Any changes in form or substance which the witness desires to make shall be entered upon the deposition by the officer with a statement of the reasons given by the witness for making them. The deposition shall then be signed by the witness, unless the parties by stipulation waive the signing or the witness is ill or cannot be found or refuses to sign. If the deposition is not signed by the witness, the officer shall sign it and state on the record the fact of the waiver or of the illness or absence of the witness or the fact of the refusal to sign together with the reason, if any, given therefor; and the deposition may then be used as fully as though signed,

unless on a motion to suppress the board holds that the reasons given for the refusal to sign require rejection of the deposition in whole or in part.

(2) The officer shall certify on the deposition that the witness was duly sworn by him and that the deposition is a true record of the testimony given by the witness. He shall then securely seal the deposition in an envelope indorsed with the title of proceeding and marked "Deposition of (here insert name of witness)" and shall promptly send it by registered or certified mail to the board, or its agent, for filing. The party taking the deposition shall give prompt notice of its filing to all other parties. Except by agreement of the parties or ruling of the board, a deposition will be received only in its entirety. A party does not make a party, or the privy of a party, or any hostile witness his witness by taking his deposition. [Rule .08.320, filed 7/6/60.]

WAC 196-08-330 Depositions and interrogatories in contested cases—Submission of interrogatories. Where the deposition is taken upon written interrogatories, the party offering the testimony shall separately and consecutively number each interrogatory and file and serve them with a notice stating the name and address of the person who is to answer them and the name or descriptive title and address of the officer before whom they are to be taken. Within 10 days thereafter a party so served may serve cross-interrogatories upon the party proposing to take the deposition. WAC 196-12-020 Experience records. (1) Evaluation of records: The basic requirement for registration as a professional engineer is a specific record of eight years or more of approved experience in engineering work of a professional grade. The provisions of the law are that any

experience by college study, as defined below, must be substantiated by an official transcript, the supplying of which is the responsibility of the applicant.

(a) Graduation in an approved engineering college curriculum of four years is equivalent to four years of the required experience.

(b) Satisfactory completion of each year of such an approved engineering curriculum is equivalent to one year of experience.

(c) Graduation in a program in engineering technology approved by the accreditation board for engineering and technology (ABET) is equivalent to three years of required experience. Satisfactory completion of each year of such an approved program is equivalent to three-fourths of one year of experience.

(d) Graduation in a program in engineering technology from a non-ABET approved curricula, however approved by the board, is equivalent to two years of required experience. Satisfactory completion of each year of such a program is equivalent to one-half of one year of experience.

(e) Satisfactory completion of each year of a nonapproved curriculum in engineering may be granted up to a maximum of one-half of one year of experience. Coursework in such a program must be equivalent to that of an approved curriculum to grant maximum experience credit.

(f) Graduation in a curriculum other than engineering will be evaluated by the board.

(g) Postgraduate study in engineering may be given credit up to one year. A postgraduate degree must be obtained to be granted maximum experience credit.

(h) Applicants having engineering degrees from countries other than the United States or Canada may be required to have their transcripts evaluated by a transcript evaluation service approved by the board. This evaluation will be performed at the applicant's expense, and the applicant will be responsible for submitting all the necessary information to the evaluation service. The board shall not take any action on an application until the report from the evaluation service and all other documents are received.

(i) The board may approve engineering degree programs from countries other than the United States and Canada. A listing of said approved programs will be maintained in the board office. Graduation from such an approved program will exempt the applicant from utilizing the transcript evaluation service.

(2) Colleges recognized by the board: All student's credits from curricula approved by the accreditation board for engineering and technology are accepted. In the state of Washington student's credits from other curricula than those approved by the accreditation board for engineering and technology may be accepted at the discretion of the board.

(3) In evaluating the work experience required to qualify for registration, the following criteria will be used:

(a) In the normal educational sequence, experience gained between semesters or quarters will not be considered as professional experience.

(b) In situations where the experience/educational track is intermixed with a degree attained late in the sequence, educational achievement will not be counted in addition to work experience in determining total experience. However, professional work experience will not necessarily be considered as starting subsequent to graduation but will be evaluat-

ed in total with consideration given to progression in level of technical complexity and responsibility.

(c) Where a degree is not attained, but at least three years of education in an approved curriculum has been completed prior to a work experience track, the education will be considered in conjunction with the work experience in determining the total years of experience.

(d) Engineering teaching of a character satisfactory to the board may be recognized as professional level experience up to a maximum of two years.

(e) Any work experience gained in a situation which violates the provisions of chapter 18.43 RCW or Title 196 WAC will not be credited towards the statutory experience requirement.

(f) The statutory experience requirement to qualify for examination must be completed sixty days prior to the date of examination. Furthermore, the applicant is to provide the necessary verification of said experience up to the sixty-day limit.

(4) An applicant must have passed the first stage of the examination and be enrolled as an E.I.T. in accordance with WAC 196-12-050 before applying for the second stage or branch examination.

(6) Land surveying teaching of a character satisfactory to the board may be recognized as surveying experience up to a maximum of one year.

(7) Construction staking shall not be applicable toward the required six years of experience.

However, if the licensee's next birth date is within three months of the initial date of licensure, the original license shall expire on his or her second birth date following original licensure. All subsequent renewals shall be for a two-year period.

(4) Before the expiration date of the individual's license the director of the department of licensing shall mail a notice for renewal of license to the last known address of every person holding a current license. The licensee must return such notice along with current renewal fees prior to the expiration of said license. Regardless of whether a renewal notice is received by the licensee, said license shall become invalid if the required fee is not paid by the date of expiration. If the licensee fails to pay the prescribed renewal fees within ninety days after the expiration date of the license, then the renewal fee will be the current fee plus an amount equal to one year's renewal fee.

(5) The renewal fee for engineers, land surveyors, engineering corporations and engineering partnerships are determined by the director of the department of licensing.
