**WAC 232-12-001 Definition of terms.** Definitions used in rules of the commission are defined in RCW 77.08.010. In addition, unless the context clearly requires otherwise:

(1) Snagging, gaffing, or spearing means: An effort to impale game fish in a part of its body other than its mouth by use of hooks or other devices.

(2) A valid license, permit, tag, stamp or punchcard means: A license, permit, tag, stamp, or punchcard that was issued to the bearer for the current season by the commission and is required to hunt, fish or possess wildlife and has not been altered except as provided by rule of the commission.

(3) Hook means: One single, double, or treble hook.

(4) Barbless hook means: A single, pointed hook from which all barbs have been filed off, pinched down, removed or deleted when manufactured.

(5) Falconry means: Possession, control, or use of a raptor for the purpose of hunting and free flight training.

(6) Anadromous game fish means:

(a) Steelhead trout, *Oncorhynchus mykiss*

(b) Searun cutthroat, *Oncorhynchus clarkii*

(c) Searun Dolly Varden, *Salvelinus malma*

(7) Handgun means: Any pistol, revolver or short firearm with a barrel length of less than sixteen inches and does not have a shoulder stock.

(8) Lure or fly means: A manufactured article constructed of feathers, hair, fiber, wood, metal, glass, cork, leather, rubber or plastic which does not use scent and/or flavoring to attract fish. A lure or fly may not have more than three hooks attached. When fishing with a lure or fly, fish may be released until the catch limit is retained.

(9) Bait means: Any substance which attracts fish or wildlife by scent and/or flavor. Bait includes any device made of feathers, hair, fiber, wood, metal, glass, cork, leather, rubber or plastic which uses scent and/or flavoring to attract fish or wildlife.

(10) Steelhead means: A searun rainbow trout over twenty inches in length.

(11) Possession limit means: A two-day catch limit of game fish allowed to be retained in the field or in transit.

(12) Selective fishery regulations: Only artificial flies or lures with a barbless hook are allowed; bait is prohibited; fish may be released until the catch limit is retained. No one may fish from any floating device equipped with a motor, except where specifically allowed under special regulations for individual waters. If any fish has swallowed the hook or is hooked in the gill, eye or tongue, it should be kept if legal to do so.

(13) Fly fishing means: In waters designated as "fly fishing only" an angler may use: A dry fly, bucktail fly, wet fly, nymph or streamer with not more than one, single-pointed barbless hook; a conventional fly line at least twenty-five feet in length, with a back-up line of any kind behind the fly line. In waters designated as "fly fishing only" an angler may not fish from any floating device equipped with a motor, except where specifically allowed under special regulations for individual waters. When fishing with a lure or fly, fish may be released until the catch limit is retained.

(14) Boat fishing: Fishing while in or on a boat, raft, or any other floating device.

(15) Catch-and-release: A type of angling where none of the fish caught are retained by the angler.

(16) Daily catch limit: The maximum number of fish of a given species and size which a person may legally retain in a single day. When you are fishing with bait, all legal trout are counted as part of the daily catch limit, whether kept or released. Steelhead may be caught and

released while using bait until the daily catch limit is retained.

(17) Fish in possession: Any fish retained, secure from escape, whether dead or alive. Bass or Walleye may be caught, retained, and released alive from a livewell until a daily catch limit is in possession.

(18) Mouth of stream, river, or slough: Those waters upstream of a line projected between the outermost uplands at the mouth. Outermost uplands means those lands are not covered by water during an ordinary high water.

(19) Maximum size limit: The longest length of a fish of a given species that an angler may keep, measured from snout to tip of tail (not fork).

(20) Minimum size limit: The shortest length of a fish of a given species that an angler may keep, measured from snout to tip of tail (not fork).

(21) Night closure: On those waters where night closures are specified, it is unlawful to fish from one hour after official sunset to one hour before official sunrise.

(22) Slough: Any swamp, marsh, bog, pond, side-channel, or backwater connected to a river by water. Many waters commonly called sloughs are not connected to a river and, therefore, are considered lakes.

(23) Wild cutthroat release: Only cutthroat trout with missing adipose fins may be possessed. There must be a healed scar in the location of the missing fin.

(24) Wild steelhead release: Only steelhead with missing adipose or ventral fins may be possessed. There must be a healed scar in the location of the missing fin. It is unlawful to use a gaff hook to land steelhead in waters designated "wild steelhead release."

(25) Free fishing weekends: The weekends corresponding with National Fishing Week have been declared as family fishing weekends in Washington. On these weekends fishing licenses will not be required to fish for game fish, except steelhead trout. These free fishing days are valid for everyone, regardless of residency or age. All other regulations remain in effect. Only waters open to fishing may be fished; lure and/or bait restrictions and size and catch limits currently in place must be followed.

(b) Escapes of deleterious exotic wildlife must be reported immediately to the department.

(c) The recapture or death of escaped deleterious exotic wildlife must be reported immediately to the department.

(9) Secure facility

(a) All deleterious exotic wildlife will be held in a secure facility. For the purpose of this rule, a secure facility is an enclosure so constructed as to prevent danger to the environment or wildlife of the state, including escape of deleterious exotic wildlife specimens or ingress of resident wildlife ungulates (hoofed animals). The adequacy of the facility shall be determined by the director or agents of the director.

(b) For deleterious exotic wildlife listed in subsections (1)(d)(iv) and (1)(d)(v), the "secure facility" must comply with the fencing requirements in subsection (10) unless otherwise authorized by the director in writing.

(10) Fencing requirements

(a) Perimeter fences must be, at a minimum, eight feet above ground level for their entire length. The bottom six feet must be mesh of sufficient size to prevent resident wildlife ungulates (hoofed animals) from entering and deleterious exotic wildlife from escaping. Supplemental wire required to attain a height of eight feet may be smooth, barbed, or woven wire (at least 12-1/2 gauge) with strands spaced not more than six inches apart.

(b) Perimeter fences constructed of high tensile wire must be supported by a post or stay at minimum intervals of eight feet.

(c) Perimeter fences must be at least 12-1/2 gauge woven wire, 14-1/2 gauge high-tensile woven wire, chain

link, nonclimbable woven fence, or other fence approved by the director.

(i) If the wire used is not a full eight feet in height, it must be overlapped one row and securely fastened at every other vertical row or woven together with cable.

(d) Electric fencing materials may be used on perimeter fences only as a supplement to conventional fencing materials.

(e) All gates in the perimeter fences must be self-closing, equipped with two locking devices, and installed only in locations that have been approved by the director. Double gates may be required at points in the perimeter fences subject to frequent vehicle traffic that is not related to activities involving the holding of deleterious exotic wildlife.

(f) Posts used in the perimeter fences must be:

(i) Wood (pressure treated), five-inch minimum diameter or an equivalent as approved by the director;

(ii) Spaced no more than twenty-four feet apart with stays or supports at eight foot intervals between the posts;

(iii) Extended at least eight feet above ground level;

(iv) Corners braced with wood or with an equivalent material as approved by the director.

(g) Fences must be maintained at all times to prevent deleterious exotic wildlife from escaping or resident wildlife ungulates (hoofed animals) from entering the enclosure. If such animals do pass through, under, or over the fence because of any topographic feature or other conditions, the person possessing deleterious exotic wildlife must immediately supplement the fence to prevent continued passage.

(h) For any fence existing prior to February 13, 1993, a person may petition the director in writing for a variance from the above fencing requirements. Any such petition must be filed no later than May 31, 1993 and must identify all aspects in which the existing fence does not meet the fencing requirements contained herein. On approval of the director, such person may maintain such existing fence with normal repair. However, any extension or relocation of existing fence must meet the fencing requirements contained herein.

(11) Marking requirements

(a) All live specimens of deleterious exotic wildlife except those listed in subsections (1)(a) and (1)(b), shall be permanently and individually identified by methods approved by the director,

(b) Identification assigned to an individual animal may not be transferred to any other animal.

Such testing shall be at the possessor's expense. Animals which are deemed by department of wildlife biologists upon examination to exhibit either: behavioral (vocalization), morphological (size, rump patch, color) or biochemical indications of such influence (hemoglobin, superoxide dismutase, transferrin and post-transferrin, or others to be developed) may not be imported.

(b) The director may require a person currently possessing any member of the Genus *Cervus* which are identified in subsection (1)(v) herein to submit records of genetic tests, conducted by a professionally recognized laboratory to identify red deer genetic influence (genetic material from any member of any subspecies, race, or species of the elk-red deer-wapiti complex *Cervus elaphus* not indigenous to the state of Washington), for each individual cervid to the department. Such testing shall be at the possessor's expense. The director may require that any animal identified a red deer or having non-indigenous genetic influence be destroyed, removed from the state, or neutered.

Anglers fishing the Columbia River are restricted to one daily catch limit, as defined by the laws of the state in which they are fishing, even if they are licensed by both states.

\*Note: When fishing with bait, all trout equal to or greater than the minimum size are counted as part of the daily catch limit whether kept or released. Steelhead may be caught and released while using bait until the daily catch limit is retained. Where
