.0         | 1.5     |
|                                   | Vacuum                   | 0.8         | 1.35    |
| Cartridge*                        |                          |             | .375    |

NOTE:

\*Cartridge filters shall have a nominal micron rating of twenty microns or less.

(18) **Disinfection equipment.** Owners shall provide disinfection equipment:

(a) Providing a continuous and effective disinfectant residual in the water;

(b) Using a disinfectant with an easily monitored residual;

(c) Having a design feed rate providing effective disinfection levels when the pool is in peak demand conditions;

(d) Having easily cleanable equipment and piping used to apply chemicals and with provisions to prevent undue clogging. All materials shall be resistant to action of chemicals used;

(e) Conforming to NSF standards if the disinfection equipment contains:

(i) Adjustable output rate chemical feed equipment for liquid solutions. The equipment shall:

(A) Feed under positive pressure in the recirculation system;

(B) Provide means for dosage adjustment;

(C) Have provisions to prevent hypochlorite solution siphoning when equipment is turned off. This applies when the disinfection equipment is above pool water level.

(ii) Flow through chemical feed for solid feed materials. Solid tablets or granules shall not be placed in skimmer baskets accessible to the public.

(f) Allowing hand feeding on an emergency basis only;

(g) Meeting the following conditions when using chlorine gas:

(i) Chlorine rooms shall:

(A) Be above ground level;

(B) Be constructed so all openings or partitions with adjoining rooms are sealed;

(C) Be located with consideration of prevailing winds to dissipate leaked chlorine away from the pool facility;

(D) Have door opening outward only and to the out-of-doors; and

(E) Provide a sign on the door exterior reading DANGER CHLORINE. The sign shall be large enough to be read twenty-five feet away.

(ii) Chlorine rooms shall have mechanical exhausting ventilation including:

- (A) Air inlet located as far as possible from fan intake to promote good air circulation patterns;
- (B) Minimum of one air change per minute in the chlorine room when fan is operating;
- (C) A remote switch outside the room or a door-activated switch to turn on fan before entering;
- (D) Suction for fan near the floor;
- (E) Exhaust for fan and chlorinator vent located to prevent contaminating air intake and prevent undue hazard for pool facility users; and
- (F) Screened chlorinator vent.
- (iii) Gas chlorine systems shall:
  - (A) Be vacuum injection type, with vacuum actuated cylinder regulators;
  - (B) Provide integral backflow and anti-siphon protection at the injector;
  - (C) Provide taring (net weight of cylinder gas) scales to determine chlorine weight.
  - (iv) Breathing protection available in an accessible area for the operator outside of the chlorine room including:
    - (A) Self-contained breathing apparatus designed for use in a chlorine atmosphere for working with chlorine leaks and maintained in accordance with department of labor and industries standards; or
    - (B) Provisions to substitute breathing protection at the site, if procedures can be established and documented with emergency service fire districts or other approved organization within the area for promptly responding to chlorine leaks.
    - (v) Means for automatic shutoff when pool flow is interrupted;
    - (vi) Chlorine gas cylinders shall:
      - (A) Be stored only in chlorine rooms;
      - (B) Have approved valve-stem cylinder wrench on the valve stem to shut the system down in an emergency event;
      - (C) Be properly secured to prevent tipping;
      - (D) Be tagged to indicate cylinders are empty or full; and
      - (E) Not exceed one hundred fifty pounds tare weight per cylinder. If one-ton cylinder use is desired, an engineer specializing in chlorine design shall prepare a design proposal for department consideration.

(19) **Chemical feeding equipment for pH control.** Owners applying chemicals for controlling pH through chemical feed equipment shall provide equipment with:

- (a) Adequate size and design to allow routine cleaning and maintenance;
- (b) Materials resistant to chemical action;
- (c) Means for automatic shut off when pool flow is interrupted;
- (d) Chemical feed equipment for pH control on pools ten thousand gallons or greater;
- (e) Any pool feeding with:
  - (i) Caustic soda (NaOH);
  - (ii) Carbon dioxide (CO<sub>2</sub>); or
  - (iii) Other chemicals the department determines necessary to require metered and controlled feeding.

(20) **Heaters.** Where pool heating equipment is provided, owners shall:

(a) Locate equipment so any standing pilot is readily accessible;

(b) Install equipment per NEC and UMC.

(21) **Ventilation.** Owners shall provide indoor pool facility ventilation conforming with ASHRAE pool facility standards.

(22) **Testing equipment.** Owners shall use testing equipment as noted in the water quality section under WAC 246-260-070(6).

(23) **Chemical storage.** Owners shall ensure chemical storage design and placement minimizes safety risks.

(24) **Restroom and plumbing fixtures.** Owners shall provide restrooms and plumbing facilities at pools as follows:

(a) In the spa pool facilities provided in conjunction with general use and limited use swimming pools, wading pools, or other water recreation facilities, the spa pool bathing load shall be added to the total load for consideration of plumbing fixture units;

(b) If a spa pool is the sole water recreation facility at a site, plumbing fixtures, as noted under Table 110.5, including:

(i) Flush toilets and toilet tissue in dispensers;

(ii) Shower facilities that:

(A) Deliver water at a temperature range of ninety to one hundred ten degrees Fahrenheit; and

(B) Provide single service soap in nonglass dispensers.

(iii) Sinks provided with:

(A) Tempered or hot and cold running water;

(B) Single service soap in nonglass dispensers; and

(C) Single service towels or electric hand dryer.

(iv) Hose bibs with vacuum breakers conveniently accessible to pool and within one hundred feet; and

(v) Sewage disposed in a manner approved by the department or local health officer.

(c) If owners limit the number of people within their facility to a certain number and post maximum occupancy loading, the number of plumbing fixtures may be based on the maximum occupancy.

TABLE 110.5

PLUMBING FIXTURE MINIMUM REQUIREMENTS FOR SOLE FACILITY SPA POOLS

| Spa Pools With:   | Minimum Number of Fixture Units |        |      |                       |             |
|---|---------------------------------|--------|------|-----------------------|-------------|
|   | Toilet                          | Shower | Sink | Dress-<br>ing<br>Room | Hose<br>Bib |
| 1. Limited spa use with living units* within 100 feet and less than 3 stories         | -                               | -      | -    | -                     | 1           |
| 2. Limited spa use with living units > 100 ft. and < 500 ft. and < three stories**    | 1                               | -      | 1    | -                     | 1           |
| 3. Limited spa use with living units > 500 ft. and < 1/4 mi. and/or > three stories** | 1(M)                            | 1(M)   | 1(M) | -                     | 1           |
|   | 1(F)                            | 1(F)   | 1(F) | -                     | -           |
| 4. Limited spa use with living units > 1/4 mile or general use spa pool***            | 1(M)                            | 1(M)   | 1(M) | 1(M)                  | 1           |
|   | 1(F)                            | 1(F)   | 1(F) | 1(F)                  | -           |

## NOTE:

\*"Living unit" means all the units the facility serves.

\*\*Consideration for elevators adjacent to pool may allow variance from this requirement.

\*\*\*When bathing load exceeds 40 of either sex, the fixture units provided shall conform to general use requirements for swimming pools.

(25) **Lighting.** Owners shall design and maintain pool facility lighting to:

(a) Illuminate indoor facilities, outdoor facilities used after dusk, and locker room facilities with a minimum lighting intensity maintained thirty inches above any walking surface, pool deck, or pool area of:

- (i) Thirty foot candles at indoor facilities;
- (ii) Fifteen foot candles at outdoor facilities; and
- (iii) Twenty foot candles in locker rooms.

(b) Allow lifeguards or attendants to clearly see pool areas and walking surfaces;

(c) Meet any additional lighting requirements deemed necessary by the department or local health officer;

(d) Provide protective shielding for all lighting fixtures above walking surfaces and pool areas; and

(e) Provide all indoor facilities with one or more pool-area emergency lights designed to turn on in the event of a power failure. The emergency lighting shall conform to requirements of UL standard 924.

(26) **Emergency equipment.** Owners shall provide first aid and emergency equipment readily available during operating hours as follows:

(a) Spa pool facilities ten thousand gallons or more or used in conjunction with a general use swimming pool:

(i) A telephone within the facility with a prominently displayed list of emergency medical service response numbers;

(ii) Sufficient and suitable area provided to accommodate persons within the facility requiring first aid treatment and necessary first aid equipment;

(iii) A standard sixteen unit first aid kit;

(iv) Two or more blankets reserved for emergency use;

(v) A clearly marked emergency shut off switch for shutting off all pumps, accessible to the public within twenty feet of the pool. Spa pool facilities shall also provide an audible alarm with the emergency shut off switch; and

(vi) Heater thermostat switches shall be inaccessible to bathers.

(b) Spa facilities containing less than ten thousand gallons:

(i) During the period the facility is open for use, one of the following is required:

(A) Telephone within one minute access;

(B) Alternate means of reaching emergency medical service response numbers; or

(C) Provision of an audible emergency alarm to alert others at the area of need to respond.

(ii) Comply with subsections (26)(a)(iii), (iv), (v), and (vi) of this section.

(27) **Signs.** Owners shall provide signs at pools which must convey the following conditions, but may be conveyed by any combination of words, pictures, or symbols:

(a) Prohibition of running or horseplay;

(b) Prohibition of use by persons with communicable diseases;

(c) Prohibition of use by persons under the influence of alcohol or drugs;

(d) Requirement for a cleansing shower before pool entry;

(e) Caution that persons suffering from heart disease, diabetes, or high blood pressure should consult a physician before spa pool use;

(f) Caution for women who are or may be pregnant to seek the advice of a physician regarding spa use and to limit the women's time in the pool;

(g) Persons should limit the stay in the pool to fifteen minutes at any one session;

(h) All children twelve years of age or under shall be accompanied by a responsible adult observer. No child six years of age or under should use the pool;

(i) No person seventeen years of age or under shall use the pool alone;

(j) Maximum bathing capacity of pool shall be posted;

(k) Prohibition of food or drink in the pool water;

(l) In pools where lifeguards or attendants are not present, post requirements for facility use as described under WAC 246-260-120(3); and

(m) Location of the nearest telephone or emergency notification procedure.

(28) **Food service.** When owners allow or make provisions for food service:

(a) At general use pool facilities, ensure food and beverage sale and consumption areas are separated from pool and deck. Special provisions may allow food and beverage service on the walkway provided a minimum six feet clear area is maintained between the pool and any tables or chairs provided for food service for special facility functions;

(b) At limited use spa pool facilities, prohibit food and beverage in the pool water and maintain a minimum four foot clear area between pool edge and any tables and chairs provided for food service;

(c) At general use pool facilities, prohibit alcoholic beverages;

(d) At limited use pool facilities, when alcohol is sold within the pool facility, provide an attendant at the pool area;

(e) Provide trash containers; and

(f) Prohibit glass containers in the pool facilities.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-110, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-110, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-040, filed 3/12/90, effective 4/12/90; Regulation .98.040, effective 3/11/60.]

#### WAC 246-260-120 Operation of spa pool facilities.

(1) **Operation plan.** Owners shall ensure proper operation to protect the public health, safety, and water quality by establishing practices and developing an operations manual addressing each of the following:

(a) Physical pool facility components;

(b) Personnel;

(c) Users and spectators; and

(d) Environmental conditions.

(2) **Physical components.** Owners shall provide routine checks of the physical components:

(a) Ensuring all structural facilities which the users come in contact are intact and free from undue wear or fatigue and replaced as needed;

(b) Eliminating adverse affects of water ponding on walking surfaces;

(c) Ensuring preventive maintenance on equipment essential for protection of the public health, safety, and water quality;

(d) Ensuring any necessary emergency equipment is available and in good repair;

(e) Having means for routine oxidation of spa pool water provided after heavy use, for example, super chlorination;

(f) Maintaining barrier protection;

(g) Ensuring common articles such as towels, bathing suits, bathing caps, etc., for patron use shall be sanitized before re-use if provided for patrons; and

(h) Ensuring a continuous twenty-four-hour-a-day treatment and turnover during periods of use not exceeding:

(i) Thirty minutes in lightly loaded spas; or

(ii) Twenty minutes in moderately loaded spas; or

(iii) Ten minutes in heavily loaded spas.

(iv) Turnover rates designated in subsection (2) of this section, except allowance shall be made for minor equipment maintenance and existing pools with turnover rates varying from this section may continue to operate if water quality conditions conform with WAC 246-260-070.

(3) **Required personnel.** Owners shall ensure appropriate personnel at pool facilities as follows:

(a) A lifeguard or attendant. If no lifeguard or attendant is present, pool facility use shall be subject to the following conditions:

(i) When pool is used by children twelve years of age or under, a responsible adult eighteen years of age or older shall accompany the children and be at the pool or the pool deck at all times the children use the facility;

(ii) When used by persons seventeen years of age or under, a minimum of two people at the pool facility at all times the pool is in use;

(iii) At general use pools, subdivision (a)(i) and (ii) of this subsection be posted; and

(iv) At limited use pools, subdivision (a)(i) and (ii) of this subsection be posted and ongoing provisions notifying the responsible person of the conditions.

(b) A water treatment operator.

(4) **Personnel duties and equipment.** Owners shall ensure the specific duties and equipment of designated personnel include:

(a) Lifeguards, during periods of lifeguarding, guard users of the pool facility in areas assigned;

(b) Assistant lifeguards when provided at the pool used under the following conditions:

(i) Assistant lifeguard limited to guarding responsibility of areas four feet or less in depth; and

(ii) A lifeguard overseeing the activities of the assistant lifeguard;

(c) Attendants, when provided, at pools not requiring lifeguards oversee use of the pool by bathers and provide supervision and elementary rescues such as reaching assists to bathers in need;

(d) Water treatment operator oversees that the water treatment components are adequately functioning to protect public health, safety, and water quality;

(e) Notification of responsible persons on the conditions for facility use at pool facilities not requiring lifeguards, and where no lifeguards or attendants are present. A responsible person means a person having responsibility for overseeing users seventeen years of age or under, including but not limited to a person:

(i) Renting an apartment, hotel, motel, RV camp site; or

(ii) Who is an owner or member of a condominium, home owner's association, mobile home park, or private club with a pool facility.

(f) Lifeguards, assistant lifeguards, or attendants:

(i) Wear distinguishing suit, uniform, or emblem; and

(ii) Equipped with a whistle or a signaling device.

(5) **Personnel training.** Owners shall require training for each type of personnel including:

(a) Lifeguards shall maintain current certificates in the following:

(i) Standard first aid and adult, single rescue CPR through ARC or American Heart Association; and

(ii) Advanced lifesaving, advanced lifesaving review, or lifeguard training through ARC; or

(iii) YMCA lifeguarding or crossover course through the YMCA; or

(iv) Lifeguard through the National Lifeguard Service, Canada; or

(v) Lifeguard through the National Pool and Waterpark Lifeguard Training; or

(vi) Basic lifeguard through advanced lifeguard training international; or

(vii) Other training the department determines equivalent; and

(viii) Thirty-six months after enactment of personnel training provisions of this chapter, the department shall no longer recognize training for lifeguards in advanced lifesaving or advanced lifesaving review through the ARC.

(b) Assistant lifeguards shall maintain current certificates and meet the requirements in the following:

(i) Adult, single rescue CPR through ARC or American Heart Association; and

(ii) Emergency water safety with ARC; or

(iii) Bronze medallion award through the Royal Life-saving Society of Canada; or

(iv) Shallow water lifeguard through the National Pool and Waterpark Lifeguard Training; or

(v) Other training the department determines equivalent; and

(vi) Be fourteen years of age or older.

(c) Attendant shall maintain current certificates and meet the requirements in the following:

(i) Adult, single rescue CPR through ARC or American Heart Association; and

(ii) Basic water safety with ARC; or

- (iii) Lifesaver with YMCA; or
- (iv) Bronze medallion award through the Royal Life-saving Society of Canada; or
- (v) Other training the department determines equivalent; and
- (vi) Be sixteen years of age or older.
- (d) Water treatment operator shall have specific knowledge in the provision of pool water chemistry, filtration, pumping equipment, and rules and regulations pertaining to pool facilities;
- (e) When the pool facility is using chlorine gas, an operator shall have specific training as follows:
  - (i) Proper operation of the chlorination equipment and routine maintenance procedures;
  - (ii) Basic understanding of physical and chemical properties of chlorine gas under pressure;
  - (iii) Basic understanding on use of leak detection and emergency safety equipment;
  - (iv) Basic knowledge of proper first aid procedures and response for accidental chlorine gas inhalation; and
  - (v) Six hours or more of formal instruction once every three years or three hours or more every eighteen months with certificate of training provided.
- (f) Persons shall be exempt from having a current CPR or standard first aid certificate if the person holds a current certificate in any of the following:
  - (i) Community CPR, in place of adult, single rescue CPR;
    - (ii) In place of standard first aid:
      - (A) Advanced first aid;
      - (B) First responder;
      - (C) Emergency medical technician; or
      - (D) Paramedic.
    - (iii) Other training the department recognizes as equivalent or exceeding current requirements.
  - (6) **Emergency response plan.** Owners shall ensure emergency response provisions as follows:
    - (a) In pool facilities where lifeguards or assistant lifeguards are provided:
      - (i) Lifeguard, or assistant lifeguard where provided, is located to provide a response time not to exceed thirty seconds to all pool users;
      - (ii) Based on, but not limited to, the following:
        - (A) Pool depth;
        - (B) Line of sight;
        - (C) Bather load;
        - (D) Training procedures;
        - (E) Emergency procedures; and
        - (F) Lifeguard rotation.
      - (iii) Emergency response drills to meet the response time including:
        - (A) Drills two or more times each year;
        - (B) Testing documentation.
    - (b) In pool facilities where no lifeguard or assistant is provided:
      - (i) Posting and ongoing notification and enforcement of conditions of pool use described under subsection (3) of this section;
      - (ii) Enforcement of conditions by owner and authorized personnel;

(iii) Emergency equipment specified under WAC 246-260-110(26) readily available during operating hours.

- (c) In pool facilities where chlorine gas is used:
  - (i) Annual emergency drills; and
  - (ii) Identification of the location of accessible chlorine cylinder repair kits.

(7) **Bather use.** Owners shall establish rules of conduct for facility users to ensure health and safety. The rules shall include signage noted under WAC 246-260-110(27) of this chapter.

(8) **Environmental conditions.** Owners shall monitor various environmental conditions affecting the facility or the user and take appropriate action in response to these factors, including electrical storms, fog, wind, visibility problems, etc.

(9) **Closure.** Owners shall close the facility when the facility or portion thereof presents an unhealthful, unsafe, or unsanitary condition. These conditions would include lack of compliance with the water quality or operation requirements as detailed under WAC 246-260-070 and 246-260-120.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-120, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-120, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-045, filed 3/12/90, effective 4/12/90.]

**WAC 246-260-130 Wading pool design, construction, and equipment.** (1) **Location.** Owners shall locate pools to:

- (a) Minimize pollution by dust, smoke, soot, and other undesirable substances;
- (b) Eliminate pollution from surrounding surface drainage; and

(c) Ensure pump house, trees, and other structures are located fifteen feet or more from the pool or provide barriers or other means to prevent ready access from the structures. Structure shall not be construed to include:

- (i) Building walkways above the second story or roofs of any building structure; or
- (ii) Any barriers provided to prevent unauthorized pool access, for example, fencing.

(2) **Materials.** Owners shall use only structure and equipment materials which are nontoxic, durable, inert, impervious to water, and easily cleanable.

(3) **Walking surfaces.** Owners shall design and maintain pool walking surfaces:

(a) Uniformly sloping away from the pool or pools a minimum of one-fourth inch per foot and a maximum of one-half inch per foot;

(b) Of a nonslip finish not presenting a tripping hazard;

(c) Equipped with sufficient drains to prevent standing water;

(d) Of easily cleanable, impervious finishes;

(e) Four feet or more in width;

(f) At facilities with swimming pools fifteen hundred square feet or more associated with the wading pool, provide a minimum of sixteen square feet per bather; and

(g) In conformance with department-established guidelines for any resilient artificial surface.

(4) **Barriers.** Owners shall provide barrier protection to prevent unauthorized access.

(a) A barrier shall be sixty inches or more in height and:

(i) Shall not allow passage of a four-inch diameter sphere;

(ii) If it has horizontal members that are spaced less than forty-five inches between the tops of the horizontal members, shall have spaces between the vertical members no greater than a width of one and three-quarter inches (see Figure 130.1); or

(iii) If it has horizontal members that are spaced at, or more than, forty-five inches between the tops of the horizontal members, shall have spaces between the vertical members no greater than a four-inch width (see Figure 130.2); and

(iv) Shall have lockable gates and entrances provided with a self-closing, self-latching mechanism fifty-four inches or more from the ground with a clear space fifty inches deep on the latch side of the door to position a wheelchair. When a latching mechanism is provided at any lower height, the latching mechanism shall be of a type remaining continuously locked, and only opening with the use of a key or other access control system.

(b) Restricted area service entrances shall be exempt from door or gate requirements providing no public access is available;

(c) Lifeguarded pools are not required to have a self-closing, self-latching gate during the period a pool is in use. Facility gates shall be closed and locked during nonuse periods; and

(d) An entrance to the pool area which shall not serve as a required exit from another part of a building when there is a conflict with other codes or regulations.

(5) **Pool surfaces.** Owners shall ensure pool surfaces with:

(a) Materials complying with subsection (2) of this section;

(b) Water tight and nonabrasive construction;

(c) White or light color finish not obscuring the view of objects or surfaces;

(d) Surfaces not causing cutting, pinching, puncturing, entanglement, or abrasion hazard under casual contact; and

(e) Construction tolerances conforming with current NSPI public pool standards.

(6) **Wading pool floor and wall dimensional design.** Owners shall ensure pool dimensional designs for floors and walls provide for safety, circulation, and water quality including, but not limited to:

(a) All corners formed by intersection of walls with floor shall be coved;

(b) Uniform pool floor slopes not exceeding one foot of drop in twelve feet of run.

(7) **Wading pool entry and exit.** Owners shall provide means of entry and exit on all pools including one of the following:

(a) Stairs when provided meeting the following construction requirements:

(i) Nonslip tread finish;

(ii) Contrasting color stair tread edges clearly visible to users;

(iii) Handrails with the leading edge for stairs at entry/exit being neither eighteen inches or more beyond nor eight inches or more inside (horizontally) the vertical plane of the bottom riser;

(iv) Riser treads with a minimum unobstructed, horizontal, ten-inch tread depth and minimum two-hundred-forty-inch surface area;

(v) Riser height uniform and seven and one-half inches or less, except last step leading into pool may be less than uniform height.

(b) Shallow pool entry seven and one-half inches or less in depth;

(c) Ramp entry into the pool meeting the following construction requirements:

(i) Handrail extending over the deck edge and extending to the bottom of the ramp for entering and leaving the wading pool;

(ii) Ramp edges protruding into the pool of contrasting color;

(iii) Ramp slope not to exceed one foot in seven feet.

(d) Designs permitting entry and exit for impaired or handicapped persons are encouraged.

(8) **Turnover.** Owners shall ensure pools turn over entire pool water volume in three hours or less and:

(a) Where wading pools are recirculated jointly with swimming pools, means to ensure efficient turnover and treatment are maintained;

(b) Exceptions to recirculation requirements may be made for flow through pools in the following conditions:

(i) Where water supply is sufficient to provide the same turnover period specified for recirculation pools;

(ii) The water supply source meets the quality requirements and is subject to a disinfection method as outlined under WAC 246-260-070(3);

(iii) The introduction of fresh treated pool water is accomplished by the same type of inlet and outlet design required for recirculation pools; and

(iv) The pool water quality complies with WAC 246-260-070.

(9) **Pool depth markings.** Owners shall provide depth markings:

(a) Plainly marking the water depth in feet on the horizontal surface of the coping or deck edge;

(b) Located on the coping or deck within eighteen inches of the water edge and positioned to be read while standing on the deck facing the water;

(c) Which are slip resistant;

(d) Placed at the maximum and minimum water depths;

(e) Spaced at intervals not exceeding twenty-five feet;

(f) Uniformly arranged on both sides and ends of the pool; and

(g) With a four inch minimum height.

(10) **Bather load.** Owners shall ensure maximum number of bathers permitted in the wading pool facility at any one time not exceed one bather per seven square feet.

(11) **Inlets.** Owners shall provide pool inlets:

(a) Submerged and located to produce uniform water and chemical circulation throughout the pool; and

(b) Located on the bottom of pools twenty-five hundred square feet or more, unless otherwise justified by the design engineer to the department's or local health officer's satisfaction.

(12) **Outlets.** Owners shall provide pool outlets with:

(a) Overflow and main drain grating systems each designed to carry one hundred percent of the total recirculation filter flow and main drain piping designed to carry fifty percent or more of total recirculation filter flow;

(b) Overflow outlets that maintain:

(i) A minimum of sixty percent of filter recirculation flow at all times; and

(ii) An overflow channel which may be used on any pool and required on pools twenty-five hundred square feet or more on the pool perimeter to promote uniform circulation and skimming action of the upper water layer with:

(A) A design preventing all matter entering the channel from returning to the pool;

(B) Dimensions minimizing the hazard for bathers, such as catching arms or feet;

(C) One one-hundredth of a foot slope per foot or more;

(D) Drains sufficiently spaced and sized to collect and remove overflow water to return line and filter, where applicable; and

(E) Size sufficient to carry one hundred percent of the recirculation flow plus the surge flow equivalent to one-

fifth of the balancing tank expressed in gallons per minute.

(iii) Skimmers in lieu of pool overflow channels up to twenty-five hundred square feet if:

(A) Weir provided in skimmer has a maximum flow rate through skimmer not exceeding four gpm per inch of weir;

(B) Devices are recessed in the pool wall so no part protrudes beyond the plane of the wall into the pool;

(C) The skimmer is equipped with a device to prevent air lock in the recirculation suction line, such as, an equalizer line;

(D) The skimmer is equipped with a removable and cleanable screen designed to trap large solids;

(E) Automatically adjustable and operates freely through all designed loading rates. Displacement shall be computed at ten gallons per bather.

(c) Main drains in all pools with:

(i) Location at the pool's low points;

(ii) A minimum of two main drains spaced:

(A) Twenty feet or less apart nor closer than six feet; or

(B) As far as possible from each other in pools seven feet or less linear floor distance.

(iii) Total open area of grates sized to prevent a suction or entrapment hazard dangerous to user;

(iv) Grates on drains with:

(A) Maximum flow of one and one-half feet per second; or

(B) Net outlet area four times or more the area of the discharge pipe.

(v) Openings not allowing a sphere over one-half inch in diameter to pass;

(vi) Grates designed to withstand forces of users;

(vii) Grates removable only with specific tool; and

(viii) Means to control flow from recirculation pump or balancing tank.

(13) **Flow.** Owners shall maintain pool recirculation flow not to exceed:

(a) Six feet per second in valved suction or discharge side of the pump; and

(b) Ten feet per second in open discharge pipes on the pressure side of the pump or filter discharge. The recirculation flow limit does not apply to the return inlet and the last two feet of pipe leading to the inlet.

(14) **Balancing tanks.** Owners with overflow channels requiring balancing tanks shall:

(a) Maintain volume equivalent to seven times maximum bathing load expressed in gallons; and

(b) Increase capacity as necessary to provide volume for make-up water and to prevent air lock in the pump suction line.

(15) **Pumps.** Owners shall have and maintain wading pool recirculation pumps with adequate capacity to:

(a) Provide design flows and pressure for water recirculation over the entire operating filter pressure;

(b) Allow proper back washing of filters when specified; and

(c) Have self-priming capability when installed above pool water level.

(16) **Strainers.** Where pumps precede the filter, owners shall equip pool recirculation facilities with hair and lint strainers which shall:

- (a) Be located upstream of recirculation pumps;
- (b) Provide strainer screen sufficiently strong to prevent collapse when clogged;
- (c) Have an openable cover; and
- (d) Provide valving to isolate the strainer when located below pool water level.

(17) **Valves.** Owners shall provide valves at appropriate locations to allow isolation and maintenance of equipment.

(18) **Equipment rooms.** Owners shall provide equipment rooms:

(a) Enclosing pumps, disinfection equipment, filters and other electrical and mechanical feed equipment and associated chemicals. Chemical storage shall conform to manufacturer requirements;

(b) Providing work space and access to perform routine operations;

(c) With a forty-six-square-foot minimum floor area and provide a three-foot minimum of access area to service equipment;

(d) With one floor drain or more and a floor slope to the drain at a one-fourth-inch-per-foot minimum;

(e) Ready access if below grade;

(f) Ventilation;

(g) Twenty foot-candles or more of light measured thirty inches from the floor; and

(h) Kept locked.

(19) **Make-up water.** Owners shall ensure a source of make-up water and associated piping at the pool:

(a) Providing sufficient quantity to replace daily pool losses;

(b) Coming from a supply conforming with chapter 246-290 WAC;

(c) Preventing cross connections using a minimum air gap of two pipe diameters or approved backflow prevention devices between the make-up water source and the pool water or waste water; and

(d) If using a pool fill spout, not projecting greater than one inch into the space above the water surface area and shielded to not create a deck hazard.

(20) **Filters.** Owners shall equip pools with filtration equipment:

(a) Meeting the applicable standards of NSF or equivalent;

(b) Using acceptable type and filter rates described under Table 080.1 of this section;

(c) Having pressure or vacuum gauges for measuring loss of head through the filter with a minimum of one gauge preceding and one gauge following the filter;

(d) Having a rate of flow indicator to measure flow which has accuracy, repeatability, and durability equivalent to flow meters meeting NSF standards; and

(e) Having a means of discharging filter backwash to waste with:

(i) Discharge in a manner not creating a public nuisance;

(ii) Disposal in accordance with applicable local laws or regulations;

(iii) Minimum air gap of two pipe diameters to prevent cross-connection from waste discharge and recirculation system piping;

(iv) Discharge receptor and piping of sufficient size to accept backwash water and prevent flooding; and

(v) Ability to monitor filter effluent during backwash, that is, use of a sight glass.

(f) Providing means to release air entering the filter tank on pressure filters;

(g) When cartridge filters are used:

(i) Provide with an extra set of cartridges; and

(ii) Have any bypass valves in a permanently closed position.

(h) When using pressure DE filters with separation tanks:

(i) Provide means of air release or a lid providing a slow and safe release of pressure; and

(ii) Show a readily visible user warning that the air release must be opened before starting the circulation pump.

TABLE 130.3

TYPE AND RANGES OF FILTERS FOR WADING POOLS

| Range of Acceptable Filter Rate<br>Type of Filter Media                             | Expressed in gpm/Square Feet |                |       |
|---|------------------------------|----------------|-------|
|   | Minimum                      | Maximum        |       |
| Sand  |                              |                |       |
| Rapid Sand and Pressure Sand<br>Wading Pools less than<br>10,000 gallons            | —                            | 3              |       |

| Vacuum  | 0.8                          | 1.0            | 2.0   |
| Cartridge**   |                              |                | 0.375 |

NOTE:

\*Filters sized at maximum application rate shall be equipped with flow control valves to maintain flow equilibrium to account for varying filter pressures and consequent flow production.

\*\*Cartridge filters shall have a nominal micron rating of twenty microns or less.

(21) **Disinfection equipment.** Owners shall provide disinfection equipment:

(a) Providing a continuous and effective disinfectant residual in the water;

(b) Using a disinfectant with an easily monitored residual;

(c) Having a design feed rate providing effective disinfection levels when the pool is in peak demand conditions;

(d) Having easily cleanable equipment and piping used to apply chemicals and with provisions to prevent undue clogging. All materials shall be resistant to action of chemicals used;

(e) Conforming to NSF standards if the disinfection equipment has:

(i) Adjustable output rate chemical feed equipment for liquid solutions. When using this equipment, it shall:

(A) Feed under positive pressure in the recirculation system;

(B) Provide means for dosage adjustment;

(C) Have provisions to prevent hypochlorite solution siphoning when equipment is turned off, this applies when the disinfection equipment is above pool water level.

(ii) Flow through chemical feed for solid feed material. Solid tablets or granules shall not be placed in skimmer baskets accessible to the public.

(f) Allowing hand feeding on an emergency basis only;

(g) Meeting the following conditions when using chlorine gas:

(i) Chlorine rooms shall:

(A) Be above ground level;

(B) Be constructed so all openings or partitions with adjoining rooms are sealed;

(C) Be located with consideration of prevailing winds to dissipate leaked chlorine away from the pool facility;

(D) Have door opening outward only and to the out-of-doors;

(E) Provide a sign on the door exterior reading DANGER CHLORINE. The sign shall be large enough to be read twenty-five feet away.

(ii) Chlorine rooms shall have mechanical exhausting ventilation including:

(A) Air inlet located as far as possible from fan intake to promote good air circulation patterns;

(B) Minimum of one air change per minute in the chlorine room when fan is operating;

(C) A remote switch outside the room or a door-activated switch to turn on fan before entering;

(D) Suction for fan near the floor;

(E) Exhaust for fan and chlorinator vent located to prevent contaminating air intake and prevent undue hazard for the pool facility users; and

(F) Screened chlorinator vent.

(iii) Gas chlorine systems shall:

(A) Be vacuum injection type, with vacuum-actuated cylinder regulators;

(B) Provide integral backflow and anti-siphon protection at the injector; and

(C) Provide taring (net weight of cylinder gas) scales for determining chlorine weight.

(iv) Breathing protection available in an accessible area for the operator outside of the chlorine room including:

(A) Self-contained breathing apparatus designed for use in a chlorine atmosphere for working with chlorine leaks and maintained in accordance with department of labor and industries standards; or

(B) Provisions to substitute breathing protection at the site, if procedures can be established and documented with emergency service fire districts or other approved organization within the area for promptly responding to chlorine leaks.

(v) Means for automatic shutoff when pool flow is interrupted; and

(vi) Chlorine gas cylinders shall:

(A) Be stored only in chlorine rooms;

(B) Have approved valve-stem cylinder wrench on the valve stem to shut the system down in an emergency event;

(C) Be properly secured to prevent tipping;

(D) Be tagged to indicate cylinders are empty or full; and

(E) Not exceed one hundred fifty pounds tare weight per cylinder. If one-ton cylinder use is desired, an engineer specializing in chlorine design shall prepare a design proposal for department consideration.

(22) **Chemical feeding equipment for pH control.** Owners applying chemicals for controlling pH through chemical feed equipment shall provide equipment with:

(a) Adequate size and design to allow routine cleaning and maintenance;

(b) Materials resistant to chemical action;

(c) Means for automatic shut off when pool flow is interrupted;

(d) Chemical feed equipment for pH control on pools fifty thousand gallons volume or greater;

(e) Any pool feeding with:

(i) Caustic soda (NAOH);

(ii) Carbon dioxide (CO<sub>2</sub>); or

(iii) Other chemicals the department determines necessary to require metered and controlled feeding.

(23) **Heaters.** Where pool heating equipment is provided, owners shall:

(a) Locate equipment so any standing pilot is readily accessible; and

(b) Install equipment per NEC and UMC.

(24) **Ventilation.** Owners shall provide indoor pool facility ventilation conforming with ASHRAE pool facility standards.

(25) **Testing equipment.** Owners shall use testing equipment as noted in the water quality section under WAC 246-260-070(6).

(26) **Chemical storage.** Owners shall ensure chemical storage design and placement minimizes safety risks.

(27) **Restroom and plumbing fixtures.** Owners shall provide restroom and plumbing facilities at pools as follows:

(a) Where wading pool facilities are provided in conjunction with general use and limited use swimming pools, spas, or other water recreation facilities, the wading pool bathing load shall be added to the total load for consideration of plumbing fixture units;

(b) If a wading pool is the sole water recreation facility at a site, plumbing fixtures as described under Table 130.4 including:

(i) Flush toilets and toilet tissue in dispensers;

(ii) Shower facilities that:

(A) Deliver water at a temperature range of ninety to one hundred ten degrees Fahrenheit;

(B) Provide single service soap in nonglass dispensers.

(iii) Sinks provided with:

(A) Tempered or hot and cold running water;

(B) Single service soap in nonglass dispensers; and

(C) Single service towels or electric hand dryers.

(iv) Hose bibs with vacuum breakers conveniently accessible to pool and within one hundred feet; and

(v) Sewage disposed of in a manner approved by the department or local health officer.

TABLE 130.4

## PLUMBING FIXTURE MINIMUM REQUIREMENTS FOR SOLE FACILITY WADING POOLS

| Wading Pools with:   | Toilets      | Sinks        | H.B.   | Showers      |
|--|--------------|--------------|--------|--------------|
| 1. Limited use wading pools with living units* within 100 feet and less than 3 stories                 | -            | -            | 1      | -            |
| 2. Limited use wading pools with living units >100 feet but <500 feet and less than 3 stories.**       | 1            | 1            | 1      | -            |
| 3. Limited use wading pools with living units >500 feet but <1/4 mile and/or with 3 or more stories.** | 1(M)<br>1(F) | 1(M)<br>1(F) | 1<br>- | -<br>-       |
| 4. Limited use wading pools with living units >1/4 mile or general use wading pools.***                | 1(M)<br>1(F) | 1(M)<br>1(F) | 1<br>- | 1(M)<br>1(F) |

## NOTE:

\*"Living Units" means all units associated with limited use facilities intended to be served.

\*\*Consideration for elevators adjacent to pool may allow variance from this requirement.

\*\*\*When wading pool bathing load exceeds 40 of either sex, the fixture units provided shall conform with the general use requirements for swimming pools.

(c) If owners limit the number of people within their facility to a certain number and post maximum occupancy loading, the number of plumbing fixture units may be based on that maximum occupancy.

(28) **Lighting.** Owners shall design and maintain pool facility lighting to:

(a) Illuminate indoor facilities, outdoor facilities used after dusk, and locker room facilities with a minimum lighting intensity maintained thirty inches above any walking surface, pool deck, or pool area of:

- (i) Thirty foot-candles at indoor facilities;
- (ii) Fifteen foot-candles at outdoor facilities;
- (iii) Twenty foot-candles in locker rooms.

(b) Allow lifeguards or attendants to clearly see pool areas and walking surfaces;

(c) Meet any additional lighting requirements deemed necessary by the department or local health officer;

(d) Provide protective shielding for all lighting fixtures above walking surfaces and pool areas;

(e) Provide all indoor facilities with one or more pool area emergency lights designed to turn on in the event of a power failure. The emergency lighting shall conform to requirements of UL standard 924.

(29) **Signs.** Owners shall provide signs at pools which must convey the following conditions, but may be conveyed by any combination of words, pictures, or symbols:

- (a) Prohibition of running or horseplay;
- (b) Prohibition of use by persons with communicable diseases;
- (c) Prohibition of use by persons under the influence of alcohol or drugs;

(d) Prohibition of food or drink in the pool water;

(e) In pools where lifeguards or attendants are not present, post requirements for facility use as required under WAC 246-260-140(3).

(30) **Food service.** When food service is provided, owners shall:

(a) At general use pool facilities, ensure food and beverage sale and consumption areas are separated from pool and deck. Special provisions may be made for allowing food and beverage service on the walkway provided a minimum six feet clear area is maintained between the pool edge and any tables or chairs provided for special facility functions;

(b) At limited use pool facilities, prohibit food and beverage in the pool water and maintain a minimum four foot clear area between pool edge and any tables and chairs provided for food service;

(c) Provide trash containers;

(d) Prohibit glass containers in the pool facility.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-130, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-130, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-080, filed 3/12/90, effective 4/12/90; Regulation .98.080, effective 3/11/60.]

**WAC 246-260-140 Operation of wading pool facilities.** (1) **Operation plan.** Owners shall ensure proper operation to protect the public health, safety, and water quality by establishing practices and developing an operations manual addressing each of the following:

- (a) Physical pool facility components;
- (b) Personnel;
- (c) Users and spectators;
- (d) Environmental conditions.

(2) **Physical components.** Owners shall provide routine checks of the physical components:

(a) Ensuring all structural facilities the users come in contact are intact and free from undue wear or fatigue and replaced as needed;

(b) Eliminating adverse effects of water ponding on walking surfaces;

(c) Ensuring preventative maintenance on equipment essential for protection of the public health, safety, and water quality;

(d) Maintaining barrier protection;

(e) Ensuring treatment turnover is continuous twenty-four hours a day during seasons or periods of use and does not exceed three hours provided:

(i) Allowances shall be made for minor equipment maintenance;

(ii) Pools previously approved with turnover rates varying from subsection (2)(e)(i) of this section may continue to operate if water quality conditions conform with WAC 246-260-070.

(3) **Required personnel.** Owners shall ensure appropriate personnel at pool facilities as follows:

(a) A water treatment operator oversees that the water treatment components are adequately functioning to protect public health, safety, and water quality; and

(b) At pool facilities with no lifeguards, assistant lifeguards, or attendants, use shall be subject to the following conditions:

(i) When the pool is used by children twelve years of age or under, a responsible adult eighteen years of age or older shall accompany the children and be at the pool or pool deck at all times the children use the facility;

(ii) When used by persons seventeen years of age or under, a minimum of two people are at the pool facility at all times the pool is in use;

(iii) At general use pools, subdivision (b)(i) and (ii) of this subsection be posted; and

(iv) At limited-use pools, subdivision (b)(i) and (ii) of this subsection be posted and ongoing provisions notifying the responsible person of the conditions.

(4) **Personnel duties and equipment.** Owners shall ensure the specific duties and equipment of designated personnel include:

(a) Lifeguards, during periods of lifeguarding, guard pool facility users in areas assigned;

(b) Assistant lifeguards when provided at the pool used under the following conditions:

(i) Assistant lifeguard limited to guarding responsibility of areas four feet or less in depth; and

(ii) A lifeguard overseeing the activities of the assistant lifeguard.

(c) Attendants when provided oversee use of the pool by the bathers and provide supervision and elementary rescues, such as reaching assists to bathers in need;

(d) Water treatment operators oversee, as needed, the water treatment components are functioning adequately to protect public health, safety, and water quality;

(e) Notification of responsible persons on the conditions for use at pool facilities not requiring lifeguards, and for which no lifeguards or attendants are present. A responsible person means a person having responsibility for overseeing users, including but limited to a person:

(i) Renting an apartment, hotel, motel, RV camp site; or

(ii) Who is an owner or member of a condominium, homeowner's association, mobile home park, or private club with a pool facility.

(f) Lifeguards, assistant lifeguards, or attendants:

(i) Wear distinguishing suit, uniform, or emblem; and

(ii) Equipped with a whistle or a signaling device.

(5) **Personnel training.** Owners shall require training for each type of personnel including:

(a) Lifeguards shall maintain a current certificate in the following:

(i) Standard first aid and adult, single rescue CPR through ARC or American Heart Association; and

(ii) Advanced lifesaving, advanced lifesaving review, or lifeguard training through ARC; or

(iii) YMCA lifeguarding or crossover course through the YMCA; or

(iv) Lifeguard through the National Lifeguard Service, Canadian; or

(v) Lifeguard through National Pool and Waterpark Lifeguard Training; or

(vi) Basic lifeguard through advanced lifeguard training international; or

(vii) Other training the department determines equivalent; and

(viii) Thirty-six months after enactment of the personnel training provisions of this chapter, the department shall no longer recognize training for lifeguards in advanced lifesaving, or advanced lifesaving review through the ARC.

(b) Assistant lifeguards shall maintain current certificates and meet the requirements in the following:

(i) Adult, single rescue CPR through ARC or American Heart Association; and

(ii) Emergency water rescue with ARC; or

(iii) Bronze medallion award through the Royal Lifesaving Society of Canada; or

(iv) Shallow water lifeguard through the National Pool and Waterpark lifeguard training; or

(v) Other training the department determines equivalent; and

(vi) Be fourteen years of age or older.

(c) Attendant shall maintain current certificates and meet the requirements in the following:

(i) Adult, single rescue CPR through ARC or the American Heart Association; and

(ii) Basic water safety with ARC; or

(iii) Other training the department determines equivalent; and

(iv) Be sixteen years of age or older.

(d) Water treatment operator shall have specific knowledge in provision of pool water chemistry, filtration, pumping equipment and rules and regulations pertaining to pool facilities;

(e) When pool facility is using chlorine gas, an operator shall have specific training as follows:

(i) Proper operation of the chlorination equipment and routine maintenance procedures;

(ii) Basic understanding of physical and chemical properties of chlorine gas under pressure;

(iii) Basic understanding on use of leak detection and emergency safety equipment;

(iv) Basic knowledge of proper first aid procedures and response for accidental inhalation of chlorine gas;

(v) Six hours or more of formal instruction once every three years or three hours or more every eighteen months with certificate of training provided.

(f) Persons shall be exempt from having current CPR or standard first aid certificates if the persons hold current certificates in any of the following:

(i) Community CPR in place of adult, single rescue CPR;

(ii) In place of standard first aid:

(A) Advanced first aid;

(B) First responder;

(C) Emergency medical technician; or

(D) Paramedic.

(iii) Other training the department recognizes as equivalent or exceeding current requirements.

(6) **Bather use.** Owners shall establish conduct rules for users to ensure health and safety. The rules shall include signage noted under WAC 246-260-130(29).

(7) **Environmental conditions.** Owners shall monitor various environmental conditions affecting the facility or

the user and take appropriate action in response to these factors, including electrical storms, visibility problems, etc.

(8) **Closure.** Owners shall close the facility when the facility or portion thereof presents an unhealthy, unsafe, or unsanitary condition. These conditions include lack of compliance with the water quality or operation requirements as detailed under WAC 246-260-070 and 246-260-140.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-140, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-140, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-085, filed 3/12/90, effective 4/12/90.]

**WAC 246-260-150 Spray pool design, construction, and equipment.** (1) **Location.** Owners shall locate pools to:

(a) Minimize pollution by dust, smoke, soot, and other undesirable substances; and

(b) Eliminate pollution from surrounding surface drainage.

(2) **Materials.** Owners shall only use structure and equipment materials which are nontoxic, durable, inert, impervious to water and easily cleanable.

(3) **Walking surfaces.** Owners shall design and maintain walking surfaces:

(a) Uniformly sloping away from the pool or pools a minimum of one-fourth inch per foot and a maximum of one-half inch per foot;

(b) Of a nonslip finish not presenting a tripping hazard;

(c) Equipped with sufficient drains to prevent standing water;

(d) Of easily cleanable impervious finishes;

(e) Four feet or more in width, extending around fifty percent or more of the spray pool;

(f) In conformance with department-established guidelines for any resilient artificial surfaces.

(4) **Pool structure.** Owners shall ensure general pool requirements include:

(a) Pool surfaces with nonslip finishes and impervious to water;

(b) Uniform pool floor slopes not to exceed one foot in twelve feet;

(c) Provision for using an approved potable water supply. Water shall not be recirculated, but drain to waste after use in the spray pool; or

(d) If a spray pool facility is used in conjunction with a swimming pool over thirty thousand gallons in volume, recirculated swimming pool water may be used in the spray pool if:

(i) Means for treatment of the water draining from the spray pool is provided including filtration, disinfection, and recirculation through a separate spray pool treatment system;

(ii) Such system is sized on the maximum introduction rate of water from the recirculated swimming pool water;

(iii) Treated spray pool water is introduced into the swimming pool recirculation system;

(iv) Proper safeguards are employed to prevent interruption of proper swimming pool facility operation; and

(v) Design and construction of treatment equipment and associated facilities conform with swimming pool design requirements.

(5) **Inlets and outlets.** Owners shall provide pool inlets and outlets with:

(a) Spray nozzles not inflicting damage to users. Maximum flow through nozzles within close proximity to bathers shall not exceed fifteen fps at the nozzle;

(b) The drain located at the low point of the pool and with sufficient capacity and design to prohibit water accumulation in the pool. The outlet drain shall:

(i) Be located at the low point of the pool;

(ii) Have openings not allowing a sphere over one-half inch in diameter to pass;

(iii) Use grate design to withstand forces of users;

(iv) Have grates removable only with specific tools; and

(v) On grates attached to recirculating pumps, have:

(A) Total open area of grates sized to prevent a suction hazard dangerous to the user;

(B) Grates on drains with a maximum flow of one and one-half feet per second, or net area of outlet four times or more the discharge pipe area.

(6) **Valves.** Owners shall provide valves at appropriate locations to allow isolation and maintenance of equipment.

(7) **Make-up water.** Owners shall ensure a source of make-up water and associated pool piping:

(a) Coming from a supply conforming with chapter 246-290 WAC;

(b) Preventing cross connections using a minimum air gap of two pipe diameters or approved backflow prevention devices between the make-up water source and the spray pool water or waste water.

(8) **Waste water discharge.** Water used in a pool shall be disposed of in a manner acceptable to the local health jurisdiction.

(9) **Signs.** Owners shall provide signs at pools about general requirements for facility use. Owners may use any combination of words, pictures, or symbols conveying the prohibition of the following conditions:

(a) Running or horseplay;

(b) Use by persons with communicable diseases;

(c) Use by persons under the alcohol or drug influence;

(d) Food or drink in pool water.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-150, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-150, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-090, filed 3/12/90, effective 4/12/90; Regulation .98.090, effective 3/11/60.]

**WAC 246-260-160 Operation of spray pool facilities.** (1) **Operation plan.** Owners shall ensure proper operation to protect the public health, safety, and water quality. An operations plan shall address each of the following:

(a) Physical pool facility components;

(b) Personnel;

- (c) Users and spectators;
- (d) Environmental conditions.
- (2) **Physical components.** Owners shall provide routine checks of the physical components:
  - (a) Ensuring all structural facilities which the users come in contact are intact and free from undue wear or fatigue and replace as needed;
  - (b) Eliminating adverse effects of water ponding on walking surfaces;
  - (c) Ensuring preventative maintenance on equipment essential for protection of the public health, safety, and water quality.
- (3) **Required personnel and duties.** Owners shall provide personnel to oversee the spray pool facility ensuring proper operation and maintenance. When the facility is using recirculated water, a water treatment operator shall oversee water quality and equipment operation.
- (4) **Bather use.** Owners shall establish rules of conduct for users to ensure health and safety. The rules shall include conditions noted under WAC 246-260-150(9).
- (5) **Environmental conditions.** Owners shall monitor various environmental conditions affecting the facility or the user and take appropriate action in response to these factors, including electrical storms, visibility problems, etc.

(6) **Closure.** Owners shall close the facility when the facility or portion thereof presents an unhealthy, unsafe, or unsanitary condition. The conditions include lack of compliance with the water quality and/or operation requirements as detailed under WAC 246-260-070 and 246-260-160.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-160, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-160, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-095, filed 3/12/90, effective 4/12/90.]

**WAC 246-260-200 Water recreation industry requirements.** All owners of companies selling swimming pools, spa pools, wading pools or spray pools, and their associated facilities regulated by chapter 246-260 WAC shall furnish each purchaser a complete set of operating instructions and shall include detailed information on the safe use of the facilities including:

- (1) Proper treatment methods to ensure water quality and sanitation;
- (2) Proper safety procedures to reduce injury risks;
- (3) Specific safety instructions for use at facilities having water temperatures ninety-five degrees Fahrenheit or more on the health effects of hot water and a specific caution and explanation on the health effects of hot water on pregnant women and young children.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-200, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-200, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-100, filed 3/12/90, effective 4/12/90; Regulation .98.100, effective 3/11/60.]

**WAC 246-260-210 Technical advisory committee.** (1) The department shall appoint a technical advisory committee to assist in the following:

- (a) Reviewing and drafting of proposed rules;
- (b) Development of guidelines for use of new products, equipment, procedures, and periodic program review.
- (2) The technical advisory committee shall have meetings whenever the department determines necessary.
- (3) The technical advisory committee water recreation pool facility membership shall include representation from the following:
  - (a) General use pool facility;
  - (b) Limited use pool facility;
  - (c) Local representative from the spa and pool industry (NSPI);
  - (d) Washington recreation and parks association representative;
  - (e) Engineer or architect design consultant;
  - (f) Eastern and western Washington local environmental health authority representatives;
  - (g) Department representative;
  - (h) RWCF owner representative, as appropriate, as described under chapter 246-262 WAC.
- (4) The technical advisory committee may appoint subcommittees as the committee determines appropriate to address specific issues.
- (5) The department shall maintain minutes of meetings.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-210, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-210, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-102, filed 3/12/90, effective 4/12/90.]

**WAC 246-260-240 Substitution.** The board authorizes the department to allow substitutions of equipment, facilities, or procedures required by chapter 246-260 WAC when, in the sole determination of the department, data and/or research provide sufficient evidence that such substitution is equivalent to the requirement and will adequately provide for the protection of the public health and safety of persons using the water recreation facility.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-240, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-240, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-120, filed 3/12/90, effective 4/12/90; Order 715, § 248-98-120, filed 9/14/72.]

**WAC 246-260-250 Enforcement.** (1) The department or, if enforcement responsibility is assigned under a joint plan of operation in WAC 246-260-020, the local health officer:

- (a) Shall enforce chapter 246-260 WAC rules; or
- (b) May refer cases within the department's or local health officer's jurisdiction to the local prosecutor's office or the office of the attorney general, as appropriate.

(2) When a water recreation facility (WRF) is in violation of chapter 70.90 RCW provisions or chapter 246-260 WAC rules, appropriate enforcement action may be initiated by the department, local health officer, local

prosecutor's office, or office of the attorney general. Enforcement actions may include any one or a combination of the following:

(a) Informal administrative conferences to explore facts and resolve problems, convened at the request of the department, local health officer, or owner;

(b) Orders directed to the water recreation facility (WRF) owner and/or operator and/or the person causing or responsible for the violation of the chapter 246-260 WAC rules;

(c) Imposition of civil penalties of up to five hundred dollars per violation per day as authorized under RCW 70.90.200;

(d) Denial, suspension, or revocation of operating permits; and

(e) Civil or criminal action initiated by the local prosecutor's office or by the office of the attorney general.

(3) Orders authorized under this section include, but are not limited to the following:

(a) Requiring corrective measures necessary to effect compliance with chapters 246-260 WAC or 70.90 RCW. Such orders may or may not include a compliance schedule; and

(b) Orders to stop work and/or refrain from using any WRF or portion thereof or improvement thereto until all permits, certifications, and approvals required by statute or rule are obtained.

(4) An order issued under this section shall:

(a) Be in writing;

(b) Name the facility and the person or persons to whom the order is directed;

(c) Briefly describe each action or inaction constituting a violation of chapters 70.90 RCW or 246-260 WAC rules;

(d) Specify any required corrective action, if applicable;

(e) Provide notice, as appropriate, that continued or repeated violation may subject the violator to:

(i) Civil penalties of up to five hundred dollars;

(ii) Denial, suspension, or revocation of the facility's operating permit; or

(iii) Referral to the county prosecutor or attorney general's office.

(f) Provide the name, business address, and phone number of an appropriate staff person who may be contacted regarding an order.

(5) Service of an order shall be made:

(a) Personally, unless otherwise provided by law; or

(b) By certified mail return receipt requested.

(6) Under department or local health officer adopted rules or policies, civil penalties of up to five hundred dollars per day may be assessed against any person violating provisions of chapter 70.90 RCW or 246-260 WAC.

(7) The department or local health officer shall have cause to deny the operating permit application or reapplication or to revoke or suspend a required operating permit of any person who has:

(a) Previously had:

(i) An operating permit suspended or revoked; or

(ii) An operating permit application denied for reason.

(b) Failed or refused to comply with provisions of chapters 70.90 RCW and 246-260 WAC or any other statutory provision or rule regulating the WRF construction or operation; or

(c) Obtained or attempted to obtain an operating permit or any other required certificate or approval by fraudulent means or misrepresentation.

(8) For the purposes of subsection (7) of this section, a person shall be defined to include:

(a) Applicant;

(b) Reapplicant;

(c) Permit holder; or

(d) An individual associated with subsection (8)(a), (b), or (c) of this section including, but not limited to:

(i) Board members;

(ii) Officers;

(iii) Managers;

(iv) Partners;

(v) Association members;

(vi) Agents; and

(vii) In addition, third persons acting with the knowledge of such persons.

(9) The department or local health officer may summarily suspend an operating permit, other required permit, license, or certification without a prior hearing if the department or local health officer:

(a) Finds public health, safety, or welfare imperatively requires emergency action; and

(b) Incorporates a finding to that effect in its notice or order.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-250, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-250, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-130, filed 3/12/90, effective 4/12/90.]

**WAC 246-260-260 Hearings.** (1) A person aggrieved by the department's or local health officer's denial, suspension, or revocation of any permit may request an administrative hearing.

(a) A hearing requested to contest a local health officer's action shall be governed by the local health jurisdiction's rules for hearings.

(b) A hearing requested to contest the department's action shall be governed by section 377, chapter 3, Laws of 1991. The applicant's and permit holder's right to an adjudicative proceeding is in the same law.

(c) The procedure for the adjudicative proceeding is in this chapter and in chapter 246-08 WAC.

(2) Any person aggrieved by the department's or local health officer's application of civil penalties may request an administrative hearing.

(a) A hearing requested to contest a local health officer's action shall be governed by the local health jurisdiction's rules for hearings.

(b) A hearing requested to contest the department's action shall be governed by section 377, chapter 3, Laws of 1991. When the department imposes a civil fine, the right of a person to an adjudicative proceeding is in the same law.

(c) The procedure for the adjudicative proceeding is in this chapter and in chapter 246-08 WAC.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-260-260, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-260-260, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 90-07-010 (Order 042), § 248-98-135, filed 3/12/90, effective 4/12/90.]

**WAC 246-262-010 Definitions.** (1) "Advanced first aid" means a course of instruction recognized by the American Red Cross, department of labor and industries, the U.S. Bureau of Mines, or fire services training program.

(2) "ANSI" means American National Standards Institute.

(3) "Approved" means the department or local health officer has stated in writing that the design plans and specifications are in accordance with chapter 246-262 WAC.

(4) "ARC" means American Red Cross.

(5) "Architect" means a registered architect currently licensed under chapter 18.08 RCW in Washington state.

(6) "ASTM" means American Society for Testing Material.

(7) "Attendant" means a person trained to operate an attraction and control the users in a safe orderly manner.

(8) "Attraction or ride" means any of the specific types of recreational facilities involving partial or total immersion or intentional contact with the water designated for public recreational use.

(9) "Biomechanics" means the study of the human body as a system operating under the laws of Newtonian mechanics and the biological laws of life.

(10) "Board" means the state board of health.

(11) "Boogie or mini-surf board" means any semi-rigid device used in a wave pool for flotation or as a riding device.

(12) "Centerline" means the path defined by geometric midpoints of a component or structure, generally used in consideration of the slide path in flume rides.

(13) "Communication system" means any combination of devices permitting the passage of or exchange of messages between park operating personnel and between operating personnel and users. Systems can include, but

are not limited to, two-way radios, hardwired intercoms, horns, whistles, hand signals, direct voice, signs, or equivalent.

(14) "Contaminant" means any physical, chemical or biological substance present in the RWCF water which may adversely affect the health or safety of the user and/or the quality of the water.

(15) "CNCA" means Council for National Cooperation in Aquatics.

(16) "Cross-connection" means any physical arrangement connecting:

(a) A potable water system directly or indirectly, with anything other than another potable water system; or

(b) A RWCF to any potable or nonpotable water source capable of contaminating either the RWCF or potable water source as a result of backflow.

(17) "Department" means the department of health.

(18) "Discharge section" means the component or components making up the exit of the water slide, water tube, inner tube ride, speed slide, ramp slide, drop slide or drop tube, or kiddie flume. These components are the elements controlling the final direction and speed of the user.

(19) "Diving envelope" means the minimum dimensions of an area within the pool necessary to provide entry from a diving board, platform, or attraction segment where users enter above pool water level.

(20) "Drop slide or drop tube ride" means a sloped trough, chute, or tube exiting the user above the pool operating water level.

(21) "Engineer" means a registered professional engineer currently licensed under chapter 18.43 RCW in Washington state.

(22) "Entry access points" means the areas where users enter an attraction.

(23) "Entry rate" means the frequency at which users are permitted access to the attraction.

(24) "Ergonomics" means a multidisciplinary activity dealing with the interactions between humans and their environment plus the traditional environmental elements atmosphere, heat, light, and sound, as well as objects with which the user comes in contact.

(25) "FINA" means Federation Internationale de Natation Amateur.

(26) "Flume or tube entry" means the area at which users enter a water slide, water tube, inner tube ride, speed slide, drop slide, drop tube, or kiddie flume.

(27) "fps" means feet per second.

(28) "gpm" means gallons per minute.

(29) "IAAPA" means International Association of Amusement Parks and Attractions.

(30) "Injury or illness report" means the written record of all facts regarding an injury or illness associated with the RWCF.

(31) "Inner tube ride" means an attraction where users ride inner tube-like devices through a series of chutes, channels, flumes, and pools.

(32) "Innovative recreational water contact facility" means any type of RWCF currently unregulated.

(33) "Intermediate pool" means any pool between the entry and exit pools in attractions using a series of pools.

(34) "Kiddie flume or tube attraction" means a flume, chute, or tube designated for and restricted to use by small children.

(35) "Lifeguard" means an individual currently certified by red cross in advanced lifesaving or lifeguard training, or YMCA senior lifesaver, or equivalent certification through the royal Canadian lifeguard services.

(36) "Lifeguard station" means the designated work station of the lifeguard.

(37) "Local health officer" means the health officer of the city, county, or city-county department or district or a representative authorized by the local health officer.

(38) "mg/l" means milligrams per liter.

(39) "Multi-activity pool" means a pool with more than one type of attraction (i.e., an adult activity pool with a series of tubes, chutes, cable rides, etc., intended for use by individuals with specific swimming abilities).

(40) "NSF" means National Sanitation Foundation.

(41) "NSPI" means National Spa and Pool Institute.

(42) "Operating levels" means water levels maintained within attractions during use for proper operation of facility and for controlling safety and sanitation.

(43) "Operations" means all aspects of a RWCF which must be controlled to make the facility safe, healthy, and usable for the purpose intended.

(44) "Owner" means a person owning and responsible for a RWCF or authorized agent.

(45) "Person" means an individual, firm, partnership, co-partnership, corporation, company, association, club, government entity, or organization of any kind.

(46) "Ponding" means a condition where water fails to drain from walking surfaces.

(47) "ppm" means parts per million.

(48) "Primary zone of visual coverage" means the area assigned to a lifeguard or attendant for primary visual surveillance of user activity.

(49) "Radius of curvature" means the radius arc which denotes the curved surface from the point of departure from the vertical sidewall (springline) of the pool to the pool bottom.

(50) "Ramp slide" means a slide allowing one or more users to slide in unison down a straight incline to a run-out or a receiving pool.

(51) "Recirculation filter water" means water which is recirculated by the RWCF for treatment purposes, i.e., filtration and disinfection.

(52) "Response time" means elapsed time between bather distress and initiation of rescue assistance by a lifeguard (or attendant where applicable).

(53) "RWCF" means recreational water contact facility which is an artificial water associated facility with design and operational features that provide patron recreational activity which is different from that associated with a conventional swimming pool and purposefully involves immersion of the body partially or totally in the water and includes, but is not limited to, water slides, wave pools, and water lagoons.

(54) "Secretary" means the secretary of the department of health.

(55) "Serious injury" means any injury requiring admission to a hospital.

(56) "Speed slide or speed tube" means a sloped trough, flume, tube, or roller track having long straight and/or steep drops where users sustain speeds of twenty miles per hour or more.

(57) "Springline" means the point from which the pool wall breaks from vertical and begins its arc in the radius of curvature (for coved construction) to the bottom of the pool.

(58) "Surfboard" means a rigid device used in a wave pool for riding.

(59) "Tail coverage" means providing insurance coverage for a given period of time for discovery of claims made after the policy term for "claims made" type of insurance.

(60) "Total turnover" means the time it takes for the pool attraction water volume to be recirculated as a sum of the flows from treatment turnover and attraction recirculation systems turnover.

(61) "Treatment turnover" means the minimum time necessary to circulate the entire attraction water volume through the recirculation filter system.

(62) "T.U." means turbidity unit as measured by the nephelometric method.

(63) "Wading activity pool" means a pool or area less than twenty-four inches in total water depth with activities intended for younger children.

(64) "Walking surface" means any direct access surface to the attractions or change rooms where the user will be in bare feet. Areas set aside for picnicking, sunbathing, and lounging are excluded.

(65) "Water slide or water tube" means a sloped trough-like flume or tube structure of varying slope and direction using water as a lubricant and/or method of regulating the rider speed.

(66) "Water treatment operator" means the person appointed to operate the mechanical equipment and perform related water quality monitoring for proper operation of the physical facility.

(67) "Wave pool" means a recreational pool producing waves which usually begin at the deep end and proceed toward and dissipate at the shallow end.

(68) "WWA" means World Waterpark Association.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-020, filed 6/22/88.]

**WAC 246-262-040 Operating permit.** (1) No person shall operate a RWCF without a current operating permit issued by the department or local health officer.

(2) To obtain an operating permit, owners of an RWCF must provide information to the department or local health officer that shows the RWCF is in compliance with these rules.

(3) Operating permits shall be:

(a) Valid for one year;

(b) Renewed annually; and

(c) Nontransferable without written consent of the department or local health officer. For purposes of this

section, a change in management of a corporation, partnership, association, or other nonindividual business entity shall create a new person requiring either consent to a permit transfer or issuance of a new permit upon proper application.

(4) The department or local health officer issuing the operating permit may revoke or suspend the permit if the RWCF is not operated in accordance with chapter 70.90 RCW or chapter 246-262 WAC.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-040, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-050, filed 6/22/88.]

**WAC 246-262-060 General design, construction, and equipment.** (1) Owners shall locate RWCFs to:

(a) Minimize pollution by dust, smoke, soot, and other undesirable substances;

(b) Eliminate pollution from surrounding surface drainage; and

(c) Ensure pools within the RWCF are more than fifteen feet from any structure, object, or land formation (i.e., pumphouse, tree, etc.), which would provide a user with the opportunity to jump from such a structure into the pool. This does not include any barriers provided to prevent unauthorized access to pool or segments of attractions which enter pool.

(2) Owners shall use only materials in the structure and equipment which are nontoxic, durable, inert, impervious to water, and easily cleaned.

(3) Owners shall design and maintain walking surfaces which are:

(a) Sloped a minimum one-fourth inch per foot;

(b) Of a nonslip finish;

(c) Equipped with sufficient drains to prevent standing water;

(d) Free of resilient coverings, e.g., carpeting; and

(e) At least four feet in width.

(4) Owners shall provide adequate barrier protection to prevent unauthorized access including:

(a) In outdoor facilities, a barrier six feet or more in height with:

(i) Openings, holes, or gaps not to exceed four inches except openings protected by gates or doors; and

(ii) Lockable gates and entrances either regulated during periods of use or provided with a self-closing, self-latching mechanism a minimum of forty-two inches from the ground.

(b) In indoor facilities, suitable barriers to prevent access by unauthorized individuals or pool access by unattended small children.

(5) Owners shall ensure that pools:

(a) Comply with all provisions of chapter 246-260 WAC where pool facilities are a separate attraction;

(b) Have surfaces with:

(i) Materials complying with subsection (2) of this section;

(ii) Watertight and nonabrasive construction;

(iii) Nonslip finish where users are walking; and

(iv) White or light color finish not obscuring the view of objects or surfaces.

(c) Are dimensionally designed to provide for the safety of the user and circulation of the water including, but not limited to:

(i) Absence of protrusions, extensions, means of entanglement, or other obstruction which can cause entrapment or injury;

(ii) Construction tolerances conforming with current ANSI public pool standards;

(iii) Uniform pool floor slopes as follows:

(A) Not exceeding one foot of drop in seven feet of run for pools serving as landing or exiting pools, where total water depth is less than forty-eight inches; and

(B) Providing a maximum slope of one foot of drop in twelve feet of run up to a depth of five and one-half feet in pools where users enter and participate in extended activities.

(iv) Vertical walls for a minimum distance noted in Table 4 of this section, which may be curved (not to exceed allowable radius) to join the floor.

(A) Vertical means walls not greater than eleven degrees from plumb.

(B) Coving or portion of the side wall of a diving area in the pool shall conform as described in subsection (5)(c)(vi) of this section.

(C) In new construction or alterations to existing construction, ledges are prohibited.

(D) Requirements in subsection (5)(c) of this section do not apply to spas.

(v) A maximum intrusion beyond the vertical (as defined in subsection (5)(c)(iv)(A) of this section) with any configuration not to exceed a transitional radius from wall to floor where floor slopes join walls and which:

(A) Has its center of radius no less than the minimum vertical depth specified in Table 4 of this section below the water level;

(B) Has arc of radius tangent to the wall; and

(C) Has a maximum radius of coving (or any intrusion into the pool wall/floor interface) determined by subtracting the vertical wall depth from the total pool depth.

TABLE 4  
MAXIMUM RADIUS COVING OR POOL INTRUSION  
DIMENSIONS BETWEEN POOL FLOOR AND WALL\*

|                             |      |       |      |      |       |      |      |  |
|-----------------------------|------|-------|------|------|-------|------|------|--|
| Pool Depth                  | 2'0" | 2'6"  | 3'0" | 3'6" | 4'0"  | 4'6" | 5'0" | >5'0"  |
| Minimum Side Wall           |      |       |      |      |       |      |      |  |
| Vertical Depth              | 1'6" | 1'10" | 2'2" | 2'6" | 2'10" | 3'2" | 3'6" | >3'6"  |
| Maximum Radius of Curvature | 6"   | 8"    | 10"  | 12"  | 1'2"  | 1'4" | 1'6" | **Maximum radius equals pool depth minus the vertical wall depth |

Note: \*For pool depths which fall between the depths listed, values can be interpolated.

\*\*Radius of coving cannot intrude into pool within diving envelope or deep water entry area for attractions entering above pool water level.

(vi) Provision of diving envelopes in pools or areas of pools designated for diving activities to include:

(A) A diving envelope of no less than the CNCA standard configuration\* noted in Figure 1 of this section in areas where user would enter from deck level, diving board, or platform at a height of less than one-half meter (twenty inches).

Note: \*This requirement is based on a standard described in CNCA publication "Swimming Pools: a Guide to their Planning, Design, and Operation" 1987. Fourth edition. Human Kinetics Publisher, Inc., Champaign, Illinois. Figure 8.1

FIGURE 1:

Minimum dimensions for pools with provision for diving from deck level or providing boards or platforms at a height less than one-half meter.

| Dimension                                    | Minimum    | Preferred or Maximum |
|--|------------|----------------------|
| A Height of board above water                |            | 20 in.               |
| B Board overhang                             | 2 ft 6 in. | 3 ft                 |
| C Depth of water at plummet                  | 9 ft       | 10 ft *              |
| D Distance from plummet to start of upslope  | 16 ft      | 18 ft *              |
| E Inclination of upslope of bottom           |            | 1:3                  |
| F Depth of water at breakpoint               | 4 ft 6 in. |                      |
| G Slope of bottom in shallow portion of pool | 1:12       | 1:15 *               |
| H Length of shallow section of pool          | 8 ft       | 14 ft *              |
| I Distance to any overhead structure         | 13 ft      | 15 ft *              |
| K Board length                               |            | 12 ft                |
| L Length of pool                             | 40 ft      | 50 ft *              |
| M Dimension not less than C minus            | 6 in.      |                      |

Note: \*Values with asterisks are not to be considered as maximums.

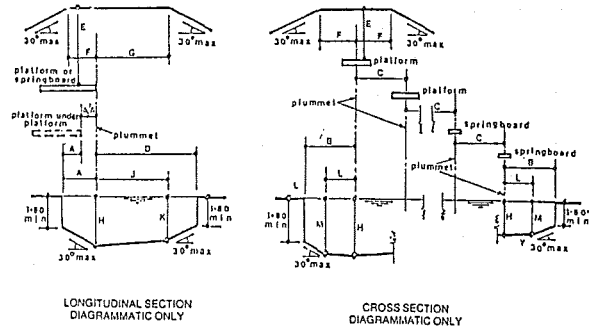

\*\*Warning stripe at break point may be of any contrasting color.

(B) A diving envelope of no less than the FINA standard configuration\*\* noted in Figure 2 of this section in areas where user would enter from diving board or platform at a height of one-half meter (twenty inches) or greater.

Note: \*\*This requirement is based on a standard described in FINA publication "FINA Handbook - 1986-1988." Constitution and rules governing swimming, diving, water polo, and synchronized swimming, 1986-1988. Edited by E. Allen Harvey, Vancouver, Canada VGN 3R6, Section D, pp. 114-115.

(d) Have adequate handholds around the perimeter in pools designed for extended swimming and bathing activity and excluding wave pools; and

(e) Stairs, ladders, or stepholes with:

(i) Stairs, when provided, meeting the following construction requirements:

(A) Treads of a nonslip finish;

(B) Stair tread edges colored to contrast with the color of the pool and clearly visible to the users;

(C) Recessed in pool areas used for lap swimming or provided with wave action; and

(D) Equipped with handrails extending over the edge of the deck.

(ii) Ladders or stepholes which:

(A) Furnish exit from pools greater than four feet in depth except in landing pools bringing the user toward a shallow area after entering the water;

(B) Are spaced a minimum of one for every fifty feet of pool perimeter greater than four feet deep;

(C) Are provided at both sides of the deep end in pools over thirty feet in width; and

(D) Are equipped with a handrail at the top of both sides extending over the coping or edge of the deck.

(iii) User access at the shallow end of pool.

(6) Owners shall ensure treatment turnover at rates no less than designated as follows:

(a) In receiving pools for water slides, water tubes, inner tube rides, speed slides or tubes, drop slides or tubes, and kiddie flume slides, treatment turnover time can be based on any of the following:

(i) Total attraction volume in one-hour period;

(ii) Treatment turnover equals design peak usage (maximum users per hour) expressed in gpm;

(iii) A rate of one hour for 20,000 gallons per two or less attraction segments. Treatment turnover times may increase proportionately for larger pool volumes per two or less attraction segments;

(iv) Alternative methods where provisions to reduce contaminants are justified to the satisfaction of the department or local health officer; and

(v) Treatment turnover times not to exceed six hours.

(b) For wave pools, a minimum treatment turnover time of two hours; and

(c) For activity pools, a minimum treatment turnover time of four hours.

(7) Owners shall provide pool inlets which are:

(a) Submerged and located to produce uniform circulation of water and chemicals throughout the pool; and

(b) Located on the bottoms of pools greater than two thousand five hundred square feet, unless otherwise justified by the engineer to the satisfaction of the department or local health officer.

- (8) Owners shall provide pool outlets with:
- (a) Overflow and main drain with each designed to carry one hundred percent of total recirculation filter flow;
    - (b) Overflow outlets that have:
      - (i) Design to maintain a minimum of sixty percent of filter recirculation flow at all times;
      - (ii) An overflow channel on the pool perimeter to promote uniform circulation and skimming action of the upper water layer for pools greater than twenty-five hundred square feet, with:
        - (A) Design preventing matter entering channel from returning to the pool;
        - (B) Dimensions minimizing the hazard for bathers, such as catching arms or feet in an overflow channel;
        - (C) 0.01 foot slope per foot or more;
        - (D) Drains sufficiently spaced and sized to collect and remove overflow water to return line to filter where applicable;
        - (E) Size sufficient to carry one hundred percent of the recirculation flow plus the surge flow equivalent to one-fifth of the balancing tank expressed in gallons per minute.
    - (iii) Skimmers, when used on pools up to twenty-five hundred square feet, if:
      - (A) Demonstrated to operate properly under design conditions;
      - (B) Turbulence is not expected to interfere with operation;
      - (C) Maximum flow rate through skimmers does not exceed four gpm per inch of weir;
      - (D) Devices are recessed in the wall of the pool so that no part protrudes beyond the plane of the wall into the pool;
      - (E) The skimmer is equipped with a device to prevent air lock in the recirculation suction line (i.e., an equalizer line); and
      - (F) The skimmer is equipped with a removable and cleanable screen designed to trap large solids.
  - (iv) Sidewall channels, when used on pools up to twenty-five hundred square feet, which accept the total recirculation volume of the pool through the upper side of the pool if:
    - (A) Overall flow through the channel exceeds four times the treatment recirculation rate;
    - (B) Design of channel prevents entrapment of the user;
    - (C) Openings of any screens have less than one-half inch slots;
    - (D) Channel openings do not allow access beyond the pool, except with the use of specific tools requiring their opening;
    - (E) Open area of grates prevent a suction or entrapment hazard which could be dangerous to the user; and
    - (F) The channel provides an action pulling water from the top of the pool to remove floatable debris and oils.
  - (c) Main drains in all pools with:
    - (i) Location at the low points of the pool;
    - (ii) A minimum of two main drains spaced not further than twenty feet apart nor closer than six feet or spaced

- as far as possible from each other in pools less than six feet linear floor distance;
- (iii) Total open area of grates preventing a suction or entrapment hazard which could be dangerous to user;
- (iv) Flat grate drains having:
  - (A) Maximum flow of 1.5 feet per second; or
  - (B) Net area of outlet being at least four times the area of the discharge pipe.
- (v) Maximum flow of four feet per second in anti-vortex drains;
- (vi) Openings not allowing a sphere over one-half inch in diameter to pass;
- (vii) Grate design to withstand forces of users;
- (viii) Grates removable only with specific tools; and
- (ix) Means to control flow from recirculation pump or balancing tank.
- (9) Owners shall maintain recirculation flow which:
  - (a) Does not exceed six feet per second in suction or valved discharge side of pump; and
  - (b) Does not exceed ten feet per second in open discharge pipes on the pressure side of the pump or filter discharge. This limit does not apply to the return inlet and the last two feet of pipe leading to the inlet.
- (10) Owners shall provide a surge chamber or surge area in RWCFs with an entry pool to:
  - (a) Accommodate at least two minutes of the total turnover; and
  - (b) Maintain proper water levels for treatment and operation of the attraction.
- (11) Owners having RWCFs with overflow channels requiring balancing tanks shall:
  - (a) Maintain volume equivalent to fifteen times maximum bathing load expressed in gallons; and
  - (b) Increase capacity as necessary to provide volume for make-up water and to prevent air lock in the pump suction line.
- (12) Owners shall have and maintain recirculation pumps with adequate capacity to:
  - (a) Provide design flows and pressure for recirculation of the RWCF water over the entire operating pressure of the filter;
  - (b) Allow proper capacity for backwashing of filters when specified; and
  - (c) Have self-priming capability when installed above the pool water level.
- (13) Where pumps precede the filter, owners shall install hair and lint strainers, which shall:
  - (a) Be located upstream of recirculation pumps;
  - (b) Be of corrosion-resistant material sufficiently strong to prevent collapse when clogged;
  - (c) Have an operable cover; and
  - (d) Provide valving to isolate the strainer when located below pool water level.
- (14) Owners shall provide valves at appropriate locations to allow isolation and maintenance of equipment.
- (15) Owners shall provide equipment rooms which:
  - (a) Enclose pumps, disinfection equipment, filters, and other electrical and mechanical equipment and associated chemicals;
  - (b) Provide adequate working space and access to perform routine operations;

(c) Provide lighting and ventilation of the equipment room; and

(d) Are not accessible to the public.

(16) Owners shall ensure the source of make-up water and associated piping in the RWCF:

(a) Provides sufficient quantity to replace daily losses from the pool;

(b) Comes from a supply conforming with chapter 246-290 WAC; and

(c) Prevents cross-connections using a minimum air gap of two pipe diameters or approved backflow prevention devices between the make-up water source and the RWCF attraction water or waste water.

(17) Owners shall equip RWCFs with filtration equipment which:

(a) Meets the applicable standards of NSF or equivalent;

(b) Uses acceptable types and filter rates described in Table 5 of this section:

TABLE 5

| Applied in<br>temperature<br>ranges: |   |                      |                |
| <95°F.                               | —   | 0.375                |                |
| >95°F.                               | —   | 0.188                |                |

Note: \*Filters sized at maximum application rate shall use flow control valves.

\*\*Cartridge filters shall have a nominal micron rating of twenty microns or less.

(c) Has pressure or vacuum gauges for measuring loss of head (pressure) through the filter with minimum of one gauge preceding and one gauge following the filter;

(d) Has a flow indicator to measure treatment turn-over; and

(e) Has means of discharging filter backwash to waste with:

(i) Discharge in a manner not creating a public nuisance;

(ii) Disposal in accordance with applicable local law or regulation;

(iii) Minimum air gap of two pipe diameters to prevent cross-connection from waste discharge and recirculation system piping;

(iv) Discharge receptor and piping of sufficient size to accept backwash water and prevent flooding; and

(v) Provisions to monitor filter effluent during backwash.

(18) Owners shall provide disinfection equipment which:

(a) Provides a continuous and effective residual of disinfectant in the water;

(b) Uses a disinfectant with a residual that is easily monitored;

(c) Conforms with NSF standards when liquid or solid feed materials are used;

(d) Has a design feed rate which will provide effective disinfection levels when RWCFs are in use;

(e) Meets the following conditions if chlorine gas is used:

(i) Chlorine rooms shall:

(A) Be above ground level;

(B) Be constructed so all openings or partitions with adjoining rooms are sealed;

(C) Be located with consideration of prevailing winds to dissipate leaked chlorine away from the RWCF;

(D) Have door opening outward only and to the out-of-doors.

(ii) Mechanical exhaust ventilation of the chlorine room including:

(A) Air inlet located as far as possible from fan intake to promote good air circulation patterns;

(B) Minimum of one air change per minute in the chlorine room when fan is operating;

(C) A remote switch outside the room or a door-activated switch to turn on fan prior to entering;

(D) Suction for fan near the floor; and

(E) Exhaust for fan and chlorinator vent located to prevent contaminating air intakes or prevent undue hazard for the users of the RWCF.

(iii) Gas chlorine systems which:

(A) Are vacuum injection type, with vacuum actuated cylinder regulators; and

(B) Provide adequate-sized backflow and anti-siphon protection at the ejector.

(iv) Breathing protection available in an accessible area for the operator outside of the chlorine room including:

(A) Instructions about limitations with chlorine concentrations and concentrations of oxygen if chlorine-type canister masks are used; and

(B) Self-contained breathing apparatus designed for use in a chlorine atmosphere as preferred equipment for working with chlorine leaks.

(v) Means for automatic shutoff when the recirculation filter pump is off or flow to the pool is interrupted;

(vi) Chlorine gas cylinders shall:

(A) Be stored only in chlorine rooms; and

(B) Not exceed one hundred fifty pounds tare weight per cylinder; except, wave pools, where one-ton cylinders may be used. Only a single, one-ton cylinder shall be stored on the premise at any time.

(19) Owners applying chemicals other than disinfectant shall provide chemical feed equipment with:

(a) Adequate size and design to allow routine cleaning and maintenance;

(b) Materials resistant to action of the chemicals to be used; and

(c) Means for automatic shut off when the recirculation filter pump is off or flow to the pool is interrupted.

(20) Owners shall have testing equipment to provide means for measuring disinfectant residuals, pH, alkalinity, and any other chemicals used routinely in the RWCF water. In pools where compressed chlorine gas is used, means to detect leaks shall be provided, i.e., use of proper strength ammonia vapor.

(21) Owners shall provide easily accessible change room facilities at all RWCFs with:

(a) Dressing rooms, showers, toilets, urinals, and sinks;

(b) Change room design including:

(i) Separate facilities for both sexes;

(ii) Floors of a nonslip finish with suitable drains;

(iii) Junctions between walls and floors coved for ease of cleaning;

(iv) Adequate ventilation to prevent build-up of moisture in the facility; and

(v) Provisions to minimize cross traffic with nonusers.

(c) Plumbing fixtures as described in Table 6 of this section.

TABLE 6  
MINIMUM PLUMBING FIXTURE REQUIREMENTS  
BASED ON MAXIMUM PEAK PERIOD OCCUPANCY

| Type of Fixture | Occupancy/Sex         | Number of Fixtures Required<br>Per Occupancy Load |        |
|-----------------|-----------------------|---|--------|
|                 |                       | Male  | Female |
| 1. Toilets      | First 600             | 1/200   | 1/100  |
|                 | Portion exceeding 600 | 1/450   | 1/300  |
| 2. Urinals      | First 600             | 1/200   | -      |
|                 | Portion exceeding 600 | 1/450   | -      |
| 3. Showers      | First 300             | 1/100   | 1/100  |
|                 | Portion exceeding 300 | 1/200   | 1/200  |
| 4. Sinks        | First 400             | 1/200   | 1/200  |
|                 | Next 350              | 1/350   | 1/350  |
|                 | Portion exceeding 750 | 1/500   | 1/500  |
| 5. Hose bibs    |                       | 1 accessible to change rooms                      |        |
| 6. Janitor sink |                       | 1 within the RWCF                                 |        |

(d) Showers:

(i) Delivering water at a temperature range between ninety and one hundred ten degrees Fahrenheit; and

(ii) Providing liquid or powdered soap in nonglass dispensers.

(e) Flush toilets and toilet tissue in dispensers;

(f) Sinks providing:

(i) Tempered or hot and cold running water,

(ii) Liquid or powdered soap in nonglass dispensers, and

(iii) Disposable towels or electric hand dryers.

(g) Sewage disposed of in a manner approved by the department or local health officer; and

(h) Hose bibs with vacuum breakers provided at convenient locations.

(22) Owners shall design and maintain lighting at RWCF attractions or change rooms to:

(a) Illuminate indoor attractions, outdoor attractions used after dusk, or change rooms with a minimum lighting intensity maintained thirty inches above any walking surface, pool deck, or pool area of:

(i) Thirty foot-candles at indoor facilities;

(ii) Fifteen foot-candles at outdoor facilities; or

(iii) Twenty foot-candles in change rooms.

(b) Allow lifeguards or attendants to clearly see every part of pool waters and walking surfaces; and

(c) Meet any additional lighting requirements deemed necessary by the department or local health officer.

(23) Owners shall provide first aid facilities in every RWCF including:

(a) A twenty-four package first aid kit per WAC 296-24-065;

(b) Two or more blankets reserved for emergency use;

(c) A telephone with a prominently displayed list of emergency medical service response numbers;

(d) A backboard meeting the specifications of the ARC; and

(e) Sufficient and suitable area to accommodate persons requiring treatment and necessary first aid equipment.

(24) Owners shall provide signs at RWCF entrances and change rooms. Any combination of words, pictures, or symbols may be used to convey the following conditions:

(a) Prohibition of use by persons with communicable diseases;

(b) Prohibition of use by persons under the influence of alcohol or drugs;

(c) Requirement for a cleansing shower before entering the attractions;

(d) Warning that persons refusing to obey the attendants are subject to removal from the premises; and

(e) Prohibition of food and drink in pool, change room, or on walking surfaces.

(25) If owners allow or make provision for food service:

(a) Food and beverage sale and consumption areas shall be separate from pool, change room, and walking surfaces;

(b) Trash containers shall be provided; and

(c) No glass containers shall be allowed in the RWCF.

(26) Owners shall prevent users or spectators access to mechanical, electrical, or chemical equipment facilities.

(27) Owners shall provide an operable drinking fountain of the angle jet type design meeting the requirements of the American Standards Association.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-060, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-060, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-070, filed 6/22/88.]

**WAC 246-262-070 Specific design, construction, and equipment.** (1) Owners shall provide specific design, construction, and equipment for the various types of RWCF attractions.

(2) Owners and manufacturers shall ensure adherence to recognized design and construction standards including, but not limited to:

(a) ASTM F-24 Standards on Amusement Rides and Devices;

(b) "Suggested Health and Safety Guidelines for Recreational Water Slide Flumes" U.S. Department of Health and Human Services, Centers for Disease Control, Atlanta, Georgia, 30333;

(c) "World Waterpark Association Considerations for Operating Safety" published by the World Waterpark Association, 7474 Village Drive, Prairie Village, Kansas, 66208; and

(d) Department recognized or approved guidelines, criteria, or standards.

(3) Owners shall ensure design and construction for water slides or tubes, inner-tube rides, kiddie flumes, or ramp slides meet the following minimum standards:

(a) Flume or tube entry access points shall have:

(i) Means to control unauthorized entrance;

(ii) Handrails or slip-resistant surfaces provided to assist users; and

(iii) Attendant stations which provide:

(A) User entry spacing control;

(B) Attendant line of sight to the attraction; and

(C) Attendant access to a communication system.

(b) Receiving pools shall have:

(i) Clearances and minimum distances as noted in

Figure 3 of this section for tube or flume entrances into pools.

FIGURE 3  
MINIMUM CLEARANCES FOR FLUME OR TUBE ENTRY TO RECEIVING POOLS

| VALUE | MINIMUM DISTANCE | DESCRIPTION   |
|-------|------------------|---|
| D     | 20 feet          | Minimum distance where flume terminates to opposite side of pool. |

FIGURE 3  
MINIMUM CLEARANCES FOR FLUME OR TUBE ENTRY TO RECEIVING POOLS

| VALUE | MINIMUM DISTANCE | DESCRIPTION  |
|-------|------------------|--|
| A     | 5 feet           | Minimum distance from edge of flume to side of pool.   |
| B     | 6 feet           | Minimum distance between sides of parallel flumes.   |
| C     | 20 feet          | Minimum distance between two flumes or tubes that are not parallel shall be so constructed so that the intersecting lines of each closest side does not intersect for a distance of at least twenty feet from the end of each flume. |

(ii) Flume or tube sliding surface ending below the pool operating water level when users ride unaided or on mats;

(iii) Flume or tube perpendicular for a minimum of ten feet to the wall of entry;

(iv) Handrails, when steps are provided for exiting; and

(v) Attendant and/or lifeguard stations with:

(A) Unobstructed access to users; and

(B) Ready access to communication system for contacting control station attendant and first aid personnel.

(4) Owners shall design and construct barriers to prevent unauthorized entry or exit from any intermediate pool.

(5) Owners shall ensure design and construction of speed slides meet the following minimum standards:

(a) Entry points conforming with subsection (3)(a) of this section;

(b) Roller- or sled-type slides designed to prevent accidental flipping of the sleds or coasters when entering the water;

(c) Provision of sufficient transition zones for deceleration preventing unsafe user impact; and

(d) Maintenance of critical water operation levels providing proper braking action of the user.

(6) Owners shall ensure design and construction of wave pools meet the following minimum standards:

(a) Walls of wave pools shall be vertical with minimum six inch radius of curvature between wall and pool bottom;

(b) Pool bottom sloped:

(i) Not exceeding one foot of drop in twelve feet of run where pool depths range from zero to three and one-half feet; or

(ii) Not exceeding one foot of drop in nine feet of run where depths range from three and one-half feet to six and one-half feet.

(c) Recessed ladders or step holes with vertical grab bars at depths above three and one-half feet:

(i) For emergency exit only;

(ii) Spaced at intervals of fifty feet or less where pool water depths are greater than three and one-half feet. Pool water depths are measured without wave action.

(d) Deck width of at least ten feet along the shallow end;

(e) A fence or restrictive barrier a minimum of forty-two inches in height and at least two feet out from the pool/deck interface at the side walls of wave pools, with emergency exit openings.

(f) Lifeguard station locations appropriate to prevailing conditions;

(g) A push-button system to shut off the wave-making equipment with:

(i) Shut offs installed on sidewall decks and spaced at intervals no greater than one hundred feet, readily accessible to the lifeguards; and

(ii) Shock hazard protection.

(h) A communication system for use by authorized personnel which is clearly audible to all portions of the pool;

(i) A communication system for interaction between authorized personnel; and

(j) Maximum bathing load (users) not to exceed a value equal to  $S/12 + D/68$  where:

(i) "S" equals surface area in square feet where depth is less than three and one-half feet;

(ii) "D" equals surface area in square feet where pool depth is three and one-half feet deep or greater; and

(iii) Pool depths are measured without wave action.

(7) If inner tubes, boogie boards, or surf boards are used, the owner shall ensure the design and operation of the wave pool provides for such activity, including:

(a) The establishment of rules for use;

(b) Operating and emergency procedures; and

(c) Crowd control.

(8) Owners shall ensure design and construction of any wading activity pool meets the following minimum standards. Wading activity pool areas are:

(a) Built with maximum water depth of two feet;

(b) Constructed with pool walls so that distance from deck to water level is six inches or less for at least seventy-five percent of the pool perimeter;

(c) Equipped with floors uniformly sloped to drain with a maximum slope of one foot of drop in twelve feet of run;

(d) Separated by at least a four foot high barrier when distance to any water area greater than four feet in depth is less than ten feet; and

(e) Protected from water areas greater than two feet by providing:

(i) A float line separating the two areas;

(ii) A six inch contrasting color line on pool bottom and side walls at float line; and

(iii) A transition zone with a maximum floor slope not exceeding one foot of drop in twelve feet of run.

(9) Owners shall ensure design and construction of drop slides or drop tubes meet the following minimum standards:

(a) Entry in accordance with subsection (3)(a) of this section;

(b) Receiving pool envelope:

(i) Conforming to CNCA standards noted in WAC 246-262-060 (5)(c)(vi)(A) if the point of exit is less than one-half meter (or twenty inches);

(ii) Conforming to FINA standards noted in WAC 246-262-060 (5)(c)(vi)(B) if the point of exit is one-half meter (or twenty inches) or greater.

(iii) Increasing in size to ensure user safety if warranted by angle of entry or speed of the user.

(c) Sufficient distance between slides or tubes to prevent collisions of users. Parallel exits are recommended.

(d) Direct line of sight and direct communication between entry access point and receiving pool.

(10) Owners shall provide signs for specific RWCF attractions. Words, pictures, or symbols may be used to convey the following as appropriate:

(a) Prohibition of running, standing, kneeling, tumbling, horseplay, or stopping in the flumes or tubes;

(b) Failure to follow directions of attendant or failure to obey posted rules may result in removal from the RWCF;

(c) Prohibition of diving from flume;

(d) Prohibition of multiple user chains if applicable to ride;

(e) Requirement to leave the landing area promptly after exiting;

(f) Recommended minimum or maximum age or height for using this attraction; and

(g) Prohibition of head first sliding if applicable to ride.

(h) Additional information on wave pools including:

(i) Warning that wave pools can be very tiring;

(ii) Warning for small children and poor swimmers to use personal flotation devices in designated areas;

(iii) Requirement for adult supervision for children;

(iv) Prohibition of diving, jumping, or entering from sides of pool; and

(v) Prohibition of using surf boards during periods of general public use.

(11) If the proposed attraction design is not addressed by or exceeds limitations of standards and guidelines specified by this section, owners shall submit:

(a) Justification to the department or local health officer prepared by an engineer; and

(b) Information on the construction, maintenance, and operation of the proposed attraction.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-070, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-070, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-080, filed 6/22/88.]

**WAC 246-262-080 Operation.** (1) Owners shall ensure proper operation to protect the public health and safety of the users and the water quality of the RWCF.

(2) Owners shall prepare and use an operations manual for the RWCF.

(3) Owners shall routinely inspect, maintain, and repair the physical components to:

(a) Ensure all structural facilities are intact and free from corrosion, wear, or stress;

(b) Prevent water ponding on walking surfaces;

(c) Ensure equipment is available and operable including:

(i) Disinfection, filtration, and related equipment;

(ii) Lifesaving equipment; and

(iii) Communication systems.

(4) Owners shall ensure user health and safety by adequately staffing the RWCF during operation. Staffing shall include:

(a) Advanced first aid personnel at all times facility is open to the public;

(b) Lifeguards and/or attendants as appropriate at all times facility is open to the public; and

(c) Water treatment operator as needed.

(5) Owners shall ensure each type of personnel performs the following duties:

(a) Advanced first aid personnel shall provide emergency medical treatment;

(b) Lifeguard shall have sole responsibility for guarding users in area assigned;

(c) Attendants shall have sole responsibility for assuring proper user control in areas assigned; and

(d) Water treatment operator shall oversee water treatment operations and conduct necessary water quality monitoring.

(6) Owners shall ensure each type of personnel meets the designated training requirements:

(a) Advanced first aid personnel with:

(i) A current advanced first aid certification or equivalent or higher levels of training including:

(A) First responder;

(B) Emergency medical technician; or

(C) Paramedic.

(ii) Training on management of spinal injuries in the aquatic environment if lifeguards with lifeguard training are not at the RWCF.

(b) Lifeguards with a current lifeguard certificate through any of the recognized programs in the definition (WAC 246-262-010(23));

(c) Attendants with training determined appropriate by the owner to respond to user safety needs at the attractions, and:

(i) Attendants stationed at shallow pool facilities (less than four feet water depth) with documented training regarding their response in at least the following:

(A) Safety instruction on basic methods of water rescue, reaching, and extension assists;

(B) Cardiopulmonary resuscitation (CPR) and airway management;

(C) Basic bleeding control;

(D) Basic fracture management; and

(E) Specific instruction on management of spinal injuries related to the aquatic environment.

(ii) Attendants stationed at entry access areas with basic training including:

(A) Controlling and supervising users in areas where attendant is responsible;

(B) Controlling timing of user entry rate where appropriate;

(C) Use of communication systems; and

(D) Knowledge of CPR by at least one attendant on duty.

(d) Water treatment operators knowledgeable in pool water chemistry, filters, and pumping equipment; and

(e) When gas chlorine is used, the manager or the operator with specific training in:

(i) Proper operation and maintenance procedures of the chlorination equipment;

(ii) Physical and chemical properties of chlorine gas under pressure;

(iii) Use of emergency safety equipment; and

(iv) Proper first aid procedures and response for accidental inhalation of chlorine gas and leaks.

(7) Owners shall ensure adequate emergency response with:

(a) Lifeguards (and attendants where appropriate) located to provide a response time not to exceed thirty seconds to all users in pools;

(b) Backup lifeguard (or attendant where appropriate) provisions so response time is maintained during multiple rescues;

(c) Lifeguards at all pools. Attendants may substitute for lifeguards at pools less than four feet in depth which:

(i) Are strictly used as receiving pools for attractions where users leave the pool immediately after entering; or

(ii) Are strictly used for wading activity; and

(iii) Attendants meet the training requirements specified in subsection (6)(c)(i) of this section.

(d) Provisions for emergency response drills to meet the response time and actions noted in WAC 246-262-080 including:

(i) Drills at least twice each operating season; and

(ii) Documentation of testing.

(8) Owners shall regulate activities of users and spectators including:

(a) Requirement to obey RWCF rules related to health and safety; and

(b) Warning that failure to comply with rules constitutes grounds for exclusion from the premises or management action as necessary.

(9) Owners shall ensure RWCF user control in specific attractions by requiring:

(a) On speed slides, completion of the ride by one user before allowing another user to enter;

(b) On ramp slides, clearing of the slide by one group prior to second group entering; and

(c) On drop slide or tube, clearing of the pool entry area prior to allowing another user to enter.

(10) Owners shall monitor various environmental conditions which affect facility safety. Weather conditions, including electrical storms, fog, wind, sun glare creating

visibility problems, and other such factors shall be evaluated. Appropriate action shall be taken in response to these factors to ensure user safety.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-080, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-090, filed 6/22/88.]

**WAC 246-262-090 Monitoring, reporting, and recordkeeping.** (1) Owners shall:

(a) Provide information requested by the department or local health officer for statewide injury and illness surveillance reports; and

(b) Notify the department or local health officer within forty-eight hours of any drowning, near drowning, death, or serious injury or illness occurring at the RWCF.

(2) Owners shall monitor and maintain records on the following for at least three years:

(a) Water quality conditions including:

(i) Testing for residual disinfectant concentration three or more different periods daily, except once a day if electronic monitoring and control equipment is provided;

(ii) Hydrogen ion (pH) concentration tested daily;

(iii) Alkalinity monitored at least weekly;

(iv) Any other chemical added to water including alum, algicides, cyanurate compounds, acid, and alkalinity compounds, etc.;

(v) Pressure or vacuum gauge readings; and

(vi) Any gross contamination to the water (i.e., vomiting, feces, etc.).

(b) Routine preventive maintenance provided on all hazardous equipment, e.g., gas chlorination equipment;

(c) Number of users of the facility; and

(d) Credentials, training, and/or certifications required for personnel per WAC 246-262-080 of this chapter.

(3) Owners shall notify the department in the event an incident occurs with a chemical creating a problem of health or safety significance (e.g., chlorine gas leak).

(4) Owners shall make records available for department review upon request.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-090, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-100, filed 6/22/88.]

**WAC 246-262-100 Inspection.** (1) Owners shall permit the department or local health officer to perform on-site inspections as necessary in the discretion of the enforcing agency to ensure compliance with standards in chapter 70.90 RCW and chapter 246-262 WAC.

(2) Employees of the enforcing agency shall provide appropriate identification when entering for purpose of routine inspections.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-100, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-100, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-110, filed 6/22/88.]

**WAC 246-262-120 Enforcement.** (1) The department or, if enforcement responsibility has been assigned under a joint plan of operation, the local health officer:

(a) Shall enforce the rules of chapter 246-262 WAC; or

(b) May refer cases within their jurisdiction to the local prosecutor's office or office of the attorney general, as appropriate.

(2) When a RWCF is in violation of provisions of chapter 70.90 RCW or the rules of chapter 246-262 WAC, appropriate enforcement action may be initiated by the department, local health officer, local prosecutor's office, or office of the attorney general. Enforcement actions may include any one or a combination of the following:

(a) Informal administrative conferences, convened at the request of the department, local health officer, or owner, to explore facts and resolve problems;

(b) Orders directed to the owner and/or operator of the RWCF and/or the person causing or responsible for the violation of the rules of chapter 246-262 WAC;

(c) Imposition of civil penalties of up to five hundred dollars per violation per day as authorized under RCW 70.90.200;

(d) Denial, suspension, or revocation of operating permits; and

(e) Civil or criminal action initiated by the local prosecutor's office or by the office of the attorney general.

(3) Orders authorized under this section include, but are not limited to, the following:

(a) Orders requiring corrective measures necessary to effect compliance with chapter 246-262 WAC or chapter 70.90 RCW. Such orders may or may not include a compliance schedule; and

(b) Orders to stop work and/or refrain from using any RWCF or portion thereof or improvement thereto until all permits, certifications, and approvals required by statute or rule are obtained.

(4) An order issued under this section shall:

(a) Be in writing;

(b) Name the facility and the person or persons to whom the order is directed;

(c) Briefly describe each action or inaction constituting a violation of chapter 70.90 RCW or the rules of chapter 246-262 WAC;

(d) Specify any required corrective action or forbearance together with a schedule for completing such corrective action, if applicable;

(e) Provide notice, as appropriate, that continued or repeated violation may subject the violator to:

(i) Civil penalties of up to five hundred dollars;

(ii) Denial, suspension, or revocation of the facilities operating permit; or

(iii) Referral to the office of the county prosecutor or attorney general.

(f) Provide the name, business address, and phone number of an appropriate staff person who may be contacted in regard to an order.

(5) Service of an order shall be made:

(a) Personally, unless otherwise provided by law; or

(b) By certified mail return receipt requested.

(6) Under such rules or policies as the department or local health officer may adopt, civil penalties of up to five hundred dollars per violation per day may be assessed against any person violating the provisions of chapter 70.90 RCW or chapter 246-262 WAC.

(7) The department or local health officer shall have cause to deny the application or reapplication for an operating permit or to revoke or suspend a required operating permit of any person who has:

(a) Previously had:

(i) An operating permit suspended or revoked; or

(ii) An application for an operating permit denied for any reason whether in this state or any other state.

(b) Failed or refused to comply with the provisions of chapter 70.90 RCW, chapter 246-262 WAC, or any other statutory provision or rule regulating the construction or operation of a RWCF; or

(c) Obtained or attempted to obtain an operating permit or any other required certificate or approval by fraudulent means or misrepresentation.

(8) For the purposes of subsection (7) of this section, a person shall be defined to include:

(a) Applicant;

(b) Reapplicant;

(c) Permit holder; or

(d) Any individual associated with subsection (8)(a), (b), or (c) of this section including, but not limited to:

(i) Board members,

(ii) Officers,

(iii) Managers,

(iv) Partners,

(v) Association members,

(vi) Employees,

(vii) Agents, and in addition

(viii) Third persons acting with the knowledge of such persons.

(9) The department or local health officer may summarily suspend an operating permit, other required permit, license, or certification without a prior hearing if the department or local health officer:

(a) Finds that public health, safety, or welfare imperatively requires emergency action; and

(b) Incorporates a finding to that effect in its notice or order.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-120, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-120, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 34.05 RCW and RCW 70.90.120. 90-06-049 (Order 040), § 248-97-130, filed 3/2/90, effective 3/2/90. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-130, filed 6/22/88.]

**WAC 246-262-130 Notice of decision--Adjudicative proceeding.** (1) A hearing requested to contest a local health officer's action shall be governed by the local health jurisdiction's rules for hearings.

(2)(a) The department's notice of a denial, suspension, modification, or revocation of a license shall be consistent with section 377, chapter 3, Laws of 1991. An applicant or license holder has the right to an adjudicative proceeding to contest the decision.

(b) A department notice of imposition of a civil fine shall be consistent with section 378, chapter 3, Laws of 1991. A person the department imposes a civil fine on has the right to an adjudicative proceeding to contest the decision.

(c) A license applicant or holder or a person the department imposes a fine on contesting a department decision shall within twenty-eight days of receipt of the decision:

(i) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street, S.E., Mailstop: EY-17, Olympia, WA 98504; and

(ii) Include in or with the application:

(A) A specific statement of the issue or issues and law involved;

(B) The grounds for contesting the department decision; and

(C) A copy of the contested department decision.

(d) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-130, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-130, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 34.05 RCW and RCW 70.90.120. 90-06-049 (Order 040), § 248-97-135, filed 3/2/90, effective 3/2/90.]

**WAC 246-262-150 Compliance.** Existing RWCFs not complying with the design, construction, and equipment requirements outlined in WAC 246-202-060 and 246-262-070 of these regulations may continue in use, provided the facility is operated in continuous compliance of the safety, sanitation, and water quality provisions of chapter 246-292 WAC as outlined in WAC 246-262-050, 246-262-080, 246-262-090, and 246-262-140.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-150, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-150, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-150, filed 6/22/88.]

**WAC 246-262-160 Variance.** The board may grant a variance from requirements of chapter 246-262 WAC if, in the sole discretion of the board, data and/or research provides sufficient evidence that the RWCF (attraction, device, equipment, procedure, etc.), will adequately protect public health and safety, as well as water quality.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-160, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-160, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-160, filed 6/22/88.]

**WAC 246-262-170 Innovations--Substitutions.** The board authorizes the department:

(1) To review new innovations, and if accepted for use, prepare appropriate amendments to chapter 246-262 WAC.

(2) To allow substitution of equipment, facilities, or procedures required by chapter 246-262 WAC when, in the sole discretion of the department, data and/or research provide sufficient evidence that such substitution is equivalent to the requirement and will adequately provide for the protection of the public health and safety of persons using the RWCF.

[Statutory Authority: RCW 70.90.120. 92-02-020 (Order 226B), § 246-262-170, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-262-170, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.90.120. 88-13-125 (Order 311), § 248-97-170, filed 6/22/88.]

### Chapter 246-264 WAC

#### WATER SAFETY TEACHING STATIONS

##### WAC

|             |   |
|-------------|---|
| 246-264-020 | Scope of chapter—Size and depth.                                  |
| 246-264-030 | Approval for construction.  |
| 246-264-050 | Plans and specifications—Approval—Notice to local health officer. |
| 246-264-080 | Enclosure and cover.  |
| 246-264-120 | Water quality.  |
| 246-264-140 | Water recirculation.  |
| 246-264-150 | Operation and sanitary control.                                   |
| 246-264-200 | Health menace prohibited.   |

**WAC 246-264-020 Scope of chapter—Size and depth.** Water safety teaching stations not more than thirty-six inches in depth and having a surface area not greater than eight hundred square feet shall comply with the requirements of this chapter. Water safety teaching stations deeper than thirty-six inches or larger than eight hundred square feet shall comply with the requirements for general use pools.

[Statutory Authority: RCW 43.20.050. 92-02-020 (Order 226B), § 246-264-020, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-264-020, filed 12/27/90, effective 1/31/91; Order 34, § 248-132-020, filed 6/26/70.]

**WAC 246-264-030 Approval for construction.** The design, construction, and equipment of a water safety teaching station must be approved by the department of health, and shall meet the requirements of WAC 246-260-090 (1); (2); (8)(b), (20)(b), (21), (22), (23), (27), (29)(a)(vi), and (30).

[Statutory Authority: RCW 43.20.050. 92-02-020 (Order 226B), § 246-264-030, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-264-030, filed 12/27/90, effective 1/31/91; Order 34, § 248-132-030, filed 6/26/70.]

**WAC 246-264-050 Plans and specifications—Approval—Notice to local health officer.** Plans and specifications for sites and appurtenances for water safety teaching stations shall be submitted to and receive the approval of the secretary (or authorized representative), of the department of health. Subsequently, the local health officer shall be notified thirty days prior to moving the pool to a new location so that a site inspection can be made by the local health officer: *Provided*, That

one day's notice is sufficient when the pool is moved to a site previously and currently approved by the local health department.

[Statutory Authority: RCW 43.20.050. 92-02-020 (Order 226B), § 246-264-050, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-264-050, filed 12/27/90, effective 1/31/91; Order 34, § 248-132-050, filed 6/26/70.]

**WAC 246-264-080 Enclosure and cover.** Unless housed in a building or other protective structure, the water safety teaching station shall be enclosed by a suitable fence or barrier in conformance with WAC 246-260-090(4) to restrict entrance of unauthorized persons, and shall be covered when not in use.

[Statutory Authority: RCW 43.20.050. 92-02-020 (Order 226B), § 246-264-080, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-264-080, filed 12/27/90, effective 1/31/91; Order 34, § 248-132-080, filed 6/26/70.]

**WAC 246-264-120 Water quality.** The water in water safety teaching stations at all times while in use shall meet the requirements pertaining to water quality as outlined in WAC 246-260-070; except, that the turbidity shall not exceed 0.5 JTU (Jackson Turbidity Unit).

[Statutory Authority: RCW 43.20.050. 92-02-020 (Order 226B), § 246-264-120, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-264-120, filed 12/27/90, effective 1/31/91; Order 34, § 248-132-120, filed 6/26/70.]

**WAC 246-264-140 Water recirculation.** Water safety teaching stations shall be so operated that the entire volume of the pool shall be recirculated in not more than four hours. Recirculation facilities shall comply with WAC 246-260-090 (14)(b)(iii).

[Statutory Authority: RCW 43.20.050. 92-02-020 (Order 226B), § 246-264-140, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-264-140, filed 12/27/90, effective 1/31/91; Order 34, § 248-132-140, filed 6/26/70.]

**WAC 246-264-150 Operation and sanitary control.** In the operation of water safety teaching stations, the requirement pertaining to operation and sanitary control of swimming pools as outlined in WAC 246-260-100 (1), (2), (3), (4), (5), (7), (8), and (9) shall apply.

[Statutory Authority: RCW 43.20.050. 92-02-020 (Order 226B), § 246-264-150, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-264-150, filed 12/27/90, effective 1/31/91; Order 34, § 248-132-150, filed 6/26/70.]

**WAC 246-264-200 Health menace prohibited.** No water safety teaching station shall be maintained or operated when such pool is determined by the local health officer, subject to the review of the secretary (or authorized representative), department of health, to constitute a menace to health.

[Statutory Authority: RCW 43.20.050. 92-02-020 (Order 226B), § 246-264-200, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-264-200, filed 12/27/90, effective 1/31/91; Order 34, § 248-132-200, filed 6/26/70.]

**Chapter 246-270 WAC**  
**SEWER SYSTEMS—CERTIFICATION OF**  
**NECESSITY FOR WATER DISTRICT**  
**INVOLVEMENT**

**WAC**

|             |   |
|-------------|---|
| 246-270-010 | Definitions.  |
| 246-270-020 | Application content.  |
| 246-270-050 | Notice of decision—Adjudicative proceeding.                 |
| 246-270-060 | Limitation of an approval and a certification of necessity. |

**WAC 246-270-010 Definitions.** For purposes of this chapter, the following definitions are applicable:

(1) "Approval and a certification of necessity" shall mean an order of the department which gives approval to a water district to establish, maintain, construct and operate a sewer system in a proposed service area in accordance with RCW 57.08.065.

(2) "Board" shall mean the Washington state board of health.

(3) "Department" shall mean the Washington state department of health.

(4) "Drainage basin" shall mean a geographic area drained by a surface stream or body of impounded water together with all tributary surface streams and bodies of impounded surface water.

(5) "Industrial wastes" shall mean the liquids, solids, or other wastes resulting from any process of industry, or from the development of any natural resource.

(6) "Necessity" shall mean a reasonable need and not mean an indispensable need.

(7) "Proposed service area" shall mean the area proposed to be served with a sewer system by the applicant water district.

(8) "Sewage" shall mean the water-carried waste products or discharge from human beings or other wastes from residences, public or private buildings, or industrial plants, together with such ground, surface or storm waters as may be present.

(9) "Sewer entities" shall mean any municipal or public corporations which by law are entitled to construct and operate a sewer system.

(10) "Sewer system" shall mean a system of sewers and appurtenances for the collection, transportation, treatment and disposal of sewage and industrial wastes.

[Statutory Authority: RCW 43.70.040 and 57.08.065. 92-02-018 (Order 224), § 246-270-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-270-010, filed 12/27/90, effective 1/31/91; Order 6, § 248-91-010, filed 10/16/68; Emergency Order 3, § 248-91-010, filed 8/2/68.]

**WAC 246-270-020 Application content.** An application for an approval and a certification of necessity must be presented to the department and shall include, but not be limited to, the following considerations:

(1) A general statement of the present and future sewage problems in the proposed area of service.

(2) A consideration of the relationship of the district to contiguous, nearby or overlapping sewer entities.

(3) Service areas considering reasonable drainage basin oriented planning.

(4) Population forecasts as a basis of sewer system design in the proposed service area.

(5) A layout map showing major trunk lines and interceptor lines including the drainage area to be served within and outside of the boundaries of the water district.

(6) The methods of interception and disposal of sewage.

(7) The projected completion time for the sewer system.

(8) An affidavit signed by an officer of the applicant water district, stating that all persons, parties or entities have been given the notice required by WAC 246-270-030.

(9) A summary setting forth the reasons why the applicant water district is better suited to provide a sewer system within the proposed service area than a contiguous or adjacent sewer entity.

[Statutory Authority: RCW 43.70.040 and 57.08.065. 92-02-018 (Order 224), § 246-270-020, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-270-020, filed 12/27/90, effective 1/31/91; Order 6, § 248-91-030, filed 10/16/68; Emergency Order 3, § 248-91-030, filed 8/2/68.]

**WAC 246-270-050 Notice of decision—Adjudicative proceeding.** (1) The department's notice of a denial, suspension, modification, or revocation of an approval and certificate of necessity shall be consistent with RCW 43.70.115. An applicant or certificate holder has the right to an adjudicative proceeding to contest the decision.

(2) A certificate applicant or holder contesting a department certificate decision shall within twenty-eight days of receipt of the decision:

(a) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and

(b) Include in or with the application:

(i) A specific statement of the issue or issues and law involved;

(ii) The grounds for contesting the department decision; and

(iii) A copy of the contested department decision.

(3) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

[Statutory Authority: RCW 43.70.040, 34.05.220 and 57.08.065. 92-02-018 (Order 224), § 246-270-050, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-270-050, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 34.05 RCW, RCW 34.05.220 (1)(a) and 1st ex.s. c 9 § 106. 90-06-019 (Order 039), § 248-91-060, filed 2/28/90, effective 3/1/90; Order 6, § 248-91-060, filed 10/16/68; Emergency Order 3, § 248-91-060, filed 8/2/68.]

**WAC 246-270-060 Limitation of an approval and a certification of necessity.** The granting of an approval and a certification of necessity by the department shall

only constitute approval to establish, maintain, construct, and operate a sewer system within the proposed service area requested in the initial application for an approval and a certification of necessity, and shall in no way constitute approval or authority to establish, maintain, construct and operate a sewer system in any area which may be annexed at some future time by the applicant water district.

The granting of an approval and a certification of necessity by the department does not constitute approval of the engineering report or plans and specifications of any sewer system, and all plans and specifications and the proposed method of operation and maintenance for any sewer system must be approved by the department pursuant to WAC 246-271-050.

[Statutory Authority: RCW 43.70.040 and 57.08.065. 92-02-018 (Order 224), § 246-270-060, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-270-060, filed 12/27/90, effective 1/31/91; Order 6, § 248-91-070, filed 10/16/68.]

| 246-271-090 | Operation of sewage treatment plants—Disinfection.               |
| 246-271-100 | Irrigation with sewage.  |
| 246-271-110 | Use of sewage sludge for fertilizer.                             |
| 246-271-130 | Appendix—Definitions.  |
| 246-271-140 | Appendix—Report—Sewage system.                                   |
| 246-271-180 | Appendix—Preliminary report, industrial waste treatment works.   |

**WAC 246-271-020 Prohibited methods of sewage disposal.** No sewage or industrial waste, or components thereof, shall be placed or permitted to be placed, or permitted to flow onto the surface of the ground, or into any waters of the state in any manner determined by the secretary to be prejudicially affecting a domestic water supply, or otherwise endangering the health and well-being of the people of the state.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-020, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-020, filed 12/27/90, effective 1/31/91; Regulation .92.010, effective 3/11/60.]

**WAC 246-271-030 Investigative and order powers of secretary.** The secretary shall investigate the methods of sewage and industrial waste disposal and if such may endanger a domestic water supply, or in any other way endanger the health or well-being of the people of the state, the secretary shall issue and enforce such orders as may be necessary to correct the condition.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-030, filed 12/23/91, effective 1/23/92; 91-02-051 (Order

124B), recodified as § 246-271-030, filed 12/27/90, effective 1/31/91; Regulation .92.020, effective 3/11/60.]

**WAC 246-271-040 Plans for sewage systems.** Report, general layout map and specifications – Every owner or authorized representative shall make a comprehensive study of the proposed sewage system and prepare and submit to the department a copy of a report, a general layout map and general construction specifications of the proposed public sewage system. Written approval of this report, general layout map and general construction specifications shall be obtained from the department before any further construction, alterations or additions are made to the system or, in case of a new system, before such system is constructed except as provided in subsection (1) of this section. After such approval has been received the owner shall not be required to submit any further plans and specifications for any part of the sewage system covered by the general layout map except as required by subsections (2), (3), and (4) of this section, but the owner shall notify the department of any portion of the system to be constructed and indicate its position on the approved general layout map. (The specifications may be submitted at the time of notification of construction.) The report and general layout map shall include but not be limited to the items listed under those headings in the appendix.

(1) In lieu of an approved report, general layout map, and specifications, any owner or authorized representative shall submit a copy of a report, a plot plan, and specifications of each new sewage system or alterations or additions to any existing sewage system and receive written approval before construction is started. The report and plot plan shall include but not be limited to those items listed in the appendix.

(2) Whether or not a report and general layout map have been approved, if the system does not include adequate sewage treatment works as determined by the department, written approval for the construction of each addition or alteration of the sewage system must be obtained from the department before construction is started.

(3) In case an addition is to be made to a sewage system and this addition is not a part of an approved general layout map, the owner shall submit a copy of a revised general layout map or a plot plan of the area to the department and receive written approval before construction is started.

(4) Every owner shall submit a set of detailed plans and specifications of all overflow or bypass structures, pipe outlets and pumping stations with overflow structures, showing the quantities of flow for which they are designed and shall receive written approval from the department before construction is started.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-040, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-040, filed 12/27/90, effective 1/31/91; Regulation .92.030, effective 3/11/60.]

**WAC 246-271-050 Plans for sewage treatment works. Engineering report of sewage treatment works –** Before detailed plans and specifications for new sewage

treatment works or major extensions, alterations or improvements to existing sewage treatment works are prepared, every owner or authorized agent shall submit one copy of a preliminary engineering report to the department and receive written approval. This report shall include the items listed under "scope of the engineering report" in the appendix.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-050, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-050, filed 12/27/90, effective 1/31/91; Order 72, § 248-92-040, filed 4/11/72; Regulation .92.040, effective 3/11/60.]

**WAC 246-271-060 Plans for sewage treatment works--Requirements for engineers.** All plans for new sewage treatment plants, major changes or additions to existing systems or plants shall be prepared under the supervision of a professional engineer licensed in accordance with chapter 283, Laws of 1947 (chapter 18.43 RCW). All copies of plans submitted to the department for review shall bear the seal of the professional engineer under whose supervision they have been prepared.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-060, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-060, filed 12/27/90, effective 1/31/91; Regulation .92.050, effective 3/11/60.]

**WAC 246-271-070 Operation of sewage treatment plants--Efficiency.** (1) **Efficient operation** - All sewage treatment plants shall be operated at their highest practical efficiency at all times. If, after investigation by the department, it is determined that any sewage treatment works is, because of defective design, inadequacy, incompetent supervision or inefficient operation, causing unsatisfactory conditions in the waters into which the effluent is discharged or otherwise interfering with the legitimate uses of such waters or causes a menace to public health, the owner shall make such changes in the plant or its operation as are necessary to produce satisfactory results. These changes shall be made within such time limits as are set by the department.

(2) **Records** - The owner shall make such tests and keep such records as are necessary to assure the effective operation of the sewage treatment works, and such records shall be made available to the department.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-070, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-070, filed 12/27/90, effective 1/31/91; Regulation .92.060, effective 3/11/60.]

**WAC 246-271-080 Operation of sewage treatment plants--Freedom from sand and silt.** All sewage systems shall be kept free from obstructions and deposits of sand and silt. All pumping stations in the sewage system shall be effectively maintained to insure continuous operation.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-080, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-080, filed 12/27/90, effective 1/31/91; Regulation .92.070, effective 3/11/60.]

**WAC 246-271-090 Operation of sewage treatment plants--Disinfection.** Effective disinfection of sewage

discharges shall be provided in accordance with the determination of the department. If at any time effective disinfection cannot be accomplished due to the breakdown of equipment or the need for bypassing raw or partially treated sewage, or any other reason, the owner shall immediately notify the department by telephone or by facsimile machine.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-090, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-090, filed 12/27/90, effective 1/31/91; Regulation .92.080, effective 3/11/60.]

**WAC 246-271-100 Irrigation with sewage.** Raw sewage, or treatment plant effluent, shall not be used for irrigation, except under conditions as may be prescribed by the department.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-100, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-100, filed 12/27/90, effective 1/31/91; Regulation .92.090, effective 3/11/60.]

**WAC 246-271-110 Use of sewage sludge for fertilizer.** The use of sewage sludge for fertilizing material shall be in compliance with the limitations and procedures as may be prescribed by the department; and the owner shall notify the department of any intended use of sludge as a fertilizing material.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-110, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-110, filed 12/27/90, effective 1/31/91; Regulation .92.100, effective 3/11/60.]

**WAC 246-271-130 Appendix--Definitions.** (1) "Department" - Washington state department of health.

(2) "Detailed plans" of sewage systems - Plans used for the construction of any sewer or sewer system.

(3) "Final plans" of sewage treatment works - Plans used for the construction of any sewage treatment works.

(4) "Industrial wastes" - The liquids, solids, or other wastes resulting from any process of industry, or from the development of any natural resource.

(5) "Industrial waste treatment works" - An arrangement of devices and structures for treating industrial wastes.

(6) "Owner" - The state, county, city, town, village, corporation, firm, company, institution, person or persons owning or operating any sewage system, sewage treatment plant, or industrial waste disposal system or treatment plant.

(7) "Pipe outlet" - A pipe line which conveys the effluent from a reservoir, sewage treatment plant, or other structure to its point of discharge.

(8) "Pumping station" - A station housing sewage pumps, and their appurtenances.

(9) "Secretary" - Secretary of the Washington state department of health or the secretary's authorized designee.

(10) "Sewage" - The water-carried waste products or discharge from human beings or other wastes from residences, public or private buildings, together with such ground, surface or storm water as may be present.

(11) "Sewage system" – A system of sewers and appurtenances for the collection, transportation, and pumping of sewage and industrial wastes.

(12) "Sewage treatment works" – An arrangement of devices and structures for treating sewage, industrial wastes, and sludge. Sometimes used as synonymous with sewage treatment plant.

(13) "Sewage works" – A comprehensive term which includes facilities for collecting, pumping, treating, and disposing of sewage; the sewage system and the sewage treatment works.

(14) "Sewer" – A pipe or conduit; generally closed, but normally not flowing full, for carrying sewage and other waste liquids.

(15) "Sewer outlet" – The point of final discharge of sewage or treatment plant effluent.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-130, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-130, filed 12/27/90, effective 1/31/91; Public Sewage Appendix, effective 3/11/60.]

**WAC 246-271-140 Appendix--Report--Sewage system.** The "report" shall include: –

(1) A description of the nature and extent of the area included in the present system (if any) and the area and extent to which plans provide sewage works for future development.

(2) The population trend and an estimate of future population to be served.

(3) A statement regarding the present and expected future quantity and character of sewage, including any industrial wastes which may be present or expected in the sewage system.

(4) A discussion of limitations placed on infiltration and the infiltration problem.

(5) A statement regarding provisions for treatment.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-140, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-140, filed 12/27/90, effective 1/31/91; Public Sewage Appendix, effective 3/11/60.]

**WAC 246-271-180 Appendix--Preliminary report, industrial waste treatment works.** The preliminary report on industrial waste disposal or treatment facilities shall include the following items where pertinent –

(1) Type of industry.

(2) Kind and quantity of finished products.

(3) The amount of process waste and its sources.

(4) The quantity of unpolluted water, such as cooling water, etc., and the provision for segregation for separate discharge.

(5) Description of the waste, including if possible a chemical analysis.

(6) The amount and kind of chemicals used in the process, if any.

(7) The basic design data of the treatment units.

(8) All necessary maps and layout sketches, including any flow diagrams.

(9) Results to be expected from the treatment process.

(10) All data necessary to indicate the location of the outlet pipe and method of diffusing the waste into the receiving water.

(11) If any domestic sewage is to be disposed of through the system, a brief description in compliance with the provisions of WAC 246-271-030 should be included.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-271-180, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-271-180, filed 12/27/90, effective 1/31/91; Public Sewage Appendix, effective 3/11/60.]

## Chapter 246-272 WAC ON-SITE SEWAGE SYSTEM

### WAC

|             |   |
|-------------|---|
| 246-272-010 | Definitions.                                |
| 246-272-020 | Local regulation.                           |
| 246-272-030 | Applicability.                              |
| 246-272-060 | No surface discharge.                       |
| 246-272-080 | Larger on-site sewage systems.              |
| 246-272-100 | Minimum land area requirement.              |
| 246-272-110 | Determination of site characteristics.      |
| 246-272-120 | Subdivision and individual site review.     |
| 246-272-130 | Larger tract requirements.                  |
| 246-272-150 | Design.                                     |
| 246-272-160 | Repair of failures along marine shorelines. |
| 246-272-170 | Marine expansions.                          |
| 246-272-190 | Inspection.                                 |

**WAC 246-272-010 Definitions.** (1) "Alternative system" means any on-site sewage system consisting of treatment and/or disposal components other than a septic tank and a subsurface soil absorption system (SSAS).

(2) "Approved" means acceptable by the health officer or department as stated in writing.

(3) "Cover" means soil material that is used to cover a subsurface disposal area.

(4) "Cuts and/or banks" means any naturally occurring or man-formed slope which is greater than one hundred percent (forty-five degrees) and extends vertically at least five feet from the toe of the slope to the top of the slope as follows:

(5) "Department" means the Washington state department of health or health officer if the approval authority for larger on-site sewage systems under WAC 246-272-080 has been delegated by agreement.

(6) "Experimental system" means any alternative on-site system excluding a larger system with no guidelines established by the technical review committee as per WAC 246-272-040.

(7) "Gross land area" means a lot area which is bounded by the centerline of adjoining road or street

right-of-ways within the boundaries of the proposed development.

(8) "Ground water" means a subsurface water occupying the zone of saturation, permanently, seasonally, or as the result of the tides, (the top surface of which is commonly referred to as the water table) which may be demonstrated by one or all of the following methods:

(a) Water seeping into or standing in an open excavation from the soil surrounding the excavation.

(b) Spots or blotches of different color or shades of color interspersed with a dominant color in soil, commonly referred to as mottling. This is caused by intermittent periods of saturation and drying, and may be indicative of poor aeration and impeded drainage.

(9) "Health officer" means the health officer of the city, county, or city-county health department or district or a representative authorized by and under the direct supervision of the health officer.

(10) "Larger on-site sewage system" means any on-site sewage system with design flows, at any common point, between 3,500 and 14,500 gallons/day. On-site sewage systems receiving state or federal grants, or systems using mechanical treatment or lagoons with ultimate design flows above 3,500 gallons/day are excluded from this definition. Excluded systems are governed by chapter 173-240 WAC which is administered by the Washington state department of ecology.

(11) "Local board of health" means the city, town, county, city-county, or district board of health as defined in chapters 70.05, 70.08, and 70.46 RCW.

(12) "Marine expansion" means any change to a structure or in the use of a structure that may cause a marine shoreline on-site sewage system to exceed its capacity. Changes that may constitute expansion include, but are not limited to:

(a) An increase in the structure's volume of generated wastewater;

(b) Higher strength of generated sewage; or

(c) Any other change adversely impacting the treatment or disposal of sewage in the existing on-site sewage system or in the replacement area.

(13) "Marine failure" means a marine shoreline on-site sewage system threatening the public health by failing to adequately treat the sewage and/or by creating a potential for the public coming in direct contact with sewage. Examples include, but are not limited to:

(a) Sewage contaminating surface or ground water;

(b) Sewage on the surface of the ground;

(c) Sewage leaking from a wastewater container;

(d) Sewage backing up into a structure or in the on-site sewage system caused by slow absorption of sewage in the SSAS; or

(e) Cesspools or seepage pits in areas of groundwater or surface water quality concerns.

(14) "Marine shoreline" means property adjacent to marine water.

(15) "Nonconforming repair" means the permitted repair or replacement of a marine shoreline on-site sewage system not meeting the definition of a standard marine system.

(16) "On-site sewage system" means any system of piping, treatment devices, or other facilities that convey, store, treat, or dispose of sewage on the property where it originates or on adjacent or nearby property under the control of the user where the system is not connected to a public sewer system.

(17) "Ordinary high-water mark" means the mark on all lakes, streams, and tidal waters, which will be found by examining the beds and banks and ascertaining where the presence and action of waters are so common and usual, and so long continued in all ordinary years, as to mark upon the soil a character distinct from that of the abutting upland, in respect to vegetation, as that condition exists on the effective date of this chapter, or as it may naturally change thereafter: *Provided*, That in any area where the ordinary high-water mark cannot be found, the ordinary high-water mark adjoining saltwater shall be the line of mean higher high tide and the ordinary high-water mark adjoining freshwater shall be the line of mean high water.

(18) "Percolation test" means a soil test performed at the depth of the bottom of a proposed subsurface soil absorption system estimating the water absorption capability of the soil. The results are normally expressed as the rate in minutes at which one inch of water is absorbed.

(19) "Person" means any individual, corporation, company, association, society, firm, partnership, joint stock company or any branch of state or local government.

(20) "Proprietary device or method" means any device or method classified as an alternative system or a component thereof that is held under a patent, trademark or copyright.

(21) "Public sewer system" means a sewerage system owned or operated by a city, town, municipal corporation, county, political subdivision of the state, or other approved ownership consisting of a collection system and necessary trunks, pumping facilities and a means of final treatment and disposal and approved or under permit from the department of ecology.

(22) "Restrictive layer" means a layer impeding the movement of water, air, and growth of plant roots. Examples of such layers or conditions are groundwater tables, hardpans, claypans, fragipans, compacted soil, bedrock and clayey soil.

(23) "Septic tank" means a watertight pretreatment receptacle receiving the discharge of sewage from a building sewer or sewers, and designed and constructed to permit separation of settleable and floating solids from the liquid, detention and digestion of the organic matter, prior to discharge of the liquid portion.

(24) "Sewage" means the water-carried human or domestic waste from residences, buildings, industrial establishments or other facilities, together with ground water infiltration, that may be present.

(25) "Soil log" means an excavation in soil of sufficient size and depth allowing adequate determinations of the soil's characteristics together with the detailed description of the soil's texture, structure, color, bulk density or compaction, water absorption capabilities or

permeability, and/or other characteristics providing information on the soil's capacity to act as an acceptable treatment and disposal medium for sewage.

(26) "Standard marine system" means a marine shoreline on-site sewage system meeting all the WAC 246-272-140 and 246-272-150 requirements, except the following:

- (a) The vertical separation shall:
  - (i) Be three feet when the SSAS is gravity fed;
  - (ii) Be two feet when the SSAS has pressure distribution per technical review committee guidelines; or
  - (iii) Meet the technical review committee alternative system guidelines.

(b) A minimum horizontal separation of fifty feet shall exist between the SSAS or other soil absorption component and the ordinary high-water mark.

(27) "Subdivision" means a division of land, as defined in chapter 58.17 RCW, now or as hereafter amended, including both long and short subdivisions.

(28) "Subsurface soil absorption system (SSAS)" means a system consisting of trenches (three feet or less in width) or beds (more than three feet in width), together with the piping and gravel, designed and installed in original undisturbed soil for the purpose of receiving effluent from a septic tank or other pretreatment device and transmitting it into the soil.

(29) "Surface water" means any body of water, whether fresh or marine, flowing or contained in natural or artificial depressions for significant periods of the year. Such bodies include, but are not limited to, natural and artificial lakes, ponds, rivers, streams, swamps, marshes, and tidal waters.

(30) "Treatment standard 1" means a thirty-day average of less than 10 mg/l of BOD5 and 10 mg/l of total suspended solids and a thirty-day geometric mean of less than 200 fecal coliform/100 ml.

(31) "Treatment standard 2" means a thirty-day average of less than 10 mg/l of BOD5 and 10 mg/l of total suspended solids and a thirty-day geometric mean of less than 800 fecal coliform/100 ml.

(32) "Type 1 soil" means soil with a texture as noted in WAC 246-272-110 (Determination of site characteristics) or other soils where conditions are such that the treatment potential is ineffective in retaining and/or removing substances of public health significance to underground sources of drinking water.

(33) "Vertical separation" means the depth of unsaturated, original, undisturbed soil of types 2-6 that exists between the bottom of a SSAS and a restrictive layer or water table.

(34) "Wave barrier" means a bulkhead of adequate height and construction preventing backwash of on-site sewage system components from wave action resulting from inclement weather and/or watercraft during extreme high tides.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-272-010, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-010, filed 12/27/90, effective 1/31/91. Statutory Authority: 1989 c 349. 89-21-026 (Order 332), § 248-96-020, filed 10/10/89, effective 11/10/89. Statutory Authority: RCW 43.20.050. 83-13-014 (Order 259), § 248-96-020, filed 6/3/83; 81-05-028 (Order 208), § 248-96-020, filed 2/18/81; 80-

04-038 (Order 196), § 248-96-020, filed 3/20/80; Order 101, § 248-96-020, filed 6/10/74.]

**WAC 246-272-020 Local regulation.** (1) Local boards of health may adopt local rules and regulations governing on-site sewage systems. Local rules, regulations, and guidelines shall be consistent with, and at least as stringent as, the state board of health regulations. Local rules and regulations and any subsequent revisions shall be approved by the department in accordance with the procedure outlined in subsections (2) through (7) of this section.

Beginning July 1, 1984, the health officer shall begin to enforce these regulations, unless local rules and regulations have been approved by the department and adopted locally. This shall not preclude the adoption of rules and regulations by local boards of health after June, 1984.

(2) Local boards of health shall submit to the department for review and approval a copy of proposed local regulations.

(3) Upon reviewing the local regulations, the department shall consider all factors relevant to the administration of the local health department's program.

(4) The department shall have ninety days from the date of receipt of the local regulations to either approve or disapprove the proposal. Failure of the department to approve or disapprove within the ninety-day period results in the approval of the local regulation.

(5) Locally proposed or adopted regulations or revisions will become effective after the regulations or revisions have received approval from the department or ninety days after receipt by the department, whichever comes first. The local health department shall provide to the department a copy of the adopted local regulations.

(6) If the department determines that the local regulations are not consistent with the purpose and objectives of the state board of health regulations, the department shall provide in writing to the local board of health, the specific reasons for not approving the local regulations. Decisions may be appealed to the state board of health within one hundred twenty days after the disapproval has been received by the local board of health. Resubmission of revised local regulations may occur any time after disapproval has been received.

(7) Local rules and regulations shall include special requirements for areas within their jurisdiction identified as having type 1 soils. The requirements within these regulations shall be commensurate with the degree of protection deemed necessary for the underground source of drinking water by the health officer and the department. The minimum requirement shall be as noted in WAC 246-272-100 (Minimum land area requirement).

(8) Nothing in these regulations shall prohibit the adoption and enforcement of more stringent regulations by local health departments where such regulations are needed to protect the public health.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-272-020, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-020, filed 12/27/90, effective 1/31/91; 83-13-014 (Order 259), § 248-96-025, filed 6/3/83.]

**WAC 246-272-030 Applicability.** These regulations shall apply to all on-site sewage systems except the following:

(1) New construction for which a permit was issued prior to July 1, 1984, or adoption of local regulations and is still valid. The regulations in effect at the time the permit was issued shall apply, except where portions of the new regulations are less stringent;

(2) An extension, alteration, or replacement necessitated by the failure of an existing on-site sewage system and is not on a marine shoreline. These regulations shall be applied to the maximum extent permitted by the site. A permit shall be required as per WAC 246-272-090;

(3) Permit applications for systems located in subdivisions having received preliminary approval or having been filed for record between July 1, 1979, and June 30, 1984 (chapter 58.17 RCW). The regulations in effect at the time preliminary or final approval was given shall apply, unless the local board of health finds a change in conditions creates a serious threat to the public health; and

(4) Facilities constructed or operated in accordance with a permit or approval issued by the Washington state department of ecology. Where these regulations may be in conflict with chapters 90.48 or 70.95B RCW, said RCW shall govern.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-272-030, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-030, filed 12/27/90, effective 1/31/91. Statutory Authority: 1989 c 349. 89-21-026 (Order 332), § 248-96-040, filed 10/10/89, effective 11/10/89. Statutory Authority: RCW 43.20.050. 83-13-014 (Order 259), § 248-96-040, filed 6/3/83; 80-04-038 (Order 196), § 248-96-040, filed 3/20/80; Order 101, § 248-96-040, filed 6/10/74.]

**WAC 246-272-060 No surface discharge.** Sewage from any on-site sewage system, excluding septic tank waste as per WAC 246-272-220 (Disposal of septic tank waste), shall not be discharged to surface water or upon the surface of the ground.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-272-060, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-060, filed 12/27/90, effective 1/31/91; 83-13-014 (Order 259), § 248-96-050, filed 6/3/83; Order 101, § 248-96-050, filed 6/10/74.]

**WAC 246-272-080 Larger on-site sewage systems.** Plans and specifications for new construction or repairs or expansions to existing larger on-site sewage systems, bearing the signature of the owner or an authorized representative, shall be submitted to and approved by the department prior to construction. By a mutual agreement with the department, local health departments may assume plan review and approval authority for larger on-site sewage systems. Where the assistance of the health officer in the review of the site and/or the design is requested by the department, fees for service may be charged to the applicant by the health officer: *Provided*, That the authorization for such fees is set forth in local regulations adopted pursuant to this chapter. Submittals, design, and management requirements shall adhere to the following procedures, requirements, and review documents.

(1) **Preliminary report:** Prior to or concurrent with the preparation of detailed plans and specifications for new construction or improvements to a larger on-site sewage system, the person proposing the larger on-site sewage system shall submit to the department for approval a preliminary report addressing the nature and scope of the proposed construction. This report shall include an analysis of the area where the proposed SSAS is to be located to satisfactorily assimilate and treat the proposed sewage quantities for the anticipated life of the system. In addition to those factors identified in WAC 246-272-100 (1)(b), the preliminary report shall contain, but need not be limited to, consideration of the following factors:

- (a) Soil and site evaluation.
- (b) Schedule for phase development.
- (c) Water balance analysis of the drainfield area.
- (d) Overall effects of the proposed sewage system upon the surrounding area.
- (e) Local zoning, platting, and building requirements as they relate to sewer utilities.

(2) **Submission of plans and specifications:**

(a) Complete plans and specifications fully describing the larger on-site sewage system shall be submitted to and approved in writing by the department prior to:

- (i) Installation of the system, or
- (ii) Entering into contract for installing a larger on-site sewage system.

The plans and specifications shall be adhered to unless deviations are first submitted to and written approval received from the department. Routine field deviations required during construction need not be submitted for approval but shall be shown on the "as-built" drawings.

(b) Plans submitted for approval shall include the proposed provisions for inspection of the work during construction.

(c) A detailed operation and maintenance manual, fully describing the treatment and disposal systems and outlining routine maintenance procedures for proper operation of the system, shall be submitted together with the plans and specifications.

(3) **Approvals--Period of validity--Renewal:**

(a) Approvals of plans and specifications by the department under this section shall be valid for an initial period of two years commencing with the date of the letter of approval. Lapsed approvals may be renewed for successive one-year periods thereafter at the discretion of the department upon the written request by the applicant.

(b) As a condition of renewal, the department may require the plans and specifications to be revised to conform with the design standards and the requirements of the rules and regulations of this chapter current at the time of request for renewal.

(4) **Requirements for engineers and engineer's construction report:** All preliminary engineering reports and plans and specifications for new larger on-site sewage systems, extensions or alterations, shall be prepared by a professional engineer licensed in the state of Washington in accordance with chapter 18.43 RCW and shall bear

the engineer's seal. Within sixty days following the completion of and prior to the use of any project or portion thereof for which plans and specifications have received the approval of the department, an engineer's construction report shall be submitted to the department and signed by a professional engineer stating the project has been constructed in accordance with the plans and specifications approved by the department. If any changes exist from the approved plans and specifications, "as-built" drawings noting such changes shall be submitted to the department. Where larger on-site systems are reviewed and approved by the health officer, the health officer may also accept preliminary reports, plans and specifications, and construction reports submitted by a registered sanitarian or a designer certified within the health officer's jurisdiction. The professional engineer, registered sanitarian, or certified designer should have expertise in the areas of soils and the design of larger on-site sewage systems.

(5) The review and approval agency shall establish a procedure for construction and final inspections.

(6) Design of the system shall comply with Design Guidelines for Larger On-site Sewage Systems, December 1987, D.S.H.S./D.O.E.

(7) Soil interpretations shall be based upon the Design Manual: On-site Wastewater Treatment and Disposal Systems, United States Environmental Protection Agency, EPA-625/1-80-012, October, 1980.

(8) Management of larger on-site systems shall be provided by an entity approved by the department. The type of entity required and the degree of management

shall be commensurate with the complexity of the system and the site conditions. The management entity shall submit a plan for approval including, but not be limited to, the following:

- (a) Duties of management, including operation and maintenance responsibilities.
- (b) Methods to ensure the continuity and permanency of management's responsibilities.
- (c) Monitoring, recordkeeping, and reporting to the department.
- (d) Rights of purchasers and management.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-272-080, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-080, filed 12/27/90, effective 1/31/91; 83-13-014 (Order 259), § 248-96-075, filed 6/3/83; 80-04-038 (Order 196), § 248-96-075, filed 3/20/80; Order 101, § 248-96-075, filed 6/10/74.]

**WAC 246-272-100 Minimum land area requirement.** (1) For any development approved after June 30, 1984, including but not limited to subdivisions, mobile home parks, multifamily housing, and commercial establishments, where an on-site sewage system is proposed, one of the following methods for determining minimum gross land area requirements shall be used. The minimum gross land area shall exist for each unit volume of sewage (450 gallons per day) or for each single family residence.

(a) **METHOD I.** Table I notes the minimum gross land area required per unit volume or single family residence based upon soil type and the type of water supply.

**TABLE I  
MINIMUM GROSS LAND AREA REQUIRED PER UNIT VOLUME OF SEWAGE OR SINGLE FAMILY RESIDENCE**

| TYPE OF WATER SUPPLY    | SOIL TYPE <sup>1</sup> |                  |                  |                  |                  |                  |
|-------------------------|------------------------|------------------|------------------|------------------|------------------|------------------|
|                         | 1                      | 2                | 3                | 4                | 5                | 6                |
| Public                  | 1<br>acre              | 12,500<br>sq.ft. | 15,000<br>sq.ft. | 18,000<br>sq.ft. | 20,000<br>sq.ft. | 22,000<br>sq.ft. |
| Individual—<br>Each Lot | 2<br>acres             | 1<br>acre        | 1<br>acre        | 1<br>acre        | 2<br>acres       | 2<br>acres       |

<sup>1</sup> Soil types are defined in WAC 246-272-110 (Determination of site characteristics).

**(b) METHOD II.**

(i) On-site sewage systems shall be installed on lots, parcels, or tracts that have a sufficient amount of area with proper soils in which sewage can be retained and treated properly on-site. Justification demonstrating that the development has sufficient area with proper soils to adequately retain and treat sewage on-site shall be provided in a report. The report shall fully support the conclusions reached by the proper analysis of all needed data. All such data shall be contained or referenced. This justification shall be sufficient to enable the health officer to establish minimum gross land area requirements. The minimum gross land area requirement

for each unit volume of sewage or for each single family residence shall be twelve thousand five hundred square feet. Application of this will result in a maximum single family residence density of 3.5 units per acre or for other development a maximum flow density of one thousand five hundred seventy gallons of sewage per acre per day. Factors that must be considered in the report shall include but not be limited to the following:

- (A) Soil type and depth.
- (B) Area drainage, development and/or lot drainage.
- (C) Public health impact on ground and surface water quality.
- (D) Setbacks from property lines, water supplies, etc.

- (E) Source of domestic water.
- (F) Topography, geology, and ground cover.
- (G) Climatic conditions.
- (H) Availability of public sewers.
- (I) Activity or land use, present, and anticipated.
- (J) Growth patterns.
- (K) Reserve areas for additional subsurface disposal.
- (L) Anticipated sewage volume.
- (M) Compliance with zoning and other requirements.
- (N) Possible use of alternative systems or designs.
- (O) Other justification submitted by the developer.

(ii) If the report required in section (1)(b)(i) of this subsection identifies type 1 soils, the health officer may allow a reduction below the requirements noted in Table 1. The health officers and the department shall develop guidelines to be applied when such reductions are considered by July 1, 1984. Until guidelines have been developed, the health officer may permit such reductions only when an alternative system will be used. The alternative system shall provide a degree of treatment to the sewage, before the sewage enters the original, undisturbed soil, equal to or greater than the treatment provided by a mound or sand filter. Mounds and sand filters are defined and the design criteria specified in the appropriate technical review committee guidelines. Until the guidelines have been developed, the resulting gross land area per unit volume of sewage or single family residence shall not be less than one-half acre.

(2) The health officer may reduce land area requirements in this section if the proposed on-site sewage systems are to be located within the boundaries of a recognized sewer utility and where the assessment roll has been finalized.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-272-100, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-100, filed 12/27/90, effective 1/31/91; 83-13-014 (Order 259), § 248-96-090, filed 6/3/83; Order 101, § 248-96-090, filed 6/10/74.]

**WAC 246-272-110 Determination of site characteristics.** (1) Site characteristics shall be determined in accordance with chapter 3 and Appendix A of Design Manual: On-site Wastewater Treatment and Disposal Systems, United States Environmental Protection Agency, Report No. EPA-625/1-80-012, October, 1980, except where modified or in conflict with these regulations.

(2) The textural classification of a soil shall be determined by using normal laboratory and/or field procedures such as particle size analyses and percolation tests. Following are the specific soil textural classifications and soil type designations. The soil textures in Table 7-2 of the design manual referenced in subsection (1) of this section are amended as follows:

| Soil Type      | Soil Textural Classifications <sup>1</sup> |
|----------------|--|
| 1 <sup>2</sup> | Coarse sands or coarser                    |
| 2              | Medium sand                                |
| 3              | Fine sand, loamy sand                      |
| 4              | Sandy loam, loam                           |

| Soil Type | Soil Textural Classifications <sup>1</sup>              |
|-----------|---|
| 5         | Porous, well-developed structure in silt and silt loams |
| 6         | Other silt loams, silty clay loams, and clay loams.     |

<sup>1</sup> According to the United States Department of Agriculture, soil conservation service's soil classification system.

<sup>2</sup> Includes other soils and/or conditions where the treatment potential is ineffective in retaining and/or removing substances of public health significance to underground sources of drinking water.

(3) All site evaluations shall be performed by or under the direct supervision of the health officer, a registered sanitarian, professional engineer, registered soil scientist (American registry of certified professionals in agronomy, crops and soils), or certified designer having knowledge and experience in the areas of soil and wastewater treatment and disposal.

(4) All soil tests shall be conducted using uniform procedures and terminology as set forth in chapter 3 and Appendix A of the manual referred to in WAC 246-272-110(1).

(5) If sufficient information is not available concerning water table conditions, the health officer or department may require that the soils analysis be performed during the months of suspected high-water table conditions.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-272-110, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-110, filed 12/27/90, effective 1/31/91; 83-13-014 (Order 259), § 248-96-094, filed 6/3/83.]

**WAC 246-272-120 Subdivision and individual site review.** (1) Subdivisions - preliminary tests for subdivisions utilizing individual on-site sewage systems shall include at least one representative soil log per acre or tract or more as required by the health officer. A reduced number of soil logs may be allowed if adequate soils information is available.

(2) Individual sites - at least one soil log shall be performed at the site of each disposal area. This requirement may be waived by the health officer if adequate soils information is available. Additional soil logs may be required where the soil characteristics vary.

(3) Individuals performing subdivision and individual site reviews shall meet the requirements and use the procedures specified in WAC 246-272-110.

[Statutory Authority: RCW 43.20.050, 92-02-019 (Order 225B), § 246-272-120, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-120, filed 12/27/90, effective 1/31/91; 83-13-014 (Order 259), § 248-96-095, filed 6/3/83; Order 101, § 248-96-095, filed 6/10/74.]

**WAC 246-272-130 Larger tract requirements.** (1) For lots, parcels, or tracts with a gross land area of five acres or 1/128th of a section or more, the health officer may take the following actions:

(a) Alter the requirements found in WAC 246-272-110(3), 246-272-140(2), and 246-272-150(2).

(b) Modify the restrictions noted in WAC 246-272-110(2).

(2) Where the health officer takes one of the actions noted in WAC 246-272-110(1), the following requirements shall apply:

(a) All portions of a SSAS shall be at least thirty feet from property lines or lines of easement existing for SSAS installation that are at the same elevation as, or at a lower elevation than, the SSAS.

(b) A restrictive covenant against further subdivision of the property into parcels or lots less than five acres or 1/128th of a section shall be recorded on the building site and remain in effect until connection to public sewer is made or some approved alternative is installed which the health officer determines will permit development of smaller parcels.

(3) On-site sewage systems installed under the provisions of this section shall meet the purpose and objectives of these regulations to the maximum extent possible.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-272-130, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-130, filed 12/27/90, effective 1/31/91; 83-13-014 (Order 259), § 248-96-096, filed 6/3/83; Order 101, § 248-96-096, filed 6/10/74.]

**WAC 246-272-150 Design.** (1) The detailed design and construction of all on-site sewage systems shall conform to the "Design Manual: On-site Wastewater Treatment and Disposal Systems," United States Environmental Protection Agency, EPA-625/1-80-012, October, 1980, except where modified by, or in conflict with these regulations.

(2) The design for an on-site sewage system shall be performed by or under the supervision of a professional engineer, registered sanitarian or certified designer. A resident owner, at the discretion of the health officer, may design the resident owner's own system, if a minimum vertical separation of three feet can be maintained.

(3) The system shall be designed to receive all sanitary sewage and domestic waste from the building served unless otherwise approved by the health officer. For individual residences, flows of one hundred twenty gallons/bedroom/day shall be used for design purposes. For other establishments, the typical values noted in the design manual referred to in WAC 246-272-150(1) shall be used. Any deviations shall be supported by appropriate water usage information and/or the use of low water use fixtures. Drainage from footing or roof drains or any other type of drain shall neither enter the sewage system nor be directed over the area where the on-site sewage system is located.

(4) All septic tanks shall be designed in accordance with subsection (1) of this section, with the following exceptions:

(a) All tanks must have a minimum of two compartments with the first compartment consisting of one-half to two-thirds of the required total volume.

(b) Intercompartmental apparatus shall be sanitary tees, slots or baffles assuring that effluent only from the clarified zone passes into the next compartment.

(c) Septic tanks serving single family residences shall have a minimum liquid capacity based on the number of bedrooms in the residence, as follows:

| Number of Bedrooms in House | Required Minimum Liquid Volume |
|-----------------------------|--------------------------------|
| 2 or less                   | 750                            |
| 3                           | 900                            |
| 4                           | 1000                           |

For each additional bedroom add 250 gallons.

A septic tank designed to service a facility other than one single family residence shall have a minimum liquid capacity equal to one and one-half times the projected daily sewage volume, with a minimum of 1000 gallons.

(d) Concrete tanks shall be approved by the health officer. Tanks made of materials other than concrete shall be approved by the health officer and the department.

(e) All septic tanks and pump chambers to be located in high water table areas shall be adequately treated to preclude ground water intrusion.

(5) Effluent shall be disposed of by means of a SSAS except when approval for other disposal systems is granted by the health officer and/or the department.

(a) The size of the SSAS shall be determined from the results of the site review and soil logs per the design manual.

(b) The health officer shall not permit installation and use of cesspools and seepage pits for the disposal of sewage.

(c) The bottom of a SSAS shall not be deeper than three feet below the finished grade, except under special conditions approved by the health officer. The depth of such a system shall not exceed ten feet from finished grade.

(d) Subsurface absorption beds (see definition of SSAS) may be considered for use only when authorized by the health officer and/or the department and when the soils are type 1, 2, or 3.

(e) Piping materials shall be approved by the health officer and the department.

(6) Cover can be used over a SSAS provided no portion of the SSAS sidewall below the invert of the distribution pipe is installed in this material.

(7) When sewage holding tank systems are used, a management program assuring ongoing operation and maintenance, which shall be approved by the health officer, shall be in effect. Sewage holding tanks shall not be permitted for either new construction or expansion of residential dwellings, whether seasonal or year-round. The health officer may approve sewage holding tanks for the following situations:

(a) Permanent use. Controlled, part-time, commercial usage situations, including, but not limited to, recreational vehicle parks, trailer dump stations, and certain limited hour businesses;

(b) Interim use. To handle emergency situations; and

(c) Repairs. As permitted under WAC 246-272-160 (1)(e)(i).

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-272-150, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-150, filed 12/27/90, effective 1/31/91. Statutory Authority: 1989 c 349. 89-21-026 (Order 332), § 248-96-110, filed 10/10/89, effective 11/10/89. Statutory Authority: RCW 43.20.050. 83-13-014 (Order 259), § 248-96-110, filed 6/3/83; Order 101, § 248-96-110, filed 6/10/74.]

**WAC 246-272-160 Repair of failures along marine shorelines.** (1) When an on-site sewage system failure occurs, the health officer shall require one of the following:

(a) Repair of the on-site sewage system using the requirements of this section. The repair system may be located either on the:

- (i) Property served; or
- (ii) Nearby or adjacent property if easements are obtained.

(b) Connection to a publicly owned larger on-site sewage system;

- (c) Connection to public sewer; or
- (d) Connection to a privately owned larger system where it is deemed economically feasible.

(e) If subsections (1)(a), (b), (c), or (d) of this section are not feasible, the health officer shall require one of the following:

- (i) Usage of a holding tank;
- (ii) Obtainment of a National Pollutant Discharge Elimination System or state discharge permit, issued to a public entity or jointly to a public entity and the system owner, from the Washington state department of ecology. This shall be considered only if an on-site sewage system is not feasible and the only realistic method of final disposal is to discharge to the surface of the land or into surface water; or
- (iii) Abandonment of the property.

(2) When the soil absorption component fails, the requirements under WAC 246-272-120 (2) and (3) shall be met before a repair permit is issued.

(3) A detailed design shall be submitted for each repair system. The repair shall be sized to accommodate all the sewage.

(4) When repair of an on-site sewage system is required to correct a failure, the health officer shall permit:

- (a) A standard marine system; or
- (b) A nonconforming repair. A nonconforming repair shall only be permitted when a:
  - (i) Standard marine system cannot be installed; and
  - (ii) Connection to either a public sewer or an approved larger on-site sewage system is not feasible.

(5) Table IV notes the minimum repair requirements based upon vertical separation and horizontal separation. The horizontal separation indicated is the distance between the SSAS or other disposal component and the ordinary high-water mark. Treatment standards shall be met before discharge to unsaturated, subsurface soil:

TABLE IV  
REQUIREMENTS FOR NONCONFORMING REPAIRS

| Vertical Separation in Feet | Horizontal Separation In Feet     |                       |                                   |
|-----------------------------|-----------------------------------|-----------------------|-----------------------------------|
|                             | < 25                              | 25-50                 | > 50                              |
| <1 <sup>1</sup>             | Treatment Standard 1              | Treatment Standard 1  | Treatment Standard 2 <sup>2</sup> |
| 1-2                         | Treatment Standard 1              | Treatment Standard 2  | Pressure Distribution             |
| >2                          | Treatment Standard 2 <sup>2</sup> | Pressure Distribution | —                                 |

<sup>1</sup> The health officer may permit ASTM C-33 sand to be used as fill to create unsaturated, subsurface soil, but fill cannot be used to achieve the vertical separation requirements.

<sup>2</sup> Not including mound systems.

(6) When a nonconforming repair is permitted:

(a) Priority shall be given to protection of drinking water sources. The site of the repair shall be selected to maximize the:

- (i) Vertical separation;
- (ii) Distance from a well or suction line; and
- (iii) Distance to surface water.

(b) The permit shall identify the system as a nonconforming repair. The permit shall state the manner and the extent the system is nonconforming. A copy of the permit and any accompanying easements or restrictive covenants shall be recorded with the county auditor. The requirement does not apply to a repaired system when a waiver from new construction standards is obtained per WAC 246-272-210;

(c) Operation, maintenance, monitoring, and reporting to the health officer shall comply with the protocol in the technical review committee guidelines. The minimum frequency shall be:

- (i) Quarterly when treatment standard 1 is required; and
  - (ii) Annually when treatment standard 2 is required.
- (d) Low-flow plumbing fixtures should be used.

(7) The health officer shall require wave barrier protection as deemed necessary.

(8) Actions taken under this section shall comply with other local and state requirements.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-272-160, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-160, filed 12/27/90, effective 1/31/91. Statutory Authority: 1989 c 349. 89-21-026 (Order 332), § 248-96-120, filed 10/10/89, effective 11/10/89.]

**WAC 246-272-170 Marine expansions.** The health officer shall require the following for a marine expansion:

- (1) A standard marine system shall be installed; and
- (2) A system replacement area shall be maintained as required by WAC 246-272-140(4).

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-272-170, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-170, filed 12/27/90, effective 1/31/91. Statutory Authority: 1989 c 349. 89-21-026 (Order 332), § 248-96-125, filed 10/10/89, effective 11/10/89.]

**WAC 246-272-190 Inspection.** The health officer may make inspections during construction to determine compliance with these regulations. No part of any installation shall be covered until approval has been obtained from the health officer. The health officer may waive this requirement provided the installation has been made by a person certified under WAC 246-272-230 and a designer program has been established according to WAC 246-272-180 provided that the designer performs the final inspection. If deviations from the approved plans and specifications have occurred in construction, a complete set of certified "as-built" drawings shall be provided to the health officer for a permanent record of the installation.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-272-190, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-272-190, filed 12/27/90, effective 1/31/91; 83-13-014 (Order 259), § 248-96-140, filed 6/3/83; Order 101, § 248-96-140, filed 6/10/74.]

### Chapter 246-280 WAC

#### RECREATIONAL SHELLFISH BEACHES

##### WAC

|             |  |
|-------------|--|
| 246-280-001 | Authority, purpose, and scope.               |
| 246-280-010 | Definitions.                                 |
| 246-280-015 | General administration.                      |
| 246-280-020 | Recreational shellfish beach classification. |

##### **WAC 246-280-001 Authority, purpose, and scope.**

(1) Authority. Under the authority of RCW 43.20.050, powers and duties of state board of health, these regulations are hereby established as minimum requirements for the monitoring and classification of recreational shellfish beaches.

(2) Purpose. It is the purpose of chapter 246-280 WAC to protect public health and establish procedures for evaluating the sanitary quality of recreational shellfish beaches.

(3) Scope.

(a) These regulations shall apply to recreational shellfish beaches under public ownership. Commercial shellfish harvest, even though it may occur on publicly owned beaches, is governed by chapter 246-282 WAC and chapter 69.30 RCW.

(b) These regulations shall apply to recreationally harvested shellfish on privately owned beaches when the general public has unlimited access to beaches for recreational shellfishing. The department may evaluate and monitor these privately owned beaches if the department determines it to be in the public interest.

(4) Other statutes related to this chapter are:

(a) Chapter 69.30 RCW, sanitary control of shellfish; and

(b) Chapter 246-282 WAC, sanitary control of shellfish.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-280-001, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-280-001, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 90.70 RCW. 89-20-020 (Order 335), § 248-52-001, filed 9/27/89, effective 10/28/89.]

##### **WAC 246-280-010 Definitions.** (1) Abbreviations:

(a) "ml" means milliliter; and

(b) "PSP" means paralytic shellfish poisoning.

(2) "Beach evaluation" means the examination of the sanitary conditions of recreational shellfish beaches through water quality testing, shellfish tissue testing, PSP testing, and sanitary surveys.

(3) "Beach inventory" means the department's list of recreational shellfish beaches governed by chapter 246-280 WAC.

(4) "Closed classification" means a beach exceeds the standards for safe shellfish harvest.

(5) "Conditionally open classification" means a recreational shellfish beach meets the standards for safe shellfish harvest during well-defined time periods, such as dry weather months, and is closed to shellfish harvest when the standards are exceeded.

(6) "Department" means the Washington state department of health (DOH).

(7) "Emergency closure" means temporary closure of a recreational shellfish beach when a contamination event is suspected of impacting an open or conditionally open beach.

(8) "Geometric mean value" means a statistical calculation giving a mean value of data points. Geometric mean value is a term used in state water quality standards. The calculation is:

(a)  $a \times b \times c \times d = y$ ; and

(b)  $n$ th root of  $y$  = geometric mean value.  $N$  = number of data points which determines the power of the root.

(9) "Health officer" means the health officer or an authorized representative of the city, county, city-county health department or district.

(10) "Local board of health" means the city, town, county, city-county, or district board of health as defined under chapters 70.05, 70.08, and 70.46 RCW.

(11) "Open classification" means a recreational shellfish beach which complies with WAC 246-280-030 standards for safe shellfish harvest without any restrictions due to health hazards.

(12) "Paralytic shellfish poisoning (PSP)" means a human illness caused by eating shellfish that contain high levels of toxin which results from the shellfish consuming large amounts of toxin-producing microscopic marine organism called *Gonyaulax catenella*.

(13) "Public ownership" means owned by the federal government, state government, a county, a city, or a port district.

(14) "Recreational shellfish beach" means any beach under public ownership available to the public and any privately owned beach where the general public has unlimited access to recreationally harvest shellfish.

(15) "Recreational shellfish harvest" means to harvest shellfish for personal consumption with no intention for sale or barter.

(16) "Sanitary survey" means an evaluation of the sanitary conditions of the shoreline and uplands of a recreational shellfish beach.

(17) "Shellfish" means, for the purposes of chapter 246-280 WAC, all varieties of oysters, clams, mussels, and scallops.

(18) "Unclassified" means a recreational shellfish beach which does not have an initial classification because the department has incomplete sanitary survey data.

(19) "Water quality study" means an evaluation of the sanitary conditions of the marine water of a recreational shellfish beach described under WAC 246-280-030 and 246-280-040.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-280-010, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-280-010, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 90.70 RCW. 89-20-020 (Order 335), § 248-52-005, filed 9/27/89, effective 10/28/89.]

**WAC 246-280-015 General administration.** (1) The department and the health officer for each local health jurisdiction shall develop a joint plan of operation designating the roles of each agency for administering chapter 246-280 WAC. This plan shall:

(a) Specifically designate those recreational shellfish beaches included in the joint plan;

(b) Establish whether the department or the health officer shall assume primary responsibility for an identified beach;

(c) Provide for a minimum acceptable frequency of beach evaluation;

(d) Specify who has responsibility for water quality studies, sanitary surveys, PSP monitoring, beach classification, and public notification;

(e) Be signed by the secretary and the chairperson of the local board of health;

(f) Be updated as needed to ensure proper operation of the plan; and

(g) Identify a process for implementing remedial actions to correct pollution sources where deemed appropriate by the department for those beaches classified as closed or conditionally open.

(2) If the local board of health adopts rules governing recreational shellfish harvest within its jurisdiction, the adopted rules shall be consistent with chapter 246-280 WAC.

(3) The department shall develop guidelines on water quality monitoring, PSP monitoring, shoreline survey procedures, public information/notification, and other topics.

(4) Throughout this chapter, the term "health officer" may be substituted for the term "department" if the joint plan of operation delegates authority for action to the health officer.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-280-015, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-280-015, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 90.70 RCW. 89-20-020 (Order 335), § 248-52-010, filed 9/27/89, effective 10/28/89.]

**WAC 246-280-020 Recreational shellfish beach classification.** (1) The department or the health officer for each local health jurisdiction as designated in the joint plan of operation, under WAC 246-280-015, shall

classify recreational shellfish beaches, based on the risk to public health from consuming shellfish. After completing an initial classification, the department or the health officer for each local health jurisdiction shall make an annual update based on the additional data collected during the year.

(2) The joint plan of operation's criteria used to classify beaches shall include the following:

(a) Water quality data;

(b) A sanitary survey of pollution sources; and

(c) A review of natural and synthetic toxins, including PSP.

(3) The department shall classify recreational shellfish beaches as follows:

(a) Open;

(b) Conditionally open;

(c) Closed;

(d) Emergency closure; and

(e) Unclassified.

[Statutory Authority: RCW 43.20.050. 92-02-019 (Order 225B), § 246-280-020, filed 12/23/91, effective 1/23/92; 91-02-051 (Order 124B), recodified as § 246-280-020, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 90.70 RCW. 89-20-020 (Order 335), § 248-52-020, filed 9/27/89, effective 10/28/89.]

## Chapter 246-282 WAC

### SANITARY CONTROL OF SHELLFISH

#### WAC

246-282-010 Definitions.

246-282-030 Storage, cleansing and washing and shipping of shellstock.

246-282-080 Identification and records.

246-282-090 Certificate of compliance—Certificate of approval—Suspension for revocation of certificate of approval—Licensure—Revocation of license.

246-282-100 Notice of decision—Adjudicative proceeding.

**WAC 246-282-010 Definitions.** The following definitions shall apply in the interpretation and the implementation of these rules and regulations:

(1) "Approved" means acceptable to the secretary based on his or her determination as to conformance with appropriate standards and good public health practice.

(2) "Commercial quantity" means any quantity exceeding:

(a) Forty pounds of mussels;

(b) One hundred oysters;

(c) Fourteen horse clams;

(d) Six geoducks; or

(e) Fifty pounds of hard or soft shell clams.

(3) "Department" means the state department of health.

(4) "Easily cleanable" means readily accessible and of such material and finish, and so fabricated that residue may be completely removed by approved cleaning methods.

(5) "Food contact surfaces" means those surfaces of equipment and utensils with which the shellfish meat normally comes in contact, and those surfaces that drain

onto surfaces that may come into contact with said food being processed.

(6) "Person" means any individual, firm, corporation, partnership, company, association, or joint stock association, and the legal successor thereof.

(7) "Person in charge" means an individual responsible for the supervision of employees and the management of any shellfish operation as defined in subsection (12) of this section.

(8) "Sanitized" means the treatment of clean surfaces of equipment and utensils by an approved process which is effective in destroying microorganisms, including pathogens.

(9) "Secretary" means the secretary of the department of health or the secretary's authorized representative.

(10) "Shellfish" means all varieties of fresh or frozen oysters, clams, or mussels, either shucked or in the shell, and all fresh or frozen edible products thereof.

(11) "Shellfish growing areas" means the lands and waters in and upon which shellfish are grown for harvesting in commercial quantities or for sale for human consumption.

(12) "Shellfish operation" means any activity in the harvesting, transporting, processing, to include, but not limited to culling, shucking, packing, and repacking or shipping or reshipping of shellfish in commercial quantities or for sale for human consumption.

[Statutory Authority: RCW 69.30.030. 92-02-019 (Order 225B), § 246-282-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-282-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 69.30.030 and 43.20.050. 85-21-048 (Order 296), § 248-58-005, filed 10/14/85. Statutory Authority: RCW 69.30.030. 78-08-059 (Order 163), § 248-58-005, filed 7/24/78.]

**WAC 246-282-030 Storage, cleansing and washing and shipping of shellstock.** (1) Shellstock shall be stored, handled, and shipped under such temperature conditions as will keep them alive, and shall be protected from contamination at all times.

(2) All shellstock prior to opening or shipping shall be reasonably clean so that mud, sand, and extraneous material will not be transferred to the opened product during processing.

(3) Water used for washing, or "wet storage" (natural storing and cleansing), of shellstock shall be obtained from an approved growing area, or from other sources which meet or exceed the water quality standards of an approved growing area.

(4) Wet storage of shellstock may be practiced only upon approval of the director. A detailed description and map denoting the location of the wet storage area shall accompany the request.

[Statutory Authority: RCW 69.30.030. 92-02-019 (Order 225B), § 246-282-030, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-282-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 69.30.030. 78-08-059 (Order 163), § 248-58-020, filed 7/24/78; Regulation 58.020, effective 3/11/60.]

**WAC 246-282-080 Identification and records.** (1) Shellfish shall be so identified by label, tag or other permanent means at the wholesale or retail level that any given container of shucked meats or lot of shellstock can be traced to the original growing area source(s).

(2) Shipments of shellfish in the shell shall be accompanied by a tag, label or other mark showing that the shipper has been duly certified by the state in which the growing area is located.

(3) Shucked shellfish shall be packed, shipped and sold retail in approved containers that are legibly marked by embossing, lithographing, or other permanent means with the name, address, and certification number of the packer, and the date packed or coded in such a manner that the date packed can be determined. Fresh packs shall be labeled with wording equivalent to "keep refrigerated," and frozen packs shall be labeled with wording equivalent to "keep frozen."

(4) All shippers, reshippers, packers, repackers, and wholesalers shall keep an accurate record of all lots of shellfish received, shipped and sold. Retailers shall keep a record of all lots received. Such records shall be kept on file for a minimum of six months.

(5) Information recorded by the harvester-shipper shall include: (a) Location of harvesting area(s) by name or code, (b) name and quantity of shellfish, (c) date of harvest, (d) date shipped.

(6) Shucker-packers and repackers shall record the following information: (a) Location of harvesting area(s) by name or code, or name of harvester, (b) name and quantity of shellfish, (c) date of harvest or date received, and (d) packing date.

[Statutory Authority: RCW 69.30.030. 92-02-019 (Order 225B), § 246-282-080, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-282-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 69.30.030. 78-08-059 (Order 163), § 248-58-070, filed 7/24/78; Regulation 58.070, effective 3/11/60.]

**WAC 246-282-090 Certificate of compliance--Certificate of approval--Suspension for revocation of certificate of approval--Licensure--Revocation of license.** (1) Only shellfish bearing, upon the tag, bill of lading, label or container as required in WAC 246-282-080(2), a certificate of compliance with the sanitary requirements of this state, or a state, territory, province of, or country of origin whose requirements are equal or comparable to these regulations, may be sold or offered for sale for human consumption in the state of Washington.

(2) No person shall possess a commercial quantity of shellfish or sell or offer to sell for human consumption shellfish in the state which have not been grown, harvested, shucked, packed, or shipped in accordance with the provisions of these regulations or chapter 69.30 RCW.

(3) Certificates of approval for shellfish growing areas and/or for shellfish operations, as hereinabove defined, shall be issued and administered as prescribed in chapter 69.30 RCW, and may be denied, suspended, or revoked

for any failure or refusal to maintain the sanitary requirements or to comply with the provisions of these regulations or chapter 69.30 RCW.

(4) No person shall operate a "shellfish operation," as defined hereinabove, without having first obtained a valid operating license issued by the director. Each license shall be issued only for the shellfish operation and person named in the application and no license shall be transferable or assignable except with the written approval of the director. An operating license will be issued to any person who shall evidence:

(a) Possession of, or an approved application for, a valid certificate of approval as described hereinabove;

(b) Continued compliance by the licensee, the licensee's employees, or those under the licensee's supervision, with the rules and regulations herein and with chapter 69.30 RCW which compliance, in part, shall include the licensee's processing and/or sale of shellfish which have been harvested only from growing areas certified by the director in the name of the licensee or the person from whom the licensee has obtained said shellfish.

(5) The department shall have cause to deny, revoke, or suspend the license required herein where any licensee has:

(a) Had his or her certificate of approval, as defined above, and as issued by the department, revoked, suspended, or denied, for any reason;

(b) Failed or refused to comply with any of the rules and regulations of the state board of health or chapter 69.30 RCW;

(c) Harvested shellfish from any growing area which does not have a valid certificate of approval issued in the name of said licensee or in the name of the person from whom the licensee has obtained said shellfish;

(d) Obtained or attempted to obtain an operating license, certificate of compliance, or certificate of approval by fraudulent means or misrepresentation.

(6) All licenses and certificates issued under the provisions of these regulations shall be posted in a conspicuous place on the licensed premises. The licensee, or at least one employee thereof, shall have a certificate of approval on his or her person while engaged in the harvesting of shellfish. Such certificates of approval shall be provided by the department. All licenses and certificates of approval shall expire on the thirtieth day of September each year.

(7) Certificates of approval shall be displayed, upon request, to an authorized representative of the department, a fisheries patrol officer, or an ex officio patrol officer. Failure to do so subjects the grower to the penalty provisions of this chapter, as well as immediate seizure of the shellfish by the representative or officer.

[Statutory Authority: RCW 69.30.030. 92-02-019 (Order 225B), § 246-282-090, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-282-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 69.30.030 and 43.20.050. 85-21-048 (Order 296), § 248-58-080, filed 10/14/85. Statutory Authority: RCW 69.30.030. 78-08-059 (Order 163), § 248-58-080, filed 7/24/78; Regulation 58.080, effective 3/11/60.]

**WAC 246-282-100 Notice of decision—Adjudicative proceeding.** (1) The department's notice of a denial, suspension, modification, or revocation of a license shall be consistent with RCW 43.70.115. An applicant or license holder has the right to an adjudicative proceeding to contest the decision.

(2) The department's notice of imposition of a civil fine shall be consistent with RCW 43.70.095. A person upon whom the department imposes a civil fine has the right to an adjudicative proceeding to contest the decision.

(3) A license applicant or holder or a person upon whom the department imposes a civil fine, contesting a department decision, shall within twenty-eight days of receipt of the decision:

(a) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and

(b) Include in or with the application:

(i) A specific statement of the issue or issues and law involved;

(ii) The grounds for contesting the department decision; and

(iii) A copy of the contested department decision.

(4) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

[Statutory Authority: RCW 69.30.030. 92-02-019 (Order 225B), § 246-282-100, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-282-100, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 34.05 RCW and RCW 69.30.030. 90-06-049 (Order 040), § 248-58-085, filed 3/2/90, effective 3/2/90.]

## Chapter 246-290 WAC PUBLIC WATER SUPPLIES

### WAC

|             |                                    |

| 246-290-300 | Monitoring requirements.           |
| 246-290-310 | Maximum contaminant levels (MCLs). |
| 246-290-320 | Follow-up action.                  |
| 246-290-330 | Public notification.               |

### WAC 246-290-010 Definitions. (1) Abbreviations:

(a) kPa – kilo pascal (SI units of pressure);

(b) m – meter;

(c) MCL – maximum contaminant level;

(d) mg/L – milligrams per liter;

(e) MID – maximum instantaneous demand;

(f) mL – milliliter;

(g) mm – millimeter;

(h) MPN – most probable number of coliform bacteria per 100 mL;

(i) NTNC – nontransient noncommunity;

(j) NTU – nephelometric turbidity unit;

(k) pCi/L – picocuries per liter;

- (l) psi – pounds per square inch;
- (m) SAL – state advisory level;
- (n) SOC – synthetic organic chemical;
- (o) THM – trihalomethane;
- (p) TNC – transient **noncommunity**;
- (q) ug/L – micrograms per liter;
- (r) umhos/cm – micromhos per centimeter;
- (s) VOC – volatile organic chemical; and
- (t) WFI – water facilities inventory and report form.
- (2) "Acute" means posing an immediate risk to human health.
- (3) "Composite sample" means a sample created in a certified laboratory by mixing equal parts of water from up to five different sources.
- (4) "Confirmation" means to demonstrate the results of a sample to be precise by analyzing a repeat sample. Confirmation occurs when analysis results fall within plus or minus thirty percent of the original sample.
- (5) "Contaminant" means a substance present in drinking water which may adversely affect the health of the consumer or the aesthetic qualities of the water.
- (6) "Cross-connection" means a physical arrangement connecting a public water system, directly or indirectly, with anything other than another potable water system, and capable of contaminating the public water system.
- (7) "Department" means the Washington state department of health or health officer as identified in a joint plan of operation per WAC 246-290-030(1).
- (8) "Disinfection" means the use of chlorine or other agent or process the department approves for killing or inactivating microbiological organisms, including pathogenic and indicator organisms.
- (9) "Distribution system" means that portion of a public water supply system which stores, transmits, pumps, and distributes water to consumers.
- (10) "Duplicate (verification) sample" means a second sample collected at the same time and location as the first sample and used for verification.
- (11) "Fire flow" means the rate of water flow needed to fight fires under WAC 246-293-640 or adopted city, town, or county standards.
- (12) "Guideline" means a department document assisting the purveyor in meeting a rule requirement.
- (13) "Health officer" means the health officer of the city, county, city-county health department or district, or an authorized representative.
- (14) "Hydraulic analysis" means the study of the water system network evaluating water flows within the distribution system under worst case conditions such as, maximum hourly flow plus fire flow, when required, or maximum instantaneous demand (MID), when fire flow is not required. Hydraulic analysis includes consideration of all factors affecting system energy losses.
- (15) "Maximum contaminant level (MCL)" means the maximum permissible level of a contaminant in water the purveyor delivers to any public water system user, measured at the locations identified under WAC 246-290-300, Table 4.
- (16) "Maximum contaminant level violation" means a confirmed measurement above the MCL and for a duration of time, where applicable, as outlined under WAC 246-290-310.
- (17) "Maximum instantaneous demand (MID)" means the maximum rate of water use, excluding fire flow, which has occurred or is expected to occur within a defined service area at an instant in time.
- (18) "Potable" means water suitable for drinking by the public.
- (19) "Primary standards" means standards based on chronic or acute human health effects.
- (20) "Protected ground water source" means a ground water source the purveyor shows to the department's satisfaction as protected from potential sources of contamination on the basis of hydrogeologic data and/or satisfactory water quality history.
- (21) "Public water system" is defined and referenced under WAC 246-290-020.
- (22) "Purchase source" means water a purveyor purchases from a public water system not under the control of the purveyor for distribution to the purveyor's customers.
- (23) "Purveyor" means an agency or subdivision of the state or a municipal corporation, firm, company, mutual or cooperative association, institution, partnership, or person or other entity owning or operating a public water system. Purveyor also means the authorized agent of such entities.
- (24) "Regularly" means four hours or more per day for four days or more per week.
- (25) "Repeat (confirmation) sample" means a sample collected a second time at the same location for confirmation of original analysis results.
- (26) "Resident" means an individual living in a dwelling unit served by a public water system.
- (27) "Seasonal source" means a public water system source used on a regular basis, but not in use more than three consecutive months within a twelve-month period.
- (28) "Secondary standards" means standards based on factors other than health effects.
- (29) "Service" means a connection to a public water system designed to serve a single family residence, dwelling unit, or equivalent use. When the connection is a group home or barracks-type accommodation, three persons shall be equivalent to one service.
- (30) "Standard methods" means the most recently published edition of the book, titled "*Standard Methods for the Examination of Water and Waste Water*," jointly published by the American Public Health Association, American Water Works Association (AWWA), and Water Pollution Control Federation. This book is available through public libraries or may be ordered from AWWA, 6666 West Quincy Avenue, Denver, Colorado 80235.
- (31) "State advisory level (SAL)" means a department-established value for a chemical without an existing MCL. The SAL represents a level which when exceeded, indicates the need for further assessment to determine if the chemical is an actual or potential threat to human health.

(32) "Synthetic organic chemical (SOC)" means a manufactured carbon-based chemical.

(33) "Trihalomethane (THM)" means one of a family of organic compounds, named as derivatives of methane, where three of the four hydrogen atoms in methane are each substituted by a halogen atom in the molecular structure. Trihalomethanes may occur when chlorine, a halogen, is added to water.

(34) "Verification" means to demonstrate the results of a sample to be precise by analyzing a duplicate sample. Verification occurs when analysis results fall within plus or minus thirty percent of the original sample.

(35) "Volatile organic chemical (VOC)" means a manufactured carbon-based chemical that vaporizes quickly at standard pressure and temperature.

(36) "Water facilities inventory form (WFI)" means the department form summarizing each public water system's characteristics.

(37) "Well field" means a group of wells one purveyor owns or controls which:

(a) Draw from the same aquifer or aquifers as determined by comparable inorganic chemical analysis; and

(b) Discharge water through a common pipe and the common pipe shall allow for collection of a single sample before the first distribution system connection.

Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-290-010, filed 12/27/90, effective 1/31/91. Statutory Authority: P.L. 99-339. 89-21-020 (Order 336), § 248-54-015, filed 10/10/89, effective 11/10/89. Statutory Authority: RCW 34.04.045. 88-05-057 (Order 307), § 248-54-015, filed 2/17/88. Statutory Authority: RCW 43.20-.050. 83-19-002 (Order 266), § 248-54-015, filed 9/8/83.]

**WAC 246-290-130 Source approval.** (1) No new, previously unapproved sources, or modification of existing sources shall be used as a public water supply without department approval. A party seeking approval shall provide the department:

(a) A copy of the water right permit, if required, obtained from the department of ecology for the source, quantity, type, and place of use;

(b) A hydrogeologic assessment of the proposed source along with a general description of the watershed, spring, and/or aquifer recharge area affecting the quantity or quality of flow. Seasonal variation shall also be included;

(c) For unfiltered surface water, the watershed control program identified under WAC 246-290-450;

(d) Upstream water uses affecting either water quality or quantity;

(e) A map showing the project location and vicinity;

(f) A map depicting topography, distances to the surface water intake, well or spring from existing property lines, buildings, potential sources of contamination, ditches, drainage patterns, and any other natural or man-made features affecting the quality or quantity of water;

(g) The dimensions and location of the sanitary control area under WAC 246-290-210;

(h) Copies of the recorded legal documents for the sanitary control area under WAC 246-290-210;

(i) A copy of the on-site inspection approval made by the department or local health department representative;

(j) A copy of the water well report;

(k) Required construction documents;

(l) Well source development data establishing the capacity of the source. Data shall include static water level, yield, the amount of drawdown, recovery rate and duration of pumping. Interference between existing sources and the source being tested shall also be shown. The source shall be pump tested at no less than the maximum design rate to determine whether the well and aquifer are capable of supplying water at the rate desired and to provide information necessary to determine the proper pump settings in the well. A department guideline on pump testing is available to assist purveyors;

(m) An initial analysis result of raw water quality, including as a minimum a bacteriological, complete inorganic chemical and physical analysis and a VOC analysis. When source water quality is subject to variation, the department may require additional monitoring defining the range of variation. If the source being approved is for a community system, a radionuclide analysis shall also be required;

(n) Detailed information regarding aspects of water quality addressed under WAC 246-290-310. If treatment is planned, refer to WAC 246-290-250(2); and

(o) Other department-required information. Before initiating source development or modification, the purveyor shall contact the department to identify any such additional information.

(2) The department shall issue a written approval when:

(a) The purveyor submits the necessary information; and

(b) The developed source provides water complying with chapter 246-290 WAC.

[Statutory Authority: Chapter 43.20 RCW. 91-07-031 (Order 150B), § 246-290-130, filed 3/15/91, effective 4/15/91. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-290-130, filed 12/27/90, effective 1/31/91. Statutory Authority: P.L. 99-339. 89-21-020 (Order 336), § 248-54-097, filed 10/10/89, effective 11/10/89. Statutory Authority: RCW 34.04.045. 88-05-057 (Order 307), § 248-54-097, filed 2/17/88.]

**WAC 246-290-300 Monitoring requirements.** (1) General.

(a) The purveyor shall be responsible for satisfying requirements of this section. The monitoring requirements in this section are minimums. The department may require additional monitoring:

(i) When system water quality exceeds an MCL; or

(ii) When source contamination is suspected; or

(iii) Under other circumstances as identified in a departmental order.

(b) Purveyor's samples required under this section shall be collected, transported, and analyzed according to department-approved methods. The state public

health laboratory or another department-certified laboratory shall perform the analyses, except turbidity as required under WAC 246-290-300(4) may be tested by water utility or health department personnel.

(c) When one public water system receives water from another public water system, the receiving system is only required to take bacteriological samples as described under WAC 246-290-300(2) and trihalomethane samples as described under WAC 246-290-300(5).

Subject to revision as appropriate, the department may reduce the monitoring requirement of the receiving system provided the receiving system:

- (i) Has a good water quality history;
- (ii) Operates in a satisfactory manner consistent with regulations under this chapter;
- (iii) Is included in the supplying system's regular monitoring schedule; and
- (iv) Is included in the service and population totals for the supplying system.

Periodic reviews of the system's sampling record may be made to determine if continued reduction is appropriate.

(d) Special purpose samples, such as check samples or samples taken to determine if disinfection following pipe repair has been sufficient, shall not count toward fulfillment of the monitoring requirements of this chapter.

(e) Monitoring requirements in subsections (2), (3), (4), (5), (6), (7), and (8) of this section apply equally to systems serving resident or nonresident populations unless otherwise stated.

(2) Bacteriological.

(a) Drinking water samples shall be collected for bacteriological analysis from representative points in the distribution system at regular time intervals.

(b) The frequency for monitoring drinking water shall be determined according to the following:

(i) For **community** systems, the minimum number of routine samples to be analyzed is shown in Table 2;

(ii) For **NTNC** and **TNC** systems, the minimum number of routine samples to be analyzed is shown in Table 3. In the case where an activity lasts for one week or less, sampling frequency shall be as directed by the department;

(iii) For **Group A** water systems serving both a resident and a nonresident population, the minimum number of routine samples to be analyzed may vary from month to month. The number of samples required each month will be the higher number of samples from Table 2 and Table 3; and

(iv) For **Group B** water systems, the minimum number of routine samples is one every twelve months.

(c) When disinfection is practiced, the purveyor shall collect untreated (raw) water samples from each source for bacteriological analysis of total coliform in addition to the number of treated samples required. The frequency of monitoring untreated water shall be determined according to the following:

(i) For protected ground water sources, one sample every three months shall be analyzed;

(ii) For unprotected ground water sources, the number of samples analyzed shall be twenty percent of the distribution samples required each month, and in no case less than one every three months;

(iii) For surface sources with treatment including coagulation, filtration, and disinfection or other treatment process, the number of samples analyzed shall be ten percent of the distribution samples required each month, and in no case less than one every three months; and

(iv) For surface sources without coagulation and filtration treatment, the number of samples analyzed shall be twenty percent of the distribution samples required each month, and in no case less than one every three months.

TABLE 2

MINIMUM ROUTINE BACTERIOLOGICAL SAMPLING REQUIREMENTS FOR COMMUNITY SYSTEMS BASED ON THE NUMBER OF RESIDENTS

| Number of Residents* Served | Minimum No. of Samples Per Month | Number of Residents Served | Minimum No. of Samples Per Month |
|-----------------------------|----------------------------------|----------------------------|----------------------------------|
| Less than 251               | 1**                              | 37,001 - 41,000            | 45                               |
| 251 - 1,000                 | 1                                | 41,001 - 46,000            | 50                               |
| 1,001 - 2,500               | 2                                | 46,001 - 50,000            | 55                               |
| 2,501 - 3,300               | 3                                | 50,001 - 54,000            | 60                               |
| 3,301 - 4,100               | 4                                | 54,001 - 59,000            | 65                               |
| 4,101 - 4,900               | 5                                | 59,001 - 64,000            | 70                               |
| 4,901 - 5,800               | 6                                | 64,001 - 70,000            | 75                               |
| 5,801 - 6,700               | 7                                | 70,001 - 76,000            | 80                               |
| 6,701 - 7,600               | 8                                | 76,001 - 83,000            | 85                               |
| 7,601 - 8,500               | 9                                | 83,001 - 90,000            | 90                               |
| 8,501 - 9,400               | 10                               | 90,001 - 96,000            | 95                               |
| 9,401 - 10,300              | 11                               | 96,001 - 111,000           | 100                              |
| 10,301 - 11,100             | 12                               | 111,001 - 130,000          | 110                              |
| 11,101 - 12,000             | 13                               | 130,001 - 160,000          | 120                              |
|                             |                                  | 160,001 - 190,000          | 130                              |

| Number of Residents* Served | Minimum No. of Samples Per Month | Number of Residents Served | Minimum No. of Samples Per Month |
|-----------------------------|----------------------------------|----------------------------|----------------------------------|
| 12,001 - 12,900             | 14                               | 190,001 - 220,000          | 140                              |
| 12,901 - 13,700             | 15                               | 220,001 - 250,000          | 150                              |
| 13,701 - 14,600             | 16                               | 250,001 - 290,000          | 160                              |
| 14,601 - 15,500             | 17                               | 290,001 - 320,000          | 170                              |
| 15,501 - 16,300             | 18                               | 320,001 - 360,000          | 180                              |
| 16,301 - 17,200             | 19                               | 360,001 - 410,000          | 190                              |
| 17,201 - 18,100             | 20                               | 410,001 - 450,000          | 200                              |
| 18,101 - 18,900             | 21                               | 450,001 - 500,000          | 210                              |
| 18,901 - 19,800             | 22                               | 500,001 - 550,000          | 220                              |
| 19,801 - 20,700             | 23                               | 550,001 - 600,000          | 230                              |
| 20,701 - 21,500             | 24                               | 600,001 - 660,000          | 240                              |
| 21,501 - 22,300             | 25                               | 660,001 - 720,000          | 250                              |
| 22,301 - 23,200             | 26                               | 720,001 - 780,000          | 260                              |
| 23,201 - 24,000             | 27                               | 780,001 - 840,000          | 270                              |
| 24,001 - 24,900             | 28                               | 840,001 - 910,000          | 280                              |
| 24,901 - 25,000             | 29                               | 910,001 - 970,000          | 290                              |
| 25,001 - 28,000             | 30                               | 970,001 - 1,050,000        | 300                              |
| 28,001 - 33,000             | 35                               | 1,050,001 - 1,140,000      | 310                              |
| 33,001 - 37,000             | 40                               |                            |                                  |

\*Does not include population of utilities wholesaled to, except as provided under WAC 246-290-300 (1)(c)

\*\*May be reduced by the department to no less than one every three months for systems with protected ground water sources.

TABLE 3

MINIMUM ROUTINE BACTERIOLOGICAL SAMPLING REQUIREMENTS FOR NTNC AND TNC SYSTEMS BASED ON NONRESIDENT POPULATIONS

| Maximum Day Population Served in Any One Month | Minimum Number Samples That Month |
|--|-----------------------------------|
| Less than 25                                   | 1 every 12 months                 |
| 25 - 299                                       | 1 every 3 months                  |
| 300 - 999                                      | 1*                                |
| 1,000 - 2,499                                  | 2                                 |
| 2,500 - 3,499                                  | 3                                 |
| 3,500 - 4,999                                  | 4                                 |
| 5,000 - 9,999                                  | 6                                 |
| 10,000 - 14,999                                | 8                                 |
| 15,000 - 19,999                                | 10                                |
| 20,000 - 29,999                                | 12                                |
| 30,000 - 39,999                                | 14                                |
| 40,000 - 49,999                                | 16                                |
| 50,000 - 74,999                                | 20                                |
| 75,000 - 99,999                                | 25                                |
| 100,000 or more                                | 30                                |

\*May be reduced by the department to one every three months for systems with protected ground water sources.

(3) Inorganic chemical and physical.

(a) The purveyor's complete inorganic chemical and physical analysis shall consist of the primary and secondary chemical and physical standards.

(i) Primary chemical and physical standards are arsenic, barium, cadmium, chromium, fluoride, lead, mercury, nitrate (as N), selenium, silver, sodium, and turbidity.

(ii) Secondary chemical and physical standards are chloride, color, copper, hardness, iron, manganese, specific conductivity, sulfate\*, total dissolved solids\*, and zinc.

\*Required only when specific conductivity exceeds seven hundred micromhos/centimeter.

(b) Purveyor samples taken for inorganic chemical analyses shall be collected at the source before treatment.

(c) The frequency for a purveyor's monitoring shall be according to:

(i) **Purveyors of community** systems shall have one complete analysis from each surface water source every twelve months;

(ii) **Purveyors of community** systems shall have one complete analysis from each ground water source or well field every thirty-six months;

(iii) **Purveyors of NTNC, TNC, and Group B** systems shall have one initial complete analysis from each source or well field. The department may waive or reduce the minimum requirement for the initial complete analysis if available information shows, to the department's satisfaction, that the aquifer provides water of satisfactory inorganic chemical quality; and

(iv) After the initial complete analysis, **NTNC, TNC, and Group B** systems shall have one nitrate sample analyzed from each source or well field every thirty-six months.

(d) When the purveyor provides treatment for one or more inorganic chemical or physical contaminants, samples shall be taken for the specific contaminant or contaminants before and after treatment. The department shall determine the frequency of sampling.

(4) Turbidity.

(a) **Purveyors of Group A** water systems with surface water sources shall monitor turbidity at least once a day.

(b) The purveyor shall monitor turbidity at or before the entry point to the distribution system and where needed for treatment process control.

(c) The department shall determine monitoring requirements for **Group B** water systems.

(d) The purveyor shall ensure that turbidimeters are designed to meet the criteria listed under standard methods, and that turbidimeters are properly operated, maintained, and calibrated at all times, based on the manufacturer's recommendations.

(5) Trihalomethanes.

(a) **Purveyors of community** systems serving a population of ten thousand or more and providing water treated with chlorine or other halogenated disinfectant shall monitor as follows:

(i) Ground water sources. The purveyor shall collect one sample from each treated spring, well, or well field every twelve months. This sample shall be taken at the source before treatment or at the extreme end of the distribution system. The sample shall be analyzed for maximum total trihalomethane potential (MTTP); or

(ii) Surface water sources. The purveyor shall collect four samples per treated source every three months. The samples shall be taken within a twenty-four-hour period. The purveyor shall take one of the samples from the extreme end of the distribution system and three samples from representative locations in the distribution system. The samples shall be analyzed for total trihalomethanes (TTHM), the sum of trichloromethane, bromodichloromethane, dibromochloromethane, and tribromomethane. After one year of monitoring, the department may reduce the monitoring frequency to one sample every three months per treatment plant if the TTHM levels are less than 0.10 mg/L. The purveyor shall take the sample at the extreme end of the distribution system; or

(iii) Purchased surface water sources. The purveyor shall collect one water sample per each purchased surface source every three months. The sample shall be taken at the extreme end of the distribution system and analyzed for TTHM.

(b) **Purveyors of community** systems shall monitor for TTHM when serving a population less than ten thousand and providing surface water treated with chlorine or other halogenated disinfectant. The purveyor shall collect one water sample per treated source every three months for one year. The sample shall be taken at the extreme end of the distribution system and analyzed for TTHM. After the first year, the purveyor shall monitor surface water sources every thirty-six months.

(c) **Purveyors of community** systems shall monitor for TTHM when serving less than ten thousand people and purchasing surface water treated with chlorine or other halogenated disinfectant or adding a halogenated disinfectant after purchase. The purveyor shall collect one water sample every three months at the extreme end of

the distribution system or at a department-acceptable location. The sample shall be analyzed for TTHM. After the first year, the purveyor shall monitor every thirty-six months.

(6) Pesticides.

**Purveyors of community** systems with surface water sources shall monitor for pesticides for which MCLs are established every thirty-six months. The purveyor shall collect the water sample during the time of year the department designates as the time when pesticide contamination is most likely to occur.

(7) Radionuclides.

(a) The purveyor's monitoring requirements for gross alpha particle activity, radium-226 and radium-228 shall be:

(i) **Community** systems shall monitor once every forty-eight months. Compliance shall be based on the analysis of an annual composite of four consecutive quarterly samples or the average of the analyses of four samples obtained at quarterly intervals;

(ii) The purveyor may omit analysis for radium-226 and radium-228 if the gross alpha particle activity is less than five pCi/L; and

(iii) If the results of the initial analysis are less than half of the established MCL, the department may allow compliance with the monitoring requirements based on analysis of a single sample collected every forty-eight months.

(b) The purveyor's monitoring requirements for man-made radioactivity shall be:

(i) **Purveyors of community** systems using surface water sources and serving more than one hundred thousand persons and other department-designated water systems shall monitor for man-made radioactivity (beta particle and photon) every forty-eight months. Compliance shall be based on the analysis of a composite of four consecutive quarterly samples or the analysis of four quarterly samples; and

(ii) Purveyors of any water system, as directed by the department, downstream from a nuclear facility shall monitor once every three months for gross beta and iodine-131, and monitor once every twelve months for strontium-90 and tritium. The department may allow the substitution of environmental surveillance data taken in conjunction with a nuclear facility for direct monitoring of man-made radioactivity if the department determines that such data is applicable to a particular public water system.

(8) Volatile organic chemicals (VOCs).

(a) Prior to January 1, 1992, purveyors of **COMMUNITY** and **NTNC** systems shall monitor each source for all chemicals listed in Table 4. If a source is treated, VOC samples shall be collected after treatment. The department shall contact the purveyor to schedule sample collection. Purveyors shall submit VOC samples to a certified lab for analysis within ninety days of contact by the department.

TABLE 4

## LIST 1: VOLATILE ORGANIC CHEMICALS (VOCs) WITH MCLs

Trichloroethylene  
Carbon Tetrachloride  
Vinyl Chloride<sup>1</sup>  
1,2-Dichloroethane  
Benzene  
para-Dichlorobenzene  
1,1-Dichloroethylene  
1,1,1-Trichloroethane

<sup>1</sup> Purveyors shall monitor for vinyl chloride if their source sampling has verified one or more of the following:

Trichloroethylene;  
1,2-Dichloroethane;  
1,1-Dichloroethylene;  
1,1,1-Trichloroethane;  
Chloroethane;  
trans-1,2-Dichloroethylene;  
cis-1,2-Dichloroethylene;  
1,1-Dichloroethane;  
1,1,2-Trichloroethane;  
1,1,1,2-Tetrachloroethane;  
1,1,2,2-Tetrachloroethane; or  
Tetrachloroethylene.

## LIST 2: VOCs WITHOUT MCLs

|                            |                         |
|----------------------------|-------------------------|
| Bromobenzene               | p-Xylene                |
| Bromomethane               | O-Xylene                |
| Chlorobenzene              | m-Xylene                |
| Chloroethane               | Bromochloromethane      |
| Chloromethane              | n-Butylbenzene          |
| o-Chlorotoluene            | Dichlorodifluoromethane |
| p-Chlorotoluene            | Fluorotrichloromethane  |
| Dibromomethane             | Hexachlorobutadiene     |
| m-Dichlorobenzene          | Isopropylbenzene        |
| o-Dichlorobenzene          | p-Isopropyltoluene      |
| trans-1,2-Dichloroethylene | Naphthalene             |
| cis-1,2-Dichloroethylene   | n-Propylbenzene         |
| Dichloromethane            | Sec-butylbenzene        |
| 1,1-Dichloroethane         | Tert-butylbenzene       |
| 1,1-Dichloropropene        | 1,2,3-Trichlorobenzene  |
| 1,2-Dichloropropane        | 1,2,4-Trichlorobenzene  |
| 1,3-Dichloropropane        | 1,2,4-Trimethylbenzene  |
| 1,3-Dichloropropene        | 1,3,5-Trimethylbenzene  |
| 2,2-Dichloropropane        | Trihalomethanes:        |
| Ethylbenzene               | Bromodichloromethane    |
| Styrene                    | Dibromochloromethane    |
| 1,1,2-Trichloroethane      | Tribromomethane         |
| 1,1,1,2-Tetrachloroethane  | Trichloromethane        |
| 1,1,2,2-Tetrachloroethane  |                         |
| Tetrachloroethylene        |                         |
| 1,2,3-Trichloropropane     |                         |
| Toluene                    |                         |

## LIST 3: VOCs WITHOUT MCLs WHICH ARE REQUIRED FOR SELECTED SOURCES

|                          |                                    |
|--------------------------|------------------------------------|
| Ethylene dibromide (EDB) | 1,2-Dibromo-3-Chloropropane (DBCP) |
|--------------------------|------------------------------------|

(b) During the first twelve months of VOC monitoring, purveyors shall sample surface water and ground water sources once every three months or as directed by the department. If no VOCs (exclusive of THMs) are detected in the first sample from a ground water source, the purveyor shall sample that source once more during that twelve-month period.

(c) If no VOCs (exclusive of THMs) are verified after the initial twelve months of monitoring, purveyors of COMMUNITY and NTNC water systems shall monitor each source at least once every thirty-six months.

(d) Purveyors may ask the certified lab to composite samples representing as many as five individual sources. If VOCs (exclusive of THMs) are detected in a composite sample, the lab shall analyze the duplicate sample for each source in the composite at the purveyor's expense. If duplicate samples are not available, the purveyor shall repeat sample each individual source within fourteen days of contact by the department. Analysis of all VOC samples shall occur within fourteen days of collection. The following restrictions shall apply to compositing of samples:

- (i) Samples shall not be composited in the field;
- (ii) Multiple source samples, such as samples representing well fields, shall not be composited;
- (iii) Ground water sources shall not be composited with surface water sources; and

(iv) The following shall not be composited:

- (A) Seasonal sources;
- (B) Sources treated for the presence of synthetic organic chemicals; and
- (C) Sources with synthetic organic chemicals, exclusive of THMs, detected within the last five years.

(e) Purveyors with emergency and seasonal sources shall monitor the sources when the sources are in use.

(f) If five or fewer separate sources are combined through a common pipe before entering the distribution system, and before a domestic service, the department may consider those sources as one for the purpose of sampling. The purveyor shall collect the distribution samples as directed by the department. If VOCs, exclusive of THMs, are detected, the department shall require repeat samples from each individual source.

(g) The department may require the purveyor to repeat sample for confirmation of results.

(h) The department shall not require purveyors of COMMUNITY systems serving less than two hundred fifty people and NTNC systems to monitor for the List 2 VOCs after purveyors complete the first twelve months of VOC monitoring for both List 1 and List 2 VOCs, provided no VOCs, exclusive of THMs, are detected and no changes have occurred indicating a need to take additional samples.

(i) Purveyors of COMMUNITY and NTNC systems shall monitor for List 3 VOCs if the department determines their sources are located in an area where the chemicals may have been applied, transported, handled, manufactured, or stored. The department shall notify purveyors of COMMUNITY and NTNC systems if this requirement applies.

(j) When water is purchased from another system, the department shall not require the purveyor of the purchasing system to monitor that source for VOCs. However, the department's requirement may still apply for a purveyor to monitor for trihalomethanes under subsection (5) of this section.

(k) Only samples analyzed after January 1, 1988, by a laboratory certified for VOC analysis of drinking water may be used to meet the requirements of this subsection.

(9) Other substances.

On the basis of public health concerns, the department may require the purveyor to monitor for additional substances.

TABLE 5  
MONITORING LOCATION

| Sample Type                              | Sample Location  |
|--|--|
| Bacteriological                          | From representative points in distribution system.                       |
| Complete Inorganic Chemical and Physical | From a sample point as close to the source as possible.                  |
| Nitrate                                  | From a sample point as close to the source as possible.                  |
| Turbidity - Surface Water                | From a location at or before the entry point to the distribution system. |
| Trihalomethanes - Surface Water          | From representative points in the distribution system.                   |
| - Ground Water                           | From the source before treatment.  |
| Pesticides - Surface Water               | From the source.   |
| Radionuclides                            | From the source.   |
| VOCs                                     | After treatment, if any, at entry points to distribution systems.        |
| Other Substances                         | As directed by the department.   |

[Statutory Authority: Chapter 43.20 RCW. 91-07-031 (Order 150B), § 246-290-300, filed 3/15/91, effective 4/15/91. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-290-300, filed 12/27/90, effective 1/31/91. Statutory Authority: P.L. 99-339. 89-21-020 (Order 336), § 248-54-165, filed 10/10/89, effective 11/10/89. Statutory Authority: RCW 34.04.045. 88-05-057 (Order 307), § 248-54-165, filed 2/17/88. Statutory Authority: RCW 43.20.050. 83-19-002 (Order 266), § 248-54-165, filed 9/8/83.]

**WAC 246-290-310 Maximum contaminant levels (MCLs).** (1) The purveyor shall be responsible for complying with the standards of water quality identified in this section.

If a substance exceeds its maximum contaminant level (MCL), the purveyor shall take follow-up action as described under WAC 246-290-320.

(2) When enforcing the standards described under this section, the department shall enforce compliance with the primary standards as its first priority.

(3) Bacteriological.

(a) Standards under subsection (3) of this section shall be considered primary standards.

(b) If any coliform bacteria are present in any sample, follow-up action as described under WAC 246-290-320(2) shall be taken.

(c) The MCL for coliform bacteria is as follows:

(i) When the membrane filter test is used, the number of coliform bacteria shall not be greater than:

(A) One per one hundred milliliters as the average of all samples tested each month; or

(B) Four per one hundred milliliters in two or more samples when less than twenty samples are tested each month; or

(C) Four per one hundred milliliters in more than five percent of the samples when twenty or more samples are tested each month.

(ii) When the five-tube MPN method is used, coliform bacteria shall not be present in:

(A) More than ten percent of the tubes tested each month; or

(B) Three or more tubes in two or more samples when less than twenty samples are tested each month; or

(C) Three or more tubes in more than five percent of the samples when twenty or more samples are tested each month.

(iii) The department may allow systems required to take less than four samples each month to base compliance with this section on the samples taken during the three-month period consisting of the month in question and the previous two months.

(iv) Special purpose samples, such as those taken to determine if disinfection following pipe repair or replacement has been sufficient, or check samples shall not be used to determine compliance with the MCL.

(v) Samples with unsuitable test results, i.e., confluent growth, TNTC (too numerous to count), excess debris, etc., will not qualify as routine samples and will not count toward fulfillment of the monitoring requirement.

(4) Inorganic chemical and physical.

The primary and secondary MCLs are listed in Table 6 and 7:

TABLE 6  
INORGANIC CHEMICAL CHARACTERISTICS

| Substance      | Primary MCLs (mg/L) |
|----------------|---------------------|
| Arsenic (As)   | 0.05                |
| Barium (Ba)    | 1.0                 |
| Cadmium (Cd)   | 0.01                |
| Chromium (Cr)  | 0.05                |
| Fluoride (F)   | 4.0                 |
| Lead (Pb)      | 0.05                |
| Mercury (Hg)   | 0.002               |
| Nitrate (as N) | 10.0                |
| Selenium (Se)  | 0.01                |
| Silver (Ag)    | 0.05                |
| Sodium (Na)    | *                   |

| Substance      | Secondary MCLs (mg/L) |
|----------------|-----------------------|
| Chloride (Cl)  | 250.0                 |
| Copper (Cu)    | 1.0                   |
| Fluoride (F)   | 2.0                   |
| Iron (Fe)      | 0.3                   |
| Manganese (Mn) | 0.05                  |

| Substance                  | Secondary MCLs (mg/L) |
|----------------------------|-----------------------|
| Sulfate (SO <sub>4</sub> ) | 250.0                 |
| Zinc (Zn)                  | 5.0                   |

Note: Although the state board of health has not established an MCL for sodium, there is enough public health significance connected with sodium levels to require inclusion in inorganic chemical and physical monitoring.

TABLE 7

## PHYSICAL CHARACTERISTICS

| Substance | Primary MCL |
|-----------|-------------|
| Turbidity | 1 NTU       |

| Substance                    | Secondary MCLs   |
|------------------------------|------------------|
| Color                        | 15 Color Units   |
| Hardness                     | None established |
| Specific Conductivity        | 700 umhos/cm     |
| Total Dissolved Solids (TDS) | 500 mg/L         |

## (5) Turbidity.

(a) The department shall consider standards under subsection (5) of this section primary standards.

(b) The MCLs for turbidity are:

(i) One NTU, based on a monthly average of the maximum daily turbidity, where the maximum daily turbidity is defined as the average of the:

(A) Highest two hourly readings over a twenty-four hour period when continuous monitoring is used; or

(B) Daily grab samples taken within one hour when daily monitoring is used.

The department may increase the MCL to five NTUs if the purveyor can show the source is within a controlled watershed and the source meets the requirements under WAC 246-290-210 and 246-290-450.

(ii) Five NTUs based on an average of the maximum daily turbidity for two consecutive days.

## (6) Trihalomethanes.

(a) The department shall consider standards under subsection (6) of this section primary standards.

(b) The MCL for total trihalomethanes (TTHM) is 0.10 mg/L. The concentrations of each of the trihalomethane compounds (trichloromethane, dibromochloromethane, bromodichloromethane, and tribromomethane) are added together to determine the TTHM level.

(c) There is no MCL for maximum total trihalomethane potential (MTTP). When the MTTP value exceeds 0.10 mg/L, the purveyor shall follow up as described under WAC 246-290-320(5).

## (7) Pesticides.

(a) The department shall consider standards under subsection (7) of this section primary standards.

(b) The MCLs for pesticides are:

(i) Chlorinated hydrocarbons:

| Substance    | MCL (mg/L) |
|--------------|------------|
| Endrin       | 0.0002     |
| Lindane      | 0.004      |
| Methoxychlor | 0.1        |
| Toxaphene    | 0.005      |

(ii) Chlorophenoxy:

| Substance         | MCL (mg/L) |
|-------------------|------------|
| 2, 4-D            | 0.1        |
| 2, 4, 5-TP Silvex | 0.01       |

(8) Radionuclides.

(a) The department shall consider standards under subsection (8) of this section primary standards.

(b) The MCLs for radium-226, radium-228, and gross alpha particle radioactivity are:

| Substance   | MCL (pCi/L) |
|---|-------------|
| Radium-226  | 3           |
| Combined Radium-226 and Radium-228                | 5           |
| Gross alpha particle activity (excluding uranium) | 15          |

(c) The MCL for beta particle and photon radioactivity from man-made radionuclides is: The average annual concentration shall not produce an annual dose equivalent to the total body or any internal organ greater than four millirem/year.

The department shall assume compliance with the four millirem/year dose limitation if the average annual concentration for gross beta activity, tritium, and strontium-90 are less than 50 pCi/L, 20,000 pCi/L, and 8 pCi/L respectively. When both tritium and strontium-90 are present, the sum of their annual dose equivalents to bone marrow shall not exceed four millirem/year.

(9) Volatile organic chemicals.

(a) The department shall consider standards under this subsection primary standards.

(b) The VOCs with MCLs are:

| Substance             | MCL (mg/L) |
|-----------------------|------------|
| Benzene               | .005       |
| Carbon Tetrachloride  | .005       |
| 1,2-Dichloroethane    | .005       |
| Trichloroethylene     | .005       |
| para-Dichlorobenzene  | .075       |
| 1,1-Dichloroethylene  | .007       |
| 1,1,1-Trichloroethane | .200       |
| Vinyl Chloride        | .002       |

(c) The department shall determine compliance with this subsection based on the running annual average of results for each sample location. The purveyor is in violation of an MCL when:

(i) The running annual average for one location is greater than the MCL (sum of all sample results in one year divided by four  $>$  MCL); or

(ii) Any one sample result causes the running annual average to exceed the MCL.

(10) The state board of health shall determine maximum contaminant levels for any additional substances.

[Statutory Authority: Chapter 43.20 RCW. 91-07-031 (Order 150B), § 246-290-310, filed 3/15/91, effective 4/15/91. Statutory Authority: RCW 43.20.050. 91-02-051 (Order 124B), recodified as § 246-290-310, filed 12/27/90, effective 1/31/91. Statutory Authority: P.L. 99-339. 89-21-020 (Order 336), § 248-54-175, filed 10/10/89, effective 11/10/89. Statutory Authority: RCW 34.04.045. 88-05-057 (Order 307), § 248-54-175, filed 2/17/88. Statutory Authority: RCW 43.20.050. 83-19-002 (Order 266), § 248-54-175, filed 9/8/83.]

**WAC 246-290-320 Follow-up action. (1) General.**

(a) If water quality exceeds any MCLs listed under WAC 246-290-310, the purveyor shall notify the department and take follow-up action as described in this section.

(b) When a primary MCL violation occurs, the purveyor shall:

(i) Notify the department within forty-eight hours;

(ii) Notify the public according to procedures outlined under WAC 246-290-330;

(iii) Determine the cause of the contamination; and

(iv) Take corrective action as required by the department.

(c) When a secondary MCL violation occurs, the purveyor shall notify the department and take corrective action as directed by the department.

**(2) Bacteriological.**

(a) When coliform bacteria are present in any sample analyzed by the membrane filter method, the purveyor shall take action as follows:

(i) When the sample result is one through four per one hundred milliliters, the sample is unsatisfactory and an additional drinking water sample shall be taken to confirm the presence of coliform bacteria; or

(ii) When the sample result is greater than four per one hundred milliliters, the sample is unsatisfactory and nonconforming. The purveyor shall take action to determine and correct the cause of the contamination. Daily check samples shall continue to be collected until at least two consecutive daily check samples show less than one coliform per one hundred milliliters.

(b) When coliform bacteria are present in any sample analyzed by the five-tube MPN method, the purveyor shall take action as follows:

(i) When the sample result is one or two tubes positive, the sample is unsatisfactory and an additional drinking water sample shall be taken to confirm the presence of contamination; or

(ii) When the sample result is three or more tubes positive, the sample is unsatisfactory and nonconforming. The purveyor shall take action to determine and correct the cause of the contamination. Daily check

samples shall continue to be collected until at least two consecutive daily check samples show no coliform bacteria are present.

(c) All additional samples required by this section shall be collected from the same location where the unsatisfactory or unsuitable sample was taken, except as specified by the department.

(d) All additional samples shall be submitted for analyses as soon as possible after the unsatisfactory or unsuitable results are known.

(e) When the presence of coliform bacteria in water has been confirmed by check samples, the purveyor shall notify the department within forty-eight hours.

(f) When the sample result is marked unsuitable, an additional drinking water sample shall then be submitted for analysis for each unsuitable result immediately upon notification of the unsuitable result. The additional sample shall be analyzed by the MPN testing method.

(g) The location where the daily check samples were taken to fulfill the requirements of this section shall not be eliminated from future sampling without the department's approval.

(3) Inorganic chemical and physical. When an initial analysis of a substance exceeds the MCL, the purveyor shall:

(a) For nitrate, immediately take one additional sample from the same sampling point. If the average of the two samples exceeds the MCL, a violation is confirmed; or

(b) For all other inorganic chemical and physical substances, collect three additional samples from the same sample point within thirty days. If the average of all four samples exceeds the MCL, a violation is confirmed.

(4) Turbidity. When the turbidity exceeds the MCL identified under WAC 246-290-310 for longer than one hour monitored continuously, the purveyor shall report to the department within forty-eight hours. When the results of a manual turbidity analysis exceeds the MCL, the purveyor shall collect another sample within one hour. When the repeat sample confirms the MCL is exceeded, the purveyor shall notify the department.

(5) Trihalomethanes. When the average of all samples taken during any twelve-month period exceeds the MCL for total trihalomethanes, the violation is confirmed and the purveyor shall take corrective action as required by the department. When the maximum trihalomethane potential (MTTP) result is equal to or greater than 0.10 mg/L and the result is confirmed by a repeat sample, the purveyor shall monitor according to WAC 246-290-300(5) for one year or more.

(6) Volatile organic chemicals (VOCs). The purveyor shall be responsible for the following follow-up actions:

(a) After the purveyor's receipt of the first VOC analysis results from the laboratory, the purveyor shall provide notice to persons served by the system as described under WAC 246-290-330(5).

(b) When a List 1 VOC is verified at a concentration above the detection limit, the purveyor shall, at a minimum:

(i) Sample the source once every three months for at least three years; and

(ii) Make analysis results available to consumers within three months of receipt from the laboratory as described under WAC 246-290-330(5).

(c) When a List 1 VOC is verified at a concentration greater than a MCL, and the level will not cause the running annual average to exceed the MCL, the purveyor shall repeat sample the source as soon as possible. If a concentration greater than an MCL is confirmed, the purveyor shall:

(i) Notify the department within seven days of receipt of the repeat sample analysis results.

(ii) Provide consumer information per WAC 246-290-330 (5)(b).

(iii) Submit documentation to the department describing the water system's strategy for gathering and analyzing additional data and identify plans for keeping the public informed.

(iv) Sample the source a minimum of once every three months for at least three years.

(d) When the running annual average of a List 1 VOC is greater than an MCL, or one sample analysis result causes the annual average to exceed an MCL, the purveyor shall:

(i) Notify the department within seven days of receipt of analysis results.

(ii) Notify the public as described under WAC 246-290-330, including mandatory health effects language.

(iii) Submit an action plan to the department for approval addressing follow-up activities, including corrective action. The purveyor shall submit the action plan within four months of receipt of department notice that the annual average exceeds the MCL. The purveyor's action plan shall, at a minimum, contain a:

(A) Tabulation of VOC sample analysis results, including the location where VOCs were detected;

(B) Description of monitoring plans for system sources;

(C) Strategy for informing the public of monitoring results and investigations; and

(D) Description of short and long-term plans to minimize exposure and/or eliminate the source of contamination.

(iv) Implement the action plan within one year of the department's approval. The department may require the purveyor's earlier compliance if necessary to eliminate an immediate health threat or may require a revision of the action plan based upon additional sample results. The department may extend the purveyor's period of compliance when the department determines:

(A) Substantial construction is required; and

(B) The purveyor has taken all appropriate measures to protect the health of consumers served by the public water system.

If the department grants the purveyor an extension, the purveyor shall issue a notice identifying the MCL exceeded and the amount by which the repeat sample analysis results exceeded the MCL. The purveyor shall include the notice in all bills mailed to affected customers until the department determines that the purveyor complies with the MCL.

(v) Sample the source a minimum of once every three months for at least three years.

(e) When a List 2 or List 3 VOC is verified at a concentration above the detection limit, the purveyor shall:

(i) Submit the sample analysis results to the department within seven days of receipt from the laboratory; and

(ii) Sample the source a minimum of once every three months for one year and then annually thereafter during the three-month period when the highest previous measurement occurred.

(f) If the department determines that a List 2 or List 3 VOC is verified at a level greater than a state advisory level (SAL), the department shall notify the purveyor in writing. The purveyor shall repeat sample the source as soon as possible after initial department notice that a SAL has been exceeded. The purveyor shall submit the analysis results to the department within seven days of receipt from the laboratory. If any repeat sample confirms that a SAL has been exceeded, the purveyor shall:

(i) Provide consumer information per WAC 246-290-330 (5)(b);

(ii) Sample the source a minimum of once every three months for at least three years; and

(iii) Submit documentation to the department listing VOC analysis results, describing the water systems' strategy for gathering and analyzing additional data, and identifying plans for keeping the public informed. The purveyor shall submit this information to the department within six months of the date of the first notice from the department that a SAL has been exceeded.

(g) The department may reduce the purveyor's monitoring requirement for a source detecting a List 1 VOC if, after three years of quarterly monitoring, all analysis results are less than the MCL. The purveyor's reduced monitoring frequency shall be no less than one sample per year.

(h) The department may reduce the purveyor's monitoring requirement for a source detecting a List 2 or List 3 VOC if the source has been monitored annually for at least three years, and all analysis results are less than the SAL.

(i) In establishing SAL's for List 2 and List 3 VOCs, the department shall use the most recent edition of the department document titled "Procedures And References For Determination Of State Advisory Levels For Drinking Water Contaminants" which has been approved by the state board of health. Copies are available from the department upon request.

(j) When List 1, List 2 (exclusive of THMs), or List 3 VOCs are verified in well fields, the purveyor shall repeat sample individual wells within the well field.

(k) When the sum of all trihalomethanes detected exceeds 0.100 mg/L, the purveyor shall sample within three months for total trihalomethanes as required under WAC 246-290-300(5).

(l) The department may collect samples from a water system or may require that specified quality assurance techniques be used to collect samples.

(7) The department shall determine the purveyor's follow-up action when a substance not included in these regulations is detected.

[Statutory Authority: Chapter 43.20 RCW. 91-07-031 (Order 150B), § 246-290-320, filed 3/15/91, effective 4/15/91. Statutory Authority: RCW 43.20.050, 91-02-051 (Order 124B), recodified as § 246-290-320, filed 12/27/90, effective 1/31/91. Statutory Authority: P.L. 99-339, 89-21-020 (Order 336), § 248-54-185, filed 10/10/89, effective 11/10/89. Statutory Authority: RCW 34.04.045, 88-05-057 (Order 307), § 248-54-185, filed 2/17/88. Statutory Authority: RCW 43.20.050, 83-19-002 (Order 266), § 248-54-185, filed 9/8/83.]

**WAC 246-290-330 Public notification.** (1) Responsibility. The purveyor of a **Group A** water system shall notify the water system users when the following occurs within the **Group A** system:

- (a) A primary MCL violation as described under WAC 246-290-310;
- (b) Failing to comply with a:
  - (i) Prescribed treatment technique;
  - (ii) Monitoring requirement under WAC 246-290-300; or
  - (iii) Testing procedure.
- (c) Operating under a variance or exemption; or
- (d) Failing to meet a variance or exemption schedule.

The department may also require the purveyor of a **Group B** water system to notify users when any of the conditions listed in (a) through (d) of this subsection occur within the **Group B** system.

(2) Content. Notices shall provide:

- (a) A clear, concise, and simple explanation of the violation;
- (b) Discussion of potential adverse health effects and any segments of the population that may be at higher risk;
- (c) Mandatory health effects information required under WAC 246-290-330(4);
- (d) A list of steps the purveyor has taken or is planning to take to remedy the situation;
- (e) A list of steps the consumer should take, including advice on seeking an alternative water supply if necessary; and
- (f) The purveyor's name and phone number.

The purveyor may provide additional information to further explain the situation.

(3) Distribution.

(a) Purveyors of **COMMUNITY** systems in violation of a primary MCL, treatment technique or variance or exemption schedule shall provide:

- (i) Newspaper notice to water system users within fourteen days of violation;
- (ii) Direct mail notice or hand delivery to all permanent residences served by the system within forty-five days of the violation. The department may waive the purveyor's mail or hand delivery if the violation is corrected within forty-five days;
- (iii) Notice to radio and television stations serving the area within seventy-two hours of violation of a nitrate MCL or other acute violation as determined by the department; and
- (iv) Repeat mail or hand delivery every three months until the violation is corrected.

(b) Purveyors of **COMMUNITY** systems shall provide newspaper notice to water system users within three months of the following:

(i) Violation of a monitoring requirement or testing procedure; or

(ii) Granting of a variance or exemption.

Purveyors shall also provide repeat notice by mail or hand delivery to all permanent residences served by the system every three months until the situation is corrected or for as long as the variance or exemption remains in effect.

(c) Purveyors of **NTNC** and **TNC** systems in violation of a primary MCL, treatment technique, variance, or exemption schedule shall post a notice within fourteen days of the violation. If the violation is acute, the department shall require posting within seventy-two hours.

(d) Purveyors of **NTNC** and **TNC** systems shall post a notice within three months of the:

(i) Violation of a monitoring requirement or testing procedure; or

(ii) Granting of a variance or exemption.

(e) Where there is mention of a newspaper notice in this section, the purveyor may substitute a community or homeowner's association newsletter or similar periodical publication if the newsletter reaches affected consumers within the specified time.

(f) The purveyor may substitute a posted notice in the absence of a newspaper of general circulation or homeowner's association newsletter or similar periodical publication.

(g) The purveyor shall place posted notices in conspicuous locations and present the notices in a manner making them easy to read. Notices shall remain posted until the violation is corrected or for as long as the variance or exemption remains in effect. When appropriate, notices shall be multi-lingual.

(h) The purveyor of a **COMMUNITY** water system shall give a copy of the most recent public notice to all new billing units or new hookups before or at the time water service begins.

(i) The purveyor shall provide the department with a copy of a public notification at the time the purveyor notifies the public.

(4) Mandatory language.

(a) The purveyor shall provide specific health effects language in the notice when a violation occurs involving a:

(i) Primary VOC MCL; or

(ii) Secondary fluoride MCL.

(b) Required specific language is contained in the department guideline titled "health effects language for drinking water public notification."

(5) VOC notification procedure.

(a) Availability of results. After receipt of the first analysis results, the purveyor of a **COMMUNITY** or **NTNC** water system shall notify persons served by the system of the availability of the results and shall supply the name and telephone number of a contact person.

(i) The purveyor shall initiate notification within three months of the purveyors receipt of the first VOC analysis results. This notification is only required one time.

(ii) Notification shall occur by:

(A) Inclusion in the first set of water bills issued after receipt of the results;

(B) Newspaper notice which shall run at least one day each month for three consecutive months;

(C) Direct mail;

(D) Posting if NTNC system; or

(E) Any other method approved by the department.

(iii) Within three months of receipt of analysis results, purveyors selling water to other public water systems shall provide copies of the analysis results to the purchasing system.

(iv) Within thirty days of receipt of analysis results, purveyors purchasing water shall make results available to their customers. The purveyor's notification shall occur by the method outlined under (a)(i) of this subsection.

(b) Consumer information.

(i) The purveyor shall provide consumer information within twenty-one days of receipt of confirmation sample results when:

(A) A List 1 VOC is confirmed at a concentration greater than a MCL, and the level will not cause the running annual average to exceed the MCL; or

(B) The department determines that a List 2 or List 3 VOC is confirmed at a level greater than a SAL.

(ii) Consumer information shall include:

(A) Name and level of VOC detected;

(B) Location where the VOC was detected;

(C) Any health effects that the VOC could cause at its present concentration;

(D) Plans for follow-up activities; and

(E) Phone number to call for further information.

(iii) Consumer information shall be distributed by any of the following methods:

(A) Notice placed in the major newspaper in the affected area;

(B) Direct mail to customers;

(C) Posting if NTNC system; or

(D) Any other method approved by the department.

(6) Fluoride notification procedure.

When a secondary MCL violation occurs, the purveyor of a **COMMUNITY** water system shall send notice to:

(a) The department annually;

(b) Water system users annually; and

(c) New billing units added while the violation exists.

(7) When circumstances dictate the purveyor give a broader or more immediate notice to protect public health, the department may require the purveyor's notification by whatever means necessary.

(8) When the state board of health grants a public water system a waiver, the purveyor shall notify customers and new billing units or new hookups before water service begins. The purveyor shall provide a notice annually and send a copy to the department.

(9) The department may give notice to the water system users as required by this section on behalf of the water purveyor. However, the purveyor remains responsible for ensuring the department's requirements are met.

#### DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER

|             |  |
|-------------|--|
| 246-310-002 | Purpose of chapter 248-156 WAC. [Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-310-002, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.025, 81-09-060 (Order 1641), § 248-156-010, filed 4/20/81.] Repealed by 92-02-018 (Order 224), filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 70.38.135 and 70.38.919. |
| 246-310-030 | Index and procedures for adjustment. [Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-310-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.025, 81-09-060 (Order 1641), § 248-156-030, filed  |

4/20/81.] Repealed by 92-02-018 (Order 224), filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 70.38.135 and 70.38.919.

246-310-030A Tertiary services identification. [Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-310-030A, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.38 RCW, 90-21-028 (Order 082), § 248-19-235, filed 10/9/90, effective 10/9/90.] Repealed by 92-02-018 (Order 224), filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 70.38.135 and 70.38.919.

**WAC 246-310-002 Repealed.** See Disposition Table at beginning of this chapter.

**WAC 246-310-010 Definitions.** For the purposes of chapter 246-310 WAC, the following words and phrases shall have the following meanings unless the context clearly indicates otherwise.

(1) "Acute care facilities" means hospitals and ambulatory surgical facilities.

(2) "Affected persons" means:

(a) The applicant;

(b) Health care facilities and health maintenance organizations providing services similar to the services under review and located in the health service area;

(c) Third-party payers reimbursing health care facilities in the health service area;

(d) Any agency establishing rates for health care facilities and health maintenance organizations in the health service area where the proposed project is to be located;

(e) Health care facilities and health maintenance organizations which, in the twelve months prior to receipt of the application, have submitted a letter of intent to provide similar services;

(f) Any person residing within the geographic area to be served by the applicant; and

(g) Any person regularly using health care facilities within the geographic area to be served by the applicant.

(3) "Alterations," see "construction, renovation, or alteration."

(4) "Ambulatory care facility" means any place, building, institution, or distinct part thereof not a health care facility as defined in this section and operated for the purpose of providing health services to individuals without providing such services with board and room on a continuous twenty-four-hour basis. The term "ambulatory care facility" includes the offices of private physicians, whether for individual or group practice.

(5) "Ambulatory surgical facility" means a facility, not a part of a hospital, providing surgical treatment to patients not requiring inpatient care in a hospital. This term does not include a facility in the offices of private physicians or dentists, whether for individual or group practice, if the privilege of using such facility is not extended to physicians or dentists outside the individual or group practice.

(6) "Applicant," except as used in WAC 246-310-230, means any person proposing to engage in any undertaking subject to review under the provisions of chapter 70.38 RCW.

"Applicant," as used in WAC 246-310-230, means any person or individual with a ten percent or greater financial interest in a partnership or corporation or other comparable legal entity engaging in any undertaking subject to review under the provisions of chapter 70.38 RCW.

(7) "Capital expenditure" means an expenditure, including a force account expenditure (i.e., an expenditure for a construction project undertaken by a nursing home facility as its own contractor), which, under generally accepted accounting principles, is not properly chargeable as an expense of operation or maintenance. The costs of any studies, surveys, designs, plans, working drawings, specifications, and other activities (including staff effort, consulting and other services which, under generally accepted accounting principles, are not properly chargeable as an expense of operation and maintenance) shall be considered capital expenditures. Where a person makes an acquisition under lease or comparable arrangement, or through donation, which would have required certificate of need review if the acquisition had been made by purchase, such acquisition shall be deemed a capital expenditure. Capital expenditures include donations of equipment or facilities to a nursing home facility, which if acquired directly by such facility, would be subject to review under the provisions of this chapter and transfer of equipment or facilities for less than fair market value if a transfer of the equipment or facilities at fair market value would be subject to such review.

(8) "Certificate of need" means a written authorization by the secretary's designee for a person to implement a proposal for one or more undertakings.

(9) "Certificate of need program" means that organizational program of the department responsible for the management of the certificate of need program.

(10) "Commencement of the project" means whichever of the following occurs first: In the case of a construction project, giving notice to proceed with construction to a contractor for a construction project; beginning site preparation or development; excavating or starting the foundation for a construction project; or beginning alterations, modification, improvement, extension, or expansion of an existing building. In the case of major medical equipment, installation. In the case of other projects, initiating a health service.

(11) "Construction, renovation, or alteration" means the erection, building, remodeling, modernization, improvement, extension, or expansion of a physical plant of a health care facility, or the conversion of a building or portion thereof to a health care facility.

(12) "Continuing care contract" means a contract providing a person, for the duration of that person's life or for a term in excess of one year, shelter along with nursing, medical, health-related, or personal care services. The contract is conditioned on the transfer of property, the payment of an entrance fee to the provider of such services, or the payment of periodic charges for the care and services involved. A continuing care contract is not excluded from this definition because the

contract is mutually terminable or because shelter and services are not provided at the same location.

(13) "Continuing care retirement community" means an entity providing shelter and services under a continuing care contract with the entity's members and sponsoring or including a health care facility or a health service.

(14) "Days" means calendar days. Days are counted starting the day after the date of the event from which the designated period of time begins to run. If the last day of the period falls on a Saturday, Sunday, or legal holiday observed by the state of Washington, a designated period runs until the end of the first working day following the Saturday, Sunday, or legal holiday.

"Working days" exclude Saturdays, Sundays, and legal holidays observed by the state of Washington. Working days are counted in the same way as calendar days.

(15) "Department" means the Washington state department of health.

(16) "Ex parte contact" means any oral or written communication between any person in the certificate of need program or any other person involved in the decision regarding an application for, or the withdrawal of, a certificate of need and the applicant for, or holder of, a certificate of need, any person acting on behalf of the applicant or holder, or any person with an interest regarding issuance or withdrawal of a certificate of need.

(17) "Expenditure minimum" means one million dollars for the twelve-month period beginning with July 24, 1983, adjusted annually by the department according to the provisions of WAC 246-310-900.

(18) "Health care facility" means hospitals, psychiatric hospitals, nursing homes, kidney disease treatment centers including freestanding dialysis units, ambulatory surgical facilities, continuing care retirement communities, hospices and home health agencies, and includes such facilities when owned and operated by a political subdivision or instrumentality of the state and such other facilities as required by federal law and implementing regulations, but does not include Christian Science sanatoriums operated or listed and certified by the First Church of Christ Scientist, Boston, Massachusetts. In addition, the term "health care facility" does not include any nonprofit hospital:

(a) Operated exclusively to provide health care services for children;

(b) Which does not charge fees for such services; and

(c) If not contrary to federal law as necessary to the receipt of federal funds by the state.

(d) In addition, the term "health care facility" does not include a continuing care retirement community which:

(i) Offers services only to contractual members;

(ii) Provides its members a contractually guaranteed range of services from independent living through skilled nursing, including some form of assistance with activities of daily living;

(iii) Contractually assumes responsibility for costs of services exceeding the member's financial responsibility

as stated in contract, so that, with the exception of insurance purchased by the retirement community or its members, no third party, including the Medicaid program, is liable for costs of care even if the member depletes personal resources;

(iv) Offers continuing care contracts and operates a nursing home continuously since January 1, 1988, or obtained a certificate of need to establish a nursing home;

(v) Maintains a binding agreement with the department of social and health services assuring financial liability for services to members, including nursing home services, shall not fall upon the department of social and health services;

(vi) Does not operate, and has not undertaken, a project resulting in a number of nursing home beds in excess of one for every four living units operated by the continuing care retirement community, exclusive of nursing home beds; and

(vii) Has undertaken no increase in the total number of nursing home beds after January 1, 1988, unless a professional review of pricing and long-term solvency was obtained by the retirement community within the prior five years and fully disclosed to members.

(19) "Health maintenance organization" means a public or private organization, organized under the laws of the state, which:

(a) Is a qualified health maintenance organization under Title XIII, Section 1310(d) of the Public Health Service Act; or

(b)(i) Provides or otherwise makes available to enrolled participants health care services, including at least the following basic health care services: Usual physician services, hospitalization, laboratory, x-ray, emergency and preventive services, and out-of-area coverage;

(ii) Is compensated (except for copayments) for the provision of the basic health care services listed in (b)(i) of this subsection to enrolled participants by a payment made on a periodic basis without regard to the date the health care services are provided and fixed without regard to the frequency, extent, or kind of health service actually provided; and

(iii) Provides physicians' services primarily:

(A) Directly through physicians who are either employees or partners of such organization, or

(B) Through arrangements with individual physicians or one or more groups of physicians (organized on a group practice or individual practice basis).

(20) "Health service area" means a geographic region appropriate for effective health planning including a broad range of health services.

(21) "Health services" means clinically related (i.e., preventive, diagnostic, curative, rehabilitative, or palliative) services and includes alcoholism, drug abuse, and mental health services.

(22) "Home health agency" means an entity which is, or is to be, certified as a provider of home health services in the Medicaid or Medicare program. The department shall not require a home health agency previously issued a certificate of need as a new health care facility to obtain additional certificate of need approval if the

agency has not received Medicare or Medicaid certification by the effective date of these rules.

(23) "Hospice" means an entity which is, or is to be, certified as a provider of hospice services in the Medicaid or Medicare program. The department shall not require a hospice previously issued a certificate of need as a new health care facility to obtain additional certificate of need approval if the hospice has not received Medicare or Medicaid certification by the effective date of these rules.

(24) "Hospital" means any institution, place, building or agency or distinct part thereof which qualifies or is required to qualify for a license under chapter 70.41 RCW, or as a psychiatric hospital licensed under chapter 71.12 RCW.

(25) "Inpatient" means a person receiving health care services with board and room in a health care facility on a continuous twenty-four-hour-a-day basis.

(26) "Intermediate care facility" means any institution or distinct part thereof certified as an intermediate care facility for participation in the Medicaid (Title XIX of the Social Security Act) program.

(27) "Kidney disease treatment center" means any place, institution, building or agency or a distinct part thereof equipped and operated to provide services, including dialysis and/or kidney transplantation, to persons who have end-stage renal disease.

(28) "May" means an act is permitted, but not required.

(29) "Nursing home" means any home, place, institution, building or agency or distinct part thereof including a nursing unit or a long-term care area of a hospital operating or maintaining facilities providing convalescent or chronic care, or both, for a period in excess of twenty-four consecutive hours for three or more patients not related by blood or marriage to the operator, who, by reason of illness or infirmity, are unable properly to care for themselves. Convalescent and chronic care may include, but not be limited to, any or all procedures commonly employed in waiting on the sick, such as administration of medicines, preparation of special diets, giving of bedside nursing care, application of dressings and bandages, and carrying out of treatment prescribed by a duly licensed practitioner of the healing arts. Nursing home includes any such entity licensed or required to be licensed under the provisions of chapter 18.51 RCW and any other intermediate care facility or skilled nursing facility as these terms are defined in this section.

(30) "Obligation," when used in relation to a capital expenditure, means the following has been incurred by or on behalf of a health care facility:

(a) An enforceable contract has been entered into by a health care facility or by a person on behalf of the health care facility for the construction, acquisition, lease, or financing of a capital asset; or

(b) A formal internal commitment of funds by a health care facility for a force account expenditure constituting a capital expenditure; or

(c) In the case of donated property, the date on which the gift is completed in accordance with state law.

(31) "Offer," when used in connection with health services, means the health facility provides one or more specific health services.

(32) "Person" means an individual, a trust or estate, a partnership, a corporation (including associations, joint stock companies, and insurance companies), the state, or a political subdivision or instrumentality of the state, including a municipal corporation or a hospital district.

(33) "Predevelopment expenditures" means capital expenditures, the total of which exceeds the expenditure minimum, made for architectural designs, plans, drawings, or specifications in preparation for the acquisition or construction of physical plant facilities. "Predevelopment expenditures" exclude any obligation of a capital expenditure for the acquisition or construction of physical plant facilities and any activity which the department may consider the "commencement of the project" as this term is defined in this section.

(34) "Professional review of continuing care retirement community pricing and long-term solvency" means prospective financial statements, supported by professional analysis and documentation, which:

(a) Conform to Principles and Practices Board Statement Number 9 of the Healthcare Financial Management Association, "Accounting and Reporting Issues Related to Continuing Care Retirement Communities"; and

(b) Project the financial operations of the continuing care retirement community over a period of ten years or more into the future; and

(c) Are prepared and signed by a qualified actuary as defined under WAC 284-05-060 or an independent certified public accountant, or are prepared by management of the continuing care retirement community and reviewed by a qualified actuary or independent certified public accountant who issues a signed examination or compilation report on the prospective financial statements; and

(d) Include a finding by management that the intended expansion project of the continuing care retirement project is financially feasible.

(35) "Project" means all undertakings proposed in a single certificate of need application or for which a single certificate of need is issued.

(36) "Secretary" means the secretary of the Washington state department of health or the secretary's designee.

(37) "Shall" means compliance is mandatory.

(38) "Skilled nursing facility" means any institution or distinct part thereof certified as a skilled nursing facility for participation in the Medicare (Title XVIII) or Medicaid (Title XIX) program.

(39) "State health plan" means a document developed in accordance with RCW 70.38.065 and in effect until June 30, 1990, unless superseded by department-adopted rules.

(40) "State Health Planning and Resources Development Act" means chapter 70.38 RCW.

(41) "Tertiary health service" means a specialized service meeting complicated medical needs of people and requires sufficient patient volume to optimize provider

effectiveness, quality of service, and improved outcomes of care.

(42) "Undertaking" means any action subject to the provisions of chapter 246-310 WAC.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-010, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.38 RCW. 90-17-086 (Order 081), § 248-19-220, filed 8/17/90, effective 9/17/90; 90-02-093 (Order 023), § 248-19-220, filed 1/3/90, effective 2/3/90. Statutory Authority: RCW 70.38.135. 88-15-021 (Order 2639), § 248-19-220, filed 7/11/88; 86-06-030 (Order 2344), § 248-19-220, filed 2/28/86; 84-07-014 (Order 2082), § 248-19-220, filed 3/14/84; 81-09-012 (Order 210), § 248-19-220, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-220, filed 11/30/79.]

**WAC 246-310-020 Applicability of chapter 246-310 WAC.** (1) The following undertakings shall be subject to the provisions of chapter 246-310 WAC, with the exceptions provided for in this section.

(a) The construction, development, or other establishment of a new health care facility:

(i) No new health care facility may be initiated as a health service of an existing health care facility without certificate of need approval as a new health care facility;

(ii) The extension, on a regular and ongoing basis, of the services of a home health agency or a hospice in a county not previously regularly included in the service area of that home health agency or hospice during the preceding twelve months shall be considered the development of a new home health agency or hospice.

(b) The sale, purchase, or lease of part or all of any existing hospital licensed under chapter 70.41 RCW or a psychiatric hospital licensed under chapter 71.12 RCW;

(c) A change in bed capacity of a health care facility increasing the total number of licensed beds or redistributing beds among acute care, skilled nursing, intermediate care, and boarding home care, as defined under RCW 18.20.020, if the bed redistribution is effective for a period in excess of six months;

(d) Any new tertiary health services offered in or through a health care facility, and not offered on a regular basis by, in, or through such health care facility within the twelve-month period prior to the time the facility will offer such services:

(i) Tertiary services include the following:

(A) Specialty burn services. This is a service designed, staffed, and equipped to care for any burn patient regardless of the severity or extent of the burn. All staff and equipment necessary for any level of burn care are available;

(B) Intermediate care nursery and/or obstetric services level II. Intermediate care nursery is defined in chapter 246-318 WAC. A level II obstetric service is in an area designed, organized, equipped, and staffed to provide a full range of maternal and neonatal services for uncomplicated patients and for the majority of complicated obstetrical problems;

(C) Neonatal intensive care nursery and/or obstetric services level III. Neonatal intensive care nursery is defined in chapter 246-318 WAC. A level III obstetric

service is in an area designed, organized, equipped, and staffed to provide services to the few women and infants requiring full intensive care services for the most serious type of maternal-fetal and neonatal illnesses and abnormalities. Such a service provides the coordination of care, communications, transfer, and transportation for a given region. Level III services provide leadership in preparatory and continuing education in prenatal and perinatal care and may be involved in clinical and basic research;

(D) Transplantation of specific solid organs, including, but not limited to, heart, liver, pancreas, lung, and kidney and including bone marrow. A transplantation service for each solid organ is considered a separate tertiary service;

(E) Open heart surgery and/or elective therapeutic cardiac catheterization including elective percutaneous transluminal coronary angioplasty (PTCA). Open heart surgery includes the care of patients who have surgery requiring the use of a heart lung bypass machine. Therapeutic cardiac catheterization means passage of a tube or other device into the coronary arteries or the heart chambers to improve blood flow. PTCA means the treatment of a narrowing of a coronary artery by means of inflating a balloon catheter at the site of the narrowing to dilate the artery;

(F) Inpatient physical rehabilitation services level III. Level III rehabilitation services are services for persons with usually nonreversible, multiple function impairments of a moderate-to-severe complexity resulting in major changes in the patient's lifestyle and requiring intervention by several rehabilitation disciplines. Services are multidisciplinary, including such specialists as a rehabilitation nurse; and physical, occupational, and speech therapists; and vocational counseling; and a physiatrist. The service is provided in a dedicated unit with a separate nurses station staffed by nurses with specialized training and/or experience in rehabilitation nursing. While the service may specialize (i.e., spinal cord injury, severe head trauma, etc.), the service is able to treat all persons within the designated diagnostic specialization regardless of the level of severity or complexity of the impairments;

(G) Specialized inpatient pediatric services. The service is designed, staffed, and equipped to treat complex pediatric cases for more than twenty-four hours. The service has a staff of pediatric specialists and subspecialists.

(ii) The department shall review, periodically revise, and update the list of tertiary services. The department shall change the tertiary services list following the procedures identified in WAC 246-310-035;

(iii) The offering of an inpatient tertiary health service by a health maintenance organization or combination of health maintenance organizations is subject to the provisions under chapter 246-310 WAC unless the offering is exempt under the provisions of RCW 70.38.111.

(e) Any increase in the number of dialysis stations in a kidney disease center;

(f) Any capital expenditure in excess of the expenditure minimum for the construction, renovation, or alteration of a nursing home. However, a capital expenditure, solely for any one or more of the following, which does not substantially affect patient charges, is not subject to certificate of need review:

- (i) Communications and parking facilities;
- (ii) Mechanical, electrical, ventilation, heating, and air conditioning systems;
- (iii) Energy conservation systems;
- (iv) Repairs to, or the correction of, deficiencies in existing physical plant facilities necessary to maintain state licensure;
- (v) Acquisition of equipment, including data processing equipment, not for use in the direct provision of health services;
- (vi) Construction, involving physical plant facilities, including administrative and support facilities, not for use in the provision of health services;
- (vii) Acquisition of land; and
- (viii) Refinancing of existing debt.

(g) Any expenditure for the construction, renovation, or alteration of a nursing home or change in nursing home services in excess of the expenditure minimum made in preparation for any undertaking subject to the provisions under chapter 246-310 WAC and any arrangement or commitment made for financing such undertaking;

(h) No person may divide a project in order to avoid review requirements under any of the thresholds specified under this section; and

(i) The department may issue certificates of need authorizing only predevelopment expenditures, without authorizing any subsequent undertaking for which the predevelopment expenditures are made.

(2) No person shall engage in any undertaking subject to certificate of need review unless:

(a) A certificate of need authorizing such undertaking is issued and remains valid; or

(b) An exemption is granted in accordance with the provisions of this chapter.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-020, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-020, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.38 RCW. 90-21-028 (Order 082), § 248-19-231, filed 10/9/90, effective 10/9/90; 89-23-098 (Order 019), § 248-19-231, filed 11/21/89, effective 12/22/89.]

**WAC 246-310-030 Repealed.** See Disposition Table at beginning of this chapter.

**WAC 246-310-030A Repealed.** See Disposition Table at beginning of this chapter.

**WAC 246-310-035 Tertiary services identification.** (1) The criteria in this section shall be used as guidelines when examining services to determine whether the service is considered a tertiary service.

(2) In determining whether a service is a tertiary service the department shall consider the degree to which the service meets the following criteria:

(a) Whether the service is dependent on the skills and coordination of specialties and subspecialties. Including, but not limited to, physicians, nurses, therapists, social workers;

(b) Whether the service requires immediate access to an acute care hospital;

(c) Whether the service is characterized by relatively few providers;

(d) Whether the service is broader than a procedure;

(e) Whether the service has a low use rate;

(f) Whether consensus supports or published research shows that sufficient volume is required to impact structure, process, and outcomes of care; and

(g) Whether the service carries a significant risk or consequence.

(3) Annually the department shall request review of proposed changes to the list of tertiary services identified in WAC 246-310-020. The annual review shall be conducted as follows:

(a) The department shall send notice to all persons who have sent the certificate of need program a written request to be notified of the annual review of tertiary services.

(b) The notice shall contain the following:

(i) Identification of the thirty-day period during which written comments may be received. This thirty-day period shall be called the comment period;

(ii) The criteria listed in this section; and

(iii) The name and address of the person in the department to whom written comments are to be addressed.

(c) The written comments must address whether a service meets or partially meets the criteria in this section.

(d) Within sixty days after the close of the comment period the department shall determine whether to propose any changes to the list of tertiary services in chapter 246-310 WAC. This sixty-day period shall be called the consideration period.

(e) During the consideration period information may be exchanged between the department and persons proposing changes to the list of tertiary services in chapter 246-310 WAC.

(4) The department shall convene a technical work group at least every three years to do the following:

(a) Review the criteria listed in this section to determine whether the criteria appropriately define a tertiary service; and

(b) Propose any necessary changes to the list of tertiary services in WAC 246-310-020.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-035, filed 12/23/91, effective 1/23/92.]

**WAC 246-310-050 Applicability determination.** (1) Any person wanting to know whether an action the person is considering is subject to certificate of need requirements (chapter 246-310 WAC) should submit a written request to the certificate of need unit requesting a formal determination of applicability of the certificate of need requirements to the action.

(a) A copy of a written request for determination of applicability shall be sent simultaneously to the appropriate advisory review agencies.

(b) The written request shall be in a form prescribed by the department and contain an explicit description of the action. The description shall include the nature and extent of any construction, changes in services, and the estimated total costs of the action.

(2) The department may request such additional written information as is reasonably necessary to make an applicability determination on the action.

(3) The department shall respond in writing to a request for an applicability determination within thirty days of receipt of all the information needed for such determination. In the written response, the department shall state the reasons for its determination that the action is or is not subject to certificate of need requirements.

(4) Information or advice given by the department as to whether an action is subject to certificate of need requirements shall not be considered an applicability determination unless it is in written form in response to a written request submitted in accordance with provisions of this section.

(5) A written applicability determination on an action in response to a written request and based on written information shall be binding upon the department: *Provided*, The nature, extent, or cost of the action does not significantly change.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-050, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-050, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-240, filed 2/28/86; 81-09-012 (Order 210), § 248-19-240, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-240, filed 11/30/79.]

**WAC 246-310-080 Letter of intent.** Any person planning to propose an undertaking subject to certificate of need review shall submit a letter of as follows:

(1) A copy of the letter of intent shall include the following information:

(a) A description of the extent of the services proposed;

(b) The estimated cost of the proposed project;

(c) A description of the service area.

(d) Any person proposing an undertaking subject to certificate of need review shall send simultaneously a copy of the letter of intent to the regional health council or councils, if any, for the health service area or areas in which the project is to be located and, in the case of a hospital project, to the hospital commission.

(e) The letter of intent shall not constitute "notice of intent" with respect to the acquisition of major medical equipment.

(2) Expedited or regular review. Any person proposing an undertaking subject to an expedited or regular review shall submit a letter of intent at least thirty days prior to the submission of the application.

(3) Concurrent review.

(a) Any person proposing undertakings subject to concurrent review shall submit a letter of intent according to the applicable schedule.

(b) Within thirty days following the last day of the letter of intent submittal period, the department, after consultation with the advisory review agencies, shall determine which of the proposed undertakings compete with other proposed undertakings. Two or more undertakings within the same concurrent review cycle may be competing when the proposed nursing home beds would be located in the same county or nursing home planning area and/or the undertakings propose nursing home beds to be allocated from the same statewide continuing care retirement community (CCRC) bed pool as defined in WAC 246-310-380.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-080, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-080, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.115. 87-10-023 (Order 2487), § 248-19-270, filed 5/1/87. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-270, filed 2/28/86; 81-09-012 (Order 210), § 248-19-270, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-270, filed 11/30/79.]

**WAC 246-310-090 Submission and withdrawal of applications.** (1) General.

(a) A person proposing an undertaking subject to review shall submit a certificate of need application in such form and manner and containing such information as the department, after consultation with the advisory review agencies, has prescribed and published as necessary to such a certificate of need application.

(i) The information, which the department prescribes and publishes as required for a certificate of need application, shall be limited to the information necessary for the department to perform a certificate of need review and shall vary in accordance with and be appropriate to the category of review or the type of proposed project: *Provided however*, That the required information shall include that which is necessary to determine whether the proposed project meets applicable criteria and plan standards.

(ii) Information regarding a certificate of need application submitted by an applicant after the department has given "notification of the beginning of review" in the manner prescribed by WAC 246-310-170 shall be submitted in writing to the department, the regional health council, and for hospital projects, to the hospital commission.

(iii) Except as provided in WAC 246-310-326, no information regarding a certificate of need application submitted by an applicant after the conclusion of a public hearing conducted under the provisions of WAC 246-310-180 or the date of the final action of the appropriate regional health council or the date of the final action of the hospital commission on the application, whichever occurs last, shall be considered by the department in reviewing and taking action on a certificate of need application. An exception to this rule shall be made when, during its final review period, the department finds an unresolved pivotal issue requires submission of

further information by an applicant and the applicant agrees to an extension of the review period in order to resolve this issue as provided for in WAC 246-310-160 (2)(b), 246-310-150 (2)(c), and 246-310-140(4). The department shall furnish copies of its request to the applicant for such additional information to the appropriate advisory review agencies. The department shall give public notice of such request for additional information through the same newspaper in which the "notification of beginning of review" for the project was published. The notice shall identify the project, the nature of the unresolved issue and the information requested of the applicant, and shall state the period of time allowed for receipt of written comments from interested persons.

(b) A person submitting a certificate of need application shall simultaneously submit copies of such application to the certificate of need unit of the department and the appropriate advisory review agencies.

(i) The original and two copies of the application shall be submitted to the certificate of need unit of the department.

(ii) At least three and such additional copies of the application as may be required by the regional health council shall be submitted to the appropriate regional health council.

(iii) For a hospital project, one copy shall be submitted to the hospital commission.

(c) On or before the last day of the applicable screening period for a certificate of need application, as prescribed in subsections (2) and (3) of this section, the department shall send a written notice to the person submitting the application stating whether or not the application has been declared complete. If an application has been found to be incomplete, the notice from the department shall specifically identify the portions of the application in which the information provided has been found to be insufficient or indefinite and request the supplemental information needed to complete the application. The notice from the department shall incorporate the findings as to insufficient or indefinite application information transmitted to the department by the regional health council and the hospital commission.

(d) The department shall not request any supplemental information of a type not prescribed and published as being necessary to a certificate of need application for the type of project being proposed. The department may request clarification of information provided in the application.

(e) A response to the department's request for information to supplement an incomplete application shall be written and submitted to the same agencies and in the same numbers as required for an application under the provisions of subsection (1)(b) of this section.

(2) Screening and prereview activities.

(a) The department and the appropriate advisory review agencies shall, within a fifteen-day period for emergency, expedited, and regular reviews, screen the application to determine whether the information provided in the application is complete and as explicit as is necessary for a certificate of need review. This screening

period shall begin on the first day after which the department and the advisory review agencies have each received copies of the application.

(b) The department shall return an incomplete certificate of need application to the person submitting the application if the department has not received a response to a request for the supplemental information sent in accordance with subsection (1)(c) of this section within forty-five days for emergency, expedited, and regular reviews and within one month for concurrent review after such request was sent.

(c) For emergency, expedited, and regular reviews, a person submitting a response to the department's request for supplemental information to complete a certificate of need application within forty-five days after the request was sent by the department, in accordance with subsection (1)(c) of this section, shall have the right to exercise one of the following options:

(i) Submission of written supplemental information and a written request that such information be screened and the applicant be given opportunity to submit further supplemental information if the application is still incomplete;

(ii) Submission of written supplemental information with a written request that review of the certificate of need application begin without the department notifying the applicant as to whether the supplemental information is adequate to complete the application; or

(iii) Submission of a written request that the incomplete application be reviewed without supplemental information.

(d) For concurrent review a person submitting a response to the department's request for supplemental information to complete a certificate of need application within one month after the request was sent by the department, in accordance with subsection (1)(c) of this section, shall submit written supplemental information or a written request that the incomplete application be reviewed. The review shall begin in accordance with the published schedule.

(e) After receipt of a request for review of a certificate of need application, submitted in accordance with subsection (2)(c)(ii) or (iii) of this section, the department shall give notification of the beginning of review in the manner prescribed for a complete application in WAC 246-310-170.

(f) If a person requests the screening of supplemental information in accordance with subsection (2)(c)(i) of this section, such screening shall be carried out in the same number of days and in the same manner as required for an application in accordance with the provisions of subsection (1)(c) and (2)(a) of this section. The process of submitting and screening supplemental information may be repeated until the department declares the certificate of need application complete, the applicant requests that review of the incomplete application begin, or the one hundred twentieth day after the beginning of the first screening period for the application, whichever occurs first. The department shall return an application to the applicant if it is still incomplete on the one hundred twentieth day after the beginning of the

first screening period and the applicant has not requested review of such incomplete application.

(3) **Withdrawal of applications.**

A certificate of need application shall be withdrawn from the certificate of need process if the department receives a written request for withdrawal of the application from the person submitting the application at any time before final action on such application has been taken by the secretary's designee.

(4) **Resubmission of applications withdrawn or returned as incomplete.**

A submission of a new certificate of need application shall be required for a certificate of need review of any undertaking for which the department has returned an incomplete application in accordance with subsection (2)(b) of this section, or for which a certificate of need application has been withdrawn in accordance with subsection (3) of this section. The content of the application should be updated as necessary before resubmission.

Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-280, filed 2/28/86; 81-09-012 (Order 210), § 248-19-280, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-280, filed 11/30/79.]

**WAC 246-310-100 Amendment of certificate of need applications.** (1) The following changes to an application may be considered an amendment of an application:

(a) The addition of a new service or elimination of a service included in the original application.

(b) The expansion or reduction of a service included in the original application.

(c) An increase in the bed capacity.

(d) A change in the capital cost of the project or the method of financing the project.

(e) A substantial change in the rationale used to justify the project.

(2) Direct responses to screening questions will not be considered amendments.

(3) Amendments to certificate of need applications shall include information and documentation consistent with the requirements of WAC 246-310-090 (1)(a)(i) and (b).

(4) **Application for emergency review.** If an applicant amends an application during the screening period, the department, after consultation with the advisory review agencies, shall determine whether the amended application constitutes a new application. An application amended during the review period shall be considered a new application.

(5) An application for expedited or regular review may be amended during the screening period or the advisory review period.

(a) The advisory review agency recommends to the department that a change to an application constitutes an amendment. When the advisory agency recommends an application has been amended, a written justification

shall be submitted to the applicant and the department within five working days after the recommendation is made. The applicant may submit written information to the department within five working days indicating why the change should not be considered an amendment. The applicant shall also submit the written information to the advisory agency.

(b) The department shall determine within five working days of receipt of the advisory agency recommendation concerning an amendment whether the change constitutes an amendment to an application.

(c) When an application has been amended, the review period may be extended at the written request of the advisory review agency for a period not to exceed forty-five days.

(6) An application for concurrent review may be amended according to the following provisions:

(a) The department, in consultation with the advisory review agency, shall determine when an application has been amended.

(b) An amendment may be made through the first forty-five days of the concurrent review process. When an applicant amends an application, the review period for all applications reviewed concurrently shall be extended by a single thirty-day period. The forty-five days for amendments shall be divided as follows:

(i) During the first thirty days an applicant or applicants may amend an application one or more times.

(ii) When an amendment has been made to an application in the first thirty days, all applicants may make one final amendment during the remaining fifteen days of the forty-five day period.

(iii) The department shall send written notice to all applicants when an amendment to an application is submitted.

(iv) If no amendment has been made to any application through the thirty-day period, no amendments may be made during the subsequent fifteen-day period.

(c) Any information submitted after the amendment period which has not been requested in writing by the department shall be returned to the person submitting the information and shall not be considered in the review of the application.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-100, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-100, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-295, filed 2/28/86.]

**WAC 246-310-110 Categories of review.** (1) In the review of any certificate of need application, one of the following review processes shall be used: Regular review, concurrent review, emergency review, expedited review, or administrative review.

(2) **Determination of review process.**

The department, after any necessary consultation with the appropriate advisory review agencies, shall determine which review process will be used in the review of a given certificate of need application.

(a) **Administrative review.**

(i) The secretary's designee shall have the authority to review an abbreviated application proposing the obligation of any capital expenditure by or on behalf of a health care facility decreasing the total number of licensed beds or relocating licensed beds from one facility to another, by ten beds or ten percent, whichever is less, in any two-year period. Prior to making a determination of administrative review, the secretary's designee shall consult with the advisory review agencies.

(ii) An abbreviated application shall be submitted in a form acceptable to the secretary's designee in accordance with the provisions of WAC 246-310-090 (1)(b).

(iii) Such review shall be completed within ten working days after receipt of an application.

(b) Emergency review.

(i) Beginning January 1, 1981, an emergency review may, with the written consent of the appropriate advisory review agencies, be conducted when an immediate capital expenditure is required in order for a health care facility to maintain or restore basic and essential patient services.

(ii) The department may, after consulting with the appropriate advisory review agencies, determine an application submitted for emergency review does not qualify for such review. Such a determination and notification to the applicant shall be made within five days after receipt of the application. When the department makes a determination an application is not subject to emergency review procedures, the application will be reviewed under another review process appropriate for the type of undertaking proposed. The department will notify the applicant of the other process under which the application will be reviewed.

(c) Expedited review.

Beginning July 24, 1983, an expedited review shall be conducted on a certificate of need application for the following:

(i) Projects proposed for the correction of deficiencies as described in WAC 246-310-480, except projects for the repair to or correction of deficiencies in the physical plant necessary to maintain state licensure, which are exempt from review by the provisions of WAC 246-310-020, if they do not substantially affect patient charges.

(ii) The replacement of equipment having similar functional capability and not resulting in the offering or development of any new health services.

(iii) Demonstration or research projects: *Provided*, That such projects do not involve a change in bed capacity or the provision of a new institutional health service.

(iv) Acquisition of an existing health care facility.

(v) Projects limited to predevelopment expenditures.

(d) Regular review process.

The regular review process shall be used for any application unless the department has determined the emergency, expedited, or concurrent review process will be used in the review of such application. The regular review process will also be used to review applications for projects solely for the purposes listed in WAC 246-310-020 determined by the department to substantially

affect patient charges, unless the project qualifies for an expedited review under subsection (2)(b)(i) of this section.

(e) Concurrent review process.

The concurrent review process shall be used for all applications determined to be competing in accordance with WAC 246-310-120.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-110, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-110, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-300, filed 2/28/86; 81-09-012 (Order 210), § 248-19-300, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-300, filed 11/30/79.]

**WAC 246-310-120 Concurrent review process. (1)**

Projects for which the department may establish concurrent review schedules are identified in RCW 70.38.115(7). An annual concurrent review has been scheduled for competing projects proposing:

(a) New nursing homes,

(b) Nursing home bed additions,

(c) The redistribution of beds from the following facility and service categories to skilled nursing facility beds:

(i) Acute care,

(ii) Boarding home, or

(iii) Intermediate care for the mentally retarded, or

(d) The redistribution of beds from the following facility and service categories to intermediate care facility beds:

(i) Acute care, or

(ii) Boarding home, and

(e) The relocation of nursing home beds from one county or nursing home planning area to another county or nursing home planning area.

(2) Procedures for the concurrent review process shall be as follows:

(a) Submittal of initial applications.

(i) Each applicant shall submit simultaneously copies of the application to each reviewing agency.

(ii) Each applicant if requested in writing shall provide a copy of his or her application to the applicant of each other competing application.

(b) Screening of the initial applications.

(i) The department and the appropriate advisory agencies shall screen each initial application during the screening period of the applicable concurrent review cycle schedule.

(ii) The screening period shall begin on the first work day following the last day of the initial application submittal period for the applicable concurrent review cycle schedule.

(iii) The department by the end of the screening period of the applicable concurrent review cycle schedule shall send a written request for supplemental information to each applicant.

(iv) Each applicant by the end of the final application submittal period shall respond to the department's written request for supplemental information in one of the following ways:

(A) Submitting the requested written supplemental information, or

(B) Submitting a written request that the incomplete application be reviewed without supplemental information.

(c) Reviewing of final applications.

(i) The department shall commence the review of competing applications on the date prescribed for the applicable concurrent review cycle schedule.

(ii) The total number of days in the advisory and final review periods shall not exceed one hundred and thirty-five, unless extended in accordance with subsection (2)(d) of this section.

(iii) The appropriate advisory review agencies shall submit written findings and recommendations on each competing application to the department within ninety days from the beginning of the advisory review period, unless the advisory review period is extended in accordance with subsection (2)(d) of this section.

(iv) The department shall conclude its final review and the secretary's designee shall take action on a certificate of need application within forty-five days after the end of the advisory review agencies' review period, unless extended in accordance with subsection (2)(d) of this section.

(d) Extending review of final applications.

(i) The advisory review period shall be extended in accordance with the provisions of WAC 246-310-100(6).

(ii) The final review period may be extended by the department under the following provisions:

(A) The department informs each applicant of the competing applications of the existence of an unresolved pivotal issue.

(B) The department may make a written request for additional information from one or more of the applicants of the competing applications.

(C) The department shall specify in the written request a deadline for receipt of written responses.

(D) Each applicant receiving such written request may provide a written response within the specified deadline.

(E) The department may extend the final review period for all competing applications up to thirty days after the receipt of the last response to the department's request for additional information or after the specified deadline, whichever occurs first.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-120, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-120, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.115. 87-10-023 (Order 2487), § 248-19-327, filed 5/1/87. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-327, filed 2/28/86.]

**WAC 246-310-130 Nursing home concurrent review cycles.** (1) The department shall review concurrently during review cycles established under subsection (6) of this section the following:

(a) New nursing homes,

(b) Nursing home bed additions, or

(c) Redistribution of beds from the following facility or service categories to skilled nursing care beds:

(i) Acute care,

(ii) Boarding home care, or

(iii) Intermediate care for the mentally retarded; or

(d) Redistribution of beds from the following facility or service categories to intermediate care facility beds:

(i) Acute care, or

(ii) Boarding home care.

(2) Undertakings of type A continuing care retirement communities (CCRCs), as defined in subsection (3)(b)(i) of this section which do not propose or are not operating within a transition period as defined in subsection (3)(d) of this section during development, and which meet the following conditions, shall be reviewed under the regular review process per WAC 246-310-160:

(a) The number of nursing home beds requested in a single undertaking shall not exceed sixty; and

(b) After project completion, the number of nursing home beds, including those with which the CCRC contracts, shall not exceed one bed for each four independent living units within the CCRC. In computing this ratio, only independent living units of the CCRC already existing, and/or scheduled for completion at the same time as the proposed nursing home beds under the same financial feasibility plan, shall be counted.

(3) For purposes of this section, the following definitions shall be used:

(a) "Continuing care contract" means a contract to provide a person, for the duration of the person's life or for a term in excess of one year, shelter along with nursing, medical, health-related, or personal care services, in exchange for payment of an entrance fee, periodic charges, or both. Continuing care contracts include, but are not limited to, life care agreements and mutually terminable contracts. The living space and services under a continuing care contract may or may not be provided at the same location.

(b) "Continuing care retirement community (CCRC)" means any of a variety of entities providing shelter and services based on continuing care contracts with its enrollees. CCRCs are categorized as follows:

(i) "Type A CCRC" means a CCRC meeting the following requirements:

(A) Maintains for a period in excess of one year a CCRC contract with its enrollees or residents for a contractually guaranteed range of services from independent living through nursing home care, including some form of assistance with activities of daily living;

(B) Continues a contract if an enrollee or resident is no longer able to pay for services;

(C) Offers services only to contractual enrollees with limited exception related to use of transition periods; and

(D) Prohibits Medicaid program liability for costs of care even if the member depletes his or her personal resources.

(ii) "Type B CCRC" means a CCRC meeting the following requirements:

(A) Maintains for a period in excess of one year a CCRC contract with its enrollees or residents,

(B) May provide a range of services beyond nursing home care,

(C) May terminate a contract if an enrollee or resident is unable to pay for services,

(D) May admit patients to the nursing home who are not CCRC enrollees or residents, and

(E) May maintain Medicaid contracts and/or other requirements for third-party payment.

(c) "Enrollee" of a CCRC means an individual who has signed a continuing care contract with a CCRC.

(d) "Transition period" means a period of time, not exceeding five years, between the date an enrollee becomes the first resident of a type A CCRC and the date it fully meets the requirements of a type A CCRC as contained in the current state health plan.

(4) The annual nursing home concurrent review consists of the following cycles:

(a) One of the annual cycles is reserved for the review of competing applications submitted by or on behalf of:

(i) Type A CCRCs applying for nursing home beds available from the statewide CCRC allotment as described in WAC 246-310-380(5);

(ii) Type A CCRCs which propose or are operating within a transition period during development and are not applying for nursing home beds available from any nursing home planning area; and

(iii) Type B CCRCs applying for nursing home beds available from the statewide CCRC allotment.

(b) Two other cycles are for review of competing applications for nursing home beds needed in half of the nursing home planning areas; and

(c) Until whichever occurs first, December 31, 1990, or issuance of a certificate of need for all or part of those available beds, one cycle is reserved for the review of competing applications submitted for nursing home beds available from the King County AIDS nursing home bed allotment established under WAC 246-310-400.

(5) The department shall use the following nursing home concurrent review application filing procedures:

(a) Each applicant shall:

(i) File the required number of copies of each application as specified in the application information requirements, and

(ii) Mail or deliver the application so that the department receives it no later than the last day for initial application receipt as prescribed in the schedule for that concurrent review cycle.

(b) The department shall:

(i) Only review applications for which a letter of intent, as described in WAC 246-310-080, was mailed or delivered to the department before the last day for receipt of letters of intent as indicated below;

(ii) Begin screening all applications received during the initial application period on the first working day following the close of that period; and

(iii) Return to the applicant any application received after the last day of the initial application receipt period.

(6) The schedules for the annual nursing home bed concurrent review cycles shall be as follows:

(a) For those applications described in subsection (4)(a) of this section, the concurrent review cycle schedule shall be as follows:

(i) Period for receipt of letters of intent shall begin on the first working day of June and end on the first working day of July,

(ii) Period for receipt of initial applications shall begin on the first working day of July and end on the first working day of August,

(iii) End of initial application completeness screening period is the first working day of September,

(iv) End of final application receipt period is the first working day of October, and

(v) Beginning of concurrent review period is October 16 or first working day after that date.

(b) For competing applications submitted for nursing home beds available for the Chelan/Douglas, Clallam, Clark/Skamania, Cowlitz, Grant, Grays Harbor, Island excluding Camano, Jefferson, King, Kittitas, Klickitat, Okanogan, Pacific, San Juan, Skagit, Spokane, and Yakima nursing home planning areas, the concurrent review cycle schedule shall be as follows:

(i) Period for receipt of letters of intent shall begin on the first working day of July and end on the first working day of August,

(ii) Period for receipt of initial applications shall begin on the first working day of August and end on the first working day of September,

(iii) End of initial application completeness screening period is the first working day of October,

(iv) End of final application receipt period is the first working day of November, and

(v) Beginning of concurrent review period is November 16 or first working day after that date.

(c) For competing applications submitted for nursing home beds available for the Adams, Asotin, Benton, Columbia, Ferry, Franklin, Garfield, Kitsap, Lewis, Lincoln, Mason, Pend Oreille, Pierce, Snohomish including Camano, Stevens, Thurston, Wahkiakum, Walla Walla, Whatcom, and Whitman nursing home planning areas, the concurrent review cycle schedule shall be as follows:

(i) Period for receipt of letters of intent shall begin on the first working day of August and end on the first working day of September,

(ii) Period for receipt of initial applications shall begin on the first working day of September and end on the first working day of October,

(iii) End of initial application completeness screening period is the first working day of November,

(iv) End of final application receipt period is the first working day of December, and

(v) Beginning of concurrent review period is December 16 or first working day after that date.

(d) For those applications described in subsection (4)(c) of this section, the concurrent review cycle shall be as follows:

(i) Period for receipt of letters of intent shall begin on February 17, 1989, and end on March 3, 1989;

(ii) Period of receipt of initial applications shall begin on March 6, 1989, and end on March 20, 1989;

(iii) End of initial application completeness screening period is April 3, 1989;

(iv) End of final application receipt period is April 17, 1989;

(v) Beginning of concurrent review period is April 17, 1989;

(vi) End of the advisory review period is June 16, 1989; and

(vii) End of the final review period is July 14, 1989.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-130, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-130, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.115. 88-24-026 (Order 2736), § 248-19-328, filed 12/2/88. Statutory Authority: RCW 70.38.115 and 70.38.135. 88-04-047 (Order 2591), § 248-19-328, filed 1/29/88. Statutory Authority: RCW 70.38.115. 87-10-023 (Order 2487), § 248-19-328, filed 5/1/87.]

**WAC 246-310-132 Open heart surgery concurrent review cycle.** (1) The department shall review new open heart surgery services using the concurrent review cycle in this section.

(2) Certificate of need applications shall be submitted and reviewed according to the following schedule and procedures.

(a) Letters of intent shall be submitted between the first working day and last working day of April 1992 and each year thereafter.

(b) Initial applications shall be submitted between the first working day and last working day of May 1992 and each year thereafter.

(c) The department shall screen initial applications for completeness by the last working day of June 1992 and each year thereafter.

(d) Responses to screening questions shall be submitted by the last working day of July 1992.

(e) The public review and comment period for applications shall begin on August 14, 1992, or the first working day thereafter each year thereafter.

(f) The public review and comment period shall be limited to ninety days, unless extended according to the provisions of WAC 246-310-120 (2)(d).

(g) The final review period shall be limited to forty-five days, unless extended according to the provisions of WAC 246-310-120 (2)(d).

(3) Any letter of intent or certificate of need application submitted for review in advance of this schedule, or certificate of need application under review as of the effective date of this section, shall be held by the department for review according to the schedule in this section.

[Statutory Authority: RCW 70.38.135. 91-17-011 (Order 188), § 246-310-132, filed 8/12/91, effective 8/28/91.]

**WAC 246-310-150 Expedited review process.** (1) The expedited review process shall not exceed fifty days from the beginning of the review period unless extended in accordance with the provisions of subsection (2) of this section: *Provided however*, That the appropriate regional health council consents in writing to a thirty-day review period. If the regional health council does not

consent to a thirty-day review period, the expedited review process shall not exceed eighty days from the beginning of the review period.

(a) If the advisory agencies' review period is thirty days, advisory review agencies shall submit written findings and recommendations to the department within thirty days of the beginning of the review period. If the advisory agencies' review period is sixty days, the advisory review agencies shall submit written findings and recommendations to the department within sixty days of the beginning of the review period.

(b) The department shall complete its final review and the secretary's designee shall make his or her decision on a certificate of need application under an expedited review within twenty days of the end of the review period or extended review period of the advisory review agencies.

(2) The review period for an expedited review may be extended according to the following provisions:

(a) If the regional health council has consented to a thirty-day review period, the review period may be extended for up to an additional thirty days upon the written request of the advisory review agency when additional time is needed by the advisory review agency, to complete the review and submit written findings and recommendations to the department and/or up to an additional forty-five days in accordance with WAC 246-310-100. The department may grant further extensions to this review period: *Provided*, The person submitting the certificate of need application gives written consent to further extension.

(b) If an issue, which is pivotal to the decision of the secretary's designee remains unresolved, the department may make one request for additional information from the person submitting the application. The department may extend its final expedited review period up to but not exceeding thirty days after receipt of the applicant's written response to the department's request for information.

(c) The department may extend either the expedited review period for the advisory review agencies or the department's final review period upon receipt of a written request of the person submitting the application: *Provided however*, That such an extension shall not exceed sixty days.

**WAC 246-310-160 Regular review process.** (1) The regular review process shall not exceed ninety days from the beginning of the review period and shall be conducted in accordance with this section unless the review period is extended in accordance with the provisions of subsection (2) of this section.

(a) Within sixty days from the first day of the review period, the advisory review agencies shall submit written findings and recommendations on a certificate of need application to the department unless either of the advisory review agencies has requested and received an extension of this review period from the department.

(b) The department shall complete its final review and the secretary's designee shall make a decision on a certificate of need application within thirty days of the end of the review period or extended review period of the advisory review agencies.

(2) The review period for a regular review may be extended according to the following provisions:

(a) The advisory agencies' review period may be extended for up to an additional thirty days upon the written request of either of the advisory review agencies when such additional time is needed to complete the review and submit written findings and recommendations to the department and/or up to an additional forty-five days in accordance with WAC 246-310-100. The department may grant further extensions to this review period: *Provided*, The person submitting the certificate of need application gives written consent to such further extensions.

(b) If an issue, which is pivotal to the decision of the secretary's designee remains unresolved, the department may make one request for additional information from the person submitting the application. The department may extend its final review period up to but not exceeding thirty days after receipt of the applicant's written response to the department's request for information.

(c) The department may extend either the review period for the advisory review agencies or the department's final review period upon receipt of a written request of the person submitting the application: *Provided however*, That such an extension shall not exceed ninety days.

**WAC 246-310-170 Notification of beginning of review. (1) Notice required.**

The department shall provide written notification of the beginning of the review of a certificate of need application and notification of the beginning of the review of a proposed withdrawal of a certificate of need to affected persons (other than persons residing within the geographic area served or to be served by the applicant, any persons regularly using health care facilities within that geographic area, and third-party payers reimbursing health care facilities for services in the health service area in which the project is proposed to be located), and any other person submitting a written request that the person's name be on the mailing list for such notice.

Notification of the beginning of the review of a certificate of need application shall be provided to persons residing within the geographic area served or to be served by the applicant, to any person regularly using health care facilities within that geographic area, and third-party payers reimbursing health care facilities for services in the health service area in which the project is proposed to be located, through a newspaper of general circulation in the health service area of the project.

(2) Specific notice requirements.

(a) The department shall give "notification of the beginning of review" of an application after the department and the appropriate advisory review agencies have each received a complete application or the applicant's request, submitted in accordance with WAC 246-310-090 (2)(c), that review of the application begin. Such notice shall be given according to the following requirements:

(i) Emergency review.

When an application is being reviewed under the emergency review process, required notices shall be given within five working days following the receipt of a complete application or the applicant's written request that review of the application begin.

(ii) Expedited and regular review.

When an application is being reviewed under the expedited or regular review process, required notices shall be given within five working days of a declaration that the application is complete or the applicant's request that review of the application begin.

(b) The department shall give notification of the beginning of the review of a proposed withdrawal of a certificate of need when the department determines there may be good cause to withdraw a certificate of need.

(c) The notices shall include:

(i) A general description of the project;

(ii) In the case of a proposed withdrawal of a certificate of need, the reasons for the proposed withdrawal;

(iii) The proposed review schedule;

(iv) The period within which one or more affected persons may request the conduct of a public hearing during the review;

(v) The name and address of the agency to which a request for a public hearing should be sent;

(vi) The manner in which notification will be provided of the time and place of any hearing so requested;

(vii) Notice that any affected person wishing to receive notification of a meeting on the application called by the department after the end of the advisory agencies review period shall submit a written request to the department to receive notification of such meetings; and

(viii) The period within which any affected person may request notification of the meetings referenced in subsection (2)(c)(vii) of this section.

(d) The notices to other affected persons shall be mailed on the same date the notice to the public is mailed to the newspaper for publication.

(3) Beginning of review.

(a) Review of a certificate of need application under the expedited or regular review process shall begin on

the day the department sends notification of the beginning of review to the general public and other affected persons unless the department has received a written request from the applicant pursuant to WAC 246-310-090 (2)(c)(iii), in which case review shall begin upon receipt of such request.

(b) Review of certificate of need applications under the concurrent review process shall begin fifteen days after the conclusion of the published time period for the submission of final applications subject to concurrent review.

(c) Review of a certificate of need application under emergency review shall begin on the first day after the date on which the department and the appropriate advisory review agencies have determined the application is complete, or have each received a written request to begin review submitted by the applicant in accordance with WAC 246-310-090 (2)(c).

(d) Review of a proposed withdrawal of a certificate of need shall begin on the day the department sends notification of the beginning of review to the general public and to other affected persons.

[Statutory Authority: RCW 70.38.135 and 70.38.919, 92-02-018 (Order 224), § 246-310-170, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-310-170, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.38 RCW, 79-12-079 (Order 188), § 248-19-310, filed 11/30/79.]

**WAC 246-310-180 Public hearings.** (1) "Opportunity for a public hearing," as used in this section, shall mean a public hearing will be conducted if a valid request for such a hearing has been submitted by one or more affected persons.

(2) The department shall provide opportunity to affected persons for a public hearing on:

(a) A certificate of need application which is under review, unless the application is being reviewed according to the emergency or expedited review processes; and

(b) The proposed withdrawal of a certificate of need.

This requirement for a public hearing shall be satisfied if the appropriate regional health council has provided opportunity for such a public hearing to "affected persons" as this term is defined in WAC 246-310-010: *Provided however*, That the department has delegated the responsibility for such hearing to the appropriate regional health council, and such regional health council has followed public hearing procedures required under the provisions of this section.

(3) To be valid, a request for a public hearing on a certificate of need application or on the proposed withdrawal of a certificate of need shall:

(a) Be submitted in writing;

(b) Be received by the agency identified in the "notification of beginning of review" within fifteen days after the date on which the department's "notification of beginning of review" for the particular certificate of need application or proposed withdrawal of a certificate of need was published in a newspaper of general circulation; and

(c) Include identification of the particular certificate of need application or proposed certificate of need withdrawal for which the public hearing is requested and the full name, complete address, and signature of the person making the request.

(4) The department or the regional health council to which the department delegated responsibility for public hearings shall give written notice of a public hearing conducted pursuant to this section.

(a) Written notice shall be given to affected persons and the public at least fifteen days prior to the beginning of the public hearing.

(b) The notices shall include: Identification of the certificate of need application or certificate of need on which the public hearing is to be conducted and the date, time, and place of the public hearing.

(c) Notice to the general public to be served by the proposed project to which the certificate of need application or certificate of need pertains shall be through a newspaper of general circulation in the health service area of the proposed project. The notices to other affected persons shall be mailed on the same date the notice to the public is mailed to the newspaper for publication.

(5) In a public hearing on a certificate of need application or on a proposed withdrawal of a certificate of need, any person shall have the right to be represented by counsel and to present oral or written arguments and evidence relevant to the matter which is the subject of the hearing. Any person affected by the matter may conduct reasonable questioning of persons who make relevant factual allegations.

(6) The department or regional health council, whoever conducts the hearing, shall maintain a verbatim record of a public hearing and shall not impose fees for the hearing.

(7) The department shall not be required to conduct a public hearing on a certificate of need application being reviewed according to the emergency or expedited review procedures.

[Statutory Authority: RCW 70.38.135 and 70.38.919, 92-02-018 (Order 224), § 246-310-180, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-310-180, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135, 86-06-030 (Order 2344), § 248-19-320, filed 2/28/86; 81-09-012 (Order 210), § 248-19-320, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW, 79-12-079 (Order 188), § 248-19-320, filed 11/30/79.]

**WAC 246-310-190 Ex parte contacts.** (1) There shall be no ex parte contacts as defined in WAC 246-310-010(17) after whichever of the following occurs last:

(a) The conclusion of a public hearing held in accordance with WAC 246-310-180, or

(b) The final action of the appropriate regional health council, or

(c) The final action of the hospital commission.

(2) Any of the following communications shall not be considered ex parte contacts:

(a) A communication regarding the procedure or process of the review.

(b) A communication made in a meeting open to the public requested by the department and reasonable notice of the meeting has been given to the applicant, the advisory review agencies, all applicants in a concurrent review, and all persons having previously requested in writing to be notified of all such meetings or written requests for information concerning a specific application for certificate of need or a specific proposed withdrawal of a certificate of need.

(c) A written request for information made by the department and provided to all persons specified in subsection (2)(b) of this section.

(d) A response to a request made by the department in a meeting held in accordance with subsection (2)(b) of this section or in response to subsection (2)(c) of this section, and submitted to the department and to all persons specified in subsection (2)(b) of this section.

[Statutory Authority: RCW 70.38.135 and 70.38.919, 92-02-018 (Order 224), § 246-310-190, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-310-190, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135, 86-06-030 (Order 2344), § 248-19-326, filed 2/28/86.]

**WAC 246-310-200 Bases for findings and action on applications.** (1) The findings of the department's review of certificate of need applications and the action of the secretary's designee on such applications shall, with the exceptions provided for in WAC 246-310-470 and 246-310-480 be based on determinations as to:

- (a) Whether the proposed project is needed;
- (b) Whether the proposed project will foster containment of the costs of health care;
- (c) Whether the proposed project is financially feasible; and
- (d) Whether the proposed project will meet the criteria for structure and process of care identified in WAC 246-310-230.

(2) The decision on a certificate of need application shall be consistent with the state health plan in effect at the time the secretary's designee made the original or reconsidered or remanded decision. A finding of inconsistency shall not be based solely on the fact a proposed project is not specifically referenced in the state health plan.

(3) Criteria contained in this section and in WAC 246-310-210, 246-310-220, 246-310-230, and 246-310-240 shall be used by the department in making the required determinations.

(a) In the use of criteria for making the required determinations, the department shall consider:

(i) The consistency of the proposed project with the applicable regional health plan (RHP) and annual implementation plan (AIP), and the state health plan (SHP);

(ii) The standards in the state health plan identified to be used for certificate of need review purposes and applicable to the type of project under review;

(iii) In the event standards in the state health plan or regional health plan do not address in sufficient detail for a required determination the services or facilities for

health services proposed, the department may consider standards not in conflict with the state health plan or regional health plan in accordance with subsection (3)(b) of this section;

(iv) The findings and recommendations of the regional health council and the hospital commission (in relation to the immediate and long-range financial feasibility of a hospital project as well as the probable impact of such project on the cost of and charges for providing health services by the hospital, including recommendations to approve, conditionally approve, partially approve, or deny an application); and

(v) The relationship of the proposed project to the long-range plan (if any) of the person proposing the project.

(b) The department may consider any of the following in its use of criteria for making the required determinations:

(i) Nationally recognized standards from professional organizations;

(ii) Standards developed by professional organizations in Washington state;

(iii) Federal Medicare and Medicaid certification requirements;

(iv) State licensing regulations;

(v) The hospital commission's policies, guidelines and regulations;

(vi) Applicable standards developed by other individuals, groups, or organizations with recognized expertise related to a proposed undertaking; and

(vii) The written findings and recommendations of individuals, groups, or organizations with recognized expertise related to a proposed undertaking, with whom the department consults during the review of an application.

(c) At the request of an applicant, the department shall identify the criteria and standards it will use prior to the submission and screening of a certificate of need application: *Provided however*, That when a person requests identification of criteria and standards prior to the submission of an application, the person shall submit such descriptive information on a project as is determined by the department to be reasonably necessary in order to identify the applicable criteria and standards. The department shall respond to such request within fifteen working days of its receipt. In the absence of an applicant's request under this subsection, the department shall identify the criteria and standards it will use during the screening of a certificate of need application. The department shall inform the applicant about any consultation services it will use in the review of a certificate of need application prior to the use of such consultation services.

(d) Representatives of the department or consultants whose services are engaged by the department may make an on-site visit to a health care facility, or other place for which a certificate of need application is under review, or for which a proposal to withdraw a certificate of need is under review when the department deems such an on-site visit is necessary and appropriate to the department's review of a proposed project.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-200, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-200, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 85-05-032 (Order 2208), § 248-19-360, filed 2/15/85; 81-09-012 (Order 210), § 248-19-360, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-360, filed 11/30/79.]

**WAC 246-310-210 Determination of need.** The determination of need for any project shall be based on the following criteria, except these criteria will not justify exceeding the limitation on increases of nursing home beds provided in WAC 246-310-810:

(1) The population served or to be served has need for the project and other services and facilities of the type proposed are not or will not be sufficiently available or accessible to meet that need. The assessment of the conformance of a project with this criterion shall include, but need not be limited to, consideration of the following:

(a) In the case of a reduction, relocation, or elimination of a service, the need the population presently served has for the service, the extent to which the need will be met adequately by the proposed relocation or by alternative arrangements, and the effect of the reduction, elimination, or relocation of the service on the ability of low-income persons, racial and ethnic minorities, women, handicapped persons, and other underserved groups and the elderly to obtain needed health care;

(b) In the case of health services or facilities proposed to be provided, the efficiency and appropriateness of the use of existing services and facilities similar to those proposed;

(c) In the case of an application by an osteopathic or allopathic facility for a certificate of need to construct, expand, or modernize a health care facility, acquire major medical equipment, or add services, the need for that construction, expansion, modernization, acquisition of equipment, or addition of services on the basis of the need for and the availability in the community of services and facilities for osteopathic and allopathic physicians and their patients, and the impact on existing and proposed institutional training programs for doctors of osteopathy and medicine at the student, internship, and residency training levels; and

(d) In the case of a project not involving health services, the contribution of the project toward overall management and support of such services.

(2) All residents of the service area, including low-income persons, racial and ethnic minorities, women, handicapped persons, and other underserved groups and the elderly are likely to have adequate access to the proposed health service or services. The assessment of the conformance of a project with this criterion shall include, but not be limited to, consideration as to whether the proposed services makes a contribution toward meeting the health-related needs of members of medically underserved groups which have traditionally experienced difficulties in obtaining equal access to health services, particularly those needs identified in the applicable regional health plan, annual implementation plan,

and state health plan as deserving of priority. Such consideration shall include an assessment of the following:

(a) The extent to which medically underserved populations currently use the applicant's services in comparison to the percentage of the population in the applicant's service area which is medically underserved, and the extent to which medically underserved populations are expected to use the proposed services if approved;

(b) The past performance of the applicant in meeting obligations, if any, under any applicable federal regulations requiring provision of uncompensated care, community service, or access by minorities and handicapped persons to programs receiving federal financial assistance (including the existence of any unresolved civil rights access complaints against the applicant);

(c) The extent to which Medicare, Medicaid, and medically indigent patients are served by the applicant; and

(d) The extent to which the applicant offers a range of means by which a person will have access to its services (e.g., outpatient services, admission by house staff, admission by personal physician).

(3) The resources for the proposed project are not needed for higher priority alternative uses identified in applicable health plans.

(4) The applicant has substantiated any of the following special needs and circumstances the proposed project is to serve.

(a) The special needs and circumstances of entities such as medical and other health professions schools, multidisciplinary clinics and specialty centers providing a substantial portion of their services or resources, or both, to individuals not residing in the health service areas in which the entities are located or in adjacent health service areas.

(b) The special needs and circumstances of biomedical and behavioral research projects designed to meet a national need and for which local conditions offer special advantages.

(c) The special needs and circumstances of osteopathic hospitals and nonallopathic services.

(5) The project will not have an adverse effect on health professional schools and training programs. The assessment of the conformance of a project with this criterion shall include consideration of:

(a) The effect of the means proposed for the delivery of health services on the clinical needs of health professional training programs in the area in which the services are to be provided; and

(b) If proposed health services are to be available in a limited number of facilities, the extent to which the health professions schools serving the area will have access to the services for training purposes.

(6) The project is needed to meet the special needs and circumstances of enrolled members or reasonably anticipated new members of a health maintenance organization or proposed health maintenance organization and the services proposed are not available from nonhealth maintenance organization providers or other health maintenance organizations in a reasonable and cost-effective manner consistent with the basic method

of operation of the health maintenance organization or proposed health maintenance organization. In assessing the availability of health services from these providers, the department shall consider only whether the services from these providers:

(a) Would be available under a contract of at least five years' duration;

(b) Would be available and conveniently accessible through physicians and other health professionals associated with the health maintenance organization or proposed health maintenance organization (for example - whether physicians associated with the health maintenance organization have or will have full staff privileges at a nonhealth maintenance organization hospital);

(c) Would cost no more than if the services were provided by the health maintenance organization or proposed health maintenance organization; and

(d) Would be available in a manner administratively feasible to the health maintenance organization or proposed health maintenance organization.

**WAC 246-310-250 Open heart surgery.** (1) Open heart surgery means a specialized surgical procedure (excluding organ transplantation) which utilizes a heart-lung bypass machine and is intended to correct congenital and acquired cardiac and coronary artery disease.

(2) Open heart surgery is a tertiary service as listed in WAC 246-310-020. To receive approval an open heart surgery program must meet the following standards in addition to applicable review criteria in WAC 246-310-210, 246-310-220, 246-310-230, and 246-310-240.

(3) There shall be a minimum volume of two hundred adult open heart surgery procedures (one hundred if exclusively pediatric) performed annually in each institution performing open heart surgery within three years of initial operation.

(4) To receive approval an application shall meet the following standards unless the department finds that the new open heart surgery operating rooms are needed to substantially improve access to care.

(a) New open heart surgery services shall not result in a number of open heart operating rooms that exceeds the maximum number of open heart operating rooms needed in the area by 1995, as determined by multiplying the state's most recent (at the time of the application) adult or pediatric open heart surgery use rate by the area's 1995 adult or pediatric populations, and dividing the result by the minimum capacity of adult or pediatric units (two hundred or one hundred surgeries, respectively).

(b) There shall be no new open heart surgery operating rooms approved until all facilities providing open heart surgery in the planning area are performing at least two hundred (one hundred for pediatric) open

heart surgeries per year per open heart surgery operating room.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-250, filed 12/23/91, effective 1/23/92. **WAC 246-310-260 Kidney transplantation.** (1) Kidney transplantation is a tertiary service as listed in WAC 246-310-020.

(2) To receive approval a kidney transplant center must meet the following standards in addition to applicable review criteria in WAC 246-310-210, 246-310-220, 246-310-230, and 246-310-240.

(a) A center shall perform at least fifteen transplants annually by the fourth year of operation.

(b) A center shall document that it will meet the requirements of membership to the United Network for Organ Sharing (UNOS) or its successor organization.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-260, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-260, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.919. 90-16-058 (Order 073), § 248-19-601, filed 7/27/90, effective 8/27/90.]

**WAC 246-310-270 Ambulatory surgery.** (1) To receive approval, an ambulatory surgical facility must meet the following standards in addition to applicable review criteria in WAC 246-310-210, 246-310-220, 246-310-230, and 246-310-240.

(2) The area to be used to plan for operating rooms and ambulatory surgical facilities is the secondary health services planning area.

(3) Secondary health services planning areas are: San Juan, Whatcom, East Skagit, Whidbey-Fidalgo, Western North Olympic, East Clallam, East Jefferson, North Snohomish, Central Snohomish, East Snohomish, Southwest Snohomish, Kitsap, North King, East King, Central King, Southwest King, Southeast King, Central Pierce, West Pierce, East Pierce, Mason, West Grays Harbor, Southeast Grays Harbor, Thurston, North Pacific, South Pacific, West Lewis, East Lewis, Cowlitz-Wahkiakum-Skamaniam, Clark, West Klickitat, East Klickitat, Okanogan, Chelan-Douglas, Grant, Kittitas, Yakima, Benton-Franklin, Ferry, North Stevens, North Pend Oreille, South Stevens, South Pend Oreille, Southwest Lincoln, Central Lincoln, Spokane, Southwest Adams, Central Adams, Central Whitman, East Whitman, Walla Walla, Columbia, Garfield, and Asotin.

(4) Outpatient operating rooms should ordinarily not be approved in planning areas where the total number of operating rooms available for both inpatient and outpatient surgery exceeds the area need.

(5) When a need exists in planning areas for additional outpatient operating room capacity, preference shall be given to dedicated outpatient operating rooms.

(6) An ambulatory surgical facility shall have a minimum of two operating rooms.

(7) Ambulatory surgical facilities shall document and provide assurances of implementation of policies to provide access to individuals unable to pay consistent with charity care levels provided by hospitals affected by the proposed ambulatory surgical facility. The amount of an ambulatory surgical facility's annual revenue utilized to finance charity care shall be at least equal to or greater than the average percentage of total patient revenue, other than medicare or medicaid, that affected hospitals in the planning area utilized to provide charity care in the last available reporting year.

(8) The need for operating rooms will be determined using the method identified in subsection (9) of this section.

(9) Operating room need in a planning area shall be determined using the following method:

(a) Existing capacity.

(i) Assume the annual capacity of one operating room located in a hospital and not dedicated to outpatient surgery is ninety-four thousand two hundred fifty minutes. This is derived from scheduling forty-four hours per week, fifty-one weeks per year (allowing for five weekday holidays), a fifteen percent loss for preparation and clean-up time, and fifteen percent time loss to allow schedule flexibility. The resulting seventy percent productive time is comparable to the previously operating hospital commission's last definition of "billing minutes" which is the time lapse from administration of anesthesia until surgery is completed.

(ii) Assume the annual capacity of one operating room dedicated to ambulatory surgery is sixty-eight thousand eight hundred fifty minutes. The derivation is the same as (a)(i) of this subsection except for twenty-five percent loss for prep/clean-up time and scheduling is for a thirty-seven and one-half hour week. Divide the capacity minutes by the average minutes per outpatient surgery (see (a)(vii) of this subsection). Where survey data are unavailable, assume fifty minutes per outpatient surgery, resulting in a capacity for one thousand three hundred seventy-seven outpatient surgeries per room per year.

(iii) Calculate the total annual capacity (in number of surgeries) of all dedicated outpatient operating rooms in the area.

(iv) Calculate the total annual capacity (in number of minutes) of the remaining inpatient and outpatient operating rooms in the area, including dedicated specialized rooms except for twenty-four hour dedicated emergency rooms. When dedicated emergency operating rooms are excluded, emergency or minutes should also be excluded when calculating the need in an area. Exclude cystoscopic and other special purpose rooms (e.g., open heart surgery) and delivery rooms.

(b) Future need.

(i) Project number of inpatient and outpatient surgeries performed within the hospital planning area for the third year of operation. This shall be based on the current number of surgeries adjusted for forecasted growth in the population served and may be adjusted for trends in surgeries per capita.

(ii) Subtract the capacity of dedicated outpatient operating rooms from the forecasted number of outpatient surgeries. The difference continues into the calculation of (b)(iv) of this subsection.

(iii) Determine the average time per inpatient and outpatient surgery in the planning area. Where data are unavailable, assume one hundred minutes per inpatient and fifty minutes per outpatient surgery. This excludes preparation and cleanup time and is comparable to "billing minutes."

(iv) Calculate the sum of inpatient and remaining outpatient (from (b)(ii) of this subsection) operating room time needed in the third year of operation.

(c) Net need.

(i) If (b)(iv) of this subsection is less than (a)(iv) of this subsection, divide their difference by ninety-four thousand two hundred fifty minutes to obtain the area's surplus of operating rooms used for both inpatient and outpatient surgery.

(ii) If (b)(iv) of this subsection is greater than (a)(iv) of this subsection, subtract (a)(iv) of this subsection from the inpatient component of (b)(iv) of this subsection and divide by ninety-four thousand two hundred fifty minutes to obtain the area's shortage of inpatient operating rooms. Divide the outpatient component of (b)(iv) of this subsection by sixty-eight thousand eight hundred fifty to obtain the area's shortage of dedicated outpatient operating rooms.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-270, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-270, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.919. 90-16-058 (Order 073), § 248-19-700, filed 7/27/90, effective 8/27/90.]

**WAC 246-310-280 Kidney disease treatment centers.** (1) To receive approval, a kidney disease treatment center must meet the following standards in addition to applicable review criteria in WAC 246-310-210, 246-310-220, 246-310-230, and 246-310-240.

(2) End stage renal disease planning areas shall be health service areas. The health service areas are as follows:

(a) Health service Area I includes Clallam, Jefferson, San Juan Island, Kitsap, Pierce, King, Snohomish, Skagit, and Whatcom counties.

(b) Health service Area II includes Thurston, Mason, Grays Harbor, Pacific, Wahkiakum, Lewis, Cowlitz, Clark, Skamania, and Klickitat counties.

(c) Health service Area III includes Okanogan, Chelan, Douglas, Grant, Kittitas, Yakima, Benton, and Franklin counties.

(d) Health service Area IV includes Ferry, Stevens, Pend Oreille, Lincoln, Spokane, Adams, Whitman, Walla Walla, Columbia, Garfield, and Asotin counties.

(3) The maximum number of dialysis stations needed in an end stage renal disease planning area shall be determined using the following data:

(a) Utilization of a dialysis station or a center.

(i) One hundred percent utilization equals twelve dialyses per week.

(ii) Eighty percent utilization equals 9.6 dialyses per week.

(iii) When determining the utilization of an existing center each station on which at least six patients have been self/home trained annually shall be deducted from the approved stations.

(iv) When determining the utilization of an existing center, the utilization rate may be reduced to seventy-five percent and seventy percent in facilities with ten percent and twenty percent peritoneal dialysis patients respectively.

(b) At the time of the application, the most recent Washington state office of financial management population data.

(c) Historical data of the Northwest renal network.

(d) The health service area's most recent three-year average shall be used for incidence, death, transplant, and home training rates.

(4) The maximum number of dialysis stations projected as needed in an ESRD planning area shall be determined using the following methodology:

(a) Identify the number of incenter patients expected in the planning area in the year in which the application is submitted.

(i) Add expected new ESRD and re-entry cases per year.

(ii) Subtract expected ESRD patient deaths per year.

(iii) Subtract expected ESRD home training patients per year.

(iv) Subtract the number of expected functional transplants per year.

(b) Calculate the number of expected dialyses by multiplying the number of incenter patients by three treatments per week.

(c) Calculate the number of dialysis stations needed in the applicant's projected third full year of operation using eighty percent utilization.

(5) All kidney disease treatment centers within a reasonable driving time must be operating at an eighty percent utilization rate before additional stations are approved.

(6) New kidney disease treatment centers must reasonably project an eighty percent utilization rate by the third year of operation.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-280, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-280, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.919. 90-16-058 (Order 073), § 248-19-701, filed 7/27/90, effective 8/27/90.]

**WAC 246-310-350 Nursing home and continuing care retirement community definitions.** The department shall use the definitions in this section in sections WAC 246-310-360 Nursing home bed need projection method through WAC 246-310-390 Nursing home bed need adjustment.

(1) "Baseline bed need" means the number of additional nursing home beds needed in the state or a planning area by the resident population by the projection year.

(2) "Baseline projection" means the number of nursing home beds calculated by the department as necessary state-wide or within a planning area, by the end of the projection period, for reasonable and appropriate use by the resident population.

(3) "Bedded" is a term which describes the adequacy of the bed supply within a planning area relative to the baseline projection.

(a) A planning area is "under-bedded" if the area's bed-to-population ratio is less than the target ratio.

(b) A planning area is "adequately bedded" if the area's bed-to-population ratio is between the target ratio and the state-wide current ratio.

(c) A planning area is "over-bedded" if its bed-to-population ratio is greater than the state-wide current ratio.

(4) "Bed supply" means within a geographic area the total number of:

(a) Nursing home beds which are licensed or certificate of need approved but not yet licensed, excluding:

(i) Those nursing home beds certified as intermediate care facility for the mentally retarded (ICF-MR) the operators of which have not signed an agreement on or before July 1, 1990, with the department of social and health services to give appropriate notice prior to termination of the ICF-MR service;

(ii) New or existing nursing home beds within a Type A CCRC which are approved under the provisions of WAC 246-310-380(5); or

(iii) Nursing home beds within a CCRC which is excluded from the definition of a health care facility per RCW 70.38.025(6); and

(iv) In computing the bed supply of a planning area, but not in computing state-wide bed supply, new nursing home beds within a Type B CCRC as defined in subsection (8)(b) of this section.

(b) Licensed hospital beds used for long-term care or certificate of need approved hospital beds to be used for long-term care not yet in use, excluding swing-beds.

(5) "Bed-to-population ratio" means the bed supply per one thousand persons of the estimated or forecast resident population age sixty-five and older, and includes the following:

(a) "State-wide current ratio" means a bed-to-population ratio computed from the most recent state-wide bed supply and the most recent estimate of the state-wide resident population.

(b) "Target ratio" means a bed-to-population ratio of forty-five established for planning and policy-making purposes.

(6) "Concurrent reviews" have been scheduled in WAC 246-310-120 for competing projects proposing nursing home beds. The redistribution of nursing home beds certified as intermediate care for the mentally retarded (ICF-MR) to skilled nursing facility beds will not be subject to concurrent review when the ICF-MR beds have been counted in the "bed supply" as referenced in subsection (4)(a)(i) of this section.

(7) "Continuing care contract" means a contract providing a person, for the duration of that person's life or for a term in excess of one year, shelter along with

nursing, medical, health-related, or personal care services. The contract is conditioned on the transfer of property, the payment of an entrance fee to the provider of such services, or the payment of periodic charges for the care and services involved. A continuing care contract is not excluded from this definition because the contract is mutually terminable or because shelter and services are not provided at the same location.

(8) A "continuing care retirement community (CCRC)" means any of a variety of entities, unless excluded from the definition of health care facility under RCW 70.38.025(6), which provides shelter and services based on continuing care contracts with its members. CCRCs are categorized as follows:

(a) "Type A CCRC" means a CCRC which:

(i) Maintains for a period in excess of one year a CCRC contract with a member which provides or arranges for at least the following specific services:

(A) Independent living units;

(B) Nursing home care with no limit on the number of medically needed days;

(C) Assistance with activities of daily living; and

(D) Services equivalent in scope to either state chore services or Medicaid home health services;

(ii) Continues a contract, if a member is no longer able to pay for services;

(iii) Offers services only to contractual members with limited exception during a transition period; and

(iv) Holds the Medicaid program harmless from liability for costs of care, even if the member depletes his or her personal resources.

(b) "Type B CCRC" means a CCRC which:

(i) Maintains for a period in excess of one year a CCRC contract with its members;

(ii) Provides shelter along with nursing, medical, health-related, or personal care services;

(iii) May terminate a contract, if a member is unable to pay for services;

(iv) May admit patients to the nursing home who are not CCRC members; and

(v) May maintain Medicaid contracts and/or other requirements for third party payment.

(9) A "member" of a CCRC means an individual who has signed a continuing care contract with a CCRC.

(10) "Net bed need" means baseline bed need of a planning area changed by any redistributions as follows:

(a) Adding nursing home beds being redistributed from another nursing home planning area or areas; or

(b) Subtracting nursing home beds being redistributed to another nursing home planning area or areas.

(11) "Planning and service area" (PSA) means the geographic area of one or more counties designated by the department of social and health services' aging and adult services administration to be represented by a single area agency on aging.

(12) "Planning area" means each individual county designated by the department as the smallest geographic area for which nursing home bed need projections are developed, except as follows:

(a) Clark and Skamania counties shall be one planning area.

(b) Chelan and Douglas counties shall be one planning area.

(c) Camano Island shall be included in Snohomish County and excluded from Island County.

(13) "Projection period" means the interval of time between July 1, 1990, and June 30, 1993.

(14) "Projection year" means the time interval between July 1, 1992, and June 30, 1993.

(15) "Redistribution" means a shift of net bed need among planning areas in accordance with a redistribution plan as described in WAC 246-310-380(4).

(16) "Resident population" means the number of residents sixty-five years of age and older living within the same geographic area which:

(a) Excludes contract holders living within a Type A CCRC:

(i) With approval for new nursing home beds under the provisions of WAC 246-310-380(5); or

(ii) Excluded from the definition of a health care facility per RCW 70.38.025(6);

(b) Is calculated using demographic data obtained from:

(i) The office of financial management; and

(ii) Certificate of need applications and exemption requests previously submitted by Type A CCRC.

(17) "Swing beds" means up to the first five hospital beds designated by an eligible rural hospital which are available to provide either acute care or long-term nursing services as required.

(18) "Transition period" means the period of time, not exceeding five years, between the date the facility is inhabited by a member and the date it fully meets the requirements of a Type A CCRC as contained in subsection (8)(a) of this section.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-350, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-350, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.919. 90-12-071 (Order 062), § 248-19-800, filed 6/1/90, effective 7/1/90.]

**WAC 246-310-380 Nursing home bed need standards.** (1) The department shall use the following rules to interpret the certificate of need review criteria contained in WAC 246-310-210(1) for applications proposing the following:

(a) Construction, development, or other establishment of a new nursing home;

(b) Increase in the licensed bed capacity of a nursing home or a hospital long-term care unit;

(c) Change in license category of beds from the following to nursing home or hospital long-term care unit beds:

(i) Acute care, or

(ii) Boarding home care;

(2) The department shall comply with the following time schedule for developing bed need projections:

(a) By the last working day in January of each year, the department shall recalculate the baseline projection for each planning-area.

(b) By the last working day in January of each year, the department shall provide the aging and adult services administration of the department of social and health services with the baseline bed need for each planning-area, pending the department's decisions on applications submitted during the previous year's nursing home concurrent review cycles.

(c) By the last working day in January of each year, the department shall rank order planning-areas from lowest to highest by the projected current supply ratio.

(d) By the first working day of June of each year, the department shall calculate the net bed need for each planning-area.

(3) The following are the baseline projections for the projection period, listed by planning and service area and planning-area. When a planning-area baseline projection is less than the planning-area's bed supply as defined by WAC 246-310-350(4), no beds can be added until the state-wide target ratio is reached, except as allowed in subsections (4) and (6) of this section.

| Planning-area              | Baseline projection |
|----------------------------|---------------------|
| <b>(a) PSA # 1</b>         |                     |
| Clallam                    | 471                 |
| Grays Harbor               | 472                 |
| Jefferson                  | 188                 |
| Pacific                    | 179                 |
| <b>(b) PSA # 2</b>         |                     |
| Island excluding Camano    | 394                 |
| San Juan                   | 105                 |
| Skagit                     | 610                 |
| Whatcom                    | 866                 |
| <b>(c) PSA # 3</b>         |                     |
| Snohomish including Camano | 2,464               |
| <b>(d) PSA # 4</b>         |                     |
| King                       | 9,229               |
| AIDS project               | 35                  |
| <b>(e) PSA # 5</b>         |                     |
| Pierce                     | 3,334               |
| <b>(f) PSA # 6</b>         |                     |
| Lewis                      | 471                 |
| Mason                      | 302                 |
| Thurston                   | 993                 |
| <b>(g) PSA # 7</b>         |                     |
| Clark/Skamania             | 1,286               |
| Cowlitz                    | 526                 |
| Klickitat                  | 121                 |
| Wahkiakum                  | 27                  |

| Planning-area       | Baseline projection |
|---------------------|---------------------|
| <b>(h) PSA # 8</b>  |                     |
| Adams               | 71                  |
| Chelan/Douglas      | 618                 |
| Grant               | 305                 |
| Lincoln             | 86                  |
| Okanogan            | 235                 |

| <b>(k) PSA # 13</b> |                     |
| Kitsap              | 1,119               |

(4) The aging and adult services administration of the department of social and health services may submit any redistribution plans to the department which:

(a) Redistribute baseline bed need among planning-areas;

(b) Document the following:

(i) That all involved area agencies on aging support each proposed redistribution, and

(ii) That the redistribution plan was approved by the assistant secretary for aging and adult services of the department of social and health services.

(c) Are received by the department no later than April tenth or the first working day thereafter.

(5) The department shall limit to three hundred the total number of nursing home beds approved for all Type A CCRC which propose or are operating within a transition period.

(a) These three hundred beds available for Type A CCRC during transition periods shall be in addition to the net nursing home beds needed in all of the planning-areas.

(b) All nursing home beds approved for Type A CCRC which propose or are operating within a transition period shall be counted as beds within this three hundred bed limitation unless and until the CCRC fully complies with all provisions of the Type A CCRC performance standards.

(6) The department shall not issue certificates of need approving more than the net bed need indicated for a given planning-area, unless:

(a) The department finds such additional beds are needed to be located reasonably close to the people they serve; and

(b) The department explains such approval in writing.

[Statutory Authority: RCW 70.38.135, 91-15-018 (Order 179), § 246-310-380, filed 7/10/91, effective 8/10/91. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-310-380, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.919, 90-12-072 (Order 063), § 248-19-810, filed 6/1/90, effective 7/1/90.]

**WAC 246-310-400 AIDS long-term care pilot facility review standards.** (1) Until an AIDS long-term care pilot facility has received a license to operate as a nursing home in this state, the department shall apply the standards in this section and those in WAC 246-310-380 in the review of applications for an AIDS long-term care pilot facility.

(2) The department shall use the standards in this subsection to interpret the certificate of need review criteria contained in WAC 246-310-210.

(a) Applicants for a certificate of need shall propose a facility to be:

(i) Licensed for not more than thirty-five nursing home beds;

(ii) Located in the King County nursing home planning area;

(iii) Located in reasonable proximity to:

(A) A hospital;

(B) An outpatient radiology service; and

(C) An outpatient laboratory service; and

(iv) Operated with admissions policies which select patients with the following characteristics:

(A) Rapidly fluctuating care needs including at least some period of needing skilled nursing care;

(B) Do not need acute hospitalization; and

(C) Need some level of twenty-four hour care, but cannot live at home.

(v) Designated to provide a residential environment supporting people in living at the maximum level of independence possible.

(b) Applicants for a certificate of need shall:

(i) Make a commitment of at least five years to maintaining the facility as described in the application; and

(ii) Admit patients with fluctuating care needs similar to those with AIDS.

(3) The department, in interpreting the certificate of need review criteria contained in WAC 246-310-220, shall give preference to those applicants that demonstrate substantial financial support from a combination of community, federal, and/or private foundation sources.

(4) The department shall use the standards in this subsection to interpret the certificate of need review criteria contained in WAC 246-310-230.

(a) Applicants for a certificate of need shall:

(i) Show how planning the facility includes input from community AIDS service organizations;

(ii) Show how they will integrate the facility's services with the services provided by other public and private AIDS services organizations; and

(iii) Document their experience in health care services delivery to patients with AIDS.

(b) Applicants for a certificate of need shall express their intent to develop a policy advisory board after the facility is in operation, to include representatives from the groups served by the facility.

(5) The department, in interpreting the certificate of need review criteria contained in WAC 246-310-240, shall require that applicants demonstrate their capability to evaluate the project and state their willingness to share the information with the assistant secretary for HIV/AIDS infectious diseases.

[Statutory Authority: RCW 70.38.135 and 70.38.919, 92-02-018 (Order 224), § 246-310-400, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-310-400, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.919, 90-12-072 (Order 063), § 248-19-840, filed 6/1/90, effective 7/1/90.]

**WAC 246-310-410 Swing bed review standards.** (1)

The department shall use the following rules, in addition to those under WAC 246-310-380 to interpret the certificate of need review criteria contained in WAC 246-310-210, 246-310-220, 246-310-230, and 246-310-240 for applications by hospitals proposing an increase in the number of designated swing beds.

(2) Swing beds are defined as up to the first five hospital beds, so designated by an eligible rural hospital, which are available to provide either acute care or long-term care nursing services as required.

(3) Hospitals proposing swing bed projects shall:

(a) Be located in geographic areas of the state defined by the United States Bureau of the Census as a nonstandardized metropolitan statistical area; and

(b) Have total licensed bed capacity not exceeding fifty.

(4) Hospitals shall demonstrate ability to meet minimum Medicare standards of care for rural hospital swing beds.

[Statutory Authority: RCW 70.38.135 and 70.38.919, 92-02-018 (Order 224), § 246-310-410, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-310-410, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.919, 90-12-072 (Order 063), § 248-19-860, filed 6/1/90, effective 7/1/90.]

**WAC 246-310-470 Review and action on health maintenance organization projects.** (1) Undertakings requiring a certificate of need.

A certificate of need shall be required for any undertaking which, in accordance with WAC 246-310-020, is subject to the provisions of chapter 246-310 WAC, unless an exemption has been granted for such undertaking under the provisions of WAC 246-310-040.

(2) Required approval.

The secretary's designee shall issue a certificate of need for a proposed project if the certificate of need applicant for the proposed project is a health maintenance organization or a health care facility controlled (directly or indirectly) by a health maintenance organization and the department finds the proposed project meets the criteria set forth in WAC 246-310-210(6).

(3) Limitation on denials.

The secretary's designee shall not deny a certificate of need to a health maintenance organization or a health

care facility controlled (directly or indirectly) by a health maintenance organization solely because a proposed project is not discussed in the applicable regional health plan, annual implementation plan, or state health plan.

(4) Sale, acquisition, or lease of facilities or equipment for which a certificate of need has been issued.

A health care facility (or portion thereof) or medical equipment for which a certificate of need has been issued under the provisions of this section shall not be sold or leased and a controlling interest in such facility or equipment or in a lease of the facility or equipment shall not be acquired unless an exemption or a certificate of need for such sale, lease, or acquisition has been granted by the secretary's designee.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-470, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-470, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-410, filed 2/28/86; 81-09-012 (Order 210), § 248-19-410, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-410, filed 11/30/79.]

**WAC 246-310-480 Projects proposed for the correction of deficiencies.** (1) For the purposes of this section, "correction of deficiencies" shall mean one or more of the following:

(a) Eliminating or preventing imminent safety hazards as defined by federal, state, or local fire, building, or life safety codes or regulations; or

(b) Complying with state licensing standards; or

(c) Complying with accreditation or certification standards which must be met to receive reimbursement under Titles XVIII or XIX of the Social Security Act.

(2) An application submitted for a project limited to the correction of deficiencies, as defined in subsection (1) of this section, shall be approved unless the department finds, after consultation with the appropriate regional health council, that:

(a) The facility or service with respect to which such capital expenditure is proposed is not needed; or

(b) The obligation of such capital expenditure is not consistent with the state health plan in effect.

(3) A determination a facility or service is not needed shall be made only if the department finds the facility or service has been identified in the state health plan as not being needed.

(4) An application submitted for the correction of deficiencies shall be reviewed under the expedited review process, in accordance with WAC 246-310-150, unless it qualifies for emergency review in accordance with WAC 246-310-140.

(5) An application reviewed under the provisions of this section shall be approved only to the extent the capital expenditure is needed for the correction of the deficiency.

(6) If the department finds any portion of the project or the project as a whole is not needed for the correction of deficiencies, such portion or entire project shall be reviewed in accordance with WAC 246-310-200, 246-

310-210, 246-310-220, 246-310-230, and 246-310-240.

(7) If the department finds a proposed capital expenditure is needed to correct deficiencies, as defined in subsection (1) of this section, the criteria in WAC 246-310-210 shall not be applied to the consideration of the project.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-480, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-480, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-415, filed 2/28/86; 81-09-012 (Order 210), § 248-19-415, filed 4/9/81, effective 5/20/81.]

**WAC 246-310-490 Written findings and actions on certificate of need applications.** (1) Written findings.

(a) The findings of the department's review of a certificate of need application shall be stated in writing and include the basis for the decision of the secretary's designee as to whether a certificate of need is to be issued or denied for the proposed project.

(b) In making its findings and taking action on a certificate of need application, the department shall use all criteria contained in chapter 246-310 WAC applicable to the proposed project.

(i) The written findings shall identify any criterion the department has decided is not applicable to the particular project and give the reason for such decision.

(ii) The secretary's designee may deny a certificate of need if the applicant has not provided the information which is necessary to a determination that the project meets all applicable criteria and which the department has prescribed and published as necessary to a certificate of need review of the type proposed: *Provided however*, That the department has requested such information in a screening letter sent in accordance with WAC 246-310-090 (1)(c).

(c) The department shall make written findings on the extent to which the project meets the criteria set forth in WAC 246-310-210 (1) and (2) when the secretary's designee issues a certificate of need directly related to the provision of health services, beds, or major medical equipment: *Provided however*, That no such written finding shall be necessary for projects for the correction of deficiencies of the types described in WAC 246-310-480 and for projects proposed by or on behalf of a health maintenance organization or a health care facility controlled, directly or indirectly, by a health maintenance organization.

(d) When, as a part of concurrent review proceedings, the secretary's designee makes a decision to approve an application or applications and to disapprove other competing applications, he or she shall provide a specific written statement of reasons for determining the approved application or applications to be superior.

(2) Separability of application and action.

When a certificate of need application is for multiple services or multiple components or the proposed project is to be multiphased, the secretary's designee may take individual and different action on separable portions of the proposed project.

## (3) Conditional certificate of need.

(a) The secretary's designee in making his or her decision on a certificate of need application may decide to issue a conditional certificate of need if the department finds the project is justified only under specific circumstances: *Provided however*, That conditions shall relate directly to the project being reviewed and to review criteria.

(b) When the department finds a project for which a certificate of need is to be issued does not satisfy the review criteria set forth in WAC 246-310-210 (1) and (2), the secretary's designee may impose a condition or conditions that the applicant take affirmative steps so as to satisfy those review criteria. In evaluating the accessibility of the project, the current accessibility of the facility as a whole shall be taken into consideration.

(c) The conditions attached to a certificate of need may be released by the secretary's designee upon the request of the health care facility or health maintenance organization for which the certificate of need was issued.

(i) The request must include information needed by the department demonstrating the conditions are no longer valid and the release of such conditions would be consistent with the purpose of chapter 70.38 RCW.

(ii) A request for the removal of a condition must be submitted in accordance with WAC 246-310-090 and will be reviewed in accordance with the regular or expedited review procedures described in WAC 246-310-160 or 246-310-150.

(4) Distribution of written findings and statement of decision.

(a) A copy of the department's written findings and statement of the decision of the secretary's designee on a certificate of need application shall be sent to:

(i) The person submitting the certificate of need application;

(ii) The regional health council for the health service area in which the proposed project is to be located;

(iii) The hospital commission, if the proposed project is for a hospital;

(iv) In the case of a project proposed by a health maintenance organization, the appropriate regional office of the United States Department of Health and Human Services; and

(v) When the secretary's designee issues a certificate of need for a project which does not satisfy the review criteria set forth in WAC 246-310-210 (1) and (2), the appropriate regional office of the Department of Health and Human Services.

(b) The written findings and statement of the decision of the secretary's designee on a certificate of need application shall be available to others requesting the certificate of need unit to provide access to a copy of such findings and statement.

(5) Explanation of inconsistency with the regional health council recommendation or plan.

The department shall send to the applicant and to the appropriate regional health council a detailed, written statement as to the reasons why a decision the secretary has made on a certificate of need application is inconsistent with any of the following:

(a) The regional health council's recommendation as to the action to be taken on the certificate of need application;

(b) The goals and policies of the applicable regional health plan; or

(c) The priorities of the applicable annual implementation plan.

[Statutory Authority: RCW 70.38.135 and 70.38.919, 92-02-018 (Order 224), § 246-310-490, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-310-490, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135, 86-06-030 (Order 2344), § 248-19-420, filed 2/28/86; 81-09-012 (Order 210), § 248-19-420, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW, 79-12-079 (Order 188), § 248-19-420, filed 11/30/79.]

**WAC 246-310-500 Issuance, suspension, denial, revocation, and transfer of a certificate of need.** (1) The secretary's designee shall issue a certificate of need to the applicant.

(a) The secretary's designee shall issue a certificate of need for:

(i) The proposed project, or

(ii) A separable portion of the proposed project.

(b) When the certificate of need is issued for a separable portion of the proposed project, the secretary's designee shall provide written notice to the applicant stating the reasons for the department's action.

(c) The secretary's designee shall issue a certificate of need only when the department finds that the project or the separable portion of the proposed project is consistent with the applicable criteria contained in chapter 246-310 WAC.

(d) In issuing a certificate of need, the secretary's designee shall:

(i) Specify the maximum capital expenditure which may be obligated under the certificate, and

(ii) Prescribe the cost components to be included in determining the capital expenditure which may be obligated under such certificate.

(2) The secretary's designee may issue a conditional certificate of need for a proposed project or a separable portion of the proposed project.

(a) The conditions attached to a certificate of need must directly relate to the project being reviewed.

(b) The conditions must directly relate to criteria contained in chapter 246-310 WAC.

(3) The department shall apply the following provisions when suspending a certificate of need.

(a) The secretary's designee may suspend a certificate of need for cause which shall include, but not be limited to:

(i) Suspicion of fraud,

(ii) Misrepresentation,

(iii) False statements,

(iv) Misleading statements,

(v) Evasion or suppression of material fact in the application for a certificate of need or any of its supporting materials.

(b) The secretary's designee shall issue an order which states the reason for any suspension of a certificate of

need to the person to whom the certificate of need had been issued.

(c) A suspension of a certificate of need shall not exceed one hundred twenty calendar days.

(i) Prior to the expiration of the suspension the department shall:

(A) Review the facts and circumstances relevant to the suspension;

(B) Reinstate, amend, or revoke the certificate of need; and,

(ii) Send written notice of its decision on a suspended certificate of need to the person to whom the certificate of need had been issued.

(4) The secretary's designee shall send written notification of denial of a certificate of need to the applicant submitting the certificate of need application stating the reasons for the denial.

(5) When a proposed project or separable portion of the proposed project is denied a certificate of need, the department shall not accept another certificate of need application for the same project or separable portion unless the department determines:

(a) There is a substantial change in existing or proposed health facilities or services in the area to be served by the project; or

(b) There is a substantial change in the need for the facilities or services of the type proposed in the area to be served by the project; or

(c) One year has lapsed since the submission of the application for the certificate of need subject to regular review which was denied or the next scheduled concurrent review cycle permits the submission of applications.

(6) The department shall apply the following provisions in the revocation of a certificate of need.

(a) The secretary's designee may revoke a certificate of need for cause which shall include the following:

(i) Fraud,

(ii) Misrepresentation,

(iii) False statements,

(iv) Misleading statements, and

(v) Evasion or suppression of material facts in the application of a certificate of need, or in any of its supporting materials.

(b) When the secretary's designee revokes a certificate of need, the secretary's designee shall provide written notice of revocation to the person to whom the certificate of need was issued, including a statement of the reasons for such revocation.

(7) The department shall apply the following procedures in transferring or assigning a certificate of need.

(a) The department shall consider a request to transfer or assign a certificate of need valid only when:

(i) The person to whom the certificate of need was originally issued, or personal representative, where the holder is deceased, submits to the department a written request that the certificate of need be transferred to another person and gives the full name and complete address of the other person; and

(ii) The person to whom the current holder of the certificate of need wishes to transfer the certificate sends

an application for such transfer on a form and in such a manner as prescribed and published by the department.

(b) The department shall review applications for transfer or assignment of a certificate of need according to the:

(i) Expedited review procedures in WAC 246-310-150; or

(ii) Regular review procedures in WAC 246-310-160.

(c) The secretary's designee shall base his or her decision to approve or deny an application to transfer or assign a certificate of need on:

(i) The demonstrated ability of the person wishing to acquire the certificate of need to undertake, complete, and operate the project in accordance with the following review criteria:

(A) WAC 246-310-220 (1) and (3), and

(B) WAC 246-310-230 (1), (3), and (5).

(ii) The continuing conformance of the project with all other applicable review criteria.

(d) When the person submitting an application to transfer or assign a certificate of need proposes to modify the project description or the maximum capital expenditure, the department shall inform in writing such person that a new or amended certificate of need is required.

(e) When the department denies an application for transfer or assignment of a certificate of need, the department shall inform in writing the person who submitted the application of the reasons for such denial.

(f) The department shall not transfer or assign any certificate of need issued after February 1, 1988, except when:

(i) Prior to completion of the project, death or divorce of one or more persons holding a certificate renders it impossible or impractical to complete the project in the absence of a transfer or assignment; or

(ii) After commencement, a substantial portion of the project has been completed by the original holder of the certificate.

(g) The department shall not transfer or assign a certificate of need under subsections (7)(f)(i) and (ii) of this section when the authorized project is to be relocated.

(h) When the department transfers a certificate of need for a project which has not been commenced, the transferred certificate of need shall have a validity period of two years from the date of issue with the provision for one six-month extension if the holder can demonstrate to the satisfaction of the secretary's designee that substantial and continuing progress towards commencement has been made.

(8) When the secretary's designee fails to issue or deny a certificate of need, the applicant may seek a writ of mandamus from superior court pursuant to chapter 7.16 RCW.

[Statutory Authority: RCW 70.38.135. 91-05-093 (Order 143), § 246-310-500, filed 2/20/91, effective 3/23/91. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-500, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.115. 89-02-040 (Order 2745), § 248-19-440, filed 12/30/88. filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-440, filed 11/30/79.]

**WAC 246-310-560 Provision for reconsideration decision.** (1) Any person or affected person may, for good cause shown, request a public hearing for the purpose of reconsideration of the decision of the secretary's designee on a certificate of need application or withdrawal of a certificate of need.<sup>1</sup>

(2) The department shall conduct a reconsideration hearing if it finds the request is in accord with the following requirements:

(a) The request for a reconsideration hearing shall be written, be received by the department within thirty days of the department's decision on the certificate of need application or withdrawal of the certificate of need, state in detail the grounds which the person requesting the hearing believes to show good cause, and be signed by the person making the request.

(b) Grounds which the department may deem to show good cause for a reconsideration hearing shall include but not be limited to the following:

(i) Significant relevant information not previously considered by the department which, with reasonable diligence, could not have been presented before the department made its decision;

(ii) Information on significant changes in factors or circumstances relied upon by the department in making its findings and decision; or

(iii) Evidence the department materially failed to follow adopted procedures in reaching a decision.

(3) A reconsideration hearing shall commence within thirty days after receipt of the request for the hearing.

(4) Notification of a public reconsideration hearing on a certificate of need application or withdrawal of a certificate of need shall be sent prior to the date of such hearing by the department to the following:

(a) The person requesting the reconsideration hearing;

(b) The person submitting the certificate of need application which is under reconsideration or the holder of the certificate of need;

(c) The regional health council for the health service area in which the proposed project is to be offered or developed;

(d) The hospital commission, if the proposed project is a hospital project;

(e) Health care facilities and health maintenance organizations located in the health service area where the project is proposed to be located providing services similar to the services under review;

(f) In the case of a concurrent review, other applicants competing as described in WAC 246-310-080; and to

(g) Other persons requesting the department to send them such notification.

(5) The department shall, within forty-five days after the conclusion of a reconsideration hearing, make written findings stating the basis of the decision made after such hearing.

(6) The secretary's designee may, upon the basis of the department's findings on a reconsideration hearing, issue or reissue, amend, revoke, or withdraw a certificate

of need or impose or modify conditions on a certificate of need for the project about which the reconsideration hearing was conducted.

Note:

<sup>1</sup>No fee will be charged for a reconsideration hearing.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-560, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-560, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-430, filed 11/30/79.]

**WAC 246-310-570 Circumstances for which an amended certificate of need is required.** (1) An amended certificate of need shall be required for any of the following modifications of a project for which a certificate of need was issued:

(a) An addition of a new service;

(b) An expansion of a service beyond that which was included in the certificate of need application on which the issuance of the certificate of need was based;

(c) An increase in the inpatient bed capacity; or

(d) A significant reduction in the scope of a project for which a certificate of need has been issued without a commensurate reduction in the cost of the project, or the project cost increases (as represented in bids on a construction project or final cost estimate or estimates acceptable to the person to whom the certificate of need was issued) when the total of such increases exceeds twelve percent or fifty thousand dollars, whichever is greater, over the maximum capital expenditure specified by the secretary's designee in issuing the certificate of need: *Provided however*, That the review of such reductions or cost increases shall be restricted to the continued conformance of the project with the criteria contained in WAC 246-310-220 and 246-310-240.

(2) An application for an amended certificate of need shall be submitted in accordance with the provisions of WAC 246-310-090.

(3) An application for an amended certificate of need may be reviewed under the expedited review process set forth in WAC 246-310-150.

(4) The department shall, after consultation with the appropriate advisory review agencies, provide a written determination as to the requirement for an amended certificate of need within twenty-one days after receipt of a request for such determination.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-570, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-570, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-450, filed 2/28/86; 81-09-012 (Order 210), § 248-19-450, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-450, filed 11/30/79.]

**WAC 246-310-590 Monitoring of approved projects.** (1) The department, in cooperation with the advisory review agencies, shall monitor the costs and components of approved projects so as to assure conformance with certificates of need that have been issued.

(2) The department shall require periodic progress reports from those applicants to whom certificates of need have been issued.

(a) Progress reports shall be required at least annually and at no greater frequency than quarterly.

(b) Progress reports shall be submitted in the form and manner prescribed and published by the department.

(3) Information required on approved projects may include:

- (a) Actual project costs;
- (b) Changes in the project;
- (c) Financing arrangements, different than approved under the certificate of need;
- (d) Project commencement date;
- (e) Progress toward completion of construction; and
- (f) Project completion date.

(4) The information required on approved projects may vary according to the nature of the projects.

(5) Progress reports on a project for which a particular certificate of need has been issued shall terminate when the project has been completed and the department finds it has received all the information necessary to determine the project has been completed in accordance with the certificate of need which had been issued and the provisions of chapter 246-310 WAC.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-590, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-590, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-470, filed 2/28/86. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-470, filed 11/30/79.]

**WAC 246-310-600 Withdrawal of a certificate of need.** (1) The secretary's designee may withdraw a certificate of need if the department determines, after consultation with the appropriate advisory review agencies, that the holder of a certificate is not meeting the timetable specified in the certificate of need application for making services or equipment available or completing the project and is not making a good-faith effort to meet such timetable.

(2) In reviewing a proposed withdrawal of a certificate of need, the department shall adhere to the provisions of WAC 246-310-170, 246-310-180, 246-310-190, and 246-310-560.

(3) The review period for a proposed withdrawal of a certificate of need shall not exceed ninety days unless extended by the department to allow sufficient time for the conduct of a public hearing pursuant to the provisions of WAC 246-310-180. The review period of the appropriate advisory review agencies shall not exceed sixty days unless extended by the department at the written request of the regional health council to allow sufficient time for the conduct of a public hearing pursuant to the provisions of WAC 246-310-180. Such extension shall not exceed thirty days.

(4) The findings of the department's review of a proposed withdrawal of a certificate of need shall be stated in writing and include the basis for the decision of the secretary's designee as to whether the certificate of need

is to be withdrawn for a proposed project. A copy of the department's written findings and statement of the decision of the secretary's designee on the proposed withdrawal of a certificate of need shall be sent to:

- (a) The holder of the certificate of need;
- (b) The regional health council for the health service area in which the proposed project is to be located;
- (c) The hospital commission, if the proposed project is for a hospital; and
- (d) In the case of a project proposed by a health maintenance organization, the appropriate regional office of the United States Department of Health and Human Services.

(5) The written findings and statement of the decision of the secretary's designee on the proposed withdrawal of a certificate of need shall be available to others requesting the certificate of need unit to provide access to a copy of such findings and statement.

(6) The department shall send to the appropriate regional health council a detailed, written statement as to the reasons why a decision which the secretary's designee has made is inconsistent with any of the following:

- (a) The regional health council's recommendation as to the action to be taken;
- (b) The goals of the applicable regional health plan; or
- (c) The priorities of the applicable annual implementation plan.

(7) When a certificate of need is for multiple services or multiple components or the proposed project is to be multiphased, the secretary's designee may take individual and different action regarding withdrawal of the certificate of need on separable portions of the certificate of need.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-600, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-600, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-475, filed 2/28/86; 81-09-012 (Order 210), § 248-19-475, filed 4/9/81, effective 5/20/81.]

**WAC 246-310-610 Adjudicative proceeding.** (1) An applicant denied a certificate of need or a certificate holder whose certificate was suspended or revoked has the right to an adjudicative proceeding.

(2) A certificate applicant or holder contesting a department certificate decision shall within twenty-eight days of receipt of the decision:

- (a) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and
- (b) Include in or with the application:
  - (i) A specific statement of the issue or issues and law involved;
  - (ii) The grounds for contesting the department decision; and
  - (iii) A copy of the contested department decision.

(3) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and

chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-610, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-610, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 34.05 RCW, RCW 34.05.220 (1)(a), 70.38.135 and 1989 1st ex.s. c 9 § 607. 90-06-019 (Order 039), § 248-19-480, filed 2/28/90, effective 3/1/90. Statutory Authority: RCW 70.38.135. 86-06-030 (Order 2344), § 248-19-480, filed 2/28/86; 82-19-055 (Order 244), § 248-19-480, filed 9/15/82; 81-09-012 (Order 210), § 248-19-480, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-480, filed 11/30/79.]

**WAC 246-310-630 Public access to records.** The general public shall have access in accordance with the provisions of chapter 42.17 RCW to all applications reviewed by the department and to all other written materials essential to any review by the department pursuant to the provisions of chapter 246-310 WAC.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-630, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-310-630, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.38.135. 81-09-012 (Order 210), § 248-19-500, filed 4/9/81, effective 5/20/81. Statutory Authority: Chapter 70.38 RCW. 79-12-079 (Order 188), § 248-19-500, filed 11/30/79.]

**WAC 246-310-900 Capital expenditure minimum adjustment procedures.** These rules and regulations are adopted pursuant to RCW 70.38.025 (6) and (12) for the purpose of establishing the index to be used and procedures for making adjustments to the "expenditure minimum" for capital expenditures and to the annual operating costs for new "institutional health services" which are subject to the requirements of the certificate of need program established under the provisions of chapter 70.38 RCW.

(1) Index to be used. For the purposes of the certificate of need program, the United States Department of Commerce Composite Construction Cost Index shall be used in the annual adjustments of the following:

(a) The "expenditure minimum" as this term is defined in RCW 70.38.025 and WAC 246-310-010; and

(b) The minimum annual operating costs entailed in the provision of new "institutional health services," as this term is defined in RCW 70.38.025 and WAC 246-310-010, which will cause a new institutional health service to be subject to the provisions of chapter 246-310 WAC, the certificate of need rules and regulations.

(2) Procedure for adjustment.

(a) On or before the first day of each January, the department shall adjust and publish the adjusted expenditure minimum for capital expenditures and the adjusted minimum annual operating costs for institutional health services. Such adjusted minimums shall be in effect during the entire calendar year for which they are established.

(b) The adjustments in the minimums shall be based on the changes which occurred in the Department of Commerce Composite Construction Cost Index during the twelve month period ending the preceding October.

(c) The adjusted minimums shall be published by the department by public notice in one or more newspapers of general circulation within the state and through a written notice sent to each health systems agency, the hospital commission, each health care facility subject to the requirements of the certificate of need program, each statewide organization of such health care facilities, and the state health coordinating council.

[Statutory Authority: RCW 70.38.135 and 70.38.919. 92-02-018 (Order 224), § 246-310-900, filed 12/23/91, effective 1/23/92.]

**WAC 246-310-990 Certificate of need review fees.**

(1) An application for a certificate of need under chapter 246-310 WAC shall include payment of a fee consisting of the following:

(a) An application processing fee in the amount of seven hundred fifty dollars which shall not be refundable;

(b) A review fee based on the project description and the total capital expenditure.

| Project Description   | Capital Expenditure Range   | Review Fee                 |
|---|---|----------------------------|
| Additional kidney disease treatment center stations   | \$ 0 - 100,001<br>100,001 - 250,001<br>250,001 or more                | \$ 4,300<br>5,700<br>7,600 |
| Administrative or emergency review  | 0 - 250,001<br>250,001 or more  | 5,400<br>8,100             |
| Amendment to a certificate of need  |   | 5,000                      |
| Bed addition of less than 10 beds   | 0 - 100,001<br>100,001 - 5,000,001<br>5,000,001 or more               | 4,300<br>5,700<br>7,600    |
| Bed addition of 10 beds or more   | 0 - 500,001<br>500,001 - 5,000,001<br>5,000,001 or more               | 8,100<br>11,900<br>15,700  |
| Bed redistribution or bed relocation  | 0 - 100,001<br>100,001 - 2,000,001<br>2,000,001 or more               | 7,000<br>10,600<br>13,200  |
| Capital expenditure over the minimum expenditure  | Exp. min. - 5,000,001<br>5,000,001 - 10,000,001<br>10,000,001 or more | 7,600<br>9,600<br>13,600   |
| Establishment of a new hospital, nursing home, or continuing care retirement community                              | 0 - 2,000,001<br>2,000,001 or more                                    | 10,600<br>15,700           |
| Establishment of a new home health agency, hospice, ambulatory surgery facility, or kidney disease treatment center | 0 - 100,001<br>100,001 or more  | 3,700<br>5,700<br>7,600    |
| Extension of the certificate of need validity period (projects involving plans review by construction review unit)  |   | 150                        |
| Extension of the certificate of need validity period (other projects)   |   | 900                        |
| Replacement of an existing health care facility   | 1 - 2,000,001<br>2,000,001 - 5,000,001<br>5,000,001 or more           | 5,400<br>8,100<br>9,600    |
| Sale, purchase, or lease of part or all of an existing hospital   | 1 - 5,000,001<br>5,000,001 or more                                    | 7,600<br>11,500            |

| Project Description   | Capital Expenditure Range | Review Fee |
|---|---------------------------|------------|
| Substantial change in services, or offering a new tertiary health service | 0 - 100,000               | 8,100      |
|   | 100,001 - 2,000,000       | 10,600     |
|   | 2,000,001 or more         | 15,700     |
| Transfer of a certificate of need   |                           | 2,700      |

(c) A nonrefundable two thousand dollar actuarial review fee surcharge for an application sponsored by an existing or proposed continuing care retirement community (CCRC) as defined in WAC 246-310-130 (3)(b).

(2) For purposes of subsection (1)(b) of this section, "total capital expenditure" means the total project costs to be capitalized according to generally accepted accounting principles consistently applied, and includes, but is not limited to, the following:

- (a) Legal fees;
- (b) Feasibility studies;
- (c) Site development;
- (d) Soil survey and investigation;
- (e) Consulting fees;
- (f) Interest expenses during construction;
- (g) Temporary relocation;
- (h) Architect and engineering fees;
- (i) Construction, renovation, or alteration;
- (j) Total costs of leases of capital assets;
- (k) Labor;
- (l) Materials;
- (m) Equipment;
- (n) Sales taxes;
- (o) Equipment delivery; and
- (p) Equipment installation.

(3) Where more than one project description under subsection (1)(b) of this section applies to an application, the applicant shall use the project description and capital expenditure range with the highest review fee in calculating the payment to accompany the application submittal.

(4) The applicant shall accompany the submittal of an amendment to a certificate of need application with a fee consisting of the following:

(a) A nonrefundable processing fee of five hundred dollars;

(b) When the amendment increases the capital expenditure, or results in a project description with a larger review fee, an additional review fee based on the difference between the review fee previously paid when the application was submitted and the review fee applicable to the greater capital expenditure or new project description; and

(c) When the amendment decreases the capital expenditure, or results in a project description with a smaller review fee, the department shall refund to the applicant the difference between the review fee previously paid when the application was submitted and the review fee applicable to the smaller capital expenditure or new project description.

(5) When an application for a certificate of need is returned by the department in accordance with the provisions of WAC 246-310-090 (2)(b) or (e), the department shall refund all review fees paid.

(6) When an applicant submits a written request to withdraw an application before the beginning of review, the department shall refund any review fees paid by the applicant.

(7) When an applicant submits a written request to withdraw an application after the beginning of review, but before the beginning of the ex parte period as determined by the department consistent with WAC 246-310-190, the department shall refund one-half of all review fees paid.

(8) When an applicant submits a written request to withdraw an application after the beginning of the ex parte period as determined by the department consistent with WAC 246-310-190, the department shall not refund any of the review fees paid.

(9) Other certificate of need program fees are:

(a) A nonrefundable two hundred fifty dollar processing fee for each request for an exemption from certificate of need review submitted under the provisions of WAC 246-310-040; and

(b) A nonrefundable two hundred fifty dollar processing fee for each request for an exemption from certificate of need review submitted under the provisions of RCW 70.38.105 (4)(d).

## Chapter 246-314 WAC

### FACILITY CONSTRUCTION REVIEW

#### WAC

- 246-314-001 Purpose.  
246-314-010 Definitions.  
246-314-990 Construction review fees.

**WAC 246-314-001 Purpose.** The purpose of this chapter is to establish fees for reviewing and approving health and residential care facility construction projects.

[Statutory Authority: RCW 43.70.110. 91-16-107 (Order 185), § 246-314-001, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-050 (Order 122), § 246-314-001, filed 12/27/90, effective 1/31/91.]

**WAC 246-314-010 Definitions.** (1) "Department" means the Washington state department of health.

(2) "Project" means a construction endeavor including new construction, replacement, alterations, additions,

expansions, conversions, improvements, remodeling, renovating, and upgrading of the following types of facilities:

- (a) "Adult residential rehabilitation center" as defined under chapters 71.12 RCW and 246-325 WAC;
- (b) "Boarding homes" as defined under chapters 18.20 RCW and 246-316 WAC;
- (c) "Maternity homes" and "childbirth centers" as defined under chapters 18.46 RCW and 246-329 WAC;
- (d) "Nursing homes" as defined under chapters 18.51 RCW and 248-14 WAC;
- (e) "Private psychiatric hospitals" as defined under chapters 71.12 RCW and 246-322 WAC;
- (f) "Private alcoholism hospitals" as defined under chapters 71.12 RCW and 246-324 WAC;
- (g) "Private alcoholism treatment facilities" as defined under chapters 71.12 RCW and 246-326 WAC;
- (h) "Residential treatment facilities for psychiatrically impaired children and youth" as defined under chapters 71.12 RCW and 246-323 WAC;
- (i) "Hospitals" as defined under chapters 70.41 RCW and 246-318 WAC; and
- (j) "Hospice care center" as defined under chapters 70.126 RCW and 246-321 WAC.

(3) "Project sponsor" means the person, persons or organization, planning and contracting for the design and construction of facilities, generally the owner or the owner's representative.

(4) "Project cost" means all costs, except taxes, directly associated with the project, initially estimated and corrected by certification to the date of completion of the project and including:

- (a) All architectural-engineering designs, plans, drawings, and specifications;
- (b) All fixed and installed equipment in the project; and
- (c) Contractor supervision, inspection, and overhead.

[Statutory Authority: RCW 43.70.110. 91-16-107 (Order 185), § 246-314-010, filed 8/7/91, effective 9/7/91. Statutory Authority: RCW 43.70.040. 91-02-050 (Order 122), § 246-314-010, filed 12/27/90, effective 1/31/91.]

**WAC 246-314-990 Construction review fees.** (1) The project sponsor shall submit to the department:

- (a) A completed project review application form along with project documents for review; and
- (b) The appropriate fee based upon the initial project construction cost as determined from the following construction fee table:

CONSTRUCTION FEE TABLE

| Project Cost     | Project Review Fee |
|------------------|--------------------|
| \$ 0 to \$ 999   | \$ 120             |
| 1,000 to 1,999   | 250                |
| 2,000 to 2,999   | 320                |
| 3,000 to 4,999   | 400                |
| 5,000 to 9,999   | 520                |
| 10,000 to 19,999 | 650                |
| 20,000 to 29,999 | 800                |
| 30,000 to 39,999 | 950                |
| 40,000 to 49,999 | 1,100              |

CONSTRUCTION FEE TABLE

| Project Cost             | Project Review Fee |
|--------------------------|--------------------|
| 50,000 to 64,999         | 1,300              |
| 65,000 to 79,999         | 1,500              |
| 80,000 to 99,999         | 1,800              |
| 100,000 to 124,999       | 2,150              |
| 125,000 to 149,999       | 2,500              |
| 150,000 to 199,999       | 2,900              |
| 200,000 to 249,999       | 3,250              |
| 250,000 to 324,999       | 3,575              |
| 325,000 to 449,999       | 4,000              |
| 450,000 to 574,999       | 4,500              |
| 575,000 to 699,999       | 5,100              |
| 700,000 to 849,999       | 5,700              |
| 850,000 to 999,999       | 6,400              |
| 1,000,000 to 1,249,999   | 7,000              |
| 1,250,000 to 2,499,999   | 7,700              |
| 2,500,000 to 2,999,999   | 8,400              |
| 3,000,000 to 3,499,999   | 9,100              |
| 3,500,000 to 4,999,999   | 10,500             |
| 5,000,000 to 6,999,999   | 11,900             |
| 7,000,000 to 9,999,999   | 13,500             |
| 10,000,000 to 14,999,999 | 15,500             |
| 15,000,000 to 19,999,999 | 17,500             |
| 20,000,000 to 29,999,999 | 19,500             |
| 30,000,000 to 39,999,999 | 22,500             |
| 40,000,000 to 59,999,999 | 25,000             |
| 60,000,000 and over      | 28,000             |

(2) The department shall charge a flat fee of eighty dollars for a project involving installation of carpet only.

(3) The project sponsor may request a reduction in the project review fee for fixed or installed technologically advanced diagnostic or treatment equipment projects including lithotripters, CT scans, linear accelerators, or MRI's.

(4) The department may adjust the project review fee if:

- (a) The final project cost changes as evidenced on the certificate of project completion card; or
- (b) The project sponsor requests a reduction in the fee according to subsection (3) of this section.

**WAC 246-316-010 Definitions.** For the purposes of these regulations, the following words and phrases shall have the following meanings unless the context clearly indicates otherwise.

(1) "Abuse" means the injury, sexual use or sexual mistreatment of an individual resident by any person under circumstances which indicate the health, welfare, and safety of the resident is harmed thereby. Abuse includes emotional, as well as physical, abuse.

(a) "Physical abuse" means damaging or potentially damaging nonaccidental acts or incidents which may result in bodily injury or death.

(b) "Emotional abuse" means verbal or nonverbal actions which constitute harassment.

(2) "Ambulatory" means physically and mentally capable of walking or traversing a normal path to safety, including the ascent and descent of stairs, without the physical assistance of another person.

(a) "Semi-ambulatory" means physically and mentally capable of traversing a normal path to safety with the use of mobility aids, but unable to ascend or descend stairs without the physical assistance of another person.

(b) "Nonambulatory" means physically or mentally unable to walk or traverse a normal path to safety without the physical assistance of another person.

(c) "Physical assistance" as used in subsection (2)(a) and (b) of this section means carrying, pushing, pulling, holding, or dragging a resident along a normal path to safety.

(3) "Area," except when used in reference to a major section of a boarding home, means a portion of a room which contains the equipment essential to carry out a particular function and is separated from other facilities of the room by a physical barrier or adequate space.

(4) "Bathing facility" means a bathtub, shower or sit-down shower.

(5) "Bathroom" means a room containing at least one bathing facility.

(6) "Board" as used in RCW 18.20.020(2) means the provision of daily meal service and lodging.

(7) "Boarding home" means:

(a) A facility as defined in RCW 18.20.020(2) and in this chapter;

(b) The licensee or person granted a license by the department to operate a boarding home.

(8) "Department" means the Washington state department of health (DOH).

(9) "Dietitian" means an individual meeting the eligibility requirements for active membership in the American dietetic association described in Directory of Dietetic Programs Accredited and Approved, American Dietetic Association, edition 100, 1980.

(10) "Domiciliary care," as used in RCW 18.20.020 and this chapter, means the care offered an individual in his or her living accommodation which includes the assumption of a general responsibility for the safety and

well-being of the individual and provision of assistance in the activities of daily living, as needed.

(11) "Facilities" means a room or area and/or equipment to serve a specific function.

(12) "Foot candle" means a measurement of light approximately equal to the light produced by a lighted candle at the distance one foot away from the candle.

(13) "Functional abilities" means the physical, mental, emotional and social abilities to cope with the affairs and activities of daily living.

(14) "Grade" means the level of the ground adjacent to the building measured at required windows with ground level or sloping downward for a distance of at least ten feet from the wall of the building.

(15) "Health care practitioner" means any individual, group or organization providing health care as authorized by Washington state law, including, but not limited to, physician, chiropractor, naturopath, certified registered nurse, physician's assistant.

(16) "Home health care agency" means any nursing or other service provided by licensed nurses, other practitioners or aides on a periodic or short-term basis excluding continuous nursing care.

(17) "Infirmary," as used in RCW 18.20.020 and this chapter, means a disability which materially limits normal activity without causing an individual to need inpatient medical or nursing care of a type provided by institutions licensed under the provisions of chapters 18.46, 18.51, 70.41 or 71.12 RCW. An infirmity may be based on conditions including, but not limited to, physical handicap, mental illness, developmental disability, chemical addiction or habituation or mental confusion, disability or disturbance.

(18) "Lavatory" means a plumbing fixture designed and equipped to serve for handwashing purposes.

(19) "May" means to permit, at the discretion of the department.

(20) "Medication" means all pharmaceuticals, vitamins, and nutrient supplements, both over-the-counter and prescribed.

(21) "Medication administration" means an act in which a single dose of a medication is given to a resident by an authorized person, other than the resident, under laws and regulations governing such acts and entailing:

(a) Removing an individual dose from a previously dispensed, properly labeled container;

(b) Reviewing the label on the container with prescriber's order or with a direct copy of a verified transcription of the order;

(c) Giving an individual dose to the proper resident; and

(d) Properly recording the time and dose given.

(22) "Minor alteration" means:

(a) Physical or functional modification in a boarding home without changing department-approved use of the modified room or area; and

(b) Prior department review of the plan specified in WAC 246-316-070 is not required.

(23) "Neglect" means negligent treatment or maltreatment; an act or omission which evinces a disregard of consequences of such a magnitude as to constitute a

clear and present danger to a resident's health, welfare, and/or safety.

(24) "New construction" means:

(a) Constructing or building a new physical plant or facility to be used as a boarding home;

(b) Additions to an existing facility or physical plant constructed for intended use as part of a boarding home;

(c) A physical alteration, modification, or renovation changing department-approved use of a room or area excluding "minor alteration."

(25) "Nurse" means either a licensed practical nurse under provisions of chapter 18.78 RCW or a registered nurse.

(26) "Nursing care" means services:

(a) Designed to maintain or promote achievement of optimal, independent function, and health status; and

(b) Planned, supervised, and evaluated by a registered nurse in the context of an overall individual plan of care as in WAC 248-14-001.

(27) "Physician" or "doctor," as used in RCW 18.20.160 and in this chapter, means an individual licensed as a physician under chapters 18.57 or 18.71 RCW.

(28) "Prescriber" means a physician, dentist under chapter 18.32 RCW, or registered nurse with prescriptive authority or others legally authorized in Washington state to prescribe drugs.

(29) "Registered nurse" means an individual licensed under chapter 18.88 RCW.

(30) "Resident" means an individual who, by reason of age or infirmity, requires domiciliary care and who is not related by blood or marriage to the operator of the boarding home.

(31) "Room" means a space set apart by floor to ceiling partitions on all sides with all openings provided with doors or windows.

(32) "Self-administration of medication" means medication administration by a resident taking his or her own medication from a properly labeled container.

(33) "Sit-down shower" means a shower which has a molded seat, fold-down type of seat, or an equivalent means for sitting and is designed for bathing while in a sitting position.

(34) "Suitable chair" means a piece of furniture intended to accommodate the act of sitting which is sturdy, comfortable, and appropriate for the age and physical condition of a resident.

(35) "Supervised medication service Category A" means:

(a) A level of self-medication or self-administration; or

(b) Self-directed medication service for a resident requiring limited assistance or no assistance, and monitoring by boarding home staff to assure medication is taken and stored properly.

(36) "Supervised medication service Category B" means a level of service for residents requiring assistance and monitoring by boarding home staff to assure:

(a) Medications taken in accordance with a health care practitioner's instructions; and

(b) Inaccessibility of medications to other residents.

(37) "Supervised medication service Category C" means a full medication administration service.

(38) "Toilet" means a disposal apparatus consisting of a hopper, fitted with a seat and flushing device, used for urination and defecation.

(39) "Usable floor space" means floor area available for:

(a) Use in a resident bedroom excluding areas with ceiling height under seven feet six inches and walk-in closets if initially and continuously licensed prior to December 31, 1988; or

(b) Living and sleeping, excluding bathrooms, toilets, toilet compartments, closets, halls, storage, or utility spaces if initially licensed after December 31, 1988.

[Statutory Authority: RCW 18.20.090, 92-02-018 (Order 224), § 246-316-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-316-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090, 89-09-034 (Order 2786), § 248-16-001, filed 4/14/89; 83-13-068 (Order 264), § 248-16-001, filed 6/16/83; Order 147, § 248-16-001, filed 6/29/77; Order 97, § 248-16-001, filed 4/5/74; § 248-16-001, filed 10/3/67; Emergency Regulation filed 8/4/67; Regulation .16.001, effective 3/11/60; Subsec. 6, Rule 1 and Subsec. 7, Rule 2, filed 5/31/61.]

**WAC 246-316-020 Boarding home license application—Department denial, suspension, revocation of license.** (1) Boarding home license applicants shall:

(a) Submit appropriate, signed, completed department application forms to the department;

(b) Apply at least thirty days prior to expiration of license for renewal;

(c) Promptly report changes in information related to the application including identity of:

(i) Officers and directors if operated by a legally incorporated entity; and

(ii) Partners if a legal partnership.

(2) The department shall:

(a) Evaluate qualifications of persons named in boarding home license application prior to granting initial and subsequent licenses;

(b) Deny, suspend, or revoke a boarding home license if the department finds persons named unqualified or unable to operate or direct operation of the facility as described in chapter 18.20 RCW and this chapter;

(c) Determine if reasonable relationship exists between any previous conviction of the applicant and ability to competently, safely oversee, or operate a boarding home;

(d) Deny, suspend, or revoke a boarding home license if any person named:

(i) Was previously denied a license to operate an agency for care of children, aged, ill, or infirm in Washington or elsewhere;

(ii) Had a license to operate an agency for treatment or care of people revoked or suspended;

(iii) Has a record of a criminal or civil conviction for:

(A) Operating an agency for care of aged, children, ill, or infirm without an appropriate, applicable license; or

(B) Any crime involving physical harm to another person.

(iv) Is identified on department abuse registry as perpetrator of substantiated abuse described in chapter 26-44 RCW;

(v) Committed, permitted, aided, or abetted an illegal act on boarding home premises;

(vi) Demonstrated cruelty, abuse, negligence, assault, or indifference to welfare and well-being of a resident;

(vii) Failed to exercise fiscal accountability and responsibility involving:

(A) A resident;

(B) The department;

(C) Public agencies; or

(D) The business community.

(3) The department may grant a license to operate a boarding home to previously disqualified licensees as specified in subsection (2) of this section if such person provides evidence including demonstrated ability to operate a boarding home according to applicable laws and rules.

(4)(a) The department's notice of a denial, suspension, modification, or revocation of a license shall be consistent with RCW 43.70.115. An applicant or license holder has the right to an adjudicative proceeding to contest a license decision.

(b) A license applicant or holder contesting a department decision shall within twenty-eight days of receipt of the decision:

(i) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and

(ii) Include in or with the application:

(A) A specific statement of the issue or issues and law involved;

(B) The grounds for contesting the department decision; and

(C) A copy of the contested department decision.

(c) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

[Statutory Authority: RCW 18.20.090 and 34.05.220. 92-02-018 (Order 224), § 246-316-020, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-020, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-031, filed 4/14/89.]

**WAC 246-316-030 Change of licensee.** (1) Boarding homes shall:

(a) Notify the department in writing at least thirty days prior to planned change of boarding home license including:

(i) Full names of the present licensee and prospective licensee;

(ii) Name and address of the boarding home concerned;

(iii) The date of the proposed change; and

(iv) The kind of change to be made, such as sale, lease, or rental.

(b) If a corporation or partnership:

(i) Notify the department, in writing, with the name and address of the responsible officers in corporation or controlling partners; and

(ii) Submit a signed statement testifying the new controlling officer or officers is in compliance with WAC 246-316-020.

(2) Applicants for an initial boarding home license shall submit a new application thirty days or more before proposed effective date of license as specified in WAC 246-316-020.

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-030, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-033, filed 4/14/89.]

**WAC 246-316-040 Requirement for and qualifications of boarding home administrator.** (1) Boarding homes shall have continuous availability of an administrator or designated alternate who:

(a) Is available in person or by phone or page at all times;

(b) Is at least twenty-one years of age;

(c) Is not a resident as defined in WAC 246-316-010(30);

(d) Possesses a high school diploma or equivalent unless administering a boarding home in Washington state prior to January 1, 1958;

(e) Has demonstrated competence and experience in management of a boarding home or completed high school or post-high school courses including:

(i) Basic accounting, except when a designated alternate administrator is in charge for two weeks or less;

(ii) Management including personnel management; and

(iii) Care of persons characteristic of those admitted or accepted as residents in a specific boarding home, such as frail elderly, developmentally disabled, or mentally ill persons.

(f) Meets requirements as specified in WAC 246-316-050 (2)(b).

(2) Boarding homes shall notify the department when changes in the administrator occur including:

(a) Provide written notice to the department of new administrator's name upon appointment; and

(b) Provide a statement of administrator's compliance with this section and WAC 246-316-050.

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-040, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-040, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-036, filed 4/14/89.]

**WAC 246-316-070 New construction--Modification of existing structure.** (1) Boarding homes shall forward plans for new construction, if applicable, to the department including:

(a) Preliminary documents with:

(i) Description of program, services, and operational methods affecting boarding home building, premises, or residents;

(ii) Scaled drawings for any physical or functional construction or modification;

(iii) Two sets of plans drawn to scale including:

(A) Plot plan showing streets and driveways;

(B) Water supply;

(C) Sewage disposal system;

(D) Grade and location of each building;

(E) Designated function of each room; and

(F) Fixed equipment.

(iv) General description of construction and materials.

(b) Final construction documents requiring department approval which are two sets of final plans and specifications including:

(i) Plot plans;

(ii) Plans for each floor of each affected building designating function for each room and fixed equipment;

(iii) Interior and exterior elevations, building sections, and construction details;

(iv) A schedule of floor, wall, and ceiling finishes and the type and size of doors and windows;

(v) Plumbing, heating, ventilating, and electrical systems;

(vi) Specifications which fully describe workmanship and finishes; and

(vii) A sample of each different carpet, if provided, including tests for flame spread and smoke density conducted by an independent testing laboratory approved by the department.

(2) Boarding homes involved in new construction projects shall:

(a) Obtain department approval of final construction documents prior to starting construction;

(b) Consult with the department prior to changing approved plans and specifications;

(c) Submit modified plans or addenda if required by the department;

(d) Construct only changes approved by the department;

(e) Provide a written notice of construction project completion to the department indicating date to be completed and compliance with requirements of chapter 18.20 RCW and this chapter; and

(f) Occupy and use buildings or rooms only after authorization by the department.

(3) When modifications or alterations to existing boarding home structure are planned, boarding homes shall forward plans to the department including:

(a) Preliminary documents with:

(i) Descriptive drawings of each floor of proposed modifications indicating area to be modified;

(ii) Description of impacts on physical plant, operations, and services;

(iii) A plan showing existing and proposed function of each room and fixed equipment; and

(iv) A sample of carpets, if provided, including tests for flame spread and smoke density conducted by an independent testing laboratory approved by the department.

(b) Final plans submitted after department review of preliminary documents.

(4) Boarding homes involved in alteration or modification projects shall:

(a) Begin modifications only after department approval of final plans; and

(b) Make adequate provisions for the health, safety, and comfort of residents during construction.

(5) Boarding homes shall obtain approval of the Washington state division of fire protection prior to new construction, modifications, alterations, and minor alterations under RCW 18.20.130.

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-070, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-070, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-057, filed 4/14/89.]

**WAC 246-316-090 Water supply.** Boarding homes shall:

(1) Provide a water supply system and water meeting requirements described in chapter 246-290 WAC public water supplies;

(2) Maintain water supply systems free of cross-connections;

(3) Provide hot and cold water under adequate pressure readily available throughout the facility;

(4) Provide hot water not to exceed 120° Fahrenheit at lavatories and bathing facilities used by residents;

(5) Label or color code unsafe or nonpotable water supplies used for irrigation, fire protection, and purposes other than domestic use;

(6) Meet laundry requirements of WAC 246-316-190; and

(7) Meet dishwashing machine requirements in WAC 246-316-170.

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-090, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-090, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-070, filed 4/14/89; 83-13-068 (Order 264), § 248-16-070, filed 6/16/83; Order 147, § 248-16-070, filed 6/29/77; Regulation .16.070, effective 3/11/60.]

**WAC 246-316-100 Sewage and liquid waste disposal.** Boarding homes shall:

(1) Have all sewage and waste water drain into a sewerage system approved by the governmental agency having jurisdiction;

(2) Prevent discharge of sewage or liquid wastes directly on the surface of the ground or directly into ground water; and

(3) For new construction, if on-site sewage disposal systems are used, discharge sewage and liquid wastes per chapter 246-272 WAC on-site sewage disposal or chapter 173-240 WAC.

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-100, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-100, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-080, filed 4/14/89; Order 147, § 248-16-080, filed 6/29/77; Regulation .16.080, effective 3/11/60.]

**WAC 246-316-150 Resident room--Room furnishings--Storage.** (1) Boarding homes shall have resident sleeping rooms with:

(a) Eighty square feet usable floor space in a one-person room;

(b) At least seventy square feet of usable floor space per person in rooms occupied by two or more;

(c) Ceiling heights of at least seven feet six inches over all portions of rooms considered usable floor space;

(d) Accommodations for a maximum of four persons per room if initially and continuously licensed before July 1, 1989;

(e) Maximum occupancy of two persons per room for boarding homes applying for initial license or increasing number of resident sleeping rooms after June 30, 1989;

(f) Appropriate room identification and resident capacity consistent with department-approved list;

(g) Unrestricted direct access to a hallway, living room, outside, or other acceptable common-use area;

(h) An exclusion for use as corridors or passageways;

(i) Window sill or sills of a window or windows used for required window area, under subsection (1)(j) of this section:

(i) No more than three feet eight inches from the floor;

(ii) At or above grade extending ten or more feet outside horizontally from the window sill.

(j) Windows, excluding openings into window wells, enclosed porches, light or ventilation shafts, or similarly enclosed areas, providing:

(i) Clear glass area at least one-tenth of required room area;

(ii) Minimum area of ten square feet.

(k) Windows designed to operate freely if necessary for fire exit or ventilation;

(l) Adjustable window curtains, shades, blinds, or equivalent for visual privacy;

(m) One or more duplex electrical outlets per bed if initially licensed after July 1, 1983;

(n) Switch at entry of bedroom to control one or more light fixtures in room;

(o) Artificial lighting at bedside if requested by a resident under WAC 246-316-120; and

(p) Noncombustible wastebaskets.

(2) Boarding homes shall provide or ensure each resident has:

(a) Sufficient storage facilities either in or immediately adjacent to his or her sleeping room to adequately store a reasonable quantity of clothing and personal possessions;

(b) Individual towel and washcloth rack or equivalent;

(c) A secure space for valuables at least one-half cubic foot and a minimum dimension of four inches if requested by the resident;

(d) A comfortable bed appropriate for size of resident and at least thirty-six inches wide with:

(i) A mattress which:

(A) Fits the bed frame;

(B) Is in good condition; and

(C) Is at least four inches thick unless otherwise requested or necessary for resident health and/or safety.

(ii) Spacing at least three feet from the other beds unless otherwise requested by all affected residents; and

(iii) Acceptable types including:

(A) Standard household bed;

(B) Studio couch;

(C) Hide-a-bed;

(D) Day bed; and

(E) Water bed if it is structurally and electrically safe.

(e) One or more comfortable pillows;

(f) Clean, and in good repair, bedding at least one time per week, or as necessary to maintain cleanliness;

(g) Clean towels and washcloths at least once each week or more often if necessary to maintain cleanliness; and

(h) At least one suitable chair excluding those used to permanently furnish the day room, dining room, or other common-use rooms.

(3) Boarding homes may permit a resident to use his or her own furniture and furnishings when consistent with health and safety of all residents including:

(a) Cooking equipment, coffee makers, and other equipment and appliances in sleeping rooms when approved by the Washington state director of fire protection; and

(b) Food and beverage storage and preparation area in sleeping room if maintained in a sanitary condition.

(4) Boarding homes shall regularly:

(a) Ascertain functional ability of residents to use cooking facilities safely; and

(b) Take appropriate actions to prohibit resident access to cooking facilities when a resident is judged unable to cook safely, including:

(i) Rewire, disconnect, or remove stove or appliance;

(ii) Transfer of resident to another accommodation; or

(iii) Ensure constant attendance by a responsible person when resident has access to or use of cooking facilities.

(5) Boarding homes may use and allow use of carpets or other floor coverings if:

(a) Securely fastened to the floor or provided with nonskid backing;

(b) Free of hazards such as curling edges or tattered sections; and

(c) Clean.

(6) If a boarding home plans to install carpeting, the boarding home shall submit samples to the department for approval prior to purchase and installation as required in WAC 246-316-070 (3)(a)(iv).

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-150, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-150, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-121, filed 4/14/89.]

**WAC 246-316-170 Food and nutrition services.** (1) Boarding homes shall maintain food service facilities and practices required in chapter 246-215 WAC food service sanitation. Boarding homes may use home-canned high-acid foods with a pH of less than 4.6, such as fruit, jelly, and jam.

(2) Boarding homes using dishwashing machines shall ensure:

(a) Machine operation per manufacturer directions; and

(b) "Home-type" machines, without high temperature sanitizing cycles, maintain water temperature at 155° Fahrenheit or above.

(3) Boarding homes shall:

(a) Provide a minimum of three meals in each twenty-four-hour period;

(b) Deviate from minimum of three meals in a twenty-four-hour period only following written approval by the department;

(c) Allow no more than fourteen hours between the evening meal and breakfast unless a snack contributing to the daily nutrient total is served or made available to all residents between the evening meal and breakfast;

(d) Provide sufficient time for residents to consume meals;

(e) Have written menus which:

(i) Are available at least one week in advance;

(ii) Include date, day of week, month, and year;

(iii) Are retained at least six months; and

(iv) Provide a variety of foods with cycle duration of at least three weeks before repeating.

(f) Prepare palatable, attractively served foods, meals, and nourishments sufficient in quality, quantity, and variety to meet the recommended dietary allowances of the food and nutrition board, National Research Council, 1980;

(g) When substituting for food contributing to daily nutrient total requirement, use food of comparable nutrient value and record food actually served;

(h) Keep a record of all food and snacks served and contributing to nutritional requirements; and

(i) Maintain an adequate dining area approved by the department with seating capacity for fifty percent or more residents per meal setting.

(4) Boarding homes shall prepare and serve:

(a) Resident specific modified or therapeutic diets when and as prescribed by a health care practitioner using a dietitian-approved menu or diet manual; and

(b) Only nutrient concentrates and supplements prescribed in writing by a health care practitioner.

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-170, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-170, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-141, filed 4/14/89.]

**WAC 246-316-200 Storage space.** (1) Boarding homes shall provide adequate storage space for:

(a) Supplies;

(b) Equipment;

(c) Linens; and

(d) Personal possessions of residents including spaces described in WAC 246-316-150(2).

(2) Boarding homes shall maintain storage space to:

(a) Prevent fire or accident hazards; and

(b) Provide separate, lockable storage for disinfectants and poisonous compounds in drawers, rooms, or equivalent.

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-200, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-200, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-170, filed 4/14/89; 83-13-068 (Order 264), § 248-16-170, filed 6/16/83; Regulation .16.170, effective 3/11/60.]

**WAC 246-316-240 Admission, placement and retention of residents.** (1) Prior to admission or acceptance as a resident, boarding homes shall obtain sufficient information to evaluate whether or not a resident/applicant can be safely housed and provided domiciliary care in the particular facility, including information in reference to:

(a) Resident/applicant's ability to function with respect to the physical premises, equipment, and staff of the boarding home;

(b) Space, equipment, and furniture requirements;

(c) Ambulatory status;

(d) Currently demonstrated overt behavior dangerous to self or others;

(e) Need for care in a hospital, nursing home, or other licensed facility under chapters 18.51, 70.41, and 71.12 RCW;

(f) Requirements for assistance in obtaining or administering medications; and

(g) Need or desire for nursing care exceeding periodic visits by staff of a home health care agency or a licensed nurse employed by an individual resident.

(2) Boarding homes shall accept, admit, and retain persons as residents only when:

(a) Ambulatory unless the boarding home is approved by the Washington state director of fire protection to:

(i) Care for semi-ambulatory residents; or

(ii) Care for nonambulatory residents not needing medical or nursing care as specified in subsection (2)(f)(ii) and (iii) of this section.

(b) Nonsmoking residents can be accommodated with smoke-free rooms and smoke-free common-use areas to prevent contact with smoke;

(c) Smoking residents can be accommodated by areas meeting the requirements in WAC 246-316-140(2);

(d) The individual resident can be accommodated by:

(i) Physical plant, facilities, and spaces;

(ii) Furniture and equipment; and

(iii) Staff who are available and sufficient to provide nature of domiciliary care required and desired by the resident.

(e) The amount and nature of needed assistance with medication or medication service is available in the boarding home under RCW 18.20.160 and WAC 246-316-300; and

(f) Individuals do not:

(i) Exhibit continuing overt behavior which is a danger to others or self;

(ii) Need inpatient care in a hospital, nursing home, or other facility licensed under chapters 18.51, 70.12, or 70.41 RCW; or

(iii) Need continuous nursing care exceeding periodic or short-term services from:

(A) Staff of a home health care agency; or

(B) A licensed nurse retained by an individual resident.

(3) Upon admission or acceptance of an individual as a resident, boarding homes shall determine a resident's choice regarding:

- (a) Definite arrangements with a health care practitioner; and
- (b) Who to call in case of resident illness or death.

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-240, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-240, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-213, filed 4/14/89; 83-13-068 (Order 264), § 248-16-213, filed 6/16/83; Order 147, § 248-16-213, filed 6/29/77.]

**WAC 246-316-320 Resident health record.** (1) Boarding homes shall maintain a health record in ink, typewritten or equivalent, for each resident including:

- (a) Full name, date of birth, and former address of resident;
- (b) Date admitted as resident and date discharged;
- (c) Name, address, and telephone number of next-of-kin or other responsible person;
- (d) Name, address, and telephone number of resident's personal physician or health care practitioner;
- (e) Signed staff entries about:
  - (i) Dates and descriptions of resident illnesses, accidents, or incidents;
  - (ii) Changes in resident functional abilities or physical and mental coordination; and
  - (iii) Actions of staff related to subdivision (e)(i) and (ii) of this subsection.
- (f) Orders signed by a resident's physician or health care practitioner for any modified diet, concentrate or supplement provided by the boarding home; and
- (g) Medication orders and records as specified in WAC 246-316-300.

(2) Boarding homes shall:

- (a) Maintain a systematic, secure method of identifying and filing resident health records for ease in locating; and
- (b) Retain each resident health record at least five years following resident discharge.

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-320, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-320, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-235, filed 4/14/89; 83-13-068 (Order 264), § 248-16-235, filed 6/16/83.]

**WAC 246-316-330 Adult day care.** (1) Boarding homes choosing to provide adult day care services and to accept or admit adults for domiciliary care in a boarding home for less than a contiguous twenty-four hours shall:

- (a) Accept and retain for day care only those adults meeting resident criteria described in WAC 246-316-240;
- (b) Provide day room and dining room facilities complying with WAC 246-316-170 and 246-316-180;
- (c) Provide toilets and lavatories complying with WAC 246-316-160;
- (d) Provide comfortable, suitable chairs and furniture;

(e) Provide sufficient furniture for comfort of residents and day care adults including, but not limited to:

- (i) Napping furniture for day care adults such as lounge chairs, recliners, couches; and
- (ii) Ability to space napping furniture at least three feet apart if needed or requested.

(f) Provide staff to supervise and assist day care adults in activities of daily living and medication management as described in WAC 246-316-260 and 246-316-300;

(g) Provide a meal meeting at least one-third of the recommended dietary allowance during every five-hour period of stay (the exception to the recommended dietary allowance is during normal sleeping hours when fasting periods greater than fourteen hours are prohibited);

(h) Ensure and provide rights, services, notification, and safety as described in WAC 246-316-250, 246-316-260, 246-316-280, and 246-316-290;

(i) Maintain a separate register of all day care adults using format described in WAC 246-316-310;

(j) Maintain a health record for each day care adult as described for residents in WAC 246-316-320.

(2) Boarding homes choosing to accept adults for day care shall:

(a) Notify the department of the plan to accept or admit adults to day care;

(b) Provide information as required for the department to establish compliance with this section; and

(c) Obtain written department approval for maximum day care adult capacity prior to accepting or admitting adults for day care.

(3) When notified of boarding home licensee's plan to accept day care adults, the department shall:

(a) Determine whether or not a boarding home complies with this section;

(b) Issue written approval for occupancy based on compliance with this section; and

(c) Indicate approved capacity for day care adults on the boarding home license.

[Statutory Authority: RCW 18.20.090. 92-02-018 (Order 224), § 246-316-330, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-316-330, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.20.090. 89-09-034 (Order 2786), § 248-16-300, filed 4/14/89.]

| 246-318-440 | Records and reports—Medical record system.  |

**WAC 246-318-010 Definitions.** For the purposes of this chapter and chapter 70.41 RCW, the following words and phrases shall have the following meanings unless the context clearly indicates otherwise. All adjectives and adverbs such as adequate, approved, suitable, properly, or sufficient used in these regulations to qualify a requirement shall be determined by the department.

(1) "Abuse" means the injury or sexual abuse of a patient under circumstances indicating the health, welfare, and safety of the patient is harmed. Person "legally responsible" shall include a parent, guardian, or an individual to whom parental or guardian responsibility is delegated (e.g., teachers, providers of residential care and treatment, and providers of day care):

(a) "Physical abuse" means damaging or potentially damaging nonaccidental acts or incidents which may result in bodily injury or death.

(b) "Emotional abuse" means verbal behavior, harassment, or other actions which may result in emotional or behavioral problems, physical manifestations, disordered or delayed development.

(2) "Accredited" means approved by the joint commission on accreditation of hospitals or the bureau of hospitals of the American Osteopathic Association.

(3) "Adolescent" means an individual during that period of life beginning with the appearance of secondary sex characteristics and ending with the cessation of somatic growth.

(4) "Agent," when used in a reference to a medical order or a procedure for a treatment, means any power, principle, or substance, whether physical, chemical, or biological, capable of producing an effect upon the human body.

(5) "Alterations":

(a) "Alterations" means changes requiring construction in existing hospitals.

(b) "Minor alterations" means any physical or functional modification within existing hospitals not changing the approved use of the room or area. (Minor alterations performed under this definition do not require prior review of the department as specified in

WAC 246-318-510 (3)(a); however, this does not constitute a release from other applicable requirements.)

(6) "Area" means a portion of a room containing the equipment essential to carrying out a particular function and separated from other facilities of the room by a physical barrier or adequate space, except when used in reference to a major section of the hospital.

(7) "Authenticate" means to authorize or validate an entry in a record by:

(a) A signature including first initial, last name, and discipline; or

(b) A unique identifier allowing identification of the responsible individual.

(8) "Bathing facility" means a bathtub or shower and does not include sitz baths or other fixtures designated primarily for therapy.

(9) "Birthing room" or "labor, delivery, recovery (LDR) room" or "labor-delivery-recovery-postpartum (LDRP) room" means a room designed and equipped to provide care of a woman, fetus, and newborn and to accommodate her support persons during the complete process of vaginal childbirth.

(10) "Children" means young persons of either sex between infancy and adolescence.

(11) "Clean" means space or spaces and/or equipment for storage and handling of supplies and/or equipment which are in a sanitary or sterile condition, when the word is used in reference to a room, area, or facility.

(12) "Critical care" means a special physical and functional nursing unit for the segregation, concentration, and close or continuous observation and care of patients critically, acutely, or seriously ill and in need of intensive, highly skilled services.

(13) "Department" means the Washington state department of health.

(14) "Dentist" means an individual licensed under chapter 18.32 RCW.

(15) "Diagnostic radiologic technician" means an individual:

(a) Certified or eligible for certification as a diagnostic radiologic technologist under chapter 18.84 RCW; or

(b) Trained by a radiologist and approved by a radiologist member of medical staff to perform specified diagnostic radiologic procedures.

(16) "Dialysis facility" means a separate physical and functional nursing unit of the hospital serving patients receiving renal dialysis.

(17) "Dialysis station" means an area designed, equipped, and staffed to provide dialysis services for one patient.

(18) "Dietitian" means an individual meeting the eligibility requirements for active membership in the American Dietetic Association described in *Directory of Dietetic Programs Accredited and Approved*, American Dietetic Association, edition 100, 1980.

(19) "Double-checking" means verification of patient identity, agent to be administered, route, quantity, rate, time, and interval of administration by two persons legally qualified to administer prior to administration of the agent.

(20) "Drug administration" means an act in which a single dose of a prescribed drug or biological is given to a patient by an authorized person in accordance with all laws and regulations governing such acts. The complete act of administration entails:

(a) Removing an individual dose from a previously dispensed, properly labeled container (including a unit dose container);

(b) Reviewing the label on the container with a verified transcription, a direct copy or the original medical practitioner's orders;

(c) Giving the individual dose to the proper patient; and

(d) Properly recording the time and dose given.

(21) "Drug dispensing" means an act entailing the interpretation of an order for a drug or biological and, pursuant to that order, proper selection, measuring, labeling, packaging, and issuance of the drug for a patient or for a service unit of the facility.

(22) "Easily cleanable" means of material or finish and so fabricated to allow complete removal of residue by normal cleaning methods.

(23) "Electrical receptacle outlet" means an outlet where one or more electrical receptacles are installed.

(24) "Facilities" means a room or area and equipment serving a specific function.

(25) "Faucet controls" means wrist, knee, or foot control of the water supply:

(a) "Wrist control" means water supply controls not exceeding four and one-half inches overall horizontal length designed and installed to be operated by the wrists;

(b) "Knee control" means the water supply is controlled through a mixing valve designed and installed to be operated by the knee;

(c) "Foot control" means the water supply control is through a mixing valve designed and installed to be operated by the foot.

(26) "Governing body" means the person or persons responsible for establishing the purposes and policies of the hospital.

(27) "Grade" means the level of the ground adjacent to the building measured at required windows. The ground must be level or slope downward for a distance of at least ten feet from the wall of the building. From there the ground may slope upward not greater than an average of one foot vertical to two feet horizontal within a distance of eighteen feet from the building.

(28) "Handwashing facility" means a lavatory or a sink properly designed and equipped to serve for handwashing purposes.

(29) "He, him, his, or himself" means a person of either sex, male, or female, and does not mean preference for nor exclude reference to either sex.

(30) "High-risk infant" means an infant, regardless of gestational age or birth weight, whose extrauterine existence is compromised by a number of factors, prenatal, natal, or postnatal needing special medical or nursing care.

(31) "Hospital" means any institution, place, building, or agency providing accommodations, facilities and services over a continuous period of twenty-four hours or more, for observation, diagnosis, or care of two or more individuals not related to the operator who are suffering from illness, injury, deformity, or abnormality, or from any other condition for which obstetrical, medical, or surgical services would be appropriate for care or diagnosis. "Hospital" as used in this chapter does not include:

(a) Hotels, or similar places furnishing only food and lodging, or simply domiciliary care;

(b) Clinics, or physicians' offices where patients are not regularly kept as bed patients for twenty-four hours or more;

(c) Nursing homes, as defined and which come within the scope of chapter 18.51 RCW;

(d) Maternity homes, which come within the scope of chapter 18.46 RCW;

(e) Psychiatric or alcoholism hospitals, which come within the scope of chapter 71.12 RCW; nor

(f) Any other hospital or institution specifically intended for use in the diagnosis and care of those suffering from mental illness, mental retardation, convulsive disorders, or other abnormal mental conditions.

(g) Furthermore, nothing in this chapter shall be construed as authorizing the supervision, regulation, or control of the remedial care or treatment of residents or patients in any hospital conducted for those who rely primarily upon treatment by prayer or spiritual means in accordance with the creed or tenets of any well-recognized church or religious denominations.

(32) "Infant" means a baby or very young child up to one year of age.

(33) "Infant station" means a space for a bassinet, incubator, or equivalent, including support equipment used for the care of an individual infant.

(34) "Intermediate care nursery" means an area designed, organized, staffed, and equipped to provide constant care and treatment for mild to moderately ill infants not requiring neonatal intensive care, but requiring or may require physical support and treatment beyond support required for a normal neonate and may include the following:

(a) Electronic cardiorespiratory monitoring;

(b) Gavage feedings;

(c) Parenteral therapy for administration of drugs; and

(d) Respiratory therapy with intermittent mechanical ventilation not to exceed a continuous period of twenty-four hours for stabilization when trained staff are available.

(35) "Investigational drug" means any article not approved for use in the United States, but for which an investigational drug application (IND) is approved by the Food and Drug Administration.

(36) "Island tub" means a bathtub placed in a room to permit free movement of a stretcher, patient lift, or wheelchair to at least one side of the tub, and movement of people on both sides and at the end of the tub.

(37) "Lavatory" means a plumbing fixture of adequate design and size for washing hands.

(38) "Legend drugs" means any drugs required by state law or regulation of the state board of pharmacy to be dispensed on prescription only or are restricted to use by practitioners only.

(39) "Licensed practical nurse," abbreviated L.P.N., means an individual licensed under provisions of chapter 18.78 RCW.

(40) "May" means permissive or discretionary on the part of the board or the department.

(41) "Medical staff" means physicians and may include other practitioners appointed by the governing body to practice within the parameters of governing body and medical staff bylaws.

(42) "Movable equipment" means equipment not built-in, fixed, or attached to the building.

(43) "Neglect" means mistreatment or maltreatment; an act or omission evincing; a serious disregard of consequences of a magnitude constituting a clear and present danger to an individual patient's health, welfare, and safety.

(a) "Physical neglect" means physical or material deprivation (e.g., lack of medical care, lack of supervision necessary for patient level of development, inadequate food, clothing, or cleanliness).

(b) "Emotional neglect" means acts such as rejection, lack of stimulation, or other acts of commission or omission which may result in emotional or behavioral problems, physical manifestations, and disordered development.

(44) "Nuclear medicine technologist" means an individual certified or eligible for certification as a nuclear medicine technologist under chapter 18.84 RCW.

(45) "Neonate" or "newborn" means a newly born infant through the twenty-seventh day of life or under twenty-eight days of age.

(46) "Neonatal intensive care nursery" means an area designed, organized, equipped, and staffed to provide constant nursing and medical care and treatment for high-risk infants who may require:

(a) Continuous ventilatory support, twenty-four hours per day;

(b) Intravenous fluids or parenteral nutrition;

(c) Preoperative and postoperative monitoring when anesthetic other than local is administered; or

(d) Cardiopulmonary or other life support on a continuing basis.

(47) "Neonatologist" means a pediatrician who is board certified in neonatal-perinatal medicine or board eligible in neonatal-perinatal medicine, provided the period of eligibility does not exceed three years, as defined and described in *Directory of Residency Training Programs by the Accreditation Council for Graduate Medical Education*, American Medical Association, 1981-1982 or the *American Osteopathic Association Yearbook and Directory*, 1981-1982.

(48) "Newborn care" means provision of nursing and medical services described by the hospital and appropriate for well and convalescing infants including supportive care, ongoing physical assessment, and resuscitation.

(49) "New construction" means any of the following:

(a) New buildings to be used as hospitals;

(b) Additions to existing buildings to be used as hospitals;

(c) Conversion of existing buildings or portions thereof for use as hospitals;

(d) Alterations.

(50) "Nursing home unit" or "long-term care unit" means a group of beds for the accommodation of patients who, because of chronic illness or physical infirmities, require skilled nursing care and related medical services but are not acutely ill and not in need of the highly technical or specialized services ordinarily a part of hospital care.

(51) "Nursing unit, general" means a separate physical and functional unit of the hospital including a group of patient rooms, ancillary and administrative, and service facilities necessary to provide nursing service to the occupants of these patient rooms. Facilities serving other areas of the hospital and creating traffic unnecessary to the functions of the nursing unit are excluded.

(52) "Observation room" means a room for close nursing observation and care of one or more outpatients for a period of less than twenty-four consecutive hours.

(53) "Obstetrical area" means the portions or units of the hospital designated or designed for care and treatment of women during the antepartum, intrapartum, and postpartum periods, and/or areas designed as nurseries for care of newborns.

(54) "Occupational therapist" means an individual licensed under the provisions of chapter 18.59 RCW.

(55) "Patient" means an individual receiving (or has received) preventive, diagnostic, therapeutic, rehabilitative, maintenance, or palliative health services at the hospital. "Outpatient" means a patient receiving services that generally do not require admission to a hospital bed for twenty-four hours or more.

(56) "Patient care areas" means all nursing service areas of the hospital where direct patient care is rendered and all other areas of the hospital where diagnostic or treatment procedures are performed directly upon a patient.

(57) "Pediatrician" means a physician:

(a) Having successfully completed a residency program approved by the American Board of Pediatrics as described in the *Directory of Residence Training Programs Accredited by the Accreditation Council for Graduate Medical Education*, American Medical Association, 1981-1982; or

(b) Approved by the American Osteopathic Board of Pediatrics as described in the *American Osteopathic Association Yearbook and Directory*, 1981-1982; and

(c) Board certified or board eligible for period not to exceed three years.

(58) "Pediatric service" means any diagnostic, treatment, or care service provided for infants, children, or adolescents.

(59) "Person" means any individual, firm, partnership, corporation, company, association, or joint stock association, and the legal successor thereof.

(60) "Pharmacist" means an individual licensed by the state board of pharmacy to engage in the practice of pharmacy under the provisions of chapter 18.64 RCW as now or hereafter amended.

(61) "Pharmacy" means the central area in a hospital where drugs are stored and are issued to hospital departments or where prescriptions are filled.

(62) "Physical barrier" means a partition or similar space divider designed to prevent splash or spray between room areas.

(63) "Physical therapist" means an individual licensed under provisions of chapter 18.74 RCW.

(64) "Physician" means an individual licensed under provisions of chapter 18.71 RCW, Physicians, or chapter 18.57 RCW, Osteopathy—Osteopathic medicine and surgery.

(65) "Physician's assistant" means an individual who is not a physician but practices medicine under provisions, rules, and regulations of chapter 18.71A RCW, or provisions, rules, and regulations under chapter 18.57A RCW.

(66) "Physician member of medical staff qualified in nuclear medicine" means a physician with staff privileges who is:

(a) Certified or eligible for certification by the American Board of Radiology (ABR) or the American Board of Nuclear Medicine (ABNM) in radiologic physics including diagnostic, therapeutic, and medical nuclear physics; and

(b) Included in the 1987-1989 list of board-certified physicians maintained by ACR Professional Bureau, 1899 Preston White Drive, Reston, VA 22091.

(67) "Prescription" means an order for drugs for a specific patient given by a licensed physician, dentist, or other individual legally authorized to write prescriptions, transmitted to a pharmacist for dispensing to the specific patient.

(68) "Protocols" and "standing order" mean written descriptions of actions and interventions for implementation by designated hospital personnel under defined circumstances and authenticated by a legally authorized person under hospital policy and procedure.

(69) "Psychiatric unit" means a separate portion of the hospital specifically reserved for the care of psychiatric patients (a part of which may be unlocked and a part locked), as distinguished from "seclusion rooms" or "security rooms" as defined in this section.

(70) "Psychiatrist" means a physician having successfully completed a three-year residency program in psychiatry and is eligible for certification by the American Board of Psychiatry and Neurology as described in the *Directory of Residency Training Programs Accredited by the Accreditation Council for Graduate Medical Education*, American Medical Association, 1981-1982, or eligible for certification by the American Osteopathic Board of Neurology and Psychiatry as described in the *American Osteopathic Association Yearbook and Directory*, 1981-1982.

(71) "Psychologist" means an individual licensed as a psychologist in the state of Washington under provisions of chapter 18.83 RCW.

(72) "Radiation oncologist" means a physician who successfully completed an approved residency program in therapeutic radiology and is either board certified or eligible for board certification in radiation oncology by:

(a) The American Board of Radiology described under *Directory of Residency Programs Accredited by the Accreditation Council for Graduate Medical Education*, American Medical Association, 1981-82, with:

(i) Certification in use of both external and brachytherapy techniques; and

(ii) Continuing education requirements of the board met; or

(b) The American Osteopathic Board of Radiology described in the *American Osteopathic Association Yearbook and Directory*, 1981-82 with:

(i) Certification in use of both external and brachytherapy techniques; and

(ii) Continuing education requirements of the board met.

(73) "Radiologist" means a physician who is board certified or eligible for certification in radiology and meeting continuing education requirements of:

(a) The American Board of Radiology described under *Directory of Residency Programs Accredited by the Accreditation Council for Graduate Medical Education*, American Medical Association, 1981-82; or

(b) The American Osteopathic Board of Radiology described under *American Osteopathic Association Yearbook and Directory*, 1981-82.

(74) "Recreational therapist" means an individual with a bachelors degree including a major or option in therapeutic recreation or recreation for the ill and handicapped.

(75) "Recovery unit" means a special physical and functional unit for the segregation, concentration, and close or continuous nursing observation and care of patients for a period of less than twenty-four hours immediately following anesthesia, obstetrical delivery, surgery, or other diagnostic or treatment procedures which may produce shock, respiratory obstruction or depression, or other serious states.

(76) "Referred outpatient diagnostic service" means a service provided to an individual receiving medical diagnosis, treatment, and other health care services from one or more sources outside the hospital limited to diagnostic tests and examinations:

(a) Not involving administration of a parenteral injection, the use of a local or general anesthesia or the performance of a surgical procedure; and

(b) Ordered by a health care practitioner, legally permitted to order such tests and examinations, to whom the hospital reports the findings and results of the tests and examinations.

(77) "Registered nurse" means an individual licensed under the provisions of chapter 18.88 RCW and practicing in accordance with the rules and regulations promulgated thereunder.

(78) "Restraint" means any apparatus used for the purpose of preventing or limiting free body movement. This shall not be interpreted to include a safety device as defined herein.

(79) "Room" means a space set apart by floor-to-ceiling partitions on all sides with proper access to a corridor and with all openings provided with doors or windows.

(80) "Rooming-in" means an arrangement for mother and infant to room together with provision for family interaction within the hospital setting.

(81) "Safety device" means a device used to safeguard a patient who, because of developmental level or condition, is particularly subject to accidental self-injury.

(82) "Seclusion room" means a small, secure room specifically designed and organized to provide for temporary placement, care, and observation of one patient and further providing an environment with minimal sensory stimuli, maximum security and protection, and visualization of the patient by authorized personnel and staff. Doors of seclusion rooms shall be provided with staff-controlled locks. There shall be security relites in the door or equivalent means affording visibility of the occupant at all times. Inside or outside rooms may be acceptable.

(83) "Security room" means a patient sleeping room designed, furnished, and equipped to provide maximum safety and security, including window protection or security windows and a lockable door with provision for observation of room occupant.

(84) "Self-administration of drugs" means a patient administering or taking his or her own drugs from properly labeled containers: *Provided*, That the facility maintains the responsibility for seeing the drugs are used correctly and the patient is responding appropriately.

(85) "Sensitive area" means a room used for surgery, obstetrical delivery, nursery, post-anesthesia recovery, special procedures where invasive techniques are used, or critical care including, but not limited to, intensive and cardiac care.

(86) "Shall" means compliance is mandatory.

(87) "Should" means a suggestion or recommendation, but not a requirement.

(88) "Sinks":

(a) "Clinic service sink (siphon jet)" means a plumbing fixture of adequate size and proper design for waste disposal with siphon jet or similar action sufficient to flush solid matter of at least two and one-eighth inch diameter.

(b) "Scrub sink" means a plumbing fixture of adequate size and proper design for thorough washing of hands and arms, equipped with knee, foot, electronic, or equivalent control, and gooseneck spout.

(c) "Service sink" means a plumbing fixture of adequate size and proper design for filling and emptying mop buckets.

(89) "Social worker" means an individual holding a masters degree in social work from a graduate school of social work approved by the council on social work education.

(90) "Soiled" (when used in reference to a room, area, or facility) means space and equipment for collection or cleaning of used or contaminated supplies and equipment or collection or disposal of wastes.

(91) "Stretcher" means a four-wheeled cart designed to serve as a litter for the transport of an ill or injured individual in a horizontal or recumbent position.

(92) "Surgical procedure" means any manual or operative procedure performed upon the body of a living human being for the purpose of preserving health, diagnosing or curing disease, repairing injury, correcting deformity or defect, prolonging life or relieving suffering, and involving any of the following:

(a) Incision, excision, or curettage of tissue or an organ;

(b) Suture or other repair of tissue or an organ including a closed as well as an open reduction of a fracture;

(c) Extraction of tissue including the premature extraction of the products of conception from the uterus; or

(d) An endoscopic examination with use of a local or general anesthesia.

(93) "Therapeutic radiologic technologist" means an individual certified or eligible for certification as a therapeutic radiologic technologist under chapter 18.84 RCW.

(94) "Through traffic" means traffic for which the origin and destination are outside the room or area serving as a passageway.

(95) "Toilet" means a room containing at least one water closet.

(96) "Tuberculous patient" means an individual receiving diagnostic or treatment services because of suspected or known tuberculosis.

(97) "Water closet" means a plumbing fixture for defecation fitted with a seat and device for flushing the bowl of the fixture with water.

(98) "Window" means a glazed opening in an exterior wall.

(a) "Maximum security window" means a window that can only be opened by keys or tools under the control of personnel. The operation shall be restricted to prohibit escape or suicide. Where glass fragments may create a hazard, safety glazing and other appropriate security features shall be incorporated. Approved transparent materials other than glass may be used.

(b) "Relite" means a glazed opening in an interior partition between a corridor and a room or between two rooms to permit viewing.

(c) "Security window" means a window designed to inhibit exit, entry, and injury to a patient, incorporating approved, safe transparent material.

**WAC 246-318-013 License expiration dates—Notice of decision—Adjudicative proceeding.** (1) The department shall issue hospital licenses initially and reissue hospital licenses as often thereafter as necessary to stagger license expiration dates throughout the calendar year so as to cause approximately one-twelfth of the total number of hospital licenses to expire on the last day of each month, but no license issued pursuant to this chapter shall exceed thirty-six months in duration. If there is failure to comply with the provisions of chapter 70.41 RCW or this chapter, the department may, in its discretion, issue a provisional license to permit the operation of the hospital for a period of time to be determined by the department.

(2) The department may deny, suspend, modify, or revoke a license for cause.

(3)(a) The department's notice of a denial, suspension, modification, or revocation of a license shall be consistent with RCW 43.70.115. An applicant or license holder has the right to an adjudicative proceeding to contest a license decision.

(b) A license applicant or holder contesting a department license decision shall within twenty-eight days of receipt of the decision:

(i) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and

(ii) Include in or with the application:

(A) A specific statement of the issue or issues and law involved;

(B) The grounds for contesting the department decision; and

(C) A copy of the contested department decision.

(c) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

[Statutory Authority: RCW 70.41.030, 92-02-018 (Order 224), § 246-318-013, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-318-013, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 34.05 RCW, RCW 34.05.220 (1)(a) and 70.41.030, 90-06-019 (Order 039), § 248-18-015, filed 2/28/90, effective 3/1/90. Statutory Authority: RCW 70.41.030 and 43.20.050, 82-24-002 (Order 249), § 248-18-015, filed 11/18/82; Order 119, § 248-18-015, filed 5/23/75; Order 69, § 248-18-015, filed 1/13/72.]

**WAC 246-318-015 Exemptions and interpretations.**

(1) If a hospital that is required to be licensed under this act does not normally provide a particular service or department, the section or sections of these regulations relating to such service or department will not be applicable.

(2) The department may, in its discretion, exempt certain hospitals from complying with parts of these

regulations when it has been found after thorough investigation and consideration that such exemption may be made in an individual case without placing the safety or health of the patients in the hospitals involved in jeopardy.

(3) The secretary of the department or his or her designee may, upon written application of a hospital, allow the substitution of procedures, materials, or equipment for those specified in these regulations when such procedures, materials, or equipment have been demonstrated to his or her satisfaction to be at least equivalent to those prescribed. The secretary or his or her designee shall send a written response to a hospital which has applied for approval of a substitution. The response shall approve or disapprove the substitution and shall be issued within thirty working days after the department has received all the information necessary to the review of the application.

(4) A hospital may, upon submission of a written request to the secretary of the department or his or her designee, obtain an interpretation of a rule or regulation contained in this chapter. The secretary or his or her designee shall, in response to such a request, send a written interpretation of the rule or regulation within thirty working days after the department has received complete information relevant to the requested interpretation.

(5) A copy of each exemption or substitution granted or interpretation issued pursuant to the provisions of this section shall be reduced to writing and filed with the department and the hospital.

[Statutory Authority: RCW 70.41.030, 92-02-018 (Order 224), § 246-318-015, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-318-015, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.41 RCW, 90-12-014 (Order 061), § 248-18-010, filed 5/30/90, effective 6/30/90. Statutory Authority: 1985 c 213, 86-08-002 (Order 2348), § 248-18-010, filed 3/20/86. Statutory Authority: RCW 70.41.30 [70.41.030], 81-05-029 (Order 209), § 248-18-010, filed 2/18/81; Order 142, § 248-18-010, filed 2/8/77; Order 119, § 248-18-010, filed 5/23/75; Order 50, § 248-18-010, filed 12/17/70; Order 22, § 248-18-010, filed 6/27/69; Order 10, § 248-18-010, filed 1/2/69; Regulation 18.010, effective 3/11/60; Subsection (3), filed 2/17/61.]

**WAC 246-318-017 Single license to cover two or more buildings—When permissible.** When an applicant and the hospital facility for which such application is submitted meet the licensure requirements of chapter 70.41 RCW and this chapter, the department may issue a single hospital license to include two or more buildings, provided:

(1) The licensee shall operate the multiple buildings as a single integrated system.

(a) All buildings or portions of buildings under a single license shall be governed by a single governing body and under administrative control of a single administrator, and

(b) All hospital facilities operating under a single license shall have a single medical staff.

(2) Buildings connected by a heated, enclosed passageway are considered a single building and the passageway shall be constructed and maintained to permit the safe transfer of patients, equipment, and supplies.

(3) Safe, appropriate, and adequate transport of patients between buildings shall be provided.

(4) Hospital buildings included under one license shall not be located more than ten surface miles apart.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-017, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-017, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030. 85-23-020 (Order 2305), § 248-18-017, filed 11/13/85; Order 119, § 248-18-017, filed 5/23/75.]

**WAC 246-318-018 Hospital license to cover attached nursing home building--When permissible.** A building meeting the requirements of this chapter and which has been approved by the department of social and health services as a nursing home may be licensed as a part of a hospital by means of a hospital license rider provided:

(1) The hospital makes application for license of the nursing home facility as a part of the hospital;

(2) The hospital and nursing home facility organization, administration and operation are integrated;

(3) The nursing home facility is connected to the hospital by an enclosed, heated passageway which has been approved by the department for the transport of patients, equipment and supplies; and

(4) The hospital establishes and maintains a mechanism whereby placement and retention of patients in the nursing home facility are reviewed by a professional group representative of the hospital's administrative, medical and nursing staffs to assure that use of the nursing home facility is limited to patients who require nonacute, convalescent or chronic care only.

And further provided that where requirements of this chapter affecting only the maintenance and operation of the nursing home facility are in conflict with this chapter, then such conflicts may be resolved by each hospital individually: *Provided*, That maintenance and operation of the facility meet either chapter 248-14 WAC or this chapter.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-018, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-018, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.41 RCW. 90-12-014 (Order 061), § 248-18-018, filed 5/30/90, effective 6/30/90; Order 119, § 248-18-018, filed 5/23/75.]

**WAC 246-318-025 Required approval for occupancy after completion of new construction.** (1) Prior to occupancy and use of a building or any room or other portion of a building constituting the whole or part of a new construction project, a hospital shall have obtained written authorization for such occupancy from the department.

(2) The hospital shall notify the department when either of the following has been substantially completed: An entire new construction project, or any room or other portion of a new construction project the hospital plans

to occupy before the entire new construction project is finished.

(3) The department shall authorize occupancy if the new construction has been completed in accordance with this chapter and the department has received written approval of such occupancy from the state fire marshal.

(4) The department may authorize occupancy of a building or any room or other portion of a building when the new construction is deficient in relation to this chapter: *Provided*, That the department has determined, after thorough investigation and consideration, the deficiencies will not impair services to patients or otherwise jeopardize the safety or health of patients, the hospital has provided written assurance of completion or correction of deficient items within a period of time acceptable to the department, and the department has received written approval of such occupancy from the state fire marshal.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-025, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-025, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030 and 43.20.050. 82-13-084 (Order 230), § 248-18-025, filed 6/22/82; Order 123, § 248-18-025, filed 3/18/76.]

**WAC 246-318-035 Infection control program.** Each hospital shall maintain an effective hospital wide program for the surveillance, prevention, and control of infection including:

(1) Designation of an infection control committee to oversee the program with:

(a) Multidisciplinary membership on the committee including representatives from medical staff, nursing, administration, and persons directly responsible for management of the infection control program;

(b) Description of the program approved by the committee and including surveillance, prevention, and control activities;

(c) Delegation of authority, approved in writing by administrative and medical staff, to institute surveillance, prevention, and control measures when there is reason to believe any patient or personnel may be at risk of infection;

(d) Regularly scheduled meetings at least quarterly;

(e) Maintenance of written minutes and reports of findings presented during committee meetings; and

(f) A method for forwarding recommendations to the medical staff, nursing, administration, quality assurance, and other committees and departments as appropriate.

(2) Management of the infection control program by one or more persons with documented evidence of qualifications related to infection surveillance, prevention, and control including:

(a) Education;

(b) Training;

(c) Certification; or

(d) Supervised experience.

(3) Establishing the following components of the infection control program:

(a) Review of patient and personnel infections, as appropriate, to determine whether an infection is

nosocomial using definitions and criteria established by the committee;

(b) Written policies and procedures describing the types of surveillance carried out to monitor:

- (i) Rates of nosocomial infections;
- (ii) Systems used to collect and analyze data; and
- (iii) Activities to prevent and control infections;

(c) A system for reporting communicable diseases and following requirements under chapter 246-100 WAC, Communicable and certain other diseases;

(d) A procedure for reviewing and approving infection control aspects of policies and procedures used in each area of the hospital;

(e) Provision of consultation regarding patient care practices, equipment, and supplies influencing risk of infection;

(f) Provision of consultation regarding appropriate procedures and products used for cleaning, disinfection, and sterilization;

(g) Provision of information on infection control for orientation and in-service education of employees, and nonemployees performing direct patient care;

(h) Development of recommendations, consistent with federal, state, and local laws and rules, on methods for the proper disposal to prevent unsafe or unsanitary conditions related to:

- (i) Sewage;
- (ii) Solid and liquid wastes; and
- (iii) Infectious wastes including safe management of sharps;

(i) Defining indications for specific precautions to prevent transmission of infections;

(j) Coordinating of or cooperating with the employee health activities relating to control of hospital exposure and transmission of infections to or from employees and others performing patient services;

(k) Designing and monitoring of the physical environment of the hospital for infectious disease control.

(4) Provision of the following in any hospital providing inpatient services for tuberculous patients:

(a) Designated patient rooms for patients with suspected or known infectious tuberculosis including:

(i) Ventilation to maintain a negative pressure condition in each patient room relative to adjacent spaces, except bath and toilet areas with:

(A) Air movement or exhaust from the patient room to the out-of-doors;

(B) Ventilation at the rate of six air changes per hour, exhaust; and

(C) Make-up or supply air from adjacent ventilated spaces permitted only when a minimum of two air changes is tempered with outside air;

(ii) Ultraviolet generator irradiation as follows:

(A) Use of ultraviolet fluorescent fixtures with lamps emitting wave length of 253.7 nanometers to irradiate ceiling and upper space of patient room;

(B) The average reflected irradiance approximately 0.2 microwatts per square centimeter in the room at the five foot level;

(C) Fixture installation conforming to the recommendations of the Illuminating Engineering Society Handbook, 5th edition, section 25, "Ultraviolet Energy";

(D) Lamps changed as recommended by the manufacturer;

(b) Transfer of discharge information to the health department of the patient's county of residence;

(c) Mantoux tuberculin skin testing of employees in contact with infectious tuberculosis cases within one year of contact if regularly working in areas described under subsection (4)(a)(i) and (ii) of this section.

(d) Tuberculin skin testing employees as required by the local health officer or the department for contact investigations. Positive skin tests for contact investigations are 5 mm induration read at forty-eight to seventy-two hours.

(5) Implementation of a human immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS) education plan including:

(a) Verifying or arranging for appropriate education and training of personnel on the prevention, transmission, and treatment of HIV and AIDS consistent with RCW 70.24.310; and

(b) Use of infection control standards and educational material consistent with the department-approved curriculum manual KNOW - HIV/AIDS, Prevention Education for Health Care Facility Employees, January 1991, published by the office on HIV/AIDS.

[Statutory Authority: RCW 70.41.030, 92-02-018 (Order 224), § 246-318-035, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-318-035, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030, 90-24-044 (Order 115), § 248-18-035, filed 11/30/90, effective 12/31/90. Statutory Authority: RCW 70.41.030 and 43.20.050, 89-21-039 (Order 4), § 248-18-035, filed 10/12/89, effective 11/12/89; Order 119, § 248-18-035, filed 5/23/75; Order 107, § 248-18-035, filed 1/13/75.]

**WAC 246-318-040 Personnel.** (1) Hospitals shall employ sufficient qualified personnel to operate each department of the hospital with verification of required license, certification, or registration.

(2) Hospitals shall ensure that nonemployees providing direct patient care comply with hospital policies and procedures.

(3) Hospitals shall establish written job descriptions for each job classification, minimally including:

(a) Job title, reporting relationships, summary of duties and responsibilities, and qualifications; and

(b) Provisions for review every two years with revision when necessary.

(4) Hospitals shall:

(a) Ensure a periodic performance appraisal of employees and volunteers related to:

(i) Satisfactory performance of assigned tasks; and

(ii) Competence in delivering health care services;

(b) Document background checks required under RCW 43.43.830 through 43.43.842 for all prospective employees and volunteers who may have regularly scheduled unsupervised access to:

(i) Children under sixteen years of age;

(ii) Groups of children under certain circumstances;

- (iii) The elderly;
- (iv) The developmentally disabled;
- (v) Individuals declared mentally incompetent or unable to participate in consent to care given; and
- (vi) Others as required under chapter 43.43 RCW;
- (c) Designate an employee responsible for volunteer services and activities;
- (d) Plan and implement orientation and education programs minimally to include:
  - (i) New employee and volunteer orientation for:
    - (A) Organizational structure;
    - (B) Building layout;
    - (C) Infection control;
    - (D) Safety, including the fire and disaster plan;
    - (E) Policies and procedures; and
    - (F) Equipment pertinent to the job;
  - (ii) Employee continuing education for maintaining and improving skills;
  - (iii) Documentation of orientation, in-service, and continuing education for employees; and
  - (iv) HIV/AIDS training for employees as specified under WAC 246-318-035;
  - (e) Establish a nursing service under the direction of a registered nurse to:
    - (i) Provide for adequate numbers of registered nurses on duty at all times; and
    - (ii) Require registered nurse supervision of employees and others performing nursing service functions;
    - (f) Ensure adequate supervision of employees and nonemployees;
    - (g) Maintain a current employee call back list for disasters;
    - (h) Require each employee to have on employment a tuberculin skin test by the Mantoux method within thirty days of employment and as follows:
      - (i) For new employees, a negative skin test is defined as less than ten millimeters of induration read at forty-eight to seventy-two hours. Employees with negative reactions to the first test and thirty-five years of age or older shall have a second test one to three weeks after the first test;
      - (ii) New employees with positive reactions to either test shall have a chest x-ray within thirty days. Hospitals shall:
        - (A) Retain records of test results, reports of x-ray findings, exceptions, or exemptions in the facility; and
        - (B) Provide a copy of test results to the employee;
      - (iii) Exclude from skin testing:
        - (A) New employees documenting a positive Mantoux test in the past;
        - (B) New employees providing documentation of meeting requirements under subsection (4)(h)(i) and (ii) of this section within the six months preceding the date of employment; and
        - (C) An employee with a written waiver from the department after stating the tuberculin skin test by the Mantoux method presents a hazard to his or her health and presenting supportive medical data to the department tuberculosis control program;
    - (i) Document the following when individuals request tuberculosis skin test waivers from the department:

- (i) Department notification of the individual requesting a waiver from tuberculosis skin testing and department decision; and
- (ii) Department advice to the individual employee and the hospital regarding department screening requirements if a waiver is granted.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-040, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-040, filed 12/27/90, effective 1/31/91. #### **WAC 246-318-180 Dietary and/or food service.**

Each hospital shall have an organized dietary and/or food service.

(1) There shall be a designated individual responsible for management of dietary and/or food service. Personnel from dietary and/or food service shall be present in the hospital during all patient meal times.

(2) The dietary and/or food service shall incorporate the ongoing and regularly scheduled input of a dietitian. A dietitian shall be responsible for developing policies and procedures for adequate nutritional and dietary consultation services for patients and food service. Patient consultation shall be documented in the medical record.

(3) At least three scheduled meals a day shall be served at regular intervals with not more than fifteen hours between the evening meal and breakfast. Snacks of nourishing quality shall be available at all times.

(4) Meals and nourishments shall provide a variety of food of sufficient quantity and quality to meet the nutritional needs of each patient. Unless contraindicated, *Recommended Dietary Allowances*, Ninth edition, 1980, the Food and Nutrition Board of the National Research Council, adjusted for activity, shall be used.

(5) Written menus shall be planned in advance and approved by a dietitian. Substitutes shall be of similar nutritional value, as approved by a dietitian. A record of the planned menus, with substitutions as served, shall be retained for one month.

(6) There shall be written orders (by an authorized individual) for all patient diets. Diets shall be prepared and served as prescribed. A current diet manual, approved in writing by the dietitian and medical staff, shall be used for planning and preparing diets.

(7) Food service sanitation shall be in compliance with chapter 246-215 WAC Food service, except for WAC 246-215-149.

(8) There shall be current written policies and procedures to include safety, infection control, food acquisition, food storage, food preparation, management of food not provided or purchased by dietary/food service, serving of food, and scheduled cleaning of all food service equipment and work areas.

(9) There shall be current written policies and procedures, with documentation of orientation and inservice, of dietary and food service employees.

[Statutory Authority: RCW 70.41.030, 92-02-018 (Order 224), § 246-318-180, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-318-180, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030 and 43.20.050, 83-07-048 (Order 257), § 248-18-180, filed 3/18/83; Order 119, § 248-18-180, filed 5/23/75; § 248-18-180, filed 12/6/67; Regulation 18.180, effective 3/11/60.]

**WAC 246-318-210 Pediatric services.** (1) Hospitals admitting, treating, or diagnosing infants, children, and adolescents shall have readily available equipment and supplies of appropriate sizes including:

- (a) Intubation equipment;
- (b) Oxygen masks and ventilatory bags;
- (c) Blood pressure cuffs;
- (d) Stethoscope;
- (e) Defibrillator and paddles;
- (f) Emergency medications;
- (g) Intravenous equipment and supplies; and
- (h) Measuring devices for length, height, weight, and circumferences.

(2) Hospitals providing services for infants, children, and adolescents shall establish written policies and procedures specific to pediatric services, consistent with WAC 246-318-190 (2)(g), 246-318-200, and 246-318-435 and minimally including:

- (a) Admission criteria;
- (b) Conditions requiring transfer or transport;
- (c) Room assignment of infants and children considering requirements for observation and developmental age level needs;
- (d) Safety measures in terms of equipment, including but not limited to:
  - (i) Cribs, bassinets, and beds;
  - (ii) Restraint use;
  - (iii) Side rails;
  - (iv) Electrical outlet protection; and
  - (v) Toys.
- (e) Placement of infants, children, and adolescents with infection, suspected infection, or exposure to infection;
- (f) Nutritional guidelines for infants, children, and adolescents to include normal diets and diets for special nutritional needs;
- (g) Safe administration of pediatric doses of blood, blood products, medications, intravenous fluids, and admixtures including:
  - (i) Intake and output;
  - (ii) Precalculated dosages of emergency drugs immediately available or posted;
  - (iii) An established list of pediatric dosages approved by the hospital pharmacist and the physician responsible for medical policies in pediatric services;
  - (iv) List of agents requiring double checking prior to administration; and
  - (v) Hospital-approved method of double checking by appropriately licensed personnel or medical staff which include nurses, physicians, or pharmacists.

(3) Hospitals providing organized, distinct pediatric units or service areas shall provide and establish:

- (a) An accessible examination or treatment area;
  - (b) A sufficient area for diversional play activities;
  - (c) Criteria and procedures for use of established areas for isolation;
  - (d) Medical services directed by a physician member of medical staff having experience in treatment of infants, children, and adolescents whose functions and scope of responsibility are delineated by medical staff;
  - (e) Review of policies, procedures, protocols, and standing orders as necessary and at least every two years with revision as necessary;
  - (f) A registered nurse responsible for implementation of nursing policies and procedures;
  - (g) Adequate nursing staff for the pediatric unit or service area available to perform all the specialized nursing skills required.
- (4) Hospitals providing nurseries in pediatric services or elsewhere in the hospital shall meet requirements for intermediate care nursery or neonatal intensive care nursery under WAC 246-318-230.

[Statutory Authority: RCW 70.41.030, 92-02-018 (Order 224), § 246-318-210, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-318-210, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030, 89-22-106 (Order 010), § 248-18-216, filed 11/1/89, effective 12/2/89.]

**WAC 246-318-220 Obstetrical services.** (1) Hospitals providing obstetrical services shall provide:

- (a) Medical services directed by a physician member or members of the medical staff having experience in obstetrics and newborn care, whose functions and scope of responsibility are delineated by the medical staff;
  - (b) Adequate staff supervised by a registered nurse, prepared by education and experience in obstetrical and newborn care nursing;
  - (c) Capability for performing caesarean sections twenty-four hours per day.
- (2) Hospitals providing obstetrical services shall establish written policies and procedures to include:
- (a) Infection control principles under WAC 246-318-035 including:
    - (i) Room assignment and placement of obstetrical patients and newborns;
    - (ii) Visitors;
    - (iii) Special clothing requirements for staff and visitors;
    - (iv) Handwashing, posted as appropriate;
    - (v) Isolation;
    - (vi) Employee health; and
    - (vii) Handling and storage of breast milk and formula.
  - (b) Screening criteria to ascertain patients appropriate for each option of labor, delivery, postpartum, and newborn care;
  - (c) Provisions for transfer and transport of a woman or a newborn to obtain a more intensive level of medical and nursing care;
  - (d) Deliveries occurring outside the obstetrical service area or areas;

(e) Requirement for authentication of all orders, standing orders, and protocols with:

(i) Delineation of the circumstances when a particular protocol is used;

(ii) Provisions for notification of appropriate medical staff;

(iii) Description of minimum qualifications or training of persons required to execute a particular order or protocol;

(iv) Written approval of policies, standing orders, and protocols by appropriate representatives of the medical, nursing, and administrative staffs;

(v) Orders for drug or treatment administration including:

(A) A description of the treatment with the name of each drug or agent;

(B) The dosage and concentration of the drug or agent;

(C) The route or method of administration; and

(D) Where pertinent, the time interval, frequency, or duration of administration.

(f) Requirements for documenting orders and protocols in the patient's medical record;

(g) Provision for maintaining body heat of each newborn;

(h) Provision for intrapartum evaluation of fetal heart rate;

(i) Procedures and protocols for the management of obstetrical and newborn emergencies, including resuscitation;

(j) Review of policies, procedures, protocols, and standing orders as necessary and at least every two years with revisions if necessary; and

(k) Recordkeeping including, but not limited to:

(i) Specific notes describing the status of mother, fetus, and newborn during labor, birth, and postpartum;

(ii) Completion of birth and death certificates as necessary;

(iii) Hospital staff's verification of initial and discharge identification of the newborn;

(iv) Documentation that the newborn screening test was obtained and forwarded, as required under RCW 70.83.020 and chapter 246-650 WAC, now or as hereafter amended;

(v) Documentation of newborn eye treatment, required under WAC 246-100-206, now or as hereafter amended; and

(vi) Medical records register or registers and index or indexes described under WAC 246-318-440.

(3) A hospital providing obstetrical services shall:

(a) Designate and maintain facilities and equipment for care of woman, fetus, and newborn either in:

(i) Labor rooms with birth occurring in a delivery room; or

(ii) Birthing rooms including labor, delivery, recovery and labor, delivery, recovery, post partum services; or

(iii) A combination of labor, delivery, and birthing rooms; or

(iv) Rooming-in, if provided.

(b) Locate any hospital room designated by the hospital as a labor room within the obstetrical service area;

(c) Utilize rooms designated by the hospital as labor rooms:

(i) For short-term patient occupancy of twenty-four hours or less; or

(ii) For patients in labor only unless the room meets the requirements for a patient room described under WAC 246-318-190.

(d) Maintain accommodations and environment in obstetrical delivery rooms, if present, including:

(i) Lighting and equipment for care of woman, fetus, and newborn during delivery including requirements described under WAC 246-318-290(2);

(ii) A minimum area of two hundred and seventy square feet with a minimum linear dimension of fifteen feet; and

(iii) A minimum room temperature of at least sixty-eight degrees Fahrenheit with a reliable method for monitoring temperature.

(e) Maintain systems for scrub up, clean up, sterilization, storage, housekeeping, and staff change room facilities; and

(f) Meet requirements described under WAC 246-318-300 and 246-318-310 for anesthesia and post-anesthesia recovery.

(4) Hospitals providing birthing or delivery services shall provide sufficient and appropriate area in rooms to accommodate not only patients, staff, and designated attendants, but also furnishings and equipment for the care of the woman, fetus, and newborn including:

(a) Adequate and appropriate equipment and supplies as follows:

(i) A bed or equivalent suitable for labor, birth, and post partum;

(ii) Oxygen with individual flow meters and mechanical suction for woman and newborn;

(iii) Newborn resuscitation bag, masks, endotracheal tubes, laryngoscopes, oral airways, and mechanical suction in the room for each birth;

(iv) Emergency equipment, medications, and supplies for care of newborn and woman required under WAC 246-318-290 (2)(b)(ii);

(v) Newborn beds available;

(vi) Radiant heat source available for the newborn;

(vii) General lighting source and provision for examination lights;

(viii) A clock with a sweep hand or equivalent second indicator visible from each patient's bedside;

(ix) Provision for receiving, covering, and transporting soiled linens and waste materials;

(x) Appropriate storage for necessary linens, instruments, supplies, medications, and equipment;

(xi) Work surfaces;

(xii) A signal device for use by staff and accessible to summon emergency back-up personnel when needed;

(xiii) Emergency power for lighting and operation of equipment;

(xiv) Easily cleanable floors, walls, cabinets, ceilings, and furnishings; and

(xv) Fetal monitoring equipment.

(b) Additional requirements if birthing rooms are provided including:

- (i) A lavatory located within each birthing room;
- (ii) A designated lavatory and water closet conveniently located for use of patient and support person or persons;
- (iii) A bathing facility convenient for patient use;
- (iv) Wardrobe unit or closets in the vicinity for the belongings of the patient and her support person or persons;
- (v) A signaling device accessible for each woman; and
- (vi) Room temperature of at least sixty-eight degrees Fahrenheit maintained with a reliable method for monitoring.

(5) Hospitals may use an operating room as a delivery room if the hospital has established policy and procedures about use of operating rooms including establishing priority over routine obstetrical procedures and nonemergent surgical procedures for:

- (a) Patients with parturition imminent;
- (b) Patients with obstetrical emergencies requiring immediate medical intervention to preserve life and health of woman and infant.

(6) Any hospital providing obstetrical services shall provide appropriate newborn care including, but not limited to:

- (a) Devices for measuring weight, length, and circumference;
- (b) Access to and availability of portable x-ray;
- (c) Provisions for stabilization, transfer, and transport of high-risk newborns and infants;
- (d) An established system to identify newborns prior to separation from mother;
- (e) Established policies and procedures minimally including:
  - (i) Ongoing clinical assessment of newborn or infant;
  - (ii) Provisions for direct supervision of each newborn by nursing staff and family in a nonpublic area, considering:
    - (A) Physical well being;
    - (B) Safety; and
    - (C) Security, including prevention from abduction.

(f) Access to oxygen, oxygen analyzers, warmed and humidified oxygen, resuscitation equipment, emergency equipment, measuring devices, mechanical suction, medical air and supplies specifically for infants and newborns.

(7) Hospitals with a newborn and infant nursery shall provide services, facilities, and equipment including:

- (a) Requirements in subsection (6) of this section;
- (b) Wall clock with sweep second hand or equivalent second indicator visible from each nursery room;
- (c) Oxygen source with provision for warming, humidifying, analyzing, and blending oxygen;
- (d) A nursery room or rooms with at least twenty square feet per bassinet and with sufficient room to move between bassinets;
- (e) Handwashing facilities located at the entrance to the nursery and in each nursery room;
- (f) Emergency call systems from the nursery to another nearby appropriately staffed area;
- (g) A system to maintain an environmental temperature of at least sixty-eight degrees Fahrenheit; and

(h) Appropriate emergency equipment, medications, and supplies for infant care and as required under WAC 246-318-290 (2)(b).

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-220, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-220, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 70.41 RCW. 90-12-014 (Order 061), § 248-18-221, filed 5/30/90, effective 6/30/90. Statutory Authority: RCW 70.41.030. 89-22-106 (Order 010), § 248-18-221, filed 11/1/89, effective 12/2/89.]

**WAC 246-318-230 Intermediate care nursery service—Neonatal intensive care nursery service.** (1) Hospitals providing intermediate care nursery services or neonatal intensive care nursery services or both shall meet requirements described under WAC 246-318-220 (6) and (7).

(2) Additional requirements for hospitals providing intermediate care nursery service include:

(a) Infant stations having adequate space within each station to accommodate equipment, supplies, and staff required for treatment of intermediate care infants;

(b) Provision for emergency power to support equipment requirements for each infant station;

(c) Oxygen, air, and suction capabilities including:

(i) One oxygen outlet in each infant station with other sources of oxygen available;

(ii) One medical air source available for each infant station;

(iii) Provision for blending, warming, humidifying, and monitoring oxygen mixtures; and

(iv) One electrical-mechanical or pneumatic suction in each infant station with other mechanical suctions available in the hospital.

(d) All equipment and supplies for infant resuscitation immediately available and present within the intermediate care nursery service area;

(e) One cardiorespiratory monitor in the intermediate care nursery area and others available;

(f) Sufficient micro-volumetric infusion pumps available;

(g) A waiting and instruction area available;

(h) A registered nurse responsible for neonatal nursing and implementation of policies;

(i) Provision of adequate nursing staff for the intermediate care nursery available to perform all the specialized nursing skills required;

(j) Laboratory, pharmacy, radiological, and respiratory care services appropriate for infants available at all times and in the hospital during assisted ventilation;

(k) Medical staff with experience in neonatal medicine available at all times during assisted ventilation;

(l) A physician with experience in neonatal medicine who is continuously available to come to the hospital as required;

(m) Medical services directed by a physician member or members of the medical staff having experience in neonatal intensive care whose functions and scope of responsibility are delineated by the medical staff;

(n) Requirements for authentication of all orders, standing orders, and protocols when used with:

(i) Delineation of the circumstances when a particular protocol is used;

(ii) Provision of notification of appropriate medical staff;

(iii) Description of minimum qualifications or training of persons required to execute a particular order or protocol;

(iv) Written approval of policies, standing orders, and protocols by appropriate members of the medical, nursing, and administrative staffs;

(v) Orders for drug or treatment administration including:

(A) A description of the treatment with the name of each drug or agent;

(B) The dosage and concentration of the drug or agent;

(C) The route or method of administration; and

(D) Where pertinent, the time interval, frequency, or duration of administration.

(vi) Review of policies, procedures, protocols, and standing orders at least every two years with revisions as necessary.

(o) A hospital-approved procedure for double checking certain drugs, biologicals, and agents by appropriately licensed personnel or medical staff including nurses, physicians, and pharmacists.

(3) Hospitals providing neonatal intensive care nursery service shall meet requirements described under WAC 246-318-220(6) and subsection (2) of this section, and additionally provide:

(a) At least fifty square feet within each infant station;

(b) Twelve electrical outlets, with at least eight clearly identified as being on emergency power, available in each infant station;

(c) Oxygen, air, and suction capabilities including:

(i) Two separate oxygen outlets in each infant station;

(ii) Two medical air outlets in each infant station;

(iii) One mechanism for blending oxygen and medical air for each infant station;

(iv) Sufficient numbers of oxygen analyzers available to continuously monitor oxygen;

(v) A means for warming, humidifying, and monitoring temperature of oxygen mixtures on a continuous basis; and

(vi) Two electrical-mechanical or pneumatic suction in each infant station with others available if needed.

(d) All equipment and supplies for infant resuscitation available and present within the neonatal intensive care nursery service area;

(e) Continuous ventilatory support equipment available at all times;

(f) Equipment for continuous monitoring of respirations and heart rate in each infant station;

(g) Equipment for continuous hemodynamic monitoring and status of oxygenation available;

(h) Equipment for continuous monitoring of body temperature available;

(i) Sufficient microvolumetric infant infusion pumps immediately available at all times in the neonatal intensive care nursery service area;

(j) Laboratory, radiology, and respiratory care and pharmacy services appropriate for neonates and infants available in the hospital at all times;

(k) Twenty-four-hour availability of an anesthesia services and a pharmacist to come to the hospital as required or requested available at all times;

(l) Provision of a registered nurse responsible for neonatal intensive care nursery services and implementation of policies;

(m) Provision of sufficient and adequate nursing staff in the neonatal intensive care nursery service to perform all specialized nursing skills required;

(n) Medical responsibility for intensive care nursery services by a neonatologist member of the medical staff;

(o) Twenty-four-hour availability of a neonatologist to come for in-house consultation as required or requested;

(p) A designated physician in the hospital available at all times to the neonatal intensive care nursery service with experience or skills including:

(i) Neonatal and infant resuscitation; and

(ii) Ventilator management including chest tube placement.

(q) Standing orders, protocols, patient discharge/transfer plans and evaluation of neonatal intensive care nursery services meeting requirements under subsection (2) of this section and WAC 246-318-220 (6)(c);

(r) Provision for referral or arranging for social work services as required; and

(s) Provision for patient access to other services as required.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-230, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-230, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030. 89-22-106 (Order 010), § 248-18-224, filed 11/1/89, effective 12/2/89.]

**WAC 246-318-250 Renal dialysis services.** Hospitals providing renal dialysis services shall:

(1) Reuse dialyzers only when the cleaning and sterilization procedure meets guidelines under Association for Advancement of Medical Instrumentation (AAMI), July 1986, "Recommended Practices for Re-use of Hemodialyzers";

(2) Provide adequate space for:

(a) Equipment and supplies necessary for the dialyzing patient;

(b) Preparation of materials necessary for dialysis; and

(c) Cleaning and disinfecting equipment;

(3) Provide water treatment, if necessary to ensure water quality, meeting recommendations under AAMI guidelines under subsection (1) of this section;

(4) Test water for bacterial contamination monthly and chemical purity as required under AAMI, July 1986;

(5) Test dialysis machine for bacterial contamination monthly or demonstrate a quality assurance program establishing effectiveness of disinfection methods and intervals;

(6) Take appropriate measures to prevent contamination, including backflow prevention under chapter 246-290 WAC, between:

- (a) Dialysis machines;
- (b) Dialysis machines and potable water supply; and
- (c) Dialysis machine, drain line, and sewer;

(7) Provide for the availability of any special dialyzing solutions required by a patient;

(8) Meet requirements under WAC 246-318-010 through 246-318-450.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-250, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-250, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030. 90-24-044 (Order 115), § 248-318-250, filed 11/30/90, effective 12/31/90.]

**WAC 246-318-260 Long-term care services.** (1) Hospitals providing inpatient long-term care services shall:

(a) Meet requirements under WAC 246-318-190;

(b) Require an assessment of each patient by a registered nurse upon admission to determine immediate care needs;

(c) Require documentation of the initial plan of care in the patient's medical record;

(d) Make the plan of care accessible to direct caregivers who have a need to know in order to provide actual health care services to the patient;

(e) Establish a plan of care individualized to the needs of each patient and:

(i) Developed by those disciplines involved in a patient's care;

(ii) Implemented in conjunction with a registered nurse responsible for total care of the patient for the duration of hospitalization in a long-term care service unit or area; and

(iii) Maintained in a confidential manner;

(f) Require a physician's order for use of any physical restraint restricting freedom of movement or position change, including the specific reason, type, and location of restraint, and:

(i) Establish and follow a policy on release of patients from physical restraints for specified intervals and monitoring of patients in restraints;

(ii) Require documentation in a patient's medical record of patient's restraint - release time intervals;

(iii) Document reason for use of any restraint on a patient in the patient care plan.

(2) Hospitals providing long-term care shall establish written policies and procedures specifying:

(a) Rights of patients including:

(i) Informing each patient of individual rights at the time of admission;

(ii) Documenting evidence of informing a legally delegated person about a patient's rights when a patient is unable to receive and understand the information;

(b) A mechanism to:

(i) Identify social and emotional needs of the patients;

(ii) Refer patients in need of social services to appropriate social agencies.

(3) Hospitals with inpatient long-term care services shall provide:

(a) An activities program designed to encourage each long-term care patient to maintain or attain normal activity and achieve an optimal level of independence;

(b) A community dining area;

(c) Handrails on both sides of all patient access corridors;

(d) Patient bathrooms and toilets arranged to accommodate wheelchair patients;

(e) A shower stall accommodating a shower chair on the same level and convenient to patient rooms.

(4) Hospitals providing long-term care services and permitting pets shall:

(a) Require and provide for humane care and maintenance of pets under conditions prohibiting animals, except for fish in an aquarium, in rooms or areas for:

(i) Food storage and preparation;

(ii) Group dining areas during the times food is served and consumed;

(iii) Cleaning and storage of cooking and eating utensils;

(iv) Linen storage or laundry;

(v) Drug or sterile supply storage; and

(vi) Patient bedrooms if the condition of a patient in the room contraindicates the presence of the animal;

(b) Permit seeing eye, hearing, and assistance dogs as needed;

(c) Provide reasonable opportunity for a patient to have regular contact with animals, if the patient desires;

(d) Consider preferences of the long-term care patients through a long-term care resident council, poll, or other means;

(e) Ensure the presence of animals does not compromise the rights, preferences, and medical requirements of individual patients;

(f) Permit animals such as dogs, cats, fish, gerbils, hamsters, guinea pigs, and birds;

(g) Require veterinarian certification of psittacine birds certified free of psittacosis or other diseases and meeting United States Department of Agriculture (USDA) quarantine procedures;

(h) Require regularly scheduled veterinarian examinations and appropriate immunizations for animals living on the premises, with records retained in the hospital;

(i) Keep animals living on the premises clean and free of external parasites such as fleas and ticks.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-260, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-260, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030. 90-24-044 (Order 115), § 248-318-260, filed 11/30/90, effective 12/31/90.]

**WAC 246-318-270 Alcoholism and/or substance abuse unit.** (1) Definitions specific to WAC 246-318-270 and 246-318-810:

(a) "Alcoholism" means an illness characterized by lack of control as to the consumption of alcoholic beverages, or the consumption of alcoholic beverages to the extent an individual's health is substantially impaired or

endangered, or his or her social or economic function is substantially disrupted.

(b) "Alcoholism counselor" means an individual with adequate education, experience, and knowledge regarding the nature and treatment of alcoholism, who is knowledgeable about community resources providing services alcoholics may need, and who knows and understands the principles and techniques of alcoholism counseling with minimal requirements to include:

(i) No history of alcohol or other drug misuse for a period of at least two years immediately prior to time of employment as an alcoholism counselor with no misuse of alcohol or other drugs while employed as an alcoholism counselor;

(ii) A high school diploma or equivalent;

(iii) Satisfactory completion of at least twelve quarter or eight semester credits from a college or university, including at least six quarter credits or four semester credits in specialized alcoholism courses exclusive of field experience credits.

(c) "Detoxification" means care or treatment of an intoxicated person during a period in which the individual recovers from the effects of intoxication.

(i) "Intoxication" means acute alcohol poisoning or temporary impairment of an individual's mental or physical functioning caused by alcohol in the body.

(ii) "Acute detoxification" means a method of withdrawing a patient from alcohol where nursing services are available and medications are routinely administered to facilitate the patient's withdrawal from alcohol.

(d) "Family" means individuals important to and designated by a patient who need not be relatives.

(e) "Individualized treatment plan" means a written statement of care to be provided for a patient based upon assessment of his or her strengths and physical and psychosocial problems. When appropriate, the statement shall be developed with participation of the patient.

(f) "Multidisciplinary treatment team" means a group comprised of individuals from the various treatment disciplines and clinical services who assess, plan, implement, and evaluate treatment for patients under care.

(2) Rules and regulations in this chapter shall apply with addition of the following:

(a) There shall be a room adequate for counseling and social activities of patients.

(b) Adequate provision for space and privacy shall be made for interviewing, group and individual counseling, and physical examinations.

(c) Policies and procedures shall include and address, as appropriate:

(i) Development, implementation, and review of the individualized treatment plan, including the participation of the multidisciplinary treatment team, the patient, and the family, as appropriate.

(ii) Patient rights to include:

(A) Treatment and care of patients in a manner promoting dignity and self-respect;

(B) Protection from invasion of privacy: *Provided*, That reasonable means may be used to detect or prevent contraband from being possessed or used on the premises;

(C) Confidential treatment of clinical and personal information in communications with individuals not associated with the plan of treatment;

(D) A means of implementing federal requirements related to confidentiality of records, Title 42, Code of Federal Regulations, Part 2, Federal Register, July 1, 1975;

(E) Provision of reasonable opportunity to practice religion of choice insofar as such religious practice does not infringe upon rights and treatment of others or the treatment program: *Provided*, That the patient also has the right to refuse participation in any religious practice.

(F) Communication with significant others in emergency situations.

(G) Freedom from physical abuse or other forms of abuse against patient's will, including being deprived of food, clothes, or other basic necessities.

(iii) Patient work assignments related to treatment program, if applicable.

(d) Personnel, staff, other services.

(i) Clinical responsibility for alcoholism and substance abuse units shall be assigned to an individual having demonstrated experience in this type of treatment and care. This individual shall be designated and function as specified by the governing body.

(ii) There shall be on staff at least one alcoholism counselor and such additional alcoholism counselors as necessary to provide alcoholism counseling services needed by patients.

(iii) There shall be a licensed nurse on duty on the unit whenever acute detoxification is taking place on the unit.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-270, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-270, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030 and 43.20.050. 84-22-003 (Order 277), § 248-18-235, filed 10/26/84.]

#### WAC 246-318-280 Psychiatric units and services.

##### (1) Definitions.

In addition to definitions in WAC 246-318-010, the following words and phrases are defined for the purpose of this section and WAC 246-318-820 unless the context clearly indicates otherwise.

(a) "Acutely mentally ill" means a condition limited to a short-term severe crisis episode of:

(i) A mental disorder, meaning any organic, mental, or emotional condition having substantial adverse effects on an individual's cognitive or volitional functions;

(ii) Suicidal or self-destructive behavior;

(iii) Actual or threatened behavior harmful to others;

(iv) Behavior which caused substantial damage to property; or

(v) Being gravely disabled, meaning a condition in which a person, as a result of a mental disorder:

(A) Is in danger of serious physical harm resulting from a failure to provide for his or her essential human needs of health and safety; or

(B) Manifests severe deterioration in routine functioning evidenced by repeated and escalating loss of cognitive or volitional control over his or her actions and is

not receiving care essential for his or her health or safety.

(b) "Child" or "children" means children and adolescents seventeen years of age or younger.

(c) "Child psychiatrist" means a physician, board-certified or board-eligible in child psychiatry under:

(i) The directory of residency training programs accredited by the accreditation council for graduate medical education, American Medical Association, 1981-82; or

(ii) *The American Osteopathic Association Yearbook and Directory*, American Osteopathic Board of Neurology and Psychiatry, 1981-82.

(d) "Child mental health specialist" means a mental health professional with:

(i) A minimum of one hundred actual, rather than semester, hours of specialized training devoted to a study of child development and the treatment of children; and

(ii) The equivalent of one year full-time experience in the treatment of children under supervision of a child mental health specialist.

(e) "Consultation" means review and recommendations regarding patient care and treatment programs.

(f) "Family" means individuals important to and designated by a patient, who need not be relatives.

(g) "Individualized treatment plan" means a written statement of care planned for a patient based upon assessment of the patient's developmental, biological, psychological, and social strengths and problems, and including:

(i) Treatment goals, with time frames stipulated;

(ii) Specific services utilized;

(iii) Designation of individual responsible for specific service provided;

(iv) Discharge criteria with estimated timeframes; and

(v) Participation of the patient and the patient's designee as appropriate.

(h) "Least restrictive alternative" means the setting, environment, or service in which the individual functions at maximum independence.

(i) "Mental health professional" or "MHP" means:

(i) A psychiatrist;

(ii) A psychiatric nurse, social worker, physician, or psychologist; or

(iii) A person with at least a masters degree in behavioral sciences, nursing science, or related field from an accredited college or university and two years experience in direct treatment of mentally ill individuals under the supervision of a mental health professional.

(j) "Multidisciplinary treatment team" means a group comprised of individuals from various disciplines and clinical services who assess, plan, implement, and evaluate treatment for patients.

(k) "Psychiatric nurse" means a registered nurse with:

(i) A bachelors degree from an accredited college or university and at least two years experience in direct treatment of mentally ill or emotionally disturbed persons with such experience gained under supervision of a psychiatrist or psychiatric nurse; or

(ii) Three years experience in the direct treatment of mentally ill or emotionally disturbed persons with such

experience gained under the supervision of a psychiatrist or psychiatric nurse.

(l) "Psychiatric service" means admission of patients with primary psychiatric diagnoses for treatment pertinent to the psychiatric diagnosis in any available bed in the hospital whether or not the hospital maintains a psychiatric unit.

(m) "Psychiatric unit" means a nursing unit specifically reserved for the care of individuals with primary psychiatric diagnoses.

(n) "Recreational therapist" means an individual:

(i) With a bachelors degree including a major or option in therapeutic recreation or recreation for the ill and handicapped; and

(ii) Preferably certified or certification-eligible under Certification Standards for Therapeutic Recreation Personnel, June 1, 1988, National Council for Therapeutic Recreation Certification, 49 South Main Street, Suite 005, Spring Valley, New York 10977.

(2) Hospitals with psychiatric units shall provide a therapeutic environment to maintain safe, secure, adequate care of acutely mentally ill persons including:

(a) Access to at least one seclusion room;

(b) Provisions for close observation of patients including provision of security windows or maximum security windows and relites appropriate to the area and program;

(c) Adequate space suitably equipped including:

(i) A day room on the unit;

(ii) Dining and therapeutic program activities either on the unit or elsewhere in the hospital appropriate to meet each patient's needs;

(iii) Space for physical and recreational activities of patients on the hospital premises; and

(iv) One area permitted to accommodate functions in (c)(i), (ii), and (iii) of this subsection if scheduled appropriately.

(d) An examination or treatment room available within the hospital;

(e) Space and privacy for interviewing, group and individual counseling, and patient and family visiting; and

(f) Separate patient sleeping rooms for children and adults.

(3) Hospitals providing a psychiatric unit shall:

(a) Provide adequate staff to implement individualized treatment plans;

(b) Assign and designate responsibility for the psychiatric unit programming to a mental health professional;

(c) Designate a psychiatrist with medical staff privileges, available for ongoing psychiatric unit consultation;

(d) Have a physician and mental health professional available for consultation and communication with each patient and the unit staff on a twenty-four hour per day, seven day a week basis;

(e) Employ a full-time psychiatric nurse responsible for nursing care;

(f) Designate staff or contract with persons or agencies responsible for:

(i) Provision of social work services with consultations by a social worker experienced in working with mentally ill patients;

(ii) Provision of occupational therapy services with the ongoing input of an occupational therapist experienced in working with mentally ill patients;

(iii) Provision of recreational therapy services with the ongoing input of a recreational therapist experienced in working with mentally ill patients; and

(iv) Providing access to psychological evaluation by or under direction of a psychologist.

(g) Provide documented staff training relating to the needs of psychiatric patients for all psychiatric unit personnel including:

(i) The utilization of least restrictive alternatives;

(ii) Methods of patient care;

(iii) Managing assaultive and self-destructive behavior;

(iv) Patient rights under chapters 71.05 and 71.34 RCW;

(v) The special needs of children, minorities, the elderly, and handicapped when appropriate.

(h) For hospitals providing a child or adolescent psychiatric unit:

(i) Assign and designate responsibility for the child and adolescent psychiatric unit programming to a child mental health specialist;

(ii) Designate a child psychiatrist with medical staff privileges available for ongoing input and consultation to the child and adolescent psychiatric unit;

(iii) Have a physician and child mental health specialist available for consultation and communication with each patient and unit staff on a twenty-four hour per day, seven days per week basis;

(iv) Employ a full-time psychiatric nurse meeting requirements of a child mental health specialist under subsection (1)(d) of this section responsible for nursing care;

(v) Designate staff or contract with persons or agencies responsible for:

(A) Provision of social work services with consultation and ongoing input by a social worker experienced in working with mentally ill children and adolescents;

(B) Provision of occupational and recreational therapy services as required under (f)(ii) and (iii) of this subsection;

(C) Provision of access to psychological evaluation as required under (f)(iv) of this subsection;

(D) Provision of documented staff training as required under (g) (i) through (v) of this subsection; and

(E) Provision of educational services.

(4) Hospitals providing psychiatric units shall establish and implement written policies and procedures including:

(a) Provision or arrangement for the care and treatment of acutely mentally ill patients;

(b) Informing patients of their rights as required under chapters 71.05 and 71.34 RCW;

(c) Posting of patient rights in prominent locations;

(d) Development of an initial individualized treatment plan for each patient within twenty-four hours of admission;

(e) Continued development of the individualized treatment plan within seventy-two hours of admission,

excluding holidays, by a multidisciplinary treatment team, the patient, family, and other agencies as appropriate;

(f) Provision of or arrangement for appropriate services including:

(i) Psychological evaluation and services;

(ii) Social work services;

(iii) Occupational therapy services;

(iv) Recreational therapy services; and

(v) Other specialized services as appropriate;

(g) Completion of a physical examination and history by a member of the medical staff and an evaluation by a mental health professional within twenty-four hours of admission with consultation of a psychiatrist as indicated;

(h) Admission, retention and transfer criteria, based upon health and safety needs of patients, including a referral and transfer mechanism for persons in need of care and not meeting the admission criteria;

(i) Continuity of care, coordination and integration of services, including discharge planning consistent with WAC 246-318-450;

(j) Prohibiting use of patients to perform basic maintenance of the hospital and equipment, housekeeping, or food service except when tasks are:

(i) Included in and appropriate to the individualized treatment plan; and

(ii) Performed under direct supervision.

(k) Appropriate response to assaultive, self-destructive, or out-of-control behavior including the use of seclusion and restraints and subject to the following conditions:

(i) Use of seclusion and restraints only to the extent and duration necessary to ensure the safety of patients, staff, and property;

(ii) Infliction of physical pain for punitive purposes is prohibited, regardless of whether or not objective damage occurs;

(iii) All assaultive incidents documented in the medical record;

(iv) Staff observation of any patients in restraint or seclusion at least every fifteen minutes with:

(A) Interventions as indicated and required; and

(B) Observations and interventions recorded in the medical record;

(v) Notification of and authorization by a physician within one hour for emergency use of patient restraint or seclusion and including:

(A) Physician examination of the patient and renewal of physician order for every twenty-four continuous hours of restraint and seclusion; and

(B) Patient evaluation by a mental health professional or registered nurse when secluded or restrained more than two continuous hours with repeat evaluation at least one time every eight hours thereafter.

(l) Notification of the family and other agencies as appropriate as soon as possible, in event of:

(i) Serious injury or physical illness of the patient;

(ii) Death of the patient; or

(iii) Disappearance of the patient.

(m) For hospitals providing child or adolescent psychiatric units:

(i) Requirements under (a) through (l) of this subsection except:

(A) Substitute for (g) of this subsection – completion of a physical examination and history by a member of the medical staff and an evaluation by a child mental health specialist within twenty-four hours of admission with consultation by a child psychiatrist as indicated; and

(B) In (k)(v)(B) of this subsection, require patient evaluation by a child mental health specialist every two hours when a child is secluded or restrained.

(ii) Evaluation by a child mental health specialist within twenty-four hours of admission including consultation with a child psychiatrist as indicated;

(iii) Requirement for designated staff to make and document a determination of the hospital's ability to safely care for each child; and

(iv) Coordination with appropriate educational agencies, as appropriate.

(5) Hospitals with psychiatric units or psychiatric services shall maintain a medical records system required under WAC 246-318-440 and require diagnoses, abbreviations, and terminology consistent with the "American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders," III R edition, 1987, and "International Classification of Diseases," 9th edition, 1989.

(6) Hospitals with psychiatric units or services shall establish and implement policies and procedures to protect patient confidentiality and release of records and information consistent with requirements under chapters 71.05 and 71.34 RCW.

(7) Hospitals providing any inpatient psychiatric service shall establish and implement written policies and procedures including:

(a) Provision of a therapeutic environment to maintain safe, secure, adequate care of acutely mentally ill patients;

(b) Provision of facilities appropriate to the scope of the psychiatric service;

(c) Designation of responsibility for psychiatric services programming to a mental health professional;

(d) Provision for close observation of patients with a security room available;

(e) Designation of a psychiatrist with medical staff privileges available for consultation;

(f) A physician and mental health professional available on staff or by contract for consultation and communication with the patient and the hospital staff on a twenty-four hour per day, seven day a week basis;

(g) Designation of a staff person responsible for developing a plan for arranging needed special services as identified in the individualized treatment plan for each patient;

(h) Employment of a registered nurse with experience and/or specialized education in psychiatric nursing responsible for nursing care twenty-four hours a day;

(i) Designation of a staff person responsible for arranging for social work services;

(j) Provision for transfer to a hospital with a psychiatric unit or appropriate psychiatric services within twenty-four hours when the hospital is unable to establish and implement procedures required under (a) through (i) of this subsection.

(k) Designating staff responsible for documented training relating to the needs of psychiatric patients for all personnel responsible for care of psychiatric patients including:

(i) The availability and utilization of the least restrictive alternatives;

(ii) Methods of patient care;

(iii) Managing assaultive and self-destructive behavior;

(iv) The special needs of children, minorities, the elderly, and handicapped as appropriate;

(v) Patient rights under chapters 71.05 and 71.34 RCW.

(l) Implementation of requirements in subsection (4) of this section except requirement for recreational or occupational therapy services under subsection (4)(f)(iii) and (iv) of this section;

(m) For hospitals providing any child or adolescent psychiatric services, with or without a psychiatric unit:

(i) All requirements under (a) through (l) of this subsection apply;

(ii) Establish and implement policy and procedures for age and behavior specific criteria in determining appropriate room assignment.

[Statutory Authority: RCW 70.41.030, 92-02-018 (Order 224), § 246-318-280, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-318-280, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030, 90-23-012 (Order 113), § 248-18-240, filed 11/13/90, effective 12/14/90. Statutory Authority: RCW 70.41.030 and 43.20.050, 83-19-058 (Order 269), § 248-18-240, filed 9/20/83. Statutory Authority: RCW 43.20.050 and chapter 70.41 RCW, 81-22-014 (Order 216), § 248-18-240, filed 10/23/81; Order 119, § 248-18-240, filed 5/23/75; Regulation 18.240, effective 3/11/60.]

**WAC 246-318-290 Surgery—Operating rooms and areas—Special procedure rooms—Surgical treatment or diagnostic areas.** (1) Operating rooms, facilities, personnel, equipment, policies and procedures shall be appropriate to the scope of surgical services offered in each hospital.

(2) Environment – facilities – equipment.

(a) Operating room facilities and services, when provided, shall be located in a segregated area or areas of the hospital with access limited by hospital policy and procedures.

(b) Operating rooms and operating room service areas and facilities shall be properly equipped, easily cleanable, and of adequate size to accommodate the equipment and personnel required for surgical procedures performed.

(i) Each operating room shall have available:

(A) Operating light and adequate general lighting;

(B) Operating table, stretcher, or equivalent;

(C) Oxygen;

(D) Suction;

(E) Appropriate electrical outlets;

(F) X-ray film illuminator;

- (G) Cardiac monitor;
  - (H) Anesthesia equipment and supplies;
  - (I) Emergency signaling device which automatically registers at a location from or through which additional assistance is always available;
  - (J) Source of emergency power; and
  - (K) Emergency lighting.
- (ii) Each hospital shall provide appropriately maintained emergency equipment, supplies, and services available within sixty seconds and appropriate for the care of adults, children, and infants minimally to include:
- (A) Ventilatory equipment, including airways;
  - (B) Cardiac defibrillator;
  - (C) Cardiac monitor;
  - (D) Laryngoscopes and endotracheal tubes;
  - (E) Suctions; and
  - (F) Emergency drugs and fluids including schedules of pediatric dosages.
- (c) There shall be adequate operating room scrub sinks with provisions for a cleansing agent located adjacent to operating rooms and providing hot and cold water and equipped with knee, foot, elbow, or automatic faucet controls.
- (d) Separate and adequate refrigerated storage facilities with appropriate alarms shall be provided for blood if blood is stored in the operating room area.
- (e) There shall be a dressing area with appropriate locker storage available for persons entering operating rooms.
- (f) Toilet facilities shall be available.
- (g) Adequate types and quantities of surgical instruments, equipment, and supplies for procedures performed shall be provided and maintained in a sanitary and safe condition.
- (h) There shall be adequate storage within the operating room service area for clean and sterile supplies and equipment.
- (i) A designated area shall be provided for collection and cleaning of soiled instruments and equipment.
- (j) There shall be adequate, cleanable facilities for safe and appropriate waste collection and disposal.
- (k) Housekeeping facilities shall be located within operating room service areas. These may be included in a soiled utility room equipped with a clinic service sink or service sink.
- (l) There shall be filtered clean air in each operating room. A positive pressure ventilation gradient to adjoining corridors shall be maintained in operating rooms.
- (m) Operating rooms shall be equipped with a room temperature control device or system capable of maintaining appropriate patient body temperature.
- (3) Policies – procedures – responsibility.
- (a) The organization plan of the hospital shall identify lines of authority, responsibility, and accountability within all operating room areas and areas where surgical procedures are performed or anesthesia administered.
- (i) There shall be a physician designated and responsible for implementation of hospital policy related to medical staff in operating rooms and operating room service areas.

(ii) A designated registered nurse shall supervise personnel as specified in hospital policy in operating rooms and operating room service areas and shall be responsible for:

(A) Development and implementation of operating room and operating room service staffing plans to maintain adequate and safe patient care.

(B) Provision for orientation and ongoing training of personnel providing services within operating rooms and operating room service areas.

(C) Defining nursing responsibility between the time of patient entry into and exit from operating rooms and operating room service areas.

(b) Written policies and procedures shall be approved in writing by appropriate representatives of administration, medical staff, and nursing services.

(i) Information, policies and procedures available to nursing and scheduling staff shall include:

(A) A current roster of medical staff including delineated surgical privileges as granted by the governing body.

(B) Policies and delineated privileges, responsibilities, and accountability of others approved by medical staff and governing body to provide services in operating rooms including, but not limited to, dentists, oral surgeons, and podiatrists.

(C) Requirements for surgical and technical-professional assistants, including current licensure and/or other qualifications and any limitations related to patient care activities within the operating room or operating room service areas including, but not limited to, surgical technicians, other technicians, nurses, or technicians who are not hospital personnel or students.

(ii) There shall be a policy and procedures for obtaining surgical assistants.

(iii) There shall be policies and procedures specifying responsibility to document all aspects of patient care in operating rooms and operating room service areas.

(iv) Written infection control policies approved by the infection control or equivalent interdisciplinary group shall delineate responsibility in training and orientation of operating room and operating room service area personnel and others. Infection control policies and procedures shall specifically address:

(A) Surgical attire;

(B) Appropriate surgical scrub procedures;

(C) Housekeeping functions specific to operating room and operating room service areas before, between, and after cases;

(D) Cleaning, disinfecting, sanitizing, packaging, sterilizing, and storage of equipment and supplies;

(E) Disposal of wastes;

(F) Nonhospital and hospital-owned equipment that may be brought into the operating room or operating room service areas including requirements for cleaning and sterilization including, but not limited to, tools for repairing equipment and physician-owned instruments.

(G) People who may enter operating room areas including those who are not hospital personnel, such as repairmen and vendors.

(v) Written policies and procedures related to patient safety or protection shall address servicing, maintenance, and safety checks of electrical-electronic equipment and other patient care equipment including nonhospital-owned equipment.

(vi) Policies and procedures shall address and define responsibility for continuous patient care and documentation when a patient is transferred from one place to another in the course of performing a surgical or invasive procedure.

(4) Preoperative patient care shall be addressed in written hospital policies which shall define requirements for patient care during the preoperative period to include:

(a) A current patient history and report of physical examination by a practitioner, authorized by medical staff rule, included in the patient medical record prior to surgery. "Current," as used in this subsection, shall be defined by hospital policy.

(b) Documented assessment of patient needs for care including, but not limited to, allergies, fears, anxieties, changes in condition, vital signs.

(c) Written consent for procedure or surgery and anesthesia available in the medical record.

(d) Identification of patients by a secured name band.

(e) Test results available prior to surgery or procedure.

(5) Short stay or short term or ambulatory or one-day surgery services or special procedures, regardless of where performed, shall function according to written policies and procedures approved by representatives of hospital administration, medical staff, and nursing services and include:

(a) Patient identification system, patient consent, and preoperative patient assessment requirements.

(b) Provisions for appropriate monitoring or observation of patients undergoing procedures by at least one qualified person in addition to the medical staff authorized practitioner performing the procedure.

(c) Written approved infection control and equipment safety policies as specified in subsection (3)(b) of this section.

(d) Emergency equipment as required for all operating rooms, available within sixty seconds as specified in subsection (2)(b)(ii) of this section.

(e) Documentation of patient assessment prior to, during, and post procedure.

(f) Teaching protocols for post procedure period including what signs and symptoms the patient should report, who to contact, limitations on activities or diet, medication control, driving, operation of mechanical equipment, and instructions for follow-up.

(g) Patient evaluation prior to discharge.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-290, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-290, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030. 85-23-017 (Order 2302), § 248-18-251, filed 11/13/85.]

**WAC 246-318-300 Anesthesia services.** (1) Anesthesia facilities, equipment, personnel, staff, policies and

procedures shall be appropriate to the scope of surgical, obstetrical, or other care offered in each hospital.

(2) There shall be a designated physician member of medical staff responsible for anesthesia services and for establishing general policies for administration of anesthesia to patients throughout the hospital.

(3) Written policies and procedures shall be established to provide safety for all anesthetized patients to include:

(a) Provision for appropriate monitoring and attendance of all anesthetized patients.

(b) Qualifications and responsibilities of persons performing anesthesia services and care in compliance with applicable federal and state laws and rules.

(c) Evaluation of each patient prior to anesthesia.

(d) Pertinent information recorded in the medical record at the time of the preoperative anesthesia evaluation.

(e) Criteria or protocols for assessment of all patients by qualified persons prior to discharge from any post-anesthesia recovery area or the hospital.

(f) Precautions or procedures for safe administration of anesthetizing agents and other drugs consistent with hospital policy approved by the appropriate medical staff committee in accordance with WAC 246-318-190 (1)(n) and (2)(f).

(g) Preparation, administration, and documentation of intravenous solutions, medications, and admixtures consistent with WAC 246-318-430 and 246-318-435.

(4) All information specific to condition and treatment of the patient occurring during anesthesia induction, anesthesia maintenance, or emergence from anesthesia shall be documented and retained in the medical record of the patient.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-300, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-300, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030. 85-23-017 (Order 2302), § 248-18-253, filed 11/13/85.]

**WAC 246-318-310 Post-anesthesia recovery areas.**

(1) Post-anesthesia facilities, equipment, personnel, staff, policies and procedures shall be appropriate to the scope of surgical, obstetrical, or other care offered in each hospital.

(2) Environment - facilities.

(a) A handwashing sink, soap dispenser, and towel dispenser shall be available within each post-anesthesia recovery room or area.

(b) There shall be provisions for visual privacy for patients.

(c) Suction and oxygen shall be available for each patient.

(d) Emergency equipment and supplies shall be appropriately maintained and available within sixty seconds, as specified in WAC 246-318-290 (2)(b)(ii).

(e) Adequate, easily cleanable storage facilities shall be provided.

(f) There shall be a soiled utility room available.

(g) An emergency signalling device registering at a location from or through which additional assistance is

always available shall be available within recovery rooms or areas.

(3) Policies – procedures – responsibility.

(a) The organization plan of the hospital shall identify lines of authority, responsibility, and accountability within post-anesthesia recovery rooms or areas.

(i) There shall be a physician designated and responsible for implementation of hospital policy related to medical staff in post-anesthesia recovery rooms and areas. Policy shall specify amount and degree of physician availability to post-anesthesia recovery areas at all times when patients are present.

(ii) A designated registered nurse shall supervise personnel as specified in hospital policy in post-anesthesia recovery rooms and areas and shall be responsible for:

(A) Developing and implementing post-anesthesia recovery service staffing plans to maintain adequate and safe patient care, and

(B) Providing for orientation and ongoing training of personnel providing services within post-anesthesia recovery rooms or areas.

(b) There shall be criteria or protocols for assessment of all patients by qualified persons prior to discharge or release from any post-anesthesia recovery room or area.

(c) There shall be policies and procedures regarding management of infected or infectious cases, approved by the infection control committee.

(4) Nursing and other staff providing patient care in post-anesthesia recovery areas shall have documented orientation and demonstrated appropriate skills related to life support activities or functions.

(5) There shall be written orders authenticated by a physician for all drugs, intravenous solutions, blood, and medical treatments. Standing medical orders or protocols, when used, shall be in the patient medical record and authenticated by a physician.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-310, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-310, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030. 85-23-017 (Order 2302), § 248-18-256, filed 11/13/85.]

**WAC 246-318-320 Processing and sterilizing services.** (1) Hospitals shall make adequate provisions for proper cleaning, disinfection, and sterilization of supplies, equipment, utensils, and solutions.

(2) Processing and sterilizing services and areas shall have adequate space and equipment for sorting, processing, and storage.

(a) Separation between soiled and clean items shall be maintained during sorting, processing, transporting, and storage.

(b) Positive air pressure shall be maintained in clean areas in relation to adjacent areas.

(c) Negative air flow shall be maintained in soiled areas.

(d) Equipment including sterilizers of the proper type for adequate sterilization shall be provided and maintained in a satisfactory and safe condition.

(e) If ethylene oxide sterilizers are used, mechanical aerators shall be provided and maintained in a safe and satisfactory condition.

(3) Processing and sterilizing services shall be adequately staffed with trained personnel:

(a) Orientation and inservice, including infection control and safe practices, shall be provided.

(b) Written policies and procedures shall specify scheduled activities and routines of personnel.

(4) There shall be written policies and procedures, approved by the infection control committee or an equivalent interdisciplinary group, for the activities performed in all processing and sterilizing areas in the hospital addressing:

(a) Collecting, receiving, decontaminating, packaging, sterilizing, and distributing of items;

(b) Aerating of items exposed to ethylene oxide;

(c) A recognized method of checking sterilizer performance by mechanical monitoring of time, temperature, and pressure as well as biological and chemical testing;

(d) Establishment of shelf life determined by packaging material and storage environment;

(e) Recall, disposal, and reprocessing of outdated, improperly sterilized, and limited-use items;

(f) Maintaining clean areas free of external shipping containers.

(5) There shall be written policies and procedures addressing emergency collection and disposition of supplies when special warnings have been issued by a manufacturer or safety agency.

(6) Processed and sterilized items shall be maintained as specified in WAC 246-318-190 (3)(a), (b), (c), (d), and (e).

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-320, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-320, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030 and 43.20.050. 85-05-034 (Order 281), § 248-18-260, filed 2/15/85; Order 119, § 248-18-260, filed 5/23/75; Regulation 18.260, effective 3/11/60.]

**WAC 246-318-350 Emergency care services.** The hospital shall have a well defined system for providing emergency care services. The nature and scope of the hospital's emergency care services should be in accord with the community's needs and the hospital's capabilities.

(1) The hospital shall provide the following basic, outpatient emergency care services.

(a) Assessment of a person's condition to determine the nature, acuity, and severity of the person's immediate medical need.

The condition of each person, who comes or is brought to the hospital for emergency medical care, shall, upon arrival, be assessed by a registered nurse, physician, or physician's assistant for the purpose of determining the nature and urgency of the person's medical need and the timing and place of the person's care and treatment.

(b) Immediate diagnosis and treatment of any life threatening cardiac arrhythmia, respiratory insufficiency or shock.

(c) Appropriate transfer or referral of a patient who needs medical care services not provided by the hospital.

Prior to transfer of an emergency patient to another health care facility, the hospital shall:

(i) Perform the emergency procedures needed to minimize aggravation of the patient's condition during transport to the other health care facility; and

(ii) Ascertain that the means by which the patient is to be transported to the other health care facility are suitable for the patient.

(2) A hospital shall not be required to comply with subsections (3)(h), (4)(a) and (d), (5)(a), and (6)(a) of this section if the hospital does not offer outpatient emergency care services regularly and only provides the outpatient emergency services required under subsection (1) of this section to the occasional emergency patient who comes or is brought to the hospital by chance.

(3) The hospital shall have, in effect, written policies and procedures which supplement and are coordinated with the hospital's basic policies and are specific to emergency care services. These policies and procedures shall be: Reviewed and revised as necessary to keep them current and, in any case, at least annually; dated and approved in writing by appropriate representatives of the hospital's administrative, medical, and nursing staffs; and made known and readily available to physicians, nurses, and other persons having a responsibility for emergency care services. Policies and procedures pertaining to emergency care services shall include the following.

(a) Policies on the scope and extent of the emergency care services to be provided.

(i) The hospital shall establish the conditions under which treatment is to be provided in the emergency care area, the types of procedures that are to be performed in another area of the hospital (e.g., surgery) rather than the emergency area, the conditions under which a patient is to be admitted as an inpatient, the conditions under which a patient is to be transferred to another health care facility, the conditions under which a patient is to be referred to a private physician or another health care facility, and the conditions under which arrangements should be made for a patient to return to the hospital for treatment.

(ii) A patient shall not be transferred to another health care facility until the other health care facility has been contacted and has consented to accept the patient.

(iii) A record containing the following data shall be sent with an emergency patient who is transferred to another health care facility: Patient identification data, identification of the patient's illness or injury, treatment given to the patient, and an appraisal of the patient's condition upon transfer.

(b) Policies and procedures which prescribe the course of action to be taken when the number of emergency patients, who have arrived or are expected, constitute an overload for the emergency service facilities and staff on hand.

The hospital shall establish who is to be notified when an overload of emergency patients occurs, the conditions under which arrangements are to be made for care of

some emergency patients at other hospitals, the conditions under which additional physicians, nurses, and other persons are to be summoned, the methods by which necessary, additional supplies and equipment are to be obtained, and the conditions under which rooms and areas outside the emergency service area of the hospital are to be used for emergency care and treatment.

(c) Medical policies, standing emergency medical orders, and written medical procedures to guide the action of nurses and other personnel when a person presents a medical emergency and a physician is not present.

(i) Medical policies shall delineate the circumstances under which particular medical policies are to be followed, provide for a physician to be called as rapidly as possible, and establish the minimum qualifications or training of persons who may execute particular emergency medical orders.

(ii) There shall be written procedures, approved in writing by a representative of the medical staff, for any use of defibrillators, respirators or other special medical equipment and for the performance of the special, emergency medical procedures listed in subsection (4)(c) of this section.

(iii) A standing medical order for administration of a drug or other treatment during a medical emergency shall include: A description of the treatment which includes the name of any drug or other agent; the dosage, concentration or intensity of any drug or other agent; the route or method of administration; where pertinent, the time interval, frequency, or duration of administration; and the signature of a representative of the medical staff.

(d) Policies which delineate medical staff responsibilities for emergency care services as related to assigned clinical privileges, physician coverage of emergency care services, and physician participation in the training of personnel.

(e) Policies regarding the notification of an emergency patient's next of kin or legal guardian.

(f) Policies relevant to obtaining consent for treatment from an emergency patient or other person who may legally give consent for treatment of the patient.

These shall include instructions regarding action to be taken when the condition of an emergency patient and the absence of another person legally able to act on behalf of the patient make it impossible to gain an informed consent for critically needed treatment or consent for critically needed treatment is refused.

(g) Policies and procedures pertaining to the care and handling of persons whose conditions require special medical or medico-legal consideration.

(i) Policies and procedures shall prescribe the course of action to be followed in the care of persons who manifest severe emotional disturbances, are under the influence of alcohol or other drugs, are victims of suspected child abuse, are victims of other suspected criminal acts, have a contagious disease, have been contaminated by radioactive material, are diagnosed dead on arrival, or present other conditions requiring special directions regarding action to be taken.

(ii) Definite provision shall be made for communications, as indicated, with health authorities, police or coroner relative to a person whose condition or its cause are reportable.

(h) Policies governing special diagnostic and therapeutic services (e.g., clinical laboratory, x-ray, pharmacy, surgery) to emergency patients.

These shall be designed to ensure prompt availability of necessary diagnostic and therapeutic services and establish the types, scope, and extent of the special diagnostic and therapeutic services to be provided for the care of emergency patients.

(i) Policies regarding notification of an emergency outpatient's personal physician and procedures for transfer of relevant reports to the personal physician.

(j) Policies regarding disclosure of information about an emergency patient.

(4) Organization and staffing for emergency care services shall be in accord with the anticipated patient load and the services provided by the hospital.

(a) There shall be a physician responsible for the medical direction of the hospital's emergency care services. This physician shall be a representative of the medical staff or a physician whose services the hospital has arranged on a regular basis. The functions and responsibilities of the physician responsible for medical direction of the emergency care services shall be delineated in writing and made known to members of the medical and nursing staffs.

(b) At all times, there shall be a physician on duty or call for emergency care services. A current schedule of the names of on-call physicians and the telephone numbers of these physicians or the call service(s) through which they can be contacted rapidly shall be posted in the emergency care area.

(c) At all times, there shall be on duty within the hospital at least one registered nurse who is immediately available and responsible for emergency care services and who is qualified to perform the following: Administration of intravenous fluids, electrocardiography and defibrillation of life threatening arrhythmias, cardio-pulmonary resuscitation, control of hemorrhage, gastric lavage, and basic neurological evaluation. It is recommended that such a nurse also be qualified to perform endotracheal intubation and arterial puncture.

(d) There shall be additional nursing staff and other personnel for emergency care services as are necessary to provide the types and amount of care required by patients.

(i) Staffing for emergency care services shall be adequate to ensure that each applicant for emergency medical care is seen within a period of time commensurate with the nature, acuity and severity of his or her immediate medical need.

(ii) Each hospital employee engaged in the provision of emergency care shall have had the education and training necessary to perform the emergency medical procedures and other functions and duties for which he or she may be responsible.

(5) The physical plant facilities, equipment, and supplies for emergency care services shall be commensurate

with the scope, types and volume of the services provided by the hospital.

(a) A hospital which regularly offers emergency care services shall maintain a distinct emergency service area.

(i) The emergency service area shall be in close proximity to an emergency entrance and separate from the surgery and delivery suites and inpatient nursing units.

(ii) The emergency service area shall provide adequate space for reception and screening of patients and have examination, treatment, and observation rooms in such numbers, sizes, and arrangements as are necessary to assure safe and effective treatment of patients.

(iii) There shall be some means of providing visual privacy to patients in all rooms or areas in which patients are examined or treated.

(iv) At the emergency entrance there shall be an outside night call bell which, when activated, sounds in an area of the hospital in which nursing personnel are always on duty.

(b) A hospital which limits its emergency care services to care of the occasional emergency patient shall not be required to maintain a distinct emergency service area, but shall designate the area(s) to be used for emergency care and provide the equipment, pharmaceuticals and other supplies essential to providing basic emergency care services required under subsection (1) of this section. Emergency equipment and supplies shall be maintained in such a location and manner (e.g., on a "crash" cart) that they may be brought into use immediately upon arrival of a person who presents a medical emergency.

(c) The equipment, pharmaceuticals and other supplies necessary to provide emergency care services shall be readily available at all times.

(i) There shall be specific, designated locations for storage of drugs, parenteral solutions, other supplies, instruments and special equipment so personnel can obtain them rapidly.

(ii) There shall be a system for regular inventory and replenishment of the stock of emergency supplies and equipment to ensure an adequate supply at all times.

(iii) There should be regular inspection and maintenance servicing of medical equipment to keep it in a safe and operable condition.

(d) Current references on toxicology, antidote information and the telephone number of the regional poison control center shall be readily available in the emergency care area.

(e) Telephone numbers of the pharmacist, the blood bank, the ambulance service, the Washington state patrol, Military Assistance Safety and Traffic (MAST), the fire department, the police department, local health authorities, the coroner and other persons or organizations emergency service personnel may need to contact rapidly shall be posted in the emergency service area.

(f) Hospital to ambulance radio communication compatible with the state-wide emergency communication system is recommended for any hospital which regularly provides emergency care services.

(6) The hospital shall maintain an emergency service register and a medical record for each person who has received emergency care service.

(a) There shall be a permanent, current register for all emergency patients.

(i) The register shall contain at least the following data for each person who comes or is brought to the hospital for immediate medical care services: Full name, age, date and time of arrival, the identifying number, the disposition of the patient and the time of the patient's departure from the emergency service area.

(ii) Data on patients shall be entered in the register in chronological order according to the dates and times of arrivals.

(iii) Identification data on a person who is dead on arrival shall be entered in the register.

(b) The hospital shall maintain a medical record for each person who receives emergency care services. Each medical record shall contain the following data.

(i) Patient identification data.

(ii) The date and time of arrival, the means by which the patient came to the hospital and by whom the patient was transported or accompanied.

(iii) Pertinent history of the patient's injury or illness which may include information on first aid or emergency care given the patient prior to his or her arrival.

(iv) Description of significant clinical findings derived from an assessment or examination of the patient.

(v) Any clinical laboratory or roentgenologic findings.

(vi) Diagnosis (tentative or definitive).

(vii) Treatment given.

(viii) Orders for administration of drugs or other treatments which are received by telephone, radio, or verbally from a physician or other person legally authorized to prescribe and acting within the scope of his or her license.

Such a telephone or verbal order shall be received, entered in the patient's medical record and signed by a registered nurse. The counter-signature of the physician or other legally authorized practitioner who gave the order shall be obtained as soon as possible thereafter. This shall not be interpreted to include verbal orders which are received from a physician or other legally authorized practitioner to whom one is providing direct assistance in care of the patient or to include standing emergency medical orders which have been established in accordance with subsection (3)(c)(iii) of this section.

(ix) Appraisal of the patient upon transfer or departure.

(x) Disposition of the patient, which shall include a resume of any instruction given to the patient or his family regarding necessary follow-up care.

Entries of data listed as (iv), (vi), (vii), (ix), and (x) above shall be authenticated by the signature of the person who rendered the service.

[Statutory Authority: RCW 70.41.030, 92-02-018 (Order 224), § 246-318-350, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-318-350, filed 12/27/90, effective 1/31/91; Order 142, § 248-18-285, filed 2/8/77; Order 119, § 248-18-285, filed 5/23/75; Order 110, § 248-18-285, filed 3/14/75; Order 106, § 248-18-285, filed 1/13/75.]

**WAC 246-318-370 Laboratory.** (1) Each hospital shall ensure:

(a) Availability of laboratory services sufficient in size and scope to provide adequate care of all patients minimally to include provisions for:

- (i) Obtaining blood and blood products,
- (ii) Performing hemoglobin or hematocrit,
- (iii) Performing white blood count,
- (iv) Performing platelet estimate,
- (v) Performing urinalysis,
- (vi) Performing blood glucose, and
- (vii) Performing serum potassium.

(b) Disposal of contaminated materials in a safe manner (see WAC 246-318-170);

(c) Appropriate maintenance, safety, and cleanliness of hospital laboratory facilities and equipment (see WAC 246-318-035, 246-318-150, 246-318-155, and 246-318-170);

(d) Provision for pathology services appropriate to all services available in the hospital.

(2) Hospitals shall provide laboratory services in accordance with guidelines for laboratory quality assurance program, WAC 246-318-99910.

[Statutory Authority: RCW 70.41.030, 92-02-018 (Order 224), § 246-318-370, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-318-370, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030, 87-23-056 (Order 2560), § 248-18-300, filed 11/18/87; Order 119, § 248-18-300, filed 5/23/75; Regulation 18.300, effective 3/11/60.]

**WAC 246-318-380 Diagnostic and therapeutic radiology and other imaging services.** (1) Hospitals shall:

(a) Ensure availability of radiologic services appropriate to the type and scope of hospital services offered for inpatients and outpatients; and

(b) Provide a written description of the type and scope of nuclear medicine and other diagnostic and therapeutic imaging services when provided in the hospital for inpatients and outpatients.

(2) Hospitals with imaging services shall:

(a) Designate medical responsibility to a physician member of the medical staff and require access to a radiologist, if radiologic services are provided in the hospital;

(b) Designate medical responsibility to one or more physician members of the medical staff qualified in nuclear medicine, if nuclear medicine services are provided;

(c) Designate medical responsibility to one or more physician members of the medical staff qualified in the appropriate specific imaging specialty if other imaging services are provided;

(d) Require performance of radiology, nuclear, and other imaging services only when:

(i) Ordered, in writing, by a member of the medical staff; or

(ii) In accordance with hospital policy and procedures; and

(e) Provide sufficient numbers of personnel and medical staff qualified to safely deliver the type, scope, and volume within each imaging service including:

(i) At least one diagnostic radiologic technician, technologist, or physician available to come to the hospital to perform diagnostic procedures at all times;

(ii) Performance of therapeutic radiologic services by:

(A) A radiologist or radiation oncologist; or

(B) A therapeutic radiologic technologist directed by a radiologist or radiation oncologist;

(iii) Performance of diagnostic radiologic services by:

(A) A physician or radiologist; or

(B) A diagnostic radiologic technician under policies and procedures approved by a radiologist; and

(iv) After December 31, 1990, performance of nuclear medicine services by a nuclear medicine technologist or by a physician member of the medical staff qualified in nuclear medicine.

(f) Establish policies and procedures approved by administration, a radiologist, and other medical staff qualified in the specialties provided including:

(i) Protection of patients and others from radiation hazards including shielding for syringes, vials, and sources of radioactivity;

(ii) Patient preparation, patient examination, and administration of diagnostic agents;

(iii) Medical staff responsibility for preparation and administration of radiopharmaceuticals;

(iv) Designating authorized users of the equipment;

(v) Safe operation of equipment;

(vi) Safe handling, storage, preparation, labeling, transporting, and disposal of radioactive materials;

(vii) Precautions to minimize unnecessary radiation exposure to patients and others;

(viii) Actions required in event of radioactive contamination of patients, personnel, equipment, and environment;

(ix) Prevention of electrical, mechanical, fire, explosion, and other hazards; and

(x) Written reports on any adverse reaction of a patient to diagnostic or therapeutic agents, including notation in the medical record or outpatient report.

(3) Hospitals providing any imaging service shall provide:

(a) Adequate space and facilities for:

(i) Patient privacy;

(ii) Patient access to a toilet;

(iii) Patient examinations;

(iv) Patient reception;

(v) Patient dressing rooms;

(vi) Exposed and unexposed film storage; and

(vii) Safe storage, preparation, labeling, transportation, and disposal of radioactive materials.

(b) Maintenance of safe, clean equipment, facilities, and supplies appropriate for the type and scope of service offered;

(c) Maintenance of all patient care equipment in safe, operating condition;

(d) Emergency equipment, supplies, and medications required under WAC 246-318-290(5); and

(e) A method for summoning extra appropriate staff for emergencies arising in imaging service areas.

(4) Hospitals providing radiologic areas, rooms, and services shall:

(a) Conduct radiologic services in a safe, appropriately equipped area of the hospital, shielded as necessary to prevent radiation hazards to individuals;

(b) Maintain radiology equipment meeting applicable state rules for radiation protection under chapter 246-225 WAC; and

(c) Arrange for services of a qualified expert defined and described under WAC 246-240-040 as needed for:

(i) Consultation, including periodic radiologic safety testing;

(ii) Supervision of radiation safety measures; and

(iii) Participation in education programs.

(5) Hospitals with imaging services shall:

(a) Maintain authenticated and dated reports of diagnostic and therapeutic procedures, consultations, and interpretations in each patient's medical record;

(b) Retain hard copies or electronic access to authenticated interpretative reports for films, consultations, and therapeutic procedures in the imaging service area for a period defined by the hospital;

(c) Require hospital-authorized practitioners to provide a reason for each examination on all requests for services;

(d) Require authentication of interpretative reports by:

(i) The radiologist for radiology reports; or

(ii) A designated physician member of the medical staff qualified in the appropriate, specific imaging specialty.

(e) Retain patient logs for imaging services and records of equipment calibration inspections and quality assurance testing in the imaging service area for a period defined, in writing, by the hospital;

(f) Maintain records of receipt and disposition of radioactive materials; and

(g) Maintain documentation of:

(i) Maintenance and periodic calibration of all radiation safety equipment;

(ii) Maintenance of all patient care equipment in a safe, operating condition; and

(iii) Calibration of diagnostic and treatment radiologic equipment by:

(A) A qualified expert defined and required under WAC 246-240-040; or

(B) An individual qualified according to manufacturer's specifications for a particular piece of equipment.

[Statutory Authority: RCW 70.41.030, 92-02-018 (Order 224), § 246-318-380, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-318-380, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030, 89-22-109 (Order 008), § 248-18-311, filed 11/1/89, effective 12/2/89.]

**WAC 246-318-410 Other services.** Hospitals offering and providing diagnostic or therapeutic services other than those specified elsewhere in this chapter shall:

(1) Maintain adequate space and equipment for the scope of services offered.

(2) Provide for patient privacy.

(3) Require professional staff licensure when required by state statute.

(4) Require evidence of specific medical staff orders for any diagnostic services or treatments for inpatients.

(5) Establish policy and procedure addressing referral orders issued by persons other than medical staff for outpatient treatments and diagnostic services.

(6) Maintain appropriate pharmacist participation as described in WAC 246-318-190 (1)(n) and (2)(f).

(7) Establish policies and procedures specific to operation of each service offered minimally to include:

- (a) Providing orientation and inservice for staff,
- (b) Ensuring patient safety and infection control,
- (c) Providing maintenance and calibration of equipment, and
- (d) Maintaining coordination with other hospital services.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-410, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-410, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030. 87-03-030 (Order 2464), § 248-18-321, filed 1/14/87.]

**WAC 246-318-420 Hospital pharmacy.** Each hospital shall provide evidence of current approval by the Washington state board of pharmacy pursuant to chapter 18.64 RCW and chapter 246-873 WAC.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-420, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-420, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 43.20.050 and 70.41.030. 84-02-036 (Order 271), § 248-18-331, filed 12/30/83. Formerly WAC 248-18-330.]

**WAC 246-318-435 Intravenous administration.** (1) There shall be written policies and procedures including:

- (a) Administration of intravenous solutions, medications, admixtures, blood, and blood products.
  - (b) Infection control policies and procedures approved by the infection control or an equivalent committee, and including:
    - (i) Site preparation.
    - (ii) Tubing and dressing management.
    - (iii) Site assessment and rotation.
  - (c) Use and control of intravenously administered investigational drugs.
  - (d) Administration of parenterally administered drugs causing tissue necrosis upon extravasation.
  - (e) Documentation requirements.
  - (f) Patient teaching and discharge instruction.
  - (g) All orders or prescriptions for intravenous solutions, admixtures, and medications shall minimally include identification of solution or medication, rate of flow or frequency, duration, strength of additive, dilution ratio of solution, identification of patient, and identification of prescribing practitioner.
  - (h) Use of electronic infusion control devices.
- (2) Personnel inserting intravenous devices shall be legally authorized and appropriately trained with demonstrated and documented skills in intravenous insertion techniques.

(3) Personnel administering intravenous solutions and admixtures shall be legally authorized to administer medications with appropriate training, demonstrated and

documented skill in intravenous administration, procedures, equipment, and approval of the hospital.

(4) There shall be drug compatibility reference material readily available to individuals who administer intravenous medications and admixtures.

(5) Intravenous solutions shall be administered only upon the order of a legally authorized practitioner authorized by hospital policy to prescribe drugs in the hospital.

(6) Intravenous solution containers shall be labeled to include patient name, identification of solution, identification and strength of additives, volume, rate of flow, expiration time and date of admixture, any special requirement for handling and storage, and identification of individual preparing admixture. There shall be procedures for appropriate labeling of precision volume chambers during times such are used for administering admixtures.

(7) There shall be documentation in the medical record to include:

- (a) Solution, medication or medications, time, date, amount administered, and rate;
  - (b) Site and site assessment;
  - (c) Date and time of insertion and removal of cannula;
  - (d) Device used, including gauge, length and type needle, or cannula;
  - (e) Condition of cannula and site at the time removed from patient;
  - (f) Use of electronic infusion devices;
  - (g) Observed complications and treatment of complications;
  - (h) Management of tubing and dressing; and
  - (i) Signature. An initial signature identification system is acceptable.
- (8) Administration of intravenous preparations to pediatric patients shall comply with regulations in this section and WAC 246-318-210.

[Statutory Authority: RCW 70.41.030. 92-02-018 (Order 224), § 246-318-435, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-318-435, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.030. 83-13-061 (Order 261), § 248-18-336, filed 6/15/83.]

**WAC 246-318-440 Records and reports--Medical record system.** Each hospital shall have a well-defined medical record system with facilities, staff, equipment, and supplies necessary to develop, maintain, control, analyze, retrieve, and preserve patient care data and medical records.

(1) Medical record service. Hospitals shall establish an organized medical record service, consistent with recognized principles of medical record management, directed, staffed, and equipped to ensure:

(a) Timely, complete and accurate checking, processing, indexing, filing, and preservation of medical records; and

(b) The compilation, maintenance, and distribution of patient care statistics.

(2) Policies and procedures related to medical record system. Hospitals shall establish and follow current

written policies and procedures related to the medical record system, including requirements for:

(a) An established format for patients' individual medical records;

(b) Access to and release of data in patients' individual medical records and other medical data considering the confidential nature of information in these records;

(c) The retention, preservation, and destruction of medical records; and

(d) Maintenance and disposition of medical and other records in Washington state owned or operated hospitals as required in chapter 40.14 RCW and rules promulgated under chapter 40.14 RCW.

(3) Patients' medical records, general. Hospitals shall:

(a) Develop and maintain an individual medical record for each person, including each neonate, receiving care, treatment, or diagnostic service at the hospital except as permitted in subsection (4)(b) of this section;

(b) Establish a systematic method for identifying each patient's medical record or records to allow ready identification, filing, and retrieval of all of the patient's record or records;

(c) Require prompt, pertinent entries in a patient's medical record on:

(i) A significant observation;

(ii) Any diagnostic or treatment procedure; and

(iii) Other significant events in a patient's clinical course or care and treatment.

(d) Require entries to include:

(i) A date;

(ii) Authentication by the individual assuming responsibility for the entry; and

(iii) A time in accordance with hospital policy.

(e) File the originals or durable, legible, direct copies of originals of reports in patients' individual medical records;

(f) Enter all diagnoses and operative procedures in patients' medical records in terminology consistent with a recognized system of disease and operations nomenclature;

(g) Require legible entries in a patient's medical record which are:

(i) Written in ink;

(ii) Typewritten; or

(iii) Recorded on a computer terminal designed to receive such information.

(4) Hospitals may:

(a) Store entries on magnetic tapes, discs, or other devices suited to the storage of data;

(b) Maintain a simple record system instead of the individual medical records required under subsections (3) and (4)(c) of this section for patients receiving only referred outpatient diagnostic services, as defined in WAC 246-318-010, provided the system permits:

(i) Identification of patient; and

(ii) Filing and retrieval of authenticated reports on all tests or examinations provided to any patient receiving services.

(c) Limit content in individual medical records for patients who would be considered referred outpatients,

except for use of parenteral injections during diagnostic tests to:

(i) Relevant history and physical findings where indicated;

(ii) Known allergies or idiosyncratic reactions;

(iii) Diagnostic interpretation;

(iv) Written consent; and

(v) Identifying admission data.

(5) Patients' medical records, content. Hospitals shall require and ensure entry of the following data into a medical record for each period a patient receives inpatient or outpatient services with exceptions only as specified in subsection (4) of this section and WAC 246-318-350(6):

(a) Admission data including:

(i) Identifying and sociological data;

(ii) The full name, address, and telephone number of the patient's next of kin or, when indicated, another person with legal authority over the person of the patient;

(iii) The date of the patient's admission as an inpatient or outpatient;

(iv) The name or names of the patient's attending physician or physicians; and

(v) The admitting or provisional diagnosis or description of medical problem.

(b) A report on any medical history obtained from the patient;

(c) Report or reports on the findings of physical examination or examinations performed upon the patient;

(d) An entry on any known allergies of the patient or known idiosyncratic reaction to a drug or other agent;

(e) Authenticated orders for:

(i) Any drug or other therapy administered to a patient;

(ii) Any diet served to the patient;

(iii) Any standing medical orders used in the care and treatment of the patient except standing medical emergency orders; and

(iv) Any restraint of the patient.

(f) Reports on all:

(i) Roentgenologic examinations;

(ii) Clinical laboratory tests or examinations;

(iii) Macroscopic and microscopic examinations of tissue;

(iv) Other diagnostic procedures or examinations performed upon the patient; and

(v) Specimens obtained from the patient.

(g) An entry on each administration of therapy, including drug therapy, to the patient;

(h) Entries on nursing services to the patient including:

(i) A report on all significant nursing observations and assessments of the patient's condition or response to care and treatment;

(ii) Nursing interventions and other significant direct nursing care including all administration of drugs or other therapy;

(iii) An entry on the time and reason for each notification of a physician or patient's family regarding a significant change in the patient's condition; and

(iv) A record of other significant nursing action on behalf of the patient.

(i) An entry on any significant health education, training, or instruction provided to the patient or family related to the patient's health care;

(j) An entry on any social services provided the patient;

(k) An entry regarding:

(i) Any adverse drug reaction of the patient; and

(ii) Any other untoward incident or accident occurring during hospitalization or outpatient visit and involving the patient.

(l) Operative report or reports on all surgery performed upon the patient;

(m) An entry or report on each anesthetic administered to the patient;

(n) Report or reports on consultation or consultations concerning the patient;

(o) Reports on labor, delivery, and postpartum period for any woman giving birth to a child in the hospital;

(p) Infant status data for any infant born in or enroute to the hospital including:

(i) The date and time of birth;

(ii) Condition at birth or upon arrival at the hospital;

(iii) Sex; and

(iv) Weight, if condition permits weighing.

(q) Progress notes describing the results of treatment and changes in the patient's condition and portraying the patient's clinical course in chronological sequence;

(r) In the event of an inpatient leaving without medical approval, an entry on:

(i) Any known events leading to the patient's decision to leave;

(ii) A record of notification of the physician regarding the patient's leaving; and

(iii) The time of the patient's departure.

(s) Discharge data including:

(i) The final diagnosis or diagnoses;

(ii) Any associated or secondary diagnoses or complications; and

(iii) The titles of all operations performed upon the patient; and

(iv) A discharge summary for any inpatient whose hospitalization exceeded forty-eight hours, except a normal newborn infant or normal obstetrical patient, to:

(A) Recapitulate significant clinical findings and events during the patient's hospitalization;

(B) Describe the patient's condition upon discharge or transfer; and

(C) Summarize any recommendations and arrangements for future care of the patient.

(t) An entry on any transmittal of medical and related data regarding the patient to a health care facility or agency or other community resource when the patient was referred or transferred;

(u) In event of the patient's death in the hospital, entries, reports, and authorizations including:

(i) A pronouncement of death;

(ii) An authorization for the autopsy, if performed;

(iii) A report on the autopsy, if performed, including findings and conclusions; and

(iv) An entry on release of the patient's body to a mortuary or coroner or medical examiner.

(v) Written consents, authorizations, or releases given by the patient or, if the patient was unable to give such consents, authorizations, or releases, by a person or agency with legal authority over the person of the patient;

(w) The relationship, legal or familial, of the signer to the patient clearly stated when a person other than the patient gives written consent, or authorizes treatment, or signs a release.

(6) Hospitals shall regard materials obtained through procedures employed in diagnosing a patient's condition or assessing the patient's clinical course as original clinical evidence excluded from requirements for content of medical records in subsection (5) of this section. Original clinical evidence includes, but is not limited to:

(a) X-ray films;

(b) Laboratory slides;

(c) Tissue specimens; and

(d) Medical photographs.

(7) Registers.

(a) Hospitals shall maintain current registers with data entered in chronological order including:

(i) An inpatient register containing at least the following data for each inpatient admission:

(A) The patient's identifying number;

(B) The patient's full name, and birth date or age; and

(C) The date of the patient's admission.

(ii) One or more outpatient registers other than registers for emergency care services to:

(A) Contain sufficient data on each outpatient to ensure positive identification; and

(B) Permit rapid retrieval of all of the outpatient's medical record or records when indicated.

(iii) An emergency service register as required under WAC 246-318-350 (6)(a);

(iv) An operation register containing at least the following data for each operation performed in a hospital surgery:

(A) The date;

(B) The identifying number and full name of the patient;

(C) The descriptive name of the operation;

(D) The names of the surgeon and the surgeon's assistant or assistants;

(E) The type of anesthesia; and

(F) The name and title of the person who administered the anesthesia.

(b) Hospitals may maintain separate registers or suitable combinations of registers if the combined register contains data for each specific register as required in subsection (7)(a) of this section.

(8) Indexes. Hospitals shall establish and maintain:

(a) A master patient index containing a master reference card or equivalent for each person receiving inpatient or outpatient care or treatment in the hospital.

(i) Master reference cards or equivalent shall contain:

(A) The patient's medical record number or numbers;

(B) The patient's full name; and

- (C) The patient's date of birth.
- (ii) Master patient indexes may be omitted for:
- (A) Referred outpatients; and
- (B) Outpatient emergency patients provided the hospital retains and preserves an emergency service register for the same period of time as the medical record.
- (b) Current indexes with required entries on index cards or equivalent completed within three months after discharge or transfer of the patient;
- (c) A disease index containing index cards or equivalent for all categories of diseases or conditions treated in the hospital on an inpatient basis with entries on index card or cards for a given category of disease including:
- (i) The identifying number, sex, and age of each patient treated for that category of disease; and
- (ii) The code for the particular disease or condition for which each patient was treated.
- (d) An operation index containing index cards or equivalent for all categories of operations performed in a hospital surgery on an inpatient or outpatient basis with entries on the index card or cards for a given category of operation with:
- (i) Identifying information including the medical record number, age, and sex of each patient upon whom that category of operation was performed; and
- (ii) The code for the particular operative procedure performed upon each patient.
- (e) Codes for entries in the disease and operation indexes in accordance with the coding system and the recognized diagnostic classification system of disease and operation nomenclature adopted by the hospital;
- (f) A physicians' index, separate or combined with the disease and operation indexes, as follows:
- (i) A combined physician's-disease operation index with the name or code number of the physician treating the patient to whom a particular entry pertains; or
- (ii) A separate physicians' index containing:
- (A) A record for every member of the hospital's medical staff; and
- (B) Entries on each physician's index card or equivalent record including the medical record number or name of each patient the particular physician treated in the hospital on an inpatient basis.
- (9) Reports on hospital services. Hospitals shall prepare the following separate or combined reports:
- (a) Census reports including:
- (i) A daily inpatient census report on admissions to inpatient services, births, and discharges including deaths and transfers to another health care facility; and
- (ii) Regular monthly or more frequent reports on admissions to outpatient services and the number of emergency care patients.
- (b) Analyses of hospital services.
- (10) Storage, handling, and control of medical records and other medical data. Hospitals shall:
- (a) Control access to patients' individual medical records and other personal or medical data on patients;
- (b) Prevent access to records by unauthorized persons;
- (c) Protect medical records and other personal and medical data from undue deterioration or destruction; and

(d) Maintain a system permitting easy retrieval of medical records and information for medical or administrative purposes.

(11) Retention, preservation, and final disposal of medical records and other patient care data and reports.

(a) Hospitals shall retain and preserve:

(i) Each patient's medical record or records, excluding reports on referred outpatient diagnostic services for a period of:

(A) No less than ten years following the most recent discharge of the adult patient; or

(B) For patients who are minors at the time of care, treatment, or diagnosis, no less than three years following the date upon which the minor patient attained the age of eighteen years or ten years following the most recent discharge, whichever is longer.

(ii) Reports on referred outpatient diagnostic services for at least two years;

(iii) A master patient index card (or equivalent) for at least the same period of time as the medical record or records for the patient to whom the master patient index card or equivalent pertains;

(iv) Data in the inpatient and outpatient registers for at least three years;

(v) Data in an emergency service register for at least the same period of time as the medical record or records for any patient on whom data were entered in the register;

(vi) Data in the operation register, the disease and operation indexes, the physicians' index, and annual reports on analyses of hospital services for at least three years; and

(vii) Patients' medical records, registers, indexes, and analyses of hospital service in original form or in photographic form in accordance with the provisions of chapter 5.46 RCW.

(b) A hospital may elect to retain and preserve an emergency service register for only three years after last entry if the hospital includes all outpatient emergency care patients in the master patient index.

(c) During final disposal, each hospital shall prevent retrieval and subsequent use of any data permitting identification of individuals in relation to personal or medical information.

(d) In event of transfer of ownership of the hospital, the hospital shall keep patients' medical records, registers, indexes, and analyses of hospital services in the hospital to be retained and preserved by the new owner in accordance with state statutes and regulations.

(e) If the hospital ceases operation, the hospital shall:

(i) Make immediate arrangements for preservation of its medical records and other records of or reports on patient care data in accordance with applicable state statutes and regulations; and

(ii) Obtain approval of the department for the planned arrangements prior to the cessation of operation.

(12) Records kept by approved eye banks pursuant to WAC 246-333-040 are not medical records or registers within the meaning of this section.

(13) Nothing in these regulations shall be construed to prohibit hospitals from collecting additional health and/or medical information or retaining medical records beyond the statutory requirements.

**WAC 246-321-010 Definitions.** For the purposes of these regulations, the following words and phrases shall have the following meanings unless the context clearly indicates otherwise.

(1) "Active volunteer" means unpaid worker or workers providing direct care to patients or clients and/or working with clinical records or confidential client information.

(2) "Adjunctive therapies" means those prescribed services provided by medically related disciplines which include but are not limited to physical therapy, occupational therapy, recreational therapy, music therapy, respiratory therapy.

(3) "Administrator" means an individual appointed as chief executive officer by the governing body of the center to act in its behalf in the overall management of the hospice care center.

(4) "Authenticated" or "authentication" means authorization of a written entry in a record or chart by means of a signature which shall include, minimally, first initial, last name, and title.

(5) "Bathing facility" means a bathtub, shower, or equivalent.

(6) "Bereavement care" means consultation, support, counseling, and follow-up of the client before and following the death of a patient.

(7) "Client" means the patient and family which together compose the unit of care in the hospice care center.

(8) "Client education" means provision of information on physical care, disease symptomatology, palliative treatment, psychosocial coping skills, availability, and utilization of community resources.

(9) "Clinical record" means a file containing all pertinent clinical information about a particular patient to include: Identifying information, data bases, assessment,

individualized comprehensive care plan, diagnosis, treatment, progress notes, other clinical events, and a discharge summary.

(10) "Department" means the Washington state department of health.

(11) "Dietitian" means a person who is eligible for membership in the American Dietetic Association.

(12) "Drug" means medication, chemical, device, or other material used in the diagnosis and/or treatment of injury, illness, or disease.

(13) "Drug administration" means an act in which a single dose of a prescribed drug or a biological is given to a patient by an authorized person in accordance with all laws and regulations governing such acts. The complete act of administration entails removing an individual dose from a previously dispensed, properly labeled container, verifying it with the order of the physician, giving the individual dose to the proper patient, and properly recording the time and dose given.

(14) "Drug dispensing" means an act entailing the interpretation of an order (prescription) for a drug or biological and, pursuant to that order (prescription), proper selection, measuring, labeling, packaging, and issuance of the drug for a patient or for a service unit of the facility.

(15) "Family" means individuals, who need not be relatives, who are important to a patient and designated by that patient.

(16) "Governing body" means the individual or group legally responsible for the operation and maintenance of the hospice care center.

(17) "Grade" means the level of the ground adjacent to the building measured at required windows. The ground must be level or slope downward for a distance of at least ten feet from the wall of the building. From there the ground may slope upward not greater than an average of one foot vertical to two feet horizontal within a distance of eighteen feet from the building.

(18) "Hospice care center" means any building, facility, place, or equivalent organized, maintained, and operated specifically to provide beds, accommodations, facilities, and services over a continuous period of twenty-four hours or more for palliative care of two or more individuals, not related to the operator, who are diagnosed as being in the latter stages of an advanced disease which is expected to lead to death. Hospice care centers are specialized types of health care facilities which come within the scope of chapter 70.41 RCW, hospital licensing and regulation. Hospice care centers may be freestanding or separately licensed portions or areas of another type of health care facility: *Provided*, That the hospice care center is under control and administered by a separate and autonomous governing body. Hospice care centers as used in this chapter do not include hotels or similar places furnishing only food and lodging or similar domiciliary care; nor does it include clinics or physicians' offices where patients are not regularly kept as bed patients for twenty-four hours or more; nor does it include hospitals licensed pursuant to chapter 70.41 RCW which provide services in addition to or in

combination with hospice care services; nor does it include nursing homes as defined and which come under the scope of chapter 18.51 RCW; nor does it include psychiatric hospitals, which come under the scope of chapter 71.12 RCW; nor any other hospital or institution specifically intended for use in the diagnosis and care of those suffering mental illness, mental retardation, convulsive disorders, or other abnormal mental conditions. Furthermore, nothing in this act or the rules and regulations adopted pursuant thereto shall be construed as authorizing the supervision, regulation, or control of the remedial care or treatment of residents or patients in any hospital conducted for those who rely primarily upon treatment by prayer or spiritual means in accordance with the creeds or tenets of any well-recognized church or religious denomination.

(19) "Hospital" means any institution, place, building, or agency which provides accommodations, facilities, and services over a continuous period of twenty-four hours or more for observation, diagnosis, or care of two or more individuals not related to the operator who are suffering from illness, injury, deformity, or abnormality, or from any other condition for which obstetrical, medical, or surgical services would be appropriate for care or diagnosis. "Hospital," as used in this chapter, does not include hotels or similar places furnishing only food and lodging or simply domiciliary care; nor does it include clinics or physicians' offices where patients are not regularly kept as bed patients for twenty-four hours or more; nor does it include nursing homes, as defined and which come under the scope of chapter 18.51 RCW; nor does it include maternity homes, which come under the scope of chapter 18.46 RCW; nor does it include psychiatric hospitals, which come within the scope of chapter 71.12 RCW; nor any other hospital or institution specifically intended for use in the diagnosis and care of those suffering from mental illness, mental retardation, convulsive disorders, or other abnormal mental conditions. Furthermore, nothing in this chapter or the rules and regulations adopted pursuant thereto shall be construed as authorizing the supervision, regulation, or control of the remedial care or treatment of residents or patients in any hospital conducted for those who rely primarily upon treatment by prayer or spiritual means in accordance with the creed or tenets of any well-recognized church or religious denominations.

(20) "Individualized care plan" means a written statement of care to be provided for a client based upon physical, psychosocial, spiritual assessment of the patient, and assessment of family as appropriate. This statement shall include short- and long-term goals, client education, discharge planning, and the name of the individual member of the interdisciplinary care team designated as responsible for implementation. This statement shall be developed with participation of clients as appropriate.

(21) "Interdisciplinary care team" means a group composed of the patient, the family, and professional care providers which may include, but is not limited to,

required adjunctive therapists, registered nurses, nutritionists, spiritual advisors, pharmacists, physicians, mental health professionals, or social workers. "Core team" means those individuals required to provide services for clients within the hospice care center program and shall include a registered nurse, physician, medical director, social worker, spiritual consultant or advisor, and volunteer director.

(22) "Lavatory" means a plumbing fixture designed and equipped for handwashing purposes.

(23) "Licensed nurse" means a registered nurse under provisions of chapter 18.88 RCW or a licensed practical nurse under provisions of chapter 18.78 RCW.

(24) "Medical staff" means physicians and other medical practitioners appointed by the governing body to practice within the parameters of the medical staff by-laws of the hospice care center.

(25) "New construction" means any of the following started after promulgation of these rules and regulations:

(a) New building or buildings to be used as part of the hospice care center;

(b) Addition or additions to existing hospice care center to be used as part of the hospice care center;

(c) Alteration or alterations or modification or modifications other than minor alteration or alterations to a hospice care center. "Minor alteration or alterations" means any structural or functional modification within the existing center which does not change the approved use of the room or area. Minor alterations performed under this definition do not require prior approval of the department.

(26) "Palliative care" means activities, interventions, and interactions which are planned and executed to cause a lessening or reduction of physical, psychosocial and spiritual pain, and intended to ease without curing.

(27) "Patient" means the terminally ill individual.

(28) "Patient care coordinator" means a designated, qualified employee who is responsible for the organization, implementation, and evaluation of the individualized care plan of a patient.

(29) "Person" means any individual, firm, partnership, corporation, company, association or joint stock association, and the legal successor thereof.

(30) "Personnel" means individuals employed and receiving monetary payment from the hospice care center.

(31) "Pharmacist" means an individual who is licensed by the state board of pharmacy to engage in the practice of pharmacy under the provisions of chapter 18.64 RCW.

(32) "Physician" means an individual licensed under provisions of chapter 18.71 RCW, Physicians, or 18.57 RCW, Osteopathy—Osteopathic medicine and surgery.

(33) "Prescription" means a written or oral order for drugs issued by a medical practitioner, licensed in the state of Washington, in the course of his or her professional practice, as defined by Washington state statute, for a legitimate medical purpose (RCW 18.64.011 (3)(a)).

(34) "Registered nurse" means an individual licensed under the provisions of the law regulating the practice of

registered nursing in the state of Washington, chapter 18.88 RCW.

(35) "Scheduled drug" means those substances or immediate precursors listed in Schedules I through V, Article II, RCW 69.50.201, State Uniform Substance Act, now or as hereafter amended.

(36) "Self-administration" means those instances when a patient or member of the client family administer a medication from a properly labeled container while on the premises of the hospice care center.

(37) "Shall" means compliance with the regulation is mandatory.

(38) "Should" means compliance with the regulation or rule is suggested or recommended but not required.

(39) "Social worker" means an individual with a masters degree in social work from an accredited school of social work or an individual eligible for membership in the academy of certified social workers.

(40) "Staff" means those individuals providing services within the hospice care center. These individuals may be paid or unpaid and shall be designated as medical staff, personnel, or volunteers, respectively.

(41) "Toilet" means a room containing at least one water closet.

(42) "Useable floor area" means floor spaces in patient rooms excluding areas taken up by vestibules, closets, wardrobes, portable lockers, lavatories, and toilet rooms.

(43) "Water closet" means a plumbing fixture fitted with a seat and a device for flushing the bowl of the fixture with water.

[Statutory Authority: RCW 43.70.040. 92-02-018 (Order 224), § 246-321-010, filed 12/23/91, effective 1/23/92; 91-02-049 (Order 121), recodified as § 246-321-010, filed 12/27/90, effective 1/31/91. Statutory Authority: 1985 c 213: 86-08-002 (Order 2348), § 248-21-002, filed 3/20/86. Statutory Authority: RCW 43.20.050. 81-23-003 (Order 218), § 248-21-002, filed 11/6/81.]

**WAC 246-321-012 Licensure--Notice of decision--Adjudicative proceeding.** (1) After January 1, 1982, no person acting separately or jointly with any other person shall establish, maintain, conduct or operate a hospice care center in this state or use the words "hospice care center" to describe or identify a place or building which does not have a license as a hospice care center as defined and described herein.

(2) An application for a hospice care center license shall be submitted to the department on forms provided by the department. The application shall be signed by the operator of the facility and the legal representative of the governing body.

(3) Other requirements related to licensure, fees, and inspection are as stipulated in RCW 70.41.100, 70.41.110, 70.41.120, 70.41.130, 70.41.150, 70.41.160, 70.41.170, and WAC 246-321-990.

(4) There shall be compliance with other regulations to include:

(a) Applicable rules and regulations for hospice care centers adopted by the Washington state fire marshal pursuant to RCW 70.41.080 and chapter 48.48 RCW;

(b) Applicable national, state, and local electrical, fire, zoning, building, and plumbing codes.

(5)(a) The department's notice of a denial, suspension, modification, or revocation of a license shall be consistent with RCW 43.70.115. An applicant or license holder has the right to an adjudicative proceeding to contest the decision.

(b) A license applicant or holder contesting a department license decision shall within twenty-eight days of receipt of the decision:

(i) File a written adjudicative proceeding application by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and

(ii) Include in or with the application:

(A) A specific statement of the issue or issues and law involved;

(B) The grounds for contesting the department decision; and

(C) A copy of the contested department decision.

(c) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

[Statutory Authority: RCW 43.70.040 and 34.05.220. 92-02-018 (Order 224), § 246-321-012, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-321-012, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 43.20.050 and chapter 34.05 RCW. 90-05-038 (Order 034), § 248-21-005, filed 2/14/90, effective 3/17/90. Statutory Authority: 43.20.050. 81-23-003 (Order 218), § 248-21-005, filed 11/6/81.]

**WAC 246-321-017 HIV/AIDS education and training.** Hospice care centers shall:

(1) Verify or arrange for appropriate education and training of personnel on the prevention, transmission, and treatment of human immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS) consistent with RCW 70.24.310; and

(2) Use infection control standards and educational material consistent with the approved curriculum manual *Know - HIV/AIDS Prevention Education for Health Care Facility Employees*, January 1991, published by the office on HIV/AIDS.

[Statutory Authority: RCW 43.70.040 and 70.24.310. 92-02-018 (Order 224), § 246-321-017, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-321-017, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.24.310. 89-21-038 (Order 3), § 248-21-017, filed 10/12/89, effective 11/12/89.]

**WAC 246-321-030 Food and dietary services.** (1) The dietary and food service shall be provided and managed by an individual trained in food service.

(2) Food and dietary services shall incorporate the periodic input of a dietitian. Appropriate nutritional and dietary consultation shall be provided patients.

(3) Food shall be prepared and served at intervals appropriate to the needs of patients. Unless contraindicated, current recommendations of the food and nutrition board of the national research council adjusted for age, sex, and activity shall be used. Snacks of a

nourishing quality shall be available as needed for patients. Cultural and ethnic preferences of patients should be respected in planning and serving meals.

(4) There shall be written physician orders for all therapeutic diets served to patients. A current therapeutic diet manual approved in writing by a dietitian and the medical director shall be used for planning and preparing therapeutic diets.

(5) All menus shall be retained for one year.

(6) When the hospice care center policy provides for allowing for the preparation and/or storage of personal food brought in by clients for consumption by clients, there shall be adequate mechanical refrigeration capable of maintaining a temperature of forty-five degrees fahrenheit or lower and dishwashing facilities which provide hot water at a temperature of not less than one hundred fifty degrees fahrenheit. Suitable dining area(s) should be provided for clients.

(7) Food service sanitation shall be governed by chapter 246-215 WAC, rules and regulations of the state board of health governing food service sanitation.

(8) There shall be current written policies and procedures for food storage, food preparation, food service, scheduled cleaning of all food service equipment and work areas. A copy of the procedures shall be kept within the food service area and shall be available for reference by dietary or food service personnel and other personnel at all times.

[Statutory Authority: RCW 43.70.040. 92-02-018 (Order 224), § 246-321-030, filed 12/23/91, effective 1/23/92; 91-02-049 (Order 121), recodified as § 246-321-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 43.20.050. 81-23-003 (Order 218), § 248-21-030, filed 11/6/81.]

**WAC 246-321-035 Infection control.** (1) There shall be written policies and procedures addressing infection control, including: Housekeeping; cleaning, sterilization, disinfection, sanitization, and storage of supplies and equipment; health of personnel; pets; food service sanitation.

(2) Provision shall be made for isolation of patients with infectious conditions in accordance with *Isolation Techniques For Use In Hospitals*, United States Department of Health and Human Services, most recent edition.

(3) There shall be reporting of communicable disease in accordance with chapter 246-100 WAC.

(4) Recognized standards of medical aseptic technique including basic handwashing practices shall be followed in all direct personal care of patients.

(5) Methods for cleaning, disinfecting or sterilizing, handling and storage of all supplies and equipment shall be such as to prevent the transmission of infection.

(6) Written procedures shall specify daily and periodic cleaning schedules and routines for facility and equipment.

(7) Sewage, garbage, refuse, and liquid waste shall be collected and disposed of in a manner to prevent the creation of an unsafe or unsanitary condition or nuisance.

(8) There shall be in effect a current system of discovering, reporting, investigating, and reviewing infections among patients and personnel with maintenance of records on such infections.

(9) Upon employment and annually thereafter each employee and volunteer shall have or provide documented evidence of a tuberculin skin test by the Mantoux method, unless medically contraindicated. A negative skin test shall consist of less than ten millimeters induration read at forty-eight to seventy-two hours. A positive skin test shall consist of ten millimeters of induration, or greater, read at forty-eight to seventy-two hours. Positive reactors shall have a chest x-ray within ninety days of the first day of employment. Exemptions and specific requirements are as follows:

(a) New employees who can document a positive Mantoux test in the past shall have an initial screening in the form of a chest x-ray;

(b) After entry, annual screening in the form of a skin test or chest x-ray shall not be required for reactors;

(c) Those with positive skin tests who have completed the recommended course of preventive or curative treatment, as determined by the local health officer, shall be exempted from testing;

(d) Records of test results, x-rays or exemptions from such, shall be kept by the facility.

(10) Employees with a communicable disease in a known infectious stage shall not be on duty. Policy and procedures shall specify conditions for staff who are working despite presence of communicable disease.

[Statutory Authority: RCW 43.70.040. 92-02-018 (Order 224), § 246-321-035, filed 12/23/91, effective 1/23/92; 91-02-049 (Order 121), recodified as § 246-321-035, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.41.30 [70.41.030] and 43.20.050. 83-07-015 (Order 254), § 248-21-035, filed 3/10/83. Statutory Authority: RCW 43.20.050. 81-23-003 (Order 218), § 248-21-035, filed 11/6/81.]

**WAC 246-321-050 Physical environment and equipment.** (1) The hospice care center shall provide a safe and clean environment for clients, staff, and visitors. Equipment shall be kept clean, calibrated, adjusted, and in good repair.

(2) The hospice care center shall be accessible and equipped to accommodate physically handicapped individuals, to include minimally:

(a) Corridors serving as egress from patient rooms eight feet wide;

(b) Corridors elsewhere in the center minimally four feet wide;

(c) Doorways for use by clients at least thirty-two inches clear width (thirty-four inch door);

(d) Doorways for patient rooms and exterior exit doors from eight foot corridors forty-four inches clear width, (forty-six inch door);

(e) Minimally, one toilet, lavatory, and bathing facility which meet barrier free code, on each floor used for client services;

(f) Stairways and stairwells shall be minimally forty-four inches clear width;

(i) Interior and exterior stairways and stairwells shall have handrails on both sides. Railing ends shall be returned to wall;

(ii) Exterior stairways and stairwells shall have adequate protection from moisture, ice, other hazards, and slipping.

(iii) Exterior steps shall be equipped with nonslip material on treads; open risers are prohibited; nosing shall be flush, slip resistant and rounded to one-half inch maximum radius.

(g) Ramps shall be minimally forty-four inches clear width;

(i) There shall be handrails on both sides;

(ii) Ramps shall not exceed slope ratio of one in twelve;

(iii) Ramps shall be provided with nonslip surfaces.

(3) There shall be provision for adequate personal privacy for personal and private activities such as toileting, bathing, dressing, sleeping, communicating with family and time alone.

(4) Patient rooms:

(a) Each patient room shall be directly accessible from a corridor or common use activity room or an area for patients;

(b) Each sleeping room shall have a clear window or relite area of approximately one-tenth of the usable floor area providing for patient visibility of the out-of-doors. A court or glass covered atrium may be equivalent to out-of-doors. Distance from relites to exterior windows or atrium relites shall not exceed eight feet, six inches.

(i) Windows shall be at least twenty-four feet from other buildings or the opposite wall of a court or at least ten feet from a property line, except on street sides;

(ii) If the depth of a court is less than one-half its width, the width requirement shall not apply.

(iii) Outside window walls shall be at least eight feet from outside public walkways.

(iv) Operable windows or openings that serve for ventilation shall be provided with screening.

(c) No room more than two foot six inches below grade shall be used for the housing of patients. Room size shall be determined by program, provided all patient rooms have at least one hundred square feet of usable floor space in each single patient room. Multipatient rooms shall provide not less than eighty-five square feet of usable floor area per bed. There shall not be less than seven and one-half foot ceiling height over the usable floor area;

(d) Each patient shall be provided an enclosed space suitable for hanging garments and storage of personal belongings within his or her room or nearby. There shall be provision for secure storage of patient valuables;

(e) Each patient shall be provided a bed appropriate to the special needs and size of the patient with a cleanable mattress which is in good repair and a cleanable or disposable pillow;

(f) Room furnishings shall be provided and maintained in a clean and safe condition;

(g) Patient beds shall be spaced so that they do not interfere with entrance, exit or traffic flow within the

room. Patient rooms shall be of a dimension and conformation allowing not less than three feet between beds.

(5) There shall be, minimally, one bathing facility for each six patients within the center, or major fraction thereof, (tub, shower, portable shower, portable tub or equivalent). This ratio includes the bathing facility described in WAC 246-321-050 (2)(e).

(6) Toilets shall be in a ratio of at least one toilet for every four patients, or major fraction thereof. This ratio excludes toilet described in WAC 246-321-050 (2)(e).

(7) Lavatories shall be provided in a ratio of at least one lavatory for each toilet located in toilet room(s). Lavatories shall be provided in a ratio of at least one per four patients. Lavatories shall be located at entry of patient rooms used for isolation.

(8) At least one toilet and lavatory shall be provided on each floor for use by those who are not patients. This may include toilet and lavatory described in WAC 246-321-050 (2)(e).

(9) Carpets may be used in patient and nonpatient occupied areas with the following exceptions; toilet rooms, bathing facilities, isolation rooms, laundry rooms, utility rooms, examination or treatment rooms, house-keeping closets;

(a) Specifications for acceptable carpeting include:

(i) Carpet material which meets the standards of the state fire marshal and is easily cleanable;

(ii) Pile tufts shall be a minimum of sixty-four per square inch or equivalent density;

(iii) Rows shall be a minimum of eight per square inch or equivalent density;

(b) Installation of carpet material.

(i) Pad and carpet shall be installed according to manufacturer recommendations;

(ii) Edges of carpet shall be covered and cove or base shoe used at all wall junctures. Seams shall be sewn or bonded together with manufacturer recommended cement.

(10) There shall be adequate visiting and lounge areas provided, excluding hallways and corridors. Ratio of fifteen square feet per patient bed and not less than one hundred eighty square feet per facility recommended, excluding hallways and corridors.

(11) There shall be adequate meeting rooms and office areas for use by the interdisciplinary care team. Other rooms or areas may serve as meeting rooms provided confidentiality is maintained.

(12) Linen and laundry:

(a) A safe and adequate clean linen storage area shall be provided with a supply of clean linen available for patients use;

(b) Any laundry done in the facility shall be done in a laundry room separate from the kitchen, dining areas, clean and soiled storage and handling areas;

(c) The soiled laundry storage and sorting area shall be in a well ventilated area separate from the clean linen handling area, clean storage areas, and food preparation areas. If linen or laundry is washed on the premises, an adequate supply of hot water shall be available to provide water at a minimum of one hundred sixty degrees fahrenheit in the washing machine.

## (13) Utility and storage facilities:

(a) Sufficient clean storage and handling room(s) shall provide closed storage for clean and sterile supplies and equipment;

(b) Washing, disinfection, storage and other handling of medical and nursing supplies and equipment shall be accomplished in a manner which ensures segregation of clean and sterile supplies and equipment from those that are contaminated;

(c) Soiled room(s) shall provide:

(i) Clinic service sink, siphon jet or equivalent;

(ii) Space for soiled linen or laundry containers;

(iii) Counter top, double compartment sink, and goose-neck spout or equivalent;

(iv) Storage for cleaning supplies and equipment.

## (14) Housekeeping:

(a) Adequate and clean housekeeping equipment shall be maintained;

(b) At least one service sink and housekeeping closet or enclosed cabinet equipped with shelving shall be provided in a suitable setting within the facility. May be combined with a soiled room as described in subsection (13)(c) of this section. Clinic service sink may be considered equivalent to service sink.

## (15) Communications:

(a) There shall be a telephone readily available for patients to make and receive confidential calls;

(b) There shall be at least one "nonpay" telephone per floor readily accessible in event of fire and other emergencies.

(c) A nurse call shall be provided at each bed and in each toilet room and bathing facility.

(16) Appropriate first aid supplies and equipment shall be maintained and available in a safe and sanitary location.

(17) Water supply and plumbing. The water supply plumbing, the fixtures and the waste and drainage system of the hospice care center shall be maintained to avoid insanitary conditions:

(a) There shall be an adequate supply of hot and cold running water under pressure which conforms with chapter 246-290 WAC;

(b) Hot water shall be a safe temperature at all fixtures used by patients. Hot water temperatures at bathing fixtures used by patients shall be automatically regulated so as not to exceed one hundred and twenty degrees fahrenheit;

(c) There shall be devices to prevent backflow into the water supply system from fixtures where extension hoses or other cross connections may occur.

(18) Heating. Heating systems shall be operated and maintained to provide a comfortable, healthful temperature in rooms used by patients during the coldest weather conditions ordinarily encountered in the geographical location of the hospice care center.

(19) Ventilation. There shall be ventilation of all rooms used by patients and personnel sufficient to remove all objectional odors, excess heat, and condensation. Inside rooms including toilets, bathrooms, smoking rooms, and other rooms in which excessive moisture,

odors or contaminants originate shall be provided with mechanical exhaust ventilation.

(20) Lighting, wiring, and power. Adequate lighting shall be provided in all usable areas of the hospice care center, appropriate to the function:

(a) Appropriate, adequate, and safe electrical service shall be provided;

(b) Adequate emergency lighting for means of egress, (battery operated acceptable);

(c) Adequate emergency power available, (battery operated acceptable).

[Statutory Authority: RCW 43.70.040. 92-02-018 (Order 224), § 246-321-050, filed 12/23/91, effective 1/23/92; 91-02-049 (Order 121), recodified as § 246-321-050, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 43.20.050. 81-23-003 (Order 218), § 248-21-050, filed 11/6/81.]

## Chapter 246-323 WAC

RESIDENTIAL TREATMENT FACILITIES FOR  
PSYCHIATRICALY IMPAIRED CHILDREN AND  
YOUTH

## WAC

|             |                                  |
|-------------|----------------------------------|
| 246-323-010 | Definitions.                     |

| 246-323-090 | Physical environment.            |

**WAC 246-323-010 Definitions.** (1) "Abuse" means injury, sexual abuse or negligent treatment or maltreatment of a child or adolescent by a person who is legally responsible for the child's/adolescent's welfare under circumstances which indicate that the child's/adolescent's health, welfare and safety is harmed thereby. (RCW 26.44.020.)

Person "legally responsible" shall include a parent or guardian or a person to whom parental responsibility has been delegated (e.g., teachers, providers of residential care, providers of day care).

(a) "Physical abuse" means damaging or potentially damaging, nonaccidental acts or incidents which may result in bodily injury or death.

(b) "Emotional abuse" means verbal behavior, harassment or other actions which may result in emotional or behavioral problems, physical manifestations, disordered or delayed development.

(2) "Administrator" means the individual appointed as chief executive officer by the governing body of the facility, to act in its behalf in the overall management of the residential treatment facility.

(3) "Authenticated" or "authentication" means authorization of a written entry in a record by means of a signature which shall include, minimally, first initial, last name, and title.

(4) "Child psychiatrist" means a psychiatrist who has specialization in the assessment and treatment of children and youth with psychiatric impairments. This individual shall be certified in child psychiatry by the board of psychiatry and neurology or board eligible.

(5) "Client" means an individual child or youth who is living in a residential treatment facility for the purpose of receiving treatment and/or other services for a psychiatric impairment.

(6) "Clinical staff" means mental health professionals who have been appointed by the governing body of a residential treatment facility to practice within the parameters of the clinical staff bylaws as established by the governing body of that residential treatment facility.

(7) "Corporal punishment" means punishment or negative reinforcement accomplished by direct physical contact of a harmful or potentially harmful nature regardless of whether or not damage is actually inflicted.

(8) "Department" means the Washington state department of health.

(9) "Dietician" means a person who is eligible for membership in the American dietetic association.

(10) "Discipline" means actions taken by personnel and staff to encourage the establishment of habits of self-control or to regulate unacceptable client behavior. The individualized treatment plan shall define both of these.

(11) "Drug administration" means an act in which a single dose of a prescribed drug or biological is given to a patient by an authorized person in accordance with all laws and regulations governing such acts. The complete act of administration entails removing an individual dose from a previously dispensed, properly labeled container (including a unit dose container), verifying it with the physician's orders, giving the individual dose to the proper patient, and properly recording the time and dose given.

(12) "Drug dispensing" means an act entailing the interpretation of an order for a drug or biological and, pursuant to that order, proper selection, measuring, labeling, packaging, and issuance of the drug for a patient or for a service unit of the facility.

(13) "Governing body" means the individual or group which is legally responsible for operation and maintenance of the residential treatment facility.

(14) "Individualized treatment plan" means a written statement of care to be provided to a client based upon assessment of his/her strengths, assets, interests, and problems. This statement shall include short and long-term goals with an estimated time frame stipulated, identification of the process for attaining the goals and a discharge plan. When possible, this statement shall be developed with participation of the client.

(15) "Mental health professional" means those individuals described in RCW 71.05.020 and WAC 275-55-020.

(16) "Multidisciplinary treatment team" means a group comprised, when indicated, of individuals from various clinical services, to include medicine, psychiatry, psychology, social work, nursing, occupational and recreational therapies, dietary, pharmacy, education, speech, and hearing. Members of this group shall assess, plan, implement, and evaluate treatment for clients under care.

(17) "Neglect" means negligent treatment or maltreatment or an act of omission which evinces a serious

disregard of consequences of such a magnitude as to constitute a clear and present danger to a child's/adolescent's health, welfare, and safety. (RCW 26.44.020.)

(a) "Physical neglect" means physical or material deprivation (e.g., lack of medical care, lack of supervision necessary for client level of development, inadequate food, clothing, or cleanliness).

(b) "Emotional neglect" means acts such as rejection, lack of stimulation, or other acts of commission or omission which may result in emotional or behavioral problems, physical manifestations, and disordered development.

(18) "New construction" means any of the following started after promulgation of these rules and regulations:

(a) New building(s) to be used as part of the residential treatment facility;

(b) Addition(s) to or conversions of existing building(s) to be used as part of the residential treatment facility;

(c) Alteration(s) or modification(s) other than minor alteration(s) to a residential treatment facility or to a facility seeking licensure as a residential treatment facility.

"Minor alteration(s)" means any structural or functional modification(s) within the existing residential treatment facility which does not change the approved use of the room or area. Minor alterations performed under this definition do not require prior approval of the department; however, this does not constitute a release from the applicable requirements contained in chapter 248-16 WAC.

(19) "Occupational therapist" means a person eligible for certification as a registered occupational therapist by the American Occupational Therapy Association.

(20) "Occupational therapy services" means activities directed toward provision of ongoing evaluation and treatment which will increase the client's ability to perform those tasks necessary for independent living, including daily living skills, sensory motor, cognitive and psychosocial components.

(21) "Owner" means an individual, firm, or joint stock association or the legal successor thereof who operates residential treatment facilities for psychiatrically impaired children, whether owning or leasing the premises.

(22) "Pharmacist" means a person who is licensed by the state board of pharmacy to engage in the practice of pharmacy under the provisions of chapter 18.64 RCW.

(23) "Physician" means a doctor of medicine or a doctor of osteopathy licensed to practice in the state of Washington.

(24) "Prescription" means the written or oral order for drugs issued by a duly licensed medical practitioner in the course of his/her professional practice, as defined by Washington state statutes for legitimate medical purposes. (RCW 18.64.011.)

(25) "Psychiatric impairment" means severe emotional disturbance corroborated by clear psychiatric diagnosis provided that one or more of the following symptomatic behaviors is exhibited:

(a) Bizarreness, severe self-destructiveness, schizophrenic ideation, chronic school failure, or other signs or symptoms which are the result of gross, ongoing distortions in thought processes;

(b) School phobias, suicide attempts, or other signs or symptoms associated with marked severe or chronic affective disorders as defined in the most recent edition of *American Psychiatric Association Diagnostic and Statistical Manual*;

(c) Chronic sexual maladjustment, history of aggressive unmanageability including violent, chronic, grossly maladaptive behaviors which are associated with (a) or (b) above.

(26) "Psychiatrist" means a physician who has successfully completed a three-year residency program in psychiatry and is certified by the American board of psychiatry and neurology.

(27) "Psychological services" means activities directed towards the provision of interpretation, review and supervision of psychological evaluations; treatment services; participation in admission and discharge; diagnostic formulation; consultation and research.

(28) "Psychologist" means a person who is licensed as a psychologist in the state of Washington under provisions of chapter 18.83 RCW with training in child clinical psychology.

(29) "Registered nurse" means an individual licensed under the provisions of chapter 18.88 RCW, regulating the practice of registered nursing in the state of Washington.

(30) "Recreational therapist" means a person with a bachelor's degree with a major or option in therapeutic recreation or in recreation for ill and handicapped or a bachelor's degree in a related field with equivalent professional experience.

(31) "Recreational therapy services" means those activities directed toward providing assessment of a client's current level of functioning in social and leisure skills and implementation of treatment in areas of deficiency.

(32) "Residential treatment facility for psychiatrically impaired children and youth" means a residence, place or facility designed and organized to provide twenty-four hour residential care and long-term individualized, active treatment for clients who have been diagnosed or evaluated as psychiatrically impaired.

(33) "Restraint" means any apparatus or chemical used for the purpose of preventing or limiting volitional body movement.

(34) "Scheduled drugs" means those drugs, substances, or immediate precursors listed in Scheduled I through V, Article II, RCW 69.50.201, State Uniform Controlled Substance Act, as now or hereafter amended.

(35) "Self-administration of medication" means that a client administers or takes his/her own medication from a properly labeled container: *Provided*, That the facility maintains the responsibility for seeing that medications are used correctly and that the client is responding appropriately.

(36) "Shall" means that compliance with regulation is mandatory.

(37) "Should" means that compliance with a regulation or standard is suggested or recommended but not required.

(38) "Social work services" means "professional social work services" which includes activities and/or services which are performed to assist individuals, families, groups or communities in improving their capacity for social functioning or in effecting changes in their behavior, emotional responses or social conditions.

(39) "Social worker" means a person with a master's degree in social work obtained from an accredited school of social work.

(40) "Special services" means clinical and rehabilitative activities and/or programs which shall include but not be limited to: Laboratory, radiology and anesthesiology services; education and vocational training; speech, language, hearing, vision, dentistry, and physical rehabilitation.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-323-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-323-010, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 82-23-004 (Order 1899), § 248-23-001, filed 11/4/82. Statutory Authority: RCW 43.20.050. 80-03-079 (Order 194), § 248-23-001, filed 3/3/80.]

**WAC 246-323-020 Licensure.** Residential treatment facilities shall be licensed under chapter 71.12 RCW, Private establishments. Chapter 246-323 WAC establishes minimum licensing standards for the safety, adequate care and treatment of clients who are residents in a residential treatment facility.

(1) Application for license.

(a) An application for a residential treatment facility license shall be submitted on forms furnished by the department. Applications shall be signed by the legal representative of the owner.

(b) The applicant shall furnish to the department full and complete information and promptly report any changes which would affect the current accuracy of such information as to the identity of each officer and director of the corporation, if the program is operated by a legally incorporated entity, profit or nonprofit, and of each partner, if the program is a legal partnership.

(2) Disqualified applicants.

(a) Each and every individual named in an application for a residential facility license shall be considered separately and jointly as applicants, and if anyone is deemed disqualified/unqualified by the department in accordance with the law or these rules and regulations, a license may be denied, suspended or revoked. A license may be denied, suspended or revoked for failure or refusal to comply with the requirements established by chapter 71.12 RCW or with rules and regulations promulgated pursuant thereto, and, in addition, for any of the following:

(i) Obtaining or attempting to obtain a license by fraudulent means or misrepresentation;

(ii) Permitting, aiding or abetting the commission of an illegal act on the premises of the residential treatment facility;

(iii) Cruelty, abuse, neglect or assault, or indifference to the welfare of any client;

(iv) Misappropriation of the property of the client; and

(v) Failure or inability to exercise fiscal accountability and responsibility toward the individual client, the department, or the business community.

(b) Before granting a license to operate a residential treatment facility, the department shall consider the ability of each individual named in the application to operate the residential treatment facility in accordance with the law and with these regulations. Individuals who have previously been denied a license to operate a health care or child care facility in this state or elsewhere, or who have been convicted civilly or criminally of operating such a facility without a license, or who have had their license to operate such a facility suspended or revoked, shall not be granted a license unless, to the satisfaction of the department, they affirmatively establish clear, cogent and convincing evidence of their ability to operate the residential treatment facility, for which the license is sought, in full conformance with all applicable laws, rules and regulations.

(3) Visitation and examination of the residential treatment facility by the department to ascertain compliance with this chapter and chapter 71.12 RCW shall occur as necessary and at least one time each twelve months.

(4) Denial, suspension, modification, or revocation of a license; adjudicative proceeding.

(a) When the department determines that a facility has failed or refused to comply with the requirements of chapter 71.12 RCW and/or these rules, the department may, if the interests of the clients so demand, issue to the applicant or licensee a notice to deny a license application or to suspend, modify, or revoke a license to a license holder. The department's notice of a denial, suspension, modification, or revocation of a license shall be consistent with RCW 43.70.115. An applicant or license holder has the right to an adjudicative proceeding to contest the decision.

(b) A license applicant or holder contesting a department license decision shall within twenty-eight days of receipt of the decision:

(i) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and

(ii) Include in or with the application:

(A) A specific statement of the issue or issues and law involved;

(B) The grounds for contesting the department decision; and

(C) A copy of the contested department decision.

(c) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

(5) Submission of plans. The following shall be submitted with an application for license: *Provided, however,* That when any of the required plans are already on file with the department through previous applications for license or construction approval, only plans for portions or changes which are not on file need to be submitted.

(a) A plot plan showing street, driveways, water and sewage disposal systems, the location of buildings on the site and grade elevations within ten feet of any building in which clients are to be housed.

(b) Floor plans of each building in which clients are to be housed. The floor plans shall provide the following information:

(i) Identification of each client's sleeping room by use of a lettering or numbering system, or some equivalent mechanism of identification;

(ii) The usable square feet of floor space in each room;

(iii) The clear window glass area in each client's sleeping room;

(iv) The height of the lowest portion of the ceiling in any client's sleeping room;

(v) The floor elevations referenced to the grade level.

(6) Posting of license. A license for the residential treatment facility shall be posted in a conspicuous place on the premises.

(7) New construction.

(a) When new construction is contemplated, the following shall be submitted to the department for review:

(i) A written program containing, at a minimum, information concerning services to be provided and operational methods to be used which will affect the extent of facilities required by these regulations.

(ii) Duplicate sets of preliminary plans which are drawn to scale and include: A plot plan showing streets, driveways, the water and sewage disposal systems, grade and location of building(s) on the site; the plans for each floor of the building(s), existing and proposed, which designate the functions of each room and show all fixed equipment. The preliminary plans shall be accompanied by a statement as to the source of the water supply and the method of sewage and garbage disposal and a general description of construction and materials, including interior finishes.

(b) Construction shall not be started until duplicate sets of final plans (drawn to scale) and specifications have been submitted to and approved by the department. Final plans and specifications shall show complete details to be furnished to contractors for construction of buildings. These shall include:

(i) Plot plans;

(ii) Plans for each floor of the building(s) which designate the function of each room and show all fixed equipment and the planned location of beds and other furniture in client's sleeping rooms;

(iii) Interior and exterior elevations, building sections and construction details;

(iv) A schedule of floors, wall and ceiling finishes, and the types and sizes of doors and windows;

(v) Plumbing, heating, ventilation, and electrical systems; and

(vi) Specifications which fully describe workmanship and finishes.

(c) Adequate provisions shall be made for the safety and comfort of clients as construction work takes place in or near occupied areas.

(d) All construction shall take place in accordance with the approved final plans and specifications. The department shall be consulted prior to making any changes from the approved plans and specifications. When indicated by the nature or extent of proposed changes, the department may require the submission of modified plans or addenda for review prior to considering proposed change(s) for approval. Only those changes which have been approved by the department may be incorporated into a construction project. In all cases, modified plans or addenda on changes which are incorporated into the construction project shall be submitted for the department's file on the project even though it was not required that these be submitted prior to approval.

(8) Exemptions. The department may, in its discretion, exempt a residential treatment facility from complying with parts of these rules pursuant to the procedures set forth in WAC 246-08-210.

(9) Compliance with other regulations.

(a) Rules and regulations adopted by the Washington state fire marshal under provisions of RCW 71.12.485 which are found in Title 212 WAC apply.

(b) If there is no local plumbing code, the uniform plumbing code of the international association of plumbers and mechanical officials shall be followed.

(c) Compliance with these regulations does not exempt a residential treatment facility from compliance with local and state electrical codes or local zoning, building and plumbing codes.

(10) Transfer of ownership. The ownership of a residential treatment facility shall not be transferred until the transferee has been notified by the department that the transferee's application for a license has been approved. Change in administrator shall be reported to the department.

**WAC 246-323-040 HIV/AIDS education and training.** Residential treatment facilities for psychiatrically impaired children and youth shall:

(1) Verify or arrange for appropriate education and training of personnel on the prevention, transmission, and treatment of human immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS) consistent with RCW 70.24.310; and

(2) Use infection control standards and educational material consistent with the approved curriculum manual *Know - HIV/AIDS Prevention Education for Health Care Facility Employees*, January 1991, published by the office on HIV/AIDS.

[Statutory Authority: RCW 43.70.040, 70.24.310 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-323-040, filed 12/23/91, effective 1/23/92. **WAC 246-323-050 Client care services.** (1) The residential treatment facility shall have written policies regarding admission criteria and treatment methods. The admission of clients shall be in keeping with the stated policies and shall be limited to clients for whom the facility is qualified by staff, services, and equipment to give adequate care.

(2) Acceptance of a client for admission and treatment shall be based upon an assessment and intake procedure that determines the following:

(a) A client requires treatment which is appropriate to the intensity and restrictions of care provided by the programs; and/or

(b) The treatment required can be appropriately provided by the program(s) or program component(s); and

(c) Alternatives for less intensive or restrictive treatment are not available.

(3) Treatment and discharge planning.

(a) An initial treatment plan shall be developed for each client upon admission.

(b) The multidisciplinary treatment team shall develop an individualized treatment plan for each client within fourteen days of admission to the facility.

(i) This plan shall be developed following a complete client assessment which shall include, but not be limited to assessment of physical, psychological, chronological age, developmental, family, educational, social, cultural, environmental, recreational, and vocational needs of the clients.

(ii) The individualized treatment plan shall be written and interpreted to the client, guardian, and client care personnel.

(iii) There shall be implementation of the individualized treatment plan by the multidisciplinary treatment team with written review and evaluation at least one time each thirty days. Modifications in the treatment plan shall be made as necessary. Implementation and review shall be evidenced in the clinical record.

(iv) The individualized treatment plan shall include a written discharge plan developed and implemented by the multidisciplinary treatment team.

(v) The individualized treatment plan shall be included in the clinical record.

(4) A written plan shall be developed describing the organization of clinical services. This plan shall address the following:

(a) Medical services.

(i) A comprehensive health assessment and medical history shall be completed and recorded by a physician

within five working days after admission unless a comprehensive health assessment and history have been completed within thirty days prior to admission and records are available to the residential treatment facility.

(ii) A complete neurological evaluation shall be completed when indicated.

(iii) A physician member of the clinical staff shall be responsible for the care of any medical condition that may be present during residential treatment.

(iv) Orders for medical treatment shall be signed by a physician.

(v) There shall be a physician on call at all times to advise regarding emergency medical problems. Provisions shall be made for emergency medical services when needed.

(vi) A psychiatric evaluation shall be completed and documented by a psychiatrist within thirty days prior or fourteen days following admission.

(vii) If there is not a child psychiatrist on the staff, there shall be a child psychiatrist available for consultation.

(b) Psychological services. There shall be a psychologist with documented evidence of skill and experience in working with children and youth available either on the clinical staff or by consultation, responsible for planning and reviewing psychological services and for developing a written set of guidelines for psychological services.

(c) Nursing service. There shall be a registered nurse, with training and experience in working with psychiatrically impaired children and youth, on staff as a full-time or part-time employee who shall be responsible for all nursing functions.

(d) Social work services. There shall be a social worker with experience in working with children and youth on staff as a full-time or part-time employee who shall be responsible for social work functions and the integration of these functions into the individualized treatment plan.

(e) Special services.

(i) There shall be an educational/vocational assessment of each client with appropriate educational/vocational programs developed and implemented or assured on the basis of that assessment.

(ii) Special services shall be provided by qualified persons as necessary to meet the needs of the clients.

(f) Occupational therapy services. There shall be an occupational therapist available who has experience in working with psychiatrically impaired children and youth responsible for occupational therapy functions and the integration of these functions into treatment.

(g) Recreational therapy services. There shall be a recreational therapist available who has had experience in working with psychiatrically impaired children and youth responsible for the recreational therapy functions and the integration of these functions into treatment.

(h) Food and dietary services.

(i) Food and dietary services shall be provided and managed by a person knowledgeable in food service.

(ii) Dietary service shall incorporate the services of a dietician in order to meet the individual nutritional needs of clients.

(iii) All menus shall be written at least one week in advance, approved by a dietician, and retained for one year.

(iv) There shall be client-specific physician orders for therapeutic diets served to clients. Therapeutic diets shall be prepared and served as prescribed. A current therapeutic diet manual approved by the dietician shall be used for planning and preparing therapeutic diets.

(v) Meals and nourishment shall provide a well balanced diet of good quality food in sufficient quantity to meet the nutritional needs of children and youth. Unless contraindicated, the dietary allowances of the food and nutrition board of the national research council adjusted for age, sex, and activity shall be used. Snacks of a nourishing quality shall be available as needed for clients.

(vi) Food service sanitation shall be governed by chapter 246-215 WAC, "food service sanitation."

(5) Other client safety and care requirements.

(a) Disciplinary policies and practices shall be stated in writing.

(i) Discipline shall be fair, reasonable, consistent, and related to the behavior of the client. Discipline, when needed, shall be consistent with the individualized treatment plan.

(ii) Abusive, cruel, hazardous, frightening, or humiliating disciplinary practices shall not be used. Seclusion and restraints shall not be used as punitive measures. Corporal punishment shall not be used.

(iii) Disciplinary measures shall be documented in the clinical record.

(b) Assault, abuse and neglect. Clients shall be protected from assault, abuse and neglect. Suspected or alleged incidents of nonaccidental injury, sexual abuse, assault, cruelty or neglect to a child or adolescent shall be reported to a law enforcement agency or to the department.

Reporting requirements for suspected incidents of child abuse and/or neglect shall comply with chapter 26.44 RCW.

(i) Staff and/or practitioners legally obligated to report suspected abuse or neglect include licensed practical nurses, registered nurses, physicians and their assistants, podiatrists, optometrists, chiropractors, dentists, social workers, psychologists, pharmacists, professional school personnel, and employees of the department.

(ii) Orientation material shall be made available to the facility personnel, clinical staff and/or consultants informing practitioners of their reporting responsibilities and requirements. Appropriate local police and department phone numbers shall be available to personnel and staff.

(iii) When suspected or alleged abuse is reported, the clinical record shall reflect the fact that an oral or written report has been made to the child protective services of the department or to a law enforcement agency. This note shall include the date and time that the report was made, the agency to which it was made and the signature of the person making the report. Contents of the report need not be included in the clinical record.

(iv) Conduct conforming with reporting requirements of this section or chapter 26.44 RCW shall not be deemed a violation of the confidential communication privileges of RCW 5.60.060 (3) and (4) and 18.83.110.

(c) Allowances, earnings, and expenditures shall be accounted for by the facility. When a client is discharged, he/she may be permitted to take the balance of his/her money or be fully informed about the transfer of his/her money to another facility or other transfer as permitted by state or federal law.

(d) Clients shall not be used to carry the responsibility for basic housekeeping and maintenance of the facility and equipment. Assigned tasks may be performed insofar as they are appropriate and are a part of the individualized treatment plan. Work assignments shall be adequately supervised and there shall be documentation of the work as part of the treatment program. Work assignments shall be appropriate to the age, physical and mental condition of the client.

(e) Written policy statements and procedures shall describe client rights as specified in WAC 275-55-170, 275-55-200(1), 275-55-260, and 275-55-270.

(f) There shall be current written policies and orders signed by a physician to guide the action of facility personnel when medical emergencies or a threat to life arise and a physician is not present.

(i) Medical policies shall be reviewed as needed and at least biennially and approved in writing by representatives of the medical, nursing, and administrative staffs.

(ii) There shall be current transfer agreement with an acute care general hospital. Medical and related data shall be transmitted with the client in the event of a transfer.

(g) Written policies and procedures shall address notification of legal guardian or next of kin in the event of a serious change in the client's condition, transfer of a client to another facility, elopement, death, or when unusual circumstances warrant.

(h) There shall be written policies and procedures addressing safety precautions to include:

(i) Smoking by personnel, clients, visitors, and others within the facility.

(ii) Provision for immediate emergency access to sleeping rooms, toilets, showers, bathrooms, or any other rooms occupied by clients.

(iii) Use and monitoring of seclusion rooms and restraints in accordance with WAC 275-55-263 (2)(c).

(iv) Availability and access to emergency supplies and equipment to include airways, bag resuscitators and other equipment as identified in the emergency medical policies.

(v) Summoning of internal or external resource agencies or persons, e.g., poison center, fire department, police.

(vi) Systems for routine preventative maintenance, checking and calibration of electrical, biomedical, and therapeutic equipment with documentation of the plan and dates of inspection.

(vii) Fire and disaster plans which include a documentation process and evidence of rehearsals on a regular basis.

(viii) Immediate actions or behaviors of facility staff when client behavior indicates that he/she is assaultive, out of control, or self-destructive. There shall be documentation that rehearsals of staff occur on a regular basis.

(i) There shall be written policies and procedures governing actions to be taken following any accident or incident which may be harmful or injurious to a client which shall include documentation in the clinical record.

(j) There shall be written policies addressing transportation of clients which shall include consideration of the following:

(i) When transportation is provided for clients in a vehicle owned by the facility, the vehicle shall be in safe operating condition as evidenced by preventive maintenance records.

(ii) Authorization of all drivers of vehicles transporting clients by administration of the facility. Drivers shall possess a current driver's license.

(iii) Observation of maximum safe vehicle driving capacity. Seat belts or other safety devices shall be provided for and used by each passenger.

(iv) Conditions under which clients may be transported in nonfacility-owned vehicles.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-323-050, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-323-050, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 82-23-004 (Order 1899), § 248-23-030, filed 11/4/82. Statutory Authority: RCW 43.20.050. 80-03-079 (Order 194), § 248-23-030, filed 3/3/80.]

**WAC 246-323-070 Infection control.** (1) There shall be written policies and procedures addressing infection control and isolation of clients (should isolation be necessary and medically appropriate for an infectious condition).

(2) There shall be reporting of communicable disease in accordance with WAC 246-100-075 and 246-100-080 as now or hereafter amended.

(3) There shall be a current system for reporting, investigating and reviewing infections among clients and personnel and for maintenance of records on such infections.

(4) Upon employment, each person shall have or provide documented evidence of a tuberculin skin test by the Mantoux method, unless medically contraindicated. When the skin test is negative (less than ten millimeters induration read at forty-eight to seventy-two hours), no further tuberculin skin test shall be required. A positive skin test shall consist of ten millimeters of induration, or greater, read at forty-eight to seventy-two hours. Positive reactors shall have a chest x-ray within ninety days of the first day of employment. Exemptions and specific requirements are as follows:

(a) Those with positive skin tests who have completed a recommended course of preventive or curative treatment, as determined by the local health officer, shall be exempted from testing.

(b) Records of test results, x-rays or exemptions to such shall be kept by the facility.

(5) Employees with communicable diseases in an infectious stage shall not be on duty.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-323-070, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-323-070, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 83-10-079 (Order 1960), § 248-23-050, filed 5/4/83; 82-23-004 (Order 1899), § 248-23-050, filed 11/4/82. Statutory Authority: RCW 43.20.050. 80-03-079 (Order 194), § 248-23-050, filed 3/3/80.]

**WAC 246-323-090 Physical environment.** (1) The residential treatment facility shall provide a safe, clean environment for clients, staff, and visitors.

(2) The residential treatment facility shall be accessible to physically handicapped persons.

(3) Client sleeping rooms.

(a) Each sleeping room shall be directly accessible from a corridor or a common use activity room or an area for clients.

(b) Sleeping rooms shall be outside rooms with a clear glass window area of approximately one-eighth of the usable floor area. Windows shall be shatter-proof and of the security type. This may be an operating security type window.

(c) No room more than three feet six inches below grade shall be used for the housing of clients. There shall be a minimum of ninety square feet of usable floor space in a single bedroom and multiclient rooms shall provide not less than eighty square feet of floor area per bed. The maximum capacity of a sleeping room shall be two clients. There shall not be less than seven and one-half foot ceiling height over the required floor area.

(d) There shall be provision for visual privacy from other clients as needed. This may be achieved through program assuring privacy in toileting, bathing, showering and dressing.

(e) Each client shall be provided an enclosed space suitable for hanging garments and storage of personal belongings within or convenient to his/her room. There shall be provision in the room or elsewhere for secure storage of client valuables.

(f) Each client shall have access to his/her room except when contraindicated by the determination of the treatment team staff.

(g) Each client shall be provided a bed at least thirty-six inches wide or appropriate to the special needs and size of the client with a cleanable, firm mattress and cleanable or disposable pillow.

(h) Sufficient room furnishings shall be provided and maintained in a clean and safe condition.

(i) Client beds shall be spaced so that they do not interfere with entrance, exit or traffic flow within the client's room. Client rooms shall be of a dimension and conformation allowing not less than three feet between beds.

(4) Each client-occupied floor of the facility shall provide one toilet and sink for each five clients or any fraction thereof. There shall be one bathing facility for each five clients or fraction thereof. If there are more than five clients, separate toilet and bathing facility for each sex are required. Privacy shall be assured.

(5) Adequate lighting shall be provided in all areas of the residential treatment facility.

(a) An adequate number of electrical outlets shall be provided to permit use of electrical fixtures appropriate to the needs of the program. These outlets shall be of a tamper-proof type.

(b) General lighting shall be provided for sleeping rooms. There shall be an electrical wall switch located at the door of each sleeping room to control one built-in light fixture within the room.

(c) Emergency lighting equipment, such as flashlights or battery-operated lamps, shall be available and maintained in operating condition.

(6) Ventilation.

(a) Ventilation of all rooms used by clients or personnel shall be sufficient to remove objectionable odors, excessive heat or condensation.

(b) Inside rooms, including toilets, bathrooms, and other rooms in which excessive moisture, odors or contaminants originate shall be provided with mechanical exhaust ventilation.

(7) There shall be an adequate supply of hot and cold running water under pressure which conforms with the standards of the state board of health, chapter 246-290 WAC.

(a) The hot water temperature at bathing fixtures used by clients shall be automatically regulated and shall not exceed one hundred twenty degrees Fahrenheit.

(b) There shall be hot water at a temperature of one hundred forty degrees Fahrenheit available for laundry equipment and dishwashing.

(c) There shall be devices to prevent backflow into the water supply system from fixtures where extension hoses or other cross-connections may be used.

(8) Linen and laundry.

(a) An adequate storage area and supply of clean linen, washcloths and towels shall be available for client use.

(b) At least one laundry room with washer and dryer located in an area separate from the kitchen and dining area shall be available.

(c) Soiled laundry/linen storage area and sorting areas shall be in a well-ventilated area physically separated from the clean linen handling area, the kitchen and the eating areas.

(9) Within the facility, at least one private area shall be provided for the visiting of clients and visitors.

(10) An adequate number of rooms shall be provided for group and individual therapy.

(a) These rooms shall be enclosed and reasonably sound-proofed as necessary to maintain confidentiality.

(b) When seclusion or maximum security rooms are required by program(s), at least one seclusion room intended for short-term occupancy, which provides for direct supervision by the treatment team staff shall be provided.

(i) Seclusion rooms and furnishings shall be designed to provide maximum security for clients.

(ii) Seclusion rooms shall have provisions for natural or artificial light and may be inside or outside rooms.

(iii) There shall be window lights in doors or other provisions for direct visibility of a client at all times during occupancy.

(iv) Seclusion rooms shall provide fifty square feet of floor space, exclusive of fixed equipment, with a minimum dimension of six feet.

(11) When physical examinations of clients are done on a regular basis within the facility, there should be an examination room available which provides privacy and adequate light. A handwashing facility and soap dispenser shall be available.

(12) When medical and nursing supplies and equipment are washed, disinfected, stored or handled within the facility, there shall be utility and storage areas which shall be designed and equipped for these functions providing for segregation of clean and sterile supplies and equipment from those that are contaminated.

(13) Housekeeping facilities.

(a) At least one service sink and housekeeping closet equipped with shelving shall be provided in a suitable setting.

(b) Sewage, garbage, refuse and liquid wastes shall be collected and disposed of in a manner to prevent the creation of an unsafe or unsanitary condition or nuisance.

(14) The heating system shall be operated and maintained to provide a comfortable, healthful temperature in rooms used by clients during the coldest weather conditions ordinarily encountered in the geographical location of the residential treatment facility.

(15) There shall be an area provided for secure storage of client records and for privacy of authorized personnel to read and document in the client records.

(16) There shall be a dining room(s) or area(s) large enough to provide table service for all clients. Appropriate furnishings shall be provided for dining.

(a) If a multipurpose room is used for dining and recreational activities or meetings, there shall be sufficient space to accommodate each of the activities without their interference with one another.

(b) At least forty square feet per bed shall be provided for the total combined area which is utilized for dining, social, educational, recreational activities and group therapies.

(17) There shall be at least one "nonpay" telephone readily accessible in the event of fire or other emergencies. There shall be a telephone which is readily available for use of clients (located so that privacy is possible).

(18) A safely maintained outdoor recreation area shall be available for use of clients.

**WAC 246-325-010 Definitions.** (1) "Abuse" means injury, sexual use or abuse, negligent or maltreatment of a resident by a person legally responsible for the resident's welfare under circumstances which indicate harm to the resident's health, welfare, and safety.

Person "legally responsible" shall include a guardian or a person to whom legal responsibility has been delegated (e.g., providers of residential care, day care, etc.).

(a) "Physical abuse" means damaging or potentially damaging, nonaccidental acts or incidents resulting in bodily injury or death.

(b) "Emotional abuse" means verbal behavior, harassment, or other actions resulting in emotional or behavioral problems, physical manifestations, disordered or delayed development.

(2) "Administrator" means the individual appointed as chief executive officer by the governing body of the facility, to act in the facility's behalf in the overall management of the residential rehabilitation center.

(3) "Adult residential rehabilitation center" or "center" means a residence, place, or facility designed and organized primarily to provide twenty-four-hour residential care, crisis and short-term care, and/or long-term individualized active rehabilitation and treatment for residents diagnosed or evaluated as psychiatrically impaired or chronically mentally ill as defined herein or in chapter 71.24 RCW.

(4) "Ambulatory" means physically and mentally able to:

(a) Walk unaided or move about independently with only the help of a cane, crutches, walkerette, walker, wheelchair, or artificial limb;

(b) Traverse a normal path to safety unaided by another individual;

(c) Get into and out of bed without assistance of another individual; and

(d) Transfer to a chair or toilet or move from place to place without assistance of another individual.

(5) "Authenticated" or "authentication" means authorization of a written entry in a record by means of a signature including minimally, first initial, last name, and title.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-323-090, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-323-090, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 82-23-004 (Order 1899), § 248-23-070, filed 11/4/82. Statutory Authority: RCW 43.20.050. 80-03-079 (Order 194), § 248-23-070, filed 3/3/80.]

(6) "Board and domiciliary care" means provision of daily meal service, lodging, and care offered within the living accommodation and includes the general responsibility for safety and well-being of the resident with provision of assistance in activities of daily living as needed.

(7) "Corporal punishment" means punishment or negative reinforcement accomplished by direct physical contact of a harmful or potentially harmful nature regardless of whether or not damage is actually inflicted.

(8) "Department" means the Washington state department of health.

(9) "Dietitian" means an individual meeting the eligibility requirements described in "Directory of Dietetic Programs Accredited and Approved," American Dietetic Association, Edition 100, 1980.

(10) "Discipline" means actions taken by personnel and staff to encourage the establishment of habits of self-control or to regulate unacceptable resident behavior. The individualized treatment plan shall define establishment of habits of self-control and unacceptable resident behavior.

(11) "Drug administration" means an act where a single dose of a prescribed drug or biological is given to a resident by an authorized person in accordance with all laws and regulations governing such acts. The complete act of administration entails removing an individual dose from the previously dispensed, properly labeled container (including the unit dose container), verifying the individual dose with the physician's orders, giving the individual dose to the proper resident, and properly recording the time and the dose given.

(12) "Drug dispensing" means an act entailing the interpretation of an order for a drug or biological and, pursuant to that order, proper selection, measuring, labeling, packaging, and issuance of the drug for a resident or for a service unit of the facility.

(13) "Dwelling" means any building or any portion thereof which is not an apartment house, lodging house or hotel, containing one or two guest rooms used, rented, leased, let, or hired out to be occupied for living purposes.

(14) "Governing body" means the individual or group responsible for establishing and maintaining the purposes and policies of the residential rehabilitation center.

(15) "Independent living skill training" consists of:

(a) Social skill training: A service designed to aid residents in learning appropriate social behavior in situations of daily living (e.g., the use of appropriate behavior in families, work settings, the residential center and other community settings).

(b) Self-care skills training: A service designed to aid residents in developing appropriate skills of grooming, self-care and other daily living skills such as eating, food preparation, shopping, handling money, the use of leisure time, and the use of other community and human services.

(16) "Individualized treatment plan or ITP" means a written statement of care to be provided to a resident

based upon assessment of his or her strengths, assets, interests, and problems. The statement shall include stipulation of an estimated time frame, identification of the process for attaining the goals, and a discharge plan.

(17) "Licensed practical nurse (LPN)" means an individual licensed under provisions of chapter 18.78 RCW.

(18) "Mental health professional" means the individuals described in RCW 71.05.020 and WAC 275-55-020.

(19) "Multidisciplinary treatment team" means the availability of a group comprised, when indicated, of individuals from various clinical disciplines, to include medicine, psychiatry, psychology, social work, nursing, occupational and recreational therapies, dietary, pharmacy, speech, and hearing services. Members of the team shall assess, plan, implement, and evaluate rehabilitation and treatment for residents under care.

(20) "Neglect" means negligent treatment or maltreatment or an act of omission, evincing a serious disregard of consequences of such a magnitude as to constitute a clear and present danger to a resident's health, welfare, and safety.

(a) "Physical neglect" means physical or material deprivation (e.g., lack of medical care, lack of supervision necessary for resident level of functioning, inadequate food, clothing, or cleanliness).

(b) "Emotional neglect" means acts such as rejection, lack of stimulation or other acts of commission or omission, resulting in emotional or behavioral problems, or physical manifestations.

(21) "New construction" means any of the following started after promulgation of these rules and regulations:

(a) New building(s) to be used as a part of the residential rehabilitation center;

(b) Addition or additions to or conversions, either in whole or in part, of the existing building or buildings to be used as part of the residential rehabilitation center;

(c) Alteration or modification other than minor alteration to a residential rehabilitation center or to a facility seeking licensure as a residential rehabilitation center;

(d) "Minor alteration" means any structural or functional modification within the existing residential rehabilitation center, without changing the approved use of the room or area. Minor alterations performed under this definition do not require prior approval of the department; however, this does not constitute a release from the applicable requirements contained in this chapter.

(22) "Occupational therapist" means an individual licensed as an occupational therapist under provisions of chapter 18.59 RCW.

(23) "Owner" means an individual, partnership or corporation, or the legal successor thereof, operating residential rehabilitation centers for psychiatrically impaired adults, whether owning or leasing the premises.

(24) "Paraprofessional" means a person qualified, through experience or training, or a combination thereof, deemed competent while under supervision of a mental health professional, to provide counseling, rehabilitation,

training, and treatment services to psychiatrically impaired adults. Such a person shall have, at a minimum:

(a) One year of training in the field of social, behavioral, or health sciences, and one year of experience in an approved treatment program for the mentally ill; or

(b) Two years of training in the field of social, behavioral, or health sciences; or

(c) Three years of work experience in an approved treatment program for the mentally ill.

(25) "Pharmacist" means an individual licensed by the state board of pharmacy to engage in the practice of pharmacy under the provisions of chapter 18.64 RCW.

(26) "Physician" means an individual licensed under the provisions of chapter 18.57 or 18.71 RCW.

(27) "Prescription" means the written or oral order for drugs or devices issued by a duly licensed medical practitioner in the course of his or her professional practice, as defined by Washington state statutes for legitimate medical purposes under the provisions of RCW 18.64.011(8).

(28) "Private adult treatment home" or "treatment home" means a dwelling which is the residence or home of one or more adults providing food, shelter, beds, and care for two or fewer psychiatrically impaired residents, provided these residents are detained under chapter 71.05 RCW and the home is certified as an evaluation and treatment facility under provisions of chapter 71.05 RCW.

(29) "Psychiatric impairment" means serious mental disorders, excluding mental retardation, substance abuse disorders, simple intoxication with alcohol or drugs, personality disorders, and specific developmental disorders as defined in the American Psychiatric Association's *Diagnostic and Statistical Manual of Mental Disorders*, third edition, revised (DSM-III-R), where one or more of the following symptomatic behaviors is exhibited:

(a) Bizarreness, severe self-destructiveness, schizophrenic ideation, or other signs or symptoms resulting from gross, on-going distortions in thought processes;

(b) Suicide attempts or other signs or symptoms associated with marked, severe, or chronic affective disorders;

(c) Chronic sexual maladjustment, or other grossly maladaptive behaviors, in accordance with subsection (29) (a) or (b) of this section.

(30) "Psychiatrist" means a physician having successfully completed a three-year residency program in psychiatry and is eligible for certification by the American Board of Psychiatry and Neurology (ABPN) as described in *Directory of Residency Training Programs Accredited by the Accreditation Council for Graduate Medical Education*, American Medical Association, 1981-1982, or eligible for certification by the American Osteopathic Board of Neurology and Psychiatry as described in *American Osteopathic Association Yearbook and Directory*, 1981-1982.

(31) "Psychologist" means a person licensed as a psychologist in the state of Washington under provisions of chapter 18.83 RCW.

(32) "Recreational therapist" means a person with a bachelors degree with a major or option in therapeutic

recreation or in recreation for ill and handicapped or a bachelors degree in a related field with equivalent professional experience.

(33) "Registered nurse" means an individual licensed under the provisions of chapter 18.88 RCW, regulating the practice of registered nursing in the state of Washington.

(34) "Rehabilitation services" means a combination of social, physical, psychological, vocational, and recreational services provided to strengthen and enhance the capability of psychiatrically impaired persons and to enable these persons to function with greater independence. The services include, but are not limited to, training in independent living skills.

(35) "Rehabilitation specialist" means mental health professionals, paraprofessionals, and medical personnel employed to work in a residential rehabilitation center to provide direct resident treatment, training, and rehabilitation services within the residential rehabilitation center, and includes full-time and part-time staff and consultants.

(36) "Resident" means an individual living in an adult residential rehabilitation center or private adult treatment home for the purpose of participating in rehabilitation and treatment for psychiatric impairment or an individual living in the facility for board and domiciliary care.

(37) "Restraint" means any apparatus or chemical used for the purpose of preventing or limiting free body movement.

(38) "Security window" means a window designed to inhibit exit, entry, and injury to a resident, incorporating approved, safe, transparent material.

(39) "Self-administration of medication" means the resident administers or takes his or her own medication from a properly labeled container: *Provided*, That the facility maintains the responsibility to assure medications are used correctly and the resident is responding appropriately.

(40) "Shall" means compliance with regulation is mandatory.

(41) "Should" means compliance with a regulation or standard is suggested or recommended, but not required.

(42) "Social worker" means an individual holding a masters degree in social work from a graduate school of social work.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-325-010, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 88-17-022 (Order 2668), § 248-25-002, filed 8/9/88; 82-17-009 (Order 1858), § 248-25-002, filed 8/6/82.]

**WAC 246-325-012 Licensure—Adult residential rehabilitation centers and private adult treatment homes.** Centers and treatment homes shall obtain a license under chapter 71.12 RCW. This chapter establishes minimum licensing standards for the safety, adequate care, and treatment of residents living in centers or treatment homes.

(1) Application for license.

(a) Applicants shall apply for a center or treatment home license on forms furnished by the department. The owner or a legal representative of the owner shall sign the application.

(b) The applicant shall furnish to the department full and complete information and promptly report any changes affecting the current accuracy of such information as to:

(i) The identity of each officer and director of the corporation, if the program is operated by legally incorporated entity, profit or nonprofit; and

(ii) The identity of each partner, if the program is a legal partnership.

(2) Disqualified applicants.

(a) The department shall consider each and every individual named in an application for a center or treatment home license, separately and jointly, as applicants. If the department deems anyone disqualified or unqualified in accordance with the law or these rules, a license may be denied, suspended, or revoked.

(b) The department may deny, suspend, or revoke a license for failure or refusal to comply with the requirements and rules established under provisions of chapter 71.12 RCW, and in addition, but not limited to, for any of the following:

(i) Obtaining or attempting to obtain a license by fraudulent means or misrepresentation;

(ii) Permitting, aiding, or abetting the commission of an illegal act on the premises of a center or treatment home;

(iii) Cruelty, abuse, neglect or assault, or indifference to the welfare of any resident;

(iv) Misappropriation of the property of the resident;

(v) Failure or inability to exercise fiscal accountability and responsibility toward the individual resident, the department, or the business community.

(c) The department shall consider the ability of each individual named in the license application prior to granting a license to determine:

(i) Ability of each individual to operate the center or treatment home in accordance with the law and these rules;

(ii) If there is cause for denial of a license to an individual named in the application for any of the following reasons:

(A) Previous denial of a license to operate a health or personal care facility in Washington state or elsewhere, or

(B) Civil or criminal conviction for operating a health or personal care facility without a license, or

(C) Previous revocation or suspension of a license to operate a health or personal care facility.

(d) The department shall deny a license for reasons listed in subsections (2)(c)(ii) of this section unless an applicant affirmatively establishes clear, cogent, and convincing evidence of ability to operate a center or treatment home in full conformance with all applicable laws, rules and regulations.

(3) Inspection of premises. Centers and treatment homes shall permit the department to visit and examine the premises of centers and treatment homes annually

and as necessary to ascertain compliance with chapter 71.12 RCW and this chapter.

(4) Denial, suspension, or revocation of a license; adjudicative proceeding.

(a) The department shall issue a letter to an applicant or licensee stating the department is denying an application, or is suspending, modifying, or revoking a license because:

(i) Findings upon inspection reveal failure or refusal of a center or treatment home to comply with chapter 71.12 RCW and this chapter; and

(ii) The criteria in WAC 246-325-012 (2)(b) are satisfied; and

(iii) The health, safety, or welfare of residents is endangered.

(b) The department's notice of a denial, suspension, modification, or revocation of a license shall be consistent with RCW 43.70.115. An applicant or license holder has the right to an adjudicative proceeding to contest the decision.

(c) A license applicant or holder contesting a department license decision shall within twenty-eight days of receipt of the decision:

(i) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and

(ii) Include in or with the application:

(A) A specific statement of the issue or issues and law involved;

(B) The grounds for contesting the department decision; and

(C) A copy of the contested department decision.

(d) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

(5) Submission of plans and programs for centers. Centers shall submit the following with an application for license unless already on file with the department:

(a) A written description of activities and functions containing, at a minimum, information concerning services to be provided and operational methods to be used affecting the physical plant and facilities required by this chapter;

(b) A plot plan showing street, driveways, water and sewage disposal systems, the location of buildings on the site, and grade elevations within ten feet of any building housing residents;

(c) Floor plans of each building housing residents with the following information:

(i) Identification of each resident's sleeping room by use of a lettering or numbering system, or some equivalent mechanism of identification;

(ii) The usable square feet of floor space in each room;

(iii) The clear window glass area in each resident's sleeping room;

(iv) The height of the lowest portion of the ceiling in any resident's sleeping room; and

(v) The floor elevations referenced to the grade level.

(6) New construction for centers.

(a) Centers shall submit the following to the department for review when new construction is contemplated:

(i) A written description of activities and functions containing, at a minimum, information concerning services to be provided and operational methods to be used affecting the physical plant and facilities required by these regulations;

(ii) Duplicate sets of preliminary plans drawn to scale and including:

(A) A plot plan showing streets, driveways, the water and sewage disposal systems, grade and location of building or buildings on the site; and

(B) The plans for each floor of the building or buildings, existing and proposed, designating the functions of each room and showing all fixed equipment.

(iii) A statement about:

(A) Source of the water supply;

(B) The method of sewage and garbage disposal; and

(C) A general description of construction and materials, including interior finishes.

(b) Licensees and applicants shall start construction only after department receipt and approval of:

(i) Specifications and duplicate sets of final plans drawn to scale;

(ii) Specifications showing complete details to contractors for construction of buildings; and

(iii) Plans and specifications including:

(A) Plot plans;

(B) Plans for each floor of each building designating the function of each room and showing all fixed equipment and the planned location of beds and other furniture in residents' sleeping rooms;

(C) Interior and exterior elevations, building sections, and construction details;

(D) A schedule of floor, wall and ceiling finishes, and the types and sizes of doors and windows;

(E) Plumbing, heating, ventilation, electrical systems, fire safety; and

(F) Specifications fully describing workmanship and finishes.

(c) Centers shall make adequate provisions for safety and comfort of residents as construction work takes place in or near occupied areas.

(d) Centers shall:

(i) Ensure all construction takes place in accordance with department approved final plans and specifications;

(ii) Consult with the department prior to making any changes from the approved plans and specifications;

(iii) Incorporate only department-approved changes into a construction project;

(iv) Submit modified plans or addenda on changes incorporated into a construction project to the department file on the project even though submission of the modified plans or addenda was not required by the department prior to approval.

(e) The department may require submission of modified plans or addenda for review prior to considering a proposed change or changes for approval.

(7) Compliance with other regulations.

(a) Centers shall comply with rules and regulations adopted by the Washington state fire marshal under provisions of RCW 71.12.485.

(b) Centers involved in construction shall comply with the state building code as required in chapter 19.27 RCW.

(c) Compliance with this chapter does not exempt centers from compliance with codes under other state authorities or local jurisdictions, such as state electrical codes or local zoning, building, and plumbing codes.

(8) Posting of license. Centers shall post the license in a conspicuous place on the premises.

(9) Transfer of ownership. A center shall transfer ownership or, if a corporation, sell a majority of stock, only after the transferee has received department approval of the license application and reported change of center administrator.

(10) Exemptions.

(a) The secretary or designee may exempt a center or treatment home from compliance with specified subsections of these regulations when the department ascertains such exemptions may be made in an individual case without jeopardizing the safety or health of the residents in a particular center or treatment home.

(b) Centers and treatment homes shall keep all written exemptions granted by the department pursuant to this chapter on file in the center or treatment home.

[Statutory Authority: RCW 43.70.040, 34.05.220 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-012, filed 12/23/91, effective 1/23/92. **WAC 246-325-015 Licensure—Private adult treatment home.** Private adult treatment homes shall be licensed under chapter 71.12 RCW, private establishments. This chapter establishes minimum licensing rules and regulations for safety and adequate care of psychiatrically-impaired clients living in a private adult treatment home. WAC 246-325-010 (1), (2), (3), (4), (6), (8), (9), and (10) shall apply. All other rules and regulations for private adult treatment homes are contained in WAC 246-325-010, 246-325-100, and 246-325-120.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-015, filed 12/23/91, effective 1/23/92. Statutory Authority: Chapter 71.12 RCW. 82-17-009 (Order 1858), § 248-25-015, filed 8/6/82.]

**WAC 246-325-025 HIV/AIDS education and training.** Adult residential rehabilitation centers and private adult treatment homes shall:

(1) Verify or arrange for appropriate education and training of personnel on the prevention, transmission, and treatment of human immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS) consistent with RCW 70.24.310; and

(2) Use infection control standards and educational material consistent with the approved curriculum manual *Know - HIV/AIDS Prevention Education for Health Care Facility Employees*, January 1991, published by the office on HIV/AIDS.

[Statutory Authority: RCW 43.70.040, 70.24.310 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-025, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-325-025, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.24.310, 89-21-038 (Order 3), § 248-25-025, filed 10/12/89, effective 11/12/89.]

**WAC 246-325-030 Resident care services in adult residential rehabilitation centers or private adult treatment homes.** (1) Policies and procedures. Centers shall establish and follow written policies regarding admission criteria and treatment methods ensuring:

(a) Admission of residents in keeping with stated policies and limited to residents for whom a center is qualified by staff, services, and equipment, to give adequate care;

(b) Acceptance of a psychiatrically impaired resident based upon prior assessment by a mental health professional as defined in chapter 71.05 RCW or by a community mental health program under chapter 71.24 RCW.

(2) Resident assessments. Centers shall require documentation of the assessment of each psychiatrically impaired resident by a mental health professional or program to establish:

(a) Resident requirements are appropriate to the intensity and restrictions of care available and provided;

(b) Resident services required can be appropriately provided by the center or treatment home program or program components; and

(c) The resident is free of a physical condition requiring medical or nursing care available only in a hospital.

(3) Board and domiciliary care. Centers may admit and provide services for residents requiring only board and domiciliary care.

(4) Resident admission limitations. Unless excepted in writing by the Washington state fire marshal and the department, centers and treatment homes shall prohibit admission and retention of individuals who:

(a) Need physical restraints,  
 (b) Are not ambulatory,  
 (c) Lack adequate cognitive functioning to enable response to a fire alarm, or

(d) Are unable to evacuate the premises in an emergency without assistance.

(5) Individual treatment and discharge planning.

(a) Centers and treatment homes shall ensure an initial assessment of each resident within seventy-two hours of admission with development of a provisional individualized treatment plan (ITP) for each psychiatrically impaired resident.

(b) A multidisciplinary treatment team shall develop a written ITP for each resident within fourteen days of admission.

(i) The center or treatment home shall provide interpretation of the ITP to resident care staff.

(ii) Each resident and/or an individual selected or chosen by the resident shall be provided an opportunity to participate in development of the ITP.

(iii) The center or treatment home and the multidisciplinary treatment team shall implement the ITP with written review and evaluation as necessary and at least once each thirty days with:

(A) Modifications in the ITP as necessary; and

(B) Implementation and review evidenced in the clinical record.

(iv) Centers and treatment homes shall include the ITP in the clinical record.

(6) Treatment and rehabilitation delivery services. Centers and treatment homes shall develop a written plan describing the organization of services. Consistent with the plan, policies and procedures shall address the following:

(a) Requirements for physician authentication of a completed comprehensive health assessment and medical history within three working days after admission unless a comprehensive health assessment or review performed within the previous thirty days is available upon admission;

(b) Arrangements for physician care of any resident with a medical condition present;

(c) Signing of orders for medical treatment by a physician or other authorized practitioner acting within the scope of Washington state statutes defining practice;

(d) Provisions for emergency medical services;

(e) Completion of a psychiatric evaluation for each psychiatrically impaired resident with authentication by a psychiatrist within thirty days prior to or three working days following admission;

(f) Requirements for a registered nurse, with training and experience in working with psychiatrically impaired adults as follows:

(i) Employed full or part-time or under contract or written agreement; and

(ii) Responsible for all nursing functions.

(g) Access to and availability of mental health professionals, occupational therapists, recreational therapists, LPN, rehabilitation specialists, and paraprofessionals with experience in working with psychiatrically impaired adults, as necessary to develop, integrate, and implement the ITP.

(h) Rehabilitation services under long-term care to include:

(i) An educational and vocational assessment of each resident with appropriate educational and vocational programs developed and implemented or arranged on the basis of the assessment; and

(ii) Training in independent living skills provided by qualified persons as necessary to meet the needs of the residents.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-030, filed 12/23/91, effective

1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-325-030, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 88-17-022 (Order 2668), § 248-25-030, filed 8/9/88; 82-17-009 (Order 1858), § 248-25-030, filed 8/6/82.]

**WAC 246-325-045 Food storage--Preparation--Service.** (1) Centers shall maintain food service facilities and practices complying with chapter 246-215 WAC.

(2) Centers and treatment homes shall provide:

(a) A minimum of three meals in each twenty-four hour period;

(b) Evidence of written approval by the department when a specific request for fewer than three meals per twenty-four hour period is granted;

(c) A maximum time interval between the evening meal and breakfast of fourteen hours unless a snack contributing to the daily nutrient total is served or made available to all residents between the evening meal and breakfast;

(d) Dated, written menus which:

(i) Are written at least one week in advance,

(ii) Are retained six months, and

(iii) Provide a variety of foods with cycle duration of at least three weeks before repeating.

(e) Substitutions for food on menus of comparable nutrient value;

(f) Palatable, attractively served diets, meals, and nourishments sufficient in quality, quantity, and variety to meet the recommended dietary allowances of the food and nutrition board, national research council, 1980 edition; and

(g) A record of all food and snacks served and contributing to nutritional requirements.

(3) Centers and treatment homes shall prepare and serve:

(a) Resident specific modified or therapeutic diets when prescribed and as prescribed by a physician with menus approved by a dietitian; and

(b) Only those nutrient concentrates and supplements prescribed in writing by a physician.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-045, filed 12/23/91, effective 1/23/92. Statutory Authority: Chapter 71.12 RCW. 88-17-022 (Order 2668), § 248-25-045, filed 8/9/88.]

**WAC 246-325-050 Infection control in adult residential rehabilitation centers.** (1) Centers shall establish written policies and procedures addressing infection control and isolation of residents (should isolation be necessary and medically appropriate for an infectious condition).

(2) Centers shall report communicable disease in accordance with chapter 246-100 WAC.

(3) Centers shall maintain:

(a) A current system for reporting, investigating, and reviewing infections among residents and personnel; and

(b) A system for keeping records on such infections.

(4) Centers shall require off-duty status or restrict resident contact where an employee is known to have a

communicable disease in an infectious stage and is likely to be spread by casual contact.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-050, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-325-050, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 88-17-022 (Order 2668), § 248-25-050, filed 8/9/88; 82-17-009 (Order 1858), § 248-25-050, filed 8/6/82.]

**WAC 246-325-060 Clinical records.** (1) Centers shall maintain and retain:

(a) A well-defined clinical record system, adequate and experienced staff;

(b) Adequate facilities, equipment, and supplies necessary to the development, maintenance, security, control, retrieval, analysis, use, and preservation of resident care data; and

(c) A person demonstrating competency and experience or training in clinical record administration responsible for the clinical record system.

(2) Centers and treatment homes shall document and maintain individual resident records and a record system in accordance with recognized principles of clinical record management to include:

(a) Ready access for appropriate members of staff;

(b) Systematic methods for identifying the record of each resident; and

(c) Legible, dated, authenticated entries (ink, type-written, computer terminal, or equivalent) on all diagnostic and treatment procedures and other clinical events].

(3) Centers shall have current policies and procedures related to the clinical record system including:

(a) An established format and documentation expectations for the clinical record of each resident;

(b) Control of access to and release of data in clinical records including confidentiality of information contained in records and release of information in accordance with chapter 71.05 RCW;

(c) Retention, preservation, and final disposal of clinical records and other resident care data to ensure:

(i) Retention and preservation of:

(A) Each resident's clinical record for a period of no less than five years, or for five years following the resident's most recent discharge, whichever is the longer period of time;

(B) A complete discharge summary, authenticated by an appropriate member of the staff, for a period of no less than ten years or no less than ten years following the resident's most recent discharge, whichever is the longer period of time; and

(C) Reports of tests related to the psychiatric condition of each resident for a period of no less than ten years or no less than ten years following the resident's most recent discharge, whichever is the longer period of time.

(ii) Final disposal of any resident clinical record, indices, or other reports permitting identification of the individual shall be accomplished so retrieval and subsequent use of data contained therein are impossible;

(iii) In the event of transfer of ownership of the center or treatment home, resident clinical records, indices, and reports remain in the center or treatment home, retained and preserved by the new operator in accordance with this section;

(iv) Center or treatment home arrangements for preservation of clinical records, reports, indices, and resident data in accordance with this section if the center or treatment home ceases operation; and

(v) Department approval of plans for preservation and retention of records prior to cessation of operation.

(d) Psychiatric diagnoses, abbreviations, and terminology consistent with the American Psychiatric Association's *Diagnostic and Statistical Manual of Mental Disorders*, third edition, revised (DSM-III-R), physical diagnoses, abbreviations, and terminology consistent with *International Classification of Diseases*, ninth revision, Clinical Modification (ICD-9-CM);

(e) Clinical records identifying information, assessments by the multidisciplinary treatment team, regular progress notes by members of the multidisciplinary treatment team, individualized treatment plans, final evaluation, and a discharge summary;

(f) A master resident index;

(g) Identifying information;

(h) Assessments and regular progress notes by the multidisciplinary treatment team;

(i) Individualized treatment plans; and

(j) Final evaluation and discharge summary.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-060, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-325-060, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 88-17-022 (Order 2668), § 248-25-060, filed 8/9/88; 82-17-009 (Order 1858), § 248-25-060, filed 8/6/82.]

**Reviser's note:** The bracket in the text of the above section occurred in the copy filed by the agency.

**WAC 246-325-070 Physical environment in adult residential rehabilitation centers.** (1) Each center shall provide a safe, clean environment for residents, staff, and visitors.

(2) Centers shall provide:

(a) A ground floor accessible to the physically handicapped; and

(b) Program activity areas and sleeping quarters for any physically handicapped residents on floors meeting applicable standards.

(3) Residents' sleeping rooms.

(a) Centers shall provide sleeping rooms which:

(i) Are directly accessible from a corridor or common-use activity room or an area for residents;

(ii) Are outside rooms with a clear glass window area of approximately one-tenth of the usable floor area;

(iii) Have windows above the ground floor level appropriately screened or have a security window;

(iv) Provide a minimum of eighty square feet of usable floor space in a single-bed room;

(v) Provide no less than seventy square feet of usable floor area per bed in multi-bed rooms;

(vi) Accommodate no more than four residents;

(vii) Provide no less than seven and one-half feet of ceiling height over the required floor area;

(viii) Provide space so beds do not interfere with the entrance, exit, or traffic flow within the room;

(ix) Have dimensions and conformation allowing placement of beds three feet apart; and

(x) Have room furnishings maintained in a clean, safe condition.

(b) Centers shall prohibit use of any room more than three feet, six inches below grade as a resident sleeping room.

(c) Centers shall provide:

(i) Visual privacy for each resident as needed and may achieve this through a program assuring privacy in toileting, bathing, showering, and dressing;

(ii) An enclosed space suitable for hanging garments and storage of personal belongings for each resident within or convenient to his or her room; and

(iii) Secure storage of resident valuables in the room or elsewhere.

(d) Centers shall provide each resident access to his or her room with the following exceptions:

(i) If appropriate, center rules may specify times when rooms are unavailable; and/or

(ii) An ITP may specify restrictions on use of a room.

(e) Centers shall provide a bed for each resident which is:

(i) At least thirty-six inches wide or appropriate to the special needs and size of the resident; and

(ii) Provided with a clean, cleanable, firm mattress and a clean, cleanable, or disposable pillow.

(4) Centers shall ensure that each resident occupied floor or level provides:

(a) One toilet and sink for each eight residents or any fraction thereof;

(b) A bathing facility for each twelve residents or fraction thereof; and

(c) Arrangements for privacy in toilets and bathing facilities.

(5) Centers shall provide:

(a) Adequate lighting in all areas;

(b) An adequate number of electrical outlets to permit use of electrical fixtures appropriate to the needs of residents and consistent with the program;

(c) General lighting for sleeping rooms with an electrical wall switch located at the door of each sleeping room to control one built-in light fixture within the room; and

(d) Emergency lighting equipment such as flashlights or battery-operated lamps available and maintained in operating condition.

(6) Ventilation.

(a) Centers shall provide ventilation of all rooms used by residents or personnel sufficient to remove objectionable odors, excessive heat, or condensation.

(b) Centers shall provide appropriate vents in inside rooms, including toilets, bathrooms, and other rooms where excessive moisture, odors, or contaminants originate.

(7) Centers shall provide:

(a) An adequate supply of hot and cold running water under pressure conforming with standards of the state board of health, chapter 246-290 WAC;

(b) Hot water temperature at bathing fixtures not to exceed one hundred twenty degrees Fahrenheit;

(c) Hot water at a temperature of one hundred forty degrees Fahrenheit available for laundry equipment; and

(d) Devices to prevent back-flow into the water supply system from fixtures where extension hoses or other cross connections may be used.

(8) Linen and laundry. Centers shall provide:

(a) An adequate storage area and supply of clean linen, washcloths, and towels available for resident use;

(b) Availability of at least one laundry room with washer and dryer located in an area separated from the kitchen and dining area; and

(c) Well-ventilated soiled laundry or linen storage and sorting areas physically separated from the clean linen handling area, the kitchen, and the eating areas.

(9) Centers shall provide at least one private area within the center for visitation of residents and guests.

(10) Centers shall provide an adequate number of therapy and examination rooms for:

(a) Group and individual therapy reasonably sound-proofed to maintain confidentiality;

(b) Seclusion or maximum security if required by a program, unless immediately accessible in a hospital, with each room:

(i) Under direct staff supervision;

(ii) Intended for short-term occupancy only;

(iii) Designed and furnished to provide maximum security and safety for occupant;

(iv) An inside or outside room with natural or artificial light;

(v) Provided with window lights in door or other provisions for direct visibility of an occupant at all times; and

(vi) A minimum of fifty square feet of floor space, exclusive of fixed equipment and a minimum dimension of six feet.

(c) Physical examination of residents when performed on a routine basis within the center including:

(i) Provisions for privacy and adequate light;

(ii) A handwashing facility with single-use disposable towels or equivalent; and

(iii) A soap dispenser.

(11) If seclusion or maximum security rooms are not required by program, these shall be immediately available in a hospital or other licensed facility.

(12) When medical and nursing supplies and equipment are washed, disinfected, stored, or handled within the center, centers shall provide utility and storage areas designed and equipped for these functions providing for segregation of clean and sterile supplies and equipment from contaminated supplies and equipment.

(13) Centers shall provide housekeeping facilities including:

(a) At least one service sink and housekeeping closet equipped with shelving; and

(b) Provision for collection and disposal of sewage, garbage, refuse, and liquid wastes in a manner to prevent creation of an unsafe or unsanitary condition or nuisance.

(14) Centers shall provide:

(a) A heating system operated and maintained to provide a comfortable, healthful temperature in rooms used by residents;

(b) An area for secure storage of resident records;

(c) An area providing privacy for authorized personnel to read and document in the resident records;

(d) An appropriately furnished dining room or rooms or area or areas large enough to provide table service for all residents;

(e) Sufficient space to accommodate various activities when a multipurpose room is used for dining as well as recreational activities or meetings; and

(f) At least forty square feet per bed for the total combined area utilized for dining, social, educational, recreational activities, and group therapies.

(15) Centers shall provide:

(a) Ready access to one "nonpay" telephone in the event of fire or other emergencies; and

(b) A readily available telephone for use by residents located so privacy is possible.

(16) Centers shall arrange availability of a safely maintained outdoor recreational area for use of residents.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-070, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-325-070, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 88-17-022 (Order 2668), § 248-25-070, filed 8/9/88; 82-17-009 (Order 1858), § 248-25-070, filed 8/6/82.]

**WAC 246-325-100 Resident care services in private adult treatment homes.** (1) The treatment home shall have written policies regarding admission criteria and treatment methods. Admission of residents shall be in keeping with stated policies and limited to psychiatrically impaired residents for whom the home can provide adequate safety, treatment, and care.

(2) Rules and regulations contained in this chapter shall apply except for the following:

(a) WAC 246-325-012 (5), (6), (8), and (9);

(b) WAC 246-325-020;

(c) WAC 246-325-030 (1), (2), (6)(f);

(d) WAC 246-325-035 (6)(j)(i)-(ii) and (6)(k);

(e) WAC 246-325-040;

(f) WAC 246-325-050; and

(g) WAC 246-325-070.

(3) The treatment home shall:

(a) Require a specific order or prescription by a physician or other legally authorized practitioner for resident medications;

(b) Assume responsibility for security and monitoring of resident medications including:

(i) Locked storage or other means to keep medication inaccessible to unauthorized persons;

(ii) Refrigeration of medication when required;

(iii) External and internal medications stored separately (separate compartments);

(iv) Each medication stored in original labeled container;

(v) Medication container labels including the name of the resident and the date of purchase;

(vi) Limiting disbursement and access to licensee except for self-administered medications;

(vii) Medications dispersed only on written approval of an individual or agency having authority by court order to approve medical care;

(viii) Medications dispersed only as specified on the prescription label or as otherwise authorized by a physician; and

(ix) Ensuring self-administration of medications by a resident in accordance with the following:

(A) The resident shall be physically and mentally capable of properly taking his or her own medicine; and

(B) Prescription drugs, over-the-counter drugs, and other medical materials used by individuals shall be kept so the prescription drugs are not available to other individuals.

(4) Clinical records and record systems shall comply with WAC 246-325-060.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-100, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-325-100, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 88-17-022 (Order 2668), § 248-25-100, filed 8/9/88; 82-17-009 (Order 1858), § 248-25-100, filed 8/6/82.]

**WAC 246-326-001 Purpose.** Regulations relating to alcoholism treatment facilities are hereby adopted pursuant to chapter 71.12 RCW. The purpose of these regulations is to provide health and safety standards and procedures for the issuance, denial, suspension, and/or revocation of licenses for facilities, other than hospitals regulated pursuant to chapter 246-318 or 246-322 WAC, maintained and operated primarily for receiving or caring for alcoholics.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-326-001, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-326-001, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 84-17-010 (Order 2130), § 248-26-001, filed 8/3/84. Formerly WAC 248-22-500.]

**WAC 246-326-010 Definitions.** For the purpose of these regulations, the following words and phrases shall have the following meanings unless the context clearly indicates otherwise. All adjectives and adverbs such as adequate, approved, competent, qualified, necessary, reasonable, reputable, satisfactory, sufficiently, effectively, appropriately, or suitable used in these rules and regulations to qualify an individual, a procedure, equipment, or building shall be as determined by the Washington state department of health.

(1) "Abuse," other than substance or alcohol abuse, means the injury, sexual use, or sexual mistreatment of an individual patient by any person under circumstances which indicate the health, welfare, and safety of the patient is harmed thereby.

(a) "Physical abuse" means damaging or potentially damaging nonaccidental acts or incidents which may result in bodily injury or death.

(b) "Emotional abuse" means verbal or nonverbal actions, outside of accepted therapeutic programs, which are degrading to a patient or constitute harassment.

(2) "Administrator" means an individual appointed as the chief executive officer by the governing body of a facility to act in the facility's behalf in the overall management of the alcoholism treatment facility.

(3) "Alcoholic" means a person with alcoholism.

(4) "Alcoholism" means an illness characterized by lack of control as to the consumption of alcoholic beverages, or the consumption of alcoholic beverages to the extent an individual's health is substantially impaired or endangered, or his or her social or economic function is substantially disrupted.

(5) "Alcoholism counselor" means an individual having adequate education, experience, and knowledge regarding the nature and treatment of alcoholism and knowledgeable about community resources providing services alcoholics may need and who knows and understands the principles and techniques of alcoholism counseling with minimal requirements to include:

(a) A history of no alcohol or other drug misuse for a period of at least two years immediately prior to time of employment as an alcoholism counselor and no misuse of alcohol or other drugs while employed as an alcoholism counselor;

(b) A high school diploma or equivalent;

(c) Satisfactory completion of at least twelve quarter or eight semester credits from a college or university, including at least six quarter credits or four semester credits in specialized alcoholism courses.

(6) "Alcoholism treatment facility" means a private place or establishment, other than a licensed hospital, operated primarily for the treatment of alcoholism.

(7) "Alteration" means changes requiring construction in an existing alcoholism treatment facility.

"Minor alteration" means any physical or functional modification within existing alcoholism treatment facilities not changing the approved use of a room or area. Minor alterations performed under this definition do not require prior review of the department; however, this does not constitute a release from any applicable requirements herein.

(iii) External and internal medications stored separately (separate compartments);

(iv) Each medication stored in original labeled container;

(v) Medication container labels including the name of the resident and the date of purchase;

(vi) Limiting disbursement and access to licensee except for self-administered medications;

(vii) Medications dispersed only on written approval of an individual or agency having authority by court order to approve medical care;

(viii) Medications dispersed only as specified on the prescription label or as otherwise authorized by a physician; and

(ix) Ensuring self-administration of medications by a resident in accordance with the following:

(A) The resident shall be physically and mentally capable of properly taking his or her own medicine; and

(B) Prescription drugs, over-the-counter drugs, and other medical materials used by individuals shall be kept so the prescription drugs are not available to other individuals.

(4) Clinical records and record systems shall comply with WAC 246-325-060.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-325-100, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-325-100, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 88-17-022 (Order 2668), § 248-25-100, filed 8/9/88; 82-17-009 (Order 1858), § 248-25-100, filed 8/6/82.]

**WAC 246-326-010 Definitions.** For the purpose of these regulations, the following words and phrases shall have the following meanings unless the context clearly indicates otherwise. All adjectives and adverbs such as adequate, approved, competent, qualified, necessary, reasonable, reputable, satisfactory, sufficiently, effectively, appropriately, or suitable used in these rules and regulations to qualify an individual, a procedure, equipment, or building shall be as determined by the Washington state department of health.

(1) "Abuse," other than substance or alcohol abuse, means the injury, sexual use, or sexual mistreatment of an individual patient by any person under circumstances which indicate the health, welfare, and safety of the patient is harmed thereby.

(a) "Physical abuse" means damaging or potentially damaging nonaccidental acts or incidents which may result in bodily injury or death.

(b) "Emotional abuse" means verbal or nonverbal actions, outside of accepted therapeutic programs, which are degrading to a patient or constitute harassment.

(2) "Administrator" means an individual appointed as the chief executive officer by the governing body of a facility to act in the facility's behalf in the overall management of the alcoholism treatment facility.

(3) "Alcoholic" means a person with alcoholism.

(4) "Alcoholism" means an illness characterized by lack of control as to the consumption of alcoholic beverages, or the consumption of alcoholic beverages to the extent an individual's health is substantially impaired or endangered, or his or her social or economic function is substantially disrupted.

(5) "Alcoholism counselor" means an individual having adequate education, experience, and knowledge regarding the nature and treatment of alcoholism and knowledgeable about community resources providing services alcoholics may need and who knows and understands the principles and techniques of alcoholism counseling with minimal requirements to include:

(a) A history of no alcohol or other drug misuse for a period of at least two years immediately prior to time of employment as an alcoholism counselor and no misuse of alcohol or other drugs while employed as an alcoholism counselor;

(b) A high school diploma or equivalent;

(c) Satisfactory completion of at least twelve quarter or eight semester credits from a college or university, including at least six quarter credits or four semester credits in specialized alcoholism courses.

(6) "Alcoholism treatment facility" means a private place or establishment, other than a licensed hospital, operated primarily for the treatment of alcoholism.

(7) "Alteration" means changes requiring construction in an existing alcoholism treatment facility.

"Minor alteration" means any physical or functional modification within existing alcoholism treatment facilities not changing the approved use of a room or area. Minor alterations performed under this definition do not require prior review of the department; however, this does not constitute a release from any applicable requirements herein.

(8) "Area," except when used in reference to a major section of an alcoholism treatment facility, means a portion of a room containing the equipment essential to carry out a particular function and separated from other facilities of the room by a physical barrier or adequate space.

(9) "Authenticated" means written authorization of any entry in a patient treatment record by means of a signature including, minimally, first initial, last name, and title.

(10) "Authentication record" means a document which is part of each patient treatment record and includes identification of all individuals initialing entries in the treatment record: Full printed name, signature as defined in WAC 246-326-010(9), title, and initials that may appear after entries in the treatment record.

(11) "Bathing facility" means a bathtub or shower.

(12) "Counseling, group" means an interaction between two or more patients and alcoholism counselor or counselors for the purpose of helping the patients gain better understanding of themselves and develop abilities to deal more effectively with the realities of their environments.

(13) "Counseling, individual" means an interaction between a counselor and a patient for the purpose of helping the patient gain a better understanding of self and develop the ability to deal more effectively with the realities of his or her environment.

(14) "Detoxification" means care or treatment of an intoxicated person during a period where the individual recovers from the effects of intoxication.

(a) "Acute detoxification" means a method of withdrawing a patient from alcohol where nursing services and medications are routinely administered to facilitate the patient's withdrawal from alcohol.

(b) "Subacute detoxification" means a method of withdrawing a patient from alcohol utilizing primarily social interaction between patients and staff within a supportive environment designed to facilitate safety for patients during recovery from the effects of intoxication with no medications administered by the staff.

(15) "Detoxified" means withdrawn from the consumption of alcohol and recovered from the effects of intoxication and any associated acute physiological withdrawal reactions.

(16) "Department" means the Washington state department of health.

(17) "Facilities" means a room or area and/or equipment to serve a specific function.

(18) "General health supervision" means provision of the following services as indicated:

(a) Reminding a patient to self-administer medically prescribed drugs and treatments;

(b) Encouraging a patient to follow a modified diet and rest or activity regimen when one has been medically prescribed;

(c) Reminding and assisting a patient to keep appointments for health care services, such as appointments with physicians, dentists, home health care services, or clinics;

(d) Encouraging a patient to have a physical examination if he or she manifests signs and symptoms of an illness or abnormality for which medical diagnosis and treatment are indicated.

(19) "Governing body" means an individual or group responsible for approving policies related to operation of an alcoholism treatment facility.

(20) "Grade" means the level of the ground adjacent to the building measured at the required windows. The ground shall be level or sloped downward for a distance of at least ten feet from the wall of the building.

(21) "Inpatient" means a patient to whom the alcoholism treatment facility is providing board and room on a twenty-four-hour-per-day basis.

(22) "Intoxication" means acute or temporary impairment of an individual's mental or physical functioning caused by alcohol in the body.

(23) "Intoxicated" means in the state of intoxication.

(24) "Lavatory" means a plumbing fixture of adequate size and proper design for washing hands.

(25) "Legend drug" means any drug required by state law or regulation of the state board of pharmacy to be dispensed on prescription only or is restricted to use by practitioners only.

(26) "Licensed nurse" means either a registered nurse or a licensed practical nurse.

(a) "Licensed practical nurse" means an individual licensed pursuant to chapter 18.78 RCW.

(b) "Registered nurse" means an individual licensed pursuant to chapter 18.88 RCW.

(27) "May" means permissive or possible at the discretion of the department.

(28) "Neglect" means negligent treatment or mal-treatment; an act or omission evincing a disregard of consequences of such magnitude as to constitute a clear and present danger to a patient's health, welfare, and/or safety.

(29) "New construction" means any of the following:

(a) New building to be used as an alcoholism treatment facility.

(b) Additions to existing buildings to be used as an alcoholism treatment facility.

(c) Conversion of existing buildings or portions thereof for use as an alcoholism treatment facility.

(d) Alterations.

(30) "Owner" means an individual, firm, partnership, corporation, company, association, or joint stock association or the legal successor thereof operating an alcoholism treatment facility whether he or she owns or leases the premises.

(31) "Patient" means any individual receiving services for the treatment of alcoholism.

(32) "Pharmacist" means an individual licensed as a pharmacist in the state of Washington pursuant to provisions of chapter 18.64 RCW.

(33) "Physician" means an individual licensed under the provisions of chapter 18.71 RCW Physicians, or chapter 18.57 RCW Osteopathy—Osteopathic medicine and surgery.

(34) "Room" means a space set apart by floor to ceiling partitions on all sides with proper access to a corridor or a common-use living room or area and with all openings provided with doors or windows.

(35) "Secretary" means the secretary of the Washington state department of health.

(36) "Shall" means compliance is mandatory.

(37) "Should" means a suggestion or recommendation but not a requirement.

(38) "Through traffic" means traffic for which the origin and destination are outside the room or area serving as a passageway.

(39) "Toilet" means a disposal apparatus consisting of a hopper fitted with a seat and flushing device, used for urination and defecation.

(40) "Usable floor space" means, in reference to patient sleeping room, the floor space exclusive of vestibules and closets, wardrobes, or portable lockers.

(41) "Utility sink" means a plumbing fixture of adequate size and proper design for filling and emptying mop buckets.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-326-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-326-010, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 84-17-010 (Order 2130), § 248-26-010, filed 8/3/84. Formerly WAC 248-22-501.]

**WAC 246-326-020 Licensure.** (1) Application for license.

(a) An application for an alcoholism treatment facility license shall be submitted on forms furnished by the department. An application shall be signed by the owner of the facility, or his or her legal representative, and the administrator.

(b) The applicant shall furnish to the department full and complete information, and promptly report any changes.

(2) Disqualified applicants.

(a) Each and every individual named in an application for an alcoholism treatment facility license shall be considered separately and jointly as applicants and, if anyone be deemed unqualified by the department in accordance with the law or these rules and regulations, the license may be denied, suspended, or revoked.

(b) A license may be denied, suspended, or revoked for failure or refusal to comply with the requirements established by chapter 71.12 RCW or with these rules and regulations and, in addition, any of the following:

(i) Obtaining or attempting to obtain a license by fraudulent means or misrepresentation;

(ii) Permitting, aiding, or abetting the commission of any illegal act on the premises of the alcoholism treatment facility;

(iii) Cruelty, assault, abuse, neglect, or indifference to the welfare of any patient;

(iv) Misappropriation of the property of the patients; or

(v) Failure or inability to exercise fiscal accountability and responsibility toward the individual patient, the department, or the business community.

(c) Before granting a license to operate an alcoholism treatment facility, the department shall consider the ability of each individual named in the application to operate the alcoholism treatment facility in accordance with the law and these regulations. Individuals having been previously denied a license to operate a health or personal care facility in this state or elsewhere, or having been convicted civilly or criminally of operating such a facility without a license, or having had their license to operate such a facility suspended or revoked shall not be granted a license unless to the satisfaction of the department they affirmatively establish clear, cogent, and convincing evidence of their ability to operate the alcoholism treatment facility, for which the license is sought, in full conformance with all applicable laws, rules, and regulations.

(d) Individuals convicted of a felony, child abuse, and/or any crime involving physical harm to another person, or individuals identified as perpetrators of substantiated child abuse pursuant to chapter 26.44 RCW, shall be disqualified by reason of such conviction if such conviction is reasonably related to the competency of the person to exercise responsibilities for ownership, operation, and/or administration of an alcoholism treatment facility unless, to the satisfaction of the department, the individual establishes clear, cogent, and convincing evidence of sufficient rehabilitation subsequent to such conviction or abuse registry listing to warrant public trust.

(3) Submission of plans. The following shall be submitted with an application for license: *Provided however*, That whenever any of the required plans are already on file with the department through previous applications for license or construction approval, only plans for portions or changes not on file need to be submitted.

(a) A plot plan showing streets, driveways, water and sewage disposal systems, locations of buildings on the site, and grade elevations within ten feet of any building where patients are to be housed.

(b) Floor plans of each building where patients are to be housed. The floor plans shall provide the following information:

(i) Identification of each room by use of a system;

(ii) Identification of category of service intended for each room;

(iii) The usable square feet of floor space in each patient sleeping room;

(iv) The clear window glass area in each patient's sleeping room;

(v) The height of the lowest portion of the ceiling in any patient's sleeping room; and

(vi) Floor elevations referenced to the grade level.

(c) If new construction or remodeling is planned, requirements in WAC 246-326-020(7) shall apply.

(4) Classification or categories of alcoholism treatment services. For the purpose of licensing, alcoholism treatment services provided by alcoholism treatment facilities shall be classified as follows:

(a) **Alcoholism detoxification services** are either acute or subacute services required for the care and/or treatment of individuals intoxicated or incapacitated by alcohol during the initial period the body is cleared of alcohol and the individual recovers from the transitory effects of intoxication. Services include screening of intoxicated persons, detoxification of intoxicated persons, counseling of alcoholics regarding their illness to stimulate motivation to obtain further treatment, and referral of detoxified alcoholics to other, appropriate alcoholism treatment programs.

(b) **Alcoholism intensive inpatient treatment services** are those services provided to the detoxified alcoholic in a residential setting including, as a minimum, limited medical evaluation and general health supervision, alcoholism education, organized individual and group counseling, discharge referral to necessary supportive services, and a patient follow-through program after discharge.

(c) **Alcoholism recovery house services** are the provision of an alcohol-free residential setting with supporting services and social and recreational facilities for detoxified alcoholics to aid their adjustment to alcohol-free patterns of living and their engagement in occupational training, gainful employment, or other types of community activities.

(d) **Alcoholism long-term treatment services** are long-term provision of a residential care setting providing a structural living environment, board, and room for alcoholics with impaired self-maintenance capabilities needing personal guidance and assistance to maintain sobriety and optimum health status.

(5) Authorization and designation of categories of alcoholism treatment service.

(a) The license issued to an alcoholism treatment facility shall show the category or categories of alcoholism treatment the facility is licensed to provide.

(b) For each category of alcoholism treatment service, the licensee shall designate and maintain the particular category or categories of service for which the department has shown approval on the license.

(c) If maintenance and operation are not in compliance with chapter 71.12 RCW or chapter 246-326 WAC, the department may deny, suspend, or revoke authorization to provide a particular category of treatment service.

(6) Posting of license. The license for an alcoholism treatment facility shall be posted in a conspicuous place on the premises.

(7) New construction.

(a) When new construction is planned, the following shall be submitted to the department for review:

(i) A written program containing, at a minimum, information concerning services to be provided and operational methods to be used affecting the extent of facilities required by these regulations.

(ii) Duplicate sets of preliminary plans for new construction drawn to scale and including:

(A) A plot plan showing streets, driveways, the water and sewage disposal systems, grade and location of building or buildings on the site;

(B) Plans of each floor of the building or buildings, existing and proposed, designating the function of each room and showing all fixed equipment;

(iii) Preliminary plans shall be accompanied by a statement as to:

(A) Source of the water supply;

(B) Method of sewage and garbage disposal; and

(C) A general description of construction and materials including interior finishes.

(b) Construction shall not be started until duplicate sets of final plans for new construction, drawn to scale, and specifications have been submitted to and approved by the department. Final plans and specifications shall show complete details to be furnished to contractors for construction of buildings. These shall include:

(i) Plot plan;

(ii) Plans of each floor of the building or buildings designating the function of each room and showing all fixed equipment;

(iii) Interior and exterior elevations, building sections, and construction details;

(iv) A schedule of floor, wall, and ceiling finishes, and the types and sizes of doors and windows;

(v) Plumbing, heating, ventilating, and electrical systems; and

(vi) Specifications fully describing the workmanship and finishes.

(c) Adequate provisions shall be made for the safety and comfort of patients if construction work takes place in or near occupied areas.

(d) All construction shall take place in accordance with the approved final plans and specifications.

(i) The department shall be consulted prior to making any changes from the approved plans and specifications.

(ii) When indicated by the nature or extent of proposed changes, the department may require the submission of modified plans or addenda for review prior to considering proposed change or changes for approval.

(iii) Only those changes approved by the department shall be incorporated into a construction project.

(iv) In all cases, modified plans or addenda on changes incorporated into the construction project shall be submitted for the department's file on the project even though it was not required these be submitted prior to approval.

(8) Exemptions.

(a) The secretary or designee may exempt an alcoholism treatment facility from compliance with parts of these regulations when it has been found after thorough investigation and consideration such exemption may be made in an individual case without jeopardizing the safety or health of the patients in the particular alcoholism treatment facility.

(b) The secretary or designee may, upon written application, allow the substitution of procedures, materials, or equipment for those specified in these regulations when such procedures, materials, or equipment have been demonstrated, to the satisfaction of the secretary, to be at least equivalent to those prescribed.

(c) All exemptions or substitutions granted pursuant to the foregoing provisions shall be reduced to writing

and filed with the department and the alcoholism treatment facility.

(9) Compliance with other regulations.

(a) Rules and regulations adopted by the Washington state fire marshal under provision of RCW 71.12.485 which are found in chapter 212-40 WAC apply.

(b) If there is no local plumbing code, the *Uniform Plumbing Code of the International Association of Plumbing and Mechanical Officials*, 1979 edition, shall be followed.

(c) Compliance with these regulations does not exempt an alcoholism treatment facility from compliance with local and state electrical codes or local zoning, building, and plumbing codes.

(10) Transfer of ownership. The possession or ownership of an alcoholism treatment facility shall not be transferred until the transferee has been notified by the department that the transferee's application for license has been approved.

(11) Denial, suspension, modification, or revocation of licenses or a license appeal; notice; adjudicative proceeding.

(a) When the department determines a facility has failed or refused to comply with the requirements of chapter 71.12 RCW and/or these rules, the department may deny, suspend, modify, or revoke a license. The department's notice of a denial, suspension, modification, or revocation of a license shall be consistent with RCW 43.70.115. An applicant or license holder has the right to an adjudicative proceeding to contest the decision.

(b) A license applicant or holder contesting a department license decision shall within twenty-eight days of receipt of the decision:

(i) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and

(ii) Include in or with the application:

(A) A specific statement of the issue or issues and law involved;

(B) The grounds for contesting the department decision; and

(C) A copy of the contested department decision.

(c) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

[Statutory Authority: RCW 43.70.040, 34.05.220 and chapter 71.12 RCW: 92-02-018 (Order 224), § 246-326-020, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040, 91-02-049 (Order 121), recodified as § 246-326-020, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 34.05 RCW, RCW 34.05.220 (1)(a) and 1989 1st ex.s. c 9 § 106. 90-06-019 (Order 039), § 248-26-020, filed 2/28/90, effective 3/1/90. Statutory Authority: Chapter 71.12 RCW, 84-17-010 (Order 2130), § 248-26-020, filed 8/3/84. Formerly WAC 248-22-510.]

**WAC 246-326-030 Administrative management. (1) Governing body.**

[1991 WAC Supp—page 1188]

(a) The alcoholism treatment facility shall have a governing body responsible for adopting policies related to the conduct of the alcoholism treatment facility in accordance with applicable laws and regulations.

(b) The governing body shall provide for the personnel, facilities, equipment, supplies, and special services necessary to meet patient needs for services and to maintain and operate the facility in accordance with applicable laws and regulations.

(2) **Administrator.**

(a) There shall be an administrator at least twenty-one years of age, with no history of drug or alcoholism misuse for a period of two years prior to employment, to manage the alcoholism treatment facility in compliance with chapter 71.12 RCW and chapter 246-326 WAC.

(b) The administrator either shall be on duty or readily available at all times except when an alternate administrator meeting qualifications in this section is designated in writing or in written job description and is on duty or readily available.

(c) The administrator shall establish and maintain a current written plan of organization including all positions and delineating the functions, responsibilities, authority, and relationships of all positions within the alcoholism treatment facility.

(d) The administrator shall ensure the existence and availability of policies and procedures which are:

(i) Written, developed, reviewed, and revised as necessary to keep them current;

(ii) Dated and signed by persons having responsibility for approval of the policies and procedures;

(iii) Readily available to personnel; and

(iv) Followed in the care and treatment of patients.

(3) **Personnel.**

(a) There shall be sufficient numbers of qualified personnel, who are not patients, to provide services needed by patients and to properly maintain the alcoholism treatment facility. At least one staff person shall be on duty or in residence within the alcoholism treatment facility at all times.

(b) There shall be a written job description for each position classification within the facility.

(c) Upon employment each person shall have or provide documented evidence of a tuberculin skin test by the Mantoux method unless medically contraindicated. When this skin test is negative (less than ten millimeters of induration read at forty-eight to seventy-two hours), no further tuberculin skin test shall be required. A positive test consists of ten millimeters or more of induration read at forty-eight to seventy-two hours. Positive reactors shall have a chest x-ray within ninety days of the first day of employment. Exemptions and specific requirements are as follows:

(i) Those with positive tests who have completed a recommended course of preventive or curative treatment, as determined by the local health officer, shall be exempted from testing.

(ii) Records of test results, x-rays, or exemptions to such shall be kept by the facility.

(d) Employees with a communicable disease in an infectious stage shall not be on duty.

(e) A planned, supervised orientation shall be provided to each new employee to acquaint him or her with the organization of the facility, the physical plant layout, his or her particular duties and responsibilities, the policies, procedures, and equipment pertinent to his or her work, and the disaster plan for the facility.

(f) A planned, training program shall be provided to any employee not prepared for his or her job responsibilities through previous training.

(g) Records shall be maintained of orientation, on-the-job training, and continuing education provided for employees.

(h) At least one staff person on the premises shall be currently qualified to provide basic first aid and cardiopulmonary resuscitation.

(i) Medical or nursing responsibilities, functions, or tasks shall be consistent with current Washington state law governing physician or nursing practice.

(j) Records or documentation of compliance with employee requirements described in chapter 246-326 WAC shall be available.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-326-030, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-326-030, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 84-17-010 (Order 2130), § 248-26-030, filed 8/3/84. Formerly WAC 248-22-520.]

**WAC 246-326-035 HIV/AIDS education and training.** Alcoholism treatment facilities shall:

(1) Verify or arrange for appropriate education and training of personnel on the prevention, transmission, and treatment of human immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS) consistent with RCW 70.24.310; and

(2) Use infection control standards and educational material consistent with the approved curriculum manual *Know - HIV/AIDS Prevention Education for Health Care Facility Employees*, January 1991, published by the office on HIV/AIDS.

[Statutory Authority: RCW 43.70.040, 70.24.310 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-326-035, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-326-035, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.24.310. 89-21-038 (Order 3), § 248-26-035, filed 10/12/89, effective 11/12/89.]

**WAC 246-326-040 Patient care and services--**

**General.** (1) Individual treatment plan. For each patient, there shall be a plan individualized for treatment to include the treatment prescribed as well as assessment of physical, mental, emotional, social, and spiritual needs.

(a) The patient shall be encouraged to participate in development of the plan.

(b) Work assignments may be permitted when part of the individual treatment plan and under supervision of staff.

(2) General care and treatment.

(a) Each patient shall have available the equipment, supplies, and assistance needed to maintain personal cleanliness and grooming.

(b) The patient shall be treated in a manner respecting individual identity and human dignity with policies and procedures, as appropriate, to include:

(i) Protection from invasion of privacy: *Provided*, That reasonable means may be used to detect or prevent contraband from being possessed or used on the premises;

(ii) Confidential treatment of clinical and personal information in communications with individuals not associated with the plan of treatment;

(iii) Means of implementing federal requirements related to confidentiality of records, Title 42, Code of Federal Regulations, Part 2, Federal Register, July 1, 1975;

(iv) Provision of reasonable opportunity to practice religion of choice insofar as such religious practice does not infringe upon rights and treatment of other patients or the treatment program in the alcoholism treatment facility: *Provided*, That a patient also has the right to refuse participation in any religious practice;

(v) Communication with significant others in emergency situations;

(vi) Freedom from physical abuse, corporal punishment, or other forms of abuse against the patient's will, including being deprived of food, clothes, or other basic necessities.

(c) Infection control, general.

(i) There shall be policies and procedures designed to prevent transmission of infection minimally to include aseptic techniques, handwashing, methods of cleaning, disinfecting or sterilizing, handling, and storage of all supplies and equipment.

(ii) There shall be reporting of communicable disease of patients in accordance with chapter 246-100 WAC.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-326-040, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-326-040, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 84-17-010 (Order 2130), § 248-26-040, filed 8/3/84. Formerly WAC 248-22-530.]

**WAC 246-326-050 Health and medical care services--All facilities.** (1) Admission and retention of patients shall be appropriate to services available.

(a) Each alcoholism treatment facility shall have written policies related to admission, retention, leave, and discharge.

(b) Patients manifesting signs and symptoms of a physical or mental condition requiring medical or nursing care not provided or available in the alcoholism treatment facility shall not remain in the facility. Staff shall facilitate movement of such patients to an appropriate setting as soon as possible and feasible.

(2) Each alcoholism treatment facility shall have a current, transfer agreement with a hospital licensed pursuant to chapter 70.41 or 71.12 RCW.

(3) Medical coverage.

(a) A physician shall be responsible for direction of all medical aspects of the alcoholism treatment program or programs with medical responsibility minimally to include approval of policies and procedures related to:

(i) Initial and ongoing medical screening and assessment of patients;

(ii) Care of patients with minor illnesses or other conditions requiring minor treatment or first aid; and

(iii) Medical emergencies.

(b) There shall be specific arrangements for physician services at all times with schedules, names, and phone numbers posted and available in appropriate locations. Physician services may include hospital emergency departments, group clinic practice, or equivalent emergency facilities.

(c) Medical emergency policy and procedures related to emergency situations shall minimally include:

(i) Delineation of circumstances, signs, and symptoms related to specific actions required of personnel;

(ii) Circumstances warranting immediate contact of physician services or other licensed personnel;

(iii) Minimum qualifications for staff executing procedures; and

(iv) Written approval or acceptance of medical emergency policies and procedures by administrator and responsible physician. When nursing services are provided, approval or acceptance by the responsible registered nurse shall be included.

(4) Nursing services. Nursing services, when provided, shall be planned and supervised by a registered nurse minimally to include:

(a) Responsibility for any nursing functions performed by personnel in the alcoholism treatment facility.

(b) Selection, training, and written evaluation of personnel or volunteers providing nursing observation and/or care.

(c) Written nursing procedures to guide actions of personnel and volunteers providing nursing observation and/or care.

(5) Supplies. Appropriate supplies for first aid, medical, or nursing procedures shall be readily available.

(6) Safety measures.

(a) There shall be written policies and procedures governing actions of staff following any accident or incident jeopardizing a patient's health or life, minimally to include:

(i) Facilitation of patient protection and safety;

(ii) Investigation of accidents or incidents;

(iii) Institution of preventive measures insofar as possible;

(iv) Written documentation in the patient treatment record.

(b) There shall be provision for staff to gain immediate emergency access to any room occupied by a patient.

(7) Individual patient treatment/care records.

(a) There shall be an organized record system providing for:

(i) Maintenance of a current, complete, treatment record for each patient;

(ii) A systematic method of identifying and filing patient records so each record can be located readily;

(iii) Maintenance of the confidentiality of patient treatment records by storing and handling the records under conditions allowing only authorized persons access to the records.

(b) Each entry in the patient's treatment/care record shall be dated and authenticated by the signature and title of the person making the entry. (An authentication record system may be acceptable.)

(c) Each record shall be available to treatment staff and include:

(i) Identifying and sociological data including the patient's full name, birthdate, home address, or last known address if available;

(ii) Date of admission;

(iii) The name, address, and telephone number of the patient's personal physician or medical practitioner if available;

(iv) A record of the findings of any health screenings;

(v) A record of medical findings following examination by a medical practitioner;

(vi) A record of observations of the patient's condition;

(vii) A physician or legally authorized practitioner's written order for any modified diet served to the patient;

(viii) Orders for any drugs or medical treatment shall be dated and signed by a physician or legally authorized practitioner unless self-administered from a container bearing an appropriate pharmacist-prepared label in accordance with instructions on that label;

(ix) A record of any administration of a medication or treatment to a patient by the person legally authorized to administer medications and/or observation of self-administration including time and date of administration and signature of the individual administering the medication or observing self-administration;

(x) Medical progress notes, when applicable, shall be made in the treatment record.

(8) Notification regarding change in patient's condition. A member of the patient's family or another person with whom the patient is known to have a responsible personal relationship shall be notified as rapidly as possible, upon the discretion of the treating physician, should a serious change in the patient's condition, transfer, or death of the patient occur: *Provided however*, That the patient is incapable of rational communication. Such notification shall not occur without the consent of the patient any time when the patient is capable of rational communication.

(9) Food services - general.

(a) Food service sanitation shall be governed by chapter 246-215 WAC rules and regulations of the state board of health governing food service sanitation.

(b) Areas used for storage and preparation of food shall be used only for performance of assigned food service duties. Through traffic is prohibited.

(c) There shall be current written policies and procedures to include safety, food acquisition, food storage, food preparation, serving of food, and scheduled cleaning of all food service equipment and work areas. These policies shall be readily available to all personnel.

(i) All personnel handling food, including patients assisting in food services, shall follow the procedures.

(ii) Cooking shall not be permitted in sleeping rooms.

(d) Food provided shall be appropriate to meet the needs of patients on a twenty-four hour basis.

(10) Food service – alcoholism intensive inpatient treatment, recovery house, long-term treatment services.

(a) There shall be a designated individual responsible for food service.

(b) Staff trained in food service procedures shall be present during all meal times when meals are served on the premises.

(c) Meals and nourishments shall be palatable, properly prepared, attractively served, and sufficient in quality, quantity, and variety to meet "Recommended Dietary Allowance," *Food and Nutrition Board, National Research Council*, 1980 edition, adjusted for activity unless medically contraindicated.

(i) At least three meals a day shall be served at regular intervals with not more than fourteen hours between the evening meal and breakfast.

(ii) There shall be written medical orders for any therapeutic diet served to a patient. Therapeutic diets shall be prepared and served as prescribed.

(iii) A current diet manual, approved in writing by a dietitian and physician, shall be used for planning and preparing diets.

(d) Menus shall be planned, written, and dated at least one week in advance.

(i) Food substitutions shall be of comparable nutritional value and recorded as served.

(ii) A record of planned menus with substitutions and food as served shall be retained for six months.

(iii) The written order of a legally authorized medical practitioner is required prior to serving any nutrient concentrate or supplement.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-326-050, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-326-050, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 84-17-010 (Order 2130), § 248-26-050, filed 8/3/84.]

**WAC 246-326-060 Medication responsibility--Administration of medications and treatments.** (1) There shall be provisions for timely delivery of necessary patient medications from a pharmacy so a physician's or legally authorized practitioner's orders for medication therapy can be implemented without undue delay.

(2) There shall be written policies and procedures providing for description of types of stock medications, procurement, storage, control, use, retention, release, and disposal of medications in accordance with applicable federal and state laws and regulations.

(a) There shall be adequate medication facilities providing for locked storage of all medications.

(b) There shall be a sink with hot and cold running water, other than the lavatory or sink in a toilet room, available.

(c) Medications, including stock medications, shall be accessible only to authorized staff.

(d) Stock internal and external medicine and medications shall be stored apart from each other.

(e) Medicine or medications requiring special storage conditions shall be stored according to manufacturer's or pharmacist's directions.

(f) The inside temperature of the refrigerator where drugs are stored shall be maintained within a thirty-five to fifty degree Fahrenheit range. Medication stored in a refrigerator shall be enclosed in a container to separate the medications from food or other products.

(g) All medications shall be obtained and kept in containers labeled securely and legibly by a pharmacist, or in original containers labeled by the manufacturer, and shall not be transferred from the container except for preparation of a single dose for administration. A label on a container of medication shall not be altered or replaced except by a pharmacist.

(i) Medication containers having soiled, damaged, incomplete, illegible, or makeshift labels shall be returned to a pharmacist for relabeling or disposal.

(ii) Medication in containers having no labels shall be destroyed.

(h) Any medication having an expiration date shall be removed from usage and destroyed immediately after the expiration date.

(i) All of an individual patient's medications left in the facility following discharge, transfer, or departure, except those released to the patient upon discharge and Schedule II controlled substances, shall be destroyed by authorized staff after departure of the patient or returned to a pharmacist for appropriate disposition.

(i) Medications or medicines shall be destroyed in the presence of a witness or by a pharmacist in such a manner that the medications cannot be retrieved, salvaged, or used; medications shall not be discarded with garbage or refuse.

(ii) For any medication destroyed, staff shall make an entry in the individual patient treatment record to include:

- (A) Date;
- (B) Name of medication;
- (C) Strength of medication;
- (D) Quantity of medication;
- (E) Signature of staff who destroyed the medication; and
- (F) Signature of staff who witnessed destruction.

(j) When staff who are legally authorized to administer medications are employed or available in an alcoholism treatment facility, a physician or legally authorized prescribing practitioner may provide an emergency drug or medication supply within a facility: *Provided*, That the following requirements are met:

(i) The emergency drug or medication supply shall be considered an extension of the physician's or prescribing practitioner's own drug or medication supply and remain his or her responsibility.

(ii) All drugs or medications for an emergency supply shall be kept in a separate, secure, locked, emergency drug drawer or cabinet or equivalent.

(iii) The emergency drug or medication supply shall be limited to medications needed for genuine medical emergencies, including the need for the medical management of an intoxicated person.

(iv) The quantity of any medication in a particular dosage strength shall be limited to a seventy-two hour

supply determined by calculating the number of patients and the potential need for emergency medication.

(v) A list of drugs or medications to be kept in the emergency medication supply shall be available with the emergency medication supply.

(A) This list shall include the names and dosage strength of each medication, and be dated and signed by the physician or legally authorized prescribing practitioner.

(B) The emergency medication supply shall contain only those medications on this list.

(vi) There shall be a record of each medication removed or added to the emergency medication supply. This record shall include:

(A) Name and amount of medication removed or added;

(B) Date of removal or addition;

(C) Identification of the patient receiving a medication removed;

(D) Signature of staff removing or adding to the emergency medication supply.

(k) Medications listed as controlled substances in Washington shall be prohibited. This does not preclude individual patient prescriptions or medications kept in an emergency medication supply pursuant to WAC 246-326-060 (2)(j).

(l) The alcoholism treatment facility maintaining nonprescription medications in a first-aid supply shall establish policies and procedures for use of the first-aid supply, approved by signature of a legally authorized prescribing practitioner.

(3) Administration of medications and medical treatments. Policies and procedures shall be established for administration of medications, including self-administration, within each alcoholism treatment facility.

(a) There shall be an organized system designed to ensure accuracy in receiving, transcribing, and implementing orders for administration of medications and treatments.

(i) Orders for medications and treatments, including standing orders, used in the care of a patient shall be entered in the patient's treatment record and shall be signed by a physician or other legally authorized practitioner.

(ii) Orders for drugs and medical treatments shall include:

(A) Date ordered;

(B) Name of the medication or description of the treatment including the name of medication, solution, or other agent to be used in the treatment;

(C) Dosage, concentration, or intensity of a medication, solution, or other agent used;

(D) Route or method of administration;

(E) Frequency, time interval between doses, or duration of administration;

(F) Maximum number of doses or treatments to be administered;

(G) Circumstances for which the medication or treatment is to be administered; and

(H) Signature of the legally authorized prescribing practitioner.

(iii) A verbal or telephone order for the administration of medication or medications or medical treatment or treatments shall be received by a licensed nurse from the physician or other practitioner legally authorized to prescribe. Upon receipt of such an order, the following shall be entered immediately into the patient's treatment record.

(A) Data required under WAC 246-326-060 (3)(a)(ii);

(B) Name of the physician or legally authorized practitioner issuing the order;

(C) Signature of the licensed nurse receiving the order;

(D) Physician's or legally authorized practitioner's signature for such an order shall be obtained as soon as possible and not later than five days after receipt of the verbal or telephone order.

(iv) Persons administering medications and medical treatments to patients shall be qualified by training and legally permitted to assume this responsibility.

(v) Any medication administered to a patient shall be prepared, administered, and recorded in the patient's treatment record by the same person. This shall not be interpreted to preclude a physician's administration of a medication having been prepared for administration by a person assisting the physician in the performance of a diagnostic or treatment procedure or the administration of a single, properly labeled medication having been dispensed or issued from a pharmacy so the medication is ready to administer.

(b) Medications shall be administered or self-administered only as legally authorized through written order, approval, or prescription signed by a physician or other legally authorized practitioner or self-administered from a container in accordance with an appropriately affixed pharmacist-prepared label.

(c) Medications shall be administered by appropriately licensed personnel when they are not self-administered.

(d) Self-administration of drugs by a patient shall be in accordance with the following:

(i) The patient shall be physically and mentally capable of administering his or her own medication properly.

(ii) Any medication a patient has for self-administration in the facility shall have been ordered, approved, or prescribed by a legally authorized practitioner.

(iii) Prescription medications, over-the-counter medications purchased independently by the patient, and other medicinal materials used by a patient shall be kept in individual storage units within locked drawers, medicine cabinets, compartments, or equivalent. Access to all medications shall be controlled by authorized staff. Use of such medications and materials in each individual storage unit shall be restricted to the particular patient for self-administration.

(iv) Staff shall observe use of medications by each patient and record the observation in the patient's individual treatment record.

(e) Any medications used in the subacute detoxification service shall be self-administered only with observation of use of medication recorded in the individual

treatment record by the staff of the alcoholism treatment facility.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-326-060, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-326-060, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 84-17-010 (Order 2130), § 248-26-060, filed 8/3/84.]

**WAC 246-326-090 Physical plant and equipment.**

**(1) Patients' sleeping rooms.**

(a) There shall be at least eighty square feet of usable floor space in single-bed sleeping rooms and seventy square feet of usable floor space per bed in multiple bed sleeping rooms.

(i) No portion of a sleeping room having less than seven foot six inch ceiling height may be counted as part of the required area.

(ii) The maximum capacity of any patient sleeping room shall not exceed twelve beds.

(b) Each sleeping room shall be located to prevent through traffic and minimize the entrance of excessive noise, odors, and other nuisances.

(c) Only rooms having unrestricted direct access to a hallway, living room, outside, or other common-use area shall be used as sleeping rooms.

(d) Sleeping rooms shall be outside rooms with a clear glass window area in a vertical wall not less than one-tenth of the required floor area.

(i) Rooms shall not be considered to be outside rooms if such required window area is within ten feet of another building or other obstruction to view or opens into a window well, enclosed porch, light shaft, ventilation shaft, or other enclosure of similar confining nature.

(ii) Windows designed to open shall operate freely.

(iii) Curtains, shades, blinds, or equivalent shall be provided at each window for visual privacy.

(e) A basement room may be used as a sleeping room provided the floor of the room is no more than three feet eight inches below the base of the window or windows, and there is adequate natural light. The grade shall extend ten feet out horizontally from the base of the window or windows.

(f) Each patient shall be provided with sufficient storage facilities, either in or convenient to his or her sleeping room, to adequately store a reasonable quantity of clothing and personal possessions.

(g) Sleeping rooms, furniture, and furnishings.

(i) Each patient shall be provided a comfortable bed not less than thirty-six inches wide, with a mattress in good condition.

(ii) To be acceptable, a patient's bed shall be a sturdy, nonfolding type, at least thirty-six inches wide and length appropriate to the height of the patient.

(iii) Room design and size shall be adequate to accommodate patient beds spaced three feet apart.

(iv) Sleeping rooms shall be provided with adequate furnishings including one chair per bed available in the facility.

(2) Toilet and bathing facilities.

(a) On each level there shall be one toilet and one lavatory for each eight persons or fraction thereof.

(b) There shall be one bathing facility for each twelve persons or fraction thereof residing in the facility.

(c) The word "persons" used in subsection (2)(a) and (b) of this section includes all patients and staff members not having private toilet and bathing facilities for their exclusive use.

(d) There shall be a lavatory in each toilet room unless the toilet room adjoins a single patient room containing a lavatory.

(e) Each toilet and each bathing facility shall be enclosed in a separate room or stall, with a door or curtain for privacy. One toilet may be permitted in a room containing a single bathing facility. When a room contains more than one toilet or one bathing facility, it shall be used by one sex only.

(f) Grab bars shall be securely mounted at toilets and bathing facilities in such numbers and in such locations that accidental falls will be minimized minimally to include:

(i) One grab bar at each bathing facility.

(ii) One grab bar appropriately mounted at each toilet.

(3) Patient dining, living, and therapy rooms.

(a) The alcoholism treatment facility shall have two or more rooms suitably furnished to accommodate patients' dining, social, educational and recreational activities, group therapy, and staff meetings. At least one of these rooms shall be an outside room with a window or windows.

(i) An adequate dining area shall be provided with capacity to seat at least fifty percent of the patients at each meal setting.

(ii) If a multipurpose room is used for dining and social and recreational activities or meetings, there shall be sufficient space to accommodate each of the activities without their interference with one another.

(iii) At least twenty-five square feet of floor space per bed shall be provided for dining, social, educational, recreational activities, and group therapy.

(b) There shall be at least one room providing privacy for interviewing and counseling of patients on an individual basis. Additional rooms shall be provided in a ratio of 1:12 patient beds or major fraction thereof.

(4) Medical examination room. If there is regular provision for a medical practitioner to perform physical examinations of patients within the facility, there shall be an examination room in the facility. This examination room shall be equipped with an examination table, examination light, and storage units for medical supplies and equipment. There shall be a handwashing facility readily accessible to the examination room.

(5) Utility and storage for medical and nursing supplies and equipment. If the services provided by the alcoholism treatment facility involve the use of medical supplies and equipment, there shall be facilities designed and equipped for washing, disinfection or sterilization, storage, and other handling of supplies and equipment in a manner ensuring segregation of clean and sterile supplies and equipment from those that are contaminated, soiled, or used.

(6) Storage facilities. There shall be sufficient, suitable storage facilities to provide for storage of clean linen and other supplies and equipment under sanitary conditions.

(7) Handrails on stairways and ramps.

(a) All stairways and ramps shall be provided with handrails on both sides.

(b) Adequate guardrails and other safety devices shall be provided on all open stairways and ramps.

(8) Surfaces (floors, walls, ceilings).

(a) The surfaces in each room and area of the alcoholism treatment facility shall be easily cleanable and suited to the functions of the room or area.

(b) Toilet rooms, bathrooms, kitchens, and other rooms subject to excessive soiling or moisture shall have washable, impervious floors.

(c) Ramp surfaces and stairway treads shall be of nonslip materials.

(9) Communications. There shall be at least one telephone and such additional telephones as may be needed to operate the alcoholism treatment facility and to provide for a telephone to be readily accessible in the event of fire or other emergency.

(10) Lighting.

(a) Lighting in all areas of the facility shall provide adequate illumination.

(b) An adequate number of electrical outlets shall be provided.

(c) General lighting shall be provided for sleeping rooms.

(d) Emergency lighting equipment, such as flashlights or battery-operated lamps, shall be available and maintained in operating condition.

(11) Heating-temperature.

(a) The alcoholism treatment facility shall be equipped with an approved heating system capable of maintaining a healthful temperature. Use of portable space heaters is prohibited unless approved in writing by the Washington state fire marshal.

(b) Temperature shall be maintained at a healthful level and not less than sixty-five degrees Fahrenheit.

(12) Ventilation.

(a) Ventilation of all rooms used by patients or personnel shall be sufficient to remove all objectionable odors, excessive heat, or condensation.

(b) All inside rooms, including toilets, bathrooms, and other rooms in which excessive moisture, odors, or contaminants originate, shall be provided with mechanical exhaust ventilation.

(13) Water supply. Hot and cold water under pressure shall be readily available at all times.

(a) Water used for domestic purposes shall meet the standards of the department as described in chapter 246-290 WAC.

(b) Cross connections of any kind are prohibited.

(c) In the event an unsafe or nonpotable water supply is used for irrigation, fire protection, or other purposes, the system shall be adequately color-coded or labeled to lessen any chance of water use for domestic purposes.

(d) Hot water at lavatories, bathtubs, and showers used by patients shall not exceed one hundred twenty degrees Fahrenheit.

(14) Sewage disposal system. All sewage shall be discharged into a public sewage system where such system is available and is acceptable to the department. Otherwise, sewage shall be collected, treated, and disposed of in an independent sewage disposal system approved by the appropriate local health department.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-326-090, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-326-090, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 84-17-010 (Order 2130), § 248-26-090, filed 8/3/84. Formerly WAC 248-22-590.]

#### **WAC 246-326-100 Special additional requirements for facilities providing alcoholism detoxification service.**

(1) When an alcoholism detoxification service is located in an alcoholism treatment facility, it shall be designated as either an acute detoxification service or a subacute detoxification service.

(2) Acute detoxification services shall provide:

(a) Initial medical screening and ongoing nursing assessments of each patient with transfer to an appropriate hospital when signs and symptoms of a serious illness or severe trauma exist.

(b) Nursing services as described in WAC 246-326-050(4) with the following additional requirements:

(i) When there is not a need for full-time services of a registered nurse, part-time registered nurse supervision is acceptable, provided such a supervisor is on duty within the facility at least four hours each week.

(ii) At least one staff member, qualified to provide nursing observation and care needed by patients during detoxification, shall be on duty in the facility at all times.

(A) "Qualified" shall include training and approval by the responsible registered nurse supervisor to provide physiological and psychological observation and care as required.

(B) When a licensed nurse is not on duty, a registered nurse shall be on call who shall come to the alcoholism treatment facility when indicated.

(iii) Continuing observation of each patient's condition shall be by persons competent to recognize and evaluate significant signs and symptoms and to take appropriate action.

(A) Frequency of observation shall correspond with degrees of acuity, severity, and instability of patient's condition with at least one written note on patient condition every eight hours in each individual patient treatment record.

(B) Observation of significant signs and symptoms indicative of abnormality, adverse change, or favorable progress including vital signs, motor and sensory abilities, behavior, and discomfort.

(C) Observations shall be recorded and signed by the person making the observation.

(D) Significant adverse signs and symptoms shall be appropriately reported to a physician with nature of the report and time noted in the patient's treatment record.

(3) Subacute detoxification services shall provide:

(a) Screening of patients by a person knowledgeable about alcoholism and trained and skilled in recognition of significant signs and symptoms of illness or trauma.

(b) Continuing observation of each patient's condition by persons competent to recognize and evaluate significant signs and symptoms and to take appropriate action.

(i) Frequency of observation shall correspond to degree of acuity, severity, and instability of patient's condition with appropriate documentation in the individual treatment record;

(ii) Observation of significant signs and symptoms indicative of abnormality, adverse change, or favorable progress including vital signs, motor and sensory abilities, behavior, and discomfort.

(iii) Observations shall be recorded and signed by the person making the observation.

(c) Personnel on duty having valid, current first-aid and cardiopulmonary resuscitation certificates.

(d) Medication shall not be provided or administered by personnel in the distinct part of the alcoholism treatment facility where subacute detoxification service is located.

(e) A written plan or policies and procedures for management of patient-owned medications to include:

(i) Method of verification of need for patient to continue a medication while in subacute detoxification;

(ii) Method of verification that medication is correct (as labeled);

(iii) Security of patient-owned medication while in the facility;

(iv) Disposition of patient-owned medications when patient leaves; and

(v) Observation and documentation of patient use of any medication in the individual treatment record.

[Statutory Authority: RCW 43.70.040 and chapter 71.12 RCW. 92-02-018 (Order 224), § 246-326-100, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-326-100, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 71.12 RCW. 84-17-010 (Order 2130), § 248-26-100, filed 8/3/84. Formerly WAC 248-22-550.]

| 246-327-155 | Functions, duties, and responsibilities of direct care personnel. |

**WAC 246-327-010 Definitions.** For the purpose of chapter 70.127 RCW and chapter 246-327 WAC, the following words and phrases shall have the following meaning unless the context clearly indicates otherwise.

(1) "Acute care" means care provided by an agency for patients who are not medically stable or have not attained a satisfactory level of rehabilitation. These patients require frequent monitoring by a health care professional in order to maintain their health status.

(2) "Administrator" means a person managing and responsible for the day-to-day operation of each licensed agency.

(3) "Advanced registered nurse practitioner" means a registered nurse with a ARNP recognition document under chapter 246-839 WAC.

(4) "Agency" means a home health agency defined under this section and chapter 70.127 RCW.

(5) "AIDS" means acquired immunodeficiency syndrome defined under WAC 246-100-011.

(6) "Authorizing practitioner" means a person authorized to sign a home health plan of treatment including a physician licensed under chapter 18.57 or 18.71 RCW, a podiatrist licensed under chapter 18.22 RCW, or an advanced registered nurse practitioner as authorized by the board of nursing under chapter 18.88 RCW.

(7) "Branch office" means a location or site from which an agency provides services within a portion of the total geographic area served by the parent agency. The branch office is part of the agency, included in the license of the agency, and located sufficiently close to share administration, supervision, and services.

(8) "Bylaws" means a set of rules adopted by an agency for governing the agency operation.

(9) "Clinical note" means a written, signed, dated notation of each contact with a patient which may contain a description of signs and symptoms, treatments, medications given, the patient reaction, any changes in physical or emotional condition, and other pertinent information.

(10) "Department" means the department of health.

(11) "Dietitian" means an individual certified under chapter 18.138 RCW, Dietitians and Nutritionists.

(12) "Family" means an individual or individuals who are important to and designated by the patient, and who may or may not be relatives.

(13) "Governing body" means the person, who may be the owner or a group, with responsibility and authority to establish policies related to operation of the agency.

(14) "HIV" means human immunodeficiency virus defined under RCW 70.24.017(7).

(15) "Home health agency" means a private or public agency or organization administering or providing home health aide services or two or more home health services directly or through a contract arrangement to ill, disabled, or infirm persons in places of temporary or permanent residence.

(16) "Home health aid" means an individual registered or certified as a nursing assistant under chapter 18.88A RCW.

(17) "Home health aid services" means services provided by a home health agency under supervision of a registered nurse, physical therapist, occupational therapist, or speech therapist and as further defined under RCW 70.127.010(7).

(18) "Home health plan of care" or "plan of care" means a written plan of care established by a home health agency by appropriate health care professionals, including comprehensive case assessment and management, and describing maintenance care to be provided. A patient or the patient's representative shall be allowed to participate in the development of the plan of care to the extent practicable.

(19) "Home health plan of treatment" or "plan of treatment" means a written plan of care established by a physician, a podiatrist, or an advanced registered nurse practitioner, in consultation with appropriate health care professionals within the agency, including comprehensive case assessment and management, and describing medically necessary acute care to be provided for treatment of illness or injury.

(20) "Home health services" means health or medical services provided to ill, disabled, or infirm persons. Home health services of an acute or maintenance care nature include, but are not limited to:

- (a) Nursing services;
- (b) Home health aide services;
- (c) Physical therapy services;
- (d) Occupational therapy services;
- (e) Speech therapy services;
- (f) Respiratory therapy services;
- (g) Nutritional services;
- (h) Homemaker services;
- (i) Personal care services;
- (j) Medical social services;
- (k) Medical supplies or equipment services; and
- (l) Pharmacy services.

(21) "Homemaker services" means services assisting ill, disabled, or infirm persons with household tasks essential to achieving adequate household and family management, including transportation, shopping, and maintenance of premises.

(22) "Ill, disabled, or infirm persons" means persons needing home health, hospice, or home care services in order to maintain themselves in their places of temporary or permanent residence.

(23) "Licensed practical nurse" means an individual licensed as a practical nurse under chapter 18.78 RCW, Practical nurses.

(24) "Maintenance care" means care provided by home health agencies that is necessary to support an existing level of health and to preserve a patient from further failure or decline.

(25) "Managed care plan" means a plan controlled by the terms of the reimbursement source.

(26) "May" means permissive or discretionary on the part of the department.

(27) "Medical social worker" means an individual with a bachelor's degree in social work, psychology, or a related field and having completed one year of social work experience and registered as a counselor under RCW 18.19.090.

(28) "Nutritional services" means nutritional assessment and counseling, dietary teaching, and the monitoring and management of special diets and

hyperalimentation provided by a dietitian or certified nutritionist under chapter 18.138 RCW.

(29) "Occupational therapist" means an individual licensed as an occupational therapist under chapter 18.59 RCW.

(30) "Owner" means the individual, partnership, or corporate entity legally responsible for the business requiring licensure as a home health agency under chapter 70.127 RCW.

(31) "Personal care services" means services assisting ill, disabled, or infirm persons with dressing, feeding, and personal hygiene to facilitate self-care.

(32) "Personnel" means individuals providing patient care on behalf of an agency including employees and individuals under contract.

(33) "Pharmacist" means an individual licensed as a pharmacist under RCW 18.64.080.

(34) "Physical therapist" means an individual licensed as a physical therapist under chapter 18.74 RCW.

(35) "Physician" means an individual licensed as a medical doctor under chapter 18.71 RCW or an osteopathic physician and surgeon licensed under chapter 18.57 RCW, or a podiatrist licensed under chapter 18.22 RCW.

(36) "Prehire screening" means checking of work references, appropriate registration, certification, licensure, and qualifications.

(37) "Registered nurse" means an individual licensed under chapter 18.88 RCW, Registered nurses.

(38) "Respiratory therapist" means an individual certified under chapter 18.89 RCW, Respiratory care practitioners.

(39) "Shall" means compliance is mandatory.

(40) "Speech therapist" means a person meeting:

(a) The education and experience requirements for a certificate of clinical competence in the appropriate area of speech pathology or audiology, granted by the American Speech, Language, and Hearing Association as described in *The ASLHA Directory*, American Speech, Language, and Hearing Association, 10801 Rockville Pike, Rockville, Maryland 20852, 1983; or

(b) The education requirements for a certificate of clinical competence and in the process of accumulating the supervised experience, as specifically prescribed in *The ASLHA Directory*, 1983.

(41) "Supervision" means authoritative procedural guidance by a qualified person who assumes the responsibility for the accomplishment of a function or activity and who provides direction and ongoing monitoring and evaluation of the actual act of accomplishing the function or activity.

(42) "Therapist" means a physical therapist, occupational therapist, speech therapist, or respiratory therapist defined under this section or other therapist licensed or certified under Title 18 RCW and providing health or medical care or treatment within their defined scope of practice.

(43) "Therapy assistant" means a licensed occupational therapy assistant defined under chapter 18.59 RCW or physical therapist assistant defined under chapter 246-915 WAC.

(44) "Therapy services" means those services delivered by a therapist defined under this section.

(45) "Volunteer" means an individual providing assistance to the home health agency and:

(a) Oriented, trained, and supervised to perform specific assigned tasks; and

(b) Working without compensation.

(46) "Without compensation" means:

(a) A recipient of care is not charged a fee for any service delivered by the volunteer; and

(b) An individual delivering care receives no pay, except reimbursement for personal mileage incurred to deliver home health services.

[Statutory Authority: RCW 70.127.120 and 70.127.250. 92-02-018 (Order 224), § 246-327-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-327-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.126.040. 89-12-077 (Order 2790), § 248-27-015, filed 6/7/89.]

**WAC 246-327-025 Licensure of the home health agency.** (1) After June 30, 1989, persons operating home health agencies defined under chapter 70.127 RCW shall submit applications and fees to the department.

(2) After July 1, 1990, no person shall:

(a) Advertise, operate, manage, conduct, open, or maintain a home health agency without first obtaining an appropriate license from the department; or

(b) Use the words "home health agency," "home health care services," or "visiting nurse services" in its corporate or business name, or advertise using such words unless licensed as a home health agency under chapter 70.127 RCW.

(3) Applicants for a home health agency license shall:

(a) Submit a completed application and fee for initial license or renewal to the department on forms furnished by the department, including signature of the owner or legal representative of the owner;

(b) Furnish to the department full and complete information as required by the department for the proper administration of department requirements including:

(i) Evidence of current insurance including:

(A) Professional liability insurance coverage specified under RCW 70.127.080; and

(B) Public liability and property damage insurance coverage specified under RCW 70.127.080.

(ii) Information on organizational and governing structure and the identity of the applicant, officers, directors, partners, managing employees, or owners of ten percent or more of the applicant's assets;

(iii) A list of counties where the applicant will operate;

(iv) A list of branch offices; and

(v) A list of services provided or offered.

(4) Agencies requesting license renewal shall submit a renewal application and fee to the department.

(5) If the applicant or owner meets the requirements of this chapter and chapter 70.127 RCW, the department shall issue or renew a license for the agency.

(6) The department shall:

(a) Deny a license if in the last five years the owner, applicant, officers, directors, partners, managing employees, or owners of ten percent or more of the applicant's assets are found in a civil or criminal proceeding to have committed any act reasonably relating to the fitness of any of the above persons to:

(i) Establish, maintain, or administer an agency; or

(ii) Provide care in the home of another.

(b) Provide a combination of applications and licenses and the reduction of individual license fees if an applicant applies for more than one category of license under chapter 70.127 RCW;

(c) Establish fees to be paid under RCW 43.70.110 and WAC 246-327-990, including providing for the reduction of individual license fees if an applicant applies for more than one category of license under RCW 70.127.110;

(d) Prohibit transfer or reassignment of a license without thirty-day-prior-notice to the department and department approval;

(e) Issue a license following approval of a new or current owner's application;

(f) Conduct on-site reviews of the agency, which may include in-home visits with consent of the patient, to determine compliance;

(g) Examine and audit records of the agency if the department has reason to believe persons are providing care without an appropriate license;

(h) Provide for combined licensure inspections and audits for owners holding more than one license under RCW 70.127.110;

(i) Give written notice of any violations, including a statement of deficiencies observed;

(j) Inform the owner or applicant of the requirement to:

(i) Present a plan of correction to the department within ten working days; and

(ii) Comply within a specified time not to exceed sixty days.

(k) Allow the owner a reasonable period of time, not to exceed sixty days, to correct a deficiency prior to assessing a civil penalty unless:

(i) The deficiency is an immediate threat to life, health, or safety; or

(ii) The owner fails to comply with any of the provisions under WAC 246-327-045 (3)(a), (b), (c), (d), (e), (f), (g), (h), (i), and (j).

(l) Initiate disciplinary action, under RCW 70.127-.170 and this chapter, if the owner or applicant fails to comply.

(7) The department may:

(a) Issue a license effective for one year or less unless the license is suspended or revoked;

(b) Inspect an agency and examine records at any time to determine compliance with chapter 70.127 RCW and this chapter;

(c) Deny, suspend, modify, or revoke an agency license for failure to comply with chapter 70.127 RCW or this chapter.

(8) When a change of ownership is planned, the owner shall notify the department, in writing, at least thirty days prior to the date of transfer, including:

(a) Full name and address of the current owner and prospective new owner;

(b) Name and address of the agency and new name under which the agency will be operating, if known; and

(c) The date of the proposed change of ownership.

(9) The prospective new owner shall submit a new application for an agency license with the fee at least thirty days prior to the change of ownership.

(10) The agency shall inform the department, in writing, at the time of opening or closing the agency or branch offices included in the agency license.

[Statutory Authority: RCW 70.127.120 and 70.127.250. 92-02-018 (Order 224), § 246-327-025, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-327-025, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.126.040. 89-12-077 (Order 2790), § 248-27-025, filed 6/7/89.]

**WAC 246-327-035 License denials--Suspensions--Modifications--Revocations.** (1) The department may deny, suspend, modify, or revoke a license or assess civil penalties, or both, against the agency if an applicant, owner, officer, director, or managing employee:

(a) Fails or refuses to comply with the provisions under chapter 70.127 RCW or this chapter;

(b) Continues to operate after the license is revoked or suspended for cause without subsequent reinstatement by the department;

(c) Makes a false statement of a material fact in the application for the license or data attached or in any record required by this chapter or matter under investigation by the department;

(d) Refuses to allow representatives of the department to inspect any part of the agency or books, records, or files required by this chapter;

(e) Willfully prevents or interferes with, or attempts to impede in any way, the work of a representative of the department in the lawful enforcement of chapter 70.127 RCW and this chapter;

(f) Willfully prevents or interferes with a representative of the department in the preservation of evidence of a violation under chapter 70.127 RCW or this chapter;

(g) Fails to pay or make arrangements to pay a civil monetary penalty assessed by the department within ten days after the assessment becomes final, as provided under WAC 246-327-045, Civil fines;

(h) Uses false, fraudulent, or misleading advertising;

(i) Has repeated incidents of personnel performing services beyond services authorized by the agency or law; or

(j) Misrepresents, or is fraudulent in an aspect of, the conduct of the applicant's or owner's business.

(2) If the department finds the public health, safety, or welfare imperatively require emergency action, a license may be summarily suspended pending proceedings for revocation or other action.

[Statutory Authority: RCW 70.127.120, 70.127.250 and 34.05.220. 92-02-018 (Order 224), § 246-327-035, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-327-035, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 34.05 RCW, RCW 34.05.220 (1)(a) and 70.126.040. 90-06-019 (Order 039), § 248-27-035, filed 2/28/90, effective 3/1/90. Statutory Authority: RCW 70.126.040. 89-12-077 (Order 2790), § 248-27-035, filed 6/7/89.]

**WAC 246-327-055 License action and/or civil fine--Notice--Adjudicative proceeding.** (1) The department's notice of a denial, suspension, modification, or revocation of a license shall be consistent with RCW 43.70.115. An applicant or licensee holder has the right to an adjudicative proceeding to contest the decision.

(2) The department's notice of imposition of a civil fine shall be consistent with RCW 43.70.095. A person the department imposes a civil fine on has the right to an adjudicative proceeding to contest the decision.

(3) A license applicant or holder or a person the department imposes a civil fine on contesting a department decision shall within twenty-eight days of receipt of the decision:

(a) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and

(b) Include in or with the application:

(i) A specific statement of the issue or issues and law involved;

(ii) The grounds for contesting the department decision; and

(iii) A copy of the contested department decision.

(4) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

[Statutory Authority: RCW 70.127.120, 70.127.250 and 34.05.220. 92-02-018 (Order 224), § 246-327-055, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-327-055, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 34.05 RCW, RCW 34.05.220 (1)(a) and 70.126.040. 90-06-019 (Order 039), § 248-27-055, filed 2/28/90, effective 3/1/90. Statutory Authority: RCW 70.126.040. 89-12-077 (Order 2790), § 248-27-055, filed 6/7/89.]

**WAC 246-327-105 AIDS education and training.** Home health agencies shall:

(1) Verify or arrange for appropriate education and training of personnel and volunteers on the prevention, transmission, and treatment of HIV and AIDS consistent with RCW 70.24.310; and

(2) Use infection control standards and educational material consistent with the approved curriculum manual *Know - AIDS Education for Health Care Facility Employees*, January 1991, published by the department office on HIV/AIDS.

[Statutory Authority: RCW 70.127.120, 70.127.250 and 70.24.310. 92-02-018 (Order 224), § 246-327-105, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-327-105, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.126.040. 89-12-077 (Order 2790), § 248-27-105, filed 6/7/89.]

**WAC 246-327-155 Functions, duties, and responsibilities of direct care personnel.** (1) Agencies shall describe functions, duties, and responsibilities of direct patient care personnel and volunteers including:

(a) Initial and ongoing patient assessment, reassessment, and evaluation;

(b) Participation in development and revision of plan of treatment or care;

(c) Provision of appropriate services in accordance with agency policy and procedures;

(d) Participation in case conferences or other processes used to coordinate patient care;

(e) Teaching and counseling patients and family to meet patient needs identified in the plan of treatment or care;

(f) Preparation of clinical notes;

(g) Participation in discharge planning from home health care;

(h) Development of written directions for use by home health aide or appropriate therapy assistant; and

(i) Supervision and orientation of home health aide or appropriate therapy assistant to assure safe, therapeutic patient care.

(2) Agencies utilizing the services of licensed practical nurses shall follow agency policies, provide supervision by a registered nurse, and comply with chapter 18.78 RCW.

(3) The agency shall utilize the services of therapy assistants:

(a) Only as defined under WAC 246-327-010;

(b) Under supervision of an appropriately qualified therapist; and

(c) Following a plan of care compatible with the plan of treatment which is approved and supervised by the qualified therapist.

(4) Home health aide services, when utilized, shall:

(a) Be included in the plan of care or plan of treatment;

(b) Follow a specific written plan of care or treatment; and

(c) Be under the supervision of a registered nurse, therapist, or licensed practical nurse, as appropriate, with:

(i) Orientation of the home health aide to the specific home health care of each patient prior to care given;

(ii) Evidence of an in-home supervisory visit at least once a month if the patient needs acute care and at least once every three months if the patient needs maintenance care; and

(iii) Direct observation of in-home performance of each home health aide at least every six months.

(5) The agency shall define the functions and duties of home health aides including the ability to:

(a) Observe and recognize changes in patient's condition and report changes to the supervisor;

(b) Initiate emergency procedures under the agency policy;

(c) Assist with medications ordinarily self-administered by the patient, with assistance limited to:

(i) Communication of appropriate information to the patient regarding self-administration including:

(A) Reminding a patient of when it is time to take a prescribed medication; and

(B) Reading the label of the medication container.

(ii) Handing a patient-owned medication container to the patient;

(iii) Opening the medication container; or

(iv) Application or installation of skin, nose, eye, and ear preparations only under specific direction of the supervisor.

(d) Record pertinent information in the patient's clinical record.

[Statutory Authority: RCW 70.127.120 and 70.127.250. 92-02-018 (Order 224), § 246-327-155, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-327-155, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.126.040. 89-12-077 (Order 2790), § 248-27-155, filed 6/7/89.]

## Chapter 246-329 WAC CHILDBIRTH CENTERS

### WAC

|             |                                       |
|-------------|---------------------------------------|
| 246-329-010 | Definitions.                          |
| 246-329-020 | Licensure.                            |
| 246-329-030 | Governing body and administration.    |
| 246-329-050 | HIV/AIDS education and training.      |
| 246-329-060 | Birth center policies and procedures. |
| 246-329-100 | Birth center—Physical environment.    |

**WAC 246-329-010 Definitions.** (1) "Administration of drugs" means an act in which a single dose of a prescribed drug or biological is given to a client by an authorized person in accordance with all laws and regulations governing such acts. The complete act of administration entails removing an individual dose from a previously dispensed, properly labeled container, including a unit dose container, verifying it with the orders of a practitioner who is legally authorized to prescribe, giving the individual dose to the proper client and properly recording the time and dose given.

(2) "Authenticated or authentication" means authorization of a written entry in a record by means of a signature which shall include, minimally, first initial, last name, and title.

(3) "Bathing facility" means a bathtub or shower.

(4) "Birth center or childbirth center" means a type of maternity home which is a house, building, or equivalent organized to provide facilities and staff to support a birth service, provided that the birth service is limited to low-risk maternal clients during the intrapartum period.

(5) "Birthing room" means a room designed, equipped, and arranged to provide for the care of a woman and newborn and to accommodate her support person or persons during the process of vaginal childbirth, (the three stages of labor and recovery of a woman and newborn).

(6) "Birth service" means the prenatal, intrapartum, and postpartum care provided for individuals with uncomplicated pregnancy, labor, and vaginal birth, to include the newborn care during transition and stabilization.

(7) "Client" means a woman, fetus, and newborn receiving care and services provided by a birth center during pregnancy and childbirth and recovery.

(8) "Clinical staff" means physicians and midwives appointed by the governing body to practice within the birth center and governed by rules approved by the governing body.

(9) "Department" means the Washington state department of health.

(10) "Governing body" means the person or persons responsible for establishing and approving the purposes and policies of the childbirth center.

(11) "Hospital" means any institution, place, building, or agency which provides accommodations, facilities, and services over a continuous period of twenty-four hours or more, for observation, diagnosis, or care, of two or more individuals not related to the operator or suffering from any other condition which obstetrical, medical, or surgical services would be appropriate for care or diagnosis. "Hospital" as used in this definition does not include hotels, or similar places furnishing only food and lodging, or simply, domiciliary care; nor does it include clinics, physicians' offices where patients are not regularly kept as bed patients for twenty-four hours or more; nor does it include nursing homes, as defined and which comes under the scope of chapter 18.51 RCW; nor does it include maternity homes, which come within the scope of chapter 18.46 RCW; nor does it include psychiatric hospitals, which come under the scope of chapter 71.12 RCW; nor any other hospital or institution specifically intended for use and the diagnosis and care of those suffering from mental illness, mental retardation, convulsive disorders, or other abnormal mental conditions. Furthermore, nothing in this definition shall be construed as authorizing the supervision, regulation, or control of the remedial care or treatment of residents or patients in any hospital conducted for those who rely primarily upon treatment by prayer or spiritual means in accordance with creed or tenets of any well-recognized church or religious denomination.

(12) "Lavatory" means a plumbing fixture designed and equipped for handwashing purposes.

(13) "Low-risk maternal client" means an individual who:

(a) Is in general good health with uncomplicated prenatal course and participating in ongoing prenatal care;

(b) Is participating in an appropriate childbirth and infant care education program;

(c) Has no major medical problems;

(d) Has no previous major uterine wall surgery, caesarean section, or obstetrical complications likely to recur;

(e) Has parity under six unless a justification for a variation is documented by clinical staff;

(f) Is not a nullipara of greater than thirty-eight years of age unless a justification for a variation is documented by clinical staff;

(g) Is not less than sixteen years of age unless a justification for variation for ages fourteen through fifteen only is documented by clinical staff;

(h) Has no significant signs or symptoms of pregnancy-induced hypertension, polyhydramnios or oligohydramnios, abruptio placenta, chorioamnionitis, multiple gestation, intrauterine growth retardation, meconium stained amniotic fluid, fetal complications, or substance abuse;

(i) Demonstrates no significant signs or symptoms of anemia, active herpes genitalis, pregnancy-induced hypertension, placenta praevia, malpositioned fetus, or breech while in active labor;

(j) Is in labor, progressing normally;

(k) Is without prolonged ruptured membranes;

(l) Is not in preterm labor nor postterm gestation;

(m) Is appropriate for a setting where analgesia is limited; and

(n) Is appropriate for a setting where anesthesia is used in limited amounts and limited to local infiltration of the perineum or pudendal block.

(14) "Maternity home" means any home, place, hospital, or institution in which facilities are maintained for the care of four or more women not related by blood or marriage to the operator during pregnancy or during or within ten days after delivery: *Provided however*, That this chapter shall not apply to any hospital licensed under chapter 70.41 RCW, "Hospital licensing and regulation."

(15) "Midwife" means an individual recognized by the Washington state board of nursing as a certified nurse midwife as provided in chapter 18.88 RCW, chapter 246-839 WAC, or an individual possessing a valid, current license to practice midwifery in the state of Washington as provided in chapter 18.50 RCW, chapter 246-834 WAC.

(16) "New construction" means any of the following:

(a) New buildings to be used as a birth center;

(b) Addition or additions to an existing building or buildings to be used as a childbirth center;

(c) Conversion of existing buildings or portions thereof for use as a childbirth center;

(d) Alterations or modifications other than minor alterations.

"Minor alterations" means any structural or physical modification within an existing birth center which does not change the approved use of a room or an area. Minor alterations performed under this definition do not require prior review of the department; however, this does not constitute a release from other applicable requirements.

(17) "Personnel" means individuals employed by the birth center.

(18) "Physician" means an individual licensed under provisions of chapter 18.71 RCW, "Physicians," or chapter 18.57 RCW, "Osteopathy—Osteopathic medicine and surgery."

(19) "Registered nurse" means an individual licensed under the provision of chapter 18.88 RCW, "Registered nurses," who is practicing in accordance with the rules and regulations promulgated thereunder.

(20) "Recovery" means that period or duration of time starting at birth and ending with discharge of a

client from the birth center or the period of time between the birth and the time a client leaves the premises of the birth center.

(21) "Shall" means compliance is mandatory.

(22) "Should" means a suggestion or recommendation, but not a requirement.

(23) "Support person" means the individual or individuals selected or chosen by a maternal client to provide emotional support and to assist her during the process of labor and childbirth.

(24) "Toilet" means a room containing at least one water closet.

(25) "Volunteer" means an individual who is an unpaid worker in the birth center, other than a support person.

(26) "Water closet" means a plumbing fixture for defecation fitted with a seat and a device for flushing the bowl of the fixture with water.

[Statutory Authority: RCW 18.46.060. 92-02-018 (Order 224), § 246-329-010, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-329-010, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 18.46.060. 86-04-031 (Order 2338), § 248-29-010, filed 1/29/86. Statutory Authority: RCW 43.20.050. 80-05-099 (Order 197), § 248-29-010, filed 5/2/80.]

**WAC 246-329-020 Licensure.** (1) Application for license.

(a) An application for a childbirth center license shall be submitted on forms furnished by the department. The application shall be signed by the legal representative of the governing body.

(b) The applicant shall furnish to the department full and complete information and promptly report any changes which would affect the current accuracy of such information as to the identity of each officer and director of the corporation, if the birth center is operated by a legally incorporated entity, profit or nonprofit, and of each partner if the birth center is operated through a legal partnership.

(c) Each application for license shall be accompanied by a license fee as established by the department under RCW 43.70.110: *Provided*, That no fee shall be required of charitable or nonprofit or government-operated birth centers. Upon receipt of the license fee, when required, the department shall issue a childbirth center license if the applicant and the birth center facilities meet the requirements of this chapter.

(2) License renewal—Limitations—Display.

(a) A license, unless suspended or revoked, shall be renewed annually.

(i) Applications for renewal shall be on forms provided by the department and shall be filed with the department not less than ten days prior to expiration.

(ii) The department shall inspect and investigate each childbirth center as needed and at least annually to determine compliance with standards herein (chapter 246-329 WAC) and applicable standards of chapter 18.46 RCW.

(b) Each license shall be issued only for the premises and persons named. Licenses shall be transferrable or assignable only with written approval by the department.

(c) Licenses shall be posted in a conspicuous place on the licensed premises.

(3) Denial, suspension, modification, revocation of a license; notice; adjudicative proceeding.

(a) The department may, if the interests of the clients so demand, deny, suspend, or revoke a license when there has been failure or refusal to comply with the requirements of chapter 18.46 RCW and/or these rules. The department's notice of a denial, suspension, modification, or revocation of a license shall be consistent with RCW 43.70.115. An applicant or license holder has the right to an adjudicative proceeding to contest the decision.

(b) A license applicant or holder contesting a department license decision shall within twenty-eight days of receipt of the decision:

(i) File a written application for an adjudicative proceeding by a method showing proof of receipt with the Administrative Hearings Unit, Department of Health, 1300 Quince Street S.E., P.O. Box 47851, Olympia, WA 98504-7851; and

(ii) Include in or with the application:

(A) A specific statement of the issue or issues and law involved;

(B) The grounds for contesting the department decision; and

(C) A copy of the contested department decision.

(c) The proceeding is governed by the Administrative Procedure Act (chapter 34.05 RCW), this chapter, and chapter 246-08 WAC. If a provision in this chapter conflicts with chapter 246-08 WAC, the provision in this chapter governs.

(4) New construction—Major alterations.

(a) When new construction or major alteration is contemplated, the following shall be submitted to the department for review:

(i) A written program containing, at a minimum, information concerning services to be provided and operational methods to be used which will affect the extent of facilities required by these regulations;

(ii) Duplicate sets of preliminary plans which are drawn to scale and include: A plot plan showing streets, driveways, water, and sewage disposal systems, grade and location of the building or buildings on the site; the plans for each floor of each building, existing and proposed, which designate the functions of each room and show all fixed equipment. The preliminary plans shall be accompanied by a statement as to the source of water supply and the method of sewage and garbage disposal and a general description of construction and materials, including interior finishes.

(b) Construction shall not be started until duplicate sets of final plans (drawn to scale) and specifications have been submitted to and approved by the department. Final plans and specifications shall show complete details to be furnished to contractors for construction of buildings or major alterations in existing buildings. These shall include:

(i) Plot plans;

(ii) Plans for each floor of each building which designate the function of each room and show all fixed

equipment and the planned location of beds and other furniture;

(iii) Interior and exterior elevations, building sections, and construction details;

(iv) Schedule of floors, wall, and ceiling finishes, and the types and sizes of doors and windows; plumbing, heating, ventilation, and electrical systems; and

(v) Specifications which fully describe workmanship and finishes.

(c) Adequate provisions shall be made for the safety and comfort of clients as construction work takes place in or near an occupied area.

(d) Construction shall take place in accordance with approved final plans and specifications. Only those changes which have been approved by the department may be incorporated into the construction project. Modified plans, additions, or changes incorporated into the construction project shall be submitted to the department for the department file on the project.

(5) Compliance with other regulations.

(a) Applicable rules and regulations adopted by the Washington state fire marshal.

(b) If there is no local plumbing code, the Uniform Plumbing Code of the National Association of Plumbing and Mechanical Officials shall be followed.

(c) Compliance with these regulations does not exempt birth centers from compliance with the local and state electrical codes or local fire, zoning, building, and plumbing codes.

[Statutory Authority: RCW 18.46.060 and 34.05.220. 92-02-018 (Order 224), § 246-329-020, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-329-020, filed 12/27/90, effective 1/31/91. Statutory Authority: Chapter 34.05 RCW, RCW 34.05.220 (1)(a) and 18.46.060. 90-06-019 (Order 039), § 248-29-020, filed 2/28/90, effective 3/1/90. Statutory Authority: RCW 18.46.060. 86-04-031 (Order 2338), § 248-29-020, filed 1/29/86; 83-07-016 (Order 255), § 248-29-020, filed 3/10/83. Statutory Authority: RCW 43.20.050. 80-05-099 (Order 197), § 248-29-020, filed 5/2/80.]

**WAC 246-329-030 Governing body and administration.** (1) The birth center shall have a governing body.

(2) The governing body shall be responsible for provision of personnel, facilities, equipment, supplies, and special services needed to meet the needs of the clients.

(3) The governing body shall adopt policies for the care of clients within or on the premises of the birth center.

(4) The governing body shall appoint an administrator or director who shall be responsible for implementing the policies adopted by the governing body.

(5) The governing body shall establish and maintain a current written organizational plan which includes all positions and delineates responsibilities, authority, and relationship of positions within the birth center.

(6) The governing body shall have the authority and responsibility for appointments and reappointments of clinical staff and ensure that only members of the clinical staff shall admit clients to the birth center.

(a) Each birth center shall have designated physician participation in clinical services and in the quality assurance program.

(b) Each birth center shall have a written policy and program which shall stipulate the extent of physician participation in the services offered.

(c) Each physician and midwife appointed to the clinical staff shall provide evidence of current licensure in the state of Washington.

(d) The clinical staff shall develop and adopt bylaws, rules, and regulations subject to the approval of the governing body which shall include requirements for clinical staff membership; delineation of clinical privileges and the organization of clinical staff.

(7) The governing body shall be responsible for a quality assurance audit on a regular basis to review cases, minimally to include ongoing compliance with rules in chapter 246-329 WAC.

[Statutory Authority: RCW 18.46.060. 92-02-018 (Order 224), § 246-329-030, filed 12/23/91, effective 1/23/92. Statutory Authority: RCW 43.70.040. 91-02-049 (Order 121), recodified as § 246-329-030, filed 12/27/90, effective 1/31/91. Statutory Authority: RCW 70.24.310. 89-21-038 (Order 3), § 248-29-045, filed 10/12/89, effective 11/12/89.]

**WAC 246-329-060 Birth center policies and procedures.** Written policies and procedures shall include, but not be limited to:

(1) Definition of a low-risk maternal client who shall be eligible for birth services offered by the birth center.

(2) Definition of a client who shall be ineligible for birth services at the birth center.

(3) Identification and transfer of clients who, during the course of pregnancy, are determined to be ineligible.

(4) Identification and transfer of clients who, during the course of labor or recovery, are determined to be ineligible for continued care in the birth center.

(5) Written plans for consultation, backup services, transfer and transport of a newborn and maternal client to a hospital where appropriate care is available.

(6) Written informed consent which shall be obtained prior to the onset of labor and shall include evidence of an explanation by personnel of the birth services offered and potential risks.

(7) Provision for the education of clients, family, and support persons in childbirth and newborn care.

(8) Plans for immediate and long-term follow-up of clients after discharge from the birth center.

(9) Registration of birth and reporting of complications and anomalies, including sentinel birth defect reporting pursuant to RCW 70.58.320 and chapter 246-420 WAC, as now or as hereafter amended.

(10) Prophylactic treatment of the eyes of the newborn in accordance with WAC 246-100-206 (5)(b) as now, or as hereafter, amended.

(11) Metabolic screening of newborns.

(a) Educational materials shall be provided to each client relative to metabolic screening and informed consent for metabolic screening. These materials shall be obtained from the genetics program of the department.

(b) There shall be a mechanism for weekly reporting of all live births to the genetics program of the department on forms provided by the genetics program.

(c) The birth center shall provide each client with instructions and a metabolic screening collection kit, obtained from the genetics program of the department. There shall be a procedure and/or evidence of a plan for follow-up so that blood samples are collected between the seventh and tenth day of life.

(d) When parents refuse metabolic screening, there shall be provisions for a signed refusal statement which shall be sent to the genetics program of the department in lieu of the blood sample.

(12) Infection control to include consideration of housekeeping; cleaning, sterilization, sanitization, and storage of supplies and equipment, and health of personnel. Health records for personnel shall be kept in the facility and include documented evidence of a tuberculin skin test by the Mantoux method upon employment. A copy of the health record shall be given to each employee upon termination of employment. A nonsignificant skin test is defined as less than 10mm induration read at forty-eight to seventy-two hours. A significant skin test is defined as 10mm of induration, or greater, read at forty-eight to seventy-two hours. Positive reactors shall have a chest x-ray within ninety days of the first day of employment. Exemptions and specific requirements are as follows:

(a) New employees who can document a positive Mantoux test in the past shall be excluded from screening;

(b) Those with positive skin tests and abnormal chest x-ray for tuberculosis shall complete the recommended course of preventive or curative treatment, as determined by the local health officer;

(c) Employees with any communicable disease in an infectious stage shall not be on duty.
