WAC 352-32-030 Camping. (1) Camping facilities of the state parks within the Washington state parks and recreation commission system are designed and administered specifically to provide recreational opportunities for park visitors. Use of park facilities for purposes which are of a nonrecreational nature, such as long-term residency at park facilities, obstructs opportunities for recreational use, and is inconsistent with the purposes for which those facilities were designed.

No person or camping unit may use any state park facility for residence purposes, as defined (WAC 352-32-010(17)).

(2) No person shall camp in any state park area except in areas specifically designated and/or marked for that purpose or as directed by a ranger.

(3) Occupants shall vacate camping facilities by removing their personal property therefrom prior to 3:00 p.m., (or other appropriate, established time in parks where camping is reserved) if the applicable camping fee has not been paid or if the time limit for occupancy of the campsite has expired or the site is reserved by another party. Remaining in a campsite beyond the established checkout time shall subject the occupant to the payment of an additional camping fee.

(4) Use of utility campsites by tent campers shall be subject to payment of the utility campsite fee except when otherwise specified by a ranger.

(5) A campsite is considered occupied when it is being used for purposes of camping by a person or persons who have paid the camping fee within the applicable time limits or when it has been reserved through the appropriate procedures of the reservation system. No person shall take or attempt to take possession of a campsite when it is being occupied by another party, or when informed by a ranger that such site is occupied, or when the site is posted with a "reserved" sign. In the case of a reserved site, a person holding a valid reservation for that specific site may occupy it according to the rules relating to the reservation system for that park. In order to afford the public the greatest possible use of the state park system on a fair and equal basis, campsites in those parks not on the state park reservation system will be available on a first-come, first-serve basis.

[1993 WAC Supp—page 1612]

No person shall hold or attempt to hold campsite(s), for another camping unit for present or future camping dates, except as prescribed for multiple campsites. Any site occupied by a camping unit must be actively utilized for camping purposes.

(6) One person may register for one or more sites within a multiple campsite by paying the multiple campsite fee (WAC 352-32-250(6)). Registration preference will be given to multiple camping units who want to use multiple sites. An individual may register and hold a multiple campsite for occupancy on the same day by other camping units. Multiple campsites in designated reservation parks are reservable under the reservation system.

(7) In order to afford the general public the greatest possible use of the state park system, on a fair and equal basis, and to prevent residential use, continuous occupancy of facilities by the same camping unit shall be limited to ten consecutive nights in one park, after which the camping unit must vacate the site for three consecutive nights, May 1 through September 30, not to exceed twenty days in a thirty-day time period; and fifteen consecutive nights in one park, after which the camping unit must vacate the site for three consecutive nights, October 1 through April 30, not to exceed thirty days in a sixty-day time period. This limitation shall not apply to those individuals who meet the qualifications of WAC 352-32-280 and 352-32-285.

(8) Only one camping unit with a maximum of eight people shall be permitted at a campsite, unless otherwise authorized by a ranger. The number of vehicles occupying a campsite shall be limited to one car or one recreational vehicle: *Provided*, That one additional vehicle without built-in sleeping accommodations may occupy a designated campsite when in the judgment of a ranger the constructed facilities so warrant. The number of tents allowed at each campsite shall be limited to the number that will fit on the designated or developed tent pad as determined by a ranger.

(9) Persons traveling by bicycles, motor bikes or other similar modes of transportation and utilizing campsites shall be limited to eight persons per site, provided no more than four motorcycles shall occupy a campsite.

(10) All persons camping in organized groups shall use designated group camp areas unless otherwise directed by a ranger and shall pay the applicable group camping fee.

A group can be any formalized group or an organized collection of families wishing to camp together.

Group camping areas other than marine trail camping areas, may be reserved in advance through contact with the local ranger. Any group must have a leader who has reached the age of majority who will be required to read and sign a "Group use permit and regulation form."

(11) Marine trail camping areas are for the exclusive use of persons traveling by human powered beachable vessels as their primary mode of transportation to the areas. Such camping areas are not subject to the campsite capacity limitations as otherwise set forth in this section. Capacities for marine trail camping areas may be established by the ranger on an individual basis and are subject to change based upon the impacts to the area. All persons using such camping areas shall pay the applicable fee.

(12) Emergency camping areas set aside in certain state parks may be used only when all designated campsites are full but may not be used prior to 9:00 p.m. Persons using

emergency areas must pay the standard campsite fee and must vacate the site by 8:00 the following morning.

(13) Except as provided in WAC 352-32-310, any violation of this section is an infraction under chapter 7.84 RCW.

Accepted reservation requests will be processed in order of arrival up to fourteen days in advance of Labor Day.

(5) Reservations may be made in person on or after April 1 at the park where camping is to occur.

(6) There will be a \$5.00 nonrefundable fee charged for each reservation made at each park, in addition to the standard campsite fee, regardless of the number of days reserved. Payment of the nonrefundable reservation fee and first night's camping fee must accompany the reservation request.

(8) Reservations for a specific campsite within a park will not be guaranteed.

(9) Campsites which have not been reserved may be used on a first-come-first-served basis without paying a reservation fee, if the site is occupied immediately.

(10) A raincheck will be issued for the camping fee paid for any confirmed reservation which is not used, provided a cancellation request is made by calling the campsite information center or the park in which the site is reserved, no less than twenty-four hours in advance of the first day of the reservation, or in writing to the park, postmarked seven days in advance of the first day of the reservation. Rainchecks will be valid for one year from the date of issue, and may be used toward camping fees in any state park, or may accompany a subsequent reservation request in lieu of payment for the first night's camping fee.

(11) Campers will be declared no-show and forfeit their reservation as well as the reservation fee and the first night's camping fee if they have not cancelled or if the reservation is not claimed by 9:00 p.m. After this time, the site may be reassigned, unless late arrival arrangements are made with the park by telephone between the hours of 7:00 p.m. and 9:00 p.m. on the day of arrival.

VESSEL SOUND LEVEL MEASUREMENT PROCEDURES

WAC

352-67-010	Purpose.
352-67-020	Definitions.
352-67-030	Instrumentation.
352-67-040	General requirements.
352-67-050	Specific requirements.

WAC 352-67-010 Purpose. The purpose of these rules is to adopt vessel sound level measurement procedures. These rules are adopted pursuant to chapter 88.12 RCW Regulation of motor boats, under authority of chapter 88.12 RCW and RCW 43.51.400. These test procedures are based on SAE recommended practices SAE J1970, Shoreline Sound Level Measurements Procedure, and SAE J2005, Stationary Sound Level Measurement Procedures for Pleasure Motorboat, and are obtained from and printed with the permission of the Society of Automotive Engineers Inc., 400 Commonwealth Drive, Warrendale, PA 15096-0001.

[Statutory Authority: RCW 43.51.400. 93-21-014, § 352-67-010, filed 10/11/93, effective 11/11/93.]

WAC 352-67-020 Definitions. As used in this chapter, unless the context clearly indicates otherwise:

"dB" means the sound pressure level in decibels measured using the "A" weighting network on a sound level meter.

"Commission" means the state parks and recreation commission.

"Muffler" or "muffler system" means a sound suppression device or system, including an underwater exhaust system, designed and installed to abate the sound of exhaust gases emitted from an internal combustion engine and that prevents excessive or unusual noise.

"Operate" means to steer, direct, or otherwise have physical control of a vessel that is underway.

"Operator" means an individual who steers, directs, or otherwise has physical control of a vessel that is underway or exercises actual authority to control the person at the helm.

"Owner" means a person who has a lawful right to possession of a vessel by purchase, exchange, gift, lease, inheritance, or legal action whether or not the vessel is subject to a security interest.

"Sound level meter" means a device which measures sound pressure levels and conforms to Type 1 or Type 2 as specified in the American National Standards Institute (ANSI), Specifications for Sound Level Meters, S1.4-1983.

"Vessel" includes every description of watercraft on the water, other than a seaplane, used or capable of being used as a means of transportation on the water. However, it does not include inner tubes, air mattresses, and small rafts or flotation devices or toys customarily used by swimmers.

"Waters of the state" means any waters within the territorial limits of Washington state.

[Statutory Authority: RCW 43.51.400. 93-21-014, § 352-67-020, filed 10/11/93, effective 11/11/93.]

WAC 352-67-030 Instrumentation. (1) A sound level meter which meets Type 1 or Type 2 specifications shall be used.

(2) A microphone windscreen that does not affect the overall reading by more than ± 0.5 dB shall be used.

(3) A sound level calibrator shall be used to calibrate the sound level meter. Proper acoustical calibration shall comprise the complete measurement system including extension cables, etc. Field calibration shall be performed immediately before and after each test sequence.

[Statutory Authority: RCW 43.51.400. 93-21-014, § 352-67-030, filed 10/11/93, effective 11/11/93.]

WAC 352-67-040 General requirements. The following general requirements shall be followed when conducting sound level measurement procedures:

(1) The measurements shall be conducted only by persons qualified by training to perform these procedures.

(2) Proper use of all test instrumentation is essential to obtain valid measurements. Operating manuals or other literature furnished by the instrument manufacturer should be consulted for both recommended operation of the instrument, and precautions to be observed.

(3) A measurement shall be invalid if changes in the background sound level affect the applicable reading.

[Statutory Authority: RCW 43.51.400. 93-21-014, § 352-67-040, filed 10/11/93, effective 11/11/93.]

WAC 352-67-050 Specific requirements. (1) A person who is qualified to conduct sound level measurement procedures may use either the shoreline sound level measurement procedure, or the stationary sound level measurement procedure, or both.

(2) The shoreline sound level measurement procedure shall be performed as follows:

(a) A suitable measurement site is the shore of a body of water, or dock projecting out from the shore into the body of water, or a raft, or a vessel moored to a dock, or anchored so that the sound level meter or microphone is not more than

six meters (twenty feet) from shore. If the measurement is made from a dock, the dock shall be of open construction so that it presents a minimum of reflecting surfaces. The area around the microphone and vessel being measured shall be free of large obstructions or reflective surfaces including but not limited to buildings, high embankments, sea walls, hills, large piers, or breakwaters, for a minimum distance of thirty meters (one hundred feet).

(b) The applicable reading does not require that the vessel subject to the procedure be at any specific distance from the shoreline or microphone.

(c) This measurement procedure shall not be used during the time period of thirty seconds following engine start-up and/or preceding engine shutdown.

(d) The microphone shall be placed 1.2 meters to 1.5 meters (four feet to five feet) above the water, and no less than 0.6 meter (two feet) above the curve of the shore, dock, or platform. If on a dock or platform, the microphone shall be placed near or beyond the end of the dock or platform. If the measurement is made from a vessel, the microphone shall be held at a height of not less than 0.6 meter (two feet) above the surface of the water. A suitable vessel for this purpose is of open hull construction.

(e) The meter shall be set for slow response and the A-weighting network on the sound level meter.

(f) The observer reading the meter shall not be closer than arm's length from the microphone. Only one other person may be within fifteen meters (fifty feet) of the microphone when measuring from the dock or shoreline, and that person shall be directly behind the observer reading the sound level meter.

(g) The applicable reading shall be the highest sound level measured during a period when the background sound level is at least ten dB lower than the maximum allowable sound level. Background sound level includes wind effects, noise from boats other than the one being measured, wave action, boat wakes, and other extraneous noises. Readings due to hull slaps which create intermittent sound levels shall be disregarded.

(h) The observer shall record the applicable reading and the background sound levels taken immediately before and immediately after applicable reading.

(i) When sound level readings are taken from inside a vessel, three dB shall be subtracted from the reading to better correlate with shoreline readings.

(3) The stationary sound level measurement procedure shall be performed as follows:

(a) A suitable measurement site is a body of water free of large obstructions or reflective surfaces including but not limited to buildings, vessels other than those involved in the procedure, large embankments, or breakwaters, for a minimum distance of eight meters (twenty-five feet) from the vessel being measured. The vessel being tested shall either be moored to a dock or lashed to another vessel. If moored to a dock, the dock shall be of open construction so that it presents a minimum of reflecting surfaces. If the measurement is made in open water, the vessel being measured shall be lashed to the measurement vessel to prevent relative motion and to allow positioning of the microphone in the prescribed location. The measurement vessel shall be positioned to minimize reflected sound.

(b) The engine or motor of the vessel being evaluated shall be operated at low idle speed within the engine manufacturer's recommended operating range, in neutral gear if so equipped. For vessels without a neutral gear, the engine or motor shall be operated at its lowest operational speed. The engine or motor shall be operated for a sufficient amount of time to allow water to flow through the exhaust system before taking measurements.

(c) The microphone shall be placed at a distance of 1.2 meters to 1.5 meters (four feet to five feet) above the water and no closer than one meter (3.3 feet) from the vertical projection of any part of the vessel in the area adjacent to the exhaust outlet(s).

(d) The meter shall be set for slow response and the A-weighting network.

(e) The observer reading the meter shall not be closer than arm's length from the microphone to minimize sound reflections.

(f) The applicable reading shall be the average sound level measured during a period when the background sound level is at least ten dB lower than the measured sound level. Background sound level includes wind effects, noise from vessels other than the one being measured, wave action, vessel wakes, and other extraneous noises. Peak readings of intermittent sound levels created by wave slaps or changes in sound level due to wave action and/or engine or motor speed variation shall not be included in the applicable reading.

(g) The observer shall record the applicable reading and the background sound levels taken immediately before and immediately after the applicable reading.

[Statutory Authority: RCW 43.51.400. 93-21-014, § 352-67-050, filed 10/11/93, effective 11/11/93.]
