WAC 232-12-001 Definition of terms. Definitions used in rules of the commission are defined in RCW 77.08.010. In addition, unless otherwise provided:

(1) "Snagging" means an effort to take fish with a hook and line in a manner such that the fish does not take the hook voluntarily in its mouth.

(2) "Gaffing" means an effort to take fish by impaling the fish with a hook attached directly to a pole or other device.

(3) "Spearing" and "spear fishing" means an effort to take fish by impaling the fish on a shaft, arrow, or other device.

(4) A "valid" license, permit, tag, stamp or catch record card means a license, permit, tag, stamp, or catch record card that was issued to the bearer for the current season and is required to hunt, fish or possess wildlife and has not been altered except as provided by rule of the commission.

(5) "Hook" means one single, double, or treble hook. A "single hook" means a hook having a single point; a "double hook" means a hook having two points on a common shank;

and a "treble hook" means a hook having three points on a common shank. "Barbless hook" means a hook on which all barbs have been deleted when manufactured, filed off, or pinched down.

(6) "Falconry" means possession, control, or use of a raptor for the purpose of hunting and free flight training.

"Nonbuoyant lure" means a lure, complete with hooks, swivels or other attachments, that does not float in freshwater.

(10) "Bait" means any substance which attracts fish or wildlife by scent and/or flavor. Bait includes any device made of feathers, hair, fiber, wood, metal, glass, cork, leather, rubber or plastic which uses scent and/or flavoring to attract fish or wildlife.

(11) "Possession limit" means the number of daily limits allowed to be retained in the field or in transit.

(12) "Daily limit" means the maximum number of game fish which a person may legally retain in a single day.

(13) "Boat fishing" means fishing while in or on a boat, raft, or any other floating device.

An ordinary residence is a residential dwelling where a person normally lives, with associated features such as address, telephone number, utility account, etc. A motorhome or camper parked at a campsite or a vessel are not considered to be an ordinary residence.

WAC 232-12-002 Fish and wildlife commission members' recusal requirements for commissioners with beneficial interests in certain commission decisions and transactions. (1) Commission members must comply with subsection (2) of this section when the following circumstances apply or it is reasonably foreseeable that they will apply:

(a) The member is beneficially interested, directly or indirectly, in a contract, sale, lease, purchase, or grant that may be made by, through, or under the supervision of the Commission, in whole or in part; or

(b) The member accepts, directly or indirectly, any compensation, gratuity or reward from any other person beneficially interested in a contract, sale, lease, purchase, or grant that may be made by, through, or under the supervision of the Commission, in whole or in part; or

(c) The member either owns a beneficial interest in, or is an officer, agent, employee or member of, an entity which is engaged in a transaction involving the Commission.

(2) If required by subsection (1) of this section, the member must:

(a) Recuse himself or herself from discussions by the Commission, regarding the specific contract, sale, lease, purchase, grant, or transaction; and

(b) Recuse himself or herself from any vote by the Commission on the specific contract, sale, lease, purchase, grant, or transaction; and

(c) Refrain from attempting to influence any other member or employee in any discussion or vote regarding the specific contract, sale, lease, purchase, grant, or transaction.

(3) Definitions. The following definitions apply to this section:

(a) "Transaction involving the Commission" means a proceeding, application, submission, request for a ruling or other determination, contract, claim, case, or other similar

matter that the Commission member in question believes, or has reason to believe:

- (i) Is, or will be, the subject of Commission action; or
- (ii) Is one to which the Commission is or will be a party;

or

(iii) Is one in which the Commission has a direct and substantial proprietary interest.

(b) "Transaction involving the Commission" does not include the following: preparation, sale, lease, purchase, or grant when the other person bids or otherwise seeks to be awarded the contract, sale, lease, purchase, or grant.

(c) "Commission action" means any action on the part of the Commission, including, but not limited to:

- (i) A decision, determination, finding, ruling, or order; and
- (ii) A grant, payment, award, license, contract, transaction, sanction, or approval, or the denial thereof, or failure to act with respect to a decision, determination, finding, ruling, or order.

(4) Under subsection (1)(b), "any other person" has a beneficial interest in a contract, sale, lease, purchase, or grant when the other person bids or otherwise seeks to be awarded the contract, sale, lease, purchase, or grant.

(5) The prohibitions contained in subsection (2) do not prohibit the member from using his or her general expertise to educate and provide general information on the subject area to other Commission members.

(6) If recusal occurs pursuant to the State Ethics law, chapter 42.52 RCW, or rules adopted pursuant to the State Ethics law, the Commission member must disclose to the public the reasons for his or her recusal from any Commission action whenever recusal occurs. The Commission staff must record each such recusal and basis for the recusal.

EXAMPLES:

EXAMPLE ONE: The Commission is composed of individuals who often are employed in the private sector. The governor appoints members of the Commission. In making these appointments, the governor is required to seek to maintain a balance reflecting all aspects of fish and wildlife. Commission members are appointed because they have general knowledge of the habit and distribution of fish and wildlife and are often recommended by interest groups, such as sport fishers, commercial fishers, hunters, private landowners, and environmentalists. A Commission member is employed by a company that provides contract facilitation services. The Commission is in the process of selecting a contractor to conduct a series of public meetings on fishing in Washington. The company which employs the member of the Commission has bid for the contract. The Commission member may use his or her general expertise to educate Commissioners about desirable public meeting design elements for a successful public involvement project like the one the Commission wants to conduct. The Commission member is prohibited from participating in the Commission discussion and

analysis establishing criteria for selecting a contractor and is prohibited from participating in the Commission vote to select a contractor (see WAC 232-12-002-1(c)). The Commission member would publicly announce his or her recusal and the reasons for it, and the Commission staff would record this information as part of the public record.

EXAMPLE TWO: The Commission contracts with King Software (hypothetical company) to provide computer systems for tracking recreational license purchases. King Software's contract with the Commission is almost expired, and the Commission must seek bids from software companies for the next contract period. The Commission issues a request for bids to various software companies who offer suitable software, including Fishsoft, Inc. (hypothetical company). Approximately nine months ago, one Commission member worked for Fishsoft, Inc. and received compensation from that company. The Commission member subsequently left Fishsoft, Inc. The Commission member is not required to recuse himself or herself from selecting a contractor for the Commission's computer license system. Fishsoft, Inc. did not have a beneficial interest in the Commission's contract until it bid on the contract. Therefore, Fishsoft, Inc. was not a person beneficially interested in the contract when the Commission member received the compensation (see WAC 232-12-002(4)). However, if the Commission member received compensation from Fishsoft, Inc. after it bid on the contract, the Commission member would be required to disclose the fact that he or she received the compensation from a bidder and recuse himself or herself from the Commission's specific discussion and the vote awarding the contract (see WAC 232-12-002(1(b))). The Commission staff would record this information into the public record. Again, the Commission member could participate in discussions using his or her general expertise to educate and provide general information on the subject area to the other Commission members.

(d) The specimens are confined to a secure facility.

(e) Reindeer may not be imported into, held, or possessed in Ferry, Stevens, or Pend Oreille counties or that portion of Spokane County north of Spokane River.

(8) Escaped animals

(a) Escaped deleterious exotic wildlife, including Fallow deer (*Dama dama*), and Reindeer (all members of the Genus *Rangifer*, except *Rangifer tarandus caribou*) will be considered a public nuisance. The department or any peace officer may seize, capture, or destroy deleterious exotic wildlife that have escaped the possessor's control. The former possessor shall be responsible for costs incurred by the department in recovering, maintaining, or disposing of such animals, as well as any damage to the state's wildlife or habitat.

(b) Escapes of deleterious exotic wildlife must be reported immediately to the department.

(c) The recapture or death of escaped deleterious exotic wildlife must be reported immediately to the department.

(9) Secure facility

(a) All deleterious exotic wildlife will be held in a secure facility. For the purpose of this rule, a secure facility is an enclosure so constructed as to prevent danger to the environment or wildlife of the state, including escape of deleterious exotic wildlife specimens or ingress of resident wildlife ungulates (hoofed animals). The adequacy of the facility shall be determined by the director or agents of the director.

(b) For deleterious exotic wildlife listed in subsections (1)(d)(iv) and (1)(d)(v), the "secure facility" must comply with the fencing requirements in subsection (10) unless otherwise authorized by the director in writing.

(10) Fencing requirements

(a) Perimeter fences must be, at a minimum, eight feet above ground level for their entire length. The bottom six feet must be mesh of sufficient size to prevent resident wildlife ungulates (hoofed animals) from entering and deleterious exotic wildlife from escaping. Supplemental wire required to attain a height of eight feet may be smooth, barbed, or woven wire (at least 12-1/2 gauge) with strands spaced not more than six inches apart.

(b) Perimeter fences constructed of high tensile wire must be supported by a post or stay at minimum intervals of eight feet.

(c) Perimeter fences must be at least 12-1/2 gauge woven wire, 14-1/2 gauge high-tensile woven wire, chain link, non-climbable woven fence, or other fence approved by the director.

(i) If the wire used is not a full eight feet in height, it must be overlapped one row and securely fastened at every other vertical row or woven together with cable.

(d) Electric fencing materials may be used on perimeter fences only as a supplement to conventional fencing materials.

(e) All gates in the perimeter fences must be self-closing, equipped with two locking devices, and installed only in locations that have been approved by the director. Double gates may be required at points in the perimeter fences subject to frequent vehicle traffic that is not related to activities involving the holding of deleterious exotic wildlife.

(f) Posts used in the perimeter fences must be:

(i) Wood (pressure treated), five-inch minimum diameter or an equivalent as approved by the director;

(ii) Spaced no more than twenty-four feet apart with stays or supports at eight foot intervals between the posts;

(iii) Extended at least eight feet above ground level;

(iv) Corners braced with wood or with an equivalent material as approved by the director.

(g) Fences must be maintained at all times to prevent deleterious exotic wildlife from escaping or resident wildlife ungulates (hoofed animals) from entering the enclosure. If such animals do pass through, under, or over the fence because of any topographic feature or other conditions, the person possessing deleterious exotic wildlife must immediately supplement the fence to prevent continued passage.

(h) For any fence existing prior to February 13, 1993, a person may petition the director in writing for a variance from the above fencing requirements. Any such petition must be filed no later than May 31, 1993 and must identify all aspects in which the existing fence does not meet the fencing requirements contained herein. On approval of the director, such person may maintain such existing fence with normal repair. However, any extension or relocation of existing fence must meet the fencing requirements contained herein.

(11) Marking requirements

(a) All live specimens of deleterious exotic wildlife except those listed in subsections (1)(a) and (1)(b), shall be permanently and individually identified by methods approved by the director,

(b) Identification assigned to an individual animal may not be transferred to any other animal.

(c) All specimens of deleterious exotic wildlife identified in subsections (1)(d)(iv) and (1)(d)(v) must be individually identified by the methods specified below.

(i) All live specimens of such deleterious exotic wildlife shall be marked with USDA Official ear tags or with ear tags supplied or approved by the department. Tags shall be applied in sequential order, and

(ii) All live specimens of such deleterious exotic wildlife shall be marked with a tattoo with an identifying number that

has been recorded with the director. The tattoo must be placed on the left ear of the animal.

(d) All lawful progeny of deleterious exotic wildlife must be tagged and tattooed by December 31 of the year of birth or upon leaving the holding facility, whichever is earlier.

(e) Where allowed, if an animal is sold or transferred within the state, the tag and tattoo must accompany the animal. The new owner or possessor shall not renumber the animal.

(f) Where allowed, live specimens of deleterious exotic wildlife shall be marked prior to importation.

(g) No unmarked deleterious exotic wildlife may be sold or otherwise transferred from the holding facility.

(12) Testing of specimens

(a) Where allowed, prior to entry into the state of Washington, a person importing any member of the Genus Cervus which is identified in subsection (1)(v) herein must submit records of genetic tests, conducted by a professionally recognized laboratory to identify red deer genetic influence (genetic material from any member of any subspecies, race, or species of the elk-red deer-wapiti complex *Cervus elaphus* not indigenous to the state of Washington). Such testing shall be at the possessor's expense. Animals which are deemed by department of wildlife biologists upon examination to exhibit either: behavioral (vocalization), morphological (size, rump patch, color) or biochemical indications of such influence (hemoglobin, superoxide dismutase, transferrin and post-transferrin, or others to be developed) may not be imported.

(b) The director may require a person currently possessing any member of the Genus Cervus which are identified in subsection (1)(v) herein to submit records of genetic tests, conducted by a professionally recognized laboratory to identify red deer genetic influence (genetic material from any member of any subspecies, race, or species of the elk-red deer-wapiti complex *Cervus elaphus* not indigenous to the state of Washington), for each individual cervid to the department. Such testing shall be at the possessor's expense. The director may require that any animal identified a red deer or having non-indigenous genetic influence be destroyed, removed from the state, or neutered.

(c) The director may require that all specimens of deleterious exotic wildlife lawfully in captivity be tested for brucellosis (*brucella abortus*), tuberculosis (*mycobacterium bovis* and *mycobacterium tuberculosis*), meningeal worm (*Paralophostromylyus tenuis*), and muscle worm (*Elaphostromylyus cervis*) in accordance with the procedures specified in department of agriculture WAC 16-54-035 as now or hereafter amended and/or for other disease or parasites determined to pose a risk to wildlife. The results of such tests shall be filed with the director as required.

(13) Reporting

(a) A person holding deleterious exotic wildlife in captivity shall submit a completed report no later than March 30, 1993 and then no later than January 31 of each year, or as otherwise required by the director, on a form provided by the department.

(1999 Ed.)

(b) Persons possessing deleterious exotic wildlife must notify the director within ten days of any change of such persons' address and/or location of the holding facility.

(14) Inspection

(a) All holding facilities for deleterious exotic wildlife located in the state are subject to inspection for compliance with the provisions of this section.

(b) Such inspections may take place without warrant or prior notice but shall be conducted at reasonable times and locations.

(15) Notification and disposition of diseased animals.

(a) Any person who has reason to believe that deleterious exotic wildlife being held pursuant to this rule have or have been exposed to a dangerous or communicable disease or parasite shall notify the department immediately.

(b) Upon having reason to believe that deleterious exotic wildlife held pursuant to this rule have been exposed to or contracted a dangerous or contagious disease or parasite, the director may order inspection of such animals by a licensed, accredited veterinarian or inspection agent. Inspection shall be at the expense of the possessor.

(c) The director shall determine when destruction of animals, quarantine, or disinfection is required at any facility holding deleterious exotic wildlife pursuant to this rule. If the director determines that destruction, quarantine, or disinfection is required, a written order shall be issued to the possessor describing the procedure to be followed and the time period for carrying out such actions. Such activities shall be at the expense of the possessor.

(16) Quarantine area

(a) Any facility holding deleterious exotic wildlife must have an approved quarantine facility within its exterior boundary or submit an action plan to the director that guarantees access to an approved quarantine facility within the state of Washington.

(i) An approved quarantine facility is one that meets criteria set by the Washington State department of agriculture.

(ii) The quarantine area must meet the tests of isolation, separate feed and water, escape security, and allowances for the humane holding and care of its occupants for extended periods of time.

(b) Should the imposition of a quarantine become necessary, the possessor must provide an on-site quarantine facility or make arrangements at such possessor's expense to transport the animals to the approved quarantine facility named in the quarantine action plan.

(17) Seizure

(a) The department of wildlife may seize any unlawfully possessed deleterious exotic wildlife.

(b) The cost of any seizure and/or holding of deleterious exotic wildlife may be charged to the possessor of such animals.

If such animals do pass through, under, or over the fence because of any topographic feature or other conditions, the person possessing wildlife must immediately supplement the fence to prevent continued passage.

(h) For any fence existing prior to February 13, 1993, a person may petition the director in writing for a variance from the above fencing requirements. Any such petition must be filed no later than May 31, 1993 and must identify all aspects in which the existing fence does not meet the fencing requirements contained herein. WAC 232-12-168 Fishing contests. (1) Contest defined: By definition, a fishing contest exists when 6 or more persons fish competitively and determine winners, regardless of prize value.

(2) Application:

(a) Fishing contest permit applications should be submitted to the department by November 1 of each year for contests that are to take place the following calendar year. After November 1, applications must be submitted not less than 30 days prior to the date for which the contest is proposed.

(b) Applications must include the permit fee required by RCW 77.32.211. The fee will be returned if the permit is denied. No more than seven permits will be issued to any one permittee during a calendar year. The fee is \$24 per permit.

(3) Approval:

(a) Fishing contests which adversely affect fish or wildlife resources or other recreational opportunity may be denied.

[Title 232 WAC—p. 30]

(b) Contests will not be allowed on sea-run cutthroat trout, Dolly Varden or bull trout.

(c) Contests involving only juveniles or the handicapped may exceed the participation limits in contests per month, contests per year, or boats per contest day with permission from the director. Also, contests involving only juveniles may target any fish species except sea-run cutthroat trout, Dolly Varden or bull trout, under one permit.

(4) Prize value: Total prize value per contest will not exceed \$400 when trout, steelhead, char, whitefish, grayling, or kokanee are included as target species; provided that contests wherein other species not listed above are targeted, or where bass or walleye are the targeted species and at least 90 percent of bass or walleye are released alive and in good condition after the contest, may qualify for no limitation on amount of prize. Contests involving only juveniles are not required to meet 90 percent live release requirements even if bass or walleye are included as a target species.

(5) Legal requirements, all contests:

(a) Fishing contest permits must be in the possession of the contest sponsor or official at the contest site.

(b) Contests are restricted to the species and waters approved on the permit. Only those species listed as a target of the contest may be retained by contest participants during bass or walleye contests where all contestants fish at the same time and place.

(c) Sponsors must report contest information requested by the department within 30 days after the contest has ended. Subsequent contest permits will not be issued for one year after the date of the contest for which the report was not returned if this requirement is not fulfilled.

(d) Contest participants may not restrict public access at boat launches.

(e) Contests where all participants expect to fish at the same time from boats on lakes or reservoirs will not last longer than three consecutive days and have the following limits per water:

ACRES	CONTESTS PER DAY	CONTESTS PER MONTH*	BOATS PER CONTEST DAY		
			BASS	WALLEYE	
Less than 300	1	1	5	0	15
301 - 3,000	1	2	10	2	35
3,001 - 6,000	1	3	15	2	60
6,001 - 10,000	1	4	25	2	125
More than 10,000**	2	5	35	2	300

* No more than four weekend days per month nor more than two weekends per month may be scheduled on any water when contestants fish at the same time, and are allowed to fish from boats.

** Two separate contest permits may be issued with no more than 150 boats per contest.

(f) It is unlawful for the fishing contest permittee or any of the contest participants to fail to comply with the conditions of the fishing contest permit, or of general fishing rules not specifically exempted by this permit. Failure of the permittee or any of the contestants to comply with all provisions of the contest permit or of other fishing regulations during a contest may lead to revocation of the permit.

(6) Special regulations, bass and walleye contests:

(a) In any contest targeting either bass or walleye, all live bass or walleye must be released alive into the water from which they were caught after being weighed and/or measured. At the end of each day's competition, if the mortality of target fish caught that day exceeds 10%, the contest will be suspended. Suspended contests may be continued (within assigned permit dates) only if the cause of the high mortality can be positively identified, and the cause of the mortality (high waves, equipment deficiency, etc.) ceases or is corrected by contest officials. Contests involving only juveniles are not required to meet the 90 percent live release requirement for any approved species.

(b) During bass contests only, participants may continue to fish while holding a daily catch limit of bass in possession for the particular water being fished, as long as one fish is released immediately upon catching a fish which would make the angler in excess of the daily catch limit if kept. The fish released may come either from the one just caught, or from the livewell, but at no time may the angler have more than a daily limit in the livewell.

(c) During bass contests, contestants may not use live bait, except that contests involving only juveniles which include bass as a target species may use bait.

(d) During bass contests held on waters managed under statewide "standard" regulations, participants may retain a daily catch limit of bass of any size to be weighed in. However, if the contest is on waters managed by "nonstandard" (exception) regulations, no deviations to size limits are allowed. Regardless of whether the contest is on a water managed by "standard" or "exception" regulations, tournament anglers may not be in possession of more than the daily catch limit for the water being fished, except as authorized under (6)(f) below.

(e) During walleye contests, all current bag and size remain in effect. No size or number limit exceptions are allowed for walleye contests except as authorized under (6)(f) below.

(f) The contest director or director designee may exceed possession limits for bass or walleye for the purpose of transporting fish from a weigh-in site to an open-water area. During transportation, the transport boat must not leave the water the fish were caught from and a copy of the contest permit must be on board during actual fish transport.

(g) Livewell dimensions: During walleye tournaments, all livewells used to hold walleye must be at least 34 inches in length and have a water capacity of at least 20 gallons. Not more than 6 walleye may be placed in a single livewell. All livewells must have both a functional freshwater pump and backup aeration capability.

(h) Boat identification: All boats used for fishing in bass contests must be clearly identified according to criteria established by the department.

(i) Zebra mussel decontamination. Prior to participating in a Washington state fishing contest:

(a) All contest participants are required to sign a zebra mussel decontamination statement that their boats and/or boat trailers have or have not been in physical contact with any waters east of the Continental Divide for thirty days immediately preceding the contest and, if the boat and/or trailer has been in contact with such waters the participant

must complete a decontamination report indicating that the following actions have been taken:

WAC 232-12-181 Livestock grazing on department of wildlife lands. All persons wishing to apply for a grazing lease should contact the Washington Department of Wildlife, 600 North Capitol Way, Olympia, Washington 98504.

(1) The director is authorized to enter into grazing leases when the director determines that a grazing lease will benefit wildlife management programs and will be in the public interest. Except for temporary permits, each grazing lease shall first be submitted to the commission, which may review the lease to determine whether it will benefit wildlife or improve public hunting, fishing or recreation without adverse impact on wildlife. If, within 30 days, the commission has not disapproved the lease, the director shall be deemed authorized to enter into that lease.

(2) The director shall advertise and sell a license to use department lands for grazing at public auction to the highest bidder. The director is authorized to reject any and all bids if it is determined to be in the best interest of the department to do so. The director may negotiate a grazing lease without using the public auction process only when the director determines that benefits to wildlife would be equal to or greater than the cash or monetary payments foregone.

(3) The term of each grazing lease shall be no greater than five years. When an existing lease expires or is about to expire, and the director wishes to continue to permit grazing on the subject parcel, then a modified public auction process shall be used. A minimum bid based on market value shall be established prior to the public auction. The last previous or the existing lessee shall be provided the option of meeting the highest bid made at public auction. The director may grant a term longer than five years only with the prior approval of the commission. The director may permit exceptions to the public auction process only when the director determines that benefits to wildlife would be equal to or greater than the cash or monetary payment foregone.

(4) A temporary permit may be granted by the director to satisfy an immediate, short-term need where benefits to wildlife management programs and the public interest can be demonstrated. The term of a temporary permit shall not exceed two weeks and no fee need be charged.

[Title 232 WAC—p. 32]

(5) The director may approve a grazing lease where a grazing management plan which includes objectives and site characteristics, pasture rotation schedule, on-off dates, number of AUM's, and a monitoring plan has been developed by the agency. The director shall inspect the site of a grazing lease no less than two times each year. The director shall retain the right to alter provisions of the plan to reduce acreage available or the number of animals using the area when such change is, in the judgment of the director, required to benefit fish or wildlife management, public hunting and fishing, or other recreational uses. The director may not enter into any grazing lease not accompanied by a grazing management plan unless the commission has approved it.

(6) The director may cancel a lease (1) for noncompliance with the terms and conditions of the lease, or (2) if the area described in the lease is included in a land use plan determined by the agency to be a higher and better use, or (3) if the property is sold or conveyed, or (4) if damage to wildlife or wildlife habitat occurs.

(7) All lands covered by any agreement shall at all times be open to public hunting, fishing and other wildlife recreational uses unless such lands have been closed by action of the commission or emergency order of the director.

(d) Each permit shall require that an applicant intending to release wildlife in the state shall report immediately to the director the outbreak of any disease among the wildlife intended to be released. If the director determines that such outbreak presents a threat to the wildlife of the state, the director may immediately order such action as necessary including quarantine or destruction of stock, sterilization of enclosures and facilities, cessation of activities, and disposal of wildlife in a manner satisfactory to the director.

(e) Each permit shall require that wildlife to be released shall not be branded, tattooed, tagged, fin clipped or otherwise marked for identification without approval of the director or as required in WAC 232-12-044.

(f) Legally acquired pheasant of the genus *Phasianus*; gray partridge of the genus *Perdix*; chukar partridge of the genus *Alectoris*; quail of the genus *Lophortyx*, *Callipepla*, and *Colinus*; and mallard ducks of the species *Anas platyrhynchos* may be released without a permit for purposes of dog training, and hunting pursuant to WAC 232-12-044. Game birds released for these purposes must be purchased from facilities that have been inspected by a certified veterinarian within the past twelve months.

(2) Release by the director. The director may plant aquatic plants or release animal species, subspecies, or hybrids which have been planted or released previously in Washington if they do not pose a disease threat and if planting or release will not cause adverse impact on the wildlife or wildlife habitat of the state. Before releasing any species, subspecies, or hybrid of animal not already existing in the wild in Washington, the director shall report to the commission on the planned release, stating the basis for determining that the planned release fulfills the criteria set forth herein. The director may release nonnative species, subspecies, or hybrids not previously released in Washington only if the director in his or her sole discretion has determined that:

(a) There is no reasonable expectation of adverse impact on the wildlife or wildlife habitat of the state and there is an adequate plan for evaluating such impact following the release;

(b) The commission has classified the species, subspecies, or hybrids to be released pursuant to RCW 77.12.020;

(c) Suitable habitat is available;

(d) The nonnative species, subspecies, or hybrids to be released are free of exotic pathogens;

(e) The release serves the public interest.

WAC 232-12-292 Bald eagle protection rules.

Purpose

1.1 The purpose of these rules is to protect the habitat and thereby increase and maintain the population of the bald eagle so that the species no longer is classified as threat-

ened or endangered in Washington state. The "delisting" of the bald eagle for Washington state is a realistic goal which can best be accomplished by promoting cooperative efforts to manage for site-specific eagle habitat needs through a process which is sensitive to the site-specific landowner goals as well. The following rules are designed to promote such cooperative management.

Authority

2.1 These rules are promulgated pursuant to RCW 77.12.655.

Definitions

3.1 "Communal roost site" means all of the physical features surrounding trees used for night roosting that are important to the suitability of the roost for eagle use. These features include flight corridors, sources of disturbance, trees in which eagles spend the night, trees used for perching during arrival or departure and other trees or physical features, such as hills, ridges, or cliffs that provide wind protection.

3.2 "Cultural activities" means activities conducted to foster the growth of agricultural plants and animals.

3.3 "Delist" means to remove a species from the state special species list by action of the game commission or from the federal endangered species list by action of the secretary of the interior.

3.4 "Department" means department of game.

3.5 "Endangered" means a species which is seriously threatened with extirpation throughout all or a significant portion of its range within Washington.

3.6 "Government entities" means all agencies of federal, state and local governments.

3.7 "Landowner" means any individual, private, partnership, nonprofit, municipal, corporate, city, county, or state agency or entity which exercises control over a bald eagle habitat whether such control is based on legal or equitable title, or which manages or holds in trust land in Washington state.

3.8 "Nest tree" means any tree that contains a bald eagle nest or has contained a nest.

3.9 "Nest site" means all of the physical features surrounding bald eagle nests that are important to normal breeding behavior. These features include alternate and potential nest trees, perch trees, vegetative screening, foraging area, frequently used flight paths, and sources of disturbance.

3.10 "Perch tree" means a tree that is consistently used by eagles. It is often close to a nest or feeding site and is used for resting, hunting, consumption of prey, mating display and as a sentry post to defend the nest.

3.11 "Predicides" means chemicals used to kill or control problem wildlife.

- 3.12 "Region" means an ecological/geographic area that forms a unit with respect to eagles, e.g., Hood Canal, lower Columbia River, outer coast and south Puget Sound.
- 3.13 "Site management plan" means a legal agreement between the department and the landowner for management of a bald eagle nest or roost site
- 3.14 "Threatened" means a species that could become endangered within Washington without active management or removal of threats.

Applicability and operation

- 4.1 The department of game shall make available to other governmental entities, interest groups, landowners and individuals information regarding the location and use pattern of eagle nests and communal roosts.
- 4.2 The department of game shall itself and through cooperative efforts (such as memoranda of understandings) work with other government agencies and organizations to improve the data base for nest and roost site activity and productivity. The department regularly shall confer with other governmental entities to improve the preliminary nest site management information and its accessibility and useability.
- 4.3 The department's goal shall be to identify, catalog and prioritize eagle nesting or roost sites. The department shall facilitate landowner notification that nesting or roost sites exist on their property and work with landowners to develop a nesting or roost site description.
- 4.4 When a proposed land-use activity involves land containing or adjacent to an eagle nest or communal roost, the permitting agency shall immediately notify the department of game of the permit application.
- 4.5 When the department determines that a proposed activity would adversely impact eagle habitat, a department representative shall meet on-site with the landowner and, where applicable, a representative of the permitting agency to discuss management options for the protection of eagle habitat. The purpose of these discussions shall be to reach agreement on a site management plan for bald eagle habitat protection.
- 4.6 It is recognized that normal on-going agricultural activities of land preparation, cultivating, planting, harvesting, other cultural activities, grazing and animal-rearing activities in existing facilities do not have significant adverse consequences for eagles and therefore do not require a site management plan. New building construction, conversion of lands from agriculture to other uses, application of preacides and aerial pesticide spraying, may, following a conference with the department of game, be subject to the site management planning process described in these rules.
- 4.7 Emergency situations, such as insect infestation of crops, requires immediate action on the site management plan or special permission to address the impending crisis by the department of game.

Site management plan for bald eagle habitat protection

- 5.1 The purpose of the site management plan is to provide for the protection of specific bald eagle habitat in such a way as to recognize the special characteristics of the site and the landowner's property rights, goals and pertinent options. To this end, every land owner shall have fair access to the process including available incentives and benefits. Any relevant factor shall be considered, including, but not limited to, the following:
- 5.1.1 The status of the eagle population in the region.
- 5.1.2 The useful life of the nest or roost trees and condition of the surrounding forest; the topography; accessibility and visibility; and existing and alternative flight paths, perch trees, snags and potential alternative nest and roost trees.
- 5.1.3 Eagle behavior and historical use patterns, available food sources, and vulnerability to disturbance.
- 5.1.4 The surrounding land-use conditions, including degree of development and human use.
- 5.1.5 Land ownership, landowner ability to manage, and flexibility of available landowner options.
- 5.1.6 Appropriate and acceptable incentive mechanisms such as conservation easements, transfer or purchase of development rights, leases, mutual covenants, or land trade or purchase.
- 5.1.7 Published recommendations for eagle habitat protection of other government entities such as the U.S. Fish and Wildlife Service.
- 5.2 The site management plan shall provide for
- 5.2.1 Tailoring the timing, duration or physical extent of activities to minimize disturbance to the existing eagle habitat and, where appropriate, identifying and taking steps to encourage and create alternative eagle habitat; and
- 5.2.2 Establishing a periodic review of the plan to monitor whether:
- The plan requires amendment in response to changing eagle and landowner circumstances
 - The terms of the plan comply with applicable laws and regulations,
 - The parties to the plan are complying with its terms.
- 5.3 The site management plan may also provide for implementing landowner incentive and compensation mechanisms through which the existing eagle habitat can be maintained or enhanced.

Guidelines for acquisition of bald eagle habitat

- 6.1 Real property interests may be acquired and agreements entered into which could enhance protection of bald eagle habitat. These include fee simple acquisition, land trades, conservation easements, transfer or purchase of development rights, leases, and mutual covenants. Acquisition shall be dependent upon having a willing seller and a willing buyer. Whatever interest or method of protection is preferable will depend on the particular

use and ownership characteristics of a site. In discussing conservation objectives with private or public landowners, the department shall explore with the landowner the variety of protection methods which may be appropriate and available.

6.2 The following criteria and priorities shall be considered by the department when it is contemplating acquiring an interest in a bald eagle habitat.

6.2.1 Site considerations:

- a) Relative ecological quality, as compared to similar habitats
- b) Ecological viability—the ability of the habitat and eagle use to persist over time
- c) Defensibility—the existence of site conditions adequate to protect the eagle habitat from unnatural encroachments
- d) Manageability—the ability to manage the site to maintain suitable eagle habitat
- e) Proximity to food source
- f) Proximity to other protected eagle habitat
- g) Proximity to department land or other public land
- h) Eagle population density and history of eagle use in the area
- i) The natural diversity of native species, plant communities, aquatic types, and geologic features on the site.

6.2.2 Other considerations

- a) Ownership
- b) Degree of threat
- c) Availability of funding
- d) Existence of willing donor or seller and prior agency interest
- e) Cost

In general, priority shall be given to the most threatened high quality eagle habitats with associated natural values which require the least management.

Resolution of site management plan disputes

7.1 The department, the landowner and the permitting agency shall work to develop a mutually agreeable site management plan within 30 days of the original notice to the department of game. This plan shall become a part of the application for a permit.

7.2 Should agreement not be reached, the landowner may refer the site management plan to the bald eagle oversight committee (paragraph 8). The committee shall have 30 days from the date contacted to bring about agreement among the department, the landowner, and the permitting agency. The committee may use conciliation, mediation and factfinding, or any other method they deem appropriate to bring about a mutually acceptable resolution of the issues.

7.3 If the landowner chooses not to use the services of the bald eagle oversight committee or if resolution is not reached, the department of game shall within 15 days provide a site management plan to the landowner and permitting agency.

7.4 The landowner may initiate a formal appeal of the department of game's decision. Formal appeal procedures appear in WAC 232-12-197.

Bald eagle oversight committee

8.1 The director of the department of game shall appoint a five-member bald eagle oversight committee with two members representing landowner interests, two members representing wildlife interests and one nonvoting member from the department of game. Members are appointed for three year terms, with the initial terms for one, two or three years so that committee appointments will be staggered over time. The committee shall meet at least quarterly, and as needed, to accomplish the following:

8.1.1 Monitor the progress of cooperative bald eagle management processes under these regulations and make recommendations to the department and other interested parties to improve the effectiveness of these processes.

8.1.2 Undertake resolution of site management plan disputes under paragraph 7.2 above.

8.1.3 Coordinate joint efforts on Washington bald eagle protection.

8.2 The members of the committee shall not receive compensation but shall be reimbursed under RCW 43.03.050 and 43.03.060 for travel expenses incurred while attending official meetings of the committee.

Automatic review processes

9.1 The bald eagle oversight committee will report to the department of game annually regarding its activities under paragraph 8.1. The department of game will conduct an initial review of the bald eagle regulatory process after 3 years which will include a public hearing, and then every five years thereafter.

Penalties

10.1 Failure to comply with the processes set forth in these rules or with the provisions of a site management plan constitutes a misdemeanor as set forth in RCW 77.21.010.

WAC 232-12-297 Endangered, threatened, and sensitive wildlife species classification.

Purpose

1.1 The purpose of this rule is to identify and classify native wildlife species that have need of protection and/or management to ensure their survival as free-ranging populations in Washington and to define the process by

which listing, management, recovery, and delisting of a species can be achieved. These rules are established to ensure that consistent procedures and criteria are followed when classifying wildlife as endangered, or the protected wildlife subcategories threatened or sensitive.

Definitions

For purposes of this rule, the following definitions apply:

- 2.1 "Classify" and all derivatives means to list or delist wildlife species to or from endangered, or to or from the protected wildlife subcategories threatened or sensitive.
- 2.2 "List" and all derivatives means to change the classification status of a wildlife species to endangered, threatened, or sensitive.
- 2.3 "Delist" and its derivatives means to change the classification of endangered, threatened, or sensitive species to a classification other than endangered, threatened, or sensitive.
- 2.4 "Endangered" means any wildlife species native to the state of Washington that is seriously threatened with extinction throughout all or a significant portion of its range within the state.
- 2.5 "Threatened" means any wildlife species native to the state of Washington that is likely to become an endangered species within the foreseeable future throughout a significant portion of its range within the state without cooperative management or removal of threats.
- 2.6 "Sensitive" means any wildlife species native to the state of Washington that is vulnerable or declining and is likely to become endangered or threatened in a significant portion of its range within the state without cooperative management or removal of threats.
- 2.7 "Species" means any group of animals classified as a species or subspecies as commonly accepted by the scientific community.
- 2.8 "Native" means any wildlife species naturally occurring in Washington for purposes of breeding, resting, or foraging, excluding introduced species not found historically in this state.
- 2.9 "Significant portion of its range" means that portion of a species' range likely to be essential to the long term survival of the population in Washington.

Listing criteria

- 3.1 The commission shall list a wildlife species as endangered, threatened, or sensitive solely on the basis of the biological status of the species being considered, based on the preponderance of scientific data available, except as noted in section 3.4.
- 3.2 If a species is listed as endangered or threatened under the federal Endangered Species Act, the agency will recommend to the commission that it be listed as endangered or threatened as specified in section 9.1. If listed, the agency will proceed with development of a recovery plan pursuant to section 11.1.

3.3 Species may be listed as endangered, threatened, or sensitive only when populations are in danger of failing, declining, or are vulnerable, due to factors including but not restricted to limited numbers, disease, predation, exploitation, or habitat loss or change, pursuant to section 7.1.

3.4 Where a species of the class Insecta, based on substantial evidence, is determined to present an unreasonable risk to public health, the commission may make the determination that the species need not be listed as endangered, threatened, or sensitive.

Delisting criteria

- 4.1 The commission shall delist a wildlife species from endangered, threatened, or sensitive solely on the basis of the biological status of the species being considered, based on the preponderance of scientific data available.
- 4.2 A species may be delisted from endangered, threatened, or sensitive only when populations are no longer in danger of failing, declining, are no longer vulnerable, pursuant to section 3.3, or meet recovery plan goals, and when it no longer meets the definitions in sections 2.4, 2.5, or 2.6.

Initiation of listing process

- 5.1 Any one of the following events may initiate the listing process.
 - 5.1.1 The agency determines that a species population may be in danger of failing, declining, or vulnerable, pursuant to section 3.3.
 - 5.1.2 A petition is received at the agency from an interested person. The petition should be addressed to the director. It should set forth specific evidence and scientific data which shows that the species may be failing, declining, or vulnerable, pursuant to section 3.3. Within 60 days, the agency shall either deny the petition, stating the reasons, or initiate the classification process.
 - 5.1.3 An emergency, as defined by the Administrative Procedure Act, chapter 34.05 RCW. The listing of any species previously classified under emergency rule shall be governed by the provisions of this section.
 - 5.1.4 The commission requests the agency review a species of concern.
- 5.2 Upon initiation of the listing process the agency shall publish a public notice in the Washington Register, and notify those parties who have expressed their interest to the department, announcing the initiation of the classification process and calling for scientific information relevant to the species status report under consideration pursuant to section 7.1.

Initiation of delisting process

- 6.1 Any one of the following events may initiate the delisting process:
 - 6.1.1 The agency determines that a species population may no longer be in danger of failing, declining, or vulnerable, pursuant to section 3.3.

6.1.2 The agency receives a petition from an interested person. The petition should be addressed to the director. It should set forth specific evidence and scientific data which shows that the species may no longer be failing, declining, or vulnerable, pursuant to section 3.3. Within 60 days, the agency shall either deny the petition, stating the reasons, or initiate the delisting process.

6.1.3 The commission requests the agency review a species of concern.

6.2 Upon initiation of the delisting process the agency shall publish a public notice in the Washington Register, and notify those parties who have expressed their interest to the department, announcing the initiation of the delisting process and calling for scientific information relevant to the species status report under consideration pursuant to section 7.1.

Species status review and agency recommendations

7.1 Except in an emergency under 5.1.3 above, prior to making a classification recommendation to the commission, the agency shall prepare a preliminary species status report. The report will include a review of information relevant to the species' status in Washington and address factors affecting its status, including those given under section 3.3. The status report shall be reviewed by the public and scientific community. The status report will include, but not be limited to an analysis of:

7.1.1 Historic, current, and future species population trends

7.1.2 Natural history, including ecological relationships (e.g. food habits, home range, habitat selection patterns).

7.1.3 Historic and current habitat trends.

7.1.4 Population demographics (e.g. survival and mortality rates, reproductive success) and their relationship to long term sustainability.

7.1.5 Historic and current species management activities.

7.2 Except in an emergency under 5.1.3 above, the agency shall prepare recommendations for species classification, based upon scientific data contained in the status report. Documents shall be prepared to determine the environmental consequences of adopting the recommendations pursuant to requirements of the State Environmental Policy Act (SEPA).

7.3 For the purpose of delisting, the status report will include a review of recovery plan goals.

Public review

8.1 Except in an emergency under 5.1.3 above, prior to making a recommendation to the commission, the agency shall provide an opportunity for interested parties to submit new scientific data relevant to the status report, classification recommendation, and any SEPA findings.

8.1.1 The agency shall allow at least 90 days for public comment.

8.1.2 The agency will hold at least one Eastern Washington and one Western Washington public meeting during the public review period.

Final recommendations and commission action

9.1 After the close of the public comment period, the agency shall complete a final status report and classification recommendation. SEPA documents will be prepared, as necessary, for the final agency recommendation for classification. The classification recommendation will be presented to the commission for action. The final species status report, agency classification recommendation, and SEPA documents will be made available to the public at least 30 days prior to the commission meeting.

9.2 Notice of the proposed commission action will be published at least 30 days prior to the commission meeting.

Periodic species status review

10.1 The agency shall conduct a review of each endangered, threatened, or sensitive wildlife species at least every five years after the date of its listing. This review shall include an update of the species status report to determine whether the status of the species warrants its current listing status or deserves reclassification.

10.1.1 The agency shall notify any parties who have expressed their interest to the department of the periodic status review. This notice shall occur at least one year prior to end of the five year period required by section 10.1.

10.2 The status of all delisted species shall be reviewed at least once, five years following the date of delisting.

10.3 The department shall evaluate the necessity of changing the classification of the species being reviewed. The agency shall report its findings to the commission at a commission meeting. The agency shall notify the public of its findings at least 30 days prior to presenting the findings to the commission.

10.3.1 If the agency determines that new information suggests that classification of a species should be changed from its present state, the agency shall initiate classification procedures provided for in these rules starting with section 5.1.

10.3.2 If the agency determines that conditions have not changed significantly and that the classification of the species should remain unchanged, the agency shall recommend to the commission that the species being reviewed shall retain its present classification status.

10.4 Nothing in these rules shall be construed to automatically delist a species without formal commission action.

Recovery and management of listed species

11.1 The agency shall write a recovery plan for species listed as endangered or threatened. The agency will write a management plan for species listed as sensitive. Recovery and management plans shall address the listing criteria described in sections 3.1 and 3.3, and shall include, but are not limited to:

11.1.1 Target population objectives

11.1.2 Criteria for reclassification

11.1.3 An implementation plan for reaching population objectives which will promote cooperative management and be sensitive to landowner needs and

property rights. The plan will specify resources needed from and impacts to the department, other agencies (including federal, state, and local), tribes, landowners, and other interest groups. The plan shall consider various approaches to meeting recovery objectives including, but not limited to regulation, mitigation, acquisition, incentive, and compensation mechanisms.

- 11.1.4 Public education needs
- 11.1.5 A species monitoring plan, which requires periodic review to allow the incorporation of new information into the status report.
- 11.2 Preparation of recovery and management plans will be initiated by the agency within one year after the date of listing.
 - 11.2.1 Recovery and management plans for species listed prior to 1990 or during the five years following the adoption of these rules shall be completed within 5 years after the date of listing or adoption of these rules, whichever comes later. Development of recovery plans for endangered species will receive higher priority than threatened or sensitive species.
 - 11.2.2 Recovery and management plans for species listed after five years following the adoption of these rules shall be completed within three years after the date of listing.
 - 11.2.3 The agency will publish a notice in the Washington Register and notify any parties who have expressed interest to the department interested parties of the initiation of recovery plan development.
 - 11.2.4 If the deadlines defined in sections 11.2.1 and 11.2.2 are not met the department shall notify the public and report the reasons for missing the deadline and the strategy for completing the plan at a commission meeting. The intent of this section is to recognize current department personnel resources are limiting and that development of recovery plans for some of the species may require significant involvement by interests outside of the department, and therefore take longer to complete.
- 11.3 The agency shall provide an opportunity for interested public to comment on the recovery plan and any SEPA documents.

Classification procedures review

- 12.1 The agency and an ad hoc public group with members representing a broad spectrum of interests, shall meet as needed to accomplish the following:
 - 12.1.1 Monitor the progress of the development of recovery and management plans and status reviews, highlight problems, and make recommendations to the department and other interested parties to improve the effectiveness of these processes.
 - 12.1.2 Review these classification procedures six years after the adoption of these rules and report its findings to the commission.

Authority

- 13.1 The commission has the authority to classify wildlife as endangered under RCW 77.12.020. Species classified as

endangered are listed under WAC 232-12-014, as amended.

- 13.2 Threatened and sensitive species shall be classified as subcategories of protected wildlife. The commission has the authority to classify wildlife as protected under RCW 77.12.020. Species classified as protected are listed under WAC 232-12-011, as amended.

WAC 232-12-807 Operations and procedures. The department of game is a public service agency whose statutory responsibility is to preserve, protect, and perpetuate all forms of wildlife in the state of Washington and to serve the public by providing the maximum amount of wildlife-oriented recreation consistent with sound biological management.

The state game commission consists of six members appointed by the governor. They serve a term of six years each. Terms are arranged so that appointments of two members expire every two years. By law, three commissioners are appointed from eastern Washington and three from western

Washington. The game commission establishes regulations, sets overall policies to guide the department, and appoints the director of game. The director is responsible for all activities of the department of game and reports directly to the game commission.

Organization of the department of game is one of decentralized management. A deputy director and two assistant directors aid in the operation and administration of the department. The Olympia staff consists of seven division administrators who head up areas of program planning and coordination. Completing the staff is a planning section and a special assistant to the director for federal affairs.

The fisheries management division is responsible for research, program development, planning and coordination of management for all fish classified as game fish.

The wildlife management division is responsible for research, planning, program development, and coordination of management for all wildlife in the state other than fish. Major activities of this division relate to big game species, a variety of small game including birds, nonhunted wildlife, and management of wildlife areas.

The habitat management division is responsible for research, planning, program development and coordination for protection, restoration, and enhancement of wildlife and fish habitat areas through the use of environmental laws and public education. A major portion of this program is related to cooperative contractual agreements with other land managers and private landholders.

The enforcement division is responsible for planning, program development, and coordination of enforcement and wildlife control activities.

The engineering and lands division is responsible for engineering and design, construction, maintenance, surveying, land acquisition, and property management services. The division also prepares and implements the department's capital budget.

The management services division has responsibility for the budget development, accounting, federal aid coordination, payroll, printing, mailing, purchasing, vendor payments, warehouse services, safety, maintenance of archives, department's license management, and data processing.

The information and education division is responsible for planning and program development of the hunter education and safety training, project WILD for school children, various publications, trapper training, interpretive displays, newsletters, news releases, and radio and television public service announcements.

The department of game has six administrative regions in the state; three on the eastside, three on the westside. Each region is administered by a regional supervisor who is responsible for all department programs within his assigned region. They are assisted by program managers for the key areas of enforcement, habitat, wildlife, and fisheries. Program implementation is carried out primarily by field agents and biological or production staff.

The game commission, through the public meeting process, establishes all rules and regulations that govern departmental activities. This includes establishment of hunting and fishing seasons; approval of land acquisitions or exchanges; coordination with other federal, state, county, or city pro-

grams; and adjudication of requests for license reinstatements when individual privileges have been revoked in accordance with RCW's.

The game commission holds four statutory meetings each year in January, April, July, and October, and other special meetings as necessary to conduct its business.

Eastern Washington - all lands lying east of the Cascade Crest Trail and east of the Big White Salmon River in Klickitat County.

Western Washington - all lands lying west of the Cascade Crest Trail and west of and including the Big White Salmon River in Klickitat County.

WAC 232-12-810 Public records officer. The department public records are in charge of a public records officer designated by the director. The person so designated is located in the Administrative Office of the Department, 600 No. Capitol Way, Olympia, Washington. The public records officer is responsible for the following: The implementation of the department's rules and regulations regarding release of public records, regarding the administration or enforcement of chapter 1, Laws of 1973 and these rules, coordinating the staff of the department in this regard, and generally insuring compliance by the staff with the public records and disclosure requirements of chapter 1, Laws of 1973.

[Statutory Authority: RCW 77.12.040. 81-22-002 (Order 174), § 232-12-810, filed 10/22/81; Order 42, § 232-12-810, filed 7/19/73.]

WAC 232-12-813 Copying. No fee shall be charged for the inspection of public records. The department shall charge a fee of twenty-five cents per page for providing copies of public records, and two dollars for certification if requested.

(2) The department of game shall to the fullest extent possible:

(a) Interpret and administer the policies, regulations, and laws of the state of Washington in accordance with the policies set forth in SEPA and these rules.

(b) Find ways to make the SEPA process more useful to decisionmakers and the public; promote certainty regarding the requirements of the act; reduce paperwork and the accumulation of extraneous background data; and emphasize important environmental impacts and alternatives.

(c) Prepare environmental documents that are concise, clear, and to the point, and are supported by evidence that the necessary environmental analyses have been made.

(d) Initiate the SEPA process early in conjunction with other agency operations to avoid delay and duplication.

(e) Permits will be drawn by computer selection using a weighted point selection system.

(f) Incomplete applications:

(i) To be eligible for the deer, elk, cougar or black bear permit hunts drawing, each application must include a valid hunt number, complete name, correct mailing address, date of birth, a marked species check box, a valid Washington hunting license number, and a valid species transport tag number for each applicant.

(ii) To be eligible for the special mountain goat, moose or mountain sheep permit hunts drawing, each application must include a valid hunt number, complete name, correct mailing address, date of birth, and a marked species check box.

(iii) To be eligible to accrue points, each application must include either a valid social security number, driver's license number, or a state-issued identification number for each applicant. Applicants choosing not to submit one of the above-listed numbers will be eligible for the drawing, but will not accrue points. The same identification number must be used each year to accrue points. If a different number is used (i.e., driver's license number instead of social security number), point accrual will begin anew for the applicant while maintaining the point accrual under the former identification number.

(g) Inaccurate applications:

(i) If an applicant makes a mistake, applies for the wrong hunt, and is drawn, the permit can be returned to the department of fish and wildlife Olympia headquarters before the opening day of the hunt or the opening day of the general season, whichever comes first. The applicant's points will be restored to the condition they were in prior to the drawing.

(ii) If an applicant inaccurately submits his/her identification number on an application, no points will be accrued for that year for that species under the correct identification number.

(7) The commission establishes auction and raffle Private Lands Wildlife Management Areas (PLWMA) hunts:

(a) The commission may authorize, by agreement with PLWMA, the sale, auction, or raffle of hunts on PLWMAs.

(c) Any person may purchase PLWMA raffle tickets in addition to WDFW raffle tickets and participate in general permit hunt application drawing.

(d) An additional deer or elk transport tag will be issued upon payment for a deer or elk PLWMA raffle permit hunt.

(e) The PLWMA manager conducting an authorized big game auction or raffle will provide an annual report to the department of fish and wildlife prior to December 31. The report will include information on how the event was administered, where and when it occurred, who the winners are, the cost of tickets and numbers sold.

(8) The commission establishes auction and raffle hunts:

(a) The commission may establish big game and wild turkey auction and raffle permit hunts. The director may conduct the auction or raffle or may contract to a non-profit wildlife conservation organization (registered 5013c) for marketing. The organization may retain the vendor fee for each raffle ticket sold to cover expenses incurred or a percentage of the auction permit receipt.

(b) There is no limit on the number of raffle tickets a person may purchase. Raffle tickets cost no more than \$25.00 each with a 50 cent vendor fee included in the price.

(c) The organization interested in conducting an auction or raffle for an authorized permit hunt shall submit a proposal outlining its experience and plans to conduct an auction or raffle. The department of fish and wildlife shall solicit bids consistent with established state competitive bid rules. The proposal shall include:

(i) Name of the organization, articles of incorporation, and contact person.

(ii) The date, time and place of the proposed auction and raffle drawing.

(iii) The approximate number of people expected to attend the function.

(e) The department or organization conducting a raffle shall notify the public about the raffle hunt opportunity and offer raffle tickets for sale.

(i) The department or organization shall inform the public of date, time and place of the raffle and hold the drawing as specified.

(ii) Raffle tickets sales conducted through agency license vendors or the director authorized nonprofit wildlife conservation organization vendor must be received at the department's Olympia office headquarters on or before the last business day prior to the public drawing. Contracting organizations conducting hunting raffles must account for raffle tickets and funds received. A representative of the department will monitor the drawing.

(iii) Additional tickets may be purchased at the raffle site prior to the drawing.

(iv) One winner and two alternates shall be drawn at the drawing.

(v) The raffling organization shall notify the department of the name, address and phone number of the raffle permit winner and two alternates immediately (but no later than two business days) after the drawing. The department will notify the winner and two alternates by mail. The winner must claim the raffle permit during the regular business hours within 15 days of being notified or he/she shall be disqualified and the department will offer the raffle permit to the first alternate. The first alternate must claim the raffle permit within 10 business days of notification or he/she shall be disqualified and the department will notify the second alternate. The second alternate must claim the permit within 10 business days of notification or he/she shall be disqualified and the department will not offer the raffle permit.

(9) Citizen reward for reporting violations - bonus points:

A person who provides information which contributes substantially to the arrest of another person for illegally killing big game or an endangered species as defined by Title 77 RCW is eligible to receive ten bonus points toward the department drawing for deer and elk special permits.

(a) Ten bonus points may only be awarded to only one person providing information for each person charged regardless of the number of violations involved.

(b) Selection of bonus points is in lieu of application for a cash award which may be authorized by RCW 77.21.080.

Antler points may include eye guards, but antler points on the lower half of the main beam must be at least four (4) inches long measured from antler tip to nearest edge of beam; all other antler points must be at least one (1) inch long. Antler restrictions apply to all hunters during any open season.

Hunters who held a 1997 authorization and returned the Harvest Report prior to the deadline will be mailed a 1998 authorization in early October. Hunters who did not possess a 1997 authorization must fill out an application (available at Washington Department of Fish and Wildlife Olympia and regional offices). Application forms must be delivered to a Department office no later than September 25 or postmarked on or before September 25 in order for applicants to be

mailed a 1998 authorization before the season starts. No applications will be accepted after October 31, 1998. Immediately after taking a snow goose into possession, hunters must record in ink the information required on the Harvest Report. Return of the Harvest Report is mandatory. The Canada goose season for Western Washington Goose Management Area 2 will be closed early if dusky Canada goose harvests exceed area quotas which collectively total 80 geese. The Fish and Wildlife Commission has authorized the Director to implement emergency area closures in accordance with the following quotas: A total of 80 dusks, to be distributed 10 for Zone 1 (Ridgefield NWR); 25 for Zone 2 (Cowlitz County south of the Kalama River); 20 for Zone 3 (Clark County private lands); 10 for Zone 4 (Cowlitz County north of the Kalama River and Wahkiakum County); 10 for Zone 5 (Pacific County); and 5 for Zone 6 (Grays Harbor County). Quotas may be shifted to other zones during the season to optimize use of the statewide quota and minimize depredation.

Hunting is only permitted by written authorization from the Washington Department of Fish and Wildlife. Hunters who maintained a valid 1997 written authorization will be mailed a 1998 authorization card prior to the 1998 season. New hunters and those who did not maintain a valid 1997 authorization must review goose identification training materials and demonstrate adequate performance on a goose identification test to receive written authorization. Information on training materials and testing dates/locations is available at the Olympia and regional offices.

[Statutory Authority: 1984 c 72, 84-18-065 (Order 237), § 232-32-010, filed 9/5/84.]

WAC 232-32-020 Definitions. (1) "Volunteer group" means any person or group of persons interested in or party to an agreement with the department of game relating to a cooperative wildlife project.

(2) "Cooperative wildlife project" means a project conducted by a volunteer group that will benefit the game fish, game bird, game animal, or nongame wildlife resources of the state and for which the benefits of the project, including wildlife reared and released, are available to all citizens of the state.

[Statutory Authority: 1984 c 72, 84-18-065 (Order 237), § 232-32-020, filed 9/5/84.]

WAC 232-32-030 Information required from volunteer groups. The following information should be furnished by volunteer groups when applying for a cooperative wildlife project.

(1) Date of application.

(2) Name of volunteer group or person proposing cooperative project. If a group, give the name, address, and telephone number of one person in that group who will serve as contact person and project leader.

(3) General description of proposed project, including title, project objectives (how the proposed project will benefit the wildlife resource), methods for achieving objectives, and criteria for measuring achievement of objectives.

(4) Location and physical size of project, as specific as possible, including county, legal description, street address (if applicable), property ownership, township, range, section, and acreage.

[Statutory Authority: 1984 c 72. 84-18-065 (Order 237), § 232-32-030, filed 9/5/84.]

WAC 232-32-040 Review and selection process. The following steps are included in the process of reviewing and selecting cooperative wildlife projects:

(1) Applications will be made available to anyone interested in conducting a cooperative project. Application forms will be available at any time at the Olympia headquarters and all regional offices of the department of wildlife.

(2) Applications for projects may be submitted at any time.

(3) The department will send each applicant, within 45 days of receipt of each application, a written acknowledgment of the receipt of the application and give the applicant a date when notification of acceptance or rejection of the proposal can be expected. The written acknowledgement will also provide the department's selection criteria and a general description of the review and selection process. Final decisions and notification of acceptance or rejection of proposals where funding is requested will be made only after the biennial budget is passed by the legislature and signed by the governor.

(4) The department will determine when a proposed project might affect the management programs of federal,

(1999 Ed.)

other state, and local agencies and of treaty Indian tribes and will make contact with these entities, when the department determines it is appropriate to do so, during the review and selection process. If the department determines that ongoing coordination between a volunteer group and another agency or tribe would be appropriate, it may be required as a condition of the permit, when issued.

(5) Each approved agreement will include the following, when determined by the department to be necessary or appropriate: (a) Permit for release of fish or wildlife; (b) procedures for applying for a hydraulic project approval (HPA), and (c) description of methods that will be used to provide the volunteer group with fish, bird, or animal food or other available supplies.

[Statutory Authority: RCW 75.52.050. 88-17-030 (Order 317), § 232-32-040, filed 8/12/88. Statutory Authority: 1984 c 72. 84-18-065 (Order 237), § 232-32-040, filed 9/5/84.]

WAC 232-32-050 Criteria used in selecting cooperative wildlife projects. The following criteria will be considered by the department in ranking project proposals for funding. These criteria are not rigid but are intended to guide the department in selecting projects that are feasible, cost effective, and complementary with other department programs.

(1) Game commission policy: The game commission policies, adopted in 1980, as amended, will be used, along with other criteria, to rank project proposals. Policies include the following: (a) The first management priority will be to establish and perpetuate the highest quality wildlife habitat, with the second priority being to provide recreation opportunity in the form of hunting, fishing, and wildlife enjoyment; and (b) within habitat capabilities, wildlife will be managed according to the following priorities: Natural reproduction rather than stocking; native species of wildlife; and species which provide the most recreational opportunities for hunting, fishing, and wildlife viewing.

(2) Program goals, objectives, and priorities: Project proposals will be ranked according to their adherence to program goals, objectives, and priorities, as outlined in department species plans and regional operational plans. When production or rearing projects are considered, potential conflicts or competition with other species of fish and wildlife, including food fish and shellfish, will be considered.

(3) Costs versus benefits: Project proposals will be evaluated and ranked according to expected ratio of costs to public benefits. Costs will include both money and man-days; benefits may include direct benefits to wildlife or habitat and benefits to the public in terms of recreational opportunities or increased knowledge about wildlife.

(4) Educational value. Consideration will be given to a project's value in educating and informing the public about the life history and needs of wildlife.

(5) Capabilities of volunteer groups. When considering the renewal or refunding of projects, the relative success of that project and the overall capability of a particular volunteer group in managing cooperative projects and producing results will be considered; this will include the amount of department supervision or assistance required to accomplish the project.

[Statutory Authority: 1984 c 72. 84-18-065 (Order 237), § 232-32-050, filed 9/5/84.]

WAC 232-32-060 Procedures for revocation of a cooperative wildlife project. The following criteria and procedures will be followed when the department considers revocation or actually revokes a cooperative wildlife project:

(1) The department may revoke a cooperative project agreement for the following reasons: (a) A violation of agreement provisions; (b) unavailability of adequate biological or financial resources to continue participation by the department; and (c) the development of unacceptable biological or resource management conflicts.

(2) When the department decides that a cooperative project is in danger of being revoked, a certified letter will be sent to the contact person, with the volunteer group responsible for the project advising him or her of the problem and either setting conditions for continuation of the project, or attempting to arrange a meeting to discuss ways of bringing the cooperative agreement into compliance or resolving other problems that might result in revocation.

(3) When the department decides that a cooperative project should be terminated, a certified letter to that effect will be sent to the contact person within the volunteer group responsible for the project. The exact termination date will be determined by the severity of the problem which requires revocation.

[Statutory Authority: 1984 c 72. 84-18-065 (Order 237), § 232-32-060, filed 9/5/84.]

WAC 232-32-070 Priority for eggs, seed, juveniles, broodstock, and department facilities. The following priorities will be followed in allocating eggs, seed, juveniles, broodstock, or using rearing space at department hatcheries and other facilities:

- (1) Needs of the department of game
- (2) Needs of other public agencies in Washington
- (3) Cooperative wildlife projects
- (4) Exchange agreements with agencies outside Washington
- (5) Sales.

[Statutory Authority: 1984 c 72. 84-18-065 (Order 237), § 232-32-070, filed 9/5/84.]
