(6) Physical therapy treatment beyond initial twelve treatments as outlined in chapters 296-21, 296-23, and 296-23A WAC.

(7) Diagnostic or therapeutic injection. Epidural or caudal injection of substances other than anesthetic or contrast solution will be authorized under the following conditions only:

(a) When the worker has experienced acute low back pain or acute exacerbation of chronic low back pain of no more than six months duration.

(b) The worker will receive no more than three injections in an initial thirty-day treatment period, followed by a thirty-day evaluation period. If significant pain relief is demonstrated one additional series of three injections will be authorized. No more than six injections will be authorized per acute episode.

(8) Home nursing or convalescent center care must be authorized per provision outlined in WAC 296-20-091.

(9) Provision of prosthetics, orthotics, surgical appliances, special equipment for home or transportation vehicle; custom made shoes for ankle/foot injuries resulting in permanent deformity or malfunction of a foot; TNS units; masking devices; hearing aids; etc., must be authorized in advance as per WAC 296-20-1101 and 296-20-1102.

(10) Biofeedback program; pain clinic; weight loss program; psychotherapy; rehabilitation programs; and other programs designed to treat special problems must be authorized in advance. Refer to the department's medical aid rules and fee schedules for details.

(11) Prescription or injection of vitamins for specific therapeutic treatment of the industrial condition(s) when the attending doctor can demonstrate that published clinical studies indicate vitamin therapy is the treatment of choice for the condition. Authorization for this treatment will require presentation of facts to and review by department medical consultant.

(12) Injections of anesthetic and/or anti-inflammatory agents into the vertebral facet joints will be authorized to qualified specialists in orthopedics, neurology, and anesthesia, or other physicians who can demonstrate expertise in the

procedure, AND who can provide certification their hospital privileges include the procedure requested under the following conditions:

(a) Rationale for procedure, treatment plan, and request for authorization must be presented in writing to the department or self-insurer.

(b) Procedure must be performed in an accredited hospital under radiographic control.

(c) Not more than four facet injection procedures will be authorized in any one patient.

(13) The long term prescription of medication under the specific conditions and circumstances in (a) and (b) are considered corrective therapy rather than palliative treatment and approval in advance must be obtained.

(a) Nonsteroidal anti-inflammatory agents for the treatment of degenerative joint conditions aggravated by occupational injury.

(b) Anticonvulsive agents for the treatment of seizure disorders caused by trauma.

(14) Intra-muscular and trigger point injections of steroids and other nonscheduled medications are limited to three injections per patient. The attending doctor must submit justification for an additional three injections if indicated with a maximum of six injections to be authorized for any one patient.

(15) The department may designate those diagnostic and surgical procedures which can be performed in other than a hospital inpatient setting. Where a worker has a medical condition which necessitates a hospital admission, prior approval of the department or self-insurer must be obtained.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-20-03001, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 90-04-057, § 296-20-03001, filed 2/2/90, effective 3/5/90; 86-20-074 (Order 86-36), § 296-20-03001, filed 10/1/86, effective 11/1/86; 86-06-032 (Order 86-19), § 296-20-03001, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-20-03001, filed 8/2/83. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-24-041 (Order 81-28), § 296-20-03001, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-20-03001, filed 12/23/80, effective 3/1/81. Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-20-03001, filed 11/30/79, effective 1/1/80; Order 76-34, § 296-20-03001, filed 11/24/76, effective 1/1/77.]

WAC 296-20-03002 Treatment not authorized. The department or self-insurer will not allow nor pay for following treatment:

(1) **Use of diapulse, thermatic (standard model only), spectrowave and superpulse machines on workers entitled to benefits under the Industrial Insurance Act.**

(2) Iontophoresis; prolotherapy; acupuncture; injections of colchicine; injections of fibrosing or sclerosing agents; and injections of substances other than anesthetic or contrast into the subarachnoid space (intra-thecal injections).

(3) Treatment to improve or maintain general health (i.e., prescriptions and/or injection of vitamins or referrals to special programs such as health spas, swim programs, exercise programs, athletic-fitness clubs, diet programs, social counseling).

(4) Continued treatment beyond stabilization of the industrial condition(s), i.e., maintenance care, except where necessary to monitor prescription of medication necessary to

maintain stabilization i.e., anti-convulsive, anti-spasmodic, etc.

(5) After consultation and advice to the department or self-insurer, any treatment measure deemed to be dangerous or inappropriate for the injured worker in question.

(6) Treatment measures of an unusual, controversial, obsolete, or experimental nature (see WAC 296-20-045). Under certain conditions, treatment in this category may be approved by the department or self-insurer. Approval must be obtained prior to treatment. Requests must contain a description of the treatment, reason for the request with benefits and results expected.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 86-06-032 (Order 86-19), § 296-20-03002, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-20-03002, filed 8/2/83. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-24-041 (Order 81-28), § 296-20-03002, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-20-03002, filed 12/23/80, effective 3/1/81; Order 76-34, § 296-20-03002, filed 11/24/76, effective 1/1/77.]

WAC 296-20-03004 Chemonucleolysis. Chymopapain injections may be authorized in the treatment of lumbar disc disease under the following limitations and criteria:

(1) Only physicians (a) who routinely care for patients with herniated lumbar intervertebral discs, (b) who are qualified by training and experience to diagnose lumbar disc disease and to perform laminectomy, discectomy or other spinal procedures, (c) who have received specialized training in chemonucleolysis, may administer the procedure for industrial injured workers covered under state industrial insurance fund or self-insurance.

(2) Preadministration work-up shall include but is not limited to (a) a concurring opinion from a physician familiar with the procedure and qualified by training and experience to diagnose and treat lumbar disc disease, (b) diagnostic studies indicative of level of disc herniation i.e., myelogram, a high resolution CT scan, discogram, etc., (c) other diagnostic studies including sedimentation rate (anaphylaxis has occurred primarily in females with sedimentation rates in excess of 20 mm per hour) as indicated for the individual patient.

(3) Procedure will be authorized (a) one time only in the treatment life of any given patient, (b) maximum of two levels per patient (Generally only one level will be authorized. Indications for a second level are infrequent. However, authorization may be granted if diagnostic studies and/or concurring opinion so indicates.), (c) only for patients who have had no previous lumbar surgery at that level.

(4) Procedure must be carried out in hospital setting under radiographic or fluoroscopic control, with a permanent x-ray record maintained.

(5) Prior authorization from the department or the self-insurer must be obtained before procedure is scheduled.

(6) These rules were formulated based upon the recommendations of the Federal Food and Drug Administration, the drug manufacturer, and the industrial insurance committee of the Washington state medical association.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 83-16-066 (Order 83-23), § 296-20-03004, filed 8/2/83.]

WAC 296-20-03005 Inoculation or immunological treatment for exposure to infectious occupational disease.

Authorization for inoculation or other immunological treatment for occupational disease shall be given only in cases in which a work related activity has resulted in probable exposure of the worker to a potential infectious occupational disease. In no case shall such inoculation or immunological treatment be authorized until such time as a work related activity has resulted in such probable exposure. Inoculation or other treatment required as a condition for employment or otherwise obtained prior to the worker's performing a work related activity resulting in probable exposure to an occupational disease shall not be authorized. For purposes of this section, probable exposure is an incident which gives rise to a clear and immediate likelihood of contracting an occupational disease process.

[Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.36.010. 86-18-025 (Order 86-34), § 296-20-03005, filed 8/27/86, effective 11/1/86.]

WAC 296-20-03010 What are the general principles the department uses to determine coverage on drugs and medications?

The department or self-insurer pays for drugs that are deemed proper and necessary to treat the industrial injury or occupational disease accepted under the claim. In general, the department will consider coverage for all FDA approved drugs for stated indications. The department or self-insurer may pay for prescriptions for off label indications when used within current medical standards and prescribed in compliance with published contraindications, precautions and warnings.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03010, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03011 What general limitations are in place for medications? (1) Amount dispensed.

The department or self-insurer will pay for no more than a thirty-day supply of a medication dispensed at any one time.

(2) **Over-the-counter drugs.** Prescriptions for over-the-counter items may be paid. Special compounding fees for over-the-counter items are not payable.

(3) **Generic drugs.** Prescriptions are to be written for generic drugs unless the attending physician specifically indicates that substitution is not permitted. For example: The patient cannot tolerate substitution. Pharmacists are instructed to fill with generic drugs unless the attending physician specifically indicates substitution is not permitted.

(4) **Prescriptions for unrelated medical conditions.** The department or self-insurer may consider temporary coverage of prescriptions for conditions not related to the industrial injury when such conditions are retarding recovery. Any treatment for such conditions must have prior authorization per WAC 296-20-055.

(5) **Pension cases.** Once the worker is placed on a pension, the department or self-insurer may pay for only those drugs and medications authorized for continued medical treatment for conditions previously accepted by the department. Authorization for continued medical and surgical treatment is at the sole discretion of the supervisor of industrial insurance and must be authorized before the treatment is ren-

dered. In such pension cases, the department or self-insurer cannot pay for scheduled drugs used to treat continuing pain resulting from an industrial injury or occupational disease.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03011, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03012 Where can I find the department's outpatient drug and medication coverage decisions? The department's outpatient drug and medication coverage decisions are contained in the department's formulary, as developed by the department in collaboration with the Washington State Medical Association's Industrial Insurance and Rehabilitation Committee.

In the formulary, drugs are listed in the following categories:

• Allowed

Drugs used routinely for treating accepted industrial injuries and occupational illnesses.

Example: Nonscheduled drugs and other medications during the acute phase of treatment for the industrial injury or condition.

• Prior authorization required

Drugs used routinely to treat conditions not normally accepted as work related injuries, drugs which are used to treat unrelated conditions retarding recovery from the accepted condition on the claim, and drugs for which less expensive alternatives exist.

Example: All drugs to treat hypertension because hypertension is not normally an accepted industrial condition.

• Denied

Drugs not normally used for treating industrial injuries or not normally dispensed by outpatient pharmacies.

Example: Most hormones, most nutritional supplements.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03012, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03013 Will the department or self-insurer pay for a denied outpatient drug in special circumstances?

Some of the drugs that are routinely denied may be covered in special circumstances. Requests for coverage under special circumstances require authorization prior to treatment. Examples of drugs that may be covered in special circumstances include:

• Drugs and medications to treat unrelated conditions when retarding recovery;

• Special treatments for unique catastrophic injuries.

The department may require written documentation to support the request.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03013, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03014 Which drugs have specific limitations?

(1) **Injectables.** Prescriptions for injectable opioids or other analgesics, sedatives, antihistamines, tranquilizers, psychotropics, vitamins, minerals, food supplements, and hormones are not covered.

Exceptions: The department or self-insurer covers injectable medications under the following circumstances.

(a) Indicated injectable drugs for the following:

- Inpatients; or
- During emergency treatment of a life-threatening condition/injury; or
- During outpatient treatment of severe soft tissue injuries, burns or fractures when needed for dressing or cast changes; or
- During the perioperative period and the postoperative period, not to exceed forty-eight hours from the time of discharge.

(b) Prescriptions of injectable insulin, heparin, anti-migraine medications, or impotency treatment, when proper and necessary.

(2) **Noninjectable scheduled drugs administered by other than the oral route.** Nonoral routes of administration of scheduled drugs that result in systemic availability of the drug equivalent to injectable routes will also not be covered.

(3) **Sedative-hypnotics.** During the chronic stage of an industrial injury or occupational disease, payment for scheduled sedatives and hypnotics will not be authorized.

(4) **Benzodiazepines.** Payment for prescriptions for benzodiazepines are limited to the following types of patients:

- Hospitalized patients;
- Claimants with an accepted psychiatric disorder for which benzodiazepines are indicated;
- Claimants with an unrelated psychiatric disorder that is retarding recovery but which the department or self-insurer has temporarily authorized treatment (see WAC 296-20-055) and for which benzodiazepines are indicated; and
- Other outpatients for not more than thirty days for the life of the claim.

(5) **Cancer.** When cancer or any other end-stage disease is an accepted condition, the department or self-insurer may authorize payment for any indicated scheduled drug and by any indicated route of administration.

(6) **Spinal cord injuries.** When a spinal cord injury is an accepted condition, the department or self-insurer may authorize payment for anti-spasticity medications by any indicated route of administration (e.g., some benzodiazepines, Baclofen). Prior authorization is required.

Note: See the department formulary for specific limitations and prior authorization requirements of other drugs.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03014, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03015 What steps may the department or self-insurer take when concerned about the amount or appropriateness of drugs and medications prescribed to the injured worker? (1) The department or self-insurer may take any or all of the following steps when concerned about the amount or appropriateness of drugs the patient is receiving:

- Notify the attending physician of concerns regarding the medications such as drug interactions, adverse reactions, prescriptions by other providers;
- Require that the attending physician send a treatment plan addressing the drug concerns;
- Request a consultation from an appropriate specialist;

[Title 296 WAC—p. 504]

- Request that the attending physician consider reducing the prescription, and provide information on chemical dependency programs;

- Limit payment for drugs on a claim to one prescribing doctor.

(2) If the attending physician or worker does not comply with these requests, or if the probability of imminent harm to the worker is high, the department or self-insurer may discontinue payment for the drug after adequate prior notification has been given to the worker, pharmacy and physician.

(3) Physician failure to reduce or terminate prescription of controlled substances, habit forming or addicting medications, or dependency inducing medications, after department or self-insurer request to do so for an injured worker may result in a transfer of the worker to another physician of the worker's choice. (See WAC 296-20-065.)

(4) Other corrective actions may be taken in accordance with WAC 296-20-015, Who may treat.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03015, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03016 Is detoxification and/or chemical dependency treatment covered? The department or self-insurer may pay for detoxification and/or chemical dependency treatment in the following circumstances:

- The injured worker becomes dependent or toxic on medication prescribed for an accepted condition on the claim; or

- The injured worker becomes dependent or toxic due to medications prescribed for a condition retarding recovery of the accepted condition on the claim; or

- The injured worker is dependent or toxic due to medications for an unrelated condition, but that dependency or toxicity is retarding recovery of the accepted condition.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03016, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03017 What information is needed for prescriptions and the physician's record? Prescriptions must include the department authorized provider number for the prescribing physician and the physician's signature. The physician's record must contain the name and reason for the medication, the dosage, quantity prescribed and/or dispensed, the route of administration, the frequency, the starting and stopping dates, the expected outcome of treatment, and any adverse effects that occur. Please refer to WAC 296-20-03021 and 296-20-03022 for additional documentation requirements when treating chronic, noncancer pain.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03017, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03018 What inpatient drugs are covered? In general, the department or self-insured employer pays for most drugs in an inpatient hospital setting. Please see WAC 296-20-075, Hospitalization.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03018, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03019 Under what conditions will the department or self-insurer pay for oral opioid treatment for chronic, noncancer pain? Chronic, noncancer pain may develop after an acute injury episode. It is defined as pain that typically persists beyond two to four months following the injury.

The department or self-insurer may pay for oral opioids for the treatment of chronic, noncancer pain caused by an accepted condition when that treatment is proper and necessary. See WAC 296-20-01002 for the definition of "proper and necessary" health care services.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03019, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03020 What are the authorization requirements for treatment of chronic, noncancer pain with opioids? No later than thirty days after the attending physician begins treating the worker with opioids for chronic, noncancer pain, the attending physician must submit a written report to the department or self-insurer in order for the department or self-insurer to pay for such treatment. The written report must include the following:

- A treatment plan with time-limited goals;
- A consideration of relevant prior medical history;
- A summary of conservative care rendered to the worker that focused on reactivation and return to work;
- A statement on why prior or alternative conservative measures may have failed or are not appropriate as sole treatment;
- A summary of any consultations that have been obtained, particularly those that have addressed factors that may be barriers to recovery;
- A statement that the attending physician has conducted appropriate screening for factors that may significantly increase the risk of abuse or adverse outcomes (e.g., a history of alcohol or other substance abuse); and
- An opioid treatment agreement that has been signed by the worker and the attending physician. This agreement must be renewed every six months. The treatment agreement must outline the risks and benefits of opioid use, the conditions under which opioids will be prescribed, the physician's need to document overall improvement in pain and function, and the worker's responsibilities.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03020, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03021 What documentation is required to be submitted for continued coverage of opioids to treat chronic, noncancer pain? In addition to the general documentation required by the department or self-insurer, the attending physician must submit the following information at least every sixty days when treating with opioids:

- Documentation of drug screenings, consultations, and all other treatment trials;
- Documentation of outcomes and responses, including pain intensity and functional levels; and
- Any modifications to the treatment plan.

(2001 Ed.)

The physician must use a form developed by the department, or a substantially equivalent form, to document the patient's improvement in pain intensity and functional levels. This form may be included as part of a sixty-day report.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03021, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03022 How long will the department or self-insurer continue to pay for opioids to treat chronic, noncancer pain? The department or self-insurer will continue to pay for treatment with opioids so long as the physician documents:

- Substantial reduction of the patient's pain intensity; and
- Continuing substantial improvement in the patient's function.

Once the worker's condition has reached maximum medical improvement, further treatment with opioids is not payable. Opioid treatment for chronic, noncancer pain past the first three months of such treatment without documentation of substantial improvement is presumed to be not proper and necessary.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03022, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03023 When may the department or self-insurer deny payment of opioid medications used to treat chronic, noncancer pain? Payment for opioid medications may be denied in any of the following circumstances:

- Absent or inadequate documentation;
- Noncompliance with the treatment plan;
- Pain and functional status have not substantially improved after three months of opioid treatment; or
- Evidence of misuse or abuse of the opioid medication or other drugs, or noncompliance with the attending physician's request for a drug screen.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03023, filed 12/7/99, effective 1/20/00.]

WAC 296-20-03024 Will the department or self-insurer pay for nonopioid medications for the treatment of chronic, noncancer pain? The department or self-insurer may pay for nonopioid medication for the treatment of chronic, noncancer pain when it is proper and necessary.

For example, some drugs such as anti-convulsants, anti-depressants, and others have been demonstrated to be useful in the treatment of chronic pain and may be approved when proper and necessary.

[Statutory Authority: RCW 51.04.020 and 51.04.030. 00-01-040, § 296-20-03024, filed 12/7/99, effective 1/20/00.]

WAC 296-20-035 Treatment in cases that remain open beyond sixty days. Conditions requiring treatment beyond sixty days are indicative of a major industrial condition or complication by other conditions. Except in cases of severe and extensive injuries, i.e., quadriplegia, paraplegia, multiple fractures, etc., when the worker requires treatment beyond sixty days following injury, a complete examination is necessary to determine and/or establish need for continued

treatment and/or payment of time loss compensation. This may be accomplished either by the attending doctor or a consultation exam. In either case, a detailed exam report must be provided to the department or self-insurer. Refer to chapter 296-20 WAC (including the definition section) and department policy for the type of information that must be included in these reports.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 93-16-072, § 296-20-035, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030 [51.04.030], 87-08-004 (Order 87-09), § 296-20-035, filed 3/20/87. Statutory Authority: RCW 51.04.020(4) and 51.04.030, 86-06-032 (Order 86-19), § 296-20-035, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3), 81-24-041 (Order 81-28), § 296-20-035, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-20-035, filed 12/23/80, effective 3/1/81; Order 71-6, § 296-20-035, filed 6/1/71; Order 70-12, § 296-20-035, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-20-035, filed 11/27/68, effective 1/1/69.]

WAC 296-20-045 Consultation requirements. In the event of complication, controversy, or dispute over the treatment aspects of any claim, the department or self-insurer will not authorize treatment until the attending doctor has arranged a consultation with a qualified doctor with experience and expertise on the subject, and the department or self-insurer has received notification of the findings and recommendations of the consultant.

This consultation must be arranged in accordance with WAC 296-20-051.

Consultations are also required in the following situations:

(1) All nonemergent major surgery on a patient with serious medical, emotional or social problems which are likely to complicate recovery.

(2) All procedures of a controversial nature or type not in common use for the specific condition.

(3) Surgical cases where there are complications or unfavorable circumstances such as age, preexisting conditions or interference with occupational requirements, etc.

(4) If the attending doctor, the department, self-insurer, or authorized department representative requests a consultation.

(5) Conservative care, (e.g., nonsurgical cases) extending past one hundred twenty days following initial visit. Such consultation may be with a chiropractic or a medical or osteopathic consultant.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030, 90-04-057, § 296-20-045, filed 2/2/90, effective 3/5/90. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3), 81-01-100 (Order 80-29), § 296-20-045, filed 12/23/80, effective 3/1/81. WAC 296-20-051 Consultations. In cases presenting diagnostic or therapeutic problems to the attending doctor, consultation with a specialist will be allowed without prior authorization. The consultant must submit his findings and recommendations immediately to the attending doctor and the department or self-insurer. Refer to chapter 296-20 WAC and department policy for reporting requirements.

[Title 296 WAC—p. 506]

Whenever possible, the referring doctor should make his x-rays and records available to the consultant to avoid unnecessary duplication. The department's consultation referral form may be used to convey information to the consultant. Consultants may proceed with indicated and reasonable x-rays or laboratory work and reasonable diagnostic studies as permitted within their scope of practice.

Consultations will be held with a specialist within a reasonable geographic area. Whenever possible, consultation should be made with a doctor outside the referring doctor's office or partnership.

The attending doctor will not arrange a consultation if he has received notification that a special or commission examination is being arranged by the department or self-insurer. If he has had recent consultation and is notified that the department or self-insurer is arranging an examination, he must immediately advise the department or self-insurer of the consultation.

The consultation fee will be paid only if a consultation report is complete and contains all pathological findings as well as all pertinent negative or normal findings. The report must be received in the department within fifteen days from the date of the consultation. No fee is paid to the consultant if the worker fails the appointment.

The consultant may not order, prescribe, or provide treatment without the approval of the attending doctor and the injured worker. No transfer will be made to the consultant without the prior approval of the attending doctor and the injured worker.

Consultation services will not be reimbursed for workers who are currently, or have been under the physician's care within the last three years. Such services should be billed as follow up visits, as listed in the fee schedules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 93-16-072, § 296-20-051, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030, 86-06-032 (Order 86-19), § 296-20-051, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3), 81-01-100 (Order 80-29), § 296-20-051, filed 12/23/80, effective 3/1/81; Order 71-6, § 296-20-051, filed 6/1/71; Order 70-12, § 296-20-051, filed 12/1/70, effective 1/1/71. Formerly WAC 296-20-070.]

WAC 296-20-055 Limitation of treatment and temporary treatment of unrelated conditions when retarding recovery. Conditions preexisting the injury or occupational disease are not the responsibility of the department. When an unrelated condition is being treated concurrently with the industrial condition, the attending doctor must notify the department or self-insurer immediately and submit the following:

(1) Diagnosis and/or nature of unrelated condition.

(2) Treatment being rendered.

(3) The effect, if any, on industrial condition.

Temporary treatment of an unrelated condition may be allowed, upon prior approval by the department or self-insurer, provided these conditions directly retard recovery of the accepted condition. The department or self-insurer will not approve or pay for treatment for a known preexisting unrelated condition for which the claimant was receiving treatment prior to his industrial injury or occupational dis-

(2001 Ed.)

ease, which is not retarding recovery of his industrial condition.

A thorough explanation of how the unrelated condition is affecting the industrial condition must be included with the request for authorization.

The department or self-insurer will not pay for treatment of an unrelated condition when it no longer exerts any influence upon the accepted industrial condition. When treatment of an unrelated condition is being rendered, reports must be submitted monthly outlining the effect of treatment on both the unrelated and the accepted industrial conditions.

The department or self-insurer will not pay for treatment for unrelated conditions unless specifically authorized. This includes prescription of drugs and medicines.

[Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-01-100 (Order 80-29), § 296-20-055, filed 12/23/80, effective 3/1/81; Order 71-6, § 296-20-055, filed 6/1/71; Order 70-12, § 296-20-055, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-20-055, filed 11/27/68, effective 1/1/69.]

WAC 296-20-06101 What reports are health care providers required to submit to the insurer? The department or self-insurer requires different kinds of information at various stages of a claim in order to approve treatment, time loss compensation, and treatment bills. The department or self-insurer may request the following reports at specified points in the claim. The information provided in these reports is needed to adequately manage industrial insurance claims.

<i>Report</i>	<i>Due/Needed by Insurer</i>	<i>What Information Should Be Included In the Report?</i>	<i>Special Notes</i>
Report of Industrial Injury or Occupational Disease (form) Self-Insurance: Physician's Initial Report (form)	Immediately - within five days of first visit.	See form If additional space is needed, please attach the information to the application. The claim number should be at the top of the page.	Only MD, DO, DC, ND, DPM, DDS, and OD may sign and be paid for completion of this form.
Sixty Day (narrative) Purpose: Support and document the need for continued care when conservative (non-surgical) treatment is to continue beyond sixty days	Every sixty days when only conservative (non-surgical) care has been provided.	(1) The conditions diagnosed , including ICD-9-CM codes and the subjective complaints and objective findings.	Providers may submit legible comprehensive chart notes in lieu of sixty day reports PROVIDED the chart notes include all the information required as noted in the "What Information Should Be Included?" column.
		(2) The relationship of diagnoses , if any, to the industrial injury or exposure. (3) Outline of proposed treatment program , its length, components and expected prognosis including an estimate of when treatment should be concluded and condition(s) stable. An estimated return to work date and the probability , if any, of permanent partial disability resulting from the industrial condition.	However , office notes are not acceptable in lieu of requested narrative reports and providers may not bill for the report if chart notes are submitted in place of the report. Please see WAC 296-20-03021 and 296-20-03022 for documentation requirements for those workers receiving opioids to treat chronic non-cancer pain.

<i>Report</i>	<i>Due/Needed by Insurer</i>	<i>What Information Should Be Included In the Report?</i>	<i>Special Notes</i>
		(4) Current medications , including dosage and amount prescribed. With repeated prescriptions, include the plan and need for continuing medication. (5) If the worker has not returned to work, indicate whether a vocational assessment will be necessary to evaluate the worker's ability to return to work and why. (6) If the worker has not returned to work, a doctor's estimate of physical capacities should be included. (7) Response to any specific questions asked by the insurer or vocational counselor.	Providers must include their name, address and date on all chart notes submitted.
Special Reports/Follow-up Reports (narrative)	As soon as possible following request by the department/insurer.	Response to any specific questions asked by the insurer or vocational counselor.	"Special reports" are payable only when requested by the insurer.
Consultation Examination Reports (narrative) Purpose: Obtain an objective evaluation of the need for ongoing conservative medical management of the worker. The attending doctor may choose the consultant.	At one hundred twenty days if only conservative (nonsurgical) care has been provided.	(1) Detailed history. (2) Comparative history between the history provided by the attending doctor and injured worker. (3) Detailed physical examination. (4) Condition(s) diagnosed including ICD-9-CM codes, subjective complaints and objective findings. (5) Outline of proposed treatment program : Its length, components, expected prognosis including when treatment should be concluded and condition(s) stable. (6) Expected degree of recovery from the industrial condition. (7) Probability of returning to regular work or modified work and an estimated return to work date .	If the injured/ill worker had been seen by the consulting doctor within the past three years for the same condition, the consultation will be considered a follow-up office visit, not consultation. A copy of the consultation report must be submitted to both the attending doctor and the department/insurer.

<i>Report</i>	<i>Due/Needed by Insurer</i>	<i>What Information Should Be Included In the Report?</i>	<i>Special Notes</i>
		(8) Probability , if any, of permanent partial disability resulting from the industrial condition. (9) A doctor's estimate of physical capacities should be included if the worker has not returned to work. (10) Reports of necessary, reasonable x-ray and laboratory studies to establish or confirm diagnosis when indicated.	
Supplemental Medical Report (form)	As soon as possible following request by the department/insurer.	See form	Payable only to the attending doctor upon request of the department/insurer.
Attending Doctor Review of IME Report (form) Purpose: Obtain the attending doctor's opinion about the accuracy of the diagnoses and information provided based on the IME.	As soon as possible following request by the department/insurer.	Agreement or disagreement with IME findings. If you disagree, provide objective/subjective findings to support your opinion.	Payable only to the attending doctor upon request of the department/insurer.
Loss of Earning Power (form) Purpose: Certify the loss of earning power is due to the industrial injury/occupational disease.	As soon as possible after receipt of the form.	See form	Payable only to the AP.
Application to Reopen Claim Due to Worsening of Condition (form) Purpose: Document worsening of the accepted condition and need to reopen claim for additional treatment.	Immediately following identification of worsening after a claim has been closed for sixty days. Crime Victims: Following identification of worsening after a claim has been closed for ninety days.	See form	Only MD, DO, DC, ND, DPM, DDS, and OD may sign and be paid for completion of this form.

What documentation is required for initial and follow-up visits?

Legible copies of office or progress notes are required for the initial and all follow-up visits.

What documentation are ancillary providers required to submit to the insurer?

Ancillary providers are required to submit the following documentation to the department or self-insurer:

Provider	Chart Notes	Reports
Audiology	X	X
Biofeedback	X	X
Dietician		X
Drug & Alcohol Treatment	X	X
Free Standing Surgery	X	X
Free Standing Emergency Room	X	X
Head Injury Program	X	X

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.060, 00-01-190, § 296-20-06101, filed 12/22/99, effective 1/24/00. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 93-16-072, § 296-20-06101, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030, 86-06-032 (Order 86-19), § 296-20-06101, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3), 81-24-041 (Order 81-28), § 296-20-06101, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-20-06101, filed 12/23/80, effective 3/1/81; Order 74-39, § 296-20-06101, filed 11/22/74, effective 1/1/75.]

WAC 296-20-065 Transfer of doctors. All transfers from one doctor to another must be approved by the department or self-insurer. Normally transfers will be allowed only after the worker has been under the care of the attending doctor for sufficient time for the doctor to: Complete necessary diagnostic studies, establish an appropriate treatment regimen, and evaluate the efficacy of the therapeutic program.

Under RCW 51.36.010 the worker is entitled to free choice of treating doctor. Except as provided under subsections (1) through (7) of this section, no reasonable request for transfer will be denied. The worker must be advised when and why a transfer is denied.

When a transfer is approved, the new attending doctor must be provided with a copy of the worker's treatment record by the previous attending doctor. X-rays in the possession of the previous attending doctor must be immediately forwarded to the new attending doctor for his or her retention as long as the worker remains under his or her care. Copies of x-rays and other records may be provided in lieu of originals.

The department or self-insurer reserves the right to require a worker to select another doctor or specialist for treatment, under the following conditions:

(1) When more conveniently located doctors, qualified to provide the necessary treatment, are available.

(2) When the attending doctor fails to cooperate in observation and compliance with the department rules.

(3) In time loss cases where reasonable progress towards return to work is not shown.

(4) Cases requiring specialized treatment, which the attending doctor is not qualified to render, or is outside the scope of the attending doctor's license to practice.

[Title 296 WAC—p. 510]

(5) Where the department or self-insurer finds a transfer of doctor to be appropriate and has requested the worker to transfer in accordance with this rule, the department or self-insurer may select a new attending doctor if the worker unreasonably refuses or delays in selecting another attending doctor.

(6) In cases where the attending doctor is not qualified to treat each of several accepted conditions. This does not preclude concurrent care where indicated. See WAC 296-20-071.

(7) No transfer will be approved to a consultant or special examiner without the approval of the attending doctor and the worker.

Transfers will be authorized for the foregoing reasons or where the department or self-insurer in its discretion finds that a transfer is in the best interest of returning the worker to a productive role in society.

When a worker's care is transferred to another doctor each doctor must submit a separate bill to the department or self-insurer for their portion of the care. Payment will be made at rates determined by department policy.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 93-16-072, § 296-20-065, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030, 86-06-032 (Order 86-19), § 296-20-065, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3), 81-01-100 (Order 80-29), § 296-20-065, filed 12/23/80, effective 3/1/81; Order 77-27, § 296-20-065, filed 11/30/77, effective 1/1/78; Emergency Order 77-26, § 296-20-065, filed 12/1/77; Emergency Order 77-16, § 296-20-065, filed 9/6/77; Order 75-39, § 296-20-065, filed 11/28/75, effective 1/1/76; Order 74-7, § 296-20-065, filed 1/30/74; Order 71-6, § 296-20-065, filed 6/1/71; Order 70-12, § 296-20-065, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-20-065, filed 11/27/68, effective 1/1/69.]

WAC 296-20-071 Concurrent treatment. In some cases, treatment by more than one practitioner may be allowed. The department or self-insurer will consider concurrent treatment when the accepted conditions resulting from the injury involve more than one system and/or require specialty or multidisciplinary care.

When requesting consideration for concurrent treatment, the attending doctor must provide the department or self-insurer with the following:

The name, address, discipline, and specialty of all other practitioners assisting in the treatment of the injured worker and an outline of their responsibility in the case and an estimate of the length of the period of concurrent care.

When concurrent treatment is allowed, the department or self-insurer will recognize one primary attending doctor, who will be responsible for prescribing all medications; directing the over-all treatment program; providing copies of all reports and other data received from the involved practitioners and, in time loss cases, providing adequate certification evidence of the worker's inability to work.

The department or self-insurer will approve concurrent care on a case-by-case basis. Consideration will be given to all factors in the case including availability of providers in the worker's geographic location.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030, 86-06-032 (Order 86-19), § 296-20-071, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3), 81-01-100 (Order 80-29), § 296-20-071, filed 12/23/80, effective 3/1/81; Order 75-39, § 296-20-071,

WAC 296-20-075 Hospitalization. (1) Hospitalization will be paid for proper and necessary medical treatment of the accepted condition(s). The department may develop and implement utilization management criteria which will be used to review inpatient hospital admissions. Reimbursement for hospitalization is limited to proper and necessary care for an accepted condition. Failure to comply with these criteria may result in delayed or reduced reimbursement to the provider as allowed under chapter 51.48 RCW. Ward or semi-private accommodations will be paid, unless the worker's condition requires special care.

(2) Discharge from the hospital shall be at the earliest date possible consistent with proper health care. If transfer to a convalescent center or nursing home is indicated, prior arrangements should be made with the department or self-insurer. See WAC 296-20-091 for further information. The department may designate those diagnostic and surgical procedures which will be reimbursed only if performed in an outpatient setting. When procedures so designated must be performed in an inpatient setting for reasons of medical necessity, prior authorization must be obtained.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 90-04-057, § 296-20-075, filed 2/2/90, effective 3/5/90; 87-24-050 (Order 87-23), § 296-20-075, filed 11/30/87, effective 1/1/88; 86-20-074 (Order 86-36), § 296-20-075, filed 10/1/86, effective 11/1/86; 86-06-032 (Order 86-19), § 296-20-075, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-01-100 (Order 80-29), § 296-20-075, filed 12/23/80, effective 3/1/81; Order 71-6, § 296-20-075, filed 6/1/71; Order 70-12, § 296-20-075, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-20-075, filed 11/27/68, effective 1/1/69.]

WAC 296-20-081 Unrelated concurrent nonemergent surgery. Elective surgery for an unrelated condition is not normally permitted during hospitalization for an industrial condition. Under some circumstances unrelated elective surgery may be permitted through prior agreement and approval by the department provided the unrelated surgery is not more extensive than the procedure for the industrial condition. The requesting doctor must submit a written request and identify which services are needed due to the industrial injury and which are needed due to unrelated conditions, along with an estimate of what effect, if any, the unrelated surgery will have on the accepted conditions and recovery time from surgery.

[Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-01-100 (Order 80-29), § 296-20-081, filed 12/23/80, effective 3/1/81; Order 70-12, § 296-20-081, filed 12/1/70, effective 1/1/71. Formerly WAC 296-20-095.]

WAC 296-20-091 Home nursing or attendant care. A worker temporarily totally disabled or permanently totally disabled may either temporarily or permanently require home nursing or attendant care. A physician's request and prior department authorization are required for home nursing and attendant care.

Home health, hospice, and home care agency providers shall be licensed.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-05-041, § 296-20-091, filed 2/13/92, effective 3/15/92. Statutory Authority: RCW

WAC 296-20-097 Reopenings. When a claim has been closed by the department or self-insurer by written order and notice for sixty days, submission of a formal "application to reopen claim for aggravation of condition" form (LI 210-79) is necessary. The department or self-insurer is responsible for customary charges for examinations, diagnostic studies, and determining whether or not time-loss is payable regardless of the final action taken on the reopening application. Reopening applications should be submitted immediately. When reopening is granted, the department or self-insurer can pay time loss and treatment benefits only for a period not to exceed sixty days *prior* to date the application is received by the department or self-insurer. Necessary treatment should not be deferred pending a department or self-insurer adjudication decision. However, should reopening be denied treatment costs become the financial responsibility of the worker.

[Statutory Authority: RCW 51.32.190 and 51.32.210. 90-22-054, § 296-20-097, filed 11/5/90, effective 12/6/90. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-24-041 (Order 81-28), § 296-20-097, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-20-097, filed 12/23/80, effective 3/1/81; Order 71-6, § 296-20-097, filed 6/1/71; Order 70-12, § 296-20-095 (codified as WAC 296-20-097), filed 12/1/70, effective 1/1/71. Formerly WAC 296-20-090.]

WAC 296-20-09701 Request for reconsideration. On occasion, a claim may be closed prematurely or in error or other adjudication action may be taken, which may seem inappropriate to the doctor or injured worker. When this occurs the attending doctor should submit immediately in writing his request for reconsideration of the adjudication action, supported by an outline of:

- (1) The claimant's current condition.
- (2) The treatment program being received.
- (3) The prognosis of when stabilization will occur.

All requests for reconsideration must be received by the department or self-insurer within sixty days from date of the order and notice of closure. Request for reconsideration of other department or self-insurer orders or actions must be made in writing by either the doctor or the injured worker within sixty days of the date of the action or order.

[Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-01-100 (Order 80-29), § 296-20-09701, filed 12/23/80, effective 3/1/81.]

WAC 296-20-100 Eye glasses and refractions. The department or self-insurer will be responsible one time for replacement of glasses or contact lenses only to the extent of the cost of restoring damaged item to its condition at the time of the accident. This benefit applies only if the worker was wearing the glasses or contact lens when the industrial accident occurred.

If glasses are repairable and a worker determines that he/she prefers a replacement, the department or self-insurer is responsible only for the cost of the repairs and the worker is responsible for the difference between repair and replacement costs.

[Title 296 WAC—p. 511]

Refraction to replace a broken or lost lens is only payable when it is substantiated that the prescription was not available from the broken lens or any other source. If the prescription is available, and the patient needs a new refraction, he is responsible for the costs of such exam.

If a refractive error is the result of the industrial injury or occupational disease condition, refraction and glasses or contact lenses will be authorized and paid by the department or self-insurer.

When broken or lost glasses or contact lenses are the only injury or condition suffered, the doctor's portion of the report of accident can be completed by an optometrist or other vendor furnishing the replacement. A report of accident must be received by the department or self-insurer in order to adjudicate the claim.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 86-06-032 (Order 86-19), § 296-20-100, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3), 81-01-100 (Order 80-29), § 296-20-100, filed 12/23/80, effective 3/1/81; Order 71-6, § 296-20-100, filed 6/1/71; Order 70-12, § 296-20-100, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-20-100, filed 11/27/68, effective 1/1/69.]

WAC 296-20-110 Dental. Only dentists, oral surgeons or dental specialists licensed in the state in which they practice are eligible to treat workers entitled to benefits under the industrial insurance law.

If only a dental injury is involved, the doctor's portion of the report of accident must be completed by the dentist to whom the worker first reports. See WAC 296-20-025 for further information.

If the accident report has been submitted by another doctor, the dentist's report should be made by letter. In addition to the information required under WAC 296-20-025, the dentist should outline the extent of the dental injury and the treatment program necessary to repair damage due to the injury. Dental x-rays should be retained by the attending dentist for a period of not less than ten years. The department or self-insurer does not require submission of the actual films except upon specific request.

The department or self-insurer is responsible only for repair or replacement of teeth injured or dentures broken as a result of an industrial accident. Any dental work needed due to underlying conditions unrelated to the industrial injury is the responsibility of the worker. It is the responsibility of the dentist to advise the worker accordingly.

In cases presenting complication, controversy, or diagnostic or therapeutic problems, consultation by another dentist may be requested to support authorization for restorative repairs.

Bills covering the cost of dentures should be submitted for the denture only and should not include the cost for subsequent relining. If relining becomes necessary, authorization for relining must be obtained in advance from the department or self-insurer.

Bills must be submitted to the department or self-insurer within one year from the date the service is rendered. Bills must itemize the service rendered, including the current HCPCS Level II codes, the materials used and the injured tooth number(s). See WAC 296-20-125 and department policy for further billing rules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 94-14-044, § 296-20-110, filed 6/29/94, effective 7/30/94; 93-16-072, § 296-20-110, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 86-06-032 (Order 86-19), § 296-20-110, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3), 81-01-100 (Order 80-29), § 296-20-110, filed 12/23/80, effective 3/1/81; Order 70-12, § 296-20-110, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-20-110, filed 11/27/68, effective 1/1/69.]

WAC 296-20-1101 Hearing aids and masking devices. The department or self-insurer is responsible for replacement or repair of hearing aids damaged or lost due to an industrial accident only to the extent of restoring the damaged item to its condition at time of the accident. If the hearing aid is repairable and the worker determines he prefers replacement, the department or self-insurer is responsible only to the extent of the cost to repair the original and the worker is responsible for the difference between repair and replacement costs.

When the department or self-insurer has accepted a hearing loss condition either as a result of industrial injury or occupational exposure, the department or self-insurer will furnish a hearing aid (hearing aids when bilateral loss is present) when prescribed or recommended by a physician.

The department or self-insurer will bear the cost of repairs or replacement due to normal wear and the cost of battery replacement for the life of the hearing aid.

In cases of accepted tinnitus, the department or self-insurer may provide masking devices under the same provisions as outlined for hearing aids due to hearing loss.

Provision of masking devices and hearing aids require prior authorization.

[Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3), 81-01-100 (Order 80-29), § 296-20-1101, filed 12/23/80, effective 3/1/81.]

WAC 296-20-1102 Special equipment rental and purchase prosthetic and orthotics equipment. The department or self-insurer will authorize and pay rental fee for equipment or devices if the need for the equipment will be for a short period of treatment during the acute phase of condition. Rental extending beyond sixty days requires prior authorization. If the equipment will be needed on long term basis, the department or self-insurer will consider purchase of the equipment or device. The department's or self-insurer's decision to rent or purchase an item of medical equipment will be based on a comparison of the projected rental costs of the item with its purchase price. An authorized representative of the department or self-insurer will decide whether to rent or purchase certain items, provided they are appropriate and medically necessary for treatment of the worker's accepted industrial condition. Decisions to rent or purchase items will be based on the following information:

- (1) Purchase price of the item.
- (2) Monthly rental fee.
- (3) The prescribing doctor's estimate of how long the item will be needed.

The prescribing doctor must obtain prior authorization from the department or self-insurer, for rental or purchase of special equipment or devices. Also, all equipment (rentals and purchases), prosthetics, and orthotics must be billed

using the appropriate codes, and billing forms, as determined by the medical aid rules and fee schedules.

The department or self-insurer will authorize and pay for prosthetics and orthotics as needed by the worker and substantiated by attending doctor. If such items are furnished by the attending doctor, the department or self-insurer will reimburse the doctor his cost for the item. See chapter 296-20 WAC (including WAC 296-20-124) and the fee schedules for information regarding replacement of such items on closed claims.

The department or self-insurer will repair or replace originally provided damaged, broken, or worn-out prosthetics, orthotics, or special equipment devices upon documentation and substantiation from the attending doctor.

Provision of such equipment requires prior authorization.

THE GRAVITY GUIDING SYSTEM, GRAVITY LUMBAR REDUCTION DEVICE, BACKSWING AND OTHER INVERSION TRACTION EQUIPMENT MAY ONLY BE USED IN A SUPERVISED SETTING. RENTAL OR PURCHASE FOR HOME USE WILL NOT BE ALLOWED NOR PAID BY THE DEPARTMENT OR SELF-INSURER.

EQUIPMENT NOT REQUIRING PRIOR AUTHORIZATION INCLUDES CRUTCHES, CERVICAL COLLARS, LUMBAR AND RIB BELTS, AND OTHER COMMONLY USED ORTHOTICS OF MINIMAL COST.

PERSONAL APPLIANCES SUCH AS VIBRATORS, HEATING PADS, HOME FURNISHINGS, HOT TUBS, WATERBEDS, EXERCISE BIKES, EXERCISE EQUIPMENT, JACUZZIES, PILLOWS, CASSETTE TAPES, EDUCATIONAL MATERIALS OR BOOKS, AND OTHER SIMILAR ITEMS WILL NOT BE AUTHORIZED OR PAID.

In no case will the department or self-insurer pay for rental fees once the purchase price of the rented item has been reached.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-20-1102, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-22-052 (Order 87-22), § 296-20-1102, filed 11/2/87; 86-06-032 (Order 86-19), § 296-20-1102, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-20-1102, filed 8/2/83. WAC 296-20-1103 Travel expense. The department or self-insurer will reimburse travel expense incurred by workers for the following reasons: (1) Examinations at department's or self-insurer's request; (2) vocational services at department's or self-insurer's request; (3) treatment at department rehabilitation center; (4) fitting of prosthetic device; and (5) upon *prior authorization* for treatment when worker must travel more than ten miles one-way from the worker's home to the nearest point of adequate treatment. Travel expense is *not* payable when adequate treatment is available within ten miles of injured worker's home, yet the injured worker prefers to report to an attending doctor outside the worker's home area.

Travel expenses will be reimbursed at the current department rate.

Receipts are required for all expenses except parking expenses under ten dollars.

Claims for reimbursement of travel expenses must be received by the department or self-insurer within one year

(2001 Ed.)

after the date expenses are incurred. Refer to WAC 296-20-125 and to department policy for additional rules.

WAC 296-20-120 Procedures not listed in this schedule. Procedures not specifically listed will be given values comparable to those of the listed procedures of closest similarity. Refer to chapter 296-20 WAC (including the definition section) and the fee schedules for required billing documentation.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-20-120, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-01-100 (Order 80-29), § 296-20-120, filed 12/23/80, effective 3/1/81; Order 71-6, § 296-20-120, filed 6/1/71; Order 70-12, § 296-20-120, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-20-120, filed 11/27/68, effective 1/1/69.]

WAC 296-20-12050 Special programs. (1) The department or self-insurer may from time to time enter into special agreements for services provided by, or under the direction of, licensed providers authorized to bill the department. Special agreements are for services other than routine services covered under the fee schedule, and may include multi-disciplinary or inter-disciplinary programs such as pain management, work hardening, and physical conditioning.

(2) The department shall establish payment rates for special agreements, and may establish outcome criteria, measures of effectiveness, minimum staffing levels, certification requirements, special reporting requirements and such other criteria as will ensure injured workers receive good quality and effective services at a prudent cost.

(3) Special agreements shall be purchased at the discretion of the department or self-insurer. The department may terminate special programs from the industrial insurance program upon thirty days notice to the provider.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-24-050 (Order 87-23), § 296-20-12050, filed 11/30/87, effective 1/1/88.]

WAC 296-20-121 X-rays. Recognizing the greatest need for access to x-rays lies with the attending doctor, the department or self-insurer requires only submission of x-ray findings and does not require submission of the actual films except upon specific request when needed for purposes of permanent disability rating, other administrative or legal decisions, or in litigation cases. The department or self-insurer requires the attending doctor retain x-rays for a period of not less than ten years. In transfer cases, the x-rays in the possession of the current attending doctor must be made available to the new attending doctor.

When requesting consultation, the attending doctor should make any x-rays in his possession available to the consultant.

When a special exam has been arranged for the worker by the department or self-insurer, the worker's existing x-rays

should be provided to the special examiner. The worker may carry such x-rays to the exam.

When the doctor's office is closed because of death, retirement or leaving the state, arrangements must be made with the department or self-insurer regarding custody of x-rays to insure availability on request. When submitting billing for x-ray service, a copy of the x-ray findings is required. No payment will be made for excessive or unnecessary x-rays. No payment will be made on closed or rejected claims, except under conditions outlined in WAC 296-20-124.

Prior authorization is required for x-rays subsequent to the initial study. Repeat or serial radiology examinations may be performed only upon adequate clinical justification to confirm changes in the condition(s) accepted. The subjective complaints and the objective findings substantiating the repeat study must be submitted by the practitioner in the request for authorization to the department or self-insurer.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 86-06-032 (Order 86-19), § 296-20-121, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-24-041 (Order 81-28), § 296-20-121, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-20-121, filed 12/23/80, effective 3/1/81; Order 77-27, § 296-20-121, filed 11/30/77, effective 1/1/78; Emergency Order 77-26, § 296-20-121, filed 12/1/77; Emergency Order 77-16, § 296-20-121, filed 9/6/77; Order 74-39, § 296-20-121, filed 11/22/74, effective 1/1/75; Order 74-7, § 296-20-121, filed 1/30/74.]

WAC 296-20-124 Rejected and closed claims. (1) No payment will be made for treatment or medication on rejected claims or for services rendered after the date of claim closure.

(2) When the department or self-insurer has denied responsibility for an alleged injury or industrial condition the only services which will be paid are those which were carried out at the specific request of the department or the self-insurer and/or those examination or diagnostic services which served as a basis for the adjudication decision. Following the date of the order and notice of claim closure, the department or self-insurer will be responsible only for those services specifically requested or those examinations, and diagnostic services necessary to complete and file a reopening application.

(3) Periodic medical surveillance examinations will be covered by the department or self-insurer for workers with closed claims for asbestos-related disease, to include chest x-ray abnormalities, without the necessity of filing a reopening application when such examinations are recommended by accepted medical protocol.

(4) Replacement of prosthetics, orthotics, and special equipment can be provided on closed claims after prior authorization. See WAC 296-20-1102 for further information.

[Statutory Authority: Chapters 34.04 [34.05], 51.04, 51.32 and 51.36 RCW. 90-04-007, § 296-20-124, filed 1/26/90, effective 2/26/90. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-01-100 (Order 80-29), § 296-20-124, filed 12/23/80, effective 3/1/81; Order 76-34, § 296-20-124, filed 11/24/76, effective 1/1/77.]

WAC 296-20-12401 Provider application process. (1) **How can a provider obtain a provider account number from the department?** In order to receive a provider account number from the department, a provider must:

- Complete a provider application;

[Title 296 WAC—p. 514]

- Sign a provider agreement;
- Provide a copy of any practice or other license held;
- Complete, sign and return a Form W-9; and
- Meet the department's provider eligibility requirements as cited in the department's rules.

Notes: A provider account number is required to receive payment from the department, but is not a guarantee of payment for services. Self-insured employers may have additional requirements for provider status.

(2) Provider account status definitions.

- Active - account information is current and provider is eligible to receive payment.
- Inactive - account is not eligible to receive payment based on action by the department or at provider request. These accounts can be reactivated.
- Terminated - account is not eligible to receive payment based on action by the department or at provider request. These accounts can not be reactivated.

(3) When may the department inactivate a provider account? The department may inactivate a provider account when:

- There has been no billing activity on the account for eighteen months; or
- The provider requests inactivation; or
- Provider communications are returned due to address changes; or
- The department changes the provider application or application procedures; or
- Provider does not comply with department request to update information.

(4) When may the department terminate a provider account? The department may terminate a provider account when:

- The provider is found ineligible to treat per department rules; or
- The provider requests termination; or
- The provider dies or is no longer in active business status.

(5) How can a provider reactivate a provider account? To reactivate a provider account, the provider may call or write the department. The department may require the provider to update the provider application and/or agreement or complete other needed forms prior to reactivation. Account reactivation is subject to department review.

If a provider account has been terminated, a new provider application will be required.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.36.080. 00-09-078, § 296-20-12401, filed 4/18/00, effective 7/1/00.]

WAC 296-20-125 Billing procedures. All services rendered must be in accordance with the medical aid rules, fee schedules, and department policy. The department or self-insurer may reject bills for services rendered in violation of these rules. Workers may not be billed for services rendered in violation of these rules.

(1) Bills must be itemized on department or self-insurer forms or other forms which have been approved by the department or self-insurer. Bills may also be transmitted electronically using department file format specifications. Pro-

viders using any of the electronic transfer options must follow department instructions for electronic billing. Physicians, osteopaths, advanced registered nurse practitioners, chiropractors, naturopaths, podiatrists, psychologists, and registered physical therapists use the national standard HCFA 1500 health insurance claim form with the bar code placed 2/10 of an inch from the top and 1 1/2 inches from the left side of the form. Hospitals use the UB-92 billing form for institution services and the national standard HCFA 1500 health insurance claim form with the bar code placed 2/10 of an inch from the top and 1 1/2 inches from the left side of the form for professional services. Hospitals should refer to chapter 296-23A WAC for billing rules pertaining to institution, or facilities, charges. Pharmacies use the department's statement for pharmacy services. Dentists, equipment suppliers, transportation services, vocational services, and massage therapists use the department's statement for miscellaneous services. When billing the department for home health services, providers should use the "statement for home nursing services." Providers may obtain billing forms from the department's local service locations.

(2) Bills must specify the date and type of service, the appropriate procedure code, the condition treated, and the charges for each service.

(3) Bills submitted to the department must be completed to include the following:

- (a) Worker's name and address;
- (b) Worker's claim number;
- (c) Date of injury;
- (d) Referring doctor's name and L & I provider account number;
- (e) Area of body treated, including ICD-9-CM code(s), identification of right or left, as appropriate;
- (f) Dates of service;
- (g) Place of service;
- (h) Type of service;
- (i) Appropriate procedure code, hospital revenue code, or national drug code;
- (j) Description of service;
- (k) Charge;
- (l) Units of service;
- (m) Tooth number(s);
- (n) Total bill charge;
- (o) The name and address of the practitioner rendering the services and the provider account number assigned by the department;
- (p) Date of billing;
- (q) Submission of supporting documentation required under subsection (6) of this section.

(4) Responsibility for the completeness and accuracy of the description of services and charges billed rests with the practitioner rendering the service, regardless of who actually completes the bill form;

(5) Vendors are urged to bill on a monthly basis. Bills must be received within one year of the date of service to be considered for payment.

(6) The following supporting documentation is required when billing for services:

- (a) Laboratory and pathology reports;
- (b) X-ray findings;

- (c) Operative reports;
 - (d) Office notes;
 - (e) Consultation reports;
 - (f) Special diagnostic study reports;
 - (g) For BR procedures - see chapter 296-20 WAC for requirements; and
 - (h) Special or closing exam reports.
- (7) The claim number must be placed on each bill and on each page of reports and other correspondence in the upper right-hand corner.

(8) The following considerations apply to rebills.

(a) If you do not receive payment or notification from the department within one hundred twenty days, services may be rebilled.

(b) Rebills must be submitted for services denied if a claim is closed or rejected and subsequently reopened or allowed. In these instances, the rebills must be received within one year of the date the final order is issued which subsequently reopens or allows the claim.

(c) Rebills should be identical to the original bill: Same charges, codes, and billing date.

(d) In cases where vendors rebill, please indicate "REBILL" on the bill.

(9) The department or self-insurer will adjust payment of charges when appropriate. The department or self-insurer must provide the health care provider or supplier with a written explanation as to why a billing or line item of a bill was adjusted at the time the adjustment is made. A written explanation is not required if the adjustment was made solely to conform with the maximum allowable fees as set by the department. Any inquiries regarding adjustment of charges must be received in the required format within ninety days from the date of payment to be considered. Refer to the medical aid rules for additional information.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-20-125, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-01-100 (Order 80-29), § 296-20-125, filed 12/23/80, effective 3/1/81; Order 77-27, § 296-20-125, filed 11/30/77, effective 1/1/78; Emergency Order 77-26, § 296-20-125, filed 12/1/77; Emergency Order 77-16, § 296-20-125, filed 9/6/77; Order 75-39, § 296-20-125, filed 11/28/75, effective 1/1/76; Order 74-39, § 296-20-125, filed 11/22/74, effective 1/1/75; Order 74-7, § 296-20-125, filed 1/30/74; Order 71-6, § 296-20-125, filed 6/1/71; Order 70-12, § 296-20-125, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-20-125, filed 11/27/68, effective 1/1/69.]

WAC 296-20-12501 Physician assistant billing procedure. Billing for physician assistant services can be made only by the supervising physician at ninety percent of the value listed in the fee schedules. Payment will be made directly to the supervising physician. All physician assistant services must be identified by using physician assistant modifiers, as listed in chapter 296-21 WAC and the fee schedules.

(1) Bills must be itemized on department or self-insurer forms, as the case may be, specifying: The date, type of service and the charges for each service.

(2) The bill form must be completed in detail to include the claim number. While the name of the physician's assistant

rendering service must be included on the bill, all bills must be submitted under the supervising physician account number. Bills will be accepted when signed by other than the practitioner rendering services. When bills are prepared by someone else, the responsibility for the completeness and accuracy of the description of services and charges rests with the supervising physician.

(3) For a bill to be considered for payment, it must be received in the department or by the self-insurer within one year from the date each specific treatment and/or service was rendered or performed. Whenever possible, bills should be submitted monthly.

(4) Bills cannot be paid for services rendered while a claim is closed.

(5) The department or self-insurer may deny payment of bills for services rendered in violation of the medical aid rules or department policy. Workers may not be billed for services rendered in violation of these rules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-20-12501, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-20-12501, filed 11/30/79, effective 1/1/80.]

WAC 296-20-132 Determination of conversion factor adjustments. Adjustments to the conversion factors for providers and services covered by the fee schedules and by department policy may occur annually following prior public hearings.

Such adjustments will be based on the estimated increase/decrease in the state's average wage for the current year and on other factors as determined by department policy. The following calendar year's estimate, of the average state wage will be adjusted to reflect the actual increase/decrease in the state's average wage for the preceding year.

The total percentage change for any one calendar year for the conversion factors may not exceed the total of the estimated increase/decrease in the current year, plus or minus the actual adjustment for the preceding calendar year.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 96-10-086, § 296-20-132, filed 5/1/96, effective 7/1/96. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-20-132, filed 8/1/93, effective 9/1/93. WAC 296-20-135 Conversion factors. (1) Conversion factors are used to calculate payment levels for services reimbursed under the Washington resource based relative value scale (RBRVS), and for anesthesia services payable with base and time units.

(2) **Washington RBRVS** services have a conversion factor of \$47.07. The fee schedules list the reimbursement levels for these services.

(3) **Anesthesia services** that are paid with base and time units have a conversion factor of \$2.60 per minute, which is equivalent to \$39.00 per 15 minutes. The base units and payment policies can be found in the fee schedules.

WAC 296-20-170 Pharmacy—Acceptance of rules and fees. Acceptance and filling of a prescription for a worker entitled to benefits under the industrial insurance law, constitutes acceptance of the department's rules and fees. When there is questionable eligibility, (i.e., no claim number, prescription is for medication other than usually prescribed for industrial injury; or pharmacist has reason to believe claim is closed or rejected), the pharmacist may require the worker to pay for the prescription. In these cases, the pharmacist must furnish the worker with a signed receipt and a non-negotiable copy of the prescription including national drug code and quantity or a completed department pharmacy bill form signed in the appropriate areas verifying worker has paid for the prescribed item(s) in order for the worker to bill the department or self-insurer for reimbursement. The worker may not be charged more than the amount allowable by the department or self-insurer. The worker must submit such reimbursement request within one year of the date of service.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-20-170, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 86-06-032 (Order 86-19), § 296-20-170, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 80-18-033 (Order 80-24), § 296-20-170, filed 12/1/80, effective 1/1/81; Order 76-34, § 296-20-170, filed 11/24/76, effective 1/1/77.]

WAC 296-20-17001 Allowance and payment for medication. The department or self-insurer will pay for medications or supplies dispensed for the treatment of conditions resulting from an industrial injury and/or conditions which are retarding the recovery from the industrial injury, for which the department or self-insurer has accepted temporary responsibility.

Approved generics are to be substituted for brand name pharmaceuticals in all cases unless the worker's condition will not tolerate a generic preparation and the prescribing physician indicates no substitution is permitted. A list of approved generics and their base cost will be published periodically by the department.

Items not normally paid include: Syringes, injectables, heating pads, vibrators, personal appliances, oral nutritional supplements, anorexiant, and medications normally pre-

scribed for systemic conditions. These items may be authorized to certain individuals in unusual circumstances; prior approval from the department or self-insurer is mandatory.

Rental or purchase of medical equipment must be prior authorized by the department or self-insurer.

No bills will be paid for medication dispensed after the date of order and notice of claim closure, on an accepted claim; nor, on rejected claims; nor for conditions unrelated to the industrial condition.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030, 86-06-032 (Order 86-19), § 296-20-17001, filed 2/28/86, effective 4/1/86; 83-24-016 (Order 83-35), § 296-20-17001, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3), 80-18-033 (Order 80-24), § 296-20-17001, filed 12/1/80, effective 1/1/81; Order 76-34, § 296-20-17001, filed 11/24/76, effective 1/1/77.]

WAC 296-20-17002 Billing. In addition to the billing procedures described in WAC 296-20-125 and in department policy the current national drug code number for each prescribed drug, followed by the average wholesale price to the pharmacy must be entered on each prescription. The department's statement for pharmacy services must be used when billing the department for NDC medications and supplies. The department's statement for miscellaneous services must be used when billing the department for non-NDC medications and supplies. In addition, the claimant's name, claim number, date of injury, prescribing doctor's name and department of labor and industries provider number; and the assigned department provider number for the pharmacy must be on the bill. Bills for medication not containing this information will be returned to the pharmacy. Billing must be made within one year of the date of service. It is requested bills be presented on a monthly basis.

When billing the department for compound prescriptions, providers must use the "Statement for Compound Prescriptions."

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 93-16-072, § 296-20-17002, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030, 86-06-032 (Order 86-19), § 296-20-17002, filed 2/28/86, effective 4/1/86; 83-24-016 (Order 83-35), § 296-20-17002, filed 11/30/83, effective 1/1/84. WAC 296-20-200 General information. (1) The department of labor and industries has promulgated the following rules and categories to provide a comprehensive system of classifying unspecified permanent partial disabilities in the proportion they reasonably bear to total bodily impairment. The department's objectives are to reduce litigation and establish more certainty and uniformity in the rating of unspecified permanent partial disabilities pursuant to RCW 51.32.080(2).

(2) The following system of rules and categories directs the examiner's attention to the actual conditions found and establishes a uniform system for conducting rating examinations and reporting findings and conclusions in accord with broadly accepted medical principles.

The evaluation of bodily impairment must be made by experts authorized to perform rating examinations. This system recognizes and provides for this. After conducting the

examination, the examiner will choose the appropriate category for each bodily area or system involved in the particular claim and include this information in the report. The examiner will, therefore, in addition to describing the worker's condition in the report, submit the conclusions as to the relative severity of the impairment by giving it in terms of a defined condition rather than a personal opinion as to a percentage figure. In the final section of this system of categories and rules are some rules for determining disabilities and the classification of disabilities in bodily impairment is listed for each category. These last provisions are for the department's administrative use in acting upon the expert opinions which have been submitted to it.

(3) In preparing this system, the department has complied with its duty to enact rules classifying unspecified disabilities in light of statutory references to nationally recognized standards or guides for determining various bodily impairments. Accordingly, the department has obtained and acted upon sound established medical opinion in thus classifying unspecified disabilities in the reasonable proportion they bear to total bodily impairment. In framing descriptive language of the categories and in assigning a percentage of disability, careful consideration has been given to nationally recognized medical standards and guides. Both are matters calling for the use of expert medical knowledge. For this reason, the meaning given the words used in this set of categories and accompanying rules, unless the text or context clearly indicates the contrary, is the meaning attached to the words in normal medical usage.

(4) The categories describe levels of physical and mental impairment. Impairment is anatomic or functional abnormality or loss of function after maximum medical rehabilitation has been achieved. This is the meaning of "impairment" as the word is used in the guides mentioned above. This standard applies to all persons equally, regardless of factors other than loss of physical or mental function. Impairment is evaluated without reference to the nature of injury or the treatment therefore, but is based on the functional loss due to the injury or occupational disease. The categories have been framed to include conditions in other bodily areas which derive from the primary impairment. The categories also include the presence of pain, tenderness and other complaints. Workers with comparable loss of function thus receive comparable awards.

(5) These rules and categories (WAC 296-20-200 through 296-20-690) shall only be applicable to compensable injuries occurring on or after the effective date of these rules and categories.

(6) These rules and categories (WAC 296-20-200 through 296-20-690) shall be applicable only to cases of permanent partial disability. They have no applicability to determinations of permanent total disability.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015, 97-09-036, § 296-20-200, filed 4/14/97 effective 5/15/97. Statutory Authority: RCW 51.04.020(4) and 51.04.030, 91-07-008, § 296-20-200, filed 3/8/91, effective 5/1/91; Order 74-32, § 296-20-200, filed 6/21/74, effective 10/1/74.]

WAC 296-20-210 General rules. These general rules establish a uniform standard for conducting examinations and

submitting reports of examinations. These general rules must be followed by doctors who make examinations or evaluations of permanent bodily impairment.

(1) Examinations for the determination of the extent of permanent bodily impairment shall be made only by doctors currently licensed in medicine and surgery (including osteopathic and podiatric) or dentistry, and department-approved chiropractors. A chiropractic evaluation of permanent impairment may be performed only where the worker has been clinically managed by a chiropractor.

(2) Whenever an examination is made, the examiner shall record, among other pertinent information, the complete history as obtained from the person examined; the complete history of past injuries and diseases; the complaints; the age, sex, height and weight; x-ray findings and diagnostic tests made or reviewed in connection with the examination; the diagnosis; and all findings, including negative findings, in all bodily areas and systems where a detailed review of systems reveals past or present complaints. The examiner shall record his conclusions as to: Whether the residuals of the injury are fixed; whether treatment is required for the injury and, if so, any treatment shall be described. If the examiner finds residuals of the injury are fixed, he shall record the appropriate category or categories of permanent impairment for diagnoses attributable to the industrial injury or occupational disease. Conditions or impairments not attributable to the industrial injury or occupational disease shall be described and diagnosed in the report, with a description of how they affect the person examined and the appropriate category of permanent impairment where possible.

(3) The examiner shall not assign a percentage figure for permanent bodily impairment described in the categories established herein.

(4) Reports shall specify diagnoses and medical terms as listed in current procedural terminology (CPT), current medical information and terminology (CMIT), international classification of diseases adopted (ICDA), or standard nomenclature of disease, except when otherwise specified in these rules.

(5) Workers who are scheduled for disability examinations are allowed to bring with them an accompanying person to be present during the physical examination. The accompanying person cannot be compensated in any manner, except that language interpreters may be necessary for the communication process and may be reimbursed for interpretative services.

The department may designate those conditions under which the accompanying person is allowed to be present during the disability examination process.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015. 97-09-036, § 296-20-210, filed 4/14/97 effective 5/15/97. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 88-14-012 (Order 88-09), § 296-20-210, filed 6/24/88; Order 74-32, § 296-20-210, filed 6/21/74, effective 10/1/74.]

WAC 296-20-220 Special rules for evaluation of permanent bodily impairment. (1) Evaluations of permanent bodily impairment using categories require uniformity in procedure and terminology. The following rules have been

enacted to produce this uniformity and shall apply to all evaluations of permanent impairment of an unspecified nature.

(a) Gradations of relative severity shall be expressed by the words "minimal," "mild," "moderate" and "marked" in an ascending scale. "Minimal" shall describe deviations from normal responses which are not medically significant. "Mild," "moderate" and "marked" shall describe ranges of medically significant deviations from normal responses. "Mild" shall describe the least severe third. "Moderate" shall describe the middle third. "Marked" shall describe the most severe third.

(b) "Permanent" describes those conditions which are fixed, lasting and stable, and from which within the limits of medical probability, further recovery is not expected.

(c) "Impairment" means a loss of physical or mental function.

(d) "Total bodily impairment," as used in these rules, is the loss of physical or mental function which is essentially complete short of death.

(e) The examiner shall not assign a percentage figure for permanent bodily impairment described in the categories established herein.

(f) The method of evaluating impairment levels is by selection of the appropriate level of impairment. These descriptive levels are called "categories." Assessments of the level of impairment are to be made by comparing the condition of the injured workman with the conditions described in the categories and selecting the most appropriate category.

These rules and categories for various bodily areas and systems provide a comprehensive system for the measurement of disabling conditions which are not already provided for in the list of specified permanent partial disabilities in RCW 51.32.080(1). Disabilities resulting from loss of central visual acuity, loss of an eye by enucleation, loss of hearing, amputation or loss of function of the extremities will continue to be evaluated as elsewhere provided in RCW 51.32.080.

The categories have been classified in percentages in reasonable proportion to total bodily impairment for the purpose of determining the proper award. Provision has been made for correctly weighing the overall impairment due to particular injuries or occupational disease in cases in which there are preexisting impairments.

(g) The categories of the various bodily areas and systems are listed in the order of increasing impairment except as otherwise specified. Where several categories are given for the evaluation of the extent of permanent bodily impairment, the impairments in the higher numbered categories, unless otherwise specified, include the impairments in the lesser numbered categories. No category for a condition due to an injury shall be selected unless that condition is permanent as defined by these rules.

The examiner shall select the one category which most accurately indicates the overall degree of permanent impairment unless otherwise instructed. Where there is language in more than one category which may appear applicable, the category which most accurately reflects the overall impairment shall be selected.

The categories include appropriate subjective complaints in an ascending scale in keeping with the severity of

objective findings, thus a higher or lower category is not to be selected purely on the basis of unusually great or minor complaints.

(h) When the examination discloses a preexisting permanent bodily impairment in the area of the injury, the examiner shall report the findings and any category of impairment appropriate to the worker's condition prior to the industrial injury in addition to the findings and the categories appropriate to the worker's condition after the injury.

(i) Objective physical or clinical findings are those findings on examination which are independent of voluntary action and can be seen, felt, or consistently measured by examiners.

(j) Subjective complaints or symptoms are those perceived only by the senses and feelings of the person being examined which cannot be independently proved or established.

(k) Muscle spasm as used in these rules is an involuntary contraction of a muscle or group of muscles of a more than momentary nature.

(l) An involuntary action is one performed independently of the will.

(m) These special rules for evaluation of permanent bodily impairment shall apply to all examinations for the evaluation of impairment, in accordance with RCW 51.32.080, for the body areas or systems covered by or enumerated in WAC 296-20-230 through 296-20-660.

(n) The rules for evaluation of each body area or system are an integral part of the categories for that body area or system.

(o) In cases of injury or occupational disease of bodily areas and/or systems which are not included in these categories or rules and which do not involve loss of hearing, loss of central visual acuity, loss of an eye by enucleation or loss of the extremities or use thereof, examiners shall determine the impairment of such bodily areas and/or systems in terms of percentage of total bodily impairment.

(p) The words used in the categories of impairments, in the rules for evaluation of specific impairments, the general rules, and the special rules shall be deemed, unless the context indicates the contrary, to have their general and accepted medical meanings.

(q) The rating of impairment due to total joint replacement shall be in accordance with the limitation of motion guidelines as set forth in the "Guides to the Evaluation of Permanent Impairment" of American Medical Association, with department of labor and industries acknowledgement of responsibility for failure of prostheses beyond the seven year limitation.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015, 97-09-036, § 296-20-220, filed 4/14/97 effective 5/15/97. Statutory Authority: RCW 51.04.030 and 51.16.035, 79-12-086 (Order 79-18), § 296-20-220, filed 11/30/79, effective 1/1/80; Order 74-32, § 296-20-220, filed 6/21/74, effective 10/1/74.]

WAC 296-20-230 Cervical and cervico-dorsal impairments. (1) Rules for evaluation of cervical and cervico-dorsal impairments are as follows:

(a) Muscle spasm or involuntary guarding, bony or fibrous fusion, any arthritic condition, internal fixation

(2001 Ed.)

devices or other physical finding shall be considered, in selecting the appropriate category, only insofar as productive of cervical or cervico-dorsal impairment.

(b) Gradations of clinical findings of cervico-dorsal impairments in terms of "mild," "moderate" or "marked" shall be based on objective medical tests.

(c) Categories 2, 3, 4 and 5 include the presence of complaints of whatever degree in the neck or extremities.

(d) Bladder and/or bowel sphincter impairments deriving from cervical and cervico-dorsal impairment shall be evaluated separately.

(e) Neck as used in these rules and categories shall include the cervical and adjacent areas.

[Order 74-32, § 296-20-230, filed 6/21/74, effective 10/1/74.]

WAC 296-20-240 Categories of permanent cervical and cervico-dorsal impairments. (1) No objective clinical findings are present. Subjective complaints may be present or absent.

(2) Mild cervico-dorsal impairment, with objective clinical findings of such impairment with neck rigidity substantiated by x-ray findings of loss of anterior curve, without significant objective neurological findings.

This and subsequent categories include the presence or absence of pain locally and/or radiating into an extremity or extremities. This and subsequent categories also include the presence or absence of reflex and/or sensory losses. This and subsequent categories also include objectively demonstrable herniation of a cervical intervertebral disc with or without discectomy and/or fusion, if present.

(3) Mild cervico-dorsal impairment, with objective clinical findings of such impairment, with neck rigidity substantiated by x-ray findings of loss of anterior curve, narrowed intervertebral disc spaces and/or osteoarthritic lipping of vertebral margins, with significant objective findings of mild nerve root involvement.

This and subsequent categories include the presence or absence of any other neurological deficits not otherwise specified in these categories with the exception of bladder and/or bowel sphincter impairments.

(4) Moderate cervico-dorsal impairment, with objective clinical findings of such impairment, with neck rigidity substantiated by x-ray findings of loss of anterior curve, narrowed intervertebral disc spaces and/or osteoarthritic lipping of vertebral margins, with objective findings of moderate nerve root involvement with weakness and numbness in one or both upper extremities.

(5) Marked cervico-dorsal impairment, with marked objective clinical findings of such impairment, with neck rigidity substantiated by x-ray findings of loss of anterior curve, narrowed intervertebral disc spaces and/or osteoarthritic lipping of vertebral margins, with objective findings of marked nerve root involvement with weakness and numbness in one or both upper extremities.

[Order 74-32, § 296-20-240, filed 6/21/74, effective 10/1/74.]

WAC 296-20-250 Impairments of the dorsal area. (1) Rules for evaluation of permanent dorsal area impairments are as follows:

[Title 296 WAC—p. 519]

(a) Muscle spasm or involuntary guarding, bony or fibrous fusion, any arthritic condition, internal fixation devices or other physical finding shall be considered, in selection of the appropriate category, only insofar as productive of dorsal area impairment.

(b) Gradations of clinical findings of dorsal impairments in terms of "mild," "moderate" or "marked" shall be based on objective medical tests.

(c) Categories 2 and 3 include the presence of complaints of whatever degree.

(d) Bladder and/or bowel sphincter impairments deriving from impairments of the dorsal area shall be evaluated separately.

(e) Impairments which also involve the cervical or lumbar areas shall be evaluated only under the cervical and cervico-dorsal or dorsolumbar and lumbosacral categories.

[Order 74-32, § 296-20-250, filed 6/21/74, effective 10/1/74.]

WAC 296-20-260 Categories of permanent dorsal area impairments. (1) No objective clinical findings are present. Subjective complaints may be present or absent.

(2) Mild or moderate dorsal impairment, with objective clinical findings of such impairment, without significant objective neurological findings, with or without x-ray changes of narrowed intervertebral disc spaces and/or osteoarthritic lipping of intervertebral margins. Includes the presence or absence of reflex and/or sensory losses.

This and the subsequent category include the presence or absence of pain, locally or radiating from the dorsal area.

(3) Marked dorsal impairment, with marked objective clinical findings, with marked x-ray findings of narrowed intervertebral disc spaces and/or osteoarthritic lipping of vertebral margins, with significant objective neurological deficits, complaints and/or findings, deriving from dorsal impairment.

[Order 74-32, § 296-20-260, filed 6/21/74, effective 10/1/74.]

WAC 296-20-270 Dorso-lumbar and lumbosacral impairments. (1) Rules for evaluation of permanent dorso-lumbar and lumbosacral impairments are as follows:

(a) Muscle spasm or involuntary guarding, bony or fibrous fusion, any arthritic condition, internal fixation devices or other physical finding shall be considered, in selecting the appropriate category, only insofar as productive of low back impairment.

(b) Gradations of clinical findings of low back impairments in terms of "mild," "moderate" or "marked" shall be based on objective medical tests.

(c) All of the low back categories include the presence of complaints of whatever degree.

(d) Any and all neurological deficits, complaints, and/or findings in other bodily areas or systems which are the result of dorso-lumbar and lumbosacral impairments, except for objectively demonstrated bladder and/or bowel sphincter impairments, shall be evaluated by the descriptions contained in the categories of dorso-lumbar and lumbosacral impairments.

[Title 296 WAC—p. 520]

(e) Bladder and/or bowel sphincter impairments deriving from dorso-lumbar and lumbosacral impairments shall be evaluated separately.

(f) Low back as used in these rules and categories includes the lumbar and adjacent areas.

[Order 74-32, § 296-20-270, filed 6/21/74, effective 10/1/74.]

WAC 296-20-280 Categories of permanent dorso-lumbar and lumbosacral impairments. (1) No objective clinical findings. Subjective complaints and/or sensory losses may be present or absent.

(2) Mild low back impairment, with mild intermittent objective clinical findings of such impairment but no significant x-ray findings and no significant objective motor loss. Subjective complaints and/or sensory losses may be present.

(3) Mild low back impairment, with mild continuous or moderate intermittent objective clinical findings of such impairment but without significant x-ray findings or significant objective motor loss.

This and subsequent categories include: The presence or absence of reflex and/or sensory losses; the presence or absence of pain locally and/or radiating into an extremity or extremities; the presence or absence of a laminectomy or discectomy with normally expected residuals.

(4) Mild low back impairment, with mild continuous or moderate intermittent objective clinical findings of such impairment, with mild but significant x-ray findings and with mild but significant motor loss objectively demonstrated by atrophy and weakness of a specific muscle or muscle group.

This and subsequent categories include the presence or absence of a surgical fusion with normally expected residuals.

(5) Moderate low back impairment, with moderate continuous or marked intermittent objective clinical findings of such impairment, with moderate x-ray findings and with mild but significant motor loss objectively demonstrated by atrophy and weakness of a specific muscle or muscle group.

(6) Marked low back impairment, with marked intermittent objective clinical findings of such impairment, with moderate or marked x-ray findings and with moderate motor loss objectively demonstrated by atrophy and weakness of a specific muscle or muscle group.

(7) Marked low back impairment, with marked continuous objective clinical findings of such impairment, with marked x-ray findings and with marked motor loss objectively demonstrated by marked atrophy and weakness of a specific muscle or muscle group.

(8) Essentially total loss of low back functions, with marked x-ray findings and with marked motor loss objectively demonstrated by marked atrophy and weakness of a muscle group or groups.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030, 83-16-066 (Order 83-23), § 296-20-280, filed 8/2/83; Order 74-32, § 296-20-280, filed 6/21/74, effective 10/1/74.]

WAC 296-20-290 Impairments of the pelvis. (1) Rules for impairment of the pelvis:

(a) All of these categories include the presence of complaints of whatever degree.

(2001 Ed.)

(b) Categories 2, 5, 6 and 7 describe separate entities and more than one may be selected when appropriate. Category 9 includes the findings described in Category 3, and Category 8 includes the findings described in Category 4.

[Order 74-32, § 296-20-290, filed 6/21/74, effective 10/1/74.]

WAC 296-20-300 Categories of permanent impairments of the pelvis. (1) Healed pelvic fractures without displacement, without residuals; healed fractures with displacement without residuals, of: Single ramus, bilateral rami, ilium, innominate or coccyx; or healed fracture of single rami with displacement with deformity and residuals.

(2) Healed fractures with displacement with deformity and residuals of ilium.

(3) Healed fractures of symphysis pubis, without separation with displacement without residuals.

(4) Healed fractures of sacrum with displacement without residuals.

(5) Healed fracture of bilateral rami with displacement with deformity and residuals.

(6) Excision or nonunion of fractures of coccyx.

(7) Healed fractures of innominate, displaced one inch or more, with deformity and residuals.

(8) Healed fractures of sacrum extending into sacroiliac joint with deformity and residuals.

(9) Healed fractures of symphysis, displaced or separated, with deformity and residuals.

[Order 74-32, § 296-20-300, filed 6/21/74, effective 10/1/74.]

WAC 296-20-310 Convulsive neurological impairments. (1) Rules for evaluation of convulsive neurological impairments:

(a) The description of Categories 2, 3 and 4 include the presence of complaints of whatever degree.

[Order 74-32, § 296-20-310, filed 6/21/74, effective 10/1/74.]

WAC 296-20-320 Categories of permanent convulsive neurological impairments. (1) No electroencephalogram findings of convulsive neurological disorder. Subjective complaints may be present or absent.

(2) Electroencephalogram findings of convulsive neurological disorder, but on appropriate medication there are no seizures.

(3) Electroencephalogram findings of convulsive neurological disorder, and on appropriate medication there are each year either one through four major seizures or one through twelve minor seizures.

(4) Electroencephalogram findings of convulsive neurological disorder, and on appropriate medication there are each year either more than four major seizures or more than twelve minor seizures.

[Order 74-32, § 296-20-320, filed 6/21/74, effective 10/1/74.]

WAC 296-20-330 Impairments of mental health. (1) Rules for evaluation of permanent impairment of mental health:

(a) Mental illness means malfunction of the psychic apparatus that significantly interferes with ordinary living.

(2001 Ed.)

(b) Each person has a pattern of adjustment to life. The pattern of adjustment before the industrial injury or occupational disease serves as a base line for all assessments of whether there has been a permanent impairment due to the industrial injury or occupational disease.

(c) To determine the preinjury pattern of adjustment, all evaluations of mental health shall contain a complete preinjury history including, but not necessarily limited to: Family background and the relationships with parents or other nurturing figures; extent of education and reaction to it; military experience, if any; problems with civil authorities; any history of prolonged illness, and difficulty with recovery; any history of drug abuse or alcoholism; employment history, the extent of and reaction to responsibility, and relationships with others at work; capacity to make and retain friends; relationships with spouses and children; nature of daily activities, including recreation and hobbies; and lastly, some summary statement about the sources of the patient's self-esteem and sense of identity. Both strengths and vulnerabilities of the person shall be included.

(d) Differences in adjustment patterns before and after the industrial injury or occupational disease shall be described, and the report shall contain the examining physician's opinion as to whether any differences: (1) Are the result of the industrial injury or occupational disease and its sequelae, in the sense they would not have occurred had there not been the industrial injury or occupational disease; (2) are permanent or temporary; (3) are more than the normal, self-correcting and expectable response to the stress of the industrial injury or occupational disease; (4) constitute an impairment psychosocially or physiologically; and (5) are susceptible to treatment, and, if so, what kind. The presence of any unrelated or coincidental mental impairment shall always be mentioned.

(e) All reports of mental health evaluations shall use the diagnostic terminology listed in the *Diagnostic and Statistical Manual of Mental Disorders of the American Psychiatric Association*.

(f) No classification of impairment shall be made for complaints where the quality of daily life does not differ substantially from the preinjury pattern. A patient not currently employed may not engage in the same activities as when working, but the level and variety of his activities and zest for them shall distinguish the purely situational difference from cases of regression and withdrawal. In cases where some loss of use of body member is claimed, no category or impairment shall be assigned unless there are objective findings of physiologic regression or consistent evidence of altered adaptability.

(g) The physician shall identify the schizoid, antisocial, inadequate, sociopathic, passive, hysterical, paranoid, or dependent personality types. Patients with these longstanding character disorders may show problem behavior that seems more related to current stress than it is, sometimes unconsciously insinuating themselves into difficult situations of which they then complain. Emotional reactions to an injury and subsequent events must be carefully evaluated in these patients. It must be medically probable that such reactions are permanent before a category of impairment can be attributed

to the injury; temporary reactions or preexisting psychopathology must be differentiated.

[Order 74-32, § 296-20-330, filed 6/21/74, effective 10/1/74.]

WAC 296-20-340 Categories for evaluation of permanent impairments of mental health. (1) Nervousness, irritability, worry or lack of motivation following an injury and commensurate with it and/or other situational responses to injury that do not alter significantly the life adjustment of the patient may be present.

(2) Any and all permanent worsenings of preexisting personality traits or character disorders where aggravation of preexisting personality trait or character disorder is the major diagnosis; mild loss of insight, mildly deficient judgment, or rare difficulty in controlling behavior, anxiety with feelings of tension that occasionally limit activity; lack of energy or mild apathy with malaise; brief phobic reactions under usually avoidable conditions; mildly unusual and overly rigid responses that cause mild disturbance in personal or social adjustment; rare and usually self-limiting psycho-physiological reactions; episodic hysterical or conversion reactions with occasional self-limiting losses of physical functions; a history of misinterpreted conversations or events, which is not a preoccupation; is aware of being absentminded, forgetful, thinking slowly occasionally or recognizes some unusual thoughts; mild behavior deviations not particularly disturbing to others; shows mild over-activity or depression; personal appearance is mildly unkempt. Despite such features, productive activity is possible most of the time. If organicity is present, some difficulty may exist with orientation; language skills, comprehension, memory; judgment; capacity to make decisions; insight; or unusual social behavior; but the patient is able to carry out usual work day activities unassisted.

(3) Episodic loss of self-control with risk of causing damage to the community or self; moments of morbid apprehension; periodic depression that disturbs sleep and eating habits or causes loss of interest in usual daily activities but self-care is not a problem; fear-motivated behavior causing mild interference with daily life, frequent emotogenic organ dysfunctions requiring treatment; obsessive-compulsive reactions which limit usual activity; periodic losses of physical function from hysterical or conversion reactions; disturbed perception in that patient does not always distinguish daydreams from reality; recognizes his fantasies about power and money are unusual and tends to keep them secret; thought disturbances cause patient to fear the presence of serious mental trouble; deviant social behavior can be controlled on request; exhibits periodic lack of appropriate emotional control; mild disturbance from organic brain disease such that a few work day activities require supervision.

(4) Very poor judgment, marked apprehension with startle reactions, foreboding leading to indecision, fear of being alone and/or insomnia; some psychomotor retardation or suicidal preoccupation; fear-motivated behavior causing moderate interference with daily life; frequently recurrent and disruptive organ dysfunction with pathology of organ or tissues; obsessive-compulsive reactions causing inability to work with others or adapt; episodic losses of physical function from hysterical or conversion reactions lasting longer than several weeks; misperceptions including sense of persecution

or grandiosity which may cause domineering, irritable or suspicious behavior; thought disturbance causing memory loss that interferes with work or recreation; periods of confusion or vivid daydreams that cause withdrawal or reverie; deviations in social behavior which cause concern to others; lack of emotional control that is a nuisance to family and associates; moderate disturbance from organic brain disease such as to require a moderate amount of supervision and direction of work day activities.

(5) Marked apprehension so as to interfere with memory and concentration and/or to disturb markedly personal relationships; depression causing marked loss of interest in daily activities, loss of weight, unkempt appearance, marked psycho-motor retardation, suicidal preoccupation or attempts, or marked agitation as well as depression; marked phobic reactions with bizarre and disruptive behavior; psychophysiological reactions resulting in lasting organ or tissue damage; obsessive-compulsive reactions that preclude patient's usual activity; frequent or persistent loss of function from conversion or hysterical reactions with regressive tissue or organ change; defects in perception including frank illusions or hallucinations occupying much of the patient's time; behavior deviations so marked as to interfere seriously with the physical or mental well-being or activities of others; lack of emotional control including marked irritability or overactivity.

[Order 74-32, § 296-20-340, filed 6/21/74, effective 10/1/74.]

WAC 296-20-350 Cardiac impairments. (1) Rule for evaluation of permanent cardiac impairments:

(a) Classification of impairment using the following categories shall be based upon a carefully obtained history, thorough physical examination and the use of appropriate laboratory aids.

[Order 74-32, § 296-20-350, filed 6/21/74, effective 10/1/74.]

WAC 296-20-360 Categories of permanent cardiac impairments. (1) No objective findings are present. Subjective complaints may be present or absent.

(2) Objective findings of mild organic heart disease but no signs of congestive heart failure. No medically appropriate symptoms produced by prolonged exertion or intensive effort or marked emotional stress.

(3) Objective findings of mild organic heart disease but no signs of congestive heart failure. Medically appropriate symptoms produced by prolonged exertion or intensive effort, or marked emotional stress but not by usual daily activities.

(4) Objective findings of moderate organic heart disease but no signs of congestive heart failure. Medically appropriate symptoms produced by prolonged exertion or intensive effort or marked emotional stress but not by usual daily activities.

(5) Objective findings of marked organic heart disease with minimal signs of congestive heart failure with therapy. Medically appropriate symptoms produced by usual daily activities.

(6) Objective findings of marked organic heart disease with mild to moderate signs of congestive heart failure

despite therapy. Medically appropriate symptoms produced by usual daily activities.

[Order 74-32, § 296-20-360, filed 6/21/74, effective 10/1/74.]

WAC 296-20-370 Respiratory impairments. (1)

Rules for evaluation of permanent respiratory impairments:

(a) Definitions.

(i) "FEV1" means the forced expiratory volume in 1 second as measured by a spirometric test performed as described in the most current *American Thoracic Society Statement on Standardization of Spirometry*, and using equipment, methods of calibration, and techniques that meet American Thoracic Society (ATS) criteria including reproducibility. The measurement used must be taken from a spirogram which is technically acceptable and represents the patient's best effort. The measurement is to be expressed as both an absolute value and as a percentage of the predicted value. The predicted values are those listed in the most current edition of the *American Medical Association (AMA) Guidelines* for rating permanent respiratory impairment.

(ii) "FVC" means the forced vital capacity as measured by a spirometric test in accordance with criteria described in (a)(i) of this subsection.

(iii) "FEV1/FVC" is a ratio calculated based on the ATS Guides criteria as described in the most current *American Thoracic Society Statement on Standardization of Spirometry*.

(iv) "Significant improvement" means a fifteen percent or greater improvement in FEV1 (volume) after a post-bronchodilator pulmonary function test.

(v) "DLCO" means the diffusion capacity of carbon monoxide as measured by a test based on predicted values demonstrated to be appropriate to the techniques and equipment of the laboratory performing the test according to current ATS standards. DLCO may be considered for impairment rating only if accompanied by evidence of impaired gas exchange based on exercise testing.

(vi) "VO2 Max" means the directly measured oxygen consumption at maximum exercise capacity of an individual as measured by exercise testing and oxygen consumption expressed in ml/kilo/min corrected for lean bodyweight. Estimated values from treadmill or other exercise tests without direct measurement are not acceptable. The factor limiting the exercise must be identified.

(vii) "Preexisting impairment" shall be reported as described in WAC 296-20-220 (1)(h).

(viii) "Coexisting" is a disease or injury not due to or causally related to the work-related condition that impacts the overall respiratory disability.

(ix) "Apportionment" is an estimate of the degree of impairment due to the occupational injury/exposure when preexisting or coexisting conditions are present.

(x) "Dyspnea" is the subjective complaint of shortness of breath. Dyspnea alone must not be used to determine the level of respiratory impairment. Dyspnea unexplained by objective signs of impairment or spirometry requires more extensive testing (i.e., VO2 Max).

(xi) Copies of the *American Thoracic Society Statement on Standardization of Spirometry* and ATS standards for (2001 Ed.)

measuring D_{LCO} can be obtained by ordering *Pulmonary Function Testing* from The American Thoracic Society, 1740 Broadway, New York, NY 10019-4374, Attn: ATS Statements. Copies of this document are available for review in the section of the office of the medical director, department of labor and industries, Tumwater building.

These standards are also available through the following references: "American Thoracic Society Committee on Proficiency Standards for Pulmonary Function Laboratories: Standardization of spirometry-1987 update." *Am Rev Respir Dis* 1987; 136:1285-1298. "American Thoracic Society D_{LCO} Standardization Conference: Single breath carbon monoxide diffusing capacity (transfer factor): Recommendations for a standard technique." *Am Rev Respir Dis* 1987; 136:1299-1307.

(b) Evaluation procedures. Each report of examination must include the following, at a minimum:

(i) Identification data: Worker's name, claim number, gender, age, and race.

(ii) Detailed occupational history: Job titles of all jobs held since employment began. A detailed description of typical job duties, protective equipment worn, engineering controls present (e.g., ventilation) as well as the specific exposures and intensity (frequency and duration) of exposures. More detail is required for jobs involving potential exposure to known respiratory hazards.

(iii) History of the present illness: Chief complaint and description of all respiratory symptoms present (e.g., wheezing, cough, phlegm, chest pain, paroxysmal nocturnal dyspnea, dyspnea at rest and on exertion) as well as the approximate date of onset, and duration of each symptom, and aggravating and relieving factors.

(iv) Past medical history: Past history of childhood or adult respiratory illness, hay fever, asthma, bronchitis, chest injury, chest surgery, respiratory infections, cardiac problems, hospitalizations for chest or breathing problems and current medications.

(v) Lifestyle and environmental exposures: Descriptive history of exposures clinically related to respiratory disease including, but not limited to, tobacco use with type and years smoked. Use of wood as a primary heat source at home or hobbies that involve potential exposure to known respiratory tract hazards, and other environmental exposures.

(vi) Family history: Family history of respiratory or cardiac disease.

(vii) Physical examination findings: Vital signs including a measured height without shoes, weight, and blood pressure. Chest exam shall include a description of the shape, breathing, breath sounds, cardiac exam, and condition of extremities (e.g., cyanosis, clubbing, or edema).

(viii) Diagnostic tests: A chest x-ray shall be obtained in all cases. When available, the x-ray should be obtained using International Labor Organization (ILO) standard techniques and interpreted using the ILO classification system. The presence or absence of pleural thickening or interstitial abnormalities shall be noted. Pulmonary function reports including a description of equipment used, method of calibration, and the predicted values used. A hard copy of all pulmonary function tracings must be available for review. The report must con-

tain at a minimum FEV1 and FVC and a narrative summary of an interpretation of the test results and their validity.

(ix) The rating of respiratory impairment. The rating of respiratory impairment shall be based on the pulmonary function test most appropriate to the respiratory condition. A pre-bronchodilator and postbronchodilator test must be performed on and results reported for all patients with demonstrated airway obstruction. The largest FEV1 or FVC, on either the prebronchodilator or postbronchodilator trial must be used for rating the impairment. If the FEV1 and FEV1/FVC result in different categories of impairment, the value resulting in a higher category of impairment will be used.

(x) The rating of persisting variable respiratory impairment with abnormal baseline function. If resting FEV1 is "abnormal" (below eighty percent predicted) and shows significant bronchodilator improvement (a greater than or equal to fifteen percent improvement in FEV1) one category of impairment must be added to the given category rating, but only when the work-related disease being rated is obstructive in nature. If there is substantial variability from test to test (and good effort), the severity of impairment may be rated, using the best fit into the category system, as described in WAC 296-20-380.

(xi) The rating of persisting variable respiratory impairment with normal baseline spirometry. Variable respiratory impairment due to allergic or irritative disorder of the respiratory tract, such as bronchial asthma or reactive airway disease, caused or permanently aggravated by factors in the work place, shall be evaluated by detailed narrative report, including the casual relationship to work factors, a discussion of the relative importance of nonwork related cofactors, such as preexisting asthma, tobacco usage, or other personal habits, the need for regular medication to substantially improve or control the respiratory condition, and the prognosis. When tests of ventilatory function, done when the patient is in clinical steady state, are normal (one second forced expiratory volume eighty percent or greater of predicted), an appropriate provocative bronchial challenge test (i.e., methacholine or histamine) shall be done to demonstrate the presence of unusual respiratory sensitivity.

(xii) At the time of the rating, the patient shall be off theophylline for at least twenty-four hours, beta agonists for at least twelve hours, and oral and/or inhaled steroids or cromolyn for at least two weeks, in order to determine severity of air-flow obstruction, unattenuated by therapy. If withdrawal of medication would produce a hazardous or life threatening condition, then the impairment cannot be rated at this time, and the physician must provide a statement describing the patient's condition and the effect of medication withdrawal.

(xiii) The method for standardizing provocative bronchial challenge testing, using either histamine or methacholine, shall be used. The test drug may be given either by continuous tidal volume inhalation of known concentrations, using an updraft nebulizer, for two minutes, or by the technique of intermittent deep breaths of increasing test drug strengths either via a Rosenthal dosimeter or updraft nebulizer, and the results shall be expressed either as the mg/ml concentration of test drug, or the cumulative breath units (1

breath of a 1 mg/ml solution equals one breath unit) which result in a prompt and sustained (at least three minute) fall in the FEV1, greater than twenty percent below baseline FEV1. Medications that can blunt the effect of bronchoprovocation testing shall be withheld prior to testing. Once testing is complete, the results shall be expressed in terms of normal, mild, moderate, or marked bronchial reactivity, as described in WAC 296-20-385.

If multiple bronchoprovocative inhalation challenge tests have been done, the examining physician shall select the one category (normal, mild, moderate, or marked) which most accurately indicates the overall degree of permanent impairment at the time of rating.

If the results of serial pulmonary function testing are extremely variable and the clinical course and use of medication also indicate major impairment, then the physician must make a statement in the formulation and medical evaluation containing, at a minimum: Diagnosis and whether work related or nonwork related; nature and frequency of treatment; stability of condition and work limitations; impairment.

(xiv) Further treatment needs. In all cases, the examining physician shall indicate whether further treatment is indicated and the nature, type, frequency, and duration of treatment recommended.

[Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.32.080(2). 94-03-073, § 296-20-370, filed 1/17/94, effective 3/1/94. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 82-24-050 (Order 82-39), § 296-20-370, filed 11/29/82, effective 1/1/83; Order 74-32, § 296-20-370, filed 6/21/74, effective 10/1/74.]

WAC 296-20-380 Categories of permanent respiratory impairments. (1) The FVC and FEV1 are greater than or equal to eighty percent of predicted normal for the person's age, gender, and height. The FEV1/FVC ratio is greater than or equal to .70. Subjective complaints may be present or absent. If exercise testing is done, the maximum oxygen consumption is greater than 25cc/kilo/min.

(2) The FVC or FEV1 is from seventy to seventy-nine percent of predicted, and if obstruction is present, the FEV1/FVC ratio is .60 - .69. If exercise testing is done, the maximum oxygen consumption is 22.5-25cc/kilo/min.

(3) The FVC or FEV1 is from sixty to sixty-nine percent of predicted, and if obstruction is present, the FEV1/FVC ratio is .60 - .69. If exercise testing is done, the maximum oxygen consumption is 20-22.4cc/kilo/min.

(4) The FVC or FEV1 is from fifty-one to fifty-nine percent of predicted. The FEV1/FVC ratio is .51 - .59. If exercise testing is done, the maximum oxygen consumption is 17.5-19.9cc/kilo/min.

(5) FVC from fifty-one to fifty-nine percent of predicted, or the FEV1 from forty-one to fifty percent of predicted, and if obstruction is present, the FEV1/FVC ratio is .41 - .50. If exercise testing is done, the maximum oxygen consumption is 15-17.4cc/kilo/min.

(6) The FVC is equal to or less than fifty percent of predicted or the FEV1 is equal to or less than forty percent of predicted. The FEV1/FVC ratio is equal to or less than .40. If exercise testing is done, the maximum oxygen consumption is less than 15cc/kilo/min.

[Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.32.080(2). 94-03-073, § 296-20-380, filed 1/17/94, effective 3/1/94. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 82-24-050 (Order 82-39), § 296-20-380, filed 11/29/82, effective 1/1/83; Order 74-32, § 296-20-380, filed 6/21/74, effective 10/1/74.]

WAC 296-20-385 Categories of persisting variable respiratory impairment with normal baseline spirometry.

(1) "Normal" bronchial reactivity is demonstrated by an insignificant (less than twenty percent) fall from baseline FEV1 at test doses of histamine or methacholine, up to 16 mg/ml (continuous inhalation method) or up to 160 breath units (cumulative, repeated deep breath technique).

(2) "Mild" bronchial hyperactivity (BHR) is a significant (equal to or greater than twenty percent) fall in the FEV1 at test doses of 2.1-16 mg/ml, or 21-160 breath units.

(3) "Moderate" BHR is a significant (equal to or greater than twenty percent) fall in the FEV1 at test doses of 0.26-2 mg/ml, or 2.6-20 breath units.

(4) "Marked" BHR is a significant (equal to or greater than twenty percent) fall in the FEV1 at test doses equal to or less than .25 mg/ml, or 2.5 breath units.

[Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.32.080(2). 94-03-073, § 296-20-385, filed 1/17/94, effective 3/1/94.]

WAC 296-20-390 Air passage impairments. (1) Rule for evaluation of permanent air passage impairments:

(a) Categories 2, 3, 4 and 5 include the presence of complaints of whatever degree.

[Order 74-32, § 296-20-390, filed 6/21/74, effective 10/1/74.]

WAC 296-20-400 Categories of permanent air passage impairments. (1) No objective findings are present. Subjective complaints may be present or absent.

(2) Objective findings of one or more of the following air passage defects: Partial obstruction of oropharynx, laryngopharynx, larynx, trachea, bronchi, complete obstruction of nasopharynx or of nasal passages bilaterally. No dyspnea caused by the air passage defect even on activity requiring prolonged exertion or intensive effort.

(3) Objective findings of one or more of the following air passage defects: Partial obstruction of oropharynx, laryngopharynx, larynx, trachea, bronchi, complete obstruction of nasopharynx or of nasal passages bilaterally, dyspnea caused by the air passage defect produced only by prolonged exertion or intensive effort.

(4) Objective findings of one or more of the following air passage defects: Partial obstruction of oropharynx, laryngopharynx, larynx, trachea, bronchi, complete obstruction of nasopharynx or of nasal passages bilaterally, with permanent tracheostomy or stoma, dyspnea caused by the air passage defect produced only by prolonged exertion or intensive effort.

(5) Objective findings of one or more of the following air passage defects: Partial obstruction of oropharynx, laryngopharynx, larynx, trachea, bronchi, with or without permanent tracheostomy or stoma if dyspnea is produced by moderate exertion.

(6) Objective findings of one or more of the following air passage defects: Partial obstruction of oropharynx, larynx,

(2001 Ed.)

gopharynx, larynx, trachea, bronchi, with or without permanent tracheostomy or stoma if dyspnea is produced by mild exertion.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 83-16-066 (Order 83-23), § 296-20-400, filed 8/2/83; Order 74-32, § 296-20-400, filed 6/21/74, effective 10/1/74.]

WAC 296-20-410 Nasal septum impairments. (1) Rules for evaluation of permanent air passage impairments due to nasal septum perforation.

(a) These categories, if appropriate, are to be used in addition to the categories of permanent air passage impairment.

(b) Categories 1 and 2 include complaints of whatever degree.

[Order 74-32, § 296-20-410, filed 6/21/74, effective 10/1/74.]

WAC 296-20-420 Categories of permanent air passage impairment due to nasal septum perforations. (1) Perforation or perforations posterior to the cartilaginous septum.

(2) Perforation or perforations through or anterior to the cartilaginous septum.

[Order 74-32, § 296-20-420, filed 6/21/74, effective 10/1/74.]

WAC 296-20-430 Loss of taste and smell. (1) Rule for evaluation of permanent loss of taste and smell.

(a) If the person being examined can detect any odor or taste, even though it cannot be named, no category shall be assigned.

[Order 74-32, § 296-20-430, filed 6/21/74, effective 10/1/74.]

WAC 296-20-440 Categories of permanent loss of taste and smell. (1) Loss of sense of taste.

(2) Loss of sense of smell.

[Order 74-32, § 296-20-440, filed 6/21/74, effective 10/1/74.]

WAC 296-20-450 Speech impairments. (1) Rules for evaluation of permanent speech impairments.

(a) The physician making an examination for evaluation of permanent speech impairment should have normal hearing and the examination should be conducted in a reasonably quiet office which approximates the noise level conditions of everyday living.

(b) Selection of the appropriate category of permanent speech impairment shall be based on direct observation of the speech of the person being examined, including, but not limited to: Response to interview, oral reading, and counting aloud. The observation shall be made with the physician about eight feet from the person being examined both when he faces the physician and with his back to the physician.

[Order 74-32, § 296-20-450, filed 6/21/74, effective 10/1/74.]

WAC 296-20-460 Categories of permanent speech impairments. (1) No objective findings of significant speech impairment are present. Subjective complaints may be present or absent.

(2) Can produce speech of sufficient audibility, intelligibility and functional efficiency for most everyday needs, although this may require effort and occasionally exceed capacity; listeners may occasionally ask for repetition and it may be difficult to produce some elements of speech, and there may be slow speaking and hesitation.

(3) Can produce speech of sufficient audibility, intelligibility and functional efficiency for many everyday needs, is usually heard under average conditions but may have difficulty in automobiles, busses, trains, or enclosed areas; can give name, address, and be understood by a stranger, but may have numerous inaccuracies and have difficulty articulating; speech may be interrupted, hesitant or slow.

(4) Can produce speech of sufficient audibility, intelligibility and functional efficiency for some everyday needs such as close conversation, conversation with family and friends, but has considerable difficulty in noisy places; voice tires rapidly and tends to become inaudible in a few seconds, strangers may find patient difficult to understand; patient may be asked to repeat often, and often can only sustain consecutive speech for brief periods.

(5) Can produce speech of sufficient audibility, intelligibility and functional efficiency for few everyday needs; can barely be heard by a close listener or over the telephone; may be able to whisper audibly but has no voice; can produce some speech elements; may have approximation of a few words such as names of family members which are, however, unintelligible out of context; cannot maintain uninterrupted speech flow, speech is labored, and its rate is impractically slow.

(6) Is unable to produce speech of sufficient audibility, intelligibility and functional efficiency for any everyday needs.

[Order 74-32, § 296-20-460, filed 6/21/74, effective 10/1/74.]

WAC 296-20-470 Skin impairments. (1) Rules for evaluation of permanent skin impairments.

(a) Evaluation of permanent impairment of the skin shall be based upon actual loss of function and cosmetic factors shall not be considered.

(b) Categories 2, 3, 4, 5 and 6 include the presence of complaints of whatever degree.

[Order 74-32, § 296-20-470, filed 6/21/74, effective 10/1/74.]

WAC 296-20-480 Categories of permanent skin impairments. (1) Objective findings of skin disorder may be present or absent but there is no or minimal limitation in daily activities. Subjective complaints may be present or absent.

(2) Objective findings of skin disorder are present and there is discomfort and minimal limitation in the performance of daily activities.

(3) Objective findings of skin disorder are present and there is limitation in some daily activities, including avoidance of and protective measures against certain chemical or physical agents. Intermittent symptomatic treatment is required.

(4) Objective findings of skin disorder are present and there is limitation in many daily activities, including avoidance of and protective measures against certain chemical or

physical agents. Continuous symptomatic treatment is required.

(5) Objective findings of skin disorder are present and there is limitation in most daily activities, including avoidance of and protective measures against certain chemical or physical agents. Continuous symptomatic treatment is required.

(6) Objective findings of skin disorder are present and there is limitation in all daily activities, including avoidance of and protective measures against certain chemical or physical agents. Continuous symptomatic treatment is required.

[Order 74-32, § 296-20-480, filed 6/21/74, effective 10/1/74.]

WAC 296-20-490 Impairment of the upper digestive tract, stomach, esophagus or pancreas. (1) Rule for evaluation of permanent impairments of the upper digestive tract, stomach, esophagus or pancreas.

(a) Categories 2, 3, 4 and 5 include complaints of whatever degree.

[Order 74-32, § 296-20-490, filed 6/21/74, effective 10/1/74.]

WAC 296-20-500 Categories of permanent impairments of the upper digestive tract, stomach, esophagus or pancreas. (1) No objective findings are present. Subjective complaints may be present or absent.

(2) There are objective findings of digestive tract impairment but no anatomic loss or alteration, continuous treatment is not required and weight can be maintained at the medically appropriate level.

(3) There are objective findings of digestive tract impairment, or there is anatomic loss or alteration. Dietary restrictions and drugs control symptoms, signs and/or nutritional state, and weight can be maintained at at least 90 percent of medically appropriate level.

(4) There are objective findings of digestive tract impairment, or there is anatomic loss or alteration. Dietary restrictions and drugs do not completely control symptoms, signs and/or nutritional state. Weight can be maintained at 80-90 percent of medically appropriate level.

(5) There are objective findings of digestive tract impairment, or there is anatomic loss or alteration. Dietary restrictions and drugs do not control symptoms, signs and/or nutritional state. Weight cannot be maintained as high as 80 percent of medically appropriate level.

[Order 74-32, § 296-20-500, filed 6/21/74, effective 10/1/74.]

WAC 296-20-510 Lower digestive tract impairments. (1) Rule for evaluation of permanent lower digestive tract impairments.

(a) Categories 2, 3 and 4 include the presence of complaints of whatever degree.

[Order 74-32, § 296-20-510, filed 6/21/74, effective 10/1/74.]

WAC 296-20-520 Categories of permanent lower digestive tract impairments. (1) No objective findings of impairment of lower digestive tract. Subjective complaints may be present or absent.

(2) The objective findings of lower digestive tract impairment are infrequent and of brief duration, and there is limitation of activities, but special diet or medication is not required, and there are neither systemic manifestations nor impairment of nutrition.

(3) There are objective findings of lower digestive tract impairment or anatomic loss or alteration and mild gastrointestinal symptoms with occasional disturbance of bowel function, accompanied by moderate pain and minimal restriction of diet; mild symptomatic therapy may be necessary; no impairment of nutrition.

(4) There are moderate to marked intermittent bowel disturbances with continual or periodic pain; there is restriction of activities and diet during exacerbations, there are constitutional manifestations such as fever, anemia or weight loss. Includes but is not limited to any permanent ileostomy or colostomy.

[Order 74-32, § 296-20-520, filed 6/21/74, effective 10/1/74.]

WAC 296-20-530 Impairment of anal function. (1) Rule for evaluation of permanent impairment of anal function.

(a) Categories 2, 3 and 4 include the presence of complaints of whatever degree.

[Order 74-32, § 296-20-530, filed 6/21/74, effective 10/1/74.]

WAC 296-20-540 Categories of permanent impairments of anal function. (1) No objective findings of impairment of anal function. Subjective complaints may be present or absent.

(2) There are objective findings of mild organic disease, anatomic loss or alteration with loss of anal function and mild incontinence involving gas and/or liquid stool.

(3) There are objective findings of moderate anal disease, anatomic loss or alteration with loss of anal function and moderate incontinence requiring continual care.

(4) There are objective findings of marked anal disease, anatomic loss, alteration and/or complete fecal incontinence.

[Order 74-32, § 296-20-540, filed 6/21/74, effective 10/1/74.]

WAC 296-20-550 Liver and biliary tract impairments. (1) Rule for evaluation of permanent liver and biliary tract impairments.

(a) Categories 2, 3, 4 and 5 include complaints of whatever degree.

[Order 74-32, § 296-20-550, filed 6/21/74, effective 10/1/74.]

WAC 296-20-560 Categories of permanent liver and biliary tract impairments. (1) There are no objective findings of impairment of the liver or biliary tract. Subjective complaints may be present or absent.

(2) There are objective findings on biochemical studies of minimal impairment of liver function with or without symptoms, or there are occasional episodes of loss of function of the biliary tract, but nutrition and strength are good.

(3) There are objective findings on biochemical studies of mild impairment of liver function without symptoms, or there is recurrent biliary tract impairment, but no ascites,

(2001 Ed.)

jaundice or bleeding esophageal varices and nutrition and strength are good.

(4) There are objective findings on biochemical studies of moderate impairment of liver function with jaundice, ascites, bleeding esophageal varices or gastric varices and nutrition and strength may be affected; or there is irreparable obstruction of the common bile duct with recurrent cholangitis.

(5) There are objective findings on biochemical studies of marked impairment of liver function and nutritional state is poor; or persistent jaundice, bleeding esophageal varices or gastric varices.

[Order 74-32, § 296-20-560, filed 6/21/74, effective 10/1/74.]

WAC 296-20-570 Impairments of the spleen, loss of one kidney, and surgical removal of the bladder with urinary diversion. (1) Rule for evaluation of permanent impairments of the spleen, loss of one kidney, and surgical removal of bladder with urinary diversion.

(a) Categories 1, 2 and 3 include complaints of whatever degree.

[Order 74-32, § 296-20-570, filed 6/21/74, effective 10/1/74.]

WAC 296-20-580 Categories of permanent impairment of the spleen, loss of one kidney, and surgical removal of bladder with urinary diversion. (1) Loss of spleen by splenectomy after age eight.

(2) Loss of one kidney by surgery or complete loss of function of one kidney.

(3) Surgical removal of bladder with urinary diversion.

[Order 74-32, § 296-20-580, filed 6/21/74, effective 10/1/74.]

WAC 296-20-590 Impairment of upper urinary tract. (1) Rule for evaluation of permanent impairment of upper urinary tract.

(a) Categories 2, 3, 4 and 5 include the presence of complaints of whatever nature.

[Order 74-32, § 296-20-590, filed 6/21/74, effective 10/1/74.]

WAC 296-20-600 Categories of permanent impairments of upper urinary tract. (1) No objective findings of impairment of upper urinary tract. Subjective complaints may be present or absent.

(2) Loss of upper urinary function as evidenced by creatinine clearance of 75 to 90 liters/24 hr. (52 to 62.5 ml/min) and PSP excretion of 15 percent to 20 percent in 15 minutes; or if there are intermittent objective findings of upper urinary tract disease or dysfunction not requiring continuous treatment or surveillance.

(3) Loss of upper urinary tract function as evidenced by creatinine clearance of 60 to 75 liters/24 hr. (42 to 52 ml/min) and PSP excretion of 10 percent to 15 percent in 15 minutes; or although function is greater than these levels, there are objective findings of upper urinary tract disease or dysfunction requiring continuous surveillance and frequent symptomatic treatment.

(4) Loss of upper urinary tract function as evidenced by creatinine clearance of 40 to 60 liters/24 hr. (28 to 42 ml/min)

and PSP excretion of 5 percent to 10 percent in 15 minutes; or although function is greater than these levels, there are objective findings of mild or moderate upper urinary tract disease or dysfunction which can be only partially controlled.

(5) Loss of upper urinary tract function as evidenced by creatinine clearance below 40 liters/24 hr. (28 ml/min) and PSP excretion below 5 percent in 15 minutes; or although function is greater than these levels there are objective findings of severe upper urinary tract disease or dysfunction which persists despite continuous treatment.

[Order 74-32, § 296-20-600, filed 6/21/74, effective 10/1/74.]

WAC 296-20-610 Additional permanent impairments of upper urinary tract due to surgical diversion. (1) Rule for evaluation of additional permanent impairments of upper urinary tract due to surgical diversion.

(a) These categories include the presence of complaints of whatever degree.

[Order 74-32, § 296-20-610, filed 6/21/74, effective 10/1/74.]

WAC 296-20-620 Categories of additional permanent impairments of upper urinary tract due to surgical diversion. (1) Uretero-intestinal diversion or cutaneous ureterostomy without intubation.

(2) Nephrostomy or intubated ureterostomy.

[Order 74-32, § 296-20-620, filed 6/21/74, effective 10/1/74.]

WAC 296-20-630 Impairment of bladder function.

(1) Rules for evaluation of permanent impairment of bladder function.

(a) In making examinations for evaluation of impairments of bladder function, physicians shall use objective techniques including, but not limited to, cystoscopy, cystography, voiding cystourethrography, cystometry, uroflometry, urinalysis and urine culture.

(b) Categories 2, 3, 4 and 5 include the presence of complaints of whatever degree.

[Order 74-32, § 296-20-630, filed 6/21/74, effective 10/1/74.]

WAC 296-20-640 Categories of permanent impairments of bladder function. (1) No objective findings are present. Subjective complaints may be present or absent.

(2) Objective findings of bladder dysfunction, intermittent treatment required, but there is no dysfunction between such intermittent attacks.

(3) Objective findings of bladder dysfunction, continuous treatment required or there is good bladder reflex activity but no voluntary control.

(4) Objective findings of bladder dysfunction, there is poor reflex activity with intermittent dribbling and no voluntary control.

(5) Objective findings of bladder dysfunction, there is no reflex or voluntary control and there is continuous dribbling.

[Order 74-32, § 296-20-640, filed 6/21/74, effective 10/1/74.]

WAC 296-20-650 Anatomical or functional loss of testes. (1) Rule for evaluation of permanent anatomical or functional loss of testes.

[Title 296 WAC—p. 528]

(a) Categories 2, 3, 4 and 5 include the presence of whatever complaints.

[Order 74-32, § 296-20-650, filed 6/21/74, effective 10/1/74.]

WAC 296-20-660 Categories of permanent anatomical or functional loss of testes. (1) No objective findings. Subjective complaints may be present or absent.

(2) Anatomical or functional loss of one testicle.

(3) Anatomical or functional loss of both testes after the age of 65.

(4) Anatomical or functional loss of both testes between the ages of 40 and 65.

(5) Anatomical or functional loss of both testes before the age of 40.

[Order 74-32, § 296-20-660, filed 6/21/74, effective 10/1/74.]

WAC 296-20-670 Disability. (1) The rules for determining disability are as follows:

(a) The determination of the percentage of disability in terms of total bodily impairment for any category is solely an administrative function and shall be done only in accordance with the tables of disability listed in WAC 296-20-680 and 296-20-690, or as otherwise provided in this chapter.

(b) When the industrial injury or occupational disease has caused further impairment to a bodily area where permanent bodily impairment existed prior to the industrial injury or occupational disease, the department shall award the percentage difference between the disability for the category of impairment which preexisted the industrial injury or occupational disease and the disability for the category of permanent impairment existing after the industrial injury or occupational disease.

(c) Neither the combined values chart provided in the guides to the evaluation of permanent impairment nor any other formula for the combination of the disabilities to different body areas or organ systems used in any other nationally recognized guide for determining bodily impairments shall be applied in computing the amount of disabilities to be awarded under these rules.

(d) Except as otherwise specifically provided, a percentage of total bodily impairment in one body area or system shall not be added to or combined with a percentage of total bodily impairment from another body area or system; the percentages for each body area or system shall be stated separately.

[Order 74-32, § 296-20-670, filed 6/21/74, effective 10/1/74.]

Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-21-085 Specific therapeutic procedures—Miscellaneous. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-17-039 (Order 89-09), § 296-21-085, filed 8/10/89, effective 9/10/89; 86-06-032 (Order 86-19), § 296-21-085, filed 2/28/86, effective 4/1/86; Order 75-39, § 296-21-085, filed 11/28/75, effective 1/1/76; Order 74-7, § 296-21-085, filed 1/30/74; Order 68-7, § 296-21-085, filed 11/27/68, effective 1/1/69.] Repealed by 94-14-044, filed 6/29/94, effective 7/30/94. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-086 Chemotherapy injections. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 91-07-008, § 296-21-086, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-21-086, filed 8/10/89, effective 9/10/89; 86-06-032 (Order 86-19), § 296-21-086, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-21-086, filed 8/2/83.] Repealed by 92-24-066, filed 12/1/92, effective 1/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-21-090 Special dermatological procedures. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-17-039 (Order 89-09), § 296-21-090, filed 8/10/89, effective 9/10/89; 86-06-032 (Order 86-19), § 296-21-090, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-01-100 (Order 80-29), § 296-21-090, filed 12/23/80, effective 3/1/81; Order 74-7, § 296-21-090, filed 1/30/74; Order 68-7, § 296-21-090, filed 11/27/68, effective 1/1/69.] Repealed by 92-24-066, filed 12/1/92, effective 1/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-21-095 Physical medicine. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 91-17-038, § 296-21-095, filed 8/16/91, effective 9/30/91; 86-06-032 (Order 86-19), § 296-21-095, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-21-095, filed 8/2/83. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-24-041 (Order 81-28), § 296-21-095, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-21-095, filed 12/23/80, effective 3/1/81; Order 76-34, § 296-21-095, filed 11/24/76, effective 1/1/77; Order 74-39, § 296-21-095, filed 11/22/74, effective 1/1/75; Order 74-7, § 296-21-095, filed 1/30/74; Order 70-12, § 296-21-095, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-21-095, filed 11/27/68, effective 1/1/69.] Repealed by 92-24-066, filed 12/1/92, effective 1/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-21-125 Anesthesia. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 86-06-032 (Order 86-19), § 296-21-125, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-21-125, filed 8/2/83. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-

- 24-041 (Order 81-28), § 296-21-125, filed 11/30/81, effective 1/1/82; Order 74-7, § 296-21-125, filed 1/30/74; Order 68-7, § 296-21-125, filed 11/27/68, effective 1/1/69.] Repealed by 92-24-066, filed 12/1/92, effective 1/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-21-128 Special services and billing procedures—Anesthesia. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 88-04-052 (Order 87-29), § 296-21-128, filed 1/29/88; 86-06-032 (Order 86-19), § 296-21-128, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-24-041 (Order 81-28), § 296-21-128, filed 11/30/81, effective 1/1/82; Order 74-7, § 296-21-128, filed 1/30/74.] Repealed by 92-24-066, filed 12/1/92, effective 1/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-21-130 Calculation of total anesthesia values. [Order 74-7, § 296-21-130, filed 1/30/74; Order 70-12, § 296-21-130, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-21-130, filed 11/27/68, effective 1/1/69.] Repealed by 92-24-066, filed 12/1/92, effective 1/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-21-140 Guidelines. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-21-140, filed 12/1/92, effective 1/1/93.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-150 Office or other outpatient services. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-21-150, filed 12/1/92, effective 1/1/93.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-160 Hospital inpatient services. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-21-160, filed 12/1/92, effective 1/1/93.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-170 Consultations. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-21-170, filed 12/1/92, effective 1/1/93.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-180 Emergency department services. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-21-180, filed 12/1/92, effective 1/1/93.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-190 Miscellaneous. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-21-190, filed 12/1/92, effective 1/1/93.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-200 Critical care services. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-21-200, filed 12/1/92, effective 1/1/93.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-210 Nursing facility services. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-21-210, filed 12/1/92, effective 1/1/93.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-230 Case management services. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-21-230, filed 12/1/92, effective 1/1/93.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-240 General instructions. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-21-240, filed 8/1/93, effective 9/1/93.] Repealed by 94-14-044, filed 6/29/94, effective 7/30/94. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-250 Bundled services and supplies. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-21-250, filed 8/1/93, effective 9/1/93.] Repealed by 94-14-044, filed 6/29/94, effective 7/30/94. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-260 Global surgery policy. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-21-260, filed 8/1/93, effective 9/1/93.] Repealed by 94-14-044, filed 6/29/94, effective 7/30/94. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-300 HCPCS codes. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-21-300, filed 8/1/93, effective 9/1/93.] Repealed by 94-14-044, filed 6/29/94, effective 7/30/94. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-310 HCPCS billing modifiers. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-21-310, filed 8/1/93, effective 9/1/93.] Repealed by 94-14-044, filed 6/29/94, effective 7/30/94. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-21-320 Provider types and services not covered. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-21-320, filed 8/1/93, effective 9/1/93.] Repealed by 94-14-044, filed 6/29/94, effective 7/30/94. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.

SPECIFIC THERAPEUTIC PROCEDURES

WAC 296-21-270 Psychiatric services. The following rules supplements information contained in the fee schedules regarding coverage and reimbursement for psychiatric services.

Treatment of mental conditions to workers is to be goal directed, time limited, intensive, and limited to conditions caused or aggravated by the industrial condition. Psychiatric services to workers are limited to those provided by psychiatrists and licensed psychologists, and according to department policy. For purposes of this rule, the term "psychiatric" refers to treatment by psychologists as well as psychiatrists.

Initial evaluation, and subsequent treatment must be authorized by department staff, as outlined by department policy. The report of initial evaluation, including test results, and treatment plan are to be sent to the worker's attending provider, as well as the department. A copy of sixty-day narrative reports to the department is also to be sent to the attending provider.

All providers are bound by the medical aid rules in chapter 296-20 WAC. Reporting requirements are defined in chapter 296-20 WAC. In addition, the following are required: Testing results with scores, scales, and profiles; report of raw data sufficient to allow reassessment by a panel or independent medical examiner. Use of the current Diagnostic and Statistical Manual of the American Psychiatric Association axis format in the initial evaluation and sixty-day narrative reports, and explanation of the numerical scales are required.

A report to the department will contain, at least, the following elements:

- Subjective complaints;
- Objective observations;
- Assessment of the worker's condition and goals accomplished; and
- Plan of care.

The codes, reimbursement levels, and other policies for psychiatric services are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-21-270, filed 8/1/93, effective 9/1/93.]

WAC 296-21-280 Biofeedback rules. Procedures listed in the fee schedules are for use by medical doctors, osteopathic physicians, licensed psychologists and other qualified providers as determined by department policy. All providers of biofeedback are bound by the medical aid rules and fee schedule for biofeedback services.

Administration of biofeedback treatment is limited to those practitioners who are certified by the Biofeedback Certification Institute of America or who meet the minimum education, experience, and training qualifications to be so certified. Those practitioners wishing to administer biofeedback treatment to workers, must submit a copy of their biofeedback certification or supply evidence of their qualifications to the department or self-insurer.

(1) The department will authorize biofeedback treatment for the following conditions when accepted under the industrial insurance claim:

- (a) Idiopathic Raynaud's disease;
- (b) Temporomandibular joint dysfunction;
- (c) Myofascial pain dysfunction syndrome (MPD);
- (d) Tension headaches;
- (e) Migraine headaches;
- (f) Tinnitus;
- (g) Torticollis;
- (h) Neuromuscular reeducation as result of neurological damage in CVA or spinal cord injury;

(i) Inflammatory and/or musculoskeletal disorders causally related to the accepted condition.

(2) Twelve biofeedback treatments in a ninety-day period will be authorized for the above conditions when the following is presented:

- (a) An evaluation report documenting:
 - (i) The basis for the claimant's condition;
 - (ii) The condition's relationship to the industrial injury;
 - (iii) An evaluation of the claimant's current functional measurable modalities (i.e., range of motion, up time, walking tolerance, medication intake, etc.);
 - (iv) An outline of the proposed treatment program;
 - (v) An outline of the expected restoration goals.

(b) No further biofeedback treatments will be authorized or paid for without substantiation of evidence of improvement in measurable, functional modalities (i.e., range of motion, up time, walking tolerance, medication intake, etc.). Only one additional treatment block of twelve treatments per ninety days will be authorized. Requests for biofeedback treatment beyond twenty-four treatments or one hundred eighty days will be granted only after file review by and on the advice of the department's medical consultant.

(c) In addition to treatment, pretreatment and periodic evaluation will be authorized. Follow-up evaluation can be authorized at one, three, six, and twelve months posttreatment.

(d) At the department's option, a concurring opinion may be required regarding relationship of the condition to the industrial injury and/or need for biofeedback treatment.

The codes, reimbursement levels, and other policies for biofeedback services are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 93-16-072, § 296-21-280, filed 8/1/93, effective 9/1/93.]

WAC 296-21-290 Physical medicine. (1) Whom does the department authorize and pay for physical medicine or physical therapy services? The department or self-insurer may authorize and pay for physical medicine services from the following providers:

- A medical or osteopathic physician who is "board certified or board qualified" in the field of physical medicine and rehabilitation; or

- A licensed physical therapist; or

- The injured worker's attending doctor, within the limitations listed below.

The physical medicine services must be personally performed by the:

- Physical medicine and rehabilitation physician; or

- Attending doctor; or

- Licensed physical therapist; or

- Physical therapist assistant employed by and serving under the direction of a registered physical therapist, physical medicine and rehabilitation physician, or attending doctor.

Note: Licensed physical therapy provider rules are contained in chapter 296-23 WAC.

(2) When may the department or self-insurer pay the attending doctor for physical medicine services? The department or self-insurer may pay the attending doctor to provide physical medicine modalities and/or procedures in the following situations:

(a) The attending doctor's scope of practice includes physical medicine modalities and procedures.

(b) Only the physical medicine modalities and procedures allowed under the department's fee schedules and payment policies will be authorized or paid.

(c) No more than six physical medicine visits may be authorized and paid to the attending doctor. If the worker requires treatment beyond six visits, the worker must be referred to a licensed physical therapist or a board certified or qualified physical medicine and rehabilitation physician for such treatment. Payments will be made in accordance with the department's fee schedules and payment policies.

(d) In remote areas, where no physical medicine and rehabilitation specialist, licensed physical therapist or physical therapist assistant is available, physical medicine visits required by the patient's accepted condition(s) may be authorized and paid to the attending doctor. Payments will be made in accordance with the department's fee schedules and payment policies.

(e) The attending doctor may bill for office visits in addition to the physical medicine services only when a separately identifiable office visit service is provided in addition to the physical medicine service.

(3) What codes and fees are payable for physical medicine services?

- The codes, reimbursement levels, and other policies for physical medicine services are listed in the department's *Medical Aid Rules and Fee Schedules*. Physicians licensed in physical medicine and licensed physical therapists use CPT and/or HCPCS codes, rules and payment policies as listed in the department's *Medical Aid Rules and Fee Schedules* or provider bulletins.

- Attending doctors must use the local codes, rules and payment policies published in the department's *Medical Aid Rules and Fee Schedules* or provider bulletins.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.36.080, 00-09-078, § 296-21-290, filed 4/18/00, effective 7/1/00. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 93-16-072, § 296-21-290, filed 8/1/93, effective 9/1/93.]

Chapter 296-23 WAC

**RADIOLOGY, RADIATION THERAPY, NUCLEAR
MEDICINE, PATHOLOGY, HOSPITAL,
CHIROPRACTIC, PHYSICAL THERAPY,
DRUGLESS THERAPEUTICS AND NURSING—
DRUGLESS THERAPEUTICS, ETC.**

WAC

RADIOLOGY

- 296-23-135 General information—Radiology.
296-23-140 Custody of x-rays.
296-23-145 Duplication of x-rays and extra views.

PATHOLOGY

- 296-23-155 Pathology general information and instructions.

DENTAL

- 296-23-160 General information and instructions.

MISCELLANEOUS SERVICES AND APPLIANCES

- 296-23-165 Miscellaneous services and appliances.
296-23-170 Nursing services and attendant care.
296-23-175 Stimulators.
296-23-180 Vehicle and home modification.
296-23-185 Drug and alcohol rehabilitation services.

CHIROPRACTIC

- 296-23-195 Chiropractic consultations.

NATUROPATHIC PHYSICIANS

- 296-23-205 General instructions—Naturopathic physicians.
296-23-215 Office visits and special services—Naturopathic physi-
cians.

PHYSICAL THERAPY

- 296-23-220 Physical therapy rules.
296-23-225 Work hardening.

OCCUPATIONAL THERAPY

- 296-23-230 Occupational therapy rules.
296-23-235 Work hardening.

NURSING

- 296-23-240 Licensed nursing rules.
296-23-245 Licensed nursing billing instructions.
296-23-250 Massage therapy rules.
296-23-255 Independent medical examinations.
296-23-260 Examination reports.
296-23-265 Who may perform independent medical examinations?
296-23-26501 How do doctors become approved examiners?
296-23-26502 Where can doctors get an application to become an
approved examiner and other information about
independent medical examinations?
296-23-26503 What factors does the medical director consider in
approving, suspending or removing doctors from
the approved examiners list?
296-23-26504 What happens if an examiner is suspended or removed
from the approved examiner list by the medical
director?
296-23-26505 Is there a fee schedule for independent medical exami-
nations?
296-23-26506 Can a worker file a complaint about an independent
medical examiner's conduct?
296-23-267 When may attending doctors perform impairment rating
examinations?
296-23-270 Independent medical examinations two or more examiners.

**DISPOSITION OF SECTIONS FORMERLY
CODIFIED IN THIS CHAPTER**

- 296-23-010 General information—Radiology. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-17-039 (Order 89-09), § 296-23-010, filed 8/10/89, effective 9/10/89. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-010, filed 12/23/80, effective 3/1/81; Order 76-34, § 296-23-010, filed 11/24/76, effective 1/1/77; Order 74-39, § 296-23-010, filed 11/22/74, effective 1/1/75; Order 74-

296-23-01001

7, § 296-23-010, filed 1/30/74; Order 71-6, § 296-23-010, filed 6/1/71; Order 70-12, § 296-23-010, filed 12/1/70, effective 1/1/71; Order 68-7, § 296-23-010, filed 11/27/68, effective 1/1/69.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.

Injection procedures. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-17-039 (Order 89-09), § 296-23-01001, filed 8/10/89, effective 9/10/89. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-01001, filed 12/23/80, effective 3/1/81; Order 76-34, § 296-23-01001, filed 11/24/76, effective 1/1/77.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.

296-23-01002

Custody of x-rays. [Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-24-041 (Order 81-28), § 296-23-01002, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-23-01002, filed 12/23/80, effective 3/1/81; Order 77-27, § 296-23-01002, filed 11/30/77, effective 1/1/78; Emergency Order 77-26, § 296-23-01002, filed 12/1/77; Emergency Order 77-16, § 296-23-01002, filed 9/6/77; Order 76-34, § 296-23-01002, filed 11/24/76, effective 1/1/77.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.

296-23-01003

Identification of x-rays. [Order 76-34, § 296-23-01003, filed 11/24/76, effective 1/1/77.] Repealed by Order 77-27, filed 11/30/77, effective 1/1/78; Emergency Order 77-26, filed 12/1/77; Emergency Order 77-16, filed 9/6/77.

296-23-01004

Billing procedures. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-17-039 (Order 89-09), § 296-23-01004, filed 8/10/89, effective 9/10/89. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-01004, filed 12/23/80, effective 3/1/81; Order 77-27, § 296-23-01004, filed 11/30/77, effective 1/1/78; Emergency Order 77-26, § 296-23-01004, filed 12/1/77; Emergency Order 77-16, § 296-23-01004, filed 9/6/77; Order 76-34, § 296-23-01004, filed 11/24/76, effective 1/1/77.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.

296-23-01005

Duplication of x-rays and extra views. [Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-01005, filed 12/23/80, effective 3/1/81; Order 76-34, § 296-23-01005, filed 11/24/76, effective 1/1/77.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.

296-23-01006

Radiology, radiation therapy, nuclear medicine and modifiers. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 91-17-038, § 296-23-01006, filed 8/16/91, effective 9/30/91; 89-17-039 (Order 89-09), § 296-23-01006, filed 8/10/89, effective 9/10/89; 87-03-005 (Order 86-47), § 296-23-01006, filed 1/8/87; 86-06-032 (Order 86-19), § 296-23-01006, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-23-01006, filed 8/2/83. Statutory Authority: RCW 51.04.020(4), 51.04.030, and 51.16.120(3). 81-24-041 (Order 81-28), § 296-23-01006, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-23-01006, filed 12/23/80, effective 3/1/81; Order 76-34, § 296-23-01006, filed 11/24/76, effective 1/1/77.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.

296-23-01007

Unlisted service or procedure. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-17-039 (Order 89-09), § 296-23-01007, filed 8/10/89, effective 9/10/89; 83-16-066 (Order 83-23), § 296-23-01007, filed 8/2/83. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-01007, filed 12/23/80, effective 3/1/81; Order 76-34, § 296-23-01007, filed 11/24/76, effective 1/1/77.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.

296-23-01008

Special report. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23-01008, filed 12/1/92, effective 1/1/93; Order 76-34, §

- 055, filed 11/24/76, effective 1/1/77; Order 74-7, § 296-23-055, filed 1/30/74; Order 68-7, § 296-23-055, filed 11/27/68, effective 1/1/69.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-060, 296-23-070, 296-23-075, 296-23-085, 296-23-090, 296-23-095, 296-23-100, 296-23-205, 296-23-210, 296-23-215, 296-23-220, 296-23-225, 296-23-230, 296-23-235, 296-23-240 and 296-23-245. [Order 68-7, filed 11/27/68, effective 1/1/69.] Repealed by Order 74-7, filed 1/30/74.
- 296-23-065 Vascular system. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23-065, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23-065, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23-065, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23-065, filed 7/23/87; 86-06-032 (Order 86-19), § 296-23-065, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-23-065, filed 8/2/83. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-24-041 (Order 81-28), § 296-23-065, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-23-065, filed 12/23/80, effective 3/1/81; Order 76-34, § 296-23-065, filed 11/24/76, effective 1/1/77; Order 74-7, § 296-23-065, filed 1/30/74; Order 68-7, § 296-23-065, filed 11/27/68, effective 1/1/69.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-079 Miscellaneous. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23-079, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23-079, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23-079, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23-079, filed 7/23/87; 86-06-032 (Order 86-19), § 296-23-079, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-23-079, filed 8/2/83. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-24-041 (Order 81-28), § 296-23-079, filed 11/30/81, effective 1/1/82; 81-01-100 (Order 80-29), § 296-23-079, filed 12/23/80, effective 3/1/81; Order 76-34, § 296-23-079, filed 11/24/76, effective 1/1/77; Order 74-7, § 296-23-079, filed 1/30/74.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-07901 Diagnostic ultrasound. [Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-07901, filed 12/23/80, effective 3/1/81; Order 75-39, § 296-23-07901, filed 11/28/75, effective 1/1/76.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-07902 Head and neck. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23-07902, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23-07902, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23-07902, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23-07902, filed 7/23/87; 86-06-032 (Order 86-19), § 296-23-07902, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-23-07902, filed 8/2/83. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-07902, filed 12/23/80, effective 3/1/81; Order 75-39, § 296-23-07902, filed 11/28/75, effective 1/1/76.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-07903 Heart and chest. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23-07903, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23-07903, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23-07903, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23-07903, filed 7/23/87; 86-06-032 (Order 86-19), § 296-23-07903, filed 2/28/86, effective 4/1/86; 83-16-066 (Order 83-23), § 296-23-07903, filed 8/2/83. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-07903, filed 12/23/80, effective 3/1/81; Order 75-39, § 296-23-07903, filed 11/28/75, effective 1/1/76.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-07904 Thorax. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23-07904, filed 7/23/87; 86-06-032 (Order 86-19), § 296-23-07904, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-07904, filed 12/23/80, effective 3/1/81; Order 75-39, § 296-23-07904, filed 11/28/75, effective 1/1/76.] Repealed by 89-17-039 (Order 89-09), filed 8/10/89, effective 9/10/89. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-23-07905 Abdomen and retroperitoneum. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23-07905, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23-07905, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23-07905, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23-07905, filed 7/23/87; 86-06-032 (Order 86-19), § 296-23-07905, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-07905, filed 12/23/80, effective 3/1/81; Order 75-39, § 296-23-07905, filed 11/28/75, effective 1/1/76.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-07906 Pelvis, genitalia, and extremities. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-910 Licensed nursing billing instructions. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 90-18-028, § 296-23-910, filed 8/27/90, effective 9/27/90; 86-20-074 (Order 86-36), § 296-23-910, filed 10/1/86, effective 11/1/86; 86-06-032 (Order 86-19), § 296-23-910, filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 81-01-100 (Order 80-29), § 296-23-910, filed 12/23/80, effective 3/1/81; Order 74-7, § 296-23-910, filed 1/30/74.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-940 Vocational service providers. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 82-24-050 (Order 82-39), § 296-23-940, filed 11/29/82, effective 1/1/83.] Repealed by 86-06-032 (Order 86-19), filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-23-9401 Reasons for holding provider ineligible for referral. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 82-24-050 (Order 82-39), § 296-23-9401, filed 11/29/82, effective 1/1/83.] Repealed by 86-06-032 (Order 86-19), filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-23-9402 Time lines. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 82-24-050 (Order 82-39), § 296-23-9402, filed 11/29/82, effective 1/1/83.] Repealed by 86-06-032 (Order 86-19), filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-23-9403 Services requiring authorization. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 82-24-050 (Order 82-39), § 296-23-9403, filed 11/29/82, effective 1/1/83.] Repealed by 86-06-032 (Order 86-19), filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-23-9408 Vocational fee schedule. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 83-16-066 (Order 83-23), § 296-23-9408, filed 8/2/83. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 82-24-050 (Order 82-39), § 296-23-9408, filed 11/29/82, effective 1/1/83.] Repealed by 83-24-016 (Order 83-35), filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-23-9409 Vocational services. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 83-24-016 (Order 83-35), § 296-23-9409, filed 11/30/83, effective 1/1/84.] Repealed by 86-06-032 (Order 86-19), filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-23-9410 Retraining service. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 83-24-016 (Order 83-35), § 296-23-9410, filed 11/30/83, effective 1/1/84.] Repealed by 86-06-032 (Order 86-19), filed 2/28/86, effective 4/1/86. Statutory Authority: RCW 51.04.020(4) and 51.04.030.
- 296-23-950 Massage therapy rules. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 86-06-032 (Order 86-19), § 296-23-950, filed 2/28/86, effective 4/1/86.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-960 Massage—Modalities. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 86-20-074 (Order 86-36), § 296-23-960, filed 10/1/86, effective 11/1/86; 86-06-032 (Order 86-19), § 296-23-960, filed 2/28/86, effective 4/1/86.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-970 Occupational therapy rules. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-08-002 (Order 89-01), § 296-23-970, filed 3/23/89, effective 5/1/89; 86-06-032 (Order 86-19), § 296-23-970, filed 2/28/86, effective 4/1/86.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-980 Occupational therapy services. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 91-17-038, § 296-23-980, filed 8/16/91, effective 9/30/91; 87-08-004 (Order 87-09), § 296-23-980, filed 3/20/87; 86-20-074 (Order 86-36), § 296-23-980, filed 10/1/86, effective 11/1/86; 86-06-032 (Order 86-19), § 296-23-980, filed 2/28/86, effective 4/1/86.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23-990 Work hardening. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-08-002 (Order 89-01), § 296-23-990, filed 3/23/89, effective 5/1/89.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.

RADIOLOGY

WAC 296-23-135 General information—Radiology.

(1) Rules and billing procedures pertaining to all practitioners rendering services to workers are presented in the general instruction section beginning with WAC 296-20-010.

(2) Billing codes, reimbursement levels, and supporting policies are listed in the fee schedules.

(3) Refer to WAC 296-20-132 and 296-20-135 for information regarding use of the conversion factors.

(4) Refer to the fee schedules for information on use of coding modifiers.

(5) The values listed in the fee schedules only apply when these services are performed by or under the responsible supervision of a doctor.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 94-14-044, § 296-23-135, filed 6/29/94, effective 7/30/94; 93-16-072, § 296-23-135, filed 8/1/93, effective 9/1/93.]

WAC 296-23-140 Custody of x-rays. (1) Radiographs should not be sent to the department or self-insurer unless they are requested for comparison and interpretation in determining a permanent disability, administrative or legal decisions, and for cases in litigation. X-rays must be retained for a period of ten years by the radiologist or the attending doctor.

(2) X-rays must be made available upon request to consultants, to medical examiners, to the department, to self-insurers, and/or the board of industrial insurance appeals.

(3) In cases where the worker transfers from one doctor to another, the former attending doctor will immediately forward all films in his possession to the new attending doctor.

(4) When a doctor's office is closed because of death, retirement, or upon leaving the state, department approved custodial arrangements must be made to insure availability on request. If a radiological office is closed for any of the previously listed reasons or because the partnership or corporation is being dissolved, disposition of x-rays for industrial injuries will be handled in the same manner. In the event custodial arrangements are to be made, the department must approve the arrangements prior to transfer of x-rays to the custodian so as to assure their availability to the department or self-insurer upon request.

(5) Refer to chapter 296-20 WAC (including WAC 296-20-125) and to chapter 296-21 WAC for additional information.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 93-16-072, § 296-23-140, filed 8/1/93, effective 9/1/93.]

WAC 296-23-145 Duplication of x-rays and extra views. Every attempt should be made to minimize the number of x-rays taken for workers. The attending doctor or any other person or institution having possession of x-rays which pertain to the injury and are deemed to be needed for diagnostic or treatment purposes should make these x-rays available upon request.

The department or self-insurer will not authorize or pay for additional x-rays when recent x-rays are available except when presented with adequate information regarding the need to re-x-ray.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 93-16-072, § 296-23-145, filed 8/1/93, effective 9/1/93.]

[Title 296 WAC—p. 544]

PATHOLOGY

WAC 296-23-155 Pathology general information and instructions. (1) Rules and billing procedures pertaining to all practitioners rendering service to workers are presented in general information section beginning with WAC 296-20-010.

(2) Refer to WAC 296-20-132 and 296-20-135 for information regarding use of the conversion factors.

(3) Refer to the fee schedules for information on use of coding modifiers.

(4) Billing codes, reimbursement levels, and supporting policies are listed in the fee schedules.

(5) The reimbursement levels listed in the fee schedules apply only when the services are performed by or under the responsible supervision of a physician. Unless otherwise specified, the listed values include the collection and handling of the specimens by the laboratory performing the procedure. SERVICES IN PATHOLOGY AND LABORATORY are provided by the pathologist or by technologists under responsible supervision of a physician.

(6) Laboratory procedures performed by other than the billing physician shall be billed at the value charged that physician by the reference (outside) laboratory under the individual procedure number or the panel procedure number listed under "PANEL OR PROFILE TESTS" (see modifier -90).

(7) The department or self-insurer may deny payment for lab procedures which are determined to be excessive or unnecessary for management of the injury or conditions.

(8) Separate or multiple procedures: It is appropriate to designate multiple procedures that are rendered on the same date by separate entries.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159, 94-14-044, § 296-23-155, filed 6/29/94, effective 7/30/94; 93-16-072, § 296-23-155, filed 8/1/93, effective 9/1/93.]

DENTAL

WAC 296-23-160 General information and instructions. (1) The department or self-insurer is responsible only for repair or replacement of teeth injured or prosthodontics broken as a result of an industrial injury.

(2) Information pertaining to industrial claims is explained in WAC 296-20-010.

(3) Information pertaining to reports of accident is outlined in WAC 296-20-025.

(4) Information pertaining to the care of workers is explained in WAC 296-20-110.

(5) An estimate of cost is not needed prior to authorization of dental work unless indicated due to the extensive nature of the dental work. The department or self-insurer reserves the right to review all charges billed.

(6) Billing instructions are listed in WAC 296-20-125. Bills for services must be itemized, specifying tooth numbers and materials used. No services will be paid on rejected or closed claims except those rendered in conjunction with a reopening application.

(7) Billing codes, billing modifiers, reimbursement levels, and supporting policies are listed in the fee schedules.

(2001 Ed.)

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-160, filed 8/1/93, effective 9/1/93.]

MISCELLANEOUS SERVICES AND APPLIANCES

WAC 296-23-165 Miscellaneous services and appliances. (1) The department or self-insurer will reimburse for certain medically necessary miscellaneous services and items needed as a result of an industrial accident. Nursing care, attendant care, transportation, hearing aids, eyeglasses, orthotics and prosthetics, braces, medical supplies, oxygen systems, walking aids, and durable medical equipment are included in this classification.

(a) When a fee maximum has been established, the rate of reimbursement for miscellaneous services and items will be the supplier's usual and customary charge or the department's current fee maximum, whichever is less. In no case may a supplier or provider charge a worker the difference between the fee maximum and their usual and customary charge.

(b) When the department or self-insurer has established a purchasing contract with a qualified supplier through an open competitive request for proposal process, the department or self-insurer will require that workers obtain specific groups of items from the contractor. When items are obtained from a contractor, the contractor will be paid at the rates established in the contract. When a purchasing contract for a selected group of items exists, suppliers who are not named in the contract will be denied reimbursement if they provide a contracted item to a worker. The noncontracting supplier, not the worker, will be financially responsible for providing an item to a worker when it should have been supplied by a contractor. This rule may be waived by an authorized representative of the department or self-insurer in special cases where a worker's attending doctor recommends that an item be obtained from another source for medical reasons or reasons of availability. In such cases, the department may authorize reimbursement to a supplier who is not named in a contract. Items or services may be provided on an emergency basis without prior authorization, but will be reviewed for appropriateness to the accepted industrial condition and medical necessity on a retrospective basis.

(2) The department or self-insurer will inform providers and suppliers of the selected groups of items for which purchasing contracts have been established, including the beginning and ending dates of the contracts.

(3) Prior authorization by an authorized representative of the department or self-insurer will be required for reimbursement of selected items and services which are provided to workers. Payment will be denied for selected items or services supplied without prior authorization. The supplier, not the worker, will be financially responsible for providing selected items or services to workers without prior authorization. In cases where a worker's doctor recommends rental or purchase of a contracted item from a supplier who lacks a contract agreement, prior authorization will be required.

The decision to grant or deny prior authorization for reimbursement of selected services or items will be based on the following criteria:

- (a) The worker is eligible for coverage.

(b) The service or item prescribed is appropriate and medically necessary for treatment of the worker's accepted industrial condition.

(4) The decision to rent or purchase an item will be made based on a comparison of the projected rental costs of the item with its purchase price. An authorized representative of the department or self-insurer will decide whether to rent or purchase certain items provided they are appropriate and medically necessary for treatment of the worker's accepted condition. Decisions to rent or purchase items will be based on the following information:

(a) Purchase price of the item.

(b) Monthly rental fee.

(c) The prescribing doctor's estimate of how long the item will be needed.

(5) The department will review the medical necessity, appropriateness, and quality of items and services provided to workers.

(6) The department's STATEMENT FOR MISCELLANEOUS SERVICES form or electronic transfer format specifications must be used for billing the department for miscellaneous services, equipment, supplies, appliances, and transportation. Bills must be itemized according to instructions in WAC 296-20-125 and the department or self-insurer's billing instructions. Bills for medical appliances and equipment must include the type of item, manufacturer name, model name and number, and serial number.

(7) All miscellaneous materials, supplies and services must be billed using the appropriate HCPCS Level II codes and billing modifiers. HCPCS codes are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-165, filed 8/1/93, effective 9/1/93.]

WAC 296-23-170 Nursing services and attendant care. Refer to WAC 296-20-132 and 296-20-135 for information regarding use of the conversion factors.

See WAC 296-20-091 for qualifications.

The codes and fees for home nursing services and attendant care are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-170, filed 8/1/93, effective 9/1/93.]

WAC 296-23-175 Stimulators. For qualifications regarding prior authorization and billing of stimulators refer to chapter 296-23 WAC (Miscellaneous services and appliances), WAC 296-20-1102, and 296-20-125.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-175, filed 8/1/93, effective 9/1/93.]

WAC 296-23-180 Vehicle and home modification. Requires prior approval from the assistant director for industrial insurance.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 96-10-086, § 296-23-180, filed 5/1/96, effective 7/1/96. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-180, filed 8/1/93, effective 9/1/93.]

WAC 296-23-185 Drug and alcohol rehabilitation services. Authorization requirements for these services may be found in WAC 296-20-03001 and 296-20-055.

[Statutory Authority: RCW 51.04.020(4) and 51.04.030. 96-10-086, § 296-23-185, filed 5/1/96, effective 7/1/96. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-185, filed 8/1/93, effective 9/1/93.]

CHIROPRACTIC

WAC 296-23-195 Chiropractic consultations. See WAC 296-20-035, 296-20-045, and 296-20-051 for rules pertaining to consultation.

Chiropractic consultation requires prior notification to the department or self-insurer. Consultants must be from an approved list of chiropractic consultants.

The codes and reimbursement levels for chiropractic consultations services are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-195, filed 8/1/93, effective 9/1/93.]

NATUROPATHIC PHYSICIANS

WAC 296-23-205 General instructions—Naturopathic physicians. (1) Refer to WAC 296-20-010 through 296-20-125 regarding general rules and billing procedures.

(2) Refer to WAC 296-20-132 and 296-20-135 regarding the use of conversion factors.

(3) In addition to general rules found in WAC 296-20-010 through 296-20-125, the following rules apply to naturopathic physicians:

(a) If the naturopathic physician is dual licensed, all treatment rendered by the practitioner must be billed as "treatment of the day." Further, the practitioner must elect and notify the department or self-insurer, which type of treatment he is providing for the injured worker, and abide by rules pertaining to area of elected treatment.

(b) Naturopathic physicians utilizing hydro-; mechano-; and/or electro-therapy modalities cannot bill for those services in addition to office visit services. Office visit includes treatment of the day.

(c) No more than one office visit will be allowed per day, except on the initial and next two subsequent visits. The attending doctor must submit a detailed report regarding the need for the additional treatment.

(d) If necessary, x-rays may be taken immediately prior to and following the initial naturopathic physician treatment without prior authorization.

(e) X-rays immediately prior to and following each subsequent naturopathic physician treatment will be disallowed, unless previously authorized.

(f) Prior authorization must be obtained for x-rays subsequent to initial treatment.

(g) Payment will not be made for excessive or unnecessary x-rays. No payment will be made for x-rays taken on rejected or closed claims, except those taken in conjunction with a reopening application.

(h) See chapter 296-23 WAC for custody requirements for x-rays.

[Title 296 WAC—p. 546]

(4) Drugless therapy as a maintenance or supportive measure will not be authorized or paid.

(5) Treatment beyond the first twenty treatments or sixty days, whichever occurs first, will not be authorized without submission of a consultation report or a comprehensive comparative exam report regarding need for further care.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-205, filed 8/1/93, effective 9/1/93.]

WAC 296-23-215 Office visits and special services—Naturopathic physicians. Definitions:

Routine office visit: A level of service pertaining to the evaluation and treatment of a condition requiring only an abbreviated history and exam.

Extended office visit: A level of service pertaining to an evaluation of patient with a new or existing problem requiring a detailed history, review of records, exam, and a formal conference with patient or family to evaluate and/or adjust therapeutic treatment management and progress.

Comprehensive office visit: A level of service pertaining to an indepth evaluation of a patient with a new or existing problem, requiring development or complete reevaluation of treatment data; includes recording of chief complaints and present illness, family history, past treatment history, personal history, system review; and a complete exam to evaluate and determine appropriate therapeutic treatment management and progress.

Reporting:

Reporting requirements are outlined in WAC 296-20-06101. The department or self-insurer will accept a brief narrative report of treatment received and the patient's progress as supporting documentation for billings in lieu of routine follow-up office notes.

Modifiers:

-22 Unusual services: When treatment services provided are greater than that usually required for listed procedures. Use of this modifier must be based on the injured worker's need for extended or unusual care. A report is required. The modifier -22 should be added to the procedure number.

-52 Reduced services: Under certain circumstances no treatment may be given, in these cases the procedure should be reduced by ten units and modifier -52 should be added to the procedure number.

Material supplied by doctor:

Department or self-insurer will reimburse the doctor for materials supplied, i.e., cervical collars, heel lifts, etc., at cost only. See RCW 19.68.010, professional license statutes.

All supplies and materials must be billed using HCPCS Level II codes as listed in the fee schedules.

The codes and reimbursement levels are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-215, filed 8/1/93, effective 9/1/93.]

PHYSICAL THERAPY

WAC 296-23-220 Physical therapy rules. Practitioners should refer to WAC 296-20-010 through 296-20-125

(2001 Ed.)

for general information and rules pertaining to the care of workers.

Refer to WAC 296-20-132 and 296-20-135 regarding the use of conversion factors.

All supplies and materials must be billed using HCPCS Level II codes. Refer to chapter 296-21 WAC for additional information. HCPCS codes are listed in the fee schedules.

Refer to chapter 296-20 WAC (WAC 296-20-125) and to the department's billing instructions for additional information.

Physical therapy treatment will be reimbursed only when ordered by the worker's attending doctor and rendered by a licensed physical therapist or a physical therapist assistant serving under the direction of a licensed physical therapist. Doctors rendering physical therapy should refer to WAC 296-21-290.

The department or self-insurer will review the quality and medical necessity of physical therapy services provided to workers. Practitioners should refer to WAC 296-20-01002 for the department's rules regarding medical necessity and to WAC 296-20-024 for the department's rules regarding utilization review and quality assurance.

The department or self-insurer will pay for a maximum of one physical therapy visit per day. When multiple treatments (different billing codes) are performed on one day, the department or self-insurer will pay either the sum of the individual fee maximums, the provider's usual and customary charge, or \$91.00 whichever is less. These limits will not apply to physical therapy that is rendered as part of a physical capacities evaluation, work hardening program, or pain management program, provided a qualified representative of the department or self-insurer has authorized the service.

The department will publish specific billing instructions, utilization review guidelines, and reporting requirements for physical therapists who render care to workers.

Use of diaphuse or similar machines on workers is not authorized. See WAC 296-20-03002 for further information.

A physical therapy progress report must be submitted to the attending doctor and the department or the self-insurer following twelve treatment visits or one month, whichever occurs first. Physical therapy treatment beyond initial twelve treatments will be authorized only upon substantiation of improvement in the worker's condition. An outline of the proposed treatment program, the expected restoration goals, and the expected length of treatment will be required.

Physical therapy services rendered in the home and/or places other than the practitioner's usual and customary office, clinic, or business facilities will be allowed only upon prior authorization by the department or self-insurer.

No inpatient physical therapy treatment will be allowed when such treatment constitutes the only or major treatment received by the worker. See WAC 296-20-030 for further information.

The department may discount maximum fees for treatment performed on a group basis in cases where the treatment provided consists of a nonindividualized course of therapy (e.g., pool therapy; group aerobics; and back classes).

Biofeedback treatment may be rendered on doctor's orders only. The extent of biofeedback treatment is limited to those procedures allowed within the scope of practice of a

(2001 Ed.)

licensed physical therapist. See chapter 296-21 WAC for rules pertaining to conditions authorized and report requirements.

Billing codes and reimbursement levels are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020(1) and 51.04.030. 00-09-077, § 296-23-220, filed 4/18/00, effective 7/1/00. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 99-10-043, § 296-23-220, filed 4/30/99, effective 7/1/99; 98-09-125, § 296-23-220, filed 4/22/98, effective 7/1/98; 97-10-017, § 296-23-220, filed 4/28/97, effective 7/1/97; 96-10-086, § 296-23-220, filed 5/1/96, effective 7/1/96; 95-05-072, § 296-23-220, filed 2/15/95, effective 3/18/95. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 94-02-045, § 296-23-220, filed 12/30/93, effective 3/1/94; 93-16-072, § 296-23-220, filed 8/1/93, effective 9/1/93.]

WAC 296-23-225 Work hardening. The department will publish billing instructions, reimbursement limits, quality assurance standards, utilization review guidelines, admission criteria, outcome criteria, measures of effectiveness, minimum staffing levels, certification requirements, special reporting requirements, and other criteria that will ensure workers receive good quality services at cost-effective payment levels. Providers will be required to meet the department's requirements in order to qualify as a work hardening provider. The department may also establish a competitive or other appropriate selection process for work hardening providers. Providers should refer to WAC 296-20-12050 regarding special programs.

Billing codes and reimbursement levels are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-225, filed 8/1/93, effective 9/1/93.]

OCCUPATIONAL THERAPY

WAC 296-23-230 Occupational therapy rules. Practitioners should refer to WAC 296-20-010 through 296-20-125 for general information and rules pertaining to the care of workers.

Refer to WAC 296-20-132 and 296-20-135 for information regarding the conversion factors.

All supplies and materials must be billed using HCPCS Level II codes, refer to the department's billing instructions for additional information.

Occupational therapy treatment will be reimbursed only when ordered by the worker's attending doctor and rendered by a licensed occupational therapist or an occupational therapist assistant serving under the direction of a licensed occupational therapist. Vocational counselors assigned to injured workers by the department or self-insurer may request an occupational therapy evaluation. However, occupational therapy treatment must be ordered by the worker's attending doctor.

An occupational therapy progress report must be submitted to the attending doctor and the department or self-insurer following twelve treatment visits or one month, whichever occurs first. Occupational therapy treatment beyond the initial twelve treatments will be authorized only upon substantiation of improvement in the worker's condition. An outline of the proposed treatment program, the expected restoration goals, and the expected length of treatment will be required.

The department or self-insurer will review the quality and medical necessity of occupational therapy services. Practitioners should refer to WAC 296-20-01002 for the department's definition of medically necessary and to WAC 296-20-024 for the department's rules regarding utilization review and quality assurance.

The department will pay for a maximum of one occupational therapy visit per day. When multiple treatments (different billing codes) are performed on one day, the department or self-insurer will pay either the sum of the individual fee maximums, the provider's usual and customary charge, or \$91.00 whichever is less. These limits will not apply to occupational therapy which is rendered as part of a physical capacities evaluation, work hardening program, or pain management program, provided a qualified representative of the department or self-insurer has authorized the service.

The department will publish specific billing instructions, utilization review guidelines, and reporting requirements for occupational therapists who render care to workers.

Occupational therapy services rendered in the worker's home and/or places other than the practitioner's usual and customary office, clinic, or business facility will be allowed only upon prior authorization by the department or self-insurer.

No inpatient occupational therapy treatment will be allowed when such treatment constitutes the only or major treatment received by the worker. See WAC 296-20-030 for further information.

The department may discount maximum fees for treatment performed on a group basis in cases where the treatment provided consists of a nonindividualized course of therapy (e.g., pool therapy; group aerobics; and back classes).

Billing codes, reimbursement levels, and supporting policies for occupational therapy services are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020(1) and 51.04.030. 00-09-077, § 296-23-230, filed 4/18/00, effective 7/1/00. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 99-10-043, § 296-23-230, filed 4/30/99, effective 7/1/99; 98-09-125, § 296-23-230, filed 4/22/98, effective 7/1/98; 97-10-017, § 296-23-230, filed 4/28/97, effective 7/1/97; 96-10-086, § 296-23-230, filed 5/1/96, effective 7/1/96; 95-05-072, § 296-23-230, filed 2/15/95, effective 3/18/95. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 94-02-045, § 296-23-230, filed 12/30/93, effective 3/1/94; 93-16-072, § 296-23-230, filed 8/1/93, effective 9/1/93.]

WAC 296-23-235 Work hardening. The department will publish billing instructions, reimbursement limits, quality assurance standards, utilization review guidelines, admission criteria, outcome criteria, measures of effectiveness, minimum staffing levels, certification requirements, special reporting requirements, and other criteria that will ensure workers receive good quality services at cost-effective payment levels. Providers will be required to meet the department's requirements in order to qualify as a work hardening provider. The department may also establish a competitive or other appropriate selection process for work hardening providers. Providers should refer to WAC 296-20-12050 regarding special programs.

Billing codes, reimbursement levels, and supporting policies for work hardening services are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-235, filed 8/1/93, effective 9/1/93.]

NURSING

WAC 296-23-240 Licensed nursing rules. (1) Registered nurses and licensed practical nurses may perform private duty nursing care in industrial injury cases when the attending physician deems this care necessary. Registered nurses may be reimbursed for services as outlined by department policy. (See chapter 296-20 WAC for home nursing rules.)

(2) Advanced registered nurse practitioners (ARNPs) may perform advanced and specialized levels of nursing care on a fee for service basis in industrial injury cases within the limitations of this section. ARNPs may be reimbursed for services as outlined by department policy.

(3) In order to treat workers under the Industrial Insurance Act, the advanced registered nurse practitioner must be:

(a) Recognized by the Washington state board of nursing or other government agency as an advanced registered nurse practitioner (ARNP). For out-of-state nurses an equivalent title and training may be approved at the department's discretion.

(b) Capable of providing the department with evidence and documentation of a reliable and rapid system of obtaining physician consultations.

(4) Billing procedures outlined in the medical aid rules and fee schedules apply to all nurses.

(5) Advanced registered nurse practitioners cannot sign accident report forms or time loss cards.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-240, filed 8/1/93, effective 9/1/93.]

WAC 296-23-245 Licensed nursing billing instructions. (1) Registered nurses may be required to obtain provider account numbers from the department as outlined by department policy.

(2) Advanced registered nurse practitioners must obtain provider account numbers from the department.

(3) Refer to WAC 296-20-132 and 296-20-135 for information regarding the conversion factors.

(4) Refer to the department's billing instructions for additional information.

(5) Services performed by advanced registered nurse practitioners must be billed using the appropriate procedure code number listed in the fee schedules preceded by a Type of Service Code "N." The rate of reimbursement for the services billed by advanced registered nurse practitioners will be ninety percent of the value listed in the fee schedules.

(6) Refer to chapter 296-20 WAC (home nursing care) and chapter 296-23 WAC (miscellaneous services) for rules regarding reimbursement for home attendant care.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-245, filed 8/1/93, effective 9/1/93.]

WAC 296-23-250 Massage therapy rules. Practitioners should refer to WAC 296-20-010 through 296-20-125 for general information and rules pertaining to the care of workers. See WAC 296-20-125 for billing instructions.

Refer to WAC 296-20-132 and 296-20-135 for information regarding use of the conversion factors.

Massage therapy treatment will be permitted when given by a licensed massage practitioner only upon written orders from the worker's attending doctor.

A progress report must be submitted to the attending doctor and the department or the self-insurer following six treatment visits or one month, whichever comes first. Massage therapy treatment beyond the initial six treatments will be authorized only upon substantiation of improvement in the worker's condition in terms of functional modalities, i.e., range of motion; sitting and standing tolerance; reduction in medication; etc. In addition, an outline of the proposed treatment program, the expected restoration goals, and the expected length of treatment will be required.

Massage therapy in the home and/or places other than the practitioners usual and customary business facilities will be allowed only upon prior justification and authorization by the department or self-insurer.

No inpatient massage therapy treatment will be allowed when such treatment constitutes the only or major treatment received by the worker. See WAC 296-20-030 for further information.

Massage therapy treatments exceeding once per day must be justified by attending doctor.

Billing codes, reimbursement levels, and supporting policies for massage therapy services are listed in the fee schedules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-250, filed 8/1/93, effective 9/1/93.]

WAC 296-23-255 Independent medical examinations. (1) Purpose:

Independent medical examinations may be requested by the department, the self-insurer, or the attending physician; this is usually for one of the following purposes:

(a) To establish a diagnosis. Prior diagnoses may be controversial or ill-defined;

(b) To outline a program of rational treatment, where treatment or progress is controversial;

(c) To establish medical data from which it may be determined whether the medical condition is industrially acquired, or unrelated to industrial work activities;

(d) To determine the extent and duration of aggravation of a preexisting medical condition by an industrial injury or exposure;

(e) To establish when the accepted medical condition has reached maximum benefit from treatment;

(f) To establish a percentage rating of any permanent disability, based on the loss of body function or the category rating when maximum recovery is reached; or

(g) To determine the medical indications for reopening of a claim for further treatment on the basis of aggravation of an accepted condition, based on objective findings.

(2) Workers who are scheduled for independent medical examinations are allowed to bring with them an accompanying person to be present during the physical examination. The accompanying person cannot be compensated in any manner, except that language interpreters may be necessary for the

(2001 Ed.)

communication process and may be reimbursed for interpretative services.

The department may designate those conditions under which the accompanying person is allowed to be present during the independent medical examination process.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-255, filed 8/1/93, effective 9/1/93.]

WAC 296-23-260 Examination reports. (1) It is the department's intention to purchase objective examinations to ensure that sure and certain determinations are made of all benefits to which the injured worker might be entitled.

The report of an independent medical examination must include the following items:

(a) A detailed chronology of the injury or condition including mechanism of injury, diagnostic studies, and treatments attempted. The chronology must mention the results of treatments and diagnostic studies;

(b) An opinion as to whether treatment actual or proposed is or will be curative or palliative in nature;

(c) An assessment of whether the condition is industrially caused, on a more probable than not basis;

(d) Specific diagnoses sorted into the following categories:

(i) The accepted condition;

(ii) Preexisting conditions, and a statement as to whether they are worsening on their own or are aggravated by the accepted industrially acquired condition; and

(iii) Conditions acquired after the industrial injury.

(e) Answers to written questions posed by adjudicators, or a description of what would be needed to address the questions; and

(f) Conclusions and a summary statement of the objective medical findings upon which the conclusions are based.

(2) Disability ratings are to be done as specified in WAC 296-20-210.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-260, filed 8/1/93, effective 9/1/93.]

WAC 296-23-265 Who may perform independent medical examinations? Doctors in Washington, Oregon, or Idaho who wish to perform independent medical examinations for the department or self-insurers providing coverage to workers covered under Title 51 RCW must be approved examiners. Independent medical examinations must be performed according to WAC 296-20-200 by the following:

Examiner is:	Doctors licensed to practice:				
	Medicine & surgery	Osteopathic medicine & surgery	Podiatric medicine & surgery	Chiropractic	Dentistry
In Washington, Oregon, or Idaho and is approved by department to perform IMEs	Yes	Yes	Yes	Yes	Yes
Not in Washington, Oregon, or Idaho and is a board certified specialist	Yes	Yes	Yes	No	Yes
The treating doctor in a department approved chronic pain management program	Yes	Yes	Yes	No	Yes

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015. 97-09-036, § 296-23-265, filed 4/14/97 effective 5/15/97. Statutory Authority: RCW 51.32.112. 95-04-056, § 296-23-265, filed 1/26/95, effective 3/1/95. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-265, filed 8/1/93, effective 9/1/93.]

WAC 296-23-26501 How do doctors become approved examiners? Doctors must submit a completed department application to the provider review and education unit at the Department of Labor and Industries, P.O. Box 44322, Olympia, WA 98504 and receive the medical director's approval. Approved examiners will be included on the department's approved examiners list.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015. 97-09-036, § 296-23-26501, filed 4/14/97 effective 5/15/97.]

WAC 296-23-26502 Where can doctors get an application to become an approved examiner and other information about independent medical examinations? The application for approved examiner status and the standards for independent medical examinations are published in the *Medical Examiners' Handbook* available from the department of labor and industries.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015. 97-09-036, § 296-23-26502, filed 4/14/97 effective 5/15/97.]

WAC 296-23-26503 What factors does the medical director consider in approving, suspending or removing doctors from the approved examiners list? The medical director may consider several factors in approving, disapproving, or suspending examiners. Examples include, but are not limited to:

- (1) Board certification;
- (2) Complaints from workers about the conduct of the examiner (see WAC 296-23-26506);
- (3) Disciplinary proceedings or actions;
- (4) Experience in direct patient care in the area of specialty;
- (5) Ability to effectively convey and substantiate medical opinions and conclusions concerning workers;
- (6) Quality and timeliness of reports;
- (7) Geographical need of the department and self-insurer;
- (8) Availability and willingness to testify on behalf of the department, worker, or employer; and
- (9) Acceptance of the department fee schedule rate for testimony.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015. 97-09-036, § 296-23-26503, filed 4/14/97 effective 5/15/97.]

WAC 296-23-26504 What happens if an examiner is suspended or removed from the approved examiner list by the medical director? Examiners who are suspended or removed from the approved examiners list will not receive examination referrals from the department or self-insurers. In addition, suspended or removed examiners will not be reimbursed by the department or self-insurer for examinations performed at the request of other referral sources.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015. 97-09-036, § 296-23-26504, filed 4/14/97 effective 5/15/97.]

WAC 296-23-26505 Is there a fee schedule for independent medical examinations? The maximum fee schedule for performing independent medical examinations is published in the *Medical Examiners' Handbook* available from the department.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015. 97-09-036, § 296-23-26505, filed 4/14/97 effective 5/15/97.]

WAC 296-23-26506 Can a worker file a complaint about an independent medical examiner's conduct? Workers can send written complaints about the examiner's conduct during an independent medical examination to the self-insurer or department. Complaints received by the self-insurer and department staff must be promptly forwarded to the provider review and education unit. Based on the nature of the complaint, the department may refer the complaint to the department of health.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015. 97-09-036, § 296-23-26506, filed 4/14/97 effective 5/15/97.]

WAC 296-23-267 When may attending doctors perform impairment rating examinations? Attending doctors may perform impairment rating examinations for workers under their care at the direction of the state fund or self-insurer if licensed to perform:

- Medicine and surgery;
- Osteopathic medicine and surgery;
- Podiatric medicine and surgery;
- Dentistry; or
- Chiropractic (chiropractors must be on the approved examiners list).

Attending doctors performing rating exams must be available and willing to testify on behalf of the department, worker, or employer and accept the department fee schedule rate for testimony.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.32.112, 51.32.114 and 51.36.015. 97-09-036, § 296-23-267, filed 4/14/97 effective 5/15/97.]

WAC 296-23-270 Independent medical examinations two or more examiners. Providers who wish to offer independent medical examinations by two or more examiners must apply for a panel provider number and meet standards set by the medical director of the department. Examiners working through panels must be on the approved list.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23-270, filed 8/1/93, effective 9/1/93.]

Chapter 296-23A WAC HOSPITALS

WAC

PART 1 - GENERAL INFORMATION

- 296-23A-0100 Where can I find general information and rules pertaining to the care of workers?
296-23A-0110 When will the department or self-insurer pay for hospital services?
296-23A-0120 What services are subject to review by the department or self-insurer?
296-23A-0130 How does the department establish hospital payment rates?
296-23A-0140 How can interested persons request advance notice of changes to hospital payment rates, methods and policies?

PART 1.1 - SUBMITTING BILLS

- 296-23A-0150 How must hospitals submit bills for hospital services?
296-23A-0160 How must hospitals submit charges for ambulance and professional services?
296-23A-0170 How must hospitals bill the department or self-insurer for preadmission services?

PART 1.2 - SUPPORTING DOCUMENTATION REQUIREMENTS

- 296-23A-0180 What supporting documentation must hospitals send for hospital services?
296-23A-0190 Where must hospitals send supporting documentation for hospital services for state fund claims?
296-23A-0195 When must providers using electronic medium submit supporting documentation?

PART 2 - PAYMENT METHODS FOR HOSPITAL SERVICES

- 296-23A-0200 How does the department pay for hospital inpatient services?
296-23A-0210 How do self-insurers pay for hospital inpatient services?
296-23A-0220 How does the department or self-insurer pay for hospital outpatient services?
296-23A-0230 How does the department or self-insurer pay out-of-state hospitals for hospital services?
296-23A-0240 How does the department define and pay a new hospital?
296-23A-0250 Does a change in hospital ownership affect a hospital's payment rate?

PART 2.1 - PERCENT OF ALLOWED CHARGES (POAC) PAYMENT METHODS AND POLICIES

- 296-23A-0300 When do percent of allowed charges (POAC) payment factors apply?
296-23A-0310 What is the method for calculating percent of allowed charges (POAC) factors?

PART 2.2 - PER DIEM PAYMENT METHODS AND POLICIES

- 296-23A-0350 When do per diem rates apply?
296-23A-0360 What is the method for calculating per diem rates?

(2001 Ed.)

PART 2.3 - DIAGNOSIS-RELATED-GROUP PAYMENT METHODS AND POLICIES

- 296-23A-0400 What is a "diagnosis-related-group" payment system?
296-23A-0410 How does the department calculate diagnosis-related-group (DRG) relative weights?
296-23A-0420 How does the department determine the base price for hospital services paid using per case rates?
296-23A-0430 How does the department calculate a hospital specific case-mix adjusted average cost per case?
296-23A-0440 How does the department calculate the base price for DRG hospitals, except major teaching hospitals?
296-23A-0450 What cases does the department exclude from base price calculations?
296-23A-0460 How does the department calculate the diagnosis-related-group (DRG) per case payment rate for a particular hospital?
296-23A-0470 Which exclusions and exceptions apply to diagnosis-related-group (DRG) payments for hospital services?
296-23A-0480 Which hospitals does the department exclude from diagnosis-related-group (DRG) payments?
296-23A-0490 Which hospital services does the department include in diagnosis-related-group (DRG) rates?
296-23A-0500 When does a case qualify for high outlier status?
296-23A-0520 How does the department pay for high outlier cases?
296-23A-0530 How does a case qualify for low outlier status?
296-23A-0540 How does the department pay for low outlier cases?
296-23A-0550 Under what circumstances will the department pay for interim bills?
296-23A-0560 How does the department define and pay for hospital readmissions?
296-23A-0570 How does the department define a transfer case?
296-23A-0575 How does the department pay a transferring hospital for a transfer case?
296-23A-0580 How does the department pay the receiving hospital for a transfer case?

PART 3 - REQUESTING A HOSPITAL RATE ADJUSTMENT

- 296-23A-0600 How can a hospital request a rate adjustment?
296-23A-0610 Where must hospitals submit requests for rate adjustments?
296-23A-0620 What action will the department take upon receipt of a request for a rate adjustment?

DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER

- 296-23A-100 General information. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-100, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-16-004 (Order 87-18), § 296-23A-100, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-100, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-105 Payment for hospital inpatient and outpatient services. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-105, filed 12/1/92, effective 1/1/93; 87-24-050 (Order 87-23), § 296-23A-105, filed 11/30/87, effective 1/1/88; 87-03-005 (Order 86-47), § 296-23A-105, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-106 Reimbursement for inpatient services by per case rates and percentage of allowed charges. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-106, filed 12/1/92, effective 1/1/93.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-110 Hospital outpatient fee schedule information. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-110, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-110, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-115 Hospital outpatient services conversion factors. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-115, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 91-02-063, § 296-23A-115, filed 12/28/90,

	effective 1/28/91; 88-24-011 (Order 88-28), § 296-23A-115, filed 12/1/88, effective 1/1/89; 87-03-005 (Order 86-47), § 296-23A-115, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.		Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-120	Questionable eligibility. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-120, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-185	Transfers. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-24-050 (Order 87-23), § 296-23A-185, filed 11/30/87, effective 1/1/88.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-125	Refund of incorrect payments. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-125, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-190	Adjustment of rates. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-190, filed 12/1/92, effective 1/1/93; 87-24-050 (Order 87-23), § 296-23A-190, filed 11/30/87, effective 1/1/88.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-130	Treatment of unrelated illness or injury. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-130, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-130, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-200	General information—Hospital outpatient radiology. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-200, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-200, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-135	Closed claims. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-135, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-205	Billing procedures. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-205, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 91-17-038, § 296-23A-205, filed 8/16/91, effective 9/30/91; 89-17-039 (Order 89-09), § 296-23A-205, filed 8/10/89, effective 9/10/89; 87-03-005 (Order 86-47), § 296-23A-205, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-140	Take-home Rx's. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-140, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-210	Injection procedures. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-210, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-145	Routine laboratory procedures on admission. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-145, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-215	Responsibility for x-rays. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-215, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-150	Billing procedures. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-150, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 90-04-057, § 296-23A-150, filed 2/2/90, effective 3/5/90; 87-16-004 (Order 87-18), § 296-23A-150, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-150, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-220	Duplication of x-rays. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-220, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-155	New hospitals. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-24-050 (Order 87-23), § 296-23A-155, filed 11/30/87, effective 1/1/88.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-225	Additional views. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-225, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-160	Excluded and included services. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-160, filed 12/1/92, effective 1/1/93; 87-24-050 (Order 87-23), § 296-23A-160, filed 11/30/87, effective 1/1/88.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-230	Unlisted service or procedure. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-230, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-230, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-165	Out-of-state hospitals. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-24-050 (Order 87-23), § 296-23A-165, filed 11/30/87, effective 1/1/88.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-235	Special report. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-235, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-235, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
296-23A-170	Outliers. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-170, filed 12/1/92, effective 1/1/93; 90-04-057, § 296-23A-170, filed 2/2/90, effective 3/5/90; 87-24-050 (Order 87-23), § 296-23A-170, filed 11/30/87, effective 1/1/88.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-240	Head and neck. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-240, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-240, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-240, filed 8/10/89, effective 9/10/89; 87-03-005 (Order 86-47), § 296-23A-240, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
296-23A-175	Interim bills. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-24-050 (Order 87-23), § 296-23A-175, filed 11/30/87, effective 1/1/88.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.	296-23A-242	Chest. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-242, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-242, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-242, filed 8/10/89, effective 9/10/89; 87-03-005 (Order 86-47), § 296-23A-242, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93.
296-23A-180	Readmissions. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-24-050 (Order 87-23), § 296-23A-180, filed 11/30/87, effective 1/1/88.]		

- Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-244 Spine and pelvis. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-244, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-244, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-244, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-244, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-244, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-246 Upper extremities. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-246, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-246, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-246, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-246, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-246, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-248 Lower extremities. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-248, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-248, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-248, filed 8/10/89, effective 9/10/89; 87-03-005 (Order 86-47), § 296-23A-248, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-250 Abdomen. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-250, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-250, filed 3/8/91, effective 5/1/91; 87-03-005 (Order 86-47), § 296-23A-250, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-252 Gastrointestinal tract. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-252, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-252, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-252, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-252, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-252, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-254 Urinary tract. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-254, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-254, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-254, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-254, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-254, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-256 Gynecological and obstetrical. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-256, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-256, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-256, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-256, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-256, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-258 Vascular system. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-258, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-258, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-258, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-258, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-258, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-260 Miscellaneous. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-260, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-260, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-260, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-260, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-260, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-262 Diagnostic ultrasound. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-262, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-262, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-262, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-262, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-262, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-264 Therapeutic radiology. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-264, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-264, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-264, filed 8/10/89, effective 9/10/89; 87-03-005 (Order 86-47), § 296-23A-264, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-266 Nuclear medicine. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-266, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-266, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-266, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-266, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-266, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-268 Therapeutic. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-268, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-268, filed 3/8/91, effective 5/1/91; 87-03-005 (Order 86-47), § 296-23A-268, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-300 General information—Hospital outpatient pathology and laboratory. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-300, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-17-039 (Order 89-09), § 296-23A-300, filed 8/10/89, effective 9/10/89; 87-03-005 (Order 86-47), § 296-23A-300, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
- 296-23A-310 Billing procedures. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-310, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-310, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
- 296-23A-315 Unlisted service or procedure. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-315, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-315, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
- 296-23A-320 Special report. [Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 93-16-072, § 296-23A-320, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-320, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
- 296-23A-325 Panel or profile tests. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-325, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-325, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-325, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-325, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-325, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.

- 296-23A-330 Urinalysis. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-330, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-330, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-330, filed 8/10/89, effective 9/10/89; 87-03-005 (Order 86-47), § 296-23A-330, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-335 Chemistry and toxicology. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-335, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-335, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-335, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-335, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-335, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-340 Hematology. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-340, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-340, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-340, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-340, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-340, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-345 Immunology. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-345, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-345, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-345, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-345, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-345, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-350 Microbiology. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-350, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-350, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-350, filed 8/10/89, effective 9/10/89; 87-03-005 (Order 86-47), § 296-23A-350, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-355 Cytopathology. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-355, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-355, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-355, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-355, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-355, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-360 Miscellaneous. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 92-24-066, § 296-23A-360, filed 12/1/92, effective 1/1/93; 91-07-008, § 296-23A-360, filed 3/8/91, effective 5/1/91; 89-17-039 (Order 89-09), § 296-23A-360, filed 8/10/89, effective 9/10/89; 87-16-004 (Order 87-18), § 296-23A-360, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-360, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-400 Hospital outpatient physical therapy rules. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 96-10-086, § 296-23A-400, filed 5/1/96, effective 7/1/96; 95-05-072, § 296-23A-400, filed 2/15/95, effective 3/18/95. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159. 94-02-045, § 296-23A-400, filed 12/30/93, effective 3/1/94; 93-16-072, § 296-23A-400, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-08-002 (Order 89-01), § 296-23A-400, filed 3/23/89, effective 5/1/89; 87-03-005 (Order 86-47), § 296-23A-400, filed 1/8/87.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.
- 296-23A-410 Muscle testing. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-410, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-415 Modalities. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-415, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-420 Procedures. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 87-03-005 (Order 86-47), § 296-23A-420, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-425 Tests and measurements. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 91-17-038, § 296-23A-425, filed 8/16/91, effective 9/30/91; 87-16-004 (Order 87-18), § 296-23A-425, filed 7/23/87; 87-03-005 (Order 86-47), § 296-23A-425, filed 1/8/87.] Repealed by 93-16-072, filed 8/1/93, effective 9/1/93. Statutory Authority: RCW 51.04.020, 51.04.030 and 1993 c 159.
- 296-23A-430 Work hardening. [Statutory Authority: RCW 51.04.020(4) and 51.04.030. 89-08-002 (Order 89-01), § 296-23A-430, filed 3/23/89, effective 5/1/89.] Repealed by 97-06-066, filed 2/28/97, effective 4/1/97. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080.

PART 1 - GENERAL INFORMATION

WAC 296-23A-0100 Where can I find general information and rules pertaining to the care of workers? Hospitals may find general information and rules pertaining to the care of workers in chapters 296-20, 296-21 and 296-23 WAC, department bulletins and other department publications. This list is not exhaustive and hospitals remain responsible for other applicable rules.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0100, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0110 When will the department or self-insurer pay for hospital services? The department or self-insurer will pay for hospital services when proper and necessary for the treatment of the accepted occupational disease or injury.

See WAC 296-20-01002 for the definition of medically necessary.

See WAC 296-20-075 for further rules regarding hospitalization.

See WAC 296-20-03001 for treatment requiring authorization.

See WAC 296-20-03002 for treatment not authorized.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0110, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0120 What services are subject to review by the department or self-insurer? The department uses utilization review criteria and all hospital inpatient and outpatient services and billed charges are subject to review by the department, self-insurer or a representative chosen by the department or self-insurer.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0120, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0130 How does the department establish hospital payment rates? The department will establish and update hospital payment rates, methods and policies in consultation with interested persons at times determined by the department. The department will publish a description of payment methods, rates, and policies for hospital services at least thirty calendar days prior to implementation.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0130, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0140 How can interested persons request advance notice of changes to hospital payment rates, methods and policies? The department will give at least thirty calendar days notice to interested persons who request advance notice of changes to hospital payment rates, methods and policies. Interested persons may request advance notice by contacting the department at the following address:

Department of Labor and Industries
Health Services Analysis
Mailing List for Hospital Payment Rates
P.O. Box 44322
Olympia, Washington 98504-4322

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0140, filed 2/28/97, effective 4/1/97.]

PART 1.1 - SUBMITTING BILLS

WAC 296-23A-0150 How must hospitals submit bills for hospital services? Hospitals must submit bills for hospital services using the current National Uniform Billing Form (billing form), or electronically using department file format specifications. Providers using the paper billing form must follow both the billing instructions provided by the department and the Washington state version of the *National Uniform Billing Data Element Specifications* as adopted by the National Uniform Billing Committee.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0150, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0160 How must hospitals submit charges for ambulance and professional services? Hospitals must submit charges for ambulance services and professional services provided by hospital staff physicians on the Health Insurance Claim Form, HCFA 1500 using the provider account number(s) assigned by the department for these services. Hospitals using any of the electronic transfer options must follow department instructions for electronic billing.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0160, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0170 How must hospitals bill the department or self-insurer for preadmission services? Preadmission services performed in a hospital outpatient setting within one day prior to hospital admission must be billed as hospital inpatient services.

(2001 Ed.)

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0170, filed 2/28/97, effective 4/1/97.]

PART 1.2 - SUPPORTING DOCUMENTATION REQUIREMENTS

WAC 296-23A-0180 What supporting documentation must hospitals send for hospital services? Hospitals must send the following supporting documentation for hospital services:

- Admission history and physical examination
- Discharge summary for stays over forty-eight hours
- Emergency room reports
- Operative reports
- Anesthesia records
- Other documentation as requested by the department or self-insurer.

Hospitals must place the worker's name and claim number on the upper right-hand corner of each page of supporting documentation submitted.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0180, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0190 Where must hospitals send supporting documentation for hospital services for state fund claims? Do not submit supporting documentation with the bill for services. Hospitals must send supporting documentation for hospital services for state fund claims to:

Department of Labor and Industries
Claims Section
P.O. Box 44291
Olympia, WA 98504-4291

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0190, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0195 When must providers using electronic medium submit supporting documentation? Providers using any of the electronic transfer options provided by the department must send the department or self-insurer the required supporting documentation within thirty calendar days of the date billing information was sent to the department on electronic medium. Providers must comply with the electronic billing instructions supplied by the department regarding the submission of hospital bill documentation.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0195, filed 2/28/97, effective 4/1/97.]

PART 2 - PAYMENT METHODS FOR HOSPITAL SERVICES

WAC 296-23A-0200 How does the department pay for hospital inpatient services? The department will pay for hospital inpatient services according to the following table:

[Title 296 WAC—p. 555]

<i>Hospital Type or Location</i>	<i>Do Diagnosis Related Group (DRG) payment methods apply?</i>	<i>Do per diem payment methods apply?</i>	<i>Do percent of allowed charges (POAC) payment methods apply to hospital inpatient services?</i>
Children's Hospitals	No	No	Yes, paid 100% of allowed charges
Chronic Pain Management Program	Exempt, paid per department agreement.	Exempt, paid per department agreement.	Exempt, paid per department agreement.
Health Maintenance Organizations	No	No	Yes, paid 100% of allowed charges
Military	No	No	Yes, paid 100% of allowed charges
Veterans Administration	No	No	Yes, paid 100% of allowed charges
State psychiatric facility	No	No	Yes, paid 100% of allowed charges
Washington rural (Peer Group A)	No	Yes, statewide per diem rates apply for five DRG categories: Chemical dependency, psychiatric, rehabilitation, medical, and surgical DRGs	No
All other Washington hospitals	Yes	Yes, statewide average per diem rates apply for designated categories: Chemical dependency, psychiatric, rehabilitation, low volume medical, and low volume surgical DRGs	Yes, applies to low cost outlier payments and high cost outlier payments above the high cost outlier threshold

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.36.080. 00-06-027, § 296-23A-0200, filed 2/24/00, effective 3/26/00; 97-06-066, § 296-23A-0200, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0210 How do self-insurers pay for hospital inpatient services? Self-insurers will pay for hospital inpatient services using percent of allowed charges (POAC) factors, according to the following table:

<i>Hospital Type or Location</i>	<i>Do percent of allowed charges (POAC) payment methods apply to hospital inpatient services?-</i>
Military, Veteran's Administration, Health Maintenance Organizations, State Psychiatric Facilities, Children's Hospitals	Yes, paid 100% of allowed charges
All other Washington hospitals	Yes, paid the hospital specific POAC factor

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.36.080. 00-06-027, § 296-23A-0210, filed 2/24/00, effective 3/26/00; 97-06-066, § 296-23A-0210, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0220 How does the department or self-insurer pay for hospital outpatient services? The department or self-insurer will pay for hospital outpatient services according to the following table:

<i>Hospital Type or Location</i>	<i>Do percent of allowed charges (POAC) payment methods apply?</i>	<i>Does the department's Medical Aid Rules and Fee Schedules apply to hospital outpatient radiology, laboratory, pathology and physical therapy services?</i>
Children's Hospitals	Yes, paid 100% of allowed charges	Yes
Chronic Pain Management Program	Exempt, paid per department agreement	Exempt, paid per department agreement
Health Maintenance Organizations	Yes, paid 100% of allowed charges	Yes
Military	Yes, paid 100% of allowed charges	No, paid 100% of allowed charges
Veterans Administration	Yes, paid 100% of allowed charges	No, paid 100% of allowed charges
State psychiatric facility	Yes, paid 100% of allowed charges	Yes
Washington rural (Peer Group A)	Yes, applies to hospital outpatient services except radiology, laboratory, pathology and physical therapy	Yes

<i>Hospital Type or Location</i>	<i>Do percent of allowed charges (POAC) payment methods apply?</i>	<i>Does the department's Medical Aid Rules and Fee Schedules apply to hospital outpatient radiology, laboratory, pathology and physical therapy services?</i>
All other Washington hospitals	Yes, applies to hospital outpatient services except radiology, laboratory, pathology and physical therapy	Yes

Hospitals are reimbursed only for the technical component of rates listed in the fee schedules, for outpatient radiology, pathology and laboratory services.

See chapter 296-23 WAC for rules on radiology, pathology, laboratory, physical therapy and work hardening services.

See WAC 296-20-132 and 296-20-135 for information on the conversion factor used for hospital outpatient services.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.36.080. 00-06-027, § 296-23A-0220, filed 2/24/00, effective 3/26/00; 97-06-066, § 296-23A-0220, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0230 How does the department or self-insurer pay out-of-state hospitals for hospital ser-

vices? The department or self-insurer pays out-of-state hospitals for hospital services using a percent of allowed charges (POAC) factor or department fee schedule. The POAC factor may differ for services performed in inpatient and outpatient settings. Payment rates to hospitals located outside of Washington state are calculated by multiplying the out-of-state percent of allowed charges factor (POAC) by the allowed charges.

Amount paid = (out-of-state POAC Factor) X (Allowed Charges).

Out-of-state hospital providers should bill and the department or self-insurer will pay out-of-state hospitals services according to the following table:

<i>Hospital Professional and Ambulance Services</i>	<i>Hospital Outpatient Services</i>	<i>Hospital Inpatient Services</i>
Professional and ambulance services should be billed with CPT and HCPCS codes on HCFA 1500 forms under separate provider numbers. These services will be paid using the fee schedule rates and payment policies stated in the Washington Medical Aid Rules and Fee Schedules.	All hospital outpatient services should be billed on UB forms under the hospital provider number with revenue codes. These services will be paid at the out-of-state percent of allowed charges (POAC) factor as stated in the Washington Medical Aid Rules and Fee Schedules.	All hospital inpatient services should be billed on UB forms under the hospital provider number using revenue codes. These services will be paid at the out-of-state percent of allowed charges (POAC) factor as stated in the Washington Medical Aid Rules and Fee Schedules.
Military and veteran's administration professional and ambulance services should be billed on HCFA 1500 forms and will be paid at 100% of allowed charges.	Military, veteran's administration, health maintenance organization, children's, and state-run psychiatric hospitals will be paid at 100% of allowed charges for outpatient hospital services.	Military, veteran's administration, health maintenance organization, children's, and state-run psychiatric hospitals will be paid at 100% of allowed charges for inpatient hospital services.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.36.080. 00-09-078, § 296-23A-0230, filed 4/18/00, effective 7/1/00; 97-06-066, § 296-23A-0230, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0240 How does the department define and pay a new hospital? New hospitals are those open for less than one year prior to the implementation of the department's most recent hospital payment rates. The department will pay new hospitals according to the following table:

<i>Hospital Type or Location</i>	<i>What Diagnosis Related Group (DRG) base price applies?</i>	<i>What Per Diem Payment Rates Apply?</i>	<i>What percent of allowed charges (POAC) factor applies?</i>
Military, Veterans Administration, State Psychiatric, Health Maintenance Organization, Children's,	Exempt	Exempt	Paid 100% of allowed charges
Chronic Pain Management Program	Exempt, paid per department agreement	Exempt, paid per department agreement	Exempt, Paid per department agreement
Washington Rural Hospital (Peer Group A)	Exempt	Washington statewide average per diem rates	Washington statewide average POAC
Other Washington Hospital	Weighted median case-mix adjusted average cost per case for Washington DRG hospitals, except major teaching hospitals	Washington statewide average per diem rates	Washington statewide average POAC

A new hospital will be paid using its hospital-specific POAC within three years of receiving a provider account number(s) from the department.

[Statutory Authority: RCW 51.04.020, 51.04.030, 51.36.080. 00-06-027, § 296-23A-0240, filed 2/24/00, effective 3/26/00; 97-06-066, § 296-23A-0240, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0250 Does a change in hospital ownership affect a hospital's payment rate? A change in ownership does not constitute the creation of a new hospital. If a hospital changes ownership, rates will remain the same as those payable to the previous owner.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0250, filed 2/28/97, effective 4/1/97.]

PART 2.1 - PERCENT OF ALLOWED CHARGES (POAC) PAYMENT METHODS AND POLICIES

WAC 296-23A-0300 When do percent of allowed charges (POAC) payment factors apply? The department may designate from time to time, those hospitals and hospital services to be paid using POAC factors.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0300, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0310 What is the method for calculating percent of allowed charges (POAC) factors? POAC factors are based on Medicare cost report data and are calculated by dividing adjusted operating expenses by adjusted patient revenues. The department will allow costs for graduate medical education and charity care. Allowable costs for charity care shall not exceed a maximum of two percent of the facility's total allowable costs. A hospital's POAC factor shall not exceed one hundred percent of allowed charges.

Payment rates are calculated by multiplying the POAC factor by the allowed charges.

Amount Paid = (POAC Factor) X (Allowed Charges)

Each hospital will be notified of their revised POAC factor thirty days prior to implementation. Incorrect data or erroneous calculations can be appealed in accordance with WAC 296-23A-0600.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0310, filed 2/28/97, effective 4/1/97.]

PART 2.2 - PER DIEM PAYMENT METHODS AND POLICIES

WAC 296-23A-0350 When do per diem rates apply? The department may designate from time to time, those hospitals and hospital services paid on a per diem basis. For example, the department may develop per diem rates for the following diagnosis-related-group (DRG) categories:

- Psychiatric;
- Rehabilitation;
- Substance abuse;
- Medical;
- Surgical; and
- Other categories as determined by the department.

[Title 296 WAC—p. 558]

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0350, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0360 What is the method for calculating per diem rates? Per diem rates are calculated by dividing the total costs for all relevant cases in the historical data base by the total number of days. The total number of days is equal to the sum of the number of days for each relevant case. The number of days per case is equal to last date of service minus the first date of service. The department will allocate costs at the detailed revenue code level using Medicare cost report data and Medicare definitions for allowable costs. The department will allow costs for graduate medical education and charity care. Allowable costs for charity care shall not exceed a maximum of two percent of the facility's total allowable costs.

Payment rates are equal to the applicable per diem rate multiplied by the number of days allowed by the department. The department does not pay for the day of discharge. Payment shall not exceed allowed billed charges.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0360, filed 2/28/97, effective 4/1/97.]

PART 2.3 - DIAGNOSIS-RELATED-GROUP PAYMENT METHODS AND POLICIES

WAC 296-23A-0400 What is a "diagnosis-related-group" payment system? A diagnosis-related-group (DRG) system categorizes patients into clinically coherent and homogenous groups with respect to resource use. The department will use an all-patient grouper to perform the diagnostic categorization. To the extent feasible, where DRG relative weights meet acceptable reliability and validity standards, the department will use DRG per case rates for payment of hospital inpatient services.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0400, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0410 How does the department calculate diagnosis-related-group (DRG) relative weights? In calculating DRG relative weights, the department will:

(1) Allocate costs for hospital services at a detailed revenue code level using Medicare cost report data and Medicare definitions for allowable costs. The department will allow costs for graduate medical education and charity care. Allowable costs for charity care shall not exceed a maximum of two percent of the facility's total allowable costs.

(2) Classify department hospital admissions data and hospital discharge data in the Washington state department of health's comprehensive hospital abstract reporting system (CHARS), using an all-patient grouper.

(3) Establish relative weights from department of labor and industries' hospital admission data. If the department's data is not sufficient to calculate stable relative weights, the department may use hospital discharge data in the Washington state department of health's comprehensive hospital abstract reporting system (CHARS) or another appropriate data source.

(4) Exclude the following types of cases from DRG relative weight calculations: Transfers, statistical outliers, length

(2001 Ed.)

of stay equal to zero, psychiatric, substance abuse and rehabilitation DRGs, out-of-state hospitals, other hospitals and services designated as exempt from DRG payment rates.

See WAC 296-23A-0470 and 296-23A-0480 for exclusions and exceptions to DRG payments for hospital services.

(5) Test each DRG statistically for adequacy of sample size to ensure that relative weights meet acceptable reliability and validity standards.

(6) Replace unstable department relative weights with stable CHARS derived relative weights.

(7) Standardize department and CHARS relative weights to a statewide case-mix index of 1.0.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0410, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0420 How does the department determine the base price for hospital services paid using per case rates? The department determines the base price for hospital services paid using per case rates according to the following table:

Type of Hospital	Base Price
Major Teaching Hospital:	Hospital-specific case-mix adjusted average cost per case
Harborview Medical Center or University of Washington	
Other DRG Hospital	Weighted median case-mix adjusted average cost per case for DRG hospitals, except major teaching hospitals

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0420, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0430 How does the department calculate a hospital specific case-mix adjusted average cost per case? The department determines the case-mix adjusted average cost per case for each hospital by:

(1) Allocating costs for hospital services at a detailed revenue code level using Medicare cost report data and Medicare definitions for allowable costs. The department will allow costs for graduate medical education and charity care. Allowable costs for charity care shall not exceed a maximum of two percent of the facility's total allowable costs;

(2) Totaling the costs of all DRG cases;

(3) Dividing the total by the number of cases; and

(4) Then dividing that number by the hospital's case-mix index.

(5) Per case costs are indexed to the payment period for inflation and other factors.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0430, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0440 How does the department calculate the base price for DRG hospitals, except major teaching hospitals? The department calculates the base price for DRG hospitals, except major teaching hospitals by:

(1) Calculating each hospital's case-mix adjusted average cost per case;

(2001 Ed.)

(2) Weighting each hospital's case-mix adjusted average cost per case by the number of cases at that hospital;

(3) Determining the median (fiftieth percentile) of the list of case-mix adjusted average costs per case.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0440, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0450 What cases does the department exclude from base price calculations? The department excludes the following types of cases from base price calculations:

- Transfers;
- Statistical outliers;
- Length of stay equal to zero;
- Psychiatric, substance abuse and rehabilitation DRGs;
- Out-of-state hospitals; and
- Other hospitals and services designated as exempt from DRG payment rates.

See WAC 296-23A-0470 and 296-23A-0480 for exclusions and exceptions to DRG payments for hospital services.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0450, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0460 How does the department calculate the diagnosis-related-group (DRG) per case payment rate for a particular hospital? The DRG per case rate for a particular hospital is calculated by multiplying the assigned DRG relative weight for that admission by the applicable base price.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0460, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0470 Which exclusions and exceptions apply to diagnosis-related-group (DRG) payments for hospital services? The following exclusions and exceptions apply to DRG payments for hospital services:

- Psychiatric, rehabilitation, and chemical dependency (substance abuse) services will be excluded from payment by DRG rates. These services will be paid using per diem payment rates.
- Ambulance and air transportation services are excluded from DRG payments.
- Bills assigned to a DRG that is defined as ungroupable will be denied.
- Bills where the principal diagnosis is invalid as a discharge diagnosis will be denied.
- Bills where the injured worker has been admitted and discharged in less than twenty-four hours will be reviewed by the department and may be paid as hospital outpatient services.
- The department may choose to exclude other DRGs from DRG payment rates due to concerns about access, case volume or other considerations. These services will be paid using the applicable percent of allowed charges (POAC) factor and per diem rates.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0470, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0480 Which hospitals does the department exclude from diagnosis-related-group (DRG) payments? The following hospitals are excluded from DRG payments:

- Military, Veterans Administration, state psychiatric facilities, health maintenance organizations (HMO), and children's hospitals will be paid their allowed charges.
- Department-approved chronic pain management programs will be paid according to department agreement or contract.
- Peer Group A hospitals, as defined by the department of health, will be paid using per diem rates.
- Hospitals located outside of Washington will be paid a percent of allowed charges (POAC).
- Other hospitals, as determined by the department, may be excluded from DRG reimbursement rates due to concerns about access, case volume or other considerations. These facilities will be paid using the applicable POAC factor and per diem rates.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0480, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0490 Which hospital services does the department include in diagnosis-related-group (DRG) rates? Unless otherwise specified, the department will include in the DRG rate all hospital services provided to an injured worker admitted to a hospital. Hospital services must be medically necessary for the treatment of the accepted occupational disease or injury.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0490, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0500 When does a case qualify for high outlier status? Outlier payments apply only to diagnosis-related-group (DRG) reimbursed cases with unusually high or low costs. Outlier status does not apply to cases paid using a percent of allowed charges (POAC) factor or per diem rates.

A case is considered a high cost outlier if the costs for the case exceed the outlier threshold for the assigned diagnosis-related-group. The costs for a case are determined by multiplying the allowed charges for the case by the hospital specific POAC factor. The threshold used to define a high outlier case is the greater of a dollar threshold of twelve thousand dollars or two standard deviations above the statewide average cost for each DRG paid by the department.

The dollar threshold may be adjusted annually for inflation or other factors as determined by the department. The standard deviations for DRGs will be computed from all relevant cases in the historical data base, excluding statistical outliers.

[Statutory Authority: RCW 51.04.020, 51.04.030. 00-24-066, § 296-23A-0500, filed 12/1/00, effective 1/1/01. Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0500, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0520 How does the department pay for high outlier cases? Cases defined as high cost outliers will be reimbursed at the diagnosis-related-group (DRG) payment rate plus one hundred percent of costs in excess of

[Title 296 WAC—p. 560]

the threshold. Costs are determined by multiplying the allowed charges by the hospital specific percent of allowed charges (POAC) factor.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0520, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0530 How does a case qualify for low outlier status? To qualify as a low outlier, the allowed charges multiplied by that hospital's percent of allowed charges (POAC) factor must be less than ten percent of the state-wide diagnosis-related-group (DRG) rate or five hundred dollars whichever is greater. The standard deviations for DRGs will be computed from all relevant cases in the historical data base, excluding statistical outliers.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0530, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0540 How does the department pay for low outlier cases? Low outlier cases are paid by multiplying each hospital's specific percent of allowed charges (POAC) factor by the allowed charges for the case.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0540, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0550 Under what circumstances will the department pay for interim bills? The department will deny interim bills which are assigned to diagnosis-related-groups (DRGs) paid per case rates by the department.

If an interim bill is coded as a diagnosis-related-group (DRG) not paid per case rates by the department, then the bill will be paid using the applicable percent of allowed charges (POAC) factor and per diem rates. If a subsequent bill coded as a DRG paid per case rates by the department, for the same injured worker, has a first date of service within seven days of the last date of service of the previous bill, then the bills will be subject to review and adjustment by the department.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0550, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0560 How does the department define and pay for hospital readmissions? The department will review hospital readmissions occurring within seven days of discharge and will determine whether the second admission resulted from premature discharge. Payment for services associated with readmission will depend upon the review. For example:

- If the second admission is determined unnecessary, reimbursement may be denied.
- If the admission was avoidable, the two admissions may be combined and a single diagnosis-related-group (DRG) payment made.
- If two different DRG assignments are involved, reimbursement for the appropriate DRG will be based upon review of the case.
- Readmissions involving different hospitals will be reviewed by the department and may be paid using the payment method for transfers.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0560, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0570 How does the department define a transfer case? A transfer case is defined as an injured worker's admission to another acute care hospital within seven days of that worker's previous discharge. All bills for transfer cases will be subject to review by the department and payment will be determined based on that analysis. The transferring hospital may qualify for high and low outlier status.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0570, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0575 How does the department pay a transferring hospital for a transfer case? When the stay at the transferring hospital is a diagnosis-related-group (DRG) paid by the department, and does not qualify as a low outlier, the transferring hospital is paid a graduated per diem rate for each day of care allowed by the department. If the case qualifies as a low cost outlier, the hospital will be paid the graduated per diem amount or low cost outlier payment amount, whichever is lower. The per diem rate is determined by dividing that hospital's rate for the appropriate DRG by that DRG's average length of stay as determined by the department. Payment for the first day of service will be two times the per diem rate. For subsequent allowed days, the basic per diem rate will be paid up to the full DRG payment amount. Unless the case qualifies as a high outlier, payment to the transferring hospital will not exceed the appropriate DRG rate that would have been paid had the injured worker not been transferred to another hospital.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0575, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0580 How does the department pay the receiving hospital for a transfer case? The hospital receiving a transfer will be paid according to the department's review of the case. If the receiving hospital's stay is a diagnosis-related-group (DRG) paid by the department, then the hospital will receive the appropriate per case and outlier payments. If the case is not a DRG paid by the department, then the hospital is paid using applicable percent of allowed charges (POAC) factor or per diem rates.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0580, filed 2/28/97, effective 4/1/97.]

PART 3 - REQUESTING A HOSPITAL RATE ADJUSTMENT

WAC 296-23A-0600 How can a hospital request a rate adjustment? Hospitals may submit a request for adjustment to their rate if:

- The rate methodology or principles of reimbursement established in department publications were incorrectly applied, or
- Incorrect data or erroneous calculations were used in the establishment of the hospital's rate.

In all circumstances, requests for adjustments to rates must show how the rate adjustment was calculated and contain sufficient detail to permit an audit. Requests must specify

(2001 Ed.)

the nature and the amount of the adjustment sought. The burden of proof is on the requesting hospital.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0600, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0610 Where must hospitals submit requests for rate adjustments? Hospitals must submit requests for rate adjustments in writing to:

Department of Labor and Industries
 Health Services Analysis
 Request for Hospital Rate Adjustment
 P.O. Box 44322
 Olympia, Washington 98504-4322.

Requests must be received within sixty days after the facility receives notice of its payment rates.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0610, filed 2/28/97, effective 4/1/97.]

WAC 296-23A-0620 What action will the department take upon receipt of a request for a rate adjustment? Upon receipt of the request, the department shall determine the need for a conference with the hospital and will contact the facility to arrange a conference if needed. The conference, if needed, must be held within sixty days of the department's receipt of the request.

Within thirty calendar days of the receipt of the request for review or the date of the conference, the department shall notify the facility of the action to be taken by the department.

If the department's review of the material submitted by the hospital results in a favorable determination for the hospital, the department will modify the hospital's payment rate(s). The revised rate(s) will apply to all bills with a date of admission on or after a date chosen by the department. The chosen date will be within one hundred twenty days of the department's and hospital's agreement to modify the rate(s).

If the department's review of the material submitted by the hospital results in an unfavorable determination for the hospital, the hospital may file an appeal with the board of industrial insurance appeals.

[Statutory Authority: RCW 51.04.020, 51.04.030 and 51.36.080. 97-06-066, § 296-23A-0620, filed 2/28/97, effective 4/1/97.]

**Chapter 296-24 WAC
 GENERAL SAFETY AND HEALTH STANDARDS**

WAC

**PART A-1
 GENERAL, EDUCATIONAL, MEDICAL AND FIRST-AID
 REQUIREMENTS**

296-24-001	Foreword.
296-24-003	Subsections, subdivisions, items, subitems, and segments.
296-24-005	Purpose and scope.
296-24-006	Equipment approval by nonstate agency or organization.
296-24-007	Incorporation of standards of national organization.
296-24-008	Incorporation of standards of federal agency.
296-24-010	Variance and procedure.
296-24-012	Definitions applicable to all sections of this chapter.
296-24-015	Education and first-aid standards.
296-24-020	Management's responsibility.
296-24-025	Employee's responsibility.

296-24-040	Accident prevention programs.
296-24-045	Safety and health committee plan.
296-24-055	Safety bulletin board.
296-24-061	First-aid requirements.
296-24-06105	What workplaces does this rule apply to?
296-24-06110	What is the purpose of this rule?
296-24-06115	What definitions apply to this section?
296-24-06120	How must an employer ensure that first-aid assistance is available in the workplace?
296-24-06125	How many employees must be trained in first aid?
296-24-06130	What must first-aid training cover?
296-24-06135	How often must employees complete first-aid training?
296-24-06140	How must an employer document first-aid training?
296-24-06145	What is the requirement for first-aid supplies?
296-24-06150	What is the requirement to provide a first-aid station?
296-24-06155	APPENDIX 1 Evaluation worksheet for the first-aid response plan.
296-24-06160	APPENDIX 2—First-aid kit guidance.
296-24-073	Safe place standards.

PART A-2

PERSONAL PROTECTIVE EQUIPMENT

296-24-075	Personal protective equipment.
296-24-07501	General requirements.
296-24-078	Eye and face protection.
296-24-07801	General.
296-24-084	Occupational head protection.
296-24-086	Personal flotation devices.
296-24-088	Occupational foot protection.
296-24-090	Hand protection.
296-24-092	Electrical protective equipment.
296-24-094	Lighting and illumination.
296-24-096	Appendix A to Part A-2—References for further information (nonmandatory).
296-24-098	Appendix B to Part A-2—Nonmandatory compliance guidelines for hazard assessment and personal protective equipment selection.

PART A-3

LATE NIGHT RETAIL WORKER CRIME PROTECTION

296-24-102	Scope and application.
296-24-10203	General requirements.

PART A-4

SAFETY PROCEDURES

296-24-110	The control of hazardous energy (lockout/tagout).
296-24-11001	Scope, application, and purpose.
296-24-11003	Definitions applicable to this part.
296-24-11005	General.
296-24-11007	Application of control.
296-24-11009	Release from lockout or tagout.
296-24-11011	Additional requirements.
296-24-11013	Reserved.
296-24-11015	Reserved.
296-24-11017	Reserved.
296-24-119	Appendices.

PART B-1

SANITATION, TEMPORARY LABOR CAMPS AND NONWATER CARRIAGE DISPOSAL SYSTEMS

Sanitation

296-24-120	Sanitation.
296-24-12001	Scope.
296-24-12002	Definitions.
296-24-12003	General requirements.
296-24-12005	Water supply.
296-24-12007	Toilet facilities.
296-24-12009	Washing facilities.
296-24-12011	Change rooms.
296-24-12017	Consumption of food and beverages on the premises.
296-24-12019	Waste disposal.
296-24-12021	Vermin control.
296-24-125	Temporary labor camps.
296-24-12501	What requirements apply to camp sites?
296-24-12503	How must camp shelters be constructed?
296-24-12504	What electricity must be provided for temporary labor camps?
296-24-12505	What requirements apply to the water supply?
296-24-12507	Must an employer provide toilet facilities for the camp?
296-24-12509	Must sewer lines connect to public sewers?
296-24-12511	What facilities must an employer provide for laundry, handwashing, and bathing?

296-24-12513	What lighting must an employer provide for camp buildings?
296-24-12515	What requirements apply to refuse disposal?
296-24-12517	What cooking and food-handling facilities must be provided in temporary labor camps?
296-24-12519	Must an employer provide insect and rodent control?
296-24-12521	What first-aid facilities must be available in the camp?
296-24-12523	When must an employer report communicable diseases in a camp?

PART B-2

SAFETY COLOR CODE FOR MARKING PHYSICAL HAZARDS, ETC., WINDOW WASHING

Color Code—Marking Physical Hazards

296-24-135	Safety color code for marking physical hazards.
296-24-13501	Color identification.
296-24-140	Specifications for accident prevention signs and tags.
296-24-14001	Scope.
296-24-14003	Definitions.
296-24-14005	Classification of signs according to use.
296-24-14007	Sign design and colors.
296-24-14009	Sign wordings.
296-24-14011	Accident prevention tags.
296-24-145	Window washing.
296-24-14501	Definitions.
296-24-14503	Application.
296-24-14505	Protection of persons engaged at window cleaning.
296-24-14507	General.
296-24-14509	Belt terminals, anchors and bolts.
296-24-14511	Belts.
296-24-14513	Anchor installations.
296-24-14515	Reversible and pivot windows.
296-24-14517	Ladders.
296-24-14519	Boatswain's chairs.

PART C

MACHINERY AND MACHINE GUARDING

296-24-150	Machinery and machine guarding—General requirements for all machines—Scope and application.
296-24-15001	Machine guarding.
296-24-15003	Anchoring fixed machinery.
296-24-15005	Means to prevent slipping.
296-24-15007	Machines shall be stopped when making repairs.
296-24-15009	Counterweights.
296-24-165	Fixed and portable power tool requirements.
296-24-16501	Definitions.
296-24-16503	Machine construction general.
296-24-16505	Machine controls and equipment.
296-24-16507	Hand-fed ripsaws.
296-24-16509	Hand-fed crosscut table saws.
296-24-16511	Circular resaws.
296-24-16513	Self-feed circular saws.
296-24-16515	Swing cutoff saws.
296-24-16517	Radial saws.
296-24-16519	Bandsaws and band resaws.
296-24-16521	Jointers.
296-24-16523	Tenoning machines.
296-24-16525	Boring and mortising machines.
296-24-16527	Shapers and similar equipment.
296-24-16529	Planing, molding, sticking, and matching machines.
296-24-16531	Profile and swing-head lathes and heel turning machine.
296-24-16533	Sanding machines.
296-24-16535	Veneer cutters and wringers.
296-24-16537	Miscellaneous machines.
296-24-16539	Inspection and maintenance of machinery.
296-24-180	Abrasive wheel machinery.
296-24-18001	Definitions.
296-24-18003	General requirements.
296-24-18005	Guarding of abrasive wheel machinery.
296-24-18007	Flanges.
296-24-18009	Mounting.
296-24-190	Mills and calenders in the rubber and plastics industries.
296-24-19001	Definitions.
296-24-19003	General requirements.
296-24-19005	Mill safety controls.
296-24-19007	Calender safety controls.
296-24-19009	Protection by location.
296-24-19011	Trip and emergency switches.
296-24-19013	Stopping limits.
296-24-19015	Alarm.
296-24-195	Mechanical power presses.
296-24-19501	Definitions.

296-24-19503 General requirements.
 296-24-19505 Mechanical power press guarding and construction, general.
 296-24-19507 Safeguarding the point of operation.
 296-24-19509 Design, construction, setting and feeding of dies.
 296-24-19511 Inspection, maintenance and modification of presses.
 296-24-19513 Operation of power presses.
 296-24-19514 Reports of injuries to employees operating mechanical power presses.
 296-24-19517 Presence sensing device initiation (PSDI).
 296-24-197 Compactors.
 296-24-200 Forging machines.
 296-24-20001 Definitions.
 296-24-20003 General requirements.
 296-24-20005 Hammers, general.
 296-24-20007 Presses.
 296-24-20009 Power-driven hammers.
 296-24-20011 Gravity hammers.
 296-24-20013 Forging presses.
 296-24-20015 Trimming presses.
 296-24-20017 Upsetters.
 296-24-20019 Other forging equipment.
 296-24-20021 Other forge facility equipment.
 296-24-205 Safeguarding power transmission parts.
 296-24-20501 What is an employer's duty to protect employees from hazards of power transmission parts?
 296-24-20503 What requirements must guards meet?
 296-24-20505 What requirements must devices meet?
 296-24-20507 What requirements must safeguarding by distance meet?
 296-24-20509 What requirements must safeguarding by location meet?
 296-24-20511 What other responsibilities beyond safeguarding does an employer have to protect employees from power transmission parts?
 296-24-20513 When may a guardrail be used as a safeguard?
 296-24-20515 What are the additional requirements for flywheels?
 296-24-20517 What are the additional requirements for shafting?
 296-24-20519 What are the additional requirements for pulleys?
 296-24-20521 What are the additional requirements for belt and rope drives?
 296-24-20523 What are the additional requirements for gears?
 296-24-20525 What are the additional requirements for belt shifters?
 296-24-20527 What are the additional requirements for sewing machines?
 296-24-20529 Reserve.
 296-24-20531 Reserve.
 296-24-20533 Reserve.
 296-24-20699 Appendices A through D are added to Part C of chapter 296-24 WAC, to describe the federal procedures for third-party validation and certification of presence sensing devices on mechanical power presses.
 296-24-20700 Appendix A to WAC 296-24-195.
 296-24-20710 Appendix B to WAC 296-24-195.
 296-24-20720 Appendix C to WAC 296-24-195.
 296-24-20730 Appendix D to WAC 296-24-195.

PART D

MATERIALS HANDLING AND STORAGE, INCLUDING CRANES, DERRICKS, ETC., AND RIGGING

Handling And Storage—Cranes, Derricks, etc.

296-24-215 Materials handling and storage—Handling materials—General.
 296-24-21501 Use of mechanical equipment.
 296-24-21503 Secure storage.
 296-24-21505 Housekeeping.
 296-24-21507 Drainage.
 296-24-21509 Clearance limits.
 296-24-21511 Rolling railroad cars.
 296-24-21513 Guarding.
 296-24-21515 Conveyors.
 296-24-217 Servicing multi-piece and single-piece rim wheels.
 296-24-21701 Scope.
 296-24-21703 Definitions.
 296-24-21705 Employee training.
 296-24-21707 Tire servicing equipment.
 296-24-21709 Wheel component acceptability.
 296-24-21711 Safe operating procedure—Multi-piece rim wheels.
 296-24-21713 Safe operating procedure—Single-piece rim wheels.
 296-24-230 Powered industrial trucks.
 296-24-23001 Definition.
 296-24-23003 General requirements.
 296-24-23005 Designations.
 296-24-23007 Designated locations.

296-24-23009 Converted industrial trucks.
 296-24-23011 Safety guards.
 296-24-23013 Fuel handling and storage.
 296-24-23015 Changing and charging storage batteries.
 296-24-23017 Lighting for operating areas.
 296-24-23019 Control of noxious gases and fumes.
 296-24-23021 Dockboards (bridge plates).
 296-24-23023 Trucks and railroad cars.
 296-24-23025 Operator training.
 296-24-23027 Powered industrial truck operations.
 296-24-23029 Traveling.
 296-24-23031 Loading.
 296-24-23033 Operation of the truck.
 296-24-23035 Maintenance of industrial trucks.
 296-24-23037 Appendix 1 stability of powered industrial trucks non-mandatory appendix.
 296-24-233 Motor vehicle trucks and trailers.
 296-24-235 Overhead and gantry cranes.
 296-24-23501 Definitions.
 296-24-23503 General requirements.
 296-24-23505 Cabs.
 296-24-23507 Footwalks and ladders.
 296-24-23509 Stops, bumpers, rail sweeps, and guards.
 296-24-23511 Brakes.
 296-24-23513 Electric equipment.
 296-24-23515 Hoisting equipment.
 296-24-23517 Warning device.
 296-24-23519 Inspection.
 296-24-23521 Testing.
 296-24-23523 Maintenance.
 296-24-23525 Rope inspection.
 296-24-23527 Handling the load.
 296-24-23529 Operators.
 296-24-23531 Other requirements—General.
 296-24-23533 Crane and derrick suspended personnel (work) platforms.
 296-24-237 Construction, operation and maintenance—Chain and electric hoists.
 296-24-238 Air hoists.
 296-24-240 Crawler locomotive and truck cranes.
 296-24-24001 Definitions.
 296-24-24003 General requirements.
 296-24-24005 Load ratings.
 296-24-24007 Inspection classification.
 296-24-24009 Testing.
 296-24-24011 Maintenance procedure.
 296-24-24013 Rope inspection.
 296-24-24015 Handling the load.
 296-24-24017 Other requirements.
 296-24-24019 Operating near overhead electric power lines.
 296-24-245 Derricks.
 296-24-24501 Definitions.
 296-24-24503 General requirements.
 296-24-24505 Load ratings.
 296-24-24507 Inspection.
 296-24-24509 Testing.
 296-24-24511 Maintenance.
 296-24-24513 Rope inspection.
 296-24-24515 Operations of derricks.
 296-24-24517 Handling the load.
 296-24-24519 Other requirements.
 296-24-260 Helicopters.
 296-24-293 "A" frames.
 296-24-294 Rigging.
 296-24-29401 Wire rope.
 296-24-29403 Hemp rope.
 296-24-29405 Hemp and wire rope slings.
 296-24-29407 Guys.
 296-24-29409 Thimbles.
 296-24-29411 Blocks and falls.
 296-24-29413 Chains and cables.
 296-24-29415 Slings.
 296-24-29417 Definitions.
 296-24-29419 Safe operating practices.
 296-24-29421 Inspections.
 296-24-29423 Alloy steel chain slings.
 296-24-29425 Wire rope slings.
 296-24-29427 Metal mesh slings.
 296-24-29429 Natural and synthetic fiber rope slings.
 296-24-29431 Synthetic web slings.

PART E
HAZARDOUS MATERIALS, FLAMMABLE AND COMBUSTIBLE
LIQUIDS, SPRAY FINISHING, DIP TANKS

Hazardous Materials	
296-24-295	Compressed gases (general requirements).
296-24-29501	Inspection of compressed gas cylinders.
296-24-29503	Compressed gases.
296-24-29505	Safety relief devices for compressed gas containers.
296-24-310	Acetylene.
296-24-31001	Cylinders.
296-24-31003	Piped systems.
296-24-31005	Generators and filling cylinders.
296-24-315	Hydrogen.
296-24-31501	General.
296-24-31503	Gaseous hydrogen systems.
296-24-31505	Liquefied hydrogen systems.
296-24-320	Oxygen.
296-24-32001	Scope.
296-24-32003	Bulk oxygen systems.
296-24-325	Nitrous oxide.
296-24-330	Flammable and combustible liquids.
296-24-33001	Definitions.
296-24-33003	Scope.
296-24-33005	Tank storage.
296-24-33007	Piping, valves, and fittings.
296-24-33009	Container and portable tank storage.
296-24-33011	Industrial plants.
296-24-33013	Bulk plants.
296-24-33015	Service stations.
296-24-33017	Processing plants.
296-24-33019	Refineries, chemical plants, and distilleries.
296-24-370	Spray finishing using flammable and combustible materials.
296-24-37001	Definitions.
296-24-37003	Spray booths.
296-24-37005	Electrical and other sources of ignition.
296-24-37007	Ventilation.
296-24-37009	Flammable and combustible liquids—Storage and handling.
296-24-37011	Protection.
296-24-37013	Operations and maintenance.
296-24-37015	Fixed electrostatic apparatus.
296-24-37017	Electrostatic hand spraying equipment.
296-24-37019	Drying, curing, or fusion apparatus.
296-24-37021	Automobile undercoating in garages.
296-24-37023	Powder coating.
296-24-37025	Organic peroxides and dual component coatings.
296-24-37027	Scope.
296-24-405	Dip tanks containing flammable or combustible liquids.
296-24-40501	Definitions.
296-24-40503	Ventilation.
296-24-40505	Construction of dip tanks.
296-24-40507	Liquids used in dip tanks, storage and handling.
296-24-40509	Electrical and other sources of ignition.
296-24-40511	Operations and maintenance.
296-24-40513	Extinguishment.
296-24-40515	Special dip tank applications.
296-24-450	Chlorine cylinders used in chlorinator systems.

PART F-1

STORAGE AND HANDLING OF LIQUEFIED PETROLEUM GASES

296-24-475	Storage and handling of liquefied petroleum gases.
296-24-47501	Definitions.
296-24-47503	Scope.
296-24-47505	Basic rules.
296-24-47507	Cylinder systems.
296-24-47509	Systems utilizing containers other than DOT containers.
296-24-47511	Liquefied petroleum gas as a motor fuel.
296-24-47513	Storage of containers awaiting use or resale.
296-24-47517	Liquefied petroleum gas service stations.

PART F-2

STORAGE AND HANDLING OF ANHYDROUS AMMONIA

296-24-510	Storage and handling of anhydrous ammonia.
296-24-51001	Scope.
296-24-51003	General.
296-24-51005	Definitions.
296-24-51007	Use of water in emergencies.
296-24-51009	Basic rules.
296-24-51011	Systems utilizing stationary, pier-mounted or skid-mounted aboveground or underground, nonrefrigerated storage.

296-24-51013	Refrigerated storage.
296-24-51015	Systems utilizing portable DOT containers.
296-24-51017	Systems mounted on trucks, semi-trailers, and trailers for transportation of ammonia.
296-24-51019	Systems mounted on farm wagons (implements of husbandry) for the transportation of ammonia.
296-24-51021	Systems mounted on farm equipment (implements of husbandry) for the application of ammonia.
296-24-51099	Appendix C—Availability of reference material.

PART G-1
MEANS OF EGRESS

296-24-550	Means of egress.
296-24-55001	Definitions.
296-24-55003	General requirements.
296-24-55005	Fundamental requirements.
296-24-55007	Protection of employees exposed by construction and repair operations.
296-24-55009	Maintenance.
296-24-565	Means of egress, general.
296-24-56501	Permissible exit components.
296-24-56503	Protective enclosure of exits.
296-24-56505	Width and capacity of means of egress.
296-24-56507	Egress capacity and occupant load.
296-24-56509	Arrangement of exits.
296-24-56511	Access to exits.
296-24-56513	Exterior ways of exit access.
296-24-56515	Discharge from exits.
296-24-56517	Headroom.
296-24-56519	Changes in elevation.
296-24-56521	Maintenance and workmanship.
296-24-56523	Furnishings and decorations.
296-24-56525	Automatic sprinkler systems.
296-24-56527	Fire alarm signaling systems.
296-24-56529	Fire retardant paints.
296-24-56531	Exit marking.
296-24-567	Employee emergency plans and fire prevention plans.
296-24-56701	Appendix.

PART G-2
FIRE PROTECTION

296-24-585	Fire protection.
296-24-58501	Definitions applicable to fire protection.
296-24-58503	Scope, application and definitions applicable.
296-24-58505	Fire brigades.
296-24-58507	Organization.
296-24-58509	Training and education.
296-24-58511	Fire fighting equipment.
296-24-58513	Protective clothing.
296-24-58515	Respiratory protection devices.
296-24-58516	Procedures for interior structural fire fighting.
296-24-58517	Appendix A—Fire brigades.

PART G-3
FIRE SUPPRESSION EQUIPMENT

296-24-592	Portable fire extinguishers.
296-24-59201	Scope and application.
296-24-59203	Exemptions.
296-24-59205	General requirements.
296-24-59207	Selection and distribution.
296-24-59209	Inspection, maintenance and testing.
296-24-59211	Hydrostatic testing.
296-24-59213	Training and education.
296-24-59215	Appendix A—Portable fire extinguishers.
296-24-602	Standpipe and hose systems.
296-24-60201	Scope and application.
296-24-60203	Protection of standpipes.
296-24-60205	Equipment.
296-24-60207	Water supply.
296-24-60209	Tests and maintenance.
296-24-60299	Appendix A—Standpipe and hose systems.
296-24-607	Automatic sprinkler systems.
296-24-60701	Scope and application.
296-24-60703	Exemptions.
296-24-60705	General requirements.
296-24-60799	Appendix A—Automatic sprinkler systems.
296-24-617	Fixed extinguishing systems, general.
296-24-61701	Scope and application.
296-24-61703	General requirements.
296-24-61705	Total flooding systems with potential health and safety hazards to employees.
296-24-61799	Appendix A—Fixed extinguishing systems, general.
296-24-622	Fixed extinguishing systems, dry chemical.

- 296-24-62201 Scope and application.
- 296-24-62203 Specific requirements.
- 296-24-62299 Appendix A—Fixed extinguishing systems, dry chemical.
- 296-24-623 Fixed extinguishing systems, gaseous agent.
- 296-24-62301 Scope and application.
- 296-24-62303 Specific requirements.
- 296-24-62399 Appendix A—Fixed extinguishing systems, gaseous agent.
- 296-24-627 Fixed extinguishing systems, water spray and foam.
- 296-24-62701 Scope and application.
- 296-24-62703 Specific requirements.
- 296-24-62799 Appendix A—Fixed extinguishing systems, water spray and foam.
- 296-24-629 Fire detection systems.
- 296-24-62901 Scope and application.
- 296-24-62903 Installation and restoration.
- 296-24-62905 Maintenance and testing.
- 296-24-62907 Protection of fire detectors.
- 296-24-62909 Response time.
- 296-24-62911 Number, location and spacing of detecting devices.
- 296-24-62999 Appendix A—Fire detection systems.
- 296-24-631 Employee alarm systems.
- 296-24-63101 Scope and application.
- 296-24-63103 General requirements.
- 296-24-63105 Installation and restoration.
- 296-24-63107 Maintenance and testing.
- 296-24-63109 Manual operation.
- 296-24-63199 Appendix A—Employee alarm systems.
- 296-24-63299 Appendix B—National consensus standards.
- 296-24-63399 Appendix C—Fire protection references for further information.
- 296-24-63499 Appendix D—Availability of publications incorporated by references in WAC 296-24-58505—Fire brigades.
- 296-24-63599 Appendix E—Test methods for protective clothing.

**PART H-1
HAND AND PORTABLE POWERED TOOLS AND OTHER
HAND-HELD EQUIPMENT**

Hand and Portable Powered Tools

- 296-24-650 Hand and portable powered tools and equipment—General.
- 296-24-65001 General requirements.
- 296-24-65003 Compressed air used for cleaning.
- 296-24-65005 Compressed air tools.
- 296-24-65007 Air hammer.
- 296-24-655 Guarding of portable powered tools.
- 296-24-65501 Portable powered tools.
- 296-24-657 Pneumatic powered tools and hose.
- 296-24-65701 Portable tools.
- 296-24-65703 Airhose.
- 296-24-660 Portable abrasive wheels.
- 296-24-66001 Abrasive wheel terms.
- 296-24-66003 General requirements.
- 296-24-66005 Cup wheels.
- 296-24-66007 Vertical portable grinders.
- 296-24-66009 Other portable grinders.
- 296-24-66011 Mounting and inspection of abrasive wheels.
- 296-24-663 Safety requirements for powder actuated fastening systems.
- 296-24-66301 Scope.
- 296-24-66303 Purpose.
- 296-24-66305 Definitions applicable to this section.
- 296-24-66307 Requirements.
- 296-24-66309 Power loads.
- 296-24-66311 Fasteners.
- 296-24-66313 Operation.
- 296-24-66315 Limitations of use.
- 296-24-66317 Maintenance and storage.
- 296-24-66319 Authorized instructor.
- 296-24-66321 Qualified operator.
- 296-24-665 Power lawnmowers.
- 296-24-66501 Terms.
- 296-24-66503 General requirements.
- 296-24-66505 Walk-behind and riding rotary mowers.
- 296-24-66507 Walk-behind rotary mowers.
- 296-24-66509 Riding rotary mowers.
- 296-24-670 Jacks.
- 296-24-67001 Jack terms.
- 296-24-67003 Loading and marking.
- 296-24-67005 Operation and maintenance.

**PART H-2
SAFE PRACTICES OF ABRASIVE BLASTING OPERATIONS,
VENTILATION**

Abrasive blasting operations

- 296-24-675 Safe practices of abrasive blasting operations.
- 296-24-67501 Purpose.
- 296-24-67503 Application.
- 296-24-67505 Selection of abrasives and equipment.
- 296-24-67507 Definitions.
- 296-24-67509 Dust hazards from abrasive blasting.
- 296-24-67511 Blast cleaning enclosures.
- 296-24-67513 Construction and maintenance of the exhaust ventilation systems.
- 296-24-67515 Personal protective equipment.
- 296-24-67517 Air supply and air compressors.
- 296-24-67519 Operational procedures and general safety.
- 296-24-67520 Ventilation.
- 296-24-67521 Appendix I.

**PART I
WELDING, CUTTING AND BRAZING**

- 296-24-680 Welding, cutting, and brazing.
- 296-24-68001 Definitions.
- 296-24-682 Installation and operation of oxygen fuel gas systems for welding and cutting.
- 296-24-68201 General requirements.
- 296-24-68203 Cylinders and containers.
- 296-24-68205 Manifolding of cylinders.
- 296-24-68207 Service piping systems.
- 296-24-68209 Protective equipment, hose, and regulators.
- 296-24-68211 Acetylene generators.
- 296-24-68213 Calcium carbide storage.
- 296-24-68215 Public exhibitions and demonstrations.
- 296-24-685 Application, installation, and operation of arc welding and cutting equipment.
- 296-24-68501 General.
- 296-24-68503 Application of arc welding equipment.
- 296-24-68505 Installation of arc welding equipment.
- 296-24-68507 Operation and maintenance.
- 296-24-690 Installation and operation of resistance welding equipment.
- 296-24-69001 General.
- 296-24-69003 Spot and seam welding machines (nonportable).
- 296-24-69005 Portable welding machines.
- 296-24-69007 Flash welding equipment.
- 296-24-69009 Hazards and precautions.
- 296-24-69011 Maintenance.
- 296-24-695 Fire prevention and protection.
- 296-24-69501 Basic precautions.
- 296-24-69503 Special precautions.
- 296-24-69505 Welding or cutting containers.
- 296-24-69507 Confined spaces.
- 296-24-700 Protection of employees.
- 296-24-70001 General.
- 296-24-70003 Eye protection.
- 296-24-70005 Protective clothing.
- 296-24-70007 Work in confined spaces.
- 296-24-715 Health protection and ventilation.
- 296-24-71501 General.
- 296-24-71503 Ventilation for general welding and cutting.
- 296-24-71505 Local exhaust hoods and booths.
- 296-24-71507 Ventilation in confined spaces.
- 296-24-71509 Fluorine compounds.
- 296-24-71511 Zinc.
- 296-24-71513 Lead.
- 296-24-71515 Beryllium.
- 296-24-71517 Cadmium.
- 296-24-71519 Mercury.
- 296-24-71521 Cleaning compounds.
- 296-24-71523 Cutting of stainless steels.
- 296-24-71525 First-aid equipment.
- 296-24-720 Industrial applications.
- 296-24-72001 Transmission pipeline.
- 296-24-72003 Mechanical piping systems.
- 296-24-722 Welding, cutting, and heating in way of preservative coatings.

PART J-1
WORKING SURFACES, GUARDING FLOORS AND WALL
OPENINGS, LADDERS

Working Surfaces, Ladders, Scaffolds

296-24-735	Walking-working surfaces.
296-24-73501	General requirements.
296-24-73503	Housekeeping.
296-24-73505	Aisles and passageways.
296-24-73507	Covers and guardrails.
296-24-73509	Floor loading protection.
296-24-73511	Steam pipes.
296-24-73513	Buildings—Floors.
296-24-750	Guarding floor and wall openings and holes.
296-24-75001	Terms.
296-24-75003	Protection for floor openings.
296-24-75005	Protection for wall openings and holes.
296-24-75007	Protection of open-sided floors, platforms and runways.
296-24-75009	Stairway railings and guards.
296-24-75011	Railing, toeboards, and cover specifications.
296-24-765	Fixed industrial stairs.
296-24-76501	Terms.
296-24-76503	Application of requirements.
296-24-76505	Where fixed stairs are required.
296-24-76507	Stair strength.
296-24-76509	Stair width.
296-24-76511	Angle of stairway rise.
296-24-76513	Stair treads.
296-24-76515	Length of stairways.
296-24-76517	Railings and handrails.
296-24-76519	Vertical clearance.
296-24-76521	Open risers.
296-24-76523	General.
296-24-76555	Alternating tread-type stairs.
296-24-780	Portable wood ladders.
296-24-78003	Application of requirements.
296-24-78005	Materials.
296-24-78007	Construction requirements.
296-24-78009	Care and use of ladders.
296-24-795	Portable metal ladders.
296-24-79501	Terms.
296-24-79503	Requirements.
296-24-79505	Testing.
296-24-79507	Care and maintenance and use of ladders.
296-24-810	Fixed ladders.
296-24-81001	Definitions.
296-24-81003	Design requirements.
296-24-81005	Specific features.
296-24-81007	Clearance.
296-24-81009	Special requirements.
296-24-81011	Pitch.
296-24-81013	Maintenance and use.
296-24-855	Other working surfaces.
296-24-85501	Dockboards (bridge plates).
296-24-85503	Forging machine area.
296-24-85505	Veneer machinery.

PART J-2
SCAFFOLDS

296-24-860	Scaffolds.
296-24-86005	Definitions applicable to this part.
296-24-86010	General requirements.
296-24-86015	Additional requirements applicable to specific types of scaffolds.
296-24-86020	Training.
296-24-861	Manually propelled mobile ladder stands and scaffolds (towers).
296-24-86105	General requirements.
296-24-86110	Mobile tubular welded frame scaffolds.
296-24-86115	Mobile tubular welded sectional folding scaffolds.
296-24-86120	Mobile tube and coupler scaffolds.
296-24-86125	Mobile work platforms.
296-24-86130	Mobile ladder stands.
296-24-862	Nonmandatory appendices.

PART J-3
POWERED PLATFORMS

296-24-875	Elevating work platforms.
296-24-87505	Self-propelled elevating work platforms.
296-24-87510	Boom supported elevating work platforms.
296-24-87515	Aerial lifts.
296-24-880	Power platforms for exterior building maintenance.
296-24-88005	Definitions.

296-24-88010	Inspections and tests.
296-24-88015	Powered platform installations—Affected parts of buildings.
296-24-88020	Powered platform installations—Equipment.
296-24-88025	Maintenance.
296-24-88030	Operations.
296-24-88035	Personal fall protection.
296-24-88040	Appendix A—Guidelines (advisory).
296-24-88045	Appendix B—Exhibits (advisory).
296-24-88050	Appendix C—Personal fall arrest system (Part I—Mandatory; Parts II and III—Nonmandatory).
296-24-88055	Appendix D—Existing installations (mandatory).
296-24-900	Manlifts.
296-24-90001	Definitions.
296-24-90003	General requirements.
296-24-90005	Mechanical requirements.
296-24-90007	Operating rules.
296-24-90009	Periodic inspection.

PART K
COMPRESSED GAS AND COMPRESSED GAS EQUIPMENT

296-24-920	Inspection of compressed gas cylinders.
296-24-92001	Definitions.
296-24-92003	General requirements.
296-24-92005	Inspection of low-pressure cylinders exempt from the hydrostatic test including acetylene cylinders.
296-24-92007	Low-pressure cylinders subject to hydrostatic testing.
296-24-92009	High-pressure cylinders.
296-24-92011	Internal inspection.
296-24-930	Safety relief devices for compressed gas cylinders.
296-24-93001	Definitions.
296-24-93003	General requirements.
296-24-935	Safety relief devices for cargo and portable tanks storing compressed gases.
296-24-93501	Definitions.
296-24-93503	General requirements.
296-24-940	Air receivers.
296-24-94001	General requirements.
296-24-94003	Installation and equipment requirements.

PART L
ELECTRICAL

296-24-956	Electrical.
296-24-95601	Definitions applicable to WAC 296-24-956 through 296-24-985.
296-24-95603	Electric utilization systems.
296-24-95605	General requirements.
296-24-95607	Wiring design and protection.
296-24-95609	Wiring methods, components, and equipment for general use.
296-24-95611	Specific purpose equipment and installations.
296-24-95613	Hazardous (classified) locations.
296-24-95615	Special systems.
296-24-95617	Reserved.
296-24-95699	Appendices.
296-24-960	Working on or near exposed energized parts.
296-24-965	Safety-related work practices.
296-24-970	Training.
296-24-975	Selection and use of work practices.
296-24-980	Safeguards for personnel protection.
296-24-985	Use of equipment.

DISPOSITION OF SECTIONS FORMERLY
CODIFIED IN THIS CHAPTER

296-24-060	First-aid training and certification. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-060, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240. 81-13-053 (Order 81-9), § 296-24-060, filed 6/17/81. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-24-060, filed 11/13/80; 78-12-017 (Order 78-22), § 296-24-060, filed 11/13/78; Order 74-27, § 296-24-060, filed 5/7/74; Order 73-5, § 296-24-060, filed 5/9/73 and Order 73-4, § 296-24-060, filed 5/7/73.] Repealed by 98-06-061, filed 3/2/98, effective 6/1/98. Statutory Authority: Chapter 49.17 RCW.
296-24-065	First-aid kit. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-065, filed 7/20/94, effective 9/20/94; 91-03-044 (Order 90-18), § 296-24-065, filed 1/10/91, effective 2/12/91; Order 74-27, § 296-24-065, filed 5/7/74; Order 73-5, § 296-24-065,

	filed 5/9/73 and Order 73-4, § 296-24-065, filed 5/7/73.] Repealed by 98-06-061, filed 3/2/98, effective 6/1/98. Statutory Authority: Chapter 49.17 RCW.		
296-24-067	First-aid station. [Order 73-5, § 296-24-067, filed 5/9/73 and Order 73-4, § 296-24-067, filed 5/7/73.] Repealed by 98-06-061, filed 3/2/98, effective 6/1/98. Statutory Authority: Chapter 49.17 RCW.	296-24-13007	Seepage pit construction. [Order 73-5, § 296-24-13007, filed 5/9/73 and Order 73-4, § 296-24-13007, filed 5/7/73.] Repealed by 82-08-026 (Order 82-10), filed 3/30/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-070	First-aid room. [Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240. 81-13-053 (Order 81-9), § 296-24-070, filed 6/17/81; Order 73-5, § 296-24-070, filed 5/9/73 and Order 73-4, § 296-24-070, filed 5/7/73.] Repealed by 98-06-061, filed 3/2/98, effective 6/1/98. Statutory Authority: Chapter 49.17 RCW.	296-24-13009	Combustion toilet. [Order 73-5, § 296-24-13009, filed 5/9/73 and Order 73-4, § 296-24-13009, filed 5/7/73.] Repealed by 82-08-026 (Order 82-10), filed 3/30/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-081	Respiratory protection. [Order 73-5, § 296-24-081, filed 5/9/73 and order 73-4, § 296-24-081, filed 5/7/73.] Repealed by 81-16-016 (order 81-19), filed 7/27/81. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240. Later promulgation, see chapter 296-62 WAC.	296-24-13011	Recirculating toilet specifications. [Order 73-5, § 296-24-13011, filed 5/9/73 and Order 73-4, § 296-24-13011, filed 5/7/73.] Repealed by 82-08-026 (Order 82-10), filed 3/30/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-08101	Permissible practice. [Order 73-5, § 296-24-08101, filed 5/9/73 and Order 73-4, § 296-24-08101, filed 5/7/73.] Repealed by 81-16-016 (Order 81-19), filed 7/27/81. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240.	296-24-13013	Portable toilet construction. [Order 73-5, § 296-24-13013, filed 5/9/73 and Order 73-4, § 296-24-13013, filed 5/7/73.] Repealed by 82-08-026 (Order 82-10), filed 3/30/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-08103	Requirements for a minimal acceptable program. [Statutory Authority: RCW 49.17.040, 49.17.050, and 49.17.240. 80-11-010 (Order 80-14), § 296-24-08103, filed 8/8/80; Order 73-5, § 296-24-08103, filed 5/9/73 and Order 73-4, § 296-24-08103, filed 5/7/73.] Repealed by 81-16-016 (Order 81-19), filed 7/27/81. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240.	296-24-13503	Color specifications. [Order 73-5, § 296-24-13503, filed 5/9/73 and Order 73-4, § 296-24-13503, filed 5/7/73.] Repealed by 83-15-017 (Order 83-19), filed 7/13/83, effective 9/12/83. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-08105	Selection of respirators. [Order 73-5, § 296-24-08105, filed 5/9/73 and Order 73-4, § 296-24-08105, filed 5/7/73.] Repealed by 81-16-016 (Order 81-19), filed 7/27/81. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240.	296-24-170	Cooperage machinery. [Order 73-5, § 296-24-170, filed 5/9/73 and Order 73-4, § 296-24-170, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-08107	Air quality. [Statutory Authority: RCW 49.17.040, 49.17.050, and 49.17.240. 80-11-010 (Order 80-14), § 296-24-08107, filed 8/8/80; Order 73-5, § 296-24-08107, filed 5/9/73 and Order 73-4, § 296-24-08107, filed 5/7/73.] Repealed by 81-16-016 (Order 81-19), filed 7/27/81. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240.	296-24-17001	Definitions. [Order 73-5, § 296-24-17001, filed 5/9/73 and Order 73-4, § 296-24-17001, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-08109	Use of respirators. [Statutory Authority: RCW 49.17.040, 49.17.050, and 49.17.240. 80-11-010 (Order 80-14), § 296-24-08109, filed 8/8/80; Order 73-5, § 296-24-08109, filed 5/9/73 and Order 73-4, § 296-24-08109, filed 5/7/73.] Repealed by 81-16-016 (Order 81-19), filed 7/27/81. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240.	296-24-17003	Heading bolt sawing machine. [Order 73-5, § 296-24-17003, filed 5/9/73 and Order 73-4, § 296-24-17003, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-08111	Maintenance and care of respirators. [Order 73-5, § 296-24-08111, filed 5/9/73 and Order 73-4, § 296-24-08111, filed 5/7/73.] Repealed by 81-16-016 (Order 81-19), filed 7/27/81. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240.	296-24-17005	Bolt, equalizer, stave, and heading saws (tilting table style). [Order 73-5, § 296-24-17005, filed 5/9/73 and Order 73-4, § 296-24-17005, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-08113	Identification of gas mask canisters. [Order 73-5, § 296-24-08113, filed 5/9/73 and Order 73-4, § 296-24-08113, filed 5/7/73.] Repealed by 81-16-016 (Order 81-19), filed 7/27/81. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240.	296-24-17007	Barrel stave saws (cylindrical saws). [Order 73-5, § 296-24-17007, filed 5/9/73 and Order 73-4, § 296-24-17007, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-12013	Lunchrooms. [Order 73-5, § 296-24-12013, filed 5/9/73 and Order 73-4, § 296-24-12013, filed 5/7/73.] Repealed by Order 74-27, filed 5/7/74.	296-24-17009	Hand-fed ripsaws. [Order 73-5, § 296-24-17009, filed 5/9/73 and Order 73-4, § 296-24-17009, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-12015	Food handling. [Order 73-5, § 296-24-12015, filed 5/9/73 and Order 73-4, § 296-24-12015, filed 5/7/73.] Repealed by Order 74-27, filed 5/7/74.	296-24-17011	Self-feed stave and heading equalizer saws. [Order 73-5, § 296-24-17011, filed 5/9/73 and Order 73-4, § 296-24-17011, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-130	Nonwater carriage disposal systems. [Order 73-5, § 296-24-130, filed 5/9/73 and Order 73-4, § 296-24-130, filed 5/7/73.] Repealed by 82-08-026 (Order 82-10), filed 3/30/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-17013	Stave and heading planers (single and double heads). [Order 73-5, § 296-24-17013, filed 5/9/73 and Order 73-4, § 296-24-17013, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-13001	Acceptable industrial disposal systems. [Order 73-5, § 296-24-13001, filed 5/9/73 and Order 73-4, § 296-24-13001, filed 5/7/73.] Repealed by 82-08-026 (Order 82-10), filed 3/30/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-17015	Stave jointing machines (wheel). [Order 73-5, § 296-24-17015, filed 5/9/73 and Order 73-4, § 296-24-17015, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-13003	Privy specifications. [Order 73-5, § 296-24-13003, filed 5/9/73 and Order 73-4, § 296-24-13003, filed 5/7/73.] Repealed by 82-08-026 (Order 82-10), filed 3/30/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-17017	Heading jointer and doweler machine (wheel). [Order 73-5, § 296-24-17017, filed 5/9/73 and Order 73-4, § 296-24-17017, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-24-13005	Chemical toilet specifications. [Order 73-5, § 296-24-13005, filed 5/9/73 and Order 73-4, § 296-24-13005, filed 5/7/73.] Repealed by 82-08-026 (Order 82-10),	296-24-17019	Heading rounder. [Order 73-5, § 296-24-17019, filed 5/9/73 and Order 73-4, § 296-24-17019, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
		296-24-17021	Power windlass machine. [Order 73-5, § 296-24-17021, filed 5/9/73 and Order 73-4, § 296-24-17021, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.
		296-24-17023	Crozing machine (stationary heads). [Order 73-5, § 296-24-17023, filed 5/9/73 and Order 73-4, § 296-24-17023,

	filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-22011	Building service equipment. [Order 73-5, § 296-24-22011, filed 5/9/73 and Order 73-4, § 296-24-22011, filed 5/7/73.] Repealed by Order 74-27, filed 5/7/74.
296-24-17025	Heading-up machine. [Order 73-5, § 296-24-17025, filed 5/9/73 and Order 73-4, § 296-24-17025, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-47515	LP-gas system installations on commercial vehicles. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-47515, filed 7/20/94, effective 9/20/94; Order 76-6, § 296-24-47515, filed 3/1/76; Order 73-5, § 296-24-47515, filed 5/9/73 and Order 73-4, § 296-24-47515, filed 5/7/73.] Repealed by 99-17-094, filed 8/17/99, effective 12/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
296-24-17027	Head charring machine. [Order 73-5, § 296-24-17027, filed 5/9/73 and Order 73-4, § 296-24-17027, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-590	Portable fire suppression equipment—Portable fire extinguishers. [Order 73-5, § 296-24-590, filed 5/9/73 and Order 73-4, § 296-24-590, filed 5/7/73.] Repealed by 88-11-021 (Order 88-04), filed 5/11/88. Statutory Authority: Chapter 49.17 RCW.
296-24-17029	Bilge truss hoop ring removing machine. [Order 73-5, § 296-24-17029, filed 5/9/73 and Order 73-4, § 296-24-17029, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-59001	General requirements. [Order 73-5, § 296-24-59001, filed 5/9/73 and Order 73-4, § 296-24-59001, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-17031	Hoop elevators and conveyors. [Order 73-5, § 296-24-17031, filed 5/9/73 and Order 73-4, § 296-24-17031, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-59003	Selection of extinguishers. [Order 74-27, § 296-24-59003, filed 5/7/74; Order 73-5, § 296-24-59003, filed 5/9/73 and Order 73-4, § 296-24-59003, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-17033	Barrel sanding machine. [Order 73-5, § 296-24-17033, filed 5/9/73 and Order 73-4, § 296-24-17033, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-59005	Distribution of portable fire extinguishers. [Order 73-5, § 296-24-59005, filed 5/9/73 and Order 73-4, § 296-24-59005, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-17035	Hoop drivers and trussers. [Order 73-5, § 296-24-17035, filed 5/9/73 and Order 73-4, § 296-24-17035, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-59007	Inspection, maintenance, and hydrostatic tests. [Order 74-27, § 296-24-59007, filed 5/7/74; Order 73-5, § 296-24-59007, filed 5/9/73 and Order 73-4, § 296-24-59007, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-17037	Head sanding machine. [Order 73-5, § 296-24-17037, filed 5/9/73 and Order 73-4, § 296-24-17037, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-600	Standpipe and hose systems. [Order 73-5, § 296-24-600, filed 5/9/73 and Order 73-4, § 296-24-600, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-17039	Hand jointer. [Order 73-5, § 296-24-17039, filed 5/9/73 and Order 73-4, § 296-24-17039, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-60001	General requirements. [Order 73-5, § 296-24-60001, filed 5/9/73 and Order 73-4, § 296-24-60001, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-17041	Hoop punching and coiling machine. [Order 73-5, § 296-24-17041, filed 5/9/73 and Order 73-4, § 296-24-17041, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-60003	Hose outlets. [Order 74-27, § 296-24-60003, filed 5/7/74; Order 73-5, § 296-24-60003, filed 5/9/73 and Order 73-4, § 296-24-60003, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-17043	Hoop riveting machine. [Order 73-5, § 296-24-17043, filed 5/9/73 and Order 73-4, § 296-24-17043, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-60005	Water supplies. [Order 73-5, § 296-24-60005, filed 5/9/73 and Order 73-4, § 296-24-60005, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-17045	Hoop flaring and expanding machine. [Order 73-5, § 296-24-17045, filed 5/9/73 and Order 73-4, § 296-24-17045, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-60007	Tests and maintenance. [Order 73-5, § 296-24-60007, filed 5/9/73 and Order 73-4, § 296-24-60007, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-17047	Inspection and maintenance of cooperage machinery. [Order 73-5, § 296-24-17047, filed 5/9/73 and Order 73-4, § 296-24-17047, filed 5/7/73.] Repealed by 82-13-045 (Order 82-22), filed 6/11/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-24-605	Fixed fire suppression equipment—Automatic sprinkler systems. [Order 73-5, § 296-24-605, filed 5/9/73 and Order 73-4, § 296-24-605, filed 5/7/73.] Repealed by 88-11-021 (Order 88-04), filed 5/11/88. Statutory Authority: Chapter 49.17 RCW.
296-24-19515	Reports of point of operation injuries—Mechanical power presses. [Order 76-6, § 296-24-19515, filed 3/1/76.] Repealed by 88-14-108 (Order 88-11), filed 7/6/88. Statutory Authority: Chapter 49.17 RCW.	296-24-60501	General requirements. [Order 73-5, § 296-24-60501, filed 5/9/73 and Order 73-4, § 296-24-60501, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-220	Indoor general storage. [Order 73-5, § 296-24-220, filed 5/9/73 and Order 73-4, § 296-24-220, filed 5/7/73.] Repealed by Order 74-27, filed 5/7/74.	296-24-60503	Fire department connections. [Order 73-5, § 296-24-60503, filed 5/9/73 and Order 73-4, § 296-24-60503, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-22001	Definitions. [Order 73-5, § 296-24-22001, filed 5/9/73 and Order 73-4, § 296-24-22001, filed 5/7/73.] Repealed by Order 74-27, filed 5/7/74.	296-24-60505	Sprinkler alarms. [Order 73-5, § 296-24-60505, filed 5/9/73 and Order 73-4, § 296-24-60505, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-22003	General requirements. [Order 73-5, § 296-24-22003, filed 5/9/73 and Order 73-4, § 296-24-22003, filed 5/7/73.] Repealed by Order 74-27, filed 5/7/74.	296-24-60507	Maintenance of sprinkler system. [Order 76-6, § 296-24-60507, filed 3/1/76; Order 73-5, § 296-24-60507, filed 5/9/73 and Order 73-4, § 296-24-60507, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-22005	Piling procedures and precautions. [Order 73-5, § 296-24-22005, filed 5/9/73 and Order 73-4, § 296-24-22005, filed 5/7/73.] Repealed by Order 74-27, filed 5/7/74.	296-24-60509	Sprinkler head clearance. [Order 73-5, § 296-24-60509, filed 5/9/73 and Order 73-4, § 296-24-60509, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
296-24-22007	Fire protection requirements. [Order 73-5, § 296-24-22007, filed 5/9/73 and Order 73-4, § 296-24-22007, filed 5/7/73.] Repealed by Order 74-27, filed 5/7/74.		
296-24-22009	Mechanical handling equipment. [Order 73-5, § 296-24-22009, filed 5/9/73 and Order 73-4, § 296-24-22009, filed 5/7/73.] Repealed by Order 74-27, filed 5/7/74.		

<p>296-24-615</p> <p>296-24-61501</p> <p>296-24-61503</p> <p>296-24-61505</p> <p>296-24-620</p> <p>296-24-62001</p> <p>296-24-62003</p> <p>296-24-625</p> <p>296-24-662</p> <p>296-24-66201</p> <p>296-24-66203</p> <p>296-24-66205</p> <p>296-24-66207</p> <p>296-24-66209</p> <p>296-24-66211</p> <p>296-24-66213</p> <p>296-24-66215</p> <p>296-24-66217</p>	<p>Fixed dry chemical extinguishing systems. [Order 73-5, § 296-24-615, filed 5/9/73 and Order 73-4, § 296-24-615, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.</p> <p>General requirements. [Order 73-5, § 296-24-61501, filed 5/9/73 and Order 73-4, § 296-24-61501, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.</p> <p>Alarms and indicators. [Order 74-27, § 296-24-61503, filed 5/7/74; Order 73-5, § 296-24-61503, filed 5/9/73 and Order 73-4, § 296-24-61503, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.</p> <p>Inspection and maintenance. [Order 76-6, § 296-24-61505, filed 3/1/76; Order 73-5, § 296-24-61505, filed 5/9/73 and Order 73-4, § 296-24-61505, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.</p> <p>Carbon dioxide extinguishing systems. [Order 73-5, § 296-24-620, filed 5/9/73 and Order 73-4, § 296-24-620, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.</p> <p>General requirements. [Order 73-5, § 296-24-62001, filed 5/9/73 and Order 73-4, § 296-24-62001, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.</p> <p>Inspection and maintenance. [Order 74-27, § 296-24-62003, filed 5/7/74; Order 73-5, § 296-24-62003, filed 5/9/73 and Order 73-4, § 296-24-62003, filed 5/7/73.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.</p> <p>Local fire alarm signaling systems. [Order 74-27, § 296-24-625, filed 5/7/74.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.</p> <p>Safety requirements for explosive-actuated fastening tools. [Order 73-5, § 296-24-662, filed 5/9/73 and Order 73-4, § 296-24-662, filed 5/7/73.] Repealed by 79-08-115 (Order 79-9), filed 7/31/79. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240.</p> <p>Scope. [Order 73-5, § 296-24-66201, filed 5/9/73 and Order 73-4, § 296-24-66201, filed 5/7/73.] Repealed by 79-08-115 (Order 79-9), filed 7/31/79. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240.</p> <p>Purpose. [Order 73-5, § 296-24-66203, filed 5/9/73 and Order 73-4, § 296-24-66203, filed 5/7/73.] Repealed by 79-08-115 (Order 79-9), filed 7/31/79. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240.</p> <p>Definitions. [Order 73-5, § 296-24-66205, filed 5/9/73 and Order 73-4, § 296-24-66205, filed 5/7/73.] Repealed by 79-08-115 (Order 79-9), filed 7/31/79. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240.</p> <p>Design requirements—High velocity tools. [Order 73-5, § 296-24-66207, filed 5/9/73 and Order 73-4, § 296-24-66207, filed 5/7/73.] Repealed by 79-08-115 (Order 79-9), filed 7/31/79. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240.</p> <p>Low velocity piston tools. [Order 73-5, § 296-24-66209, filed 5/9/73 and Order 73-4, § 296-24-66209, filed 5/7/73.] Repealed by 79-08-115 (Order 79-9), filed 7/31/79. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240.</p> <p>Hammer-operated piston tools—Low velocity type. [Order 73-5, § 296-24-66211, filed 5/9/73 and Order 73-4, § 296-24-66211, filed 5/7/73.] Repealed by 79-08-115 (Order 79-9), filed 7/31/79. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240.</p> <p>Requirements for loads and fasteners. [Order 73-5, § 296-24-66213, filed 5/9/73 and Order 73-4, § 296-24-66213, filed 5/7/73.] Repealed by 79-08-115 (Order 79-9), filed 7/31/79. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240.</p> <p>Approvals. [Order 73-5, § 296-24-66215, filed 5/9/73 and Order 73-4, § 296-24-66215, filed 5/7/73.] Repealed by 79-08-115 (Order 79-9), filed 7/31/79. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240.</p> <p>Operation. ---	---	---	---

	and Order 73-4, § 296-24-82513, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.	296-24-82533	Interior hung scaffolds. [Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240. 79-08-115 (Order 79-9), § 296-24-82533, filed 7/31/79; Order 73-5, § 296-24-82533, filed 5/9/73 and Order 73-4, § 296-24-82533, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
296-24-82515	Two-point suspension scaffolds (swinging scaffolds). [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-82515, filed 7/20/94, effective 9/20/94; 88-23-054 (Order 88-25), § 296-24-82515, filed 11/14/88. Statutory Authority: RCW 49.17.040, 49.17.050, and 49.17.240. 80-11-010 (Order 80-14), § 296-24-82515, filed 8/8/80. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240. 79-08-115 (Order 79-9), § 296-24-82515, filed 7/31/79; Order 73-5, § 296-24-82515, filed 5/9/73 and Order 73-4, § 296-24-82515, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.	296-24-82535	Ladder-jack scaffolds. [Order 73-5, § 296-24-82535, filed 5/9/73 and Order 73-4, § 296-24-82535, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
296-24-82517	Stone setters' adjustable multiple-point suspension scaffolds. [Statutory Authority: Chapter 49.17 RCW. 88-23-054 (Order 88-25), § 296-24-82517, filed 11/14/88. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240. 79-08-115 (Order 79-9), § 296-24-82517, filed 7/31/79; Order 73-5, § 296-24-82517, filed 5/9/73 and Order 73-4, § 296-24-82517, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.	296-24-82537	Window-jack scaffolds. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-82537, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-82537, filed 5/9/73 and Order 73-4, § 296-24-82537, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
296-24-82519	Single-point adjustable suspension scaffolds. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-82519, filed 7/20/94, effective 9/20/94; 88-23-054 (Order 88-25), § 296-24-82519, filed 11/14/88; Order 73-5, § 296-24-82519, filed 5/9/73 and Order 73-4, § 296-24-82519, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.	296-24-82539	Roofing brackets. [Order 73-5, § 296-24-82539, filed 5/9/73 and Order 73-4, § 296-24-82539, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
296-24-82521	Boatswain's chairs. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-82521, filed 7/20/94, effective 9/20/94; 88-23-054 (Order 88-25), § 296-24-82521, filed 11/14/88; Order 73-5, § 296-24-82521, filed 5/9/73 and Order 73-4, § 296-24-82521, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.	296-24-82541	Crawling boards or chicken ladders. [Order 73-5, § 296-24-82541, filed 5/9/73 and Order 73-4, § 296-24-82541, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
296-24-82522	Carpenters' bracket scaffolds. [Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240. 79-08-115 (Order 79-9), § 296-24-82523, filed 7/31/79; Order 76-6, § 296-24-82523, filed 3/1/76; Order 73-5, § 296-24-82523, filed 5/9/73 and Order 73-4, § 296-24-82523, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.	296-24-82543	Float or ship scaffolds. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-82543, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-82543, filed 5/9/73 and Order 73-4, § 296-24-82543, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
296-24-82525	Bricklayers' square scaffolds. [Order 73-5, § 296-24-82525, filed 5/9/73 and Order 73-4, § 296-24-82525, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.	296-24-82545	Scope. [Order 73-5, § 296-24-82545, filed 5/9/73 and Order 73-4, § 296-24-82545, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
296-24-82527	Horse scaffolds. [Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240. 79-08-115 (Order 79-9), § 296-24-82527, filed 7/31/79; Order 73-5, § 296-24-82527, filed 5/9/73 and Order 73-4, § 296-24-82527, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.	296-24-840	Manually propelled mobile ladder stands and scaffolds (towers). [Order 73-5, § 296-24-840, filed 5/9/73 and Order 73-4, § 296-24-840, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
296-24-82529	Needle beam scaffold. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-82529, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240. 79-08-115 (Order 79-9), § 296-24-82529, filed 7/31/79; Order 73-5, § 296-24-82529, filed 5/9/73 and Order 73-4, § 296-24-82529, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.	296-24-84001	Definitions. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-84001, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-84001, filed 5/9/73 and Order 73-4, § 296-24-84001, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
296-24-82531	Plasterers', decorators', and large area scaffolds. [Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240. 79-08-115 (Order 79-9), § 296-24-82531, filed 7/31/79; Order 73-5, § 296-24-82531, filed 5/9/73 and Order 73-4, § 296-24-82531, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.	296-24-84003	General requirements. [Statutory Authority: RCW 49.17.040, 49.17.150, and 49.17.240. 79-08-115 (Order 79-9), § 296-24-84003, filed 7/31/79; Order 73-5, § 296-24-84003, filed 5/9/73 and Order 73-4, § 296-24-84003, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
		296-24-84005	Mobile tubular welded frame scaffolds. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-84005, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-84005, filed 5/9/73 and Order 73-4, § 296-24-84005, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
		296-24-84007	Mobile tubular welded sectional folding scaffolds. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-84007, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-84007, filed 5/9/73 and Order 73-4, § 296-24-84007, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
		296-24-84009	Mobile tube and coupler scaffolds. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-84009, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-84009, filed 5/9/73 and Order 73-4, § 296-24-84009, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.

- 296-24-84011 Mobile work platforms. [Order 73-5, § 296-24-84011, filed 5/9/73 and Order 73-4, § 296-24-84011, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-84013 Mobile ladder stands. [Order 73-5, § 296-24-84013, filed 5/9/73 and Order 73-4, § 296-24-84013, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-870 Power platforms for exterior building maintenance. [Statutory Authority: Chapter 49.17 RCW. 90-09-026 (Order 90-01), § 296-24-870, filed 4/10/90, effective 5/25/90; Order 73-5, § 296-24-870, filed 5/9/73 and Order 73-4, § 296-24-870, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87001 Definitions. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-87001, filed 7/20/94, effective 9/20/94; 90-09-026 (Order 90-01), § 296-24-87001, filed 4/10/90, effective 5/25/90; Order 73-5, § 296-24-87001, filed 5/9/73 and Order 73-4, § 296-24-87001, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87003 General requirements. [Order 76-6, § 296-24-87003, filed 3/1/76; Order 73-5, § 296-24-87003, filed 5/9/73 and Order 73-4, § 296-24-87003, filed 5/7/73.] Repealed by 90-09-026 (Order 90-01), filed 4/10/90, effective 5/25/90. Statutory Authority: Chapter 49.17 RCW.
- 296-24-87005 Type F powered platforms. [Order 76-6, § 296-24-87005, filed 3/1/76; Order 73-5, § 296-24-87005, filed 5/9/73 and Order 73-4, § 296-24-87005, filed 5/7/73.] Repealed by 90-09-026 (Order 90-01), filed 4/10/90, effective 5/25/90. Statutory Authority: Chapter 49.17 RCW.
- 296-24-87007 Type T powered platforms. [Order 73-5, § 296-24-87007, filed 5/9/73 and Order 73-4, § 296-24-87007, filed 5/7/73.] Repealed by 90-09-026 (Order 90-01), filed 4/10/90, effective 5/25/90. Statutory Authority: Chapter 49.17 RCW.
- 296-24-87009 Inspections and tests. [Statutory Authority: Chapter 49.17 RCW. 90-09-026 (Order 90-01), § 296-24-87009, filed 4/10/90, effective 5/25/90; Order 73-5, § 296-24-87009, filed 5/9/73 and Order 73-4, § 296-24-87009, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87011 Powered platform installations—Affected parts of buildings. [Statutory Authority: Chapter 49.17 RCW. 91-24-017 (Order 91-07), § 296-24-87011, filed 11/22/91, effective 12/24/91; 90-09-026 (Order 90-01), § 296-24-87011, filed 4/10/90, effective 5/25/90.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87013 Powered platform installations—Equipment. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-87013, filed 7/20/94, effective 9/20/94; 90-09-026 (Order 90-01), § 296-24-87013, filed 4/10/90, effective 5/25/90.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87015 Maintenance. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-87015, filed 7/20/94, effective 9/20/94; 90-09-026 (Order 90-01), § 296-24-87015, filed 4/10/90, effective 5/25/90.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87017 Operations. [Statutory Authority: Chapter 49.17 RCW. 90-09-026 (Order 90-01), § 296-24-87017, filed 4/10/90, effective 5/25/90.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87019 Personal fall protection. [Statutory Authority: Chapter 49.17 RCW. 90-09-026 (Order 90-01), § 296-24-87019, filed 4/10/90, effective 5/25/90.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87031 Appendix A—Guidelines (advisory). [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-87031, filed 7/20/94, effective 9/20/94; 90-09-026 (Order 90-01), § 296-24-87031, filed 4/10/90, effective 5/25/90.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87033 Appendix B—Exhibits (advisory). [Statutory Authority: Chapter 49.17 RCW. 90-09-026 (Order 90-01), § 296-24-87033, filed 4/10/90, effective 5/25/90.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87035 Appendix C—Personal fall arrest system (Part I—Mandatory; Parts II and III—Nonmandatory). [Statutory Authority: Chapter 49.17 RCW. 91-03-044 (Order 90-18), § 296-24-87035, filed 1/10/91, effective 2/12/91; 90-09-026 (Order 90-01), § 296-24-87035, filed 4/10/90, effective 5/25/90.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-87037 Appendix D—Existing installations (mandatory). [Statutory Authority: Chapter 49.17 RCW. 90-09-026 (Order 90-01), § 296-24-87037, filed 4/10/90, effective 5/25/90.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-885 Vehicle-mounted elevating and rotating work platforms. [Order 76-6, § 296-24-885, filed 3/1/76; Order 73-5, § 296-24-885, filed 5/9/73 and Order 73-4, § 296-24-885, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-88501 Definitions. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-88501, filed 7/20/94, effective 9/20/94; Order 76-6, § 296-24-88501, filed 3/1/76; Order 73-5, § 296-24-88501, filed 5/9/73 and Order 73-4, § 296-24-88501, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-88503 General requirements. [Statutory Authority: Chapter 49.17 RCW. 91-24-017 (Order 91-07), § 296-24-88503, filed 11/22/91, effective 12/24/91; Order 76-6, § 296-24-88503, filed 3/1/76; Order 73-5, § 296-24-88503, filed 5/9/73 and Order 73-4, § 296-24-88503, filed 5/7/73.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-88505 Specific requirements. [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-88505, filed 7/20/94, effective 9/20/94; Order 76-6, § 296-24-88505, filed 3/1/76.] Repealed by 00-08-078, filed 4/4/00, effective 7/1/00. Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050.
- 296-24-950 Electrical—Application. [Order 74-27, § 296-24-950, filed 5/7/74.] Repealed by 83-24-013 (Order 83-34), filed 11/30/83. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-24-955 National electrical code. [Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-015 (Order 80-21), § 296-24-955, filed 11/13/80; 78-12-017 (Order 78-22), § 296-24-955, filed 11/13/78; Order 77-12, § 296-24-955, filed 7/11/77; Order 74-27, § 296-24-955, filed 5/7/74.] Repealed by 82-08-026 (Order 82-10), filed 3/30/82. Statutory Authority: RCW 49.17.040 and 49.17.050.

PART A-1

GENERAL, EDUCATIONAL, MEDICAL AND FIRST-AID REQUIREMENTS

WAC 296-24-001 Foreword. This chapter has been compiled with the purpose of consolidating all safety rules of general application into one chapter of the Washington Administrative Code, by the promulgation of the rules contained herein. It is also the intent that the safety rules of the Washington state department of labor and industries, will be at least as effective as those adopted by the U.S. Department of Labor and administered by the Occupational Safety and

Health Administration as published in the Code of Federal Regulations. The department is incorporating many of the existing safety rules of general application and adding new rules under this chapter.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-001, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-001, filed 5/9/73 and Order 73-4, § 296-24-001, filed 5/7/73.]

WAC 296-24-003 Subsections, subdivisions, items, subitems, and segments. (1) That portion of section numeration appearing after the chapter designation appears in either a three digit or a five digit format (e.g. 296-24-330 and 296-24-33002). The final two digits of the section number are implied decimal extensions of the first three digits and represent a further division of the three digit enumeration.

(2) Sections of this chapter may be divided into subsections (1), (2), (3), etc., which may in turn be divided into subdivisions (a), (b), (c), etc., which may be further divided into items (i), (ii), (iii), etc., which may be further divided into subitems (A), (B), (C), etc., which may be further divided into segments (I), (II), (III), etc., all according to the following hierarchy, e.g.

Sections	296-24-330 and 296-24-33002
Subsections	(1) (2)
Subdivisions	(a) (b)
Items	(i) (ii)
Subitems	(A) (B)
Segments	(I) (II)

[Statutory Authority: Chapter 49.17 RCW. 88-23-054 (Order 88-25), § 296-24-003, filed 11/14/88; Order 76-6, § 296-24-003, filed 3/1/76; Order 73-5, § 296-24-003, filed 5/9/73 and Order 73-4, § 296-24-003, filed 5/7/73.]

WAC 296-24-005 Purpose and scope. The rules included in this chapter apply throughout the state of Washington, to any and all work places under the jurisdiction of the department of labor and industries. These rules are minimum safety requirements with which all industries must comply. Special industry rules which will complement or augment rules contained in this chapter, appear as vertical standards in other chapters of Title 296 WAC. By adherence to such rules industrial accidents may be eliminated or minimized.

[Order 73-5, § 296-24-005, filed 5/9/73 and Order 73-4, § 296-24-005, filed 5/7/73.]

WAC 296-24-006 Equipment approval by nonstate agency or organization. Whenever a provision of this chapter states that only that equipment or those processes approved by an agency or organization other than the department of labor and industries, such as the Underwriters Laboratories or the Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health (NIOSH), shall be utilized, that provision shall be construed to mean that approval of such equipment or pro-

cess by the designated agency or group shall be prima facie evidence of compliance with the provision of this chapter.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-006, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-006, filed 5/9/73 and Order 73-4, § 296-24-006, filed 5/7/73.]

WAC 296-24-007 Incorporation of standards of national organization. Whenever a provision of this chapter incorporates by reference a national code or portion thereof which has been adopted by and is currently administered by another state agency, compliance with those provisions adopted and administered by such other state agency, if from a more recent edition of such national code, will be deemed to be prima facie evidence of compliance with the provisions of this chapter.

The specific standard(s), rule(s) or regulation(s) referenced in Title 296 WAC are available for review through local department of labor and industries offices. The standards are also available through the local library system or directly from the issuing organization.

[Statutory Authority: Chapter 49.17 RCW. 94-20-057 (Order 94-16), § 296-24-007, filed 9/30/94, effective 11/20/94; Order 73-5, § 296-24-007, filed 5/9/73 and Order 73-4, § 296-24-007, filed 5/7/73.]

WAC 296-24-008 Incorporation of standards of federal agency. (1) Whenever a provision of this chapter incorporates therein provisions of the Code of Federal Regulations (CFR) or any other regulations adopted by an agency of the federal government, that provision of this chapter shall be construed to mean that compliance with such regulations shall be prima facie evidence of compliance with the provisions of this chapter.

(2) Whenever a provision of this chapter incorporates therein provisions of the Code of Federal Regulations, the provisions so incorporated shall be those in effect on the date of effectiveness of this chapter, unless the content of the incorporating section specifies otherwise.

[Order 73-5, § 296-24-008, filed 5/9/73 and Order 73-4, § 296-24-008, filed 5/7/73.]

WAC 296-24-010 Variance and procedure. Conditions may exist in operations that a state standard will not have practical use. The director may issue a variance from the requirements of the standard when another means of providing equal protection is provided.

Applications for variances will be reviewed and investigated by the department. Variances granted shall be limited to the specific case or cases covered in the application and may be revoked for cause. The variance shall remain prominently posted on the premises while in effect.

Variance application forms may be obtained from the department upon request. Requests for variances from safety and health standards shall be made in writing to the director or the assistant director, Department of Labor and Industries, Post Office Box 44600, Olympia, Washington 98504-4600. (Reference RCW 49.17.080 and 49.17.090.)

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-010, filed 7/20/94, effective 9/20/94; 91-24-017 (Order 91-07), § 296-24-010, filed 11/22/91, effective 12/24/91; Order 74-27, § 296-24-010, filed

5/7/74; Order 73-5, § 296-24-010, filed 5/9/73 and Order 73-4, § 296-24-010, filed 5/7/73.]

WAC 296-24-012 Definitions applicable to all sections of this chapter.

Note: Meaning of words. Unless the context indicates otherwise, words used in this chapter shall have the meaning given in this section.

(1) "Approved" means approved by the director of the department of labor and industries or his/her authorized representative: Provided, however, That should a provision of this chapter state that approval by an agency or organization other than the department of labor and industries is required, such as Underwriters' Laboratories or the Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health (NIOSH), the provisions of WAC 296-24-006 shall apply.

(2) "Authorized person" means a person approved or assigned by the employer to perform a specific type of duty or duties or to be at a specific location or locations at the job site.

(3) "Competent person" means one who is capable of identifying existing and predictable hazards in the surroundings or working conditions which are unsanitary, hazardous, or dangerous to employees, and who has authorization to take prompt corrective action to eliminate them.

(4) "Department" means the department of labor and industries.

(5) "Director" means the director of the department of labor and industries, or his/her designated representative.

(6) "Employer" means any person, firm, corporation, partnership, business trust, legal representative, or other business entity which engages in any business, industry, profession, or activity in this state and employs one or more employees or who contracts with one or more persons, the essence of which is the personal labor of such person or persons and includes the state, counties, cities, and all municipal corporations, public corporations, political subdivisions of the state, and charitable organizations: Provided, That any person, partnership, or business entity not having employees, and who is covered by the industrial insurance act shall be considered both an employer and an employee.

(7) "First-aid" means, for purposes of this section, the extent of treatment that could be expected to be given by a person trained in basic first-aid, using supplies from a first-aid kit. Tests, such as x-rays, shall not be confused with treatment.

(8) "Hazard" means that condition, potential or inherent, which can cause injury, death, or occupational disease.

(9) "Hospitalization" means to be sent to; to go to; or be admitted to a hospital or an equivalent medical facility and receive medical treatment beyond that which would be considered as first-aid treatment, regardless of the length of stay in the hospital or medical facility.

(10) "Qualified" means one who, by possession of a recognized degree, certificate, or professional standing, or who by extensive knowledge, training, and experience, has successfully demonstrated the ability to solve or resolve problems relating to the subject matter, the work, or the project.

(11) "Safety factor" means the ratio of the ultimate breaking strength of a member or piece of material or equipment to the actual working stress or safe load when in use.

(12) "Safety and health standard" means a standard which requires the adoption or use of one or more practices, means, methods, operations, or processes reasonably necessary or appropriate to provide safe or healthful employment and places of employment.

(13) "Shall" means mandatory.

(14) "Should" means recommended.

(15) "Standard safeguard" means a device designed and constructed with the object of removing the hazard of accident incidental to the machine, appliance, tool, building, or equipment to which it is attached.

Standard safeguards shall be constructed of either metal or wood or other suitable material or a combination of these. The final determination of the sufficiency of any safeguard rests with the director of the department of labor and industries.

(16) "Suitable" means that which fits, or has the qualities or qualifications to meet a given purpose, occasion, condition, function, or circumstance.

(17) "Working day" means a calendar day, except Saturdays, Sundays, and legal holidays as set forth in RCW 1.16.050, as now or hereafter amended, and for the purposes of the computation of time within which an act is to be done under the provisions of this chapter, shall be computed by excluding the first working day and including the last working day.

(18) "Worker," "personnel," "person," "employee," and other terms of like meaning, unless the context of the provision containing such term indicates otherwise, mean an employee of an employer who is employed in the business of his/her employer whether by way of manual labor or otherwise and every person in this state who is engaged in the employment of or who is working under an independent contract the essence of which is his/her personal labor for an employer whether by manual labor or otherwise.

(19) "Work place" means any plant, yard, premises, room, or other place where an employee or employees are employed for the performance of labor or service over which the employer has the right of access or control, and includes, but is not limited to, all work places covered by industrial insurance under Title 51 RCW, as now or hereafter amended.

(20) Abbreviations used in this chapter:

(a) "ANSI" means American National Standards Institute.

(b) "API" means American Petroleum Institute.

(c) "ASA" means American Standards Association.

(d) "ASAE" means American Society of Agricultural Engineers.

(e) "ASHRE" means American Society of Heating and Refrigeration Engineers.

(f) "ASME" means American Society for Mechanical Engineers.

(g) "ASTM" means American Society for Testing and Materials.

(h) "AWS" means American Welding Society.

(i) "BTU" means British thermal unit.

(j) "BTUH" means British thermal unit per hour.

- (k) "CFM" means cubic feet per minute.
 - (l) "CFR" means Code of Federal Register.
 - (m) "CGA" means Compressed Gas Association.
 - (n) "CIE" means Commission Internationale de l'Éclairage.
 - (o) "DOT" means department of transportation.
 - (p) "FRP" means fiberglass reinforced plastic.
 - (q) "GPM" means gallons per minute.
 - (r) "ICC" means Interstate Commerce Commission.
 - (s) "ID" means inside diameter.
 - (t) "LPG" means liquefied petroleum gas.
 - (u) "MCA" means Manufacturing Chemist Association.
- (New name: Chemical Manufacturers Association.)
- (v) "NBFU" means National Board of Fire Underwriters.
 - (w) "NEMA" means National Electrical Manufacturing Association.
 - (x) "NFPA" means National Fire Protection Association.
 - (y) "NTP" means normal temperature and pressure.
 - (z) "OD" means outside diameter.
 - (aa) "PSI" means pounds per square inch.
 - (bb) "PSIA" means pounds per square inch atmospheric.
 - (cc) "PSIG" means pounds per square inch gauge.
 - (dd) "RMA" means Rubber Manufacturers Association.
 - (ee) "SAE" means Society of Automotive Engineers.
 - (ff) "TFI" means The Fertilizer Institute.
 - (gg) "TSC" means Trailer Standard Code.
 - (hh) "UL" means Underwriters' Laboratories, Inc.
 - (ii) "USASI" means United States of America Standards Institute.
 - (jj) "USC" means United States Code.
 - (kk) "USCG" means United States Coast Guard.
 - (ll) "WAC" means Washington Administrative Code.
 - (mm) "WISHA" means Washington Industrial Safety and Health Act of 1973.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-012, filed 7/20/94, effective 9/20/94; 89-11-035 (Order 89-03), § 296-24-012, filed 5/15/89, effective 6/30/89; Order 73-5, § 296-24-012, filed 5/9/73 and Order 73-4, § 296-24-012, filed 5/7/73.]

WAC 296-24-015 Education and first-aid standards.

It shall be the duty of every employer to comply with such standards and systems of education for safety as shall be, from time to time, prescribed for such employer by the director of labor and industries or by statute. (Chapter 49.17 RCW.)

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-015, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 43.22 and 42.30 RCW. 80-17-015 (Order 80-21), § 296-24-015, filed 11/13/80; Order 73-5, § 296-24-015, filed 5/9/73 and Order 73-4, § 296-24-015, filed 5/7/73.]

WAC 296-24-020 Management's responsibility.

(1) It shall be the responsibility of management to establish, supervise, and enforce, in a manner which is effective in practice:

- (a) A safe and healthful working environment.
- (b) An accident prevention program as required by these standards.
- (c) Training programs to improve the skill and competency of all employees in the field of occupational safety and health. Such training shall include the on-the-job instructions on the safe use of powered materials handling equipment,

machine tool operations, use of toxic materials and operation of utility systems prior to assignments to jobs involving such exposures.

(2) After the emergency actions following accidents that cause serious injuries that have immediate symptoms, a preliminary investigation of the cause of the accident shall be conducted. The investigation shall be conducted by a person designated by the employer, the immediate supervisor of the injured employee, witnesses, employee representative, and any other person with the special expertise required to evaluate the facts relating to the cause of the accident. The findings of the investigation shall be documented by the employer for reference at any following formal investigation. If the employee representative is the business agent of the employee bargaining unit and is unavailable to participate without delaying the investigation group, the employer may proceed, and satisfy the requirements of subsection (2) of this section by using one of the following alternatives:

- (a) The shop steward acts as the employee representative.
 - (b) An employee representative member of the safety committee acts as the employee representative.
 - (c) The employees select a person to represent them.
- (3) Reporting of fatality or multiple hospitalization incidents.

(a) Within eight hours after the fatality or probable fatality of any employee from a work-related incident or the inpatient hospitalization of two or more employees as a result of a work-related incident, the employer of any employees so affected, shall orally report the fatality/multiple hospitalization by telephone or in person to the nearest office of the department or by using the OSHA toll-free central telephone number, 1-800-321-6742.

(i) This requirement applies to each such fatality or hospitalization of two or more employees which occurs within thirty days of the incident.

(ii) Exception: If the employer does not learn of a reportable incident at the time it occurs and the incident would otherwise be reportable under this subsection, the employer shall make a report within eight hours of the time the incident is reported to any agent or employee of the employer.

(iii) Each report required by this subsection shall relate the following information: Establishment name, location of the incident, time of the incident, number of fatalities or hospitalized employees, contact person, phone number, and a brief description of the incident.

(b) Equipment involved in an incident resulting in an immediate or probable fatality or in the inpatient hospitalization of two or more employees, shall not be moved, until a representative of the department investigates the incident and releases such equipment, except where removal is essential to prevent further incident. Where necessary to remove the victim, such equipment may be moved only to the extent of making possible such removal.

(c) Upon arrival of the department's investigator, employer shall assign to assist the investigator, the immediate supervisor and all employees who were witnesses to the incident, or whoever the investigator deems necessary to complete the investigation.

(4) Each employer shall maintain in each establishment a system for maintaining records of occupational injuries and illnesses as prescribed by WAC 296-27-030.

Note: Recordable cases include:

1. Every occupational death.
2. Every industrial illness.
3. Every occupational injury that involves one of the following:
 - a. Unconsciousness.
 - b. Inability to perform all phases of regular job.
 - c. Inability to work full time on regular job.
 - d. Temporary assignment to another job.
 - e. Medical treatment beyond first-aid.

(5) All employers with eleven or more employees shall record occupational injury and illness information on forms OSHA 101 - Supplementary Record Occupational Injuries and Illnesses and OSHA 200 - Log and Summary. Forms other than OSHA 101 may be substituted for the Supplementary Record of Occupational Injuries and Illnesses if they contain the same items.

(6) Machinery, tools, materials or equipment, whether owned by the employer or under control of another firm or individual, which does not meet the compliance requirements of this chapter, or any other applicable vertical standard of a specific industry, shall not be utilized by employees.

(7) Each employer shall post and keep posted a notice or notices (the WISHA Poster, Job safety and health protection; form F416-081-000) to be furnished by the department of labor and industries, informing employees of the protections and obligations provided for in the act. For assistance and information, including copies of the act, and of specific safety and health standards, employees should contact the employer or the nearest office of the department of labor and industries. Such notice or notices shall be posted by the employer at each establishment in a conspicuous place or places where notices to employees are customarily posted. Each employer shall take steps to assure that such notices are not altered, defaced, or covered by other material.

[Statutory Authority: Chapter 49.17 RCW. 94-20-057 (Order 94-16), § 296-24-020, filed 9/30/94, effective 11/20/94; 91-24-017 (Order 91-07), § 296-24-020, filed 11/22/91, effective 12/24/91; 91-03-044 (Order 90-18), § 296-24-020, filed 1/10/91, effective 2/12/91; 90-03-029 (Order 89-20), § 296-24-020, filed 1/11/90, effective 2/26/90. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240 and chapters 42.30 and 43.22 RCW. 78-12-017 (Order 78-22), § 296-24-020, filed 11/13/78; Order 74-27, § 296-24-020, filed 5/7/74; Order 73-5, § 296-24-020, filed 5/9/73 and Order 73-4, § 296-24-020, filed 5/7/73.]

WAC 296-24-025 Employee's responsibility. (1) Employees shall coordinate and cooperate with all other employees in an attempt to eliminate accidents.

Note: What other written accident prevention program requirements may apply? The accident prevention plan information and/or documentation required by the following chapters can be part of the accident prevention program itself, or they can be covered in supplemental documents.

First-aid requirements WAC 296-24-061

Personal protective equipment Chapter 296-24 WAC,
Part A-2

(2) Employees shall study and observe all safe practices governing their work.

(3) Employees should offer safety suggestions, wherein such suggestions may contribute to a safer work environment.

(4) Employees shall apply the principles of accident prevention in their daily work and shall use proper safety devices and protective equipment as required by their employment or employer.

(5) Employees shall properly care for all personal protective equipment.

(6) Employees shall make a prompt report to their immediate supervisor, of each industrial injury or occupational illness, regardless of the degree of severity.

(7) Employees shall not wear torn or loose clothing while working around machinery.

[Order 74-27, § 296-24-025, filed 5/7/74; Order 73-5, § 296-24-025, filed 5/9/73 and Order 73-4, § 296-24-025, filed 5/7/73.]

WAC 296-24-040 Accident prevention programs. Each employer must develop a formal accident-prevention program, tailored to the needs of the particular plant or operation and to the type of hazards involved. The department may be contacted for assistance in developing appropriate programs.

(1) The minimal program elements for all employers are:

(a) A safety orientation program describing the employer's formal accident prevention program and including the following:

- How and when to report injuries, including instruction as to the location of first-aid facilities.
- How to report unsafe conditions and practices.
- The use and care of required personal protective equipment.
- The proper actions to take in event of emergencies including the routes of exiting from areas during emergencies.

• Identification of the hazardous gases, chemicals or materials involved along with the instructions on the safe use and emergency action following accidental exposure.

- A description of the employer's total safety program.
- An on-the-job review of the practices necessary to perform the initial job assignments in a safe manner.

(b) A designated safety and health committee consisting of management and employee representatives with the employee representatives being elected or appointed by fellow employees.

(2) Each accident-prevention program must be outlined in writing.

If an employer chooses Option 1 for first-aid response, the requirements must be in writing in accordance with the standard.

The employer must provide a written certification that a workplace hazard assessment has been performed.

Safety procedure-control of hazardous energy (lockout/tagout)	Chapter 296-24 WAC, Part A-4	The employer shall establish a written program consisting of an energy control procedure in accordance with the standard.
Hazard communication	Chapter 296-62 WAC, Part C	If workers use or are exposed to chemicals, employers are required to have a written program.
Respiratory protection	Chapter 296-62 WAC, Part E	If the use of a respirator is needed because a hazard exists, a written program is required.
Hearing conservation	Chapter 296-62 WAC, Part K	If employees work in a high noise environment as defined by the standard, the employer must establish a hearing conservation program. Each employer shall maintain a written description of the training program instituted.
Confined space	Chapter 296-62 WAC, Part M	If the employer decides that its employees will enter permit spaces, the employer is required to develop and implement a written permit confined space program.
Biological agents	Chapter 296-62 WAC, Part J	Each employer having employees with occupational exposures as defined by the standard is required to establish a written exposure control plan.
Late night retail	Chapter 296-24 WAC, Part A-3	If a retail employer has employees working between 11:00 p.m. and 6:00 a.m., crime prevention training shall be a part of the accident prevention program.
Means of egress	Chapter 296-24 WAC, Part G-1	If an employer must have an emergency action plan as a requirement of another standard (i.e., process safety management, grain handling, air contaminants) it must be developed and in writing in accordance with the standard.
Welding, cutting and brazing	Chapter 296-24 WAC, Part I	Rules and instructions for the operation and maintenance of oxygen or fuel-gas supply equipment must be readily available in accordance with the standard.
Powered platforms, etc.	Chapter 296-24 WAC, Part J-2	If employees use working platforms, written work procedures for the operation, safe use, and inspection must be provided for training in accordance with the standard.
Carcinogens (cancer causing)	Chapter 296-62 WAC, Part G	If employees are exposed to carcinogens, employers are required to implement a written program to reduce exposure to or below permissible limits.
Air contaminants (specific)	Chapter 296-62 WAC, Part I	If employees are exposed to air contaminants listed in this chapter, employers must establish and implement a written compliance program in accordance with the standard.
Asbestos, tremolite, anthophyllite and actinolite	Chapter 296-62 WAC, Part I-1	If employees are exposed to asbestos, tremolite, anthophyllite and actinolite, employers must establish and implement a written program to reduce employee exposure to or below the permissible limit.
Coke ovens	Chapter 296-62 WAC, Part O	If an employer operates coke ovens, they must implement a written program to reduce employee exposure in accordance with the standard.

Hazardous waste operations	Chapter 296-62 WAC, Part P	If employees are involved in hazardous waste operations, employers must develop and implement a written safety and health program in accordance with the standard.
Hazardous chemicals in laboratories	Chapter 296-62 WAC, Part Q	If employees are exposed to hazardous chemicals in laboratories, employers must develop and carry out the provisions of a written chemical hygiene plan in accordance with this standard.
Safety standards for process safety management of highly hazardous chemicals	Chapter 296-67 WAC	If employees work with toxic, reactive, flammable, or explosive chemicals, employers must develop a written plan as required by the standard.
Telecommunications	Chapter 296-32 WAC	There are additional accident prevention program requirements.
Diving operations	Chapter 296-37 WAC	The employer shall develop and maintain a safe practice manual.
Electrical workers	Chapter 296-45 WAC	There are additional accident prevention program requirements for employees working on or around high voltage.
Ski area facilities and operations	Chapter 296-59 WAC	The employer shall develop a written safety program.
Grain handling facilities	Chapter 296-99 WAC	The employer shall develop and implement a written housekeeping program.
Fire fighters	Chapter 296-305 WAC	The fire department shall develop a risk management policy that can be implemented into the function of incident command and the development on incident strategies.
Agriculture	Chapter 296-307 WAC	Agricultural employees are not covered by chapter 296-24 WAC, but agricultural employers must follow the accident prevention program requirements in WAC 296-307-030, as well as any other applicable standards referenced in this note.

Note:

- In chapter 296-27 WAC and elsewhere, there are recordkeeping requirements of which employers need to be aware.

Certain job specific activities need written, site or activity specific work plans (for example, the fall protection work plan and lead exposure in construction work).

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-17-093, § 296-24-040, filed 8/17/99, effective 12/1/99. Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-040, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240 and chapters 42.30 and 43.22 RCW. 78-12-017 (Order 78-22), § 296-24-040, filed 11/13/78; Order 74-27, § 296-24-040, filed 5/7/74; Order 73-5, § 296-24-040, filed 5/9/73 and Order 73-4, § 296-24-040, filed 5/7/73.]

WAC 296-24-045 Safety and health committee plan.

(1) All employers of eleven or more employees, shall have a designated safety committee composed of employer-selected and employee-elected members.

(a) The terms of employee-elected members shall be a maximum of one year. Should a vacancy occur on the committee, a new member shall be elected prior to the next scheduled meeting.

(b) The number of employer-selected members shall not exceed the number of employee-elected members.

(2) The safety committee shall have an elected chairperson.

(2001 Ed.)

(3) The safety committee shall be responsible for determining the frequency of committee meetings.

Note: If the committee vote on the frequency of safety meetings is stalemated, the department's regional safety consultation representative shall be consulted for recommendations.

(a) The committee shall be responsible for determining the date, hour and location of the meeting.

(b) The length of each meeting shall not exceed one hour except by majority vote of the committee.

(4) Minutes of each committee meeting shall be prepared and filed for a period of at least one year and shall be made available for review by noncompliance personnel, of the department of labor and industries.

(5) Safety and health committee meetings shall address the following:

(a) A review of the safety and health inspection reports to assist in correction of identified unsafe conditions or practices.

(b) An evaluation of the accident investigations conducted since the last meeting to determine if the cause of the unsafe acts or unsafe condition involved was properly identified and corrected.

(c) An evaluation of the accident and illness prevention program with a discussion of recommendations for improvement where indicated.

(d) The attendance shall be documented.

(e) The subject(s) discussed shall be documented.

(6) All employers of ten or less employees and employers of eleven or more employees where the employees are segregated on different shifts or in widely dispersed locations in crews of ten or less employees, may elect to have foreperson-crew meetings in lieu of a safety and health committee plan provided:

(a) Foreperson-crew safety meetings shall be held at least once a month, or if conditions require, weekly or biweekly meetings shall be held to discuss safety problems as they arise.

(b) All items under subsection (5) of this section, shall be complied with.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-045, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-24-045, filed 11/13/80; 78-12-017 (Order 78-22), § 296-24-045, filed 11/13/78.]

WAC 296-24-055 Safety bulletin board. There shall be installed and maintained in every fixed establishment employing eight or more persons, a safety bulletin board sufficient in size to display and post safety bulletins, newsletters, posters, accident statistics and other safety educational material. It is recommended that safety bulletin boards be painted green and white.

[Order 73-5, § 296-24-055, filed 5/9/73 and Order 73-4, § 296-24-055, filed 5/7/73.]

WAC 296-24-061 First-aid requirements.

[Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-061, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06105 What workplaces does this rule apply to? This rule applies to all workplaces, except for the ones listed below. They are, instead covered by separate individual rules (vertical standards):

<u>Rule Title</u>	<u>Chapter</u>
• Agriculture	296-307 WAC
• Compressed Air Work	296-36 WAC
• Construction	296-155 WAC
• Fire Fighters	296-305 WAC
• Logging	296-54 WAC
• Sawmills	296-78 WAC
• Shipbuilding and Repairing	296-304 WAC

[Statutory Authority: RCW 49.17.040. 99-02-023, § 296-24-06105, filed 12/30/98, effective 3/30/99. Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-06105, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06110 What is the purpose of this rule?

This rule ensures quick and effective first aid for all employees of the state, in case an injury or acute illness occurs on the job.

[Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-06110, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06115 What definitions apply to this section? "Emergency medical service" means medical treat-

[Title 296 WAC—p. 578]

ment and care given at the scene of any medical emergency or while transporting any victim to a medical facility.

"First aid" is immediate emergency care for injuries or acute illness before emergency medical treatment is available.

"First-aid station" is a well marked location where first-aid kits and supplies are stored and telephone numbers of emergency medical services are posted.

"First-aid kit" is an unlocked container holding first-aid supplies.

[Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-06115, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06120 How must an employer ensure that first-aid assistance is available in the workplace? The employer must ensure that first-aid trained personnel are available to help employees who are injured or who become acutely ill on the job. The employer must meet this requirement by one of the two options listed below.

(1) Option 1: Developing and maintaining a written first-aid response plan. The first-aid response plan must:

(a) Fit the work location, type of work and environmental conditions;

(b) Identify available emergency medical services and access numbers;

(c) Tell where the emergency medical services access numbers are posted;

(d) Tell how employees are trained in first aid, if applicable;

(e) Tell how injured or ill employees will have access to first-aid-trained employees;

(f) Give the location(s) of first-aid supplies and/or first-aid stations;

(g) Identify the contents of first-aid kits; and

(h) Tell how first-aid supplies or kits will be inspected and maintained.

Note: The first-aid response plan can be part of the written accident prevention program. See Appendix 1 for further guidance on a first-aid response plan.

(2) Option 2: Maintaining first-aid trained staff on the job site. The employer must ensure that:

(a) Each person in charge of employees has first-aid training; or another person with first-aid training is present or available to the employees;

(b) Documentation of first-aid training is kept as required in WAC 296-24-06140;

(c) Emergency telephone numbers are adequately posted.

[Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-06120, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06125 How many employees must be trained in first aid? If the employer chooses Option 1 of WAC 296-24-06120, the employer must determine how many employees to train in first aid based on the following factors:

(1) Nature, potential and degree of occupational hazards;

(2) Remoteness of the workplace;

- (3) Complexity of the workplace (including, but not limited to, design, size, etc.);
- (4) History of past medical emergencies; and
- (5) Time and distance to emergency medical services.

Note: If the employer requires an employee to give first aid, the bloodborne pathogen standard, WAC 296-62-080 applies and requires additional training.

[Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-06125, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06130 What must first-aid training cover? First-aid training must include these core elements:

- (1) Role and responsibilities of the first-aid provider;
- (2) Assessing a scene;
- (3) Performing an initial and ongoing assessment of an injured or ill person;
- (4) Scene safety;
- (5) Body substance isolation;
- (6) Performing an emergency move;
- (7) Placing an ill person in the recovery position;
- (8) Opening and maintaining an airway;
- (9) Providing rescue breathing;
- (10) Managing an obstructed airway;
- (11) Performing adult one rescuer CPR;
- (12) Recognizing the warning signs and symptoms of medical problems;
- (13) Recognizing and caring for an injured or ill person with decreased levels of responsiveness;
- (14) Controlling external bleeding and recognizing internal bleeding;
- (15) Recognizing and caring for victims of shock;
- (16) Recognizing and stabilizing spinal injury;
- (17) Recognizing and manually stabilizing suspected skeletal injuries; and
- (18) Knowledge of voluntary provisions of first aid, consent and confidentiality.

Note: Occupational risk or extended time and distance from emergency medical services may indicate a need for training beyond the items listed above. Each work environment should be surveyed to determine the appropriate level of training that employees should receive.

[Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-06130, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06135 How often must employees complete first-aid training? Every two years, employees must successfully complete first-aid training by demonstrating skill and knowledge in the core elements outlined in WAC 296-24-06130.

[Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-06135, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06140 How must an employer document first-aid training? Documentation of first-aid training must be maintained by the employer. Training rosters, first-aid cards or certificates are considered documentation.

[Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-06140, filed 3/2/98, effective 6/1/98.]

(2001 Ed.)

WAC 296-24-06145 What is the requirement for first-aid supplies? (1) First-aid supplies must be readily available to all employees.

(2) First-aid supplies must be stored in containers adequate to protect the contents from damage, deterioration, or contamination. The containers must be clearly marked and not locked, but may be sealed.

(3) First-aid supplies must be able to be moved to the location of the injured or acutely ill worker.

(4) The first-aid supplies must be appropriate to the occupational setting and the response time of emergency medical services.

Note: See Appendix 2 for recommended contents of first-aid kits.

[Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-06145, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06150 What is the requirement to provide a first-aid station? (1) Employers with 50 or more employees per shift at one location must establish a first-aid station.

(2) The first-aid station must:

- (a) Be well marked;
 - (b) Be available to employees during all working hours;
 - (c) Be equipped with first-aid supplies (type and amount depends on the number of employees, occupational setting and conditions);
 - (d) Have at least one portable first-aid kit.
- (3) At least one first-aid trained employee must be available.

[Statutory Authority: Chapter 49.17 RCW. 98-06-061, § 296-24-06150, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06155 APPENDIX 1 Evaluation worksheet for the first-aid response plan. This is a nonmandatory appendix. Option 1 of the first-aid standard (WAC 296-24-061) requires employers to prepare a first-aid response plan. The plan must address the availability of first-aid trained personnel at each place of employment. Since work sites are highly variable, the first-aid needs will also vary, depending on the number of employees, the type of work, the job hazards, and the availability of emergency medical services.

This questionnaire is designed to be used as a tool to assess the need for first-aid trained employees. Since some employers may have more than one location or type of work, this questionnaire can be used to assess each site. The plan should be reviewed annually or whenever conditions change at the work site.

1. What site or location does this plan cover?
2. Who is responsible for managing this plan?
3. How is this plan communicated to employees?
4. When was the plan written or last reviewed?
5. How many employees at the work site? (If work is seasonal, consider how many per season and shifts worked.)
6. How many work shifts at the work site? (Indicate shifts and employees per shift.)

Number of Employees	Shifts		
	Day	Swing	Graveyard
less than 10	—	—	—
11-49	—	—	—
50-99	—	—	—
100 or more	—	—	—

7. What are the sources of potential injuries or illnesses at the work site?

8. What types of injuries or illnesses have occurred in the past at the work site? (This information may be found in such sources as OSHA 200 forms, worker compensation claims, or safety committee minutes.)

9. What is the response time of the available emergency medical services to the work site (estimated time in minutes)?

10. How accessible are the first-aid trained personnel in the case of an accident?

11. What factors did I consider in deciding how many employees to train in first aid (specify)?

> Injury/illness history.

> Possible hazardous exposures (*chemicals, flammable liquids, temperature extremes, moving machinery or machinery parts, powered tools, work at elevations, high voltage electricity, confined spaces. If seasonal work, list for each season*).

> Number of separate work sites (*can be either separate locations, buildings, or types of work such as offices, warehouses, production areas, etc.*).

> Number of employees at this work site? (If seasonal work, list for each season.)

> Number of employees in each shift?

> Emergency medical service response time?

> First-aid response time?

12. Does the first-aid training provided to my employees include all the core elements required in the standard?

13. Based on my assessment of work site hazards, is additional training required beyond the core elements? (*Examples include burns, eye injuries, poisoning, heat stress, frost-bite.*)

14. What factors did I consider in determining the contents of my first-aid supplies/kits (specify)?

> Injury/illness history.

> Type of hazards at work site (*physical, chemical, biological*).

> Number of employees and shifts.

> Recommendations of first-aid training providers, local emergency response providers, physicians or clinics, trade organizations, knowledgeable employees or first-aid kit vendors.

15. What factors did I consider in determining the number and location of my first-aid supplies/kit(s) (specify)?

> Location of employees.

> Areas of greatest hazards.

> Ease of accessibility of kit.

16. Who is responsible for maintaining first-aid supplies/kit(s)?

[Statutory Authority: Chapter 49.17 RCW, 98-06-061, § 296-24-06155, filed 3/2/98, effective 6/1/98.]

WAC 296-24-06160 APPENDIX 2—First-aid kit guidance.

Sample First-aid Kit Contents

- a) 1 absorbent compress, 4x8 inches
- b) 16 adhesive bandages, 1x3 inches
- c) 1 adhesive tape, 5 yards long
- d) 10 antiseptic single-use packages, 0.5 g. application
- e) 6 burn treatment single-use packages, 0.5 g. application
- f) 1 eye covering (for two eyes)
- g) 1 eye wash, 1 fluid ounce
- h) 4 sterile pads, 3x3 inches
- i) 2 pair of medical exam gloves
- j) 1 triangular bandage, 39x39x55 inches

Optional First-aid Kit Contents

- ao) Bandage compresses, 2x2 inches, 3x3 inches and 5x5 inches
- bo) Self-activating cold packs, 4x5 inches
- co) Roller bandages, 6 yards long
- do) Mouth-to-mouth barrier for CPR

Note: ASTM, ANSI, or other consensus national standard kits will meet these requirements.

Employers may consider factors in Appendix 1 (item #15) to determine additional locations or quantities of first-aid supplies.

[Statutory Authority: Chapter 49.17 RCW, 98-06-061, § 296-24-06160, filed 3/2/98, effective 6/1/98.]

WAC 296-24-073 Safe place standards. (1) Each employer shall furnish to each employee a place of employment free from recognized hazards that are causing or likely to cause serious injury or death to his employees.

(2) Every employer shall furnish and use safety devices and safeguards, and shall adopt and use practices, means, methods, operations, and processes which are reasonably adequate to render such employment and place of employment safe. Every employer shall do every other thing reasonably necessary to protect the life and safety of employees.

(3) No employer shall require any employee to go or be in any employment or place of employment which is not safe.

(4) No employer shall fail or neglect:

(a) To provide and use safety devices and safeguards.

(b) To adopt and use methods and processes reasonably adequate to render the employment and place of employment safe.

(c) To do every other thing reasonably necessary to protect the life and safety of employees.

(5) No employer, owner, or lessee of any real property shall construct or cause to be constructed any place of employment that is not safe.

(6) No person shall do any of the following:

(a) Remove, displace, damage, destroy or carry off any safety device, safeguard, notice, or warning, furnished for use in any employment or place of employment.

(b) Interfere in any way with the use thereof by any other person.

(c) Interfere with the use of any method or process adopted for the protection of any one employee, including themselves, in such employment, or place of employment.

(d) Fail or neglect to do every other thing reasonably necessary to protect the life and safety of employees.

(e) Intoxicating beverages and narcotics shall not be permitted in or around work sites except in industries and business engaged in the production, distribution, and sale of intoxicating beverages and drugs. Workers under the influence of alcohol or narcotics shall not be permitted on the work site. This rule does not apply to persons taking prescription drugs and narcotics as directed by a physician or dentist providing such use shall not endanger the worker or others.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-073, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 85-01-022 (Order 84-24), § 296-24-073, filed 12/11/84; Order 74-27, § 296-24-073, filed 5/7/74; Order 73-5, § 296-24-073, filed 5/9/73 and Order 73-4, § 296-24-073, filed 5/7/73.]

PART A-2

PERSONAL PROTECTIVE EQUIPMENT

WAC 296-24-075 Personal protective equipment.

[Order 73-5, § 296-24-075, filed 5/9/73 and Order 73-4, § 296-24-075, filed 5/7/73.]

WAC 296-24-07501 General requirements. (1) Application.

(a) Protective equipment, including personal protective equipment for eyes, face, head, and extremities, protective clothing, respiratory protection according to chapter 296-62 WAC, Part E, and protective shields and barriers, shall be provided, used, and maintained in a sanitary and reliable condition wherever it is necessary by reason of hazards of processes or environment, chemical hazards, radiological hazards, or mechanical irritants encountered in a manner capable of causing injury or impairment in the function of any part of the body through absorption, inhalation or physical contact.

(b) Employee owned equipment. Where employees provide their own protective equipment, the employer shall be responsible to assure its adequacy, including proper maintenance, and sanitation of such equipment.

(c) Design. All personal protective equipment shall be of safe design and construction for the work to be performed. Protectors shall be durable, fit snugly and shall not unduly interfere with the movements of the wearer.

(2) Hazard assessment and equipment selection. This subsection does not apply to WAC 296-24-092, Electrical protective devices, and chapter 296-62 WAC, Part E, Respiratory protection.

(2001 Ed.)

(a) The employer shall assess the workplace to determine if hazards are present, or are likely to be present, which necessitate the use of personal protective equipment (PPE). If such hazards are present, or likely to be present, the employer shall:

(i) Select, and have each affected employee use, the types of PPE that will protect the affected employee from the hazards identified in the hazard assessment;

(ii) Communicate selection decisions to each affected employee; and

(iii) Select PPE that properly fits each affected employee.

Note: Nonmandatory Appendix B contains an example of procedures that would comply with the requirement for a hazard assessment.

(b) The employer shall verify that the required workplace hazard assessment has been performed through a written certification that identifies the workplace evaluated; the person certifying that the evaluation has been performed; the date(s) of the hazard assessment; and, which identifies the document as a certification of hazard assessment.

(3) Defective and damaged equipment. Defective or damaged personal protective equipment shall not be used.

(4) Training. This subsection does not apply to WAC 296-24-092, Electrical protective devices, and chapter 296-62 WAC, Part E, Respiratory protection.

(a) The employer shall provide training to each employee who is required by this section to use PPE. Each such employee shall be trained to know at least the following:

(i) When PPE is necessary;

(ii) What PPE is necessary;

(iii) How to properly don, doff, adjust, and wear PPE;

(iv) The limitations of the PPE; and

(v) The proper care, maintenance, useful life and disposal of the PPE.

(b) Each affected employee shall demonstrate an understanding of the training specified in (a) of this subsection, and the ability to use PPE properly, before being allowed to perform work requiring the use of PPE.

(c) When the employer has reason to believe that any affected employee who has already been trained does not have the understanding and skill required by (b) of this subsection, the employer shall retrain each such employee. Circumstances where retraining is required include, but are not limited to, situations where:

(i) Changes in the workplace render previous training obsolete; or

(ii) Changes in the types of PPE to be used render previous training obsolete; or

(iii) Inadequacies in an affected employee's knowledge or use of assigned PPE indicate that the employee has not retained the requisite understanding or skill.

(d) The employer shall verify that each affected employee has received and understood the required training through a written certification that contains the name of each employee trained, the date(s) of training, and that identifies the subject of the certification.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-10-071, § 296-24-07501, filed 5/4/99, effective 9/1/99. Statutory Authority: Chapter 49.17 RCW. 94-20-057 (Order 94-16), § 296-24-07501, filed

9/30/94, effective 11/20/94; Order 73-5, § 296-24-07501, filed 5/9/73 and Order 73-4, § 296-24-07501, filed 5/7/73.]

WAC 296-24-078 Eye and face protection.

[Order 73-5, § 296-24-078, filed 5/9/73 and Order 73-4, § 296-24-078, filed 5/7/73.]

WAC 296-24-07801 General. (1) The employer shall ensure that each affected employee uses appropriate eye or face protection when exposed to eye or face hazards from flying particles, molten metal, liquid chemicals, acids or caustic liquids, chemical gases or vapors, or potentially injurious light radiation.

(2) The employer shall ensure that each affected employee uses eye protection that provides side protection when there is a hazard from flying objects. Detachable side protectors (e.g., clip-on or slide-on side shields) meeting the pertinent requirements of this section are acceptable.

(3) The employer shall ensure that each affected employee who wears prescription lenses while engaged in operations that involve eye hazards wears eye protection that incorporates the prescription in its design, or wears eye protection that can be worn over the prescription lenses without disturbing the proper position of the prescription lenses or the protective lenses.

(4) Eye and face PPE shall be distinctly marked to facilitate identification of the manufacturer.

(5) The employer shall ensure that each affected employee uses equipment with filter lenses that have a shade number appropriate for the work being performed for protection from injurious light radiation. The following is a listing of appropriate shade numbers for various operations.

Filter Lenses for Protection Against Radiant Energy

Operations	Electrode Size 1/32 (inches)	Minimum* Protective Arc Current	Shade
Shielded metal arc welding	Less than 3	Less than 60	7
	3-5	60-160	8
	5-8	160-250	10
	More than 8	250-550	11
Gas metal arc welding and flux cored arc welding		Less than 60	7
		60-160	10
		160-250	10
		250-500	10
Gas Tungsten arc welding		Less than 50	8
		50-150	8
		150-500	10
Air carbon Arc cutting	(Light)	Less than 500	10
	(Heavy)	500-1000	11
Plasma arc welding		Less than 20	6
		20-100	8
		100-400	10
		400-800	11
Plasma arc cutting	(Light)	Less than 300	8
	(Medium)**	300-400	9
	(Heavy)**	400-800	10
Torch brazing			3
Torch soldering			2
Carbon arc welding			14

Filter Lenses for Protection Against Radiant Energy

Operations	Plate thickness (inches)	Plate thickness (mm)	Minimum* Protective Shade	
Gas welding:	Light	Under 1/8	Under 3.2	4
	Medium	1/8 to 1/2	3.2 to 12.7	5
	Heavy	Over 1/2	Over 12.7	6
Oxygen cutting:	Light	Under 1	Under 25	3
	Medium	1 to 6	25 to 150	4
	Heavy	Over 6	Over 150	5

*As a rule of thumb, start with a shade that is too dark to see the weld zone. Then go to a lighter shade which gives sufficient view of the weld zone without going below the minimum. In oxyfuel gas welding or cutting where the torch produces a high yellow light, it is desirable to use a filter lens that absorbs the yellow or sodium line in the visible light of the (spectrum) operation.

** These values apply where the actual arc is clearly seen. Experience has shown that lighter filters may be used when the arc is hidden by the workpiece.

(6) Criteria for protective eye and face devices.

(a) Protective eye and face devices purchased after February 20, 1995, shall comply with ANSI Z87.1-1989, "American National Standard Practice for Occupational and Educational Eye and Face Protection," which is incorporated by reference, or shall be demonstrated by the employer to be equally effective.

(b) Eye and face protective devices purchased before February 20, 1995, shall comply with the ANSI standard "American National Standard Practice for Occupational and Educational Eye and Face Protection," ANSI Z87.1-1968 or shall be demonstrated by the employer to be equally effective.

[Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 97-11-055, § 296-24-07801, filed 5/20/97, effective 8/1/97. Statutory Authority: Chapter 49.17 RCW. 94-20-057 (Order 94-16), § 296-24-07801, filed 9/30/94, effective 11/20/94; Order 73-5, § 296-24-07801, filed 5/9/73 and Order 73-4, § 296-24-07801, filed 5/7/73.]

WAC 296-24-084 Occupational head protection. (1)

General requirements.

(a) The employer shall ensure that each affected employee wears a protective helmet when working in areas where there is a potential for injury to the head from falling or flying objects.

(b) The employer shall ensure that a protective helmet designed to reduce electrical shock hazard is worn by each such affected employee when near exposed electrical conductors which could contact the head.

(2) Criteria for protective helmets.

(a) Protective helmets purchased after February 20, 1995, shall comply with ANSI Z89.1-1986, "American National Standard for Personnel Protection—Protective Headwear for Industrial Workers—Requirements," which is incorporated by reference, or shall be demonstrated to be equally effective.

(b) Protective helmets purchased before February 20, 1995, shall comply with the ANSI standard "American National Standard Safety Requirements for Industrial Head

Protection," ANSI Z89.1-1969, or shall be demonstrated by the employer to be equally effective.

(3) Persons working in the shops around machinery or in locations which present a hair catching or fire hazard shall wear caps or other type of head covering which completely covers the hair. Caps with metal buttons or metal visors shall not be worn around electrical hazards.

Note 1: The following will define hair lengths considered hazardous:

(a) When the length would exceed the circumference of exposed revolving shafts or tools in fixed machines by 200 percent.

(b) When the length would exceed the radius of pressure rolls with exposed in-running nip points.

(c) When the employee is exposed to an ignition source and the employee may, with hair aflame, run into an area containing class -I flammable liquids or combustible atmospheres.

(d) When exposures require personal protective devices, such as mask-type respirators or ear-cup-type hearing protection devices, and hair, either facial or head, would interfere with a proper seal.

Note 2: When hair length is judged hazardous from a hair catching standpoint (instances (a) or (b) under interpretations in Note 1) minimal confinement shall be within netting which controls all loose ends.

Note 3: If hazardous from fire hazard aspects (instance (c) of Note 1) the hair must be confined within a solid-type material.

(4) Protective helmets shall be worn by employees who work around or under scaffolds or other overhead structures, or who are otherwise exposed to the hazards of falling materials and propelled objects.

[Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 97-11-055, § 296-24-084, filed 5/20/97, effective 8/1/97. Statutory Authority: Chapter 49.17 RCW. 96-09-030, § 296-24-084, filed 4/10/96, effective 6/1/96; 94-20-057 (Order 94-16), § 296-24-084, filed 9/30/94, effective 11/20/94; 91-03-044 (Order 90-18), § 296-24-084, filed 1/10/91, effective 2/12/91; Order 74-27, § 296-24-084, filed 5/7/74; Order 73-5, § 296-24-084, filed 5/9/73 and Order 73-4, § 296-24-084, filed 5/7/73.]

WAC 296-24-086 Personal flotation devices. (1)

Employees working on, over or along water, where the danger of drowning exists, shall be provided with and shall wear approved personal flotation devices.

(a) Employees are not considered exposed to the danger of drowning when;

(i) The water depth is known to be less than chest deep on the exposed individual;

(ii) When working behind standard height and strength guardrails;

(iii) When working inside operating cabs or stations which eliminate the possibility of accidentally falling into the water;

(iv) When wearing approved safety belts with lifeline attached so as to preclude the possibility of falling into the water.

(b) Prior to and after each use, personal flotation devices shall be inspected for defects which would reduce their designed effectiveness. Defective personal flotation devices shall not be used.

(c) To meet the approved criteria required by subdivision (1), a personal flotation device shall be approved by the United States Coast Guard as a Type I PFD, Type II PFD, Type III PFD, or Type V PFD, or their equivalent, pursuant to 46 CFR 160 (Coast Guard Lifesaving Equipment Specifi-

(2001 Ed.)

cations) and 33 CFR 175.23 (Coast Guard table of devices equivalent to personal flotation devices). Ski belt or inflatable type personal flotation devices are specifically prohibited.

(2) Life ring.

(a) Along docks, walkways or other fixed installations on or adjacent to open water more than five feet deep, approved life rings with line attached shall be provided. The life rings shall be spaced at intervals not to exceed 200 feet and shall be kept in easily visible and readily accessible locations.

(b) When employees are assigned work at other casual locations where exposure to drowning exists, at least one approved life ring with line attached shall be provided in the immediate vicinity of the work assigned.

(c) Work assigned over water where the vertical drop from an accidental fall would exceed 50 feet, shall be subject to specific procedures as approved by the department.

(d) Lines attached to life rings shall be at least 90 feet in length, at least 1/4 inch in diameter and have a minimum breaking strength of 500 pounds.

(e) Life rings must be United States Coast Guard approved 30 inch size.

(f) Life rings and attached lines must be maintained to retain at least 75 percent of their designed buoyance and strength.

[Order 76-6, § 296-24-086, filed 3/1/76.]

WAC 296-24-088 Occupational foot protection. (1)

General requirements. The employer shall ensure that each affected employee wears protective footwear when working in areas where there is a danger of foot injuries due to falling or rolling objects, or objects piercing the sole, and where such employee's feet are exposed to electrical hazards.

(2) Criteria for protective footwear.

(a) Protective footwear purchased after February 20, 1995, shall comply with ANSI Z41-1991, "American National Standard for Personal Protection—Protective Footwear," which is incorporated by reference, or shall be demonstrated by the employer to be equally effective.

(b) Protective footwear purchased before February 20, 1995, shall comply with the ANSI standard "USA Standard for Men's Safety-Toe Footwear," ANSI Z41.1-1967, which is incorporated by reference, or shall be demonstrated by the employer to be equally effective.

(3) Calks or other suitable footwear which will afford reasonable protection from slipping shall be worn while working on logs.

[Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 97-11-055, § 296-24-088, filed 5/20/97, effective 8/1/97. Statutory Authority: Chapter 49.17 RCW. 94-20-057 (Order 94-16), § 296-24-088, filed 9/30/94, effective 11/20/94; 94-15-096 (Order 94-07), § 296-24-088, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-088, filed 5/9/73 and Order 73-4, § 296-24-088, filed 5/7/73.]

WAC 296-24-090 Hand protection. (1) General requirements. Employers shall select and require employees to use appropriate hand protection when employees' hands are exposed to hazards such as those from skin absorption of harmful substances; severe cuts or lacerations; severe abra-

sions; punctures; chemical burns; thermal burns; and harmful temperature extremes.

(2) Selection. Employers shall base the selection of the appropriate hand protection on an evaluation of the performance characteristics of the hand protection relative to the task(s) to be performed, conditions present, duration of use, and the hazards and potential hazards identified.

[Statutory Authority: Chapter 49.17 RCW, 94-20-057 (Order 94-16), § 296-24-090, filed 9/30/94, effective 11/20/94.]

WAC 296-24-092 Electrical protective equipment.

(1) Design requirements. Insulating blankets, matting, covers, line hose, gloves, and sleeves made of rubber shall meet the following requirements:

(a) Manufacture and marking.

(i) Blankets, gloves, and sleeves shall be produced by a seamless process.

(ii) Each item shall be clearly marked as follows:

(A) Class 0 equipment shall be marked Class 0.

(B) Class 1 equipment shall be marked Class 1.

(C) Class 2 equipment shall be marked Class 2.

(D) Class 3 equipment shall be marked Class 3.

(E) Class 4 equipment shall be marked Class 4.

(F) Nonozone-resistant equipment other than matting shall be marked Type I.

(G) Ozone-resistant equipment other than matting shall be marked Type II.

(H) Other relevant markings, such as the manufacturer's identification and the size of the equipment, may also be provided.

(iii) Markings shall be nonconducting and shall be applied in such a manner as not to impair the insulating qualities of the equipment.

(iv) Markings on gloves shall be confined to the cuff portion of the glove.

(b) Electrical requirements.

(i) Equipment shall be capable of withstanding the a-c proof-test voltage specified in Table A-2 or the d-c proof-test voltage specified in Table A-3.

(A) The proof-test shall reliably indicate that the equipment can withstand the voltage involved.

(B) The test voltage shall be applied continuously for three minutes for equipment other than matting and shall be applied continuously for one minute for matting.

(C) Gloves shall also be capable of withstanding the a-c proof-test voltage specified in Table A-2 after a sixteen-hour water soak. (See the note following (c)(ii)(B) of this subsection.)

(ii) When the a-c proof-test is used on gloves, the 60 hertz proof-test current may not exceed the values specified in Table A-2 at any time during the test period.

(A) If the a-c proof-test is made at a frequency other than 60 hertz, the permissible proof-test current shall be computed from the direct ratio of the frequencies.

(B) For the test, gloves (right side out) shall be filled with tap water and immersed in water to a depth that is in accordance with Table A-4. Water shall be added to or removed from the glove, as necessary, so that the water level is the same inside and outside the glove.

(C) After the sixteen-hour water soak specified in (b)(i)(C) of this subsection, the 60-hertz proof-test current may exceed the values given in Table A-2 by not more than 2 milliamperes.

(iii) Equipment that has been subjected to a minimum breakdown voltage test may not be used for electrical protection. (See the note following (c)(ii)(B) of this subsection.)

(iv) Material used for Type II insulating equipment shall be capable of withstanding an ozone test, with no visible effects. The ozone test shall reliably indicate that the material will resist ozone exposure in actual use. Any visible signs of ozone deterioration of the material, such as checking, cracking, breaks, or pitting, is evidence of failure to meet the requirements for ozone-resistant material. (See the note following (c)(ii)(B) of this subsection.)

(c) Workmanship and finish.

(i) Equipment shall be free of harmful physical irregularities that can be detected by the tests or inspections required under this section.

(ii) Surface irregularities that may be present on all rubber goods because of imperfections on forms or molds or because of inherent difficulties in the manufacturing process and that may appear as indentations, protuberances, or imbedded foreign material are acceptable under the following conditions:

(A) The indentation or protuberance blends into a smooth slope when the material is stretched.

(B) Foreign material remains in place when the insulating material is folded and stretches with the insulating material surrounding it.

Note: Rubber insulating equipment meeting the following national consensus standards is deemed to be in compliance with subsection (1) of this section:

American Society for Testing and Materials (ASTM) D 120-87, Specification for Rubber Insulating Gloves.

ASTM D 178-93, Specification for Rubber Insulating Matting.

ASTM D 1048-93, Specification for Rubber Insulating Blankets.

ASTM D 1049-93, Specification for Rubber Insulating Covers.

ASTM D 1050-90, Specification for Rubber Insulating Line Hose.

ASTM D 1051-87, Specification for Rubber Insulating Sleeves.

These standards contain specifications for conducting the various tests required in subsection (1) of this section. For example, the a-c and d-c proof-tests, the breakdown test, the water soak procedure, and the ozone test mentioned in this paragraph are described in detail in the ASTM standards.

(2) In-service care and use.

(a) Electrical protective equipment shall be maintained in a safe, reliable condition.

(b) The following specific requirements apply to insulating blankets, covers, line hose, gloves, and sleeves made of rubber:

(i) Maximum use voltages shall conform to those listed in Table A-5.

(ii) Insulating equipment shall be inspected for damage before each day's use and immediately following any incident that can reasonably be suspected of having caused damage. Insulating gloves shall be given an air test, along with the inspection.

(iii) Insulating equipment with any of the following defects may not be used:

(A) A hole, tear, puncture, or cut;

(B) Ozone cutting or ozone checking (the cutting action produced by ozone on rubber under mechanical stress into a series of interlacing cracks);

(C) An embedded foreign object;

(D) Any of the following texture changes: Swelling, softening, hardening, or becoming sticky or inelastic.

(E) Any other defect that damages the insulating properties.

(iv) Insulating equipment found to have other defects that might affect its insulating properties shall be removed from service and returned for testing under (b)(viii)(ix) of this subsection.

(v) Insulating equipment shall be cleaned as needed to remove foreign substances.

(vi) Insulating equipment shall be stored in such a location and in such a manner as to protect it from light, temperature extremes, excessive humidity, ozone, and other injurious substances and conditions.

(vii) Protector gloves shall be worn over insulating gloves.

(viii) Electrical protective equipment shall be subjected to periodic electrical tests. Test voltages and the maximum intervals between tests shall be in accordance with Table A-5 and Table A-6.

(ix) The test method used under (b)(viii) and (xi) of this subsection shall reliably indicate whether the insulating equipment can withstand the voltages involved.

Note: Standard electrical test methods considered as meeting this requirement are given in the following national consensus standards:
 American Society for Testing and Materials (ASTM) D 120-87, Specification for Rubber Insulating Gloves.
 ASTM D 1048-93, Specification for Rubber Insulating Blankets.
 ASTM D 1049-93, Specification for Rubber Insulating Covers.
 ASTM D 1050-90, Specification for Rubber Insulating Line Hose.
 ASTM D 1051-87, Specification for Rubber Insulating Sleeves.
 ASTM F 478-92, Specification for In-Service Care of Insulating Line Hose and Covers.
 ASTM F 479-88a, Specification for In-Service Care of Insulating Blankets.
 ASTM F 496-93b, Specification for In-Service Care of Insulating Gloves and Sleeves.

(x) Insulating equipment failing to pass inspections or electrical tests shall not be used by employees, except as follows:

(A) Rubber insulating line hose could be used in shorter lengths with the defective portion cut off.

(B) Rubber insulating blankets could be repaired using a compatible patch that results in physical and electrical properties equal to those of the blanket.

(C) Rubber insulating blankets could be salvaged by severing the defective area from the undamaged portion of the blanket. The resulting undamaged area shall not be smaller than twenty-two inches by twenty-two inches (560 mm by 560 mm) for Class 1, 2, 3, and 4 blankets.

(xi) Repaired insulating equipment shall be retested before it may be used by employees.

(xii) The employer shall certify that equipment has been tested in accordance with the requirements of (b)(viii), (ix),

and (xi) of this subsection. The certification shall identify the equipment that passed the test and the date it was tested.

Note: Marking of equipment and entering the results of the tests and the dates of testing onto logs are two acceptable means of meeting this requirement.

Table A-2. -A-C Proof-Test Requirements
 Maximum proof-test current, mA (gloves only)

Class of equipment	Proof-test voltage rms V	267-mm (10.5-in) glove	356-mm (14-in) glove	406-mm (16-in) glove	457-mm (18-in) glove
0	5,000	8	12	14	16
1	10,000		14	16	18
2	20,000		16	18	20
3	30,000		18	20	22
4	40,000			22	24

Table A-3. -D-C Proof-Test Requirements

Class of equipment	Proof-test voltage
0	20,000
1	40,000
2	50,000
3	60,000
4	70,000

Note: The d-c voltages listed in this table are not appropriate for proof testing rubber insulating line hose or covers. For this equipment, d-c proof-tests shall use a voltage high enough to indicate that the equipment can be safely used at the voltages listed in Table A-4. See ASTM D 1050-90 and ASTM D 1049-88 for further information on proof tests for rubber insulating line hose and covers.

Table A-4.-Glove Tests-Water Level^{1, 2}

Class of glove	A-C proof-test		D-C proof-test	
	mm.	in.	mm.	in.
0	38	1.5	38	1.5
1	38	1.5	51	2.0
2	64	2.5	76	3.0
3	89	3.5	102	4.0
4	127	5.0	153	6.0

¹The water level is given as the clearance from the cuff of the glove to the water line, with a tolerance of 13 mm. (0.5 in.).

²If atmospheric conditions make the specified clearances impractical, the clearances may be increased by a maximum of 25 mm. (1 in.).

Table A-5.-Rubber Insulating Equipment
 Voltage Requirements
 Maximum

Class of equipment	use	Retest	Retest
	voltage ¹ a-c-rms	voltage ² a-c-rms	voltage ² d-c-rms
0	1,000	5,000	20,000
1	7,500	10,000	40,000
2	17,000	20,000	50,000
3	26,500	30,000	60,000
4	36,000	40,000	70,000

Note: Rubber gloves shall only be used on voltages of 5000 volts phase to phase or less.

¹The maximum use voltage is the a-c voltage (rms) classification of the protective equipment that designates the maximum nominal design/voltage of the energized system that may be safely worked. The nominal design voltage is equal to the phase-to-phase voltage on multiphase circuits. However, the phase-to-ground potential is considered to be the nominal design/voltage:

1. If there is no multiphase exposure in a system area and if the voltage exposure is limited to the phase-to-ground potential, or

2. If the electrical equipment and devices are insulated or isolated or both so that the multiphase exposure on a grounded wye circuit is removed.

²The proof-test voltage shall be applied continuously for at least one minute, but no more than three minutes.

Table A-6.-Rubber Insulating Equipment Test Intervals

Type of equipment	When to test
Rubber insulating line hose	Upon indication that insulating value is suspect.
Rubber insulating covers	Upon indication that insulating value is suspect.
Rubber insulating blankets	Before first issue and every 12 months thereafter. ¹
Rubber insulating gloves	Before first issue and every 6 months thereafter. ¹
Rubber insulating sleeves	Before first issue and every 12 months thereafter. ¹

If the insulating equipment has been electrically tested but not issued for service, it may not be placed into service unless it has been electrically tested within the previous 12 months.

(3) Where switches or fuses of more than 150 volts to ground are not guarded during ordinary operations, suitable insulating floors, mats or platforms shall be provided on which the operator must stand while handling the switches.

WAC 296-24-098 Appendix B to Part A-2—Non-mandatory compliance guidelines for hazard assessment and personal protective equipment selection. This Appendix is intended to provide compliance assistance for employers and employees in implementing requirements for a hazard assessment and the selection of personal protective equipment.

(1) Controlling hazards. PPE devices alone should not be relied on to provide protection against hazards, but should be used in conjunction with guards, engineering controls, and sound manufacturing practices.

(2) Assessment and selection. It is necessary to consider certain general guidelines for assessing the foot, head, eye and face, and hand hazard situations that exist in an occupational or educational operation or process, and to match the protective devices to the particular hazard. It should be the responsibility of the safety officer to exercise reasonable diligence and appropriate expertise to accomplish these tasks.

(3) Assessment guidelines. In order to assess the need for PPE the following steps should be taken:

(a) Survey. Conduct a walk-through survey of the areas in question. The purpose of the survey is to identify sources of hazards to workers and co-workers. Consideration should be given to the basic hazard categories:

- (i) Impact;
- (ii) Penetration;
- (iii) Compression (roll-over);
- (iv) Chemical;
- (v) Heat;
- (vi) Harmful dust;
- (vii) Light (optical) radiation.

(b) Sources. During the walk-through survey the safety officer should observe:

(i) Sources of motion; i.e., machinery or processes where any movement of tools, machine elements or particles could exist, or movement of personnel that could result in collision with stationary objects;

(ii) Sources of high temperatures that could result in burns, eye injury or ignition of protective equipment, etc.;

(iii) Types of chemical exposures;

(iv) Sources of harmful dust;

(v) Sources of light radiation, i.e., welding, brazing, cutting, furnaces, heat treating, high intensity lights, etc.;

(vi) Sources of falling objects or potential for dropping objects;

(vii) Sources of sharp objects which might pierce the feet or cut the hands;

(viii) Sources of rolling or pinching objects which could crush the feet;

(ix) Layout of workplace and location of co-workers; and

(x) Any electrical hazards. In addition, injury/accident data should be reviewed to help identify problem areas.

(c) Organize data. Following the walk-through survey, it is necessary to organize the data and information for use in the assessment of hazards. The objective is to prepare for an analysis of the hazards in the environment to enable proper selection of protective equipment.

(d) Analyze data. Having gathered and organized data on a workplace, an estimate of the potential for injuries should be made. Each of the basic hazards (subsection (3)(a) of this section) should be reviewed and a determination made as to the type, level of risk, and seriousness of potential injury from each of the hazards found in the area. The possibility of exposure to several hazards simultaneously should be considered.

(4) Selection guidelines. After completion of the procedures in subsection (3) of this section, the general procedure for selection of protective equipment is to:

(a) Become familiar with the potential hazards and the type of protective equipment that is available, and what it can do; i.e., splash protection, impact protection, etc.;

(b) Compare the hazards associated with the environment; i.e., impact velocities, masses, projectile shape, radiation intensities, with the capabilities of the available protective equipment;

(c) Select the protective equipment which ensures a level of protection greater than the minimum required to protect employees from the hazards; and

(d) Fit the user with the protective device and give instructions on care and use of the PPE. It is very important that end users be made aware of all warning labels for and limitations of their PPE.

(5) Fitting the device. Careful consideration must be given to comfort and fit. PPE that fits poorly will not afford the necessary protection. Continued wearing of the device is more likely if it fits the wearer comfortably. Protective devices are generally available in a variety of sizes. Care should be taken to ensure that the right size is selected.

(6) Devices with adjustable features. Adjustments should be made on an individual basis for a comfortable fit that will maintain the protective device in the proper position. Particular care should be taken in fitting devices for eye protection against dust and chemical splash to ensure that the devices are sealed to the face. In addition, proper fitting of helmets is important to ensure that it will not fall off during work operations. In some cases a chin strap may be necessary to keep the helmet on an employee's head. (Chin straps should break at a reasonably low force, however, so as to prevent a strangulation hazard.) Where manufacturer's instructions are available, they should be followed carefully.

(7) Reassessment of hazards. It is the responsibility of the safety officer to reassess the workplace hazard situation as necessary, by identifying and evaluating new equipment and processes, reviewing accident records, and reevaluating the suitability of previously selected PPE.

(8) Selection chart guidelines for eye and face protection. Some occupations (not a complete list) for which eye protection should be routinely considered are: Carpenters, electricians, machinists, mechanics and repairers, millwrights, plumbers and pipe fitters, sheet metal workers and tinsmiths, assemblers, sanders, grinding machine operators, lathe and milling machine operators, sawyers, welders, laborers, chemical process operators and handlers, and timber cutting and logging workers. The following chart provides general guidance for the proper selection of eye and face protection to protect against hazards associated with the listed hazard "source" operations.

Eye and Face Protection Selection Chart		
Source	Assessment of Hazard	Protection
IMPACT—Chipping, grinding machining, masonry work, sawing, drilling, chiseling, powered fastening, riveting, woodworking, and sanding.	Flying fragments, objects, large chips, particles sand, dirt, etc.	Spectacles with side protection, goggles, face shields. See notes 1, 3, 5, 6, 10. For severe exposure, use face shield.
	Hot sparks	Face shields, goggles, spectacles with side protection. For severe exposure use face shield. See notes 1, 2, 3.
	Splash from molten metals	Face shields worn over goggles. See notes 1, 2, 3.
HEAT—Furnace operations, pouring, casting, hot dipping, and welding.	High temperature exposure	Screen face shields, reflective face shields. See notes 1, 2, 3.
	Splash	Goggles, eyecup and cover types. For severe degreasing exposure, use face shield. See notes 3, 11.
CHEMICALS—Acid and chemicals handling, plating.	Irritating mists	Special-purpose goggles.
	Nuisance dust	Goggles, eyecup and buffing, general cover types. See note 8.
DUST—Woodworking, dusty conditions.	Optical radiation	Welding helmets or welding shields. Typical shades: 10-14. See notes 9, 12.
	Optical radiation	Welding goggles or welding face shield. Typical shades: Gas welding 4-8, cutting 3-6, brazing 3-4. See note 9.
	Optical radiation	Spectacles or welding face shield. Typical shades, 1.5-3. See notes 3, 9.
LIGHT and/or RADIATION—	Welding: Electric arc.	Welding helmets or welding shields. Typical shades: 10-14. See notes 9, 12.
	Welding: Gas.	Welding goggles or welding face shield. Typical shades: Gas welding 4-8, cutting 3-6, brazing 3-4. See note 9.
Cutting, Torch brazing, Torch soldering.	Optical radiation	Spectacles or welding face shield. Typical shades, 1.5-3. See notes 3, 9.

Eye and Face Protection Selection Chart		
Source	Assessment of Hazard	Protection
Glare.	Poor vision	Spectacles with shaded or special-purpose lenses, as suitable. See notes 9, 10.

Notes to Eye and Face Protection Selection Chart:

- Care should be taken to recognize the possibility of multiple and simultaneous exposure to a variety of hazards. Adequate protection against the highest level of each of the hazards should be provided. Protective devices do not provide unlimited protection.
- Operations involving heat may also involve light radiation. As required by the standard, protection from both hazards must be provided.
- Face shields should only be worn over primary eye protection (spectacles or goggles).
- As required by the standard, filter lenses must meet the requirements for shade designations in WAC 296-24-07801(5). Tinted and shaded lenses are not filter lenses unless they are marked or identified as such.
- As required by the standard, persons whose vision requires the use of prescription (Rx) lenses must wear either protective devices fitted with prescription (Rx) lenses or protective devices designed to be worn over regular prescription (Rx) eyewear.
- Wearers of contact lenses must also wear appropriate eye and face protection devices in a hazardous environment. It should be recognized that dusty and/or chemical environments may represent an additional hazard to contact lens wearers.
- Caution should be exercised in the use of metal frame protective devices in electrical hazard areas.
- Atmospheric conditions and the restricted ventilation of the protector can cause lenses to fog. Frequent cleansing may be necessary.
- Welding helmets or face shields should be used only over primary eye protection (spectacles or goggles).
- Nonsideshield spectacles are available for frontal protection only, but are not acceptable eye protection for the sources and operations listed for "impact."
- Ventilation should be adequate, but well protected from splash entry. Eye and face protection should be designed and used so that it provides both adequate ventilation and protects the wearer from splash entry.
- Protection from light radiation is directly related to filter lens density. See note (4). Select the darkest shade that allows task performance.

(9) Selection guidelines for head protection. All head protection (helmets) is designed to provide protection from impact and penetration hazards caused by falling or flying objects. Head protection is also available which provides protection from electric shock and burn. When selecting head protection, knowledge of potential electrical hazards is important. Class A helmets, in addition to impact and penetration resistance, provide electrical protection from low-voltage conductors (they are proof tested to 2,200 volts). Class B helmets, in addition to impact and penetration resistance, provide electrical protection from high-voltage conductors (they are proof tested to 20,000 volts). Class C helmets provide impact and penetration resistance (they are usually made of aluminum which conducts electricity), and should not be used around electrical hazards. Where falling or flying object hazards are present, helmets must be worn. Some examples include: Working below other workers who are using tools and materials which could fall; working around or under conveyor belts which are carrying parts or materials; working below machinery or processes which might cause material or objects to fall; and working on exposed energized conductors. Some examples of occupations for which head protection should be routinely considered are: Carpenters, electricians, linemen, mechanics and

repairers, plumbers and pipe fitters, assemblers, packers, wrappers, sawyers, welders, laborers, freight handlers, timber cutting and logging, stock handlers, and warehouse laborers.

(10) Selection guidelines for foot protection. Safety shoes and boots which meet the ANSI Z41-1991 Standard provide both impact and compression protection. Where necessary, safety shoes can be obtained which provide puncture protection. In some work situations, metatarsal protection should be provided, and in other special situations electrical conductive or insulating safety shoes would be appropriate. Safety shoes or boots with impact protection would be required for carrying or handling materials such as packages, objects, parts or heavy tools, which could be dropped; and, for other activities where objects might fall onto the feet. Safety shoes or boots with compression protection would be required for work activities involving skid trucks (manual material handling carts) around bulk rolls (such as paper rolls) and around heavy pipes, all of which could potentially roll over an employee's feet. Safety shoes or boots with puncture protection would be required where sharp objects such as nails, wire, tacks, screws, large staples, scrap metal, etc., could be stepped on by employees causing a foot injury. Some occupations (not a complete list) for which foot protection should be routinely considered are: Shipping and receiving clerks, stock clerks, carpenters, electricians, machinists, mechanics and repairers, plumbers and pipe fitters, structural metal workers, assemblers, drywall installers and lathers, packers, wrappers, craters, punch and stamping press operators, sawyers, welders, laborers, freight handlers, gardeners and grounds-keepers, timber cutting and logging workers, stock handlers and warehouse laborers.

(11)(a) Selection guidelines for hand protection. Gloves are often relied upon to prevent cuts, abrasions, burns, and skin contact with chemicals that are capable of causing local or systemic effects following dermal exposure. WISHA is unaware of any gloves that provide protection against all potential hand hazards, and commonly available glove materials provide only limited protection against many chemicals. Therefore, it is important to select the most appropriate glove for a particular application and to determine how long it can be worn, and whether it can be reused. It is also important to know the performance characteristics of gloves relative to the specific hazard anticipated; e.g., chemical hazards, cut hazards, flame hazards, etc. These performance characteristics should be assessed by using standard test procedures. Before purchasing gloves, the employer should request documentation from the manufacturer that the gloves meet the appropriate test standard(s) for the hazard(s) anticipated. Other factors to be considered for glove selection in general include:

(i) As long as the performance characteristics are acceptable, in certain circumstances, it may be more cost effective to regularly change cheaper gloves than to reuse more expensive types; and

(ii) The work activities of the employee should be studied to determine the degree of dexterity required, the duration, frequency, and degree of exposure of the hazard, and the physical stresses that will be applied.

(b) With respect to selection of gloves for protection against chemical hazards:

(i) The toxic properties of the chemical(s) must be determined; in particular, the ability of the chemical to cause local effects on the skin and/or to pass through the skin and cause systemic effects;

(ii) Generally, any "chemical resistant" glove can be used for dry powders;

(iii) For mixtures and formulated products (unless specific test data are available), a glove should be selected on the basis of the chemical component with the shortest breakthrough time, since it is possible for solvents to carry active ingredients through polymeric materials; and

(iv) Employees must be able to remove the gloves in such a manner as to prevent skin contamination.

(12) Cleaning and maintenance. It is important that all PPE be kept clean and properly maintained. Cleaning is particularly important for eye and face protection where dirty or fogged lenses could impair vision. For the purposes of compliance with WAC 296-24-07501 (1)(a) and (b), PPE should be inspected, cleaned, and maintained at regular intervals so that the PPE provides the requisite protection. It is also important to ensure that contaminated PPE which cannot be decontaminated is disposed of in a manner that protects employees from exposure to hazards.

[Statutory Authority: Chapter 49.17 RCW. 94-20-057 (Order 94-16), § 296-24-098, filed 9/30/94, effective 11/20/94.]

PART A-3 LATE NIGHT RETAIL WORKER CRIME PROTECTION

WAC 296-24-102 Scope and application. Application of this section is limited to retail establishments operating between the hours of 11:00 p.m. and 6:00 a.m. with the exception of restaurants, hotels, taverns, or any lodging facility.

[Statutory Authority: Chapter 49.17 RCW. 90-03-029 (Order 89-20), § 296-24-102, filed 1/11/90, effective 2/26/90.]

WAC 296-24-10203 General requirements. (1) All employers operating late night retail establishments shall provide crime prevention training to their employees.

(2) Crime prevention training shall be a part of the accident prevention program requirements imposed pursuant to WAC 296-24-040.

(3) The employer shall provide training to ensure that the purpose and function of robbery and violence prevention are understood by employees and that the knowledge and skills required for their safety have been provided. The employer shall:

(a) Provide training and training materials that outline security policies, safety and security procedures, and personal safety and crime avoidance techniques.

(b) Provide formal instruction through a training seminar or training video presentation and upon completion require the employee to sign off on the date, time, and place of training. The training documentation will be placed in the employee's personnel file. The following elements shall be included in the crime prevention training program:

(i) An explanation of the importance of keeping the store clean, neat, and uncluttered thereby making it as unattractive as possible to robbers.

(ii) Provide explanation of the purpose of maintaining an unobstructed view of the cash register from outside the store, provided the cash register is located in a position visible from the street.

(iii) Provide instruction on reasons for operating only minimum number of cash registers at night.

(iv) Keeping the cash register fund to a minimum.

(v) Taking extra precautions after dark, i.e., keep alert, observe lighting and dark corners, spot possible hiding places.

(vi) Violence prevention procedures in case of robbery.

(vii) Provide a refresher course on crime prevention on or near the employee's anniversary date. Videotape and crime prevention material shall be available for employee's review at their request.

(4) In addition to providing crime prevention training as defined in this section, all employers operating late night retail establishments shall:

(a) Post a conspicuous sign in the window or door which states that there is a safe on the premises and it is not accessible to the employees on the premises and that the cash register contains only the minimal amount of cash needed to conduct business: No employer shall be subject to citation and penalty for having moneys in the cash register in excess of the minimal amount needed to conduct business.

(b) All displays, and any other material posted in window(s) or door(s) should be arranged so as to provide a clear and unobstructed view of the cash register; provided the cash register is located in such a position so as to be visible from the street.

(c) Have a drop-safe, limited access safe, or comparable device on the premises.

(d) Operate the outside lights for that portion of the approach and parking area that is necessary to accommodate customers during all night hours the late night retail establishment is open. This may be accomplished through:

(i) Surveillance lighting - to detect and observe pedestrian and vehicular entrances.

(ii) Providing adequate illuminances - adequate illuminance throughout the pedestrian and vehicular entrance areas should be a minimum of one foot candle to comply with ANSI/IES RP7-1983.

[Statutory Authority: Chapter 49.17 RCW. 90-03-029 (Order 89-20), § 296-24-10203, filed 1/11/90, effective 2/26/90.]

PART A-4 SAFETY PROCEDURES

WAC 296-24-110 The control of hazardous energy (lockout/tagout).

[Statutory Authority: Chapter 49.17 RCW. 90-20-091 (Order 90-14), § 296-24-110, filed 10/1/90, effective 11/15/90.]

WAC 296-24-11001 Scope, application, and purpose.

(1) Scope.

(a) This standard covers the servicing and maintenance of machines and equipment in which the unexpected energ-

zation or start up of the machine or equipment or release of stored energy could cause injury to employees. This standard establishes minimum performance requirements for the control of such hazardous energy. This section shall apply to agriculture March 1, 1995.

(b) This standard does not cover the following:

(i) Construction and maritime employment;
 (ii) Installations under the exclusive control of electric utilities for the purpose of power generation, transmission, and distribution, including related equipment for communications or metering; and

(iii) Exposure to electrical hazards from work on, near, or with conductors or equipment in electric utilization installations, which is covered by Part L of chapter 296-24 WAC; and

(iv) Oil and gas well drilling and servicing.

(2) Application.

(a) This standard applies to the control of energy during servicing and/or maintenance of machines and equipment.

(b) Normal production operations are not covered by this standard (see Part C of chapter 296-24 WAC). Servicing and/or maintenance which takes place during normal production operations is covered by this standard only if:

(i) An employee is required to remove or bypass a guard or other safety device; or

(ii) An employee is required to place any part of his or her body into an area on a machine or piece of equipment where work is actually performed upon the material being processed (point of operation) or where an associated danger zone exists during a machine operating cycle.

Note: Exception to subdivision (b) of this subsection. Minor tool changes and adjustments, and other minor servicing activities, which take place during normal production operations, are not covered by this standard if they are routine, repetitive, and integral to the use of the equipment for production, provided that the work is performed using alternative measures which provide effective protection (see Part C of chapter 296-24 WAC).

(c) This standard does not apply to the following:

(i) Work on cord and plug connected electric equipment for which exposure to the hazards of unexpected energization or start up of the equipment is controlled by the unplugging of the equipment from the energy source and by the plug being under the exclusive control of the employee performing the servicing or maintenance.

(ii) Hot tap operations involving transmission and distribution systems for substances such as gas, steam, water, or petroleum products when they are performed on pressurized pipelines, provided that the employer demonstrates that:

(A) Continuity of service is essential;

(B) Shutdown of the system is impractical; and

(C) Documented procedures are followed, and special equipment is used which will provide proven effective protection for employees.

(3) Purpose.

(a) This section requires employers to establish a written program and utilize procedures for affixing appropriate lockout devices or tagout devices to energy isolating devices, and to otherwise disable machines or equipment to prevent unexpected energization, start-up, or release of stored energy in order to prevent injury to employees.

(b) When other Title 296 WAC vertical standards require the use of lockout or tagout, they shall be used and supplemented by the procedural and training requirements of this part.

[Statutory Authority: Chapter 49.17 RCW. 94-06-068 (Order 93-17), § 296-24-11001, filed 3/2/94, effective 3/1/95. Statutory Authority: Chapter 49.17 RCW and RCW 49.17.040, [49.17].050 and [49.17].060. 92-22-067 (Order 92-06), § 296-24-11001, filed 10/30/92, effective 12/8/92. Statutory Authority: Chapter 49.17 RCW. 91-11-070 (Order 91-01), § 296-24-11001, filed 5/20/91, effective 6/20/91; 90-20-091 (Order 90-14), § 296-24-11001, filed 10/1/90, effective 11/15/90.]

WAC 296-24-11003 Definitions applicable to this part. (1) Affected employee. An employee whose job requires him/her to operate or use a machine or equipment on which servicing or maintenance is being performed under lockout or tagout, or whose job requires him/her to work in an area in which such servicing or maintenance is being performed.

(2) Authorized employee. A person who locks out or tags out machines or equipment in order to perform servicing or maintenance on that machine or equipment. An affected employee becomes an authorized employee when that employee's duties include performing servicing or maintenance covered under this part.

(3) Capable of being locked out. An energy isolating device is capable of being locked out if it has a hasp or other means of attachment to which, or through which, a lock can be affixed, or it has a locking mechanism built into it. Other energy isolating devices are capable of being locked out, if lockout can be achieved without the need to dismantle, rebuild, or replace the energy isolating device or permanently alter its energy control capability.

(4) Energized. Connected to an energy source or containing residual or stored energy.

(5) Energy isolating device. A mechanical device that physically prevents the transmission or release of energy, including but not limited to the following: A manually operated electrical circuit breaker; a disconnect switch; a manually operated switch by which the conductors of a circuit can be disconnected from all ungrounded supply conductors and, in addition, no pole can be operated independently; a line valve; a block; and any similar device used to block or isolate energy. Push buttons, selector switches, and other control circuit type devices are not energy isolating devices.

(6) Energy source. Any source of electrical, mechanical, hydraulic, pneumatic, chemical, thermal or other energy, including gravity.

(7) Hot tap. A procedure used in the repair, maintenance, and services activities which involves welding on a piece of equipment (pipelines, vessels, or tanks) under pressure, in order to install connections or appurtenances. It is commonly used to replace or add sections of pipeline without the interruption of service for air, gas, water, steam, and petrochemical distribution systems.

(8) Lockout. The placement of a lockout device on an energy isolating device, in accordance with an established procedure, ensuring that the energy isolating device and the equipment being controlled cannot be operated until the lockout device is removed.

(9) Lockout device. A device that utilizes a positive means such as a lock, either key or combination type, to hold an energy isolating device in the safe position and prevents the energizing of a machine or equipment. Included are blank flanges and bolted slip blinds.

(10) Normal production operations. The utilization of a machine or equipment to perform its intended production function.

(11) Servicing and/or maintenance. Workplace activities such as constructing, installing, setting up, adjusting, inspecting, modifying, and maintaining and/or servicing machines or equipment. These activities include lubrication, cleaning, or unjamming of machines or equipment and making adjustments or tool changes, where the employee may be exposed to the unexpected energization or startup of the equipment or release of hazardous energy.

(12) Setting up. Any work performed to prepare a machine or equipment to perform its normal production operation.

(13) Tagout. The placement of a tagout device on an energy isolating device, in accordance with an established procedure, to indicate that the energy isolating device and the equipment being controlled may not be operated until the tagout device is removed.

(14) Tagout device. A prominent warning device, such as a tag and a means of attachment, which can be securely fastened to an energy isolating device in accordance with an established procedure, to indicate that the energy isolating device and the equipment being controlled may not be operated until the tagout device is removed.

[Statutory Authority: Chapter 49.17 RCW. 93-19-142 (Order 93-04), § 296-24-11003, filed 9/22/93, effective 11/1/93. Statutory Authority: Chapter 49.17 RCW and RCW 49.17.040, [49.17].050 and [49.17].060. 92-22-067 (Order 92-06), § 296-24-11003, filed 10/30/92, effective 12/08/92. Statutory Authority: Chapter 49.17 RCW. 91-11-070 (Order 91-01), § 296-24-11003, filed 5/20/91, effective 6/20/91; 90-20-091 (Order 90-14), § 296-24-11003, filed 10/1/90, effective 11/15/90.]

WAC 296-24-11005 General. (1) Energy control program. The employer shall establish a written program consisting of an energy control procedure, employee training and periodic inspections to ensure that before any employee performs any servicing or maintenance on a machine or equipment where the unexpected energizing, start up, or release of stored energy could occur and cause injury, the machine or equipment shall be isolated from the energy source, and rendered inoperative.

(2) Lockout/tagout.

(a) If an energy isolating device is not capable of being locked out, the employer's energy control program under subsection (1) of this section shall utilize a tagout system.

(b) If an energy isolating device is capable of being locked out, the employer's energy control program under subsection (1) of this section shall utilize lockout unless the employer can demonstrate that the utilization of a tagout system will provide full employee protection as set forth in subsection (3) of this section.

(c) After the effective date of this section, whenever major replacement or major repair, renovation, or modification of a machine or equipment is performed, and whenever new machines or equipment are installed, energy isolating

devices for such machines or equipment shall be designed to accept a lockout device.

(3) Full employee protection.

(a) When a tagout device is used on an energy isolating device which is capable of being locked out, the tagout device shall be attached at the same location that the lockout device would have been attached, and the employer shall demonstrate that the tagout program will provide a level of safety equivalent to that obtained by using a lockout program.

(b) In demonstrating that a level of safety is achieved in the tagout program which is equivalent to the level of safety obtained by using a lockout program, the employer shall demonstrate full compliance with all tagout-related provisions of this standard together with such additional elements as are necessary to provide the equivalent safety available from the use of a lockout device. Additional means to be considered as part of the demonstration of full employee protection shall include the implementation of additional safety measures such as the removal of an isolating circuit element, blocking of a controlling switch, opening of an extra disconnecting device, or the removal of a valve handle to reduce the likelihood of inadvertent energization.

(4) Energy control procedure.

(a) Procedures shall be developed, documented, and utilized for the control of potentially hazardous energy when employees are engaged in the activities covered by this section.

Note: Exception: The employer need not document the required procedure for a particular machine or equipment when all of the following elements exist:

- (i) The machine or equipment has no potential for stored or residual energy or reaccumulation of stored energy after shut down which could endanger employees;
- (ii) The machine or equipment has a single energy source which can be readily identified and isolated;
- (iii) The isolation and locking out of that energy source will completely deenergize and deactivate the machine or equipment;
- (iv) The machine or equipment is isolated from that energy source and locked out during servicing or maintenance;
- (v) A single lockout device will achieve a locked-out condition;
- (vi) The lockout device is under the exclusive control of the authorized employee performing the servicing or maintenance;
- (vii) The servicing or maintenance does not create hazards for other employees; and
- (viii) The employer, in utilizing this exception, has had no accidents involving the unexpected activation or reenergization of the machine or equipment during servicing or maintenance.

(b) The procedures shall clearly and specifically outline the scope, purpose, authorization, rules, and techniques to be utilized for the control of hazardous energy, and the means to enforce compliance including, but not limited to, the following:

(i) A specific statement of the intended use of the procedure;

(ii) Specific procedural steps for shutting down, isolating, blocking, and securing machines or equipment to control hazardous energy;

(iii) Specific procedural steps for the placement, removal, and transfer of lockout devices or tagout devices and the responsibility for them; and

(iv) Specific requirements for testing a machine or equipment to determine and verify the effectiveness of lock-

out devices, tagout devices, and other energy control measures.

(5) Protective materials and hardware.

(a) Locks, tags, chains, wedges, key blocks, adapter pins, self-locking fasteners, or other hardware shall be provided by the employer for isolating, securing, or blocking of machines or equipment from energy sources.

(b) Lockout devices and tagout devices shall be singularly identified; shall be the only device(s) used for controlling energy; shall not be used for other purposes; and shall meet the following requirements:

(i) Durable.

(A) Lockout devices and tagout devices shall be capable of withstanding the environment to which they are exposed for the maximum period of time that exposure is expected.

(B) Tagout devices shall be constructed and printed so that exposure to weather conditions or wet and damp locations will not cause the tag to deteriorate or the message on the tag to become illegible.

(C) Tags shall not deteriorate when used in corrosive environments such as areas where acid and alkali chemicals are handled and stored.

(ii) Standardized. Lockout and tagout devices shall be standardized within the facility in at least one of the following criteria: Color; shape; or size; and additionally, in the case of tagout devices, print and format shall be standardized.

(iii) Substantial.

(A) Lockout devices. Lockout devices shall be substantial enough to prevent removal without the use of excessive force or unusual techniques, such as with the use of bolt cutters or other metal cutting tools.

(B) Tagout devices. Tagout devices, including and their means of attachment, shall be substantial enough to prevent inadvertent or accidental removal. Tagout device attachment means shall be of a nonreusable type, attachable by hand, self-locking, and nonreleasable with a minimum unlocking strength of no less than 50 pounds and having the general design and basic characteristics of being at least equivalent to a one-piece, all-environment-tolerant nylon cable tie.

(C) Identifiable. Lockout devices and tagout devices shall indicate the identity of the employee applying the device(s).

(c) Tagout devices shall warn against hazardous conditions if the machine or equipment is energized and shall include a legend such as the following: Do not start, do not open, do not close, do not energize, do not operate.

(6) Periodic inspection.

(a) The employer shall conduct a periodic inspection of the energy control procedure at least annually to ensure that the procedure and the requirements of this standard are being followed.

(i) The periodic inspection shall be performed by an authorized employee other than the one(s) utilizing the energy control procedure being inspected.

(ii) The periodic inspection shall be conducted to correct any deviations or inadequacies identified.

(iii) Where lockout is used for energy control, the periodic inspection shall include a review, between the inspector and each authorized employee, of that employee's responsibilities under the energy control procedure being inspected.

(iv) Where tagout is used for energy control, the periodic inspection shall include a review, between the inspector and each authorized and affected employee, of that employee's responsibilities under the energy control procedure being inspected, and the elements set forth in subsection (7)(b) of this section.

(b) The employer shall certify that the periodic inspections have been performed. The certification shall identify the machine or equipment on which the energy control procedure was being utilized, the date of the inspection, the employees included in the inspection, and the person performing the inspection.

(7) Training and communication.

(a) The employer shall provide training to ensure that the purpose and function of the energy control program are understood by employees and that the knowledge and skills required for the safe application, usage, and removal of the energy controls are acquired by employees. The training shall include the following:

(i) Each authorized employee shall receive training in the recognition of applicable hazardous energy sources, the type and magnitude of the energy available in the workplace, and the methods and means necessary for energy isolation and control.

(ii) Each affected employee shall be instructed in the purpose and use of the energy control procedure.

(iii) All other employees whose work operations are or may be in an area where energy control procedures may be utilized, shall be instructed about the procedure, and about the prohibition relating to attempts to restart or reenergize machines or equipment which are locked out or tagged out.

(b) When tagout systems are used, employees shall also be trained in the following limitations of tags:

(i) Tags are essentially warning devices affixed to energy isolating devices, and do not provide the physical restraint on those devices that is provided by a lock.

(ii) When a tag is attached to an energy isolating means, it is not to be removed without authorization of the authorized person responsible for it, and it is never to be bypassed, ignored, or otherwise defeated.

(iii) Tags must be legible and understandable by all authorized employees, affected employees, and all other employees whose work operations are or may be in the area, in order to be effective.

(iv) Tags and their means of attachment must be made of materials which will withstand the environmental conditions encountered in the workplace.

(v) Tags may evoke a false sense of security, and their meaning needs to be understood as part of the overall energy control program.

(vi) Tags must be securely attached to energy isolating devices so that they cannot be inadvertently or accidentally detached during use.

(c) Employee retraining.

(i) Retraining shall be provided for all authorized and affected employees whenever there is a change in their job assignments, a change in machines, equipment or processes that present a new hazard, or when there is a change in the energy control procedures.

(ii) Additional retraining shall also be conducted whenever a periodic inspection under subsection (6) of this section reveals, or whenever the employer has reason to believe, that there are deviations from or inadequacies in the employee's knowledge or use of the energy control procedures.

(iii) The retraining shall reestablish employee proficiency and introduce new or revised control methods and procedures, as necessary.

(d) The employer shall certify that employee training has been accomplished and is being kept up to date. The certification shall contain each employee's name and dates of training.

(8) Energy isolation. Lockout or tagout shall be performed only by authorized employees who are performing the servicing or maintenance.

(9) Notification of employees. Affected employees shall be notified by the employer or authorized employee of the application and removal of lockout devices or tagout devices. Notification shall be given before the controls are applied, and after they are removed from the machine or equipment.

[Statutory Authority: Chapter 49.17 RCW and RCW 49.17.040, [49.17].050 and [49.17].060. 92-22-067 (Order 92-06), § 296-24-11005, filed 10/30/92, effective 12/8/92. Statutory Authority: Chapter 49.17 RCW. 91-11-070 (Order 91-01), § 296-24-11005, filed 5/20/91, effective 6/20/91; 90-20-091 (Order 90-14), § 296-24-11005, filed 10/1/90, effective 11/15/90.]

WAC 296-24-11007 Application of control. (1) The established procedures for the application of energy control (the lockout or tagout procedures) shall cover the following elements and actions and shall be done in the following sequence:

(a) Preparation for shutdown. Before an authorized or affected employee turns off a machine or equipment, the authorized employee shall have knowledge of the type and magnitude of the energy, the hazards of the energy to be controlled, and the method or means to control the energy.

(b) Machine or equipment shutdown. The machine or equipment shall be turned off or shut down using the procedures established for the machine or equipment. An orderly shutdown must be utilized to avoid any additional or increased hazard(s) to employees as a result of equipment stoppage.

(c) Machine or equipment isolation. All energy isolating devices that are needed to control the energy to the machine or equipment shall be physically located and operated in such a manner as to isolate the machine or equipment from the energy source(s).

(2) Lockout or tagout device application.

(a) Lockout or tagout devices shall be affixed to each energy isolating device by authorized employees.

(b) Lockout devices, where used, shall be affixed in a manner that will hold the energy isolating devices in a "safe" or "off" position.

(c) Tagout devices, where used, shall be affixed in such a manner as will clearly indicate that the operation or movement of energy isolating devices from the "safe" or "off" position is prohibited.

(i) Where tagout devices are used with energy isolating devices designed with the capability of being locked, the tag

(2001 Ed.)

attachment shall be fastened at the same point at which the lock would have been attached.

(ii) Where a tag cannot be affixed directly to the energy isolating device, the tag shall be located as close as safely possible to the device, in a position that will be immediately obvious to anyone attempting to operate the device.

(3) Stored energy.

(a) Following the application of lockout or tagout devices to energy isolating devices, all potentially hazardous stored or residual energy shall be relieved, disconnected, restrained, and otherwise rendered safe.

(b) If there is a possibility of reaccumulation of stored energy to a hazardous level, verification of isolation shall be continued until the servicing or maintenance is completed, or until the possibility of such accumulation no longer exists.

(4) Verification of isolation. Prior to starting work on machines or equipment that have been locked out or tagged out, the authorized employee shall verify that isolation and deenergization of the machine or equipment have been accomplished.

[Statutory Authority: Chapter 49.17 RCW and RCW 49.17.040, [49.17].050 and [49.17].060. 92-22-067 (Order 92-06), § 296-24-11007, filed 10/30/92, effective 12/8/92. Statutory Authority: Chapter 49.17 RCW. 91-11-070 (Order 91-01), § 296-24-11007, filed 5/20/91, effective 6/20/91; 90-20-091 (Order 90-14), § 296-24-11007, filed 10/1/90, effective 11/15/90.]

WAC 296-24-11009 Release from lockout or tagout.

(1) Release from lockout or tagout.

(a) Before lockout or tagout devices are removed and energy is restored to the machine or equipment, procedures shall be followed and actions taken by the authorized employee(s) to ensure the following:

(b) The machine or equipment. The work area shall be inspected to ensure that nonessential items have been removed and to ensure that machine or equipment components are operationally intact.

(2) Employees.

(a) The work area shall be checked to ensure that all employees have been safely positioned or removed.

(b) After lockout or tagout devices have been removed and before a machine or equipment is started, affected employees shall be notified that the lockout or tagout device(s) have been removed.

(3) Lockout or tagout devices removal. Each lockout or tagout device shall be removed from each energy isolating device by the employee who applied the device. Exception: When the authorized employee who applied the lockout or tagout device is not available to remove it, that device may be removed under the direction of the employer, provided that specific procedures and training for such removal have been developed, documented, and incorporated into the employer's energy control program. The employer shall demonstrate that the specific procedure provides equivalent safety to the removal of the device by the authorized employee who applied it. The specific procedure shall include at least the following elements:

(a) Verification by the employer that the authorized employee who applied the device is not at the facility;

(b) Making all reasonable efforts to contact the authorized employee to inform him/her that his/her lockout or tagout device has been removed; and

(c) Ensuring that the authorized employee has this knowledge before he/she resumes work at that facility.

[Statutory Authority: Chapter 49.17 RCW and RCW 49.17.040, [49.17].050 and [49.17].060. 92-22-067 (Order 92-06), § 296-24-11009, filed 10/30/92, effective 12/8/92. Statutory Authority: Chapter 49.17 RCW. 91-11-070 (Order 91-01), § 296-24-11009, filed 5/20/91, effective 6/20/91; 90-20-091 (Order 90-14), § 296-24-11009, filed 10/1/90, effective 11/15/90.]

WAC 296-24-11011 Additional requirements. (1) Testing or positioning of machines, equipment, or components thereof.

In situations in which lockout or tagout devices must be temporarily removed from the energy isolating device and the machine or equipment energized to test or position the machine, equipment or component thereof, the following sequence of actions shall be followed:

(a) Clear the machine or equipment of tools and materials in accordance with WAC 296-24-11009 (1)(b);

(b) Remove employees from the machine or equipment area in accordance with WAC 296-24-11009(2);

(c) Remove the lockout or tagout devices as specified in WAC 296-24-11009(3);

(d) Energize and proceed with testing or positioning;

(e) Deenergize all systems and reapply energy control measures in accordance with WAC 296-24-11007 to continue the servicing and/or maintenance.

(2) Outside personnel (contractors, etc.).

(a) Whenever outside servicing personnel are to be engaged in activities covered by the scope and application of this standard, the on-site employer and the outside employer shall inform each other of their respective lockout or tagout procedures.

(b) The outside employer shall assure that his/her employees understand and comply with the restrictions and prohibitions of the on-site employer's energy control program.

(3) Group lockout or tagout.

(a) When servicing and/or maintenance is performed by a crew, craft, department or other group, they shall utilize a procedure which affords the employees a level of protection equivalent to that provided by the implementation of a personal lockout or tagout device.

(b) Group lockout or tagout devices shall be used in accordance with the procedures required by WAC 296-24-11005(4) including, but not necessarily limited to, the following specific requirements:

(i) Primary responsibility is vested in an authorized employee for a set number of employees working under the protection of a group lockout or tagout device (such as an operations lock);

(ii) Provision for the authorized employee to ascertain the exposure status of individual group members with regard to the lockout or tagout of the machine or equipment; and

(iii) When more than one crew, craft, department, etc., is involved, assignment of overall job-associated lockout or tagout control responsibility to an authorized employee des-

ignated to coordinate affected work forces and ensure continuity of protection; and

(iv) Each authorized employee shall affix a personal lockout or tagout device to the group lockout device, group lockbox, or comparable mechanism when he or she begins work, and shall remove those devices when he or she stops working on the machine or equipment being serviced or maintained.

(4) Shift or personnel changes. Specific procedures shall be utilized during shift or personnel changes to ensure the continuity of lockout or tagout protection, including provision for the orderly transfer of lockout or tagout device protection between off-going and oncoming employees, to minimize exposure to hazards from the unexpected energization or start-up of the machine or equipment, or release of stored energy.

WAC 296-24-119 Appendices.

APPENDIX A

Appendix A - Typical Minimal Lockout Procedure—Nonmandatory.

(1) General.

The following simple lockout procedure is provided to assist employers in developing their procedures so they meet the requirements of this standard. When the energy isolating devices are not lockable, tagout may be used, provided the employer complies with the provisions of the standard which require additional training and more rigorous periodic inspections. When tagout is used and the energy isolating devices are lockable, the employer must provide full employee protection (see WAC 296-24-11005(3)) and additional training and more rigorous periodic inspections are required. For more complex systems, more comprehensive procedures may need to be developed, documented and utilized.

Lockout Procedure

Lockout procedure for

(Name of Company for single procedure or identification of equipment if multiple procedures are used.)

(2) Purpose.

This procedure establishes the minimum requirements for the lockout of energy isolating devices whenever maintenance or servicing is done on machines or equipment. It shall be used to ensure that the machine or equipment is stopped, isolated from all potentially hazardous energy sources and locked out before employees perform any servicing or maintenance where the unexpected energization or start-up of the machine or equipment or release of stored energy could cause injury.

(3) Compliance with this program.

(a) All employees are required to comply with the restrictions and limitations imposed upon them during the use of lockout. The authorized employees are required to perform the lockout in accordance with this procedure. All employees, upon observing a machine or piece of equipment which is locked out to perform servicing or maintenance shall not attempt to start, energize or use that machine or equipment.

(b) Type of compliance enforcement to be taken for violation of the above.

(4) Sequence of lockout.

(a) Notify all affected employees that servicing or maintenance is required on a machine or equipment and that the machine or equipment must be shut down and locked out to perform the servicing or maintenance.

Name(s)/job title(s) of affected employees and how to notify.

(b) The authorized employee shall refer to the company procedure to identify the type and magnitude of the energy that the machine or equipment utilizes, shall understand the hazards of the energy, and shall know the methods to control the energy.

Type(s) and magnitude(s) of energy, its hazards and the methods to control the energy.

(c) If the machine or equipment is operating, shut it down by the normal stopping procedure (depress stop button, open switch, close valve, etc.).

Type(s) and location(s) of machine or equipment operating controls.

(d) Deactivate the energy isolating device(s) so that the machine or equipment is isolated from the energy source(s).

Type(s) and location(s) of energy isolating devices.

(e) Lock out the energy isolating device(s) with assigned individual lock(s).

(f) Stored or residual energy (such as that in capacitors, springs, elevated machine members, rotating flywheels, hydraulic systems, and air, gas, steam, or water pressure, etc.) must be dissipated or restrained by methods such as grounding, repositioning, blocking, bleeding down, etc.

Type(s) of stored energy - methods to dissipate or restrain.

(g) Ensure that the equipment is disconnected from the energy source(s) by first checking that no personnel are exposed, then verify the isolation of the equipment by operating the push button or other normal operating control(s) or by testing to make certain the equipment will not operate.

(2001 Ed.)

CAUTION: Return operating control(s) to neutral or "off" position after verifying the isolation of the equipment.

Method of verifying the isolation of the equipment.

(h) The machine or equipment is now locked out.

(5) Restoring equipment to service.

(a) When the servicing or maintenance is completed and the machine or equipment is ready to return to normal operating condition, the following steps shall be taken.

(b) Check the machine or equipment and the immediate area around the machine or equipment to ensure that nonessential items have been removed and that the machine or equipment components are operationally intact.

(c) Check the work area to ensure that all employees have been safely positioned or removed from the area.

(d) Verify that the controls are in neutral.

(e) Remove the lockout devices and reenergize the machine or equipment.

Note: The removal of some forms of blocking may require reenergization of the machine before safe removal.

(f) Notify affected employees that the servicing or maintenance is completed and the machine or equipment is ready for use.

[Statutory Authority: Chapter 49.17 RCW and RCW 49.17.040, [49.17].050 and [49.17].060. 92-22-067 (Order 92-06), § 296-24-119, filed 10/30/92, effective 12/8/92. PART B-1**SANITATION, TEMPORARY LABOR CAMPS AND NONWATER CARRIAGE DISPOSAL SYSTEMS****Sanitation****WAC 296-24-120 Sanitation.**

Note: Rules and regulations of the state board of health governing sanitation of places of work shall be complied with by every employer, and shall be enforced as provided for by statute law (RCW 43.20.050).

[Order 73-5, § 296-24-120, filed 5/9/73 and Order 73-4, § 296-24-120, filed 5/7/73.]

WAC 296-24-12001 Scope. This scope includes all sections of WAC 296-24-120 in the numbering and applies to all permanent places of employment except where domestic, or mining work only is performed. The shower requirements in WAC 296-24-12009(3) are not applicable to agricultural operations. Measures for the control of toxic materials are considered to be outside the scope of this section.

[Statutory Authority: RCW 49.17.010, [49.17].050 and [49.17].060. 95-22-015, § 296-24-12001, filed 10/20/95, effective 1/16/96. Statutory Authority: Chapter 49.17 RCW. 94-06-068 (Order 93-17), § 296-24-12001, filed 3/2/94, effective 3/1/95; Order 74-27, § 296-24-12001, filed 5/7/74; Order 73-5, § 296-24-12001, filed 5/9/73 and Order 73-4, § 296-24-12001, filed 5/7/73.]

WAC 296-24-12002 Definitions. The following definitions are applicable to all sections of this chapter which include WAC 296-24-120 in the section number.

(1) "Nonwater carriage toilet facility" means a toilet facility not connected to a sewer.

(2) "Number of employees" means, unless otherwise specified, the maximum number of employees present at any one time on a regular shift.

(3) "Personal service room" means a room used for activities not directly connected with the production or service function performed by the establishment. Such activities include but are not limited to, first aid, medical services, dressing, showering, toilet use, washing, and eating.

(4) "Potable water" means water which meets the quality standards for drinking purposes of state or local authority having jurisdiction or water that meets the quality standards prescribed by the United States Environmental Protection Agency's National Interim Primary Drinking Water Regulations, published in 40 CFR Part 141, and 40 CFR 147.2400.

(5) "Toilet facility" means a fixture maintained within a toilet room for the purpose of defecation or urination, or both.

(6) "Toilet room" means a room maintained within or on the premises of any place of employment, containing toilet facilities for use by employees.

(7) "Toxic material" means a material in concentration or amount which exceeds the applicable limit established by a standard, such as chapter 296-62 WAC or, in the absence of an applicable standard, which is of such toxicity so as to constitute a recognized hazard that is causing or is likely to cause death or serious physical harm.

(8) "Urinal" means a toilet facility maintained within a toilet room for the sole purpose of urination.

(9) "Water closet" means a toilet facility maintained within a toilet room for the purpose of both defecation and urination and which is flushed with water.

(10) "Wet process" means any process or operation in a workroom which normally results in surfaces upon which employees may walk or stand becoming wet.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-17-094, § 296-24-12002, filed 8/17/99, effective 12/1/99. Statutory Authority: Chapter 49.17 RCW. 91-11-070 (Order 91-01), § 296-24-12002, filed 5/20/91, effective 6/20/91; Order 74-27, § 296-24-12002, filed 5/7/74.]

WAC 296-24-12003 General requirements. House-keeping.

(1) All places of employment shall be kept clean to the extent that the nature of the work allows.

(2) The floor of every workroom shall be maintained so far as practicable in a dry condition. Where wet processes are used, drainage shall be maintained and false floors, platforms, mats, or other dry standing places shall be provided, where practicable, or appropriate waterproof footwear shall be provided.

(3) To facilitate cleaning, every floor, working place, and passageway shall be kept free from protruding nails, splinters, loose boards and unnecessary holes and openings.

(4) Cleaning and sweeping shall be done in such a manner as to minimize the contamination of the air with dust and so far as is practicable, shall be done outside of working hours.

[Order 74-27, § 296-24-12003, filed 5/7/74; Order 73-5, § 296-24-12003, filed 5/9/73 and Order 73-4, § 296-24-12003, filed 5/7/73.]

WAC 296-24-12005 Water supply. (1) Potable water.

(a) Potable water shall be provided in all places of employment, for drinking, washing of the person, cooking, washing of foods, washing of cooking or eating utensils, washing of food preparation or processing premises, and personal service rooms.

(b) Portable drinking water dispensers shall be designed, constructed, and serviced so that sanitary conditions are maintained, shall be capable of being closed, and shall be equipped with a tap.

(c) Open containers such as barrels, pails, or tanks for drinking water from which the water must be dipped or poured, whether or not they are fitted with a cover, are prohibited.

(d) A common drinking cup and other common utensils are prohibited.

(2) Nonpotable water.

(a) Outlets for nonpotable water, such as water for industrial or firefighting purposes shall be posted or otherwise marked in a manner that will indicate clearly that the water is unsafe and is not to be used for drinking, washing of the person, cooking, washing of food, washing of cooking or eating utensils, washing of food preparation or processing premises, or personal service rooms, or for washing clothes.

(b) Construction of nonpotable water systems or systems carrying any other nonpotable substance shall be such as to prevent backflow or backsiphonage into a potable water system.

Nonpotable water shall not be used for washing any portion of the person, cooking or eating utensils, or clothing. Nonpotable water may be used for cleaning work premises, other than food processing and preparation premises and personal service rooms: Provided, That this nonpotable water does not contain concentrations of chemicals, fecal coliform, or other substances which could create unsanitary conditions or be harmful to employees.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 82-13-045 (Order 82-22), § 296-24-12005, filed 6/11/82; Order 74-27, § 296-24-12005, filed 5/7/74; Order 73-5, § 296-24-12005, filed 5/9/73 and Order 73-4, § 296-24-12005, filed 5/7/73.]

WAC 296-24-12007 Toilet facilities. (1) General.

(a) Except as otherwise indicated in this section, toilet facilities, in toilet rooms separate for each sex, shall be provided in all places of employment in accordance with Table B-1 of this section. The number of facilities to be provided for each sex shall be based on the number of employees of that sex for whom the facilities are furnished. Where toilet rooms will be occupied by no more than one person at a time, can be locked from the inside, and contain at least one water closet, separate toilet rooms for each sex need not be provided. Where such single-occupancy rooms have more than one toilet facility, only one such facility in each toilet room shall be counted for the purpose to Table B-1.

TABLE B-1

Number of employees:	Minimum number of water closets
1 to 15	1
16 to 35	2
36 to 55	3
56 to 80	4

TABLE B-1

81 to 110	_____	5
111 to 150	_____	6
Over 150	_____	One additional fixture for each additional 40 employees

Where toilet facilities will not be used by women, urinals may be provided instead of water closets, except that the number of water closets in such cases shall not be reduced to less than 2/3 of the minimum specified.

(b) The requirements of subdivision (a) of this subsection do not apply to mobile crews or to normally unattended work locations so long as employees working at these locations have transportation immediately available to nearby toilet facilities which meet the other requirements of this section.

(c) The sewage disposal method shall not endanger the health of employees.

(d) Toilet paper with holder shall be provided for every water closet.

(2) Construction of toilet rooms. Each water closet shall occupy a separate compartment with a door and walls or partitions between fixtures sufficiently high to assure privacy.

[Statutory Authority: Chapter 49.17 RCW. 87-24-051 (Order 87-24), § 296-24-12007, filed 11/30/87. Statutory Authority: RCW 49.17.040 and 49.17.050. 82-02-003 (Order 81-32), § 296-24-12007, filed 12/24/81. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 43.22 and 42.30 RCW. 80-17-015 (Order 80-21), § 296-24-12007, filed 11/13/80; Order 74-27, § 296-24-12007, filed 5/7/74; Order 73-5, § 296-24-12007, filed 5/9/73 and Order 73-4, § 296-24-12007, filed 5/7/73.]

WAC 296-24-12009 Washing facilities. (1) General. Facilities for maintaining personal cleanliness shall be provided in every place of employment pursuant to the provisions of this section. These shall be convenient for the employees for whom they are provided and shall be maintained in a sanitary condition.

(2) Lavatories.

(a) Lavatories shall be made available in all places of employment. The requirements of this subsection do not apply to mobile crews or to normally unattended work locations if employees working at these locations have transportation readily available to nearby washing facilities which meet the other requirements of this section.

(b) Each lavatory shall be provided with hot and cold running water, or tepid running water.

(c) Hand soap or similar cleansing agents shall be provided.

(d) Individual hand towels or sections thereof, of cloth or paper, warm air blowers or clean individual sections of continuous cloth toweling, convenient to the lavatories, shall be provided.

(3) Showers.

(a) Showers are mandatory on exit from the jobsite when residual chemicals allowed to remain on the skin between work shifts could cause a serious occupational illness.

(b) The employer is responsible for identifying such potential hazards and for insisting that the employee shower at the end of the shift.

(2001 Ed.)

(c) Whenever showers are required by a particular standard, the showers shall be provided, in accordance with items (i) through (iv) as follows:

(i) One shower shall be provided for each 10 employees of each sex, or numerical fraction thereof, who are required to shower during the same shift.

(ii) Body soap or other appropriate cleansing agents convenient to the showers shall be provided as specified in this section.

(iii) Showers shall be provided with hot and cold water feeding a common discharge line.

(iv) Employees who use showers shall be provided with individual clean towels.

[Statutory Authority: Chapter 49.17 RCW. 90-03-029 (Order 89-20), § 296-24-12009, filed 1/11/90, effective 2/26/90. Statutory Authority: RCW 49.17.040 and 49.17.050. 82-08-026 (Order 82-10), § 296-24-12009, filed 3/30/82. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 43.22 and 42.30 RCW. 80-17-015 (Order 80-21), § 296-24-12009, filed 11/13/80; Order 74-27, § 296-24-12009, filed 5/7/74; Order 73-5, § 296-24-12009, filed 5/9/73 and Order 73-4, § 296-24-12009, filed 5/7/73.]

WAC 296-24-12011 Change rooms. (1) Whenever employees are required by a particular standard to wear protective clothing because of the possibility of contamination with toxic materials, change rooms equipped with storage facilities for street clothes and separate storage facilities for the protective clothing shall be provided.

(2) Clothes drying facilities. Where working clothes are provided by the employer and become wet or are washed between shifts, provisions shall be made to insure that such clothing is dry before reuse.

[Order 74-27, § 296-24-12011, filed 5/7/74; Order 73-5, § 296-24-12011, filed 5/9/73 and Order 73-4, § 296-24-12011, filed 5/7/73.]

WAC 296-24-12017 Consumption of food and beverages on the premises. (1) Application. This section shall apply only where employees are permitted to consume food or beverages, or both, on the premises.

(2) Eating and drinking areas. No employee shall be allowed to consume food or beverages in a toilet room nor in any area exposed to a toxic material.

(3) In every establishment where there is exposure to injurious dusts or other toxic materials, a separate lunchroom shall be maintained unless it is convenient for the employees to lunch away from the premises. The following number of square feet per person, based on the maximum number of persons using the room at one time, shall be required:

Number of persons	Square feet	per person
25 and less	_____	13
26-74	_____	12
75-149	_____	11
150 and over	_____	10

(4) Waste disposal containers. Receptacles, constructed of smooth, corrosion resistant, easily cleanable, or disposable materials, shall be provided and used for the disposal of waste food. The number, size, and location of such receptacles shall encourage their use and not result in overfilling. They shall be emptied not less frequently than once each working day, unless unused, and shall be maintained in a

clean and sanitary condition. Receptacles shall be provided with a solid tight-fitting cover unless sanitary conditions can be maintained without use of a cover.

(5) Sanitary storage. No food or beverages shall be stored in toilet rooms or in an area exposed to a toxic material.

(6) Food handling. All employee food service facilities and operations shall be carried out in accordance with sound hygienic principles. In all places of employment where all or part of the food service is provided, the food dispensed shall be wholesome, free from spoilage, and shall be processed, prepared, handled, and stored in such a manner as to be protected against contamination.

[Order 76-6, § 296-24-12017, filed 3/1/76; Order 74-27, § 296-24-12017, filed 5/7/74.]

WAC 296-24-12019 Waste disposal. (1) Any receptacle used for putrescible solid or liquid waste or refuse shall be so constructed that it does not leak and may be thoroughly cleaned and maintained in a sanitary condition. Such a receptacle shall be equipped with a solid tight-fitting cover, unless it can be maintained in a sanitary condition without a cover. This requirement does not prohibit the use of receptacles which are designed to permit the maintenance of a sanitary condition without regard to the aforementioned requirements.

(2) All sweepings solid or liquid wastes, refuse, and garbage shall be removed in such a manner as to avoid creating a menace to health and as often as necessary or appropriate to maintain the place of employment in a sanitary condition.

[Order 74-27, § 296-24-12019, filed 5/7/74.]

WAC 296-24-12021 Vermin control. Every building shall be so constructed, equipped, and maintained so as to restrict the entrance or harborage of rodents, insects, and other vermin. A continuing and effective extermination program shall be instituted where their presence is detected.

[Order 74-27, § 296-24-12021, filed 5/7/74.]

WAC 296-24-125 Temporary labor camps.

[Order 73-5, § 296-24-125, filed 5/9/73 and Order 73-4, § 296-24-125, filed 5/7/73.]

WAC 296-24-12501 What requirements apply to camp sites? (1) You must ensure that all sites used for temporary labor camps are adequately drained. The site must be free from periodic flooding, and located at least two hundred feet from a swamp, pool, sink hole, or other surface collection of water unless the water surface can be subject to mosquito control. Drainage from and through the camp must not endanger any domestic or public water supply. All sites must be free from depressions in which water may become a nuisance.

(2) All sites must be large enough to prevent overcrowding of necessary structures. The principal camp area for sleeping and for food preparation and eating must be at least five hundred feet from where livestock are kept.

(3) The grounds and open areas surrounding the shelters must be maintained in a clean and sanitary condition.

[Title 296 WAC—p. 598]

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12501, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12501, filed 5/9/73 and Order 73-4, § 296-24-12501, filed 5/7/73.]

WAC 296-24-12503 How must camp shelters be constructed? (1) You must ensure that every shelter in the camp is constructed to provide protection against the elements.

(2) Each room used for sleeping purposes must have at least fifty square feet of floor space for each occupant. The room must have at least a seven-foot ceiling.

(3) You must provide beds, cots, or bunks, and suitable storage facilities such as wall lockers for clothing and personal articles in every sleeping room.

(a) Beds must be at least thirty-six inches apart, both laterally and end to end, and the frame must keep mattresses at least twelve inches off the floor.

(b) Double-deck bunks must be spaced at least forty-eight inches apart, both laterally and end to end.

(c) The minimum clear space between lower and upper bunks must be at least twenty-seven inches.

(d) Triple-deck bunks are prohibited.

(4) The floors of each shelter must be constructed of wood, asphalt, or concrete. Wooden floors must be smooth and tight. The floors must be kept in good repair.

(5) All wooden floors must be elevated at least one foot above ground level at all points to prevent dampness and to permit free air circulation.

(6) You may "bank" around outside walls with earth or other suitable material to guard against extreme low temperatures.

(7) All living quarters must have windows covering a total area equal to at least one-tenth of the floor area. You must ensure that at least one-half of each window can be opened for ventilation.

(8) All exterior openings must be screened with sixteen-mesh material. All screen doors must have self-closing devices.

(9) You must ensure that each dwelling unit has at least seventy square feet of floor space for the first occupant and at least fifty square feet of floor space for each additional occupant. In a family unit, the husband and wife must have a separate sleeping area whenever living with one or more children over six years old.

(10) If a camp is used during cold weather, you must provide adequate heating equipment.

Note: All heating, cooking, and water heating equipment must be installed according to state and local ordinances, codes, and regulations governing such installations.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12503, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12503, filed 5/9/73 and Order 73-4, § 296-24-12503, filed 5/7/73.]

WAC 296-24-12504 What electricity must be provided for temporary labor camps? (1) A labor camp operator must supply electricity to all dwelling units, kitchen facilities, shower/bathroom facilities, common areas, and laundry facilities.

(2) All electrical wiring and electrical equipment in labor camps must meet the electric standards of applicable building codes.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12504, filed 12/1/98, effective 3/1/99.]

WAC 296-24-12505 What requirements apply to the water supply? (1) In each camp, you must provide an adequate and convenient water supply for drinking, cooking, bathing, and laundry purposes. The water supply must be approved by the appropriate health authority.

"Adequate water supply" means a water supply that is capable of delivering thirty-five gallons per person per day to the campsite at a peak rate of two and one-half times the average hourly demand.

(2) You must ensure that the distribution lines are able to supply water at normal operating pressures to all fixtures for simultaneous operation. If water is not piped to the shelters, water outlets must be distributed throughout the camp so that no shelter is more than one hundred feet from a yard hydrant.

(3) Where water under pressure is available, you must provide one or more drinking fountains for each one hundred occupants or fraction thereof. The construction of drinking fountains must comply with ANSI Standard Specifications for Drinking Fountains, Z4.2-1942. Common drinking cups are prohibited.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12505, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12505, filed 5/9/73 and Order 73-4, § 296-24-12505, filed 5/7/73.]

WAC 296-24-12507 Must an employer provide toilet facilities for the camp? (1) You must provide toilet facilities adequate for the camp capacity.

(2) You must ensure that no one has to pass through a sleeping room to reach a toilet room. Toilet rooms must either have a window of at least six square feet opening directly to the outside, or be satisfactorily ventilated. All outside openings must be screened with sixteen-mesh material. No fixture, water closet, chemical toilet, or urinal must be located in a room used for other than toilet purposes.

(3) A toilet room must be within two hundred feet of the door of each sleeping room. An outhouse must be at least one hundred feet away from any sleeping room, dining room, lunch area, or kitchen.

(4) Where toilet rooms are shared, such as in multifamily shelters and in barracks-type facilities, you must provide separate toilet rooms for each sex. These rooms must be distinctly marked "men" and "women" by signs printed in English and in the native language of the persons occupying the camp, or marked with easily understood pictures or symbols. If the facilities for each sex are in the same building, they must be separated by solid walls or partitions extending from the floor to the roof or ceiling.

(5) Where toilet facilities are shared, you must provide water closets or outhouses for each sex, based on the maximum number of persons of that sex that the camp is designed to house at any one time. Water closets or outhouses must be provided in the ratio of one unit for each fifteen persons, and a minimum of two units for any shared facility.

(6) You must provide one urinal or two linear feet of urinal trough for each twenty-five men. The floor from the wall and out at least fifteen inches from the outer edge of the urinals must be constructed of materials impervious to moisture.

(2001 Ed.)

Where water under pressure is available, urinals must have an adequate water flush. Urinal troughs in outhouses must drain freely into the pit or vault and the drain must be constructed to exclude flies and rodents from the pit.

(7) Every water closet installed after the effective date of these standards must be located in a toilet room.

(8) Each outhouse, water closet, or chemical toilet compartment must have an adequate supply of toilet paper.

(9) Toilet rooms must be kept in a sanitary condition and be cleaned at least daily.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12507, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12507, filed 5/9/73 and Order 73-4, § 296-24-12507, filed 5/7/73.]

WAC 296-24-12509 Must sewer lines connect to public sewers? All sewer lines and floor drains from buildings must be connected to public sewers when sewers are available.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12509, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12509, filed 5/9/73 and Order 73-4, § 296-24-12509, filed 5/7/73.]

WAC 296-24-12511 What facilities must an employer provide for laundry, handwashing, and bathing? (1) Laundry, handwashing, and bathing facilities must be provided in the following ratio:

(a) One handwash basin per family shelter or per six persons in shared facilities.

(b) One shower head for every ten persons.

(c) One laundry tray or tub for every thirty persons.

(d) One "deepwell" type sink in each building used for laundry, handwashing, and bathing.

(2) Floors must be moisture-resistant and smooth but not slippery. All junctions of the curbing and the floor must be coved. The walls and partitions of shower rooms must be smooth and moisture-resistant to the height of splash. All shower baths, shower rooms, or laundry rooms must have floor drains to remove waste water and facilitate cleaning.

(3) An adequate supply of hot and cold running water must be provided for bathing and laundry purposes. Facilities for heating water must be provided.

(4) Every service building must be provided with equipment capable of maintaining a temperature of at least 70 degrees Fahrenheit.

(5) Facilities for drying clothes must be provided.

(6) All service buildings must be kept clean.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12511, filed 12/1/98, effective 3/1/99. Statutory Authority: Chapter 49.17 RCW, 94-15-096 (Order 94-07), § 296-24-12511, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-12511, filed 5/9/73 and Order 73-4, § 296-24-12511, filed 5/7/73.]

WAC 296-24-12513 What lighting must an employer provide for camp buildings? Each habitable room in a camp must have at least one ceiling-type light fixture and at least one separate floor-type or wall-type convenience outlet. Laundry and toilet rooms and rooms where people congregate must have at least one ceiling-type or wall-type fixture. Light levels in toilet and storage rooms must be at least twenty foot-candles thirty inches from the floor. The light

[Title 296 WAC—p. 599]

level in other rooms, including kitchens and living quarters, must be at least thirty foot-candles thirty inches from the floor.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12513, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12513, filed 5/9/73 and Order 73-4, § 296-24-12513, filed 5/7/73.]

WAC 296-24-12515 What requirements apply to refuse disposal? (1) Cleanable or single service containers that can be securely closed, approved by the state board of health, must be provided for garbage storage. At least one such container must be provided for each family shelter and must be located within one hundred feet of each shelter on a wooden, metal, or concrete pad.

(2) Garbage containers must be kept clean.

(3) Garbage containers must be emptied when full, and at least twice a week.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12515, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12515, filed 5/9/73 and Order 73-4, § 296-24-12515, filed 5/7/73.]

WAC 296-24-12517 What cooking and food-handling facilities must be provided in temporary labor camps? A labor camp operator must provide enclosed and screened cooking and food-handling facilities for all occupants.

(1) If cooking facilities are located in dwelling units, the operator must provide:

(a) An operable cook stove or hot plate with at least one cooking surface for every two occupants;

(b) A sink with hot and cold running potable water under pressure;

(c) Food storage areas and nonabsorbent, easily cleanable food preparation counters situated off the floor;

(d) Mechanical refrigeration able to maintain a temperature of 45 degrees Fahrenheit or below, with enough space to store perishable food items for all occupants;

(e) Fire-resistant, nonabsorbent, nonasbestos, and easily cleanable wall coverings adjacent to cooking areas;

(f) Nonabsorbent, easily cleanable floors;

(g) At least one ceiling or wall light fixture; and

(h) Lighting of thirty foot-candles measured thirty inches from the floor; and

(i) Adequate ventilation for cooking facilities.

(2) In common food-handling facilities, the operator must provide:

(a) A room or building, adequate in size, separate from any sleeping quarters;

(b) No direct openings to living or sleeping areas from the common food-handling facility;

(c) An operable cook stove or hot plate with at least one cooking surface for every two occupants;

(d) Sinks with hot and cold running potable water under pressure;

(e) Food storage areas and nonabsorbent, easily cleanable food preparation counters situated off the floor;

(f) Mechanical refrigeration able to maintain a temperature of 45 degrees Fahrenheit or below, with enough space to store perishable food items for all occupants;

[Title 296 WAC—p. 600]

(g) Fire-resistant, nonabsorbent, nonasbestos, and easily cleanable wall coverings adjacent to cooking areas;

(h) Nonabsorbent, easily cleanable floors;

(i) At least one ceiling or wall light fixture; and

(j) Lighting of thirty foot-candles measured thirty inches from the floor;

(k) Adequate ventilation for cooking facilities.

(3) The operator must ensure that dining hall facilities:

(a) Comply with chapter 246-215 WAC, Food service;

(b) Are in a room or building, adequate in size, separate from any sleeping quarters;

(c) Have no direct openings to living or sleeping areas from the dining hall facility;

(d) Have fire-resistant, nonabsorbent, nonasbestos, and easily cleanable wall coverings adjacent to cooking areas;

(e) Have nonabsorbent, easily cleanable floors;

(f) Have at least one ceiling or wall light fixture; and

(g) Have available lighting of thirty foot-candles measured thirty inches from the floor.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12517, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12517, filed 5/9/73 and Order 73-4, § 296-24-12517, filed 5/7/73.]

WAC 296-24-12519 Must an employer provide insect and rodent control? You must take effective measures to prevent and control insect and rodent infestation.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12519, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12519, filed 5/9/73 and Order 73-4, § 296-24-12519, filed 5/7/73.]

WAC 296-24-12521 What first-aid facilities must be available in the camp? (1) In every camp, you must provide and maintain adequate first-aid facilities, approved by a health authority, for emergency treatment.

(2) A first-aid trained person must be in charge of first-aid facilities.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12521, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12521, filed 5/9/73 and Order 73-4, § 296-24-12521, filed 5/7/73.]

WAC 296-24-12523 When must an employer report communicable diseases in a camp? (1) You must report immediately to the local health officer the name and address of any individual in the camp known to have or suspected of having a communicable disease.

(2) Whenever suspected food poisoning or an unusual prevalence of fever, diarrhea, sore throat, vomiting, or jaundice occurs, the camp superintendent must report immediately the outbreak to the local health officer or state board of health.

[Statutory Authority: RCW 49.17.040, 98-24-096, § 296-24-12523, filed 12/1/98, effective 3/1/99; Order 73-5, § 296-24-12523, filed 5/9/73 and Order 73-4, § 296-24-12523, filed 5/7/73.]

(2001 Ed.)

PART B-2
SAFETY COLOR CODE FOR MARKING PHYSICAL HAZARDS, ETC., WINDOW WASHING

Color Code—Marking Physical Hazards

WAC 296-24-135 Safety color code for marking physical hazards.

[Order 73-5, § 296-24-135, filed 5/9/73 and Order 73-4, § 296-24-135, filed 5/7/73.]

WAC 296-24-13501 Color identification. (1) Red. Red shall be the basic color for the identification of:

(a) Fire protection equipment and apparatus, except motorized apparatus, as used on roads.

(b) Danger. Safety cans or other portable containers of flammable liquids having a flashpoint at or below 80°F, table containers of flammable liquids (open cup tester), excluding shipping containers, shall be painted red with some additional clearly visible identification either in the form of a yellow band around the can or the name of the contents conspicuously stenciled or painted on the can in yellow. Red lights shall be provided at barricades and at temporary obstructions, as specified in ANSI Safety Code for Building Construction, A10.2-1944. Danger signs shall be painted red.

(c) Stop. Emergency stop bars on hazardous machines such as rubber mills, wire blocks, flat work ironers, etc., shall be red. Stop buttons or electrical switches used for emergency stopping of machinery shall be red.

(2) Yellow. Yellow shall be the basic color for designating caution and for marking physical hazards such as: Striking against, stumbling, falling, tripping, and "caught in between."

[Statutory Authority: RCW 49.17.010, [49.17].050 and [49.17].060. 95-22-015, § 296-24-13501, filed 10/20/95, effective 1/16/96. Statutory Authority: RCW 49.17.040 and 49.17.050. 82-13-045 (Order 82-22), § 296-24-13501, filed 6/11/82; Order 73-5, § 296-24-13501, filed 5/9/73 and Order 73-4, § 296-24-13501, filed 5/7/73.]

WAC 296-24-140 Specifications for accident prevention signs and tags.

[Order 73-5, § 296-24-140, filed 5/9/73 and Order 73-4, § 296-24-140, filed 5/7/73.]

WAC 296-24-14001 Scope. (1) These specifications apply to the design, application, and use of signs or symbols (as included in WAC 296-24-14005 through 296-24-14009) intended to indicate and, insofar as possible, to define specific hazards of a nature such that failure to designate them may lead to accidental injury to workers. These specifications are intended to cover all safety signs except those designed for streets, highways, railroads, and marine regulations. These specifications do not apply to plant bulletin boards or to safety posters.

(2) All new signs and replacements of old signs after August 27, 1971 shall be in accordance with these specifications.

[Order 76-6, § 296-24-14001, filed 3/1/76; Order 73-5, § 296-24-14001, filed 5/9/73 and Order 73-4, § 296-24-14001, filed 5/7/73.]

(2001 Ed.)

WAC 296-24-14003 Definitions. As used in this section, the word "sign" refers to a surface on which letters or other markings appear, prepared for the warning of, or safety instructions of, industrial workers who may be exposed to hazards. Excluded from this definition, however, are news releases, displays commonly known as safety posters, and bulletins used for employee education.

[Order 73-5, § 296-24-14003, filed 5/9/73 and Order 73-4, § 296-24-14003, filed 5/7/73.]

WAC 296-24-14005 Classification of signs according to use. (1) Danger signs.

(a) Danger signs should be used only where an immediate hazard exists. There shall be no variation in the type of design or signs posted to warn of specific dangers and radiation hazards.

(b) All employees shall be instructed that danger signs indicate immediate danger and that special precautions are necessary.

(2) Caution signs.

(a) Caution signs shall be used only to warn against potential hazards or to caution against unsafe practices.

(b) All employees shall be instructed that caution signs indicate a possible hazard against which proper precaution should be taken.

(3) Safety instruction signs. Safety instruction signs shall be used where there is a need for general instructions and suggestions relative to safety measures.

[Order 73-5, § 296-24-14005, filed 5/9/73 and Order 73-4, § 296-24-14005, filed 5/7/73.]

WAC 296-24-14007 Sign design and colors. (1) All signs shall be furnished with rounded or blunt corners and shall be free from sharp edges, burrs, splinters, or other sharp projections. The ends or heads of bolts or other fastening devices shall be located in such a way that they do not constitute a hazard.

(2) Danger signs.

(a) The colors red, black, and white shall be those of opaque glossy samples as specified in Table 1 of Fundamental Specification of Safety Colors for CIE Standard Source "C," American National Standard Z53.1-1971.

(b) Standard proportions shall be as indicated in Table J-1, and format shall be as in Fig. J-1.

(3) Radiation warning signs.

(a) Standard color of the background shall be yellow; the panel, reddish purple with yellow letters; the symbol, reddish purple; any letters used against the yellow background shall be black. The colors shall be those of opaque glossy samples as specified in Table 1 of American National Standard, Z53.1-1971.

(b) The standard symbol shall be as in Figure J-3. Method of dimensioning, design, and orientation of the standard symbol (one blade pointed downward and centered on the vertical axis) shall be executed as illustrated. The symbol shall be prominently displayed, and of a size consistent with the size of the equipment or material or area to which it is attached.

(c) Format shall be as in Figure J-2. Sign proportions shall be the same as those for danger signs in Table J-1.

[Title 296 WAC—p. 601]

(4) Caution signs.

(a) Standard color of the background shall be yellow; and the panel, black with yellow letters. Any letters used against the yellow background shall be black. The colors shall be those of opaque glossy samples as specified in Table 1 of American National Standard Z53.1-1971.

(b) Standard proportions shall be as indicated in Table J-2, and format shall be as in Figure J-4.

(5) Exit signs. Exit signs shall be in accordance with WAC 296-24-56531.

(6) Safety instruction signs.

(a) Standard color of the background shall be white; and the panel, green with white letters. Any letters used against the white background shall be black. The colors shall be those of opaque glossy samples as specified in Table 1 of American National Standard, Z53.1-1971.

(b) Standard proportions shall be as indicated in Table J-3, and format shall be as in Figure J-5.

(7) Directional signs.

(a) Standard color of the background shall be white; and the panel, black with white directional symbol. Any letters used against the white background shall be black. The colors shall be those of opaque glossy samples as specified in Table 1 of American National Standard Z53.1-1971.

(b) Standard proportions shall be as indicated in Table J-4, and format shall be as in Figure J-6.

(8) In-plant traffic signs. Regulatory and control signs required for the safe movement of vehicles and pedestrians on thoroughfares on plant property shall conform to the standards established in American National Standard Manual on Uniform Traffic Control Devices for Streets and Highways, D6.1-1971.

(9) Informational signs. Blue shall be the standard color for informational signs. It may be used as the background color for the complete sign or as a panel at the top of such types of "notice" signs, which have a white background. The colors shall be those of opaque glossy samples as specified in Table 1 of American National Standard Z53.1-1971.

(10) Slow-moving vehicle emblem. This emblem (see Fig. J-7) consists of a fluorescent yellow-orange triangle with a dark red reflective border. The yellow-orange fluorescent triangle is a highly visible color for daylight exposure. The reflective border defines the shape of the fluorescent color in daylight and creates a hollow red triangle in the path of motor vehicle headlights at night. The emblem is intended as a unique identification for, and it shall be used only, on vehicles which by design move slowly (25 m.p.h. or less) on the public roads. The emblem is not a clearance marker for wide machinery nor is it intended to replace required lighting or marking of slow-moving vehicles. Neither the color film pattern and its dimensions nor the backing shall be altered to permit use of advertising or other markings. The material, location, mounting, etc., of the emblem shall be in accordance with the American Society of Agricultural Engineers Emblem for Identifying Slow-Moving Vehicles, ASAE R276, 1967, or ASAE S276.2 (ANSI B114.1-1971).

(11) Symbols. Symbols used on signs shall follow recognized practices, such as in Figure J-8. For radioactive materials, see symbol in Figure J-3.

[Statutory Authority: RCW 49.17.040 and 49.17.050, 82-13-045 (Order 82-22), § 296-24-14007, filed 6/11/82; Order 73-5, § 296-24-14007, filed 5/9/73 and Order 73-4, § 296-24-14007, filed 5/7/73.]

WAC 296-24-14009 Sign wordings. (1) Examples of wordings. The lists in (3) through (7) of this section are intended to serve as a guide for choosing the correct sign design for the message to be displayed.

(2) Nature of wording. The wording of any sign should be easily read and concise. The sign should contain sufficient information to be easily understood. The wording should make a positive, rather than negative suggestion and should be accurate in fact.

(3) Danger signs.

Danger—Keep off, electric current.

Danger—No smoking, matches, or open lights.

Danger—Workers above.

Danger—Not room enough here to clear men on cars.

Danger—Keep away.

Danger—Workers in boiler.

Danger—Insufficient clearance.

Danger—2,300 volts.

Danger—Keep out.

Danger—Crane overhead.

Danger—Keep off.

(4) Biological hazard signs. The biological hazard warning shall be used to signify the actual or potential presence of a biohazard and to identify equipment, containers, rooms, materials, experimental animals, or combinations thereof, which contain, or are contaminated with, viable hazardous agents. For the purpose of this subdivision the term "biological hazard," or "biohazard," shall include only those infectious agents presenting a risk or potential risk to the well-being of persons. The biohazard symbol shall be designed and proportioned as illustrated in Figure J-9. The symbol design shall be a fluorescent orange or orange-red color. Background color is optional as long as there is sufficient contrast for the symbol to be clearly defined. Appropriate wording may be used in association with the symbol to indicate the nature or identity of the hazard, name of individual responsible for its control, precautionary information, etc., but never should this information be superimposed on the symbol.

(5) Caution signs.

Caution—Do not operate, working on repairs.

Caution—Hands off switch, working on line.

Caution—Working on machines, do not start.

Caution—Goggles must be worn when operating this machine.

Caution—This door must be kept closed.

Caution—Electric trucks, go slow.

Caution—This space must be kept clear at all times.

Caution—Stop machinery to clean, oil, or repair.

Caution—Keep aisles clear.

Caution—Operators of this machine shall wear snug fitting clothing—No gloves.

Caution—Close clearance.

Caution—Watch your step.

Caution—Electric fence.

(6) Safety instruction signs.

Report all injuries to the first-aid room at once.
 Walk—Don't run.
 Report all injuries no matter how slight.
 Think, if safe go ahead.
 Make your work place safe before starting the job.
 Report all unsafe conditions to your supervisor.
 Help keep this plant safe and clean.

(7) Directional signs.

This way out (below arrow panel).
 This way (inside arrow) out (below arrow panel).
 Fire exit (below arrow panel).
 Fire (inside arrow) extinguisher (below arrow panel).
 To the (inside arrow) fire escape (below arrow panel).
 To the (inside arrow) first aid (below arrow panel).
 Manway (below arrow panel).
 This way to (inside arrow) first-aid room (below arrow panel).

(8) Informational signs.

No trespassing under penalty of the law.
 This elevator is for freight only, not for passengers.
 No admittance except to employees on duty.
 No admittance.
 No admittance, apply at office.
 No trespassing.
 Men.
 Women.
 For employees only.
 Office.

Note: When sign wordings such as those listed in this section are contemplated, care should be taken to be sure that they are suitable for the particular location at which the sign is to be placed and that wording meets the requirements of the intended purpose. When there is a reasonable doubt, a sign of a standard design should be used.

[Statutory Authority: Chapter 49.17 RCW, 94-15-096 (Order 94-07), § 296-24-14009, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-14009, filed 5/9/73 and Order 73-4, § 296-24-14009, filed 5/7/73.]

WAC 296-24-14011 Accident prevention tags. (1)

Scope and purpose.

(a) This section applies to all accident prevention tags used to identify hazardous conditions and provide a message to employees with respect to hazardous conditions as set forth in subsection (3) of this section, or to meet the specific requirements of other WAC requirements.

(b) Tags are a temporary means of warning all concerned of a hazardous condition, defective equipment, radiation hazards, etc. The tags are not to be considered as a complete warning method, but should be used until a positive means can be employed to eliminate the hazard; for example, a "do not start" tag on power equipment shall be used for a few moments or a very short time until the switch in the system can be locked out; a "defective equipment" tag shall be placed on a damaged ladder and immediate arrangements made for the ladder to be taken out of service and sent to the repair shop.

(c) This section does not apply to construction.

(2001 Ed.)

(2) Definitions.

(a) "Biological hazard" or "**Biohazard**" means those infectious agents presenting a risk of death, injury or illness to employees.

(b) "Major message" means that portion of a tag's inscription that is more specific than the signal word and that indicates the specific hazardous condition or the instruction to be communicated to the employee. Examples include: "High Voltage," "Close Clearance," "Do Not Start," or "Do Not Use" or a corresponding pictograph used with a written text or alone.

(c) "Pictograph" means a pictorial representation used to identify a hazardous condition or to convey a safety instruction.

(d) "Signal word" means that portion of a tag's inscription that contains the word or words that are intended to capture the employee's immediate attention.

(e) "Tag" means a device usually made of card, paper, pasteboard, plastic or other material used to identify a hazardous condition.

(3) Use.

(a) Tags shall be used as a means to prevent accidental injury or illness to employees who are exposed to hazardous or potentially hazardous conditions, equipment or operations which are out of the ordinary, unexpected or not readily apparent.

(b) Tags shall be used until such time as the identified hazard is eliminated or the hazardous operation is completed. Tags need not be used where signs, guarding or other positive means of protection are being used.

(c) Do not start tags shall be placed in a conspicuous location or shall be placed in such a manner that they effectively block the starting mechanism which would cause hazardous conditions should the equipment be energized. See Fig. J-11.

(4) General tag criteria.

(a) All required tags shall meet the following criteria:

(i) Tags shall contain a signal word and a major message.

(ii) The signal word shall be either "Danger," "Caution," or "Biological Hazard," "biohazard," or the biological hazard symbol.

(iii) The major message shall indicate the specific hazardous condition or the instruction to be communicated to the employee.

(b) The signal word shall be readable at a minimum distance of five feet (1.52 m) or such greater distance as warranted by the hazard.

(c) The tag's major message shall be presented in either pictographs, written text or both.

(d) The signal word and the major message shall be understandable to all employees who may be exposed to the identified hazard.

(e) All employees shall be informed as to the meaning of the various tags used throughout the workplace and what special precautions are necessary.

(f) Tags shall be affixed as close as safely possible to their respective hazards by a positive means such as string, wire, or adhesive that prevents their loss or unintentional removal.

(g) The tag and attachment method or device used shall be constructed of such material that they will not be likely to deteriorate in the environment in which the tag is used during the time period of intended use.

(5) Danger tags.

(a) Danger tags shall be used in major hazard situations where an immediate hazard presents a threat of death or serious injury to employees. Danger tags shall be used only in these situations. See Fig. J-11.

(b) All employees should be instructed that danger tags indicate immediate danger and that special precautions are necessary.

(6) Caution tags.

(a) Caution tags shall be used in minor hazard situations where a nonimmediate or potential hazard or unsafe practice presents a lesser threat of employee injury. Caution tags shall be used only in these situations. See Fig. J-12.

(b) All employees should be instructed that caution tags indicate a possible hazard against which proper precautions should be taken.

(7) Warning tags. Warning tags may be used to represent a hazard level between "Caution" and "Danger," instead of the required "Caution" tag, provided that they have a signal word of "Warning," an appropriate major message, and otherwise meet the general tag criteria of subsection (4) of this section.

(8) Out of order tags. Out of order tags should be used only for the specific purpose of indicating that a piece of equipment, machinery, etc., is out of order and to attempt to use it might present a hazard. (See Fig. J-13.)

(9) Radiation tags.

(a) The standard background for radiation tags shall be yellow; the panel shall be reddish purple. Any letters used against the yellow background shall be black. The colors shall be those of opaque glossy samples as specified in Table 1, Fundamental Specification of Safety Colors for CIE Standard Source "C" American National Standards Institute, Safety Color Code for Marking Physical Hazards and the Identification of Certain Equipment, Z53.1-1971.

(b) The method of dimension, design, and orientation of the standard symbol (one blade pointed downward and centered on the vertical axis) shall be executed as illustrated in Figure J-14. The symbol shall be prominently displayed and of a size consistent with the size of the equipment or area in which it is to be used.

(10) Biological hazard tags.

(a) Biological hazard tags shall be used to identify the actual or potential presence of a biological hazard and to identify equipment, containers, rooms, experimental animals, or combinations thereof, that contain or are contaminated with hazardous biological agents.

(b) The symbol design for biological hazard tags shall conform to the design shown in Fig. J-15.

(11) Other tags. Other tags may be used in addition to those required by this section or in other situations where this section does not require tags, provided that they do not detract from the impact or visibility of the signal word and major message of any required tag.

Appendix A—Recommended color coding.

While the standard does not specifically mandate colors to be used on accident prevention tags, the following color scheme is recommended by OSHA for meeting the requirements of this section:

"DANGER"—Red, or predominantly red, with lettering or symbols in a contrasting color.

(2001 Ed.)

"CAUTION"—Yellow, or predominantly yellow, with lettering or symbols in a contrasting color.

"WARNING"—Orange, or predominantly orange, with lettering or symbols in a contrasting color.

"BIOLOGICAL HAZARD"—Fluorescent orange or orange-red, or predominantly so, with lettering or symbols in a contrasting color.

Appendix B—References for further information.

The following references provide information which can be helpful in understanding the requirements contained in various sections of the standard:

WAC 296-24-145 Window washing.

[Order 73-5, § 296-24-145, filed 5/9/73 and Order 73-4, § 296-24-145, filed 5/7/73.]

WAC 296-24-14501 Definitions. (1) "Building" means a building more than one story in height or having window sills more than twelve feet above grade, which is a place of employment.

(2) The term "outside" means wholly without the building and/or establishment.

(3) The term "window cleaning" means all methods of cleaning windows.

(4) The term "safety belt" means the equipment which is attached to the body of the window cleaner while cleaning windows.

(5) "Waist band" means that part of the safety belt which is attached to the body of the window cleaner.

(6) "Terminal strap" means the strap or rope which is attached to the waist band and to which the belt terminals are attached.

(7) A "safe manner" means the method employed in cleaning windows in which the employee is protected:

(a) By standing or sitting on the sill while protected by a safety device.

(b) By working from a ladder.

(c) By working from a scaffold, or

(d) By working from a boatswain's chair.

(8) "Belt terminal" means that part of the safety belt which is fastened to the terminal strap to be attached to the anchor during the operation of window cleaning.

(9) The term "anchor" means the fitting, fastened to the window frame or wall, to which the belt terminal is attached.

(10) The term "single-head anchor" means an anchor having one head.

(11) The term "double-head anchor" means an anchor having two heads.

(12) The term "machine bolt" means the bolts used to install anchors in steel window frames.

(13) "Grade" means the ground, the floor, the sidewalk, the roof, or any approximately level solid surface of sufficient area and having sufficient structural strength to be considered as a safe place to work.

[Order 73-5, § 296-24-14501, filed 5/9/73 and Order 73-4, § 296-24-14501, filed 5/7/73.]

WAC 296-24-14503 Application. These orders shall apply to all window cleaning done in places of employment.

[Order 73-5, § 296-24-14503, filed 5/9/73 and Order 73-4, § 296-24-14503, filed 5/7/73.]

WAC 296-24-14505 Protection of persons engaged at window cleaning. (1) The employer shall not require nor permit any window in such building to be cleaned from the outside unless means are provided to enable such work to be done in a safe manner as provided in these standards.

[Title 296 WAC—p. 608]

(2) All employees required to clean windows shall use safety devices as required herein.

[Order 73-5, § 296-24-14505, filed 5/9/73 and Order 73-4, § 296-24-14505, filed 5/7/73.]

WAC 296-24-14507 General. (1) In every building hereafter erected, having windows so constructed that it is usual and/or practicable for a person to stand on the sill in order to clean said window, there shall be installed window cleaner's safety anchors approved by the American National Standards Institute.

(2) Employees sitting on a window sill with their legs inside the room, shall wear a safety belt equipped with a safety line. One end of the line shall be tied to a radiator, or any other substantial anchorage inside the room, unless the window opening is equipped with anchors in which case the safety belt shall be attached to the anchors.

(3) No safety device shall be used in window cleaning operations until it has the approval of the American National Standards Institute.

(4) The use of lag screws is prohibited in new or replacement installations hereafter made.

(5) Window cleaners shall not pass from one window sill to another window sill on the outside of a building unless one terminal is connected at all times.

(6) No employee who has not been properly trained to handle such equipment shall be assigned to work on scaffolds or boatswains' chairs.

(7) All window cleaning safety devices hereafter approved shall bear identification marks to identify the approval of the American National Standards Institute.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-14507, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-14507, filed 5/9/73 and Order 73-4, § 296-24-14507, filed 5/7/73.]

WAC 296-24-14509 Belt terminals, anchors and bolts. (1) All anchors and belt terminals shall be capable of withstanding the following tests:

(a) To withstand an impact test of an iron weight of thirty-two pounds falling free a distance of four feet and striking the head of the anchor without fracture.

(b) A drop test of three hundred fifty pounds dead weight (not sand) falling a distance of four feet without fracture. The connection between the weight and anchor being a standard safety belt or ropes or cables not over six feet long.

(c) To withstand a tension pull of six thousand pounds without fracture. This tension to be applied through a belt terminal and in the direction which the anchor must withstand in service when a person falls.

(2) All metals used in the manufacture of anchors and belt terminals shall have a minimum ultimate tensile strength of fifty-five thousand pounds per square inch, with an elongation of at least twenty-five percent in two inches and shall have a corrosion resistance of sixty percent as compared to copper. The belt terminal may be excepted from the corrosive resistance and elongation requirements of this order if of material and design of obvious superiority.

(3) All anchors installed hereafter shall be double-headed. These heads to be so designed or spaced that it will be impossible to attach the belt terminal to a single head. The

(2001 Ed.)

department may approve a single-headed anchor upon sufficient tests and proofs.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-14509, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-14509, filed 5/9/73 and Order 73-4, § 296-24-14509 filed 5/7/73.]

WAC 296-24-14511 Belts. (1) An approved safety belt of tanned leather, canvas or any other approved material shall be used when the operator is required to stand on the sill while cleaning the window. The safety belt shall be capable of withstanding a drop test of three hundred fifty pounds dead weight (not sand) falling a distance of four feet without failure, one terminal only being attached. The connection between the weight and the belt shall be the waist band of the belt.

(2) The safety belt shall be kept in repair.

(3) Window cleaners using a safety belt shall attach one belt terminal to anchor before stepping out onto the sill. During the operation of window cleaning, both belt terminals shall be attached to the anchors.

(4) The fittings on the waist band through which the terminal strap or rope passes shall be so constructed that it will be impossible for the safety terminals to pass through them.

(5) Metal thimbles shall be provided where ropes or straps are secured to eyes or rings.

(6) Suitable length terminal straps shall be provided for windows more than six feet wide between mullions.

[Order 73-5, § 296-24-14511, filed 5/9/73 and Order 73-4, § 296-24-14511, filed 5/7/73.]

WAC 296-24-14513 Anchor installations. (1) Locations: Anchors shall be attached to the side frames of the window or to the building at a point not less than forty-two inches nor more than fifty-one inches (approximately) above the window sill. Care shall be taken when screwing up anchor fastenings, to prevent producing excess stresses.

(2) Wood—Existing and new buildings: When anchors are attached to wood construction, through bolts of not less than one-half inch diameter, extending at least through the window frame with washers and nuts inside, shall be used as anchor fasteners. Means shall be provided to keep the nut from backing off.

Wall flanges shall be not less than one and one-quarter inches in diameter, or equivalent area.

(3) Concrete—New buildings: Anchors attached to concrete poured in place in buildings hereafter erected, shall be installed while the concrete is being placed. Such anchors shall extend not less than five inches into the concrete and shall have a cross-sectional area of not less than one-quarter of a square inch and shall be provided with a fluke at the end of the anchor not less than one inch in length.

(4) Masonry—New buildings: Anchors attached to masonry, other than concrete poured in place, in buildings hereafter erected, shall be installed while the wall is under construction and shall be shaped to build into the joints between masonry units. Such anchors shall be not less than eight and one-half inches long and shall have a cross-sectional area of not less than one-quarter of a square inch at all unexposed points and shall have a fluke or flukes having a

(2001 Ed.)

holding surface of not less than one inch in length that shall be firmly imbedded in the masonry.

(5) Masonry and concrete—Existing buildings: Anchors installed on buildings or masonry and concrete construction heretofore erected, shall be attached to the window frames as required in these standards, or by other methods approved by the department.

(6) Hollow metal—Existing and new buildings: Anchors shall be attached to hollow metal construction by one of the following methods:

(a) At least two nickel steel bolts not less than five-sixteenths of an inch in diameter passing through the frame and a steel reinforcing plate five-sixteenths of an inch thick and not less than six inches long, placed on the inside of the frame and secured by means of nuts and lock washers. In cases where it is impracticable to provide nuts and lock washers, the reinforcing plate may be tapped to receive five-sixteenths inch diameter bolts, and the bolts shall extend through the plate.

(b) Where the screw bolt is an integral part of the anchor, it shall be at least one-half inch in diameter and shall be secured by means of a nut and lock washer, or any other method approved by the department.

(c) All anchors and anchor fastenings shall be provided with means to prevent them from turning, backing off or becoming loose.

(7) Solid metal—Existing and new buildings: Anchors shall be attached to solid metal construction by one of the following methods:

(a) At least two nickel steel bolts not less than five-sixteenths of an inch in diameter passing through the frame, and secured by means of nuts and lock washers. In cases where it is impracticable to provide nuts and lock washers, the metal frame shall be reinforced with a five-sixteenths inch thick plate and tapped to receive at least two five-sixteenths inch diameter nickel steel bolts, and the bolts shall extend through the reinforcing plate.

(b) Where the screw bolt is an integral part of the anchor, it shall be at least one-half inch in diameter and shall be secured by means of a nut and lock washer, or any other method approved by the department.

(c) All anchors and anchor fastenings shall be provided with means to prevent them from turning, backing off or becoming loose.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-14513, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-14513, filed 5/9/73 and Order 73-4, § 296-24-14513, filed 5/7/73.]

WAC 296-24-14515 Reversible and pivot windows.

(1) When it is necessary to clean reversible and pivot windows either of which is prevented from properly operating by obstructions or by the design of said windows, they shall be provided with safety devices of approved design.

(2) Horizontally pivoted sash. Provision shall be made so that the outside of horizontally pivoted windows may be cleaned without necessitating the window washer leaning against or putting weight on the sash.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-24-14515, filed 7/20/94, effective 9/20/94; Order 73-5, § 296-24-14515, filed 5/9/73 and Order 73-4, § 296-24-14515, filed 5/7/73.]

WAC 296-17-31024 Classification rates. (1) How do you determine what rate to charge me?

Each classification has a corresponding base rate. The base rate assigned to your business will depend on the basic classification or classifications assigned to your business.

(2) What do you mean by a base rate?

The base rate is a comparison of losses (*claims*) and exposure to produce a cost per unit of exposure. The base rate is an unmodified rate that all employers with an experience factor of 1.000 will pay in a specific classification.

(3) Do all employers in the same classification pay the base rate?

In practice, only a few employers pay the *base rate*. If you are a new employer, you will pay the base rate until you have reported worker hours during the current *experience period*. After you have reported hours during an experience period, your rate will be modified as of January 1, of the next calendar year. We refer to that modified rate as your *experience rate*. Your experience rate is the base rate adjusted by your own company's claims losses (*experience factor*). It can produce a premium higher or lower than the *base rate*. This means that employers with few claims will pay less than employers in the same classification who have many claims. Experience rating encourages strong safety and accident prevention programs. Details of how experience rating affects your premium are outlined in WAC 296-17-850 through 296-17-875. Your policy manager can also answer questions about your individual experience factor. The name and phone number of your policy manager can be found on your quarterly premium report or your annual rate notice. For your convenience you can call us at (360) 902-4817 and we will put you in contact with your assigned policy manager.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31024, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31025 Change in business operations. If I change the type of business I operate, or add a new operation, should I call you? Yes, we rely on you to update us about changes in your business operations. We provide a place on your quarterly premium reports to let us know about any changes you have made. If you need help determining if changes to your account are necessary, you can call your policy manager. Depending on the type of change you are making, you may need to complete a new master application. The name and phone number of your policy manager can be found on your quarterly premium report or annual rate notice. For your convenience you can call us at (360) 902-4817 and we will put you in contact with your assigned policy manager.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31025, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31026 Reporting multiple business operations. If I have more than one business, can I report them on the same account? The way the businesses are organized will make a difference. Each separate "*ownership type*" must be classified and reported separately from any other much the same way you must keep each business' finan-

cial records separate from any other. Your master application must specify the "*ownership type*" of your business, such as, sole proprietor, partnership, corporation, etc. If that one ownership type registration is for more than one location of the same business or more than one type of business, you can choose to report all of them on the same account or on separate accounts. However, if you register each as a separate ownership type, you must report them on separate accounts.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31026, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31027 Temporary help company. Sometimes I use temporary help employees which I obtain through a temporary help company. Do I have to report those workers to labor and industries in my basic classification? No, if you obtain temporary help employees from a temporary help company, the temporary help company should report these workers to us and pay the required premiums. Temporary help companies have special classifications assigned to them to report and pay premiums on behalf of their client businesses. These classifications are used only in the temporary help industry and are different from our basic classifications which are assigned to nontemporary help companies. If the temporary help service fails to pay premiums to us, the client company is held responsible for the unpaid premiums of any temporary help employee used by the client company.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31027, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31028 Closing accounts. What are my responsibilities when I close my business, or when I no longer have employees? You must notify us in writing when you close your business or when you no longer have employees. You may either send a letter, or include a note on your final quarterly report. We will not close your account from a telephone call.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31028, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31029 Insurance principles. (1) What insurance principles does the department of labor and industries use when a new classification is developed?

Those principles are broken down into four major components as follows:

- Administration
- Equity
- Homogeneity
- Safety

A detailed explanation of these principles can be found in subsection (2) of this section.

(2) What are these principles?

- **Administration:** Recordkeeping requirements must be simple and easy to follow. If our classification system imposed burdensome recordkeeping requirements, most employers would find it difficult to comply. Resolving complaints related to burdensome recordkeeping requirements would be in nobody's interest. The premium rate for your basic classification is based

on the *average* exposure to hazard of all your workers. If our classification system were based upon individual occupations, you would pay a lower rate for your workers whose duties are considered low hazard, but you would pay a higher rate for your workers who have duties that expose them to a greater hazard. The total premium you pay would not be decreased; it would only be redistributed and would require more record-keeping. Having one basic classification assigned to cover all the operations makes recordkeeping and reporting easier for you.

- **Statistical credibility or equity:** By monitoring our classification plan, we ensure that enough hours are reported in each classification to provide a meaningful statistical base. A large enough statistical base helps avoid sudden large increases or decreases in rates and keeps them at the lowest possible level. We refer to this as *statistical credibility*. Classifications must also be *responsive to change* if equity and fairness are to be achieved. Our classification plan is in a constant state of evolution. In the early 1970s we had approximately 45 classifications. Today we have over 300 main classifications and approximately 1,000 subclassification codes to track losses. In some industries, the evolution is gradual, and no change to the classification itself is needed. We recognize that the wording used to describe a classification may not have kept up with changes in an industry. However, as the industry conditions evolve because of modern equipment, new processes or materials, or changes in employment laws and safety standards, so does the experience upon which the rate is based. In other words, the changes in the experience which is used to develop premium rates *reflect* new developments in processes, equipment, and technology even though the wording in the classification is unchanged. We strive to keep our classification language current. Although it would be easy to just change the classification wording as we encounter changes in an industry, Washington law requires that we conduct public hearings before we make official changes to the rule. We do this as a public safeguard and to involve business in the change process. As technologies change or new industries develop, we receive requests from industry representatives for new classifications or for determination of proper classification assignments for the new processes. We will evaluate the request and determine if there is a large enough group of employers to justify a new classification. Any classification must produce enough premium to cover losses. In addition, as specific industries become obsolete or certain processes are no longer in use we will discontinue the classifications that covered them.
- **Homogeneity:** Although it is rare that any two businesses are identical, our classification plan recognizes that similar businesses have similar exposures to occupational injury and disease. Employers with similar operations and exposures are grouped together so each classification includes common exposures and carries a rate that reflects those exposures. This method of grouping *homogenous* risks ensures that the overall cost of the workers' compensation system is distributed fairly among the businesses we insure. Classifications must also be *mutually exclusive*. Our classifications are clearly defined so that each type of business or industry fits in only one basic classification.
- **Workplace safety and accident prevention:** By classifying employers by the nature of their business, each

industry can take responsibility for controlling its own workers' compensation costs. Employers may belong to a trade association, which usually offers safety or risk management services. If such services result in fewer and less costly accidents, that improved experience will tend to lower the base rates for that industry. If our classification system were based upon the occupations or duties of employees, the success of a single industry's safety or risk management program would have little impact on its premium costs.

Example: Many retail grocery stores employ meat cutters. If grocery stores wanted to reduce the frequency of injury to their meat cutters they could develop a safety plan that focused on proper meat handling, lifting, and cutting. Assuming the safety program was successful and reduced the cost associated with meat cutter claims, the rate for grocery stores would go down. If, on the other hand, all meat cutters, such as those who work for restaurants, grocery stores, or slaughter houses, reported in a single meat cutter classification, it is doubtful that the grocery stores' safety program would have any impact on the premium rates since grocery stores' meat cutters would represent only a small portion of a meat cutter classification.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-31029, filed 8/28/98, effective 10/1/98.]

WAC 296-17-352 Audits. An audit of the employer's books, records and payrolls performed pursuant to the authority contained in RCW 51.48.040 may include but will not be limited to:

- (1) An audit to determine whether an employer engaged in a business or trade has employment subject to the industrial insurance laws.
- (2) A visual inspection of the employer's workplace or places for the purpose of determining appropriate classifications in accordance with the industrial insurance laws and rules as set forth in chapter 296-17 WAC.
- (3) Audits containing a complete and detailed examination of the employer's books and records for a specific period to establish the reporting of the employer's payroll in accordance with the industrial insurance laws and the rules as set forth in chapter 296-17 WAC, and as well, chapter 296-15 WAC in the event the employer has been certified a self-insurer.

Except as otherwise provided in this rule any audit time period may be less than, but will not exceed, three years of the due dates of any payments from any employer where the department has requested submission of the employer's books, or three years of the due dates of any payments where the employer makes claim for adjustment, recomputation or alteration of any such payment: Provided, That an employer certified to self-insure pursuant to the authority contained in chapter 51.14 RCW, shall be subject to such audit as deemed necessary to guarantee its compliance with the industrial insurance laws and rules and regulations for self-insurers: Provided further, That an employer who fails to make any books and records, or certified copies thereof, available for audit in the state of Washington, will be charged for all costs incurred by the department in auditing any books and records maintained at other places: Provided further, That in any

instance where fraud may be indicated with respect to underpayment or nonpayment of premiums the audit time period may be extended beyond that previously set forth.

[Statutory Authority: RCW 51.16.035. 85-06-026 (Order 85-7), § 296-17-352, filed 2/28/85, effective 4/1/85. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 78-12-043 (Order 78-23), § 296-17-352, filed 11/27/78, effective 1/1/79; Order 76-36, § 296-17-352, filed 11/30/76; Order 76-18, § 296-17-352, filed 5/28/76, effective 7/1/76.]

WAC 296-17-35201 Recordkeeping and retention.

Washington law (RCW 51.48.030) requires every employer to make, keep, and preserve records which are adequate to facilitate the determination of premiums due to the state for workers' compensation insurance for their covered workers. In the administration of Title 51 RCW, the department of labor and industries has deemed the records and information required in the various subsections of this section to be essential in the determination of premiums due to the state fund. The records so specified and required, shall be provided at the time of audit to any authorized representative of the department who has requested them.

Failure to produce the requested records within thirty days of the request, or within an agreed upon time period shall constitute prima facie evidence of noncompliance with this rule and shall invoke the statutory bar to challenge found in RCW 51.48.030 and/or 51.48.040.

(1) Employment records. Every employer shall with respect to each worker, make, keep, and preserve original records containing all of the following information for three full calendar years following the calendar year in which employment occurred:

- (a) The name of each worker;
- (b) The Social Security number of each worker;
- (c) The beginning date of employment for each worker and, if applicable, the separation date of employment of each such worker;
- (d) The basis upon which wages are paid to each worker;
- (e) The number of units earned or produced for each worker paid on a piecework basis;
- (f) The risk classification applicable to each worker whenever the worker hours of any one employee are being divided between two or more classifications;
- (g) The number of actual hours worked (WAC 296-17-31002) by each worker, unless another basis of computing hours worked is prescribed in WAC 296-17-31021;
- (h) A summary time record for each worker showing the calendar day or days of the week work was performed and the actual number of hours worked each work day;
- (i) The workers' total gross pay period earnings;
- (j) The specific sums withheld from the earnings of each worker, and the purpose of each sum withheld;
- (k) The net pay earned by each such worker.

(2) Business, financial records, and record retention. Every employer is required to keep and preserve all original employment time records for three full calendar years following the calendar year in which employment occurred. The three-year period is specified in WAC 296-17-352 as the composite period from the date any such premium became due.

Employers who pay their workers by check are required to keep and preserve all check registers and bank statements. Employers who pay their workers by cash are required to keep and preserve records of these cash transactions which provide a detailed record of wages paid to each worker.

(3) Recordkeeping - Estimated premium computation. Any employer required by this section to make, keep, and preserve records containing the information as specified in subsections (1) and (2) of this section, who fails to make, keep, and preserve such records, shall for the purpose of premium calculation assume worker hours using the average hourly wage rate for each classification, and also will be subject to penalties prescribed in subsection (4) of this section. The records of the department as compiled for the preceding fiscal year ending June 30, shall be the basis for determining the average hourly wage rate: Provided, That the average hourly wage rate shall be no less than the state minimum wage existing at the time such assumed hours are worked. Notwithstanding any other provisions of this section, workers employed in a work activity center subject to Classification 7309 shall be reported on the basis of the average hourly wage.

(4) Failure to maintain records - Penalties. Any employer required by this section to make, keep, and preserve records containing the information as specified in subsections (1) and (2) of this section, who fails to make, keep, and preserve such record, shall be liable, subject to RCW 51.48.030, to a penalty in the amount of two hundred fifty dollars for each such offense. Failure to make, keep, and preserve records containing the information as specified in subsections (1) and (2) of this section, for a single employee shall constitute one offense, for two employees two offenses, and so forth.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-35201, filed 8/31/99, effective 10/1/99. Statutory Authority: RCW 51.04.020. 95-08-052, § 296-17-35201, filed 4/3/95, effective 7/1/95.]

WAC 296-17-35202 Definitions. For the purpose of interpretation of this manual, chapter 296-17 WAC, or administering Title 51 RCW, the following terms shall have the meanings given below:

(1) "Free from control or direction" shall mean that the contracted individual has the responsibility to deliver a finished product or service without the contracting firm or individual either exercising direct supervision over the work hours or the methods and details of performance or having the right to exercise that authority under the contract.

(2) "Principle place of business" shall be the physical location of the business from which the contract of service is directed and controlled.

(3) "Within a reasonable period" for establishing an account with state agencies shall be the time prior to the first date on which the individual begins performance of service toward the contract or the date upon which the individual is required to establish an account with a state agency, as otherwise required by law, whichever event shall last occur.

(4) "Bona fide officer" means any person empowered in good faith by stockholders or directors, in accordance with articles of incorporation or bylaws, to discharge the duties of such officer.

(5) "Related by blood within the third degree" means the degree of kinship as computed according to the rules of the civil law.

(6) "Related by marriage" means the union subject to legal recognition under the domestic relations laws of this state.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-35202, filed 8/28/98, effective 10/1/98.]

WAC 296-17-35203 Special reporting instruction. (1) Professional and semiprofessional athletic teams. Athletes assigned to a Washington-domiciled sports team are mandatorily covered by Washington industrial insurance: Provided, That a professional athlete who is under contract with a parent team domiciled outside of the state of Washington while assigned to a team domiciled within Washington is subject to mandatory coverage by Washington industrial insurance unless the player and employer (parent team) have agreed in writing as to which state shall provide coverage in accordance with RCW 51.12.120(5).

The following rules shall apply to the written agreement:

(a) Agreement must be in writing and signed by the employer and the individual athlete.

(b) Agreement must specify the state that is to provide coverage. The state agreed upon to provide coverage must be a state in which the player's team, during the course of the season, will engage in an athletic event. For example, if the Washington-based team is a part of a league with teams in only Washington, Oregon, and Idaho, the player and the employer can agree to any of those three states to provide coverage. However, they could not agree to have California provide the coverage as this would not qualify as a state in which the player regularly performs assigned duties.

(c) The state agreed upon accepts responsibility for providing coverage and acknowledges such to the department by certified mail.

(d) Agreement and certification by the other state must be received by this department's underwriting section prior to any injury incurred by the athlete.

(e) Agreement will be for one season only commencing with the assigning of the player to a particular team. A separate agreement and certification must be on file for each additional season.

Failure to meet all of these requirements will result in the athlete being considered a Washington worker for premium and benefit purposes until such time as all requirements have been met.

Professional sports teams who are domiciled outside the state of Washington and who participate in sporting events with Washington-domiciled teams are not subject to Washington industrial insurance for their team members while in this state. These out-of-state teams are not considered employers subject to Title 51 on the basis that they are not conducting a business within this state.

(2) **Excluded employments.** Any employer having any person in their employ excluded from industrial insurance whose application for coverage under the elective adoption provisions of RCW 51.12.110 or authority of RCW 51.12.095 or 51.32.030 has been accepted by the director shall report and pay premium on the actual hours worked for

(2001 Ed.)

each such person who is paid on an hourly, salaried-part time, percentage of profit or piece basis; or one hundred sixty hours per month for any such person paid on a salary basis employed full time. In the event records disclosing actual hours worked are not maintained by the employer for any person paid on an hourly, salaried-part time, percentage of profits or piece basis the worker hours of such person shall be determined by dividing the gross wages of such person by the state minimum wage for the purpose of premium calculation. However, when applying the state minimum wage the maximum number of hours assessed for a month will be one hundred sixty.

(3) **Special trucking industry rules.** The following subsection shall apply to all trucking industry employers as applicable.

(a) **Insurance liability.** Every trucking industry employer operating as an intrastate carrier or a combined intrastate and interstate carrier must insure their workers' compensation insurance liability through the Washington state fund or be self-insured with the state of Washington.

Washington employers operating exclusively in interstate or foreign commerce or any combination of interstate and foreign commerce must insure their workers' compensation insurance liability for their Washington employees with the Washington state fund, be self-insured with the state of Washington, or provide workers' compensation insurance for their Washington employees under the laws of another state when such other state law provides for such coverage.

Interstate or foreign commerce trucking employers who insure their workers' compensation insurance liability under the laws of another state must provide the department with copies of their current policy and applicable endorsements upon request.

Employers who elect to insure their workers' compensation insurance liability under the laws of another state and who fail to provide updated policy information when requested to do so will be declared an unregistered employer and subject to all the penalties contained in Title 51 RCW.

(b) **Reporting.** Trucking industry employers insuring their workers' compensation insurance liability with the Washington state fund shall keep and preserve all original time records/books including supporting information from drivers' logs for a period of three calendar years plus three months.

Employers are to report actual hours worked, including time spent loading and unloading trucks, for each driver in their employ. For purposes of this section, actual hours worked does not include time spent during lunch or rest periods or overnight lodging.

Failure of employers to keep accurate records of actual hours worked by their employees will result in the department estimating work hours by dividing gross payroll wages by the state minimum wage for each worker for whom records were not kept. However, in no case will the estimated or actual hours to be reported exceed five hundred twenty hours per calendar quarter for each worker.

(c) **Exclusions.** Trucking industry employers meeting all of the following conditions are exempted from mandatory coverage.

(i) Must be engaged exclusively in interstate or foreign commerce.

(ii) Must have elected to cover their Washington workers on a voluntary basis under the Washington state fund and must have elected such coverage in writing on forms provided by the department.

(iii) After having elected coverage, withdrew such coverage in writing to the department on or before January 2, 1987.

If all the conditions set forth in (i), (ii), and (iii) of this subsection have not been met, employers must insure their workers' compensation insurance liability with the Washington state fund or under the laws of another state.

(d) Definitions. For purposes of interpretation of RCW 51.12.095(1) and administration of this section, the following terms shall have the meanings given below:

(i) "Agents" means individuals hired to perform services for the interstate or foreign commerce carrier that are intended to be carried out by the individual and not contracted out to others but does not include owner operators as defined in RCW 51.12.095(1).

(ii) "Contacts" means locations at which freight, merchandise, or goods are picked up or dropped off within the boundaries of this state.

(iii) "Doing business" means having any terminals, agents or contacts within the boundaries of this state.

(iv) "Employees" means the same as the term "worker" as contained in RCW 51.08.180.

(v) "Terminals" means a physical location wherein the business activities (operations) of the trucking company are conducted on a routine basis. Terminals will generally include loading or shipping docks, warehouse space, dispatch offices and may also include administrative offices.

(vi) "Washington" shall be used to limit the scope of the term "employees." When used with the term "employees" it will require the following test for benefit purposes (all conditions must be met).

- The individual must be hired in Washington or must have been transferred to Washington; and
- The individual must perform some work in Washington (i.e., driving, loading, or unloading trucks).

(4) **Forest, range, or timber land services—Industry rule.** Washington law (RCW 51.48.030) requires every employer to make, keep, and preserve records which are adequate to facilitate the determination of premiums (taxes) due to the state for workers' compensation insurance coverage for their covered workers. In the administration of Title 51 RCW, and as it pertains to the forest, range, or timber land services industry, the department of labor and industries has deemed the records and information required in the various subsections of this section to be essential in the determination of premiums (taxes) due to the state fund. The records so specified and required, shall be provided at the time of audit to any representative of the department who has requested them.

Failure to produce these required records within thirty days of the request, or within an agreed upon time period, shall constitute noncompliance of this rule and RCW 51.48.030 and 51.48.040. Employers whose premium computations are made by the department in accordance with (d)

of this subsection are barred from questioning, in an appeal before the board of industrial insurance appeals or the courts, the correctness of any assessment by the department on any period for which such records have not been kept, preserved, or produced for inspection as provided by law.

(a) General definitions. For purpose of interpretation of this section, the following terms shall have the meanings given below:

(i) "Actual hours worked" means each workers' composite work period beginning with the starting time of day that the employees' work day commenced, and includes the entire work period, excluding any nonpaid lunch period, and ending with the quitting time each day work was performed by the employee.

(ii) "Work day" shall mean any consecutive twenty-four-hour period.

(b) Employment records. Every employer shall with respect to each worker, make, keep, and preserve original records containing all of the following information for three full calendar years following the calendar year in which the employment occurred:

- (i) The name of each worker;
- (ii) The Social Security number of each worker;
- (iii) The beginning date of employment for each worker and, if applicable, the separation date of employment for each such worker;
- (iv) The basis upon which wages are paid to each worker;
- (v) The number of units earned or produced for each worker paid on a piece-work basis;
- (vi) The risk classification(s) applicable to each worker;
- (vii) The number of actual hours worked by each worker, unless another basis of computing hours worked is prescribed in WAC 296-17-31021. For purposes of chapter 296-17 WAC, this record must clearly show, by work day, the time of day the employee commenced work, and the time of day work ended;

(viii) A summary time record for each worker showing the calendar day or days of the week work was performed and the actual number of hours worked each work day;

(ix) In the event a single worker's time is divided between two or more risk classifications, the summary contained in (b)(viii) of this subsection shall be further broken down to show the actual hours worked in each risk classification for the worker;

- (x) The workers' total gross pay period earnings;
- (xi) The specific sums withheld from the earnings of each worker, and the purpose of each sum withheld;
- (xii) The net pay earned by each such worker.

(c) Business, financial records, and record retention. Every employer is required to keep and preserve all original time records completed by their employees for a three-year period. The three-year period is specified in WAC 296-17-352 as the composite period from the date any such premium became due.

Employers who pay their workers by check are required to keep and preserve a record of all check registers and cancelled checks; and employers who pay their workers by cash are required to keep and preserve records of these cash trans-

actions which provide a detailed record of wages paid to each worker.

(d) Recordkeeping - estimated premium computation. Any employer required by this section to make, keep, and preserve records containing the information as specified in (b) and (c) of this subsection, who fails to make, keep, and preserve such records, shall have premiums calculated as follows:

(i) Estimated worker hours shall be computed by dividing the gross wages of each worker for whom records were not maintained and preserved, by the state's minimum wage, in effect at the time the wages were paid or would have been paid. However, the maximum number of hours to be assessed under this provision will not exceed five hundred twenty hours for each worker, per quarter for the first audited period. Estimated worker hours computed on all subsequent audits of the same employer that disclose a continued failure to make, keep, or preserve the required payroll and employment records shall be subject to a maximum of seven hundred eighty hours for each worker, per quarter.

(ii) In the event an employer also has failed to make, keep, and preserve the records containing payroll information and wages paid to each worker, estimated average wages for each worker for whom a payroll and wage record was not maintained will be determined as follows: The employer's total gross income for the audit period (earned, received, or anticipated) shall be reduced by thirty-five percent to arrive at "total estimated wages." Total estimated wages will then be divided by the number of employees for whom a record of actual hours worked was not made, kept, or preserved to arrive at an "estimated average wage" per worker. Estimated hours for each worker will then be computed by dividing the estimated average wage by the state's minimum wage in effect at the time the wages were paid or would have been paid as described in (d)(i) of this subsection.

(e) Reporting requirements and premium payments.

(i) Every employer who is awarded a forest, range, or timber land services contract must report the contract to the department promptly when it is awarded, and prior to any work being commenced, except as provided in (e)(iii) of this subsection. Employers reporting under the provisions of (e)(iii) of this subsection shall submit the informational report with their quarterly report of premium. The report shall include the following information:

(I) The employers' unified business identification account number (UBI).

(II) Identification of the landowner, firm, or primary contractor who awarded the contract, including the name, address, and phone number of a contact person.

(III) The total contract award.

(IV) Description of the forest, range, or timber land services work to be performed under terms of the contract.

(V) Physical location/site where the work will be performed including legal description.

(VI) Number of acres covered by the contract.

(VII) Dates during which the work will be performed.

(VIII) Estimated payroll and hours to be worked by employees in performance of the contract.

(ii) Upon completion of every contract issued by a landowner or firm that exceeds a total of ten thousand dollars, the

contractor primarily responsible for the overall project shall submit in addition to the required informational report described in (e)(i) of this subsection, report the payroll and hours worked under the contract, and payment for required industrial insurance premiums. In the event that the contracted work is not completed within a calendar quarter, interim quarterly reports and premium payments are required for each contract for all work done during the calendar quarter. The first such report and payment is due at the end of the first calendar quarter in which the contract work is begun. Additional interim reports and payments will be submitted each quarter thereafter until the contract is completed. This will be consistent with the quarterly reporting cycle used by other employers. Premiums for a calendar quarter, whether reported or not, shall become due and delinquent on the day immediately following the last day of the month following the calendar quarter.

(iii) A contractor may group contracts issued by a landowner, firm, or other contractor that total less than ten thousand dollars together and submit a combined quarterly report of hours, payroll, and the required premium payment in the same manner and periods as nonforestation, range, or timber land services employers.

(f) Out-of-state employers. Forest, range, or timber land services contractors domiciled outside of Washington state must report on a contract basis regardless of contract size for all forest, range, or timber land services work done in Washington state. Out-of-state employers will not be permitted to have an active Washington state industrial insurance account for reporting forest, range, or timber land services work in the absence of an active Washington forest, range, or timber land services contract.

(g) Work done by subcontract. Any firm primarily responsible for work to be performed under the terms of a forest, range, or timber land services contract, that subcontracts out any work under a forest, range, or timber land services contract must send written notification to the department prior to any work being done by the subcontractor. This notification must include the name, address, Social Security number, farm labor contractor number, (UBI) of each subcontractor, and the amount and description of contract work to be done by subcontract.

(h) Forest, range, or timber land services contract release - verification of hours, payroll, and premium. The department may verify reporting of contractors by way of an on-site visit to an employers' work site. This on-site visit may include close monitoring of employees and employee work hours. Upon receipt of a premium report for a finished contract, the department may conduct an audit of the firm's payroll, employment, and financial records to validate reporting. The department will notify the contractor, and the entity that awarded the contract, of the status of the contractors' account immediately after verification. The landowner, firm, or contractors' premium liability will not be released until the final report for the contract from the primary contractor and any subcontractors has been received and verified by the department.

(i) Premium liability - work done by contract. Washington law (RCW 51.12.070) places the responsibility for industrial insurance premium payments primarily and directly

upon the person, firm, or corporation who lets a contract for all covered employment involved in the fulfillment of the contract terms. Any such person, firm, or corporation letting a contract is authorized to collect from the contractor the full amount payable in premiums. The contractor is in turn authorized to collect premiums from any subcontractor they may employ his or her proportionate amount of the premium payment.

To eliminate premium liability for work done by contract permitted by Title 51 RCW, any person, firm, or corporation who lets a contract for forest, range, or timber land services work must submit a copy of the contract they have let to the department and verify that all premiums due under the contract have been paid.

Each contract submitted to the department must include within its body, or on a separate addendum, all of the following items:

- (I) The name of the contractor who has been engaged to perform the work;
- (II) The contractor's UBI number;
- (III) The contractor's farm labor contractor number;
- (IV) The total contract award;
- (V) The date the work is to be commenced; a description of the work to be performed including any pertinent acreage information;
- (VI) Location where the work is to be performed;
- (VII) A contact name and phone number of the person, firm, or corporation who let the contract;
- (VIII) The total estimated wages to be paid by the contractor and any subcontractors;
- (IX) The amount to be subcontracted out if such subcontracting is permitted under the terms of the contract;
- (X) The total estimated number of worker hours anticipated by the contractor and his/her subcontractors in the fulfillment of the contract terms;
- (j) Reports to be mailed to the department. All contracts, reports, and information required by this section are to be sent to:

The Department of Labor and Industries
Reforestation Team 8
P.O. Box 44168
Tumwater, Washington 98504-4168

(k) Rule applicability. If any portion of this section is declared invalid, only that portion is repealed. The balance of the section shall remain in effect.

(5) Logging and/or tree thinning—Mechanized operations—Industry rule. The following subsection shall apply to all employers assigned to report worker hours in risk classification 5005, WAC 296-17-66003.

(a) Every employer having operations subject to risk classification 5005 "logging and/or tree thinning - mechanized operations" shall have their operations surveyed by labor and industries insurance services staff prior to the assignment of risk classification 5005 to their account. Annual surveys may be required after the initial survey to retain the risk classification assignment.

(b) Every employer as a prerequisite of being assigned risk classification 5005 and having exposure (work hours) which is reportable under other risk classifications assigned

to the employer shall be required to establish a separate sub-account for the purpose of reporting exposure (work hours) and paying premiums under this risk classification (5005). Except as otherwise provided for in this rule, only exposure (work hours) applicable to work covered by risk classification 5005 shall be reported in this subaccount. In the event that the employer's only other reportable exposure (work hours) is subject to one of the standard exception risk classifications, or the shop or yard risk classification then all exposure (work hours) will be reported under a single main account.

(c) Every employer assigned to report exposure (work hours) in risk classification 5005 shall supply an addendum report with their quarterly premium report which lists the name of each employee reported under this classification during the quarter, the Social Security number of such worker, the piece or pieces of equipment the employee operated during the quarter, the number of hours worked by the employee during the quarter, and the wages earned by the employee during the quarter.

(6) Special drywall industry rule.

(a) **Why have we changed the way you pay premiums?** Under Washington law (RCW 51.16.035), we are given the authority to establish how workers' compensation insurance rates are computed. For most industries, workers' compensation insurance rates are based on hours worked by employees. While the worker hour system works well for most industries, this method of paying premium can be unfair when a large segment of workers within an industry are not paid an hourly wage. The drywall industry is one in which many workers are paid on the basis of material installed, finished, stocked and/or scrapped (piece work), not the hours they work. To help remedy the problems caused by using work hours as the basis of how you pay premiums, and to provide greater fairness to employers engaged in drywall work, the premium for classifications 0524, 0526, 0527, 0528, 0529, 0530, 0531, 0532, 0533, and 0534 is based on material (square feet).

(b) **How can I qualify for a discounted rate?** For each drywall industry classification, we have established a second classification covering the same activity. The second classification carries a discounted rate. To qualify for a discounted classification and rate you are required to meet all of the following conditions:

(i) Prior to the end of the quarter that you want the discounted classifications and rates to be applied to your business, you must attend two workshops that we offer. For example, if you want the discounted classifications and rates to apply to your business for the third calendar quarter (July 1 through September 30), you must attend the two workshops by September 30. One workshop covers claims and risk management practices; the other workshop covers premium reporting and recordkeeping. The two workshops may be offered together or separately. Be sure to sign in so that you receive credit for attending the workshops.

(ii) You must provide us with a signed and completed voluntary release of information form that we will provide to you or your representative at the workshops. If we audit your account we will use this release form to obtain material and supply/purchase sales records from the material supply

dealer(s) you use. This will aid us as we verify the information you supply us on your premium and supplemental reports. If we need to verify the information that you supplied us, we will send you written notice before we contact your material supply dealer(s). We must receive this release form prior to the end of the quarter in which you want the discounted classifications and rates to become effective. For example, if you want the discounted classifications and rates to apply to your business for the third calendar quarter (July 1 through September 30), we must receive your signed and completed release of information form by September 30. You can complete the voluntary release form at the workshop and give it to our representative at the workshop or mail it to:

Labor and Industries
Employer Services - Drywall Manager
P.O. Box 44166
Olympia, Washington 98504-4166

(iii) You must submit complete and accurate premium reports when they are due and be current with all premium reports and payments. If you owe us money (premiums) for any quarter or period prior to December 31, 1996, we will allow you to report in the discounted classifications. To meet this condition you must file all reports required by this section when due; and if you have not paid premiums which were due for any quarterly report you submitted to us prior to and including the fourth quarter 1996 (October 1, through December 31, 1996), either pay the balance due immediately or maintain a current payment agreement with us for any past due premium. For purposes of this section, a "current payment agreement" is a written legal agreement which we have approved and entered into with you. This agreement will set forth your unpaid premium obligation, any applicable penalties and interest that must be paid, the amount of each installment (payment) and a schedule of payment due dates. If you fail to make any payment covered in a payment agreement you will lose the right to use the discounted classifications and rates. You will not be allowed to use a discounted classification or rate if you fail to submit reports, or make premium payments on time for any period beginning with the first quarter 1997. This requirement applies to any classification assigned to your business and for any exposure (hours, square feet, etc.) which occurs after January 1, 1997.

(iv) You must provide us with a supplemental quarterly report which shows by employee the employee's name and Social Security number, the wages you paid them during the quarter, the basis for how they are paid, (piece rate, commission, hourly, etc.) their rate of pay per unit/hour, and a notation as to whether they are an installer, finisher, scrapper, painter, etc. This report is to be attached to and submitted with your quarterly premium report.

(v) For any work which you subcontract to others, you must maintain the records described in WAC 296-17-31013.

(vi) You must keep and retain the payroll and employment records described in WAC 296-17-35201.

If you do not meet all of the above conditions, we will not assign the discounted rates to your business and you will be required to pay premiums in the nondiscounted classification(s).

(2001 Ed.)

(c) **Can I be disqualified from using the discounted rates?** Yes, as opposed to failing to qualify because you did not meet the conditions of (b) of this subsection, your business will be disqualified from using the discounted premium rates if:

- You do not file premium reports on time;
- You fail to pay premiums on time;
- You under report or misclassify the work performed by your employees;
- You fail to maintain the payments in a payment agreement you have entered into with us; or
- You fail to meet any other condition set forth in this rule.

(d) **How long will I be disqualified from using the discounted classifications?** If we disqualify your business from using the discounted classifications, the disqualification will be for three years (thirty-six months) from the period of last noncompliance.

(e) **I have several businesses. If one of my businesses is disqualified from using the discounted rates will that affect my other businesses?** Yes, if you have ownership interest in a business which has been disqualified from using the discounted rates, and you also have ownership interest in other construction businesses which have separate industrial insurance accounts or subaccounts, all businesses in which you have ownership interest will be disqualified from using the discounted rates. This includes a business which you own or owned that is in bankruptcy status and for which you have not entered into a payment agreement, if you owe us any money; or money that you owe us which we wrote off as an uncollectible debt.

(f) **If I make a mistake in how I reported to you, should I correct the error?** Yes, you should send in a revised report with an explanation of the error you are trying to correct. If we audit your business, and we determine that you have under reported exposure in any classification assigned to your business, all exposure which you reported in the discounted classifications for the audit period will be reclassified to the nondiscounted classifications.

(g) **If I disagree with an audit or other decision can I still use the discounted rates while we are resolving the issue?** Yes, if you are involved in a dispute with us over the status of an independent contractor, the issue being whether an individual is a covered worker; the proper classification of work your employees performed; or under reporting; you may qualify for the discounted classifications by paying the disputed amount while the issue is under dispute. In the event the issue is resolved in your favor we will refund any moneys which you paid which were disputed. We will not pay interest on the refunded amount. If you do not pay the audit balance or disputed amount when requested or do not post an equivalent bond, you will not be permitted to use any of the discounted classifications.

(h) **I am the owner of the business, and I do some of the work myself. Can I deduct the work I do from the total square feet to be reported to you?** Yes, as an owner of the business you can deduct the amount of work that you did from the total square feet which you are going to report to us.

(i) **How do I calculate and report this deduction to you?** To claim this deduction you must send us a report which shows by job, project, site or location the total amount of material that was installed or finished at that job, project, site or location; the amount of material which you, the owner, installed and/or finished at the job, project, site or location; the hours it took you to install and/or finish the material you are claiming deduction for; the total material installed and/or finished by employees at the job, project, site or location; and the hours the employees worked by job, project, site or location. This report must accompany the quarterly report in which you are claiming a deduction. If there are several owners, you must supply this information for each owner for whom you wish to claim a deduction.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-35203, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-35203, filed 8/28/98, effective 10/1/98.]

WAC 296-17-35204 Penalty assessments for employers who fail to register under Title 51 RCW. (1) Any employer who has failed to secure payment of compensation for their workers covered under this title will be liable, subject to RCW 51.48.010, to a maximum penalty in a sum of five hundred dollars or in a sum double the amount of premiums due for the four quarters prior to securing payment of compensation under this title, whichever is greater, for the benefit of the medical aid fund.

(2) If an injury or occupational disease is sustained by a worker of an employer who has failed to secure payment of compensation under this title that employer may also be liable for the cost of such an injury or occupational disease at the time the claim for benefits is accepted by the department.

For the purposes of this section only the cost of such claim will be determined as follows:

The case reserve value shall be determined by the nature of the injury or occupational disease, the part of the body affected and other factors which will impact the cost, including but not limited to, age, education and work experience. The case reserve value will include actual costs paid to date and estimated future claim costs. No further adjustments or evaluations of the cost of the claim will be made for the purposes of this subsection after assessment for the cost of an injury or occupational disease is made by the department.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-35204, filed 8/28/98, effective 10/1/98.]

WAC 296-17-501 Classification 0101.

0101-00 Land clearing: Highway, street and road construction, N.O.C.

Applies to contractors engaged in clearing right of ways for subsurface construction on a new or existing highway, street, or roadway project that is not covered by another classification (N.O.C.). The subsurface is the roadbed foundation consisting of dirt, sand, gravel and/or ballast which has been leveled and compressed. Unless the finished project is a compressed gravel road, the subsurface or sub base is constructed prior to any asphalt or concrete paving activities. Work contemplated by this classification involves the excavation of rocks and boulders, removal of tree stumps, clearing or scrap-

ing land of vegetation, grubbing, earth excavation, cut and fill work, and bringing the roadbed to grade. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as, but not limited to, shovels, scrapers, bulldozers, graders, rollers, and dump trucks.

This classification excludes asphalt surfacing or resurfacing on roadways which is to be reported separately in classification 0210; construction specialty services such as the installation of guardrails, lighting standards and striping which is to be reported separately in classification 0219; bridge or tunnel construction including the abutments and approaches which is to be reported separately in classification 0201; felling of trees which is to be reported separately in the applicable logging classification; and logging road construction which is to be reported separately in classification 6902.

0101-01 Land clearing: Airport landing strips, runways and taxi ways; alleys and parking lots

Applies to contractors primarily engaged in clearing right of ways for subsurface construction on a new or existing airport landing strip, runway, and taxi way. This classification also includes clearing of right of ways for alley and parking lot projects. The subsurface is the foundation consisting of dirt, sand, gravel and/or ballast which has been leveled and compressed. Unless the finished project is compressed gravel, the subsurface or sub base is constructed prior to any asphalt or concrete paving activities. Work contemplated by this classification involves the excavation of rocks and boulders, removal of tree stumps, clearing or scraping land of vegetation, grubbing, earth excavation, cut and fill work, and bringing the roadbed or project site to grade. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as, but not limited to, shovels, scrapers, bulldozers, graders, rollers, and dump trucks.

This classification excludes asphalt surfacing or resurfacing on roadways which is to be reported separately in classification 0210; construction specialty services such as the installation of guardrails, lighting standards and striping which is to be reported separately in classification 0219; and felling of trees which is to be reported separately in the applicable logging classification.

0101-02 Excavation work, N.O.C.

Applies to contractors engaged in general excavation work for others that is not covered by another classification (N.O.C.). Work contemplated by this classification involves excavating or digging of earth to form the foundation hole such as for a wood-frame or nonwood-frame building and side sewer hookups (street to house) when performed as part of the excavation contract. Activities include, but are not limited to, excavation of rocks and boulders, removal of tree stumps, clearing or scraping land of vegetation, grubbing, piling or pushing of earth, earth excavation, cut and fill work, backfilling, etc. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as, but not limited to, shovels, scrapers, bulldozers, graders and dump trucks.

This classification excludes asphalt surfacing or resurfacing on roadways which is to be reported separately in clas-

sification 0210 and felling of trees which is to be reported separately in the applicable logging classification.

0101-03 Grading work, N.O.C.

Applies to contractors engaged in various forms of grading work for others that are not covered by another classification (N.O.C.). Typical equipment used is a grader, but other equipment such as a bulldozer and a front end loader may also be used. Work contemplated by this classification includes, but is not limited to, leveling and grading lands, spreading dirt, sand, gravel and/or ballast to desired contour on farm lands or other tracts of land.

0101-04 Land clearing, N.O.C.

Applies to contractors engaged in general land clearing work that is not covered by another classification (N.O.C.). This classification includes, but is not limited to, excavation of rocks and boulders, removal of tree stumps, clearing or scraping land of vegetation, grubbing, piling or pushing of earth to rearrange the terrain, earth excavation, cut and fill work, backfilling, and slope grooming. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as, but not limited to, shovels, scrapers, bulldozers, graders and dump trucks.

This classification excludes felling of trees which is to be reported separately in the applicable logging classification.

0101-16 Railroad line: Construction, maintenance and repair, N.O.C.

Applies to contractors engaged in the construction, maintenance and repair of railroad tracks not covered by another classification (N.O.C.), including the dismantling of track and the sale of salvaged track metal and ties. Work contemplated by this classification includes all operations on new or existing main lines, side tracks and spurs to industrial properties. This classification includes, but is not limited to, the laying of rock or ballast, laying of ties and track, installation of crossover frogs and switches, erection of switch stands and switch mechanism, erection of cattle guards, the placing of grade crossing planks, and similar activities related to the laying or relaying of railroad lines and also includes the dismantling of railroad main lines, side tracks and spurs to include track, ties, etc., and the subsequent storage and sale of salvaged material after the railroad line is dismantled.

This classification excludes asphalt surfacing/resurfacing and all concrete construction work which is to be reported separately in the applicable asphalt or concrete construction classification; logging railroad construction which is to be reported separately in classification 6902; and the construction, maintenance, or repair of an elevated railway which is to be reported separately in classification 0508.

0101-17 Retaining wall: Construction or repair when done in connection with road, street and highway construction, N.O.C.

Applies to contractors engaged in the construction or repair of retaining walls in connection with highway, street, or roadway projects that are not covered by another classification (N.O.C.). Retaining walls are often constructed to protect against potential problems such as earth slides or erosion of banks alongside a roadway or overpass. Work con-

templated by this classification involves large scale excavation to contour a specific area of earth serving as a retaining wall. Activities include, but are not limited to, excavation, clearing, cut and fill work, backfilling, grading and slope grooming. Fill material used may include dirt, sand, stone or boulder. Equipment used by contractors subject to this classification includes, but is not limited to, scrapers, bulldozers, graders, backhoes and dump trucks.

This classification excludes asphalt surfacing or resurfacing on roadways which is to be reported separately in classification 0210; concrete construction which is to be reported separately in the applicable concrete construction classification; construction specialty services such as the installation of guardrails, lighting standards and striping which is to be reported separately in classification 0219; bridge or tunnel construction including the abutments and approaches which is to be reported separately in classification 0201; felling of trees by chain saw which is to be reported separately in classification 5001; logging road construction which is to be reported separately in classification 6902; and tunnels and approaches including lining, cofferdam work, shaft sinking and well digging with caissons which is to be reported separately in classification 0201.

0101-36 Tree care and pruning services, N.O.C.

Applies to specialist contractors engaged in providing a variety of tree care services such as tree topping and tree pruning that are not covered by another classification (N.O.C.). Work contemplated by this classification generally takes place in residential areas, parking lots, business parks, shopping malls, or settings adjacent to nonforestry or timberland roadways. A primary purpose of this work is to remove tree or branch hazards from power lines, structures, or buildings. This classification includes, but is not limited to, incidental ground operations such as picking up branches and limbs, operating mobile chip machines used in connection with a tree care service, spraying or fumigating of trees, debris removal and stump removal when conducted by employees of an employer subject to this classification.

This classification excludes tree care services done in connection with an orchard operation which is to be reported separately in classification 4803 when performed by orchard employees; tree care services done in connection with a nursery operation which is to be reported separately in classification 4805; tree care services done in connection with a public or private forest or timberland which is to be reported separately in classification 5004; tree care services done in connection with a Christmas tree farm operation which is to be reported separately in classification 7307; and felling trees which is to be reported separately in classification 5001.

0101-37 Soil remediation

Applies to establishments engaged in various types of remediation of soil contaminated with hazardous or toxic materials. Soil remediation can take place at the site of the contamination, or the contaminated soil may be hauled to another area for remediation. This classification also includes oil spill cleanup on land. Equipment used will include backhoes and front end loaders, as well as other types of dirt moving equipment.

The methods used for soil remediation include, but are not limited to:

- Bio-remediation: Contaminated soil is mixed with nutrients, sawdust, and various other additives. Naturally occurring bacteria in the soil break down the pollutants.

- Encapsulation: Contaminated soil is enclosed in some type of protective material to prevent drainage into surrounding soil.

- Excavation and hauling to an approved disposal site.

- Hot air vapor extraction: A burner unit is mounted on a trailer. Contaminated soil is arranged in layers on which an aluminum perforated pipe system is placed at 2' intervals, with a return pipe on the top layer. The soil stack is enclosed in visqueen, then hot air is pumped into the piping system which creates the steam that is recycled through the system and carries the contaminants back through the catalytic burner. Because of the catalytic action there are virtually no contaminants exhausted into the atmosphere.

- Soil vapor extraction: A series of holes are bored in the ground and vacuum pumps are used to suck the trapped gases which are drawn through carbon filters for decontamination.

- In situ vitrification: Graphite electrodes are fed into contaminated soil at a specified rate, where high voltage "melts" the organic and inorganic materials in the soil and forms a solid, glasslike substance.

- Land farming: Contaminated soil is deposited and spread out by a farm type spreader on an area of ground dedicated for this purpose. Chemical or manure fertilizer is added to provide a medium for naturally occurring bacteria to thrive. (This part is similar to bio-remediation.) The soil is turned frequently by tillers or rototillers to assist in the aeration of the soil and in the growth of the bacteria. It may take anywhere from a month to two years to cleanse the soil, depending on the volatility of the contaminants. This method is used particularly with soil that is heavily contaminated with oil.

- Mobile incineration: Contaminated soil is loaded onto a conveyor belt which carries it into the hopper of a mobile unit mounted on a lowboy trailer. The unit is heated to burn off the contaminants in the soil. The mobile unit contains a type of dust-collecting mechanism which filters out gases and other undesirable elements so only clean air enters the atmosphere as the refreshed soil is produced. There are various methods of mobile incineration, but the general process and the end result are similar.

- Thermal disabsorption: A process similar to mobile incineration.

- Stabilization: Concrete landfill cells are created by mixing cement with refuse or other contaminated soil to stabilize the material and reduce the seepage into the surrounding soil.

This classification excludes oil spill cleanup involving diking or ditching work which is to be reported separately in classification 0201.

0101-39 Pool or pond excavation

Placement of pool or pond liners

Applies to contractors engaged in the excavation of pools or ponds. Work contemplated by this classification involves excavating or digging of earth to form the hole such

as for a swimming pool or pond. Work contemplated by this classification includes excavation of rocks and boulders, removal of tree stumps, clearing or scraping land of vegetation, grubbing, piling or pushing of earth, earth excavation, cutting, filling or backfilling, etc. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as, but not limited to, shovels, bulldozers, backhoes and dump trucks. This classification includes the placement of plastic pool and pond liners provided it is not in connection with concrete work.

This classification excludes concrete construction which is to be reported separately in the applicable concrete construction classification.

0101-40 Mowing or chemical spraying of roadway median strips, roadsides, and/or power line right of ways

Applies to contractors engaged in mowing, grooming, picking up litter, and chemical spraying of roadway median strips and edges, roadsides, and power line right of ways. Work contemplated by this classification includes spraying chemicals to control weeds and unwanted vegetation, tall grass, brush, brambles and tree seedlings as part of a roadway, roadside or right of way maintenance contract. Equipment used by contractors subject to this classification includes, but is not limited to, a variety of equipment such as backhoes, tractors, push mowers, brush mowers, weed eaters, as well as hand tools such as machetes, sickles, and pruners.

This classification excludes mowing and/or grooming of roadway median strips, roadsides, and power line right of ways when performed by employees of cities, counties, state agencies, or other municipalities which is to be reported in the classification applicable to the type of municipality performing the work; forest, timber or range land contract work which is to be reported separately in the classification applicable to the work being performed; and the felling and removal of trees by chain saw which is to be reported separately in classification 5001.

Special note: Classification 0301, "landscape construction," and classification 0308, "landscape maintenance," are not to be assigned to mowing and/or grooming of roadway median strips, roadsides, and power line right of ways.

[Statutory Authority: RCW 51.16.035, 51.04.020. 00-14-052, § 296-17-501, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-501, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-501, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-501, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-501, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-501, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-17-501, filed 11/30/79, effective 1/1/80; Order 76-36, § 296-17-501, filed 11/30/76; Order 75-38, § 296-17-501, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-501, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-501, filed 11/9/73, effective 1/1/74.]

WAC 296-17-503 Classification 0103.

0103-09 Drilling or blasting: N.O.C.

Applies to contractors engaged in drilling operations for others not covered by another classification (N.O.C.). Work contemplated by this classification includes, but is not limited to, well drilling for oil, gas or water; exploratory well

drilling; and drilling of holes in rock for shot holes. Such drilling generally contemplates the digging of a hole using a rotating or pounding type tool. Equipment used by drilling contractors includes earth auger drills, jackhammers, drilling rigs, and bits which will vary in size depending upon the terrain or material to be drilled and the depth and size of holes to be drilled. This classification also includes blasting operations not covered by another classification (such as the blasting of rock in connection with highway, street or road construction).

This classification excludes drilling operations performed in connection with concrete or building construction which is to be reported separately in the construction classification applicable for the work being performed; drilling done in connection with all types of underground or surface mining and quarry operations which is to be reported separately in the applicable mining classification; and blasting performed as part of building demolition which is to be reported separately in classification 0506.

0103-10 Geophysical exploration: Seismic detection of the mechanical properties of the earth

Applies to establishments engaged in geophysical exploration, by seismic detection, of the earth's subsurface. Work contemplated by this classification involves a seismograph work crew consisting of a party chief, a permit person, a surveyor, drillers, shooters, observers and a computer analyst. The seismic method utilizes a dynamite blast that simulates a miniature earthquake. The recorder of the vibrations is the sensitive earthquake detector which records the intense vibrations on a rapidly moving tape. The data collected from the tapes and photographic records are interpreted and a contour map of the rocks and their foundation to depths of several thousand feet is developed.

This classification excludes geophysical exploration without seismic detection which is to be reported separately in classification 1007.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-503, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-503, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-503, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-503, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-503, filed 11/30/83, effective 1/1/84; Order 74-40, § 296-17-503, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-503, filed 11/9/73, effective 1/1/74.]

WAC 296-17-504 Classification 0104.

0104-12 Dredging, N.O.C.

Applies to contractors engaged in providing dredging services to others that are not covered by another classification (N.O.C.). Work contemplated by this classification includes cleaning, deepening or widening a body of water such as a harbor or other waterway. Scooping or suction machinery is generally employed in the dredging process to remove sand, clay, mud or other material from the body of water that is being dredged.

This classification excludes diving operations which are to be reported separately in classification 0202; underground mining operations which are to be reported separately in classification 1702; and dredging for the production of sand,

gravel, or shale which is to be reported separately in classification 0112.

Special note: Dredging projects could occur on or adjacent to navigable waters (a harbor, river, canal) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform the work activities from a vessel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick or dredge, or type of pontoon which is a flat bottom boat or portable float. Workers who perform the work activities from the shoreline or from adjacent areas such as an existing dock or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Usually, dredging projects involve a variety of types of work crews such as those working from a floating derrick or dredge, a pontoon, a shoreline dredge, workers who are on shore distributing the discharged material, as well as the maintenance and repair of the dredge and equipment. Care should be exercised prior to assignment of this classification as the workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-504, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-504, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-504, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-504, filed 11/9/73, effective 1/1/74.]

WAC 296-17-505 Classification 0105.

0105-13 Fence erection or repair: N.O.C.; parking meter installation; and placement of wire mesh on slopes for slope protection

Applies to contractors engaged in the erection and repair of all types of metal, wood, plastic, or vinyl fences not covered by another classification (N.O.C.). Work contemplated by this classification includes the use of a tractor with a propelled auger, or a mechanical or manual post hole digger. The poles or posts are set in the ground with small quantities of sand, gravel or concrete. Occasionally, a fence contractor may pour a concrete footing around the perimeter of the fence to be constructed. Work of this nature, when done in connection with a fence construction project, is included within the scope of this classification. This classification also includes the installation or removal of entire parking meter units, and the placement of wire mesh on slopes for slope protection.

This classification excludes contractors engaged in the erection or repair of brick, masonry or stone fences or planters which are to be reported separately in classification 0302; erection or repair of concrete fences or planters which are to be reported separately in classification 0217; and service or repair of parking meters which is to be reported separately in classification 0606.

Special note: It is common for contractors subject to this classification to sell kennel kits, fence repair parts and fence

ing materials. Sales of fencing materials by a fence contractor are included in classification 0105. Classifications 2009, 6309 or similar store classifications are not to be assigned to a contracting business.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-505, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-505, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-505, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.16.035, 87-24-060 (Order 87-26), § 296-17-505, filed 12/1/87, effective 1/1/88; 87-12-032 (Order 87-12), § 296-17-505, filed 5/29/87, effective 7/1/87; 86-12-041 (Order 86-18), § 296-17-505, filed 5/30/86, effective 7/1/86; 85-24-032 (Order 85-33), § 296-17-505, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-505, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-505, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-505, filed 11/9/73, effective 1/1/74.]

WAC 296-17-50601 Classification 0107.

0107-00 Utility line construction: Underground, N.O.C.

Applies to contractors engaged in underground utility line or cable construction that is not covered by another classification (N.O.C.). Work contemplated by this classification includes the installation and maintenance of underground television cable, power, and telephone line including main, extension, and outside service connection lines. Installation of these types of utilities usually occurs at a depth of 3' or less. This classification includes digging narrow trenches, laying pipe or conduit, laying line or cable, and filling or backfilling trenches. In some instances automatic equipment is used which in one operation opens the trench, lays the line and backfills. Equipment used by contractors subject to this classification includes backhoes, mechanical or manual trench diggers, automatic equipment and dump trucks.

This classification excludes land or road clearing and excavation which is to be reported separately in classification 0101; overhead television, power, or telephone lines including poles or towers which are to be reported separately in classification 0509 or the applicable utility company classification; asphalt surfacing/resurfacing which is to be reported separately in classification 0210 or 0212; concrete construction which is to be reported separately in the applicable concrete construction classification(s); and construction specialty services including the installation of guardrails, lighting standards and striping which is to be reported separately in classification 0219.

0107-01 Pipelaying, N.O.C.

Applies to contractors engaged in underground pipelaying or pipeline construction not covered by another classification (N.O.C.). Work contemplated by this classification includes the installation and maintenance of underground gas, oil or water main construction, and other pipelines such as those extending cross country. Installation of these types of pipes usually occurs at a depth of approximately 3'. This classification includes digging narrow trenches, laying pipe, making connections, and filling or backfilling trenches. This classification includes machinery and equipment such as backhoes, mechanical or manual trench diggers, and dump trucks.

This classification excludes land or road clearing and excavation which is to be reported separately in classification 0101; construction of sewer lines and drainage systems,

canals, ditches, underground tanks generally occurring at a depth greater than 3' which are to be reported separately in classification 0108; asphalt surfacing/resurfacing which is to be reported separately in classification 0210 or 0212 as applicable; concrete construction which is to be reported separately in the applicable concrete construction classification(s); and construction specialty services such as the installation of guardrails, lighting standards and striping which is to be reported separately in classification 0219.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-50601, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-50601, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-50601, filed 5/31/93, effective 7/1/93; 89-24-051 (Order 89-22), § 296-17-50601, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-50601, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-50601, filed 11/30/83, effective 1/1/84; 80-17-016 (Order 80-23), § 296-17-50601, filed 11/13/80, effective 1/1/81. Statutory Authority: RCW 51.04.030 and 51.16.035, 79-12-086 (Order 79-18), § 296-17-50601, filed 11/30/79, effective 1/1/80.]

WAC 296-17-50602 Classification 0108.

0108-00 Ditches and canals, N.O.C.

Applies to contractors engaged in the construction of ditches and canals not covered by another classification (N.O.C.). A ditch or canal consists of a long trench dug in the ground that will remain uncovered to serve as an artificial waterway or artificially improved river such as for irrigation, drainage, or a boundary line. Work contemplated by this classification includes digging of main irrigation canals or drainage ditches and all laterals extending from the canal or ditch, installation of pipe, making connections as needed, and filling or backfilling as needed. Equipment used by contractors subject to this classification includes a variety of machinery and equipment such as power shovels, backhoes, bulldozers, dump trucks, and mechanical or hand tool trench diggers.

This classification excludes asphalt surfacing/resurfacing which is to be reported separately in classification 0210 or 0212, and concrete construction which is to be reported separately in the applicable concrete construction classification(s).

0108-01 Sewer construction; septic tank installation

Applies to contractors engaged in the construction or repair of new or existing sewer lines and systems. This includes, but is not limited to, sewers, cesspools, drainpools, storm drains, and septic tanks including the drainfield construction. Work contemplated by this classification includes the installation and maintenance of all types of storm, sanitary or sewage lines and systems. Installation of these types of pipelines and systems occur entirely, or in part, at a depth greater than 3'. This classification includes such activities as excavation, trench digging, leveling trench with fill material such as sand or gravel, filling or backfilling, installation of force main type sewage work, the installation of storm sewer lines including the outfall construction of drain concrete boxes, catch basins, manholes, handling and laying of pipe (regardless of the size of pipe or depth below the ground), making connections, etc. Equipment used by contractors subject to this classification includes a variety of machinery

and equipment such as power shovels, backhoes, bulldozers, dump trucks, and mechanical or manual trench diggers.

This classification excludes side sewer hookups (street to house) when performed by a plumbing contractor as part of a plumbing contract which is to be reported separately in classification 0306; and sewer pipe cleaning including services engaged in line cleaning and unplugging of waste lines which is to be reported separately in classification 0306.

0108-02 Tanks, N.O.C. - underground: Installation, repair, or removal

Applies to contractors engaged in the installation, repair or removal of underground tanks not covered by another classification (N.O.C.) such as those used to store gas or oil. Activities include excavating or digging of holes, placement or removal of tank, and filling or backfilling. This classification makes no distinction as to the size of tank being placed or removed. Usually, the actual lifting into or out of the ground occurs with the use of a power shovel, front end loader or backhoe. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as power shovels, front end loaders, backhoes, bulldozers, and dump trucks.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-50602, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 94-12-063, § 296-17-50602, filed 5/30/94, effective 6/30/94; 93-12-093, § 296-17-50602, filed 5/31/93, effective 7/1/93; 89-24-051 (Order 89-22), § 296-17-50602, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-50602, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-50602, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-50602, filed 11/29/82, effective 1/1/83; 80-17-016 (Order 80-23), § 296-17-50602, filed 11/13/80, effective 1/1/81. Statutory Authority: RCW 51.04.030 and 51.16.035, 79-12-086 (Order 79-18), § 296-17-50602, filed 11/30/79, effective 1/1/80.]

WAC 296-17-50603 Classification 0112.

0112-00 Commercial production of sand, gravel, clay and stone products

Applies to establishments engaged in the production of sand, gravel, clay and stone products. Material may be excavated in an open or surface type pit at the production site, or from a mine or quarry operation. Sand, gravel and stone is washed, crushed, sorted, graded and screened. Sand or gravel in its natural state usually requires only screening with the larger stones being removed. The larger stones are crushed and rescreened. Clay is screened and graded. Refined products are stored in bins, hoppers, piles or yards prior to delivery by truck or rail to customers. This classification includes dealers who stockpile or store products in a yard type of environment prior to delivery to the customers when done in connection with the production of such products. Equipment includes, but is not limited to, scrapers, shovels, front end loaders, trucks, conveyors, jaw crushers, gyrators, roll crushers, and shaking tables.

This classification excludes establishments engaged in selling custom soil mixes, bark, decorative rock, sand, or gravel purchased from others which are to be reported separately in classification 1103.

Special note: Classifications 0112 and 1103 are not to be assigned to the same business unless all the conditions of the

(2001 Ed.)

general reporting rule covering the operation of a secondary business have been met.

0112-01 Humus or peat digging

Applies to establishments engaged in the digging or stripping of humus or peat. Humus is a brown or black organic substance consisting of decayed vegetable matter that provides nutrients for plants and increases the water retention of soil. Peat is a partially carbonized vegetable matter found in bogs and used as fertilizer and fuel. Work contemplated by this classification involves stripping material from the surface or bogs with mechanical equipment such as, but not limited to, power shovels, scrapers, drag lines, clamshell diggers or cranes, and hydraulic dredges. The material is conveyed from the pit or bog to hoppers by trucks or belt conveyors. At times it is necessary to grade, screen and dry the material prior to storage or delivery to customers. This classification includes dealers who stockpile or store material in a yard type of environment prior to delivery to customers when done in connection with the digging or stripping of such products.

Special note: Classifications 0112 and 1103 are not to be assigned to the same business unless all of the conditions of the general reporting rule covering the operation of a secondary business have been met.

0112-02 Pit, crusher and bunker operations in connection with road, street and highway construction

Applies to establishments engaged in pit, crusher and bunker operations in connection with highway, street or roadway construction projects. Generally, this type of operation is located in close proximity to the project site and is only set up for the duration of the project. Work contemplated by this classification includes excavating open or surface pits, scraping or stripping the surface, crushing, and bunker (storage) of material. Products extracted from the pit or surface include boulders, stone, rock, gravel, aggregate, sand, dirt or clay. These products can be used directly without any further refinements or could be washed, sorted, crushed and/or screened. Products are stored in bunkers or piles until needed. These products are used in a variety of ways as part of the roadway project such as, but not limited to, making preliminary roads into an area, filling in low or uneven areas, use as natural barriers, and bringing the roadbed and surrounding areas to grade. Equipment includes, but is not limited to, power shovels, scrapers, bulldozers, front end loaders and other earth moving equipment, trucks, conveyors, jaw crushers, gyrators, roll crushers, shaking tables, etc.

Special note: This classification excludes contractors that maintain a temporary pit, crusher or bunker operation when performed by a contractor engaged in additional phases of the same road, street or highway construction project which is to be reported separately in classification 0101.

0112-03 Sand, gravel, or shale: Digging, N.O.C.

Applies to establishments engaged in the digging or dredging of sand, gravel or shale that is not covered by another classification (N.O.C.). The material is excavated from surface pits with mechanical equipment such as power shovels, drag lines, clamshell diggers or cranes, or obtained from nonnavigable waters by means of hydraulic dredges, clamshell dredges, etc. The material is conveyed from the

bank, pit or dredge to hoppers by trucks, belt conveyors, narrow gauge railroads or pipelines. It is then washed, graded, screened and stored in bins, hoppers, or piles prior to delivery by truck or rail to customers. Sand or gravel in its natural state usually requires only screening with the larger stones being removed. In some instances, the larger stones may be crushed and rescreened which is included in this classification. This classification includes dealers who stockpile or store material in a yard type of environment prior to delivery to customers when done in connection with the digging or stripping of such products.

This classification excludes underground mining operations which are to be reported separately in classification 1702.

Special note: Classifications 0112 and 1103 are not to be assigned to the same account unless all the conditions of the general reporting rule covering the operation of a secondary business have been met.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-50603, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-50603, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-50603, filed 5/31/96, effective 7/1/96.]

WAC 296-17-508 Classification 0201.

0201-01 Bridge, trestle, overhead crossing and viaduct: Construction, maintenance and repair

Applies to contractors engaged in the construction, maintenance or repair of bridges, trestles, overhead crossings and viaducts including the foundations and approaches. These types of structures provide a series of spans or arches, or a type of vertical and horizontal framework for a road or railroad passage over an obstacle such as a waterway, wide valley, other roads, or railroads. Work contemplated by this classification includes the construction of approaches, abutments, foundation supports, framework, and includes all concrete, iron or steel, timber, or carpentry work to completion of the project. The approach is the area of ground or roadway built up just before entering onto a structure such as a bridge or trestle. The abutments are the reinforced foundation supports at the end of the approach which will bear much of the weight for the structure. The erection of the structure usually begins at both ends of the approaches and abutments and gradually continues toward the center of the structure. This classification includes activities such as, but not limited to, the placement and securing of piles, beams and members by way of boom or crane, forming columns, piers and supports, tying reinforcing steel, set-up and tear down of forms, pouring and finishing of concrete, installing precast deck supports, decking slabs and nonstructural members, constructing the retaining walls, erecting iron railings, and the installation of suspension cables and cable clamps. This classification also includes shaft sinking, pile driving, caisson and cofferdam work as it is considered an integral part of the structure's foundation and support.

This classification excludes asphalt surfacing/resurfacing on roadways which is to be reported separately in classification 0210 and concrete paving which is to be reported separately in classification 0214.

Special note: Care should be exercised prior to assignment of this classification as the workers could be subject to

federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act. A detailed description of these acts can be found in classifications 0104 or 0202.

0201-04 Breakwater, jetty, levee: Construction, maintenance and repair

Applies to contractors engaged in the construction, maintenance or repair of a jetty, levee or breakwater. These types of barriers or embankments are very similar to a dike, but involve substantially more construction in that they usually begin away from the water and extend into a body of water and are sometimes used as protection for a harbor to prevent adverse currents from interfering with shipping. Work contemplated by this classification involves building, protecting and/or filling in an embankment or barrier of a river, harbor or other body of water. The predominant activity involves earth moving or placing of fill or other material. This classification includes, but is not limited to, clearing of land, excavation, filling, and grading and involves earth moving equipment such as, but not limited to, drag lines, graders, scrapers, bulldozers, and dump trucks. Materials include, but are not limited to, dirt, sand, stones or boulders, concrete piles, timber or heavy timber cribbing filled with stones or boulders. Often, the barrier or embankment being built is seeded or paved in part with asphalt, concrete, soil, or cement to assist in strengthening the structure.

This classification excludes pile driving operations in connection with jetty, levee and breakwater operations which are to be reported separately in classification 0202, and asphalt surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed.

Special note: Care should be exercised prior to assignment of this classification as the workers could be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act. A detailed description of these acts can be found in classifications 0104 or 0202.

0201-05 Bulkhead retaining walls: Construction, maintenance and repair, riprapping - all water hazard

Applies to contractors engaged in the construction, maintenance or repair of a bulkhead. A bulkhead is a wall or embankment constructed to protect against potential problems such as earth slides, erosion of banks alongside water, or excessive increases in the water level. Work contemplated by this classification involves building, protecting and/or filling in a wall or embankment of a river, harbor or other body of water, or other areas of land. The predominant activity involves earth moving or placing of fill or other material. This classification includes, but is not limited to, clearing of land, excavation, filling, and grading. Equipment used by contractors subject to this classification includes, but is not limited to, drag lines, graders, scrapers, bulldozers, and dump trucks. Materials include, but are not limited to, dirt, sand, stones, boulders, concrete piles, timber or heavy timber cribbing filled with stones or boulders. Often, the wall or embankment being built, or if it already exists, is seeded or paved in part with asphalt, concrete, cement, or soil to assist in strengthening the structure. This classification includes riprap work which is a loose assemblage of broken stones erected in water or on soft ground. Such stone serves as a fill-

in material to assist with the building of a dike, levee, or bulkhead.

This classification excludes pile driving operations in connection with bulkhead construction operations which is to be reported separately in classification 0202, and asphalt surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed.

Special note: Care should be exercised prior to assignment of this classification as the workers could be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act. A detailed description of these acts can be found in classifications 0104 or 0202.

0201-06 Concrete culverts; aluminum, steel, or other types of culverts over 12 feet

Applies to contractors engaged in the construction or placement of concrete culverts or other types of culverts greater than twelve feet in diameter. A culvert is a sewer or drain running under a road, embankment, or structure such as a bridge. Culverts can be made of material such as, but not limited to, concrete, aluminum, and galvanized steel. Their primary purpose is to channel excess water away from the road, embankment, or structure to assist in preventing water damage or flooding. Work contemplated by this classification includes excavation, laying of sand or gravel, placement of culverts, and filling in the site.

0201-08 Tunnels and approaches

Applies to contractors engaged in the construction of tunnels and approaches including the lining, cofferdam work, shaft sinking, and well digging with caissons. A tunnel is a passage through or under a barrier to be used as a roadway, railway or pedestrian walkway. The approach is the area of ground built up before the entrance of a tunnel or similar type of structure. Work contemplated by this classification includes, but is not limited to, the construction of approaches, shaft sinking, caisson and cofferdam work, boring, the framework or lining, and all concrete, iron or steel, timber, and carpentry work to completion of the project. In some instances, the initial phase of a tunnel project may require that the approaches and abutments be put in place. This may involve extensive excavation and fill work depending on how uneven the terrain is with the proposed tunnel entrances. The abutments are the reinforced foundation supports at the end of the approach and will bear much of the weight at the tunnel entrances. Most often, the abutments will consist of metal beams or concrete with reinforced steel, that are placed vertically, horizontally or at an angle into the ground. The boring of the tunnel may include the removal of earth, rock and water with mechanical equipment, drilling and boring machines, rock drills and chippers, explosives, well drilling with caissons, and the need for pumps and drains piped to the outside of the bore. Occasionally, a cofferdam is erected which is a temporary structure from which water can be pumped or sucked to provide a dry work area during construction of the structure. Once the structural support is complete, the cofferdam is taken apart and removed. As the bore progresses steel I-beams are placed and horizontal beams or solid bar stock are bolted or welded for support. Shielding the bore between the I-beams requires bolting or welding steel plates to the beams. This is followed by filling the gaps

between the face of the bore and the shielding with sand or concrete grout. Some tunnels will then be lined with concrete, steel or tile, and lighting, ventilation and drains may be installed.

This classification excludes underground mining operations which are to be reported separately in classification 1702, and asphalt surfacing/resurfacing or concrete paving which is to be reported separately in the classification applicable to the work being performed.

0201-09 Diking, N.O.C.

Applies to contractors engaged in the construction of dikes not covered by another classification (N.O.C.). A dike is a type of protective barrier or embankment which keeps a body of water such as a river in its proper channel and prevents the erosion of banks. Work contemplated by this classification involves building up and/or protecting the embankment. This classification includes, but is not limited to, earth moving work, assemblage of loose stone or rock, placement of sandbags or concrete piles, fill dirt or broken pieces of concrete, or building of crib work which may be filled in with stone or other types of fill. This classification also applies to diking or ditching work in connection with oil spill clean-up such as alongside a river bank or other shoreline.

This classification excludes pile driving operations which are to be reported separately in classification 0202.

Special note: Care should be exercised prior to assignment of this classification as the workers could be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act. A detailed description of these acts can be found in classifications 0104 or 0202.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-508, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-508, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-508, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-508, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-508, filed 11/9/73, effective 1/1/74.]

WAC 296-17-509 Classification 0202.

0202-02 Pile driving - wood or concrete piling construction

Applies to contractors engaged in pile driving and piling construction. Pile driving involves long sturdy posts or columns of timber, steel, or concrete being driven into the earth as a foundation or support for a structure such as a building, pier or wharf. This type of activity usually occurs when a portion of the structure is going to be under water, in mud, at a site where the ground is soft or unstable, or when the structure is expected to be of extraordinary weight. Work contemplated by this classification includes driving wood or steel beams, driving concrete columns, shaft sinking or caisson work, stacking of concrete piles, erection of a cofferdam, and includes all cross beaming, decking, and similar carpentry incidental to, and connected with, pile driving operations as part of the foundation construction project. Shaft sinking is removal of earth from a hole with a relatively small diameter and usually at a considerable depth. The cofferdam is a temporary structure from which water can be pumped or sucked to provide a dry work area during construction of the foundation or substructure. Once the foundation support is complete, the cofferdam is taken apart and removed.

This classification excludes diving operations or activities which are to be reported separately in classification 0202-04.

Special note: Pile driving projects could occur on or adjacent to navigable waters (harbors, rivers, canals) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform the work activities from on board a vessel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick, pile driver or dredge, a barge, or a pontoon (which is a flat bottom boat) or portable float. Workers who perform the work activities from the shoreline or from adjacent areas such as an existing dock, pier, or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Usually, pile driving projects involve a variety of types of work crews such as those working from a floating derrick or pile driver, a barge, a pontoon, a shoreline pile crew, workers inside the cofferdam, as well as the maintenance and repair of the construction material or equipment. Care should be exercised prior to assignment of this classification as the workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

0202-03 Wharf, pier, dock and marine railway: Construction, maintenance and repair

Applies to contractors engaged in the construction, maintenance or repair of piers, wharves, docks and marine railways. A pier or wharf is a platform extending from a shore over water and supported by piles or pillars. A dock is the area between two piers or alongside a pier or wharf. These types of platforms are for vessels to tie up and provide an area for loading, unloading, or repairing vessels. Most often, the construction of such platforms will include the foundation or substructure being under water or mud, and the remainder of the platform being exposed above the water or mud. Work contemplated by this classification includes, but is not limited to, construction of the foundation or substructure which consists of shaft sinking, pile driving, stacking of piles and/or erection of a cofferdam, and includes all concrete, steel or carpentry work after the foundation or substructure is built to completion of the project. Shaft sinking involves the removal of earth from a hole with a relatively small diameter and usually at a considerable depth. Pile driving involves long sturdy posts or columns of timber, steel, or concrete being driven into the earth as a foundation or support for the structure. The cofferdam is a temporary structure from which water can be pumped or sucked to provide a dry work area during construction of the foundation or substructure. Once the foundation support is complete, the cofferdam is taken apart and removed. This classification also includes caisson work as part of the construction for the foundation or substructure support.

This classification excludes diving operations or activities which are to be reported separately in classification 0202-04.

Special note: The construction of piers, wharves, docks and marine railways could occur on or adjacent to navigable waters (harbors, rivers, canals) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform the work activities from on board a vessel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick, floating barge, a pontoon (which is a flat bottom boat) or portable float. Workers who perform the work activities from the shoreline or from adjacent areas such as an existing dock, pier, or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Usually, these types of projects involve a variety of work crews such as those working from a floating derrick or barge, a pontoon, a shoreline pile crew, workers inside the cofferdam, as well as the maintenance and repair of the construction material or equipment. Care should be exercised prior to assignment of this classification as the workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

0202-04 Diving operations and subaqueous work, N.O.C.

Applies to establishments engaged in diving operations not covered by another classification (N.O.C.). Diving operations such as underwater diving, skin diving or scuba diving are performed in numerous types of uncontrolled environments such as the ocean, harbors, bays, dams, lakes, as well as controlled environments such as swimming pools or aquarium tanks. Work contemplated by this classification includes, but is not limited to, marine salvage and wreckage, underwater mining and sweeping, underwater construction or demolition, installation, repair and/or inspection of wharves, piers, and docks, inspection of ships, barges, and other vessels, subaqueous harvesting of geoduck, sea cucumbers, or similar marine life, underwater exploration, as well as diving instruction. Classification 0202 includes all diving activities with the following exception: Diving instructors who provide instructional lessons in a controlled environment such as a swimming pool may be reported separately in classification 6209 provided accurate time records are maintained for the instructional lesson hours. Failure to maintain accurate time records will result in the hours in question being assigned to classification 0202 without a division of hours between the two classifications.

Special note: Many diving operations and activities occur on or adjacent to navigable waters (a harbor, river, canal, dam, lake) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform diving activities (to include divers, deck hands, or "diving tenders" who are support personnel such as line handlers and pump persons) from on board a ves-

sel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick or dredge, a boat or ship, a barge, or type of pontoon (which is a flat bottom boat) or portable float. Workers who perform diving activities (to include divers, deck hands, or "diving tenders" who are support personnel such as line handlers and pump persons) from the shoreline or from adjacent areas such as an existing dock, pier or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Care should be exercised prior to assignment of this classification as the workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-509, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035. 87-12-032 (Order 87-12), § 296-17-509, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-509, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-509, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-509, filed 11/30/83, effective 1/1/84; Order 76-36, § 296-17-509, filed 11/30/76; Order 73-22, § 296-17-509, filed 11/9/73, effective 1/1/74.]

WAC 296-17-50908 Classification 0210.

0210-00 Asphalt paving or surfacing: Highway, street or roadway

Applies to contractors engaged in forms of asphalt paving or surfacing, resurfacing, scraping, sawing, cutting or patching operations performed on or in connection with new or existing highway, street, or roadway projects including approaches and bridges. The process begins after the roadbed or roadside grade has already been established and the subsurface or sub base has been prepared. Work contemplated by this classification is limited to laying crushed stone, placement of expansion joints, application of oil or other adhesive bonding materials, and the surface spreading and rolling of crushed aggregate. Equipment used by a contractor subject to this classification includes, but is not limited to, scrapers, graders, rollers, paving machinery, oil trucks and dump trucks.

This classification excludes preliminary roadbed or roadside construction such as clearing of right of ways, establishing grades, subsurfaces or sub bases which is to be reported separately in classification 0101; asphalt surfacing/resurfacing not in connection with highway, street or roadway projects which is to be reported separately in classification 0212; construction specialty services such as the installation of guardrails, lighting standards and striping which is to be reported separately in classification 0219; and concrete construction which is to be reported separately in the classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-50908, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-50908, filed 5/31/96, effective 7/1/96.]

(2001 Ed.)

WAC 296-17-50910 Classification 0212.

0212-00 Asphalt paving or surfacing, N.O.C.

Applies to contractors engaged in asphalt paving or surfacing not in connection with highway, street, or roadway projects not covered by another classification (N.O.C.). This classification covers all forms of asphalt paving or surfacing, resurfacing, scraping, sawing, cutting or patching operations not in connection with highway, street, or roadway projects such as, but not limited to, parking lots, airport runways and landing strips, driveways, walking paths, bicycle trails, tennis courts, playgrounds, and golf cart paths. The process begins after the land grade has already been established and the subsurface or sub base has been prepared. Work contemplated by this classification includes the laying of crushed stone, placement of expansion joints, application of oil or other adhesive bonding materials, and the surface spreading and rolling of crushed aggregate. Equipment used by a contractor subject to this classification includes, but is not limited to, scrapers, graders, rollers, paving machinery, oil trucks and dump trucks. This classification also applies to the application of various types of cushion surfaces for playgrounds.

This classification excludes the preliminary clearing of land, establishing grades, subsurfaces or sub bases which are to be reported separately in classification 0101; asphalt surfacing/resurfacing in connection with highway, street, or roadway projects which is to be reported separately in classification 0210; application of asphalt sealant to roadways and parking lots which is to be reported separately in classification 0219; application of asphalt sealant to driveways which is to be reported separately in classification 0504-06; construction specialty services such as the installation of guardrails, lighting standards and striping which are to be reported separately in classification 0219; and concrete construction which is to be reported separately in the classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-50910, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-50910, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-50910, filed 5/31/96, effective 7/1/96.]

WAC 296-17-50912 Classification 0214.

0214-00 Concrete paving and repaving: Highways, streets or roadways

Applies to contractors engaged in concrete paving and repaving of highways, streets, or roadways including approaches and bridges. This classification covers all forms of concrete paving, repaving, scraping, sawing, drilling or cutting operations in connection with a highway, street or roadway project, including the construction of curbs, gutters, sidewalks, median walls and retaining walls when performed as part of the roadway paving or repaving project. The process begins after the roadbed or roadside grade has already been established and the subsurface or sub base has been prepared. Work contemplated by this classification includes the laying of crushed stone, placement of reinforcing steel or expansion joints, grading or rolling stone base, set-up and tear down of forms, pouring, and finishing of concrete. Equipment used by a contractor subject to this classification includes, but is not limited to, scrapers, graders, rollers, paving machinery, water trucks and dump trucks.

[Title 296 WAC—p. 225]

This classification excludes preliminary roadbed or roadside construction such as clearing right of ways, establishing grades, subsurfaces or sub bases which are to be reported separately in classification 0101; asphalt paving, surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed; concrete flatwork not in connection with highway, street, or roadway projects which is to be reported separately in classification 0217; and construction specialty services such as the installation of guardrails, lighting standards and striping which are to be reported separately in classification 0219.

0214-01 Concrete curbs, gutters, and sidewalks: Construction and repair in connection with highways, streets or roadways

Applies to contractors engaged in the construction or repair of concrete curbs, gutters, and sidewalks in connection with highways, streets, or roadways including approaches and bridges. The process begins after the roadbed or roadside grade has already been established and the subsurface or sub base has been prepared. Work contemplated by this classification includes the set-up and tear down of forms, placement of reinforcing steel or expansion joints, and the pouring and finishing of concrete.

This classification excludes preliminary roadbed or roadside construction such as clearing right of ways, establishing grades, subsurfaces or sub bases which are to be reported separately in classification 0101; asphalt paving, surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed; concrete flatwork not in connection with highway, street, or roadway projects which is to be reported separately in classification 0217; and construction specialty services such as the installation of guardrails, lighting standards and striping which are to be reported separately in classification 0219.

0214-02 Concrete median walls and retaining walls: Construction and repair in connection with highways, streets or roadways

Applies to contractors engaged in the construction or repair of concrete median (divider) walls and retaining walls in connection with highway, street, or roadway projects including approaches and overpasses. The process begins after the roadbed or roadside grade has already been established and the subsurface or sub base has been prepared. Work contemplated by this classification includes the set-up and tear down of forms, placement of reinforcing steel or expansion joints, and the pouring and finishing of concrete to form median or divider walls, median strips, or retaining walls alongside the roadway.

This classification excludes the preliminary land excavation of a retaining wall area, as well as roadbed or roadside construction such as clearing right of ways, establishing grades, subsurfaces or sub bases which are to be reported separately in classification 0101; asphalt paving, surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed; concrete flatwork not in connection with highway, street, or roadway projects which is to be reported separately in classification 0217; and construction specialty services such as the installa-

tion of guardrails, lighting standards and striping which are to be reported separately in classification 0219.

0214-03 Concrete sawing, drilling, and cutting: In connection with highways, streets or roadways

Applies to contractors engaged in concrete sawing, drilling and cutting in connection with concrete highway, street, or roadway projects including concrete curbs, gutters, sidewalks, median walls and retaining walls. These activities occur on new or existing roadway and related projects such as, but not limited to, the sawing, cutting and drilling for manholes, drainage grates, poles or posts, exposing underground utility lines and systems, and repairing defective areas.

This classification excludes preliminary roadbed or roadside construction such as clearing right of ways, establishing grades, subsurfaces or sub bases which is to be reported separately in classification 0101; asphalt paving, or surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed; concrete flatwork not in connection with highway, street, or roadway projects which is to be reported separately in classification 0217; and construction specialty services such as the installation of guardrails, lighting standards and striping which are to be reported separately in classification 0219.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-50912, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-50912, filed 5/31/96, effective 7/1/96.]

WAC 296-17-50915 Classification 0217.

0217-00 Concrete flatwork - construction and/or repair: N.O.C.

Applies to contractors engaged in the construction and/or repair of concrete flatwork not covered by another classification (N.O.C.) such as, but not limited to, walkways, pathways, fences, and curbing. Work in this classification includes the set-up and tear down of forms, placement of reinforcing steel and wire mesh, and the pouring and finishing of concrete.

This classification excludes land clearing and excavation which is to be reported separately in classification 0101; concrete work performed on or in connection with highway, street, or roadway projects including sidewalks, curbs, gutters, median or retaining walls, sawing, drilling, or cutting operations which is to be reported separately in classification 0214; and concrete work contained within a concrete, masonry, iron or steel frame building or structure such as the foundation, floor slabs, precast or poured in place bearing floors or wall panels, columns, pillars, metal erection or any other portion of the building or structure itself which is to be reported separately in classification 0518.

0217-01 Concrete foundation and flatwork construction and repair: Wood structural buildings

Applies to contractors engaged in the construction and/or repair of concrete foundation and flatwork for wood structural buildings not to exceed three stories in height. This classification includes the set-up and tear down of forms, placement of reinforcing steel and wire mesh, pouring, and finishing of concrete footings, stem walls, floor pads, cellar

or basement floors, garage floors, swimming pools and ponds. This includes incidental concrete work such as walkways or driveways when performed by a foundation contractor.

This classification excludes land clearing and excavation which is to be reported separately in classification 0101; concrete work performed on or in connection with highway, street, or roadway projects including sidewalks, curbs, gutters, median or retaining walls, sawing, drilling, or cutting operations as part of the roadway which is to be reported separately in classification 0214; and concrete work contained within a concrete, masonry, iron or steel frame building or structure such as the foundation, floor slabs, precast or poured in place bearing floors or wall panels, columns, pillars, metal erection or any other portion of the building or structure itself which is to be reported separately in classification 0518.

0217-02 Concrete sawing, drilling and cutting, N.O.C.

Applies to contractors engaged in concrete sawing, drilling and cutting not covered by another classification (N.O.C.), including repairs. Work contemplated by this classification includes concrete sawing, drilling and cutting operations in connection with wood frame and nonwood frame buildings or structures, including flatwork such as, but not limited to, foundations, walkways, driveways, patios and swimming pools which may or may not be part of the building or structure. Activities include, but are not limited to, the sawing, cutting and drilling for ventilation boxes in the footings or stem walls, cut outs for windows or door ways, preparation to mount brackets for stairways or interior bearing walls, cutting interior walls as part of a building renovation project, cut outs for electrical and switch boxes, and repairing defective areas.

This classification excludes concrete sawing, drilling, and cutting operations performed on or in connection with highway, street, or roadway projects including sidewalks, curbs, gutters, median or retaining walls as part of roadways which are to be reported separately in classification 0214; bridge construction which is to be reported separately in classification 0201; and new dam construction which is to be reported separately in classification 0701.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-50915, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-50915, filed 5/31/96, effective 7/1/96.]

WAC 296-17-50917 Classification 0219.

0219-00 Construction specialty services, N.O.C.

Applies to contractors engaged in the installation or removal of highway, street, or roadway lighting, signs, guardrails, roadside reflectors, lane buttons or turtles, or lane markers not covered by another classification (N.O.C.). Usually, these activities occur as finishing touches after new or existing roadways are paved or surfaced. Roadway lighting includes traffic signal lights, and halogen or mercury vapor lights mounted to metal standards erected alongside the roadway. Signs (such as speed limit, road condition, city and town mile destination) are mounted on overpasses or on wood or metal poles erected alongside the roadway. Guardrails include metal barriers mounted on wood or metal poles

(2001 Ed.)

driven into the roadside shoulder. Lane markers, lane buttons or turtles consist of small reflectors, or chips of plastic or concrete attached to the road with an adhesive bonding material. This classification includes the related hook-up of power to the light standard.

This classification excludes the installation of power lines that feed into power poles which is to be reported separately in the applicable construction classification for the work being performed.

Special note: This classification excludes exterior sign erection, repair, or removal not in connection with displaying highway, street, or roadway information or conditions even though such signs may be erected or placed alongside roadways (such as advertisement bill boards, business, or personal property signs) which is to be reported separately in classification 0403.

0219-01 Construction specialty services

Applies to contractors engaged in specialty services such as the painting or striping of highways, streets, roadways, or parking lots not covered by another classification (N.O.C.). This classification includes painting, striping, numbering, or lettering highways, streets, roadways, parking lots, parking garages, airport runways, taxi ways, curbs, roadway dividers or median strips, and special traffic areas such as fire, bus, handicap, and no parking zones. The paint or other material used for these markings is usually applied to the surface using a mechanical device, either self-propelled or towed by a truck or other motor vehicle. In some instances, the paint will be applied manually with brush or roller which is included in this classification. This classification includes the application of asphalt sealants to roadways or parking lots. This classification also includes concrete barrier installation, in connection with road construction, by a concrete barrier rental business or by a flagging contractor who also supplies the concrete barriers. This includes the flaggers who are necessary during the installation of the barriers as well as any flaggers the company supplies to the road construction project itself.

This classification excludes the interior painting of buildings which is to be reported separately in classification 0521, the exterior painting of buildings or structures which is to be reported separately in classification 0504; application of asphalt sealant to driveways which is to be reported separately in classification 0504-06; the rental of the concrete barriers and other flagging equipment which is to be reported separately in classification 6409; and flaggers who are not employed by a concrete barrier rental business or by a flagging contractor who also supplies the concrete barriers which are to be reported separately in classification 7116 or 7118 as appropriate.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-50917, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-50917, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-50917, filed 5/31/96, effective 7/1/96.]

WAC 296-17-510 Classification 0301.

0301-04 Lawn type sprinkler systems: Installation, service or repair

Applies to contractors engaged in the installation, service or repair of lawn type sprinkler systems. This type of

activity is performed by landscaping contractors, plumbing contractors, and irrigation specialist contractors. Generally, lawn type sprinkler systems are installed at private residences or commercial businesses. The process involves identifying the area of land to be covered to determine the size and amount of pipe and sprinkler heads needed for the job. The installation involves cutting a trench in the ground (12" to 18" deep and wide enough to accommodate the pipe) with a vibrating plow or pipe pulling machine. Next, pipe is laid in the trench, glued, or otherwise joined, heads and canisters are installed, and the timer is hooked up. The system is checked for leaks, needed adjustments are made, and the pipe and heads are buried.

This classification excludes open canal type irrigation systems which are to be reported separately in classification 0108; the installation, service or repair of above or below ground agricultural/irrigation systems which is to be reported separately in classification 0301-06; and maintenance and cleaning of lawn sprinkler system pipes and heads done in connection with a landscape maintenance contract which is to be reported separately in classification 0308.

0301-06 Agricultural sprinkler/irrigation systems, N.O.C.: Installation, service or repair

Applies to contractors engaged in the installation, service or repair of above or below ground agricultural sprinkler and irrigation systems not covered by another classification (N.O.C.). The more common types of systems include below ground, fixed or movable, and wheel or impulse. Generally, these types differ from lawn sprinkler systems in that the size of pipes and pumps installed are much larger to produce the water pressure needed to irrigate large areas of land. Installation of below ground systems involves the use of trenching equipment to dig trenches, which are usually more than two feet deep to lay pipe. The above ground systems are laid out and assembled based on the need of the land area.

This classification excludes open canal type irrigation systems which are to be reported separately in classification 0108, and the installation, service or repair of lawn type sprinkler systems which is to be reported separately in classification 0301-04.

0301-08 Landscape construction operations, N.O.C.

Applies to landscape contractors engaged in new landscape construction or renovation projects not covered by another classification (N.O.C.). This classification also applies to specialist contractors engaged in the installation of invisible fences which are usually used to confine animals within a given area. Landscape construction work contemplated by this classification includes producing a preliminary drawing of the landscape or renovation project, preparing the ground (which may include tilling and spreading top soils or custom mix soils), installing sprinkler systems, planting trees, plants or shrubs, planting or replanting grass from seed or sod, installing ground cover material or plastic to retard weeds, placement of concrete borders, and the incidental construction of rockery, fences, ponds, paths, walkways, arbors, trellis and gazebos when performed by employees of a landscape contractor as part of a landscape contract. Such activities conducted separately from a landscape contract and not part of the landscape project are to be reported separately in

the classification applicable to the work being performed. Equipment used by contractors subject to this classification includes, but is not limited to, tractors with till attachments, small front end loaders, trenchers, mowers, fertilizer spreaders, wheelbarrows, and electric power tools.

Invisible fence construction work contemplated by this classification includes identifying the land area to be fenced, sketching a preliminary drawing, burying the wire in a narrow trench (about 1" wide by 2" to 6" deep) that has been dug along the field perimeter (or just securing the wire onto the ground around the perimeter), and connecting end of wire to a low voltage transmitter box (usually about the size of a hand-held calculator) that plugs into a 110 volt electrical outlet. This classification includes training sessions for the animal and related maintenance and repair at the customer's location. Equipment used to install invisible fences includes, but is not limited to, rakes or other hand tools, and small trench diggers.

This classification excludes all grading, clearing, or contouring of land which is to be reported separately in classification 0101; bulkheads not adjacent to water, or similar structures built of rock, which are to be reported separately in classification 0302; and lawn care maintenance or chemical spraying or fumigating which is to be reported separately in classification 0308.

[Statutory Authority: RCW 51.16.035, 51.04.020. 00-14-052, § 296-17-510, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-510, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-510, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-510, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-510, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-510, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-510, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-17-510, filed 11/30/79, effective 1/1/80; Order 76-36, § 296-17-510, filed 11/30/76; Order 73-22, § 296-17-510, filed 11/9/73, effective 1/1/74.]

WAC 296-17-511 Classification 0302.

0302-01 Brick, block, rock and slate work, N.O.C.

Applies to contractors engaged in interior or exterior brick, block, rock and slate work not covered by another classification (N.O.C.). Included in this classification are projects related to sidewalks, walkways, driveways, patios, steps, pads for wood stoves, flower or planting boxes, fences, inlay for fireplaces, countertops, buffets, full or partial interior or exterior walls, and includes the construction of entire buildings or structures with brick, block or rock products. Work contemplated by this classification includes, but is not limited to, laying and cutting and/or polishing brick, block, rock, slate, marble, granite, and adhering with mortar or tuck pointing (filling and/or finishing brickwork or stonework joints with cement or mortar).

This classification excludes plastering, stuccoing or lathing work which is to be reported separately in classification 0303; tile setting which is to be reported separately in classification 0502; and concrete work which is to be reported separately in the classification applicable to the work being performed.

0302-02 Masonry, N.O.C.

Applies to contractors engaged in interior or exterior masonry work not covered by another classification (N.O.C.), including chimney and fireplace construction. This classification includes lining or relining fireplace walls or boxes, chimneys, blast furnaces, ovens, firepits, and setting tombstones. Work contemplated by this classification includes, but is not limited to, laying and cutting brick or stone, and tuck pointing (filling and/or finishing brickwork or stonework joints with cement or mortar).

This classification excludes plastering, stuccoing or lathing work which is to be reported separately in classification 0303; tile setting which is to be reported separately in classification 0502; and concrete work which is to be reported separately in the classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-511, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-511, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-511, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-511, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-511, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-511, filed 11/29/82, effective 1/1/83; Order 75-38, § 296-17-511, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-511, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-511, filed 11/9/73, effective 1/1/74.]

WAC 296-17-51101 Classification 0303.**0303-00 Plastering, stuccoing and lathing buildings, N.O.C.**

Applies to contractors engaged in interior and exterior plastering, stuccoing and lathing work on buildings or structures not covered by another classification (N.O.C.). Work contemplated by this classification includes the lathing work which involves nailing thin wood or metal strips and wire mesh or Styrofoam panels to studs or joists to support the application of plaster or stucco, mixing of plaster or cement with water, and applying the mixture by hand trowel or low pressure spray apparatus to the lathing material.

This classification excludes masonry or brick work which is to be reported separately in classification 0302; interior painting which is to be reported separately in classification 0521; exterior painting which is to be reported separately in classification 0504; and concrete work which is to be reported separately in the classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-51101, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-51101, filed 5/31/96, effective 7/1/96.]

WAC 296-17-512 Classification 0306.**0306-00 Plumbing, N.O.C**

Applies to contractors engaged in plumbing work not covered by another classification (N.O.C.). Work contemplated by this classification includes activities such as, but not limited to, rough-in plumbing work as part of new or remodel projects, placement of pipe (plastic, copper or galvanized), cutting and/or threading pipe, soldering, welding or gluing all types of pipe, fittings or valves, installation of fixtures (sinks, showers and tubs, faucets), installation of appliances (dishwashers, hot water tanks, refrigerators with ice

(2001 Ed.)

and water dispensers), and other necessary plumbing activities in connection with water supplies, water carrying, dispensing, or drainage systems. This classification includes incidental side sewer hook ups (street to house) when performed by a plumbing contractor subject to this classification, and only when it is performed as a part of a plumbing contract which includes installation of waste lines and waste carry systems within a building; and sewer pipe cleaning including services provided by service providers engaged in cleaning or unplugging waste lines.

This classification excludes side sewer hook ups performed as part of an excavation contract which are to be reported separately in classification 0101, and underground water line or water main construction which is to be reported separately in classification 0107.

Special note: This classification includes the installation of display areas or showrooms which provide prospective customers an opportunity to inspect the quality of workmanship and products carried by the contractor. Generally, displays or showrooms are installed where the contractor stores his materials. It is common for contractors subject to this classification to sell plumbing fixtures and supplies, but the intent of these areas is not to sell products to walk-in customers. Sale of these products by a plumbing contractor is included in classification 0306. Classifications 2009, 6309, or similar store classifications are not to be assigned to a contractor's business. Employees engaged exclusively in showing the display areas or showrooms to customers are to be assigned classification 6303 provided the conditions of the standard exception general reporting rule have been met.

0306-02 Automatic sprinkler systems or fire extinguishing systems: Installation, service or repair within buildings

Applies to contractors engaged in the installation, service or repair of automatic sprinkler or fire extinguishing systems within buildings. Work contemplated by this classification includes installation of pipe, fittings, couplings, valves, hangers, regulators, and alarms in ceilings, walls and floors, and cutting and/or threading pipe. These systems are usually equipped to release dry chemicals or water automatically when the surrounding temperature exceeds a predetermined limit.

This classification excludes contractors engaged in the installation, service or repair of outside lawn type and agricultural/irrigation sprinkler systems who are to be reported separately in classification 0301, and contractors engaged in all types of general plumbing installation or repair work who are to be reported separately in classification 0306-00.

0306-03 Boilers, steam pipes, water pipes, heating ducts: Installation of covering insulation

Applies to contractors engaged in the installation of insulated covering on boilers, steam pipes, water pipes and heating ducts to help them retain heat. A boiler is a type of enclosed storage tank erected within a building which heats and circulates extremely hot water or converts hot water into steam. Contractors subject to this classification may also install water jets inside the tanks.

[Title 296 WAC—p. 229]

This classification excludes contractors primarily engaged in the erection of boiler tanks who are to be reported separately in classification 0306-04, and the removal of asbestos from boilers which is to be reported separately in classification 0512.

0306-04 Boilers, N.O.C.: Installation, service or repair

Applies to contractors engaged in the installation, service or repair of boilers not covered by another classification (N.O.C.), including boiler scaling and tank erection within buildings. A boiler is a type of enclosed storage tank erected within a building which heats and circulates extremely hot water or converts hot water into steam. Work contemplated by this classification includes the erection and/or installation of the boiler or tank (which is above ground), pipes, tubing, ducts, heating units, valves, headers, jets and insulation coverings. Also included is the process of boiler scaling which is the removal of scales or residue from the tank or pipes using chemicals, steam or mechanical methods.

This classification excludes contractors primarily engaged in covering a boiler and pipes with insulation covering who are to be reported separately in classification 0306-03, and the erection of exterior tanks which is to be reported separately in classification 0508.

0306-05 Pump installation, service or repair, N.O.C.

Applies to contractors engaged in the installation, service or repair of pumps related to water or waste carrying systems, and which are not covered by another classification (N.O.C.). Work contemplated by this classification applies to all types of water or sump pumps in connection with residential or commercial settings, water wells, and irrigation and drainage systems. A pump is a device that siphons or transfers material from one source or container to another. Activities include pump installation or repair services related to a building's water lines and water carrying systems, plumbing fixtures, dispensers, swimming pools and hot tubs, water wells, and agricultural or irrigation systems.

This classification excludes the installation of water pumps in connection with drilling operations which is to be reported separately in classification 0103; the installation or repair of service station pumps which is to be reported separately in classification 0603; and contractors engaged in all types of general plumbing installation or repair work who are to be reported separately in classification 0306-00.

0306-06 Water softening or treatment systems - installation of new equipment systems

Applies to establishments engaged in the installation of plumbing lines for new water conditioning, purifying or softening systems. Establishments providing this type of service are not required to be a "licensed plumber" to do the installation; however, it does involve plumbing work. The installation involves cutting the water line between the water source and the building or home. The line is cut with a hacksaw, reciprocating saw, or copper tube cutter, depending on the type of pipe involved. After the line is cut, the water source is connected to the intake of the system and the building or home is connected to the outlet of the system with supply and return lines. The bypass unit will allow the water to remain hard for the outside faucet. A small rubber hose is installed

under the house into the drain. Occasionally, a sump pump is needed. For plastic pipes, glue is used to seal the connections. On copper pipes, soldering equipment is used to secure the connections. Water softening is a process by which the water passes through a resin tank where calcium ions are exchanged for sodium ions, resulting in "soft" water. Periodically, the resin is recharged by "back flushing" with a saturated salt solution from another tank. Installations of this type include the two tanks, pressure regulators, valves, and in new facilities an automatic timer.

Special note: This classification allows for the service or repair of water softening or treatment systems to be reported separately in classification 0607 provided accurate time records are maintained which distinguishes new installation contract work from service or repair contract work.

0306-07 Hot water heater: Installation, service or repair

Applies to contractors engaged exclusively in the installation, service or repair of hot water heater units. Work contemplated by this classification includes removal of old units and the installation of new or replacement units. This includes activities such as disconnecting hot heater units, removal of plastic, copper or galvanized water pipes, installing or setting up new or replacement units, installing new pipes, cutting and/or threading pipe, soldering, welding or gluing all types of pipe, fittings or valves, filling and testing the new or replacement units, and wrapping hot water heaters with insulation blankets.

This classification excludes contractors engaged in all types of general plumbing work, or when the installation, service or repair of a hot water heater unit is performed as part of a general plumbing contract which is to be reported separately in classification 0306-00.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-512, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-512, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-512, filed 5/31/93, effective 7/1/93; 91-12-014, § 296-17-512, filed 5/31/91, effective 7/1/91. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-512, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-512, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-512, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-512, filed 11/29/82, effective 1/1/83. Statutory Authority: RCW 51.04.030 and 51.16.035, 79-12-086 (Order 79-18), § 296-17-512, filed 11/30/79, effective 1/1/80; Order 74-40, § 296-17-512, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-512, filed 11/9/73, effective 1/1/74.]

WAC 296-17-513 Classification 0307.

0307-01 Furnaces and heating systems: Installation, service or repair

Applies to contractors engaged in the installation, service, or repair of furnaces and heating systems, including duct work, in all types of residential and commercial settings. These services are generally performed by furnace contractors, heating and ventilation contractors, or sheet metal contractors. Work contemplated by this classification includes the fabrication, erection, installation and duct work performed at the job site. Materials include, but are not limited to, gas or electric furnace units, heater units, heat pumps, air purification systems, fireplace inserts or units, hot water tanks, thermostats, flat sheets of metal, vents, preformed or bent venting duct and pipe, vent collars and reels, fittings,

galvanized pipe, insulation wrap, concrete pads and gas logs. Contractors who operate a sheet metal fabrication shop or who prefabricate the duct systems in a shop away from the construction site are to be assigned classification 3404 for the shop fabrication work. When a contractor's business is assigned classification 3404 for shop operations, then classification 5206, "Permanent yard or shop," is no longer applicable to the contractor's business for the storage of materials or repair to equipment.

This classification excludes sheet metal fabrication shops which are to be reported separately in classification 3404; duct cleaning work which is to be reported separately in classification 1105; installation or repair of ventilation, air conditioning and refrigeration systems which is to be reported separately in classification 0307-04; or the installation of wood stoves which is to be reported separately in classification 0307-05.

Special note: This classification includes the installation of display areas or showrooms which provide prospective customers an opportunity to inspect the quality of workmanship and products carried by the contractor. Generally, displays or showrooms are installed where the contractors store their materials. It is common for contractors subject to this classification to sell furnace and heating system materials and accessories, but the intent of these areas is not to sell products to walk-in customers. Sales of these products by a furnace and heating systems contractor are included in classification 0307. Classification 2009, 6309, or similar store classifications, are not to be assigned to a contracting business. Employees engaged exclusively in showing the display areas or showrooms to customers are to be assigned classification 6303 provided the conditions of the standard exception general reporting rule have been met.

0307-04 Ventilating, air conditioning and refrigeration systems: Installation, service or repair, N.O.C.

Applies to contractors engaged in the installation, service, or repair of ventilating, air conditioning and refrigeration systems not covered by another classification (N.O.C.), including duct work at the job site in all types of residential and commercial settings. These services are generally performed by heating and ventilation contractors, refrigeration contractors, or sheet metal contractors. Work contemplated by this classification includes the fabrication, erection, installation and duct work performed at the job site. Materials include, but are not limited to, air conditioning units, refrigeration systems, air purification systems, hoods and protective metal covers, hot water tanks, flat sheets of metal, vents, preformed or bent duct portions, vent collars and reels, thermostats, fittings, galvanized pipe, insulation wrap, and concrete pads. This classification includes the installation or repair of built-in vacuum systems and air (pneumatic) tube systems, such as those at drive-up teller windows. Contractors who operate a sheet metal fabrication shop or who prefabricate the duct systems in a shop away from the construction site are to be assigned classification 3404 for the shop fabrication work. When a contractor's business is assigned classification 3404 for shop operations, then classification 5206 "Permanent yard or shop" is no longer applicable to the contractor's business for the storage of materials or repair to equipment.

This classification excludes sheet metal fabrication shops which are to be reported separately in classification 3404; installation or repair of furnace or heating systems which is to be reported separately in classification 0307-01; and the installation of wood stoves which is to be reported separately in classification 0307-05.

Special note: This classification includes the installation of display areas or showrooms which provide prospective customers an opportunity to inspect the quality of workmanship and products carried by the contractor. Generally, displays or showrooms are installed where the contractors store their materials. It is common for contractors subject to this classification to sell ventilating and air conditioning equipment and materials, but the intent of these areas is not to sell products to walk-in customers. Sales of these products by a ventilating and air conditioning contractor are included in classification 0307. Classification 2009, 6309, or similar store classifications, are not to be assigned to a contracting business. Employees engaged exclusively in showing the display areas or showrooms to customers are to be assigned classification 6303 provided the conditions of the standard exception general reporting rule have been met.

0307-05 Wood, pellet, or gas stove: Installation, service or repair

Applies to contractors engaged in the installation, service or repair of wood, pellet or gas stoves in all types of residential and commercial settings. Work contemplated by this classification includes the fabrication, installation and duct work performed at the job site. Materials include, but are not limited to, wood, gas or pellet stoves, inserts, heater units, protective metal covers or hoods, gas fireplace logs, preformed or bent venting duct and pipe, or vents and vent collars. Contractors who operate a sheet metal fabrication shop or who prefabricate the duct systems in a shop away from the installation site are to be assigned classification 3404 for the shop fabrication work. When a contractor's business is assigned classification 3404 for the shop operations, then classification 5206, "Permanent yard or shop," is no longer applicable to the contractor's business for the storage of materials or repair to equipment.

This classification excludes wood stove and accessory stores which are to be reported separately in classification 6309; stove manufacturing which is to be reported separately in classification 5209; sheet metal fabrication shops which are to be reported separately in classification 3404; brick or masonry work which is to be reported separately in classification 0302; and the installation or repair of furnace or heating systems which is to be reported separately in classification 0307-01.

Special note: This classification includes the installation of display areas or showrooms which provide prospective customers an opportunity to inspect the quality of workmanship and products carried by the contractor. Generally, displays or showrooms are installed where the contractors store their materials. It is common for contractors subject to this classification to sell wood stove installation materials and accessories, but the intent of these areas is not to sell products to walk-in customers. Sales of these products by a wood stove installation contractor are included in classification

0307. Classifications 2009, 6309, or similar store classifications, are not to be assigned to a contracting business. Employees engaged exclusively in showing the display areas or showrooms to customers are to be assigned classification 6303 provided the conditions of the standard exception general reporting rule have been met.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-513, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-513, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-513, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-513, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-513, filed 11/9/73, effective 1/1/74.]

WAC 296-17-51301 Classification 0308.

0308-00 Chemical spraying and fumigating

Applies to establishments engaged in providing chemical spraying and fumigating services only to established residential landscaping and commercial properties. Work contemplated by this classification includes, but is not limited to, the application of various liquid and granular chemicals (fertilizers, herbicides, pesticides, insecticides, iron, nitrogen, slow release food stakes) for use on grass, plants, shrubs, flowers, trees, moss, ivy or weeds. Employees of establishments subject to this classification arrive at the location site in a tank truck equipped with a premixed solution that is dispensed with a spray hose, or by fertilizer spreaders, injection guns, and back pack dispensers.

This classification excludes chemical spraying of roadway median strips by nonmunicipal employees adjacent to state, city or town roadways which is to be reported separately in classification 0101; chemical spraying done in connection with forest roads or reforestation projects which is to be reported in the applicable forestry classification; pest and termite control which is to be reported separately in classification 6602; chemical spraying and fumigating by employees of cities, counties, state agencies, or other municipalities which is to be reported in the classification applicable to the type of municipality performing the work; chemical spraying of agricultural farms or orchards which *may* be reported separately in classification 4808 or in the agricultural classification applicable to the employer's operation; and crop dusting by aircraft which is to be reported separately in classification 6903.

0308-01 Lawn care maintenance

Applies to contractors engaged in maintenance of established lawns and gardens. Work contemplated by this classification includes, but is not limited to, mowing and thatching lawns, edging, weeding flower beds, raking, rototilling gardens, application of fertilizers, and spraying and trimming of shrubs. Also included is minor landscape renovation and/or restoration activities incidental to, and performed as part of, the lawn care maintenance contract for an existing lawn or landscape such as the removal and replacement of plants, turf repair or reseeding of grass, and the spreading of decorative rock, topsoil, or bark. This classification includes replacement of sprinkler heads and cleaning of lawn type sprinkler systems only when performed in connection with and incidental to the lawn care maintenance contract. Equipment used by contractors subject to this classification includes, but is not limited to, riding or power lawn mowers, power sweep-

ers, edgers, thatchers, weed eaters, grass blowers, fertilizer spreaders, sprayers, gas or electric power tools, and hand tools.

This classification excludes new landscape construction which is to be reported separately in classification 0301; tree care and pruning services which are to be reported separately in classification 0101; grading, clearing, or contouring of land which is to be reported separately in classification 0101; installation, service or repair of lawn type sprinkler systems which is to be reported separately in classification 0301; and the installation, service or repair of above or below ground agricultural irrigation systems which is to be reported separately in classification 0301.

Special notes: Classifications 0308 and 0301 may be assigned to the same business provided that the conditions of the general reporting rule covering the operation of a secondary business have been met.

Care should be exercised in the assignment of this classification when tree services are included. Tree care service contracts generally call for the radical topping, pruning or cutting of tree limbs to remove or eliminate a hazard to buildings, property, or power lines. Tree trimming as part of this classification is only for the purpose of shaping and maintaining healthy trees and to control size for the visual relationship to other landscape material.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-51301, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-51301, filed 5/31/96, effective 7/1/96.]

WAC 296-17-516 Classification 0403.

0403-00 Sign: Erection, repair, and/or removal, including related painting and maintenance

Applies to contractors engaged in the erection, repair, and/or removal of signs, including related painting and maintenance. Signs include, but are not limited to, commercial business or personal property signs, advertisement billboards, poster panels erected at commercial or residential properties, private properties, buildings or structures, or open spaces. Signs may be made of wood, metal, plastic, glass, or neon tube. Free standing sign erection process begins with digging or drilling holes in which to stand or set poles or posts. The sign is attached to the pole or post prior to standing or is lifted with a boom or crane to be mounted and secured. Other signs are mounted and secured directly to buildings or structures. This classification includes the related electrical hook-up work to install neon and digital signs such as those located at banks and stores including the maintenance, repair, and painting of signs at the customer's location or at the contractor's shop.

This classification excludes the installation or removal of highway, street, or roadway signs that specify roadway information (such as speed limits, road conditions, city and town mile destinations) which are mounted on overpasses or erected alongside the roadway which are to be reported separately in classification 0219; the placement of temporary signs which is to be reported separately in classification 4910; or the manufacturing of signs which is to be reported separately in the applicable classification.

0403-10 Sign painting or lettering outside buildings or structures, N.O.C.

Applies to contractors engaged in sign painting or lettering outside buildings or structures not covered by another classification (N.O.C.), and includes all contractor's shop operations. Generally, this classification involves specialty lettering or painting such as, but not limited to, business logos, addresses, business hours or phone numbers, murals or other artwork.

This classification excludes contractors engaged in the installation or removal of highway, street, or roadway signs that specify roadway information (such as speed limits, road conditions, city and town mile destinations) which are mounted on overpasses or erected alongside the roadway which are to be reported separately in classification 0219; striping parking lots and painting curbs (and numbering on curbs) which is to be reported separately in classification 0219; sign painting or lettering inside of buildings, including inside murals or other artwork, which is to be reported separately in classification 4109; exterior painting of buildings or structures which are to be reported separately in classification 0504; painting or lettering in connection with an automotive body shop which is to be reported separately in classification 3412; and the erection, repair or removal of outdoor signs which is to be reported separately in classification 0403-00.

0403-11 Street and building decoration: Hanging or removing flags or bunting

Applies to establishments engaged in hanging or removing flags or bunting for conventions, celebrations, events, or similar decorations on the exterior or interior of buildings, structures, or streets. Buntings are strips of decorative cloth which may be used to span a roadway to promote events, as overhead streamers at an auto sales lot, or as a sign hung on a building to advertise grand openings.

This classification excludes the manufacture of flags or bunting which is to be reported separately in the applicable classification.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-516, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-516, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-516, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-516, filed 11/30/83, effective 1/1/84; Order 74-40, § 296-17-516, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-516, filed 11/9/73, effective 1/1/74.]

WAC 296-17-517 Classification 0502.**0502-04 Rug, linoleum, tile and other floor or drainboard covering: Installation or removal**

Applies to contractors engaged in the installation or removal of floor or drainboard coverings such as, but not limited to, rugs, wall to wall carpet, linoleum, vinyl, laminate, tile, parquet or astroturf in residential or commercial settings. Work contemplated by this classification includes, but is not limited to, the installation and/or removal of foam or rubber padding, floor coverings such as rugs or carpet, tack strips, door strips, subflooring (particle board or plywood), linoleum, vinyl, base board or door strips, and hauling existing floor covering debris away. This classification also includes the installation of counter tops and the installation of clay or ceramic tiles on drainboards and backsplashes.

(2001 Ed.)

This classification excludes contractors engaged in the installation of counter tops as part of an interior finish carpentry or cabinetry contract which is to be reported separately in classification 0513; the installation of hardwood floors which is to be reported separately in classification 0513; the installation of decorative brick, slate, marble or granite which is to be reported separately in classification 0302; installation of roofing tiles which is to be reported separately in classification 0507; and floor covering stores which are to be reported separately in the applicable classification.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-517, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-517, filed 5/31/96, effective 7/1/96; 87-24-060 (Order 87-26), § 296-17-517, filed 12/1/87, effective 1/1/88; 85-24-032 (Order 85-33), § 296-17-517, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-517, filed 11/30/83, effective 1/1/84; Order 75-38, § 296-17-517, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-517, filed 11/9/73, effective 1/1/74.]

WAC 296-17-519 Classification 0504.**0504-06 Waterproofing, N.O.C.: Buildings or structures**

Applies to contractors engaged in waterproofing buildings or structures not covered by another classification (N.O.C.). This classification includes the application and repair services of waterproofing material to all types of buildings or structures, regardless of height, including, but not limited to, foundations and foundation walls, floors, decks, fences, walkways and driveways. Waterproof material is applied to a variety of surfaces such as wood, concrete, asphalt, steel, metal, plaster, or stone. There are several types of waterproof processes: Membrane, which adheres long strips of rubber and pumice to exterior walls or foundations with the use of primer; pressure injection, which uses a long wand inserted into the ground to fill cracks; epoxy injection, which is performed on the interior or exterior with use of a caulk gun to inject a silicon material into cracks; or application with use of a brush, roller or spray directly onto the surface. This classification includes the application of asphalt sealant to driveways.

This classification excludes excavation work performed in conjunction with a waterproofing contract which is to be reported separately in classification 0101; waterproofing operations performed in connection with roofing or subaqueous work which is to be reported separately in the classification applicable to the work being performed; the application of asphalt sealant or waterproof materials to roadways and parking lots which is to be reported separately in classification 0219; and the application of waterproof materials performed by a concrete contractor as part of the concrete construction project which is to be reported separately in the classification applicable to the work being performed.

Special note: Classification 0101 applies when excavation work is performed (to remove dirt away from a foundation wall or to push it against the wall after the waterproofing material is applied) regardless of the type of contractor performing the excavation work.

0504-18 Pressure washing services or sandblasting, N.O.C.: Buildings or structures

Applies to contractors engaged in pressure washing or sandblasting buildings or structures, not covered by another classification (N.O.C.). This classification includes cleaning,

[Title 296 WAC—p. 233]

washing, pressure washing or sandblasting buildings or structures. These services are performed to remove dirt, moss, rust or old paint from buildings or structures. Pressure washing involves a forced spray of air and water to remove unwanted surface materials, whereas, sandblasting, or abrasive blasting, involves a forced spray of sand, steel, or glass. This classification includes the cleaning of roofs, gutters, and downspouts, the removal of moss or snow from multiple story buildings, and the cleaning of ceiling tiles. Pressure washing and sandblasting systems include portable blast and pressure cleaning machines, hand-operated, cabinet-type sandblasting or pressure washing machines, automatic blast or pressure cleaning machines and wet-blast cleaning machines.

This classification excludes contractors engaged in multimedia blasting in shop which is to be reported separately in classification 3402; pressure washing or sandblasting by a painting contractor as a part of the preparation for painting exterior buildings, structures, or the interior/exterior of tanks which is to be reported separately in the classification 0504-21; pressure washing as a part of interior building painting contracts which is to be reported separately in classification 0521; cleaning or washing roofs, or removing snow from, single story buildings (provided the cleaning or washing is not part of a painting or roofing contract) which is to be reported separately in classification 6602; waterproofing buildings or structures, N.O.C. which is to be reported separately in classification 0504-06; and pressure washing or sandblasting operations performed in conjunction with and as a part of another type of business such as a foundry, metal goods manufacturer, auto body repair shop, etc., which is to be reported separately in the applicable classification.

0504-20 Lead abatement

Applies to contractors engaged in lead abatement which is performed on structures where there are significant amounts of lead-based paint and lead dust. Contractors must comply with various governmental regulations. The first step in all lead abatement projects is the preliminary testing of the site to determine the presence of lead and the extent of the contamination. If the ground surrounding the proposed worksite is contaminated, it will require remediation, which is done by a soil remediation contractor who is to be reported separately in the appropriate classification. The next step is deciding which abatement procedure is right for the project such as: Encapsulation which is used on interior surfaces to seal the lead-based paint with a bonding material; enclosure which is used on interior and exterior surfaces and involves constructing special airtight enclosures made out of gypsum wallboard, plywood paneling, aluminum, vinyl or wood exterior sidings; component replacement which involves removing building components such as paneling, moldings, windows and doors which are coated with lead-based paint and replacing them with new components; and chemical removal, abrasive removal or handscraping which are methods to physically remove the lead paint. This classification includes all preparation work and all cleanup work.

This classification excludes soil remediation work which is to be reported separately in classification 0101; asbestos abatement which is to be reported separately in classification

0512; and lead abatement as part of a painting contract for interior/exterior of buildings or structures, or the interior/exterior of tanks which is to be reported separately in the applicable classification.

0504-21 Painting: Exterior buildings or structures, N.O.C.; Cleaning: Interior/exterior of oil or gas storage tanks, beer vats, and sewage treatment tanks

Applies to contractors engaged in painting the exterior of all types of buildings or structures not covered by another classification (N.O.C.), regardless of height. Buildings and structures include, but are not limited to, bridges, towers, smokestacks, stadiums, factories, warehouses, stores, churches, and residential or commercial single or multiple story buildings. Paint is applied by brush, roller or spray to a variety of surfaces such as wood, concrete, steel, metal, plaster, stone, or other types of exterior surfaces. This classification includes all preparation work such as the set up of scaffolding or power lifts, pressure washing, removal of old paint or asbestos, sandblasting, taping or masking, and cleanup work. This classification also applies to cleaning, coating, or painting the interior/exterior of oil or gas storage tanks, beer vats, or sewage treatment tanks.

This classification excludes contractors engaged in waterproofing buildings or structures, N.O.C. which are to be reported separately in classification 0504-06; pressure washing services or sandblasting of buildings or structures which are to be reported separately in classification 0504-18; interior painting of buildings which is to be reported separately in classification 0521; painting of murals or other artwork on the interior of buildings which is to be reported separately in classification 4109; and painting of murals or other artwork on the exterior of buildings which is to be reported separately in classification 0403.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-519, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-519, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-519, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 94-12-063, § 296-17-519, filed 5/30/94, effective 6/30/94; 90-13-018, § 296-17-519, filed 6/8/90, effective 7/9/90; 89-24-051 (Order 89-22), § 296-17-519, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035. 88-12-050 (Order 88-06), § 296-17-519, filed 5/31/88, effective 7/1/88; 85-24-032 (Order 85-33), § 296-17-519, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-519, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-519, filed 11/29/82, effective 1/1/83; Order 76-36, § 296-17-519, filed 11/30/76; Order 73-22, § 296-17-519, filed 11/9/73, effective 1/1/74.]

WAC 296-17-52001 Classification 0506.

0506-03 Building raising, moving and underpinning

Applies to contractors engaged in raising, moving and underpinning buildings. Work contemplated by this classification includes a variety of services involving the change of a building's elevation, location or support structure including incidental shoring and removal or rebuilding of walls, foundations, columns or piers. Employees of the contractor responsible for the overall completion of the project are to be reported in this classification. *Underpinning* is a process to correct wall cracks, foundation settling or collapse of a building or structure. Generally, underpinning involves one of two methods. In the first method, earth around a foundation is removed to permit construction of a new foundation to

replace the old one or to allow for the installation of subfoundations to support the existing earth. This would include masonry or concrete work, blasting (when required) and shoring of surrounding ground and building or structure to prevent cave-ins while foundation work is being performed. The second method deals with steel or wooden beams being inserted through a lower point of the building or structure. The beams are raised and supported by jacks until the foundation is relieved of some or all of its ground pressure. *Building raising or moving* is a process to change a building's position, either raised to a new elevation in place or moved to a new site, or both. Workers, subcontractors or utility companies will first disconnect all utilities from the building or structure to be moved. Workers will remove all detachable items and open foundation walls to allow metal or wood beams to be placed under the floor structure. Once beams are placed, hydraulic jacks are used to lift the building or structure clear of the old foundation high enough for a new foundation to be constructed, or high enough to allow the carrying vehicle (trailer) to be placed under the beams if it is to be moved. The trailer is moved along a previously graded and cleared path to the new location. The building or structure is then set down on a new foundation which is usually constructed by a separate contractor. Miscellaneous repair work is performed and utilities are reconnected.

This classification excludes contractors engaged in clearing paths, grading and excavation work who are to be reported separately in classification 0101; contractors who disconnect or hook-up underground gas, water or power lines who are to be reported separately in classification 0107; contractors who construct concrete foundations for wood frame or nonwood frame buildings who are to be reported separately in classification 0217, or in classification 0518 as applicable; and contractors engaged in the delivery and set up of factory built housing units who are to be reported separately in classification 0517.

0506-04 Building wrecking or demolition

Applies to contractors engaged in wrecking or demolishing buildings or structures. Work contemplated by this classification includes incidental sales of materials, burning or hauling away of debris, and incidental ground clearing activities at the site to permit other use of land. Wrecking and demolition involves barricading the site and walkways to keep nonconstruction workers out of the area to prevent possible injury to them. Guards, watchmen, and traffic controllers (flaggers) are on-site and in adjacent areas to keep work areas secure. Work hours are occasionally restricted to avoid interference with surrounding business activities. Salvage of materials is usually done by hand. Loading of trucks with debris is by chute or front end loaders. Actual demolition of a building or structure is performed in a variety of ways, including dismantling board by board, by crane (pulling sections to the ground), by crane equipped with a steel ball which is swung from the boom of the crane, or by explosives. Employees of the contractor responsible for the overall completion of the project are to be reported in this classification.

This classification excludes security guards employed by contractors to guard the job site before or after the construction work activity hours who are to be reported separately in

classification 6601; establishments primarily engaged in selling salvaged building materials which are to be reported separately in classification 2009; and all types of wood frame and nonwood frame building construction, remodeling, or repair work which is to be reported separately in the applicable classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-52001, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-52001, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-52001, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-52001, filed 11/29/82, effective 1/1/83.]

WAC 296-17-52002 Classification 0507.

0507-05 Roofwork construction and repair

Applies to contractors engaged in the installation or repair of roofing material on all types of new or existing buildings or structures. Roofing materials include, but are not limited to, felt roofing paper, rolled composition, wood, fiberglass or composition shingles or shakes, aluminum or sheet metal, masonry or ceramic tile, tar, and polyurethane foam. Installation of roofing materials varies with the product. Wood, fiberglass and composition shingles are nailed; masonry, slate or ceramic tiles require drilling, nailing or cementing; polyurethane foam is applied by spray then coated with a protective layer of paint-like material; hot tar requires melting in tanks, usually at ground level, then it is pumped or raised by bucket to the roof top and applied by spray or mop; cold apply uses an adhesive to bond roofing membranes to form a roofing system; cold tar is applied by brush, spray or mop; single ply involves large sheets of roofing material which are unrolled on the roof with edges overlapping and seamed; and metal roofing is seam welded or nailed. For purposes of this classification the term "roofwork" includes repairs to the subroof such as the replacement of trusses, rafters, supports, and sheathing, but excludes the placement of trusses, rafters, supports or sheathing on new building construction. Essentially, when removing the existing roof material from an existing building or structure it is not uncommon to find dry rot or deterioration to parts of the subroof. The repair of the subroof is part of the roof repair or replacement project and is included in this classification. By contrast, when a subroof is constructed on new buildings or structures, this activity is to be reported separately in the classification applicable to the work being performed such as 0510 for wood frame construction or 0518 for nonwood frame construction.

This classification excludes roof cleaning, moss or snow removal on single story buildings not incidental to, or part of, a roofing contract which is to be reported separately in classification 6602; roof cleaning or moss removal of multiple story buildings not incidental to, or part of, a roofing contract which is to be reported separately in classification 0504; the installation of gutters and downspouts which is to be reported separately in classification 0519; waterproofing parts of buildings other than roofs which is to be reported separately in classification 0504 and/or 0101; placing roof trusses, rafters, supports and sheathing on new wood frame buildings which is to be reported separately in classification 0510; the application of polystyrene strips used as insulation on mobile homes which is to be reported separately in classification

0512; and placing roof trusses, rafters, supports and sheathing on new buildings, N.O.C. which is to be reported separately in classification 0518.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-52002, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-52002, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-52002, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-52002, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-52002, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-52002, filed 11/29/82, effective 1/1/83.]

WAC 296-17-521 Classification 0508.

0508-00 Radio, television, cellular or water towers, poles and towers, N.O.C.: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of iron, steel, or wood radio, television, cellular or water towers, poles, towers and those towers which are not covered by another classification (N.O.C.). Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the foundation/excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, raising structural members by crane and welding or bolting them into place, and the installation, removal, service and/or repair of antennas, dish units and/or other transmitting/receiving apparatus to the structure. This classification also includes the delivery of material and supplies to the job site when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of a control building or installation of a modular control building which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow the separate reporting of excavation or foundation work irrespective of who performs the work. This classification includes specialty contractors who install, remove, service or repair antennas, dish units and/or other transmitting/receiving apparatus to a structure covered by this classification.

0508-01 Smokestack: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of iron, steel or concrete smokestacks. These structures are part of an industrial complex and facilitate the discharge of combustion vapors, gases, or smoke. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and

assembly of parts, installation of scaffolding, raising segments into place with a crane and welding or bolting them into place. This classification includes the delivery of material and supplies to the job site and installation of any apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; preliminary clearing of land by a contractor who is not also excavating the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of a control building or installation of a modular control building which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow separate reporting of excavation or foundation work irrespective of who performs the work.

0508-02 Windmill and silo: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of iron, steel or wood windmills or silos. Windmills use the force of wind passing around the rotor blades to turn turbines and produce electric power. These may be built individually or in groups known as "wind farms." Additional apparatus and storage batteries are housed in separate buildings nearby. Silos are large cylindrical structures used to store grain or fodder (silage). They are filled through the top by means of a conveyor. Within the structure, augers and pumps can move the grain to blend, aerate, or feed it out the chute. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, raising structural members by crane and welding or bolting them into place. This classification includes the delivery of material and supplies to the job site and the installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of a control building or installation of a modular control building which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow the separate reporting of excavation or foundation work irrespective of who performs the work.

0508-03 Oil still or refinery: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of oil stills or refineries. These facilities are basically composed of multi-story storage tanks, chimneys, pipelines, separating apparatus and steam generating systems. They receive unprocessed petroleum (crude oil) and convert it into usable products such as gasoline, kerosene, wax, grease and chemical feed stocks. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation and other concrete, on-site fabrication and assembly of parts, erecting framework, installation of scaffolding, raising structural members by crane and welding or bolting them into place. This classification includes the delivery of material and supplies to the job site and the installation of apparatus in an oil still or refinery when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of control or pump houses and other buildings not part of the main processing plant which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow separate reporting of excavation or foundation work irrespective of who performs the work and plant maintenance contract work which is to be reported separately in classification 0603.

0508-04 Blast furnace and metal burners: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of blast furnaces and metal burners. These are tall, very heavy gauge, cylindrical steel structures in which heated air and combustible fuels are combined to produce the heat necessary to separate the usable material in metal ores from the waste products. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, installation of a brick lining, raising structural members by crane and welding or bolting into place. This classification includes the delivery of material and supplies to the job site and the installation of apparatus onto a structure covered by this classification when

done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of additional buildings as part of an ore reduction or metal producing facility which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow separate reporting of excavation or foundation contractors irrespective of who performs the work.

0508-08 Elevated railway, tram, lift or similar conveyances: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of elevated railways, trams, lifts or similar conveyances. An elevated railway can be a full scale railroad or a smaller scale system such as a recreational monorail. For the purposes of this classification, trams are overhead cable cars, and lifts are similar to the typical ski lift. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting frames and supports (metal or concrete), installation of scaffolding, raising structural members by crane and welding or bolting them into place, and installing and securing tracks, cables or pulley systems. This classification includes the delivery of material and supplies to the job site and the installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; or the construction of a control building or installation of a modular control building which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow separate reporting of excavation or foundation contractors irrespective of who performs the work.

0508-09 Exterior tanks, N.O.C.: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of all types of

exterior tanks not covered by another classification (N.O.C.). These tanks may be part of water storage and distribution systems, chemical or petroleum processing and storage operations, or other industrial applications. This classification includes the erection or construction of tanks that are elevated on structural piers and those that rest on the ground. These tanks may be constructed singly or in groups known as "tank farms" which are common to the petroleum industry. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, and raising structural members by crane and welding or bolting them into place. This classification includes the delivery of material and supplies to the job site and installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of a control building or installation of a modular control building which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow separate reporting of excavation or foundation contractors irrespective of who performs the work.

0508-11 Crane or derrick: Installation, construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the installation, construction or erection, dismantling, maintenance or repair of nonmobile cranes and derricks for commerce and industrial use. Cranes and derricks can be very similar in that they are both defined as machines for hoisting and moving heavy objects through the use of stationary or movable booms equipped with cables. An object, sometimes weighing many tons, can be secured to the cables and moved into position along the length of a stationary boom or to another location within the reach of a movable boom. A derrick, however, can also be a permanent framework over an opening, such as an oil-drilling operation, to support boring equipment. The cranes included in this classification are those that are permanently installed at a marine port, cargo handling facility or an industrial facility to move supplies, cargo containers, or heavy objects (vertically or horizontally) that are being assembled and must pass through the length of a building to complete the process. Work contemplated by this classification includes, but is not limited to, the placement of forms and reinforcing steel for a foundation (in the case of some structures described above, the additional reinforcing required to support the crane is usually contemplated in the

plan for the building's foundation where the crane is being anchored), on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, raising structural members by hoist and welding or bolting them into place. This classification includes the delivery of material and supplies to the job site and installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; and delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification.

Special note: This classification does not allow separate reporting of excavation or foundation contractors irrespective of who performs the work.

0508-12 Water cooling towers or structures - metal or wood: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of metal or wood water cooling towers or vertical structures. These structures are usually part of an industrial complex in which water is used as a cooling element in a manufacturing process. The water, which absorbs heat from the machinery being cooled, can be circulated and reused after it has been channeled through a cooling tower to be chilled sufficiently. A common design allows the hot water to tumble down numerous open louvers or steps to lower its temperature. These towers are often composed of prefabricated parts which are delivered to the site and then assembled by bolting or welding together, then the necessary motors, pipes, fans and pumps are installed. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, raising structural members by crane and welding, bolting or otherwise fastening them into place. This classification includes the delivery of material and supplies to the job site and installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of other related buildings at the project site which is to be reported separately in the applicable construction classification.

Special notes: This classification does not allow separate reporting of excavation or foundation irrespective of who performs the work. Construction of a water cooling structure that uses a horizontal rather than tower-like design is to be reported separately in classification 0518.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-521, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-521, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-521, filed 5/31/93, effective 7/1/93; 89-24-051 (Order 89-22), § 296-17-521, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-521, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-521, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-521, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-521, filed 11/29/82, effective 1/1/83; Order 76-36, § 296-17-521, filed 11/30/76; Order 75-38, § 296-17-521, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-521, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-521, filed 11/9/73, effective 1/1/74.]

WAC 296-17-52101 Classification 0509.

0509-00 Overhead telephone or telegraph lines: New construction or extension of lines - including poles or towers; erection, maintenance or repair by contractor

Applies to contractors engaged in the construction, maintenance or repair of overhead telephone or telegraph lines, poles and towers. Work contemplated by this classification includes, but is not limited to, clearing a right of way (excluding logging-type operations), boring holes for poles to be set in, installing cross arms, insulators and brackets on poles (which may be wood or metal), setting poles or towers into position, installing guy wires if necessary, stringing the lines, incidental tree topping, tying into the low-voltage power source, and making service connections when done by employees of an employer having operations subject to this classification. Towers may be of a solid wall, cylindrical steel construction or of a fabricated steel cross member design reaching a height of about 50 feet, and are secured to a concrete pad or set into the ground. They may be used to elevate the lines to cross long distances or to support microwave antennae or receivers.

This classification excludes specialty contractors engaged in any single phase of the work described above: Land clearing and grading operations which are to be reported separately in classification 0101; erection of poles or towers which is to be reported separately in classification 0508; drilling holes which is to be reported separately in classification 0103; tree topping which is to be reported separately in classification 0101; service connections which are to be reported separately in classification 0608; underground telephone line installation which is to be reported separately in classification 0107; and the felling of timber which is to be reported separately in the applicable logging classification.

Special note: If done by a telephone or telegraph company the work described above is included in classification 1303. A contractor engaged in the installation of electric and/or cable television overhead lines in addition to telephone and telegraph lines is to be reported in classification 0509-03. If a specialty contractor is only stringing telephone or telegraph lines, and not erecting poles or towers, classification 0509-00 is still applicable.

(2001 Ed.)

0509-01 Overhead television lines: New construction or extension of lines - including poles or towers; erection, maintenance or repair by contractor

Applies to contractors engaged in the construction, maintenance or repair of overhead television lines, poles and towers. Work contemplated by this classification includes, but is not limited to, clearing a right of way (excluding logging-type operations), boring holes for poles to be set in, installing cross arms, insulators and brackets on poles (which may be wood or metal), setting poles or towers into position, installing guy wires if necessary, stringing the lines, incidental tree topping, tying into the low-voltage power source, and making service connections when done by employees of an employer having operations subject to this classification. Towers may be of a solid wall, cylindrical steel construction or of a fabricated steel cross member design reaching a height of about 50 feet, and are secured to a concrete pad or set into the ground. They may be used to elevate the lines over long distances or to support microwave antennae or receivers.

This classification excludes specialty contractors engaged in any single phase of the work described above: Land clearing and grading operations which are to be reported separately in classification 0101; erection of poles or towers which is to be reported separately in classification 0508; drilling holes which is to be reported separately in classification 0103; tree topping which is to be reported separately in classification 0101; service connections which are to be reported separately in classification 0601; underground television line installation which is to be reported separately in classification 0107; and the felling of timber which is to be reported separately in the applicable logging classification.

Special note: If done by a cable television company the work described above is included in classification 1305. A contractor engaged in the installation of overhead electric and/or telephone or telegraph lines in addition to overhead television lines is to be reported in classification 0509-03. If a specialty contractor is only stringing overhead television lines, and not erecting poles or towers, classification 0509-01 is still applicable.

0509-02 Overhead electric transmission lines: New construction or extension of lines - including poles, or towers; erection, maintenance or repair by contractor

Applies to contractors engaged in the construction, maintenance or repair of overhead electric transmission lines, poles and towers. Work contemplated by this classification includes, but is not limited to, clearing a right of way (excluding logging-type operations), boring holes for poles to be set in, installing cross arms, insulators and brackets on poles (which may be wood or metal), setting poles or towers into position, installing guy wires if necessary, stringing the lines, installing circuit breakers and transformers, incidental tree topping, tying into the high-voltage power source, and making service connections when done by employees of an employer having operations subject to this classification. Towers may be of a solid wall, cylindrical steel construction or of a fabricated steel cross member design reaching a height of about 50 feet, and are secured to a concrete pad or set into the ground. They may be used to elevate the lines over long distances or to support electric power distribution apparatus.

[Title 296 WAC—p. 239]

This classification excludes specialty contractors engaged in any single phase of the work described above: Land clearing and grading operations which are to be reported separately in classification 0101; erection of poles or towers which is to be reported separately in classification 0508; drilling holes which is to be reported separately in classification 0103; tree topping which is to be reported separately in classification 0101; underground electric line installation which is to be reported separately in classification 0107; and the felling of timber which is to be reported separately in the applicable logging classification.

Special note: If done by an electric power company the work described above is included in classification 1301. A contractor engaged in the installation of overhead telephone or telegraph lines and/or television lines in addition to overhead electric lines is to be reported in classification 0509-03. If a specialty contractor is only stringing overhead electric lines, and not erecting poles or towers, classification 0509-02 is still applicable.

0509-03 Overhead transmission lines, N.O.C.: New construction or extension of lines - including poles or towers; erection, maintenance or repair by contractor

Applies to contractors engaged in the construction, maintenance or repair of more than one type of overhead transmission line, including poles and towers which are not covered by another classification (N.O.C.). If the contractor specializes in either telephone, telegraph, television or electric lines, they can be specifically defined elsewhere within classification 0509. Work contemplated by this classification includes, but is not limited to, clearing a right of way (excluding logging-type operations), boring holes for poles to be set in, installing cross arms, insulators and brackets on poles (which may be wood or metal), setting poles or towers into position, installing guy wires if necessary, stringing the lines, incidental tree topping, installing circuit breakers and transformers, tying into the power source, and making service connections when done by employees of an employer having operations subject to this classification. Towers may be of a solid wall cylindrical steel construction or of a fabricated steel cross member design reaching a height of about 50 feet, and are secured to a concrete pad or set into the ground. They may be used to elevate the lines over long distances or to support microwave antennae, receivers or electric power distribution apparatus.

This classification excludes specialty contractors engaged in any single phase of the work described above: Land clearing and grading operations which are to be reported separately in classification 0101; erection of poles or towers which is to be reported separately in classification 0508; drilling holes which is to be reported separately in classification 0103; tree topping which is to be reported separately in classification 0101; service connections for cable television lines which is to be reported separately in classification 0601; underground line installation which is to be reported separately in classification 0107; and the felling of timber which is to be reported separately in the applicable logging classification.

Special note: If done by a telephone or telegraph company, the work described above is included in classification

1303; if done by a cable television company it is included in classification 1305; if done by an electric utility company it is included in classification 1301. If a specialty contractor is only stringing a combination of types of overhead lines, and not erecting poles or towers, classification 0509-03 is still applicable.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-52101, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-52101, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-52101, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-52101, filed 11/29/82, effective 1/1/83.]

WAC 296-17-52102 Classification 0510.

0510-00 Wood frame building: Construction or alterations, N.O.C.

Applies to contractors engaged in wood frame building construction or alterations not covered by another classification (N.O.C.). For the purposes of this classification, wood frame building construction means buildings erected exclusively of wood or wood products. This classification includes all building framing activities done in connection with wood frame building construction including the placement of roof trusses, sheathing roofs, installation of exterior building siding, and the installation of exterior doors and door frames. This classification also includes the installation of windows, window frames, and skylights when performed by framing workers as part of the framing contract on a wood frame building.

This classification excludes all other phases of wood frame building construction not listed as part of the framing activities above such as, but not limited to, site preparation and excavation (0101); overhead or underground utilities, asphalt work, or concrete work which is to be reported separately in the applicable classification; new landscape work (0301); brick work (0302); stucco work (0303); plumbing work (0306); HVAC work (0307); carpet and tile work (0502); exterior painting (0504); roof work (0507); insulation work (0512); interior finish carpentry - interior doors, cabinets, fixtures or molding (0513); installation of garage doors (0514); installation of sheet metal siding, gutters, and non-structural sheet metal patio covers/carports (0519); interior painting (0521); electrical work (0601) or wallboard installation, taping or texturing which are to be reported separately in the applicable classifications. For a more thorough description of the activities included and excluded from wood frame building construction, review the Construction Industry Guide.

Special note: Classification 0510 also includes wood frame building alterations or remodel work when the activity involves building new additions. The term "new additions" is defined as adding on to an existing wood frame building (upwards or outwards) in which the use of structural supports and main bearing beams is required. This is distinguishable from classification 0516 - building repair or carpentry work that typically does not require the placement of structural supports or main bearing beams. The purpose of classification 0516 is to build or rebuild with nonstructural or bearing beams, or to replace an existing portion (including existing structural and bearing beams) of a wood frame building for appearances or as a result of deterioration to make it appear

new again. Care should be exercised as the terminology to build, rebuild, remodel, construct or reconstruct is irrelevant to assignment of classification which should recognize what the project actually involves.

Guidelines:

Constructing a new wood frame building that never existed - 0510

Altering all or part of an existing wood frame building by adding on new additions - 0510

Remodeling all or part of an existing wood frame building *without* adding on new additions - 0516

Installation of wood or vinyl siding on a new or existing wood frame building - 0510

Constructing a new wood garage that never existed - 0510

Altering all or part of an existing wood garage by adding on new additions - 0510

Remodeling all or part of an existing wood garage without adding on new additions - 0516

Constructing a new wood carport or wood shed that never existed - 0510

Rebuilding an existing wood carport or wood shed (all or part) with or without new additions - 0516

Construction of a new wood deck by the framing contractor when a new wood house is being built - 0510

Constructing or replacing a wood deck on an existing wood house - 0516

Constructing or replacing a wood deck for any type of nonwood building - 0516

Altering the existing interior of a wood frame building by adding exterior additions - 0510

Remodeling the existing interior of a wood frame building without adding exterior additions - 0516

Constructing, altering, or remodeling the interiors of nonwood frame buildings - 0516

Installation of windows, window frames, and skylights when performed by framing workers as part of the framing contract of a wood frame building - 0510.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-52102, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-52102, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-52102, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-52102, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035, 88-12-050 (Order 88-06), § 296-17-52102, filed 5/31/88, effective 7/1/88; 87-12-032 (Order 87-12), § 296-17-52102, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-52102, filed 11/27/85, effective 1/1/86.]

WAC 296-17-52103 Classification 0511.

0511-00 Glass installation in buildings

Applies to contractors and glass merchants engaged in the installation and/or removal of glass in buildings and residences. This type of work is generally performed by a "glazier" who installs, removes, and/or boards up broken or damaged window or door glass. This classification includes a variety of glass, plastic and similar materials in buildings and residences, including exterior glass curtain walls on multi-story buildings, skylights, mirrors, storm windows, window

(2001 Ed.)

sashes and window/door glass. This classification also includes glass tinting or the application of tinted plastic film to glass windows and doors in buildings or residences.

This classification excludes glass merchants which are to be reported separately in classification 1108; the installation of auto glass which is to be reported separately in classification 1108 when performed at or away from the glass merchant's shop; glass frosting, etching or beveling which is to be reported separately in classification 1108; tinting or the application of tinted plastic film to auto glass by an auto detailer which is to be reported separately in classification 3406; glass manufacturing which is to be reported separately in classification 3503; and the installation of windows, window frames and skylights when performed as part of a framing contract on a wood frame building by the framing workers which is to be reported separately in classification 0510.

Special note: Care should be exercised when determining if the business is a glass installation contractor or a glass merchant. A glass merchant in classifications 1108 and 0511, does not qualify for classification 5206 "Permanent yard or shop." However, if the business is engaged exclusively as a glass installation contractor, and not as a glass merchant, the contractor's business *may* qualify for classification 5206 for the storage of materials.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-52103, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-52103, filed 5/31/96, effective 7/1/96; 86-12-041 (Order 86-18), § 296-17-52103, filed 5/30/86, effective 7/1/86.]

WAC 296-17-52104 Classification 0512.

0512-00 Insulation or sound proofing materials: Installation, N.O.C.

Applies to contractors engaged in installing insulation or sound proofing materials not covered by another classification (N.O.C.). This classification includes the installation or removal of insulation material for all types of residential or commercial buildings or structures. Insulation materials include, but are not limited to, flexible types in the form of blankets, rolls or quilts, loose fills or mineral substances in granulated, powder, cellulose or fibrous wood forms, pads and bats of mineral wool, slabs of cork board or wood fiber, rigid types such as wood and sugarcane fiberboard or panels, and the reflective type often consisting of aluminum foil encased in paper. The methods of installation include hand, blower, nailing, or cementing with special adhesive. This classification includes the installation of suspended or acoustical grid ceilings. This classification includes installation of weather strip and caulking, roof or soffit ventilators, energy efficient doors and related carpentry work done in connection with the weatherization or retrofitting of buildings and residences. This classification also includes the application of polystyrene strips placed as insulation on the tops of mobile homes.

This classification excludes the installation of glass windows in buildings which is to be reported separately in classification 0511; energy auditors with no installation or delivery duties who may be reported separately in classification 6303 provided all the conditions of the general reporting rules covering standard exception employees have been met; asbestos

abatement which is to be reported separately in classification 0512-01; lead abatement which is to be reported separately in classification 0504; and the installation of insulated covering on boilers or steam pipes which is to be reported separately in classification 0306.

0512-01 Asbestos abatement

Applies to contractors engaged in the removal of asbestos. Work contemplated by this classification includes all operations such as, but not limited to, the removal of damaged, deteriorated or unwanted existing asbestos coverings and material from buildings and other structures such as, but not limited to, ceilings, walls, partitions, floors, and from around air conditioning and heating ducts. Also included in this classification is the removal of asbestos insulated covering around boilers and steam pipes, asbestos used as insulation, fireproofing, and in various building materials such as floor coverings, ceiling tiles, cement sheeting, granular and corrugated wrap, and acoustical and decorative treatment for walls and ceilings.

This classification excludes contractors engaged in the installation of boiler and steam pipe insulation coverings who are to be reported separately in classification 0306; lead abatement which is to be reported separately in classification 0504; asbestos abatement as a part of painting the interior or exterior of buildings or structures or the interior/exterior of tanks which is to be reported separately in the applicable classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-52104, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-52104, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 94-12-063, § 296-17-52104, filed 5/30/94, effective 6/30/94. Statutory Authority: RCW 51.16.035. 87-12-032 (Order 87-12), § 296-17-52104, filed 5/29/87, effective 7/1/87; 86-12-041 (Order 86-18), § 296-17-52104, filed 5/30/86, effective 7/1/86.]

WAC 296-17-52105 Classification 0513.

0513-00 Interior finish carpentry

Applies to contractors engaged in interior finish carpentry work for all types of buildings. Generally, the interior finish carpentry work begins after the drywall, taping, texturing, and painting and/or wallpapering is complete. This classification includes a variety of interior finish or trim carpentry work to include, but not be limited to, the installation of wood paneling and wainscoting, wood fireplace mantels, stair railings, posts and banisters, interior doors and door frames, wood molding on windows, baseboards, interior fixtures such as towel bars and tissue holders, closet organizers, installation and/or finishing of hardwood flooring, and cabinets such as kitchen, medicine, laundry and storage. Contractors who operate a wood cabinet manufacturing or assembly shop away from the construction site, are to be assigned classification 2907 for the shop manufacturing work. When a contractor's business is assigned classification 2907 for the shop operation, then classification 5206, "Permanent yard or shop," is no longer applicable to the contractor's business for the storage of materials or repair of equipment. This classification includes the installation of counter tops as part of a contract which includes the installation of cabinets or other interior finish or carpentry work. Contractors engaged exclusively in the installation of counter tops or as part of a floor

covering contract are to be reported separately in classification 0502.

This classification excludes all carpentry work on the exterior of a building, or interior work such as framing interior walls, installing wallboard, taping and texturing walls, plastering, painting, masonry, glazing, insulation, installing overhead garage or exterior doors, concrete, electrical and plumbing work which is to be reported separately in the applicable classification.

Special note: This classification includes the installation of cabinet display areas or showrooms which provide prospective customers an opportunity to inspect the quality of workmanship and products carried by the contractor. Generally, displays or showrooms are installed where the contractors store their materials. It is common for contractors subject to this classification to sell some interior finish-related products, but the intent of these areas is not to sell products to walk-in customers. Sale of these products by an interior finish contractor is included in classification 0513. Classifications 2009, 6309, or similar store classifications, are not to be assigned to a contracting business. Employees engaged exclusively in showing the display areas or showrooms to customers are to be assigned classification 6303 provided all the conditions of the general reporting rule covering standard exception employees have been met.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-52105, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-52105, filed 5/29/87, effective 7/1/87.]

WAC 296-17-52106 Classification 0514.

0514-00 Garage or overhead door: Installation, service or repair

Applies to contractors engaged in the installation, service or repair of garage or overhead doors made of wood, metal, or aluminum. As part of a new construction project, the installation usually occurs before the building or structure is painted. Garage or overhead door installation can also occur as a replacement to an existing door or as an alteration or addition to a building or structure. The process involves installing door tracks on both sides of the doorway, inserting the door, which usually consists of panels or sections, into the tracks, and attaching panels or sections to one another. This classification also includes the installation of automatic door openers when performed as a part of the garage or overhead door installation contract, and by the same contractor installing the doors.

This classification excludes the installation, service or repair of commercial automatic door openers when it is not performed as a part of the garage or overhead door installation contract which is to be reported separately in classification 0603; the installation, service or repair of residential automatic door openers when it is not performed as a part of the garage or overhead door installation contract which is to be reported separately in classification 0607; the installation of exterior glass doors and door frames such as nonautomatic and automatic opening doors at retail establishments or commercial buildings which are to be reported separately in classification 0511; the installation of interior or exterior doors and door frames when performed by a framing contractor as

part of framing a wood frame building which is to be reported separately in classification 0510; the installation of interior doors and door frames which is to be reported separately in classification 0513; the installation of wood, fiberglass or metal exterior doors as part of a nonwood frame building when performed by employees of the general contractor which is to be reported separately in classification 0518; and the repair or replacement of wood, fiberglass or metal doors on an existing building which is to be reported separately in classification 0516.

0514-01 Nonstructural additions to buildings or structures: Installation, removal, alteration, and/or repair

Applies to contractors engaged in the installation, removal, alteration, and/or repair of nonstructural additions to buildings or structures. Nonstructural iron, steel, brass or bronze additions include, but are not limited to, fire escapes, staircases, balconies, railings, window or door lintels, protective window or door gratings, bank cages, decorative elevator entrances or doors, permanent stadium seating, and wall facades and facings. Shutters and similar decorative add-ons may be made of wood, vinyl or plastic. Generally, the process involves bolting, screwing, riveting, or welding these additions to the interior or exterior of buildings or structures. Contractors who operate a shop to prefabricate the additions are to be assigned the classification applicable for the shop manufacturing work being performed. When a contractor's business is assigned a manufacturing classification for shop operations, classification 5206, "Permanent yard or shop," is no longer applicable to the contractor's business for the storage of materials or repair of equipment.

This classification excludes sheet metal installation such as siding, gutters and downspouts, and nonstructural sheet metal patio covers/carpports which are to be reported separately in classification 0519; the installation, repair or dismantling of portable bleachers or stages which is to be reported separately in classification 0603; and the erection of commercial metal carpports, service station canopies, and structural iron or steel work as part of a building or structure which is to be reported separately in classification 0518.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-52106, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-52106, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-52106, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 89-24-051 (Order 89-22), § 296-17-52106, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 88-12-050 (Order 88-06), § 296-17-52106, filed 5/31/88, effective 7/1/88.]

WAC 296-17-52108 Classification 0516.

0516-00 Building repair and carpentry, N.O.C.

Applies to contractors engaged in building repair and carpentry work, not covered by another classification (N.O.C.). This classification applies to carpentry-related framing work on concrete, brick and steel buildings, and to wood framed building renovation and remodeling projects where the structure is not being modified or altered. Typical projects include, but are not limited to: Converting a room from one use to another, such as a bedroom to a study, or a garage to a family room; enlarging or changing the configuration of a room by removing or adding an interior wall; upgrading a kitchen or bathroom; or adding structures such as

(2001 Ed.)

a wooden deck to an existing building, screening a porch, installing a wood patio cover, or assembling sheet metal tool or garden sheds. Contractors subject to this classification use a variety of dimensional lumber and wood products as well as metal fasteners (nails, screws and bolts), and metal reinforcing or support straps such as joist hangers and post brackets. Technological changes have produced new materials which are replacing wood and wood products. These materials include, but are not limited to, light weight metal studs and plastic and fiber reinforced boards. This classification includes the framing of private residences with light weight metal studs and the installation of earthquake tie downs on residential buildings. This classification also includes specialty service providers or contractors engaged in providing general repair services (handyman) on buildings and dwellings. Classification 0516-00 can be used for these businesses to simplify recordkeeping and reporting if they provide general carpentry work and at least two of the following types of *repair* work; electrical, plumbing, cabinet, interior alteration, painting, drywall, masonry, carpet/linoleum/laminate, glazing, or appliance repair.

This classification excludes roofing or roof work which is to be reported separately in classification 0507.

0516-01 Wood playground equipment: Installation and/or repair

Applies to contractors engaged in the installation and/or repair of wood playground equipment. Work contemplated by this classification begins after the area of land has been excavated and/or cleared and includes installing wood playground equipment at private residences and in public settings such as, but not limited to, schools, parks, daycare centers, churches, and hotels. This classification usually includes a variety of playground equipment comprised of treated wood beams, poles, posts, and a variety of dimensional lumber used in building swings, forts, stationary and swinging bridges, balance beams, climbing towers, slides, and rope and tire walks. Generally, the process involves setting poles or posts with use of a post hole digger, backhoe or tractor equipped with an auger. The poles or posts may be set in concrete. Depending on the piece of equipment being built, use of beams, planks, dimensional lumber, rope, chains, tires, and metal bars or rings, are securely attached with nails, screws, bolts or eye hooks. This classification includes the building of borders surrounding the playground equipment area with beams or railroad ties and the spreading of pea gravel, sand or wood chips underneath the equipment.

This classification excludes the installation of metal playground equipment which is to be reported separately in classification 0603, and the excavation or clearing of land which is to be reported separately in classification 0101.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-52108, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-52108, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-52108, filed 5/31/93, effective 7/1/93; 89-24-051 (Order 89-22), § 296-17-52108, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 88-12-050 (Order 88-06), § 296-17-52108, filed 5/31/88, effective 7/1/88.]

WAC 296-17-52109 Classification 0517.**0517-00 Factory built housing units: Set up by contractor or by employees of the manufacturer**

Applies to the set up of factory built housing units such as mobile/manufactured homes, modular homes, or prefab cedar homes by contractors who work independently from a sales dealership or by employees of the manufacturer. This classification includes delivery of the factory built unit when performed by the set up contractor. The set up process includes placement of the unit or unit sections on blocks or foundations; joining the interior and exterior sections which may involve incidental placement of ridge cap, siding, trim boards, moldings, and interior seams; plumbing and electrical connections; and the installation of skirting, awnings or decks.

This classification excludes mobile home or factory built housing sales dealerships who set up and/or deliver the unit to a sales location or customer's site which are to be reported separately in classification 3415; the delivery of a mobile home or other factory built housing unit by a trucking service which is to be reported separately in classification 1102; the pouring of foundations; and/or the construction of nonstructural sheet metal patio covers/carports, garages or storage sheds regardless if performed by employees of the set up contractor or by another contractor which is to be reported separately in the applicable classification.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-52109, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-52109, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-52109, filed 12/1/89, effective 1/1/90.]

WAC 296-17-52110 Classification 0518.**0518-00 Building construction, N.O.C.: Alterations and concrete construction, N.O.C.**

Applies to contractors engaged in building construction, not covered by another classification (N.O.C.), including alterations. Work contemplated by this classification includes nonwood frame buildings and structures such as, but not limited to, waste treatment and waste disposal plants, fish hatcheries and stadiums in which the superstructure, skeleton framework, or building shell consists of concrete, iron or steel, or a combination of concrete, iron, steel and/or wood. This classification makes no distinction to the size of the structure or number of stories within the building and includes all concrete tilt-up buildings. Activities include, but are not limited to, the set up and tear down of forms, placement of reinforcing steel, rebar, or wire mesh, pouring and finishing concrete within the building or structure such as foundations, monolithic slabs, ground supported floor pads, precast or poured in place bearing floors or wall panels, columns, pillars, balconies, stairways, including the raising and/or standing of concrete tilt-up walls or precast floors and wall portions, and raising and securing metal frames or members into place using a crane or boom and securing by bolt, rivet or weld.

This classification excludes all other phases of construction which are not in connection with building the superstructure, skeleton framework, or building shell such as, but not limited to, site preparation and excavation which is to be

reported separately in classification 0101; bridge or tunnel construction which is to be reported separately in classification 0201; pile driving which is to be reported separately in classification 0202; underground utilities and systems which is to be reported separately in the classification applicable to the work being performed; asphalt work which is to be reported separately in the classification applicable to the work being performed; concrete paving or flatwork not contained within the building which is to be reported separately in the classification applicable to the work being performed; new landscape construction which is to be reported separately in classification 0301; brick, block, granite, marble, slate or masonry work which is to be reported separately in classification 0302; plastering, stuccoing and lathing work which is to be reported separately in classification 0303; plumbing work which is to be reported separately in classification 0306; HVAC work which is to be reported separately in classification 0307; carpet and tile work which is to be reported separately in classification 0502; exterior painting which is to be reported separately in classification 0504; roof work which is to be reported separately in classification 0507; installation of glass panels, curtain walls or windows which is to be reported separately in classification 0511; installation of insulation, sound proofing or suspended acoustical ceilings which is to be reported separately in classification 0512; interior finish carpentry such as the installation of interior doors, cabinets, fixtures or molding which is to be reported separately in classification 0513; installation of overhead doors, garage doors which is to be reported separately in classification 0514; installation of exterior doors and door frames, interior framing and carpentry work which is to be reported separately in classification 0516; installation of sheet metal siding or gutter work which is to be reported separately in classification 0519; interior building painting which is to be reported separately in classification 0521; electrical work which is to be reported separately in classification 0601; the installation of elevators and elevator door bucks which is to be reported separately in classification 0602; new dam construction projects which are to be reported separately in classification 0701; wood frame buildings which are to be reported separately in classification 0510; sheet metal tool sheds which are to be reported separately in classification 0516; brick or block buildings which are to be reported separately in classification 0302 and wallboard installation, taping or texturing which are to be reported separately in the applicable classifications.

0518-01 Metal carport: Erection

Applies to contractors engaged in the erection of metal carports such as those used for commercial parking lots. This classification includes raising and securing metal frames, members, or I-beams into place with a boom or crane and securing by bolt, rivet or weld.

This classification excludes the erection of nonstructural sheet metal patio cover/carports which is to be reported separately in classification 0519, and the erection of a wood carport which is to be reported separately in the applicable carpentry classification (see classification 0510 for additional information).

0518-02 Metal service station canopy: Erection

Applies to contractors engaged in the erection of metal service station canopies. Work contemplated by this classification includes, but is not limited to, raising and securing metal frames, members, or I-beams into place with a boom or crane and securing by bolt, rivet or weld.

This classification excludes the removal or installation of underground tanks which is to be reported separately in classification 0108, and the removal or installation of service station pumps which is to be reported separately in classification 0603.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-52110, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-52110, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-52110, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-52110, filed 5/31/93, effective 7/1/93; 89-24-051 (Order 89-22), § 296-17-52110, filed 12/1/89, effective 1/1/90.]

WAC 296-17-52111 Classification 0519.**0519-00 Building construction sheet metal work, N.O.C.**

Applies to contractors engaged in the installation or repair of sheet metal work in building construction, not covered by another classification (N.O.C.). Work contemplated by this classification applies to interior and exterior sheet metal work for residential or commercial buildings and includes wood frame, pole buildings, and nonwood frame buildings. This classification includes the installation of metal siding, gutters and downspouts, nonstructural sheet metal patio covers/carports, metal industrial shelving, stainless steel counter tops, and interior wall panels (such as the back splash behind stoves or sinks). Contractors who operate a sheet metal fabrication shop or prefabricate the gutters, downspouts and posts in a shop away from the construction site are to be assigned classification 3404 for the shop operations. When a contractor's business is assigned classification 3404 for shop operations then classification 5206 "Permanent yard or shop" is no longer applicable to the contractor's business for the storage of materials or repair to equipment.

This classification excludes sheet metal work as part of heating ventilation and air conditioning systems installation which is to be reported separately in classification 0307; the installation of aluminum or sheet metal as part of roof work which is to be reported separately in classification 0507; the installation of light weight sheet metal tool sheds which is to be reported separately in classification 0516; and the installation of commercial metal carports and service station canopies which is to be reported separately in classification 0518.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-52111, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-52111, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-52111, filed 12/1/89, effective 1/1/90.]

WAC 296-17-52113 Classification 0521.**0521-00 Painting building interiors; wallpaper hanging/removal**

Applies to contractors engaged in painting building interiors regardless of the height inside the building. This classification includes building interiors such as, but not limited to, single and multiple story residential houses and commercial

(2001 Ed.)

buildings, warehouses, factories, coliseums, theaters, stores and churches. The following structures are examples which would *not meet* the definition of a building or qualify as interior painting: Bridges, refineries, grain silos, water towers, service station canopies, or tanks. Paint is applied by brush, roller or spray to a variety of surfaces such as wood, wallboard, plaster, stucco, metal, concrete, or other types of surfaces found within the interior of a building. This classification includes all preparation work such as the set up of scaffolding, sanding, removal of old paint or asbestos, taping or masking, and clean up work. This classification also includes the hanging or removal of wallpaper. The process of hanging wallpaper includes cleaning or scraping walls to ensure the wallpaper will adhere to the surface. Depending on the type of wallpaper, adhesive is applied to the wall surface, the wallpaper, or both. Patterns are matched and the strip is applied to the surface and brushed smooth to remove the air pockets. This process is repeated until the entire job is complete. This classification also includes refinishing or resurfacing of tubs, sinks, appliances and countertops.

This classification excludes exterior painting of buildings or structures which is to be reported separately in classification 0504. Classifications 0521 and 0504 may be assigned to the same employer provided accurate records are maintained which distinguish interior building painting contracts from exterior building or structure painting contracts. This classification also excludes contractors engaged in waterproofing buildings or structures N.O.C., pressure washing services or sandblasting of buildings or structures, lead paint abatement, and the exterior painting of buildings or structures, including interior/exterior tanks which are all to be reported separately in classification 0504; painting of murals or other artwork on the interior of buildings which is to be reported separately in classification 4109; and painting of murals or other artwork on the exterior of buildings which is to be reported separately in classification 0403.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-52113, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-52113, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-52113, filed 5/31/96, effective 7/1/96.]

WAC 296-17-52116 Classification 0524.**0524-00 Wallboard installation - discounted rate (to be assigned only by the drywall underwriter)**

Applies to contractors engaged in the installation or repair of wallboard. This classification includes the installation of wallboard, drywall, or sheetrock in all types of residential or commercial buildings or structures. Material is generally delivered to the construction site by employees of the building material dealers. This classification includes delivery of materials to the construction site when performed by employees of the wallboard contractor. The process consists of cutting wallboard with a utility knife, hacksaw, or power saw to the desired size and then butting material into place and nailing or screw fastening to wood or aluminum wall studs. Electrical box, window, or door openings are cut out where needed. Installation may require the use of scaffolding, ladders, specialty lifts, or stilts when working at heights, including the use of T holders or hydraulic lifts to hold material being installed on ceilings.

[Title 296 WAC—p. 245]

This classification excludes wallboard taping which is to be reported separately in classification 0526 or 0531; wallboard priming and texturing which is to be reported separately in classification 0527 or 0532; wallboard stocking by nonmaterial dealer employees which is to be reported separately in classification 0528 or 0533; wallboard scrapping by nonmaterial dealer employees which is to be reported separately in classification 0529 or 0534; interior painting work which is to be reported separately in classification 0521; plastering, stuccoing or lathing work which is to be reported separately in classification 0303; and the framing of nonbearing walls when performed by the drywall contractor which is to be reported separately in classification 0516.

Special note: *The basis of premium for this classification is material installed (square feet).* For contractors to be assigned and continue to report in this classification, their account must remain in good standing and conform to the conditions specified in the special drywall industry rule.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-52116, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 51.16.035 and 51.32.073. 97-06-007, § 296-17-52116, filed 2/24/97, effective 4/1/97.]

WAC 296-17-52118 Classification 0526.

0526-00 Wallboard taping - discounted rate (to be assigned only by the drywall underwriter)

Applies to contractors engaged in taping wallboard in residential or commercial buildings or structures. This process occurs after wallboard, drywall, or sheetrock has been installed and involves taping the seams, and spreading joint compound over the seams and nail or screw heads. When dry, the seams are sanded to remove any rough edges.

This classification excludes wallboard installation which is to be reported separately in classification 0524 or 0530; wallboard priming and texturing which is to be reported separately in classification 0527 or 0532; wallboard stocking by nonmaterial dealer employees which is to be reported separately in classification 0528 or 0533; and wallboard scrapping by nonmaterial dealer employees which is to be reported separately in classification 0529 or 0534.

Special note: *The basis of premium for this classification is material finished (square feet).* For contractors to be assigned, and continue to report in this classification, their account must remain in good standing and conform to the conditions specified in the special drywall industry rule.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-52118, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 51.16.035 and 51.32.073. 97-12-011, § 296-17-52118, filed 5/27/97, effective 7/1/97.]

WAC 296-17-52119 Classification 0527.

0527-00 Wallboard priming and texturing - discounted rate (to be assigned only by the drywall underwriter)

Applies to contractors engaged in priming and texturing wallboard in residential or commercial buildings or structures. Priming is the application of an undercoating that may be applied either directly to the wallboard or after it has been textured. The priming application is necessary for any subsequent painting work. Texture is a putty-like material that is sprayed over the prepared wallboard in a clump-like application. The clumps are smoothed with a trowel or a wide putty

[Title 296 WAC—p. 246]

knife. This classification includes incidental painting when performed by employees of the priming and texturing contractor.

This classification excludes wallboard installation which is to be reported separately in classification 0524 or 0530; wallboard taping which is to be reported separately in classification 0526 or 0531; wallboard stocking by nonmaterial dealer employees which is to be reported separately in classification 0528 or 0533; and wallboard scrapping by nonmaterial dealer employees which is to be reported separately in classification 0529 or 0534.

Special note: *The basis of premium for this classification is material finished (square feet).* For contractors to be assigned, and continue to report in this classification, their account must remain in good standing and conform to the conditions specified in the special drywall industry rule.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-52119, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 51.16.035 and 51.32.073. 97-12-011, § 296-17-52119, filed 5/27/97, effective 7/1/97.]

WAC 296-17-52120 Classification 0528.

0528-00 Wallboard stocking by nonmaterial dealer employees - discounted rate (to be assigned only by the drywall underwriter)

Applies to contractors or employees of contractors engaged in the process of stocking drywall. This activity usually entails placing the needed amount of drywall within the various rooms of the residential or commercial building or structure being built.

This classification excludes wallboard installation which is to be reported separately in classification 0524 or 0530; wallboard taping which is to be reported separately in classification 0526 or 0531; wallboard priming and texturing which is to be reported separately in classification 0527 or 0532; and wallboard scrapping by nonmaterial dealer employees which is to be reported separately in classification 0529 or 0534.

Special note: *The basis of premium for this classification is material finished (square feet).* For contractors to be assigned, and continue to report in this classification, their account must remain in good standing and conform to the conditions specified in the special drywall industry rule.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-52120, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 51.16.035 and 51.32.073. 97-12-011, § 296-17-52120, filed 5/27/97, effective 7/1/97.]

WAC 296-17-52121 Classification 0529.

0529-00 Wallboard scrapping by nonmaterial dealer employees - discounted rate (to be assigned only by the drywall underwriter)

Applies to contractors or employees of contractors engaged in the process of scrapping drywall. This activity entails the picking up and discarding of the wallboard remnants and scraps.

This classification excludes wallboard installation which is to be reported separately in classification 0524 or 0530; wallboard taping which is to be reported separately in classification 0526 or 0531; wallboard priming and texturing

(2001 Ed.)

which is to be reported separately in classification 0527 or 0532; and wallboard stocking by nonmaterial dealer employees which is to be reported separately in classification 0528 or 0533.

Special note: *The basis of premium for this classification is material finished (square feet).* For contractors to be assigned, and continue to report in this classification, their account must remain in good standing and conform to the conditions specified in the special drywall industry rule.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-52121, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 51.16.035 and 51.32.073, 97-12-011, § 296-17-52121, filed 5/27/97, effective 7/1/97.]

WAC 296-17-52122 Classification 0530.

0530-00 Wallboard installation - nondiscounted rate (to be assigned only by the drywall underwriter)

Applies to contractors engaged in the installation or repair of wallboard. This classification includes the installation of wallboard, drywall, or sheetrock in all types of residential or commercial buildings or structures. Material is generally delivered to the construction site by employees of the building material dealers. This classification includes delivery of materials to the construction site when performed by employees of the wallboard contractor. The process consists of cutting wallboard with a utility knife, hacksaw, or power saw to the desired size and then butting material into place and nailing or screw fastening to wood or aluminum wall studs. Electrical box, window, or door openings are cut out where needed. Installation may require the use of scaffolding, ladders, specialty lifts, or stilts when working at heights, including the use of T holders or hydraulic lifts to hold material being installed on ceilings.

This classification excludes wallboard taping which is to be reported separately in classification 0526 or 0531; wallboard priming and texturing which is to be reported separately in classification 0527 or 0532; wallboard stocking by nonmaterial dealer employees which is to be reported separately in classification 0528 or 0533; wallboard scrapping by nonmaterial dealer employees which is to be reported separately in classification 0529 or 0534; interior painting work which is to be reported separately in classification 0521; plastering, stuccoing or lathing work which is to be reported separately in classification 0303; and the framing of nonbearing walls when performed by the drywall contractor which is to be reported separately in classification 0516.

Special note: *The basis of premium for this classification is material installed (square feet).*

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-52122, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 51.16.035 and 51.32.073, 97-12-011, § 296-17-52122, filed 5/27/97, effective 7/1/97.]

WAC 296-17-52123 Classification 0531.

0531-00 Wallboard taping - nondiscounted rate (to be assigned only by the drywall underwriter)

Applies to contractors engaged in taping wallboard in residential or commercial buildings or structures. This process occurs after wallboard, drywall, or sheetrock has been installed and involves taping the seams, and spreading joint

(2001 Ed.)

compound over the seams and nail or screw heads. When dry, the seams are sanded to remove any rough edges.

This classification excludes wallboard installation which is to be reported separately in classification 0524 or 0530; wallboard priming and texturing which is to be reported separately in classification 0527 or 0532; wallboard stocking by nonmaterial dealer employees which is to be reported separately in classification 0528 or 0533; and wallboard scrapping by nonmaterial dealer employees which is to be reported separately in classification 0529 or 0534.

Special note: *The basis of premium for this classification is material finished (square feet).*

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-52123, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 51.16.035 and 51.32.073, 97-12-011, § 296-17-52123, filed 5/27/97, effective 7/1/97.]

WAC 296-17-52124 Classification 0532.

0532-00 Wallboard priming and texturing - nondiscounted rate (to be assigned only by the drywall underwriter)

Applies to contractors engaged in priming and texturing wallboard in residential or commercial buildings or structures. Priming is the application of an undercoating that may be applied either directly to the wallboard or after it has been textured. The priming application is necessary for any subsequent painting work. Texture is a putty-like material that is sprayed over the prepared wallboard in a clump-like application. The clumps are smoothed with a trowel or a wide putty knife. This classification includes incidental painting when performed by employees of the priming and texturing contractor.

This classification excludes wallboard installation which is to be reported separately in classification 0524 or 0530; wallboard taping which is to be reported separately in classification 0526 or 0531; wallboard stocking by nonmaterial dealer employees which is to be reported separately in classification 0528 or 0533; and wallboard scrapping by nonmaterial dealer employees which is to be reported separately in classification 0529 or 0534.

Special note: *The basis of premium for this classification is material finished (square feet).*

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-52124, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 51.16.035 and 51.32.073, 97-12-011, § 296-17-52124, filed 5/27/97, effective 7/1/97.]

WAC 296-17-52125 Classification 0533.

0533-00 Wallboard stocking by nonmaterial dealer employees - nondiscounted rate (to be assigned only by the drywall underwriter)

Applies to contractors or employees of contractors engaged in the process of stocking drywall. This activity usually entails placing the needed amount of drywall within the various rooms of the residential or commercial building or structure being built.

This classification excludes wallboard installation which is to be reported separately in classification 0524 or 0530; wallboard taping which is to be reported separately in classification 0526 or 0531; wallboard priming and texturing

which is to be reported separately in classification 0527 or 0532; and wallboard scrapping by nonmaterial dealer employees which is to be reported separately in classification 0529 or 0534.

Special note: The basis of premium for this classification is material finished (square feet).

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-52125, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 51.16.035 and 51.32.073, 97-12-011, § 296-17-52125, filed 5/27/97, effective 7/1/97.]

WAC 296-17-52126 Classification 0534.

0534-00 Wallboard scrapping by nonmaterial dealer employees - nondiscounted rate (to be assigned only by the drywall underwriter)

Applies to contractors or employees of contractors engaged in the process of scrapping drywall. This activity entails the picking up and discarding of the wallboard remnants and scraps.

This classification excludes wallboard installation which is to be reported separately in classification 0524 or 0530; wallboard taping which is to be reported separately in classification 0526 or 0531; wallboard priming and texturing which is to be reported separately in classification 0527 or 0532; and wallboard stocking by nonmaterial dealer employees which is to be reported separately in classification 0528 or 0533.

Special note: The basis of premium for this classification is material finished (square feet).

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-52126, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 51.16.035 and 51.32.073, 97-12-011, § 296-17-52126, filed 5/27/97, effective 7/1/97.]

WAC 296-17-522 Classification 0601.

0601-00 Electrical wiring in buildings; electrical wiring, N.O.C.; Permanent flood lighting: Installation

Applies to contractors engaged in the electrical wiring of buildings, or in electrical wiring not covered by another classification (N.O.C.). Work contemplated by this classification is characterized as general electrical work, including installation, service or repair at residential and commercial settings. This classification includes electrical work which generally begins at the power meter and extends to the inside or outside of the building or its exterior setting, including, but not limited to, the installation of the breaker panel, fuses, plugs and snap switches, rough-in electrical work to include the stringing of insulated or encased wiring and mounting of plug-in or switch housing boxes, installation of plug-in, dimmer and switch units; installation of light fixtures, recessed canister and fluorescent lighting, track lighting, and other interior and exterior lighting fixtures, installation of ceiling fans, and the installation of residential and commercial appliances such as built-in microwaves, dishwashers, electric ovens and oven hoods. This classification also includes the installation of permanent flood lighting at stadiums and parks. Generally, flood lighting fixtures are mounted onto poles, buildings, or other structures; the erection or construction of those structures is not included in this classification.

[Title 296 WAC—p. 248]

This classification excludes the installation of overhead or underground power lines and poles by an electric utility company which is to be reported separately in classification 1301; the installation of overhead power lines by a nonelectric utility contractor which is to be reported separately in classification 0509; and the installation of underground power lines by a nonelectric utility contractor which is to be reported separately in classification 0107.

0601-07 Electrical machinery and auxiliary apparatus: Installation and repair

Applies to contractors engaged in the installation and repair of electrical machinery and auxiliary apparatus such as, but not limited to, heavy motors, generators, converters, transformers, compressors and power switchboard equipment. Generally, this type of work occurs at industrial or commercial plants, power plants, or sites where large machinery is to be installed. Work contemplated by this classification includes extending insulator or encased wiring or cable from the power meter, breaker or control panel to the physical location where the machinery is to be installed, and incidental wiring of the machinery or auxiliary apparatus.

0601-08 Temporary floodlights or search lights: Erection

Applies to contractors engaged in the erection or set up of temporary floodlights away from the contractor's premises. Usually, these lights are mounted on a truck or trailer, then transported to the customer site or location where they are operated with use of a generator. Uses of temporary floodlights and searchlights include, but are not limited to, advertising grand openings or special sales at shopping malls, auto dealers, grocery and outlet stores, marking the location of special events such as carnivals or concerts, or at construction project sites.

This classification excludes the erection of permanent floodlight fixtures to poles, buildings or structures which is to be reported separately in classification 0601-00.

0601-15 Television cable: Installation service or repair in buildings by contractor

Applies to contractors engaged in the installation, service or repair of television cable in buildings. This classification includes the installation of television cable lines in residential and commercial buildings and includes the dropping of lines from the pole to the house, mounting of cable control panel boxes to the exterior of buildings, extending cable, mounting multiple line adapter units and relay switches, and affixing the cable end for hook-up to televisions and other stereo components.

This classification excludes the installation of underground or overhead television cable lines when performed by a television cable company which is to be reported separately in classification 1305; installation of underground television cable lines when performed by a nontelevision cable company contractor which is to be reported separately in classification 0107; and installation of overhead television cable lines from pole to pole by a nontelevision cable company contractor which is to be reported separately in classification 0509.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-522, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-522, filed

(2001 Ed.)

11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-522, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-522, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-522, filed 11/29/82, effective 1/1/83; Order 75-38, § 296-17-522, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-522, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-522, filed 11/9/73, effective 1/1/74.]

WAC 296-17-523 Classification 0602.

0602-03 Elevators or elevator door bucks: Installation, service and/or repair

Applies to contractors engaged in the installation, service and/or repair of freight or passenger elevators and elevator door bucks in private residences and commercial buildings or structures. Generally, the process begins after the elevator shaft has been erected, to include, but not be limited to, the installation of elevator units, doors, door bucks, cables and hoisting systems, motors, and electrical apparatus and wiring in connection with operation of the elevator.

This classification excludes the installation or repair of escalators and industrial machinery which is to be reported separately in classification 0603, and the erection of temporary construction elevators as part of a construction project which is to be reported separately in the classification applicable to the phase of construction being supported.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-523, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-523, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-523, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-523, filed 11/9/73, effective 1/1/74.]

WAC 296-17-524 Classification 0603.

0603-00 Machinery: Installation, service and/or repair, N.O.C.; Millwright work, N.O.C.

Applies to contractors engaged in the installation, service and/or repair of heavy machinery or equipment at a customer's location which is not covered by another classification (N.O.C.). Millwright work and the service or repair of engines and gas machines is also included. A millwright is a technician who specializes in installing and repairing industrial machinery. Typical customers include, but are not limited to, wood, metal and plastic manufacturing plants, fuel refineries, and mills. Types of machinery installed and repaired includes, but is not limited to, escalators, conveyor systems, printing presses, lathes, mill saws, dairy equipment and wind machines. (Store operations of dairy equipment/supply dealers or wind machine dealers are to be reported separately in classification 6407.) Work contemplated by this classification includes, but is not limited to, the pouring of a concrete pad on which the machinery will be installed, cutting and welding of brackets and mountings, assembling component parts, any incidental electrical connections needed to complete the installation, and calibrating the controls and testing the machinery's operation when done by employees of an employer having operations subject to this classification. Placement of heavy machinery must often be done with cranes or by rigging hoists. This classification also includes the dismantling and removal of machinery and equipment covered by this classification.

(2001 Ed.)

0603-05 Dynamos, electrical generators and turbines: Installation, service and/or repair

Applies to contractors engaged in the installation, service and/or repair of dynamos, electrical generators and turbines at a customer's location. A dynamo is a generator of direct electrical current; a turbine is a mechanism that converts moving fluid into mechanical power. Customers include, but are not limited to, electrical utilities, manufacturing plants, mills, and telecommunications companies. Work contemplated by this classification includes, but is not limited to, preparation of a concrete pad on which the machinery will be installed, cutting and welding of brackets and mountings, assembly of component parts if necessary, any incidental electrical connections needed to complete the installation, and calibrating and testing the machinery's operation when done by employees of an employer having operations subject to this classification. Placement of heavy machinery must often be done with cranes or by rigging hoists. Also included is the dismantling and removal of dynamos, generators and turbines.

This classification excludes the installation of underground overhead power lines and poles by an electric utility company which is to be reported separately in classification 1301; the installation of overhead power lines by a nonelectric utility contractor which is to be reported separately in classification 0509; and the installation of underground power lines by a nonelectric utility contractor which is to be reported separately in classification 0107.

0603-07 Industrial plant maintenance by contractor

Applies to contractors engaged in maintaining, repairing and installing machinery on a long-term contract basis for customers at the customers' location. Customers include, but are not limited to, manufacturing or chemical plants, petroleum refineries, food processing plants and mills. Work contemplated by this classification includes all routine maintenance and repair of a customer's equipment such as, but not limited to, cleaning, oiling and regularly scheduled maintenance and replacement of machinery or machinery parts, equipment and other mechanical installations that are part of the customer's building when done by employees of an employer having operations subject to this classification.

0603-08 Metal playground equipment, portable bleachers or stages, above ground swimming pools: Installation, dismantling, and/or repair

Applies to contractors engaged in the installation, dismantling, and/or repair of metal playground equipment, portable bleachers or stages, and above ground swimming pools. Playground equipment includes, but is not limited to, swings, monkey bars, merry-go-rounds, and slides. Work contemplated by this classification for the erection of playground equipment and portable bleachers or stages includes boring holes in the ground (usually with an auger) into which the various pieces of equipment will be set in concrete, any incidental cutting, welding, drilling and bolting of the tubular steel components which are usually from one to four inches in diameter, and fastening on the chains, swings, handlebars, sliding surface, platforms, bench seats, or other components. Activities in the installation of above ground pools are simi-

[Title 296 WAC—p. 249]

lar. This classification also includes the application of any finish material or paint when done by employees of an employer having operations subject to this classification.

This classification excludes the installation of wood playground equipment which is to be reported separately in classification 0516.

0603-09 Commercial equipment: Installation, dismantling, service, and/or repair

Applies to contractors engaged in the installation, dismantling, service, and/or repair of commercial equipment such as, but not limited to, commercial dishwashing units, bakery and restaurant ovens, stoves, grills, sanitizers, steam tables, car washing equipment, commercial laundry equipment, electric entry doors, dry cleaning equipment, gas pumps, or parimutuel totalizer equipment at horse racing facilities. Work contemplated by this classification includes, but is not limited to, placing and leveling the equipment, any assembly of component parts if necessary, connecting or bolting to the wall or floor, making any necessary incidental plumbing or electrical connections, and calibrating and testing the equipment when done by employees of an employer having operations subject to this classification. Some pieces of equipment in this classification may be large enough that they must be moved and positioned with hoists or cranes. Also included is the dismantling and removal of commercial equipment.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-524, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-524, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 94-12-063, § 296-17-524, filed 5/30/94, effective 6/30/94; 93-12-093, § 296-17-524, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-524, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-524, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-524, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-524, filed 11/29/82, effective 1/1/83; Order 75-38, § 296-17-524, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-524, filed 11/9/73, effective 1/1/74.]

WAC 296-17-525 Classification 0604.

0604-04 Scrap metal dealers or processors: Collecting, sorting and reduction of scrap metal

Applies to establishments engaged as dealers or processors of ferrous and nonferrous scrap metals for resale. Ferrous metals are primarily composed of iron or steel. Nonferrous metals include, but are not limited to, aluminum, brass, bronze, copper, lead, magnesium, pewter, tin, and zinc. If the dealer collects scrap metals from mills, foundries, refineries, or fabricators, they usually leave dumpster containers with the "customer" and pick up the full containers with their own trucks. If they buy scrap from independent collectors, the collectors bring the metals to the dealer's yard. In either case, the metal is weighed, graded, and sorted by type at the dealer's yard. It may be resold as is to customers who occasionally come to the yard; however, it is usually further processed and prepared for shipping to industrial customers. Shipping is done by rail, ship, or common carrier. As an incidental service, scrap dealers may also buy back recyclable goods such as, but not limited to, aluminum cans, glass, and batteries; this activity is included within the scope of this classification when performed by employees of employers

subject to this classification. Processing includes one or more of the following operations: Cutting off impure metals or plastic parts with acetylene cutting torches; cutting scraps into smaller pieces with alligator shears or cutting torches; slicing heavier scrap metals or flattened automobiles with hydraulic guillotine shears; crushing auto bodies with crushers; ripping apart large pieces of scrap with shredders; separating metal from rubber, plastic, wood, dirt, and other materials with magnetic separators; removing insulated coverings from copper wire with wire choppers, and compressing scraps into bales with balers. Additional machinery includes, but is not limited to, conveyors, scales, forklifts, tractor-trailer trucks, cranes, electromagnets or grapples, front end loaders, and grinders. Because of recent EPA regulations, instead of melting down metals in their own furnaces, scrap dealers usually ship it to foundries or steel mills that conform with the regulations. However, reduction of metals is included within the scope of this classification if performed by an establishment subject to this classification.

This classification excludes dealers that sell new iron, steel, wire or cable which are to be reported separately in classification 2004; automobile or truck wrecking or dismantling establishments which are to be reported separately in classification 1104; and recycle, collection, and receiving stations (known as buy-back stations) for rags, bottles, paper, and metal containers which are to be reported separately in classification 2102.

Special note: Scrap metal dealers vary widely in the type of metals or usable items they buy and sell. Often the term "junk yards" is used to describe dealers who carry a sizable inventory of used goods, such as, but not limited to, bottles, rags, paper, appliances, nails, rubber, in addition to scrap metal in varying amounts. It is the activity of the business that must be considered when determining the classification, rather than how the business refers to its activities. Receiving/Buy-back stations for recyclable items in classification 2102 are different from dealers in classification 0604. Receiving stations buy back only recyclable items which they do not process, other than condensing the materials into bales, and selling it to others.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-525, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 89-24-051 (Order 89-22), § 296-17-525, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-525, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-525, filed 2/28/85, effective 4/1/85; Order 73-22, § 296-17-525, filed 11/9/73, effective 1/1/74.]

WAC 296-17-526 Classification 0606.

0606-01 Vending, coin-, or token-operated machines: Installation service and/or repair

Applies to establishments engaged in the installation, service and/or repair of vending, coin- or token-operated machines. Operations contemplated by this classification include, but are not limited to, delivering machines to desired location, unloading and setting up machines, servicing machines, collecting money, repairing machines, and restocking product into machines. Coin-operated machines include pay telephone booths, weight machines, juke boxes, change makers, pull tabs, slot machines, and similar gaming

devices. Vending machine products include, but are not limited to, soft drinks, candies, sandwiches, stamps, cigarettes, frozen desserts, coffee, and personal hygiene products. This classification also includes the preparation of products such as, but not limited to, salads, sandwiches, cookies, and deserts, and honor snack food services when performed by employees of an employer subject to this classification.

This classification excludes honor snack services operated independently from, and not in connection with, coin-operated vending machine services which are to be reported separately in classification 1101; and the installation of parking meter units which is to be reported separately in classification 0105.

0606-02 Fire extinguisher and fire safety equipment: Sales and service

Applies to establishments engaged in the sales and servicing of fire extinguishers and related safety equipment. Operations contemplated by this classification include, but are not limited to, retail and wholesale store operations, field testing services, recharging services, and related safety training. Establishments subject to this classification routinely sell a variety of home and commercial type fire extinguishers, protective clothing, gloves, and hats, specialty shoes, smoke and fire alarms, and first aid kits. Fire extinguisher sales and service companies may also carry other safety items such as traffic cones, construction and speed signs.

0606-03 Money collecting service of coin-operated and vending machines

Applies to establishments engaged in the removal and/or replacement of money into coin-operated machines. Operations contemplated by this classification are limited to the collection and replenishing of coins in coin-operated or vending machines. This classification also applies to replenishing currency in automated teller machines (cash machines) and removal of coins from parking meters and pay telephones.

This classification excludes the servicing of machines, placement of products into machines for sale, installation of machines, or any product preparation, which is to be reported separately in the applicable classification; installation of free standing automated teller machines which is to be reported separately in classification 0607; establishments engaged in the construction of structures which house automated teller machines, such as those found in parking lots of shopping centers, which are to be reported separately in the applicable construction classifications.

0606-12 Coin- or token-operated amusement devices in stores or shopping malls, N.O.C.: Installation, removal, service and/or repair

Applies to establishments engaged in the placement and servicing of coin- or token-operated amusement devices, not covered by another classification (N.O.C.), within stores and shopping malls for use by the general public. Operations contemplated by this classification include, but are not limited to, the installation, service, repair, or removal of the devices, such as, but not limited to, video games, pinball machines, carousels and small amusement rides for children. Establishments subject to this classification generally are not involved in the operations of arcades or amusement rides. If

an establishment subject to this classification also operates a video or amusement arcade, such operations may be reported separately in classification 6406 provided all the conditions of the general reporting rules covering the operation of a secondary business have been met.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-526, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-526, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-526, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 87-12-032 (Order 87-12), § 296-17-526, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-526, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-526, filed 2/28/85, effective 4/1/85; Order 73-22, § 296-17-526, filed 11/9/73, effective 1/1/74.]

WAC 296-17-527 Classification 0607.

0607-11 Household appliances: Installation, service and/or repair by nonstore service or repair company; dealers of used household appliances

Applies to establishments engaged in the installation, service and/or repair of electrical or gas household appliances and to dealers of used electrical or gas household appliances. Many establishments covered by this classification have small retail store operations where they offer reconditioned or second hand appliances for sale, a parts department, and an area where appliances brought into the shop are repaired. Although this classification deals primarily with service away from the shop, the store, parts department and shop operations are included within the scope of this classification. The term "household appliances" includes, but is not limited to, stoves, ovens, ranges, dishwashers, refrigerators, trash compactors, television sets, residential type garage door openers, washing machines, and clothes dryers. This classification also applies to the installation, service or repair of automated teller machines. Repair services provided by establishments subject to this classification may also include related smaller appliances such as video players, portable television sets, stereo systems, microwave and toaster ovens, blenders, coffee makers and mixers. The *servicing* of water softening systems, coffee and juice machines, and beer taps is also included in this classification.

This classification excludes dealers of new household appliances who are to be reported separately in classification 6306; installation, service, and/or repair of commercial appliances such as those used in laundries, bakeries, and restaurants which is to be reported separately in classification 0603; installation, service, and repair of commercial garage doors and openers which is to be reported separately in classification 0603; installation of water softening systems which is to be reported separately in classification 0306; and small table top or counter top appliance stores which are to be reported separately in classification 6406.

Special note: Classification 0607 is distinguishable from classification 6306-02 operations in that appliance stores covered in classification 6306-02 are engaged primarily in the sales of new appliances. Although classification 6306 includes repair of appliances, most repairs are related to warranty work and represent a minor part of the business. By contrast, the repair of appliances in classification 0607 is the primary activity of the business.

0607-16 Television antenna or satellite dish: Installation, removal, service and/or repair

Applies to establishments engaged in the installation, removal, service and/or repair of television antennas or satellite dish receiving units. Operations contemplated by this classification are limited to rooftop installation of television antennas or ground or rooftop-mounted satellite dish reception units. Establishments covered by this classification will generally employ technicians and installers to install systems and trouble shoot reception problems. Equipment is limited primarily to delivery trucks, vans, ladders, and small power and/or hand tools.

This classification excludes specialty contractors who install, remove, service or repair antennas, dish units, and/or other transmitting/receiving apparatus to a structure covered by classification 0508, who are to be reported separately in classification 0508; and establishments engaged in the sale of new console type and big screen televisions who also sell and install antennas which are to be reported separately in classification 6306.

0607-17A Safes or vaults, private mail boxes, or safe deposit boxes: Installation, removal, service and/or repair

Applies to contractors engaged in the installation, removal, service and/or repair of all types of safes or vaults regardless of size or application, private mail or postal boxes, or safe deposit box units within buildings. Safes and vaults are found in businesses such as, but not limited to, banks, jewelry stores, rare coin and stamp stores, grocery stores, and gasoline service stations, as well as in private residences. Services contemplated by this classification include, but are not limited to, safe opening services.

0607-17B Lock sets and/or dead bolt locks: New installation

Applies to the *new installation* of lock sets and/or dead bolt locks on buildings or structures by contractor or by employees of a locksmith. The term new installation applies to installing a lock set (locking doorknob) or a dead bolt where none previously existed. The process consists of measuring and marking where the unit is to be placed on the door, boring holes into the door to accept the lock set or dead bolt lock, and installing the lock set unit using a power drill and basic hand tools.

This classification excludes the installation of a *replacement* lock set or dead bolt lock unit by employees of a locksmith, and locksmith store operations which are to be reported separately in classification 6309.

0607-18A Window/door blinds, shades, curtains and drapes: Installation

Applies to contractors and employees of store operations who are engaged in the installation of indoor or outdoor window coverings, such as, but not limited to, blinds, shades, screens, exterior roll shutters and draperies or curtains, but does not include awnings. The process consists of marking the location of covering on the frame or opening, securing brackets or hardware, rods and poles, and installing the covering.

This classification excludes the installation of window and door awnings which is to be reported separately in the applicable classification, and the manufacture of coverings which is to be reported in the applicable classification.

Special note: Care should be taken when considering the assignment of a store classification to an establishment engaged in the installation of coverings to verify that a store exists. It is common for establishments subject to this classification to have show rooms to help customers visualize covering products available for sale. These establishments have little or no product available for immediate sale, as most items are special order from the manufacturer. A bona fide window/door covering store will have a large assortment of coverings, as well as related home interior products such as, but not limited to, pillows, small rugs, and accent pieces, readily available for sale to customers.

0607-19 Advertising or merchandise display: Set up or removal within buildings by nonstore employees

Applies to contractors engaged in the set up or removal of advertising or merchandise displays within buildings for retail or wholesale store customers. Operations contemplated by this classification will vary from seasonal panoramas with extensive carpentry, painting, and art work to dressing mannequins to be displayed in store windows. Classification 0607 also includes employees of a manufacturer and manufacturer's representatives who are involved in the setting up of these displays.

This classification excludes employees of store operations engaged in setting up displays who are to be reported separately in the applicable store classification as this is a common store activity.

0607-21 Meat slicer or grinder: Installation, service and/or repair

Applies to contractors and employees of equipment manufacturers engaged in the installation service and/or repair of meat cutting, slicing, or grinding equipment within stores, restaurants, or processing plants. Repair may be performed at the customer's location or in a shop operated by an employer subject to this classification. This classification includes repair shops, field technicians, installers, and warehouse or parts department employees.

Special note: Establishments subject to this classification generally do not have store operations. Equipment is generally ordered from the manufacturer or distributor and shipped to the customer's location where it will be installed. In the event that an establishment subject to this classification has a store operation it is included within classification 0607.

0607-22 Protective bumpers: Installation

Applies to contractors engaged in the installation of protective bumpers on structures such as, but not limited to, store loading docks for freight or cargo. Operations contemplated by this classification are limited to measuring the dock to be fitted with a rubber bumper, finish cutting or otherwise fabricating the rubber pieces to fit the required application, and fastening the dock bumper with the use of hand tools. Dock bumpers are made of rubber from recycled tires or similar pliable materials.

This classification excludes the manufacture of loading dock bumpers which is to be reported separately in the applicable manufacturing classification.

0607-23 Cellular phone systems or audio components: Installation in vehicles, service and repair

Applies to establishments engaged in the installation of cellular phone systems and/or audio components in vehicles. Audio components include, but are not limited to, radios and stereo systems, speakers and amplifiers, alarm systems, television units, antennas, two-way radio systems. This classification applies to installation employees of stores that sell products as well as to auto service centers that specialize in the installation of products covered by this classification.

This classification excludes retail and wholesale store operations which are to be reported separately in the applicable store classification.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-527, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-527, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-527, filed 5/31/96, effective 7/1/96. WAC 296-17-52701 Classification 0608.

0608-01 Electrical alarm systems: Installation, service, and/or repair

Applies to contractors engaged in the installation, service, and/or repair of electrical alarm systems such as, but not limited to, burglar, smoke, security, and fire, within buildings. Operations contemplated by this classification include, but are not limited to, installing low voltage wiring for security units, connecting control panels, installing motion or magnetic sensors on doors, windows, and hallways, installing security cameras and recording equipment, and installing smoke and fire alarm units on walls or ceilings. This classification includes both field and shop operations.

0608-02 Intercom or audio call box: Installation, service, and/or repair

Applies to contractors engaged in the installation, service, and/or repair of all types of building or plant audio communication systems such as, but not limited to, intercoms, sound and paging systems in stores and shopping malls, and call box units in factories and refineries. Operations contemplated by this classification include, but are not limited to, installation of low voltage wiring, installation of audio and speaker units and connecting control units. This classification includes both field and shop operations.

0608-04 Telephone and/or telephonic equipment - prewire by contractor: Installation, service, and/or repair

Applies to contractors engaged in the installation, service, and/or repair of all types of telephone and/or telephonic equipment within residences, office buildings, stores and

(2001 Ed.)

shopping malls, factories, refineries or other types of buildings. Operations contemplated by this classification include, but are not limited to, installation of low voltage wiring, installation of telephone units, and connecting control units. This classification includes both field and shop operations, as well as contractors engaged only in prewiring buildings for telephone and computer systems, but who do not install equipment.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-52701, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 89-24-051 (Order 89-22), § 296-17-52701, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 88-12-050 (Order 88-06), § 296-17-52701, filed 5/31/88, effective 7/1/88; 87-24-060 (Order 87-26), § 296-17-52701, filed 12/1/87, effective 1/1/88; 85-24-032 (Order 85-33), § 296-17-52701, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-52701, filed 2/28/85, effective 4/1/85.]

WAC 296-17-528 Classification 0701.

0701-00 New dam construction: All operations in dam site area

Applies to contractors engaged in the construction of new dams only, and includes all operations in the dam site area. A dam is a barrier built across a waterway to control the flow or level of water. Work contemplated by this classification includes the construction of the foundation and substructure such as, but not limited to, earth and rock excavation; boring or tunneling; pile driving or shaft sinking; caisson work; erection of cofferdams; placement of reinforcing steel and rebar; setting and stripping of forms, false work (temporary forms and support structures), concrete distributing apparatus; erection of scaffolds; pouring and finishing concrete; and the placement of gates, turbines, control towers and electrical wiring apparatus. This classification also includes the incidental construction of fish ladders as part of the new dam construction project.

This classification excludes all other construction, service, or repair work done as part of an existing dam which is to be reported separately in the classification applicable to the phase of construction work being performed. For example, the inspection of the foundation by divers is to be reported separately in classification 0202; the patching of cracks in the dam is to be reported separately in classification 0518.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-528, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-528, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 94-12-063, § 296-17-528, filed 5/30/94, effective 6/30/94. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-528, filed 11/27/85, effective 1/1/86; Order 76-36, § 296-17-528, filed 11/30/76; Order 73-22, § 296-17-528, filed 11/9/73, effective 1/1/74.]

WAC 296-17-529 Classification 0803.

0803-00 Cities and towns - all other employees

Applies to employees of cities or towns who perform manual labor, or who supervise a work crew performing manual labor such as custodial or maintenance, and machinery or equipment operators including transit bus drivers. This classification includes administrative personnel such as engineers, safety inspectors, and biologists, who have field exposure, and also includes store and stock clerks. For purposes of this classification, field exposure is defined as any exposure

[Title 296 WAC—p. 253]

other than the normal travel to a work assignment, such as an auditor or social worker would encounter.

This classification excludes municipal power districts which are to be reported separately in classification 1301; privately owned and operated bus or transit systems which are to be reported separately in classification 1407; irrigation and waterworks operations which are to be reported separately in classification 1507; law enforcement officers who are to be reported separately in classifications 6905 and 6906, as appropriate; fire fighters who are to be reported separately in classification 6904; volunteers who are to be reported separately in classification 6901; and clerical office and administrative employees who are to be reported separately in classification 5305.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-529, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-529, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-529, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-529, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-529, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-529, filed 11/30/83, effective 1/1/84; Order 77-27, § 296-17-529, filed 11/30/77, effective 1/1/78; Emergency Order 77-25, § 296-17-529, filed 12/1/77; Order 75-38, § 296-17-529, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-529, filed 11/9/73, effective 1/1/74.]

WAC 296-17-532 Classification 0901.

0901-00 Ship building and/or repair, N.O.C. (to be assigned only by the maritime underwriter)

Applies to establishments engaged in the building and/or repair of ships not covered by another classification (N.O.C.) and to the dismantling of hulls. Ships contemplated by this classification are recreational vessels under sixty-five feet and some commercial vessels such as, but not limited to, military vessels, tugs, scows, and barges. This classification may also include vessels over sixty-five feet that do not meet the situs and status provisions of the United States Longshore and Harbor Workers Compensation Act. This classification includes shop operations.

This classification excludes wood boat building and repair which is to be reported separately in classification 2903; sheet aluminum boat building which is to be reported separately in classification 3404; fiberglass boat building which is to be reported separately in classification 3511; plate aluminum boat building which is to be reported separately in classification 5209; and boat dealers, marinas, and boat house operations including repair centers which are to be reported separately in classification 3414.

Special note: This classification is seldom assigned as most work would be covered by LHWCA. Commercial vessels included in this classification are required to have a Small Vessel Exception Certificate issued by the U.S. Department of Labor.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-532, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-532, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 90-13-018, § 296-17-532, filed 6/8/90, effective 7/9/90; 89-24-051 (Order 89-22), § 296-17-532, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-532, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-532, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-532, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-532, filed 11/9/73, effective 1/1/74.]

WAC 296-17-534 Classification 1002.

1002-00 Sawmills: Operation and maintenance

Applies to establishments engaged in the operation and maintenance of a sawmill. Sawmills receive raw logs which they usually store temporarily in their yard before cutting them into rough and finished lumber. This classification includes operations such as, but not limited to, loading raw logs onto the conveyor or log slip; sawing logs with a variety of head, cut-off, circular or band saws; grading and sorting lumber; drying green (wet) lumber; and the stacking and storing of lumber. The raw logs are cut into rough lumber, such as cants and blocks, or into finished lumber, such as posts, planks or boards.

This classification excludes all operations conducted in the woods, such as logging or use of a portable sawmill, which is to be reported separately in classification 5001, and establishments engaged *only* in the manufacturing of wood, veneer, veneer products, or lumber remanufacturing which is to be reported separately in the classification applicable to the manufacturing being performed.

1002-08 Shake and shingle mills - automated process

Applies to establishments operating an automated shake and shingle mill which manufacture shakes, shingles and/or ridge caps using automated processes. For purposes of this classification, automated processes refers to shake and shingle mills equipped with automatic feeders on all saws, adjustable packing and cutting stations, and fully automatic systems for conveying material to work stations. All equipment must be equipped with automatic shut off switches. Within a shingle mill the operation of a trim saw must be performed by an individual as a separate function from that of the shingle saw operator (shingle sawyer is not to perform both functions). Shake splitters must be equipped with a gauge control mechanism which permits the operator to automatically set the thickness of the cut. Conveyor systems must have dual controls to allow the deck man and sawyer the ability to control incoming material to the work station.

Block mills must be equipped with an automated pallet dump to eliminate the handling of material to the sawyer work station or an adjustable scissor lift adjacent to the shingle saw or shake splitter. Blocked wood purchased by mills must be contained in pallets prior to entering the mill yard or premises. Log mills must be equipped with a fully mechanized log slip (used to move logs into the deck area), log levelers, stabilizers, and lifters must be present in the deck area, automatic deck cut-off saw, live deck for moving material from the deck to the splitting area and overhead mounted splitters. Trim saws, also referred to as clipper saws, must be equipped with a laser guide or quartz light. This lighting reveals to the operator where its saw blade is in relationship to the material being processed.

For purposes of this classification, the following terms or words shall be given the meanings below:

Automatic deck or cut-off saw: A large saw, usually circular, used to trim logs to a specified length (rounds) before they enter a manufacturing plant.

Clipper saw: A machine used to make shingle edges parallel.

Shingle: Roofing or siding material having sawn faces and backs, are of a standard thickness at the butt end and tapered finish at the other end.

Shake: Roofing or siding material having at least one surface with a natural grain textured split surface.

Live deck: A chain driven platform located in the same proximity as the deck saw and is used to convey cut rounds from the cutting area to the splitting area.

Log stabilizer: A levered device adjacent to the deck saw used to hold the log steady while it is being cut.

Log slip: A chain driven conveyor used to move logs into the deck area.

Laser or quartz guide light: An overhead mounted light above a saw that illuminates that portion of a work surface where the saw blade will pass or make a cut.

Log leveler: A levered device adjacent to the deck saw used to level a log automatically.

Overhead splitter: A ceiling mounted hydraulic, air, or electrically operated apparatus with wedge shaped end that is used to split log rounds into block wood when activated by the splitterman.

Shingle saw: A machine used to make shingles.

Shake splitter: A machine used to split blocks into shake blanks.

Shake saw: A machine used to saw shake blanks into a finished wedged shaped product.

This classification excludes all operations conducted in the woods, such as logging or the cutting and splitting of shake or shingle bolts, which are to be reported separately in classification 5001.

Special notes: Shake and shingle mills not meeting all the conditions as set forth above shall be reported separately in classification 1005 "shake and shingle mills, N.O.C."

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-534, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-534, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 90-01-013 (Order 89-21), § 296-17-534, filed 12/8/89, effective 1/8/90. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-534, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-534, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-534, filed 11/29/82, effective 1/1/83; 81-24-042 (Order 81-30), § 296-17-534, filed 11/30/81, effective 1/1/82; 80-17-016 (Order 80-23), § 296-17-534, filed 11/13/80, effective 1/1/81; Order 77-27, § 296-17-534, filed 11/30/77, effective 1/1/78; Order 76-36, § 296-17-534, filed 11/30/76; Order 73-22, § 296-17-534, filed 11/9/73, effective 1/1/74.]

WAC 296-17-535 Classification 1003.

1003-02 Dry kiln operations

Applies to establishments engaged in kiln drying of wood as a service for customers in the wood products industry. They may also purchase and dry wood themselves for later sale to a wood product manufacturer. Operations contemplated by this classification include, but are not limited to, receiving green lumber or logs, peeling (mechanized or manual), any incidental machining or turning, layering on a trolley (with spacers in between to allow for air circulation), drying in the heated kiln, and the incidental application of preservative, fire retardant, or insecticide treatments, storing, and delivery. Preservatives may be oil or water based and may be applied through a heated, pressurized vacuum process in an autoclave, by surface application (spraying, brushing,

dipping) or by soaking in tanks. Machinery and equipment includes, but is not limited to, log handling and trimming machinery, kilns, boilers that heat the kilns, autoclaves, storage tanks, trolley cars, fork lifts, hand tools and delivery trucks.

This classification excludes dry kiln operations that are part of a wood, veneer or lumber product manufacturing or remanufacturing operation which are to be reported separately in the classification applicable for the operation being performed; all operations conducted in the woods, such as the felling of timber, which are to be reported separately in the applicable logging classification, and work conducted away from the shop or yard, except delivery, which is to be reported separately in the classification applicable for the work being performed.

1003-03 Creosote works; pile and pole treating

Applies to establishments engaged in treating wood poles with creosote or other chemicals to inhibit deterioration. Poles produced by this type of business are intended for use as utility line poles, supports for bridges and trestles, or piles to be driven into the ground as part of the support for a pier or other structure. Operations contemplated by this classification include, but are not limited to, receiving logs, storing, seasoning (either by air or kiln drying), peeling (mechanized or manual), any incidental machining and turning (which may include cutting material into ties or cross arms), the application of creosote or other chemical preservative, and pick up and delivery. Preservative may be applied to seasoned wood through a heated, pressurized vacuum process in an autoclave, by surface application (spraying, brushing, dipping), or soaking in tanks. Machinery and equipment includes, but is not limited to, log handling/trimming/cutting machinery, kilns, boilers that heat the kiln, autoclaves, storage tanks, trolley cars for use in the kiln, fork lifts, hand tools, and trucks.

This classification excludes all operations conducted in the woods, such as the felling of timber, which are to be reported separately in the applicable logging classification, and work conducted away from the shop or yard, except delivery, which is to be reported separately in the classification applicable for the work being performed.

1003-04 Pole yards

Applies to establishments engaged in producing wood poles to a customer's specifications or for their own resale. These poles are intended for a variety of uses and are finished to varying requirements. Work contemplated by this classification includes, but is not limited to, receiving logs, storing, seasoning (either by air or kiln drying), peeling (mechanized or manual), incidental machining or turning (which may include cutting some material into cross arms, cutting and boring), the application of creosote or other chemical preservative, and pick up and delivery. Preservative may be applied to seasoned wood through a heated, pressurized vacuum process in an autoclave, by surface application (spraying, brushing, dipping), or soaking in tanks. Machinery and equipment includes, but is not limited to, log handling/trimming/cutting machinery, kilns, boilers that heat the kiln, autoclaves, storage tanks, trolley cars for use in the kiln, fork lifts, hand tools, and trucks.

This classification excludes all operations conducted in the woods, such as the felling of timber, which are to be reported separately in the applicable logging classification, and work conducted away from the shop or yard, except delivery, which is to be reported separately in the classification applicable for the work being performed.

1003-05 Masts and spars yards

Applies to establishments engaged in producing wood masts and spars. Masts and spars are the main and secondary supports, respectively, for sails and running rigging on sailing vessels. These businesses may also produce poles for other uses which may need to be more precisely shaped and finished than those produced in 1003-04. Work contemplated by this classification includes, but is not limited to, receiving logs, storing, seasoning (either by air or kiln drying), peeling the logs (mechanized or manual), machining and turning to size (which may include cutting and boring holes), application of chemical preservative, sanding if necessary, and pick up and delivery. The application of wood finish is also included when performed by employees of an employer having operations subject to this classification. Preservative may be applied to seasoned wood through a heated, pressurized vacuum process in an autoclave, by surface application (spraying, brushing, dipping), or soaking in tanks. Machinery and equipment includes, but is not limited to, log handling/trimming/cutting machinery, kilns, boilers that heat the kiln, autoclaves, storage tanks, trolley cars for use in the kiln, fork lifts, wood finishing equipment, hand tools, and trucks. This classification includes the production of finished logs that will be used in the manufacture of log houses or cabins.

This classification excludes all operations conducted in the woods, such as the felling of timber, which are to be reported separately in the applicable logging classification, and work conducted away from the shop or yard, except delivery, which is to be reported separately in the classification applicable for the work being performed.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-535, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-535, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-535, filed 11/30/83, effective 1/1/84; Order 77-27, § 296-17-535, filed 11/30/77, effective 1/1/78; Order 74-40, § 296-17-535, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-535, filed 11/9/73, effective 1/1/74.]

WAC 296-17-53501 Classification 1004.

1004-00 Log storage and log sorting yards

Applies to establishments engaged in the operation of log storage or sorting yards. The logs may be owned by the yard, for later sale, or stored for others. Operations contemplated by this classification include, but are not limited to, loading/unloading log trucks, grading logs by type or size, stacking logs, recordkeeping, security and routine maintenance of grounds and equipment.

This classification excludes all trucking outside of the yard which is to be reported separately in classification 1102; log storage or sorting yards operated by a logging company at a side or a remote location, which are considered an inclusion and are to be reported separately in classifications 5001 or 5005 as applicable; and log storage yards operated in con-

junction with a pole yard, log drying, or wood products manufacturing business which are to be reported separately in the classification applicable to the business.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-53501, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-53501, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-53501, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-53501, filed 11/30/83, effective 1/1/84; 80-17-016 (Order 80-23), § 296-17-53501, filed 11/13/80, effective 1/1/81.]

WAC 296-17-53502 Classification 1005.

1005-02 Shake and/or shingle mills

Applies to establishments engaged in the operation and maintenance of a shake and/or shingle mill. Work contemplated by this classification includes receiving raw logs which they cut and split into shakes, shingles and ridge caps. A shake is a roofing or siding material having at least one surface with a natural grain textured split surface. A shingle is a roofing or siding material having sawn faces and backs and are of a standard thickness at the butt end and tapered finish at the other end. A ridge cap is produced from two pieces nailed together to form a "v" shape placed on the center line of a roof. Raw logs are temporarily stored in the yard. This classification may include operations such as, but not limited to, loading raw logs onto a conveyor or log slip, cutting the log into rounds, splitting the rounds into blocks, feeding the blocks through a shake or shingle saw, grading and sorting, bundling, stacking and storing of finished shakes, shingles and/or ridge caps. Machinery and equipment includes, but is not limited to, log loaders, conveyors, log slips, overhead splitters, cut-off saws, shake saws, shingle saws, taper saws, head saws, pallet presses, and forklifts.

This classification excludes establishments engaged exclusively in the manufacturing of ridge caps or shims which are to be reported separately in classification 2903; automated shake and shingle mills which are to be reported separately in classification 1002 provided the entire process to produce shakes and shingles uses automated processes at the mill site, meets the requirements defined in WAC 296-17-534; and all operations conducted in the woods, such as logging or the cutting and splitting of shake or shingle bolts, which are to be reported separately in the applicable logging classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-53502, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-53502, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-53502, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-53502, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-53502, filed 11/30/81, effective 1/1/82.]

WAC 296-17-53504 Classification 1007.

1007-08 Geophysical exploration, N.O.C.

Applies to contractors engaged in geophysical exploration, with no core drilling, and without seismic detection, who are not covered by another classification (N.O.C.). The more common methods of geophysical exploration are gravitational, electric and magnetic. In the gravitational method, delicate pendulums and torsion balances capable of detecting differences in the gravitational pull of the earth at various places enable the geologist to tell where oil is likely to be

found. There are two electrical methods, resistivity and inductive. In the resistivity method, measurements are taken on an ohmmeter, which indicate the resistivity of the subsurface. The inductive method is somewhat comparable, but instead of determining the resistivity of the subsurface formations, the conductivity is measured enabling the geologist to determine the character of the subsurface being studied. The magnetic method is accomplished by means of a highly developed form of magnetic dipping needle with a telescope magnifier. The magnetic attraction exerted by magnetic rocks and formations causes the needle to deflect from its horizontal plane, thereby enabling a geologist to develop contour maps with lines of equal magnetic attraction. This classification includes prospectors who may specialize in particular instrumentation such as electrical, gravity, magnetic or seismic. The prospector studies structure of subsurface rock formations to locate petroleum deposits; conducts research using geophysical instruments such as seismograph, gravimeter, torsion balance, and magnetometer, pendulum devices, and electrical resistivity apparatus to measure characteristics of the earth; computes variations in physical forces existing at different locations and interprets data to reveal subsurface structures likely to contain petroleum deposits; and determines desirable locations for drilling operations. This classification includes prospecting for mineral ores and the testing of soil for percolation when performed by employees of an employer subject to this classification.

This classification excludes core drilling and seismic geophysical exploration which are to be reported separately in classification 0103, and geophysical crews employed by oil companies who are to be reported in the classification applicable to the business.

Special note: When assigning classifications 1007-08, 4901-16 - Geologists, and 0103-10 - Seismic geophysical exploration, care must be taken to look beyond the word "geologist" to determine the actual nature of the activities being performed.

1007-09 Testing and inspecting of pipelines using radiographic or X-ray analysis process by contractor at industrial plants or construction sites

Applies to establishments engaged in the testing or inspecting of pipelines or conduits for others, provided the testing or inspecting is not performed in conjunction with the construction of the pipeline. This classification includes testing or inspecting involving radiographic or X-ray analysis processes such as the X-raying of containers, inspecting of utility lines, and the drawing of oil samples on-site when performed by employees of an employer subject to this classification. Classification 1007-09 is assigned primarily to field activities.

This classification excludes testing or inspecting done in conjunction with construction which is to be reported separately in the appropriate construction classification.

1007-15 Inspection and grading bureaus, N.O.C.; log scaling and grading bureaus; lumber inspection services; weigh scale attendants, N.O.C.; weather stations; rainmaking - no aircraft

(2001 Ed.)

Applies to establishments operating as *inspection and grading bureaus*, not covered by another classification (N.O.C.), including, but not limited to, those involved in inspecting and grading commodities such as logs, lumber, shingles, shakes, poles, and railroad ties. The commodity is examined and stamped with a grademark which indicates the grade, species, producer's name or number and other pertinent data. A certificate of inspection may be issued in lieu of a grademark. The purpose of the inspection is to grade, tally, and stamp only those products which meet certain required specifications and to cull those products which do not meet the established standards. *Log scaling and grading bureaus* measure the logs, and by applying log rule formulas, determine the net yield, usually expressed in board feet. A scale ticket containing descriptive data is attached to the end of the log. This classification also applies to *weigh scale attendants* not covered by another classification (N.O.C.), when the service is available to the general public, otherwise the weigh scale attendants are to be included in the basic classification of the business. This classification includes establishments engaged exclusively in such services as auto emission control testing, air flow balancing and testing, the balancing and testing of heating, ventilating and air conditioning systems, hydrostatic testing of such objects as boilers, tanks, pipes and fittings using compressed air or water pressure to detect leaks, the strength testing of building material such as, but not limited to, asphalt, concrete and steel; and the testing or inspecting of steel weldments. This classification also includes *weather stations* which observe and record weather conditions for use in forecasting, and which read weather instruments, including thermometers, barometers, and hygrometers to ascertain elements such as temperature, barometric pressure, humidity, wind velocity, and precipitation. Weather data is transmitted and received also from other stations. A fully automated (computerized) weather station can be reported under classification 4904. This classification also covers rainmaking without the use of aircraft.

Special note: Classification 1007, classification 5001, and classification 5004, shall not be assigned to the same business unless the operations described by these classifications are conducted as separate and distinct businesses and the conditions set forth in the general reporting rules covering the operation of a secondary business have been met.

1007-16 Foresters (to be assigned only by reforestation underwriter)

Applies to foresters engaged in forest management for others. Foresters may plan and direct forestation or reforestation projects, map forest areas, estimate standing timber and future growth, or manage timber sales. Foresters also may plan cutting programs to assure continuous production of timber, and determine methods of cutting and removing timber with a minimum of waste and environmental damage. They may plan and design forest fire suppression and fire-prevention programs, plan and design construction of fire towers, trails, roads and fire breaks and may also plan and design projects for control of floods, soil erosion, tree diseases, and insect pests in forests. Foresters may specialize in one aspect of forest management.

[Title 296 WAC—p. 257]

This classification excludes manual labor or direct supervision of manual labor.

Special note: Classification 1007, classification 5001, and classification 5004 shall not be assigned to the same business unless the operations described by these classifications are conducted as separate and distinct businesses and the conditions set forth in the general reporting rules covering the operation of a secondary business have been met.

1007-18 Foresters and timber cruisers - scientific tree, forestry, and watershed studies (to be assigned only by reforestation underwriter)

Applies to establishments engaged in scientific tree studies for others. Scientific tree studies are research oriented; random sample plots are measured and data such as the size of trees, species, disease and insect or animal damage, and seedling mortality, are recorded. Plots are maintained where each tree is tagged, its genealogy recorded, and growth statistics entered. A scion (a detached living shoot or twig) may be grafted onto a root stock and detailed records maintained of its genealogy and growth. Other data, such as fertilizers used, also may be maintained. These test plots are sometimes referred to as progeny plots or progeny studies. This classification includes scientific studies of watersheds or watershed restoration which involves the evaluation of slopes, road systems, streams and the entire ecosystem (an ecological community with its physical environment, regarded as a unit). This classification also includes precommercial thinning layouts or pruning inspections to determine if an area is ready for thinning or pruning.

This classification excludes manual labor or direct supervision of manual labor.

Special note: Classification 1007, classification 5001, and classification 5004 shall not be assigned to the same business unless the operations described by these classifications are conducted as separate and distinct businesses and the conditions set forth in the general reporting rules covering the operation of a secondary business have been met.

1007-19 Timber cruisers (to be assigned only by reforestation underwriter)

Applies to timber cruisers engaged in cruising timber land to estimate the volume and quality of a timber stand through an on-site visual inspection for others. A timber cruiser collects data concerning forest conditions for appraisal, sales, administration, logging, land use, and forest management planning. A forest area is traversed on foot in an established pattern and sampling techniques applied. The height and diameter of each tree in a test site is recorded as are defects such as rot and bends, to estimate the useable wood in each tree. From the data collected a summary report is prepared giving the timber types, sizes, condition and outstanding features of an area, such as existing roads, streams, and communication facilities. Trees may be marked with spray paint to denote trail, boundary, or for cutting.

This classification excludes manual labor or direct supervision of manual labor.

Special note: Classification 1007, classification 5001, and classification 5004 shall not be assigned to the same business unless the operations described by these classifications are conducted as separate and distinct businesses and the con-

ditions set forth in the general reporting rules covering the operation of a secondary business have been met.

1007-20 Foresters and timber cruisers - tree auditing (to be assigned only by reforestation underwriter)

Applies to establishments engaged in tree auditing for others. This service is generally associated with new plantations and is the process of evaluating the quality and the rate of planting of new trees, as well as surveying newly planted sites on a periodic schedule to determine the survival rate.

This classification excludes tree auditing services when planting is in process, which is to be reported separately in classification 5004, and manual labor or direct supervision of manual labor.

Special note: Classification 1007, classification 5001, and classification 5004 shall not be assigned to the same business unless the operations described by these classifications are conducted as separate and distinct businesses and the conditions set forth in the general reporting rules covering the operation of a secondary business have been met.

1007-21 Environmental and ecological surveyor services, N.O.C.

Applies to establishments engaged in providing environmental and ecological surveying services not covered by another classification (N.O.C.) for others. Environmental or ecological surveying firms typically serve as consultants to industrial or commercial enterprises, governmental agencies or private citizens. Environmental engineer is a term applied to engineering personnel who apply knowledge of chemical, civil, mechanical, or other engineering disciplines to preserve the quality of life by correcting and improving various areas of environmental concern, such as air, soil, or water pollution. Services include identifying and projecting potential environmental impact resulting from proposed projects, assessing the source, severity and extent of environmental damage resulting from human or natural causes, and recommending solutions to protect or regain the natural balance between organisms and their environment. Activities of environmental surveying/consulting establishments include, but are not limited to, locating archaeological sites for preservation, researching and collecting field data on birds and insects, preparing impact statement for landowners and developers, stream and fish monitoring, botanical surveys, wetland surveys, soil and groundwater testing for contamination, air monitoring including industrial hygiene services, monitoring and testing at hazardous waste sites, providing advice on pollution control at its source, and developing a plan for cleaning up already recognized problems such as waste disposal sites, radon or asbestos contamination. Other services provided may include helping clients develop a system for complying with various governmental regulations. This classification includes employees of the environmental surveying service who conduct field work as well as those who are assigned to act as project managers or project superintendents to oversee the work of remediation contractors.

This classification excludes all types of remediation work which is to be reported separately in the classification applicable to the type of remediation work being performed, and surveyors employed by construction companies or other

types of businesses who are to be reported separately in the applicable classifications.

Special note: When assigning classifications 1007 or 4901, care must be taken to look beyond the words "consulting" or "engineering" to determine the actual nature of the activities being performed. Classifications 1007 and 4901 shall not be assigned to the same business unless the operations described by these classifications are conducted as separate and distinct businesses, each business has separate and distinct employees, and the conditions set forth in the general reporting rules covering the operation of a secondary business have been met.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-53504, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 94-12-063, § 296-17-53504, filed 5/30/94, effective 6/30/94; 93-12-093, § 296-17-53504, filed 5/31/93, effective 7/1/93. WAC 296-17-536 Classification 1101.

1101-04 Automobile delivery or repossessing

Applies to establishments engaged in delivering or repossessing individual automobiles for others. Generally, a client will contact the service company and arrange for a car to be delivered to a specific destination or request that a car of which they (client) is the legal owner, be repossessed and delivered to a specific location. In either case, a driver, not a motorized transportation service, does the delivery. Duties of employees subject to this classification are generally limited to unlocking vehicles and driving. It is common on long distance deliveries for the service company to use more than one driver. This classification also applies to drivers of sound trucks.

This classification excludes operation of tractor/trailer combinations to transport vehicles which is to be reported separately in classification 1102 or classification 1109, depending on the method of transporting.

1101-06 Delivery by retail and wholesale stores and distributors, N.O.C.

Applies to employees of retail and wholesale stores engaged in inter-store delivery, customer merchandise delivery when excluded from the store classification, and delivery not covered by another classification (N.O.C.). Employees subject to this classification are generally involved in loading and unloading delivery vans or trucks and driving from store to store, or from a store to a customer's location. Drivers may or may not have designated routes or delivery areas. This classification is not applicable to establishments engaged in general trucking services which are to be reported separately in classification 1102. Classification 1101 is distinguishable from delivery operations reported in classification 1102 in that businesses covered by classification 1102 generally do not own the merchandise they are transporting.

1101-09 Parcel delivery companies for delivery of small parcels

Applies to establishments engaged in the delivery of small parcels for others. Establishments subject to this clas-

sification may offer overnight express services, but usually do not deliver packages that exceed 150 pounds. Work contemplated by this classification includes, but is not limited to, driving, loading and unloading delivery vehicles. This classification also applies to contract mail delivery route drivers and contract hauling of mail between post offices.

This classification excludes the delivery of bulk freight such as that delivered by trucking companies which are to be reported separately in classification 1102.

1101-14 News agents or distributors of magazines, periodicals and telephone books - no retail dealers

Applies to establishments engaged in the distribution of newspapers, periodicals, and telephone books. Work contemplated by this classification includes, but is not limited to, driving, loading and unloading the vehicles, stocking shelves, and removing old periodicals from shelves.

1101-17 Driver delivery sales, N.O.C.

Applies to establishments engaged in route sales of a wide variety of merchandise not covered by another classification (N.O.C.), including, but not limited to, hand tools, automotive supply, household items, used clothing, snack foods (such as potato chips), dairy products, greeting cards, over-the-counter medications, grooming products, and pamphlets. Sales personnel drive company vehicles to deliver products which have been previously ordered and, while at the customer's location, solicit further orders, remove outdated merchandise, and restock shelves or displays. They may also call on new customers along their route. The classification also applies to establishments or employees who travel to their customer's place of business and remove outdated merchandise from shelves and restock with new products.

1101-19 Route food services

Applies to establishments engaged in route food services where prepackaged, prepared food is sold, or where food may be prepared in the mobile unit for immediate sale by employees of the route food service. Duties include, but are not limited to, driving, food preparation, loading and unloading the vehicle, and cashiering. Typical route food services include, but are not limited to, traveling coaches that sell beverages and prepared pastries or snack items at various locations during a given work day, ice cream wagons, refrigerated trucks that sell specialty prepackaged foods to route customers, or mobile "short-order" food services that sell fast foods at special events or at locations where hot food may not be available.

This classification excludes food preparation at a fixed location for the route food vehicles which may be reported separately in classification 3905 or as applicable.

1101-20 Computer tape or accounting records delivery service

Applies to establishments engaged in picking up and delivering computer tape, accounting records, or similar financial records to or from storage centers to customer locations. Delivery drivers in this classification often work in metropolitan areas and drive small cars or bicycles.

1101-21 Errand service

Applies to establishments engaged in providing errand services for others. Types of errands include, but are not limited to, shopping services, delivery of food, beverages or other commodities, and delivery of body fluid samples to laboratories. Vehicles used by these services are typically small cars or bicycles. This classification also applies to the distribution of sample merchandise by vehicle.

WAC 296-17-537 Classification 1102.**1102-02 Interstate trucking**

Applies to establishments engaged in interstate trucking. Interstate trucking is the hauling of goods that either originate out of state or have an out-of-state destination. Duties include driving, mechanical repair, and in some cases loading/unloading vehicles. The loading and unloading may be done with forklifts, pallet jacks, hand trucks, or by hand. The drivers may have an assigned route, or they may be assigned a different destination each trip.

Special notes: Effective July 1, 1993, trucking establishments are allowed to have both the trucking classification 1102 and the freight handling classification 2002. However, hours cannot be split for a worker who works in both classes. If an employee has any driving duties, *all* their hours are to be reported in classification 1102. Establishments subject to this classification are to report actual hours worked for each driver. However, the hours are to be capped at 520 hours per driver per quarter. Detailed information can be found in the general audit rule covering the trucking industry and in RCW 51.12.095.

1102-03 Intrastate trucking

Applies to establishments engaged in intrastate trucking. Intrastate trucking is the hauling of goods *only* within the boundaries of a state. In other words, the goods must have both an origin and destination in the same state. Duties include driving, mechanical repair and, in some cases, loading and unloading the vehicles. The loading and unloading may be done with forklifts, pallet jacks, hand trucks, or by hand. The drivers are usually assigned routes or a territory. Businesses in this classification usually have terminals or storage depots where merchandise is stored awaiting transfer.

Special notes: Effective July 1, 1993, trucking establishments are allowed to have both the trucking classification 1102 and the freight handling classification 2002. However, hours cannot be split for a worker who works in both classes. If an employee has any driving duties, *all* their hours are to be

reported in classification 1102. Establishments subject to this classification are to report actual hours worked for each driver. However, the hours are to be capped at 520 hours per driver per quarter. Detailed information can be found in the general audit rule covering the trucking industry and in RCW 51.12.095.

1102-04 Combined interstate/intrastate trucking

Applies to establishments engaged in a combination of interstate/intrastate trucking activities. Businesses assigned to this classification generally do not produce, manufacture, or legally own the goods they are hauling. Interstate trucking is the hauling of goods which either originate out of state or have an out-of-state destination. Intrastate trucking is the hauling of goods *only* within the boundaries of a state. In other words, the goods have both an origin and destination in the same state. Duties include driving, mechanical repair and, in some cases, loading and unloading the vehicles. The loading and unloading may be done with forklifts, pallet jacks, hand trucks, or by hand. The drivers are usually assigned routes or a territory. Establishments in this classification usually have terminals or storage depots where merchandise is stored awaiting transfer.

Special notes: Effective July 1, 1993, trucking establishments are allowed to have both the trucking classification 1102 and the freight handling classification 2002. However, hours cannot be split for a worker who works in both classes. If an employee has any driving duties, *all* their hours are to be reported in classification 1102. Establishments subject to this classification are to report actual hours worked for each driver. However, the hours are to be capped at 520 hours per driver per quarter. Detailed information can be found in the general audit rule covering the trucking industry and in RCW 51.12.095.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-537, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-537, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-537, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-537, filed 11/30/83, effective 1/1/84; Order 74-40, § 296-17-537, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-537, filed 11/9/73, effective 1/1/74.]

WAC 296-17-538 Classification 1103.**1103-00 Coal and solid fuel dealers - yard operations**

Applies to establishments engaged in the sale and delivery of coal, pressed wood fiber logs (fire logs), wood stove pellets, wood chips, and sawdust. Operations contemplated by this classification include all related store, yard and delivery operations when conducted by employees of employers having operations subject to this classification.

This classification excludes all manufacturing operations which are to be reported separately in the classification applicable to the material and process used, and all mining operations which are to be reported separately in the applicable classification.

1103-02 Firewood dealers - yard operations

Applies to establishments engaged in the sale of firewood. This classification is limited to establishments operating a firewood sales lot where customers either pick up firewood or the dealer will make deliveries from. Operations

contemplated by this classification are limited to yard and delivery operations.

This classification excludes firewood cutting operations conducted in timber or forest lands and firewood sales lots conducted from a logging landing which are both to be reported separately in the applicable logging classification.

Special note: Establishments subject to this classification may purchase pre-cut firewood from other nonrelated businesses or may have a cutting crew. The only cutting operations allowed in classification 1103 are those conducted in the sales lot.

1103-04 Composting

Applies to establishments engaged in composting yard waste or other materials. Depending on the type of yard waste accepted, grinders may be used to reduce the size of the material for faster composting. Once the material is an acceptable size for composting, it may be placed in static curing piles, turned periodically to aerate until it is adequately decomposed, then sometimes screened. Another method of curing is to place the waste material in long rows, called "windrows" which are turned periodically. Other establishments, either operated privately or by municipalities, may use processed and dewatered sludge which is mixed with other materials such as shredded yard waste, sawdust, or other wood waste. The mixture must be designed to have the right degree of moisture and air to maintain a temperature of between 130 and 160 degrees Fahrenheit. The end product, in either instance, is a "Class A" pathogen product, meaning it can be used in soil for raising vegetables and is referred to as "manufactured" soil. This classification includes delivery when performed by employees of an employer having operations subject to this classification.

1103-05 Pallet recycle service - yard operations

Applies to establishments engaged in the sale of used wood pallets to others. Operations contemplated by this classification are limited to the pick up of discarded used pallets from stores, warehouses, or other facilities, transporting of pallets to the establishment's sorting and storage yard where they are sorted by grade and size, reloading of pallets onto trucks, and delivery of pallets to customers.

This classification excludes all pallet repair activities which are to be reported separately in classification 2903.

1103-06 Top soil, humus, peat and beauty bark dealers - yard operations

Applies to establishments engaged in the sale of soils, humus, peat, and beauty bark to others. Operations contemplated by this classification are limited to the receipt of soils, peat, humus, bark and compost in bulk and the subsequent load out of bark, soil and related organic matter into customer vehicles. This classification includes custom mixing soils, incidental sales of landscaping rock, sand, gravel, and crushed rock, and delivery when performed by employees of an employer subject to this classification.

This classification excludes contract delivery by non-dealer employees who are to be reported separately in classification 1102, and digging of soils/humus/peat/gravel or grinding of bark which are to be reported separately in the applicable classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-538, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-538, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-538, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 87-12-032 (Order 87-12), § 296-17-538, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-538, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-538, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-538, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-538, filed 11/9/73, effective 1/1/74.]

WAC 296-17-53801 Classification 1104.

1104-00 Auto or truck wrecking or dismantling

Applies to establishments engaged in salvaging, dismantling and parting out motorized vehicles, motorcycles, and aircraft. Parts may be removed and inventoried or removed when there is a special request for them. Afterwards, hulls are stripped and may be crushed. Operations contemplated by this classification includes removal of salable parts with the use of hand tools and discarding frames and bodies for future sale to scrap dealers and metal manufacturers. Any subsequent breaking up of stripped chassis and bodies with torches or shears to be sold as iron or steel scrap is also included within the scope of this classification as is the reconditioning of the yard's own autos and trucks for resale. In addition to the yard work, salvaged parts will be reconditioned or repaired and sold over the counter. New parts may also be sold. A dismantler may locate and obtain parts from another yard for a customer. Dismantlers may haul cars and trucks to the yard by tow truck, flatbed, or multi-car carrier or the owner may bring the vehicle to the yard. Tow truck operations related to the hauling of vehicles purchased by the wrecking yard for sale by the yard are included within the scope of this classification.

This classification excludes establishments engaged in tow truck services to the public which are to be reported separately in classification 1109, and establishments engaged in salvaging, collecting, sorting and reducing scrap metal which are to be reported separately in classification 0604.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-53801, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-53801, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-53801, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-53801, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-53801, filed 11/29/82, effective 1/1/83.]

WAC 296-17-53802 Classification 1105.

1105-00 Septic tank pumping

Applies to establishments engaged in septic tank pumping services. Operations contemplated by this classification include driving, locating the septic tank and digging as necessary to uncover it, connecting the pumping hose to the septic tank, pumping out the sludge, and disposing of the waste products.

This classification excludes installation and repair of septic tanks or systems which are to be reported separately in classification 0108, and cleaning of sewage treatment tanks which is to be reported separately in classification 0504.

1105-01 Street sweeping; parking lot sweeping; and portable chemical toilet servicing

Applies to establishments that perform street sweeping and parking lot sweeping services for others. Trucks used for sweeping are equipped with rotating or nonrotating brushes and vacuum/suction devices. In addition to driving duties, the drivers may adjust/unclog the brushes, and clean the holding tanks contained on the sweeping or pumping vehicle. This classification also includes snow removal by plowing, delivery of portable toilets and the related servicing and disposal of waste products which are recovered by establishments subject to this classification.

1105-02 Vacuum truck services

Applies to establishments engaged in vacuum truck services for others. Services include, but are not limited to, cleaning of duct work, picking up waste oils, lubricants, anti-freeze, bilge water, and similar waste products. Establishments subject to this classification may offer a regular service, one-time or occasional pick-up service. The driver has kits for testing the materials and, if there is a question, a sample is taken to a laboratory for further analysis. If the waste material is acceptable, it is pumped into the tanker truck. The waste material may be consolidated with similar products and "bulked" in storage tanks, then taken to appropriate treatment or disposal facilities, or it may be taken directly to appropriate facilities. If it is to be "bulked" with other products, it will be filtered as it is pumped into the storage tanks and allowed to sit for a few days for any water to settle to the bottom of the tank and be drained off. Bulked materials may be hauled away by the establishment's own trucks or by common carrier. Establishments subject to this classification may pick up containers of used oil filters and bring them into their plant where they are sorted into crushed and uncrushed filters, and gaskets removed. This activity is included within the scope of this classification if it is an incidental service. This classification includes the related disposal of waste products which are recovered by establishments subject to this classification.

This classification excludes septic tank pumping which is to be reported separately in classification 1105-00.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-53802, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-53802, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-53802, filed 5/31/96, effective 7/1/96.]

WAC 296-17-53803 Classification 1106.**1106-00 Rental stores, N.O.C.; Truck canopy sales**

Applies to establishments engaged in the rental of items, not covered by another classification (N.O.C.), such as hand tools, air compressors, automotive tools, baby equipment, convalescent equipment, exercise equipment, floor care equipment, pressure washers, party and banquet equipment, light construction tools or equipment such as saws, drills, and sanders, and lawn and garden equipment, as opposed to machinery or larger commercial or industrial equipment. The tools and equipment are generally rented to homeowners for use on their property. Rental stores within this classification rent a variety of tools and equipment unlike specialty rental stores that specialize in one type of product. This classification includes clerical office personnel, sales personnel, as well as the maintenance and repair of rented goods when per-

formed by employees of the rental store. This classification also applies to establishments engaged in the sale and installation of truck canopies and related accessories, but who do not sell other types of vehicles or trailers.

This classification excludes establishments engaged in the rental of commercial or industrial equipment and/or machinery such as, but not limited to, bulldozers, tractors, and backhoes which are to be reported separately in classification 6409; establishments engaged in the rental of farm machinery equipment which are to be reported separately in classification 6408; establishments engaged in the rental of vehicles which are to be reported separately in the applicable classification; establishments engaged in the rental of sporting goods which are to be reported separately in classification 6309; establishments engaged in the rental of clothing or costumes which are to be reported separately in classification 6305; and establishments engaged in the rental of furniture which are to be reported separately in classification 6306.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-53803, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-53803, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-53803, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-53803, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-53803, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-53803, filed 11/29/82, effective 1/1/83.]

WAC 296-17-53805 Classification 1108.**1108-02 Glass tempering**

Applies to establishments engaged in glass tempering services for others. Operations contemplated by this classification include glass cutting, bending, grinding, beveling, and silvering. Tools and equipment include metal and wood cutting tools and machinery, grinders, sanders, drills, saws, knives, suction cups, putty, caulking, cleaning solvents, forklifts, packing materials, delivery and service vehicles and tempering ovens. The process of glass tempering consists of taking auto or sheet glass which has been purchased from a glass manufacturer or distributor and placing it in a tempering oven. The oven heat realigns the molecular structure of the glass creating added strength, however, the appearance of the glass remains unchanged. This classification includes the sale of accessories for flat glass such as sealants, screening, aluminum frames for storm windows and doors, mirror backings, frames and glass cleaners.

This classification excludes establishments engaged in the installation of glass, mirrors, aluminum or wood window sashes or similar products away from the shop which are to be reported separately in classification 0511; establishments engaged in the manufacture of glass which is to be reported separately in classification 3503; merchants who specialize in selling or installing auto glass which is to be reported separately in classification 1108-04; glass merchants engaged exclusively in flat glass sales which are to be reported separately in classification 1108-03; and combined auto/flat glass merchants with no tempering which are to be reported separately in classification 1108-05.

1108-03 Flat glass merchants - no tempering

Applies to establishments engaged in receiving, storing and selling all types of fabricated glass and plexiglas. Glass products include, but are not limited to, window glass, plate

glass, safety glass for automobiles, and mirrors. Work contemplated by this classification includes cutting of glass to customers specified dimensions, beveling, buffing, grinding, polishing, silvering of plate glass, and the installation of glass into frames within the shop or adjacent yard. Some dealers may specialize in cutting, selling or installing fabricated flat glass or they may also sell and install plate, laminated, window, cathedral, stained, bullet proof, opalescent flat, picture, skylight and tempered glass. Most glass dealers will cut glass to order. Tools and equipment include metal and wood cutting tools and machinery, grinders, sanders, drills, saws, knives, suction cups, putty, caulking, cleaning solvents, forklifts, packing materials, delivery and service vehicles. This classification includes the sale of accessories for flat glass such as sealants, screening, aluminum frames for storm windows and doors, mirror backings, frames and glass cleaners.

This classification excludes establishments engaged in the installation of glass, mirrors, aluminum or wood window sashes or similar products away from the shop which are to be reported separately in classification 0511; manufacturing of glass which is to be reported separately in classification 3503; glass merchants who perform glass tempering which are to be reported separately in classification 1108-02; and merchants who specialize in selling or installing auto glass which are to be reported separately in classification 1108-04.

1108-04 Auto glass merchants

Applies to establishments engaged in selling and installing automobile glass in vehicles. In addition to selling and installing new or replacement auto glass, merchants typically repair auto windshield cracks, scratches, bullseyes and breaks. Tools and equipment include metal and wood cutting tools, grinders, sanders, drills, saws, knives, windshield sticks, suction cups, putty, caulking, cleaning solvents, delivery and service vehicles. Solar tinting of auto glass with film to reduce heat and glare may also be performed, as well as selling and installing sun roofs. Auto glass merchants may offer 24-hour emergency service or pickup and delivery. Installation of auto glass, truck glass or boat tops performed in or away from the shop is included within the scope of this classification.

This classification excludes establishments engaged in the manufacturing of glass which are to be reported separately in classification 3503; tinting or the application of tinted plastic film to auto glass by an auto detailer which is to be reported separately in classification 3406; glass merchants who perform glass tempering which are to be reported separately in classification 1108-02; glass merchants exclusively dealing in flat glass which are to be reported in classification 1108-03; and combined auto/flat glass merchants with no tempering which are to be reported in classification 1108-05.

1108-05 Combined auto and flat glass merchants - no tempering

Applies to establishments engaged in receiving, storing and selling all types of fabricated glass and plexiglas as window glass, plate glass, safety glass for automobiles, mirrors and other types of glass at a permanent shop location or adjacent yard. Work contemplated by this classification includes cutting of glass to customers' specified dimensions, beveling, buffing, grinding, polishing, silvering of plate glass and the

installation of glass into frames. Tools and equipment include metal and wood cutting tools and machinery, grinders, sanders, drills, saws, knives, suction cups, windshield sticks, putty, caulking, cleaning solvents, forklifts, packing materials, and delivery and service vehicles. A glass merchant performing the installation of glass in automobiles is also included within the scope of this classification; as are related services such as, but not limited to, repair of auto windshield cracks, scratches, bullseyes and breaks; in vehicle tinting of auto glass to reduce heat and glare; and installing sun roofs. Other dealers may specialize in cutting, selling or installing fabricated flat glass or they may also sell and install plate, laminated, window, cathedral, stained, bullet proof, opalescent flat, picture, skylight and tempered glass. Included within the scope of this classification is the sale of accessories for flat glass such as sealants, screening, aluminum frames for storm windows and doors, mirror backings, frames and glass cleaners.

This classification excludes establishments engaged in the installation of glass, aluminum or wood window sashes or similar products away from the shop which are to be reported separately in classification 0511; manufacturing of glass which is to be reported separately in classification 3503; tinting or the application of tinted plastic film to auto glass by an auto detailer which is to be reported separately in classification 3406; glass merchants who perform glass tempering which are to be reported separately in classification 1108-02; and flat glass merchants who do not sell or install auto glass which are to be reported separately in classification 1108-03.

1108-06 Glass frosting, etching, beveling or grinding

Applies to establishments engaged in shaping and finishing solid glass by cutting, frosting, etching, beveling, grinding, sandblasting, carving, glue chipping, decorating or grooving. Custom items manufactured in this classification include, but are not limited to, video game tops, glass signs, glass used in the assembly of electrical appliances such as microwave ovens, electronically controlled cabinets and display panels, and mirrors of all sizes. Machinery includes diamond or glass cutting saws, diamond or glass grinding wheels and discs, drills, polishing laps, etching tools and other hand tools. In the manufacture of mirrors, metallic solutions (usually silver), shellacs or varnishes, paints, and plate glass are received from outside sources. The glass is cut to size, ground, smoothed, and the edges may be beveled. Hole drilling, chemical etching, drying, buffing and polishing may be performed. Reflective surfaces are generally produced by pouring or spraying metallic solutions over prepared glass. Heavier coats are obtained by successive applications of the plating solution. After applying the plating solution, the mirrors are sprayed or hand brushed with shellac or varnish, then with paint. Frames, handles or similar finishes may be attached. Production manufacturing of insulated glass by sealing together two or more sheets of glass with an air space between them is also included when performed by employees of an employer subject to this classification.

This classification excludes the mining, digging or quarrying of raw materials which is to be reported separately in the applicable classification; glass merchants who do incidental grinding, beveling, silvering and cutting of glass who

are to be reported separately in the classification applicable to the type of glass they specialize in; establishments manufacturing optical goods or telescopes, or perform precision grinding of blank or rough lenses which are to be reported separately in classification 6604; and establishments engaged in manufacturing stained or leaded glassware, or in melting or blowing glass which are to be reported separately in classification 3503.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-53805, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-53805, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-53805, filed 5/31/96, effective 7/1/96; 86-12-041 (Order 86-18), § 296-17-53805, filed 5/30/86, effective 7/1/86; 85-24-032 (Order 85-33), § 296-17-53805, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-53805, filed 2/28/85, effective 4/1/85; 82-24-047 (Order 82-38), § 296-17-53805, filed 11/29/82, effective 1/1/83.]

WAC 296-17-53806 Classification 1109.

1109-00 Automobile or truck towing services, N.O.C.

Applies to establishments engaged in providing towing services to others which are not covered by another classification (N.O.C.). Operations contemplated by this classification are limited to tow truck drivers and their assistants who are engaged in towing services for hire. For purposes of this classification "towing services for hire" means, but is not limited to, the towing of disabled vehicles to a shop (that is unrelated to the towing service) for repair; the recovery of repossessed vehicles for others by tow truck; roadside assistance during snow, ice or flooding to recover or free stuck vehicles; and the towing in of disabled vehicles to a secured yard for insurance or law enforcement agencies. It is common for towing companies to also operate a vehicle repair garage or service center in conjunction with the towing service. Auto service centers and repair garages, auto body shops and wrecking yard operations are to be reported separately in the applicable service or repair classification provided that the conditions of the general reporting rules covering the operation of a secondary business and the division of worker hours have been met. Tow truck dispatchers who have no other duties may be reported separately in classification 4904 provided that the conditions of the standard exception general reporting rules have been met.

Special note: Towing is common to many classifications. Employers offering towing services should be contacted to verify whether the towing service they provide is only in connection with their auto repair, auto body or wrecking yard (*towing service not for hire*), or provided as a general service unrelated to their repair garage (*towing services for hire*). Only towing services for hire are to be assigned to classification 1109. If a business provides both towing services for hire and not for hire, worker hours for drivers and their assistants maybe divided between this classification and the applicable repair garage classification provided that the conditions of the general reporting rule covering the division of worker hours has been met. Otherwise, all driver and assistant hours are to be assigned to the highest rated classification applicable to the business.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-53806, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-53806, filed 5/31/96, effective 7/1/96; 87-12-032 (Order 87-12), § 296-17-53806, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-53806, filed 11/27/85, effective 1/1/86.]

WAC 296-17-539 Classification 1301.

1301-00 Electric light and power plants operated by cities, towns, or counties

Applies to establishments, operated by a city, town, or county, engaged in generating and distributing electricity to their residents. These may be hydroelectric, fossil fuel steam or turbo-generator plants. This classification includes the regular installation, maintenance and repair of power plant machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), the installation and maintenance of circuit breakers and transformers on poles, pole-to-house hook-ups (service connections), meter installation and meter readers when done by employees of an employer having operations subject to this classification. Machinery and equipment may include, but not be limited to, boilers, turbines, generators, cables, transformers, switchgears, circuit breakers, control panels, substations, poles, lines, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, meters and hand tools. Clerical office and administrative personnel are to be reported separately in classification 5305 for a city or town, or 5306 for a county.

This classification excludes contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings who are to be reported separately in classification 0601; contractors engaged in the installation of machinery or equipment who are to be reported separately in classification 0601 or 0603 as applicable; and the construction of any buildings which is to be reported separately in the applicable construction classification.

1301-01 Electric light and power cooperatives

Applies to establishments, in the form of cooperatives, engaged in generating and distributing electricity to their customers. A cooperative is formed by, and owned jointly by, those who make use of the service being provided. The power may be generated by a hydroelectric, fossil fuel steam or turbo-generator plant. This classification is appropriate whether a cooperative owns a power plant or is distributing power purchased from another utility company. Work contemplated by this classification includes the regular installation, maintenance and repair of power plant machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), the installation and maintenance of circuit breakers and transformers on poles, pole-to-house hook-ups (service connections), meter installation and meter readers when done by employees of an employer having operations subject to this classification. Machinery and equipment may include, but not be limited to, boilers, turbines, generators, cables, transformers, switchgears, circuit breakers, control panels, substations, poles, lines, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, meters and hand tools. Clerical office and administrative personnel are to be reported separately as appropriate for the ownership of the coopera-

tive; 5305 for cities and towns; 5306 for counties; or 4904 and 6303 for nonmunicipal.

This classification excludes contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings who are to be reported separately in classification 0601; contractors engaged in the installation of machinery or equipment who are to be reported separately in classification 0601 or 0603 as applicable; and the construction of any buildings which is to be reported separately in the applicable construction classification.

1301-02 Electric light and power plants operated by public utility districts

Applies to establishments, in the form of a public utility district (P.U.D.), engaged in generating and distributing electric power to a part of a county. This classification applies whether a P.U.D. owns a power plant or is distributing power purchased from another utility. Work contemplated by this classification includes the regular installation, maintenance and repair of power plant machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), the installation and maintenance of circuit breakers and transformers on poles, pole-to-house hook-ups (service connections), meter installation and meter readers when done by employees of an employer having operations subject to this classification. Machinery and equipment may include, but not be limited to, boilers, turbines, generators, cables, transformers, switchgears, circuit breakers, control panels, substations, poles, lines, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, meters and hand tools. Clerical office and administrative personnel are to be reported separately in 5306.

This classification excludes contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings who are to be reported separately in classification 0601; contractors engaged in the installation of machinery or equipment who are to be reported separately in classification 0601 or 0603 as applicable; and the construction of any buildings which is to be reported separately in the applicable construction classification.

1301-05 Steam heat power plants

Applies to establishments engaged in the operation of a steam heat power plant. These businesses use coal, oil, natural gases or electric power to produce steam which is distributed through a network of under or overground pipes to customers (the plant must be very near the purchaser). The initial process of producing the steam is the same as the process used in a steam powered electric generating plant, but the steam is channeled out to the purchaser instead of being used to turn turbines. The purchasers use the steam for heating buildings, operating saunas, as a heat source for cooking or processing in food processing plants, breweries or restau-

(2001 Ed.)

rants, producing the heat needed for wood drying kilns, or to convert back to hot water. Work contemplated by this classification includes, but is not limited to, the regular installation, maintenance or repair of plant machinery and equipment, the extension and maintenance of over or underground pipes, main-to-user hook-ups, meter installation and meter readers. Clerical office and administrative personnel are to be reported separately as appropriate for the ownership of the steam plant; 5305 for cities and towns; 5306 for counties; or 4904 and 6303 for nonmunicipal.

This classification excludes contractors engaged in over or underground pipeline construction, maintenance or repair, main-to-house line extensions and hook-ups, who are to be reported separately in classification 0107; contractors engaged in the installation or contract maintenance of machinery or equipment who are to be reported separately in classification 0603; and the construction of any buildings which is to be reported separately in the applicable construction classification.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-539, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-539, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-539, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-539, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-539, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-539, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-539, filed 11/9/73, effective 1/1/74.]

WAC 296-17-540 Classification 1303.

1303-00 Telephone companies - all other employees

Applies to establishments engaged in providing telecommunications services which enable subscribers to converse or transmit coded data. Work contemplated by this classification includes, but is not limited to, the regular installation, maintenance and repair of machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), clearing right of ways, installing telephones and wiring in buildings, and making service connections when done by employees of an employer having operations subject to this classification. Machinery and equipment includes, but is not limited to, central control and switching center equipment, relays, computers, antennae, cranes, forklifts, vehicles and garages, warehouse equipment, and hand tools.

This classification excludes clerical office, exchange operators and administrative personnel who are to be reported separately in classification 1304; contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole, and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings and making pole-to-house hook-ups who are to be reported separately in classification 0608; contractors engaged in the installation or contract maintenance of machinery or equipment who are to be reported separately in classification 0603; and establishments primarily engaged in selling telephone equipment retail which are to be reported separately in classification 6406.

[Title 296 WAC—p. 265]

1303-01 Telegraph companies - all other employees

Applies to establishments engaged in providing telecommunication services which enable printed messages (telegrams) to be transmitted from one agent to another for receipt by, or delivery to, a designated party. Telegraph companies also provide a "moneygram" service which allows an agent to receive a sum of money at one location and transmit a message to another agent to pay out the same amount of money to a designated party at another location. Work contemplated by this classification includes the regular installation, maintenance and repair of machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), installing transmission and receiving equipment, the clearing of right of ways, and delivery work when done by employees of an employer having operations subject to this classification. Machinery and equipment includes, but is not limited to, cables, control panels, poles, lines, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, and hand tools.

This classification excludes clerical office and administrative personnel who are to be reported separately in classification 1304; contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole, and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings who are to be reported separately in classification 0608; and contractors engaged in the installation or contract maintenance of machinery or equipment who are to be reported separately in classification 0603.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-540, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-540, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-540, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-540, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-540, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-540, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-540, filed 11/9/73, effective 1/1/74.]

WAC 296-17-541 Classification 1304.**1304-00 Telephone companies - exchange operators, clerical office and sales personnel**

Applies to the administrative and clerical office personnel of establishments engaged in providing telecommunication services which enable two or more parties to converse or transmit coded data. For purposes of this classification, administrative personnel includes clerical office, sales, data processing, exchange operators, customer service, marketing, and retail telephone store (when operated by the telephone company) sales personnel.

This classification excludes all other telephone company employees who are to be reported separately in classification 1303.

1304-01 Telegraph companies - clerical office and sales personnel

Applies to administrative and clerical office personnel of establishments engaged in providing telecommunication services which enable printed messages (telegrams) or moneygrams to be transmitted from one agent to another for receipt

by a designated party. For purposes of this classification, administrative personnel includes clerical office, sales, data processing, customer service, marketing, cashiers and operators of telegraph, teletype or other transmitting and receiving equipment.

This classification excludes all other telegraph company employees who are to be reported separately in classification 1303.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-541, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-541, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-541, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-541, filed 11/9/73, effective 1/1/74.]

WAC 296-17-54101 Classification 1305.**1305-00 Television cable companies - all other employees**

Applies to establishments engaged in providing point-to-point subscription cable communications services. This classification is restricted to companies that provide the total spectrum of cable services for a fee or rental charge. These companies will normally operate and maintain antenna and control centers where they receive signals from broadcasting stations and transmit them through a cable system to local customers. This classification also includes homeowner associations and co-ops that operate a central system for residential users. Work contemplated by this classification includes, but is not limited to, the regular installation, maintenance and repair of machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), installation of antennae, the clearing of right of ways, erections of poles, crossarms and insulators, and subscriber service connections when done by employees of an employer having operations subject to this classification. Machinery and equipment includes, but is not limited to, cables, transformers, control panels, poles, lines, antennae, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, and hand tools.

This classification excludes contractors engaged in underground line construction, maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line installation who are to be reported separately in classification 0509; contractors engaged in pole and tower construction, maintenance or repair who are to be reported separately in classification 0508; contractors engaged in wiring within buildings and making pole-to-house service connections who are to be reported separately in classification 0601; and clerical office employees of television cable companies who are to be reported separately in classification 4502.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-54101, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-54101, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-54101, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-54101, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-54101, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-54101, filed 11/29/82, effective 1/1/83.]

WAC 296-17-542 Classification 1401.**1401-01 Taxicab companies**

Applies to establishments engaged in furnishing passenger transportation to others. Work contemplated by this classification includes, but is not limited to, operation of the vehicle, loading/unloading passengers' luggage, assisting passengers in and out of the vehicle, incidental "cabulance" services which may be offered in conjunction with the taxi service, and maintenance/repair of the vehicle when performed by employees of an employer subject to this classification. Businesses that operate pedicab and horse-drawn carriage services are included in this classification.

This classification excludes: Establishments that operate ambulance services which are to be reported separately in classification 1405; establishments that operate cabulance and paratransit services exclusively which are to be reported separately in classification 1404; and dispatchers with no other job duties who may be reported separately in classification 4904.

Special note: Establishments that furnish only a dispatch service for taxicab drivers who own or lease their own vehicles may be reported separately in classification 4904 provided all the conditions of the general reporting rules covering standard exception employees have been met. Employees of a taxicab dispatch service who perform maintenance/repair are to be reported separately in classification 3411. See RCW 51.08.180 for the definition of "worker" to aid in determining if drivers are employees. Please also refer to the special note in classification 1404-12.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-542, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-542, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-542, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-542, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-542, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-542, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-542, filed 11/9/73, effective 1/1/74.]

WAC 296-17-544 Classification 1404.**1404-06 Vessels, ferries, tugs, and steamboats, N.O.C.**

Applies to employees not covered under federal jurisdiction, or another classification (N.O.C.), who provide services for seaworthy vessels such as ferries, tugs, or steamboats at the docking site or on adjacent land. Vessels may operate seasonal or year-round. Employments include, but are not limited to, dock workers, maintenance workers, traffic control personnel, and night security personnel.

Special note: Care should be exercised prior to assignment of this classification as the workers could be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act. A detailed description of these acts can be found in classifications 0104 or 0202.

1404-07 Train rides

Applies to establishments engaged in the operation of passenger excursion train rides for scenic or amusement purposes on an intrastate basis only. Excursion train rides are typically operated from a mountain, lake or similar site. The trains may operate on a seasonal basis in direct relation to the volume of tourists, weather conditions, or dates of local cele-

bration. Employments in this classification include, but are not limited to, drivers/engineers, guides, lecturers, hostesses, and maintenance personnel. Ticket sellers may be reported separately in classification 4904 provided that they do not handle baggage and that the conditions of the standard exception general reporting rules have been met. On-board food service personnel may be reported separately in classification 3905 as long as their duties are limited to food service and they do not facilitate the train ride or train ride operation in any way.

1404-11 Escort and pilot cars

Applies to establishments that provide escort or pilot car services for others. The duties include driving ahead of, or behind, various types of vehicles.

This classification excludes employees of an employer assigned to drive escort or pilot cars in connection with the delivery of equipment, buildings, goods, or similar items which the employer sells or contracts to deliver. Such employment is to be reported separately in the classification applicable to sales or delivery of such items. For example, an escort driver employed by a common carrier transporting a modular home to a customer's site is to be reported separately in classification 1102.

1404-12 Cabulance and paratransit

Applies exclusively to establishments that provide on-demand, nonemergency transportation services to passengers with special needs. Vehicles used are usually vans that are equipped for accessibility to accommodate passengers with mobility limitations including passengers in wheelchairs or gurneys. Work contemplated by this classification includes, but is not limited to, operation of the vehicle, assisting passengers in and out of the vehicle, and maintenance/repair of the vehicle when performed by employees of an employer subject to this classification.

This classification excludes: Cabulance services offered in conjunction with a taxi service which are to be reported separately in classification 1401, cabulance services offered in conjunction with an ambulance service which are to be reported separately in classification 1405, paratransit services offered in conjunction with a municipal bus or transit system which are to be included in classification 0803 or 1501 as appropriate, ambulance services which are to be reported separately in classification 1405, limousine drivers who are to be reported separately in classification 6301, and dispatchers with no other duties who are to be reported separately in classification 4904.

Special note: Care should be exercised in determining what type of cabulance service is being provided. This classification *is not to be* assigned when provided as an incidental part of a taxi cab service subject to classification 1401. A cabulance service as defined in this rule will need a specialized van or bus to transport passengers as opposed to a passenger automobile that is not equipped to accommodate special mobility needs, and whereby the transportation service has been prearranged. For purposes of this subclassification, paratransit businesses reporting under classification 1405-00 are not required to report in this subclassification until January 1, 2001.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-544, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-544, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-544, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 91-12-014, § 296-17-544, filed 5/31/91, effective 7/1/91. Statutory Authority: RCW 51.16.035, 87-12-032 (Order 87-12), § 296-17-544, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-544, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-544, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-544, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-544, filed 11/9/73, effective 1/1/74.]

WAC 296-17-54401 Classification 1405.

1405-00 Ambulance services

Applies to establishments engaged in prehospital emergency care and transportation of ill or injured persons to or from medical facilities. The services provided by any one ambulance company will vary to some degree, however, normal operations for ambulance companies include, but are not limited to, the following: Prehospital care, responding to calls where the injury or accident does not require medical treatment other than that provided by Emergency Medical Technicians (para-medics) who work for the ambulance company, standby at events, assisting in providing prehospital care and patient transport services of injured players or spectators at games, concerts, and fairs, public education/training, teaching CPR, first aid, and related courses to the public, and cabulance service (transporting patients who do not require prehospital care to and from medical facilities).

This classification excludes: Cabulance services offered in conjunction with a taxi service which are to be reported separately in classification 1401; companies engaged exclusively in cabulance and paratransit services which are to be reported separately in classification 1404; and similar emergency services provided by a municipality which are to be reported separately in classification 6904.

Special notes: Special care must be taken in classifying *cabulance services* which may also be included in classifications 1401 or 1404. In order to qualify for classification 1405, a company must be primarily in business as an ambulance company. For premium reporting purposes, ambulance companies are to report all employees on an hourly basis, provided the maximum will not exceed eight hours during any twenty-four hour period. If verifiable records disclosing actual time worked are unavailable, employees are to be reported at eight hours per day for each day they had duties. If records do not disclose hours or days worked by individual employees, an assessment of forty hours per week is to be made for each week in which an employee had duties, or one hundred and sixty hours per month. For *air ambulance services*, flight time is to be reported separately in classification 6803, and ground operations are to be reported separately in classification 1405.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-54401, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-54401, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-54401, filed 5/29/87, effective 7/1/87.]

[Title 296 WAC—p. 268]

WAC 296-17-54403 Classification 1407.

1407-00 Bus companies

Applies to establishments engaged in providing transportation services such as, but not limited to, charter and tour bus, contract school bus, shuttle van, and nonmunicipal, scheduled bus systems. Work contemplated by this classification includes operation of the vehicle and related loading/unloading duties, cleaning, maintenance and ordinary repair of all facilities, equipment, and vehicles, all bus terminal employment except for office personnel. Ticket sellers and dispatchers may be reported separately in classification 4904 provided that they do not handle baggage and that all of the conditions of the standard exception general reporting rules have been met.

This classification excludes: Municipal transit and bus service provided by a county or taxing district which is to be reported separately in classification 1501; municipal transit and bus service provided by a city or town which is to be reported separately in classification 0803; taxicab companies which are to be reported separately in classification 1401; cabulance and paratransit companies which are to be reported separately in classification 1404; and drivers employed by a limousine company who are to be reported separately in classification 6301.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-54403, filed 7/1/00, effective 7/1/00.]

WAC 296-17-545 Classification 1501.

1501-00 Counties and taxing districts, N.O.C. - all other employees

Applies to employees of counties and taxing districts, not covered by another classification (N.O.C.), who perform manual labor, or who supervise a work crew performing manual labor such as custodial or maintenance, and machinery or equipment operators including transit bus drivers. This classification includes administrative personnel such as engineers, safety inspectors, and biologists who have field exposure, and internal inventory and supply clerks. For purposes of this classification, field exposure is defined as any exposure other than the normal travel to or from a work assignment.

This classification excludes electric light and power public utility districts which are to be reported separately in classification 1301; privately owned and operated bus or transit systems which are to be reported separately in classification 1407; water distribution or purification system public utility districts which are to be reported separately in classification 1507; irrigation system public utility districts which are to be reported separately in classification 1507; port districts which are to be reported separately in classification 4201; school districts, library districts or museum districts which are to be reported separately in classifications 6103 or 6104; hospital districts which are to be reported separately in classification 6105; fire fighters who are to be reported separately in classification 6904; law enforcement officers who are to be reported separately in classification 6905 and 6906, as appropriate; clerical office and administrative employees who are to be reported separately in classification 5306, and volun-

teers who are to be reported separately in classifications 6901 or 6906, as appropriate.

1501-01 Housing authorities, N.O.C. - all other employees

Applies to employees of housing authorities, not covered by another classification, who perform manual labor, or who supervise a work crew performing manual labor such as custodial or maintenance, and machinery or equipment operators. This classification includes all functional operations of a housing authority such as inspection, maintenance and repairs, including minor structural repairs, janitorial service, and building and grounds maintenance. Also included in this classification are meter readers, security personnel, other than those with law enforcement powers, administrative personnel such as engineers and safety inspectors who have field exposure, and internal inventory and supply clerks. For purposes of this classification, housing authorities are defined as nonprofit, public and political entities which serve the needs of a specific city, county or Indian tribe. The nature and objectives of some of the projects undertaken by housing authorities include providing decent, safe and sanitary living accommodations for low income persons, or providing group homes or halfway houses to serve developmentally or otherwise disabled persons or juveniles released from correctional facilities. A housing authority has the power to prepare, carry out, lease and operate housing facilities; to provide for the construction, reconstruction, improvement, alteration or repair of any housing project; to sell or rent dwellings forming part of the project to or for persons of low income; to acquire, lease, rent or sell or otherwise dispose of any commercial space located in buildings or structures containing a housing project; to arrange or contract for the furnishing of the units; and to investigate into the means and methods of improving such conditions where there is a shortage of suitable, safe and sanitary dwelling accommodations for persons of low income.

This classification excludes new construction or major alteration activities which are to be reported separately in the appropriate construction classifications; clerical office and administrative employees who are to be reported separately in classification 5306; security personnel with law enforcement powers who are to be reported separately in classification 6905; and volunteers who are to be reported separately in classifications 6901 or 6906, as appropriate.

1501-08 Native American tribal councils - all other employees

Applies to employees of Native American tribal councils who perform manual labor, or who supervise a work crew performing manual labor such as custodial or maintenance, and machinery or equipment operators. This classification includes administrative personnel such as engineers, safety inspectors, and biologists who have field exposure, and internal inventory and supply clerks of the tribal council. For purposes of this classification, field exposure is defined as any exposure other than the normal travel to and from a work assignment.

This classification excludes electric light and power public utility districts which are to be reported separately in classification 1301; water distribution or purification system public utility districts which are to be reported separately in clas-

sification 1507; irrigation system public utility districts which are to be reported separately in classification 1507; school districts, library districts or museum districts which are to be reported separately in classifications 6103 or 6104; hospital districts which are to be reported separately in classification 6105; fire fighters who are to be reported separately in classification 6904; law enforcement officers who are to be reported separately in classifications 6905 and 6906; new construction or reconstruction activities which are to be reported separately in the appropriate construction classification; clerical office and administrative employees who are to be reported separately in classification 5306.

Special notes: Housing authorities operating under the name of, and for the benefit of, a particular tribe are not exempt from mandatory coverage. These housing authorities are federally funded and are not owned or controlled by a tribe.

Only those tribal operations which are also provided by county governments are subject to classification 1501. The following activities, such as but not limited to, visiting nurses and home health care, grounds keepers, building maintenance, park maintenance, road maintenance, and garbage and sewer works, are considered to be normal operations to be included in this classification. All other tribal council operations which are not normally performed by a county government shall be assigned the appropriate classification for the activities being performed. The following operations, such as but not limited to, meals on wheels, bingo parlors, casinos, liquor stores, tobacco stores, grocery stores, food banks, gift shops, restaurants, motels/hotels, Head Start programs, fish/shellfish hatcheries, logging, and tree planting/reforestation are outside the scope of classification 1501 and are to be reported separately in the applicable classifications.

1501-09 Military base maintenance, N.O.C.

Applies to establishments, not covered by another classification (N.O.C.), engaged in providing all support operations and services on a military base on a contract basis. Such services include, but are not limited to, data processing, photography, mail delivery (on post and to other military facilities), hotel/motel services, mess halls, recreational facilities, grounds and building maintenance, vehicle maintenance, and may also include the maintenance of such facilities as water works, sewer treatment plants and roads.

This classification excludes new construction or construction repair projects which are to be reported separately in the applicable construction classification for the work being performed; contracts for specific activities on a military base such as, but not limited to, building maintenance, club or mess hall operations, or vehicle maintenance, which are to be reported separately in the applicable classification for the work being performed; firefighters who are to be reported separately in classification 6904; law enforcement officers who are to be reported separately in classification 6905; and clerical office and administrative employees who are to be reported separately in classification 5306.

Special note: Classification 1501-09 is to be assigned to an establishment only when *all* support services on a military base are being provided by the contractor.

[Statutory Authority: RCW 51.16.035, 51.04.020. 00-14-052, § 296-17-545, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-545, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-545, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-545, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 54.16.035. 93-12-093, § 296-17-545, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-545, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-545, filed 11/30/83, effective 1/1/84; 80-17-016 (Order 80-23), § 296-17-545, filed 11/13/80, effective 1/1/81; Order 77-27, § 296-17-545, filed 11/30/77, effective 1/1/78; Emergency Order 77-25, § 296-17-545, filed 12/1/77; Order 73-22, § 296-17-545, filed 11/9/73, effective 1/1/74.]

WAC 296-17-546 Classification 1507.

1507-01 Irrigation ditches operation, repair and maintenance

Applies to establishments engaged in providing water for agricultural irrigation through a network of ditches, canals and/or pipelines. Irrigation system operations may be owned by individuals, a private company, cooperatives or a municipality. Water for irrigation can come from a natural above or below ground source or a reservoir and is kept flowing by means of pumping plants. Irrigation water usage is monitored at the "turn-out" which must be manually opened by an employee of the irrigation company and is located between the ditch/pipeline and the user's field. Work contemplated by this classification includes, but is not limited to, digging and maintaining ditches or canals, installing underground pipe, installation or maintenance of control gates and pumps, cleaning of ditches, spraying to control insects, and regular maintenance of vehicles and equipment when done by employees of an employer having operations subject to this classification. Machinery and equipment includes, but is not limited to, water pumps, ditch digging/pipe laying equipment, control gates, pumps, vehicles, spraying equipment and hand tools. This classification includes the operation of drainage systems by a private company or a municipal special purpose district.

This classification excludes: Contractors engaged in the digging of ditches or canals who are to be reported separately in classification 0108 or 0201 as applicable; contractors engaged in underground pipe laying which is to be reported separately in classification 0107; contractors engaged in the installation of agricultural sprinkler systems which is to be reported separately in classification 0301; contractors engaged in the installation or repair of irrigation/drainage pumps which is to be reported separately in classification 0306; the routine irrigation of individual agricultural acreage with the owner's own system which is to be reported separately in the classification applicable to the establishment; the construction of any new buildings which is to be reported separately in the construction classification applicable to the work being performed; and clerical office and administrative personnel who are to be reported separately as appropriate, classification 5305 for cities and towns, classification 5306 for counties, or classifications 4904 and 6303 for nonmunicipal ownership.

Special note: Many water supply operations in Washington may have "irrigation district" as part of their name because of their original purpose, but they are actually functioning as a waterworks supplying residential users and are to be reported separately in classification 1507-02.

[Title 296 WAC—p. 270]

1507-02 Waterworks operations, repair and maintenance

Applies to establishments engaged in the operation of water purification and distribution systems known as waterworks. Water is obtained from natural sources of surface or ground water, piped to filtration plants, filtered, treated with chemicals, then pumped to holding facilities for eventual distribution to the user through underground pipes. Waterworks may be owned by cooperatives, such as homeowners' associations, a private company, or a municipality (as a P.U.D.). Work contemplated by this classification includes, but is not limited to, erection of towers and tanks, underground waterline construction, maintenance of purification and filtration facilities, installation of fire hydrants, operating a laboratory, main-to-house hook-ups and the installation and reading of meters when done by employees of an employer having operations subject to this classification. Machinery and equipment includes, but is not limited to, excavating, pipe laying, erecting and welding equipment, vehicles, machine shop equipment, pumps and gauges, meters and hand tools. This classification includes the operation of sewerage treatment plants by owner or contract.

This classification excludes: Contractors engaged in underground waterline construction, maintenance or repair, including main-to-house hook-ups, who are to be reported separately in classification 0107; plumbing contractors engaged in waterline main-to-house hook-ups as part of an all-inclusive plumbing installation contract which is to be reported separately in classification 0306; the erection of water towers and tanks by a contractor which is to be reported separately in classification 0508; contractors engaged in industrial plant maintenance who are to be reported separately in classification 0603; the construction of dams which is to be reported separately in classification 0701; the construction of any new buildings which is to be reported separately in the construction classification applicable to the work being performed; and clerical office and administrative personnel who are to be reported separately as appropriate, classification 5305 for cities and towns, classification 5306 for counties, or classifications 4904 and 6303 for nonmunicipal.

[Statutory Authority: RCW 51.16.035, 51.04.020. 00-14-052, § 296-17-546, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-546, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-546, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-546, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-546, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-546, filed 11/30/83, effective 1/1/84; Order 74-40, § 296-17-546, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-546, filed 11/9/73, effective 1/1/74.]

WAC 296-17-548 Classification 1701.

1701-02 Ore reduction, by wet or dry process without application of heat at mine

Applies to establishments engaged in the reduction of coarse ores by a wet or dry process at a mine site. Work contemplated by this classification involves a variety of ore milling activities. The process begins by crushing, screening and washing the ores. Next, ores are placed in a rotating cylindrical mill which contains steel balls, flint pebbles, rods or rock for further grinding. Then with the use of amalgamation (introduction of a chemical such as mercury to break down the ores) or flotation (uses water to separate by buoyancy and

(2001 Ed.)

densities), the ore material is broken down and dried to obtain concentrated ores of metals. The milling of ores to recover some nonmetallic minerals which do not require amalgamation or flotation are also included within this classification.

This classification excludes underground mining operations which are to be reported separately in classification 1702, and open cut mining operations which are to be reported separately in classification 1703.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-548, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-548, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-548, filed 11/9/73, effective 1/1/74.]

WAC 296-17-549 Classification 1702.

1702-01 Coal mines and mines N.O.C., underground; coke ovens

Applies to establishments engaged in underground mining, not covered by another classification (N.O.C.), involving the extraction of coal, ores, stone, clay or other minerals. Operations contemplated by this classification include excavation and tunneling below ground as well as the incidental activities occurring above ground. Underground mining may involve shaft sinking, slope sinking, rock tunneling, and the building of drifts and shafts with heavy timbers or steel beams. Material is broken loose within the tunnel or shaft with explosives, drilling machines, rock drills, chippers, power hand drills and picks. After the material is broken loose it is removed from underground by way of hoist, conveyor, or some type of haulage car on steel track. On the surface, some of the extracted material is further refined such as coal which is crushed, screened, washed and graded before being hauled away. Additional equipment includes elevators, ventilation and communication systems, water pipes, lighting systems, as well as front end loaders, bulldozers and trucks. This classification also applies to establishments engaged in the manufacture of coke which is a solid carbonaceous residue obtained from bituminous coal after the removal of volatile materials by a distillation process. The method usually consists of a beehive or by-product oven process. Coal is fed into crushers which breaks oversized pieces into smaller pieces which are then conveyed to bunkers serving the ovens. This classification also applies to ore reduction involving heat processes.

This classification excludes ore reduction operations which do not require the use of heat which are to be reported separately in classification 1701, and open cut mining which is to be reported separately in classification 1703.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-549, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-549, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-549, filed 2/28/85, effective 4/1/85; Order 75-38, § 296-17-549, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-549, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-549, filed 11/9/73, effective 1/1/74.]

WAC 296-17-550 Classification 1703.

1703-01 Open cut mining - all types; placer or hydraulic mining

Applies to establishments engaged in open cut mining to extract all types of ore including certain minerals such as, but

(2001 Ed.)

not limited to, phosphate rock, graphite, talc, chalk, mica, asphalt, asbestos and gypsum. The process of open cut mining is also commonly referred to as surface mining, open pit mining or strip mining whereby such ores and minerals are extracted from a large hole or pit on the surface. Operations contemplated by this classification involve excavating and stripping the surface material with use of drag lines, power shovels or earth moving equipment. The products are loaded onto dump trucks or belt conveyors for movement to railroad sidings and loading into ore cars for shipment to processing plants. The equipment generally involves compressors, pneumatic drilling rigs, conveyors, trucks, drag lines, shovels, scrapers and bulldozers. This classification also applies to establishments engaged in hydraulic mining in which material is excavated by moving a stream of high pressure water over the mining face, and placer mining which obtains minerals from placers by use of running water such as on a stream or the shoreline.

This classification excludes underground mining which is to be reported separately in classification 1702, and quarrying which is to be reported separately in classification 1704.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-550, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-550, filed 11/27/85, effective 1/1/86; Order 75-38, § 296-17-550, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-550, filed 11/9/73, effective 1/1/74.]

WAC 296-17-551 Classification 1704.

1704-02 Quarries, N.O.C.

Applies to establishments engaged in quarrying, not covered by another classification (N.O.C.), to extract large solid stone such as, but not limited to, limestone, sandstone, granite, marble, slate, hard shale rock, ballast rock, cement rock, coral rock, etc., from hillsides or open pits. Operations contemplated by this classification involve exposing stone with use of drag lines, power shovels, scrapers or other earth moving equipment. In some instances, blasting with explosives is performed on large stone masses to break portions loose. The stone is separated into large blocks, sometimes called loafs. There are several methods to cut a loaf - line drilling, wire sawing, diamond wire sawing or chiseling. The loafs are removed from the quarry pit and taken to the surface. This classification includes all other activities occurring on the surface of the quarry site which could involve the further cutting of the loafs or the crushing of stone into smaller pieces.

This classification excludes open pit mining operations which are to be reported separately in classification 1703, and underground mining which is to be reported separately in classification 1702.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-551, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-551, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-551, filed 11/9/73, effective 1/1/74.]

WAC 296-17-552 Classification 1801.

1801-01 Lead smelting, sintering, or refining; calcium carbide manufacturing

Applies to establishments primarily engaged in the smelting, sintering, or refining of lead, including the manufacturing of calcium carbide. The lead ore most commonly

[Title 296 WAC—p. 271]

mined is galena which is the sulfide of lead. The ore is mixed with other metalliferous minerals, such as sphalerite, copper pyrites and iron pyrites. The smelting process consists of fusing or separating the metallic elements. After ore has been received, the process begins by crushing, washing and screening the ore. There may be various steps of milling, concentration or amalgamation (floatation) to separate the galena from the sphalerite and other minerals. The roasting or sintering process takes place in rotary kilns or other types of furnaces. In this way the material is sintered or converted into lumps (called sinter) which are mixed with coke and placed into a shaft furnace. The material is then desilvitized which is achieved by adding metallic zinc and raising the temperature sufficiently to dissolve it. The molten metal is then cast into ingots. The ingots may go through further refining processes or may be considered a finished product. This classification also includes the manufacturing of calcium carbide which is a crystalline material produced by heating pulverized limestone or quicklime with carbon and used to generate acetylene gas, as a dehydrating agent, and in making graphite and hydrogen.

This classification excludes aluminum smelting operations which are to be reported separately in classification 1802; the smelting, sintering or refining of ores not covered by another classification, (N.O.C.) which is to be reported separately in classification 1801-08; the recovering, refining or reprocessing of metals which is to be reported separately in classification 1801-09; ore reduction which is to be reported separately in classification 1701; and open pit or underground mining operations which are to be reported separately in the classification applicable to the mining being performed.

1801-03 Steel or iron rolling mills; rolling mills, N.O.C.

Applies to establishments engaged in operating iron or steel rolling mills. In a rolling mill ingots and/or slabs of steel are rolled (i.e., they are passed between rollers whereby they undergo an increase in length and a corresponding reduction in depth). The rollers used by the rolling mills vary widely in size and shape, depending on the type of rolled section(s) to be produced. Depending upon the thickness of the metal to start and the desired thickness when finished, a single piece of metal may pass through the same or a different set of rollers several times.

Rolling mills for pipes may be divided into two categories - welded pipes and seamed pipes. Welded pipes are produced from a steel strip which is bent to a tubular shape and whose edges are then joined by welding. Seamed pipes are produced from cast or rolled billets at rolling temperature. There are different processes for both kinds of manufacturing. Whatever method is used the metals are somehow heated to temperatures up to 1400 degrees Fahrenheit. The equipment may include, but is not limited to, rakes, ladle, forklifts and front loaders.

This classification excludes aluminum smelting plant operations which are to be reported separately in classification 1802, and establishments engaged in the manufacture of pipe or tube from iron or steel by drawing or bending which are to be reported separately in classification 5101.

1801-08 Ore smelting, sintering or refining, N.O.C.

Applies to establishments engaged in the smelting, sintering, or refining of ores not covered by another classification (N.O.C.). Smelting and sintering are refining processes which use different properties of heat which may or may not reduce the ore to molten form. Temperatures are usually lower than 1400 degrees Fahrenheit. Ore is received direct from the mine or in a variety of forms such as, but not limited to, pellets, particles, molds and briquettes. The process begins by crushing, washing and screening; there may be various steps of milling, concentration or amalgamation. The roasting or sintering process takes place in rotary kilns or other types of furnaces. In this way the material is sintered or converted into lumps (called sinter) which may be mixed with other materials and placed into a shaft furnace. The molten metal ore is then cast or recast into ingots. The ingots may go through further refining processes or may be considered a finished product.

This classification excludes aluminum smelting operations which are to be reported separately in classification 1802; the smelting, sintering or refining of lead which is to be reported separately in classification 1801-01; the recovering, refining or reprocessing of metals which is to be reported separately in classification 1801-09; ore reduction which is to be reported separately in classification 1701; and open pit or underground mining operations which are to be reported separately in the classification applicable to the mining being performed.

1801-09 Metal recovering, refining or reprocessing

Applies to establishments engaged in the recovering, refining, or reprocessing of metals. These establishments are considered secondary processors or reprocessors to primary metal producers. The primary producer uses ore to manufacture metal, whereas, the secondary processors or reprocessors will recover, refine, or reproduce refined metals from coarse metal. Types of metal include, but are not limited to, gold, aluminum, silver, lead, and zinc. Metal comes in various forms to include cast ingots, dross, and scrap material. The scrap material and dross are recycled to extract reusable metallic elements. Other metals are reprocessed and may include adding alloys and/or other elements, or recasting the metals into different shapes and sizes. An example may include adding magnesium to zinc as part of the recycling process in which zinc oxide is produced and sold to rubber companies for manufacturing tires and other rubber products. Metals are weighed, sorted and/or sifted through a variety of screens and includes crushing as needed. Next, the materials are placed in an oven or furnace and chemicals and/or alloys are added. At this point the metal may be placed in molds and cooled by air or water. Finished products are inspected, graded, weighed, packaged and shipped. To assist in the processing function, ladles, rakes, conveyers, scales, hoist, front end loaders and forklifts may be used. This classification also includes the incidental buying and selling of scrap metal.

This classification excludes aluminum smelting operations which are to be reported separately in classification 1802; the smelting, sintering or refining of lead which is to be reported separately in classification 1801-01; the smelting, sintering or refining ores not covered by another classifica-

tion N.O.C., which is to be reported separately in classification 1801-08; ore reduction which is to be reported separately in classification 1701; scrap metal dealers which are to be reported separately in classification 0604; and establishments which compact or recycle metal containers such as aluminum or tin cans which are to be reported separately in classification 2102.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-552, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-552, filed 8/28/98, effective 10/1/98; 88-12-050 (Order 88-06), § 296-17-552, filed 5/31/88, effective 7/1/88; 85-24-032 (Order 85-33), § 296-17-552, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-552, filed 11/9/73, effective 1/1/74.]

WAC 296-17-55201 Classification 1802.

1802-00 Aluminum smelting

Applies to establishments engaged in the primary smelting of aluminum from alumina using an electrolytic reduction process. This classification includes the alloying and casting of sheet ingots, T-ingots, rolling ingots, notched ingots, sows, pigs, extrusion logs, extrusion billets and other primary production shapes when performed by a primary producer subject to this classification. Aluminum is produced from alumina. Alumina is extracted from bauxite which is an ore found in the earth's crust. Bauxite contains approximately 50% aluminum oxide (alumina) together with iron oxide, silica, and titanium oxide. The aluminum smelting process is two-fold; first, pure aluminum oxide is produced, then the aluminum is decomposed from the oxygen by an electrolytic treatment. The process is complex, labor intensive and power intensive. The use of an electric current causes pure aluminum to go to the cathode (part of the smelting structure) and accumulates as a layer floating on the molten salt in a large vat. This aluminum has a purity of 99.99% and is removed from time to time and cast into suitable shapes from molds.

This classification excludes secondary processors who do not reduce aluminum from alumina, but whose principle business is casting, rolling, extruding, foiling or recycling aluminum alloys from molten aluminum, primary production shapes or used scrap and dross which are to be reported separately in the applicable classification; ore reduction which is to be reported separately in classification 1701; and open pit or underground mining operations which are to be reported separately in the classification applicable to the mining being performed.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-55201, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-55201, filed 5/31/96, effective 7/1/96; 88-06-047 (Order 87-33), § 296-17-55201, filed 3/1/88.]

WAC 296-17-555 Classification 2002.

2002-13 Freight handler services, N.O.C.

Applies to establishments engaged in packing, handling, shipping, or repackaging merchandise or freight which is owned by others and is not covered by another classification, (N.O.C.). General cargo is usually in boxes, cartons, crates, bales, or bags. Other cargo includes, but is not limited to, lumber, logs, steel, pipe, grains, produce, machinery, and vehicles. These establishments are generally located at railroad yards, airports, or warehouses not located on piers or

(2001 Ed.)

areas adjoining piers. This classification includes the repackaging of goods from damaged containers. Employees of freight handler services perform duties such as, but not limited to, unloading, checking in and weighing goods, sorting and repackaging goods, tiering (placing in a series of rows one above the other), and reloading goods for shipment. Employments include, but are not limited to, superintendents, checkers, tally men, and lumpers. Machinery and equipment includes, but is not limited to, pallet jacks, hand trucks, forklifts, boom trucks, mobile cranes or overhead track cranes, and hand tools. This classification also includes moving or uncrating, and assembly of modular work stations or other types of office furniture.

This classification excludes drivers and freight handling employees with driving duties who are to be reported separately in classification 1102 without a division of work hours; establishments engaged in loading, unloading, or icing refrigerator cars which are to be reported separately in classification 2002-31; and establishments engaged in warehousing operations for general merchandise which are to be reported separately in classification 2102.

Special notes: Establishments engaged as freight handlers have the hazard of the continual movement of goods, in contrast to warehousing operations in classification 2102-00 that usually store goods for long periods of time. In addition, freight handling services providers do not operate warehouses and storage facilities as a general rule. Freight handling operations performed in connection with the loading or unloading of vessels or rail lines on piers or adjoining areas may be subject to coverage under the U.S. Longshore and Harbor Workers Act. Care should be exercised prior to the assignment of this classification to determine proper jurisdiction.

2002-31 Refrigeration car - loading, unloading or icing

Applies to establishments engaged in loading, unloading, or icing refrigeration cars at railroad yards, airports, or warehouses not located on piers or in areas adjoining piers. This classification includes the repackaging of goods from damaged containers. Establishments in this classification have no equity or ownership in the merchandise being handled. They may contract with customers such as, but not limited to, grocery distributors, meat packers, or pharmaceutical suppliers to pick up and deliver frozen goods. Goods are loaded into refrigerated containers and shipped by common carrier or into refrigerated railcars. Icing the refrigeration systems by adding water, ammonia, or other additives is done to maintain the cold temperatures. Machinery and equipment includes, but is not limited to, pallet jacks, hand trucks, forklifts, compressors, and hand tools.

This classification excludes drivers and freight handling employees with driving duties who are to be reported separately in classification 1102 without a division of work hours; establishments engaged in freight handler services not covered by another classification (N.O.C.) which are to be reported separately in classification 2002-13; and establishments engaged in warehousing operations for general merchandise which are to be reported separately in classification 2102.

Special notes: Establishments engaged as freight handlers have the hazard of the continual movement of goods, in contrast to warehousing operations in classification 2102-00 that usually store goods for long periods of time. In addition, freight handling services providers do not operate warehouses and storage facilities as a general rule. *Freight handling* operations performed in connection with the loading or unloading of vessels or rail lines on piers or adjoining areas may be subject to coverage under the U.S. Longshore and Harbor Workers Act. Care should be exercised prior to the assignment of this classification to determine proper jurisdiction.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-555, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-555, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 54.16.035. 93-12-093, § 296-17-555, filed 5/31/93, effective 7/1/93; 89-24-051 (Order 89-22), § 296-17-555, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035. 86-12-041 (Order 86-18), § 296-17-555, filed 5/30/86, effective 7/1/86; 85-24-032 (Order 85-33), § 296-17-555, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-555, filed 11/30/83, effective 1/1/84; Order 75-38, § 296-17-555, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-555, filed 11/9/73, effective 1/1/74.]

WAC 296-17-557 Classification 2004.

2004-21 Iron or steel merchants; wire rope and cable dealers

Applies to establishments engaged as iron or steel merchants or as dealers of wire rope, cable, or metal conduit. This classification includes the merchandising of nonferrous metals such as, but not limited to, copper, brass, or aluminum. This classification is distinguished from scrap metal dealers in classification 0604 who deal primarily in used metal as opposed to merchants in classification 2004 who sell new goods. Iron or steel merchants receive metal in the form of beams, sheets, plates, bars, rods, pipe, rounds, channels, angles, tubes, or coils from the mills which they unload with overhead cranes, and store them in their shop or yard. Using power equipment such as shearers, hacksaws, drills, benders, and cutting torches, they are cut, sheared, and formed to customer specifications. Wire rope and cable dealers use coilers to wind the wire rope or cable from large spools onto smaller spools, and use saws or other cutting tools to cut it to length and large hydraulic presses to attach sockets, pulleys and other hardware to wire rope to form rigging used by the fishing, logging, and construction industry.

This classification excludes scrap metal and junk dealers which are to be reported separately in classification 0604, and rebar fabricators which are to be reported separately in classification 5209.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-557, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-557, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-557, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-557, filed 11/9/73, effective 1/1/74.]

WAC 296-17-560 Classification 2007.

2007-02 Grain elevator or warehouse

Applies to establishments engaged in providing grain elevator or warehouse facilities. These facilities may range from hundred thousand bushel country elevators to multi-

million bushel terminal elevators, the latter of which are located near railroad lines or seaports. Grain may be stored in elevators for years, depending on market conditions. Grain elevators operate year round or seasonally and may offer a variety of services ranging from storage only to grain milling (see exclusions below). Typical operations in this classification include weighing, grading, cleaning and drying of the grain, and conveyance to the storage lofts. Most grain elevators also provide a brokerage service for their customers.

This classification excludes grain milling which is to be reported separately in classification 2101 and bean or pea elevators which are to be reported separately in classification 2007-03.

2007-03 Bean or pea elevator or warehouse

Applies to establishments engaged in providing bean or pea elevator or warehouse facilities. Bean or pea elevators run all year round or seasonally and may offer a variety of services ranging from storage only to brokerage services. Typical operations in this classification include weighing, grading, cleaning and drying of the bean or pea, and conveyance to the storage lofts.

This classification excludes seed merchants who are to be reported separately in classification 2101; grain elevators which are to be reported separately in classification 2007-02; and vegetable cannery or processing operations and pea vining by cannery employees which are to be reported separately in classification 3902.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-560, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-560, filed 11/27/85, effective 1/1/86; Order 75-38, § 296-17-560, filed 11/24/75, effective 1/1/76; 73-22, § 296-17-560, filed 11/9/73, effective 1/1/74.]

WAC 296-17-561 Classification 2008.

2008-01 Warehouses - field bonded

Applies to establishments engaged in providing bonded warehouse services at the customers location. Field bonding involves appropriating a warehouse (or portion of one), that is owned by the customer, for the purpose of segregating and securing a portion of that customer's merchandise to be used as collateral for a bank loan. The field bonding company will catalog the merchandise that is involved in the transaction, issue a receipt (the receipt is presented as collateral for the loan), and ensure its security and value for the length of the contract. The field bonding company is not responsible for the maintenance of the facility and doesn't become involved in handling, moving or shipping the goods. Work contemplated by this classification is limited to employees who catalog the goods being held, security guards, and clerical help employed at the secured location.

This classification excludes drivers who are to be reported separately in classification 1102.

Special note: Traditional warehousing establishments (such as those described in classification 2102) may be "bonded" in that they can assure their customers that goods regulated by the Bureau of Alcohol, Tobacco and Firearms, or goods awaiting inspection by U.S. Customs, will remain secured. This type of bonding is similar in that it is an assurance of value and safekeeping, but differs from classification

2008 in that the goods are delivered to, and held at, the warehouse company's own facility.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-561, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-561, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-561, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-561, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-561, filed 11/9/73, effective 1/1/74.]

WAC 296-17-56101 Classification 2009.

2009-00 Building material dealers and lumber yards

Applies to establishments engaged as building material dealers or lumber yards. For purposes of this classification the term "building materials" includes, but is not limited to, such items as wallboard, roofing, insulation, sheet metal, bricks, blocks, windows, fixtures, cabinets, doors, linoleum, tile, paneling, interior wood and plastic trim and molding, concrete mix, pipe, plumbing, and electrical supplies. In addition, such establishments often carry a variety of paints and accessories, garden tools and accessories, and hardware items such as nails, nuts and bolts, tools, hinges, doorknobs, locks, and more. It is not uncommon for a building material dealer to specialize and sell only one of the above types of items. Establishments engaged as lumber yards carry a diverse line of wood and lumber products and usually with sufficient quantity to build an entire wood structure. This line of wood and lumber products could include beams, planks, boards, plywood, an array of dimensional lumber (1x2, 2x4, 2x12, etc.), fence posts, railroad ties, shakes and shingles, siding, wood paneling, as well as interior wood trim and molding. Such establishments often carry a variety of other building materials such as electrical supplies, pipe and plumbing supplies, fixtures, cabinets, doors, windows, wallboard, insulation, linoleum, tile, paneling, bricks, blocks, concrete mix, roofing materials, sheet metal and more. These establishments often utilize one or more covered sheds to protect less durable materials from the outside climate, and will also utilize an uncovered open yard type of environment for storage of more durable wood, lumber, and building materials. In addition, such establishments could also have an inside store operation to include a variety of items such as hand and power tools, table saws, paints and varnishes, caulking, and a variety of hardware type items such as nails, nuts and bolts, hinges, doorknobs, locks, and more. This classification also includes retail/wholesale fence material dealers. This classification includes all store and yard operations and the transfer of materials or inventory between related stores.

This classification excludes delivery drivers (other than those involved in intrastore or intrayard transfers mentioned above) who are to be reported separately in classification 1101; nondelivery activities conducted away from the store or yard; hardware stores with building materials or lumber which are to be reported separately in classification 2009-03; and warehouse centers which are to be reported separately in classification 2009-05.

2009-01 Electrical supply dealers

Applies to establishments engaged as electrical hardware and supply dealers who primarily sell electrical hardware and supplies in bulk to the contractor trades, such as electrical and

(2001 Ed.)

construction, although sales also may be made to individuals for their own use. Supplies are typically received in bulk quantity and may include, but are not limited to, spools of electrical wiring and cable, wiring harnesses, plastic and flex hosing, panel boxes, brackets, electrical outlet boxes, fuses, switches, plates, and residential and commercial canisters and light fixtures. This classification includes all store and yard operations and the transfer of materials or inventory between related stores.

This classification excludes delivery drivers (other than those involved in intrastore or intrayard transfers mentioned above) who are to be reported separately in classification 1101; nondelivery activities conducted away from the store or yard; all service or repair work which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location; retail lighting fixture stores which demonstrate lights and fixtures to walk-in customers which are to be reported separately in classification 6406; and establishments engaged as wholesale lighting fixture and light bulb dealers who buy direct from manufacturers and who sell wholesale to retail lighting fixture stores or other such stores or institutions who are to be reported separately in classification 6407.

2009-02 Farm supply stores

Applies to establishments primarily engaged in operating farm supply or farm cooperative stores. These establishments carry a diverse line of farm feeds, products, and accessories. Typical items may include, but are not limited to, bulk quantities of mixed and unmixed feeds, seeds, oats and grains; bales of alfalfa or hay; bag feed for dogs, cats, chickens, birds, and other animals; bulk and bag fertilizers; pesticides and other garden items including peat moss and bark; animal grooming and care accessories; horse tack; specialty clothing; feed and water bins; metal fencing and grates for livestock; fence posts; barbed wire; pumps and piping; hardware and tools; automotive and tractor parts and accessories; and miscellaneous homeowner or yard equipment such as mowers, rototillers, and a variety of small tractors and accessories. This classification includes all store and yard operations and the transfer of materials or inventory between related stores.

This classification excludes delivery drivers (other than those involved in transferring materials or inventory between related stores) who are to be reported separately in classification 1101; all other nondelivery activities conducted away from the store or yard; all service or repair work which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location; and establishments primarily engaged in the sale, service and/or repair of farm machinery and implements which are to be reported separately in classification 6408.

Special note: Farm supply or farm cooperative stores may conduct additional operations which are to be reported separately. These activities may occur at a single location operated by the business or at separate locations and may include an oil or gas dealership which is to be reported separately in classification 3407; self-service gas or diesel stations which are to be reported separately in classification 3409; or agricultural fertilizer dealers (not including the man-

ufacture of raw materials) which are to be reported separately in classification 2106.

2009-03 Hardware stores with lumber or building material supplies

Applies to establishments engaged in operating hardware stores that also sell building material supplies. For purposes of this classification the term "building materials" includes, but is not limited to, such items as wallboard, roofing, insulation, sheet metal, bricks, blocks, and windows, cabinets, doors, windows, sheet metal, roofing materials, concrete mix, boards, plywood, dimensional lumber (1x2, 2x4, 2x12, etc.), fence posts, railroad ties, siding, and wood paneling, as well as interior wood trim and molding. The merchandise carried will vary from store to store. For the purposes of this classification, hardware includes items such as, but not limited to, nails, nuts, bolts, screws, door fixtures, hinges, locks, power and hand tools, garden tools and accessories, electrical and plumbing supplies, and paint and automobile supplies. Depending on their location and customer base, hardware stores may also sell a limited selection of giftware, housewares, sporting goods, athletic equipment, games or similar items. Other services provided could include making keys, threading pipe, mixing paint, and the sale of fishing or hunting licenses. This classification includes all store and yard operations and the transfer of materials or inventory between related stores.

This classification excludes delivery drivers (other than those involved in transferring materials or inventory between related stores) who are to be reported separately in classification 1101; all other nondelivery activities conducted away from the store or yard operation; and all service or repair work which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location.

Special note: Hardware stores with lumber or building material supplies are smaller and offer a smaller product selection than warehouse centers which are reported separately in classification 2009-05. Establishments primarily engaged as building material dealers and lumber yards are to be reported separately in classification 2009-00.

2009-04 Pump, plumbing, irrigation, and pipe supply dealers

Applies to establishments engaged as pump, plumbing, irrigation, and pipe supply dealers. Merchandise includes, but is not limited to, pumps, above and below ground irrigation systems and supplies, pipe, fittings, elbows, adapters, connectors, hoses, valves, water softeners, filters, disposals, hot water tanks, heaters, sinks, tubs, toilets, and shower units. Merchandise is typically received in bulk quantity by the pallet, sling, crate or box. Merchandise is sold primarily to plumbing and irrigation contractors. This classification includes all store and yard operations, including showrooms or display areas and in-shop services such as the rebuilding or repair of pumps, and cutting and threading pipe. Also included in this classification is the transfer of product or material inventory between related stores.

This classification excludes delivery drivers who are to be reported separately in classification 1101; all other nondelivery activities conducted away from the store or yard; and

all service or repair work not described above which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location.

2009-05 Warehouse centers

Applies to establishments engaged in operating warehouse centers with lumber or building material supplies. For purposes of this classification a warehouse center is an enclosed building or structure which serves to protect the majority of the items or products contained within the warehouse environment. Warehouse centers are larger than traditional hardware stores and offer a wider product selection. A dominant characteristic of a warehouse center is that excess stock is stacked up to 25 feet high throughout the building. The term "building materials" as used in this classification includes, but is not limited to, such items as wallboard, roofing, insulation, sheet metal, bricks, blocks, and windows. Merchandise carried by warehouse centers may include hardware, variety items, building materials, as well as wood or lumber. Hardware items may include such items as nails, nuts, bolts, door fixtures, hinges, locks, hand or power tools, garden tools, garden supplies and accessories, lawn mowers, electrical supplies, plumbing supplies, paint, and auto supplies. Variety items may include giftware, housewares, sporting goods, athletic equipment, games, rugs, and lawn chairs. Wood and lumber products may include beams, planks, boards, plywood, dimensional lumber (1x2, 2x4, 2x12, etc.), fence posts, railroad ties, shakes and shingles, siding, and wood paneling. This classification includes all store and yard operations and the transfer of materials or inventory between related stores.

This classification excludes delivery drivers (other than those involved in transferring materials or inventory between related stores) who are to be reported separately in classification 1101; all other nondelivery activities conducted away from the store or yard; and all service or repair work which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location.

Special note: Hardware stores with lumber or building material supplies are smaller and offer a smaller product selection than warehouse centers and are reported separately in classification 2009-03. Establishments primarily engaged as building material dealers and lumber yards are to be reported separately in classification 2009-00.

2009-06 HVAC supply dealers

Applies to establishments engaged as heating, ventilation, and air conditioning product and supply dealers. Merchandise includes, but is not limited to, furnace units, gas fireplaces, air conditioning and heater units, hot water tanks, thermostats, vents, venting duct and pipe, vent collars and reels, registers, fittings, adapters, galvanized pipe, insulation wrap, preformed or bent duct portions, flat sheets of metal, concrete pads and gas logs. Merchandise is typically received in bulk quantity by the pallet, sling, crate or box. Merchandise is primarily sold to heating and ventilation contractors, furnace contractors and sheet metal contractors. This classification includes all store and yard operations and the transfer of product or material inventory between related stores.

This classification excludes sheet metal fabrication shops which are to be reported separately in classification 3404; delivery drivers (other than those involved in intrastore or intrayard transfers) who are to be reported separately in classification 1101; all other nondelivery activities conducted away from the store or yard; and all service or repair work which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-56101, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-56101, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 94-12-063, § 296-17-56101, filed 5/30/94, effective 6/30/94; 93-12-093, § 296-17-56101, filed 5/31/93, effective 7/1/93.]

WAC 296-17-562 Classification 2101.

2101-00 Grain milling; flour mills; feed mills; feed manufacturing

Applies to establishments engaged in milling grain into flour or meal or in the manufacture of dry (powdered, granule or pellet) feed. Operations contemplated by this classification include the receipt of grain (wheat, barley, oats, corn) in bulk or bag which is purchased from others, grinding or milling the grain to either a coarse or a fine powder, adding binder (molasses), adding and mixing ingredients (depending on product being made), and packaging. This classification includes delivery of products in packaged or bulk form to customers.

This classification excludes establishments engaged in the further processing of flour or meal to manufacture food products which are to be reported separately in the applicable food manufacturing classification, and establishments engaged in the manufacture of canned or frozen animal food which are to be reported separately in classification 3902.

2101-01 Hay, grain or feed dealers

Applies to establishments engaged in the sale of grain, feed, and hay to others. Operations contemplated by this classification are limited to the purchase of hay, grain, or feed in bulk from others and the subsequent resale of these items in bulk to others. Establishments subject to this classification may have a small store operation, a substantial storage facility, or they may haul product from location to location all of which are included within the scope of this classification when done by employees of employers subject to this classification.

This classification excludes the sale of hay by farm operations which is to be reported separately in classification 4808, and establishments engaged in the manufacture of animal feed which are to be reported separately in classification 2101-00.

2101-02 Seed processing

Applies to establishments engaged in the processing of agricultural seeds for wholesale or retail sales. These establishments receive produce such as wheat, barley, alfalfa, lentils, vegetables, fruit or flowers from farmers the seed company has contracted with, or in the case of larger seed companies, they may have their own fields for raising the seed crop. Work contemplated by this classification includes, but is not

limited to, cleaning, grading, crushing, separating, and packaging of the product (either by hand or by machine). Machinery includes, but is not limited to, screening machines, air gravity separators, clippers, tumbling drums for polishing, and bagging machines. This classification also includes trial plots or lab research facilities used to develop new seed hybrids and improve existing varieties, consultation services provided to the farmers during planting and harvesting seasons, and custom milling work conducted at the farmer's premises. Also included in this classification are establishments engaged exclusively in providing grain or seed drying services.

This classification excludes growing of seeds, other than on a trial plot, which is to be reported separately in the appropriate agricultural classification; merchants engaged in hand packaging seeds that have been processed by others who are to be reported separately in classification 6309-06; grain milling which is to be reported separately in classification 2101-00; hay/grain/feed dealers which are to be reported separately in classification 2101-01; and grain or bean/pea elevators which are to be reported separately in classification 2007.

2101-05 Hop pellet manufacturing

Applies to establishments engaged in the manufacture of hop pellets. Hop pellets are one of several ingredients used by breweries in the manufacture of beer and ale. Operations contemplated by this classification include, but are not limited to, cold storage room operations where bales of hops are kept, bale breaking and grinding of hops into powder, blending of powders and additives, testing of hops, pelletizing, packaging, and shipping. Establishments subject to this classification may own the hops or do custom blending for others.

This classification excludes establishments engaged in the manufacture of hop extract which are to be reported separately in classification 3701.

Special note: Hop pellets are often referred to as a flavoring so care should be taken, when another classification is being considered, to determine the process used.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-562, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-562, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-562, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 54.16.035, 93-12-093, § 296-17-562, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035, 87-12-032 (Order 87-12), § 296-17-562, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-562, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-562, filed 11/9/73, effective 1/1/74.]

WAC 296-17-563 Classification 2102.

2102-00 Warehouses - general merchandise

Applies to establishments operating as warehouses for general merchandise. This merchandise belongs to a customer and is usually stored for long periods of time. Products typically involved are bulk, nonperishable materials which might include, but not be limited to, rice, coffee, potatoes, or dry cement. Work contemplated by this classification includes, but is not limited to, unloading deliveries, moving merchandise within the facility, recordkeeping, security, and maintaining the facility. Equipment and machinery used

includes pallet jacks, forklifts, routine maintenance, cleaning and recordkeeping supplies, and shop vehicles.

This classification excludes delivery drivers who are to be reported separately in classification 1102; wholesale dealers who operate a warehouse for storage of their own product which is to be reported separately in the classification applicable to the product being sold; warehousing of household furnishings by a moving and storage company which is to be reported separately in classification 6907; cold storage plants which are to be reported separately in classification 4401; mini-storage warehousing which is to be reported separately in classification 4910; field bonded warehouses which are to be reported separately in classification 2008; and the warehousing of a manufacturer's own product which is to be reported separately in the manufacturing classification applicable to the work being performed.

Special note: Even though this type of operation may handle some "grocery" products, it differs from 2102-11 in that the products being handled in 2102-00 are in bulk packaging (not cases of consumer-size packages), do not belong to the business that is warehousing them, and are not intended for sale to a wholesaler/retailer.

2102-04 Recycle, collection and receiving stations; rags, bottles, paper and metal container dealers, N.O.C.

Applies to establishments engaged in the collection of used paper, aluminum, tin, glass, and plastic for the purpose of selling the material to another business that will recycle/remanufacture it into new products. These facilities normally acquire material by placing collection bins at various remote locations, operating a drop-off center (this phase of the business is known in the trade as a "buy back center"), and employing drivers to pick up from businesses. Work contemplated by this classification includes, but is not limited to, sorting material, operating various pieces of equipment used to crush, reduce, wash, and bale material, weighing containers, paying customers for receipt of items that have a redemption value by the pound or piece ("buying back"), and operating shop or yard vehicles. Machinery and equipment includes, but is not limited to, shredders, balers, can crushers, weigh scales, forklifts, collection bins, shop or yard vehicles, and rolloff trucks to handle the collection bins. This classification includes dealers of rags, bottles, paper and metal containers not covered by another classification (N.O.C.)

This classification excludes drivers who are to be reported separately in classification 1102 and establishments engaged in collecting, sorting and reducing scrap metal such as junk dealers, scrap metal dealers or processors, which also receives glass, paper, plastic, etc., which are to be reported separately in classification 0604.

Special note: Classification 2102-04 should not be assigned to an employer who also operates a business subject to classification 4305-18 (Garbage, refuse or ashes collecting) without careful review and an on-site survey. Most garbage collecting businesses have some type of "recycle" program as part of their normal operations in an effort to sort and reduce the amount of waste that goes to landfills and this is considered an inclusion.

2102-11 Grocery, fruit or produce distributors - wholesale or combined wholesale and retail

Applies to establishments engaged in the wholesale, or wholesale/retail, distribution of a variety of grocery items, fruit and produce. A business in this classification buys products from the manufacturer and sells to retail grocery stores, restaurants, and similar businesses. Grocery items may include, but not be limited to, packaged foods, frozen foods, household cleaning supplies, paper products, personal care items, beer, soda, and dairy products. Work contemplated by this classification includes, but is not limited to, unloading deliveries, moving merchandise within the facility, incidental repackaging, breakdown of merchandise into smaller lots, recordkeeping, security, and maintaining the facility. Equipment and machinery includes, but is not limited to, pallet jacks, forklifts, strapping and shrink wrapping equipment, and vehicles.

This classification excludes delivery drivers who are to be reported separately in classification 1101; any general merchandise warehouse operations in which the operator of the warehouse does not own the merchandise being handled and it is in bulk quantities, which is to be reported separately in classification 2102-00; cold storage plants handling food products which are to be reported separately in classification 4401; operations specializing in vegetable/fruit packing for wholesale distribution which are to be reported separately in classification 2104; operations specializing in wholesale distribution of beer, wine, ale or soft drinks which is to be reported separately in classification 2105; field bonded warehouses which are to be reported separately in classification 2008; and the warehousing of a manufacturer's own product which is to be reported separately in the manufacturing classification applicable to the work being performed.

2102-28 Wool or cotton merchants

Applies to establishments operating as wool or cotton merchants. Merchants subject to this classification buy raw wool or cotton from others, do incidental sorting, grading and repackaging, and sell the product to another business for use as a raw material to make products such as yarn, thread or fabric. Work contemplated by this classification includes, but is not limited to, unloading deliveries, moving merchandise within the facility, hand sorting the product by grade (quality), repackaging, recordkeeping, security, and maintaining the facility. Equipment and machinery includes, but is not limited to, pallet jacks, forklifts, repackaging equipment and vehicles.

This classification excludes drivers who are to be reported separately in classification 1102; wholesale dealers of a finished wool or cotton product which are to be reported separately in the classification applicable to the product; and the warehousing of a manufacturer's own product which is to be reported separately in the manufacturing classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-563, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-563, filed 5/31/96, effective 7/1/96; 88-12-050 (Order 88-06), § 296-17-563, filed 5/31/88, effective 7/1/88; 85-24-032 (Order 85-33), § 296-17-563, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-563, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-563, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-563, filed 11/30/81, effective

1/1/82; 80-17-016 (Order 80-23), § 296-17-563, filed 11/13/80, effective 1/1/81; Order 77-27, § 296-17-563, filed 11/30/77, effective 1/1/78; Order 75-38, § 296-17-563, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-563, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-563, filed 11/9/73, effective 1/1/74.]

WAC 296-17-564 Classification 2104.

2104-01 Vegetable packing - fresh

Applies to establishments engaged in the packing of fresh vegetables. These operations are usually located in produce growing areas and are generally seasonal. The vegetables are generally brought to the packing plant by the farmer or co-op drivers, but some packing plants may employ their own drivers to pick up the product from the local farms or co-op. Typical activities of the packing operation include, but are not limited to, sorting, grading, cleaning, trimming, packing and shipping of the vegetables. Various packing containers such as plastic bags, boxes, barrels, crates, and baskets may be used. The packing may be done by hand for fragile vegetables or by machine for the more sturdy produce. This classification includes cold storage operations if it is used solely for the storage of their own produce. Drivers employed by these establishments who pick up the vegetables from the suppliers or deliver the packaged product to the market are included in this classification. A farm operation that grows and packs their own fresh vegetables or packs other farms' fresh vegetables in addition to their own is to be assigned this classification (2104) for the packing operation. However, if the farmer only sorts and stores the fresh vegetables, the appropriate agricultural classification is applicable to both the growing and sorting/storage operations. This classification also includes establishments engaged in processing potatoes into seed potatoes. Processing plants receive whole potatoes from their suppliers. At the plant the potatoes are moved along on a conveyor belt, cleaned as appropriate, cut into small pieces (usually quarters), and treated with a fumigant powder or other sterilizer. The smaller pieces, referred to as "seed potatoes," are delivered to farmers who plant them for future crops.

This classification excludes fresh fruit packing which is to be reported separately in classification 2104-02; cannery or freezing operations and/or any processing of the vegetables which are to be reported separately in classification 3902; and cold storage operations not exclusively part of a packing operation which are to be reported separately in either classification 4401 or 4404.

2104-02 Fruit packing - fresh

Applies to establishments engaged in the packing of fresh fruit. These operations are usually located in produce growing areas and generally are seasonal. The fruit may be brought to the packing plant by the farmer or co-op drivers, but some packing plants may employ their own drivers to pick up the product from the local farms or co-op. Typical activities of the packing operation include, but are not limited to, sorting, grading, cleaning, trimming, packing and shipping the fruit. Various packing containers such as plastic bags, boxes, barrels, crates and baskets may be used. The packing may be done by hand for fragile fruit or by machine for the more sturdy produce. This classification includes any cold storage operations if it is used solely for the storage of

their own produce. Drivers employed by these establishments who pick up the fruit from the farmer or deliver the packaged product to the market are included in this classification. A farm operation that grows and packs their own fresh fruit, or packs other farms' fresh fruit in addition to their own, is to be assigned this classification (2104) for the packing operation. However, if the farmer only sorts and stores the fresh fruit the appropriate agricultural classification is applicable to both the growing and sorting/storage operations.

This classification excludes fresh vegetable packing which is reported separately in classification 2104-01; cannery or freezing operations and/or any processing of the fruit which are to be reported separately in classification 3902; and cold storage operations not exclusively part of a packing operation which is reported separately in either classification 4401 or 4404.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-564, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-564, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-564, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-564, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-564, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-564, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-564, filed 11/9/73, effective 1/1/74.]

WAC 296-17-56401 Classification 2105.

2105-00 Beer, ale, wine and soft drink importers, exporters and distributors - wholesale or combined wholesale and retail

Applies to establishments engaged in wholesale, or combined wholesale and retail, distribution of beer, ale, wine and soft drinks. These establishments carry a wide selection of soft drinks, domestic and import beers, ales, and wine, as well as beer pumps and ice. Product stock is received directly from the breweries, wineries, manufacturers or larger distributors, and stored in warehouses or refrigerated storerooms on pallets, in crates, boxes, cases, cartons, kegs or canisters. Stock is then distributed to customers such as, but not limited to, restaurants, lounges and bars, hotels, grocery stores, or other commercial businesses. This classification includes route drivers and driver's assistants.

This classification excludes establishments engaged in the installation, service and repair of vending machines which are to be reported separately in classification 0606, and breweries, wineries, and beverage bottlers, N.O.C. which are to be reported separately in classification 3702.

Special notes: Classifications 2105 and 3702 shall not be assigned to the same account unless each operation is conducted as a separate and distinct business and the conditions set forth in the general reporting rule covering the operation of a secondary business have been met.

2105-01 Beer, ale and wine importers, exporters and distributors - wholesale or combined wholesale and retail

Applies to establishments engaged in wholesale, or combined wholesale and retail, distribution of beer, ale and wine, but not in soft drink beverages. These establishments carry a wide selection of domestic and import beers, ales or wines, as well as beer pumps and ice. Product stock is received directly from the breweries, wineries, manufacturers, or larger dis-

tributors and stored in warehouses or refrigerated storerooms on pallets, in crates, boxes, cases, cartons, kegs or canisters. Stock is then distributed to customers such as, but not limited to, restaurants, lounges and bars, hotels, grocery stores, or other commercial businesses. This classification includes route drivers and driver's assistants.

This classification excludes establishments engaged in the installation, service and repair of vending machines which are to be reported separately in classification 0606, and breweries, wineries and beverage bottlers, N.O.C. which are to be reported separately in classification 3702.

Special notes: Classifications 2105 and 3702 shall not be assigned to the same account unless each operation is conducted as a separate and distinct business and the conditions set forth in the general reporting rule covering the operation of a secondary business have been met.

2105-02 Soft drink importers, exporters and distributors - wholesale or combined wholesale and retail

Applies to establishments engaged in wholesale, or combined wholesale and retail, distribution of soft drink beverages but not alcoholic beverages. Product stock is received directly from the manufacturers or larger distributors and stored in warehouses or refrigerated storerooms on pallets, in crates, boxes, cases, cartons, or canisters. Stock is then distributed to customers such as, but not limited to, restaurants, lounges and bars, hotels, grocery stores, or other commercial beverages. This classification includes route drivers and driver's assistants.

This classification excludes establishments engaged in the installation, service and repair of vending machines which are to be reported separately in classification 0606, and establishments that bottle beverages which are to be reported separately in classification 3702.

Special note: Classifications 2105 and 3702 shall not be assigned to the same account unless each operation is conducted as a separate and distinct business and the conditions set forth in the general reporting rule covering the operation of a secondary business have been met.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-56401, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-56401, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-56401, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-56401, filed 2/28/85, effective 4/1/85; 81-24-042 (Order 81-30), § 296-17-56401, filed 11/30/81, effective 1/1/82.]

WAC 296-17-56402 Classification 2106.

2106-00 Fertilizer, anhydrous ammonia and agricultural chemical dealers

Applies to establishments engaged in the sale of fertilizer, anhydrous ammonia, and agricultural chemicals. This classification includes the mixing of wet or dry chemical fertilizers all of which fall into one of three categories: Nitrogen, phosphate or potassium. Fertilizer dealers may use a chemical or mechanical process to mix one or more of the basic fertilizers or combine portions of each per customer specifications. Included in this classification is the manufacture, distribution, and application of anhydrous ammonia which is dry ammonia gas compressed into a liquid and used as a fertilizer. Also included in this classification are estab-

lishments that sell and distribute "natural" fertilizers (manure). Typical establishments in this classification include, but are not limited to, commercial fertilizer dealers, farmer co-ops, and grange supply dealers which may do some chemical mixing but are more predominately involved in the sales and delivery of the fertilizer.

This classification excludes the mining of raw ores (phosphate and potassium) used in *manufacturing* the fertilizer which is to be reported separately in classification 1701; the manufacture of ammonia and nitric acid which is to be reported separately in classification 3701; and the application of fertilizer by a custom farm services contractor which is to be reported separately in classification 4808.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-56402, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-56402, filed 5/31/96, effective 7/1/96; 88-12-050 (Order 88-06), § 296-17-56402, filed 5/31/88, effective 7/1/88.]

WAC 296-17-565 Classification 2201.

2201-01 Laundry, dry cleaning and dyeing establishments

Applies to establishments engaged in laundry, dry cleaning, or dyeing services. This classification is limited to establishments providing services primarily to retail walk-in customers who leave the items to be laundered, dry cleaned, or dyed at the laundry facility. This classification covers all operations including, but not limited to, dry cleaning, dyeing, the washing, drying, and pressing of clothing or household furnishings such as, but not limited to, curtains, bedding, linens, and sleeping bags, repairing or altering the items left for cleaning, pick up and delivery services, and drop off stations. These establishments generally employ counter staff to wait on customers as well as employees who engage in laundering and/or dry cleaning operations (although some employees may perform both activities). This classification also includes waterproofing or mothproofing garments, or providing cold storage for fur goods for retail customers. Materials and machinery include, but are not limited to, detergents, bleaches, cleaning solvents, deodorizers, dyes, clothes hangers, plastic bags, automatic or steam operated washing machines, dryers, dry cleaning chambers, dyeing vats, pressing and ironing boards, sewing machines, and delivery vans.

This classification excludes self-service, coin-operated laundry or dry cleaning establishments which are to be reported separately in classification 2204; commercial or industrial laundries not covered by another classification, including linen, uniform and diaper services which are to be reported separately in classification 2203; and carpet, rug and upholstery cleaning establishments which are to be reported separately in classification 2202.

Special note: It is common for establishments subject to this classification to have satellite locations where customers drop off and pick up cleaning, but where no actual laundering occurs. Drop off centers are included in this classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-565, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-565, filed 5/31/96, effective 7/1/96; 87-12-032 (Order 87-12), § 296-17-565, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-565, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-565, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-565, filed 11/9/73, effective 1/1/74.]

WAC 296-17-566 Classification 2202.**2202-03 Carpet, rug, and upholstery cleaning**

Applies to establishments engaged in cleaning rugs, carpets, or upholstery for commercial, institutional or residential customers. This classification contemplates work done either at the customer's location or in their own shop or plant. In-shop cleaners usually clean area rugs, and may occasionally clean furniture upholstery. Items are picked up by employees or delivered to the shop, where they are measured and inspected for tears, worn areas, stains or other damage. Rugs may be cleaned with vibrating machines, vacuum cleaners, or shampooing machines. Cleaned rugs are suspended from poles and conveyed into the drying room where large fans propel heated air to dry them. Once dry, the rugs are inspected, rolled, wrapped, and returned to the customer or stored until the customer requests delivery. Services at customers' location may use truck-mounted or portable cleaning equipment. Carpet and upholstery cleaning services may offer incidental, related services such as, but not limited to, carpet dyeing and tinting, repairs, carpet maintenance consultations, rug decontamination, on-site dry cleaning of draperies, floor or wall cleaning, the rental of cleaning equipment, or the sale of cleaning solutions. These incidental activities are included in this classification when done by employees of employers subject to this classification.

This classification excludes janitorial establishments that provide general interior cleaning services to the public which are to be reported separately in classification 6602, and laundry and dry cleaning establishments providing services primarily to retail walk-in customers which are to be reported separately in classification 2201.

Special note: Restoration work (as a result of smoke or water damage) such as drying and/or cleaning carpets and upholstered furniture, washing and polishing furniture, washing walls, washing and waxing floors, and cleaning the personal contents of a home is included in classification 6602-03. Refer to classification 6602-03 for more detailed information on restorations.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-566, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-566, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-566, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-566, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-566, filed 11/9/73, effective 1/1/74.]

WAC 296-17-56601 Classification 2203.**2203-00 Laundries - commercial or industrial: N.O.C.**

Applies to establishments engaged in laundering operations which are not covered by another classification (N.O.C.). In addition to linen, uniform or diaper services, these establishments may launder other goods such as, but not limited to, protective apparel (flame, heat, or chemical resistant), dust control items (treated mops, rugs, mats, dust cloths), and wiping towels. These items may belong to the commercial or industrial laundry and rented to users, or they may be the customers' own goods. Operations include, but are not limited to, soliciting new customers by route supervisors or drivers, collecting and delivering, marking, weighing and sorting laundry, washing, extracting, tumbling, starching,

(2001 Ed.)

drying, machine or hand ironing, making repairs or alterations, folding and wrapping. This classification also contemplates employees such as counter personnel, receiving clerks, sorters and markers at collection or distribution stores operated on the premises where laundering is performed.

This classification excludes laundry and dry cleaning establishments providing services primarily to retail walk-in customers which are to be reported separately in classification 2201; self-service, coin-operated laundry or dry cleaning establishments which are to be reported separately in classification 2204; and carpet, rug and upholstery cleaning establishments which are to be reported separately in classification 2202.

Special note: This classification also covers establishments specializing in stone washing jeans or "contract dyeing" for commercial or industrial businesses and the cleaning of nonfabric items, such as venetian blinds, plastic goods or computer parts when done at the laundry facility.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-56601, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-56601, filed 5/29/87, effective 7/1/87.]

WAC 296-17-56602 Classification 2204.**2204-00 Laundry or dry cleaning - coin-operated, self-service operations**

Applies to establishments engaged in the operation of coin (or card) operated self-service laundry and dry cleaning equipment for customers' use on the premises. Most facilities have an attendant(s) on duty at all times; others may have only periodic surveillance by the owner or employees. Attendants generally ensure there are no problems with the equipment or with vandalism; they may perform minor repair or adjustments on the machines, assist patrons by carrying laundry or explaining the operation of the machines. There is usually a small waiting area which may include benches and chairs, change-making machines, vending machines with food and laundry supplies. Materials include, but are not limited to, detergents, bleaches, fabric softeners, dry cleaning solvents, spot-removing fluids, plastic bags, and hangers. Machinery includes, but is not limited to, residential or commercial sized washers and dryers, dry cleaning machines, pressing machines, irons, coin changing machines, tables for folding clothing, chairs, hanger racks, water heating and storage system, solvent reclaiming units, and solvent storage tanks.

This classification excludes laundry and dry cleaning establishments providing services primarily to retail walk-in customers which are to be reported separately in classification 2201, and commercial or industrial laundries not covered by another classification, including linen, uniform and diaper service which are to be reported separately in classification 2203.

Special note: This classification includes self-service/coin-operated cleaning facilities that offer dry cleaning services where the customers leave their clothing with the attendant and it is sent elsewhere for professional dry cleaning. This classification does not apply to any self-service/coin-operated cleaning facilities where the attendant performs any washing, drying, dry cleaning, hanging, or fold-

ing services on the premises which are to be reported separately in classification 2201.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-56602, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-56602, filed 5/31/96, effective 7/1/96.]

WAC 296-17-567 Classification 2401.

2401-00 Paper, pulp, or wood fiber: Manufacturing

Applies to establishments engaged in making paper from raw materials such as, but not limited to, wood chips, cotton fiber, water, kraft paper, recycled paper, bleach and dye purchased from outside sources. This classification includes the mashing of wood chips into fiber. Paper manufacturers may make finished products from the paper they manufacture which is included in this classification when done by employees of employers subject to this classification. Equipment includes, but is not limited to, large vats and tanks, spraying systems, choppers, paper-making machines, conveyor systems, forklifts, scales, winders, rewinders, and cutting machinery. Modern automated paper mills are monitored from computerized control rooms; many of the employees are electricians and control technicians. Wood chips are heated, washed, drained, impregnated with chemicals to separate natural binder fibers from the cellulose fibers, then chopped into tiny particles and further cleansed. Bleach and water are added again and the fibrous mixture is held in tanks to relax and fluff it to a natural state before going to a filtering process where the water is removed, allowing it to coagulate. More ingredients are added to increase strength, then the mixture is sprayed onto the paper-making machinery where it winds through the various sections at high speed. During the first stage the pulp is mostly water; as it spins on the wire mesh, the water is suctioned out and the paper winds around felt-covered rollers. The machine moves the paper through an enclosed, heated room (oven) and dried. The dried paper is rolled from the oven, smoothed on rollers, then rewound into smaller rolls and cut into desired lengths and widths.

This classification excludes establishments engaged in the manufacture of wood chips which are to be reported separately in classification 2903 and establishments engaged in the manufacture of abrasive cloth or paper (emery cloth/sandpaper) which are to be reported separately in classification 3708.

2401-03 Corrugated and fiber board container: Manufacturing

Applies to establishments engaged in the manufacture of boxes and cartons made of corrugated cardboard. Manufacturers subject to this classification may either corrugate cardboard for use in their own products or purchase corrugated cardboard from others. Applying coatings or laminating their own products is included in this classification when done by employees of employers subject to this classification. Raw materials include, but are not limited to, corrugated cardboard, glue, staples, tape, ink, and coating resins. Machinery includes, but is not limited to, sheeters, slitters, slotters, winders or rewinders, printing presses, box-making machinery, die cutters or other cutting machines, laminators, corrugators, balers and shredders, and forklifts. Cardboard is cut to size and shape, printed, scored or creased, corners cut or slotted,

sides folded and bottom pieces taped together. Box manufacturers may cut Styrofoam into packing pieces if their customers want them as a packaging unit. This incidental activity is included within the scope of this classification when done by employees of an employer subject to this classification.

This classification excludes establishments engaged in corrugating, laminating, oiling or coating paper which are to be reported separately in classification 2401-04 and establishments engaged in the manufacture of abrasive cloth or paper (emery cloth/sandpaper) which are to be reported separately in classification 3708.

2401-04 Paper coating, corrugating, laminating, oiling, or embossing

Applies to establishments engaged in manufacturing corrugated cardboard, or in coating, laminating, oiling, embossing paper or cardboard (chipboard) for others. To make *corrugated* cardboard, three (or more) rolls of kraft paper are simultaneously fed into a corrugating machine. Steam is sprayed onto the middle sheet as it winds around grooved rollers, forming grooves. Glue is applied to the tips of the grooves and the middle sheet is run between the other two sheets to form corrugated cardboard. The rest of the process involves heating, drying and curing, scoring and cutting the cardboard. *Coating* involves mixing coating materials, pouring the mixture into troughs of coating machines; the paper passes over rollers through the coating mixtures. *Oiling or waxing* processes are similar, but the oils or waxes are heated prior to being applied to the paper. After saturation, paper is dried, then finished by calendering (smoothed by being pressed through large rollers), slitting to desired widths, and rewinding or sheeting to size. *Laminated* paper is produced by feeding a paste or glue between layers of paper, pressing them together, drying and finishing by winding into rolls, or cutting, slitting or die cutting to size and shape. Paper is *embossed* by winding it on embossing rollers that perforate designs in it. Raw materials include, but are not limited to, kraft paper, chipboard, glues, waxes, resins and other coating liquids. Machinery for all these processes moves paper through glue baths, finishing applications, squeeze rollers, corrugating or embossing rollers, drying ovens, cutting devices, laminators, and/or stacking equipment. Other machinery includes, but is not limited to, forklifts, balers and shredders.

This classification excludes establishments engaged in the manufacture of paper, pulp or wood fiber which are to be reported separately in classification 2401-00; establishments engaged in the manufacture of corrugated and fiber board containers which are to be reported separately in classification 2401-03; and establishments engaged in the manufacture of abrasive cloth or paper (emery cloth/sandpaper) which are to be reported separately in classification 3708.

Special note: This classification differs from classification 2401-03 in that making corrugated cardboard or laminating, oiling, or coating cardboard products made by others is the main activity in classification 2401-04 while such supporting operations in classification 2401-03 are incidental to the manufacture of the product.

2401-08 Paper goods, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of heavy-grade, paper-based products, which are not covered by another classification (N.O.C.). Products range widely and include, but are not limited to, panels, paper-mache items, milk cartons, display boards, commercial air filters, and spiral tubes. Spiral tubes range in size from small cores for paper towels to large tubes used by the construction industry to form concrete. Materials include, but are not limited to, paper, chipboard, glue, inks and dyes, chemicals; materials such as lightweight wire, or small parts made of plastic, Styrofoam, or textiles could be used as auxiliary pieces of the finished product. Machinery includes, but is not limited to, sheeters, slitters, slotters, winders, rewinders, printing presses, cutting, drilling or punching machines, ovens, heated presses, vats and beaters, grinders, laminators, embossers, gluers, vacuum machines, heat-sealing machines, wire-bending equipment, packaging equipment, conveyors, shredders, and balers. Depending on the product being made, processes are similar to one or more of those described in the other paper products manufacturing classifications.

This classification excludes establishments engaged in the manufacture of paper, pulp or wood fiber which are to be reported separately in classification 2401-00.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-567, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-567, filed 5/31/96, effective 7/1/96. WAC 296-17-568 Classification 2903.**2903-00 Wood chip, hog fuel, bark, bark flour, fire log and lath: Manufacturing**

Applies to establishments engaged in the production of products such as, but not limited to, wood chips, hog fuel, bark, bark flour, fire logs, kindling, excelsior, particleboard, and similar wood by-products.

Wood chips are small pieces of wood, generally uniform in size and larger and coarser than sawdust, commonly used to make pulp, particleboard, stuffing for products such as animal bedding, and as smoker/barbecue fuel;

Hog fuel is made by grinding waste wood in a hog machine, is larger and coarser than wood chips, and is used to fire boilers or furnaces, often at the mill or plant at which the fuel was processed;

Bark is the outermost covering of a tree which is chopped into pieces of varying sizes, and is commonly used for landscaping;

Bark flour is finely ground bark used as a filler or extender in adhesives;

Fire logs are made by forming sawdust into a log about 15 inches long and are used for fuel;

Lath is a narrow strip of wood commonly used to support shingle, slate or tile roofing, and as a fencing material;

(2001 Ed.)

Excelsior is the curled shreds of wood used as a packing and stuffing material, or as a raw material in making various board products;

Particleboard is a panel made from discrete particles of wood which are mixed with resins and formed into a solid board under heat and pressure.

The degree of manual labor required to make these products varies depending upon the size of the operation and sophistication of the equipment. Raw materials include, but are not limited to, logs, mill waste, bark, sawdust, or chips. Machinery includes, but is not limited to, rip saws, cut-off saws, loaders, debarkers, hog chippers, hammer mills, conveyors, sorting screens, and storage bunkers. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. The operation of portable chipping or debarking mills is included in this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; veneer manufacturing which is to be reported separately in classification 2904; and sawmill operations which are to be reported separately in classification 1002.

2903-06 Wood furniture stock: Manufacturing

Applies to establishments engaged in the manufacture of wood furniture stock such as, but not limited to, tabletops, table or chair legs, chair backs or seats, panels for beds, turning squares (bolts of wood which are shaped on lathes into furniture legs) and furniture squares (standard sized - usually 2" x 2" - pieces of wood used in constructing frames of upholstered furniture). Stock may be mass produced or custom. Raw material includes dimensional lumber from hardwoods such as, but not limited to, ash or alder. If the lumber is not presurfaced, it is sanded and/or planed. It is cut to desired width and thickness with a rip saw; and cut to desired length with a cut-off saw. Pieces may be beveled with a table saw, bored with a horizontal boring machine, molded or shaped, and joints formed using a mortise, tenon or jointer. Finished stock is banded and/or palletized and usually shipped unfinished and unassembled to furniture manufacturing plants. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; manufacture of wood furniture and caskets which is to be reported separately in classification 2905; lumber remanufacturing which is to be reported separately in classification 2903-26; veneer manufacturing which is to be reported separately in classification 2904; and sawmill operations which are to be reported separately in classification 1002.

2903-08 Wood door, jamb, window, sash, stair, molding and miscellaneous millwork: Manufacturing, prehang-ing or assembly

Applies to establishments engaged in the manufacture, prehanging or assembly of wooden doors, door components,

jamb, windows, sashes, stairs, mantels, moldings, turnings, and miscellaneous millwork such as, but not limited to, shutters, door and window grilles, skylights, pillars, wainscot, and similar architectural ornaments. Doors manufactured in this classification may be for residential or commercial use, such as, but not limited to, garage, closet, warehouse, interior and exterior; they may be odd-size or standard, panel, solid, louver, hollow core, sliding, bi-fold and overhead. Component parts for stairs include, but are not limited to, risers, tread, balusters, hand rails, and newel posts. Fireplace mantels include both the shelf and the complete ornamental facing surrounding the firebox. Moldings include, but are not limited to, picture moldings, chair rails, quarter round, coves, and architectural molding and base. Raw materials include, but are not limited to, cut stock lumber, plywood, veneer, particleboard, cardboard, plastic laminates, glue, hardware, glass, and metal. Cutting and fitting of glass and metal components for doors and windows is an integral phase of the manufacturing process and is included within the scope of this classification. Machinery includes, but is not limited to, various types of saws (table, panel, rip, cut-off, radial arm, trim, circular, band, jig, and miter), molders, shapers, routers, planers, finger jointers, mortises, tenons, lathes, presses, various types of sanders, drill presses, hand drills, boring machines, pneumatic nail, screw and staple guns, spray guns, chisels, air compressors, glue spreaders, drying ovens, overhead vacuum lifts, conveyor systems, fork lifts, and pallet jacks. Some door manufacturers have "door machines" which route impressions in jambs and blanks for hinge placement, and bore holes in the blank for knobs and locks; some have computerized overhead vacuum lights, electronic gluers, hydraulic lift pits, or electronically controlled saws. Pre-hanging doors involves boring holes in door blanks for knobs and locks, routing impressions into the blanks and jambs for hinge replacement, mounting hinges, trimming door and jamb replacements to exact size. Finishing the products with stain, paint, oil, or lacquer is included in this classification when done by employees of employers subject to this classification. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; the manufacture of wood furniture and caskets which is to be reported separately in classification 2905; the manufacture of wood cabinets, countertops, and fixtures which is to be reported separately in classification 2907; lumber remanufacturing which is to be reported separately in classification 2903-26; veneer manufacturing which is to be reported separately in classification 2904; the manufacture of metal doors, jambs, windows, and sashes which is to be reported separately in classification 3404; and sawmill operations which are to be reported separately in classification 1002.

Special note: Lumber yards and building materials centers subject to classification 2009 are to be assigned classification 2903-08 in addition to their basic classification if they prehang door blanks.

[Title 296 WAC—p. 284]

2903-10 Wood box, shook, pallet, bin: Manufacturing, assembly, or repair

Applies to establishments engaged in the manufacture, assembly, or repair of wood pallets, boxes, bins, shook, shipping crates, and storage containers. A shook is a set of unassembled sawn wood components for assembling a packing box or barrel. Shooks are usually sold to box assembly plants. Pallets may be constructed out of vertical and horizontal runners of dimensional lumber to form a slatted pallet or by attaching three evenly spaced rows of wooden blocks between two sheets of solid plywood to form a lid-block pallet. Usually, the manufacturer subject to this classification picks up pallets, boxes or shipping crates from the customer, brings them to the plant for repair, reconditioning, or rebuilding, then returns them to the customer. However, the *assembly or repair* of bins is often done at the customer's location, which is still to be reported in classification 2903-10 when performed by employees of the bin manufacturer. Raw materials include, but are not limited to, dimensional lumber, plywood, nails, staples, screws, glue, and paint. Machinery includes, but is not limited to, a variety of saws (table, rip, radial arms, cut-off, band or trim), planers, molders, drills, boring machines, notchers, nailing machines, pneumatic stapler, screw and nail guns, conveyors, roll cases, sorting tables, pallet jacks, and fork lifts. Incoming lumber is cut to specified lengths, widths, and thicknesses with saws, then planed, bored, tongued, and grooved. Pieces are nailed, stapled or glued together to form finished products. Cut ends of pallets, bins, and boxes may be painted for design or for color identification purposes. Customer's name may be imprinted on the product using stencils and paint or wood burning tools. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant (except bin assembly at a customer's location) which are to be reported separately in the classification applicable to the work being performed; pallet dealers which are to be reported separately in classification 1103; lumber remanufacturing which is to be reported separately in classification 2903-26; and sawmill operations which are to be reported separately in classification 1002.

Special note: Classification 1103 for pallet dealers does not include the repair or assembly of pallets. Any assembly or repair of pallets is to be reported in classification 2903-10.

2903-12 Wood products, N.O.C.: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of miscellaneous wood products which are not covered by another classification (N.O.C.), including, but not limited to, ladders, utility pole crossarms, beams, barricades, cable spools, slugs or ends for paper rolls, attic vents, prefabricated wall panels, gazebos, saunas, solariums, lattice panels, mall and park furnishings, playground equipment, docks and floats, parade floats, boat trailer bunks, cattle feeders, tree spreaders, tack strip, exhibit booths, weaving looms, and pottery wheels. Finishing of the product with stains or other lacquers is included in this classification when done by employees of employers subject to this classification. Raw

materials include, but are not limited to, dimensional lumber, plywood, particleboard, lath, logs, glue, staples, screws, nails, stains, paints, oils, and lacquers. Operations require substantial amounts of machine work, as well as hand assembly. Machinery includes, but is not limited to, saws (table, panel, cut-off, band, jig, miter, or chain), sanders, planers, routers, shapers, molders, jointers, drill presses, boring machines, hydraulic presses, pneumatic nail, screw and staple guns. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; the manufacture of wood household and sporting goods which is to be reported separately in classification 2909; the manufacture of wood furniture and caskets which is to be reported separately in classification 2905; the manufacture of wood cabinets, countertops and fixtures which is to be reported separately in classification 2907; lumber remanufacturing which is to be reported separately in classification 2903-26; veneer manufacturing which is to be reported separately in classification 2904; and sawmill operations which are to be reported separately in classification 1002.

2903-13 Veneer products: Manufacturing

Applies to establishments engaged in the manufacture of veneer products by laminating rough veneer to plywood or particleboard and applying plastic or polyester overlays. Laminated veneer sheets are generally sold to other manufacturers and used in the construction of items such as, but not limited to, cabinets, countertops, furniture, wall board, flooring, and shelving. Veneer products generally require no pre-finishing with paint, stain or lacquer. Raw materials include, but are not limited to, plywood, particleboard, polyester, paper, polyethylene, fiberglass, plastic laminates and glue. To make veneer products, sheets of rough veneer are individually fed through glue spreader machines which apply glue to both sides. Veneer sheets may be laminated to other veneer or to plywood or particleboard, cut to size with saws, then plastic or polyester overlays applied. Laminated sheets are fed through either hydraulic cold or hot presses to be bonded and cured. More sophisticated presses automatically feed the sheets through, and shear the laminated panels to standard 4' x 8' or 4' x 10' dimensions, or to specified lengths and widths for custom orders. Forklifts are used to move materials. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; the manufacture of household and sporting goods wooden ware which is to be reported separately in classification 2909; the manufacture of wood products not covered by another classification (N.O.C.) which is to be reported separately in classification 2903-12; the manufacture of wood furniture and caskets which is to be reported separately in classification 2905; the manufacture of wood cabinets, countertops and fixtures

which is to be reported separately in classification 2907; the manufacture of rough veneer which is to be reported separately in classification 2904-00; lumber remanufacturing which is to be reported separately in classification 2903-26; and sawmill operations which are to be reported separately in classification 1002.

2903-20 Wood sign: Manufacturing

Applies to establishments engaged in the manufacture of interior or exterior signs made of wood or wood products. Raw materials include, but are not limited to, dimensional lumber, plywood, molding, acrylic, paint, stain, lacquer and hardware. When additional sizing is required, saws, such as table, panel, cut-off, or radial arm, are used to cut material to desired dimensions. Pieces may be further sized, shaped, and smoothed with routers, saws, planers, or sanders. Stain, paint, or other finishes may be applied as background colors, borders or designs, with pneumatic spray guns, airbrushes, or by hand. Lettering or designs can be painted directly on the sign, cut from separate stock and glued or screwed on, or carved, routed or sandblasted. Computer-cut vinyl lettering may also be applied. Sign painting and lettering is included in this classification when done by employees of the sign manufacturer. Hand drills or drill presses are used to mount wood lettering or designs, bore holes and attach hardware used in the subsequent installation of the sign. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes the installation or removal of signs outside of buildings which is to be reported separately in classification 0403; the installation or removal of signs inside of buildings which is to be reported separately in classification 0513; sign painting or lettering on the inside of buildings which is to be reported separately in classification 4109; establishments that paint on or apply lettering to sign "backings" that are manufactured by others which is to be reported separately in classification 4109; the manufacture of metal or plastic signs which is to be reported separately in the classification applicable to the manufacturing process; and sawmill operations which are to be reported separately in classification 1002.

Special note: The majority of sign manufacturers also install their signs. Installation and removal of signs is to be reported separately.

2903-21 Wood truss: Manufacturing

Applies to establishments engaged in the manufacture of structural roof trusses, and/or ceiling and floor joists from wood or wood products. These products usually do not require a high degree of finishing work. Raw materials include, but are not limited to, dimensional lumber (usually 2" x 4", 2" x 6", and 2" x 8", which is kiln dried, machine stressed, and presurfaced), plywood, metal gussets, and hardware. Dimensional lumber is cut with gang, table, resaw, or radial arm saws. Cut stock is placed in a hydraulic jig assembly which holds the unassembled components in the properly aligned configuration. Pneumatic nailers are used to embed the nail clips which connect each joint of the truss. A gantry, which is an overhead crane traveling along a bridge-like frame, is used to relocate the truss along the assembly line.

The assembled truss is placed in a stationary or moveable press which attaches reinforcing triangular shaped metal plates called gussets at each joint or angle. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all installation activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; the manufacture of door jambs, windows, sashes, stairs, molding and miscellaneous millwork which is to be reported separately in classification 2903-08; lumber remanufacturing which is to be reported separately in classification 2903-26; and sawmill operations which are to be reported separately in classification 1002.

Special note: Truss manufacturers, whose primary customers are building contractors and building supply dealers, usually deliver their product. Delivery to the construction site often entails placing trusses onto the roof top, using boom lifts mounted on the delivery truck, which is included in this classification when performed by employees of employers subject to this classification.

2903-26 Lumber: Remanufacturing

Applies to establishments engaged in lumber remanufacturing, which is the process of converting cants, plywood, or lumber into a more specialized or higher grade product. Cants are large slabs of wood, usually having one or more rounded edges, which have been cut from logs. The incoming stock is generally green, rough-cut, and may be owned by the customer or by the remanufacturer. Machinery includes, but is not limited to, a variety of saws, (chop, resaw, trim, rip, table, radial arm, and cut-off), planers, surfacers, sanders, molders, groovers, finger jointers, tenoners, gluers, kiln dryers, fork lifts, and trolley cars. Stock is kiln dried, re-sawed, planed, grooved, or otherwise treated, according to customer specification if the customer owns it, or to standard cuts if it is for resale. Remanufacturers sell lumber to construction contractors or manufacturers that use it in the construction of products such as, but not limited to, paneling, countertops, framing studs, siding, decking, fencing, railroad ties, or molding. Remanufacturers generally do not finish the material with stain, paint, or lacquer. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; the manufacture of roof trusses and ceiling and floor joints which is to be reported separately in classification 2903-21; veneer manufacturing which is to be reported separately in classification 2904; establishments that exclusively kiln dry and/or treat lumber with preservatives, fire retardants, or insecticides, and that do not perform any remanufacturing operations which are to be reported separately in classification 1003; and sawmill operations which are to be reported separately in classification 1002.

2903-27 Ridge cap and/or shim: Manufacturing

[Title 296 WAC—p. 286]

Applies to establishments engaged in the production of shims and ridge caps. Shims are thin wedges of wood used for filling spaces or leveling. Ridge caps are shingles which are used as a covering for roof peaks. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; veneer manufacturing which is to be reported separately in classification 2904; and sawmill operations which are to be reported separately in classification 1002.

Special note: This classification must be assigned only by Classification Services after a field inspection of the business has been performed. If a classification must be assigned prior to the field inspection, assign classification 1005-02.

2903-28 Wood boat: Manufacturing, repair, or refinish

Applies to establishments engaged in manufacturing, repairing, or refinishing wooden boats. Raw materials include, but are not limited to, dimensional lumber, plywood, glue, staples, screws, nails, stains, paints, oils, and lacquers. Machinery includes, but is not limited to, band saws, lathes, drill presses, jointers, planers and sanders. Other than pleasure craft, very few wooden boats have been manufactured over the last 50 years. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes the manufacture of fiberglass boats which is to be reported separately in classification 3511, and the manufacture of metal boats which is to be reported separately in the classification applicable to the materials used and work being performed.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-568, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-568, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-568, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035, 87-12-032 (Order 87-12), § 296-17-568, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-568, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-568, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-568, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-568, filed 11/29/82, effective 1/1/83; 81-24-042 (Order 81-30), § 296-17-568, filed 11/30/81, effective 1/1/82; Order 76-36, § 296-17-568, filed 11/30/76; Order 75-28, § 296-17-568, filed 11/24/75, effective 1/1/76; Order 75-28, § 296-17-568, filed 8/29/75, effective 10/1/75; Order 73-22, § 296-17-568, filed 11/9/73, effective 1/1/74.]

WAC 296-17-569 Classification 2904.

2904-00 Veneer: Commercial production

Applies to establishments engaged in all types of commercial production of rough veneer. Veneer is a thin layer of material, usually made of wood or plastic, which is used to cover the surface of another material. In most instances, finished veneer will have a superior appearance or quality than the surface it covers. Rough veneer made of wood generally involves sawing logs, bolts (lengthwise strips), or blocks, softening them in vats of hot water or steam rooms to remove the bark and make the fiber pliable for cutting or turning. The

pieces are further shaped by turning, slicing or sawing, cutting the single-ply veneer sheets to various sizes of length and thickness, then drying them in kilns. Rough veneer manufactured in this classification is generally sold to manufacturers of veneer products made by laminating rough veneer to plywood or particleboard. Machinery includes, but is not limited to, band saws, table saws, stationary knife machines, rotary lathes, conveyor systems, kilns, forklifts.

This classification excludes sawmill operations which are to be reported separately in classification 1002; the manufacture of plywood which is to be reported separately in classification 2904-01; the manufacture of veneer products which is to be reported separately in classification 2903; and the manufacture of other products made from wood or plastic which are to be reported separately in the classification applicable to the work being performed. The production of veneer by employees of employers engaged in the manufacture of other products is to be included in the classification covering the manufacture of those products.

2904-01 Plywood: Manufacturing

Applies to establishments engaged in the manufacture of plywood. Plywood is a structural material made of layers of wood (veneer) glued tightly together, usually with the grains of adjoining layers at right angles to each other. (In this application the word "ply" means one of the sheets of veneer.) The production of veneer is included in the scope of this classification when done by employees of employers engaged in the manufacture of plywood. To form plywood, it may be necessary to join less-than-full-size sheets of veneer into full-size sheets. In the joining process, veneer jointers, taping machines, tapeless splicers, or other methods of joining veneer, such as stringing and stitching are used. Next, a glue spreader coats the cross banding and core veneers (front and back) with liquid glue. Once glued, the veneer is conveyed to a hot press that bonds the veneers into plywood. The panels are removed from the presses, placed in a storage pile (referred to as a "hot stack") to cool and cure, then trimmed, sanded, and stacked for conditioning. Plywood may be impregnated with chemicals to develop wood-plastic combinations that are harder and denser than ordinary plywood. After they are inspected and graded according to thickness and quality, plywood panels are moved by forklift to the warehouse portion of the plant where they are stacked in tiers which are separated by a piece of lumber to prevent sagging or distortion. Pieces are bundled with metal straps, either manually or with automatic strapping equipment.

This classification excludes sawmill operations which are to be reported separately in classification 1002; establishments that manufacture rough veneer as a product which are to be reported separately in classification 2904-00; and the manufacture of other products made from wood or plastic which are to be reported separately in the classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-569, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-569, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-569, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-569, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-569, filed 11/9/73, effective 1/1/74.]

(2001 Ed.)

WAC 296-17-56901 Classification 2905.

2905-00 Wood furniture and casket: Manufacturing, assembling, or repairing;

Furniture refinishing

Applies to establishments primarily engaged in manufacturing, assembling or repairing furniture or caskets made of wood. Products may be custom-made or stock, for residential or commercial use. This classification includes establishments that repair and refinish wood furniture that is new, used, antique, or furniture with factory defects or damages from shipping. Furniture includes, but is not limited to, sofas, love seats, chairs, tables, beds, dressers, chests, stools, hutches, pool tables, credenzas, desks, bookcases, pews, altars, pulpits, baptisteries, and benches. Materials include, but are not limited to, dimensional lumber, furniture stock, plywood, veneer, particleboard, plastic laminates, polyfoam, upholstery materials (fabric, stuffing, cardboard, metal springs), hardware, glue, paint, stain, oils or lacquer. Machinery includes, but is not limited to, various types of saws (table, panel, rip, cut-off, radial arm, trim, circular, band, jig and miter), molders, shapers, routers, jointers, mortises, tenons, lathes, planers, various types of sanders, drill presses, hand drills, boring machines, pneumatic nail, screw and staple guns, spray guns, air compressors, glue spreaders, dust collectors, drying ovens, sewing machines, steam irons, fork lifts, and pallet jacks. Operations range from processing rough or surfaced lumber, plywood or fiberboard, to the assembly of frame parts into finished products. For classification purposes, repair includes fabricating replacement parts, reinforcing structural weak points, disassembling, regluing and reassembling, recaning chairs, and similar activities, and refinishing includes stripping, sanding, filling, priming, and finishing with stain, oil, paint, or lacquer. Manufacturers in this classification may upholster their furniture, sell it unfinished, or finish it with various lacquers by spraying, dipping, or applying by hand. To make caskets, wood is cut to size, planed, and sanded. Sections are joined to form the shell, finished with lacquer, oil, or stain, and hardware added. Interior upholstery is usually stapled in place; exterior upholstery is usually glued on. This classification also contemplates the assembly of caskets from purchased components. Manufacturers of wood caskets often purchase ready-made fiberglass or metal casket shells, refinish them if necessary, mount the hardware, and upholster them. This is considered incidental to the main operation and is included in this classification. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. Physically separated upholstery departments of establishments engaged in furniture or casket manufacturing, assembly, or finishing may be reported separately in classification 3808 provided that the conditions of the general reporting rules covering the division of employee hours have been met.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; establishments engaged in stripping and refinishing furniture, but do not otherwise repair it, which are to be reported separately in

[Title 296 WAC—p. 287]

classification 3603; establishments engaged in the manufacture of wood cabinets, countertops or fixtures which are to be reported separately in classification 2907; and establishments engaged in the manufacture of furniture or caskets from metal or plastic which are to be reported separately in the classification applicable to the work being performed.

Special note: Establishments primarily engaged in the manufacture of furniture or caskets may make other wood products such as cabinets, countertops and fixtures as an incidental activity. The incidental manufacture of these products can be included within the scope of this classification. Furniture is generally moveable and unsecured. Fixtures are usually secured, stationary, or permanently built-in objects. Even though some fixtures may not be secured to a wall or floor, they are not intended to be relocated, unlike furniture which is frequently and more easily arranged.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-56901, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-56901, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-56901, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 87-12-032 (Order 87-12), § 296-17-56901, filed 5/29/87, effective 7/1/87.]

WAC 296-17-570 Classification 2906.

2906-01 Pattern or model - metal, plastic or wood: Manufacturing

Applies to establishments engaged in making metal, plastic, or wood patterns or models. Patterns or models produced may include industrial, aircraft, foundry, architectural scale and mechanical models. Use of this classification is limited to the fabrication of individual or prototype pieces. Work contemplated is limited to fabricating the pattern or model using woodworking and metal cutting tools, sanding and filling voids with fillers (wood or plastic); and extensive hand finishing of all these mediums when performed by employees of an employer subject to this classification.

This classification excludes pattern or model making by other manufacturers unless specifically allowed for in the manufacturing classification, and establishments engaged in the manufacture of plastic or wood model kits (assembly of a scale model of a car, boat, or plane) which is to be reported separately in the applicable classification.

2906-14 Wood piano or musical instrument: Manufacturing

Applies to establishments engaged in the manufacture of wood musical instruments including, but not limited to, pianos, organs, violins, harps, and guitars. Work contemplated by this classification includes various phases of woodworking techniques required to manufacture cases, sounding boards, pedals and action boards, metal working techniques required to produce components such as pipes, frames, switches, magnets, wind reservoirs and blower systems, and incidental tanning of skins for drums and banjos when done by employees of an employer having operations subject to this classification. This classification applies whether the company is producing all component parts or assembling a wooden musical instrument from purchased parts. This classification includes the reconditioning and subsequent sale of

reconditioned pianos, organs, and wooden musical instruments.

This classification excludes the manufacture of metal musical instruments which is to be reported separately in classification 3404; tuning or repair of pianos which is to be reported separately in classification 4107; and the sale of new piano and organs or wooden musical instruments which is to be reported separately in classification 6306 or 6406 as applicable.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-570, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-570, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-570, filed 11/9/73, effective 1/1/74.]

WAC 296-17-57001 Classification 2907.

2907-00 Wood cabinet, countertop, and fixture: Manufacturing, modifying or assembly

Applies to establishments engaged in the manufacture, modification, or assembly of wood cabinets, countertops, and fixtures. Cabinetry work contemplated by this classification includes, but is not limited to, manufacturing custom or modular cabinets, assembling prefabricated modular cabinet components, refacing existing cabinets and replacing hardware, and modifying the dimension or design of modular cabinets. Manufacturing countertops includes fabricating the core or sub top in addition to laying the plastic laminate, polyester overlay or tile when performed in the shop by employees of employers subject to this classification. Finishing that is subcontracted out to a prefinishing contractor or performed by the general or specialty construction contractor at the job site is to be reported in the classification applicable to the work being performed. Finish work, including staining, lamination, and the attachment of hardware, is included in classification 2907-00 when performed by employees of an employer subject to this classification. Fixture manufacturing includes built-in store, office, restaurant, bank and residential fixtures such as, but not limited to, showcases, display cases, end aisles, display pedestals, shelving, partitions, racks, closet organizers, bookshelves, work stations, credenzas, podiums, wall units, china hutches, entertainment centers, cashier cubicles, check-out counters, and curio cabinets. The wiring of fixtures for electrical fittings, and the cutting and fitting of plastic laminates, glass, mirrors, or metal trim, when performed in the shop, is included as an integral function of the manufacturing process encompassed within this classification. Raw materials include, but are not limited to, dimensional lumber, plywood, veneer, particleboard, plastic laminates, polyester overlays, sheet rock, slot wall dowels, hardware, mirrors, metal trim, electrical hardware, carpet, upholstery fabric, stain, paint, lacquer or glue. Machinery includes, but is not limited to, table, panel, radial arm, cut-off, chop, rip, band, and miter saws, wide belt sanders, edge sanders, hand finish jointers, mortises, tenoners, drill presses, hand drills, boring machines, edge banders, dowel machines, glue spreaders, face framing machines, pneumatic nail, screw and staple guns, air compressors, spray guns, forklifts, pallet jackets, and dust collectors. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. Lumber yards, building material

dealers, or general construction contractors that maintain a separate woodworking shop for manufacturing, assembling cabinets, and fixtures are subject to this classification for the woodworking operations, in addition to any other basic classification applicable to their business.

This classification excludes the installation of cabinets, countertops, and fixtures which is to be reported separately in classification 0513; the manufacture of wood furniture and caskets which is to be reported separately in classification 2905; the manufacture of metal cabinets which is to be reported separately in classification 3404; lumber remanufacturing which is to be reported separately in classification 2903; veneer manufacturing which is to be reported separately in classification 2904; and sawmill operations which are to be reported separately in classification 1002.

Special note: Establishments primarily engaged in the manufacture of cabinets, countertops and fixtures, may make other wood products such as doors, windows, moldings, and/or furniture as an incidental activity to the main business. The manufacture of these incidental products is included within the scope of classification 2907-00. Furniture is generally moveable and unsecured. Fixtures are usually secured, stationary, permanently built-in objects. Even though some fixtures may be secured to a wall or floor, they are not intended to be relocated, unlike furniture which is frequently and more easily arranged.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-57001, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-57001, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-57001, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-57001, filed 5/31/93, effective 7/1/93; 91-12-014, § 296-17-57001, filed 5/31/91, effective 7/1/91. Statutory Authority: RCW 51.16.035, 87-12-032 (Order 87-12), § 296-17-57001, filed 5/29/87, effective 7/1/87.]

WAC 296-17-57002 Classification 2908.

2908-00 Factory built housing: Manufacturing or assembly

Applies to establishments engaged in the assembly line production of factory built (manufactured) housing such as wood prefab and modular homes, log home kits, mobile homes and prefab cedar homes when manufactured at a shop or adjacent yard. Sections vary in size up to 80 feet long and 28 or more feet wide. Manufactured homes are built on an assembly line with materials such as plywood, rolls of aluminum, steel I beams, insulation, electric wire, particleboard, lumber, pipes, plumbing fixtures, electrical fixtures, appliances, carpeting, paint and hardware. Assembly may be single line or on a side by side line. After the chassis is built, it is placed on a conveyor where workers lay joists and heating and plumbing lines. Floors are then installed, interior walls are raised and cabinets are installed. Preassembled exterior walls are fastened, the roof is placed, covered, and tie down straps are attached. These homes may be sided with aluminum, vinyl, hardwood fiberboard or natural wood. While the chassis and some other steel parts are welded, the majority of the work is performed with stamping and forming equipment, hand and air tools, joiners, jig clamps, planers, hoists, forklifts and rail conveyors. Other parts may be nailed, riveted, stapled or glued. Furniture and blinds or curtains may then be

(2001 Ed.)

installed and specialty items such as fireplaces may be added. Units are inspected, then moved to the yard until sold or delivered. Individual work stations may include a mill room, cabinet mill room, sheet metal department or paint and finish departments. Some plants may also have sewing departments where they make curtains, blinds and drapes. This classification includes transporting of the factory built home to the customer's site or a dealer's sales lot when performed by employees of an employer subject to this classification, but excludes set up which is to be reported separately in classification 0517.

This classification excludes establishments engaged in the manufacture of campers and travel trailers which are to be reported separately in classification 2908-02; establishments engaged exclusively in the manufacture of truck canopies which are to be reported separately in classification 2908-03; establishments engaged in the manufacture of fiberglass canopies which are to be reported separately in classification 3511; and delivery and set up performed by an independent contractor which is to be reported separately in classification 0517.

2908-02 Campers and travel trailers: Manufacturing

Applies to establishments engaged in the manufacture of factory built campers or travel trailers which are generally not more than 35 feet long and 8 feet wide. This process includes cutting steel I-beams, placing them on a jig and welding the pieces together. Hitches, running gear, and side frames are installed. Subflooring is assembled on a jig and fastened with lag bolts to the frame. Shears, stamping equipment, drill presses and jig clamps are used to perform the work as the pieces are moved by conveyor. Interior and exterior metal panels and trim are spray painted in spray booths or dipped in tanks, using enamel and then hardened by using drying ovens or heat lamps. All electrical wiring, flooring, carpets, heating units, and plumbing fixtures are installed with the use of electrical hand tools, pneumatic wrenches, staplers, and air compressors. Partition walls are then nailed in place with nail guns. Side walls are framed up on a jig and placed on the trailer. Afterwards, the ceiling is nailed in place and the insulation and cabinets are put in place. Sheet metal sides are stapled on and the top is installed. All systems are checked and the trailer or camper is delivered to the distributor's lot. The process of manufacturing a camper is similar except there are no frame rails, axles or hitch involved as a camper has no chassis. Campers are mounted on pickup trucks; travel trailers are fitted with a hitch for towing behind a motor vehicle.

This classification excludes establishments engaged in the manufacture of factory built housing which are to be reported separately in classification 2908-00; establishments engaged in the manufacture of truck canopies which are to be reported separately in classification 2908-03; establishments engaged in fiberglass canopy manufacturing which are to be reported separately in classification 3511; and camper and travel trailer rental/sales agencies which are to be reported separately in classification 3411.

2908-03 Wood or metal truck canopy: Manufacturing

Applies to establishments engaged in the manufacture of wood or metal truck canopies. After the framework is assembled, insulation is cut to size and inserted, electrical wiring is

strung, exterior aluminum sheeting or "skin" is cut to size and attached, interior paneling and decorative trim is fitted, doors and windows are installed and electrical clearance lights are attached. Machinery includes, but is not limited to, saws, electrical hand tools, metal cutting and welding equipment, shears, stamping equipment, drill presses, jig clamps, spray booths, pneumatic wrenches, staple and nail guns, air compressors and miscellaneous hand tools. Direct sales to retail consumers or to wholesale dealers by a canopy manufacturer are included in this classification.

This classification excludes dealers who sell and/or install canopies who are reported separately in classification 1106; establishments engaged in the manufacture of campers and travel trailers which are to be reported separately in classification 2908-02; establishments engaged in the manufacture of factory built housing which are to be reported in classification 2908-00; and establishments engaged in the manufacture of fiberglass canopies which are to be reported separately in classification 3511.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-57002, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-57002, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-57002, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-57002, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-57002, filed 11/29/82, effective 1/1/83.]

WAC 296-17-57003 Classification 2909.

2909-00 Woodenware - household and sporting goods N.O.C.: Manufacturing or assembly

Applies to establishments engaged in light woodworking, not covered by another classification (N.O.C.), for the manufacture of woodenware household goods, sporting goods and a wide range of decorative woodenware items that require a minimal amount of cutting, shaping, drilling, sanding, assembling and finishing. Items produced in this classification include, but are not limited to, towel bars, tissue holders, magazine racks, spice racks, knife holders, recipe boxes, cutting boards, rolling pins, salad forks, bowls, picture and mirror frames, candle holders, speaker shells, bases for turntables, trophy and plaque bases, house numbers, window blinds and shades, drapery woodenware (rods, brackets, supports, rings), broom and brush handles, bobbins and spools, crutches, hat blocks, pegs, coat hangers, toothpicks, gift boxes, tobacco pipes, toys, games, basketball backboards, baseball bats, boomerangs, pool or shuffleboard cues, hockey sticks, oars, paddles, archery bows and arrow shafts. Establishments in this classification generally purchase ready-made components which they assemble with pneumatic or hand tools such as, but not limited to, nail or glue guns, spray or paint guns, staple guns, screw guns, drills, shaping tools, and brushes. Products may be left natural, or finished by applying paint, stain, lacquer or varnish, or hand dipping or rubbing. A limited assortment of basic wood shop machinery such as, but not limited to, table saws, circular saws, band saws, miter saws, jig saws, routers, shapers, belt sanders, edge sanders, drill presses, boring machines, and finger jointer may be used for the occasionally cutting of a piece of wood. Other materials include, but are not limited to, molding stock, dowels, plywood, glue, staples, screws, and small

nails. In most cases, products are small and the manufacturers do not provide installation. This is a shop or plant only classification. It does, however, include work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; and the manufacture or assembly of wood products such as, but not limited to, molding stock, outdoor playground equipment, marine floats and docks, gazebos, solariums, saunas, ladders, or cable spools from dimension lumber which is to be reported separately in the applicable classifications.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-57003, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-57003, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-57003, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 87-12-032 (Order 87-12), § 296-17-57003, filed 5/29/87, effective 7/1/87.]

WAC 296-17-571 Classification 3101.

3101-05 Ready mix concrete dealers

Applies to establishments engaged in the mixing and delivery of ready mix concrete for all types of residential and commercial projects such as, but not limited to, foundations, walls, slabs, roadways, driveways, walkways, dams, bridges and swimming pools. Usually, these establishments operate a plant location with a supply of sand, gravel, pebbles, broken stones or slag, and various ingredients to produce bonding adhesives such as cement. The concrete is premixed at the plant location and loaded into a delivery truck, or the raw unmixed ingredients such as cement, sand, gravel, pebbles, broken stones and water are loaded into a concrete truck and mixed in a revolving or rotating drum in transit to the project site. The concrete is discharged from the drum with use of a metal shoot or is transferred into the bed of a concrete pump truck for pumping. This classification includes ready mix dealers who operate concrete ready mix trucks and/or concrete pump trucks as part of the delivery service. This classification also includes the related sale of tools, equipment, and building materials such as bricks or concrete blocks, and pit and crusher operations provided all sand and gravel produced is used by the dealer to manufacture concrete mix.

This classification excludes establishments engaged in the commercial production and/or digging of sand, gravel or stone not in connection with a ready mix dealer which is to be reported separately in classification 0112, and concrete pump truck services not in connection with a ready mix dealer which is to be reported separately in classification 3506.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-571, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-571, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-571, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-571, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-571, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-571, filed 11/29/82, effective 1/1/83; Order 75-38, § 296-17-571, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-571, filed 11/9/73, effective 1/1/74.]

WAC 296-17-572 Classification 3102.**3102-04 Rock wool insulation: Manufacturing**

Applies to establishments engaged in the manufacture of mineral wool insulation from siliceous materials such as, but not limited to, rock, slag, and glass, or combinations thereof. In a special furnace, hot air or steam is blown through molten rock or slag, shredding the material into a mass of fine inter-twined fibers to form the wool. To produce fiberglass insulation material, molten glass is drawn at high speeds through orifices, then subjected to jets of high pressure steam which break the glass filaments into fine fibers. The final product, regardless of raw material, may be shipped in granules which are bagged, or formed into flat sheets, cut to size, enclosed in paper or foil, and packaged. Incidental rock, slag, and glass crushing operations are contemplated by this classification.

This classification excludes the digging or quarrying of raw materials which is to be reported separately in the classification appropriate to the work being performed, and the manufacture of asbestos products which is to be reported separately in classification 3104.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-572, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-572, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-572, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-572, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-572, filed 11/9/73, effective 1/1/74.]

WAC 296-17-573 Classification 3103.**3103-01 Cement or lime: Manufacturing**

Applies to establishments engaged in the manufacture of cement or lime. Cement is a mixture of various granulated raw materials which may include limestone, shale, clay, slate, alumina, silica sand, iron ore and gypsum. The manufacturing process involves crushing and grinding the raw materials into a powder state. Materials are then blended with water to create a slurry, then kiln burned at high temperatures which chemically changes the mixture. This mixture is then combined with gypsum and ground into the final product. Cement may be sold as is or mixed with water and coarse aggregate to make concrete. Lime production involves a similar process using crushing and blending machinery and large kilns. Cement and lime manufacturers may own a limestone quarry as it is the major component of both products.

This classification excludes the quarrying of raw material which is to be reported separately in classification 1704; ready mix concrete dealers who are to be reported separately in classification 3101; and the manufacturing of concrete products which is to be reported separately in classification 3105.

3103-02 Lightweight aggregate building or insulation material: Manufacturing

Applies to establishments engaged in the manufacture of lightweight aggregate building material or insulation material. Types of products covered by this classification include, but are not limited to, vermiculite, perlite, pozzolan, magnesite, expanded shale aggregate and fiberglass. The manufacturing process contemplates crushing of raw materials and blending and heating of materials in large furnaces.

(2001 Ed.)

This classification excludes the quarrying of raw material which is to be reported separately in classification 1704, and the manufacture of fiberglass products which is to be reported separately in the appropriate manufacturing classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-573, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-573, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-573, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-573, filed 11/9/73, effective 1/1/74.]

WAC 296-17-574 Classification 3104.**3104-08 Plaster, whiting, talc, emery powder: Manufacturing**

Applies to establishments engaged in the manufacture of plaster, whiting, talc or emery powder. Plaster is a mixture of lime, sand, water, and may include hair or other fibers, that hardens to a smooth solid and is used for coating walls and ceilings. Plaster can also be manufactured in dry form and sold in bags. Whiting is a pure white grade of chalk that has been ground and washed for use in paints, ink, and as an extender in pigments, putty or whitewash. Talc is a fine-grained white, greenish, or gray mineral with a soft soapy texture, which is used in the manufacture of talcum and face powder, as a paper coating, and as a filler for paint and plastics. Emery is a fine-grained mineral used for grinding and polishing. This classification is for the production of the powders only. Machinery includes, but is not limited to, crushing, mixing, grinding, milling and washing and cooking machinery, conveyors and forklifts.

This classification excludes establishments engaged in the manufacture of plaster statuary or ornaments which are to be reported separately in classification 3509; establishments engaged in the manufacture of plasterboard or plaster block which are to be reported separately in classification 3104-55; interior and exterior plastering and stucco work which is to be reported separately in classification 0303; and quarrying operations which are to be reported separately in classification 1704.

3104-52 Asbestos products or mica goods: Manufacturing

Applies to establishments engaged in the manufacture of asbestos products and mica goods. Asbestos products include, but are not limited to, fireproofing, electrical insulation, building materials, brake linings, clutch facings, valve packings, dryer felt, and chemical filters. Asbestos is a fibrous mineral form combined with impure magnesium silicate. Flake asbestos can be mixed, spun and woven into cloth; or the flakes can be used as an ingredient in the processing or treatment of paper. To make molded asbestos products, asbestos is mixed with other ingredients, molded, baked, cut to size, and ground. Mica is also a mineral form; it is split to desired thickness using hand knives or knives mounted on tables. The split mica is sent to punch presses which stamp out the various products usually used by the electrical trades. Mica that is too small to be processed on punch presses may be placed in burling machines, mixed with liquids, then pressed into sheets. Removal of imperfections is usually done by hand; the sheets are dried, baked in ovens and run through sanders prior to crating and shipping.

[Title 296 WAC—p. 291]

This classification excludes establishments engaged in the manufacture of plasterboard or plaster block which are to be reported separately in classification 3104-55; contractors engaged in the installation or removal of asbestos or mica products at the customer's site which are to be reported separately in the classification applicable to the phase of construction being performed; and quarrying operations which are to be reported separately in classification 1704.

3104-53 Soapstone or soapstone products: Manufacturing; marble cutting and polishing; slate milling; stone cutting or polishing, N.O.C.

Applies to establishments engaged in the manufacture of soapstone products, and the cutting, milling, and polishing of marble, slate, or stone such as grindstone, limestone, millstone and lithographic stone (usually sheet zinc), not covered by another classification (N.O.C.). Soapstone (also called steatite) is a massive white-to-green talc found in extensive mine beds and is used in products such as, but not limited to, insulation, paints, ceramics, decorative accessories, and ornamental objects. The manufacturing process requires turning, shaping, carving and polishing of the soapstone with a variety of milling equipment. Finished products of marble, slate or stone include, but are not limited to, decorative accessories, tops for furniture, countertops, floor tiles and other building materials. Machinery and materials include, but are not limited to, saws, milling machines, grinders and abrasives.

This classification excludes installation of tile, marble or slate building materials which is to be reported separately in the classification applicable to the phase of construction being performed and quarry operations which are to be reported separately in classification 1704.

3104-55 Plasterboard or plaster block: Manufacturing

Applies to establishments engaged in the manufacture of plasterboard (wallboard) or plaster block which are used as building materials. Raw materials include, but are not limited to, plaster, fiberboard, and rolls of paper. Plasterboard is made by bonding plaster to a thin rigid board or to layers of fiberboard or paper to form a flat board or a block. Product is dried in ovens, cut to size with slitters or other cutting machinery, and packed for shipment. This classification includes the mixing of the plaster when done by employees of employers subject to this classification.

This classification excludes establishments operating as plaster mills which are to be reported separately in classification 3104-08; interior and exterior plastering and stucco work which is to be reported separately in classification 0303; and quarrying operations which are to be reported separately in classification 1704.

3104-57 Coating of building materials, N.O.C.

Applies to establishments engaged in the coating of building materials, not covered by another classification (N.O.C.), with preservatives to keep them from decaying when placed into the ground. These materials include, but are not limited to, dimensional lumber, deck materials, fence posts, landscaping beams, and lattice work. The coating process may include immersing the lumber in vats of preservative, or cutting or drilling small holes into the lumber and applying preservatives that soak in. Machinery and materials

include, but are not limited to, immersion vats, drills, brushes, or machines to drill holes and apply preservatives.

This classification excludes installation of these products which is to be reported separately in the classification applicable to the work being performed.

3104-58 Monument dealers

Applies to establishments engaged in selling monuments, statues, cornerstones, and grave markers to others. This classification includes the finish cutting, grinding, polishing, engraving, and sandblasting of the stone when done by employees of employers subject to this classification. Wholesale monument dealers generally receive split, rough cut stone from the mine or quarry. Materials such as granite and marble are cut to block size, and precast bronze markers may be attached to the stone. Some blocks are sold without further processing while others are finished with stone polishers and abrasives, then cut into monuments prior to shipment to retail monument dealers. Retail monument dealers may provide engraving, artwork, lettering, and dates, according to customer specifications, that is usually done with a sandblasting technique. This classification includes installation of monuments when performed by employees of the monument dealer.

This classification excludes installation of monuments by employees of cemeteries which is to be reported separately in classification 6202; contractors engaged in the installation of monuments which are to be reported separately in the classification applicable to the work being performed; and establishments engaged in providing specialized services, such as, but not limited to, sandblasting which are to be reported separately in the classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-574, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-574, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-574, filed 11/27/85, effective 1/1/86; 82-24-047 (Order 82-38), § 296-17-574, filed 11/29/82, effective 1/1/83; Order 76-36, § 296-17-574, filed 11/30/76; Order 73-22, § 296-17-574, filed 11/9/73, effective 1/1/74.]

WAC 296-17-575 Classification 3105.

3105-06 Concrete blocks, bricks, poles, piles, tiles and beams manufacturing

Applies to establishments engaged in the manufacture of concrete blocks, bricks, poles, tiles, and beams. Sand, gravel, cement, cinders, aggregates, mesh wire, rods, and, in some cases, plastics are received from others. Raw materials are mixed with water and fed into molds or forming machines. Heavy mesh wire or rods may be inserted into the molds for strength. The formed products are usually steam dried and placed in the yard for curing prior to shipping. This classification does not apply to the manufacture of these products when done by construction contractors at a construction site for use in the construction project.

This classification excludes the production of raw materials which is to be reported separately in the applicable mining, quarrying, or excavation classification; the installation or erection of products manufactured under this classification which is to be reported separately in the classification applicable to the work being performed; the manufacture of con-

crete sewer and irrigation pipes, septic tanks and concrete products not classified elsewhere which is to be reported separately in classification 3105-07; the manufacture of statuary and ornamental items from plaster or concrete which is to be reported separately in classification 3509; and the manufacture of brick or clay products which is to be reported separately in classification 3501.

Special note: This classification differs from classification 3509 "statuary or ornament manufacturing" in that products manufactured in classification 3105 are rough, do not require perfect finishes, and are generally for construction use; products manufactured in classification 3509 are for decorative purposes, are usually lighter weight, and have smoother or more perfect finishes than the concrete products manufactured in classification 3105.

3105-07 Concrete sewer and irrigation pipes, concrete septic tanks and concrete products, N.O.C. manufacturing

Applies to establishments engaged in the manufacture of concrete sewer and irrigation pipes, septic tanks and other concrete products not covered by another classification (N.O.C.), such as, but not limited to, panels, tubs, catch basin covers, chimney caps, columns, incinerators, manhole covers, pier footings, monuments, coffins, caskets, and burial vaults. Sand, gravel, cement, cinders, aggregates, mesh wire, rods, and, in some cases, plastics are received from others. Raw materials are mixed with water and fed into molds or forming machines. Heavy mesh wire or rods may be inserted into the molds for strength. The formed products are usually steam dried and placed in the yard for curing prior to shipping. The manufacture of concrete panels generally involves the cutting and welding of metal to form a frame to which concrete fiberboard is attached. Additional steps may involve the application of an adhesive to the frame and the attachment of decorative material such as crushed rock, gravel, ceramic tile or brick. The fabrication of the metal framing is included within the scope of this classification when performed by employees of an employer engaged in manufacturing concrete panels. This classification does not apply to the manufacture of these products when done by construction contractors at a construction site for use in the construction project.

This classification excludes the production of raw materials which is to be reported separately in the applicable mining, quarrying, or excavation classification; the installation or erection of products manufactured under this classification which is to be reported separately in the applicable classification; the manufacture of concrete blocks, bricks, poles, piles, tiles and beams which is to be reported separately in classification 3105-06; the manufacture of statuary and ornamental items from plaster or concrete which is to be reported separately in classification 3509; and the manufacture of brick or clay products which is to be reported separately in classification 3501.

Special note: This classification differs from classification 3509 "statuary and ornament manufacturing" in that products manufactured in classification 3105 are rough, do not require perfect finishes, and are generally for construction use; products manufactured in classification 3509 are for dec-

orative purposes, are usually lighter weight, and have smoother or more perfect finishes than the concrete products manufactured in classification 3105.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-575, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-575, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-575, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-575, filed 11/9/73, effective 1/1/74.]

WAC 296-17-57602 Classification 3303.

3303-07 Fish dealers - retail

Applies to establishments engaged in the retail sale of fresh fish and shellfish over the counter. Refrigerated show cases display the fresh fish available for sale by the pound. Retail fish dealers typically purchase a supply of fish and shellfish, such as finfish, bottomfish, shrimp, crabs, oysters and clams, from wholesale seafood processing, packing or repackaging dealers, and clean, cut, trim, portion, shuck, package, and weigh the products for consumer use. This classification includes the packaging of whole herring, minnow and anchovy which are used primarily as bait fish. The packaging operation involves placing whole fresh fish side by side on a tray which is then sealed in clear plastic, weighed and placed in cold storage until delivery. Bait may be sold retail or wholesale. The incidental sale of items such as seasonings, spices, snack foods, and condiments is also included in this classification.

This classification excludes establishments engaged in fish processing, packing and repackaging operations on a wholesale or combined wholesale/retail basis which are to be reported separately in classification 3304; establishments engaged in the raising, harvesting and subsequent processing and packing of shellfish which are to be reported separately in the appropriate classifications; and establishments engaged in the cold storage or locker operations of products owned by others which are to be reported separately in classifications 4401 or 4404 as applicable.

3303-08 Meat and poultry dealers - retail

Applies to establishments engaged in the retail sale of fresh, frozen or cured meat and poultry over the counter. Refrigerated show cases display fresh meat and poultry for sale by the pound. Retail meat and poultry dealers typically purchase their supply of meat or poultry from wholesale dealers, and cut, trim, portion, package, weigh and label the products for consumer use. The incidental sale of items such as seasonings, spices, condiments, milk, and bread is also included in this classification. The retail meat and poultry market may be located in a single building, a grocery store, or other multipurpose building, but independently owned and operated by the meat and poultry dealer.

This classification excludes custom meat cutting operations, including farm kill, which are to be reported separately in classification 4302; cold storage or locker operations which are to be reported separately in classifications 4401 or 4404 as applicable when conducted as a separate and distinct business; and wholesale or combined wholesale/retail meat, fish and poultry dealers who are to be reported separately in classification 3304.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-57602, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-57602, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 90-13-018, § 296-17-57602, filed 6/8/90, effective 7/9/90. Statutory Authority: RCW 51.16.035. 87-12-032 (Order 87-12), § 296-17-57602, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-57602, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-57602, filed 2/28/85, effective 4/1/85. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 78-12-043 (Order 78-23), § 296-17-57602, filed 11/27/78, effective 1/1/79.]

WAC 296-17-57603 Classification 3304.

3304-00 Fish processors, packers and repackagers - wholesale or combined wholesale/retail

Applies to establishments engaged in processing, packaging, and repackaging fish such as salmon, cod, whitefish, halibut, tuna, and/or shellfish when conducted by a wholesale or combined wholesale/retail operation. Typically, fish will arrive at a port via a commercial fishing vessel. Before the load of fish is accepted the wholesaler will inspect the commercial fishing vessel's records to ensure that the fish were caught, handled and stored in accordance with all applicable laws. The fish is then unloaded, identified, inspected for quality, weighed and stored in a refrigerated area or a freezer to await further disposition. Fish are processed, packed and repackaged as requested by the customers. Processing may include, but is not limited to, cutting, filleting, cooking, and/or canning. The fish may be sold to fish and meat markets, supermarkets, grocery stores, restaurants, or other wholesale dealers. This classification includes fishing activities that are not covered by another classification (N.O.C.) and the harvesting, planting or packaging of aquatic plants or shellfish obtained from natural areas where the husbandry of the resource is not an integral part of the operation.

This classification excludes establishments engaged in the cold storage or locker operations of products owned by others which are to be reported separately in classifications 4401 or 4404 as applicable; establishments engaged in the raising, harvesting and subsequent processing and packing of shellfish which are to be reported separately in the appropriate classifications; and establishments engaged exclusively in retail fish activities, or the packaging of whole minnow, herring, or anchovy (not processed), which are to be reported separately in classification 3303.

3304-01 Meat and/or poultry dealers - wholesale or combined wholesale/retail

Applies to establishments engaged in the wholesale or combined wholesale/retail distribution of fresh, frozen, cured, or smoked meat or poultry. Wholesale dealers generally purchase meat (whole, half, or quarter carcasses) from slaughterhouses, and poultry from poultry processing plants. The meat or poultry is cut into steaks, chops, roasts, fillets or poultry parts, for sale to commercial or institutional customers such as restaurants, hotels, grocery stores, meat and poultry markets, hospitals, and prisons. Wholesale dealers typically do not have display cases for the meat or poultry and receive orders by telephone or by mail. This classification includes the processing and butchering of poultry.

This classification excludes meat products manufacturing, canning or dehydrating, and packing house or slaughterhouse operations, which are to be reported separately in clas-

sification 4301; custom meat cutting operations, including farm kill, which are to be reported separately in classification 4302; cold storage or locker operations which are to be reported separately in classifications 4401 or 4404 as applicable, when conducted as a separate and distinct business; establishments engaged in processing, packaging, and repackaging fish which are to be reported separately in classification 3304-00; and retail meat, fish and poultry dealers who are to be reported separately in classification 3303.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-57603, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-57603, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-57603, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-57603, filed 12/1/89, effective 1/1/90.]

WAC 296-17-578 Classification 3309.

3309-02 Golf cart sales/rental agencies

Applies to establishments engaged in the sale and/or rental of new, used golf carts and go carts, and related items such as, but not limited to, golf cart trailers, canopies, protective outerwear, helmets, and replacement parts for the above products. The sale of boats and canoes can be included in this classification if they are incidental to the sale of golf carts and go carts. This classification includes outside lots, and full product line parts and service departments. Regional service representatives who provide factory training to local dealer shop mechanics are included in this classification.

This classification excludes establishments primarily engaged in the sale of boats, boat trailers and motors, which are to be reported separately in classification 3414, and the repair of lawn and garden equipment and small engines which is to be reported separately in classification 3402.

3309-03 Motorcycle, moped, motor scooter, snowmobile, jet ski, all-terrain vehicles sales/rental agencies

Applies to establishments engaged in the sale of new and used motorcycles, mopeds, motor scooters, snowmobiles, jet skis, three wheel and four wheel all-terrain vehicles. These establishments may also sell related items such as, but not limited to, portable generators, lawn and garden equipment, chain saws, water pumps, snow blowers, small gasoline engines, boat motors, protective outerwear, helmets, and replacement parts for the above products. The sale of boats and canoes can be included in this classification if they are incidental to the sale of motorcycles, mopeds, or other primary merchandise. This classification includes outside lots, and full product line parts and service departments. Also included are motorcycle service and repair shops, motorcycle dismantlers (wrecking yards), regional service representatives who provide factory training to local dealer shop mechanics, and establishments engaged in the sale/rental *and service (repair)* of motorized mobility aids, such as motorized wheelchairs and 3-wheel scooters.

This classification excludes establishments primarily engaged in the sale of boats, boat trailers and motors, which are to be reported separately in classification 3414; establishments primarily engaged in the sale of lawn and garden equipment which is reported separately in classification 6309; and the repair of lawn and garden equipment and small

engines which is to be reported separately in classification 3402.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-578, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-578, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-578, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-578, filed 2/28/85, effective 4/1/85; Order 73-22, § 296-17-578, filed 11/9/73, effective 1/1/74.]

WAC 296-17-580 Classification 3402.

3402-00 Air compressor: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of air compressors. This includes air or gas compressors used for paint sprayers, air tools, tire inflation, and general industrial purposes. Operations contemplated include, but are not limited to, welding, machining, general mechanical and electrical work. Machinery and equipment includes, but is not limited to, hand and air tools, welders, punches, shears, and compression equipment. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-01 Printing or bookbinding machinery: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of printing or bookbinding machinery. The outside casings of the machines may be made of plate metal that varies between 1" to 2 1/2" in thickness. The machines used to make the presses and binding machinery may include both Computer Numeric Controlled (CNC) and manual mills and lathes. Other machinery used in the manufacturing process includes, but is not limited to, welders or cutters, grinders, and drill presses. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; and the set up, installation and repair of printing or bookbinding machinery which is to be reported separately in classification 0603.

3402-02 Pump, safe, scale, auto jack, and water meter: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of pumps, safes, scales, auto jacks, and water meters. Materials range from brass screws and rubber washers used to rebuild water meters to plate metal and steel castings used for safe and pump manufacturing. Machinery includes, but is not limited to, hand tools used for repairs,

(2001 Ed.)

lathes, welders, and pressure testers. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; the installation and repair of safes which is to be reported separately in classification 0607; and the installation of pumps which is to be reported separately in the applicable classification.

3402-03 Shoe or textile machinery: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of shoe machinery or textile machinery. Metal materials used vary in size, shape and dimension. Machinery includes, but is not limited to, drills, mills, lathes, saws, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the installation and repair of shoe or textile machinery which is to be reported separately in classification 0603.

3402-04 Confectioners or food processing machinery: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of food processing or confectioners machinery. Metal materials used vary in size, shape and weight. These establishments often have an assembly line operation and a separate electronic assembly area. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification, it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the installation and repair of confectioners and food processing machinery which is to be reported separately in classification 0603.

3402-05 Machine shops, N.O.C.

Applies to establishments engaged in general machine shop operations not covered by another classification (N.O.C.), tool sharpening, and mobile welding shops. Many of the establishments in this classification are "job shops." Size and shape of materials vary with steel and aluminum being the most common. Plastics, light weight aluminum,

and alloyed metals are becoming increasingly popular in the manufacture of equipment for some industries. These establishments often have welding shops along with machine shops. Machinery and equipment includes, but is not limited to, mills, lathes, grinders, saws, welding equipment, inspection equipment, and material handling equipment. Machinery is both manual and Computer Numeric Controlled (CNC). This classification also includes "mobile shops" which are used *exclusively* to repair machinery or equipment. A "mobile shop" in this classification usually means a van or pick up pulling a utility trailer equipped with hand tools, specialty tools, air tools, a compressor, and a portable welding unit. The machinery or equipment is usually repaired at the customer's location, however, sometimes the broken part is removed and taken back to the shop for repair.

This classification excludes repairs to buildings and structures which are to be reported separately in the appropriate construction classification, and mechanical repairs which are to be reported separately in the classification applicable to the work being performed.

Special note: The term "job shop" is an industry term that means the shop will produce products to customer specifications.

3402-06 Power saw, lawn and garden equipment, small motor, N.O.C.: Repair

Applies to establishments engaged in repairing small power tools, small motors powered by gas or diesel, outboard marine engines, and lawn and garden equipment not covered by another classification (N.O.C.). The largest piece of equipment repaired in this classification is generally a riding lawn mower. Classification 3402-06 is assigned in conjunction with a store classification for establishments that have a store operation and also repair the type of items they sell. Classification 3402-06 may also be assigned to a manufacturer representative who performs warranty repairs. Tools used in this type of repair are mainly hand and air tools. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the repair of electrical motors which is to be reported separately in classification 5201.

3402-07 Gear: Manufacturing or grinding

Applies to establishments engaged in the manufacture or grinding of gears. Establishments in this classification may also cut key slots and broaches. Establishments that cut stock to manufacture the gear are often not the same ones that perform the final grinding process. Gears may go through two, three, or four different grinding, slotting, and/or keying establishments and then go to another establishment for electroplating or galvanizing before they are ready for sale or use. Precision machine shops may grind gears to the ten thousandths of an inch. Materials used are usually stainless steel, aluminum, or plastic. Machinery includes, but is not limited to, gear shapers, drill presses, mill, hobbers, grinders, some of which might be Computer Numeric Controlled (CNC). This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification

when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-08 Elevator: Manufacturing

Applies to establishments engaged in the manufacture of elevators and associated electronic components. Machinery includes, but is not limited to, mills, drills, lathes, saws, and grinders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the installation, service, and repair of elevators which is to be reported separately in classification 0602.

3402-11 Metal goods: Manufacturing and shop services (temporary classification)

Applies temporarily to all establishments assigned any classification within WAC 296-17-580. When the metal goods study is complete, the establishments within this classification will be assigned to the appropriate classifications. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation.

This classification excludes all activities away from the shop or plant.

3402-12 Multimedia blasting

Applies to establishments engaged in multimedia (such as, but not limited to, glass, plastic and sand) blasting operations which strip paint or other coatings from metal or fiberglass. Most of the blasting operations in this classification are done on automobiles, but it also applies to establishments that perform blasting on items such as, but not limited to, barbecue grills, and cast iron pieces. Multimedia blasting processes in this classification are performed in a shop, use less air pressure and media with softer finishes than other blasting operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and sandblasting of buildings or structures which is to be reported separately in classification 0504.

3402-14 Furnace, heater or radiator: Manufacturing

Applies to establishments engaged in the manufacture of furnaces, radiators, or similar heating fixtures. Materials include, but are not limited to, metal cast parts, sheet metal, aluminum, or stainless steel. Machinery includes, but is not

limited to, hand tools, solder guns, punches, lathes, and saws. Establishments in this classification may have separate areas for electronic assembly and/or painting. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of radiators for automobiles or trucks which are to be reported separately in classification 3402-48; and establishments engaged in the manufacture of baseboard heaters which are to be reported separately in classification 3404.

3402-16 Die casting

Applies to establishments engaged in the manufacture of products by die casting. Die casting is a manufacturing process for producing accurately-dimensioned, sharply-defined metal products which are referred to as "die castings." "Dies" are the steel molds used to mass produce the product. The process begins when ingots of various metal alloys are melted in die casting machines. The machine forces the metal into the die under hydraulic or pneumatic pressure. The casting quickly solidifies in the die, and is automatically ejected by the machine, and the cycle starts again. The castings are cleaned by grinding or sanding, which also removes any excess metal "flash." Many die casting manufacturers maintain their own machine shop for making the dies. Die making, when done as a part of die casting operations, is included within the scope of this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; and establishments engaged in making dies for others which are to be reported separately in classification 3402-74.

3402-26 Saw blade: Manufacturing, assembly, or sharpening

Applies to establishments engaged in the manufacture, assembly, or sharpening of saw blades such as, but not limited to, those used in circular saws, band saws, rip saws, key-hole saws, and handsaws such as hacksaws or meat saws. This classification also includes sharpening services for items such as, but not limited to, tools, scissors, and knives. Materials include, but are not limited to, high tensile steel and carbide tipped blades. Machinery includes, but is not limited to, saws, mills, drills, and hand tools. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part

of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the repair or sharpening of chain saws which are to be reported separately in classification 3402-06; and establishments engaged in the manufacture or repair of electrical saws which are to be reported separately in classification 5201.

3402-28 Heat treating metal

Applies to establishments engaged in heat treating metal. The heat treating process may use computer numeric controlled ovens or furnaces. The oven may heat up to 1200 degrees Fahrenheit and a furnace may heat up to 2000 degrees Fahrenheit. The metal(s) is placed on a platform; the platform is hydraulically moved into the first chamber and the door is automatically closed. At this time, the oxygen is burned from the chamber. Then the second chamber door is opened and the metal enters the oven/furnace. Depending upon the specifications, the heat treating process usually takes six to sixteen hours. When the metal is finished in the heating chamber it returns automatically to the first chamber. Then the platform lowers and the metals are dipped into a cooling agent. Once the metals are cooled to room temperature the platform rises, the door opens, and the materials are removed. The process is essentially the same using noncomputer numeric controlled heat treating equipment except that, rather than being hydraulically operated, the machine operators move the metals through the system. Many establishments do not produce a product, but heat treat a variety of products to customer specifications. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-29 Nut, bolt, screw, nail, tack, rivet, eyelet spike, needle, N.O.C.: Manufacturing

Sprinkler head, speedometer, carburetor: Manufacturing or assembly

Applies to establishments engaged in the manufacture of nuts, bolts, screws, nails, tacks, rivets, eyelets, spikes, and needles not covered by another classification (N.O.C.). This classification also applies to establishments engaged in the manufacture or assembly of sprinkler heads, speedometers, or carburetors. Materials include, but are not limited to, steel or iron rods which may be pressed or formed, and small component parts. Machinery includes, but is not limited to, saws, shears, presses, chuckers, threading and tapping machines, some of which may be Computer Numeric Controlled (CNC). Establishments may have separate areas for deburring, inspecting, packing and shipping. The carburetor rebuilding may be performed on vehicles that are driven or towed into the shop, or on carburetors that have been already removed from the vehicles. In either case the repairs are made exclusively with hand and air tools and sometimes a

diagnostic scope and a drill press. A speedometer is usually embodied with a mileage recording mechanism. The central feature of the device is a permanent magnet. There are gears, spindles, and a drive shaft present in most speedometers. There is also a unit counting disc and a spiral spring calibrator. Hand tools are used almost exclusively in the repair of this kind of speedometer. Today many speedometers are computer controlled. Basically, if this kind of speedometer is in need of repair, a computer chip(s) is replaced, using hand tools. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of hardware that is not covered under another classification, such as handles, latches, and hinges which are to be reported separately in classification 3404, and the repair of speedometers or carburetors in a vehicle which is to be reported separately in the appropriate vehicle repair classification.

3402-32 Abrasive wheel: Manufacturing

Applies to establishments engaged in the manufacture of abrasive wheels. Manufacturing operations often include a laboratory where carbon and other materials are mixed together to form the abrasive edge of the mainly high tensile steel wheels. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-40 Welding or cutting, N.O.C. (*mobile operations limited to repair of equipment and machinery*)

Applies to establishments engaged in welding or cutting operations not covered by another classification (N.O.C.) either in the shop or at the customer's site. Steel is the predominant material along with some aluminum alloys. Machinery is predominantly welding equipment, but may include tools such as, but not limited to, grinders, saws, drills, and material handling equipment. This classification also includes "mobile shops" which are used *exclusively* to repair machinery or equipment. A "mobile shop" in this classification usually means a van or pick up pulling a utility trailer equipped with hand tools, specialty tools, air tools, a compressor, and a portable welding unit. The machinery or equipment is usually repaired at the customer's location, sometimes with the use of the customer's equipment; however, broken parts may be removed and taken back to the shop for repair.

This classification excludes repairs to buildings or structures which are to be reported separately in the appropriate

construction classification and mechanical repairs which are to be reported separately in the classification applicable to the work being performed.

3402-48 Automobile or truck, radiator and heater core: Manufacturing and repair shops

Applies to establishments engaged in the manufacture and/or repair of automobile or truck radiator and heater cores. Manufacturers in this classification may have a die casting area and a separate electronic assembly area. Tools and equipment include, but are not limited to, hand tools, solder guns, and punches. Shops that repair radiators may work on the radiators in the vehicles, but usually the radiators have been removed from the vehicle. The radiator is examined and the core may be removed. Next the radiator is cleaned, air pressurized, and dipped in a water tank to check it for leaks. Once the leaks are found they can generally be repaired by welding the holes shut. The radiator is dipped again to ensure the repair has been made properly. Cleaning the radiator may be done by sandblasting, ultra sound baths or by "rodding" the radiator to remove corrosion. Repair equipment includes, but is not limited to, welders, air and hand tools, dipping tanks, hoists, and forklifts. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-60 Office machinery, N.O.C.: Manufacturing or assembly; Cash register or sewing machines: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of cash registers, sewing machines and office machinery not covered by another classification (N.O.C.) such as, but not limited to, copiers, collators, mail/postage machines, calculators and automatic letter openers. Component parts may be metal, plastic, or wood. Operations include, but are not limited to, cutting, shaping, forming, drilling, riveting, clamping, and bolting; there may be a separate electronic assembly area. Machinery and tools vary within this classification; some establishments use hand and air tools only, others use additional equipment such as, but not limited to, saws, lathes, mills, drills, or water jets, some of which may be Computer Numeric Controlled (CNC). This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-61 Small arms: Manufacturing, assembly, or rebuild

Applies to establishments engaged in the manufacture, assembly, or rebuild of small arms. For the purpose of this classification, small arms means .50 caliber or less, such as pistols, rifles, shotguns, and light machine guns. Operations include, but are not limited to, metal stamping of casings, machining, assembling, and a high proportion of inspecting. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of ammunition which is to be reported separately in classification 4601; the manufacture or repair of heavy arms which is to be reported separately in classification 5109; and gun stores which are to be reported separately in classification 6309.

3402-74 Tool: Manufacturing, not hot forming or stamping; Die: Manufacturing - ferrous

Applies to establishments engaged in tool manufacturing or die manufacturing, for others, from ferrous materials. Tools manufactured in this classification are usually cutting tools used in lathes, mills, rotors, and saws. Machinery includes, but is not limited to, sharpeners, grinders, lathes and mills, which are both manual or Computer Numeric Controlled (CNC). The die manufacturing included in this classification includes those made exclusively of ferrous materials including, but not limited to, jigs, fixtures, and dies for metal work in general. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of machine-finished tools which are to be reported separately in classification 3402-83.

3402-77 Auto, truck, semi-trailer and bus body: Manufacturing;**Travel trailer body: Manufacturing or repair**

Applies to establishments engaged in the manufacture of auto, truck, and bus bodies, and in the manufacture or repair of travel trailer bodies or cargo containers. Repairs are usually made with the use of welders or cutting torches and air or hand tools. These establishments will also repair or replace hydraulic units. Material used in the manufacture of goods in this classification is usually steel and aluminum, varying in thickness from 16 gauge to plate metal up to one inch thick. Shapes include, but are not limited to, sheet metal, tubes,

solid rod or I-beams. Equipment includes, but is not limited to, shears, breaks, hydraulic presses, iron workers, drill presses, grinders, welders, hoist, cranes, and forklifts. Shops may have a finish sanding area as well as a paint area where the vehicle bodies are sprayed with primer, a body bonding material, or a finish coat of paint. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-83 Tool: Manufacturing and machine finishing

Applies to establishments engaged in manufacturing and machine finishing tools. Tools manufactured in this classification are usually hand held instruments such as, but not limited to, wrenches, screw drivers, hammers, torque wrenches, pliers, and sockets. Machinery includes, but is not limited to, air and hand tools, polishers, grinders, inspection equipment, mills, lathes, shapers, and drill presses, some of which may be Computer Numeric Control (CNC). Establishments may have a galvanizing and/or electroplating area for the finish work which is included when performed by employees of employers subject to this classification. Other establishments in this classification send the finish work out. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of tools from ferrous materials which are to be reported separately in classification 3402-74; and establishments engaged in tool forging which are to be reported separately in classification 5106.

3402-85 Auto or truck parts: Machining or rebuild not in vehicle

Applies to establishments engaged in machining or rebuilding auto or truck parts such as, but not limited to, water pumps, fuel pumps, transmissions, heads, brake drums, ball joints, and rear ends, which are not in the vehicle. Work contemplated in this classification may also include manufacturing sockets, pulleys, shafts, fittings, flywheels, and/or bearings. Machinery includes, but is not limited to, mills, lathes, grinders, sanders, presses, welders, and balancing equipment. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in manufacturing

or rebuilding auto, truck, or aircraft engines which are to be reported separately in classification 3402-86.

3402-86 Auto, truck or aircraft engine, N.O.C.: Manufacturing or rebuilding

Applies to establishments engaged in manufacturing or rebuilding auto, truck, or aircraft engines not covered by another classification (N.O.C.), including manufacturing the component parts. Establishments in this classification often specialize in the type of engines they make or rebuild. The basic difference between automobile, truck, and aircraft engines is the size and weight of the parts being worked on. Engine rebuild shops use many specialized machines and air tools to tear the core down to an engine block; then rebuild the engine. After the engine is stripped down to the engine block, it is placed in a machine called a baker which heats to approximately 600 degrees and bakes away the grease. After baking, the engine block is placed in a sand blaster where the surface is cleaned with very fine steel shot. The engine block is then placed in a large pressure washer which removes the steel shot. Next, the crank and cam shafts are ground and turned on machinery similar to lathes. There is usually a separate room or area which is called the "head shop" where the heads and valves are machined on valve grinders, valve facers, and head grinders. Engine rebuild shops that do not have the equipment to grind the crank and cam shafts will contract work out to other shops, or buy new crank shafts and cam shafts. Other machinery includes, but is not limited to, boring bars and hones to polish cylinder walls, small pressure washers for oil pans and other smaller parts, solvent tanks, and hoists or forklifts for lifting the engines or engine parts. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in machining or rebuilding auto or truck parts, other than engines, which are to be reported separately in classification 3402-85.

3402-91 Bed spring or wire mattress: Manufacturing

Applies to establishments engaged in the manufacture of bed springs or wire mattresses. The wire stock is coiled and cut to length on a coiling machine, then tempered in an oven to produce the spring. The coils are fastened to the frame either by hand or by machine. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of stuffed mattresses which are to be reported separately in classification 3708.

3402-93 Valve: Manufacturing

Applies to establishments engaged in the manufacture of valves. Valves regulate the flow of air, gases, liquids, or loose material through structures by opening, closing, or obstructing passageways. They are operated manually, electrically, with compressed air, or hydraulic pressure. Valves are usually cut from aluminum, steel, or stainless steel either by a Computer Numeric Controlled machine (CNC) or water jet machine. Depending upon the complexity of the valve, they are assembled in one or several stages. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of valves made in a die mold which are to be reported separately in classification 3402-74.

3402-94 Precision machined parts, N.O.C.: Manufacturing

Applies to establishments engaged in manufacturing precision machined parts not covered by another classification (N.O.C.). Most of these establishments are "job shops." Job shops make component parts for other businesses according to customer specifications, rather than manufacturing a specific product. Many establishments in this classification manufacture precision parts for the aerospace industry. Machining usually begins with solid blocks of material such as, but not limited to, steel, aluminum, titanium, inconel, or plastic, although some hollow tube, flat bar, and angle stock may also be used. The "rough cuts" are often made on manual machines, and the finish cuts on Computer Numeric Controlled (CNC) machines. Depending on the establishment and the job specifications, a specific part may be sent to one or more additional shops to be tempered, milled, or inspected before the original establishment is through with the manufacturing process. Some parts are so sensitive that climate controlled conditions are necessary. Both manual and CNC mills and lathes are the most common types of machines used. Others include, but are not limited to, saws, drills, and grinding machines. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-95 Storage battery: Manufacturing, assembly or repair

Applies to establishments engaged in the manufacture, assembly, or repair of storage batteries. Lead ingots, weigh-

ing 20-25 pounds, are melted and poured into a mold or casting machine. After the grids are cooled lead oxide is then pumped onto each side of a grid and cured by baking in an oven of about 300 - 400 degrees F. The plates are then assembled by placing a negative separator (zinc) between a positive separator (copper), and so forth until there are enough of these cells to form the battery. Next, they are sent to a burning machine that cures the paste and plates. After the burning process, the plates are placed into a plastic or hard rubber box-like container and cured for two or three days. The plates are welded together and the top is attached to the body of the battery case with an epoxy glue. Diluted sulfuric acid is added to the battery and then it is put on a charger. The battery is then cleaned and packed for shipping. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of dry cell (flashlight type) batteries which are to be reported separately in classification 3602; and establishments engaged in battery sales and installation which are to be reported separately in the applicable automotive services classification.

3402-96 Automobile or motorcycle: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of automobiles or motorcycles. Most of the manufacturing operations, such as cutting, milling, and turning, are performed with Computer Numerically Controlled (CNC) machinery. Most of the assembly operations are performed with air and hand tools. Other machinery includes but is not limited to saws, grinders, and drill presses. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged only in the manufacture of auto bodies which are to be reported separately in classification 3402-77.

3402-98 Machinery, N.O.C.: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of machinery not covered by another classification (N.O.C.). For purposes of this classification, machinery means any combination of mechanical parts constructed primarily with metal. Finished products vary widely and range from hand held machines to those weighing thousands of pounds; products include, but are not limited to, grinding machines, boring machines, conveyer systems, and wood chippers. Machinery used to manufacture these items

(2001 Ed.)

includes, but is not limited to, lathes, mills, press, breaks, shears, and welders, some of which may be Computer Numerically Controlled (CNC). This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-99 Photo processing machinery: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of photo processing machinery such as, but not limited to, photo processors or film enlargers. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-580, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-580, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-580, filed 5/31/96, effective 7/1/96. WAC 296-17-581 Classification 3403.

3403-00 Aircraft: Manufacturing

Applies to establishments engaged in the manufacture of aircraft. For the purposes of this classification "aircraft manufacturing" means the original manufacture of such aircraft as distinguished from rebuilding, modifying, or converting existing aircraft and applies *only* to the production of units that, when completed, are capable of in-air flight as distinguished from aircraft kits to be assembled by the purchaser that are not capable of air flight when sold. This classification includes aircraft operations incidental to the manufacture, such as test flights.

This classification excludes establishments engaged in the original manufacture of aircraft parts which are to be reported separately in classification 3405 or as otherwise provided for in WAC 296-17-58201; the manufacture of aircraft kits which is to be reported separately in the classification

[Title 296 WAC—p. 301]

applicable to the work being performed; modification, repair or conversions made to an existing aircraft which are to be reported separately in classification 6804; and the *assembly of aircraft kits into an airplane* which is to be reported separately in classification 6804.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-581, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-581, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-581, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-581, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-581, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 78-12-043 (Order 78-23), § 296-17-581, filed 11/27/78, effective 1/1/79; Order 73-22, § 296-17-581, filed 11/9/73, effective 1/1/74.]

WAC 296-17-582 Classification 3404.

3404-01 Can: Manufacturing - aluminum or galvanized

Applies to establishments engaged in the manufacture of cans from aluminum or galvanized metals lighter than 9 gauge. Products include, but are not limited to, soda cans, food cans, and garbage cans. The galvanizing process includes dipping the tin/metal into liquid zinc. The manufacturing process involves cutting, forming, stamping, and soldering/welding. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-02 Galvanized iron works: Manufacturing - non-structural

Applies to establishments engaged in the manufacture of nonstructural galvanized iron from sheet metal lighter than 9 gauge. Processes include cutting, forming, welding, riveting, punching, and drilling. The equipment used includes, but is not limited to, drills, presses, punches, shears, and press breaks. Establishments in this classification may paint, powder coat, or silk screen their products; which is included when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of employers subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-03 Hardware, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of hardware that is not covered by another classification (N.O.C.), such as, but not limited to, handles, latches, hinges, and buckles. Operations include, but are not limited to, stamping and assembly, electroplating and/or other types of finishing. This classification includes the repair of items

being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of nuts, bolts, screws, nails, tacks, rivets, eyelets, spikes, and needles which are to be reported separately in classification 3402.

3404-04 Metal stamping

Applies to establishments engaged in the mass production of products by metal stamping techniques which impress, cut out, or shape something to a desired size. Products produced by this technique include, but are not limited to, license plates, pie plates, pots, and waste baskets. This classification includes any finish work when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-06 Metal sign: Manufacturing

Applies to establishments engaged in the manufacture of signs from metals lighter than 9 gauge. Materials may be cut, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, water jets and welders. All operations necessary to make a sign operative, such as, but not limited to, adding electrical wiring or circuitry, painting, powder coating, or silk screening are included within the scope of this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; the installation or removal of signs outside of buildings which is to be reported separately in classification 0403; the installation or removal of signs inside of buildings which is to be reported separately in classification 0513; sign painting or lettering on the inside of buildings, or establishments that paint on or apply lettering to sign "backings" that are manufactured by others, which is to be reported separately in classification 4109; and establishments engaged in the manufacture of wood or plastic signs which are to be reported separately in the classification applicable to the manufacturing process and materials.

3404-07 Metal goods, N.O.C.: Manufacturing or assembly from materials lighter than 9 gauge

Applies to establishments engaged in the manufacture or assembly of metal goods from materials lighter than 9 gauge which are not covered by another classification (N.O.C.) including water heaters, electric baseboard heaters, electric furnaces and bicycles. Materials may be cut, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-12 Aluminum ware: Manufacturing from sheet aluminum

Applies to establishments engaged in the manufacture of aluminum ware such as, but not limited to, mail boxes, buckets, gutters, and down spouts, from sheet aluminum. Materials may be cut, bent, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-18 Metal coffin/casket: Manufacturing or assembly

Applies to establishments engaged in the manufacture of coffins or caskets out of metal. Materials may be cut, bent, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. Physically separated upholstery departments of establishments engaged in furniture, coffin, casket manufacturing, assembly, or finishing may be reported separately in classification 3808 provided all the conditions in the general reporting rule covering the division of an employees hours have been met.

This classification excludes all activities away from the shop or plant, and establishments engaged in the manufacture of caskets from wood or plastic which are to be reported sep-

(2001 Ed.)

arately in the classification applicable to the manufacturing process and materials.

3404-19 Metal awnings: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of awnings from metals lighter than 9 gauge. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant, and establishments engaged in the manufacture of awnings from canvas or other textiles which is to be reported separately in classification 3802.

3404-20 Metal furniture, shower door, showcases: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of furniture, shower doors, or showcases made with metals lighter than 9 gauge. Other items manufactured in this classification include, but are not limited to, file cabinets, desks, and stands. Material may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. Physically separated upholstery departments of establishments engaged in furniture, coffin, casket manufacturing, assembly, or finishing may be reported separately in classification 3808, provided all the conditions of the general reporting rule covering the division of an employee's hours have been met.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of wood furniture which are to be reported separately in classification 2905.

3404-21 Stove: Manufacturing from metals lighter than 9 gauge

Applies to establishments engaged in the manufacture of stoves from metals *lighter than 9 gauge*. Types of stoves include, but are not limited to, electric or gas cook stoves. Accessory materials such as, but not limited to, electrical assembly units, glass, plastic, or wood may be used in the manufacture of stoves. Materials may be cut, punched, drilled, riveted, and bent. Establishments in this classification may paint or powder coat their products which is included when performed by employees of employers subject to this classification. Machinery includes, but is not limited

[Title 296 WAC—p. 303]

to, punches, presses, drills, shears, brake presses, grinders and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant, and establishments engaged in the manufacture of wood stoves or other stoves made of metals 9 gauge or heavier which are to be reported separately in classification 5209.

3404-24 Metal electric or gas lighting fixtures, lampshades or lantern: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of metal fixtures, lampshades, or lanterns from materials lighter than 9 gauge. The metal fixtures may be equipped with electrical or gas lighting and used as signs or other display mediums. Metal may be cut, punched, drilled, riveted, and bent. Depending on the item being made, electrical or gas-filled tubes or bulbs may be attached. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, grinders, welders, and solders. Establishments in this classification may make a finished product or only component pieces. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes establishments engaged in the manufacture of neon tube signs or displays that are not attached to metal backings which are to be reported separately in classification 3602, and all activities away from the shop or plant.

3404-25 Brass or copper goods: Manufacturing

Applies to establishments engaged in the manufacture of brass or copper goods such as, but not limited to, belt buckles, lamp stands, cooking utensils, and flower pots. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, water jets, grinders, welders/solders and brazing guns. Establishments in this classification may make a finished product or a component part. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-26 Aluminum window, sash or door: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of windows, sashes or doors from aluminum. Accessory materials such as, but not limited to, glass, wood or plastic may also be used in the assembly process. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, grinders, and welders/solders. Establishments in this classification may make a finished product or only component parts. Manufacturers may paint, enamel, or bake a finish onto products, which is included when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in manufacturing vinyl window sashes which are to be reported separately in classification 3512; and establishments engaged in manufacturing wooden window sashes and doors which are to be reported separately in classification 2903.

3404-27 Auto or truck parts, N.O.C.: Manufacturing or assembly; miscellaneous stamped parts

Applies to establishments engaged in the manufacture or assembly of auto or truck parts not covered by another classification (N.O.C.), and of miscellaneous stamped parts, such as, but not limited to, hub caps, fenders, and trim. Galvanizing or electroplating is included in this classification when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-29 Metal ski and toboggan: Manufacturing

Applies to establishments engaged in the manufacture of skies or toboggans primarily from metal although wood or plastic component parts may also be used. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, water jets, shears, break presses, grinders, and welders/solders. Establishments in this classification may make a finished product or only a component part. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly

operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-582, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-582, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-582, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 88-12-050 (Order 88-06), § 296-17-582, filed 5/31/88, effective 7/1/88; 87-24-060 (Order 87-26), § 296-17-582, filed 12/1/87, effective 1/1/88; 85-24-032 (Order 85-33), § 296-17-582, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-582, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-582, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-582, filed 11/30/81, effective 1/1/82; 80-17-016 (Order 80-23), § 296-17-582, filed 11/13/80, effective 1/1/81; Order 75-38, § 296-17-582, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-582, filed 11/9/73, effective 1/1/74.]

WAC 296-17-58201 Classification 3405.

3405-01 Aircraft parts, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of aircraft parts not covered by another classification (N.O.C.), usually from steel and aluminum mixes and exotic metals. For the purpose of this rule, aircraft parts means the component parts making the aircraft operative and becoming part of the aircraft when being manufactured by the aircraft manufacturing company. The component parts manufactured in this classification are usually small, light weight, and can easily be held in the hand. Machinery includes, but is not limited to, mills, lathes, grinders, and forklifts. Computer Numeric Controlled (CNC) equipment is used most of the time for many of the parts being mass produced. Once pieces are cut and milled, they are usually deburred, then inspected and prepared for shipping in separate areas. Businesses in this classification routinely employ engineers and draftsmen who perform office work only who may be reported in classification 4904 provided all the conditions in the general reporting rule covering standard exception employees have been met. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

Special note: This classification is not to be assigned to an employer who has operations reported separately in classifications 3402, 3404, 3510, 3511, 3512, or 5201 unless all the conditions in the general reporting rule covering the operation of a secondary business have been met.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-58201, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-58201, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-58201, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-58201, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-58201, filed 2/28/85, effective 4/1/85; 81-24-042 (Order 81-30), § 296-17-58201, filed 11/30/81, effective 1/1/82. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 78-12-043 (Order 78-23), § 296-17-58201, filed 11/27/78, effective 1/1/79.]

WAC 296-17-583 Classification 3406.

3406-00 Automotive or truck gas service stations, N.O.C.

Applies to establishments operating full service gasoline or diesel service stations not covered by another classifica-

tion (N.O.C.) and includes lube and oil change specialists and mobile lube and oil services. Full service includes, but is not limited to, pumping gas for customers, replacing wiper blades, checking and/or filling the fluid levels (oil, transmission, wiper wash and antifreeze), and adding air to the tires. The repairs included in this classification are oil and filter changes, tune-ups, replacement of brakes, front end alignments and the repair or replacement of tires. This classification includes cashiers.

This classification excludes portable automobile or truck car washes which are to be reported separately in classification 6602; establishments engaged in automobile or truck repair services and tune up specialists which are to be reported separately in classification 3411; establishments engaged in the service or repair of machinery or equipment N.O.C. which are to be reported separately in classification 6409; self-service gas stations which are to be reported separately in classification 3409; and convenience grocery stores or mini-markets with self-service gasoline operations which are to be reported separately in classification 3410.

3406-01 Automobile or truck storage garages

Applies to establishments operating automobile or truck storage garages. Generally, these types of storage garages consist of an enclosed structure and usually with more than one level of parking. Storage garages may provide additional incidental services such as, but not limited to, gasoline, tune-ups, washing and waxing services, as well as cashiers and full time attendants or security personnel.

This classification excludes portable automobile or truck car washes which are to be reported separately in classification 6602; establishments providing parking lot services which are to be reported separately in classification 6704; automobile or truck repair services which are to be reported separately in classification 3411; establishments engaged in the service or repair of machinery or equipment N.O.C. which are to be reported separately in classification 6409; self-service gas stations which are to be reported separately in classification 3409; and full service gas station services which are to be reported separately in classification 3406-00.

Special note: Storage garages applicable to this classification are distinguishable from parking lots in classification 6704 in that parking lots usually are not an enclosed structure, and they do not provide service to automobiles.

3406-04 Automobile or truck - detailing by contractor; glass tinting

Applies to establishments engaged in providing automobile or truck detailing services and to establishments engaged solely in tinting glass in automobiles. Detailing services involve complete, in-depth cleaning of exteriors and interiors such as, but not limited to, washing, waxing, polishing, buffing, vacuuming or otherwise cleaning the auto bodies, chrome work, tires, hub caps, windows, mirrors, carpets and seats and may also involve tinting glass. This classification includes cashiers.

This classification excludes portable automobile or truck car washes which are to be reported separately in classification 6602; tinting of automobile or truck window glass performed by a glass dealer which is to be reported separately in classification 1108; glass tinting or the application of tinted

plastic film to glass windows and doors in buildings which are to be reported separately in classification 0511; detailing performed in connection with automobile or truck dealers, service centers or repair garages which are to be reported separately in classification 3411; detailing performed in connection with automobile or truck body and fender repair shops which are to be reported separately in classification 3412; detailing performed in connection with establishments engaged in the service or repair of machinery or equipment, N.O.C. which is to be reported separately in classification 6409; and detailing performed in connection with full service gas stations which are to be reported separately in classification 3406-00.

3406-05 Automobile or truck car washes

Applies to establishments providing automobile or truck washing services. This classification includes the exterior washing, waxing, polishing or buffing, cleaning of chrome and tires, and the interior cleaning of windows, carpets, dash and seats. These services may be performed at a coin operated self-service unit, or at a full service automatic unit where the vehicle is conveyed through the line assisted by attendants. This classification includes cashiers and the sale of accessory items such as, but not limited to, bottled car care products, air fresheners, floor mats, beverages and snack foods.

This classification excludes portable automobile or truck car washes which are to be reported separately in classification 6602; washing services performed in connection with automobile or truck dealers, services centers or repair garages which are to be reported separately in classification 3411; washing services performed in connection with automobile or truck body and fender repair shops which are to be reported separately in classification 3412; washing services performed in connection with establishments engaged in the service or repair of machinery or equipment, N.O.C. which are to be reported separately in classification 6409; washing services performed in connection with full service gas stations which are to be reported separately in classification 3406; washing services performed in connection with self-service gasoline operations which are to be reported separately in classification 3409; and washing services performed in connection with convenience stores that have self-service gasoline operations which are to be reported separately in classification 3410.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-583, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-583, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-583, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-583, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-583, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-583, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-583, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-583, filed 11/29/82, effective 1/1/83; 81-24-042 (Order 81-30), § 296-17-583, filed 11/30/81, effective 1/1/82. Statutory Authority: RCW 51.04.030 and 51.16.035, 79-12-086 (Order 79-18), § 296-17-583, filed 11/30/79, effective 1/1/80; Order 73-22, § 296-17-583, filed 11/9/73, effective 1/1/74.]

WAC 296-17-584 Classification 3407.

3407-00 Gas or oil dealers, wholesale or retail, including fuel oil, propane or butane

Applies to establishments engaged in the distribution of fuel oil, liquefied petroleum gases (propane and butane) and gasoline on a retail or wholesale basis. Dealers may maintain their own storage tanks on their premises and receive gas or oil through a pipeline from a refinery, by rail or tanker truck, or they may receive their supplies from a separate distribution facility. Gas dealers will deliver gasoline and lubricating oils directly to retail gas stations in large tank trucks. Fuel oil is delivered to customers by pump trucks and pumped into the customer's tank. Liquefied petroleum gases (LPG) is delivered to customers by pump truck or in prefilled cylinders. Some dealers may also provide, through sale or lease, the installation and maintenance of gas appliances which is included in this classification when done by employees of an employer subject to this classification. This classification includes the incidental mixing or blending of oil or gas with additives, the draining, repair, installation or removal of customer's oil tanks, maintenance contracts and emergency repairs.

This classification excludes the repair, installation or removal of underground oil storage tanks by a contractor which is to be reported separately in classification 0108; the installation or repair of furnaces by a contractor which is to be reported separately in classification 0307; and the construction or repair of exterior commercial storage tanks by a contractor which is to be reported separately in classification 0508.

3407-01 Asphalt, bitumen dealers

Applies to establishments engaged as *dealers* of asphalt and bitumen which can be either a by-product of petroleum refining or found in naturally occurring deposits. Dealers may grind and mix the raw asphalt and bitumen with sand, gravel or limestone to produce a mixture which can be suitable for some paving applications or sold to an asphalt paving material manufacturer for further processing. The product is usually not packaged, but sold by the truckload. When this mixing process is conducted in connection with an oil/petroleum refining operation, it is to be reported in classification 3407-03.

This classification excludes the mining or quarrying of raw materials which is to be reported separately as applicable; establishments engaged in the manufacture of asphalt mixtures for road paving which is to be reported separately in classification 3407-18; and the paving of roads or other surfaces which is to be reported separately in classification 0210 or 0212.

3407-02 Processing waste oils, solvents, antifreeze, paints, and similar materials

Applies to establishments engaged in processing waste oils, used solvents, antifreeze, paints, and similar hazardous materials. Mobile recycling units engaged in similar activities are included in this classification. The processes used by establishments in this classification are similar in that a sample of the waste material usually has been laboratory tested so the composition of the substance is known prior to either

being picked up by the establishment's own trucks, or delivered by the customer. Depending on the material and quantity, it may arrive in drums or by tanker trucks. Incoming oil is pumped into waste oil storage tanks where water settles out. After the settling process, the oil goes to treatment tanks where it is heated to boil off remaining water and vaporize gases. There are other methods of recycling the oil, using chemicals, which are also included in this classification. The end product can be used in industrial burners or for cutter fuel. Solvents and antifreeze can be recycled through a distilling process, and used again.

This classification excludes establishments engaged in hazardous/toxic material processing or handling, not described above, such as processing of medical or septic tank waste, drug lab or hazardous spill cleanup (excluding oil spill cleanup on land - classification 0101), and reprocessing or handling of low-level radioactive materials which are to be reported separately in classification 4305.

3407-03 Oil refining - petroleum, including manufacture of products from oil; gasohol - distilling or refining

Applies to establishments engaged in the operation of oil refineries. Oil refineries receive crude oil by pipeline, truck or tanker ship, process it into products such as, but not limited to, gasoline, natural gas, kerosene, fuel oil, lubricating oils and asphalt, and distribute it to their customers. Current refining processes involve four basic steps; separation, conversion, treating and blending. These processes are highly automated and involve the use of receiving tanks, processing units, distillation towers, intermediate storage and pipelines. Included within the scope of this classification are any additional processing methods used to produce the finished secondary products. This classification includes the production of gasohol and the preliminary separation of crude oil (called "topping") at a well site by a contractor.

This classification excludes oil refinery maintenance by a contractor which is to be reported separately in classification 0603; construction of an oil refinery or storage tanks which is to be reported separately in classification 0508; cleaning of storage tanks by a contractor which is to be reported separately in classification 0504; operation of an oil well and incidental preliminary separation of crude oil ("topping") at the well site which is to be reported separately in classification 3407-05; and operation of an oil pipeline only which is to be reported separately in classification 3407-12.

3407-04 Asphalt or tar - distilling or refining

Applies to establishments engaged in the production of commercial asphalt or tar. Products produced in this classification differ from those in 3407-01 in that products in 3407-04 are refined to, and sold as, a liquid or semi-liquid. Low grade crude oil, petroleum distillate (by-product of oil refining operations) and coal-tar oil must be treated in a heat exchange system and still before undergoing a final processing in a fractioning tower (a process also used in oil refining) to separate the asphalt or tar. Finished products and by-products include, but are not limited to, asphalt roofing compound, asphalt for use in manufacturing felt roofing paper, trinidad asphalt used in road paving, tar to be used in various paving and waterproofing applications and coal tar which is used in drugs and waterproofing products. When this process

is conducted in connection with an oil/petroleum refining operation, it is to be reported in classification 3407-03.

This classification excludes contractors engaged in distillery/refinery maintenance which is to be reported separately in classification 0603; contractors engaged in cleaning of storage tanks which is to be reported separately in classification 0504; and construction of refineries and storage tanks which is to be reported separately in classification 0508.

3407-05 Gas or oil well operation

Applies to establishments or contractors engaged in the routine operation of producing oil or gas wells. Work contemplated by this classification includes, but is not limited to, all routine operation and maintenance required such as, but not limited to, land clearing and excavation to create slush pits, fire walls, pipe laying, machinery and equipment (such as oil, gas or water pumps) installation and operation, preliminary separation of crude oil, and monitoring of oil or gas production when performed by employees of an employer having operations subject to this classification.

This classification excludes derrick or storage tank erection which is to be reported separately in classification 0508; oil well drilling which is to be reported separately in classification 0103; excavation by a contractor which is to be reported separately in classification 0101; pipe laying by a contractor which is to be reported separately in classification 0107; cleaning of storage tanks by a contractor which is to be reported separately in classification 0504; machinery or equipment maintenance by a contractor which is to be reported separately in classification 0603; and the operation of an oil or gas pipeline only which is to be reported separately in classification 3407-12.

3407-07 Oil or gas wells - cementing

Applies to establishments engaged in providing cementing services to oil and gas well drilling operations. Cementing is required to fill the space between the outer edge of the hole being drilled and the metal casing which is being installed in segments to line the hole. The mixed cement is pumped, under pressure, down into the casing. When it reaches the bottom of the existing hole, the continuing pressure forces it upward around the outside of the casing to the top of the hole or to where it will meet the last segment to have been cemented. This will serve to keep the casing stable and also to prevent any leakage of oil or gas from the casing into the surrounding soil when the well is operational. Cementing contractors can use the drilling derrick already in place to support their machinery. This classification also includes filling the entire well hole with cement, after the casing is disassembled and removed, when the well is no longer operational.

This classification excludes oil or gas well cementing done by employees of an oil well drilling contractor which is to be reported separately in classification 0103.

3407-12 Oil or gas pipeline operation

Applies to establishments engaged in operating an oil or gas pipeline. The pipeline may be used to transport crude oil from a well to a refinery or processed oil from a refinery to a remote storage facility or customer. Work contemplated by this classification includes, but is not limited to, operating

and maintaining above or below-ground pipelines, feeder and distribution lines, pumping stations to maintain flow, storage facilities, and meters and monitoring equipment. This classification is appropriate whether the pipeline is being operated by the owner or a contractor.

This classification excludes oil or gas pipeline operations done in connection with an oil refinery which are to be reported in classification 3407-03; oil or gas pipeline operations done in connection with the operation of an oil or gas well which are to be reported in classification 3407-05; contractors engaged in above or below ground pipe installation which is to be reported separately in classification 0107; construction of oil refineries and/or storage tanks which is to be reported separately in classification 0508; and the installation of pumps or monitoring equipment which is to be reported separately in classification 0603.

3407-17 Asphalt roofing material - manufacturing

Applies to establishments engaged in the manufacture of asphalt mixtures used in the preparation of building or roofing papers and shingles from raw materials purchased from others. The operations may include the incidental distillation of the asphalt flux.

Asphalt Roofing Materials - Some plants are fully automated, with controls, gauges, and valves housed in a separate room. Liquid asphalt flux, purchased from refineries, is hauled in by tanker trucks owned either by the refineries or the manufacturer, and is pumped directly into "air stills" or into holding tanks. An oxidation process takes place in the air stills. The asphalt flux is heated, then pumped into cooling tanks before it is pumped through pipes to a bulk loading/delivery station or to another area for further use. The processed hot asphalt may also be pumped into a blending tank where it can be blended with mineral spirits or naphtha to produce "cut-back" asphalt which is used in "cold asphalt" applications, or mixed with water to obtain an emulsified asphalt which "sets up" when it cools.

Asphalt Impregnated Felt Roofing Paper - Large rolls of felt paper are unrolled and automatically fed into a saturation tank where the paper is impregnated with the hot asphalt mixture. The paper then goes through several large rollers for cooling and smoothing, and is finally cut to size and rolled to produce rolls of asphalt coated felt roofing paper ready for use.

Asphalt Fiberglass Shingles - Limestone is delivered in bulk by suppliers' trucks and blown pneumatically into storage tanks. In the production processes it goes through a heater and is then mixed with the liquid asphalt. The production line starts with huge rolls of fiberglass which are fed continuously (roll ends spliced together automatically) into the process. The asphalt mixture is crushed into both sides of the fiberglass by large rollers and the excess asphalt scraped off. Granules are applied to the top side and sand is applied to the back side of the asphalt coated fiberglass. The coated fiberglass is then run through coolers. Granules are pressed into the coating and the material is fed/hung into "loopers" for additional cooling. After cooling, the coated material is automatically cut into strips, cut to specified width and length, "dragon teeth" (notches) cut, asphalt applied to the back of

the "dragon teeth", then the "teeth" applied to the shims, and the asphalt shingle is complete.

This classification excludes asphalt or bitumen dealers who are to be reported separately in classification 3407-01, asphalt or tar distilling or refining operations which are to be reported separately in classification 3407-04, and asphalt paving material manufacturers who are to be reported separately in classification 3407-18.

3407-18 Asphalt paving material - manufacturing

Applies to establishments engaged in the manufacture of asphalt mixtures used for road paving operations from raw materials purchased from others. This classification applies only to the operation of the asphalt plant which usually consists of a loader, a control operator, and a maintenance worker. (To qualify for classification 3407-18 the maintenance worker's duties must relate *only* to the asphalt plant.) This classification does not apply to workers involved in pit, crusher and bunker operations. The operations may include the incidental distillation of the asphalt flux which is included in this classification. Asphalt paving mixture plants are usually fully automated and controlled from a central control room overlooking the production area. Sand and gravel may be obtained from the producer's own gravel pit or purchased from independent suppliers. Liquid asphalt is obtained directly from either the refineries or from an asphalt dealer. Suppliers usually deliver raw materials to the manufacturing plant.

In a *batch plant*, each batch is made separately. The stored aggregate is loaded into hoppers, then carried by conveyor through a dust collecting system prior to entering the dryer drum. In the dryer drum the aggregate is dried and heated to specified temperatures before being conveyed to the "batcher" where it is screened, then stored in bins. Heated liquid asphalt is weighed to precise specifications required for that batch. Measured amounts of aggregate and liquid asphalt are in a pug mill to desired state, then discharge into trucks to be delivered to customers or stored in a silo.

In a *drum plant* the mix is continuous with several of the processing steps being combined in the drum. The measured cold aggregate is fed directly into the burner end of the drum for drying and heating. A measured amount of hot oil asphalt is dumped into the drum and mixed with the heated aggregate. The mixed product is conveyed into storage silos where it is held until pumped into delivery trucks.

This classification excludes workers involved in pit, crusher and bunker operations who are to be reported separately in classification 0112; paving contractors who manufacture asphalt paving material for their own use who are to be reported separately in the appropriate construction classifications; asphalt or bitumen dealers who are to be reported separately in classification 3407-01; asphalt or tar distilling or refining operations which are to be reported separately in classification 3407-04; and establishments engaged in the manufacture of asphalt roofing material which are to be reported separately in classification 3407-17.

Special note: If the product is manufactured by paving contractors for sale to the general public, as well as for their own use, and if the employees operating the asphalt plant

have no other duties, classification 3407-18 would apply to the asphalt plant employees.

3407-19 Dewatering sludge; advanced recycling of plastics and tires; On-site oil filtering

Applies to establishments engaged in providing mobile dewatering services to waste sludge producers through the use of mobile decanter centrifuges. The centrifuges and control instrumentation is highly specialized equipment designed specifically for the dewatering of sludge to concise quality specifications as determined by the client. Mobile decanter centrifuge installations include dredging and pumping equipment, flocculation systems, and portable electrical supply, as well as trucks for transferring the dewatered sludge. The ultimate disposal of the dewatered sludge is provided by either a subcontractor or by the client. The dewatered sludge can be used in a wide variety of applications such as composting and land reclamation. This classification also applies to establishments engaged in advanced recycling of plastics and tires. The process is similar to a small refinery. Either pelletized or shredded plastic material made from used consumer materials, or shredded used tire material may be used. The plastic or tire material is fed into a retort which decomposes the material using heat without oxygen, so the material is not burned. As the hot vapor gas cools, it is condensed into oil. Oil from the plastic processing is shipped to refineries where it will be refined further into plastic base material. Oil from the chipped tires is usually sold to oil blending companies. This classification also applies to on-site oil filtering. The usual process is filtering the oil through a filtering mechanism and then back into its original tank. This service may be performed on ships, in industrial plants, or at gas or oil storage facilities.

This classification excludes the "rig up/down" process (unloading and setting up the equipment at a new job site, and tearing it down and loading it on trucks to haul it to the next job site) which is to be reported separately in classification 0603.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-584, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-584, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-584, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-584, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-584, filed 11/9/73, effective 1/1/74.]

WAC 296-17-585 Classification 3408.

3408-00 Natural gas companies

Applies to establishments engaged in the operation of natural gas companies which distribute gas through gas mains or pipes to local consumers. Employments covered in this classification include clerical office and sales personnel, store employees, meter readers, and drivers. This classification also includes local gas main connection, new construction and extension of lines, maintenance and operation of plant equipment, installation and repair of plant pressure regulators, and installation and repair of meters, appliances, furnaces and gas regulators on piping within a customers' premises when performed by employees of an employer subject to this classification.

(2001 Ed.)

This classification excludes contractors engaged in gas line construction, maintenance or repair who are to be reported separately in classification 0107; contractors engaged in the installation of heating systems who are to be reported separately in classification 0307; contractors engaged in the installation of gas appliances who are to be reported separately in classification 0607; and contractors engaged in the installation of hot water tanks who are to be reported separately in classification 0306.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-585, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-585, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-585, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-585, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-585, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-585, filed 11/9/73, effective 1/1/74.]

WAC 296-17-58501 Classification 3409.

3409-00 Self-service gas stations

Applies to establishments engaged in self-service gas operations. A self-service station is a facility where the customers pump gas into their own vehicles with no assistance from any of the establishment's employees. Typically, the only employee involved in the operation is a cashier who monitors the pumps from inside a booth and collects the payment from the customer. Sales of cigarettes and limited snack items are allowed in this classification.

This classification excludes full service stations, establishments with both self-serve and full or limited service operations at the same location, or any type of service stations with gasoline operations that offer any repair or direct services to the customer's vehicle, regardless of the percentage of the activities, at the same location, which are to be reported separately in classification 3406; and establishments who operate a self-service gas station with a convenience store or mini-mart operations which are to be reported separately in classification 3410.

Special note: The extent and type of the groceries available for sale at a self-service only establishment must be determined to assign the appropriate classifications. Generally, if only convenience items such as oil, gas additives, cigarettes and snack foods such as candy, gum, chips, and soft drinks are available, classification 3409 would be allowed. However, if more than the items listed above are available such as milk, bread, canned food, or fast food service, classification 3410 would apply. Establishments with multiple locations are to be classified in accordance with the general reporting rule covering the operation of a secondary business.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-58501, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-58501, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-58501, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-58501, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-17-58501, filed 11/30/79, effective 1/1/80.]

WAC 296-17-58502 Classification 3410.

3410-00 Convenience grocery stores or mini-markets with self-service gasoline operations

Applies to establishments engaged in operating convenience grocery stores or mini-markets with self-service gasoline operations. These establishments provide retail sale of

convenience grocery items, not just snack items, in addition to self-service gasoline. Gasoline operations are limited to self-service only where the store employee is a cashier who monitors the pumps and collects the payments inside the store. Self-service/convenience store operations in classification 3410 differ from self-service gas stations in classification 3409 in that establishments in classification 3410 provide a more extensive line of grocery items. In addition to snack foods, staples such as bread, milk, and canned foods are available for sale. They may also prepare food such as sandwiches, chicken, jo jos, or hot dogs, and occasionally fill a customer's propane tank, and offer automobile or truck washing services, all of which is included within the scope of this classification.

This classification excludes establishments which provide any full service or limited services in addition to self-service operations at the same location which are to be reported separately in classification 3406; establishments which provide only self-service gasoline operations and whose grocery items are limited to prepared snack foods such as chips and candy, and cigarettes which are to be reported separately in classification 3409; and convenience stores with no gasoline services which are to be reported separately in classification 6403.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-58502, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-58502, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-58502, filed 5/31/93, effective 7/1/93.]

WAC 296-17-58503 Classification 3411.

3411-00 Automobile: Dealers, rental or leasing agencies, including service repair garages;

Recreational vehicle: Dealers, rental/leasing agencies, or service/repair garages

Applies to establishments engaged in selling, renting, or leasing automobiles, including service/repair centers operated by dealers. This classification also applies to establishments engaged in selling, renting, leasing *or* servicing/repairing recreational vehicles. For purposes of this classification, the term "automobile" includes standard sized passenger cars, pick up trucks, and sport utility vehicles. The term "recreational vehicle" includes motor homes, travel trailers, campers, and also includes sport and utility trailers. Work contemplated by this classification includes, but is not limited to, all phases of automotive mechanical service and repair work, washing, vacuuming, and waxing vehicles, and detailing such as striping, window tinting, vinyl repair, installing molding and electronic accessories when performed by employees of an employer subject to this classification. This classification includes service managers, parts department employees who have shop exposure, towing service for in-shop repairs, lot personnel, and customer courtesy van or car drivers.

This classification excludes: Dealers or service/repair centers for semi-trucks, diesel tractor-trailers, buses, and other heavy equipment or machinery which are to be reported separately in classification 6409; recreational vehicle dealers who also sell factory built housing units such as modular and mobile homes who are to be reported separately in classifica-

tion 3415; parts department employees who are not exposed to any hazards of the service/repair shop who may be reported separately in classification 6309; auto body shop employees or auto body specialty shops who are to be reported separately in classification 3412; dealers who sell truck canopies and related accessories, but do not sell the other vehicles/trailers included in this classification who are to be reported separately in classification 1106; establishments engaged in welding or cutting repairs and/or hydraulic installation which are to be reported separately in classification 3402; and sales employees who may be reported separately in classification 6301 provided all the conditions of the general reporting rule covering standard exception employees have been met.

Special notes: Used automobile dealers will not normally have service/repair garages or parts departments but will have lot personnel and detailers. Automobile rental and leasing agencies will normally have all the operations described above with the exception of parts department employees. New automobile dealers will routinely have all of the operations described above.

Establishments engaged in providing towing service for hire are to be reported separately in classification 1109. For purposes of this classification "towing for hire" means a towing service not performed in connection with repairs to be done by the service/repair shop.

3411-01 Automobile: Service centers, repair shops or garages

Applies to establishments engaged in servicing and repairing automobiles for others. For purposes of this classification, the term "automobile" includes standard sized passenger cars, pick up trucks, and sport utility vehicles. Work contemplated by this classification includes, but is not limited to, all phases of automotive mechanical service such as engine overhauls and rebuilding, resurfacing heads, valve grinding, transmission overhauls or rebuilding, electrical repairs, brake service, engine tune ups, fuel injection service, carburetor repair, and engine diagnostic service when performed by employees of an employer subject to this classification. This classification includes service managers, parts department employees who have shop exposure, incidental sales of reconditioned cars, towing service for in-shop repairs, and customer courtesy van or car drivers. Parts department employees who are not exposed to any hazards of the repair shop may be reported separately in classification 6309.

This classification excludes auto body shop employees who are to be reported separately in classification 3412.

Special note: While most businesses assigned to this classification have an inventory of parts which they use in the service and repair of customer vehicles, some employers have full line auto parts stores. Care needs to be taken when considering assignment of classification 6309 for auto parts sales. Only those businesses that have a full line auto parts store which is physically separated from the repair shop and whose sales of auto parts are primarily for off-premises repair (do it yourself repair) should be considered for classification 6309. *This classification does not apply to auto repair shops that also sell and install tires on customer vehicles. See clas-*

sification 6405 for auto repair shops that also sell and install tires. Establishment engaged in providing towing service for hire are to be reported separately in classification 1109. For purposes of this classification "towing for hire" means a towing service not performed in connection with repairs to be done by the repair shop.

3411-02 Automobile: Service specialty shops

Applies to establishments engaged in providing specialized automobile repair services such as air conditioning systems, muffler repair, cruise controls and electrical systems. For purposes of this classification, the term "automobile" includes standard sized passenger cars, pick up trucks, and sport utility vehicles. Work contemplated by this classification includes, but is not limited to, inspection of vehicle components for wear, diagnostic analysis, and repair of various components such as brakes and cooling systems, after-market installation of components such as cruise control, air conditioning systems, and sun roofs; and specialized repair services such as mufflers and transmissions. This classification includes service managers, part sales, towing service for in-shop repairs, and customer courtesy van or car drivers.

Special note: Businesses assigned to this classification will generally have an inventory of supplies and parts which they use in the service and repair of customer vehicles although some sales of parts and components may occur. *This classification does not apply to any shop that sells and installs tires on customer vehicles. See classification 6405 for auto repair shops that also sell and install tires.* Establishment engaged in providing towing service for hire are to be reported separately in classification 1109. For purposes of this classification "towing for hire" means a towing service not performed in connection with repairs to be done by the repair shop.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-58503, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-58503, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-58503, filed 5/31/96, effective 7/1/96.]

WAC 296-17-58504 Classification 3412.

3412-00 Automobile and truck: Body and fender repair shops

Applies to establishments engaged in repairing and refinishing automobile and truck body panel components for others. Work contemplated by this classification includes, but is not limited to, all phases of auto body repair work and panel replacement, finish removal, sandblasting or plastic medium blasting, painting, washing, vacuuming, and waxing vehicles, glass repair, upholstery work, and automobile and truck detailing such as striping, vinyl repair, window tinting (applying film to windows), installation of body and wheel molding and sunroofs, incidental glass repair or mechanical repair associated with a collision repair or car restoration, and installation of electronic accessories when performed by employees of an employer subject to this classification. The repair of fiberglass or sheet metal boat bodies and spray-on pickup truck bedliners is also included in this classification. This classification includes shop managers, parts and paint mixing department employees, towing service for in-shop repairs, incidental sales of rebuilt cars and trucks, and cus-

tomor courtesy van or car drivers. Estimators may be reported separately in classification 6303 provided all the conditions of the general reporting rule covering standard exception employees have been met.

This classification excludes the *routine* servicing or repair of automobiles or trucks *not done* in conjunction with collision repair or car restoration which is to be reported separately in classification 3411; the servicing or repair of mechanical or electrical systems in boats which is to be reported separately in classification 3414; and the repair of wooden boats which is to be reported separately in classification 2903.

Special notes: Auto body shops will routinely have a physically separate area where they store and mix paints. The separate paint storage and mixing area is generally a requirement of local fire codes and insurance policies. This separate area does not constitute a separate operation subject to a different classification. Some shops may also carry an inventory of repair panels, trim pieces and molding. Regardless of the volume of parts and supplies it is included within the basic scope of classification 3412. Establishment engaged in providing towing service for hire are to be reported separately in classification 1109. For purposes of this classification "towing for hire" means a towing service not performed in connection with repairs to be done by the repair shop.

Care must be taken in assigning classification 3411-01 to an establishment engaged in body and fender repair. An establishment *could* have both classifications 3411 and 3412 if they also provide *routine* mechanical or electrical repair services *not* in conjunction with collision repair or car restoration.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-58504, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-58504, filed 5/31/96, effective 7/1/96.]

WAC 296-17-58506 Classification 3414.

3414-00 Boat dealers

Applies to establishments engaged in the sales, service, and/or repair of boats. Work contemplated by this classification includes, but is not limited to, mechanical and electrical system repairs, vinyl and glass repairs, engine rebuilding and reconditioning, detailing boats, reconditioning seat pads and other accessories, sales and installation of boat accessories, and sales of boat trailers, specialty apparel and fishing gear when performed by employees of an employer subject to this classification. This classification also includes parts department employees, sales employees who also assist in duties described in this classification, and lot personnel.

This classification excludes boat sales personnel who may be reported separately in classification 6301 provided all the conditions of the general reporting rule covering standard exception employees have been met; repairs done in connection with manufacturing operations which are to be reported separately as applicable; and establishments engaged in the repair of fiberglass or sheet metal boat bodies which are to be reported separately in classification 3412.

3414-01 Marinas and boat house operations: Boat storage facilities

Applies to establishments engaged in providing a variety of boat-related services and facilities, and to service or repair centers. Boat storage facilities may be located in waterways adjacent to the marina or on dry land and may be operated by a marina or by a separate business. Both types of storage facilities are included within the scope of this classification. Work contemplated by this classification includes, but is not limited to, fuel service, mechanical and electrical repair service, parts departments, boat storage, moorage, sales of fishing gear, wearing apparel, groceries and bait, boat rentals and sales, and boat launching facilities when performed by employees of an employer assigned to this classification. This classification also includes other incidental services and facilities such as, but not limited to, self-service laundry facilities, public showers, holding tank pump out stations, passenger car or truck parking, and dockside electricity.

This classification excludes repairs done in connection with manufacturing operations which are to be reported separately as applicable; establishments engaged in the repair of fiberglass or sheet metal boat bodies which are to be reported separately in classification 3412; seafood or fish processing facilities operated in connection with a marina operation which are to be reported separately in classification 3304; and boat sales personnel who may be reported separately in classification 6301 provided all the conditions of the general reporting rule covering standard exception employees have been met. Overnight lodging facilities and restaurant services provided to customers by a marina operator may be reported separately provided all the conditions of the general reporting rule covering a secondary business have been met.

Special note: Some marina operators will offer boating instructions and charter boat services. Care should be taken in this area as certain boating and charter fishing excursions are not covered by state workers' compensation coverage.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-58506, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-58506, filed 5/31/96, effective 7/1/96.]

WAC 296-17-58507 Classification 3415.**3415-00 Factory built housing dealers**

Applies to establishments engaged in the sales and service of factory built housing units such as mobile/manufactured homes or modular homes. Work contemplated by this classification includes pick up of units from housing factory, set up of units at sales lot or customer locations, installation of skirting, aligning cabinets and doors, and touch up painting when performed by employees of an employer subject to this classification. This classification also includes parts department employees, sales employees who assist in duties described in this classification, and lot employees engaged in the maintenance of grounds or in the maintenance of factory built home units on display at the lot.

This classification excludes delivery of factory built home units and set up by contractor which is to be reported separately in classification 0517; employees involved in work such as, but not limited to, concrete work, electrical, plumbing, landscaping, and fence construction who are to be

reported separately in the construction classification applicable to the work they are performing; and modular or mobile home sales personnel who may be reported separately in classification 6301 provided all the conditions of the general reporting rule covering standard exception employees have been met.

Special note: Construction of separate out-buildings such as garages, carports, well houses and storage sheds which may be constructed in connection with a modular or mobile set up are excluded from this classification and are to be reported separately in the applicable construction classifications. Establishments engaged exclusively in the delivery of modular or mobile homes, but who are not involved in any aspect of the set-up of the structure, are to be reported separately in classification 1102.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-58507, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-58507, filed 5/31/96, effective 7/1/96.]

WAC 296-17-586 Classification 3501.**3501-00 Brick or clay products, N.O.C: Manufacturing**

Applies to establishments engaged in the manufacture of brick or clay products not covered by another classification (N.O.C.), such as, but not limited to, drainage or roofing tiles, building or paving bricks, wall copings, glazed or unglazed sewer or drain pipes or conduits, or similar products which are generally for industrial or construction use. Clay, which is any earth that forms a paste when added to water and hardens when heated, is widely used in making bricks and other products as described above. Brick is a molded rectangular block of clay, baked by the sun or in a kiln until hard. Similar products made of earthenware, which is a variety of coarse, porous baked clay, are included in this classification. To make bricks, clay is broken up by dry-pan grinders. After grinding, the particles pass through any one of several types of screens used for separating and grading. The mixture is fed through a pug mill to be cut and mixed then mixed with water to the desired consistency. After tempering, the pug mill extrudes a column of clay through a die, which shapes and determines the dimensions of the brick. A rotating wire cutter slices the column into proper thicknesses. Bricks are either machine molded or hand molded. The "green" bricks must be dried by sun and air, or in natural gas or electric-fired regulated kilns prior to firing. Firing dehydrates, oxidizes, and vitrifies the bricks. To make other products, clay is mixed with sand or shale, ground in a mixing machine and water is added. The liquid substance is mechanically poured into standard or specially shaped molds. All products are dried by natural warm air or steam heat. After removal from the molds, products are baked in kilns. If glazing is desired, salt is added to the kiln; the salt vaporizes and coats the products. To produce a greater degree of concentration, pressing or repressing operations may be performed, usually with hydraulic presses, subsequent to the actual formation of the products.

This classification excludes the production of raw materials which is to be reported separately in the applicable mining, quarrying or excavation classification; installation or erection of any products manufactured by establishments in

this classification which is to be reported separately in the classification applicable to the type of construction or installation work being performed; the manufacture of household or decorative pottery items, including tile, which is to be reported separately in classification 3503; and the manufacture of statuary and ornamental items from concrete or plaster which is to be reported separately in classification 3509.

Special note: Clays are generally mined by the open-pit method. After clay has been extracted, it may be stockpiled inside for use during inclement weather. In most cases, the manufacturing of brick takes place alongside the extraction site. Clay is delivered to the manufacturing site only when clay of a different characteristic is needed to blend with the "home" clay.

3501-01 Refractory products: Manufacturing

Applies to establishments engaged in the manufacture of refractory products such as, but not limited to, fireproofing tile or bricks, roofing tile, flue lining, boiler or stoker tiles, enameled bricks, retorts, kiln parts, or crucibles from refractory clays with or without other refractory materials. Refractory clays are resistant to heat. Refractory materials, such as alumina, silica, and magnesite, dolomite, bauxite, do not significantly deform or change chemically in high temperatures. Usually all types of refractory products are produced in the same plant. Clay and other materials are ground, screened and mixed with water in a mixing machine. The partly fluid substance is poured into molds to form the product. After removal of the forms, items are kiln dried. The enamels are vitreous coatings produced from solutions of chemicals, salt, lead oxide or tin, into which the brick is dipped. Enameled brick requires two or three kiln burns.

This classification excludes the production of raw materials which is to be reported separately in the applicable mining, quarrying or excavation classification; installation or erection of any products manufactured by establishments in this classification which is to be reported separately in the classification applicable to the type of construction or installation work being performed; the manufacture of household or decorative pottery items, including tile, which is to be reported separately in classification 3503; and manufacture of statuary and ornamental items from plaster or concrete which is to be reported separately in classification 3509.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-586, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-586, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-586, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-586, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-586, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-586, filed 11/9/73, effective 1/1/74.]

WAC 296-17-587 Classification 3503.

3503-17 Pottery, earthenware, ceramics, porcelain or china: Manufacturing

Applies to establishments engaged in the manufacture of a wide variety of household or decorative items such as earthenware, pottery, ceramics, porcelain or china. Casting and throwing are the most common techniques. Other techniques include pressing, extrusion and sculpturing. Finished products include, but are not limited to, pots, bowls, dishes, plates, cups, cookie jars, vases, dolls, tobacco pipes, and novelty

(2001 Ed.)

items. Materials include clay, sand, fluxing agents, paints, and glazing compounds. Machinery includes, but is not limited to, hand tools, potter's wheels, kilns, and plaster molds. In the casting method, clay is mixed with water and other additives until it is about the consistency of thick cream (called slip). The molds are closed shut and secured; then the slip is poured into them through a small hole at the top, and left in the mold to dry for a short time then poured out, leaving a hollow product to fire. In the throwing method, the clay mixture is placed on a potter's wheel and molded by hand as the wheel slowly turns. The pressing technique forces relatively dry clay into molds under substantial hydraulic pressure, which makes it hold its shape until fired. Extrusion forces a ribbon of clay through specially shaped dies, then it is cut with wire to create the final form. Sculpturing is hand carving wet clay to the desired dimensions. The resulting greenware from any method may be sanded, then further dried and fired in a small kiln. Most of the items will be glazed and refired several more times, depending on the desired end result. Prior to glazing, products may be decorated by hand painting designs on them. Most of the establishments in this classification are small shops that make the products they sell, either at their shop or occasionally at craft fairs. The teaching of classes and the incidental sale of ceramic and pottery making supplies or tools to home crafters is included within the scope of classification 3503-17. This classification includes establishments that only make molds by casting shapes in plaster, most of which they sell to ceramic shops for use in casting greenware.

This classification excludes the mining, digging or quarrying of raw materials which is to be reported separately in the applicable classification; manufacture of decorative tile which is to be reported separately in classification 3503-19; manufacture of brick or concrete products such as, but not limited to, brick or clay pipe and concrete tile which is to be reported separately in the classification applicable to the work being performed; and establishments whose primary business is the sale of supplies used for crafts or hobbies which are to be reported separately in classification 6309.

Special note: Care must be taken when considering classifications 6309 or 3503. Classification 6309 is to be assigned to establishments whose primary business is the sale of supplies such as, but not limited to, ceramic and pottery making materials or tools. Classification 6309 does not cover the manufacture, fabrication or assembly of craft or hobby items for sale, but includes the teaching of classes and the assembly of an individual piece or two for display.

3503-19 Decorative tile: Manufacturing

Applies to establishments engaged in the manufacture of decorative tile from cement or various clay mixtures. Raw materials include clay, sawdust, straw, coal dust, sand, and glazing compounds. Machinery includes, but is not limited to, hand tools, hydraulic presses, automatic grinding and polishing machines, hand grinding and polishing stones and laps, batch mixers, molds, hand trucks, kiln ovens and steam curing rooms. Cement tiles are usually pressed on hydraulic presses, kept wet until cured, then ground to size with a diamond wheel and polished. To make cast clay tiles, clay is mixed with water and other ingredients, ground to desired

fineness, screened, then poured into molds to dry. After drying, tiles are removed from molds and fired in a kiln oven, then glazed. Tile glaziers apply designs to bisque tile by hand or with a silk screen process, then glaze and fire it in a kiln one or more times. This classification includes the manufacture of decorative artificial rock or brick used as trimming around fireplaces, stoves, or on walls. To make artificial rock or brick, coloring is added to a mixture of cement and aggregate; the mixture is poured into molds. After the mixture has set, the piece is removed from the mold and cured.

This classification excludes the mining, digging or quarrying of the raw materials which is to be reported separately in the applicable classification; the manufacture of pottery, earthenware, ceramics, porcelain or china which is to be reported separately in classification 3503-17; and the manufacture of brick or concrete products such as brick or clay pipe and concrete blocks or stepping stones, drain tile, beams which is to be reported separately in the classification applicable to the work being performed.

3503-20 Stained or leaded glassware, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of stained or leaded glassware not covered by another classification (N.O.C.) including, but not limited to, windows, Tiffany style or plain glass lamp shades, terrariums, or decorative items such as aquariums, shadow boxes, mirror picture frames or figurines. Much artistic hand labor is involved in making stained glass items. Pattern paper, masking tape, kerosene, wire solder, putty, and H-lead comes (slender, grooved bars) are received from others. Individual pieces of a design are cut to pattern out of stained glass; pieces may be ground for a precision fit on an emery or diamond wheel. Individual segments are pressed into the channels of the lead came; joints are fluxed, soldered and putty is pushed into any open spaces between the glass and the comes. The finished piece is smoothed and cleaned with kerosene. While lead comes are more widely used, copper foil may be used instead of lead. Manufacturers may also paint on glass and fire it in a kiln; this is most often done for stained glass window insets. Employers subject to this classification may repair items such as stained glass windows. If the repair requires bent or shaped glass, they make a mold and heat the replacement glass in a kiln oven until it "slumps" or bends to the shape of the mold. Most manufacturers in this state purchase their stained glass from others; however, the manufacture of stained glass is contemplated within the scope of this classification. Raw materials such as, but not limited to, sand, soda ash, and metal oxides are melted in a furnace and the molten glass is either rolled into sheets by machine or blown into long balloon shapes that are slit open and flattened by reheating. Color may be added to the surface while it is still molten. Some incidental manufacturing of insulated glass, such as sandwiching leaded glass between two sheets of clear glass, is included within the scope of this classification, but production line manufacturing of insulated glass is to be reported separately in classification 1108. Most of the establishments in this classification are small shops that make the products they sell, either at their shop or occasionally at craft fairs. The teaching of classes and the incidental sale of supplies or

tools used to make glassware items to home crafters is included within the scope of this classification.

This classification excludes the mining, digging or quarrying of raw materials which is to be reported separately in the applicable classification; establishments that manufacture optical goods or telescopes, or perform precision grinding of blank or rough lenses, which are to be reported separately in classification 6604; establishments engaged in etching, frosting, sandblasting, carving, grinding, and beveling glass which are to be reported separately in classification 1108; establishments engaged in melting or blowing glass which are to be reported separately in classification 3503-21; and establishments whose primary business is the sale of supplies used for crafts or hobbies which are to be reported separately in classification 6309.

Special note: Care must be taken when considering classifications 6309 or 3503. Classification 6309 is to be assigned to establishments whose primary business is the sale of supplies such as, but not limited to, materials or tools used to make glassware items. Classification 6309 does not cover the manufacture, fabrication or assembly of craft or hobby items for sale, but includes teaching of classes and the assembly of an individual piece or two for display.

3503-21 Glassware, N.O.C.: Manufacturing; Melting, blowing, and forming hot glass

Applies to establishments engaged in manufacturing housewares, decorative and specialty items not covered by another classification (N.O.C.) from hot glass using methods that include melting, blowing, or forming. Items include, but are not limited to, tableware, bakeware, perfume bottles, candlestick holders, kerosene lamp chimneys, auto headlight lenses, radio insulators, doorknobs, paperweights, and ashtrays. Machinery includes, but is not limited to, hand tools, glass melting furnaces, annealing ovens, mixing machines, ball mills, glass cutting diamond saws, glass grinding wheels and discs, glass polishing laps, drill presses, steel cutting saws, arc and gas welders, forklifts, overhead cranes or hoists. Some shops make their glass from raw materials including oxides, volcanic ash, soda ash, silica sand, lime, phosphate, or borax which are received from outside sources. Others will heat glass chips (frit) in a furnace, and work the molten glass into decorative or functional shapes by molding or blowing. The molten glass is poured into molds to make products such as, but not limited to, heavy glass for special purpose windows up to about eight inches thick. Molten glass may also be poured into cold water to make "frit" which is either sold or used for further processing. The molten glass can also be formed in a mouth-blowing process or by semiautomatic blowing machines. A glass blowing process will usually have a helper working with each glass blower. The helper's duties include preliminary glass gathering and blowing, adding colored glass "ribbons" to the item being blown as the glassblower turns it, shaping items being blown with wooden or metal tools, and placing the blown object in an annealing oven to be reheated and cooled slowly to relieve internal stress in the glass. When glass reaches room temperature, it is often cut on diamond wheels or ground down and polished on a series of wheels, stones, and laps. This work is

normally done under a continuous water bath which may include grinding or polishing compounds.

This classification excludes the mining, digging or quarrying of raw materials which is to be reported separately in the applicable classification; establishments engaged in manufacturing stained or leaded glassware which are to be reported separately in classification 3503-20; establishments that manufacture optical goods or telescopes, or perform precision grinding of blank or rough lenses, which are to be reported separately in classification 6604; and establishments engaged in etching, frosting, sandblasting, carving, grinding, and beveling glass which are to be reported separately in classification 1108.

3503-23 Agate or enamel ware: Manufacturing

Applies to establishments engaged in enameling or porcelainizing products they have made or products made by others. Enamel is defined as a vitreous, usually opaque, protective or decorative coating baked on metal. Enameled products vary widely, including but not limited to, signs, cookware, items made from ceramics or clay, stove parts, or small parts for automobiles, to sewer pipe, automobile manifolds, or irrigation water gauges. Machinery includes, but is not limited to, ball mills, silk screen equipment, blenders or mixers, scales, kilns, degreasing and acid etching tanks, spray guns, heaters, conveyors, and fork lifts. The enameling process is essentially the same regardless of the product. Ceramic balls and frit (small glass chips) are placed in the ball mill. (A ball mill is a metal drum lined with rubber.) As the drum rotates, the balls roll over the frit, gradually grinding it into powder. Some enameling shops purchase the powder ready-made. To obtain desired colors, various mixes of glaze powders are prepared and placed on 1" to 2" square metal chips and baked in a small kiln. When the formulas are ready for all colors required, the job goes to the production line. The object to be glazed is cleaned, degreased, and given an acid bath if necessary, then rinsed and dried. The enamel (or porcelain) glaze may be applied by hand, silk screened on, or sprayed on with a spray gun. After the coating has air-dried, the piece heated in a kiln to melt the ceramic powder and fuse it to the surface; then cooled. Items may require repeated coatings and firings.

This classification excludes the manufacture of enameled brick which is to be reported separately in classification 3501.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-587, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 89-24-051 (Order 89-22), § 296-17-587, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-587, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-587, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-587, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-587, filed 11/9/73, effective 1/1/74.]

WAC 296-17-590 Classification 3506.

3506-02 Mobile crane and hoisting services; Rigging contractors, N.O.C.

Applies to establishments engaged in mobile crane and hoisting services and rigging contractors not covered by another classification (N.O.C.). There are many types of cranes and derricks, both stationary and nonstationary. A

(2001 Ed.)

mobile crane is a tire-mounted machine for hoisting and moving heavy objects by cables attached to a moveable boom. Rigging consists of a system of ropes, chains, cables, or tackle used for support. Generally, these types of establishments respond to and service customer requests such as righting an overturned tractor trailer, hoisting a large bell, or placement of a satellite dish on top of a building. In addition, mobile crane businesses often maintain a variety of nonmobile cranes and derricks such as those used for construction of tall buildings or structures. This classification includes transporting of a nonmobile crane or derrick to and from a customer site, but excludes the set up or erection, operating, and disassembling of the unit.

This classification excludes the construction or erection of permanent nonmobile cranes (such as those permanently mounted at a manufacturing plant or seaport to load cargo) which are to be reported separately in classification 0508; and the set up, erection, operating, and disassembling of cranes, hoisting devices or rigging in connection with work covered under a construction classification which are to be reported separately in the construction classification applicable for the work being performed.

Special note: This classification includes mobile crane and hoisting businesses when providing a service at a construction site such as lifting an air conditioning unit to a building top, and provided the crane operator is an employee of the crane and hoisting business.

3506-03 Concrete pump truck service

Applies to establishments engaged in concrete pump truck services, including the pump truck control box operator. A concrete pump truck is a large vehicle equipped with an adjustable boom spanning approximately 65' in length equipped with a flexible 4" hose running alongside the boom. This type of vehicle is different from a concrete ready mix truck which mixes the concrete in a rotating or revolving drum prior to arriving at the project site and discharges the mix with use of a metal shoot. A concrete pump truck is designed to pump concrete into areas which are difficult for a concrete ready mix truck to reach such as a tall retaining wall, the foundation of a building or structure many feet below ground level, or into an area with limited access. Concrete is fed into the bed of the pump truck (usually by a ready mix concrete truck). The driver of the pump truck also operates the control box which adjusts the boom and amount of concrete mix to discharge. The control box operator receives instructions from a construction worker overseeing the concrete pour.

This classification excludes ready mix concrete dealers who deliver concrete who are to be reported separately in classification 3101 and all other concrete construction activities occurring at the project site which are to be reported separately in the classification applicable to the construction work being performed.

Special note: This classification is limited to the concrete pump truck driver and operation of the control box. Construction workers at the project site, such as workers who are positioning and repositioning the end of the boom which discharges concrete, or workers who provide instructions with use of a headset to the control box operator, or workers

[Title 296 WAC—p. 315]

who are spreading the concrete as it is poured, are to be reported separately in the classification applicable to the construction work being performed.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-590, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-590, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 90-13-018, § 296-17-590, filed 6/8/90, effective 7/9/90. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-590, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-590, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-590, filed 11/9/73, effective 1/1/74.]

WAC 296-17-59201 Classification 3509.

3509-01 Statuary and ornament: Manufacturing

Applies to establishments engaged in the manufacture of decorative statuary, and other ornamental items including, but not limited to, planters and fountains, lawn and garden furniture, patio blocks and stepping stones, grills, and cornices. Materials such as, but not limited to, plaster, concrete, hair, wood fiber, powdered lime, sand, gravel, cinders, aggregates, mesh wire and reinforcing rods, and certain plastics are received from outside sources. Depending on the item being made, various ingredients are mixed together and cast in metal or rubber molds or in forming machines. After being removed from the molds or forms, they are dried and stored until cured. After curing, items may be sanded and smoothed with grinders, or carved by hand; some may be painted or coated with a clear finish, or designs hand painted on. Such finishing work is included within the scope of the classification when performed by employees of employers subject to this classification.

This classification excludes the mining, digging, quarrying, or manufacturing of raw materials which are to be reported separately in the applicable classification; the manufacture of decorative tile which is to be reported separately in classification 3503; and the manufacture of concrete blocks, bricks, poles, piles, tile, beams, sewer and irrigation pipe, and septic tanks which is to be reported separately in classification 3105.

Special note: This classification differs from classification 3105 "concrete blocks, sewer pipes" in that products manufactured in classification 3509 are for decorative purposes, are usually lighter weight, and have smoother or more perfect finishes than the concrete products manufactured in classification 3105 which are rough, do not require perfect finishes, and are generally for construction use.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-59201, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-59201, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-59201, filed 12/1/89, effective 1/1/90.]

WAC 296-17-59202 Classification 3510.

3510-02 Plastics: Artificial marble manufacturing

Applies to establishments engaged in the manufacture of plastic articles by molding a calcium carbonate material mixed with feed stock, a catalyst and dyes which are purchased from outside sources. When this material solidifies it resembles marble, and is used to make counter tops, sinks, novelty items such as, but not limited to, soap dishes, clock cases, and statues. Raw materials are mixed in large mixers until it has the consistency of bread dough. A release agent is

sprayed onto empty molds so the finished items can be easily removed after they are set; then the mixture is poured directly into molds, placed into molds by hand, or forced into molds under pressure. The materials are cured at room temperature or with moderate heat (up to 140 degrees F). When the material has hardened, items are removed from the molds and trimmed, sanded or otherwise finished. Sanding may be done with power rotary sanders which create clouds of dust and require the use of respirators.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which are to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and the manufacture of fiberglass goods which are to be reported separately in classification 3511.

3510-03 Plastics: Extrusion, blow molding

Applies to establishments engaged in the manufacture of plastic articles by blow molding or extruding. Processes vary, but all usually require the heating and melting of feed stock and mixing of other additives purchased from outside sources. Extrusion involves forcing material through dies; blow molding blows a bubble of plastic into the air and processes it through machinery, or forms an object in a mold by blowing air and material into it. Plastic items such as containers for milk, motor oil, bleach, or other liquids are typically made with a blow molding process, which is a fast, high volume operation. A bubble of molten plastic is blown into a mold and expanded to the shape of the mold with compressed air. The mold is kept cool with a liquid coolant that circulates through its cavities; when hot plastic is pressed against the mold, it cools and hardens in seconds. Sheets of plastic film are usually made by extruding a tube of hot plastic, expanding it with air pressure, then passing it through a series of rollers and cutters which roll it flat and cut it into two separate sheets. Plastic film is used for making plastic bags and other products. This classification includes the manufacture of plastic bags when the extrusion of plastic sheets is performed by employees of the plastic bag manufacturer. Other extrusion processes are used in the manufacture of window frame molding, gutters, pipe, and similar items.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which are to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and the manufacture fiberglass goods which are to be reported separately in classification 3511.

3510-04 Plastics: Vacuum forming

Applies to establishments engaged in the manufacture of plastic goods through a vacuum forming process. Articles manufactured by this method include, but are not limited to, signs, display stands, windshields for boats and motorcycles, boat paddles, skylight windows, trays for packaging food or other items. Sheet goods are heated in an oven or in the molding area, and a vacuum is pulled on the mold, sucking the plastic in to conform to the shape of the mold. Items pro-

duced by this method harden and cool in a few minutes. In other techniques, liquid plastic is poured into a mold, a seal of mylar plastic is placed over it, then a vacuum is pulled on the mold forming the liquid to the mold. This method produces a smooth, glossy surface similar to those produced by injection molding, but without the high-cost machinery. For either method, once the plastic material hardens, the "flashing" (excess plastic) is trimmed from the formed article. This is called "deflashing" and may be done with a hand-held knife, a router, or a lathe. There is some assembly in certain manufacturing operations such as attaching components with screws, rivets, bolts, or glue, which is incidental to the manufacturing process and is included in the classification.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which are to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and establishments engaged in the manufacture of fiberglass goods which are to be reported separately in classification 3511.

Special Note: The painting or lettering of signs is included in the plastic goods manufacturing classification when done by employees of an employer making signs. Establishments that purchase premanufactured plastic "mediums" from others, then paint lettering or designs or attach vinyl lettering to them in their own shops are to be reported separately in classification 4109.

3510-05 Plastics: Foam molding, rotary molding, liquid molding

Applies to establishments engaged in the manufacture of plastic goods through foam molding, rotary molding or liquid molding processes. Raw materials, which may be received in barrels, drums, or rail cars, include, but are not limited to, small plastic beads, powder, pellets or liquids, and foaming agents. Establishments in this classification will frequently employ laboratory employees such as chemists or chemical engineers to formulate their own plastic compounds to meet specifications as to rigidity, flexibility, or fire retardation. Liquid polymer is mixed with one or more ingredients, in some cases including a foaming agent, then heated to control the foaming action. It may be forced through pipes or hoses from a dispensing machine into the mold, or workers may carry it in buckets from the mixing pot and pour it into the molds. The top of the mold is put in place and secured. Heat and air pressure is applied inside the mold, which causes the foam to rise and form the shape of the object being made. Workers may wear respirator masks during this phase. The mold may be lined with vinyl or other fabric, or wire frames may be placed inside the molds when making items such as armrests, cushions, dashboards for vehicles, boats, or aircraft. Goods usually set overnight, then the flashing (excess plastic) is trimmed off. Liquid plastic, such as urethane, without a foaming agent, is also used to make products that are extremely tough. Products made from this type of liquid mixture include, but are not limited to, parts for aircraft or industrial machinery. Liquid mixtures are poured into molds and cured in ovens. Styrofoam products such as, but not limited to cups or plates, packaging materials are made from

small styrofoam beads that are expanded by heating, then forced or blown into a mold and heat-expanded to form the product. Logos or brand names may be printed onto the products with a special offset press. Rotary molding is used for large hollow items like garbage cans or buckets. Plastic powder, mixed with color, is poured into molds; molds are closed and moved on a rotating arm through a large oven in a tumbling action while the mold heats. The plastic powder sticks to the inside of the mold and melts. The mold is removed from the oven while still tumbling, and air and/or water cooled. Finished products are then removed from the molds.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which is to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and the manufacture of fiberglass goods which are to be reported separately in classification 3511.

3510-06 Plastics: Injection molding

Applies to establishments engaged in the manufacture of plastic goods through an injection molding process. Articles made by injection molding range widely; they include, but are not limited to, key chain holders, writing pens, combs, medicine bottles, novelty items, sporting goods, and cargo baskets for industrial use. The size of injection molding machines ranges widely, depending on the products being made. Raw materials, which are usually in the form of tiny plastic beads, are received from outside sources in barrels, drums or rail cars. The pellets are placed in a dryer to remove any moisture, then fed through a hopper on the injection molding machine into an air-free chamber where they are melted at high temperatures, then forced with an auger-type screw, ram piston or similar device, into the mold. The mold is cooled by a coolant to allow the plastic to solidify rapidly. When solidified, the item is ejected from the mold by air pressure, hydraulics, or a mechanical ram. Items may be trimmed, polished, assembled, plated, or otherwise finished. Establishments in this classification may make molds for their own use, or the customer brings molds for specific items they order. The manufacture or repair of their own or their customer's molds is included within the scope of this classification when done by employees of an employer subject to this classification.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which are to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and the manufacture of fiberglass goods which are to be reported separately in classification 3511.

3510-07 Plastics: Manufacture, N.O.C.

Applies to establishments engaged in the manufacture of plastic goods not covered by another classification (N.O.C.) using several of the operations described in the other plastics manufacturing classifications, but not having one predominate process. This classification *could* include the application of fiberglass resins with a brushing or spreading tech-

nique (sometimes referred to as "lay-up"). In the lay-up method, fabric is fitted over molds, then layers of fiberglass resins, hardeners, and fillers are applied over the fabric with a brush or trowel. In some applications, a thin foam material is fitted into a mold, then covered with fiberglass resins and hardeners; when the product is removed from the mold, the other side is coated, producing an exceptionally strong, lightweight product. Once removed from the molds, items are heated in ovens to harden and set. This classification also includes establishments that make pellets (feed stock) from recyclable plastic goods. Scraps or recyclable goods are ground or pulverized, then formed into pellets which can be used again in manufacturing processes, or further processed into oil by other manufacturers.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which are to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and establishments engaged in the manufacture of fiberglass goods which are to be reported separately in classification 3511.

Special notes: When the manufacture of plastic goods includes *any* fiberglass work using the spraying technique with a chopper gun, the entire operation is to be reported separately in classification 3511. Incidental hand brushing or troweling of fiberglass resins or epoxy over a fabric or foam material, is sometimes an integral part of manufacturing processes covered under other manufacturing classifications. A review of the manufacturing process must be made to determine the proper classification applicable to that manufacturing process.

3510-08 Graphite composite goods: Manufacturing

Applies to establishments engaged in the manufacture of fiber reinforced plastic goods. Products manufactured by establishments subject to this classification include, but are not limited to, golf club shafts, fishing poles and rod blanks, garden carts, hose reels, wind board sail masts, bicycle frames, tennis racquets, snow skis and auto parts. While the classification specifies graphite composite goods, other fiber reinforced plastics are used to make similar products and are covered by this classification. Graphite composites are also known as carbon reinforced composites. Irrespective of the product made, the processes used to produce the end products are similar. For example, the making of tube-like products such as, but not limited to, golf shafts, wind board sail masts, and fishing poles, consists of cutting a fabric-like material which is purchased from others to the specified dimension needed to make the product; rolling the material onto a mandrel (rod) or wrapping the material around a mold; securing the fabric material with a plastic (cellophane) tape; curing the product in an oven; removing the cellophane wrap; removing the mandrel or mold; sanding the product to remove the lines left by the cello wrap; and applying the finish.

This classification excludes the manufacture of nonfiber reinforced plastic goods or products which are to be reported separately in classification 3510 as applicable; fiberglass reinforced goods or products which are to be reported separately in classification 3511; and plastic goods manufacturing

from premanufactured components including the cutting, bending and milling of plastic which are to be reported separately in classification 3512.

Special note: Care should be taken when encountering the term "graphite composite." Graphite is a material common to many products such as, but not limited to, lead pencils, paints, lubricants and protective coatings, none of which are covered by classification 3510.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-59202, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-59202, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 91-12-014, § 296-17-59202, filed 5/31/91, effective 7/1/91; 90-13-018, § 296-17-59202, filed 6/8/90, effective 7/9/90.]

WAC 296-17-59203 Classification 3511.

3511-02 Fiberglass goods: Manufacturing, N.O.C.

Applies to establishments engaged in the manufacture of a wide variety of fiberglass goods not covered by another classification (N.O.C.) including, but not limited to, hot tubs, swimming or wading pools, boat hulls, chair frames, doors, fish tanks, satellite dishes, tanks, display carts, signs, industrial equipment, pick up canopies, and auto body parts such as fenders, hoods, or visors. "Fiberglass" is a composite material consisting of glass fibers in resin; it is applied over or into molds by spraying, brushing, or spreading. Materials include, but are not limited to, resin (usually received in barrels), liquid hardeners, fiberglass ribbon, and molds. Before a mold is used it is sprayed with a release agent so the item is more easily removed. In the spraying technique, resin is sprayed with compressed air gun through a "chopper gun" into the mold, while a "ribbon" of fiberglass is simultaneously fed through a razor cutter which chops it into short lengths and blows it into the mold. Because the hardeners cause the material to "set" in a short period of time, the spraying is done rapidly. Once the desired thickness is attained, the material is left in the mold until completely set and cured, then removed. Spraying and chopping the fiberglass in this method causes a substantial amount of debris in the air, so workers usually wear respirator masks. There are many finishing techniques, such as smoothing the sprayed fiberglass with a hand-held rubber roller, applying various materials such as "gel" or "vinyl" to produce a glossy surface, joining parts to make very large items, attaching hardware, all of which are included within the scope of this classification when done by employees of an employer having operations subject to this classification.

This classification excludes establishments engaged in the manufacture of plastic items by blow molding or extrusion, vacuum forming, foam, rotary, or liquid molding, or injection molding, and establishments engaged in the manufacture of artificial marble items or graphite composite goods, which are to be reported separately in classification 3510; establishments engaged in the cutting, milling, bending, heating and shaping of hard plastic goods which are to be reported separately in classification 3512; and establishments engaged in the manufacture of auto body parts from materials other than fiberglass which are to be reported separately in the classification applicable to the materials and the processes being used.

Special note: Mold making for their own production is included within the scope of this classification when done by employees of an employer subject to this classification. Molds are usually made of wood; they are smoothed and shaped with a filler, like auto body putty, then coated with fiberglass.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-59203, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 91-12-014, § 296-17-59203, filed 5/31/91, effective 7/1/91.]

WAC 296-17-59204 Classification 3512.

3512-02 Plastic goods: Manufacturing - cutting, milling or bending

Applies to establishments engaged in the manufacture of a variety of plastic goods from premanufactured components such as sheets, rods, or tubes by cutting, milling, or bending. Products include, but are not limited to, display stands, racks, dispensers for snack food items, vinyl window sashes, fiberglass panels used for aircraft or recreational vehicle interiors, and signs. Essentially anything that can be done with wood can be done with plastic, so shops in this classification usually resemble a cabinet or woodworking shop. They use the same type of tools such as, but not limited to, saws, routers, planers, and grinders, to cut or mill the plastic goods. To bend plastic material, it is first heated in an oven or with a torch, then bent to shape. Buffers are used for polishing, or the pieces may be flame polished (heated with a gas torch). Products may be formed by joining pieces with glue, hardware or other fasteners.

This classification excludes establishments engaged in the manufacture of plastic items by blow molding, extrusion, vacuum forming, foam, rotary, or liquid molding, or injection molding, and establishments engaged in the manufacture of artificial marble items or graphite composite goods, which are to be reported separately in classification 3510; establishments engaged in the manufacture of fiberglass goods which are to be reported separately in classification 3511; and sign manufacturers that purchase precut plastic backings from others, then paint lettering or designs or attach vinyl lettering to them in their own shops which are to be reported separately in classification 4109.

Special note: The cutting, milling, or bending of plastic goods incidental to the manufacturing process for products made from wood, metal or other materials is included in the classification applicable to those manufacturing processes.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-59204, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 91-12-014, § 296-17-59204, filed 5/31/91, effective 7/1/91.]

WAC 296-17-59205 Classification 3513.

3513-00 Rubber goods, N.O.C.: Manufacturing

Applies to establishments engaged in manufacturing rubber goods not covered by another classification (N.O.C.) from natural or synthetic rubber which may be hard, soft, or liquid. Products manufactured in this classification include a wide variety of items such as, but not limited to, gaskets, seals, floor tiles, O-rings, hoses, belts, rubber bands, foam rubber cushions or pads, sponge rubber novelties, shoe parts, floor mats, interior pieces for computer circuit boards, and

latex rubber goods such as gloves. Establishments in this classification also mix and compound rubber for sale to tire dealers that recap or retread tires. This classification includes establishments that manufacture rubber tires, or that shred used tires or other rubber products. Used rubber is run through granulators or rotary shearers that shred it to small pieces. Shredded material can be used as filler for asphalt for running tracks, or mixed with coal for fuel in industrial plants or further processed into oil. This classification also includes establishments that use heavy machinery to cut used tires into large pieces which are then formed into bumpers for boats, loading docks or similar items. Manufacturing processes include washing, mixing, rolling, extruding, calendaring, molding, and curing, all of which cause chemical reactions to the rubber until it reaches the desired "property or state". Vulcanization, which improves the strength, resiliency and odor of rubber by combining it with sulfur or other additives in the presence of heat and pressure, occurs in various stages of manufacturing processes. Machinery includes but is not limited to: *Shearer:* Cuts bulk rubber into strips or chunks. *Extruder:* Mixes and heats pieces of rubber to high temperature, then forces the mixture out through dies, forming it into "ropes." (O-rings are made with extruded ropes.) *Rubber mill:* Has two heavy rollers (each about 1 foot diameter) that spin towards each other; the friction of the spinning rollers causes heat. Strips of raw rubber and dry chemicals are fed into the rollers where they are mashed and pressed, forming it into different grades or densities. The rubber emerges from the mill in flat, pliable strips, ready for further treatments. *Calendar:* Passes rubber through more rollers which work it to a smooth, even, glossy finish. *Hydraulic steam press:* There are several types of molding which involve placing strips of the rubber after it has been milled and rolled into cast iron molds. The molds are inserted into a press where heat and pressure are applied until the rubber is molded to desired shape, then removed and cooled. *Injection mold press:* Rubber is shot into the cavity of the molds, and the press heats it to an almost liquid form, then it becomes stable. A vacuum pump sucks air from the molds to form the product. *Deflasher machine:* Resembles a clothes dryer with a basket inside; used to remove flashing (the excess rubber that has squeezed out of the mold during forming). Molded items are placed in the basket; nylon pellets are added to the machine. As the machine spins, the pellets beat the flashing from the molded pieces. Flashing is sometimes trimmed by hand with exacto knives or smoothed on grinders. *Curing oven:* The final step for most processes which dries and sets the rubber. Establishments subject to this classification may also make some products by cutting and gluing premanufactured materials. If any rubber molding is performed, the entire operation is to be covered under this classification.

This classification excludes establishments engaged in the manufacture of rubber goods by cutting and gluing premanufactured rubber or composite sheets (*no molding*) which are to be reported separately in classification 3802; tire dump operations which are to be reported separately in classification 4305; and the manufacture of synthetic rubber and the "advanced recycling" of shredded tires or rubber which is to be reported separately in classification 3407.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-59205, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-59205, filed 5/31/96, effective 7/1/96.]

WAC 296-17-594 Classification 3602.

3602-01 Telegraph or radio component, telephone set: Manufacture, assembly, or repair

Applies to establishments engaged in the manufacture, assembly, or repair of components related to the telegraph, radio or telephone industry. Component parts may be for items such as, but not limited to, radio or television sets, hearing aids, transformers, coils, condensers, switches, antennae, phones, speaker units, dials, rheostats, plugs, arrestors, resistors, and electrical control relays, or other parts necessary to accomplish radio, telegraph or telephone communication. Materials include, but are not limited to, metal, plastic, and wood used for the outside casings, and component parts. Some establishments in this classification manufacture the casings and the internal components. Other establishments in this classification assemble the ready-made parts with air and hand tools such as, but not limited to, drill presses, solder guns, or saws. Internal parts are usually assembled simply by clamping circuit boards in place, then soldering small pieces together. This classification includes engineers, research and laboratory personnel employed by establishments having operations subject to this classification. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification; and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-02 Instrument - scientific, medical, or professional: Manufacturing; magnetic tape: Manufacturing

Applies to establishments engaged in the manufacture of instruments used in medical, scientific, or professional applications. This classification also applies to establishments engaged in the manufacture of magnetic tapes. Instruments in this classification range widely in shape and size; they include, but are not limited to, dental or surgical instruments, microscopes or other scientific testing or research instruments, surveyors' instruments, and electrical testing instruments. Materials include, but are not limited to, metal, glass, plastic, or wood for casings, and component parts. Processes vary depending upon the product being produced, and could involve some stamping, machining, and heat-treating. However, component parts are usually manufactured by others, and establishments in this classification perform a substantial amount of hand assembling, inspecting, testing, and packaging operations. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported

separately in the classification applicable to the production process used.

3602-03 Sound recording equipment: Manufacturing

Applies to establishments engaged in the manufacture of sound recording equipment. Establishments in this classification may manufacture all or some equipment such as instruments for measuring sounds, and generators (for producing sounds), filters or modulators (for processing sounds), magnetic or tape recorders (for storing sounds), and speakers (for reproducing sounds). Materials include, but are not limited to, metal, glass, plastic, or wood for casings, clamps, glue or epoxy, and component parts. Components may be produced by the manufacturer or purchased from others and assembled. The assembly may be partially or wholly automated. Machinery includes, but is not limited to, shears, drill presses, grinders, soldering guns, welding equipment, and air or hand tools. There may be inspection areas and sound testing rooms. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-04 Thermometer and steam gauge: Manufacturing

Applies to establishments engaged in the manufacture of thermometers and/or steam gauges. The most common type of thermometer is a mercury thermometer which consists of a capillary tube that is sealed at its upper end and is enlarged into a spherical or cylindrical bulb at its lower end. This bulb is filled with mercury and mounted on a thin metal or plastic sheet. The manufacturers of steam gauges may simply assemble component parts with hand tools, test, and package them. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-05 Dental laboratories

Applies to establishments engaged in the manufacture of dentures, artificial teeth, braces, and retainers. These types of establishments are generally referred to as dental laboratories. The manufacture of these items involves precision work with castings, plastic or vinyl molding, and light wire forming. In the state of Washington dental laboratories can fit patients for dentures, in addition to making the denture which is included when performed by employees of employers subject to this classification. This is a shop only classification. Repair work when specified is limited to work performed at the shop.

This classification excludes all outside repair work which is to be reported separately in the applicable services

classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-06 Jewelry: Manufacturing or engraving; trophy assembly or engraving

Applies to establishments engaged in the manufacture or engraving of jewelry, such as, but not limited to, rings, bracelets, necklaces, earrings, watchbands, pins, broaches, and cigarette lighters. Jewelry manufacturing or engraving involves working with precious metal and/or stones. Operations usually include polishing, buffing, drilling, and assembly, mixing and melting alloys and metals, then pouring the mixture into small casts. This classification also applies to establishments engaged in assembling or engraving trophies on a production basis. For purposes of this classification, assembly means making trophies from premanufactured components purchased from others. The engraving may be done by "etching" or by computer. In the etching method, patterns or lettering is cut into a metal strip that is coated with a solution resistant to etching acids. The metal strip is treated with etching acids that "melt away" the uncoated portion of metal, leaving an impression of the design. Computerized engraving is done by keying the designs or letters into the computer; the designs are transmitted to an "arm" on the computer which "draws" (engraves) them onto the metal plate. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification; the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used; and establishments engaged in the manufacture of watches which are to be reported separately in classification 3602-09.

Special note: This classification is for manufacturers engaged in the mass production of jewelry items and is distinguishable from jewelry stores reported in classification 6308 who produce custom, one-of-a-kind pieces on a special order basis. Trophy stores in classification 6308 may assemble components to make custom trophies, or engrave plaques for the trophies they sell. Assembly and engraving that is incidental to their retail sales operation is included in their store classification.

3602-07 Electronic parts: Assembly

Applies to establishments engaged in the assembly of electronic parts which are usually sold to other manufacturers. They may have automated/robotics assembly lines for all or part of the processes. In manual operations, small parts are soldered, chipped, riveted, or screwed into place with hand tools such as, but not limited to, soldering guns, riveters, drills, screw drivers, or water jets. This classification also applies to establishments engaged in the manufacture or assembly of computers and the manufacture of dry cell (flashlight type) batteries. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

(2001 Ed.)

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-08 Electrical/electronic ignition assembly, cord set, or radio set: Assembly

Applies to establishments engaged in the assembly of electrical/electronic ignition assemblies, cord sets, and radio set components. An ignition assembly is a switching component that allows an electrical circuit to be completed in order to start a piece of machinery or equipment. Electrical cord sets are the portion of wiring found on appliances and tools that plug into electrical power sources. A radio set is comprised of an input circuit for tuning in to the frequencies of the various transmitters to be received, the demodulation circuit for separating the audio-frequency from the high-frequency carrier, a low-frequency amplifier stage, and the loudspeaker. The amplifier elements are transistors supplied with the necessary operating voltages. Establishments in this classification usually assemble radio component parts and circuit boards that are manufactured by others. The assembly is accomplished by soldering, clipping, riveting, and welding the parts into place. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-09 Watch: Manufacturing

Applies to establishments engaged in the manufacture of watches. The component parts are usually mass produced on an assembly line. Watch cases are usually made from sheet metal or plastic; watch faces are made from plastic or glass. The internal works are very small gears or springs and/or computer chips. The face may have hands and a dial, or may consist of a light emitting diode (LED). This classification includes the manufacture of internal works of clocks. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes establishments engaged in the manufacture of jewelry which are to be reported separately in classification 3602-06; establishments engaged in the manufacture of wooden housings or casings for clocks such as grandfather and mantle types which are to be reported separately in classification 2905; all outside repair work which is to be reported separately in the applicable services classification; and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-10 Camera, video camcorder, motion picture projectors: Manufacturing, assembly, or repair

[Title 296 WAC—p. 321]

Applies to establishments engaged in the manufacture, assembly, or repair of cameras, video camcorders, and motion picture projectors. Materials include, but are not limited to, metals, plastics, glass and internal components. Machinery includes, but is not limited to, punch presses, drill presses, and soldering guns. Establishments in this classification often assemble products from internal components manufactured by others. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

Special note: When an establishment subject to this classification has a retail store, then both classifications 6406 and 3602-10 may be assigned, provided all the conditions of the general reporting covering the operation of a secondary business have been met. Otherwise, all operations are to be reported in the highest rated classification of the two.

3602-11 Fishing tackle: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of fishing tackle. For purposes of this classification, the term fishing tackle is limited to lures, spinners, spoons, flies, plugs, sinkers, artificial bait and similar items. Work contemplated by this classification includes the receipt of supplies such as wire, hooks, spoons, swivels, beads and feathers, and other components from unrelated manufacturers and distributors, hand assembly of components into finished fishing tackle, painting spoons and plug bodies, packaging and shipping. This classification also contemplates testing of products and research and development of new products. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes the manufacture of items such as, but not limited to, reels, poles, nets, tackle boxes, knives, melting pots, plastic beads, wooden or plastic plug bodies, hand tools (pliers, bench vise) molds, specialty clothing or protective gear which are to be reported separately in the classification applicable to the material and process used to produce the product; and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

Special note: Care should be taken when assigning this classification to verify that the product being manufactured is compatible with the manufacturing and assembly processes contemplated within this classification. Most fishing tackle subject to this classification is hand assembled from small component parts.

3602-12 Incandescent lamp or electric tube: Manufacturing

Applies to establishments engaged in the manufacture of electrical or gas-filled bulbs or tubes such as, but not limited to, incandescent lamps, photoflash lamps, flood lamps, fluorescent tubes, X-ray tubes, cathode-ray tubes, neon tubes or artistic style neon tube signs that are not attached to metal

backings. The processes and equipment will vary somewhat depending on the type of electrical bulb, tube, or lamp being made, but the basic operation is the same. Component parts such as, but not limited to, glass bulbs, globes, or tubes, tungsten wire, metal bases, shellac, and nitrogen and argon gas are purchased from outside sources. Using flange machines, the bottom of the glass tubing is fused to the flange to produce the base that is used within the bulb or globe. Metal bases may be milled, then coated with a sealing compound such as shellac. Mounts are assembled and inserted into the flange on stem machines. The assemblies are seared together, then the tungsten filaments are fixed between support wires forming the stem. The bulbs or globes are flushed with nitrogen to expel any moisture before the stems are inserted into them. These units are inserted into the metal bases and cemented. Air is evacuated and argon gas is pumped into the bases, after which they are heat sealed and trimmed. Neon tube signs or displays are made by heating a thin tube of glass over a ribbon flame until the tube becomes flexible, blowing air into the tube to keep the glass from collapsing, then, while it is still hot, bending it to shape. Because the glass cools rapidly, the heating and bending is repeated until the desired shape is achieved, then the tube is filled with neon or argon gas and the ends sealed.

This classification excludes establishments engaged in the manufacture of metal fixtures equipped with electrical or gas lighting which are to be reported separately in classification 3404; all outside repair work which is to be reported separately in the applicable services classification; and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-14 Musical instrument - metal: Repair

Applies to establishments engaged in the repair of metal musical instruments which include, but are not limited to, trumpets, trombones, French horns, and tubas. The operations involve primarily hand work such as, but not limited to, brazing and soldering, as well as fitting, testing, and polishing the instruments. Tools include, but are not limited to, solder or brazing guns, lathes, drill presses, and various types of saws. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification; the repair of wood musical instruments which is to be reported separately in classification 2906; and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-23 Electronics products - resistors, capacitors, chips and relays, transistors: Manufacturing

Applies to establishments engaged in the manufacture of resistors, capacitors, chips, relays, and transistors which are usually tiny and delicate. Products manufactured in this classification are usually mass produced with little human intervention during the production process, which is often done in a vacuum or a nitrogen filled room. Materials include, but are not limited to, silicon, wires, and plastics. In addition to

the automated equipment, hand-held tools include, but are limited to, pliers, wrenches, and soldering guns. Finished products are inspected, usually through powerful microscopes, then packaged and shipped. This is a shop or plant only classification. Repair work, when specified, is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-24 Stamped metal goods: Manufacturing

Applies to establishments engaged in the manufacture of small, stamped, metal goods such as, but not limited to, metal tags, buttons, zippers, bottle caps, fasteners, snaps, clasps, buckles, and curtain fasteners. Materials, which come in coils or strips, are run through presses. Most of the stamping is done on automatic stamping presses. Products are cut, stamped, formed, trimmed, and cleaned, then usually finished by plating or lacquering. This is a shop or plant only classification. Repair work, when specified, is limited to work performed at the shop or plant.

This classification excludes the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-27 Electronic circuit board, N.O.C: Assembly

Applies to establishments engaged in the assembly of electronic circuit boards not covered by another classification (N.O.C.) which are used in a wide variety of electronic and automotive products. The process usually begins by cutting boards to size with power saws, then drilling or punching holes in them with automated drills or punches. Depending upon the original materials used, the boards used for the base may be coated or dipped. Then the chips, transistors, resistors, and/or condensers are installed, usually as part of an assembly line process. Next, the circuit boards are dipped and coated with a thin metal. Finished products are inspected, tested, packaged and shipped. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-28 Stereo components: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of stereo components such as, but not limited to, record changers, disc or video players, receivers and amplifiers. Materials include, but are not limited to, circuit boards, resistors, drivers, baffle plates, chambers, trim/rings, and grills. Equipment includes, but is not limited to, hot glue guns, electric drills, electric screw drivers, and automated assembly or manufacturing equipment. Finished products are inspected, tested, packaged and shipped. This is a shop or

plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-594, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-594, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-594, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 88-12-050 (Order 88-06), § 296-17-594, filed 5/31/88, effective 7/1/88; 85-24-032 (Order 85-33), § 296-17-594, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-594, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-594, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-594, filed 11/29/82, effective 1/1/83; 81-24-042 (Order 81-30), § 296-17-594, filed 11/30/81, effective 1/1/82; 80-17-016 (Order 80-23), § 296-17-594, filed 11/13/80, effective 1/1/81. Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-17-594, filed 11/30/79, effective 1/1/80; Order 75-38, § 296-17-594, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-594, filed 11/9/73, effective 1/1/74.]

WAC 296-17-595 Classification 3603.

3603-10 Furniture stripping and refinishing; metal plating or polishing, rustproofing, N.O.C.

Applies to establishments engaged in stripping and refinishing wood or metal furniture, or metal plating (a coating of metal on an object), polishing, and rustproofing that is not covered by another classification (N.O.C.). Furniture refinishing contemplated by this classification includes, but is not limited to, preparing articles for finishing or refinishing by dipping in chemical solutions/acid baths to remove the old finish or dirt, sanding and wire brushing as needed, thoroughly removing all residues, applying new finish by brushing, rolling, spraying or dipping, air or oven drying, and any appropriate finish work such as waxing, polishing and buffing when done by employees of an employer having operations subject to this classification. *Metal plating* contemplated by this classification may be done by dipping in hot solution or spraying with a very high pressure, heated gun. *Electroless plating* is another type of dipping process which can be used to plate metals, plastics, and other materials by first preparing the surface with a chemical to ensure adhesion of the metal plating material. *Rustproofing*, as contemplated by this classification, is usually applied by dipping or spraying. Plated items may be finished by lacquering and polishing. *Polishing* may also be conducted as a separate contract on metal and nonmetal items.

This classification excludes furniture finishing/refinishing done in conjunction with manufacturing or repair which is to be reported separately in classification 2905; metal plating, polishing, rustproofing and finishing done in conjunction with manufacturing of metal or a metal product which is to be reported separately as applicable to the product; undercoating of automobiles or other vehicles which is to be reported separately in classification 3411; metal plating done by an *electrolytic method* and rustproofing by *anodizing method* which are to be reported separately in classification 3603-11.

3603-11 Electroplating and detinning, N.O.C.

Applies to establishments engaged in providing electroplating or detinning services that are not covered by another classification (N.O.C.). Work contemplated by this classification includes, but is not limited to, preparing items by dipping in chemical solution/acid baths to remove old finish or dirt, sanding and wire brushing as needed, removing all residues thoroughly, electroplating to create the new finish, air or oven drying, any appropriate finish work such as polishing and buffing, and electrolytic or chemical baths for detinning processes, when done by employees of an employer having operations subject to this classification. *Electroplating* (including galvanizing and tinning) to achieve a protective or decorative coating is done by immersing the metal object in a solution which contains the desired metallic particles (metals commonly used are gold, silver, nickel, zinc and chromium) and passing an electric charge through the solution which causes the metal particles to adhere to the object being plated. Typical items plated include, but are not limited to, jewelry, plumbing hardware and components, silverware, eyeglass frames, medical instruments, and various specialized industrial components of any size. Plated items may be polished and lacquered as part of the finishing process. This classification includes *anodizing* to rustproof aluminum and some aluminum alloys by immersion in an acid bath and applying an electric charge to the metal which causes the finish to form on it. *Detinning* is the process of recovering tin from tin plated scrap. The "chemical process" involves using caustics and an oxidizing agent which causes the tin to separate from the metal it was plated to. A variation of this method introduces electrolysis to achieve a purer reclamation. The "chlorine process" uses chlorine applied under pressure to dissolve the tin and separate it from the tin plated scrap.

This classification excludes any electroplating or rustproofing by electrolytic methods done in conjunction with the manufacturing of metal or a metal product which is to be reported separately as applicable to the product; metal plating, polishing or rustproofing not using electrolytic methods which is to be reported separately in classification 3603-10; galvanizing or tinning done by hot dip process which is to be reported separately in classification 3604; and any detinning not done by a specialty shop as described above.

3603-12 Painting in shop, N.O.C.

Applies to establishments engaged in providing painting services at their shop, that are not covered by another classification (N.O.C.). This includes painting wood, metal, plastic, glass or other items. Customers include manufacturers, cabinetmakers or millwork manufacturers who do not do their own finish painting/staining/varnishing, or individuals who need only one item painted. Work contemplated by this classification includes, but is not limited to, preparing items for finishing by cleaning, sanding and wire brushing as needed, applying new finish by brushing, rolling, spraying or dipping, air or oven drying, and any appropriate finish work such as waxing, polishing and buffing when done by employees of an employer having operations subject to this classification. This classification includes application of nonmetallic coatings by dipping (such as nonstick surfaces) and painting with an electrostatic paint gun.

[Title 296 WAC—p. 324]

This classification excludes *sign painting* when done by establishments who do not manufacture the sign, which is to be reported separately in classification 4109; any painting done in conjunction with the manufacture of a sign which is to be reported separately in classification 2903, 3404, 3503 or 3510 as applicable; painting done in conjunction with the repair of an exterior sign which is to be reported separately in classification 0403; furniture stripping and refinishing services which are to be reported in classification 3603-10; furniture finishing done in conjunction with manufacturing or repair which is to be reported separately in classification 2905; automobile painting which is to be reported separately in classification 3412; the permanent yard or shop of a painting contractor which is to be reported separately in classification 5206 provided the conditions set forth in WAC 296-17-675 have been met; and the painting/staining/varnishing of any item done in conjunction with the manufacturing of that item which is to be reported separately as applicable to the product.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-595, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-595, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-595, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-595, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-595, filed 11/9/73, effective 1/1/74.]

WAC 296-17-596 Classification 3604.**3604-16 Galvanizing or tinning - not electrolytic, N.O.C.**

Applies to establishments engaged in providing galvanizing or tinning services, *not using an electrolytic method*, that are not covered by another classification (N.O.C.). This process uses molten zinc or tin dip to coat metals to deter corrosion (galvanizing) and tarnish (tinning). The process is used on all types of metal products from hand tools to automobile body parts and pieces of machinery. Work contemplated by this classification includes, but is not limited to, preparing metal by cleaning and washing in an acid solution, flushing with clean water, dipping in a metallic solution, immersion in the molten zinc or tin, and draining and/or blowing away the excess to achieve a smooth finish before cooling.

This classification excludes galvanizing or tinning using an electrolytic process which is to be reported separately in classification 3603-11 and any galvanizing or tinning operations conducted in conjunction with a metal or metal product manufacturing operation which is to be reported separately as appropriate to the product.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-596, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-596, filed 11/27/85, effective 1/1/86; 81-24-042 (Order 81-30), § 296-17-596, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-596, filed 11/9/73, effective 1/1/74.]

WAC 296-17-597 Classification 3605.**3605-28 Truck: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of complete trucks. Truck manufacturers subject to this classification are the nonpassenger type vehicles such as semi-trucks. These establishments may manufacture the chassis, body and other truck components or they may pur-

(2001 Ed.)

chase any of these items from other manufacturers and simply assemble the trucks. Usually they will purchase the axle assemblies, transmissions, electrical and cooling systems, and steering gears from others. The determining factor to assign this classification is that they do the final assembly of the various components to make the truck operational.

This classification excludes auto or passenger vehicle manufacturing including pick-up trucks which is to be reported separately in classification 3402; truck component manufacturing which is to be reported separately in the appropriate manufacturing classification; and semi-truck repair and service centers which are to be reported separately in classification 6409.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-597, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-597, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-597, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-597, filed 11/9/73, effective 1/1/74.]

WAC 296-17-599 Classification 3701.

3701-03 Ammonia, nitrogen and ammonium nitrate: Manufacturing

Applies to establishments engaged in the manufacture of ammonia, nitrogen and ammonium nitrate. Ammonia is a colorless gas used as a component in fertilizer, medicines and cleaning compounds manufacturing. The manufacturing process involves combining hydrogen and nitrogen gases with a catalyst which causes a reaction between the two gases when heated in a generator. Ammonium nitrate is a crystalline compound used mainly in fertilizers, explosives and propellants. The manufacturing process involves combining ammonia and nitric acid in a reactor. Nitrogen is a colorless gas that is obtained from the air and processed by compressing air in a pressurized tank, removing impurities, and separating nitrogen and oxygen through heating.

3701-04 Nitrate recovery from X-ray and photo films

Applies to establishments engaged in recovering nitrate or silver from X-ray and photo films. The recovery process involves placing the films in developing solutions, ionizing the solution and separating the elements.

3701-05 Dye and chemicals: Manufacturing

Applies to establishments engaged in the manufacture of all types of dyes and in the manufacture of dyes and chemicals that are used exclusively for tinting candles. Organic and inorganic compounds such as, but not limited to, phenols, alcohols, caustics, acids, salts and gases are used in the manufacturing process. Manufacturing methods include, but are not limited to, weighing raw materials to specifications and pumping them into vats where they are heated, agitated and cooled. They are then filtered through presses, dried in ovens, ground into a powder, and then packaged. Liquid or paste forms of dye go through the same process with the exception of the drying and grinding operations.

3701-06 Chemicals, N.O.C.: Manufacturing by nitration, alkylation and oxidation processes

Applies to establishments engaged in the manufacture of chemicals not covered by another classification (N.O.C.) using a nitration, alkylation or oxidation process. Nitration

involves the combining of nitrate with an organic compound to produce nitrobenzenes used in solvents, fertilizers and acids. Alkylation involves combining alkyls with other substances to form products used in the production of paper pulp, hard soap and petroleum products. Oxidation involves the combining of oxygen with other substances to produce products such as, but not limited to, hydrogen peroxide, protective metal coatings, and pharmaceutical preparations.

This classification excludes the manufacture of ammonia or nitrogen which is to be reported separately in classification 3701-03 and the manufacture of oxygen, hydrogen, acetylene gas, carbonic acid gas, or acids which is to be reported separately in classification 3701-10.

3701-07 Chemical mixing, blending and repackaging only

Applies to establishments engaged exclusively in mixing, blending or repackaging chemicals; it does *not* apply to the manufacture of ingredients for the mixing operation. The product may be mixed by hand or through a mechanical process. The equipment used by establishments covered by this classification is limited to storage tanks, mixing or blending vats, filling and packaging machines and miscellaneous equipment such as fork lifts and trucks.

This classification excludes establishments involved in more than a mixing, blending or repackaging operation which are to be reported separately in the appropriate chemical manufacturing classification.

3701-08 Cosmetics: Manufacturing

Applies to establishments engaged in the manufacture of cosmetics such as, but not limited to, soap, shampoo, hair conditioners, skin moisturizers, baby powder, lipstick, nail polish, bath oil, bath salts, and various personal care creams, gels or lotions. The process involves the mixing of premanufactured ingredients, using equipment such as storage tanks, mixers, heating devices, bottling/packaging/labeling equipment, and laboratory equipment for product development and quality control.

This classification excludes the manufacturing of the ingredients used in the mixing of the cosmetics.

3701-09 Drug, medicine, or pharmaceutical preparation: Manufacturing

Applies to establishments engaged in the manufacture of pharmaceuticals including drugs, medicines, and preparations such as, but not limited to, tablets, pills, ointments, liquids, and powders. Processes contemplated by this classification include mixing or blending of the base medicinal ingredients and additives such as, but not limited to, sugars, starches, flavorings, and waxes used for coating tablets. Compounds are then pulverized, distilled, heated and/or dried.

This classification excludes the manufacture or harvest of the ingredients used in the manufacture of the pharmaceuticals.

3701-10 Oxygen, hydrogen, acetylene gas, carbonic acid gas: Manufacturing

Applies to establishments engaged in the manufacture of oxygen, hydrogen, acetylene gas, carbonic acid gas, dry ice, or acid. The manufacture of oxygen and hydrogen involves

the recovery of these gaseous elements from the air by compression, expansion and cooling operations until it liquefies. The liquid air then goes to a fractionator where the oxygen is separated from the hydrogen along with other gases such as neon and helium. Acetylene is a highly flammable but non-toxic gas that is manufactured by reacting calcium carbide with water in a pressure generator which combines carbon and lime to form the end product. Carbonic acid gas, also known as phenol, is a caustic poisonous gas used in manufacturing resins, plastics, and disinfectants. The manufacture of phenol involves a compression and refrigeration process.

3701-11 Alcohol: Manufacturing, distilling, N.O.C.

Applies to establishments engaged in manufacturing or distilling nonspirituous alcohol not covered by another classification (N.O.C.). Types of alcohol include, but are not limited to, methanol (wood alcohol), ethanol (grain alcohol) or denatured alcohol (combination of methanol and ethanol). Products produced include, but are not limited to, solvents, processing materials, germicides, antiseptics, or materials intended to be used as an ingredient in other products such as varnish and shellac. The processes for the production are varied depending on the type of alcohol and end product but all use a distillation process which involves the heating of liquids and subsequent condensation of vapors to purify or separate a substance contained in the original wood or grain product.

This classification excludes the manufacture of spirituous liquor which is to be reported separately in classification 3702 and gasohol distilling or refining which is to be reported separately in classification 3407.

3701-13 Polish, dressing, or ink: Manufacturing

Applies to establishments engaged in the manufacture of polish, dressings, or ink. Polish and dressing products include, but are not limited to, polish or dressings for shoes, leather, furniture, automobiles or metal. The ingredients and processes for polish and dressing manufacturing vary, depending on the end product. Typical ingredients include but are not limited to oils, waxes, resins, detergents, methanol, solvents, water and coloring. The process may involve a simple mixing operation or a more involved process involving heating or cooking and molding into a cake or stick form. Typical equipment includes, but is not limited to, weighing and measuring scales, mixers, stoves, molding apparatus, automatic filling, labeling, wrapping and packaging machines. Ink manufacturing covers all types of ink including, but not limited to, newspaper, book, magazine, and writing ink. The process involves the cooking of oils and resins which produces a resin. Pigments and dyes are blended into the resin mixture and diluted to proper consistency.

This classification excludes the manufacture of candles, crayons, and adhesives which is to be reported separately in classification 3701-25.

3701-14 Extract: Manufacturing, including distillation of essential oils

Applies to establishments engaged in the manufacture of extract including the distillation of essential oils. Extracts are concentrated forms of an essential component of a food or a plant. Extracts include, but are not limited to, flavorings, per-

fume oils, sachet powders, ingredients for skin conditioners and hop extracts used in the brewing of beer. The process involves extracting flavorings or oils from various plants, herbs or fruit peelings by pressing, cooking, steaming or distillation. The extracts may be mixed or blended with other extracts for strength, consistency or color and are then bottled or canned. Typical equipment includes, but is not limited to, steam cookers, presses, distillation apparatus, filters, grinders, tanks, vats and filling, packaging and labeling machines.

This classification excludes perfume manufacturing which is to be reported separately in classification 3701-15; mint distilling which is to be reported separately in classification 3701-17; and hop pellet manufacturing which is to be reported separately in classification 2101.

3701-15 Perfume: Manufacturing, including distillation of essential oils

Applies to establishments engaged in the manufacture of perfumes including the distillation of essential oils. Perfumes may be used as a personal fragrance or by other manufacturers such as in the making of scented candles. The process typically involves the distillation, cooking, grinding, compounding, drying, blending, or liquidizing of ingredients. These ingredients may include, but not be limited to, extracts, oils, colors and binders.

This classification excludes the manufacture of candles which is to be reported separately in classification 3701-25.

3701-17 Mint distilling

Applies to establishments engaged in the distillation of mint. The process may begin with mint oil that is purchased from others or with the distillation of the mint leaves into mint oil. The mint leaves are chopped and blown into a mint steamer which lifts the moisture and oils from the mint. The resultant steam then goes through a series of condensation lines. Water is added to force the oil to the top of the liquid. The mint oil is heated for purification and to lessen the fragrance. Various mint oils may then be blended together to produce different types such as spearmint and peppermint. The product is then packaged in stainless steel or epoxy lined barrels.

This classification excludes the raising and harvesting of mint which is to be reported separately in classification 4811.

3701-20 Salt, borax or potash producing or refining

Applies to establishments engaged in the production of or refining of salt, borax or potash. This classification includes the manufacture of common salt used in chemical and food processing, borax which is used in the manufacture of glass, glazes, soap, and boric acid, and potash which is used in fertilizer. Salt ores received from others are dissolved in water to produce a brine of the desired concentration. It is refined into common salt by adding caustic soda and soda ash. Potash is refined by adding an amine to the brine which causes the salts to float to the surface where they are skimmed off. Borax is made by separating it from the potash by a rapid cooling process. All three of these products are then fully evaporated by heating in a partial vacuum to produce crystals or granules which are then dried.

This classification excludes the production of raw materials used in the manufacture of these products.

3701-21 Serum, antitoxin or virus: Manufacturing

Applies to establishments engaged in the manufacture of serums, antitoxins, or viruses. The process involves considerable microscopic laboratory work as well as working with animals. The animals are injected with bacteria and viruses, periodically bled and eventually killed. The killing of the animals is included in this classification as it is incidental and necessary to perform the operation to extract the serum from the glands and to separate the red blood cells from the blood.

This classification excludes the manufacture of other drugs or medicines which are to be reported separately in classification 3701-09.

3701-22 Paint, varnish or lacquer: Manufacturing

Applies to establishments engaged in the manufacture of paint, varnish, lacquer, enamel, shellac, paint removers and thinners. The paint manufacturing process involves a series of mixing and grinding operations. The pigments (solids) are then blended with oils or resins (liquids). A paint extender may also be added at this point. The paint is then pumped into filling machines where various sized containers are filled and then labeled. Lacquer, varnish, enamel, shellac and paint removers and thinners vary in the ingredients used but the process is similar to that of paint manufacturing in that it is mainly a mixing operation. Varnishes involve a cooking process which is generally not used in the manufacture of the other products included in this classification.

This classification excludes the production of raw materials used in the manufacture of these products.

3701-23 Putty or synthetic resin: Manufacturing

Applies to establishments engaged in the manufacture of putty or synthetic resin. Putty is a finely powdered chalk mixed with linseed oil. The main ingredients for both putty and synthetic resins are ground chalk, limestone and/or calcite. The process for both products involves grinding and mixing operations.

This classification excludes the production of the raw materials used in the manufacture of these products.

3701-25 Candle, crayon, and paste or glue: Manufacturing

Applies to establishments engaged in the manufacture of candles, crayons, and synthetic adhesives such as paste or glue. Raw materials used for making candles include, but are not limited to, beeswax, paraffin, stearin, wicks and colors which are received from others. The wax is heated in kettles or similar devices into which the wicks are dipped either by hand or by dipping equipment which can be either manual or automated. A fragrance may be added to the melted wax for scented candles. When the wax has attained the desired shape and size it is hung on lines to dry. The wicks are then cut and the candles are placed in molds to shape the base of the candle. Color is then added by dipping either by hand for specialized designs or by machine for solid colors. The candles are then inspected, wrapped, packaged and labeled. Crayons use the same ingredients that are used in making candles with the exception of the wicks. The type of wax used in making crayons determines the hardness. The wax is melted in a kettle or similar device and poured into molds for shaping and cooling. The crayons are then inspected, pack-

aged and labeled. Synthetic paste or glue is made from powder or granule arabic gum or modified starch which is received from others along with preservatives and the containers and caps. The process involves mixing and cooking the ingredients in steel tanks and pumping the product to a filling area where it is packaged, labeled and capped.

This classification excludes the manufacture of polish, dressing, or ink which is to be reported separately in classification 3701-13; the manufacture of glue from animal substances which is to be reported separately in classification 4301; and the production of raw materials used in the manufacture of these products.

3701-27 Hazardous/toxic material: Repackaging for disposal

Applies to establishments engaged in *identifying and repackaging* hazardous/toxic materials for disposal. This classification is distinguished from classification 4305-20, in that classification 3701-27 applies to the *identifying and repackaging for disposal* of such materials as drugs, pesticides, chemicals, and toners that contain toxic or hazardous materials, while classification 4305-20 includes the *processing or handling* of such materials as medical or septic tank waste, drug lab or hazardous spill *cleanup*, and *reprocessing or handling* of low-level radioactive materials. For handling hazardous or toxic materials, the workers are equipped with protective clothing such as long sleeved shirts, depending on the material to which they will be exposed. They may also be equipped with steel toed boots, protective gloves, safety glasses and various types of respirator equipment. On a typical project, the first step is to visually inspect the materials to see if they appear to be the materials described on a job order. If there is a question of identity, a sample of the material is sent to a lab for analysis. The establishment may have its own lab facilities or the sample may be sent to an outside lab, or the customer may have it analyzed. Every component of the sample must be identified. Once the material has been identified, and all containers labeled, the containers are separated into appropriate groupings. Smaller containers of similar types of materials are packed into 55 gallon drums with plastic or other cushioning protective material to prevent breakage. All necessary paper work and forms required by various government agencies must be completed before the material can be transported to a disposal site.

This classification excludes hazardous/toxic material *processing or handling*, including processing of medical or septic tank waste, drug lab or hazardous spill cleanup; reprocessing or handling of low-level radioactive materials which is to be reported separately in classification 4305-20; and the replacement of nontoxic toner in cartridges used in business machines which is to be reported separately in classification 4107.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-599, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-599, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-599, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-599, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-599, filed 11/29/82, effective 1/1/83. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 78-12-043 (Order 78-23), § 296-17-599, filed 11/27/78, effective 1/1/79; Order 74-40, § 296-17-599, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-599, filed 11/9/73, effective 1/1/74.]

WAC 296-17-600 Classification 3702.**3702-01 Breweries or malt houses****Yeast: Manufacturing**

Applies to establishments engaged in operating breweries, micro breweries, or malt houses, and includes all operations involved in the making of malt, beer, or ale as well as packaging into kegs, bottles or cans. Beer is produced from water, hops, barley malt and corn or rice; this mixture is cooked, filtered, cooled and then fermented. After the fermentation is complete, the beer is usually pasteurized and filtered, then sealed in kegs or packaged in individual bottles or cans. The exact process varies from brewery to brewery. Some breweries produce their own malt while others obtain the barley malt from an independent malting company. This classification includes warehouses and distributing stations maintained by the breweries at the brewery or at separate locations. This classification also includes tour guides, tasting room and gift shop employees. This classification also applies to establishments engaged in the manufacture of yeast.

This classification excludes establishments engaged exclusively as wholesale or combined wholesale/retail distributors of beverages which are to be reported separately in classification 2105.

3702-03 Bottling: Beverages, N.O.C.

Applies to establishments engaged in the production, bottling, and distribution of beverages not covered by another classification (N.O.C.) such as, but not limited to, carbonated and noncarbonated soft drinks, seltzers, fruit juices, lemonades, iced teas, and bottled waters. These bottling establishments purchase syrup or concentrate from the franchiser or concentrate manufacturer to produce a variety of products. Containers such as, but not limited to, aluminum or steel cans, plastic or glass bottles, are sanitized, filled with beverages, and sealed. Typically, bottlers will operate a single production facility and have multiple distribution warehouses.

This classification excludes establishments engaged exclusively as wholesale or combined wholesale/retail distributors of beverages which are to be reported separately in classification 2105 and manufacturers of syrup/concentrate for soft drinks which are to be rated separately in classification 3902.

3702-05 Wine making or wineries**Spirituos liquor: Manufacturing**

Applies to establishment engaged in making wine from fruits or flavoring products such as, but not limited to, grapes, berries, peaches, or dandelions. The ingredients are crushed and the juice extracted; yeast is added to the juice; then the mixture is stored in a cool, temperature-controlled environment (such as a cellar) for fermentation to begin. During the natural fermentation, the sugar from the fruit is converted into alcohol. Additional processing includes clarification, filtration, pasteurization, centrifugation, and blending. The wine is bottled under vacuum and corked, labeled, and cased. This classification also applies to establishments engaged in the manufacture of spirituous liquor such as whiskey, gin, rum, and vodka. Operations involve preparing the mash from various grains, potatoes or molasses received from others,

and fermenting, distilling and barreling of the products. This classification includes tour guides, tasting room and gift shop employees.

This classification excludes establishments engaged exclusively as a wholesale or combined wholesale/retail distributor of beverages which are to be reported separately in classification 2105; wine/liquor stores which are to be reported separately in classification 6403; and vineyard operations which are to be reported separately in classification 4813.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-600, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-600, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-600, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-600, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-600, filed 11/9/73, effective 1/1/74.]

WAC 296-17-604 Classification 3708.**3708-14 Hide or leather dealers**

Applies to establishments engaged in the sale of dressed animal hides, reptile skins and tanned leather. Dealers in this classification receive raw hides from others, sort and grade them, "salt" them (by soaking in a salt solution) to help their preservation, and ship them to tanneries for processing. After the tanneries have processed them, the dressed and finished hides, skins and leather are returned to the hide dealers where they are again graded, measured, trimmed by hand as necessary, then stored until they are shipped to their customers. Customers are primarily manufacturers of garments or other items.

This classification excludes establishments who process raw hides, skins, and fur into tanned leather, or dressed fur, which are to be reported separately in classification 4301.

3708-15 Linoleum, oil cloth or imitation leather: Manufacturing; Coating, impregnating, laminating or waterproofing textiles, N.O.C.

Applies to establishments engaged in the coating, impregnating, laminating, or waterproofing of crude fabric whose operations are not covered by another classification (N.O.C.). Textiles or fabrics may be treated with coatings or finishes such as, but not limited to, oils, varnishes, lacquers, or plastic and rubber finishes. Woven or felt cloth (loose, in rolls or mounted on forms) can be coated with spreading devices, rollers, or by dipping in solvents, drained to allow solvents to evaporate, then cured in drying ovens. Impregnating involves placing fabrics in vacuum tanks with solutions of rubber or lacquer and solvents and subjecting them to various pressures. Solutions are drained, contents removed, dried, baked in curing ovens and rough spots removed by grinding. Laminating is a process of cementing fabric and coating materials together and running them through heated pressure rollers, then curing them in drying ovens. Fabric embossing, which is raising designs in a surface, is included in this classification. These processes are also used in the manufacture of linoleum, oil cloth, imitation leather, and similar waterproofed or laminated fabrics.

This classification excludes establishments engaged in the bleaching, dyeing, or finishing textiles which are to be reported separately in classification 3708-16 and coating or

other finishing operations performed by employees of manufacturers of textiles or textile goods which are included in the manufacturing classification as applicable.

3708-16 Bleaching, dyeing or finishing textiles: N.O.C.

Applies to establishments engaged in the bleaching, dyeing, or mercerizing of crude fabric whose operations are not covered by another classification (N.O.C.). The fabric is first treated with bleaches, dyes, and other solutions, then singed and calendered prior to shipping to other manufacturers to be made into textile goods. Mercerizing is the treatment of fabric with sodium hydroxide to shrink the fiber and increase its color absorption and luster. Singeing is the burning of the fiber ends to seal them; calendering is pressing the cloth through heavy rollers to smooth and gloss it. The above operations require the use of large manufacturing machinery such as, but not limited to, calenders and large vats.

This classification excludes establishments engaged in coating, impregnating, laminating or waterproofing textiles which are to be reported separately in classification 3708-15; establishments engaged in the washing and drying, or dyeing of individual garments for others which are to be reported separately in classification 2201; and coating or other finishing operations performed by employees of manufacturers of textiles or textile goods which are included in the manufacturing classification as applicable.

3708-18 Broom or brush: Manufacturing or assembly, N.O.C.

Applies to establishments engaged in the manufacture or assembly of all types of household and industrial brooms, brushes, and mops not covered by another classification (N.O.C.), including, but not limited to, paint brushes and rollers, whisk brooms, scrub mops, dust mops, brushes for vacuum cleaners, street sweeping or other rotary machines. Animal hair, synthetic fibers, handles and backings made of wood, plastic or metal, screws, rivets or other hardware, metal springs and wire, yarn, and dust-attracting additives are purchased from outside sources. Tools and equipment include, but are not limited to, manually operated or computerized brush making machinery. Brush making machinery drills holes in the brush base, fills holes with hair or other fibers, and staples them in place. Other types of brush making machines make metal-back strip brushes which are mounted in straight or spiraled rows around cores (tubing or shafts), and used in rotary machines. These machines loop bristles around an anchor wire, then crimp a metal channel around the anchor wire, forming the base. The bristles are trimmed to precise lengths on trimming machines.

This classification excludes establishments engaged in the manufacture of metal, wood or plastic handles or backings which are to be reported separately in the classification applicable to the manufacturing process, and establishments that make only mop heads by sewing yarn or other strands to a cloth base which are to be reported separately in classification 3802.

3708-19 Cordage, rope, or twine: Manufacturing

Applies to establishments engaged in the manufacture of cord or cordage, rope, twine, or string from both natural and synthetic fibers such as cotton, manila, sisal, flax, jute, hemp,

(2001 Ed.)

and rayon. Finished products, which range widely, include, but are not limited to, fish lines, shade or awning cords, mountain climbing ropes or riggings on boats. This classification includes the extrusion of polyethylene or similar pellets to form fibers when done by manufacturers for use in their own products only. This classification also includes establishments that pick, card, and comb fibers prior to twisting the resulting strands into twine or lightweight cord which they may further twist or braid together to produce heavier cordage or rope. "Picking" removes debris from the raw fibers; "carding" untangles and straightens the fibers; "combing" separates long fibers from shorter ones and forms them into thick strands (which are referred to as "slivers"). Other manufacturers in this classification start with spools of cording, then twist or braid a number of strands into heavier cordage or rope. Manufacturers may dye their products, coat them with latex to prevent deterioration, or steam and dry them. The above operations are included in the classification when performed by employees of employers engaged in manufacturing rope or cordage. Machinery includes bale breaking, picking, carding, spinning, twisting, braiding, winding machines, dipping vats, and dryer ovens.

This classification excludes establishments engaged in the manufacture of net, thread, webbing, or yarn which are to be reported separately in classification 3708-26 and establishments engaged in the manufacture of plush, velvet, felt, or other fabric produced by spinning or weaving which are to be reported separately in classification 3708-27.

3708-22 Pelting

Applies to establishments engaged in animal hide pelting operations. A pelt is an untanned animal hide or skin with the hair or fur still on it. For classification purposes, pelting is defined as the initial cleaning and drying of animal skins or hides, but does not involve the removal of hair or fur, or tanning operations. Frozen pelts are thawed by flushing them in water. Fat and tissues are removed from the skin on fleshing machines. Fleshing machines resemble a band saw with a small blade over which the skin is moved to remove fat and tissue. Then skins are placed in tumblers or drums with cornmeal or sawdust to clean the excess moisture, dirt, and oils from them. They are usually transferred to another drum or shaker to remove the cornmeal or sawdust. The cleaned pelts are stretched on drying boards or metal frames, stapled to the frames with hand staplers, and placed in drying rooms until dry. Pelts are sold to tanneries or furriers where they are further processed into tanned hides or dressed furs.

This classification excludes establishments engaged in the tanning of leather and the dressing of fur which are to be reported separately in classification 4301; establishments engaged as taxidermists which are to be reported separately in classification 3708-23; and establishments engaged in raising fur bearing animals which are to be reported separately in classification 4804.

Special note: Pelting of fur bearing animals, when performed by the animal raiser, is considered incidental to the raising and is included within the scope of classification 4804. Raisers of fur bearing animals are entitled to classification 3708-22 only if their hide pelting operation involves the pelting of animals which have been raised by others.

3708-23 Taxidermists

Applies to establishments engaged in taxidermy which is the preparation, stuffing, and mounting of skins of dead animals for exhibition in a lifelike state. This classification includes all operations, including tanning of hides and making animal forms, when performed by employees of the taxidermist. Hunters and fishermen are the primary customers of taxidermists; pet owners may have a pet preserved, all of whom provide the skins or animals. Other customers include museums who use animal likenesses for decorating or exhibit. For these customers, the taxidermist usually purchases tanned hides from other sources. Small animals, such as birds, cats, or fish are usually mounted whole. Large animals may be mounted whole, although generally only the head and neck are mounted. Whole animals are posed and sometimes placed in natural-looking settings. The taxidermist may receive the skin, or the whole animal, in which case the skin is carefully removed in one piece. To remove fat and tissue, the fleshy side of the hide is pulled back and forth across the spinning blade of a fleshing machine. Fleshing machines resemble a band saw with a blade about a foot in diameter which is mounted on a worktable. Hides usually require "finer fleshing" which is done by scraping with a hand knife. Holes or tears in the skin are hand sewn. The taxidermist may finish preparing the skins, or they may send them to a tannery. Other preparations involve tumbling the skins in drums (which resemble clothes dryers) with sawdust or cornmeal to remove excess moisture, dirt, oils, then washing them in solutions of sodas, borax or alum to further clean, soften, and preserve them. Antlers are soaked in brine to remove blood and other waste. Prepared skins of smaller animals are usually stuffed; skins of larger animals are usually stretched over an animal form, sewn together, then glued onto the form. Taxidermists may make their own animal forms from fiberglass or other plastic materials, or they may purchase them elsewhere. Antlers, artificial eyeballs, teeth, tongues, toe nails, and hooves are attached. Finishing work requires touches of paint to eyelashes or mouths (applied with artist's brushes), sprays, or whatever make-up or sculpturing techniques are needed to make the animal look lifelike. Additional materials and equipment includes plaster, cotton or other stuffings, styrofoam, cleaning agents or waxes, hand tools for cutting, scraping, and sculpturing, rasps, sewing needles, hammers, saws, freezers, dryers and tumblers, and sewing machines.

This classification excludes establishments engaged in hide pelting which are to be reported separately in classification 3708-22 and establishments engaged in tanning operations and fur dressing which are to be reported separately in classification 4301.

3708-26 Net, thread, webbing, yarn: Manufacturing

Applies to establishments engaged in the manufacture of webbing, thread, or yarn by spinning, weaving or knitting processes from natural or synthetic fibers such as, but not limited to, cotton, rayon, silk, wool. This classification also includes the manufacture of nets which are woven from cording or twine. Initial operations include the removal of debris from fibers by picking; and untangling, straightening, and stretching of fibers by carding. A combing operation sepa-

rates long fibers from shorter ones and forms them into thick strands (referred to as slivers). Slivers are placed on creels and fed into spinning machines to be further stretched, spun and twisted onto bobbins (also called packages). The thread or yarn go through further winding, rewinding, doubling, or reeling, depending on the ply being produced. At some point prior to the final winding onto a cone, the threads are rinsed in vats of hot water for several hours to set the ply; dyes may be added to the rinse. Threads are then spun dry and placed in dehydrators until all moisture is removed. Yarn/thread is packaged and sold to fabric weavers. Elastic or nonelastic webbing is woven from yarns or threads on narrow-shuttle looms or knitting machines. The finished lengths are coated, laminated, or dyed prior to winding onto skeins or spools for sale to others. Nets manufactured in this classification range from batting nets or hoop nets for sports, to nets used for commercial purposes. Styles are also widely varied; mesh nets woven on net looms, other types knitted on net-knitting machines; some are hand knotted. Manufacturers may sell "net systems" which include traps, hooks, hinges, lines and other fishing paraphernalia, to the marine industry. Those companies usually sell several styles of nets, some of which are made from ready-made netting they purchase elsewhere and sew bindings and hardware onto them. Hand-knotted netting is often used to catch salmon or herring. Lengths of rope are unwound with winches and winders, and stretched across a waist-high loom that usually extends the length of the factory and includes overhead bars from which rope hangs. Workers stand at the loom and knot the lengths of rope to form nets. Hand knotting is considered an art and takes some time and skill to learn. There are different ways of finishing the nets. Some are pulled and stretched with winches through a heating-drying system (these can be up to 100 feet or so in length). The top of the unit is lowered over the stretched net and steam heat is applied. The stretching tightens the knots, which strengthens them; drying shrinks and cures the net, also adding strength. Another method is to soak nets in vats of hot water to which dyes may be added. Nets may also be dipped in latex coatings and dried in dryer-ovens.

This classification excludes establishments engaged in the manufacture of cordage, rope, or twine which are to be reported separately in classification 3708-19.

3708-27 Spinning or weaving, N.O.C. Plush, velvet, felt: Manufacturing

Applies to establishments engaged in spinning or weaving operations to manufacture woven or nonwoven fabric and which are not covered by another classification (N.O.C.). Raw materials include natural or synthetic filaments (also called thread) such as, but not limited to, cotton, wool, rayon, acetate, or spun fiberglass. Some manufacturers spin their own yarn prior to weaving it into cloth; others purchase the yarn from outside sources. To make woven cloth, creels hold spools (or beams) of yarn; the yarn feeds into the weaving machinery and is woven into cloth. The resultant cloth may be washed, dried, bleached, dyed or otherwise finished by the same manufacturer, or sent elsewhere for finishing. The dyeing, bleaching, or coating of fabric is included within the scope of this classification when performed by employees of

an employer engaged in the manufacture of fabric. Non-woven fabric (also called spunbonded) is lightweight and can be either absorbent or repellent. Uses for this type fabric include, but are not limited to, inner-lining of diapers, surgical/medical masks, handiwipes, mattress pads, pillow coverings. Process for making spunbonded fabric starts with the extrusion of polyethylene pellets into taffy-like substance which is eventually spun into continuous threads with the use of suction, electricity, cold air, and blowing. Once the substance is formed into threads, the threads move through the machinery at high speeds where air guns or nozzles suction several threads into one "visual strand." These transparent strands move along and are blown onto a fast-moving wire conveyor of a sheet-making machine where they are criss-crossed to form a nonwoven mass; the mass passes through the machine's large rollers as heat is applied to it. The heat and the pressure of the rollers bonds the webbed mass into the nonwoven fabric. The fabric passes through more rollers and winders, is wound onto paper cores, cut, and packaged for shipment. This classification includes the manufacture of plush, velvet or felt. Plush and velvet manufacturing contemplates similar operations and machinery as those for other woven fabrics. With velvet, the pile is almost always silk while the pile for plush may be of silk, wool, or mohair. Backings for both may be one or more of silk, artificial silk, wool, or cotton. After leaving the looms, the material goes through coloring, embossing, printing, brushing, shearing and inspecting processes. Felt is a mat-like material which is made by pressing raw materials, such as raw wool, cotton, nylon, textile scraps, into desired dimensions. The materials are first mixed in required proportions and, after picking and dusting, passed through breakers, carders, then laid in layers to form the felt. The felt is pressed and hardened by a hardening machine and, after fulling, is washed, dyed, then dried. (Fulling increases the weight and bulk by shrinking, beating, or pressing.) Once dry, the felt is pressed and trimmed in shearing machines and folded or rolled for shipping.

3708-29 Mattress or box springs: Manufacturing

Applies to establishments engaged in the manufacture of stuffed mattresses, spring mattresses, or box springs. The manufacture of batting, wadding, waste is included in this classification when performed by employees of employers engaged in manufacturing mattresses. Materials include, but are not limited to, wool or cotton stuffing materials, foam for padding, decorative fabric for mattress covers, upholsterer's tape and sewing notions, glue, wire coils or springs, wire grid racks, and wood frames. Machinery includes, but is not limited to, hand tools, staple guns, glue spray guns, nail guns, band saws, sewing machines, eyelet punches, quilting machines, and tape edgers. *Mattresses:* Mattress pieces are cut to desired size, edging sewn on, eyelets and cord handles attached to the side pieces. Quilting of the covering fabric is done on large quilting machines. To assemble mattresses, batting and foam padding, or other cushioning material, is laid out over the springs, then glued and stapled onto the springs, then ticking (covering) placed on both sides. Borders are sewn to the top and bottom pieces with a hand-held "tape edger" machine. *Box Springs:* Springs, grid racks, wood frames are received from outside sources. Wood

(2001 Ed.)

frames are laid out on work surfaces, wire grids set on them, then the springs are stapled to the grids and frames at both ends, forming the box. Layers of batting and covering materials are secured in place; then lightweight cloth is stapled to the bottom of the boxed spring, and plastic reinforcement corner pieces tacked on.

This classification excludes establishments engaged in the manufacture of wire springs which are to be reported separately in classification 3402 and establishments engaged in the manufacture of batting, wadding, or waste which are to be reported separately in classification 3708-34.

3708-32 Carpet or rug: Manufacturing

Applies to establishments engaged in tufting carpets from textile fiber, or weaving carpets and rugs from textile yarn on weaving machinery. Tufted products are sold as wall-to-wall carpets, area rugs, art squares, bath mats or scatter rugs. Woven products are sold as aircraft or automobile floor coverings, mats or matting. Materials include, but are not limited to, pile yarn, jute backing, liquid latex, binding, and sewing notions. Machinery and equipment includes, but is not limited to, tufting machines, looms, vats, electric infrared dryers, electric cutting knives, and sewing machines. For tufted carpets or rugs, pile yarn is sewn to a prewoven jute backing by a high speed machine using hundreds of needles. Rollers move the carpet over vats of rubberized liquid latex while the liquid is applied to the backing to secure the tufting. The carpet then passes through a dryer to dry the latex. Bindings are sewn on with a sewing machine.

This classification excludes establishments engaged in making hand carved or inlaid carpets or rugs from premanufactured carpeting which are to be reported separately in classification 3802.

3708-34 Batting, wadding or waste: Manufacturing; Wool combing or scouring

Applies to establishments engaged in the manufacture of batting, wadding or waste which is sold to distributors or other manufacturers for use in their products. The terms batting and wadding are interchangeable and refer to cotton or wool fibers wadded together to form a soft layer used for padding or stuffing. Batting/wadding is used to stuff mattresses, automobile tops, bed pillows and comforters, sleeping bags, futons, crating pads, stuffed animals, and similar items, or to upholster furniture. Raw materials such as raw or waste cotton, wool, and synthetic fibers are received from others and treated by processes that include shredding, willowing, picking, dusting, carding, blending, rolling, drying and curing. These processes require the use of considerable manufacturing machinery which includes, but is not limited to, choppers, shredders, blowers, conveyor systems, rollers, ovens, winders, and cutters. The terms willowing, picking, and dusting refer to opening and cleaning unprocessed wool or cotton; carding or combing untangles and separates fibers. Fibers are fed into garnetting machines where they are picked, pressure-blown and blended, then blown out onto a long, flat, surface that rotates as the fibers build up to a specified thickness. Once the desired thickness is reached, the mass moves through the machine's rollers, winders, and conveyors; it may be treated lightly with resins or linseed oil. The conveyors move the continuous rolled mass through enclosed ovens

where it is cured and dried. The roll of batting may pass through a quilting machine to be bound together in a web structure of strong thread. Finally, it is wound onto cores, cut and prepared for shipping. Shoddy or waste manufacturing is the processing of rags or textile mill waste until the materials are reduced to fibers. Processes may include, but not be limited to, sorting, classifying, carbonizing (exposing rags to hydrochloric acid fumes), baking, dusting, washing, drying, batching, picking, garnetting, and baling. Wool separating operations may include soaking rags in diluted sulfuric acid or carbonizing to remove cotton and other foreign matter. The rags are then dried and processed to remove dust, washed in alkali to neutralize the remaining acid, then dried. This classification also applies to establishments engaged in wool combing or scouring operations. Wool is processed in dust-ers which remove dirt. The wool then passes to scouring tanks. Several washers may be combined in a unit, the wool passing from one to the other by automatic conveyors. The last tank of clear water rinses the wool and it is then dried. Sometimes it is picked and carded again prior to being dried, then bagged or baled for sale. This classification also includes the treating and twisting of animal hair for upholsterers' use.

3708-39 Textile goods: Manufacturing N.O.C.

Applies to establishments engaged in the manufacture of a wide variety of textile goods not covered by another classification (N.O.C.), and those which incorporate textiles with other types of raw materials. In addition to those described below, raw materials include, but are not limited to, metal or plastic rods and edging strips, glue, epoxy, cork, adhesive tape, nuts, bolts and other small hardware. In addition to that described below, machinery includes, but is not limited to, die cutters, rotary press cutters, band saws, hot wire cutters, reciprocating blade cutters, slitters, balers, thermoweld presses, laminators, rivetors, punch presses, shredding machinery such as hammer mills, and hand tools such as glue sprayers, staple guns, and rivet guns. Sewing machines are often used in the manufacture of products contemplated in this classification; however, sewing is an auxiliary function performed in addition to other fabrication processes. Products contemplated in this classification include, but are not limited to:

Abrasive cloth made by running the backing material (cloth, paper, or combinations of these) through a making machine which is usually a grouping of three units. The printer unit imprints the backside of the backing material with a trademark or grade number; in the next unit an adhesive bond is applied in varying concentrations and quantities; a grain dispenser applies grains or minerals such as flint, emery, crocus, garnet, aluminum oxide or silicone carbide, either by a mechanical or an electrostatic method.

Absorbent booms or sheets designed to lift oil from water, made by shredding paper with an absorbent finish, then blowing it into a sock of netting or a sheet sewn from nonwoven fabric.

Bug screens for automobiles made by cutting wire screen mesh to size with either scissors or a small shearer, sewing vinyl bindings around them.

Conveyor belts made by joining the ends of premanufactured belting made of natural or synthetic rubber to form a continuous belt. Ends may be joined by a mechanical splice or a vulcanized splice. A mechanical splice joins the ends with lacings (metal strips into which wire rods are threaded); a vulcanized splice joins the ends by applying heat under pressure. This type of bonding is also called thermo-welding.

Fishing rod wrappings added to blank poles made by others. Cork handles are glued onto the poles individually in a hand operation. Poles are positioned on a lathe-like device powered by small motor. Next, guides are placed onto the pole and secured by winding thread around the pole as the lathe slowly turns it. Epoxy is brushed on by hand, or the pole is dipped in epoxy, then placed on a revolving wheel or hung to air dry. If the company that makes the poles also applies the wrappings (finishings), the entire operation is to be reported separately in the classification applicable to the manufacture of the poles.

Hard side luggage or carrying cases for items such as, but not limited to, video cameras, computers, telescopes, made by cutting plywood or premanufactured plastic sheets to pattern, lining the inside and outside of the pattern pieces with materials such as embossed paper or imitation leather, forming the case by riveting metal or plastic edging and corner pieces onto the pattern pieces, and attaching hardware such as handles, hinges, and locks. Polyester foam padding is glued to the inside of the specialized carrying cases to protect the contents.

Hot tub covers made by cutting styrofoam to pattern, joining the two pieces with metal hinges and enclosing the unit in a vinyl covering.

Insulating products made by cutting materials such as premanufactured fiberglass cloth to specified shapes, then stapling together, or by laminating vinyl or other covering fabrics to premanufactured fiberglass cloth.

Office divider panels made by cutting premanufactured materials similar to polyfoam, laminating fabric onto foam, and attaching light weight metal or wood edging pieces.

Rigging for boats such as rope ladders made from heavy-duty rope, slings made by sewing bindings onto premanufactured netting.

This classification also includes the *cutting and laminating* of styrofoam, polyethylene foam and other flexible "foam rubber" materials to make products such as, but not limited to, mattress pads, cushions, contour pillows, automobile seats, packaging materials, padding and pads for sports equipment. Other products *could be* contemplated in this classification as long as the materials, machinery and processes used in the manufacture of those products are similar to those of employers subject to this classification.

This classification excludes establishments engaged in the manufacture of miscellaneous textile soft goods which are to be reported separately in classification 3802 and establishments engaged in the molding and mixing of rubber, plastic or graphite goods, which are to be reported separately in the classification applicable to the work being performed.

3708-40 Bag or sack-industrial size, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of industrial size bags or sacks which are not covered by another classification (N.O.C.). These types of bags are used for packaging items in bulk, such as, but not limited to, flour, sugar, salt, meat products, fruits and vegetables, fertilizer, building materials, or coal. Raw materials include ink, strong thread, rope drawstrings, and fabric such as, but not limited to, cotton, nylon, woven polypropylene, burlap, or gunny which is generally received in bales. Baled fabric is opened on baler machinery, sewn into continuous lengths, then wound onto cores on a roll-up machine. The fabric is fed through a winder which pulls it straight, then may be run through print presses where logos, brand names, or designs are applied. The lengths are stacked on long cutting tables and cut with hand or power cutters to desired bag size. The sides and bottoms are sewn together inside out, then hem the open end. The bags are turned right side out on turning machines and drawstrings may be inserted in the hemmed edge. Finished bags are bundled into bales with strapping machines and prepared for shipping.

This classification excludes establishments engaged in the manufacture of small bags, packs, picnic bags or others generally carried on the person, which are to be reported separately in classification 3802; establishments engaged in the manufacture of plastic bags which are to be reported separately in classification 3510; and establishments engaged in the manufacture of paper bags which are to be reported separately in classification 6908.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-604, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-604, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-604, filed 5/31/93, effective 7/1/93; 91-12-014, § 296-17-604, filed 5/31/91, effective 7/1/91. WAC 296-17-606 Classification 3802.**3802-13 Handbag or pack: Manufacturing**

Applies to establishments engaged in the manufacture of a variety of bags on a mass production or quantity basis. Types of bags include, but are not limited to, handbags, backpacks, fanny packs, picnic bags, softside luggage, and other bags normally carried on the person, and such items as literature or document pockets used in airplanes or automobiles. The screen printing or embroidering of the manufacturers' own products is included in this classification when performed by employees of an employer having operations subject to this classification. Materials include, but are not limited to, natural or synthetic fabric, leather, webbing or strapping for handles, buttons, hooks, buckles, Velcro, and other sewing notions purchased from outside sources. Operations include cutting to size or pattern, hand or machine sewing, finishing, labeling, pressing. Tools and equipment include hand or power cutting tools, clicker die cutters, sewing machines that perform a variety of functions, eyelet punchers, and household irons.

(2001 Ed.)

This classification excludes establishments engaged in the manufacture of industrial bags from natural or synthetic cloth used to package commodities such as bulk flour, sugar, produce, fertilizer, building materials, which are to be reported separately in classification 3708; establishments engaged in the manufacture of paper bags which are to be reported separately in classification 6908; establishments engaged in the manufacture of plastic bags which are to be reported separately in classification 3510; and establishments engaged in the manufacture of hard sided luggage or carrying cases which are to be reported separately in classification 3708.

3802-28 Millinery: Manufacturing; Artificial feather or flower, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of hats made of felt, wool, or other textiles, fur, or leather received from outside sources. Other materials received from outside sources include woven hat bodies, braided straw, sweatbands, linings, rims or brims, ribbons, artificial flowers, feathers, or other trimmings. For fabric hats, fabric is cut to standard hat sizes, sewn, steamed on molds or blocked in hydraulic presses, and trimmings attached. For straw hats, straw stripping is roughly sewn into crowns and brims and stitched to the woven straw body. Finishing operations involve sizing, hand blocking, iron and machine blocking in hydraulic presses, then hand sewing bands and trimming onto them. For felt hats, bodies are steamed, sized, shaped, ironed or press blocked under hydraulic presses; trims are usually sewn on by hand. This classification also applies to establishments engaged in the manufacture of artificial feathers or flowers whose operations are not covered by another classification. Crepe paper, fabric, covered paper stakes, glue, and wire are received from outside sources. Paper or fabric is cut, hand rolled and assembled with wire to form the product.

This classification excludes establishments engaged in the manufacture of hats knitted to form on knitting machines which are to be reported separately in classification 3802-42 and establishments engaged in the dressing of fur or the tanning of leather which are to be reported separately in classification 4301.

3802-29 Wig: Manufacturing

Applies to establishments engaged in the manufacture of wigs and hair pieces made from real hair or synthetic hair. Human hair is usually purchased from beauty shops. After being washed in hot disinfectant, hair is dried in ovens. The strands are bleached in peroxide or ammonia, then colored with dyes to desired shades. Strands are secured to webbed caps with sewing machines or woven into the cap and cemented by hand. The final steps include clipping, curling, and styling. Materials include human hair, synthetic hair, disinfectants, adhesives and webbing fabrics. Tools and equipment include, but are not limited to, scissors, combs, brushes, curling irons, washing, bleaching and dyeing vats, drying ovens, and sewing machines.

3802-34 Screen printing of cloth or garments

Applies to establishments that provide screen printing services to others on cloth items such as, but not limited to, shirts, jackets, caps, and aprons. Most screen printing estab-

lishments display a limited quantity of garments as samples from which customers can order to outfit a team, club, or other group. The screen print shop may order the garments from their suppliers, perform the screen printing, and sell the garments to their customers, or the customers may provide their own garments. However, the principal business operation is the *service of screen printing*. Screen printing of individual garments may be done by hand or with a machine. Screen printing businesses will create designs in their art department, or customers can furnish their own design. The process begins with the transfer of a design onto a framed silk screen. A light-sensitive material is coated over the silk screen, then exposed to light. The screens are placed on a multiport machine with a number of press boards onto which garments, such as shirts, jackets, hats, aprons are loaded at one time. One color of ink is squeezed over the screen and as the machine revolves, the color for that portion of the design is applied to each garment. When the first color of the design is applied, garments move on a conveyor through a dryer oven to set the ink. This process is repeated with other colors until the complete design is reproduced on each garment. Screens are washed and cleaned so they can be reused. To screen print designs on lengths of cloth, the process is similar, but machinery for this type of application resembles commercial printing presses used in print shops. Materials include art supplies, colored ink, paint thinners, cleaning solvents. Tools and equipment include, but are not limited to, ink dispensers and squeegees, hand cutting tools, frames and screens, manual and automatic presses, dryer ovens with conveyors, drying racks, pressure spray washer units or sinks, and work tables.

Special notes: The screen printing of a manufacturer's product, when done as part of the manufacturing process by employees of the manufacturer, is included in the classification applicable to the product being produced.

Establishments in classification 6305 that are primarily engaged in the retail sale of clothing such as tee shirts, athletic sweat suits, or hats, may custom screen print or apply iron-on transfers on individual garments sold. Individualized printing or application of transfers is an incidental part of the sales operation and is included in the store classification.

Wholesale distributors of clothing or cloth goods who perform *incidental* screen printing on a small portion of their own product are to be reported separately in classification 6407. Care must be taken when considering classification 6407 to ensure that the nature of the business is the wholesale operation, not a screen print service, and that screen printing is only incidental to the sales operation.

3802-37 Hand carved or inlaid rug: Manufacturing

Applies to establishments engaged in the manufacture of custom-designed inlaid or hand carved rugs or carpets from carpeting purchased from outside sources. These are usually small businesses whose primary customers are interior designers or architects who want one-of-a-kind rugs to complement the design of a room. The designer pieces can be installed as wall-to-wall carpets or used as area rugs or wall hangings. Materials include, but are not limited to, pattern paper, netting, monk cloth, binding or fusing tape, fringed edging, carpet rolls, latex glue, and thread. Tools and equip-

ment include small cutting tools such as hot knives, tracing wheels, rulers, glue guns, air spray guns, seamers for attaching the metallic tape, carpet carvers, and sewing machines. Carpet carvers resemble a household canister vacuum cleaner. A suction hose joins the carving blades to the canister so the fibers are vacuumed as they are cut.

Inlaid: First, a design is drawn onto pattern paper, then traced onto a piece of carpet with a tracing wheel. Powder rubbed across the paper goes through the perforations to form the design on the carpet. This step is repeated for each different colored piece in the design. The complete design is also cut out of the main carpet piece. The pattern pieces are cut out with a hot knife and placed into the main carpet backing piece which will become the finished rug. The pieces are glued to the backing with fusing tape or joined with metallic seaming tape. (Carpet designers refer to this as quilting.) Hand carving (clipping around the edges of the design with the carpet carver) adds dimension. Netting is attached with latex to the back side of the design to secure it. Monk cloth or similar fabric is applied as a backing.

Hand Carved: The pattern is transferred directly onto the main carpet piece and carved along the edges of the design to give it dimension.

This classification excludes establishments engaged in the manufacture of carpets or rugs by tufting or weaving which are to be reported separately in classification 3708 and establishments engaged in the installation of carpets which are to be reported separately in classification 0502.

3802-38 Embroidery services; lace: Manufacturing

Applies to establishments that provide embroidery services to others on cloth items such as, but not limited to, shirts, jackets, caps, aprons, and patches. Most embroidery establishments display a limited quantity of garments as samples from which customers can order to outfit a team, club, or other group. The embroidery shop may order the garments from their suppliers, perform the embroidery, and sell the garments to their customers, or the customers may provide their own garments. Their principal business operation, however, is the embroidery service. Paper templates, computer tapes, natural or synthetic thread, backing materials, fabrics for patches, are received from outside sources. Designs or logos are punched onto paper strips. The strips are fed through the embroidery machines which simultaneously stitch the design onto numerous garments or cloth items which have been positioned on the machine. In computerized machines, the design is programmed onto paper computer tapes which are placed in the embroidery machine instead of the paper strips. The rest of the operations are the same. To make patches, the design is embroidered numerous times on a length of fabric. Individual patches are cut out and the edges finished on a serger sewing machine. This classification also applies to establishments engaged in the manufacture of lace. Natural or synthetic threads are received in skeins from outside sources. The thread is wound upon spools and bobbins which are placed onto the shuttles of the looms. The designs in the lace are created by various harness and shuttle movements of the loom, controlled electronically or by perforated pattern cards. After removal from the loom, the lace is inspected, mended by hand or sewing machine if

needed, washed, bleached, dried, trimmed, starched, and ironed.

Special notes: The embroidery of a manufacturer's own product, when done as part of the manufacturing process by employees of the manufacturer, is to be included in the classification applicable to the garment or product being made.

Establishments in classification 6305 who are primarily engaged in the retail sale of clothing such as tee shirts, athletic sweat suits, hats, may embroider designs or lettering on individual garments sold. Individualized embroidery is an incidental part of the sales operation and is included in the store classification.

Wholesale distributors of clothing or cloth goods who perform *incidental* embroidery on a small portion of their own product are to be reported separately in classification 6407. Care must be taken when considering classification 6407 to ensure that the nature of the business is the wholesale operation, not an embroidery service, and that embroidery is only incidental to the sales operation.

3802-39 Household furnishings: Manufacturing

Applies to establishments engaged in the manufacture of household furnishings such as, but not limited to, draperies, pillows and cushions, futons, sleeping bags or comforters. Businesses that make draperies may make other window treatments such as swags, valances, cornice boards, pull-down roller shades (window blinds) and other accessory items such as, but not limited to, throw pillows, and slip covers. If the window coverings are custom made, the shop usually includes a showroom displaying samples of drapery fabric, drapery rods, window coverings, accessories, floor coverings, wall paper or other household furnishings. These accessory items are not usually stocked, but are obtained from suppliers or manufacturers as customers order them. The sale of these items by establishments engaged in the manufacture of household furnishings is included in this classification. A separate store classification is not applicable in these situations. Draperies and curtains are cut to size, pleated, sewn, and finished by steaming or ironing. Vinyl pull-down shades or blinds are cut to size; one end is stapled to a wooden roller, then the shade is wound around the roller. The other end is creased and stitched to form a hem into which a wood slat is placed to give the blind a solid edge. Pulls, tassels, fringes, or other trims are attached. Sleeping bags, comforters, futons, and pillows are cut, sewn, and stuffed with padding materials purchased elsewhere. This classification also includes the manufacture of lamp shades. Plain or pleated fabric or laminated parchment and metal frames are purchased from outside sources. Material is cut to pattern, then attached to frames by gluing or sewing bindings around the frame and fabric. Materials include, but are not limited to, various fabrics, vinyl-coated cloth, transparent vinyl, parchment, linings, stuffings, trims, drapery hooks, rods, wooden rollers and slats, pulls or handles, hinges, wire frames for lamp shades, and sewing notions which are purchased from outside sources. Tools and machinery include scissors or other hand or power cutting tools, irons, sewing machines that perform a variety of functions such as straight stitching, hemming, serging, pleating, or tacking, drapery-folding devices, lighted surface to inspect cloth for flaws

(2001 Ed.)

prior to cutting draperies, work tables for cutting or with a padded surface for ironing, pressing machines or irons. Drapery manufacturers may have a jig saw, saber saw or miter saw for the incidental cutting of cornice boards which is included in this classification.

This classification excludes establishments engaged in the manufacture of batting, wadding, or waste which are to be reported separately in classification 3708 and establishments engaged in the installation of draperies which are to be reported separately in classification 0607.

3802-40 Garments, slippers, accessories, miscellaneous soft goods, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of garments, wet suits, accessories, slippers, and miscellaneous soft goods not covered by another classification (N.O.C.), including, but not limited to, tie downs or animal restraints made from fabric strapping, art and craft or novelty items, stuffed toys, award ribbons, medical supports, umbrellas, and parachutes on a mass production or quantity basis. The production involves cutting to size or pattern, sewing, gluing, fabric welding, inserting stuffing materials, labeling, pressing, inspecting and packaging. Screen printing or embroidering of the manufacturer's own products, and finishing processes such as dyeing or bleaching is included in this classification when performed by employees of an employer having operations subject to this classification. Manufacture of these items often includes primarily hand work or hand work incidental to machine operations. Items are produced from all types of natural or synthetic cloth or fibers; some of the trims or patches may be leather or other pliable materials. Materials include, but are not limited to, natural fabrics, synthetic fabrics such as neoprene, fur, leather, strapping or webbing, yarn, sewing notions, glue, decorative trims, ribbons or patches, imitation eyes for toys, stuffing materials, buttons, buckles, hooks, or handles which are purchased from outside sources. Tools include household irons, scissors or cutting wheels, measuring tapes, tracing wheels, brushes, power cutting tools (some types have hot blades or wires to seal frayed edges of cut pieces), glue guns, staplers, and clamps. Machinery includes, but is not limited to, cutting tables, sewing machines that perform a variety of functions such as straight or zigzag stitching, pleating, tacking or serging, clicker die cutters, iron presses, packaging equipment and various table-top or foot operated devices such as eyelet punchers, button covering machines, and hot-stamping foil presses.

This classification excludes establishments engaged in the manufacture of batting, wadding, or waste which are to be reported separately in classification 3708; establishments engaged in manufacturing operations using large factory machinery that performs functions such as, but not limited to, winding/rewinding, blowing, spinning, twisting, braiding, weaving, picking, tufting, quilting, shredding, or grinding, which are to be reported separately in classification 3708; and establishments engaged in the tanning of leather or dressing of fur which are to be reported separately in classification 4301.

[Title 296 WAC—p. 335]

3802-41 Gloves, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of gloves not covered by another classification (N.O.C.) made of fabric or leather on a mass production or quantity basis. Fabric, leather, and sewing notions are purchased from outside sources. Manufacturers may quilt lining materials to the glove fabric on quilting machines. Glove pieces are cut from numerous layers of fabric or leather with a die cutter; printing of a logo or brand name may be applied to pieces prior to stitching. Seamstresses sew the pieces together inside out, adding cuffs or trims. After stitching, each finger is individually turned right-side out on a turner which is a table-mounted device with a vertically moving rod. Gloves are then placed onto heated, hand-shaped molds for steaming and shaping.

This classification excludes establishments engaged in the manufacture of gloves knitted to form on knitting machines which are to be reported separately in classification 3802-42; establishments engaged in the manufacture of rubber gloves made by molding or mixing rubber which are to be reported separately in classification 3513; and establishments engaged in the tanning of leather which are to be reported separately in classification 4301.

3802-42 Knitted fabric or garments or hosiery: Manufacturing

Applies to establishments engaged in the fabrication of knitted cloth, the subsequent manufacture of garments from the knitted cloth, and the manufacture of gloves, mittens, and hats knitted to form on knitting machines on a mass production or quantity basis. Natural or synthetic yarn (also referred to as thread), buttons or other fasteners are received from outside sources. The knit cloth is produced on looms either mechanically or electronically controlled. Circular or flat knitting machines (some of which resemble sewing machines) are also used. The manufacturer of the knitted cloth may make wearing apparel from it, or may sell the knitted cloth to other manufacturers. Garments, such as sweaters, may be knitted to form, or pieces may be cut from the cloth and sewn together. Gloves or mittens are knitted to basic shapes on special machines. Tips of fingers are sewn closed, the glove is turned right side out, then shaped and steamed on electrically heated forms. This classification also applies to the manufacture of hosiery on a mass production or quantity basis. Skeins of natural or synthetic yarn, generally dyed, are received from outside sources. The yarn is unwound onto bobbins or cones, then placed in small circular automatic knitting machines which form the leg and heel. The leg/heel pieces are sewn into a continuous piece, then toes and tops added with looper machines. Hosiery is then washed, dried, shaped. This classification also applies to establishments that perform finishing operations on hosiery that is manufactured by others.

Special note: The looms and knitting machines used to make knitted cloth are generally smaller than the weaving and spinning machines used for the manufacture of woven textile fabrics which are formed into long, continuous lengths and sold in large bolts to cloth goods manufacturers.

3802-43 Leather goods, N.O.C.: Manufacture or repair

Applies to establishments engaged in the manufacture or repair of leather goods not covered by another classification (N.O.C.) including, but not limited to, belts, tack, holsters and other gun carrying accessories, knife sheaths, sports balls, or belts. Products manufactured in this classification can usually be worn or carried on the person and are often made individually. Tanned leather or imitation leather, glue, buckles, hooks, snaps and other fasteners, are purchased from outside sources. Leather may be skived (split) to desired thickness. Items are cut out on small die cutters or by hand, and the edges sanded and smoothed. Depending on the item being made, the leather is bent into shape, glued or sewn either by machine or hand. Imitation leather or vinyl products are sometimes joined by heat sealing instead of gluing or sewing. Items may be dyed, which involves dipping in vats of dye for about 15 or 20 minutes, hanging until dry, then rubbing with rags. Guns are placed inside custom-made holsters and laid in a forming press to form the leather around the gun for a precise fit. Next, items are placed in dryers to dry and cure; then snaps, grommets or other finishing pieces are attached with hand tools. Tools and equipment include cutting blades, edge beveling tools, mallets, snap setters, and other hand tools, die cutters, sanders, sewing machines, forming presses, and small dryers. This classification also applies to establishments engaged in the manufacture and repair of sports balls such as footballs, soccer balls, and basketballs. Leather or vinyl, lining material, bladders (deflated balloon shapes made of synthetic rubber material with valves inserted), twine, thread, foil ribbon, paint, spray cleaners are received from outside sources. Pieces are cut from leather or vinyl on die cutters, sewn together inside out forming a shell, then eyelets are inserted with eyelet punches. Logos or names may be stamped on with a hot foil stamping machine. The seams are pounded out with mallets to smooth them, then the shell is turned right side out on table-mounted turners. The shells are placed onto table-mounted, ball-shaped molds, the bladders inserted, and air blown into the bladders with air compressors, forming the balls. The balls are placed onto holders, laced and closed with twine. Further designs may be applied with paint; balls are cleaned with a spray cleaner before packaging.

This classification excludes the tanning of leather which is to be reported separately in classification 4301 and the manufacture of bladders by rubber mixing or molding which is to be reported separately in classification 3513.

3802-44 Shoe or boot: Manufacturing or repair

Applies to establishments engaged in the manufacture of boots or shoes from raw materials such as leather, imitation leather, lining materials, rubber heels and soles, padding, thread and string, eyelets, tacks, buckles, rubber cement, dyes, waxes and polishes purchased from outside sources. Shoe or boot manufacturers may purchase shoe parts already cut to pattern, or may cut out their own patterns either by hand or on small dies. There are only a few shoemakers in Washington, most of whom make custom, hand-crafted boots or shoes. Operations include measuring feet to make molds or patterns, sewing by hand or machine, gluing, attaching eyelets or studs, tacking the upper pieces to the soles and

heels, smoothing edges with grinders, dyeing, waxing, buffing, brushing and cleaning. Tools and equipment include tack hammers, awls, lasts (foot forms), hand cutting and punching tools, sewing machines, shoe jacks, foot-operated eyelet punching presses, sole stitchers (to stitch soles onto upper pieces), belt sanders and brush finishers. This classification also applies to shoe repair shops which use the same type of materials, tools and equipment used to make shoes and boots. Most shoe repair shops sell shoe accessories such as laces, insoles, polishes, which are usually displayed at the front of the shop; the sale of those items is included within the scope of this classification. The shops usually employ only one or two persons and are often located in malls or strip malls.

This classification excludes the manufacture of molded rubber shoe parts such as heels, soles, which is to be reported separately in classification 3513; establishments engaged in tanning leather which are to be reported separately in classification 4301; and the manufacture of any other materials used in making shoes or boots which is to be reported separately as applicable.

3802-45 Rubber or pliable goods: Manufacturing by cutting or gluing

Applies to establishments engaged in the manufacture of rubber or pliable goods from premanufactured materials by hand cutting, die cutting, gluing, or heat bonding. Items manufactured in this classification include, but are not limited to, gaskets, seals, bindings for skis, grips for pens or handle bars on bicycles or motorcycles. Raw materials which are lightweight, flexible and generally do not exceed about 3/8" thickness or 1" in diameter, include, but are not limited to, neoprene (a man-made rubber), cork, or other compressed sheets made of materials such as felt, paper, foam, plastic, graphite, Teflon, strips of extruded rubber. Many of the products are made simply by die cutting flat materials into the desired shapes. Other products, such as O-rings, are made by cutting lengths of extruded rubber and joining the ends by gluing or heat-bonding them together to form a circle. Grips for pens or handle bars can be made by cutting rubber tubing to length and grinding the ends for a smooth finish.

This classification excludes establishments engaged in the manufacture of rubber products by molding processes which are to be reported separately in classification 3513.

3802-46 Tent, tarp, awning or shade, boat cover or sail: Manufacturing

Applies to establishments engaged in the manufacture or repair of tents, awnings or outside window shades, boat or automobile tops and covers, sails, fruit picking bags, or similar items made from canvas, duck and synthetic water resistant fabrics. Other materials purchased from outside sources include grommets, hooks, tie rope, netting, binding, trimmings, strapping, pipe or tubing, and metal tops for fruit picking bags. Operations include cutting, sewing or fabric welding which joins pieces by heat-sealing the edges, attaching grommets, and bending pipe or rods for frames. Tools and equipment include hand cutting or punching tools, powered material cutters, sewing machines, grommet punchers, pipe cutters and benders, and staplers.

(2001 Ed.)

This classification excludes establishments engaged in the welding of metal awning frames or supports and establishments engaged in the manufacture of metal awnings which are to be reported separately in the applicable metal goods classification; and the installation of any product manufactured in this classification which is to be reported separately in the classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-606, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-606, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-606, filed 5/31/93, effective 7/1/93; 91-12-014, § 296-17-606, filed 5/31/91, effective 7/1/91. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-606, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-606, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-606, filed 11/29/82, effective 1/1/83; Order 75-38, § 296-17-606, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-606, filed 11/9/73, effective 1/1/74.]

WAC 296-17-612 Classification 3808.

3808-00 Upholstery work, N.O.C.

Applies to establishments engaged in upholstery work not covered by another classification (N.O.C.). Upholstery work is the custom finishing of furniture and vehicle interiors with stuffing, cushioning, springs, and covering material. Some sewing is usually necessary. Items upholstered include, but are not limited to, chairs, sofas, foot stools, caskets, and seats for aircraft, automobiles, boats or other recreational vehicles (RVs). Upholstery work becomes part of the furniture or vehicle as opposed to removable pillows or cushions which are not permanently attached to the structure. Upholstery shops also perform refurbishing or renovation work which involves removing the old materials, replacing springs, stuffing or cushioning as necessary, and covering with new material. They might replace a vinyl top, trim molding, striping tape, or door edge guards on a car or boat which is included in this classification when done by employees of an employer subject to this classification. Customers usually bring the furniture or vehicle to the shop for upholstery work. Upholstery shops in this classification may sell some fabric as an incidental part of their operation; however, if any upholstery work is done at the shop, the entire operation is to be reported separately in classification 3808. This classification includes businesses which produce furniture entirely from foam rubber or other cushioning or stuffing, springs, and a covering material.

This classification excludes establishments engaged in the manufacture of mattresses which are to be reported separately in classification 3708; establishments engaged in making "throw pillows or cushions" which are to be reported separately in classification 3802; and establishments engaged in selling upholstery materials (but do no upholstery work) which are to be reported separately in classification 6406.

Special note: Classification 3808-00 may be assigned to physically separated upholstery departments of furniture or casket manufacturers, and automobile, aircraft, or RV manufacturers provided the conditions set forth in the general reporting rule covering the division of worker hours have been met.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-612, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-612, filed

5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-612, filed 11/27/85, effective 1/1/86. Statutory Authority: RCW 51.04.020(1). 83-05-019 (Order 83-5), § 296-17-612, filed 2/9/83; Order 75-28, § 296-17-612, filed 8/29/75, effective 10/1/75; Order 73-22, § 296-17-612, filed 11/9/73, effective 1/1/74.]

WAC 296-17-614 Classification 3901.

3901-00 Bakeries - retail

Applies to establishments engaged in the baking of assorted goods such as, but not limited to, breads, cakes, pies, and pastries for retail sales to walk-in customers. This classification includes "deli" sections in retail bakeries where bakery products, and items such as soups, salads, sandwiches and beverages, are available for on-premises consumption. This classification also contemplates the *occasional* delivery of bakery items such as wedding cakes.

This classification excludes commercial wholesale bakeries that bake products for sale to trade customers such as supermarkets, restaurants, and distributors which are to be reported separately in classification 3906, and specialty bake shops that produce single product lines such as cookies and donuts, which are to be reported separately in classification 3901-01.

3901-01 Bakeries - retail - specialty shops

Applies to establishments engaged in operating specialty bake shops where products are sold exclusively to walk-in retail customers. A specialty bake shop is an establishment that makes and sells a single product line such as cookies, donuts, pies, or bagels to customers for consumption on or away from the premises. This classification includes related sales of beverages, as well as the *occasional* delivery of baked goods.

This classification excludes commercial wholesale bakeries that bake products for sale to trade customers such as supermarkets, restaurants, and distributors which are to be reported separately in classification 3906, and retail bakeries engaged in the baking of assorted goods such as breads, cakes, pies, and pastries, for retail sales to walk-in customers which are to be reported separately in classification 3901-00.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-614, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-614, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-614, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-614, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-17-614, filed 11/30/79, effective 1/1/80; Order 73-22, § 296-17-614, filed 11/9/73, effective 1/1/74.]

WAC 296-17-615 Classification 3902.

3902-00 Fruit and vegetable: Cannery and freezer operations

Applies to establishments engaged in fruit and vegetable canning or freezing operations for wholesale customers. Operations contemplated by this classification include the receipt of fruit and vegetables directly from growers or dealers, preparing produce for canning by removing foreign materials such as leaves or weeds, washing, sterilizing, grading, peeling, slicing, coring, blanching, scalding and pre-cooking, premeasuring, mixing them in a hopper with sugar or other ingredients, and further processing into canned or

frozen products. Pea vining, when performed by employees of a cannery, is also included in this classification.

This classification excludes establishments engaged in evaporating, preserving or dehydrating fruits and vegetables which are to be reported separately in classification 3902-01; establishments engaged in manufacturing fruit juice, cider, jam or jelly which are to be reported separately in classification 3902-02; establishments engaged in packing *fresh* vegetables and fruits which are to be reported separately in classification 2104; and pea vining when done by employees of farm operations or farm labor contractors which is to be reported separately in the applicable farm classification.

3902-01 Fruit and vegetable: Evaporating, preserving or dehydrating

Applies to establishments engaged in evaporating, preserving, or dehydrating fruits and vegetables for wholesale customers. Operations contemplated by this classification include the receipt of fruit and vegetables directly from growers or dealers, washing, peeling, cooking, pressing fruits and vegetables by machine, adding preservatives and congealants, pasteurizing, then dehydrating, drying, or evaporating to remove the moisture which preserves the fruits and vegetables and leaves only the dry, solid portion. Finished products are packaged in cans, plastic bags, or boxes for shipping.

This classification excludes establishments engaged in canning or freezing of fruits and vegetables which are to be reported separately in classification 3902-00; establishments engaged in manufacturing fruit juice, cider, jam or jelly which are to be reported separately in classification 3902-02; establishments engaged in packing fresh vegetables and fruits which are to be reported separately in classification 2104; and farm operations which are to be reported separately in the applicable farm classification.

3902-02 Fruit syrup or juice, cider, jam or jelly: Manufacturing

Applies to establishments engaged in the manufacture of fruit syrup, juice, cider, jam, or jelly. Operations contemplated by this classification include the receipt of fruit directly from growers or dealers, washing, peeling, and cooking the fruit, extracting juice and separating seeds from pulp with fruit presses or separators, adding sugars, congealants and preservatives, pasteurizing, blending juices to produce a variety of flavors, and further processing to produce bottled, canned, or concentrate products.

This classification excludes establishments engaged in canning or freezing of fruits and vegetables which are to be reported separately in classification 3902-00; establishments engaged in evaporating, preserving or dehydrating fruits and vegetables which are to be reported separately in classification 3902-01; and farm operations which are to be reported separately in the applicable farm classification.

3902-11 Chocolate, cocoa, corn products: Manufacturing

Applies to establishments engaged in the manufacture of cocoa or chocolate such as Dutch or sweet chocolate or of corn products such as, but not limited to, tortillas. Operations contemplated by this classification include receipt of corn and cocoa beans from growers or dealers, processing opera-

tions, testing, packaging and shipping. Foreign matter is removed from the cocoa beans and they are sorted, divided, cleaned, and roasted in ovens. Shells are cracked, usually by machines, and the beans examined to ensure quality. Depending on the products being manufactured, beans may be pasteurized, ground, further dried, mixed with chocolate liquor, sugar, powdered milk, cocoa butter, or potassium solutions to make into finished products. Depending on the corn product being made, ingredients are pressed, kneaded, cut, shaped or flattened, and baked or cooked.

This classification excludes establishments engaged in the manufacture of crackers, potato chips, ravioli, tamale, and pasta, or chocolate candy and confections which are to be reported separately in classification 3906, and farm operations which are to be reported separately in the applicable farm classification.

3902-12 Baking powder, dextrine, glucose and starch: Manufacturing

Applies to establishments engaged in the manufacture of baking powder, dextrine, glucose and starch. Operations contemplated by this classification include the receipt of vegetables and grains, such as, but not limited to, potatoes, corn, and wheat from growers or dealers, processing operations, testing, storing finished products in storage tanks, packaging into drums or cans, and shipping. Vegetables or grains are cleaned, sorted, and foreign matter removed. They are dumped onto conveyors and transported to grinding machines where they are ground into a starch paste. Water may be added to make liquid starch or starch milk or dryers may remove excess moisture. Starch blends may be made from raw starch suspensions using chemical solutions. Shakers remove bran, gluten or other particles from the starch suspension. Dextrine is made by further mixing the starch with dextrine paste, adding chemicals, cooking and stirring until the starch is converted to dextrine. Baking powder is made by mixing baking soda, starch, and an acid compound such as cream of tartar.

This classification excludes establishments engaged in the manufacture of food sundries not covered by another classification which are to be reported separately in classification 3902-14 and farm operations which are to be reported separately in the applicable farm classification.

3902-13 Nut shelling, egg breaking, coconut shredding and peanut handling

Applies to establishments engaged in nut shelling, egg breaking, coconut shredding, and peanut handling. Nuts are received from suppliers in bulk and placed into machinery which cracks shells and separates broken shells from the nut meat. Another machine sorts whole nut meats from those that are chipped, broken, or contaminated. At each machine, nuts are examined for rejects, and foreign matter is removed with a vacuum hose or by hand. They may be chopped, sliced, or left whole, then poured from the machines into sacks or containers. The meats of certain nuts, such as almonds, may be ground into meal, then canned for shipment. This classification also includes the grading and polishing of nuts, and shredding of coconuts. Egg breaking machines break eggs and separate the yolk from the white. They are

observed for color, quantity, and clarity; inferior yolks or whites are discarded prior to being automatically dropped onto separator trays with individual cups. Eggs may then be mixed with water, pasteurized or dried prior to packaging.

This classification excludes establishments engaged in the manufacture of oils which are to be reported separately in classification 3902-27 and establishments engaged in the manufacture of food sundries which are to be reported separately in classification 3902-14.

3902-14 Food sundries, N.O.C.: Manufacturing or processing

Applies to establishments engaged in the manufacture of a variety of miscellaneous food products not covered by another classification (N.O.C.). Products include, but are not limited to, imitation crab, spices, peanut butter, condiments, salsa, salad dressings, mayonnaise, soups, tofu, instant potatoes, salads and certain ready-to-eat dishes that are usually sold to wholesale distributors. This classification also applies to the grinding and roasting of coffee beans. Operations contemplated by this classification include the receipt of raw ingredients from growers or dealers, processing operations, testing, quality control, laboratory operations, packaging and shipping. Individual processes, which vary depending on the product being manufactured, include, but are not limited to, cleaning, dividing, grinding, mixing, blending with other ingredients, cooking, cooling, dividing again into desired portions, and packaging. The products are packaged in plastic bags, bottles, or cans, usually by machine. Some products require vacuum sealing, pasteurizing, or freezing.

This classification excludes establishments engaged in the manufacture of crackers, potato chips, ravioli, tamale, pasta, cough drops, confectionery, and chewing gum which are to be reported separately in classification 3906 and farm operations which are to be reported separately in the applicable farm classification.

3902-15 Pickles and sauerkraut: Manufacturing

Applies to establishments engaged in the manufacture of pickles and sauerkraut. Operations contemplated by this classification include the receipt of produce from growers or dealers, processing operations, testing, laboratory operations, packaging and shipping. Produce, such as cucumbers and cabbage, is cleaned, cut, chopped and placed in barrels, vats, or tanks of brine (a mixture of salt, sugar, spices, vinegar) until cured. At the end of curing period, product may be packed into glass jars, plastic bags, or cans. This classification also applies to the pickling of fruits or vegetables such as, but not limited to, tomatoes, peppers, and asparagus.

This classification excludes establishments engaged in canning or freezing of fruits and vegetables which are to be reported separately in classification 3902-00; establishments engaged in evaporating, preserving or dehydrating fruits and vegetables which are to be reported separately in classification 3902-01; establishments engaged in packing fresh vegetables and fruits which are to be reported separately in classification 2104; and farm operations which are to be reported separately in the applicable farm classification.

3902-17 Pet food: Manufacturing

Applies to establishments engaged in the manufacture of frozen or canned pet foods. Operations contemplated by this classification include the receipt of raw ingredients, processing operations, packaging and shipping. After bones and foreign matter are removed, raw ingredients are cleaned and ground. Depending on the product, various ingredients such as, but not limited to, animal meat and fat, fish by-products, cornmeal, soybean meal, ground wheat, rice, poultry, yeast, whey, salt, acids, chemicals, minerals, vitamins, water, or oil are mixed in large vats either by machine or by hand. Mixture is frozen or baked, dried, and packed into cans.

This classification excludes establishments engaged in the manufacture of dry pet food using a milling process which is to be reported separately in classification 2101 and farm operations which are to be reported separately in the applicable farm classification.

3902-24 Breakfast food: Manufacturing

Applies to establishments engaged in the manufacture of breakfast foods such as cereals or breakfast bars. Operations contemplated by this classification include the receipt of ingredients, processing operations, quality control, laboratory operations, packaging, and shipping. Flour, meal, or milled grains such as, but not limited to, corn, oats, barley, wheat, and nuts are mixed with other ingredients, formed into a dough, rolled out and extruded into flakes or other shapes. Pressure cylinders may be used to expand or puff whole grains. Cereals may be sifted through screens to check for size, color, and uniformity or otherwise tested for quality, then baked or dried in bulk prior to packaging.

This classification excludes establishments engaged in the manufacture of wholesale bakery goods which are to be reported separately in classification 3906; establishments engaged in milling or grinding operations which are to be reported separately in classification 2101; and farm operations which are to be reported separately in the applicable farm classification.

3902-26 Poultry canning and canneries, N.O.C.

Applies to establishments engaged in canning poultry or canning operations not covered by another classification (N.O.C.). Operations contemplated by this classification include the receipt of poultry or other products, processing operations, quality control, laboratory operations, packaging, and shipping. The process includes, but is not limited to, washing, cutting or chopping, and cooking poultry or other foods items. Preservatives or flavorings may be added before product is sealed in cans or jars.

This classification excludes establishments engaged in canning or freezing fruits or vegetables which are to be reported separately in classification 3902-00 and establishments engaged in canning or dehydrating meat products which are to be reported separately in classification 4301.

3902-27 Vegetable oil or butter substitutes: Manufacturing

Applies to establishments engaged in the manufacture of salad or vegetable oils, shortening, margarine or other butter substitutes. Operations contemplated by this classification include the receipt of seeds or beans from growers or through dealers, processing operations, quality control, laboratory

operations, packaging and shipping. To make oils, soybeans, cottonseeds, safflower seeds, or shelled corn is cracked, ground, milled, steam cooked, and pressed to extract the oil. Depending on the product being made, other ingredients such as water, milk, powdered milk or salt may be blended with the oil, then heated, filtered, and filled into cans or bottles. To make shortening or butter substitutes, flavoring, catalytic agents, and chemicals are added to harden the oils; some products are kneaded to spread the coloring uniformly; then they are packaged in cans, plastic containers, or wrapped in plastic or foil. Machinery includes, but is not limited to, grinders, screens, presses, extractors, dryers, and conveyors.

This classification excludes establishments engaged in the manufacture of "real" butter which are to be reported separately in classification 4002 and farm operations which are to be reported separately in the applicable farm classification.

[Statutory Authority: RCW 51.16.035, 51.04.020.00-14-052, § 296-17-615, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035.99-18-068, § 296-17-615, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-615, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-615, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-615, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-615, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-615, filed 11/29/82, effective 1/1/83; Order 75-38, § 296-17-615, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-615, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-615, filed 11/9/73, effective 1/1/74.]

WAC 296-17-616 Classification 3903.

3903-08 Sugar refining; molasses and syrup, N.O.C.: Manufacturing

Applies to establishments engaged in processing (milling) sugar cane and sugar beets into various forms of powdered and granulated sugar, and the manufacture of molasses and sugar syrups not covered by another classification (N.O.C.). Operations contemplated by this classification include the receipt of sugar cane or sugar beets directly from growers or dealers, crushing or rolling cane to obtain the juice or washing, slicing, and cooking the beets to obtain the juice, evaporating the juice to produce a crystallized substance, and further processing to produce the final product such as granular sugar, white powdered sugar, and brown sugar. Common by-products of a sugar refining operation are molasses and sugar syrups. In some cases an establishment may produce only the sugar syrup and/or molasses, not the crystallized forms of sugar. This classification applies to all of the above operations as the processes to produce sugar syrup and molasses products are similar to those used to produce crystallized sugar.

This classification excludes establishments engaged in the manufacture of fruit syrup, juice, cider, jam or jelly which are to be reported separately in classification 3902.

[Statutory Authority: RCW 51.16.035.98-18-042, § 296-17-616, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-616, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-616, filed 11/9/73, effective 1/1/74.]

WAC 296-17-618 Classification 3905.

3905-00 Restaurants, N.O.C.

Applies to establishments engaged in restaurant operations not covered by another classification (N.O.C.). These

establishments are "traditional, family or full service" restaurants that provide sit-down services, or cafeteria or buffet style meals. This classification includes the preparation and service of food and beverages. Establishments in this classification may serve beer and wine; however, they are prohibited from selling spirits or hard liquor. Typical occupations include, but are not limited to, hostesses, waiters, waitresses, cooks, busboys, dishwashers, cashiers, and managerial staff. This classification also includes the preparation of "take-out food" that customers pick up directly from the restaurant for consumption away from the premises and the operation of a card room in conjunction with the restaurant.

This classification excludes establishments engaged in operating restaurants or lounges that sell spirits or hard liquor which are to be reported separately in classification 3905-07, and catering services that are not part of the restaurant operation which are to be reported separately in classification 3909.

Special note: Traditional, family or full service restaurants are establishments where wait persons bring customers a menu, take orders, and deliver prepared meals to the customer's table or where customers choose from a variety of food items from a buffet or cafeteria style service. Such establishments will generally use nondisposable eating utensils and plates to serve food as opposed to throw away paper plates and plastic eating utensils. Care should be exercised when dealing with establishments that provide entertainment such as musicians, entertainers, disc jockeys or piano players who may be exempt from coverage as an independent contractor. Musicians or entertainers who are considered to be employees of a restaurant are to be reported separately in classification 6605.

3905-01 Food, drink, and candy vending concessionaires at theatres, parks, tracks, and exhibitions

Applies to establishments engaged in operating food, drink or candy concessions at ball parks, race tracks, theaters and exhibitions. This classification is applicable only to concession operations which are operated independent from the facility or event at which the concession service is being provided. These independent vendors selling food items are not employees of the facility or site where the event or exhibition is taking place. Vendors subject to this classification sell a variety of food, snack and beverage items from booths, mobile push carts, mobile stands, carrying boxes, or trays.

This classification excludes food and beverage operations (concession stands) operated in connection with an event or facility by employees of the event sponsor or facility operator which are to be reported separately in the classification applicable to the event or exhibition; street vendors or route food services which are to be reported separately in classification 1101; vendors of nonfood items which are to be reported separately in the applicable classification; and vending machine service companies that replenish food, snack and beverage products which are to be reported separately in classification 0606.

3905-03 Commissaries and restaurants with construction, erection, logging or mine operations

Applies to commissary or restaurant operations conducted *exclusively* in connection with a construction, errec-

tion, logging or mining camp operation. This classification is limited to food preparation services provided at a camp site or at a mess hall used to feed employees of the construction, logging, erection, or mining company. The foods prepared and served are not intended for, or offered to, the general public.

Special note: The purpose of this classification is to provide employees engaged in the food preparation activity with a classification representative of the work being performed, even though such activities may be occurring at or adjacent to the construction, logging, erection or mining site as provided for in the general reporting rule covering general inclusions.

3905-04 Eating establishments, N.O.C. such as public lunch counters in stores

Applies to establishments not covered by another classification (N.O.C.) engaged in operating lunch counters and restaurants within a retail store location. Use of this classification is limited to employees of an employer who also operates the retail store where the food service is located.

3905-06 Taverns

Applies to establishments engaged in the operation of a tavern. A tavern is primarily engaged in the sale of beer and wine for on-premises consumption, and may also provide a variety of foods ranging from peanuts and pretzels to hot food dishes. Typical occupations include, but are not limited to, bartenders, waiters, waitresses, cooks, busboys, dishwashers, and managerial staff. Beer may also be sold by the keg with the rental of necessary taps and pumps. This classification includes the operation of a "beer garden" at special events such as, but not limited to, fairs or race meets, and the operation of a card room in connection with the tavern.

This classification excludes restaurants with a license to sell spirits or hard liquor which are to be reported separately in classification 3905-07.

Special note: Care should be exercised when dealing with establishments that provide entertainment such as musicians, entertainers, disc jockeys or piano players who may be exempt from coverage as an independent contractor. Musicians or entertainers who are considered to be employees of a tavern are to be reported separately in classification 6605.

3905-07 Restaurants serving spirits or hard liquor

Applies to establishments engaged in the operation of a restaurant having a license to sell spirits or hard liquor, beer and wine in connection with their food preparation and service. This classification includes the preparation and service of food and beverages at sit down restaurants and lounges. Such establishments have extensive cooking facilities and equipment to prepare full meals. Typical occupations covered by this classification include, but are not limited to, bartenders, hostesses, waiters, waitresses, valet parking attendants, cooks, busboys, dishwashers, cashiers, and managerial staff. This classification also includes the preparation of "take-out food" that customers pick up directly from the restaurant for consumption away from the premises and the operation of a card room in connection with the restaurant.

This classification excludes establishments engaged as a restaurant without a license to sell spirits or hard liquor which are to be reported separately in classification 3905-00; taverns which are to be reported separately in classification

3905-06; catering services which are not part of a restaurant operation which are to be reported separately in classification 3909; musicians who are to be reported separately in classification 6605; and entertainers such as dancers who are to be reported separately in classification 6620.

Special note: Care should be exercised when dealing with establishments that provide entertainment such as musicians, entertainers, disc jockeys or piano players who may be exempt from coverage as an independent contractor. Musicians or entertainers who are considered to be employees of a restaurant are to be reported separately in classification 6605.

3905-08 Pizza parlors

Applies to establishments engaged in operating a pizza parlor or restaurant. Establishments subject to this classification specialize in the preparation and sales of pizza (but may also provide other foods) and beverages such as wine, beer, or soft drinks for on-premises consumption. Typical occupations include, but are not limited to, hostesses, waiters, waitresses, cooks, busboys, dishwasher, cashiers, and managerial staff. This classification also includes establishments that deliver pizza to customers, or where customers can pick up already prepared pizza at the shop, but where no customer seating is provided.

This classification excludes pizza parlors with a license to sell spirits or hard liquor which are to be reported separately in classification 3905-07 and U-bake pizza operations which are to be reported separately in classification 6403.

Special note: Care should be exercised when dealing with establishments that provide entertainment such as musicians, entertainers, disc jockeys or piano players who may be exempt from coverage as an independent contractor. Musicians or entertainers who are considered to be employees of a pizza parlor are to be reported separately in classification 6605.

3905-09 Fast food drive-ins, N.O.C.

Applies to establishments engaged in the operation of fast food drive-ins or restaurants. These establishments serve easily prepared foods quickly and nonalcoholic beverages which can be eaten on the premises or picked up by customers at a counter or a drive through window. Fast food establishments offer a variety of menu items such as, but not limited to, hamburgers, french fries, tacos, sandwiches, fried chicken, hot dogs, fish and chips.

This classification excludes street vendors and/or route food services which are to be reported separately in classification 1101 and full service restaurants which are to be reported separately in classification 3905-00.

3905-11 Soft drink lounges

Applies to establishments engaged in operating soft drink lounges. These types of establishments may provide entertainment such as dancing for an adult audience or a place where youths under the age of 21 can dance or listen to music. These lounges do not sell alcoholic beverages. This classification includes the preparation and service of light snacks and hors d'oeuvres, such as chips, peanuts, pretzels or finger sandwiches.

This classification excludes entertainers such as exotic dancers who are to be reported separately in classification

6620 and musicians who are to be reported separately in classification 6605.

Special note: Care should be exercised when dealing with establishments that provide entertainment such as musicians, entertainers, disc jockeys or piano players who may be exempt from coverage as an independent contractor. Musicians or entertainers who are considered to be employees of a lounge are to be reported separately in classification 6605 or 6620 as applicable.

3905-12 Ice cream parlors

Applies to establishments engaged in the operation of an ice cream parlor or frozen yogurt shop. These specialty shops offer a limited menu, usually confined to ice cream and frozen yogurt offered in individual servings, various size containers, and specialty items. Special occasion ice cream cakes may be ordered and picked up at a later date by the customer. These establishments usually provide customer seating.

This classification excludes street vendors and/or route food services which are to be reported separately in classification 1101.

3905-13 Candy, nut, and popcorn retail stores with on-premises manufacturing

Applies to establishments engaged in operating candy, nut or popcorn stores where some or all the products sold are manufactured on the premises. Establishments in this classification may sell a variety of candies, nuts, or popcorn, or may specialize in one or two products. They may also sell their products in gift wrapped packages.

This classification excludes establishments engaged in selling candy, nuts, or popcorn, *that do not manufacture* any product on the premises, which are to be reported separately in classification 6406, and establishments primarily engaged in the wholesale manufacturing of candy which is to be reported separately in classification 3906.

3905-14 Espresso/coffee stands and carts

Applies to vendors operating espresso or coffee stands or carts. Products sold include, but are not limited to, coffee, espresso, lattes, Italian sodas, soft drinks, pastries and pre-packaged items. These types of vendors *do not prepare food*. This classification is distinguishable from retail coffee, tea or spice stores in that coffee stands or carts in classification 3905 sell only ready-to-serve products; they do not sell packaged coffee, tea or spice items.

This classification excludes street vendors and/or route food services which are to be reported separately in classification 1101.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-618, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-618, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-618, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-618, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-618, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-618, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-618, filed 11/29/82, effective 1/1/83; Order 75-38, § 296-17-618, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-618, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-618, filed 11/9/73, effective 1/1/74.]

WAC 296-17-61801 Classification 3906.**3906-00 Bakeries, N.O.C.**

Applies to establishments engaged in the manufacture of baked goods not covered by another classification (N.O.C.) such as, but not limited to, bread, rolls, tarts, pies, cakes, cookies, bread stuffing and bread crumbs, for sale to supermarkets, restaurants, distributors, and other wholesale customers. Processes for making baked goods vary somewhat, but most are similar to that of baking bread. To make bread, ingredients such as, but not limited to, flour, water, salt, leavening, eggs, milk, sugar, shortening, and preservatives are mixed by machine or by hand and formed into dough. The dough is fed into a hopper which further kneads it and shapes it into a ball. Molders shape the dough balls into cylinders that are ready to be placed in pans. Automatic loaders move the pans through tunnel ovens. After baking, products are mechanically sliced and wrapped, then shipped to customers as quickly as possible due to the relatively short shelf life of baked goods. Machinery includes, but is not limited to, dough troughs, cake depositors, filler and icing machines, conveyors, deep fryers, bun machines, molders, ovens, mixers, flour dust collectors, and racks.

This classification excludes retail bakeries which are to be reported separately in classification 3901; route delivery drivers who are not employees of the bakery who are to be reported separately in classification 1101; and establishments engaged in the manufacture of other foods which are to be reported separately as applicable.

3906-01 Cracker: Manufacturing N.O.C.

Applies to establishments engaged in the manufacture of crackers, and other "dry" bakery products not covered by another classification (N.O.C.) such as, but not limited to, biscuits, wafers, and pretzels for sale to supermarkets, restaurants, distributors and other wholesale customers. Depending on the specific product being made, ingredients such as, but not limited to, flour, sugar, water, salt, soda, yeast, flavorings, and additives are mixed together and formed into dough. The dough is fed through a hopper into a roller, then shaped into product and baked in ovens. Machinery includes, but is not limited to, mixers, ovens, conveyors, packaging and package-handling equipment.

This classification excludes retail bakeries which are to be reported separately in classification 3901 and route delivery drivers who are not employees of the dry bakery goods manufacturer who are to be reported separately in classification 1101.

3906-02 Potato chip: Manufacturing N.O.C.

Applies to establishments engaged in the manufacture of potato chips and similar snack foods not covered by another classification (N.O.C.) such as, but not limited to, fried corn or cheese chips for sale to wholesale customers. To make potato chips, potatoes are washed, sliced, salted, and fried in cooking vats. Automatic rakes stir the potato slices to ensure uniform cooking. As chips emerge from the vats onto conveyors, they are inspected for color and quality. Burned, discolored, or broken chips are discarded; the rest are packaged for sale. Other types of fried chips are made by mixing dry ingredients which are then deep fried, inspected and pack-

aged. Machinery includes, but is not limited to, slicing equipment, mixers, deep fryers or cooking vats, pan greasers, ovens, conveyors, packaging and package-handling equipment. This classification includes delivery of the product when done by employees of an employer subject to this classification.

This classification excludes route drivers who are not employees of the chip manufacturer who are to be reported separately in classification 1101.

3906-03 Ravioli and tamale: Manufacturing

Applies to establishments engaged in the manufacture of ravioli, tamales, tortellini or similar frozen or ready-to-cook foods, for sale to wholesale customers. Ingredients include, but are not limited to, cornmeal, flour, ground meats, cheeses, seasonings, tomatoes or tomato paste, sauces, and corn husks. Depending on the specific product being made, ingredients are mixed together, placed in shells, pasta or corn husks, or otherwise prepared, cooked, inspected, wrapped, packaged and, in some cases, frozen. Machinery includes, but is not limited to, mixing or blending machines, deep fryers or cooking vats, ovens, conveyors, packaging and package-handling equipment, and freezers.

This classification excludes route drivers who are not employees of the food product manufacturer who are to be reported separately in classification 1101.

3906-04 Pasta: Manufacturing

Applies to establishments engaged in the manufacture of pasta products such as, but not limited to, macaroni, spaghetti, or noodles for sale to supermarkets, restaurants, distributors and other wholesale customers. Ingredients such as, but not limited to, flour, sugar, salt, seasonings, preservatives, oils, and water are mixed in mixing machines to form the dough. The dough is further mixed and kneaded, pressed through rollers to regulate thickness, cut with machinery or by hand to desired size and shape, then wrapped in cellophane or packaged in cartons. Machinery includes, but is not limited to, dough mixers, dough kneaders, rollers, cutting and slitting machines, hydraulic presses, ovens, conveyors, and packaging and package-handling equipment.

This classification excludes route drivers who are not employees of the manufacturer who are to be reported separately in classification 1101.

3906-05 Confectionery, chewing gum or cough drop: Manufacturing

Applies to establishments engaged in the manufacture of confectionery products, chewing gum or cough drops for sale to wholesale customers. Confections include, but are not limited to, candies such as creams, caramels, mints, hard candies, gum drops, glazed fruits, nut brittle, a wide variety of chocolate candy, and molded sugar cake decorations, such as, but not limited to, rosettes, candle holders, and colorful edible images used to decorate cakes or cookies. This classification includes both cooked and uncooked confection products. Because of the variety of candies and confections included in this classification, preparation and finishing processes which individualize the product may vary widely. Ingredients include, but are not limited to, sugar, flour, starch, nuts, milk, water, flavorings, cocoa, and coloring. Depending on spe-

cific product being made, ingredients are weighed, mixed or beat. Further processing may include heating, pressure cooking, baking, or forming uncooked mixtures (referred to as "paste" or frosting) into products by twirling, pressing, molding, or otherwise shaping. Confection products may be individually wrapped or packed in boxes, cans, trays, or other containers. Machinery includes, but is not limited to, ranges, burners, various sized kettles, pots, pressure cookers, trays, mixing, cutting, or filling machines, hoppers, conveyors, die cutters, presses, coolers, and packaging and package-handling equipment. The manufacture of chewing gum and cough drops is similar although ingredients vary somewhat.

This classification excludes route drivers who are not employees of the confection manufacturer who are to be reported separately in classification 1101; candy store operations with on-premise manufacturing which are to be reported separately in classification 3905-13; and candy store operations with no manufacturing which are to be reported separately in classification 6406.

3906-07 Pizza: Manufacturing, N.O.C.

Applies to establishments engaged in the manufacture of frozen or ready-to-bake pizza not covered by another classification (N.O.C.) for sale to wholesale customers. Dough is mixed and rolled out to form the crust; sauce and a variety of toppings such as meats, cheese, vegetables are arranged on top of the crust. Pizzas are wrapped in plastic wrap, packaged, and stored in freezers prior to delivery. Machinery includes, but is not limited to, mixers, rolling devices, ovens, conveyors, packaging and package-handling equipment, and freezers.

This classification excludes route drivers who are not employees of the pizza manufacturer who are to be reported separately in classification 1101; pizza parlors which are to be reported separately in classification 3905; and U-bake pizza stores which are to be reported separately in classification 6403.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-61801, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-61801, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-61801, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-61801, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-17-61801, filed 11/30/79, effective 1/1/80.]

WAC 296-17-61804 Classification 3909.

3909-00 Caterers

Applies to establishments engaged in catering operations. This classification includes the preparation and serving of food and beverages for customers who have arranged for their services for social and business events such as weddings, parties, bar mitzvahs, meetings or banquets. Foods prepared and served range from deli trays, sandwiches, box lunches, and buffets, to full meals. The food may be prepared at the caterer's own facility and delivered to the customer's location or may be prepared at the customer's location. Catering services include, but are not limited to, event planning, arranging tables, decorations, supplying utensils and dishes, bartending, waiting and bussing tables, and taking care of left-over food and related clean-up after the event. This classification also includes catering to airlines which involves prepar-

ing various foods and direct delivery to the airline with special trucks that maintain hot or cold foods. This classification also applies to food services provided by communities or civic/social organizations to local residents who, because of physical disability or age, are unable to prepare their own food. The food is prepared and delivered to the client's home.

This classification excludes street vendors or route food services which are to be reported separately in classification 1101.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-61804, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-61804, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-61804, filed 11/27/85, effective 1/1/86; 82-24-047 (Order 82-38), § 296-17-61804, filed 11/29/82, effective 1/1/83.]

WAC 296-17-619 Classification 4002.

4002-00 Dairy products, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of dairy products not covered by another classification (N.O.C.) such as, but not limited to, whole, low fat, skim, powdered, flavored and condensed milk, buttermilk, cream, half-and-half, and eggnog. Raw milk may be purchased from others or furnished by the manufacturer's own dairy operation. Other ingredients usually purchased elsewhere include, but are not limited to, flavorings, sweeteners, nutrients, bacteria and yogurt cultures, and paper, glass or plastic containers for packaging finished products. Raw milk is delivered by insulated tanker trucks after it is tested for antibiotics, bacteria and microorganism counts, temperature, and fat content. The raw milk is pumped from the trucks into refrigerated silos or tanks; the cream is skimmed from the top and pumped into separate storage tanks for further blending to ensure the correct fat and nutrient content. The remaining milk may be evaporated, homogenized, pasteurized, cooled, tested for quality, and further processed into various milk products which are filled into gallons, half gallons, quarts, pints and half-pint containers and packaged for shipping. This classification includes the incidental manufacture of butter, ice cream, or cheese products when done by employees of an employer subject to this classification.

This classification excludes establishments primarily engaged in the manufacture of butter, cheese, ice cream and ice cream mixes which are to be reported separately in classification 4002-01 and dairy farming operations which are to be reported separately in classification 7301.

4002-01 Butter, cheese, ice cream and ice cream mix: Manufacturing

Applies to establishments engaged in the manufacture of dairy products such as, but not limited to, butter, natural or processed cheeses, cottage cheese, cheese dips or spreads, custards, whipped topping, ice cream, milkshake or ice cream mixes, ice milk, sherbet. Raw milk may be purchased from others or furnished by the manufacturer's own dairy operation. Other raw materials usually purchased elsewhere include, but are not limited to, flavoring, coloring agents, salts, additives and preservatives, plastic or oiled wrappings, and paper, glass or plastic containers for packaging finished product. Raw milk is delivered by insulated tanker trucks

and pumped from the trucks into refrigerated silos or tanks. Initial processes are similar for products manufactured in this classification, but end processes vary, depending on the product being made. To make cheese, raw milk is heat treated and pasteurized, cooled, moved through separators which adjust fat composition by skimming the milk or adding cream, then pumped into vessels or cheese vats. Lactic acid and enzymes are added to purify and clot the milk and form a gel which is cut into tiny cubes. Other additives, preservatives, or flavorings may be added at this point. The mixture of curds and whey (the liquid by-product lost from curds after cutting) is heated by allowing steam to enter the outer jacket of the vat. The mixture is stirred, whey is drained from curds and transported to evaporators and spray dryers which condense the whey into a powder form. Aside from salting, little more is done to curds to make unripened cheeses such as cream cheese or cottage cheese. When making firmer cheeses, the next step involves knitting or stretching the drained curds for texture. This process will vary according to the type of cheese being produced, but activities commonly involve preliminary packing, pressing or pulling of the curds in hot water, or turning curd blocks (called "cheddaring"). The curd blocks are milled (cut into finger-sized pieces) and moved through a trough or air block through tubing to other vats for further processing. In other processes, curds are collected in hoops (metal containers lined with cloth or plastic) and pressed into blocks or molds, or barrels. Hydraulic presses are used to press cheese, and vacuum chambers may be used to remove air. Cured cheese blocks may be packaged in corrugated cartons, or cut into smaller blocks, vacuum sealed in plastic, then packaged in boxes, or cut or shredded prior to packaging.

This classification excludes establishments primarily engaged in the manufacture of milk and other related dairy products not covered by another classification which are to be reported separately in classification 4002-00; establishments engaged in the manufacture of cheese-based salad dressings which are to be reported separately in classification 3902; and dairy farming operations which are to be reported separately in classification 7301.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-619, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-619, filed 5/31/96, effective 7/1/96; 87-12-032 (Order 87-12), § 296-17-619, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-619, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-619, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-619, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-619, filed 11/9/73, effective 1/1/74.]

WAC 296-17-620 Classification 4101.

4101-00 Printing, lithography, engraving, map printing and silk screening, N.O.C.

Applies to establishments engaged in providing a variety of printing services not covered by another classification (N.O.C.) to others. Operations contemplated include, but are not limited to, the press room, assembly and staging areas, shipping departments, and delivery. *Printing*: This category covers many types of printing including offset cold press and letterpress printing. *Lithography*: This category of printing is similar to letterpress printing with the process used to transfer images to paper (stock) being the distinction. In let-

terpress printing the image is transferred directly from plate to stock. In lithography an additional cylinder containing a rubber blanket is used. The process is plate to blanket to stock. *Engraving*: This applies to a process wherein designs or images are incised into the surface of a material from which printing impressions can be made. *Map printing*: This applies to an end product produced by a printer rather than a specialty form of printing. *Silk screening (or screen printing)*: This applies to a specialty type of printing wherein a silk, nylon or metal screen contains the desired image and ink is forced through the screen to form the design on paper or other medium. Products produced by establishments subject to this classification include, but are not limited to, catalogs, booklets, pamphlets, brochures, books, letterhead, paper signs, and specialty invitation and business cards.

This classification excludes photographic composition or prepress work such as, but not limited to, photographic or computerized typesetting, layout, paste up, editing, proofreading, camera work and automated plate making which are to be reported separately in classification 4904. *Employees of an employer subject to this classification who have both photographic composition/prepress work duties and duties which are subject to this classification (4101) are to be reported separately in classification 4101 without a division of work hours.* This classification also excludes newspaper publishers who are to be reported separately in classification 4103 and establishments engaged in cloth printing operations which are to be reported separately in classification 3802.

4101-02 Rubber stamp: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of all types of rubber or synthetic rubber stamps or marking devices for others. Products produced by establishments subject to this classification include, but are not limited to, date, character, name and address stamps. Stamps may be produced by hand or machine and can be made from a variety of natural or synthetic materials. Finished stamps are attached to handles or coverings purchased from others.

4101-03 Bookbinding

Applies to establishments engaged in bookbinding and/or the restoration of old or damaged books using methods similar to those employed by bookbinders described by this classification. One definition of bookbinding is all further treatment of stock after printing which may include cutting, folding, trimming, gathering, stitching, gluing and casing. There are two general types of binding: Pamphlet binding and bookbinding. Pamphlet binding is used for such material as folders, booklets, catalogs and magazines. An automatic feeder carries the sheets to a folding machine. After folding, the sheets can be collated either by hand or by machine and either saddle-wire or side-wire stitched, depending on the thickness of the material being bound. There are a number of ways to bind a book, the most common being "edition" binding, also known as hard cover or cases binding, where the papers are sewn together by specialized sewing machines. This process is used when permanence is desired. "Perfect" binding is a less expensive type of binding as it requires no sewing or stitching and uses a pliable adhesive for binding.

This classification excludes photographic composition or prepress work such as photographic or computerized typesetting, layout, paste up, editing and proofreading, camera work and automated plate making which is to be reported separately in classification 4904. *Employees of an employer subject to this classification who have both photographic composition and/or prepress duties and duties which are subject to this classification (4101) are to be reported in classification 4101 without a division of work hours.*

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-620, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-620, filed 5/31/96, effective 7/1/96; 87-12-032 (Order 87-12), § 296-17-620, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-620, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-620, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-620, filed 11/29/82, effective 1/1/83; 81-24-042 (Order 81-30), § 296-17-620, filed 11/30/81, effective 1/1/82. Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-17-620, filed 11/30/79, effective 1/1/80; Order 75-38, § 296-17-620, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-620, filed 11/9/73, effective 1/1/74.]

WAC 296-17-622 Classification 4103.

4103-01 Newspaper publishing

Applies to establishments engaged in publishing daily or periodic newspapers. This classification includes the printing, distribution and general maintenance activities of the newspaper. The printing operation usually consists of one of three processes: Offset lithography, letterpress, or flexography. After the papers are printed, they are cut, folded and stacked either manually or by computer-operated machinery. Route managers then distribute the papers to door-to-door carriers or independent route delivery drivers. Typical occupations covered by this classification include bindery workers, press operators, freight handlers, machine feeders, production helpers, maintenance workers and drivers.

This classification excludes photo composition or prepress work such as photographic or computerized typesetting, layout, paste up, editing, proofreading, camera work and automated platemaking which is to be reported separately in classification 4904; outside reporters, photographers, sales personnel, advertising staff and circulation solicitors who are to be reported separately in classification 6303; and establishments engaged in printing operations for newspapers published by other firms which are to be reported separately in classification 4101.

Special note: Newspapers without any printing operations are governed by the general reporting rule covering businesses described by a standard exception classification. *Employees of an employer subject to this classification who have both photographic composition/prepress work duties and duties which are subject to this classification (4101) are to be reported separately in classification 4101 without a division of work hours.*

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-622, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-622, filed 5/31/96, effective 7/1/96; 87-12-032 (Order 87-12), § 296-17-622, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-622, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-622, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-622, filed 11/30/83, effective 1/1/84; Order 75-38, § 296-17-622, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-622, filed 11/9/73, effective 1/1/74.]

[Title 296 WAC—p. 346]

WAC 296-17-626 Classification 4107.

4107-04 Business machine: Service, adjustment, repair, and installation, N.O.C.

Applies to establishments engaged in the adjustment, service, or repair of business machines not covered by another classification (N.O.C.). Types of business machines include, but are not limited to, typewriters, copy, postage meters, keypunch, fax machines, computer components, X-ray and other medical-related electronic equipment. Work contemplated by this classification includes low voltage rewiring to the point of connecting to the live circuit. This classification includes all work performed on the customer's premises as well as in the employer's shop. This classification also includes service or repair of depth finders, radar, computerized or noncomputerized embroidery machines and the replacement or refilling of *nontoxic* toner in printer cartridges which is sometimes referred to as *remanufacturing*. The plate is removed from used cartridges, residuals of old toner is removed with hand-held vacuums, and the cartridge is wiped clean. After pouring new toner into the cartridge, the plate is replaced and the cartridge is considered new. Used toner is wrapped in plastic and discarded.

This classification excludes electrical work with a live power source which is to be reported separately in classification 0601.

4107-20 Piano tuning

Applies to establishments engaged in tuning services for pianos, organs, and other keyboard musical instruments. Establishments in this classification will tune, clean, replace the felt, and provide minor repair service such as, but not limited to, the removal and replacement of bad cords, regluing broken keys, or replacing faulty foot pedals. This classification includes all work performed on the customer's premises as well as in the shop.

This classification excludes establishments engaged in the sale of pianos and organs which are to be reported separately in classification 6306; establishments engaged in the sale of other types of musical instruments such as string, wind and percussion instruments, which are to be reported separately in classification 6406; and establishments engaged in the reconditioning of pianos and organs (and the related sales of reconditioned pianos and organs) which are to be reported separately in classification 2906.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-626, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-626, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-626, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-626, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-626, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-626, filed 11/9/73, effective 1/1/74.]

WAC 296-17-627 Classification 4108.

4108-15 Letter service shops and mailing or addressing companies

Applies to establishments engaged in providing large volume mailing and addressing services. This could be the routine mailing of periodicals or advertising brochures or a one-time letter to a particular list of recipients. Work con-

templated by this classification includes, but is not limited to, folding, sorting, labeling and stuffing envelopes (either by hand or machine), clerical support, outside sales work, pick up of preprinted material from a client's location and delivery of completed work to the client or post office when done by employees of an employer having operations subject to this classification. Companies in this classification may also research and compile mailing lists as an additional service for their clients who are involved in direct mail advertising. This classification includes contracting of complete mail room services at a client's location.

This classification excludes printing of advertising material which is to be reported separately in classification 4101 and photocopying or duplicating of printed material, private mail box services (receipt and mailing of routine ready-to-mail letters and packages) for box renters, and package wrapping/ mailing services, all of which are to be reported separately in classification 6406.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-627, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-627, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-627, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-627, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-627, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-627, filed 11/9/73, effective 1/1/74.]

WAC 296-17-628 Classification 4109.

4109-10 Sign painting or lettering inside buildings

Applies to establishments engaged in sign painting or lettering inside a customer's building. This type of painting includes, but is not limited to, names, addresses and office hours on a door or window, and signs in the form of lettering/illustrations on an interior wall. Work contemplated by this classification includes preparing the surface by cleaning, sanding, etc., applying the lettering/illustrations by appropriate method (brushing, rolling, spraying, etc.), and applying a protective finish. This classification includes the painting of scenery, by a contractor, in a shop or theater (if done by the employees of a theater or television broadcasting station it would be an inclusion in classification 4504 or 4502 as applicable), and the painting of an interior mural.

This classification excludes sign painting shops that paint on, or apply vinyl lettering to, precut backings which are to be reported separately in classification 4109-18; painting in a shop that is not covered by another classification which is to be reported separately in classification 3603-12; and the painting, repair or erection of signs or murals on any part of the exterior of a building which is to be reported separately in classification 0403.

4109-18 Sign painting in shop

Applies to establishments engaged in providing sign painting services in their shop. The use of this classification is limited to painting on, or applying vinyl lettering to, precut mediums (sign backings) provided by the customer or purchased elsewhere; it does not contemplate the manufacture of the sign backing. (Vinyl lettering or designs are usually computerized. Lettering or designs are entered into a computer; a plotter/cutter attached to the computer cuts the programmed design or lettering from rolls of vinyl.) Work contemplated by this classification includes preparing the surface by clean-

ing, sanding, etc., applying the lettering/illustrations by appropriate method (such as brushing, rolling, spraying, applying vinyl designs), and applying a protective finish. This classification includes making and applying vinyl lettering in place of painted lettering and lettering/illustrating on vehicles not in connection with auto body repair or painting.

This classification excludes the painting or lettering of signs in buildings which is to be reported separately in classification 4109-10; painting in a shop which is to be reported separately in classification 3603 (unless the painting is included in another classification); the painting, repair or erection of signs on any part of the exterior of a building which is to be reported separately in classification 0403; and sign painting in connection with sign manufacturing operations which is to be reported separately in the applicable manufacturing classification.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-628, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-628, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-628, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-628, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-628, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-628, filed 11/9/73, effective 1/1/74.]

WAC 296-17-629 Classification 4201.

4201-00 Longshoring and stevedoring

Applies to establishments engaged in longshoring (stevedoring) operations which involve the transfer, loading, and unloading of ships' cargo and storage of such on docks or in nearby warehouses. This classification includes stevedoring by hand or hand truck and containerized stevedoring which involves the use of a cross deck crane for lifting the trailer body container onto or off of the ships deck or hold. This classification also includes wharf and pier operations, coal dock operations, cargo checkers, tallymen and the repackaging or mending of damaged containers in connection with stevedoring activities.

This classification excludes stevedores employed directly by a port district who are reported separately in classification 4201-02.

Special note: Stevedoring activities are almost always covered by the Longshore Harbor Workers Compensation Act (LHWCA) except when conducted by a port district or other political subdivision.

4201-02 Port districts

Applies to the operation of port districts by a municipality. Port districts have separate taxing authority and although they may receive tax dollars from levies most of their operating costs are funded through rental and use fees on the property and facilities they operate. Port districts are authorized by state law for the purpose of acquiring, developing, maintaining and operating various transportation-related properties and facilities. In addition to marine and airports, the district may also develop and maintain facilities used for the transfer, handling, storage and terminal operations of commercial enterprises. This classification includes sales personnel and any stevedoring operations conducted by port district employees.

This classification excludes clerical office employees of a county who are to be reported separately in classification

5306 and stevedoring operations not conducted by port district employees which are to be reported separately in classification 4201-00.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-629, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-629, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-629, filed 2/28/85, effective 4/1/85; Order 73-22, § 296-17-629, filed 11/9/73, effective 1/1/74.]

WAC 296-17-630 Classification 4301.

4301-05 Glue, lard, or tallow: Manufacturing

Applies to establishments engaged in the manufacturing of products from animal substances such as glue, lard and tallow. Glue manufacturing begins by boiling animal substances, including skins and hoofs, in water until the materials are diluted and melted. The material dries as a residue and forms as a hard pure protein gelatin. Incidental operations include bone crushing, grinding and bagging of bone meal, the filling of solidified grease into drums from the oil settling tanks and the pressing, drying, pulverizing and bagging of tankage for fertilizer manufacturers. The traditional "hot" animal glue which is produced in flake form, requires a heated glue pot to keep it at a usable consistency. More modern forms are ready to use liquids. Glues come in three general forms: Ready-to-use, water mixed form, and waterproof types that are often two-part and must be sold in two separate container units. These come with directions to mix to specified proportions just before use. Ready-to-use types retail in bottles, cans and tubes. Tools and equipment used include, but are not limited to, boiling pots, scrapers and razors. This classification includes making or refining lard, which is the white solid or semisolid rendered fat from a hog, and tallow making. This process includes taking the hard fat from parts of the bodies of cattle, sheep or horses, separating it by melting from the fibrous and membranous matter and mixing the whitish solids for use in making candles, leather dressing, soap and lubricants.

This classification excludes establishments that manufacture synthetic glues such as acrylic base, contact cement, polyester, latex combination, epoxy sticks, polyethylene, polyvinyl, or cellulose nitrate or rubber base which are to be reported separately in classification 3701.

4301-10 Sausage: Manufacturing

Applies to establishments engaged in manufacturing sausage. This process includes grinding, mixing, and blending cuts of meat with seasonings, spices, and fillers using grinders, mixers, pots, cooking tanks and meat cutting instruments. The mixture is stuffed into synthetic or natural casings or packed into forms. The product is often cooked in pressurized cooking tanks. The sausage is then cured by either pumping or injecting a curing solution into the meat or dry rubbing a curing substance into the meat and immersing the meat in a brine solution. Curing solutions usually contain one or more chemicals, such as sodium or potassium nitrate, ascorbate, or erythorbate, and water. The meats are then allowed to cure for up to 40 days. Curing may be followed by a period of several hours to several days in a temperature controlled smokehouse. The final product may be packaged, canned, placed in jars, or frozen.

This classification excludes dealers of natural sausage casings which are to be reported separately in classification 4301-19; meat products manufacturing which is to be reported separately in classification 4301-12; retail meat and poultry dealers which are to be reported separately in classification 3303; and the handling of livestock which is to be reported separately in the applicable classification.

4301-11 Packing house

Applies to establishments engaged in packing house operations which include the handling and slaughtering of livestock and the preparation of fresh meat and meat products. Animals are moved through a system of chutes to a conveyor system which takes them through a stunning machine and then into the slaughtering area. Work is performed with the use of hoists, knives, scissors, razors, scrapers, meat chippers, cleavers and hydraulic dropper/spreaders. After slaughtering, the blood is drained, collected and stored. The carcasses are then dipped into a scald tank and conveyed to dehairer machines and the hides are removed. After carcasses have been inspected and weighed, they are placed in blast freezers for several hours and then moved to a cooler. Carcasses are sawed or cut into portions and specific cuts of meat including those that will be used in other products such as cold cuts, sausages, and hot dogs. The products are then placed in cardboard boxes and loaded onto pallets. This classification includes incidental rendering, lard refining, butter substitutes manufacturing, washing of casings, sausage manufacturing, salting of hides, cooking of offal (waste), processing of the viscera manually or by machine, and fertilizer manufacturing when done by employees of an employer subject to this classification. Some of the prepared meats are packed in cans, bottles, or jars, sealed and cooked in vats. Meat packing and processing operations may be consolidated or may be in different locations.

This classification excludes establishments primarily engaged in sausage manufacturing which are to be reported separately in classification 4301-10; dealers of natural sausage casings which are to be reported separately in classification 4301-19; meat products manufacturing which is to be reported separately in classification 4301-12; slaughterhouse only operations which are to be reported separately in classification 4301-22; custom meat cutting which is to be reported separately in classification 4302; retail meat and poultry dealers which are to be reported separately in classification 3303; and wholesale meat and poultry processors/dealers which are to be reported separately in classification 3304.

4301-12 Meat products: Manufacturing

Applies to establishments engaged in meat products manufacturing, including canning or dehydrating. Products include, but are not limited to, frankfurters, bologna, head cheese and meat loaf. No handling or slaughtering of livestock is performed by employers subject to this classification. Meats are received in halves, quarters or individual fresh cuts. Cuts of meat are washed, soaked in brine, smoked, pickled, corned, and/or otherwise cooked. Meat products are bottled in jars, bottles, or cans and sealed. Meat trimmings may be chopped, ground, mixed, smoked, boiled, or stuffed in sausage casings. Machinery and equipment includes, but

is not limited to, mixing, cutting, and bottling equipment or tools.

This classification excludes establishments primarily engaged in sausage manufacturing which are to be reported separately in classification 4301-10; dealers of natural sausage casings which are to be reported separately in classification 4301-19; glue, tallow or lard manufacturing which is to be reported separately in classification 4301-05; packing house operations which are to be reported separately in classification 4301-11; slaughterhouse operations which are to be reported separately in classification 4301-22; custom meat cutting which is to be reported separately in classification 4302; the retail sale of meat and poultry which is to be reported separately in classification 3303; and wholesale meat dealers and wholesale poultry processors/dealers which are to be reported separately in classification 3304.

4301-13 Peat moss: Shredding and baling

Applies to establishments engaged in the shredding and baling of peat moss. This includes the cleaning, sorting and packaging of peat moss to be used as mulch, plant food (fertilizer), soil amendment, fuel or decorative uses such as in floral arrangements.

This classification excludes establishments engaged in the digging or stripping of peat from the surface of bogs with use of mechanical equipment which are to be reported separately in classification 0112 and the picking of moss by hand in a forest which is to be reported separately in classification 4802.

4301-17 Tanneries, fur manufacturing

Applies to establishments engaged in tannery operations which involve tanning and dressing raw hides for sale to dealers or manufacturers of leather or fur products. (Taxidermists often send hides to a tannery rather than treating them at their own shops.) Hides are received from outside sources, washed in caustic soda, borax and soda to clean, soften and preserve them. Excess flesh and tissue is removed from hides by fleshing machines which resemble a band saw mounted on a table. Any additional fleshing is done by scraping with a hand knife. Hides are then softened by agitating in a lime solution to remove all or part of the hair or fur, softened by agitating paddles using a variety of chemicals mixed with cornmeal and treated with a solution of sulfuric acid. Tanning is then done in revolving drums containing a mixture of water, salt, sodium bicarbonate and chromium sulfate. Drying may be done using a gas fired oven depending on the type of hide. Shredded hide may be baled and sold to glue makers. Tanned hides are split, dyed and finished. Tears in the hide are hand sewn.

This classification excludes hide or leather dealers, establishments engaged in hide pelting, and taxidermists which are all to be reported separately in classification 3708.

4301-19 Sausage casing dealers

Applies to establishments engaged in the sales and distribution of natural sausage casings to others. Casings are animal intestines received from packing houses or rendering plants. Wholesale dealers wash, dry, sort and package casings for distribution.

This classification excludes establishments engaged in the manufacture of sausage which are to be reported separately in classification 4301-10.

4301-21 Rendering works, N.O.C.

Applies to establishments engaged in rendering operations not covered by another classification (N.O.C.). Rendering is the act of reducing or melting down fat by heating. The raw animal materials such as, but not limited to, discarded fat, bone trimmings, meat scraps, blood, grease and feathers are collected from farms, stockyards, slaughterhouses, butcher shops, supermarkets, restaurants, meat and poultry stores, ranches, feed lots or animal shelters and brought to the rendering plant. The hides are removed and stored for shipment to hide dealers and tanneries. Carcasses are cut into workable sizes and placed into tanks. Steam passes directly into the materials being cooked. The grease is drawn off and meat and bones drop into a slush box. The slush is then pressed to remove more water and grease before going to steam pressure dryers. In some plants this is all performed with one piece of equipment. Tools and equipment may also include crushers, hashers, grinders, hoggers, prebreakers, blow tanks, conveyors, bucket elevators, pumps, steam-heater batch cokers, dryers, screw presses and waste water treatment equipment. In addition, other products such as cod liver oil may be produced, depending on the basic material being rendered. Regardless of the type of rendering system being used, all fish oils and animal grease or tallow are pumped into receiving or settling tanks. Barrels, drums or tank cars are filled for shipment to manufacturers of assorted products such as soap, and fatty acid products such as cosmetics, lubricants, paints and plastics. Edible tallow is used in margarine and other foods as regulated by the USDA. This classification includes the crushing, grinding, pressing, drying, pulverizing, and bagging of dried slush or tankage to produce fish or bonemeal, and feed concentrates for livestock and poultry and fertilizer.

This classification excludes establishments engaged as packing houses which are to be reported separately in classification 4301-11 and establishments engaged as slaughterhouses which are to be reported separately in classification 4301-22.

4301-22 Slaughterhouses

Applies to establishments engaged in the slaughter of animals and the initial processing of meat. This includes purchasing livestock from individuals or feedlots, handling the livestock, maintaining pens, and butchering. The process requires the preparation of the animal carcass, washing of casings and the salting of hides or cooking of offal (waste). Tools and equipment used include hydraulic dropper/spreaders, stunning machines, hoists, knives, scissors, razors, scrapers, meat chippers and cleavers. The meat is then sold by hanging weight and distributed to buyers using box freezer or container trucks. This classification excludes establishments engaged in packing house operations which are to be reported separately in classification 4301-11; establishments engaged in manufacturing meat products which are to be reported separately in classification 4301-12; custom meat cutting which is to be reported separately in classification 4302; retail meat and poultry dealers which are to be reported separately in

classification 3303; wholesale meat dealers and wholesale poultry processors/dealers which are to be reported separately in classification 3304.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-630, filed 8/28/98, effective 10/1/98; 88-12-050 (Order 88-06), § 296-17-630, filed 5/31/88, effective 7/1/88; 85-24-032 (Order 85-33), § 296-17-630, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-630, filed 2/28/85, effective 4/1/85. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 78-12-043 (Order 78-23), § 296-17-630, filed 11/27/78, effective 1/1/79; Order 76-36, § 296-17-630, filed 11/30/76; Order 75-38, § 296-17-630, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-630, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-630, filed 11/9/73, effective 1/1/74.]

WAC 296-17-631 Classification 4302.

4302-14 Custom meat cutting

Applies to establishments engaged in operating custom meat cutting shops. This classification primarily caters to customers who bring in an animal carcass (usually from a farm or hunt) for processing. Customers generally fill out a cut and wrap list which indicates how they want the meat cut such as steaks, flank, roasts, ribs, fillets, or hamburger, and how they want the product wrapped such as 3 steaks to a package, 5 pound roasts, 2 pound packages of hamburger, etc. Once the order has been filled to a customer's specifications, meat is stored in a freezer locker until the customer picks up the product. Custom meat cutting shops may also smoke meats and offer custom cut inspected meats (meaning inspected by USDA officials) for sale as locker packages or by the pound. It is also common for these establishments to sell related grocery items such as butter, eggs or milk. Tools and equipment include, but are not limited to, knives, razors, meat chippers, cleavers and hand carts.

This classification excludes establishments primarily engaged in custom meat cutting *including farm kill operations* which are to be reported separately in classification 4302-15; establishments engaged in farm kill operations *only* which are to be reported separately in classification 4302-16; packing house operations and slaughterhouse operations which are to be reported separately in classification 4301; establishments engaged in the retail sale of meat and poultry dealers which are to be reported separately in classification 3303; and wholesale meat dealers which are to be reported separately in classification 3304.

4302-15 Custom meat cutting and farm kill

Applies to establishments engaged in operating custom meat cutting shops *which also provide farm kill operations away from the custom meat shop*. This classification primarily caters to customers who bring in an animal carcass (usually from a farm or hunted) for processing. Customers generally fill out a cut and wrap list which indicates how they want the meat cut such as steaks, flank, roasts, ribs, fillets, hamburger, etc., and how they want the product wrapped such as 3 steaks to a package, 5 pound roasts, and 2 pound packages of hamburger. Once the order has been filled to a customer's specifications, meat is stored in a refrigerated locker until the customer picks up the product. Custom meat cutting shops may also smoke meats and offer custom cut inspected meats (meaning inspected by USDA officials) for sale as locker packages or by the pound. It is also common for these estab-

lishments to sell related grocery items such as butter, eggs or milk. Tools and equipment include, but are not limited to, knives, razors, meat chippers, cleavers and hand carts. *Farm kill operations* are usually performed with the use of a mobile kill truck. The animal is killed, placed on a hook hoist attached to the mobile unit, skinned, and dressed. The meat is then processed, according to the customer's order, usually at the shop.

This classification excludes establishments engaged in custom meat cutting-in shop *only (no farm kill)* which are to be reported separately in classification 4302-14 and farm kill *only* operations (mobile butchering) which are to be reported separately in classification 4302-16.

4302-16 Farm kill

Applies to establishments engaged *exclusively* in mobile butchering or farm kill operations which are usually performed with the use of a mobile kill truck. The animal is killed, placed on a hook hoist attached to the mobile unit, skinned, and dressed. Establishments in this classification are engaged in farm kill operations *only*; they are not engaged in the further processing of meat or meat cutting.

This classification excludes establishments engaged in operating custom meat cutting shops *only (no farm kill)* which are to be reported separately in classification 4302-14 and custom meat cutting shop *including farm kill* which are to be reported separately in classification 4302-15.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-631, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 90-13-018, § 296-17-631, filed 6/8/90, effective 7/9/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-631, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-631, filed 2/28/85, effective 4/1/85; Order 76-36, § 296-17-631, filed 11/30/76; Order 73-22, § 296-17-631, filed 11/9/73, effective 1/1/74.]

WAC 296-17-633 Classification 4304.

4304-00 Feedlots or stockyards

Applies to establishments engaged in operating feedlots or stockyards. Feedlots are large, enclosed yards usually with pens or stables where livestock, such as cattle, horses, sheep or pigs, are temporarily held for the sole purpose of supplying with feed and nourishment. Feed (such as corn or hay) is brought in bulk. Feed may be mixed in choppers and blown into feeder troughs. The livestock are raised until they reach certain weights, then sold to packing houses or slaughterhouses. Stockyards are holding areas (large, enclosed yards) where livestock are kept until they are sent for slaughter, sold or dispersed elsewhere.

This classification excludes packing houses or slaughterhouses which are to be reported separately in classification 4301 and livestock auction and sales yards or livestock buyers houses which are to be reported separately in classification 4304-02.

4304-02 Livestock auction and sales yards; livestock buyers

Applies to establishments engaged in operating livestock auction and sales yards and to livestock buyers. Operation of an auction and sales yard involves the exhibition and sale of cattle, horses, mules, sheep, hogs and goats. The premises

usually consists of an arena, a grandstand for customers (both buyers and sellers), and outside pens or stalls for livestock. The livestock are usually dropped off by customers (farmers, ranchers, etc.), are tagged, recorded, checked by brand inspectors and veterinarians, and inspected by employees of the yard. If the animals are left prior to the day of the sale, the employees will feed the livestock and maintain the pens. When the auction begins, yard employees bring the livestock to the arena, parade them around for show, then take them back to the pens to be weighed. A recordkeeper usually assists the auctioneer during this activity. Recordkeepers engaged directly in the business of auctioning are subject to the auction classification. Livestock buyers view the livestock from an overhead viewing area or by walking through the pen area.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-633, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-633, filed 11/27/85, effective 1/1/86; Order 75-38, § 296-17-633, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-633, filed 11/9/73, effective 1/1/74.]

WAC 296-17-634 Classification 4305.

4305-06 Garbage works or landfill: Reduction or incineration

Applies to establishments engaged in the disposal of refuse by processing or destruction, or in the operation of incinerators, landfills or other sites for disposal of such materials. Sanitary landfilling involves spreading typical household waste, in thin layers, compacting them to the smallest practical volume, and covering them with soil each working day in a manner that minimizes environmental impact. Sanitary landfills must have permits issued by a state regulatory program. Also included in this classification are solid waste landfills which are designed to accept construction debris such as plasterboard, cement, dirt, wood, and brush. Compactors may be used to compact the trash before it is discarded in the landfill. Incinerator operations reduce the volume of refuse with the remaining material and ashes being discarded in a landfill. Front end loaders are frequently used to feed the refuse into the incinerator. This classification includes cashiers collecting fees from customers, incidental recycling or sorting operations conducted in connection with a landfill or garbage works operation by employees of an employer subject to this classification, and establishments that only sort refuse. (Refuse sorting centers are distinguished from "buy back centers" in that "buy back centers" collect recyclable materials which they sell to others while refuse sorting centers collect and dispose of materials.)

This classification excludes establishments engaged in solid waste, refuse or ashes collecting, including curbside recycle services which are to be reported separately in classification 4305-18; cities or towns engaged in solid waste, refuse or ashes collecting, including curbside recycle services which are to be reported separately in classification 0803; counties and taxing districts engaged in operating garbage works, landfill, reduction or incineration operations which are to be reported separately in classification 1501; establishments engaged in hazardous waste and toxic material processing or handling, including processing of medical or septic tank waste, drug lab or hazardous spill cleanup (excluding oil spill cleanup on land), and reprocessing or handling of low-

level radioactive materials, which are to be reported separately in classification 4305-20; establishments engaged in tire dumps or collection centers which are to be reported separately in classification 4305-21; and buy back (recycle) center operations that include the collecting, buying from customers, sorting and the baling and sales of materials which are to be reported separately in classification 2102.

4305-18 Solid waste, refuse or ashes collecting

Applies to establishments engaged in collecting and removing waste from private homes, commercial establishments, industrial facilities, and other sites. Refuse may be picked up on a daily, weekly, or other regular basis. Drivers are usually assigned designated routes to collect curbside garbage or transport metal dumpsters for commercial businesses. This classification also includes the curbside collection of recyclable material when performed by employees of an employer subject to this classification. Garbage collection companies have contracts to dump refuse at landfills or local transfer stations where refuse is compacted and later transferred to a landfill. Independent owners may also contract to run the services for a county or city. This classification also includes establishments engaged in mobile paper shredding services. A truck, similar to a small moving van, is outfitted with a paper shredder. Empty bins or cans are left at establishments such as banks and law offices which need to have documents shredded, the filled containers are picked up either on a regular basis or on call, and the paper shredded on-site. The shredded paper is delivered to recyclers or other businesses who use shredded paper.

This classification excludes establishments engaged in garbage works, landfill, reduction or incineration operations which are to be reported separately in classification 4305-06; counties or taxing districts engaged in garbage works, landfill, reduction or incineration operations which are to be reported separately in classification 1501; cities or towns engaged in solid waste, refuse or ashes collecting, including curbside recycling services which are to be reported separately in classification 0803; establishments engaged in hazardous waste and toxic material processing or handling, including processing of medical or septic tank waste, drug lab or hazardous spill cleanup (excluding oil spill cleanup on land), and reprocessing or handling of low-level radioactive materials, which are to be reported separately in classification 4305-20; establishments engaged in tire dumps or collection centers which are to be reported separately in classification 4305-21; and recycle ("buy-back") center operations that include the collecting, buying from customers, sorting, and the baling of materials which are to be reported separately in classification 2102.

4305-20 Hazardous waste and toxic material processing or handling, N.O.C.

Applies to establishments engaged in the *processing or handling* of hazardous/toxic materials not covered by another classification (N.O.C.), including the *processing* of medical or septic tank waste, drug lab or hazardous spill *cleanup* (excluding oil spill cleanup on land), and *reprocessing or handling* of low-level radioactive materials. This classification is distinguished from classification 3701-27, in that

4305-20 applies to the *processing or cleanup* of hazardous/toxic materials while 3701-27 includes the *identifying and repackaging for disposal* of such materials as drugs, pesticides, chemicals, and toners. Hazardous waste can be defined as any material that contains hazardous elements in amounts high enough to pose a significant threat to human health and the environment and therefore should be isolated. Hazardous characteristics include the ability to bioconcentrate, ignite, corrode, react with water or other materials, or show toxicity such as toxic metals including lead, cadmium and mercury; organic solvents such as benzene and trichloroethylene; and toxic materials such as asbestos.

This classification excludes establishments engaged in garbage works, landfill, reduction or incineration operations which are to be reported separately in classification 4305-06; establishments engaged in solid waste and refuse or ashes collecting, including curbside recycle services and mobile paper shredding operations, which are to be reported separately in classification 4305-18; establishments engaged in tire dumps or collection centers which are to be reported separately in classification 4305-21; soil remediation, including oil spill cleanup on land, which is to be reported separately in classification 0101; asbestos abatement, all operations, which is to be reported separately in classification 0512; processing of waste oils, solvents, antifreeze, paints, and other hazardous materials, which is to be reported separately in classification 3407; and hazardous/toxic material repackaging for disposal, including drugs, pesticides, chemicals, and toners, which is to be reported separately in classification 3701.

4305-21 Tire dumps or collection centers

Applies to establishments engaged in operating tire dumps or collection centers. The primary source of used vehicle tires are tire retailers who remove the tires from their customers' vehicles when replacement tires are sold. Occasionally community or charitable groups will hold a fund raising event where the public can drop off their used tires for a fee. Operations include, but are not limited to, picking up and hauling the used tires to a location where the tires can be stored or manually sorted into those with enough tread to be used on the highways; those casings suitable for retreading (either of which have a resale value); and those with no resale value which are hauled to an appropriate disposal site. This classification includes drivers as well as workers involved in the sorting operations.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-634, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-634, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 91-12-014, § 296-17-634, filed 5/31/91, effective 7/1/91; 90-13-018, § 296-17-634, filed 6/8/90, effective 7/9/90. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-634, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-634, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-634, filed 11/30/83, effective 1/1/84; Order 75-38, § 296-17-634, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-634, filed 11/9/73, effective 1/1/74.]

WAC 296-17-635 Classification 4401.

4401-00 Cold storage lockers

Applies to establishments that rent cold storage lockers to the public. These establishments do not own equity in the merchandise that is stored. Other than being cold storage

facilities they are similar to mini-warehouse storage operations. Typically these operations will be a part of a retail or wholesale food or beverage establishment such as meat markets or wine stores. Typical activities contemplated by this classification include maintenance and security of the facility.

This classification excludes establishments engaged in fruit/vegetable freezer operations which are to be reported separately in classification 3902; establishments engaged in cold storage warehouse operations which are to be reported separately in classification 4404; general merchandise warehouses (not cold storage) which are to be reported separately in classification 2102; mini-storage warehouses which are to be reported separately in classification 4910; and field bonded warehouses which are to be reported in classification 2008.

Special note: The distinction between this classification (4401) and cold storage warehouse operations (4404) is that classification 4404 contemplates a warehouse type facility which stores general merchandise of commercial enterprises such as manufacturers and wholesalers as opposed to classification 4401 which rents lockers out to individuals for storage of personal items.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-635, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-635, filed 11/27/85, effective 1/1/86; 82-24-047 (Order 82-38), § 296-17-635, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-635, filed 11/9/73, effective 1/1/74.]

WAC 296-17-63501 Classification 4402.

4402-00 Ice: Manufacturing or harvesting

Applies to establishments engaged in the manufacture of ice or the harvesting of naturally occurring ice from frozen bodies of water such as lakes or ponds. Ice is made by treating, forming, and freezing water in refrigeration compressor systems. The ice blocks may be scored, cut or sawed, then left in blocks or crushed and bagged. Refrigeration systems are generally freezer coils or pipes running through or around tanks, or refrigerated vaults. Other equipment includes, but is not limited to, tanks, tin molds of various pound sizes or shapes, filtering systems, ice cube making systems which consist of water tanks, tubing and cutting blades, conveyors, incline screws, holding bins, bagging machines, winches, and forklifts. Ice harvesting is the cutting of natural ice from lakes, ponds, or other bodies of water that have frozen over to a suitable thickness and storing it in refrigerated warehouses. Ice manufacturers and harvesters either deliver their ice directly to their customers or sell it to ice dealers.

This classification excludes ice dealers who are to be reported separately in classification 4402-02 and manufacturers of "dry ice" who are to be reported separately in classification 3701.

4402-02 Ice dealers

Applies to establishments engaged as dealers of ice manufactured or harvested by others. Ice dealers either pick up ice directly from manufacturers and deliver it, or store it in their own refrigerated warehouses or ice stations prior to delivery to their customers. Refrigerated, insulated trucks and trailers are used to deliver ice. Customers may include,

but not be limited to, restaurants, lounges, service stations, grocery and convenience stores. Ice dealers may also own coin-operated dispensing machines, at various locations, which they refill.

This classification excludes establishments engaged in the manufacture of ice in refrigerated systems and the harvesting of natural ice which are to be reported separately in classification 4402-00 and establishments engaged in the manufacture of "dry ice" which are to be reported separately in classification 3701.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-63501, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-63501, filed 11/27/85, effective 1/1/86; 82-24-047 (Order 82-38), § 296-17-63501, filed 11/29/82, effective 1/1/83.]

WAC 296-17-636 Classification 4404.

4404-05 Cold storage warehouse

Applies to establishments engaged in providing a cold storage facility for general merchandise. These establishments do not own equity in the merchandise they store. The cold storage facility, which is maintained through a mechanical refrigeration process, typically stores items such as, but not limited to, food products, furs, and pharmaceuticals. Work contemplated by this classification includes maintenance and security of the facility, incidental repackaging, and loading and unloading of the warehoused items when performed by employees of an employer having operations subject to this classification.

This classification excludes establishments engaged in fruit/vegetable freezer operations which are to be reported separately in classification 3902; establishments engaged in cold storage locker operations which are to be reported separately in classification 4401; general merchandise warehouses (not cold storage) which are to be reported separately in classification 2102; mini-storage warehouses which are to be reported separately in classification 4910; and field bonded warehouses which are to be reported separately in classification 2008.

Special note: The distinction between this classification (4404) and cold storage locker operations (4401) is that classification 4404 contemplates a warehouse type facility which stores general merchandise of commercial enterprises such as manufacturers and wholesalers as opposed to classification 4401 which rents lockers out to individuals for storing of their personal items.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-636, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-636, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-636, filed 11/9/73, effective 1/1/74.]

WAC 296-17-637 Classification 4501.

4501-00 Radio or television broadcasting companies: Transmitter or field employees outside, N.O.C.

Applies to the field employees, not covered by another classification (N.O.C.), of establishments engaged in the operation of radio or television broadcasting companies. This classification is limited to outside employees engaged in technical and engineering work such as the installation/test-

ing/repair of lines, antennas (including tower mounted), satellite dishes, and field transmitting equipment.

This classification excludes radio or television broadcasting station employees confined to the studio or office such as, but not limited to, control operators/engineers, announcers, camera operators, players, entertainers, musicians, clerical office and sales personnel, who are to be reported separately in classification 4502; establishments engaged in providing television cable service to subscribers which are to be reported separately in classification 1305; contractors engaged in underground line construction, maintenance, or repair who are to be reported separately in classification 0107; contractors engaged in overhead line construction, maintenance or repair who are to be reported separately in classification 0509; and contractors engaged in wiring within buildings and antenna hookups within buildings who are to be reported separately in classification 0601.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-637, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-637, filed 11/27/85, effective 1/1/86; Order 75-38, § 296-17-637, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-637, filed 11/9/73, effective 1/1/74.]

WAC 296-17-638 Classification 4502.

4502-00 Radio broadcasting stations: All other employment

Applies to establishments engaged in the operation of radio broadcasting stations. This classification is limited to those employees who are confined to the studio or office such as, but not limited to, control operators, producers, engineers, announcers, reporters, disc jockeys, players, entertainers, musicians, clerical office and sales personnel. This classification includes occasional outside exposure when broadcasting from a remote location.

This classification excludes radio broadcasting station field employees engaged in technical and engineering work such as, but not limited to, the installation/testing/repair of lines, antennas, and satellite dishes who are to be reported separately in classification 4501.

4502-01 Television broadcasting stations and video production: All other employment

Applies to establishments engaged in the operation of television broadcasting stations and the production of videos. This classification is limited to those employees who are confined to the studio or office such as, but not limited to, control operators, producers, directors, announcers, camera operators, reporters, players, entertainers, musicians, clerical office and sales personnel. This classification includes occasional outside exposure when broadcasting from a remote location.

This classification excludes television broadcasting station field employees engaged in technical and engineering work such as, but not limited to, installation/testing/repair of lines, antennas, and satellite dishes who are to be reported separately in classification 4501; studio or office employees of television cable companies who are to be reported separately in classification 4502-03; and large-scale theatrical/movie production which is to be reported separately in classification 6608.

4502-02 Recording companies, studio

Applies to establishments engaged in the operation of studio recording companies. This classification is limited to those employees who are confined to the studio or office such as, but not limited to, control operators, engineers, announcers, players, entertainers, musicians, clerical office and sales personnel. This classification includes occasional outside exposure when recording at a remote location.

4502-03 Television cable companies: Control room and clerical personnel

Applies to control room and office employees of establishments engaged in providing point-to-point cable television service to subscribers. Television cable companies receive commercially produced programming from others through satellite and antennae, which they distribute to their subscribers through the local cable lines they install and maintain. They may also become involved in producing original programming and making channels available for public access broadcasts. Work contemplated by this classification is limited to those employees who are confined to a control center, studio or office such as, but not limited to, control operators, players, announcers, entertainers, musicians, clerical office and sales personnel. This classification includes occasional outside exposure for broadcasting from a remote location. Also included are homeowners' associations and co-ops who operate a central system for residential users.

This classification excludes television cable company field employees engaged in operation, maintenance and extension of lines and subscriber hook-ups who are to be reported separately in classification 1305 and studio or office employees of noncable television broadcasting companies who are to be reported separately in classification 4502-01.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-638, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-638, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-638, filed 2/28/85, effective 4/1/85; Order 73-22, § 296-17-638, filed 11/9/73, effective 1/1/74.]

WAC 296-17-640 Classification 4504.**4504-00 Theatres**

Applies to establishments engaged in the operation of indoor motion picture theatres, drive-in theatres, and live production theatres. This classification includes, but is not limited to, managers, stage hands, box office employees, projectionists, ushers, snack bar employees, parking lot attendants, security guards, sound system and lighting engineers, set builders, clerical office employees, and sales personnel. This classification includes the organization and management of nontheatrical events on theatre-owned property, such as a "swap meet" on the grounds of an outdoor theatre, when done by employees of an employer having operations subject to this classification.

This classification excludes performers in live theatre such as, but not limited to, actors, entertainers, and musicians who are to be reported separately in 6605 or 6620 as applicable; nontheater employees engaged in setting up stage lighting and sound systems who are to be reported separately in classification 0601 or 0608 as applicable; and nontheater

employees engaged in building and setting up props and sets who are to be reported separately in classification 0516.

Special note: Theatrical productions often involve independent contractors. The independent contractor tests found in RCW 51.08.180 and 51.08.195 should be applied when reviewing the status of individuals such as, but not limited to, the playwright, composer, set designer, costume designer, lighting and sound designers, and videographer.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-640, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020, 94-24-007, § 296-17-640, filed 11/28/94, effective 1/1/95. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-640, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-640, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-640, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-640, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-640, filed 11/9/73, effective 1/1/74.]

WAC 296-17-641 Classification 4601.**4601-01 Fireworks: Manufacturing**

Applies to establishments engaged in the manufacture of fireworks such as, but not limited to, flares, star shells, rockets, firecrackers, and signals used to generate colored lights, smoke, and noise. Incendiary powders, metal salts, components such as metal and cardboard tubes, aluminum cylinders, parachutes, umbrellas, sheet steel carrying shells, glue and wax are received from others. The process involves mixing, repeated screening, drying, blending and aging. The chemicals mixed include an oxidizer which produces the oxygen needed to make it burn fast and hot, a fuel which combines with the oxygen and causes the burning, coloring agents which produce the color, and a binding material which binds all the ingredients together. The composition is weighed and pressed into containers such as, but not limited to, aluminum caps or cardboard shells. The pyrotechnic (or shell) pellet then passes to be assembled with the remainder of the device being manufactured where the fuses are also added. Most processes are done with hand tools such as knives, mallets, and scissors due to the dangers of operating machinery around explosives. Fireworks are classified as either Class B or Class C according to their complexity and amount of explosives; however, they all contain an oxidizer, a fuel and a binder and are extensively regulated by federal agencies.

This classification excludes establishments engaged in the manufacture of explosive powder which are to be reported separately in classification 4601-02; establishments engaged in the manufacture of combined chemicals and explosives which are to be reported separately in classification 4601-03; and the exhibition of fireworks which is to be reported separately in classification 6207.

4601-02 Explosive powder: Manufacturing

Applies to establishments engaged in the manufacture of pyrotechnic, explosive, and incendiary powders from ingredients such as, but not limited to, nitrates, electrolytic copper dust, potassium perchlorate, powdered magnesium, sulfur, charcoal and linseed oil which are received from other sources. According to product being made, specific ingredients are mixed, then ground, screened and blended into powder of varying grains. Powder is filled into kegs, tin cans, or special fiber containers.

This classification excludes establishments involved in the manufacture of fireworks which are to be reported separately in classification 4601-01; establishments involved in the manufacture of combined chemicals and explosives which are to be reported separately in classification 4601-03; establishments engaged in chemical manufacturing which are to be reported separately in classification 3701; and establishments involved in blasting operations which are to be reported separately in the applicable classification.

4601-03 Combined chemicals and explosives: Manufacturing

Applies to establishments engaged in the manufacture of combined chemical and explosive products such as, but not limited to, bullets, shotgun shells, caps, fuses, pellets, dynamite, grenades, or other munitions. Raw materials include, but are not limited to, ammonia, nitrates and other chemicals, fertilizer, powders, shell casings, projectiles, and boosters. The process includes screening, grinding, mixing, blending, loading into casings, and packaging for shipment according to product being made. The manufacturing of the casings and loading of the explosives are included in this classification when performed by employees of an employer subject to this classification.

This classification excludes establishments engaged in the manufacture of fireworks which are to be reported separately in classification 4601-01; establishments engaged in the manufacture of explosive powder which are to be reported separately in classification 4601-02; and establishments engaged exclusively in chemical manufacturing which are to be reported separately in classification 3701.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-641, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-641, filed 11/27/85, effective 1/1/86; Order 74-40, § 296-17-641, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-641, filed 11/9/73, effective 1/1/74.]

WAC 296-17-643 Classification 4802.

4802-02 Farms: Berry

Applies to establishments engaged in raising berries of all types. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, pruning canes, cutting runners, installing posts and wire supports, tying vines, machine harvesting of berries, and installing or maintaining sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes roadside fruit stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately in classification 6403 provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes fresh fruit packing operations which are to be reported separately in classification 2104; fruit cannery or freezer operations which are to be reported separately in classification 3902; winery operations which are to be reported separately in classification 3702;

hand harvesting of berries which is to be reported separately in classification 4806; and any contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as, but not limited to, weeding, planting, irrigating, or fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4802-03 Farms: Bulb raising

Applies to establishments engaged in raising flowers and plants for bulbs. Work contemplated by this classification may take place in an open field or a greenhouse. Farming activities include, but are not limited to, preparing soil for new plants; planting, fertilizing, weeding, dead heading or cutting flowers, maintaining or installing sprinkler or irrigation systems, and machine digging and harvesting bulbs when performed by employees of an employer subject to this classification. Any subsequent grading, sorting, packing and shipping of bulbs is included within the scope of this classification as are roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes establishments engaged exclusively in the sale of fresh cut flowers and potted plants who are not involved in the cultivation of plants or flowers which are to be reported separately in classification 6404; hand picking of bulbs which is to be reported separately in classification 4806; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as, but not limited to, weeding, planting, irrigating, or fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4802-06 Picking of forest products, N.O.C.

Applies to establishments engaged exclusively in picking forest products that are not covered by another classification (N.O.C.) such as, but not limited to, holly, ferns, cones, cedar boughs, mushrooms, wild flowers, wild berries, moss, and tree bark. Work contemplated by this classification is limited to hand picking operations and is often accomplished through the aid of hand held cutting devices such as pruning shears or saws. Properties from which products are harvested from may be owned or leased. Operations not described above are to be reported separately in the classification applicable to the work being performed.

Special note: The farm labor contractor provision, as described in the general reporting rules, is not applicable to this classification as such establishments are not engaged in a farming operation.

4802-11 Farms: Flower or vegetable seeds

Applies to establishments engaged in raising flowers, flowering plants or vegetable plants for seed. Work contemplated by this classification may take place in an open field or a greenhouse. Farming activities include, but are not limited to, preparing soil for new plants, planting, fertilizing, weeding, machine harvesting seeds, cutting fresh flowers, harvesting incidental fresh vegetables, maintaining or installing sprinkler or irrigation systems, and drying of the seed. Any subsequent grading, sorting, packing and shipping of seeds is included within the scope of this classification as is the incidental sale of fresh cut flowers or vegetables from roadside stands located at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes fresh vegetable packing operations which are to be reported separately in classification 2104; cannery or freezer operations which are to be reported separately in classification 3902; establishments engaged exclusively in the sale of fresh cut flowers and potted plants who are not involved in the cultivation of plants or flowers which are to be reported separately in classification 6404; hand gathering of seeds where no hand held cutting device is used which is to be reported separately in classification 4806; establishments engaged exclusively in the sale of fresh vegetables but are not involved in the cultivation of plants which are to be reported separately in classification 6403; and any contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who pro-

vide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4802-12 Farms: Field vegetable crops - mechanically harvested

Applies to establishments engaged in raising field vegetable crops *which are mechanically harvested*. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, pruning, machine harvest of vegetables, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met. Typical crops include the following:

Beans, Green	Parsnips	Squash
Beets, Table	Potatoes	Tomatoes
Carrots	Radishes	Turnips
Corn, Sweet	Rhubarb	
Cucumbers	Rutabagas	

This classification excludes fresh vegetable packing operations which are to be reported separately in classification 2104; cannery or freezer operations which are to be reported separately in classification 3902; and any contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported in the classification applicable to the work being performed.

Special note: This classification differs from classification 4808 "diversified field crops" in that vegetable crops grown subject to classification 4808 generally have a long growing season and are harvested upon reaching maturity at the end of the season. Vegetable crops grown in classification 4802 are generally planted so that harvesting will occur continuously over the season and in smaller quantities. Although corn is technically a grain crop, it is widely accepted as a vegetable crop when harvested for fresh market as opposed to being left in the field to dry and used as feed, flour, or cereal grain. Corn grown subject to classification 4802 is for a fresh market, cannery or frozen food while the corn grown in classification 4808 is for grain, flour and feed.

The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespec-

tive of the type of farm they are providing service to or the type of crop involved.

4802-13 Farms: Flowers - field growing

Farms: Florists - cultivating or gardening

Applies to establishments engaged in raising flowers and flowering plants for sale. Work contemplated by this classification may take place in an open field or a greenhouse. Farming activities include, but are not limited to, preparing soil for new plants, planting, fertilizing, weeding, cutting fresh flowers, and maintaining or installing sprinkler or irrigation systems. Any subsequent grading, sorting, packing and shipping of flowers is included within the scope of this classification as is the incidental collection of flower seed for use in future crops. This classification includes roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes establishments engaged exclusively in the sale of fresh cut flowers and potted plants who are not involved in the cultivation of plants or flowers which are to be reported separately in classification 6404 and any contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808-11 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-643, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-643, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-643, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.16.035, 88-12-050 (Order 88-06), § 296-17-643, filed 5/31/88, effective 7/1/88; 87-12-032 (Order 87-12), § 296-17-643, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-643, filed 11/27/85, effective 1/1/86; 85-12-024 (Order 85-11), § 296-17-643, filed 5/31/85; 85-06-026 (Order 85-7), § 296-17-643, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-643, filed 11/30/83, effective 1/1/84; Order 77-27, § 296-17-643, filed 11/30/77, effective 1/1/78; Order 75-38, § 296-17-643, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-643, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-643, filed 11/9/73, effective 1/1/74.]

(2001 Ed.)

WAC 296-17-644 Classification 4803.

4803-02 Farms: Orchards - fruit tree crops

Applies to establishments engaged in operating fruit orchards of all types. Work contemplated by this classification includes, but is not limited to, preparing soil for new trees, planting trees, fertilizing, spraying, fumigating, weeding, pruning, harvesting tree fruit, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes fresh fruit packing operations which are to be reported separately in classification 2104; fruit cannery or freezer operations which are to be reported separately in classification 3902; winery operations which are to be reported separately in classification 3702; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: Prune harvesting is often accomplished by a person laying a canvas cover around the base and surrounding area of the tree. The tree is then shaken by hand causing the fruit to dislodge and fall to the canvas cover where it is picked by hand. Harvesting done by this method is subject to classification 4806 provided that the conditions set forth in classification 4806 have been met. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4803-04 Farms: Orchards - nut tree crops

Applies to establishments engaged in operating nut producing orchards of all types. Work contemplated by this classification includes, but is not limited to, preparing soil for new trees, planting trees, fertilizing, spraying, fumigating, weeding, pruning, machine harvesting of nuts, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes the incidental sale of bulk or packaged nuts at roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shop-

[Title 296 WAC—p. 357]

ping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes nut shelling and packaging operations which are to be reported separately in classification 3902; ground hand picking of nuts which is to be reported separately in classification 4806; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: Nut harvesting is often accomplished by a person laying a canvas cover around the base and surrounding area of the tree. The tree is then shaken by hand causing the nuts to dislodge and fall to the canvas cover where they are picked by hand. Harvesting done by this method is subject to classification 4806 provided that the conditions set forth in classification 4806 have been met. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4803-16 Farms, N.O.C.

Applies to establishments engaged in operating farms not covered by another classification (N.O.C.). Establishments in this classification include holly farms and the raising of sheep, goats, alpacas and llamas. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, pruning and otherwise maintaining trees, tending and feeding animals, raising crops for feed, erecting or mending fences, breeding animals, transporting animals to market, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification also covers artificial insemination and veterinary care when performed by employees of an employer subject to this classification.

This classification excludes businesses primarily engaged in holly packing or wreath making who are to be reported separately in classification 6404 (florists), and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm ser-

VICES" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-644, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-644, filed 5/31/96, effective 7/1/96; 87-24-060 (Order 87-26), § 296-17-644, filed 12/1/87, effective 1/1/88; 85-24-032 (Order 85-33), § 296-17-644, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-644, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-644, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-644, filed 11/29/82, effective 1/1/83; 81-24-042 (Order 81-30), § 296-17-644, filed 11/30/81, effective 1/1/82; Order 75-38, § 296-17-644, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-644, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-644, filed 11/9/73, effective 1/1/74.]

WAC 296-17-645 Classification 4804.

4804-00 Farms: Poultry

Applies to establishments engaged in operating poultry farms of all types. Poultry farms covered by this classification may be engaged in breeding and raising birds for human consumption or for sale to research laboratories or egg production farms. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, tending, feeding and watering birds, raising crops for feed, erecting or mending fences, cages and pens, breeding birds, cleaning pens and cages, transporting animals to market, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification.

This classification excludes feed milling operations which are to be reported separately in classification 2101; the butchering and processing of poultry which is to be reported separately in classification 3304; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4804-03 Farms: Egg production

Applies to establishments engaged in operating egg production farms. Farms covered by this classification may also be engaged in raising brood stock for future egg production or sale to other farms. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, tending, feeding and watering birds, raising crops for feed, erecting or mending fences, cages and pens, breeding birds, cleaning pens and cages, transporting eggs to market, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification also includes any

related packing or grading of eggs by farm employees, farm stand operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations may qualify to have those activities reported separately if the conditions as a multiple business is met.

This classification excludes feed milling operations which are to be reported separately in classification 2101; the butchering and processing of poultry which is to be reported separately in classification 3304; and contractors hired to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4804-05 Farms: Fur bearing animals

Applies to establishments engaged in raising fur bearing animals such as mink, fox and chinchilla for pelts (skins) or for sale. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, tending and breeding, feeding and killing animals, fleshing and drying skins, erecting or mending fences, erecting or maintaining kennels or cages, cleaning cages and kennels, and veterinary care when performed by employees of an employer subject to this classification.

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as feeding animals, grooming, and cleaning kennels. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to.

4804-06 Farms: Worm

Applies to establishments engaged in raising worms. Work contemplated by this classification includes, but is not limited to, the preparation of soils and soil mixes, maintaining proper soil moisture to encourage worm growth and reproduction, digging worms, sorting and packaging.

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or

(2001 Ed.)

structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, preparing soils, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to.

4804-07 Farms: Apiaries (bees)

Applies to establishments engaged in raising honey bees for making honey or for sale to growers or farmers who use them as pollinators or to laboratories or research centers. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, building structures to accommodate bee hives, collecting honey from hives, and growing vegetation and plants to support the production of honey or population of bees. This classification also includes the incidental processing and packaging of honey, honey comb and bees wax and the sale of honey at roadside stands located at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations may qualify to have those activities reported separately if the conditions in the multiple enterprise section of the general reporting rules are met. The raising of insects such as crickets has also been assigned to this classification as is the collection of bees and bee hives from unrelated properties.

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as collecting hives or bees, preparing soils for crops, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to.

4804-08 Farms: Aviaries (birds)

Applies to establishments engaged in raising all varieties of birds including game birds and exotics such as, but not limited to, emu and ostrich for sale to pet dealers, other aviaries, retail customers, and laboratories or research centers. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, tending, feeding and watering, raising crops for feed or protective covering, erecting or mending fences, cages, coops and pens,

breeding birds, cleaning pens, cages and coops, transporting birds to market, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification also includes any store operations.

This classification excludes feed milling operations which are to be reported separately in classification 2101 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as collecting hives or bees, preparing soils for crops, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to.

4804-09 Egg grading, candling and packing

Applies to establishments engaged in grading, candling, and packing eggs for either retail or wholesale markets. Work contemplated by this classification includes, but is not limited to, sorting, grading, washing, candling, packing eggs into cartons or crates, and transporting eggs to market. Establishments assigned to this classification are not engaged in raising poultry or operating egg production farms. This classification includes store operations located at or near the packaging facility.

This classification excludes establishments engaged in egg breaking which are to be reported separately in classification 3902.

Special note: The farm labor contractor provision is not applicable to this classification as such establishments are not engaged in a farming operation.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-645, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-645, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-645, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-645, filed 11/30/83, effective 1/1/84; Order 74-40, § 296-17-645, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-645, filed 11/9/73, effective 1/1/74.]

WAC 296-17-646 Classification 4805.

4805-00 Nurseries, N.O.C.

Applies to establishments not covered by another classification (N.O.C.) that are engaged in the propagation and/or care of trees, shrubs, plants, and flowers pending sales to others. Nurseries can be categorized into two general groups in that some nurseries are actively engaged in the propagation of trees, plants, and shrubs from seed, grafting or cuttings, while others simply buy stock from growers and resell to the public or to commercial customers. Work contemplated by this classification includes, but is not limited to, preparing soil for new trees, shrubs or plants, propagating trees, shrubs or plants, fertilizing, spraying, fumigating, watering and

weeding plants, trees and shrubs, pruning trees and shrubs, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes incidental greenhouses which are typically maintained for the purpose of starting new plants, shrubs or trees and protecting plants from weather conditions. Greenhouses may also serve as holding areas for garden supplies, fertilizer, planting containers, and tools which are available for sale to the public. This classification also includes the incidental sale of bark, soils, decorative or crushed rock, and store operations. This classification does not apply to establishments engaged in propagating trees in connection with an orchard operation or Christmas tree farm which are to be reported separately in classification 4803 or classification 7307 as applicable, or to landscaping contractors who may raise plants, trees or shrubs to be used in connection with their own landscaping jobs who are to be reported separately in classification 0301 or 0308 as applicable.

This classification excludes establishments engaged in growing and harvesting flowers for sale to others which are to be reported separately in classification 4802 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4805-05 Nurseries: Tree

Applies to establishments engaged in the propagation and/or care of trees for sale. Nurseries can be categorized into two general groups in that some nurseries are actively engaged in the propagation of trees from seed and grafting while others simply buy stock from growers and resell to the public or commercial customers. Work contemplated by this classification includes, but is not limited to, preparing soil for new trees, propagating trees, fertilizing, spraying, fumigating, watering, weeding, and pruning trees, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes incidental greenhouses which are typically maintained for the purpose of starting new trees and protecting them from weather conditions. Greenhouses may also serve as holding areas for garden supplies, fertilizer, planting containers, and tools which are available for sale to the public. This classification also includes the incidental sale of beauty bark, soils, decorative or crushed rock, and store operations.

This classification excludes establishments engaged in propagating trees in connection with an orchard operation or

Christmas tree farm which are to be reported separately in classification 4803 or classification 7307 as applicable; landscaping contractors who may raise trees to be used in connection with their landscaping jobs who are to be reported separately in 0301 or 0308 as applicable; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4805-06 Farms: Sod growing

Applies to establishments engaged in raising lawn sod for sale. Work contemplated by this classification includes, but is not limited to, preparing soil for new grass, planting grass seed, fertilizing, spraying, fumigating, watering, weeding, mowing grass, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. Sod farms may sell directly to the public from the farm or through landscape dealers and contractors.

This classification excludes the installation of sod at a customer's location; landscaping contractors who may raise sod to be used in connection with their landscaping jobs; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported in separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4805-07 Farms: Aquatic plants

Applies to establishments engaged in the propagation of aquatic plants for sale. Work contemplated by this classification includes, but is not limited to, preparing aquatic tanks, fresh water ponds or salt water growing areas for new plants, care of aquatic growing beds including chemical treatments of beds to eliminate undesirable vegetation, and harvesting and packaging plants when performed by employees of an employer subject to this classification. Aquatic farms may sell plants directly to the public from the farm or through

dealers and unrelated stores. This classification includes farm store operations.

This classification excludes establishments engaged in the harvesting, processing, or packaging of aquatic plants obtained from natural areas, where the husbandry of the resource is not an integral part of the operation, which are to be reported separately in classification 3304 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4805-08 Farms: Shellfish - hand harvesting

Applies to establishments engaged in the propagation, and hand harvesting, of shellfish for sale. Work contemplated by this classification includes, but is not limited to, preparing aquatic tanks or salt water growing areas for shellfish; care of aquatic growing beds including chemical treatments of beds to eliminate undesirable vegetation; and harvesting, shucking and packaging shellfish when performed by employees of an employer subject to this classification. Shellfish farms may sell directly to the public from a farm stand or store, located at or near the farm, or to dealers and unrelated stores.

This classification excludes establishments engaged in the harvesting, processing or packaging of shellfish obtained from natural areas where the husbandry of the resource is not an integral part of the operation which are to be reported separately in classification 3304 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special notes: The distinction between risks assigned to this classification (4805-08) and those which are to be reported separately in classification 4808 is in the harvesting process. Risks subject to classification 4805 are engaged in hand harvesting activities which includes the use of hand held tools while those assigned to classification 4808 are engaged in mechanical harvesting activities by way of dredging operations. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as seeding of larvae to mother shells and planting shells to natural waters. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in oper-

ating machinery is the same irrespective of the type of farm they are providing service to.

4805-09 Christmas tree sales from U-cut or retail sales lots

Applies to establishments engaged in retail sales of Christmas trees. Work contemplated by this classification is limited to placing trees in stands or on racks for display purposes, showing trees to retail customers, cashiering, monitoring and directing traffic in the sales lot area, and loading trees into customer vehicles. Tree sales may be conducted at a farm location as in the case of a U-cut tree operation or at a seasonal sales lot.

This classification excludes all farming operations such as, but not limited to, preparation of soil for new trees, propagating and planting trees, fertilizing, spraying, fumigating, watering, weeding, pruning, and harvesting of trees, maintaining or installing sprinkler or irrigation systems which are to be reported separately in classification 7307; Christmas tree wholesalers and Christmas tree baling and packing operations which are to be reported separately in classification 7307; and contractors hired to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special notes: Establishments assigned to this classification (4805-09) should report hours in this classification *only during the fourth quarter of each year* since these sales are confined to the Christmas season. The farm labor contractor provision is not applicable to this classification as such establishments are not engaged in a farming operation.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-646, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-646, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-646, filed 5/31/93, effective 7/1/93; 89-24-051 (Order 89-22), § 296-17-646, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-646, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-646, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-646, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 78-12-043 (Order 78-23), § 296-17-646, filed 11/27/78, effective 1/1/79; Order 75-38, § 296-17-646, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-646, filed 11/9/73, effective 1/1/74.]

WAC 296-17-647 Classification 4806.

4806-01 Farms: Nuts, berries, prunes, or field flowers and bulbs - hand harvesting

Applies to those employees of an employer who are engaged *exclusively* in hand harvesting nuts, berries, prunes, or field flowers or bulbs. This classification is limited to the harvest of crops which are picked from trees or from the ground, by hand and by a worker either sitting, kneeling, bending, stooping, or standing on the ground. This classification excludes any operation where ladders, stools, or other climbing devices are used; all operations where harvesting is accomplished or aided with hand held cutting devices or tools, and any mechanical picking or harvesting equipment including incidental workers who may or may not follow behind such machinery and collect the harvested crops by hand; the picking of wild berries or other products in forests or other lands not associated with farming operations; and contractors hired by a farm operator to install, repair or build

any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: Classification 4806 is not to be assigned to any grower as the single farming classification. Refer to classification 4802 for berry or flower and bulb raising operations and to classification 4803 for orchard operations.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-647, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-647, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-647, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-647, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-647, filed 11/30/83, effective 1/1/84; Order 76-36, § 296-17-647, filed 11/30/76; Order 75-38, § 296-17-647, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-647, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-647, filed 11/9/73, effective 1/1/74.]

WAC 296-17-649 Classification 4808.

4808-01 Farms: Diversified field crops

Applies to establishments engaged in growing a variety of grain, vegetable, or grass crops during a single season. Work contemplated by this classification includes, but is not limited to, preparing the soil for new crops, planting, fertilizing, weeding, harvesting, and maintaining or installing sprinkler or irrigation systems. Any subsequent grading, sorting, packing and shipping of farm products grown subject to this classification is included within the scope of this classification. This classification includes roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met. Typical crops include the following:

Alfalfa	Garlic	Rye
Barley	Grain	Sugar Beets
Beans, Dry	Grass Seed	Timothy
Clover	Hay	Wheat
Corn	Peas, Dry	

This classification excludes fresh vegetable packing operations which are to be reported separately in classification 2104; cannery or freezer operations which are to be reported separately in classification 3902; establishments engaged exclusively in the sale of fresh vegetables who are not involved in the cultivation of plants which are to be reported separately in classification 6403; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: This classification differs from classification 4802 "vegetable farm operations" in that vegetable crops grown subject to classification 4808 generally have a long growing season and are harvested upon reaching maturity at the end of the season. Vegetable crops grown in classification 4802 are generally planted so that harvesting will occur continuously over the season and in smaller quantities. See clas-

sification 4802-12 for additional information. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4808-02 Farms: Alfalfa, clover and grass seed

Applies to establishments engaged exclusively in raising alfalfa, clover, and grass crops for seed. Work contemplated by this classification includes, but is not limited to, preparing soil for crops, planting, fertilizing, machine harvesting, maintaining or installing sprinkler or irrigation systems, and drying of seed. Any subsequent grading, sorting, packing and shipping of seeds is included within the scope of this classification. Also included is the incidental sale of farm products from roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale.

This classification excludes establishments engaged in grading, sorting, and packaging seeds; or selling baled alfalfa or clover who are not engaged in growing operations which are to be reported separately in classification 2101; establishments engaged exclusively in grain or seed storage who are not engaged in growing operations which are to be reported separately in classification 2007; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4808-04 Farms: Hay

Applies to establishments engaged exclusively in raising hay or straw grass for sale, and includes the raising of such crops for seed. Work contemplated by this classification includes, but is not limited to, preparing soil for crops, planting, fertilizing, machine harvesting, maintaining or installing sprinkler or irrigation systems, and drying of seed. Any subsequent grading, sorting, packing and shipping of seeds is included within the scope of this classification. Also included is the incidental sale of farm products from roadside stands operated at or near the farm and farm store operations where

a small stock of products not produced by the operation subject to this classification may also be offered for sale.

This classification excludes establishments engaged in grading, sorting, and packaging seeds, or selling baled hay who are not engaged in growing operations which are to be reported separately in classification 2101 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4808-06 Farms: Cereal grain

Applies to establishments engaged in growing cereal grain crops. Work contemplated by this classification includes, but is not limited to, preparing the soil for new crops, planting, fertilizing, weeding, harvesting, and maintaining or installing sprinkler or irrigation systems. Any subsequent grading, sorting, packing and shipping of farm products grown subject to this classification is included within the scope of this classification. Also included is the incidental sale of farm products from roadside stands or operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Typical cereal grain crops include the following:

Barley	Rye
Corn	Wheat

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special notes: See classification 4802-12 for additional information relative to corn. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4808-07 Potato sorting and storage

Applies to establishments engaged in storing potatoes in storage warehouses or cellars. Work contemplated by this classification is limited to sorting the good potatoes from

damaged ones or from debris such as vines or rocks, piling them into the storage area by size, and storing them until they are taken to processing or packing plants. Sorting may be done either in the field or at a storage warehouse. This classification also includes potato digging and piling when performed by employees of an employer engaged in storing potatoes but who is not engaged in growing potatoes.

This classification excludes fresh vegetable packing operations which are to be reported separately in classification 2104; cannery or freezer operations which are to be reported separately in classification 3902; potato chip manufacturing which is to be reported separately in classification 3906; establishments engaged exclusively in the sale of fresh vegetables who are not involved in the cultivation of plants which are to be reported separately in classification 6403; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The farm labor contractor provision is not applicable to this classification as such establishments are not engaged in a farming operation.

4808-08 Custom hay baling

Applies exclusively to a specialist farm labor contractor engaged in mowing, turning, and baling hay owned by others. This classification also includes the incidental loading of hay onto trucks and stacking of hay in a barn or warehouse when performed by employees of a specialist farm labor contractor engaged in mowing, turning, and baling hay for others.

Special note: The farm labor contractor provision is not applicable to this classification as such establishments are not engaged in a farming operation.

4808-10 Farms: Shellfish - mechanical harvesting

Applies to establishments engaged in the propagation of shellfish for sale and includes the subsequent harvest of shellfish by means of mechanical dredging operations. Work contemplated by this classification includes spawning of shellfish, seeding in controlled tanks, placement of shellfish into deep water growing beds, harvesting, and processing. Harvesting, processing, and packing of shellfish by a farm labor contractor is included in this classification provided that the shellfish being harvested were grown by an establishment subject to this classification. This classification includes the sale of shellfish at roadside stands operated at or near the business location and store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Businesses operating multiple retail locations may qualify to have those activities reported separately if all the conditions of the general reporting rule covering the operation of a secondary business have been met.

This classification excludes establishments engaged in the harvesting, processing or packaging of shellfish obtained from natural areas where the husbandry of the resource is not an integral part of the operation which are to be reported separately in classification 3304 and contractors hired by a shellfish grower to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The distinction between establishments assigned to classification 4808 and those which are to be reported separately in classification 4805 is in the harvesting process. Establishments subject to classification 4805 are engaged in hand harvesting activities which includes the use of hand held tools while those assigned to classification 4808 are engaged in mechanical harvesting activities by way of dredging operations. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as seeding of larvae to mother shells and planting shells to natural waters. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to.

4808-11 Custom farm services by contractor

Applies exclusively to contractors engaged in supplying and operating agricultural machinery and equipment at their customer's locations. Work contemplated by this classification involves preparing fields for crops, planting and cultivating crops, fertilizing, and harvesting operations using machinery and equipment such as, but not limited to, tractors, plows, fertilizer spreaders, combines, reapers, potato diggers, boom loaders and pickers. Contractors subject to this classification are generally not responsible for the overall care of the crops, but are merely hired to provide specified services, which involve the use of machinery and employee equipment operators. This classification also includes seasonal agricultural produce hauling from the field to a processing or storage plant when performed by employees of an employer not engaged in the related farming operations associated with the crop being hauled.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-649, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-649, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-649, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-649, filed 5/31/96, effective 7/1/96; 87-12-032 (Order 87-12), § 296-17-649, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-649, filed 11/27/85, effective 1/1/86; 85-12-024 (Order 85-11), § 296-17-649, filed 5/31/85; 85-06-026 (Order 85-7), § 296-17-649, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-649, filed 11/30/83, effective 1/1/84; Order 75-38, § 296-17-649, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-649, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-649, filed 11/9/73, effective 1/1/74.]

WAC 296-17-64901 Classification 4809.

4809-01 Greenhouses, N.O.C.

Applies to establishments engaged in raising plants exclusively within greenhouses not covered by another classification (N.O.C.). Such establishments may specialize in growing only indoor, outdoor, or vegetable plants, while others will grow all types. The primary distinction between classification 4809 and other classifications where similar plants are grown is the exclusive use of greenhouses for the growing operations. Establishments subject to this classification will not have outdoor growing fields. All growing areas are confined to greenhouse operations. Work contemplated by this

classification includes, but is not limited to, preparation of soils, planting seeds or cuttings into pots and trays, and watering and fertilizing plants. This classification includes related sales of plants and store operations.

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4809-04 Farms: Mushrooms

Applies to establishments engaged in the raising and harvesting of mushrooms for sale. Work contemplated by this classification includes, but is not limited to, preparation and sterilization of compost material, seeding composted trays, monitoring humidity and temperature controlled growing rooms, moving trays from growing rooms, harvesting mushrooms, and grading and sorting mushrooms. This classification also includes fresh packing of mushrooms for sale to others.

This classification excludes all cannery or freezer operations which are to be reported separately in classification 3902 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported separately in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4809-05 Farms: Sprouts

Applies to establishments engaged in the raising and harvesting of bean and alfalfa sprouts using hydroponic growing methods. Hydroponics growing is a method whereby vegetable crops are raised in trays and tanks within a temperature controlled building in a water solution containing inorganic nutrients. Work contemplated by this classification includes, but is not limited to, preparation and cleaning of tanks and trays, preparation of water solutions, planting of seed into water solution, harvesting, and packaging of crops.

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors that supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-64901, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-64901, filed 5/31/96, effective 7/1/96; 88-12-050 (Order 88-06), § 296-17-64901, filed 5/31/88, effective 7/1/88; 85-24-032 (Order 85-33), § 296-17-64901, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-64901, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-64901, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-64901, filed 11/29/82, effective 1/1/83. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 78-12-043 (Order 78-23), § 296-17-64901, filed 11/27/78, effective 1/1/79.]

WAC 296-17-64902 Classification 4810.

4810-00 Farms: Field vegetables and herbs, N.O.C. - hand harvesting

Applies to establishments engaged in raising vegetables and herbs *which are harvested by hand* for sale and which are not covered by another classification (N.O.C.). Harvesting by hand could include the use of a hand-held cutting tool. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, pruning, hand harvest of vegetables, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes the incidental sale of fresh vegetables from roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met. Typical crops include the following:

Asparagus	Carrots	Lettuce	Rutabagas
Beans, Green	Cauliflower	Onions, Green	Spinach
Beets, Table	Celery	Parsnips	Squash
Broccoli	Corn, Sweet	Peppers	Tomatoes
Brussels Sprouts	Cucumbers	Radishes	Turnips
Cabbage	Kale	Rhubarb	

This classification excludes fresh vegetable packing operations which are to be reported separately in classification 2104; cannery or freezer operations which are to be reported separately in classification 3902; and contractors hired by a farm operator to install, repair or build any farm

equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special notes: This classification differs from classification 4802 "field vegetable crops" in that vegetable crops grown subject to classification 4802 are machine harvested or harvested using a combination of machine and hand labor while vegetable crops covered in classification 4810 are harvested exclusively by hand. See classification 4802-12 for additional information. The term "farm labor contractor" applies to specialty contractors that supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-64902, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-64902, filed 5/31/96, effective 7/1/96; 88-12-050 (Order 88-06), § 296-17-64902, filed 5/31/88, effective 7/1/88; 87-24-060 (Order 87-26), § 296-17-64902, filed 12/1/87, effective 1/1/88; 86-12-041 (Order 86-18), § 296-17-64902, filed 5/30/86, effective 7/1/86; 85-24-032 (Order 85-33), § 296-17-64902, filed 11/27/85, effective 1/1/86.]

WAC 296-17-64903 Classification 4811.

4811-00 Farms: Hops

Applies to establishments engaged in raising hops for sale. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, installing poles and wires, maintaining or installing sprinkler or irrigation systems, harvesting hops, the initial drying and baling, and all other operations incidental to the activity described above when done by employees of an employer subject to this classification. Any further processing of hops after the initial drying and baling is excluded.

This classification excludes establishments engaged in the production of hop pellets which are to be reported separately in classification 2101; establishments engaged in the manufacture of a liquid hop extract which are to be reported separately in classification 3701; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special notes: Hops is one of several ingredients used to flavor beer. Extra care should be taken when dealing with hop farms and processing plants to verify the operation and applicable classification. The term "and all other operations incidental to the activity described above" refers only to maintenance type work like mending fences, fixing or servicing kiln dryers, and working on tractors and equipment. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are

contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4811-01 Farms: Mint

Applies to establishments engaged in raising mint for sale. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, maintaining or installing sprinkler or irrigation systems, harvesting mint, and mint distillation when performed by employees of an employer subject to this classification.

This classification excludes establishments engaged exclusively in the distillation of mint leaves to obtain a mint extract or mint oil who are not engaged in the raising of mint crops, which are to be reported separately in classification 3701, and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-64903, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-64903, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-64903, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-64903, filed 11/27/85, effective 1/1/86.]

WAC 296-17-64904 Classification 4812.

4812-00 Farms: Fin fish and shell fish hatcheries

Applies to establishments engaged in hatchery operations for the raising of fin or shellfish, or their eggs. Work contemplated by this classification includes, but is not limited to, spawning of larvae, growing and testing algae (food for shellfish in larvae stage), seeding of shells in tanks, loading of seeded shells for shipment or transportation to natural waters, spawning fin fish, harvesting, and management of water flow temperature and exchange rate, and laboratory work when performed by employees of an employer subject to this classification. The term "harvest" includes the sale of seeded shells, larvae, fish eggs, and whole fish.

This classification excludes the placement of seeded shells or larvae into natural waters, harvesting of mature shellfish or the related processing and packaging of shellfish which are to be reported separately in classification 3304, 4805, or 4808 as applicable, and contractors hired by a farm

operator to install, repair or build any hatchery equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: See classifications 4805 and 4808 for related information. The farm labor contractor provision is not applicable to this classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-64904, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-64904, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-64904, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-64904, filed 11/27/85, effective 1/1/86.]

WAC 296-17-64905 Classification 4813.

4813-00 Vineyards

Applies to establishments engaged in the planting, cultivating, pruning, and harvesting of grapes. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, pruning vines, installing posts and wire supports, tying vines, machine or hand harvest of grapes, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes roadside fruit stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately in classification 6403 provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes fresh fruit packing operations which are to be reported separately in classification 2104; fruit cannery or freezer operations and jam or syrup manufacturing which are to be reported separately in classification 3902; winery operations which are to be reported separately in classification 3702; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors that supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors that provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-64905, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-64905, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 91-12-014, § 296-17-64905, filed 5/31/91, effective 7/1/91.]

(2001 Ed.)

WAC 296-17-64999 Classification 4900.

4900-00 Construction: Superintendent or project manager

Applies to those employees, of general or specialty construction contractors, whose job duties are exclusively that of construction superintendents or project managers. Construction superintendents spend some time in an office and spend the remainder of time visiting various job sites to confer with construction foreman to keep track of the progress occurring at each construction site or project location. Project managers are generally stationed at the construction site or project location and confined to a temporary type of office to schedule activities and arrival of supplies such as the delivery of iron, steel, rebar, lumber, concrete ready mix, concrete pump truck services, and cranes.

This classification excludes construction superintendents or project managers who are employed by a business that specializes in offering construction management and consulting services. These businesses do not do any of the actual construction or erection activities and are to be reported separately in classification 4901.

Special notes: This classification is applicable *only* to construction superintendents or project managers who have no direct control over work crews and do not perform construction labor at the construction site or project location. A superintendent or project manager performing duties subject to this classification who also is engaged in operating equipment, performing manual labor, or who directly supervises a work crew at the construction site or project location is excluded from this classification. They are to be reported separately in the applicable construction or erection classification assigned to their employer without any division of hours. *A division of hours is not permitted between classification 4900 and any other classification.*

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-64999, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-64999, filed 5/31/96, effective 7/1/96.]

WAC 296-17-650 Classification 4901.

4901-00 Consulting engineering Architectural services, N.O.C.

Applies to establishments engaged in providing consulting engineering services, construction management or consulting services, or architectural services not covered by another classification (N.O.C.). Engineers consult with and give technical advice to clients through the use of plans, maps, charts, specifications or other media. They may specialize in particular fields of endeavor such as aeronautical, chemical, civil, electrical, industrial, marine, mechanical or structural engineering. Engineers may research, design and develop a plan, a part, a piece of equipment, or a structure and may also build prototypes and models. Architects research, plan and design building projects for clients, applying knowledge of design, construction procedures, zoning and building codes, and building materials. They may enlist the services of engineers to provide specialized technical services or to solve specific problems. Architects may specialize in certain types of facilities such as hotels, hospitals, or industrial plants, or in the restoration of older structures, or may confine

[Title 296 WAC—p. 367]

their practice to residential work. They also may be involved in the design of transportation facilities, public assembly complexes, marine or public utility projects. This classification includes employees of engineering or architectural services who perform surveys or who act as project managers or project superintendents for their employer's engineering or architectural projects. Businesses which specialize in offering construction management and/or consulting services, which are not involved in designing, engineering, or any of the actual construction activities, are also included in this classification.

This classification excludes draftsmen whose duties are limited to office work, who may be reported separately in classification 4904 provided the conditions set forth in the standard exception rule have been met, and the engineering and architectural staff of construction companies or other types of businesses who are to be reported in the classifications applicable for those businesses.

Special note: When assigning classifications 4901 or 1007, care must be taken to look beyond the words "consulting" or "engineering" to determine the actual nature of the activities being performed. Classifications 4901 and 1007 shall not be assigned to the same business unless all the conditions of the general reporting rules covering the operation of a secondary business have been met.

4901-16 Geologists, N.O.C.

Applies to establishments engaged in providing geological services, including oil or gas geologists or scouts and lease buyers performing work similar to oil geologists, not covered by another classification. Geologists study the composition, structure, and history of the earth's crust to identify and determine the sequence of processes affecting the development of the earth. By applying knowledge of chemistry, physics, biology and mathematics to explain these phenomena, they help locate mineral, geothermal, petroleum, and underground water resources. They will consult with and give technical advice to clients based on their findings. Projects may include, but are not limited to, landslide analysis and correction, rock slope design, rock fall mitigation and control, and soil cut and embankment design. They also prepare geologic reports and maps, interpret research data, recommend further study or action, and may participate in environmental studies. Duties of oil or gas geologists or scouts and lease buyers include, but are not limited to, reviewing court records, interviewing lease holders, securing data for prospective oil or gas producing land, as well as procuring core or shale samples at drilling locations for analyzing. The oil or gas geologist also may explore and chart stratigraphic arrangement and structure of the earth to locate gas and oil deposits, evaluate results of geophysical prospecting, prepare maps and diagrams indicating probable deposits of gas and oil, as well as estimate oil reserves in proven or prospective fields and visit drilling sites. Scouts keep the client company informed of events in their region, attend local meetings, and report the findings on work.

This classification excludes geophysical exploration which is to be reported separately in classification 1007; seismic geophysical exploration which is to be reported separately in classification 0103; and geologists or scouts of a

drilling or construction contractor who are to be reported separately in the classification applicable to the employer's business.

Special note: When assigning classifications 4901-16, geologists, 1007-08, geophysical exploration, and 0103, seismic geophysical exploration, care must be taken to look beyond the word "geologist" to determine the actual nature of the activities being performed.

4901-17 Land surveying services, N.O.C.

Applies to establishments engaged in providing professional land surveying services not covered by another classification (N.O.C.). Land surveyors measure the size and physical characteristics of earth surfaces to determine precise location and measurements of points, elevations, lines, areas, contours and boundaries for private, public, and commercial applications. Some firms also perform marine, mine, forestry, geological and photogrammetric surveys which utilize sophisticated instruments and techniques, including aerial photography. The field data collected by surveyors may be used to produce maps and architectural and civil engineering plans and drawings. Maps and drawings may be produced by drafters who plot out the field data by hand or by using computer-aided drafting programs.

This classification excludes draftsmen whose duties are limited to office work, who may be reported separately in classification 4904 provided all the conditions of the general reporting rules covering standard exception employees have been met, and surveyors employed by construction companies or other types of businesses who are to be reported separately in the applicable classifications for those businesses.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-650, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 94-12-063, § 296-17-650, filed 5/30/94, effective 6/30/94. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-650, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-650, filed 2/28/85, effective 4/1/85; 82-24-047 (Order 82-38), § 296-17-650, filed 11/29/82, effective 1/1/83; Order 75-38, § 296-17-650, filed 11/24/75, effective 1/1/76; Order 74-40, § 296-17-650, filed 11/27/74, effective 1/1/75; Order 73-22, § 296-17-650, filed 11/9/73, effective 1/1/74.]

WAC 296-17-651 Classification 4902.

4902-00 State government - administrative, clerical, and sales personnel

Applies to those state employees who are assigned to work in an administrative capacity, a clerical office, or in public relations or sales work. For the purposes of this classification, field exposure is to the normal travel to a work assignment such as a field auditor or social worker would encounter. This classification includes all departments, agencies, boards, commissions, committees and elected officials of all branches of state government.

This classification excludes employees with field exposure other than that described above, employees with law enforcement powers, and employees who provide patient health care.

See classifications 4906, 5307, 7103, and 7201 for other state government activities.

Special note: For purposes of this classification the terms "clerical office" and "sales personnel" shall have the

same meaning as defined in the standard exception provision of the general reporting rule.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-651, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-651, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-651, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-651, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-651, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.030 and 51.16.035, 79-12-086 (Order 79-18), § 296-17-651, filed 11/30/79, effective 1/1/80; Order 73-22, § 296-17-651, filed 11/9/73, effective 1/1/74.]

WAC 296-17-652 Classification 4903.

4903-06 Marine appraising

Applies to establishments engaged in providing marine appraisal services. Type of property appraised includes, but is not limited to, boats, yachts, marinas, wharves, and dry-docks. This service may be provided to a prospective buyer or to insurance companies for determining the value of a piece of property or for evaluating damage.

This classification excludes maritime appraisers who provide their service exclusively to insurance companies who are to be reported separately in classification 4903-09, and nonmaritime building appraisers who are to be reported separately in the classification applicable to the employer's business.

4903-07 Boiler inspecting, N.O.C.

Applies to establishments engaged in providing boiler inspection services not covered by another classification (N.O.C.). These establishments inspect pressurized vessels, including air tanks and liquefied gas tanks, in addition to boilers. The inspections involve determining if a vessel conforms to safety standards in regard to their design, fabrication, installation, repair and operation. The inspections may take place at a manufacturer's plant or where the vessel has been installed. These inspections will generally be conducted at the request of a manufacturer or an insurance company. Activities of the inspectors include, but are not limited to, inspecting the safety devices and welding, performing tests to verify the condition, calculating allowable limits of pressure, recommending changes to correct unsafe conditions, and investigating accidents involving pressurized vessels.

This classification excludes boiler inspectors employed by a state agency or municipality who are to be reported separately in the appropriate state agency or municipality classification; boiler manufacturing, repair or installation which is to be reported separately in the appropriate manufacturing, repair or installation classification; inspectors of the manufacturing company who are to be reported separately in the classification applicable to the employer's business; and establishments who provide inspections exclusively for insurance companies who are to be reported separately in classification 4903-09.

4903-08 Elevator inspecting

Applies to establishments engaged in providing elevator inspection services. Types of devices inspected include, but are not limited to, elevators, escalators, ski lifts, amusement rides and moving sidewalks. The inspections involve determining if the device conforms to safety standards in connection with their design, fabrication, installation, repair and

operation. The inspections may take place at the manufacturing plant or where the conveyance device has been installed. These inspections are usually conducted at the request of a manufacturer or an insurance company. Activities of the inspectors include, but are not limited to, reviewing the design, inspecting the mechanical and electrical features, inspecting the cables and guide rails, conducting time tests for speed, computing allowable load, observing running and drop tests to determine if brakes and safety devices are working properly, recommending changes to correct unsafe conditions, and investigating accidents involving conveyance devices.

This classification excludes elevator inspectors employed by a state agency or municipality who are to be reported separately in the appropriate state agency or municipality classification; repair or service to the elevator or conveyance device which is to be reported separately in the appropriate repair classification assigned to the type of conveyance device; inspectors employed by the manufacturer who are to be reported in the appropriate manufacturing classification; and establishments who provide inspection exclusively for insurance companies who are to be reported separately in classification 4903-09.

4903-09 Inspection for insurance or valuation

Applies to establishments engaged in providing inspection and valuation services exclusively for insurance companies. These establishments inspect damaged goods or property for loss valuation or to determine the value of an article or property the insurance company is underwriting. The property inspected includes, but is not limited to, personal property, real estate, and manufactured goods.

This classification excludes inspectors employed by a state agency or municipality who are to be reported separately in the appropriate state agency or municipality classification and boiler, elevator, or building inspectors or maritime appraisers who do not provide the service to insurance companies exclusively who are to be reported separately in classifications 4903-07, 4903-08, 4903-10 or 4903-06 as applicable and employees of insurance companies who are to be reported separately in the applicable classifications.

4903-10 Inspection of buildings

Applies to establishments engaged in providing building inspection services. These establishments inspect all types of buildings including new or existing residential, commercial, industrial, multifamily, and temporary structures. The inspections may be provided for prospective buyers to determine the condition of the building, for contractors to assist in interpreting legal requirements and recommending procedures for compliance, or for insurance companies in assessing damages. Activities of the inspectors include, but are not limited to, inspecting all components of a building for structural soundness, dry rot, pest problems, energy efficiency, and compliance with grading, zoning and safety laws.

This classification excludes building inspectors employed by a state agency or municipality who are to be reported separately in the appropriate state agency or municipality classification and establishments who provide inspections exclusively for insurance companies who are to be reported separately in classification 4903-09.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-652, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-652, filed 11/27/85, effective 1/1/86; 81-24-042 (Order 81-30), § 296-17-652, filed 11/30/81, effective 1/1/82; 80-17-016 (Order 80-23), § 296-17-652, filed 11/13/80, effective 1/1/81; Order 73-22, § 296-17-652, filed 11/9/73, effective 1/1/74.]

WAC 296-17-653 Classification 4904.

4904-00 Clerical office, N.O.C.

Applies to those employees whose job duties and work environment meet *all* the conditions of the general reporting rules covering clerical office standard exception employees who are not covered by another classification (N.O.C.) assigned to their employer's account. Duties of clerical office personnel contemplated by this classification are limited to answering telephones, handling correspondence, creating or maintaining financial, employment, personnel or payroll records, composing informational material on a computer, creating or maintaining computer software, and technical drafting.

Special note: When considering this classification, care must be taken to look beyond titles of employees. Employees with occupational titles such as, but not limited to, cashiers, clerks, or ticket sellers, may or may not qualify for this classification. This is a restrictive classification; the qualifying factor is that all the conditions of the general reporting rules covering standard exception employees have been met.

4904-13 Clerical office: Insurance companies, agents or brokers

Applies to clerical office employees of insurance companies, including insurance agents or brokers who perform duties exclusively of clerical nature and without an interchange of labor between clerical and nonclerical duties. This classification is limited to duties defined as responding to telephone inquiries, assisting walk-in customers, handling correspondence such as the preparation of insurance policies and billing, receiving and processing payments and invoices, maintaining personnel and payroll records, and performing the necessary computer work.

Special note: Individuals performing duties as an agent, broker, or solicitor (and hold a license as issued by the office of the insurance commissioner) are exempt from coverage as specified in RCW 51.12.020(11) and 48.17.010, 48.17.020, and 48.17.030. To elect voluntary coverage these individuals must submit a completed optional coverage form to the department. In addition, care should be exercised to determine if the insurance company employs individuals such as receptionists, bookkeepers, or claims clerks who perform clerical duties which may include the incidental taking of insurance applications and receiving premiums in the office of an agent or broker. Such individuals may or may not hold a license as issued by the office of the insurance commissioner, and are not deemed to be a solicitor, agent or broker when compensation is not related to the volume of such applications, insurance, or premiums. In these instances, the clerical individuals fall under mandatory workers' compensation coverage, and do not meet the requirements to be exempt from coverage as specified in RCW 51.12.020(11).

4904-17 Clerical office: Employee leasing companies

[Title 296 WAC—p. 370]

Applies to clerical office employees of employee leasing companies. This classification requires that clerical office employees perform duties exclusively of a clerical nature, without an interchange of labor between clerical and nonclerical duties, and that these duties be performed in an area or areas separated from the operative hazards of the business. This classification is limited to duties defined as responding to telephone inquiries, receptionist and administrative duties, handling correspondence such as preparing and processing billing statements and forms, maintaining personnel and payroll records, and performing the necessary computer entry work.

Special note: This is a standard exception classification and is not to be assigned unless all the conditions of the general reporting rule covering clerical office standard exception employees have been met.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-653, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-653, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-653, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-653, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-653, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-653, filed 11/9/73, effective 1/1/74.]

WAC 296-17-654 Classification 4905.

4905-04 Hotels or motels

Applies to establishments engaged in providing lodging and associated services to others. Accommodations included in this classification vary from a single room in a "bed & breakfast," to individual cabins, to luxury suites in a multi-story hotel. Hotel and motel operations may include a wide range of activities which are within the scope of this classification such as, but not limited to, housekeeping, laundry, bellhops, valets, shuttle service, maintenance personnel, and continental breakfast (if not in connection with a separate restaurant operation). Hotel and motel desk clerks with no other duties can be reported separately in classification 4904. Multiple classifications may be allowed for operations such as, but not limited to, shops, beauty salons, grocery stores, drug stores, newsstands, and service stations, provided no interchange of labor exists between operations. When an interchange of labor exists, the operations are to be assigned to classification 4905-04 without a division of hours.

This classification excludes restaurant and lounge employees which are to be reported separately in classification 3905 and other operations conducted by independent concessionaires which are to be reported separately in the applicable services or store classification.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-654, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-654, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 89-24-051 (Order 89-22), § 296-17-654, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-654, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-654, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-654, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-654, filed 11/30/81, effective 1/1/82; Order 76-36, § 296-17-654, filed 11/30/76; Order 73-22, § 296-17-654, filed 11/9/73, effective 1/1/74.]

(2001 Ed.)

WAC 296-17-655 Classification 4906.**4906-01 Institutions of higher education - public**

Applies to *public* institutions of higher education such as universities, colleges, and junior colleges that have obtained state accreditation and are supported at least in part by public funds. Work contemplated by this classification includes, but is not limited to, administrative staff, professors/teachers, advisors, librarians, athletic coaches, medical staff at a hospital or research center run as part of the institution, restaurant/snack shop staff, campus security, janitorial/maintenance staff, clerical office and sales personnel.

This classification excludes private institutions of higher education which are to be reported separately in classification 4906-02 and secondary technical or vocational schools which are to be reported separately in classifications 6103 and 6104.

4906-02 Institutions of higher education - private

Applies to *private* institutions of higher education such as universities and colleges that have obtained state accreditation. These private institutions include any institution of higher education that is not supported by public funds. Work contemplated by this classification includes, but is not limited to, administrative staff, professors/teachers, advisors, librarians, athletic coaches, medical staff at a hospital or research center run as part of the institution, restaurant/snack shop staff, campus security, janitorial/maintenance staff, and clerical office.

This classification excludes public institutions of higher education which are to be reported separately in classification 4906-01 and secondary technical or vocational schools which are to be reported separately in classifications 6103 and 6104.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-655, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-655, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-655, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-655, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-655, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-655, filed 11/9/73, effective 1/1/74.]

WAC 296-17-656 Classification 4907.**4907-00 Inmate work opportunity - state**

Applies to state prisoners who are employed by the state prison in a tax reduction industry to provide goods or services only (regardless of the type) to tax-supported entities or nonprofit organizations. Tax reduction industries provide basic work training and experience which qualify the inmates for better work within the prison or in the public community. Work is performed at the prison or at a separate location and the goods produced are property of the state.

This classification excludes work done by state prisoners under a free venture enterprise contract with a private business (profit or nonprofit) which is to be reported separately in the classification applicable to the work being performed.

4907-01 Inmate work opportunity - city

Applies to inmates of city jails who are employed by the city jail in a tax reduction industry to provide goods or services only (regardless of the type) to tax-supported entities or nonprofit organizations. Tax reduction industries provide basic work training and experience which qualify the inmates

for better work within the jail or in the public community. Work is performed at the jail or at a separate location.

This classification excludes work done by city prisoners under a free venture enterprise contract with a private business (profit or nonprofit) which is to be reported separately in the classification applicable to the work being performed.

4907-02 Inmate work opportunity - county

Applies to inmates of county jails who are employed by the county jail in a tax reduction industry to provide goods or services only (regardless of the type) to tax-supported entities or nonprofit organizations. Tax reduction industries provide basic work training and experience which qualify the inmates for better work within the jail or in the public community. Work is performed at the jail or at a separate location.

This classification excludes work done by county prisoners under a free venture enterprise contract with a private business (profit or nonprofit) which is to be reported separately in the classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-656, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-656, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-656, filed 11/9/73, effective 1/1/74.]

WAC 296-17-657 Classification 4908.**4908-00 Inmates of adult honor camps**

Applies to inmates of adult honor camps who are employed by a city, town, county, or state agency. Their employment, which takes place away from the honor camp, provides basic work training and experience to qualify inmates for better work in the correctional institute or in the public community. Typical work includes, but is not limited to, constructing and maintaining forest trails, cutting fallen trees into firewood, picking up and burning fallen limbs, fighting forest fires, and planting new trees.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-657, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-657, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-657, filed 11/9/73, effective 1/1/74.]

WAC 296-17-658 Classification 4909.**4909-00 Inmates of juvenile forest camps**

Applies to inmates of juvenile forest camps who are employed by a city, town, county, or state agency. Their employment, which takes place away from the forest camp, provides basic work training and experience to qualify inmates for better work in the correctional institute or in the public community. Typical work includes, but is not limited to, constructing and maintaining forest trails, cutting fallen trees into firewood, picking up and burning fallen limbs, fighting forest fires, and planting new trees.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-658, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-658, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-658, filed 11/9/73, effective 1/1/74.]

WAC 296-17-65801 Classification 4910.**4910-00 Property management services**

Applies to establishments engaged in managing their own rental property or properties owned by others. Properties include, but are not limited to, privately owned or commercial buildings, malls, apartment or condominium complexes, mobile home parks, halls, and conference rooms. Typical operations contemplated by this classification include, but are not limited to, management or clerical duties, advertising, showing vacant units to prospective tenants, collecting rent, providing security, and normal maintenance and repair when conducted by employees of employers subject to this classification. Normal maintenance and repair contemplated by this classification includes replacing parts on existing fixtures or equipment, repairing existing structures, normal cleaning or janitorial activities, maintaining existing landscaping, and shoveling snow from driveways or walkways. Construction, alteration, or improvements to the properties are *not* considered normal maintenance and are *not* contemplated by this classification. Major repair work is usually performed by contractors who are not employees of the property management business. *Apartment or condominium complexes and mobile home parks* may have common areas such as, but not limited to, laundry facilities, community rooms, tennis courts, exercise rooms, swimming pools, saunas or hot tubs, and playgrounds or small park areas. Common areas are maintained by employees of the complex or park owner or by the property management service. Residents of mobile home parks are usually responsible for maintaining their own mobile homes and their immediate space.

This classification includes homeowners' associations where residents in a housing development pay annual fees which cover the maintenance of lawns, paths, sprinkler systems, and common areas such as pools, activity centers, and tennis courts by employees of the homeowners' association.

This classification excludes employees engaged exclusively in clerical duties who are to be reported separately in classification 4904; employees engaged exclusively in sales duties such as collecting rents, showing and advertising the facility, conducting auctions, or in a combination of clerical and sales duties who are to be reported separately in classification 6303; establishments providing janitorial services exclusively which are to be reported separately in classification 6602; contractors engaged in mobile home set up or removal who are to be reported separately in classification 0517; any new construction or alteration work performed by employees of employers subject to this classification which is to be reported separately in the applicable construction classification; establishments that contract to perform maintenance or repair, but have no responsibilities in the management of the property, which are to be reported separately in the applicable classification; and lodging or food serving operations which are to be reported separately in the applicable classification.

4910-01 Chimney cleaning - residential buildings

Applies to establishments engaged in providing chimney cleaning services to residential customers. Workers who perform chimney cleaning services are commonly referred to as "chimney sweeps" and usually work alone or as a two-person

team. When working as a team, one "sweep" works inside the house and the other works on the roof. The methods of cleaning vary. To protect the floors and furniture, drop cloths are placed in front of the fireplace and taped over the opening. The vertical drop cloth may have a "boot" or slit in it which allows rods to be pushed through. Various brushes, usually wire, are attached to extension rods and worked up and down the flue to dislodge the soot and creosote. Creosote deposits may be removed also with a chimney bar, which is a pipe-like instrument with a chisel end, or by using metal scrapers. Where the chimney top is protected from the rain by a hood or cap, it may not be possible to insert the brushes into the opening; a chain or weight may be lowered and swung back and forth inside the chimney. Some sweeps have custom-made vacuum trucks with large collection chambers to collect the soot. In addition to cleaning the chimney flue and fireplace, some sweeps clean oil, gas and coal burning furnaces, repair chimney and flue linings, remove animals from chimneys, and offer other related services. Repairs included in this classification are limited to such activities as caulking around the flashing and sealing brickwork.

This classification excludes establishments engaged in industrial or commercial chimney or smokestack cleaning services which are to be reported separately in classification 0508; contractors engaged in chimney reconstruction or new construction made of masonry or brick who are to be reported separately in classification 0302; contractors engaged in the installation of sheet metal stove pipe who are to be reported separately in classification 0307; and the installation of a new lining in the chimney which is to be reported separately in the applicable classification.

4910-02 Mini-storage warehouse

Applies to establishments engaged in operating mini-storage facilities. Mini-storage facilities are usually fenced and entry is through a locking gate through which owners and renters of units are provided access. The units range from lockers to rooms of various sizes; once the unit is rented, the tenant or owner has sole access to it. Typical operations include, but are not limited to, management or clerical duties, renting or selling storage units to others, providing security, and normal maintenance and repair when performed by employees of employers subject to this classification. Normal maintenance and repair contemplated by this classification includes replacing parts on existing fixtures or equipment, repairing existing structures, normal cleaning of public areas, controlling rodents and other pests, maintaining existing landscaping, and shoveling snow from driveways or walkways. Construction, alteration, or improvements to the properties are *not* considered normal maintenance and are *not* contemplated by this classification. Major repair work is usually performed by contractors who are not employees of the storage facilities.

This classification excludes employees engaged exclusively in clerical duties who are to be reported separately in classification 4904; employees engaged exclusively in sales duties or in a combination of clerical and sales duties who are to be reported separately in classification 6303; and new construction or alteration work which is to be reported separately in the applicable construction classification.

4910-03 Temporary signs - placement or removal

Applies to establishments engaged in placing or removing temporary yard signs such as, but not limited to, real estate signs for real estate offices or property management firms and campaign signs. The smaller signs are usually mounted on a metal rod which is pounded into the ground to a depth of about 18". A post hole digger may be used to dig holes for larger signs that require a more sturdy post.

This classification excludes all other types of sign installation, painting or repair which are to be reported separately in the applicable classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-65801, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-65801, filed 12/1/89, effective 1/1/90.]

WAC 296-17-659 Classification 5001.**5001-03 Logging, N.O.C.**

Applies to establishments engaged in various logging operations not covered by another classification (N.O.C). Typical work contemplated by this classification includes, but is not limited to, high lead or tower logging, ground logging, and team logging with horses. For purposes of this rule, logging is the complete operation of felling, skidding, yarding, delimiting, and bucking of trees into logs or block wood and loading them onto trucks or rail cars.

Definitions:

High Lead or Tower Logging - usually occurs in steep terrain where a metal tower is set-up on a hilltop with a system of heavy cables running down the hillside and fastened to a stump or tree and has other smaller cables with chokers hanging from it. A choker is wrapped around each fallen tree and pulled back to the landing site.

Helicopter logging - includes ground crews that work with the use of helicopters to hoist fallen trees or bucked log lengths to the landing sight.

Chokers - chains or cables which are attached to the fallen trees for skidding to the landing site.

Ground logging - usually occurs on relatively flat land; fallen trees are moved to a landing by a skidder, cat or shovel.

Bucking - stripping or delimiting tree of branches and cutting the tree to desired log lengths.

Skidding - process of dragging the fallen logs to the landing site.

Landing - place where the fallen logs are brought for sorting and loading onto log trucks.

Yarding - usually performed at the landing site with use of a log loader to sort the logs by species, length and diameter, prior to loading onto log trucks.

This classification excludes flight crews of helicopters used in helicopter logging which are to be reported separately in classification 6803; log hauling which is to be reported separately in classification 5003; logging road construction which is to be reported separately in classification 6902; and mechanical or mechanized logging operations which are to be reported separately in classification 5005 provided the classification has been approved by the classification services section.

(2001 Ed.)

5001-04 Shake, shingle bolt, and post cutting

Applies to establishments engaged in the cutting of shakes, shingle bolts (blocks), and fence posts in the woods. For the purposes of this rule, this classification includes all operations performed in the woods such as, but not limited to, the felling of trees, stripping or delimiting of branches, and all further cutting or splitting of trees/logs to produce shakes, shingle bolts or fence posts. This classification includes all transporting of shakes, shingle bolts or fence posts from the cutting site when conducted by employees of employers subject to this classification.

5001-05 Firewood cutting

Applies to establishments engaged in the cutting of firewood in the woods. For the purposes of this rule, this classification includes all operations performed in the woods such as, but not limited to, the felling of trees, stripping or delimiting of branches, and all further cutting or splitting of trees/logs to produce firewood. This classification includes all transporting of log lengths, rounds or split wood from the cutting site when conducted by employees of employers subject to this classification.

5001-06 Sawmill operations conducted in the woods in connection with logging operations

Applies to establishments operating a temporary or portable sawmill operation in the woods. This type of work is usually performed on privately owned land. A portable sawmill and saw tables, similar to those at a permanent sawmill location, are transported directly to the logging site. Log lengths are fed through a circular saw that is capable of producing various sized rough cut timber, blocks, boards and planks. This classification includes all transporting of rough cut timber, blocks, boards and planks from the cutting and/or sawing site when conducted by employees of employers subject to this classification.

This classification excludes sawmill operations which are not conducted in the woods in connection with a logging operation which is to be reported separately in the applicable sawmill classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-659, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-659, filed 5/31/96, effective 7/1/96; 86-12-041 (Order 86-18), § 296-17-659, filed 5/30/86, effective 7/1/86; 85-24-032 (Order 85-33), § 296-17-659, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-659, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-659, filed 11/30/83, effective 1/1/84; 80-17-016 (Order 80-23), § 296-17-659, filed 11/13/80, effective 1/1/81. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 78-12-043 (Order 78-23), § 296-17-659, filed 11/27/78, effective 1/1/79; Order 77-27, § 296-17-659, filed 11/30/77, effective 1/1/78; Order 75-38, § 296-17-659, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-659, filed 11/9/73, effective 1/1/74.]

WAC 296-17-660 Classification 5002.**5002-00 Booming and rafting logs**

Applies to establishments engaged in booming and rafting logs on water. Booming involves making a barrier in the water usually with existing floating logs tied together with rope or chain to enclose other free floating logs. This type of barrier is referred to as a bundle. Rafting involves the use of a boom boat or tugboat to push the bundles together and tow the bundles to a particular destination. The destination may

[Title 296 WAC—p. 373]

be a port where logs are loaded directly onto vessels, or to a sawmill, lumber mill or log sorting yard. This classification includes the loading of logs into or out of the water when performed by employees of the booming and rafting business.

Special note: Care should be exercised prior to assignment of this classification as the workers may be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-660, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-660, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-660, filed 11/9/73, effective 1/1/74.]

WAC 296-17-66001 Classification 5003.

5003-01 Log hauling by contractor

Applies to contractors engaged in hauling logs for others from a logging side to a mill or storage yard. The loading and unloading of the truck is included in this classification when performed by the truck driver.

This classification excludes the hauling of logs from a log storage yard to a shipping destination which is to be reported separately in classification 1102 and log hauling by employees of a logging company which is to be reported separately in classification 5003-02.

5003-02 Log truck drivers, N.O.C.

Applies to employees of a logging company who are hauling the company's own logs from the logging side to a mill or storage yard.

This classification excludes the hauling of logs from a log storage yard to a shipping destination which is to be reported separately in classification 1102 and log hauling by a log hauling contractor which is to be reported separately in classification 5003-01.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-66001, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-66001, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-66001, filed 11/30/83, effective 1/1/84; 80-17-016 (Order 80-23), § 296-17-66001, filed 11/13/80, effective 1/1/81. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 78-12-043 (Order 78-23), § 296-17-66001, filed 11/27/78, effective 1/1/79.]

WAC 296-17-66002 Classification 5004.

This classification applies to establishments engaged in forestry and timberland management services. It applies to employees of contractors or of land owners. This classification includes all field crew supervisors and foremen assigned to oversee work covered by this classification including internal quality control audits regardless of whether their assigned duties include manual labor. Classification 5004, and related classification 1007 and 5006, cover various activities associated with the management of forests, range or timberland. These classifications have also been assigned to establishments engaged in erosion control projects and fish and wildlife habitat enhancement projects. *The industry covered by this series of classifications has special reporting requirements.* Reforestation establishments assigned to classifications 1007, 5004, and 5006 report work on a contract basis. These contracts may last a quarter or several quarters. Refer to WAC 296-17-35203(4) for specific reporting requirements. Classification 1007 applies to technical services such

as identifying volume and species of trees in a section of timberland or a forest, auditing parcels planted by a tree planting contractor for quality control purposes, conducting environmental studies, testing growing techniques and similar activities. Classification 5004 covers various forms of work conducted in the forest or timberland generally associated with the overall care of these lands. Classification 5004 is used to report manual crew labor. Classification 5006 covers machinery operations on these lands such as clearing, slashing, hydro seeding, chemical spraying and forest fire fighting. It will be common in the case of a forest fire to have employees reporting in both classification 5004 and 5006 for forest fire fighting since some employees will operate bulldozers, loaders and tanker trucks while others will use chain saws and shovels. In some cases establishments subject to classification 5004 will use multiple subclassification codes on a single contract and premium report.

This classification excludes forestry related machine work used in connection with trail construction, slash burning, fire watch/patrol and forest fire fighting, slashing, pile burning, roadside brushing, roadway dust/mud control which is to be reported separately in classification 5006 "forestry related machine work"; logging operations which are to be reported separately in classification 5001; logging road construction which is to be reported separately in classification 6902; and technical survey work which is to be reported separately in classification 1007.

5004-04 Animal damage control

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry and timberland services. Use of this classification is limited to services related to animal damage control such as placing salt blocks and hay for wildlife. This is done to provide food and nutritional supplements to forest wildlife as an alternative and preventative measure to reduce destruction to newly planted seedlings (trees) caused by feeding animals.

5004-05 Beaver trapping

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to services related to trapping mountain beaver. This is done to prevent damage to trees caused by mountain beaver when feeding and building nests for rearing their young.

5004-06 Chemical spraying

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to services related to chemical spraying. This is done to kill competing vegetation growing around young seedlings (chemical conifer release) and keep the brush on roadsides down.

This classification excludes manual conifer release which is to be reported separately in classification 5004-14.

5004-07 Cone picking

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to services related to cone picking which is done to obtain seed for new trees. Cone picking may occur on the ground or in the trees. All forms of cone picking are included within the scope of this classification.

5004-08 Fertilizing services

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to services related to applying liquid and dry fertilizers on trees and vegetation within forested or timbered lands. This is done to stimulate and encourage the growth of desired trees and vegetation.

5004-09 Hydro seeding services

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to hydro seeding abandoned roads and roadsides which is done primarily for erosion control and habitat development. This classification also includes manual labor associated with erosion control or habitat development projects.

5004-11 Pruning services

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to pruning lower tree branches. This is being done on an experimental basis on certain plots to aid in the production of clear wood (knot free) for future plywood and furniture demands.

5004-12 Tree netting services

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to placing netting or paper sleeves over new tree growth to discourage animals from eating the growth. This is also referred to as bud capping.

5004-13 Tree planting services

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to planting trees in a forest (reforestation) or in privately owned timbered land. This is done to re-establish a tree population after logging or a fire.

5004-14 Tree thinning services including forest trail construction and brush clearing, N.O.C.

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in the removal of unmarketable trees with a chain saw, machete, or pruning loppers, brush clearing, manual tree slashing and constructing walking paths or trails. This is done to reduce competition of the remaining trees for water and nutrients, eliminate fire hazard and pro-

vide trails for management and recreational use. This classification includes manual conifer release.

This classification excludes chemical conifer release which is to be reported separately in classification 5004-06.

5004-18 Miscellaneous forestry services, N.O.C.

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry and timberland services not covered by another classification (N.O.C.). This classification is for miscellaneous manual labor on forest or timberland such as, but not limited to, manual forest fire fighting.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-66002, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-66002, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1), 51.16.035, 51.12.070 and 51.16.060. 92-18-065, § 296-17-66002, filed 8/31/92, effective 10/1/92. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-66002, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-66002, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-66002, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-66002, filed 11/30/81, effective 1/1/82.]

WAC 296-17-66003 Classification 5005.

5005-00 Logging and/or tree thinning - mechanized operations

(to be assigned only by classification services staff)

Applies to establishments engaged in mechanized logging or tree thinning operations. For purposes of this classification, mechanized logging is defined as the entire process of felling, removal (skidding), yarding, processing, delimiting, bucking and loading of trees/logs by machine. This classification can be used by a logging contractor only if the entire side is being logged using methods and equipment described in this rule. If any portion of the side is being logged by conventional methods the entire operation must be reported in classification 5001 - Logging, N.O.C. For example, an employer that subcontracts to fell trees with a feller/buncher or processor but is not involved in the removal (skidding) of the trees, the processing (delimiting and bucking) of the trees and the loading of trees is excluded from classification 5005 and is to be reported in classification 5001 - Logging, N.O.C. Any employer whose operation includes any manual felling, removal, processing, or loading of trees is excluded from classification 5005 and is to be reported in classification 5001 - Logging, N.O.C. Work contemplated by this classification includes the falling of trees with a machine such as a feller buncher or processor; skidding logs to the landing with use of a grapple skidder or forwarder; delimiting logs with a mechanized delimeter such as a stroke delimeter, processor, CTR or harvester; and loading logs onto log trucks with a mechanical loader or shovel. Equipment used by employers subject to this classification will consist of the following:

Feller/buncher - used to fell trees and place felled trees into stacks (bunches) for removal to the log landing for further processing. The operator of this machine does not leave the cab of the machine in the performance of duties in the logging operation.

Processor - used to fell trees, delimit them, buck tree to desired log length and stack the bunches for removal to the landing where they will be segregated by general grade and loaded onto log trucks. A processor is sometimes used at the

landing to delimb trees and buck them to log length, especially when the trees are felled by a feller/buncher. The operator of this machine does not leave the cab of the machine in the performance of duties in the logging operation.

Grapple skidder - is used to remove (ground skid) stacks (bunches) of felled trees from the woods to the landing. The industry refers to both the skidder and the bulldozers as a tractor. The two are distinguished from one another in that the skidder is a tire-driven tractor and the bulldozer is a track-driven tractor. A bulldozer equipped with a grapple is an acceptable piece of equipment to be used in the removal of trees. The operator of either the grapple skidder or bulldozer equipped with grapple does not leave the cab of the machine in the performance of duties in the logging operation.

Forwarder - is used to remove logs as cut by a processor from the woods to an awaiting log truck or to be stacked in piles for a future pick up by a log truck. This is a small specialized tractor equipped with a self-loader and a log bunk. The operator of this machine does not leave the machine in the performance of duties in the logging operation.

Harvester - is used at the landing of the logging side to delimb trees and buck trees to desired log length. This machine can also be used to load logs onto log trucks. The operator of this machine does not leave the cab of the machine in the performance of duties in the logging operation.

Loader - is used at the landing to load logs onto log trucks. The operator of this machine does not leave the cab of the machine in the performance of duties in the logging operation.

This classification excludes log hauling which is to be reported separately in classification 5003 and logging road construction which is to be reported separately in classification 6902.

Special notes: If any portion of the logging contract is performed manually or by hand, the establishment does not qualify for this classification. If any portion of the logging contract is subcontracted out to another business and is performed manually or by hand, then none of the businesses involved in the logging contract will qualify for this classification and are to be reported separately in classification 5001.

All equipment used by employers subject to this classification must meet WISHA guidelines for Roll Over Protection Standards (ROPS) and Falling Object Protection Standards (FOPS).

See classification 5206 (WAC 296-17-675) for permanent shop/yard operations.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-66003, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-66003, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 94-12-051, § 296-17-66003, filed 5/27/94, effective 7/1/94.]

WAC 296-17-66004 Classification 5006.

This classification applies to establishments engaged in forestry and timberland management services. It applies to employees of contractors and of landowners. Classification 5006 and related classifications 1007 and 5004 cover various activities associated with the management of forests, range and timberland. These classifications have also been

assigned to establishments engaged in erosion control projects and fish and wildlife habitat enhancement projects. *The industry covered by this series of classifications has special reporting requirements.* Establishments assigned to classifications 1007, 5004 and 5006 report work on a contract basis. These contracts may span a quarter or several quarters. Refer to WAC 296-17-35203(4) for specific reporting requirements. Classification 1007 applies to technical services such as identifying volume and species of trees in a section of timberland or a forest, auditing parcels planted by a tree planting contractor for quality control purposes, conducting environmental studies, testing growing techniques and similar activities. Classification 5004 covers various forms of work conducted in the forest or timberland generally associated with the overall care of these lands. Classification 5004 is used to report manual crew labor. Classification 5006 covers machinery operations on these lands such as, but not limited to, clearing, slashing, hydro seeding, chemical spraying and forest fire fighting. It will be common in the case of a forest fire to have employees reporting in both classification 5004 and 5006 for forest fire fighting since some employees will operate bulldozers, loaders and tanker trucks while others will use chain saws and shovels. In some cases establishments subject to classification 5006 will use multiple subclassification codes on a single contract and premium report.

5006-00 Forestry machine work - brush clearing and chemical spraying

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in brush clearing using specialized tractors and chemical spraying.

5006-01 Forestry machine work - dust control

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in spraying water on logging roads to reduce dust caused by log hauling trucks, logging equipment and other passenger traffic. Equipment consists of a water tanker truck equipped with a spray apparatus controlled from within the cab of the vehicle.

5006-02 Forestry machine work - forest fire fighting

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in forest fire fighting using equipment such as, but not limited to, water tanker trucks, bulldozers and loaders.

5006-03 Forestry machine work - forest trail construction

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to

this classification engaged in forest trail construction using equipment such as, but not limited to, bulldozers and loaders.

5006-04 Forestry machine work - scarifying

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in scarifying work using equipment such as, but not limited to, bulldozers and loaders.

5006-05 Forestry machine work - slash burning

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in slash burning leftover vegetation and tree debris using equipment such as, but not limited to, bulldozers, loaders and water tanker trucks.

5006-06 Forestry machine work - slash piling

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in piling leftover vegetation and tree debris (slash) using equipment such as, but not limited to, bulldozers and loaders.

5006-07 Forestry machine work - slope grooming

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in removing vegetation and grading (leveling and smoothing) land using equipment such as, but not limited to, bulldozers and loaders.

5006-08 Miscellaneous forestry services, N.O.C.

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry and timberland services not covered by another classification (N.O.C.). This classification is for miscellaneous machine work on forest or timberland such as, but not limited to, hydro seeding and erosion control.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-66004, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-66004, filed 5/31/96, effective 7/1/96.]

WAC 296-17-661 Classification 5101.

5101-31 Pipe or tube: Manufacturing - iron or steel; Metal ejection molding

Applies to establishments engaged in the manufacture of pipe or tubes from iron or steel. This classification contemplates both seamed and seamless pipe and tubing involving either a hot or cold drawing process or roll forming and machine welding processes, as well as flexible steel tubing used for products such as, but not limited to, automotive exhaust systems, water lines, and oil lines. In the drawing process, metals are melted to a molten state in furnaces, then rolled or spun in rolling machines and a pipe or tube is drawn.

(2001 Ed.)

Tubing may be annealed (fed through a furnace then slowly cooled to strengthen and reduce brittleness). In the roll forming method flat sheets of iron or steel are bent in brake presses or other rolling or bending machinery, then the edges are welded together to form the pipe or tube. This classification also includes metal ejection molding in which raw scrap and pig iron is melted, forced into casting machines, and cast in high speed revolving flasks of various shapes depending on the product being produced. When finished, products are ejected from the molds. They may be further processed by annealing, tumbling, deburring and grinding, and cleaned in acid baths.

This classification excludes pipe dealers which are to be reported separately in classification 2009; the installation of any product manufactured in this classification which is to be reported separately in the classification applicable to the work being performed; and foundry operations which are to be reported separately in classification 5103.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-661, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-661, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-661, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-661, filed 11/9/73, effective 1/1/74.]

WAC 296-17-663 Classification 5103.

5103-00 Foundries, N.O.C.

Applies to establishments engaged in operating foundries that manufacture castings from ferrous and/or nonferrous metals. To form castings, metal is melted in furnaces, then poured or ladled into molds. After they are cooled and solidified, castings are removed from molds with shake out machines, or tools such as torches, electric arcs, abrasive saws, or sledgehammers. Depending on the product and the carbon or alloy content of the metal, further repair or refining such as welding, annealing, tempering, flame hardening or other heat treatments may be needed. Cleaning and finishing processes include, but are not limited to, machining, chipping, grinding, shot or sandblasting, tumbling, and acid pickling to remove surface defects, inspection (sometimes by radiation or chemical analysis) and painting or powder coating. Foundries may make their own patterns and mold, and/or perform their own finishing processes, or they may contract these activities out to pattern-making shops or to machine shops.

This classification excludes establishments that perform only pattern making functions which are to be reported separately in classification 2906 and establishments engaged exclusively in machine shop services which are to be reported separately in classification 3402.

Special note: Foundries that make their own patterns and/or perform their own machine finishing may report those operations separately in the classifications applicable to the work being performed provided all of the conditions of the general reporting rule covering the operation of a secondary business activity have been met.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-663, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 89-24-051 (Order 89-22), § 296-17-663, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-663, filed 11/27/85, effective 1/1/86; Order 73-22, § 296-17-663, filed 11/9/73, effective 1/1/74.]

[Title 296 WAC—p. 377]

WAC 296-17-666 Classification 5106.**5106-08 Blacksmithing; vehicle spring or auto bumper: Manufacturing**

Applies to establishments engaged in blacksmithing, or in manufacturing leaf springs or bumpers for vehicles. Blacksmithing is the hammering of metal heated in a forge to shape either with hand tools or with a steam or air hammer. The force of the blow is controlled by the operator and the desired size or shape is produced between flat dies like a hammer and anvil. Incidental welding, grinding, tempering and sharpening may also be involved. Spring manufacturing contemplated by this classification are known as leaf springs and are used in vehicles. To make leaf springs or bumpers, steel is rolled, sheared or stamped to size, bent to shape and then tempered to produce the required degree of elasticity.

This classification excludes the manufacture of wire springs, such as for wire mattresses or bed springs, which is to be reported separately in classification 3402.

5106-09 Tool forging: Hot forming or stamping

Applies to establishments engaged in the manufacture of products such as, but not limited to, forging tools, hand tools such as wrenches or levels, and small machine tools such as twist drills, chisel bits, dies, or jigs, by hot forming or stamping. Tool forging by hot forming or stamping involves heating metal in a furnace or hearth, then beating or hammering the heated metal into desired shapes with large drop hammers or rams. After forging is completed, goods are finished with typical machine shop equipment. Finishing processes may involve cutting, turning, shaping, heat-treating, drilling, milling, grinding, tapping and finishing by assembling, polishing, buffing, painting or plating.

This classification excludes establishments engaged in the manufacture of tools by machining operations which are to be reported separately in the applicable machining classification.

5106-10 Forging works; drop or machine

Applies to establishments engaged in the manufacture of products such as, but not limited to, engine parts, hooks, and chains by drop or machine forging. Forgings are produced by drop or trip hammers or forming presses. Drop or machine forging differs from blacksmithing or hammer forging in that closed impression dies are used. The forgings are produced by impact or pressure which forces the metal to conform to the shape or the die, one half of which is carried by the ram while the other half is held stationary on the anvil block. Trimming is done by the trimmer dies in a separate press which removes the surplus metal that squeezes out between the two sections of the forging die.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-666, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-666, filed 11/27/85, effective 1/1/86; 82-24-047 (Order 82-38), § 296-17-666, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-666, filed 11/9/73, effective 1/1/74.]

WAC 296-17-668 Classification 5108.**5108-55 Cable or wire rope: Drawing and manufacturing**

Applies to establishments engaged in wire drawing including wire rope or cable manufacturing from iron or

[Title 296 WAC—p. 378]

steel. Establishments may be engaged in the further manufacturing of products made from wire such as, but not limited to, baling wire, barbed wire, spikes, galvanized wire and nails. The process involves the forming of metal on a swage block into a shape that will eventually be drawn through a series of dies to reduce it in size. Some wire may be heat-treated to allow for continual drawing. Secondary and final drawing machines with progressively smaller dies are used to reduce the wire to the desired fineness. Incidental galvanizing is considered normal to iron or steel wire when performed as a subsequent treatment of drawn wire. The finished wire is automatically wound onto reels for shipment or may be further processed into wire rope or cables. Stranding and braiding is done on automatic machines and the wire or cable stored on shipping reels.

5108-56 Cable or wire rope: Manufacturing with no drawing

Applies to establishments engaged exclusively in stranding iron or steel wire rope or cable. Reeled iron or steel coils of drawn wire and core material are received from others. The wires are mechanically wound together to form a multi-wire strand which are then wound helically around a metal or fiber core to form wire rope. The finished rope or cable is pulled through a compression die, measured by power driven drums and stored on shipping reels.

5108-57 Cable or wire insulation or covering: Manufacturing

Applies to establishments engaged in manufacturing insulated or covered electrical cable. These establishments receive the drawn wire and the insulation material from outside sources. Commonly used insulation materials are enamel or lacquer, rubber, plastic, paper, cambric and cotton thread. Enamel or nylon insulation is applied by running the wire through heated tanks of either mix. The wire is then dried in ovens and the cycle is repeated several times. This classification applies also to the placing of various protective coverings on insulated wire. These protective coverings are generally cotton braid, metallic armor or lead sheathing. This classification includes incidental wire stranding when performed by employees of employers subject to this classification.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-668, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-668, filed 11/27/85, effective 1/1/86; 82-24-047 (Order 82-38), § 296-17-668, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-668, filed 11/9/73, effective 1/1/74.]

WAC 296-17-669 Classification 5109.**5109-46 Heavy machinery & equipment including locomotive engines: Manufacture or repair; Press roller recoating/resurfacing**

Applies to establishments engaged in the manufacture, assembly, and repair of heavy equipment. Machinery and equipment subject to this classification are usually made of steel and steel/iron castings and include, but are not limited to, bulldozers, dump trucks, graders, skidders, forklifts and logging towers. The component parts may weigh several hundred to thousands of pounds. Overhead cranes are com-

(2001 Ed.)

monly used in the assembly process. Machinery used in the manufacturing, assembly, and repair includes, but is not limited to, boring mills, lathes, iron workers, welders/cutters, cut saws, and drills. Some establishments use CNC (computer numeric controlled) machinery; however, most establishments in this classification primarily use manual machinery and conventional welders/cutters. Other common operations covered by this classification include paint, welding, and electronic assembly areas. This classification also includes establishments that repair, recoat or resurface press rollers such as, but not limited to, the type rollers used by printing and paper making mills. Operations include repairing the interior shafts of the rollers, then grinding fiberglass or ceramic finishes until they are smooth. For rubber-coated surfaces, they remove the old rubber from the metal surface, sandblast the roller, then recoat it with new rubber. Most establishments that recoat the surface with rubber will mix and extrude their own rubber which is included in this classification when performed by employees of employers subject to this classification.

Special note: Field work as well as shop work is contemplated as an integral part of this classification. A vehicle may be equipped with welding equipment and other tools used for field repair. The broken part may be replaced in the field or returned to the shop, repaired if feasible, or a new part is ordered. The part is then loaded onto the field vehicle taken to the job site and reconnected. Some establishments perform this type of field work almost exclusively.

5109-47 Heavy arms: Manufacturing or repair

Applies to establishments engaged in the manufacture or repair of heavy arms including large munitions. This classification applies to all types of guns 20 MM and larger including, but not limited to, aircraft guns, tank guns, naval guns, torpedoes and aircraft gun turrets.

Special note: Field work as well as shop work is contemplated as an integral part of this classification. A vehicle may be equipped with welding equipment and other tools used for field repair. The broken part may be replaced in the field or returned to the shop, repaired if feasible, or a new part is ordered. The part is then loaded onto the field vehicle taken to the job site and reconnected. Some establishments perform this type of field work almost exclusively.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-669, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-669, filed 5/31/93, effective 7/1/93; 91-12-014, § 296-17-669, filed 5/31/91, effective 7/1/91. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-669, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-669, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-669, filed 11/30/83, effective 1/1/84; 80-17-016 (Order 80-23), § 296-17-669, filed 11/13/80, effective 1/1/81; Order 75-38, § 296-17-669, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-669, filed 11/9/73, effective 1/1/74.]

WAC 296-17-670 Classification 5201.

5201-75 Electric power or transmission equipment: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of electrical power or transmission equipment, most of which is industrial and is used by public utilities for the transmission of electrical power. Equipment manufac-

(2001 Ed.)

tured includes, but is not limited to, transformers, switchboards, circuit breakers, switches or switchboard apparatus, power switching devices or systems, and power invertors. Transformers step down voltage from very high to a lower voltage. Switching equipment is normally used to switch the electricity from an incoming line to outgoing lines. Transformers are usually made from sheet metal which is approximately 14 gauge. Machinery used to manufacture transformers is similar to that used in a sheet metal shop. Winding machines are also used to wind wire to form a coil which is placed inside the transformer. This is a shop or plant only classification.

This classification excludes the installation, service or repair away from shop of products manufactured which are to be reported separately in the applicable classification; the installation, removal, and repair of electric power or transmission equipment or machinery by a contractor which is to be reported separately in the classification applicable to the work being performed.

Special note: Switchboards, current breakers and switches subject to this classification are distinguishable from switchboards, current breakers and switches covered in classification 3602. Classification 3602 switches are those found on personal computers, household light switches, and small electrical appliances compared to switches manufactured in classification 5201 which are large metal bars used in power plants and substations. Circuit breakers covered in classification 3602 are of the size found in household breaker panels compared to circuit breakers covered in classification 5201 which appear more like large round cylinders with flat metal bars extruding from the cylinders. Switchboards covered in classification 3602 are computerized systems such as telephone systems compared to industrial switchboards such as those used in rail systems for switching trains on tracks.

5201-76 Electric toasters, frying pans, wire harnesses, vacuum cleaners, electrical appliances, N.O.C: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of electric toasters, frying pans, wire harnesses, vacuum cleaners (including central vacuum systems), table top or counter top electrical appliances which are not covered by another classification (N.O.C.) including, but not limited to, electric shavers, steam and dry irons, waffle irons, can openers, mixers and blenders. *Wire harnesses* are the configuration of wires making up the electrical circuit inside an appliance or vehicle that does not include the cord set which will connect the appliance to the power source. The manufacturing process contemplated by this classification is the assembly of component parts and casings, purchased from other manufacturers, with small hand tools such as, but not limited to, drills, screwdrivers, rivet guns, and soldering or brazing tools. This is a shop or plant only classification; all activities away from the shop or plant are to be reported separately.

This classification excludes establishments engaged in the repair of household appliances for others which are to be reported separately in classification 0607; establishments engaged in the manufacture of larger household appliances such as electric ranges, washing machines and refrigerators

[Title 296 WAC—p. 379]

which are to be reported separately in classification 3404; establishments engaged in the assembly of electric cordset radio and ignitions which are to be reported separately in classification 3602; and the service or repair away from shop of products manufactured in this classification which are to be reported separately in the applicable classification.

5201-78 Electric motors, generators, alternators, starters, convertors, solenoids and servomotors: Manufacturing or assembly including repair

Applies to establishments engaged in the manufacture or assembly of electric motors, generators, alternators, starters, convertors, solenoids and servomotors of all sizes and horsepower. *Convertors* convert electricity from one voltage to another; *solenoids* are switches used to control the flow of electrical current; *servomotors* are electrical motors used to help control a mechanical device. This is a shop or plant only classification; all activities away from the shop or plant are to be reported separately.

This classification excludes the installation, service, or repair away from shop of products manufactured in this classification which are to be reported separately in the applicable classification and the installation, removal, and repair of electric power or transmission equipment in machinery by contractor which is to be reported separately in classification 0601.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-670, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-670, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-670, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-670, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-670, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-670, filed 11/9/73, effective 1/1/74.]

WAC 296-17-673 Classification 5204.

**5204-58 Railroad car: Manufacturing or repair
Railroad car wheel: Manufacturing or repair**

Applies to establishments engaged in the manufacture or repair of railroad cars and/or railroad car wheels. This classification includes the repair or rebuilding of freight cars, repair of railroad rolling stock tank cars or passenger cars. Inspections of railroad cars are usually conducted prior to making the repairs. Types of repair include, but are not limited to, electrical, mechanical (such as for brakes), or welding (such as on handrails and steps).

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-673, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-673, filed 11/27/85, effective 1/1/86; Order 75-38, § 296-17-673, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-673, filed 11/9/73, effective 1/1/74.]

WAC 296-17-675 Classification 5206.

5206-78 Permanent yard or shop operations; logging or log hauling contractor

Applies to a permanent yard or shop of logging or log hauling contractors. This classification is limited to contractor yards and shops which are maintained exclusively for the storage of materials and maintenance of equipment used in their logging and/or log hauling business. This classification does not contemplate any manufacturing operations. Only employees of a logging or log hauling contractor who are

assigned to the shop or yard are to be reported in this classification. This classification is further restricted in that employees reported in classification 5206-78 cannot have any other duties other than those related to the storage of materials and/or the maintenance of equipment during their work shift or work day. Any employee having any other duties during their assigned work shift or day are to be reported separately in the applicable logging or log hauling classification.

Special note: Under no circumstances can this be the only classification assigned to an employer.

5206-79 Permanent yard or shop operations; Construction or erection contractor

Applies to a permanent yard or shop of construction or erection contractors. This classification is limited to contractor yards and shops which are maintained exclusively for the storage of materials and maintenance of equipment used in their construction business. This classification does not contemplate any manufacturing operations. For example, a contractor engaged in cabinet manufacturing and installation is to report the shop and yard operation in classification 2907 and is not entitled to classification 5206. Only employees of a construction or erection contractor who are assigned to the shop or yard are to be reported in this classification. This classification is further restricted in that employees reported in classification 5206-79 cannot have any duties other than those related to the storage of materials and/or the maintenance of equipment during their work shift or work day. Any employee having any other duties during their assigned work shift or day are to be reported separately in the applicable construction classification.

Special note: Under no circumstances can this be the only classification assigned to an employer.

5206-80 Permanent yard or shop operations; interstate and/or intrastate trucking

Applies to a permanent yard or shop of interstate and/or intrastate trucking establishments. This classification is limited to yards and shops which are maintained exclusively for the storage or maintenance of transportation equipment or related equipment used in their trucking operation. This classification does not contemplate any driving duties, or the handling or storage of freight. Only employees of a trucking operation who are assigned to the shop or yard are to be reported in this classification. This classification is further restricted in that employees reported in classification 5206-80 cannot have any other duties other than those related to the storage or maintenance of equipment during their work shift or work day. Any employee having any other duties during their assigned work shift or day are to be reported separately in the applicable trucking classification.

Special note: Under no circumstances can this be the only classification assigned to an employer. *And*, this classification is not to be assigned to any business assigned classification 1101 for delivery services.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-675, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-675, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-675, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-675, filed 11/27/85, effective 1/1/86; 83-24-017 (Order 83-36), § 296-17-675, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-

675, filed 11/29/82, effective 1/1/83; 80-17-016 (Order 80-23), § 296-17-675, filed 11/13/80, effective 1/1/81. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 78-12-043 (Order 78-23), § 296-17-675, filed 11/27/78, effective 1/1/79; Order 76-36, § 296-17-675, filed 11/30/76; Order 73-22, § 296-17-675, filed 11/9/73, effective 1/1/74.]

WAC 296-17-676 Classification 5207.

5207-00 Bowling centers

Applies to establishments engaged in operating bowling centers. Duties include, but are not limited to, renting bowling shoes, collecting fees, distributing score sheets, designating and activating lanes, organizing league competitions, repairing and maintaining scoring equipment, automatic pin setting equipment, ball return machinery or automatic ball cleaning units, refinishing pins and cleaning, waxing, polishing, or buffing the lanes. This classification includes food and beverage operations, pro shop and billiard room operations when conducted as part of the bowling center by employees of the bowling center.

This classification excludes contractors who refinish or replace the hardwood flooring of the lanes which are to be reported separately in classification 0513; food services operated by concessionaires independent of the bowling center which are to be reported separately in classification 3905; and amusement parks that include bowling lanes as part of their operation which are to be reported separately in classification 6208.

5207-01 Skating rinks; Skateboard facilities

Applies to establishments engaged in the general operation of roller or ice skating rinks. Duties include, but are not limited to, renting roller or ice skates or rollerblades, collecting fees, assigning lockers, renting the rinks, playing music, organizing groups or competitions, performing as rink guards, repairing and maintaining sound, communication or lighting equipment, cleaning, polishing, or dusting roller skating rink floors, and maintaining the ice on the ice rinks. This classification includes food and beverage services and skate shop operations when conducted as part of the rinks by employees of the rinks. Skate shops may sell skates, clothing and related accessories, and perform minor adjustments on skates with hand tools, sharpeners, grinders, or wheel lathes. This classification also includes the operation of skateboard facilities.

This classification excludes contractors who refinish or replace the hardwood flooring of the rink which are to be reported separately in classification 0513 and food services operated by concessionaires independent of the skating rink which are to be reported separately in classification 3905.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-676, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-676, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-676, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-676, filed 2/28/85, effective 4/1/85; 81-24-042 (Order 81-30), § 296-17-676, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-676, filed 11/9/73, effective 1/1/74.]

(2001 Ed.)

WAC 296-17-67601 Classification 5208.

5208-00 Iron or steel works: Fabrication or assembly - structural iron or steel

Applies to establishments engaged in the fabrication or assembly of structural iron or steel. Structural in this classification will mean when fabricated for and used in the frame or grid work of a building, tower, bridge, or similar construction. Fabrication means the laying out of the pieces, the marking, cutting, sawing, drilling, punching, bolting, welding, assembling and finishing of the structural steel products. Raw materials include, but are not no limited to, steel I-beams, tube steel, angle steel, and flat steel. Machinery includes overhead cranes, horizontal and vertical band saws, shears, punches, drill press, brake presses, and welding equipment. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes the erection of structural iron or steel in connection with towers, refineries, elevated railways, and buildings which is to be reported separately in the applicable iron or steel construction classification; contractors engaged in building construction who are to be reported separately in the applicable iron or steel construction class; bridge construction, including structural iron or steel erection, which is to be reported separately in the classification applicable to the work being performed; and manufacturing of rebar for construction which is to be reported separately in classification 5209.

5208-01 Brass, bronze, iron - ornamental: Shop fabrication, assembly or manufacture

Applies to establishments engaged in the manufacture, fabrication, or assembly of ornamental items from brass, bronze and/or iron. Products include, but are not limited to, railings, guards, staircases, fire escapes, and art items. Products are often light and do not require cranes or hoists to move them. The processes vary depending on the product being produced. The equipment includes, but is not limited to, iron workers, shears, drill presses, band saws, forklifts, welders, and grinders. The painting of products manufactured is included in this classification when performed by employees of employers subject to this classification. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes installation which is to be reported separately in the classification applicable to the work being performed.

5208-02 Iron works: Fabrication, assembly, or manufacture; nonstructural iron or steel

Applies to establishments engaged in the manufacture, fabrication or assembly of nonstructural iron or steel. Fabrication means the laying out of the pieces, the marking, cutting, sawing, drilling, punching, bolting, welding, assembling and finishing operations including painting. Products include, but are not limited to, cattle crossing grates, window gratings, grill pieces, and storage racks used by warehouses. Equipment includes, but is not limited to, cut saws, welders,

[Title 296 WAC—p. 381]

drill presses, grinders, band saws, and hoists. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes installation which is to be reported separately in the classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-67601, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-67601, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-67601, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-67601, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-67601, filed 2/28/85, effective 4/1/85; 82-24-047 (Order 82-38), § 296-17-67601, filed 11/29/82, effective 1/1/83.]

WAC 296-17-67602 Classification 5209.

5209-00 Boiler or tank construction

Applies to establishments engaged in the construction of boilers or steel tanks. Boilers are tanks used to either store hot water or make steam. Tanks may be used to hold products such as, but not limited to, sand and gravel, water, solid waste or fuels. The product is constructed from steel plate and may use I-beams for structural support. The materials may be purchased in bulk, if the business has the brake presses and rollers to cut and shape the metals to the appropriate dimensions, or as fabricated components. These establishments may also use cutting torches and other welding equipment in the manufacture of their products. They usually have a large shop area in one or more buildings that is equipped with overhead cranes. There is usually a yard to store raw materials, work-in-process, and finished goods. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes installation of boilers or tanks which is to be reported separately in the classification applicable to the work being performed.

5209-01 Metal goods, N.O.C. from 9 gauge or heavier metals

Applies to establishments engaged in the manufacture of goods using ferrous and nonferrous metal of 9 gauge or heavier. 9 gauge metals are approximately 1/8" thick. Items manufactured include, but are not limited to, crab pots, gaff hooks, firewood boxes, rims for basketball hoops, and rebar. Raw material is cut to desired size with saws, shears, brake presses, punches, and flame cutters. Parts may be joined by welding, riveting, screwing, or bolting. The parts may be handled by overhead cranes, hoists, and forklifts. The products may be finished in a variety of ways including, but not limited to, sanding, grinding, cleaning with solvents and applying paint or lacquer. Finish work is included in this classification when performed by employees of employers subject to this classification. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes establishments primarily engaged in structural iron or steel manufacturing which are to be reported separately in classification 5208; establishments

primarily engaged in welding and machine shop activities which are to be reported separately in classification 3402; and establishments primarily engaged in manufacturing products from metal lighter than 9 gauge which are to be reported separately in classification 3404.

5209-02 Wood or pellet burning stove: Manufacturing

Applies to establishments engaged in the manufacture of wood or pellet burning stoves. Sheet steel or plate metal is sheared, formed, punched, baked and decreased. Parts are assembled by spot welding, then enameled or painted. Grey iron parts are foundry cast, chipped, and ground. Heating elements, insulation, wiring and control assemblies, glass panels and grey iron parts are assembled into stove shells on the production assembly line. The stoves are then packed for shipment. Materials include, but are not limited to, sheet steel, grey iron or ferrous castings, insulation materials, glass, aluminum and brass tubing control assemblies, chrome trim and hardware, and paints and enamels. Equipment includes, but is not limited to, power presses, shears, brake presses, welding equipment, spray painting equipment, baking oven, pneumatic and electric grinders and chippers, and pneumatic tools. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-67602, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-67602, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-67602, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-67602, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-67602, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-67602, filed 11/29/82, effective 1/1/83.]

WAC 296-17-677 Classification 5301.

5301-10 Accounting or bookkeeping services

Applies to establishments engaged in providing general accounting or bookkeeping services to others. Types of services contemplated by establishments subject to this classification include, but are not limited to, auditing, tax preparation, medical or dental claims processing and billing, and/or advisory services. This classification includes all employments such as, but not limited to, clerical office, outside sales, and personnel who travel from one office to another.

This classification excludes establishments engaged primarily in management consultant services that are not otherwise classified, which are to be reported separately in classification 5301-12.

Special note: This classification is limited to employers engaged in such services being provided to the general public. This is a services only classification and does not include retailing or store operations, nor is this classification to be assigned to employers setting up separate business operations to manage other commonly owned or operated business undertakings unless coincidentally the other operations are also subject to this classification.

5301-11 Law firms

Applies to establishments engaged in providing legal services to others. Law firms may specialize in one or more

areas of law. This classification includes clerical office and outside sales personnel who travel from one office environment to another.

Special note: This is a services only classification and does not include retailing or store operations, nor is this classification to be assigned to employers setting up separate business operations to manage other commonly owned or operated business undertakings unless coincidentally the other operations are also subject to this classification.

5301-12 Management consultant services, N.O.C.

Applies to establishments engaged in providing management consulting services not covered by another classification (N.O.C.). Management consultants typically will observe and analyze organizational structures, work processes or work flows, mail distribution, computer or communication systems, and planning or development of related business needs. After a thorough analysis, consultants usually prepare a written report for the customer which identifies problem areas and/or recommends improvements to processes or equipment. Consultants may remain to oversee the implementation of the recommended improvements. Consultants subject to this classification do not sell any product they have recommended although they may act as an agent for their client in purchasing the product. Consulting projects vary from client to client depending upon the contract. This classification includes clerical office staff, outside sales personnel and other staff who travel from one office to another.

Special note: This classification is limited to employers engaged in such services being provided to the general public. This is a services only classification and does not include retailing or store operations, nor is this classification to be assigned to employers setting up separate business operations to manage other commonly owned or operated business undertakings unless coincidentally the other operations are also subject to this classification.

5301-13 Credit bureaus; collection agencies

Applies to establishments that are licensed to provide collection and/or credit investigation services to others. Services include, but are not limited to, the collection of NSF checks or delinquent debts owed to clients of the collection agency and checking the credit backgrounds of their client's potential customers. If debts are not collected, the service agency may initiate legal proceedings against the debtor. This classification includes clerical office and outside sales personnel, other staff who travel from one office to another, and process servers, although collection agencies subject to this classification generally employ process servers of other businesses to deliver legal documents.

This classification excludes establishments engaged in providing process serving services which may be reported separately in classification 6303 provided all the conditions of the general reporting rules covering standard exception employees have been met.

5301-14 Employment agencies

Applies to establishments that are licensed to provide employment services for others. Clients of employment agencies may be persons seeking employment or companies looking for employees. Employment agencies usually con-

duct preliminary interviews with candidates for positions prior to referring them to their client companies for interviews. Generally, establishments subject to this classification place people in permanent positions. This classification includes clerical office and outside sales personnel, and staff who travel from one office to another.

This classification excludes employees of a temporary help agency who are assigned to work in the administrative or branch offices of the agency who are to be reported separately in classification 7104 and employees of a temporary help agency who are assigned on a temporary basis to its customers who are to be reported separately in the appropriate temporary help classification.

5301-15 Court reporting services

Applies to establishments engaged in providing court reporting services to others. Court reporters record verbatim testimony presented in court proceedings, depositions, public hearings or meetings. The most frequently used method to record testimony is by stenotype machine, although it may be recorded by voice recording on audio tape, or by manual shorthand. Transcription of the recorded material may be performed by the court reporter or by "note readers" or typists. The majority of court reporters today use computer-aided transcription systems. Court reporters may also offer notary public services for their clients. This classification includes clerical office and staff who travel from one office to another.

5301-16 Service and professional organizations

Applies to establishments engaged in protecting or furthering the interest of their members and/or the general public. Many of these operate as nonprofit organizations. Service and professional organizations may perform one or many of the following activities: Maintain a membership directory; collect membership dues; publish a newsletter; sponsor educational training programs; administer certification tests; provide job placement assistance; award scholarships; offer insurance programs; research and interpret local, state, and federal regulations and apprise members of the results; manage promotional marketing programs; organize fund raising campaigns; perform charitable community services; sponsor athletic leagues and tournaments; host conventions; disburse funds; perform collective bargaining; arbitrate disputes; provide counseling, adoption, and advocacy services; lobby the legislature; compile, review, and disseminate informational data; operate a tourist information center; issue vehicle license registrations, plates, decals, and certificates of title. Also included in this classification are Economic Development Councils, Boards, or Associations. These nonprofit organizations provide economic consulting services and related statistics to government and industry in the promotion of economic stability, and recruit businesses who will create jobs and provide loans from the grant funds they manage. This classification includes clerical office and outside sales personnel who travel from one office environment to another.

This classification excludes labor unions and employee representative associations which are to be reported separately in classification 6503.

5301-18 Telephone answering services

Applies to establishments engaged in providing telephone answering services for others. Customers include, but are not limited to, medical professionals, attorneys, private businesses, and individuals. Most answering services today use computerized communications systems to identify company names when answering calls for various companies, obtain correct information about the company to respond to questions, record and relay accurate messages in a timely manner. Related services often offered by telephone answering service companies include, but are not limited to, voice mail or paging, rental of office space, telemarketing, dispatching, monitoring alarm systems, placing reminder calls, and scheduling appointments for customers. This classification includes clerical office personnel and staff who travel from one office to another.

5301-19 Travel agencies

Applies to establishments engaged in providing travel arrangement services for others. Travel agencies coordinate all types of travel arrangements for their clients through air, cruise, train, or bus lines, hotels, motels, or resorts, car rental agencies, travel insurance companies, and related travel providers. Services vary and could include delivery of tickets and itineraries to clients, booking reservations and selling tickets for tours, excursions, or other entertainment events, or arrangement of special needs for disabled or elderly travelers. This classification includes clerical office and sales staff who travel from one office to another.

5301-21 Word processing or secretarial services

Applies to establishments engaged in providing word processing or secretarial services to others. Services include, but are not limited to, desktop publishing, dictation and transcription services, typing/compiling reports, proposals, resumes, or correspondence, sending faxes, and making copies of documents. A pickup and delivery service may be offered. This classification includes clerical office and outside sales personnel who travel from one office environment to another.

Special note: This classification is limited to employers engaged in such services being provided to the general public. This is a services only classification and does not include retailing or store operations, nor is this classification to be assigned to employers setting up separate business operations to manage other commonly owned or operated business undertakings unless coincidentally the other operations are also subject to this classification.

WAC 296-17-678 Classification 5305.**5305-06 Clerical office, administrative employees, and elected officials of cities and towns**

Applies to clerical office, administrative employees, and elected officials of cities and towns. Clerical duties include, but are not limited to, answering telephones, handling correspondence, computer work, and maintaining financial, personnel and payroll records. A clerical office is a work area which is physically separated from all other work areas by walls, partitions or other physical barriers. Administrative duties may be conducted in or out of the city or town facilities, but are conducted in an atmosphere free from the operative hazards of the work environments such as, but not limited to, jails, law enforcement and road works. In addition to management activities, this classification also includes field auditors, social workers or similar activities professionals would perform.

See classifications 0803, 1301, 1507, 6901, 6904, 6905 and 6906 for other city or town operations.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-678, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-678, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-678, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-678, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-678, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-678, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-678, filed 11/9/73, effective 1/1/74.]

WAC 296-17-679 Classification 5306.**5306-07 Clerical office, administrative employees, and elected officials of counties, public utility districts and taxing districts, N.O.C.**

Applies to clerical office, administrative employees, and elected officials of counties, public utility districts and taxing districts, not otherwise classified (N.O.C.). Clerical duties include, but are not limited to, answering telephones, handling correspondence, computer work, and maintaining financial, personnel and payroll records. A clerical office is a work area which is physically separated from all other work areas by walls, partitions or other physical barriers. Administrative duties may be conducted in or out of the county, public utility district or taxing district facilities, but are conducted in an atmosphere free from the operative hazards of work environments such as, but not limited to, jails, law enforcement and road works. In addition to management activities, this classification also includes field auditors, social workers, alcohol and drug abuse programs, senior health and nutrition programs, medical and dental clinics or similar activities professionals would perform.

See classifications 1301, 1501, 1507, 4201, 6103, 6104, 6901, 6904, 6905, and 6906 for other county, public utility districts and taxing districts operations.

5306-25 Clerical office and administrative employees of Native American tribal councils

Applies to clerical office and administrative employees of Native American tribal councils. Clerical duties include, but are not limited to, answering telephones, handling correspondence, computer work, and maintaining financial, personnel and payroll records. A clerical office is a work area

which is physically separated from all other work areas by walls, partitions or other physical barriers. Administrative duties may be conducted in or out of the tribal council facilities, but are conducted in an atmosphere free from the operative hazards of work environments such as, but not limited to, jails, law enforcement and road works. In addition to management activities, this classification also includes field auditors, social workers, alcohol and drug abuse programs, senior health and nutrition programs, youth services, counselors, courts, medical and dental clinics or similar activities professionals would perform.

See classifications 1501 and 6905 for other Native American tribal council operations.

Special note: Tribal operations unrelated to the business of governing such as liquor and tobacco stores, casinos, logging, fisheries and bingo parlors are to be reported separately in the classification applicable to the operation.

5306-26 Clerical office and administrative employees of local public housing authorities

Applies to clerical office and administrative employees of local public housing authorities. Clerical duties include, but are not limited to, answering telephones, handling correspondence, computer work, and maintaining financial, personnel and payroll records. A clerical office is a work area which is physically separated from all other work areas by walls, partitions or other physical barriers. Administrative duties may be conducted in or out of the housing authority facilities, but are conducted in an atmosphere free from the operative hazards of work environments such as, but not limited to, jails, law enforcement and road works. In addition to management activities, this classification also includes field auditors, social workers or similar activities professionals would perform.

This classification excludes all other employees including meter readers who are to be reported separately in classification 1501 and volunteers who are to be reported separately in classifications 6901 or 6906 as appropriate.

5306-27 Clerical office and administrative employees of military base maintenance contractors

Applies to clerical office and administrative employees of military base maintenance contractors. Clerical duties include, but are not limited to, answering telephones, handling correspondence, computer work, and maintaining financial, personnel and payroll records. A clerical office is a work area which is physically separated from all other work areas by walls, partitions or other physical barriers. Administrative duties may be conducted in or out of the military base facilities, but are conducted in an atmosphere free from the operative hazards of work environments such as, but not limited to, jails, law enforcement and road works. In addition to management activities, this classification also includes field auditors, social workers or similar activities professionals would perform.

See classification 1501 for other military base maintenance contractors' operations.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-679, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-679, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-679, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW

(2001 Ed.)

51.04.020(1) and 51.16.035, 90-13-018, § 296-17-679, filed 6/8/90, effective 7/9/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-679, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-679, filed 2/28/85, effective 4/1/85; Order 73-22, § 296-17-679, filed 11/9/73, effective 1/1/74.]

WAC 296-17-67901 Classification 5307.

5307-00 State government employees - N.O.C.

Applies to state government employees not covered by another classification (N.O.C.) who perform manual labor, or who supervise a work crew performing manual labor such as custodial or maintenance, construction, or the operation of machinery or equipment. This classification includes administrative personnel such as engineers, safety inspectors, and biologists, who have field exposure, and store and stock clerks. For the purposes of this classification field exposure is defined as any exposure other than the normal travel to a work assignment, such as a field auditor or social worker would encounter. This classification includes all departments, agencies, boards, commissions and committees of either the executive, legislative or judicial branches of state government.

See classifications 4902, 4906, 7103, and 7201 for other state government operations.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-67901, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-67901, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-67901, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-67901, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-67901, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.030 and 51.16.035, 79-12-086 (Order 79-18), § 296-17-67901, filed 11/30/79, effective 1/1/80.]

WAC 296-17-680 Classification 6103.

6103-01 Schools: Academic, K-12 - clerical office, sales personnel, teachers, N.O.C. and administrative employees

Applies to clerical office, sales personnel and administrative employees such as principals, assistant principals, receptionists, secretaries, counselors, school nurses, payroll and bookkeeping personnel, and teachers or teachers' aides of establishments engaged in operating public or private academic school facilities, K-12 (kindergarten level through grade 12).

This classification excludes all other types of employees in connection with the school facilities such as, but not limited to, cooks, bus drivers, custodians, maintenance personnel and grounds keepers, and teachers or teachers' aides who are exposed to machinery hazards such as a wood shop, metal shop, print shop, auto shop, and driver training instructors who are to be reported separately in classification 6104.

6103-02 Schools: Trade or vocational - clerical office, sales personnel, teachers, N.O.C. and administrative employees

Applies to clerical office, sales personnel and administrative employees such as deans, directors, assistant directors, receptionists, secretaries, counselors, payroll and bookkeeping personnel, and professors or instructors of establishments engaged in operating trade or vocational school facilities. These types of schools provide specialized training and

instruction to prepare students for occupations in the chosen fields. Often these facilities will coordinate on-the-job training with employers as well as assist students in finding employment.

This classification excludes all other types of employees in connection with the school facilities such as, but not limited to, cooks, drivers, custodians, maintenance personnel and grounds keepers, and professors or instructors who are exposed to machinery hazards such as a wood shop, metal shop, print shop and auto shop who are to be reported separately in classification 6104.

6103-03 Libraries, N.O.C. - clerical office, sales personnel, teachers, N.O.C. and administrative employees

Applies to clerical office, sales personnel and administrative employees such as librarians, assistant librarians, receptionists, secretaries, and payroll and bookkeeping personnel of establishments engaged in operating library facilities not covered by another classification (N.O.C.). These types of facilities maintain a wide selection of reading materials such as books, journals, articles, magazines, publications, newspapers, and audio-visual or micrographic materials.

This classification excludes all other types of employees such as, but not limited to, custodians, maintenance personnel and grounds keepers, drivers, and storage room workers who are to be reported separately in classification 6104.

6103-04 Churches - clerical office, sales personnel, teachers, N.O.C. and administrative employees

Bell ringers

Applies to clerical office, sales personnel and administrative employees such as pastors, priests, reverends, clergymen, ushers, receptionists, secretaries, counselors, payroll and bookkeeping personnel, and instructors of establishments engaged in operating church facilities for members of a religious congregation to meet and worship on a daily or weekly basis. Other services provided include, but are not limited to, sermons, rites, counseling, baptisms, weddings, funerals, bible school, and day care during church services and events. When a church is also operating a school facility, the church classifications are to be assigned for both operations. This classification also applies to bell ringers for charitable organizations.

This classification excludes all other types of employees in connection with the church facilities such as, but not limited to, custodians, maintenance personnel and grounds keepers, and drivers who are to be reported separately in classification 6104.

6103-05 Museums, N.O.C. - clerical office, sales personnel, teachers, N.O.C. and administrative employees

Applies to clerical office, sales personnel and administrative employees such as directors, assistant directors, buyers, coordinators, tour guides, receptionists, secretaries, and payroll and bookkeeping personnel of establishments engaged in operating museum facilities not covered by another classification (N.O.C.). Museums maintain a wide variety of artifacts, art, statues, sculptures, and other exhibit works.

This classification excludes all other types of employees such as, but not limited to, custodians, maintenance personnel and grounds keepers (including exhibit set-up), drivers, packers, and warehousemen who are to be reported separately in classification 6104.

6103-06 Day nurseries or child day care centers - clerical office, sales personnel, teachers, N.O.C. and administrative employees

Applies to clerical office, sales personnel, and administrative employees such as teachers, teachers' aides and nurses of establishments engaged in operating day nurseries or day care centers for infants, toddlers, and children, or in providing baby-sitting services. Employees will instruct children in activities designed to promote social, physical, and intellectual growth in preparation for primary school. Most day care centers provide breakfast and lunch.

This classification excludes all other types of employees such as, but not limited to, custodians, cooks, maintenance personnel and grounds keepers, and drivers who are to be reported separately in classification 6104.

6103-10 Flight instructions - clerical office, sales personnel, classroom teachers, N.O.C. and administrative employees

Applies to clerical office, sales personnel, classroom instructors, and administrative employees of establishments engaged in providing classroom instruction to student pilots in flight procedures and techniques. Flight instructors explain various aircraft components and instruments for controlling aircraft during maneuvers, and, using flight simulators, demonstrate procedures such as, but not limited to, take-offs and landings.

This classification excludes all other types of employees such as, but not limited to, custodians, maintenance personnel and grounds keepers and drivers who are to be reported separately in classification 6104 and in-air flight instructors outside the classroom who are to be reported separately in the classification 6803.

Special note: Reporting rules are outlined in the division of worker hours provision in the general rules.

6103-11 Schools: N.O.C. - clerical office, sales personnel, classroom teachers, N.O.C. and administrative employees

Applies to classroom instructors, clerical office, sales personnel and administrative employees such as directors and assistant directors, coordinators, instructors, receptionists, secretaries, counselors, payroll and bookkeeping personnel of establishments engaged in providing specialized classroom instruction to students in schools which are not covered by another classification (N.O.C.). Schools include, but are not limited to, dance, modeling, music, driving, cooking, first aid, and schools for coaches. Modeling and dance schools emphasize poise, balance, facial gestures, self-confidence, and counseling in wardrobe and make-up. Music schools emphasize the disciplines of playing various instruments. Driving schools concentrate on the rules, principles, and coordination needed to drive safely, using textbooks, audio-visuals, and driving simulators.

This classification excludes all other types of employees in connection with the specialized school facilities such as,

but not limited to, custodians, maintenance personnel and grounds keepers, and instructors who perform activities not as part of a classroom environment who are to be reported separately in classification 6104 and driving instructors outside of the classroom who are to be reported separately in classification 6301.

6103-12 Officials for amateur athletic or cultural events, N.O.C. - clerical office, teachers, N.O.C. and administrative employees

Applies to clerical office employees, administrative employees, and event officials of establishments engaged in providing officials such as, but not limited to, umpires or referees for amateur athletic or cultural events sponsored by schools or communities. Events include, but are not limited to, sports, spelling bees, debates, and musical competitions.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-680, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-680, filed 5/31/96, effective 7/1/96; 88-12-050 (Order 88-06), § 296-17-680, filed 5/31/88, effective 7/1/88; 87-12-032 (Order 87-12), § 296-17-680, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-680, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-680, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-680, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-680, filed 11/9/73, effective 1/1/74.]

WAC 296-17-681 Classification 6104.

6104-01 Schools: Academic, K-12 - all other employments, N.O.C.

Applies to all other employees of public or private academic schools K-12 (kindergarten level through grade 12). All other in this classification is defined as employees such as, but not limited to, cooks, bus drivers, custodians, maintenance personnel and grounds keepers, and teachers or teachers aides who are exposed to machinery hazards such as wood shop, metal shop, print shop, auto shop, and driver instructors.

This classification excludes clerical office, sales personnel and administrative employees such as principals, assistant principals, receptionists, secretaries, counselors, payroll and bookkeeping personnel, and teachers or teachers' aides who have no exposure to machinery hazards who are to be reported separately in classification 6103.

6104-02 Schools: Trade or vocational - all other employments, N.O.C.

Applies to all other employees of trade or vocational schools. All other in this classification is defined as employees such as, but not limited to, cooks, drivers, driving instructors, custodians, maintenance personnel and grounds keepers, and teachers and teachers aides who are exposed to machinery hazards such as, but not limited to, those in wood shop, metal shop, automotive shops, and plumbing or electrical work. Vocational or trade schools provide specialized training and instruction to prepare students for occupations in their chosen field. Often these facilities will coordinate on-the-job training and assist students in finding employment.

This classification excludes clerical office, sales personnel and administrative employees such as deans, directors, assistant directors, receptionists, secretaries, counselors, payroll and bookkeeping personnel and teachers or teachers'

(2001 Ed.)

aides who have no exposure to machinery hazards who are to be reported separately in classification 6103.

6104-03 Libraries, N.O.C. - all other employments, N.O.C.

Applies to all other employees of library facilities which are not covered by another classification (N.O.C.). All other in this classification is defined as employees such as, but not limited to, custodians, maintenance personnel and grounds keepers, drivers, and storage room workers. Libraries maintain a wide selection of reading materials such as books, journals, articles, magazines, publications, newspapers, and audio-visual or micrographic materials.

This classification excludes clerical office, sales personnel and administrative employees such as librarians, assistant librarians, receptionists, secretaries, and payroll and bookkeeping personnel who are to be reported separately in classification 6103.

6104-04 Churches - all other employments, N.O.C.

Applies to all other employees of churches. All other in this classification is defined as employees such as, but not limited to, custodians, maintenance personnel, grounds keepers, and drivers. Services offered by a church include, but are not limited to, providing a place for members of a religious congregation to meet and worship on a daily or weekly basis, sermons, rites, counseling, baptisms, weddings, funerals, bible school, day care during church services and events.

This classification excludes clerical office, sales personnel and administrative employees such as pastors, priests, reverends, clergymen, ushers, receptionists, secretaries, counselors, payroll and bookkeeping personnel, and instructors who are to be reported separately in classification 6103.

6104-05 Museums, N.O.C. - all other employments, N.O.C.

Applies to all other employees of establishments engaged in operating museum facilities not covered by another classification (N.O.C.). All other in this classification is defined as employees such as, but not limited to, custodians, maintenance personnel and grounds keepers (including exhibit set-up), drivers, packagers, and warehousemen. Museums maintain a wide selection of artifacts, art, statues, sculptures, and other exhibit works.

This classification excludes clerical office, sales personnel and administrative employees such as museum directors, assistant museum directors, buyers, coordinators, tour guides, receptionists, secretaries, and payroll and bookkeeping personnel who are to be reported separately in classification 6103.

6104-06 Day nurseries or child day care centers - all other employments, N.O.C.

Applies to all other employees of establishments engaged in operating day nurseries or day care centers for infants, toddlers, and children, which provide activities to promote social, physical, and intellectual growth in preparation for primary school. All other in this classification is defined as employees such as, but not limited to, custodians, cooks, maintenance personnel and grounds keepers, and drivers.

This classification excludes clerical office, sales personnel and administrative employees such as principals, receptionists, secretaries, counselors, payroll and bookkeeping personnel, and teachers or teachers' aides who are to be reported separately in classification 6103.

6104-11 Schools: N.O.C - all other employments, N.O.C.

Applies to all other employees of establishments engaged in providing specialized classroom instruction to students in schools which are not covered by another classification (N.O.C.) such as, but not limited to, dance, modeling, music, cooking, first aid, and schools for coaches. All other in this classification is defined as employees such as, but not limited to, custodians, maintenance personnel and grounds keepers, and instructors or teachers who perform activities not as part of a classroom environment or who are exposed to machinery hazards.

This classification excludes administrative employees such as directors and assistant directors, coordinators, receptionists, secretaries, counselors, payroll and bookkeeping personnel, and classroom instructors, who are to be reported separately in classification 6103 and driving instructors outside of the classroom who are to be reported separately in classification 6301.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-681, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-681, filed 5/31/96, effective 7/1/96; 87-12-032 (Order 87-12), § 296-17-681, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-681, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-681, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-681, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-681, filed 11/9/73, effective 1/1/74.]

WAC 296-17-682 Classification 6105.

6105-00 Hospitals: Religious, charitable or nonprofit

Applies to establishments engaged in operating religious, charitable, or nonprofit hospitals. These hospitals are usually corporations who are governed by a board and have an additional uncompensated care program to assess medically necessary situations and seek out any available resources to provide coverage. If no resources are available, the hospital usually provides care anyway because their mission includes addressing need and supplying care. Hospitals provide medical or surgical care and treatment for the sick and the injured. A hospital is an organization with six or more beds providing round-the-clock nursing care and access to physician's care, and operating at least a pharmacy, a diagnostic X-ray and laboratory facility, and a surgical service. Most hospitals offer a variety of medical services. General care or community hospitals offer a wide range of short-term treatments for a variety of medical conditions, whereas specialized institutions (such as children's hospitals, maternity hospitals and psychiatric hospitals) usually provide a more limited range of services to a specific class of patients. This classification contemplates all types of hospital employment including, but not limited to, admissions staff, medical staff, pharmacy staff, dietary staff, and laundry, housekeeping, custodial and grounds keeping staff. This classification also includes clerical office and sales personnel.

6105-01 Hospitals: Private proprietary

Applies to establishments engaged in operating private proprietary hospitals. These are for-profit corporations that have a board and investors. All hospitals are required to provide initial emergency care. A proprietary hospital may recommend that an indigent or uninsured person find follow-up care elsewhere. Hospitals provide medical or surgical care and treatment for the sick and the injured. A hospital is an organization with six or more beds providing round-the-clock nursing care and access to physician's care, and operating at least a pharmacy, a diagnostic X-ray and laboratory facility, and a surgical service. Most hospitals offer a variety of medical services. General care or community hospitals offer a wide range of short-term treatments for a variety of medical conditions, whereas specialized institution (such as children's hospitals, maternity hospitals and psychiatric hospitals) usually provide a more limited range of services to a specific class of patients. This classification contemplates all types of hospital employment including, but not limited to, admissions staff, medical staff, pharmacy staff, dietary staff, and laundry, housekeeping, custodial and grounds keeping staff. This classification also includes clerical office and sales personnel.

6105-05 Hospitals: N.O.C. - including hospital districts

Applies to establishments engaged in operating hospitals which are not covered by another classification (N.O.C.) including hospital districts. They are governed by a board of community members. A municipal hospital district operates similar to a charitable hospital; they will not turn away anyone in need of care, but must exercise discretion in allowing write-offs for charity cases. They will also make every effort to obtain available resources for a person before recognizing them as indigent. Hospitals provide medical or surgical care and treatment for the sick and the injured. A hospital is an organization with six or more beds providing round-the-clock nursing care and access to physician's care, and operating at least a pharmacy, a diagnostic X-ray and laboratory facility, and a surgical service. Most hospitals offer a variety of medical services. General care or community hospitals offer a wide range of short-term treatments for a variety of medical conditions, whereas specialized institutions (such as children's hospitals, maternity hospitals, and psychiatric hospitals) usually provide a more limited range of services to a specific class of patients. This classification contemplates all types of hospital employment including but not limited to admissions staff, medical staff, pharmacy staff, dietary staff, and laundry, housekeeping, custodial and grounds keeping staff. This classification also includes clerical office and sales personnel.

WAC 296-17-684 Classification 6107.**6107-01 Veterinary hospitals or clinics**

Applies to establishments of state licensed practitioners engaged in the practice of veterinary medicine, dentistry, or surgery. Veterinarians provide routine checkups, vaccinations, administer drugs and medicines, euthanasia and autopsies; some specialize in areas such as animal dermatology or animal behaviors. Usually veterinary services are performed on an outpatient basis, although animals may be kept on the premises for one or more days for observation or treatment. Veterinarians who specialize in the treatment of larger animals such as cows or horses frequently provide their services off premises rather than in their own facilities. This classification includes clerical office and sales personnel.

This classification excludes animal boarding kennels, animal shelters and/or pet grooming parlors which are to be reported separately in classification 7308.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-684, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-684, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-684, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-684, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-684, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-684, filed 11/9/73, effective 1/1/74.]

WAC 296-17-685 Classification 6108.**6108-00 Convalescent or nursing homes, rest homes, and homes for the aged**

Applies to establishments engaged in providing various levels of health care, depending on a patient's needs. Convalescent or nursing homes are state-licensed institutions. The extent of professional or medical services provided ranges from complete medical care for postoperative patients and patients requiring extensive nursing care due to illnesses such as terminal cancer, kidney disorders, and heart disease, to only minimal medical or professional care for other patients. Rest homes provide daily living assistance care to the aged or those with some limits on ability for self-care, but where medical care is not yet a major element. Homes for the aged provide care for people who, due to illness, physical infirmity, or advanced age, are unable to care for themselves and who need nursing and/or health-related care, but do not require the degree of care and treatment that a skilled or intermediate care facility is designed to provide. Patients in homes for the aged, because of their mental or physical condition, require some nursing care, including the administering of medications and treatments, or the supervision of self-administered medications in accordance with a physician's orders. Generally these homes will employ therapists, registered nurses, practical nurses, nurses aides and orderlies to provide the necessary medical care to their patients. The homes also may employ cooks, waitresses, maids, maintenance personnel, social workers and recreational directors, but usually do not employ a resident physician, although they may have arrangements with physicians who are on call for emergencies.

This classification excludes boarding houses which are to be reported separately in classification 6509.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-685, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-685, filed (2001 Ed.)

11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-685, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-685, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-685, filed 11/29/82, effective 1/1/83; 81-24-042 (Order 81-30), § 296-17-685, filed 11/30/81, effective 1/1/82; Order 75-38, § 296-17-685, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-685, filed 11/9/73, effective 1/1/74.]

WAC 296-17-686 Classification 6109.**6109-00 Physicians, surgeons, and medical clinics, N.O.C.**

Applies to establishments of licensed practitioners such as physicians and surgeons, and to medical clinics not covered by another classification (N.O.C.) engaged in the practice of general or specialized medicine and surgery. Physicians diagnose and treat a variety of diseases and injuries, order or execute various tests, analyses, and diagnostic images to provide information on a patient's condition, analyze reports and findings of tests and of examination, diagnose conditions, and administer or prescribe treatments and drugs. Physicians may also inoculate and vaccinate patients to immunize them from communicable diseases, or refer patients to a medical specialist or other practitioners for specialized treatment. They may also make house and emergency calls to attend to patients unable to visit the office. Surgeons examine patients to verify necessity of surgery, review reports of patient's general physical condition and medical history, reactions to medications, estimate possible risk to patient, and determine best operational procedure. Surgeons may specialize in a particular type of surgery. This classification includes licensed ophthalmologists who specialize in the diagnosis and treatment of diseases and injuries of the eyes, and examine patients for symptoms indicative of organic or congenital ocular disorders. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the physician's or surgeon's office or in a medical clinic, such as laboratory or X-ray technicians, and nurses.

This classification excludes psychologists and psychiatrists who are to be reported separately in classification 6109-10; optometrists who are to be reported separately in classification 6109-09; radiology and MRI referral clinics which are to be reported separately in classification 6109-17; orthotic referral clinics which are to be reported separately in classification 6109-14; and nutrition, diet, or weight loss clinics which are to be reported separately in classification 6109-12.

6109-01 Dentists and dental clinics

Applies to establishments of licensed dental practitioners and dental clinics engaged in the practice of general or specialized dentistry. Services provided by dental offices or clinics include, but are not limited to, examination of teeth and gums to determine condition, diagnosis of disease, injuries, or malformation, extractions, fillings, root canals, oral surgery, tooth replacement, cleaning, instruction on oral and dental hygiene and preventative care. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the dentist's office such as hygienists, and dental assistants or technicians.

6109-02 Chiropractors, N.O.C.

Applies to establishments of licensed practitioners not covered by another classification (N.O.C.) who are engaged

in the practice of chiropractic medicine. Chiropractors diagnose and treat musculoskeletal conditions of the spinal column and extremities to prevent disease and correct abnormalities of the body believed to be caused by interference with the nervous system. They manipulate the spinal column and other extremities to adjust, align, or correct abnormalities caused by neurologic and kinetic articular dysfunction. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the chiropractor's office.

6109-04 Naturopaths, N.O.C.

Applies to establishments of health practitioners not covered by another classification (N.O.C.) who diagnose, treat, and care for patients, using a system of practice that bases treatment of physiological functions and abnormal conditions on natural laws governing the human body, relying on natural remedies such as, but not limited to, acupuncture, sunlight supplemented with diet, and naturopathic corrections and manipulations to treat the sick. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the naturopath's office.

6109-08 Physical therapists, N.O.C.

Applies to establishments of health practitioners not covered by another classification (N.O.C.) who are engaged in the practice of physical therapy, occupational therapy, respiratory therapy, or speech therapy. Therapists treat and rehabilitate people with physical or mental disabilities or disorders, to develop or restore functions, prevent loss of physical capacities, and maintain optimum performance. Includes occupations utilizing means such as exercise, massage, heat, light, water, electricity, and specific therapeutic apparatus, usually as prescribed by a physician; or participation in medically oriented rehabilitative programs, including educational, occupational, and recreational activities. *Physical therapists* plan and administer medically prescribed physical therapy treatment for patients suffering from injuries, or muscle, nerve, joint and bone diseases, to restore function, relieve pain, and prevent disability. *Occupational therapists* plan, organize, and conduct occupational therapy programs to facilitate development and rehabilitation of the mentally, physically, or emotionally handicapped. *Respiratory therapists* administer respiratory therapy care and life support to patients with deficiencies and abnormalities of the cardiopulmonary system, under the supervision of physicians and by prescription. *Speech therapists* specialize in diagnosis and treatment of speech and language problems, and engage in scientific study of human communication. This classification includes clerical office and sales personnel, as well as other employees engaged in therapy services and also includes travel to health facilities or other locations to administer therapy services.

6109-09 Optometrists, N.O.C.

Applies to establishments of optometrists not covered by another classification (N.O.C.). Optometrists are licensed practitioners, but do not hold a medical degree. An optometrist in general practice examines patients' eyes to determine the nature and degree of vision problems or eye diseases and prescribes corrective lenses or procedures, performs various

tests to determine visual acuity and perception and to diagnose diseases and other abnormalities, such as glaucoma and color blindness. An optometrist may specialize in the type of services provided, such as contact lenses, low vision aids, or vision therapy, or in the treatment of specific groups such as children or elderly patients. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the optometrist's office.

This classification excludes optometrists employed by optical goods stores who are to be reported separately in classification 6308, and ophthalmologists who are to be reported separately in classification 6109-00.

6109-10 Psychologists and psychiatrists, N.O.C.

Applies to establishments of licensed practitioners not covered by another classification (N.O.C.) who are engaged in the diagnoses and treatment of patients with mental, emotional, or behavioral disorders. *Psychologists* are licensed practitioners who diagnose or evaluate mental and emotional disorders of individuals and administer programs of treatment. They interview patients in clinics, hospitals, prisons, and other institutions, and study medical and social case histories. *Psychiatrists* are licensed practitioners who diagnose and treat patients with mental, emotional, and behavioral disorders. They organize data obtained from the patient, relatives, and other sources, concerning the patient's family, medical history, and the onset of symptoms, and determine the nature and extent of mental disorder and formulate a treatment program utilizing a variety of psychotherapeutic methods and medications. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the doctor's office.

6109-12 Nutrition, diet, or weight loss clinics, N.O.C.

Applies to establishments engaged as nutrition, diet, or weight loss clinics not covered by another classification (N.O.C.) which provide programs whereby clients may achieve a healthy and permanent weight loss. The programs vary in approaches but most are based on the behavior modification theory, utilizing private counseling or group support meetings and seminars to educate individuals about their eating habits and proper eating patterns. Some programs may sell vitamin supplements or a line of food products to be used by their clients and may publish newsletters or other forms of literature for the benefit of their clients. This classification includes clerical office and sales personnel.

This classification excludes exercise programs which are to be reported separately in the appropriate classification.

6109-13 Childbirth classes

Applies to establishments providing childbirth education for expectant parents. Topics include, but are not limited to, expectations during pregnancy, breathing and relaxing techniques, and massage therapy. Literature and/or movies may be provided in addition to oral instruction. This classification includes clerical office and sales personnel.

6109-14 Orthotic referral clinics

Applies to establishments operating as clinics to provide care to patients with disabling conditions of the limbs and spine by fitting and preparing orthopedic braces under the

direction of and in consultation with physicians. Orthotists examine and evaluate the patient's needs in relation to disease and functional loss, and assist in the design of an orthopedic brace. Orthotist select materials, makes cast measurements, model modifications and layouts. When the brace is finished, they evaluate it on the patient, make adjustments to ensure correct fit, and instruct the patient in the use of the orthopedic brace. This classification also includes clinics of prosthetists who provides care to patients with partial or total absence of a limb by planning fabrication of, writing specifications for, and fitting the prosthesis under the guidance of and in consultation with a physician. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the referral clinics.

This classification excludes the manufacture of orthopedic braces, splints or prostheses which is to be reported separately in the applicable classification.

6109-15 Midwife services

Applies to establishments engaged in the practice of midwifery. Midwives provide care for women undergoing medically uncomplicated pregnancy and low risk labor and delivery. The delivery may take place in a clinic setting or in the expectant mother's home. This classification includes clerical office and sales personnel.

6109-16 Licensed massage therapy services

Applies to establishments of licensed practitioners who are engaged in the practice of massage therapy. Some massage therapists work in conjunction with physicians or sports teams, or at hospitals, rehabilitation facilities or convalescent homes. If a client is referred by a physician, the therapist will review the medical report and in conjunction with the client, will determine the nature of the massage (whether it is for relaxation or to correct or relieve a medical problem) and the modality to be used, such as deep-muscle work, trigger-point therapy, or joint rotation. This classification includes clerical office and sales personnel as well as other employees engaged in licensed massage therapy services.

This classification excludes massage therapists employed by a health club, gymnasium, sauna, or bath house who are to be reported separately in classification 6204.

6109-17 Radiology and MRI referral clinics

Applies to establishments of licensed practitioners who are engaged in the practice of radiology and/or magnetic resonance imaging. Radiologists diagnose and treat diseases of the human body using X-ray and radioactive substances. They examine the internal structures and functions of the organ systems and make diagnoses after correlating the X-ray findings with other examinations and tests. They administer radiopaque substances by injection, orally, or as enemas, to render internal structures and organs visible on X-ray films or fluoroscopic screens. Radiologists may employ magnetic resonance imaging technologists to operate magnetic resonance imaging equipment which produces cross-sectional images (photographs) of a patient's body for diagnostic purposes. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the clinics, such as nurses or technologists.

Statutory Authority: RCW 51.16.035, 87-24-060 (Order 87-26), § 296-17-686, filed 12/1/87, effective 1/1/88; 87-12-032 (Order 87-12), § 296-17-686, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-686, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-686, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-686, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-686, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-686, filed 11/9/73, effective 1/1/74.]

WAC 296-17-68601 Classification 6110.

6110-00 Home health services and nursing care, N.O.C.

Applies to establishments engaged in providing skilled and semi-skilled nursing and home health care services to individuals who do not need the continuous care and supervision that hospitals and nursing facilities can provide. Patients frequently are referred to home health agencies by physicians, hospital discharge planners or other medical professionals. Typically, a home health care provider will come to the patient's home to assess the individual's situation, recommend a plan of treatment and coordinate the plan. A nurse may function as the "case manager" for the patient and will coordinate the case plan. Usually a physician must authorize the plan of treatment for home care services. The services offered will vary according to each client's needs and can range from personal care for the patients such as bathing and grooming, cooking, housecleaning; to laboratory services; to skilled nursing services. Home health services may offer therapy services such as physical, occupational, speech, and respiratory. Care may be intermittent or long-term. This classification includes home health nursing visits or care made on a private-duty basis.

This classification excludes home health care social workers and dietitians with no cooking duties who may be reported separately in classification 6303 provided all the conditions of the general reporting rules covering standard exception employees have been met; private households which employ workers who serve on or about the premises in occupations usually considered as domestic service which are to be reported separately in classification 6510; and establishments engaged in providing chore workers/home care assistants to private individuals who are to be reported separately in classification 6511.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-68601, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 89-24-051 (Order 89-22), § 296-17-68601, filed 12/1/89, effective 1/1/90.]

WAC 296-17-687 Classification 6201.

6201-00 Mortuaries, funeral homes, crematoriums

Applies to establishments engaged in all operations of a mortuary, funeral home or crematorium. Funeral homes generally provide a complete burial service which includes, but is not limited to, preparing the deceased for cremation or burial (this could include beautician services), providing the casket and burial plot, conducting the funeral service, providing transportation for family of the deceased, and providing

[Title 296 WAC—p. 391]

flowers. Employments in this classification include drivers, organists, singers and other musicians, embalmers, and crematory employees if they are employed by the funeral home.

This classification excludes cemetery operations which are to be reported separately in classification 6202.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-687, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-687, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-687, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-687, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-687, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-687, filed 11/9/73, effective 1/1/74.]

WAC 296-17-688 Classification 6202.

6202-00 Cemeteries

Applies to establishments engaged in providing cemetery and funeral services at one location. Cemeteries are communal burial places and range in size from small churchyards to private facilities with hundreds of acres of land. Cemeteries sell burial plots, excavate graves, prepare grave sites for interment, carry out interment services and maintain the cemetery grounds. Grounds work includes, but is not limited to, maintaining markers, and the usual maintenance work on lawns, roadways, trees, hedges and flowers. Maintenance personnel also set up tents, chairs and other burial service equipment. A grave burial involves placing caskets in the ground within a burial vault; a lawn crypt burial involves placing the casket in a pre-fabricated, pre-placed crypt. A burial vault is a cement structure used to line graves and prevent settling. Crypts can be placed in the ground, above the ground or within private and public mausoleums. A niche houses urns which contain the cremated remains of decedents. Cemeteries may provide funeral services at the cemetery, operate a chapel, and/or offer cremation services, all of which are included in this classification when conducted in connection with a cemetery operation. This classification includes pet cemeteries.

This classification excludes establishments engaged as mortuaries, funeral homes, or crematoriums which are to be reported separately in classification 6201.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-688, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-688, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-688, filed 2/28/85, effective 4/1/85; Order 73-22, § 296-17-688, filed 11/9/73, effective 1/1/74.]

WAC 296-17-689 Classification 6203.

6203-00 YMCA/YWCA institutions

Applies to establishments engaged in the operation of a Young Men's or Young Women's Christian or Hebrew Associations. These are international community service organizations which generally respond to the needs of their communities. Typical operations include, but are not limited to, providing temporary residential facilities, swimming and exercise facilities, basketball courts, aerobic and fitness classes, child care, youth sports programs, social and educational programs, and day camp operations. Some facilities will provide a food and beverage service. This classification includes clerical office and sales personnel.

This classification excludes overnight camp operations which are to be reported separately in classification 6209.

6203-01 Boys or girls clubs

Applies to establishments engaged in operating boys or girls clubs. These clubs are nonprofit organizations which provide recreation, cultural enrichment, health and physical education, and personal adjustment services for boys and girls from 6 to 18 years of age. These facilities differ from location to location, but many offer gymnasiums, organized sports programs, day camp operations, game rooms, library or computer rooms, classes and various other supervised activities where young people can spend time. Some facilities also have swimming pools and offer meal programs. This classification includes clerical office and sales personnel.

This classification excludes overnight camp operations which are to be reported separately in classification 6209.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-689, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-689, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-689, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-689, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-689, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-689, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-689, filed 11/30/81, effective 1/1/82; Order 75-38, § 296-17-689, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-689, filed 11/9/73, effective 1/1/74.]

WAC 296-17-690 Classification 6204.

6204-00 Baths or saunas, N.O.C.

Applies to establishments engaged in operating baths or saunas not covered by another classification (N.O.C.). These facilities offer a variety of services such as, but not limited to, hot tubs, saunas, steam rooms, Jacuzzis, sun tan beds and body shampoos. Massage therapy services are included in this classification when performed by employees of employers subject to this classification. This classification excludes licensed massage therapists that qualify for classification 6109.

6204-04 Exercise or health institutes, gymnasiums, health clubs

Applies to establishments engaged in operating exercise or health institutes, gymnasiums, or health clubs. These establishments accommodate a variety of exercise areas including, but not limited to, gymnasiums, swimming pools, racquetball, tennis, squash, and handball courts, jogging tracks, and weight rooms with nautilus equipment. Operations vary from location to location, but most offer facilities and services such as, but not limited to, locker rooms, showers, whirlpools, saunas, sun tanning booths, body toning equipment, aerobic, gymnastic, and martial arts classes, instruction or training in achieving physical fitness goals, nutrition counseling, towel service, child care, massages, pro shops and food and beverage services all of which are included when performed or conducted by employees of employers subject to this classification.

This classification excludes licensed massage therapists that qualify for classification 6109.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-690, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-690, filed 8/28/98, effective 10/1/98. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-690, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-690, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-

7), § 296-17-690, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-690, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-690, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-690, filed 11/9/73, effective 1/1/74.]

WAC 296-17-691 Classification 6205.

6205-00 Clubs, N.O.C.

Applies to establishments engaged in operating clubs not covered by another classification (N.O.C.). Types of clubs contemplated by this classification include, but are not limited to, fraternal, special interest, or social clubs and clubs whose interests revolve around sports activities such as golf, tennis, boating, skiing, fishing, and swimming. The facilities and services offered vary depending on the type and size of the club. Even in an organization that has several locations, the facilities may vary greatly from a simple bar and snack food operation to a large restaurant with dancing areas, gymnasiums, and saunas. These types of clubs charge membership fees and dues as opposed to clubs or halls in classification 6607 which are open to the public. This classification includes all food and beverage operations.

This classification excludes YMCAs and boys/girls clubs which are to be reported separately in classification 6203; health clubs and gymnasiums which are to be reported separately in classification 6204; golf courses which are to be reported separately in classification 6206; and community and social centers which are to be reported separately in classification 6607.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-691, filed 8/28/98, effective 10/1/98; 87-12-032 (Order 87-12), § 296-17-691, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-691, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-691, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-691, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-691, filed 11/9/73, effective 1/1/74.]

WAC 296-17-692 Classification 6206.

6206-06 Golf courses, N.O.C.

Applies to establishments engaged in operating public or private golf courses. Pro shops, miniature golf courses, and driving ranges operated in connection with the golf course are included in this classification. Typical operations of a pro shop include, but are not limited to, selling golf clubs, golf balls, specialty clothing, and related golfing items, renting carts, arranging tee times, and collecting green fees. Also included in this classification are snack bars operated at the golf course when limited to the same hours as the golf course is open. Typical employees include golf pros, greens keepers, caddies, and snack bar employees.

This classification excludes establishments operating miniature golf courses and driving ranges which are to be reported separately in classification 6208 and "bona fide" restaurant operations which may be reported separately in classification 3905. For purposes of this classification a "bona fide" restaurant at a golf course is operated independent of the course and is open to the public even when the golf course is closed.

Special note: A pro shop operated by an independent concessionaire may qualify for classification 6309, provided (2001 Ed.)

the pro shop does not operate the course, collect green fees, or perform other functions of managing a golf course.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-692, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-692, filed 5/31/96, effective 7/1/96; 87-12-032 (Order 87-12), § 296-17-692, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-692, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-692, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-692, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-692, filed 11/9/73, effective 1/1/74.]

WAC 296-17-693 Classification 6207.

6207-00 Carnivals - traveling

Applies to those employees of an employer engaged in operating traveling carnivals, who are drivers and/or engaged in the set up and/or tear down of mechanical and nonmechanical amusement rides, and any temporary structure associated with a traveling carnival such as, but not limited to, game, food, or souvenir concession booths, mobile offices, aid rooms or ticket booths.

This classification excludes clerical office employees who are assigned to a permanent office location with no outside duties who may be reported separately in classification 4904 provided all the conditions of the general reporting rules covering standard exception employees have been met; clerical employees who travel with the carnival or with ride operators and who work out of a mobile office, ride operators, game attendants, ticket sellers/takers and personnel involved in the care, custody, and maintenance of carnival facilities who are to be reported separately in classification 6208; establishments engaged in operating mechanical or nonmechanical rides at a permanent location which are to be reported separately in classification 6208; and establishments engaged in operating video or amusement game arcades at a permanent location, not within or operated in connection with an amusement park, which are to be reported separately in classification 6406.

Special note: Permanent shop employees, and those employees assigned to the shop during the winter quartering period may be reported separately in classification 5206 provided the conditions set forth in WAC 296-17-675 have been met.

6207-01 Circuses - traveling

Applies to establishments engaged in operating a traveling circus. Work contemplated by this classification includes all preparations, operations and maintenance normally performed by employees of an employer having operations subject to this classification. Employments include, but are not limited to, drivers, trainers, performers, ticket sellers/takers, clerical staff who travel with the circus, set up/tear down of mechanical and nonmechanical rides, concession booths or stands, mobile offices, aid rooms, ticket booths and all other temporary structures associated with a traveling circus.

This classification excludes clerical office employees who are assigned to a permanent office location with no outside duties, who may be reported separately in classification 4904 provided all the conditions of the general reporting rules covering standard exception employees have been met.

Special note: Classifications 6208 and 5206 do not apply to circus operations.

6207-02 Amusement rides - traveling

Applies to establishments engaged in operating mechanical or nonmechanical amusement rides. Employments contemplated by this classification include, but are not limited to, drivers and all employees engaged in the set up and tear down, operation, and maintenance of mechanical and nonmechanical rides and all other temporary structures associated with the amusement rides. This classification also includes automobile stunt shows, such as monster trucks or motorcycle car jumps, that perform for entertainment purposes. Covered employments associated with automobile stunt shows include, but are not limited to, drivers, mechanics, and maintenance employees who set up and take down ramps or other structures used in the show.

This classification excludes clerical office employees who are assigned to a permanent office location with no outside duties, who may be reported separately in classification 4904 provided all the conditions of the general reporting rule covering standard exception employees have been met; clerical employees who travel with the amusement operations and work out of a mobile office, ride operators, attendants, ticket sellers/takers, and personnel involved in the care, custody, and maintenance of amusement facilities who may be reported separately in classification 6208; employers engaged in operating mechanical or nonmechanical rides at a permanent location which are to be reported separately in classification 6208; and establishments engaged in operating video or amusement game arcades at a permanent location, not within or operated in connection with an amusement park, which are to be reported separately in classification 6406.

Special note: Permanent shop employees, and those employees assigned to the shop during the winter quartering period, may be reported separately in classification 5206 provided the conditions set forth in WAC 296-17-675 have been met.

6207-03 Rodeos

Applies to establishments engaged in the production of rodeos. Employments contemplated by this classification include all operations normally performed by employees of an employer having operations subject to this classification such as, but not limited to, drivers and all arena employees, setting up/tearing down temporary enclosures/structures/bleachers, clowns, gate openers, animal handlers, ticket sellers/takers, first aid staff, and clerical staff who travel with the rodeo.

This classification excludes clerical office employees who are assigned to a permanent office location with no outside duties, who may be reported separately in classification 4904 provided all the conditions of the general reporting rule covering standard exception employees have been met; and stock handlers who contract with a rodeo producer to supply horses, bulls, or other rodeo animals, who are to be reported separately in classification 7302.

Special note: Classifications 6208 and 5206 do not apply to rodeos.

6207-04 Fireworks exhibition

Applies to establishments engaged in producing pyrotechnic exhibitions. This classification includes purchasing

ready made fireworks, setting up displays, timing fuses, lighting the fireworks, and cleaning up.

This classification excludes establishments engaged in the manufacture of fireworks which are to be reported separately in classification 4601.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-693, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-693, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-693, filed 5/31/96, effective 7/1/96; 86-12-041 (Order 86-18), § 296-17-693, filed 5/30/86, effective 7/1/86; 85-24-032 (Order 85-33), § 296-17-693, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-693, filed 2/28/85, effective 4/1/85; Order 77-27, § 296-17-693, filed 11/30/77, effective 1/1/78; Order 73-22, § 296-17-693, filed 11/9/73, effective 1/1/74.]

WAC 296-17-694 Classification 6208.**6208-00 Amusement parks; exhibition caves or caverns**

Applies to establishments engaged in providing amusement parks to the public or in the operation of cave or caverns for exhibition purposes. Establishments subject to this classification are located on a permanent site and usually offer a variety of activities such as, but not limited to, amusement rides, water slides, miniature golf, and games such as tossing rings, throwing balls, and shooting air rifles. There may be one or more separate arcade areas located within the park. This classification includes rides, ticket sellers, gate attendants, food and beverage operations, care, custody and maintenance of the above facilities and operations similar to a traveling carnival.

This classification excludes set up, tear down and delivery of amusement park rides, games and food booths which are to be reported separately in classification 6207.

6208-01 Ranges: Archery, ball, dart, golf, firearms shooting

Applies to establishments engaged in operating indoor or outdoor archery, ball, dart, golf, and firearms shooting ranges. Golf driving ranges subject to this classification are operated separately from a golf course. If the driving range is operated in conjunction with a golf course, then the entire establishment is to be reported separately in classification 6206. Ball ranges (batting cages) are establishments set up to provide batting practice. Archery ranges are permanent establishments that provide targets for practice. If these operations are conducted in conjunction with an amusement park, then the entire operation is to be reported separately in classification 6208-00. This classification includes ticket sellers, food and beverage operations and care, custody and maintenance of the above facilities.

This classification excludes miniature golf courses which are to be reported separately in classification 6208-07, and ranges that use air rifles which are to be reported separately in classification 6208-10.

6208-03 Boat rental facilities

Applies to establishments engaged in renting row boats, paddle boats, rubber rafts or similar water craft for recreational purposes when the water is part of a park. This classification includes the operation of bumper boat amusement rides if that is the sole function of the establishment. If the bumper boats are operated as part of an amusement park, the entire establishment is to be reported separately in classifica-

tion 6208-00. This classification includes ticket sellers, food and beverage operations and care, custody and maintenance of the above facilities.

6208-04 Fairs

Applies to establishments or community organizations engaged in managing, sponsoring and conducting fairs. These are usually annual events sponsored by a town or community. Many of the exhibitors and concessionaires are independent businesses that rent space at the fair site. This classification includes ticket sellers, food and beverage operations and care, custody and maintenance of the above facilities.

6208-05 Shows - animal

Applies to establishments engaged in managing, sponsoring and conducting animal shows such as pet or livestock exhibitions. Employments contemplated by this classification include, but are not limited to, ticket sellers, judges, security personnel, and the showing of the animals in the arena when performed by employees of employers subject to this classification. This classification includes food and beverage operations and care, custody and maintenance of the above facilities.

This classification excludes all raising or care of animals which are to be reported separately in the applicable classification.

6208-06 Shows - flower, art

Applies to establishments engaged in managing and conducting art or flower shows. The sponsors are usually responsible for the set up and tear down of the exhibition. The exhibitors and concessionaires are usually independent booth renters. Work contemplated by this classification includes, but is not limited to, coordinating exhibitors, arranging for a facility and utilities, permits or related needs, helping set up/tear down booths, judging, and security personnel. This classification includes ticket sellers, food and beverage operations and care, custody and maintenance of the above facilities.

6208-07 Miniature golf courses

Applies to establishments engaged in the operation of miniature golf courses. This classification includes ticket sellers, food and beverage operations and care, custody and maintenance of the above facilities.

This classification excludes miniature golf courses operated in conjunction with an amusement park which are to be reported separately in classification 6208-00.

6208-08 Kiddie rides at permanent locations

Applies to establishments engaged in operating kiddie rides at a permanent location. Ride attendants duties include, but are not limited to, selling tickets, directing patrons getting on and off the rides, keeping order among the patrons waiting to ride, and making sure all belts and safety devices are in the proper place and functioning. This classification includes food and beverage operations and care, custody and maintenance of the above facilities.

6208-09 Race tracks

Applies to establishments engaged in the operation of race tracks such as, but not limited to, stock car, go cart,

(2001 Ed.)

motorcycle, horse, and drag racing tracks. Employments contemplated by this classification include, but are not limited to, selling tickets, booking events, coordinating participants, and security. This classification includes food and beverage operations and care, custody and maintenance of the above facilities.

This classification excludes parimutuel clerks at a horse racing track and cashiers with no other duties who may be reported separately in classification 4904 provided all the conditions of the general reporting rules covering standard exception employees have been met; and the handling of horses or vehicles which is to be reported separately in the classification applicable to the work being performed.

6208-10 Shooting galleries for air rifles only; Laser tag, war games, paint ball facilities

Applies to establishments engaged in operating shooting galleries for *air rifles only*. If the air rifle shooting gallery is operated in conjunction with an amusement park, the entire operation is to be reported separately in classification 6208-00. This classification also applies to laser tag, war games, and paint ball facilities. This classification includes ticket sellers, food and beverage operations and care, custody and maintenance of the above facilities.

This classification excludes operations involving any firearms such as, but not limited to, pistol or rifle ranges, which are to be reported separately in classification 6208-01.

6208-11 Carnival operations, N.O.C.

Applies to those employees of an employer engaged in operating carnivals who are not covered by another classification (N.O.C.). These employees are generally employed as ride operators, game attendants, ticket sellers/takers, and traveling clerical workers. This classification includes operations care, custody and maintenance of the above facilities.

This classification excludes clerical office employees who are assigned to a permanent office location with no outside duties, who may be reported separately in classification 4904 provided all the conditions of the general reporting rules covering standard exception employees have been met; employees engaged in driving and/or set up and tear down of all mechanical and nonmechanical rides, concession booths or stands, mobile offices, aid rooms, ticket booths, and all other temporary structures associated with a traveling carnival who are to be reported separately in classification 6207; employees of carnival operations assigned to work in food booths who are to be reported separately in classification 3905; and employees of carnival operations assigned to work in souvenir or gift shops who may be reported separately in classification 6406 provided they have no other duties.

Special note: Permanent shop employees, and those employees assigned to the shop during the winter quartering period, may be reported separately in classification 5206 provided the conditions set forth in WAC 296-17-675 have been met.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-694, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-694, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-694, filed 5/31/96, effective 7/1/96; 86-12-041 (Order 86-18), § 296-17-694, filed 5/30/86, effective 7/1/86; 85-24-032 (Order 85-33), § 296-17-694, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-694, filed 2/28/85, effective 4/1/85; 81-24-042 (Order 81-30), § 296-17-694, filed

11/30/81, effective 1/1/82; Order 76-36, § 296-17-694, filed 11/30/76; Order 73-22, § 296-17-694, filed 11/9/73, effective 1/1/74.]

WAC 296-17-695 Classification 6209.

6209-03 Dude ranch resorts

Applies to establishments engaged in operating a dude ranch resort where vacationers experience the western style of life on a ranch. Activities include, but are not limited to, horseback riding, grooming the ranch animals, hay rides, swimming, ranch style meals, and nightly singing round the campfire. Operations include, but are not limited to, grooming and caring for animals, assisting with horseback riding, preparing ranch style meals and performing maintenance work on the ranch. This classification includes food and beverage operations and clerical office and sales personnel physically located at the resort.

This classification excludes cattle ranches which are to be reported separately in classification 7302.

6209-06 Swimming pools - public; Scuba diving instruction in pool

Applies to establishments engaged in the operation and maintenance of public swimming pools. Work contemplated by this classification includes, but is not limited to, testing and replenishing chemicals in the pool, cleaning the pool, providing lifeguards, providing swimming lessons to the public, food and beverage operations, and clerical office and sales personnel physically located at the above facilities. This classification includes the rental or sale of pool accessories such as paddle boards, fins and swim wear when performed in connection with a swimming pool facility by employees of employers subject to this classification. This classification also applies to scuba diving instructors providing lessons in a swimming pool even though they may not be employed by the swimming pool establishment.

This classification excludes scuba diving not performed in a swimming pool environment which is to be reported separately in classification 0202 and swimming clubs which are to be reported separately in classification 6205.

6209-09 Campgrounds

Applies to establishments engaged in operating public or private campgrounds. Campgrounds offer a variety of facilities at which families, groups, and individuals can camp overnight in recreational vehicles, cabins, or tents. Typical campgrounds may include a main building for registration and information, retail stores that sell groceries, souvenirs, camping equipment, fishing gear, and supplies, and/or snack bars, restaurants, game rooms, rental operations for recreational equipment, shower facilities, and laundries. Campground activities include, but are not limited to, swimming (in a pool or lake), fishing, boating, hiking, archery, arts and crafts, miniature golf, horseback riding, shuffleboard and other games. Typical occupations include, but are not limited to, counselors, cooks, ground and maintenance personnel, nurses, housekeepers, security guards, lifeguards, store clerks and game attendants. This classification includes clerical office and sales personnel physically located at the above facilities.

[Title 296 WAC—p. 396]

This classification excludes day camp operations that do not include overnight accommodations which are to be reported separately in the applicable classification and state park campgrounds which are to be reported separately in the applicable state agency classifications.

[Statutory Authority: RCW 51.16.035, 51.04.020. 00-14-052, § 296-17-695, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-695, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-695, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 89-24-051 (Order 89-22), § 296-17-695, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035. 87-12-032 (Order 87-12), § 296-17-695, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-695, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-695, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-695, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-695, filed 11/30/81, effective 1/1/82; Order 76-36, § 296-17-695, filed 11/30/76; Order 73-22, § 296-17-695, filed 11/9/73, effective 1/1/74.]

WAC 296-17-696 Classification 6301.

6301-00 Sales personnel: Vehicles and marine pleasure craft

Applies to sales employees of establishments engaged in selling and/or leasing new and/or used automobiles, trucks, campers, recreational vehicles, mobile homes, motorcycles or other all-terrain vehicles, or boats and other marine pleasure craft and who are not covered by another classification assigned to the employer's account. Duties contemplated by this classification are limited to sales training, test driving, showing and demonstrating vehicles, completing paper work, and arranging for delivery of purchased vehicles.

Special note: This is a restrictive classification; the qualifying factor is that all the conditions of the general reporting rules covering standard exception employees have been met.

6301-06 Instructors of driving schools

Applies to instructors of driving schools. Instructors duties include, but are not limited to, demonstrating driving techniques, and observing student drivers.

This classification excludes administrative staff and classroom instructors of driving schools who are to be reported separately in classification 6103; vehicle repair or maintenance staff who are to be reported separately in classification 3411; and high school driving instructors who are to be reported separately in classification 6104.

6301-07 Limousine drivers

Applies to drivers of establishments engaged in providing limousine services to others. Limousine services provide luxury transportation for special occasions such as, but not limited to, birthday parties, weddings, dances, sporting events, concerts, and corporate business functions. Clients usually travel in groups from two to ten. Drivers are professionally trained chauffeurs; they generally provide services by appointment from specific locations to set destinations, and often wait with the vehicle while clients attend events. Depending on the occasion, the limousine service may also provide beverages, snacks, balloons, or flowers. Since the service is intended for luxury as opposed to meeting deadlines, the hazards of driving differ from most other professional drivers.

(2001 Ed.)

This classification excludes employees who repair and/or service the company's limousines who are to be reported separately in classification 3411.

Special note: Clerical office employees may be reported separately in classification 4904 provided all the conditions of the general reporting rule covering standard exception employees have been met.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-696, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-696, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-696, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-696, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-696, filed 11/29/82, effective 1/1/83; Order 73-22, § 296-17-696, filed 11/9/73, effective 1/1/74.]

WAC 296-17-697 Classification 6302.

6302-00 Sales personnel: Door to door

Applies to sales personnel engaged in door-to-door sales of merchandise. Types of merchandise include, but are not limited to, coffee, tea, or other grocery items, mops, brushes, carpets or other household furnishings, vacuum cleaners, books, and magazines. Duties contemplated by this classification are limited to showing samples or brochures describing items for sale, completing paperwork for orders, and driving. Sales persons take orders and have the products shipped directly from a distributor to the consumer.

This classification excludes sales employees who deliver the sold products or who sell directly from stock kept in their vehicle who are to be reported separately in classification 1101.

Special note: This is a restrictive classification; the qualifying factor is that all the conditions of the general reporting rules covering standard exception employees have been met.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-697, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-697, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-697, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-697, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-697, filed 11/9/73, effective 1/1/74.]

WAC 296-17-698 Classification 6303.

6303-00 Outside sales personnel, N.O.C.; messengers

Applies to those employees whose job duties and work environment meet *all* the conditions of the general reporting rules covering outside sales personnel, and who are not covered by another classification (N.O.C.) assigned to the employer's account. Duties of outside sales personnel contemplated by this classification are limited to soliciting new customers by telephone or in person, showing, selling, and explaining products or services, servicing existing accounts, completing correspondence, placing orders, performing public relations duties, and estimating. Duties of messengers are limited to delivering interoffice mail, making deposits, and similar duties that are exclusively for the administration of the employer's business.

This classification excludes the delivery of products or merchandise or the stocking of shelves which is to be reported separately as applicable; the demonstration or delivery of machinery or equipment which are to be reported sep-

(2001 Ed.)

arately as applicable, establishments engaged as collection agencies or public relations agencies which are to be reported separately in classification 5301; establishments engaged in providing inspection and valuations exclusively for insurance companies which are to be reported separately in classification 4903.

Special note: When considering this classification care must be taken to look beyond titles of employees. Employees with occupational titles such as, but not limited to, collectors, counselors, consultants, or appraisers may or may not qualify for this classification. This is a restrictive classification; the qualifying factor is that all the conditions of the general reporting rules covering standard exception employees have been met.

6303-03 Insurance sales personnel and claims adjusters

Applies to insurance sales personnel and claims adjusters with outside duties. Duties of employees subject to this classification are limited to selling insurance policies at their place of business or at the client's home, or going to the scene of an accident or catastrophe to assess damage. Work may be performed within an office or away from the employer's premises.

Special note: Individuals performing duties as an agent, broker, or solicitor (and hold a license as issued by the office of the insurance commissioner) are exempt from coverage as specified in RCW 51.12.020(11) and 48.17.010, 48.17.020, and 48.17.030. To elect voluntary coverage these individuals must submit a completed optional coverage form to the department.

6303-21 Home health care services: Social workers and dietitians

Applies to social workers and dietitians employed by home health care service establishments who provide care for handicapped individuals. Duties of these employees include teaching and assisting physically or developmentally disabled individuals in their own home to manage daily living skills such as caring for themselves, dressing, cooking, shopping, and going to the doctor. This classification also includes dietitians, sometimes called nutritionists, who usually are referred to patients by their physicians. The dietitian assesses the patient's current nutritional status, including current food intake, medical background, family history, currently prescribed medications, and social and psychological needs, then develops a food plan to meet the patient's needs. Employees subject to this classification do no cooking.

This classification excludes nursing and home health care services which are to be reported separately in classification 6110; therapy services which are to be reported separately in classification 6109; domestic servants who are to be reported separately in classification 6510; and chore workers who are to be reported separately in classification 6511.

Special note: This is a restrictive classification; the qualifying factor is that all the conditions of the general reporting rules covering standard exception employees have been met. *This classification is not to be assigned to any account that does not also have classification 6110.*

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-698, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-698, filed 8/28/98, effective 10/1/98; 85-24-032 (Order 85-33), § 296-17-698, filed 11/27/85, effective

1/1/86; 85-06-026 (Order 85-7), § 296-17-698, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-698, filed 11/30/83, effective 1/1/84. Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-17-698, filed 11/30/79, effective 1/1/80; Order 76-36, § 296-17-698, filed 11/30/76; Order 73-22, § 296-17-698, filed 11/9/73, effective 1/1/74.]

WAC 296-17-699 Classification 6304.

6304-00 Stores: Department - retail

Applies to establishments engaged in operating large retail stores which are characterized by specialized departments such as, but not limited to, wearing apparel, jewelry, luggage, housewares, cosmetics and furniture. For purposes of this classification, a department store will include all of the following departments: Wearing apparel, shoes and household furnishings (such as, but not limited to, window coverings, bedding, linens, lamps). A department store will also have at least two of the following departments: Furniture, jewelry, audio equipment, luggage, hardware, giftware, china, or sporting goods. This classification includes employees of specialty services such as alteration personnel, and delivery drivers. This classification is distinguishable from clothing stores in classification 6305, or retail variety stores in classification 6406, in the number of specialized departments and the variety of nonclothing or giftware merchandise for sale. This classification also includes the placement or installation of furniture items such as, but not limited to, couches, china cabinets, end tables, dining tables, bedding such as mattresses and box springs, curtains, draperies, and mirrors in customer's locations.

This classification excludes automotive service centers which are to be reported separately in the applicable service classification and the installation of carpet, floor vinyl, tile, cabinets, exterior siding, painting, fencing, roofing or similar construction related activities which are to be reported separately in the classification applicable to the construction work being performed.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6304-01 Antique variety stores - retail

Applies to establishments engaged in the retail sale of a variety of used or antique merchandise. While the majority of merchandise is used, some of the items may be new. Merchandise includes, but is not limited to, glassware, jewelry, clothing, pictures, tools, floor coverings, and silverware and could include a limited amount of furniture.

This classification excludes antique or specialty stores engaged primarily in the sale of furniture which are to be reported separately in classification 6306; antique specialty stores engaged primarily in the sale of glassware, china or silverware which are to be reported separately in classification 6406; and antique specialty stores engaged primarily in the sale of wearing apparel and/or shoes which are to be reported separately in classification 6305.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-699, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-699, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-699, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-699, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-699, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-699, filed 11/30/83, effective 1/1/84; Order 73-22, § 296-17-699, filed 11/9/73, effective 1/1/74.]

WAC 296-17-700 Classification 6305.

6305-00 Stores: Clothing - retail

Applies to establishments engaged in the retail sale of new or used clothing. Merchandise varies, but generally includes shoes, jewelry, giftware, or accessories in addition to wearing apparel. Some establishments will specialize in certain types of clothing such as, but not limited to, athletic wear, T-shirts, coats, socks, or vintage clothing. This classification also applies to stores that rent clothing such as, but not limited to, costumes, tuxedos, or wedding apparel. This classification includes all store employees including specialty services such as alterations personnel and delivery drivers.

This classification is distinguishable from department stores in classification 6304 or retail variety stores in classification 6406 in the limited number of specialized departments and the variety of nonclothing or giftware merchandise for sale.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6305-01 Stores: Dry goods - retail

Applies to establishments engaged in the retail sale of a variety of new or used dry goods. For purposes of this classification dry goods include, but are not limited to, fabric, embroideries, veiling, laces, textile trimmings, curtains, draperies, blankets, bedspreads, sheets, pillowcases, tablecloths, napkins, and towels. This classification includes all store employees.

This classification is distinguishable from retail fabric stores in classification 6406 in that dry good stores will carry primarily finished piece goods for sale while fabric stores will carry primarily fabric, sewing notions and a limited supply of finished goods.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6305-02 Stores: Shoe - retail

Shoe shine stands

Applies to establishments engaged in the retail sale of new or used shoes. Establishments may sell a full line of shoes or they may specialize in certain types such as athletic shoes, safety shoes, work boots, women's, men's, or children's shoes. It is customary for shoe stores to sell some related products such as, but not limited to, handbags, socks, belts, or shoe care products. This classification includes all store employees. This classification also applies to shoe shine stands.

This classification excludes establishments engaged in the manufacture or repair of shoes or boots which are to be reported separately in classification 3802.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6305-04 Stores: Western wear, including tack - retail

Applies to establishments engaged in the retail sale of new or used western style clothing. Merchandise varies, but may also include western style shoes and boots, jewelry, giftware, or horse tack. This classification includes all store employees including specialty services such as alterations personnel and delivery drivers.

This classification is distinguishable from department stores in classification 6304 in that classification 6305 businesses are not comprised of specialized departments and do not carry furniture, housewares, and similar items required as part of the department store classification.

This classification excludes establishments engaged exclusively in the sale of horse tack and related animal grooming and care products which are to be reported separately in classification 2009 "farm supply stores."

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6305-05 Stores: Wig or hat - retail

Applies to establishments engaged in the retail sale of new or used wigs or hats. Merchandise varies, but generally these establishments will also sell related hair care products, hat pins, broaches or similar accessory items. This classification includes all store employees.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6305-06 Custom dressmaking, tailoring, alterations

Applies to establishments who provide custom dressmaking, tailoring, or alterations services to others. Activities include the showing of sketches and fabrics, modeling samples, taking individual orders and measurements, cutting, basting and fitting. Employees use sewing machines, but much of the work is hand sewing, steaming or pressing. Materials include fabrics, buttons, zippers, and sewing notions. Tools and machinery include, but are not limited to, scissors, steam presses and irons, dress forms, and sewing machines with attachments to perform a variety of sewing functions. Custom dressmakers and tailors may sell fabrics and sewing notions, or limited supply ready-made apparel. The sale of these items by establishments engaged in custom dressmaking or tailoring is included in this classification. This classification is distinguishable from clothing manufacturers in classification 3802 in that establishments subject to classification 6305 make custom clothing for individuals rather than making garments on a quantity basis. However, customers of a 6305 business may order several items of a kind such as for a wedding party or small theater group.

(2001 Ed.)

This classification excludes the mass production of wearing apparel which is to be reported separately in classification 3802.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-700, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-700, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-700, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 93-12-093, § 296-17-700, filed 5/31/93, effective 7/1/93. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-700, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-700, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-700, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-700, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-700, filed 11/9/73, effective 1/1/74.]

WAC 296-17-701 Classification 6306.

6306-00 Stores: Furniture - wholesale or retail

Stores: Billiard or pool table - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of new, used, or antique household furniture. This classification also includes the sale of related items such as, but not limited to, lamps, bedding, pillows, floor and window coverings, framed pictures, art pieces and sculptures when sold in connection with a furniture store operation. This classification includes the delivery and the incidental repair of merchandise sold. Incidental repair in this classification is limited to such activities as the repair or cleaning of upholstery or fixing a small scratch on a table. The installation of carpet and window coverings may be included in this classification if such merchandise is part of the store's inventory and is readily available for sale and delivery to the customer. The contract installation of any merchandise which must be ordered from a factory or distributor to fulfill the terms of contract is to be reported separately in the classification applicable to the work being performed. For example, a furniture store could bid on a job to carpet all units of an apartment complex. If the carpet is ordered from the factory as opposed to carpet carried at the store and in the stores inventory, then the installation is to be reported separately in classification 0502. This classification also applies to stores that sell billiard or pool tables.

Special note: Care should be exercised when considering this classification for antique or used furniture stores since such establishments may actually be a furniture refinishing business or an upholstery shop which are to be reported separately in the appropriate classification. Repair work covered by this classification (6306) is limited to such activities as fixing a small scratch on a table, replacing a piece of glass or mirror in a china or curio cabinet, sewing on a button or adjusting a reclining chair mechanism. Classification 6306 should not be assigned to an establishment that is engaged in furniture refinishing, or upholstery work which are to be reported separately in the applicable service or repair classification.

6306-01 Stores: Furniture - rental

Applies to establishments engaged in the rental of new, used, or antique household furniture. This classification also

includes the sales of related items such as, but not limited to, lamps, bedding, pillows, framed pictures, art pieces and sculptures when sold in connection with a furniture rental store operation. This classification includes the delivery and the incidental repair of merchandise rented. Incidental repair in this classification is limited to such activities as the repair or cleaning of upholstery or fixing a small scratch on a table. This classification also applies to establishments that provide rent-to-own purchasing options, and to establishments engaged in the sale or rental of hospital beds, motorized wheelchairs and similar patient appliances.

Special note: Care should be exercised when considering this classification for an antique or used furniture store since such establishments may actually be a furniture refinishing business or an upholstery shop which are to be reported separately in the appropriate classification. Repair work covered by this classification (6306) is limited to such activities as fixing a small scratch on a table, replacing a piece of glass or mirror in a china or curio cabinet, sewing on a button or adjusting a reclining chair mechanism. Classification 6306 should not be assigned to an establishment that is engaged in furniture refinishing, or upholstery work which are to be reported separately in the applicable service or repair classification.

6306-02 Stores: Appliance - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of gas, electric, or propane household appliances. Household appliances include, but are not limited to, refrigerators, freezers, stoves, range tops, trash compactors, washing machines, clothes dryers, television consoles, big screen televisions, and television antennas or satellite dish receiving units. Appliance stores will routinely carry smaller appliances which are generally referred to as counter top units which include, but are not limited to, mixers, blenders, microwave ovens, toasters and espresso machines and are included in this classification when sold in connection with the appliance store operation. This classification covers the sale of primarily new appliances although establishments subject to this classification accept trade-ins and sell some used appliances. Also included is the incidental repair of appliances sold by the appliance store, parts departments employees, and the delivery of products sold. The contract installation of any merchandise which must be ordered from a factory or distributor to fulfill the terms of contract is to be reported separately in the classification applicable to the work being performed. For example, an appliance store could bid on a job to supply appliances for all units of an apartment complex. If the appliances are ordered from the factory as opposed to items carried at the store and in the stores inventory then the installation is to be reported separately in classification 0607. Establishments engaged in the sale of commercial appliances may be assigned to this classification provided such establishments operate a bonafide store operation. Generally, however, commercial appliances such as those used to equip bakeries and restaurants are factory ordered items which are made to a customer's specifications from a manufacturer's representative.

Special note: Care should be taken when considering this classification for an antique or used appliance store since

such establishments are primarily engaged in reconditioning appliances (service and repair) for resale and are to be reported separately in classification 0607.

6306-03 Stores: Piano or organ - wholesale or retail

Applies to establishments engaged primarily in the wholesale or retail sale of new pianos and organs. This classification includes all operations associated with the store including service, repair, and delivery. It is common for stores subject to this classification to carry other musical instruments such as, but not limited to, guitars, drums and wind instruments as well as provide instructions on the use of instruments.

This classification excludes establishments engaged exclusively in piano tuning which are to be reported separately in classification 4107; stores that sell musical instruments other than pianos or organs which are to be reported separately in classification 6406; and establishments engaged in the reconditioning of organs and pianos accompanied by the related sales of reconditioned pianos and organs which are to be reported separately in classification 2906.

6306-06 Stores: Office furniture - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of new, used, or antique office furniture. This classification also includes the sales of related items such as, but not limited to, lamps, floor and window coverings, framed pictures, art pieces and sculptures when sold in connection with an office furniture store operation. This classification includes the delivery of furniture and related items, and the incidental repair of office furniture items sold by the office furniture store such as upholstery repair and cleaning. The installation of carpet and window coverings may be included in this classification if such merchandise is part of the store's inventory and readily available for sale and delivery to the customer. The contract installation of any merchandise that must be ordered from a factory or distributor to fulfill the terms of contract is to be reported separately in the classification applicable to the work being performed. For example, an office furniture store could bid on a job to supply modular desk units for a large office complex. If the desk units are ordered from the factory as opposed to units carried at the store and in the stores inventory, then the installation is to be reported separately in classification 2002.

Special note: Care should be exercised when considering this classification for an antique or used office furniture store since such establishments may actually be a furniture refinishing business or an upholstery shop which are to be reported separately in the appropriate classification. Repair work covered by this classification (6306) is limited to such activities as fixing a small scratch on a table, replacing a piece of glass or mirror in a china or curio cabinet, sewing on a button or adjusting a reclining chair mechanism. Classification 6306 should not be assigned to an establishment that is engaged in furniture refinishing or upholstery work.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-701, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-701, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-701, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-701, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-701, filed 11/30/83, effective 1/1/84; Order 76-36, § 296-17-701, filed 11/30/76; Order 75-38, § 296-17-

701, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-701, filed 11/9/73, effective 1/1/74.]

WAC 296-17-703 Classification 6308.

6308-00 Stores: Jewelry - wholesale or retail

Applies to establishments engaged in the sale of premanufactured jewelry. Jewelry sales may be retail to consumers or on a wholesale basis to other stores and dealers. It is common for jewelry stores to employ a goldsmith who will size rings on premises, mount gem stones into settings, or make custom jewelry. Jewelry stores could also be engaged in watch repair and engraving and may offer these services as a part of the jewelry store business. Repair of watches and engraving is included in this classification when performed by jewelry store employees. Custom jewelry making subject to classification 6308-00 is distinguishable from jewelry manufacturing subject to classification 3602 in that businesses in classification 3602 are engaged primarily in the manufacture of jewelry in mass quantities, while jewelry stores in classification 6308 are primarily in the business of selling jewelry purchased from a manufacturer or dealer, and may also make custom or one-of-a-kind pieces.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6308-01 Stores: Hearing-aid - wholesale or retail

Applies to establishments engaged in the sale of hearing aids. Hearing aids are purchased directly from the manufacturer or a distributor and resold to retail consumers, or at wholesale to other hearing-aid stores. Stores subject to this classification routinely offer free hearing tests to customers. Classification 6308-01 is distinguishable from medical services rendered by a physician subject to classification 6109 in that technicians employed by hearing-aid stores subject to classification 6308 rely on sound testing equipment to conduct examinations. They can provide hearing-aid appliances to customers, but do not perform medical procedures and do not need medical certification. This classification includes technicians employed by the store who conduct hearing tests. Medical doctors, on the other hand, perform a number of medical tests including X-ray and may recommend or perform hearing corrections through surgical procedures.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6308-02 Stores: Optical - wholesale or retail

Applies to establishments engaged in the sale of optical goods such as, but not limited to, eye glasses and contact lenses. Optical stores purchase eye glass frames and pre-made lenses from other sources and sell them to retail customers, or wholesale to other optical stores. Stores subject to this classification routinely offer free eye exams to customers. The eye examinations are performed by optometrists or by technicians. These technicians do not need medical certification in order to conduct tests. This classification includes optometrists or technicians employed by optical stores. Classifica-

tion 6308-02 is distinguishable from medical services rendered by a physician (ophthalmologist) subject to classification 6109 in that optical stores in classification 6308 rely on testing equipment and can only provide eye glass appliances to customers. Medical doctors, on the other hand, perform a number of medical tests including X-ray and may recommend or perform vision corrections through surgical procedures.

This classification excludes establishments engaged in grinding operations as part of the manufacture of optical lenses which are to be reported separately in classification 6604 and establishments engaged in the manufacture of eye glass frames which are to be reported separately in the classification applicable to the materials and processes used.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6308-03 Stores: Clock and watch - wholesale or retail

Applies to establishments engaged in the sale of clocks and watches, including related repair. Stores subject to this classification carry an assortment of clocks and watches such as, but not limited to, cuckoo clocks, grandfather clocks, anniversary clocks, and an assortment of heirloom quality pocket or wrist watches. Establishments assigned to this classification are not engaged in the manufacture or assembly of clocks or clock kits. Clocks are purchased directly from the manufacturer or a distributor and resold to retail consumers, or at wholesale to other stores. Classification 6308-03 is distinguishable from clock or watch manufacturing subject to classification 3602 in that clock stores subject to classification 6308 are engaged exclusively in the sale of items manufactured by others and businesses in classification 3602 are engaged primarily in the manufacture of clock mechanisms.

This classification excludes establishments engaged in the manufacture of wooden components or cabinets such as those for grandfather or cuckoo clocks which are to be reported separately in classification 2905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6308-04 Stores: Trophy or awards - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of trophies, plaques, awards and related items such as, but not limited to, banners, name badges, certificates, buttons, pins, ribbons, pens, advertising or specialty items. As a convenience to their customers, trophy stores may also sell small signs or similar items which they purchase from others. Establishments subject to this classification purchase component parts from other unrelated businesses, then assemble and engrave or letter them per customer specifications. Component pieces include, but are not limited to, plastic, marble, metal, or wood bases and backings, decorative mounts, small hardware, vinyl fabric, and ready made banners. They use hand tools, table top punching or bending devices and engraving equipment. While stores may still use old style engraving machines for some custom orders, most of today's engraving or lettering is done on computerized equipment.

This classification excludes the manufacture of component pieces or signs which is to be reported separately in the classification applicable to the work being performed.

Special note: Producing "computerized vinyl lettering or designs" is a normal activity in several types of businesses such as, but not limited to, trophy stores, manufacturers of textile banners, or sign painting services in a shop. Computerized lettering or designs are made on a plotter/cutter that is attached to a computer. A roll of vinyl fabric is placed on the plotter/cutter. Designs are created on the computer, then transferred electronically to the plotter/cutter that punches them out in the vinyl material. Designs are transferred onto the backing with the use of transfer paper. One must look beyond the producing of computerized vinyl applications when determining the nature of the business being classified. An employee whose *only* duties are generating vinyl lettering or designs on computerized equipment in an office environment could qualify for classification 4904 provided all the conditions of the general reporting rule covering standard exception employees have been met.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-703, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-703, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-703, filed 5/31/96, effective 7/1/96; 85-24-032 (Order 85-33), § 296-17-703, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-703, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-703, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-703, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-703, filed 11/9/73, effective 1/1/74.]

WAC 296-17-704 Classification 6309.

6309-02 Stores: Gun - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of hand guns and rifles. Gun stores subject to this classification will routinely sell related goods such as, but not limited to, knives, archery supplies, ammunition, cleaning kits, targets, target launchers, ammunition belts and specialty clothing. It is common for gun stores to repair guns for their customers. This generally consists of replacing worn or malfunctioning parts that they have in inventory, or that are special ordered from the manufacturer. Gun stores are not generally involved in machining operations although some light machine work is contemplated by this classification. Gun stores in this classification can also make custom ordered guns. This term may be misleading in that a custom gun made by a gun store is simply the assembly of various components to produce the desired gun. Depending on the size and location of the store a related shooting range may be found on the premise. Whether the shooting range is operated in connection with the store operation or by an independent business unrelated to the gun store, it is to be reported separately in classification 6208. Establishments in classification 6309-02 are distinguishable from operations covered in classification 3402, in that gun stores subject to classification 6309 are not engaged in the manufacture of guns, which includes such operations as machining barrels, fabricating

triggers, springs, bolts, levers, clips and handles, or in the mass assembly of gun components into finished goods.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-03 Stores: Bicycle - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of all types of bicycles. Bicycle stores subject to this classification will sell related goods such as, but not limited to, helmets, pumps, carrier racks, water bottles, shoes, trailers, child carriers, and specialty clothing. It is common for bicycle stores to assemble new bicycles as well as tune and repair bicycles for their customers. This generally consists of replacing worn or malfunctioning parts that they have in inventory or that are special ordered from the manufacturer. Bicycle stores subject to this classification will occasionally make a custom bicycle. This term may be misleading in that a custom bicycle may be nothing more than the assembly of various components to produce the desired bicycle, or it could be the actual cutting, bending, and welding of tube metal, or the cutting, rolling and heating of graphite reinforced plastic material. *Only* those custom bicycles that are assembled from components *manufactured by others* are to be reported in classification 6309 and *only* if such custom work is incidental to the primary sales of off-the-rack bicycles manufactured by others.

This classification excludes machining operations, frame welding, and establishments engaged in custom manufacturing or mass producing bicycles from nonfinished goods which are to be reported separately in the classification applicable to the bicycle frame material and process used to manufacture the finished units.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-06 Stores: Garden supply - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of homeowner type yard and garden tools, equipment, and supplies. Establishments subject to this classification will carry in their inventory and have available for immediate sale various garden tools and gloves, equipment, and supplies such as, but not limited to, rakes, shovels, post hole diggers (nonpower), hoes, wheel barrows, garden carts, edgers, weed wackers, lawn sprinklers, garden hose, lawn mowers, and chain saws. On a seasonal basis these establishments will routinely stock bags of various types of lawn, shrub and plant fertilizer, lawn seed, bags of potting soil, bags of beauty bark, flower bulbs, vegetable and flower seeds, and some bedding plants and small shrubs. This classification is distinguishable from nurseries in that nurseries sell plants, shrubs and trees that they have purchased from others or raised from seeds or cuttings, most of which are available for sale all year round. Nurseries typically sell soils and bark in bulk, but seldom sell lawn mowers, lawn tractors, edgers and similar items. Nurseries are further distinguishable from garden supply stores in that garden supply stores have a limited outside yard and are primarily composed of a store operation. Nurs-

eries, on the other hand, have limited store operations and extensive yards where plants, shrubs, and trees are displayed and cared for, as well as extensive greenhouse operations. This classification also includes merchants who are engaged in the sale and/or hand packaging of agricultural seeds that have been processed by others.

This classification excludes the repair of tools and equipment sold which is to be reported separately in the classification applicable to the work being performed.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-07 Locksmiths

Applies to establishments engaged in servicing or repairing locksets. Establishments subject to this classification will have a small retail store where they sell new door locksets, repair customer locksets, re-key locksets, make duplicate keys, and sell home security items such as safes and alarm systems. In addition to store operations, this classification includes locksmith field work such as unlocking a car, removing a broken key from an ignition or door, and installing a replacement lockset in a door.

This classification excludes the installation of safes, new locksets, or dead bolt locks which is to be reported separately in classification 0607 and the installation of home security systems which is to be reported separately in classification 0608.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-08 Stores: Automobile, truck, motorcycle, or aircraft accessories or replacement parts - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of automobile, truck, motorcycle, or aircraft accessories or replacement parts. Most establishments subject to this classification carry a full line of parts ranging from batteries, wiper blades, ignition components, to engines, tires, and transmissions. However, this classification also applies to establishments that sell specialized product lines such as, but not limited to, batteries, electrical systems, or transmission parts. This classification covers only the store operation. Any vehicle, tire, or machine shop service is to be reported separately in the applicable repair or service classification. Care should be exercised when considering the assignment of this classification to an establishment engaged in vehicle service or repair as parts departments may be included in the service or repair classification. *Only* those vehicle service or repair establishments that have "full line" replacement parts stores are to be assigned to this classification and *only* when the classification that governs the repair or service permits, the parts department to be reported separately.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-09 Stores: Architectural and surveyor supplies - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of professional and technical measurement equipment used primarily by architects and surveyors. Products sold by establishments subject to this classification include, but are not limited to, plan holders, plotters, lettering systems, engineering software, CAD supplies, copiers and computer paper and films. This classification includes the *in-shop* servicing or repair of products sold, such as replacing or adjusting parts.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-11 Stores: Stained art glass - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of stained art glass supplies. Operations contemplated by this classification include the receipt of merchandise purchased from unrelated businesses, dealers, or manufacturers, warehousing, stocking of shelves, cashiering, offering craft classes to customers, and delivery of merchandise to customers. Items sold by establishments subject to this classification include, but are not limited to, lead and leaded glass, crafts, light fixtures, terrarium parts, lamp shade parts, kits for picture frames, mirrors, books on stained glass, small grinders, glass cutters and other tools for making stained glass items.

This classification excludes the manufacture of stained glass and the fabrication and assembly of stained art goods which is to be reported separately in classification 3503 and stores that sell craft-making goods or hobby supplies which are to be reported separately in classification 6309-21.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-12 Stores: Wood stove and accessories - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of wood stoves, pellet stoves, fireplace inserts, and accessories. The majority of stoves today are produced from cast iron or steel plate and may be finished with enamel or paint. Stove stores subject to this classification will sell related accessories such as, but not limited to, noncombustible hearths and irons, wood holders, pellet scoops, stovepipes, metal chimneys, decorative brass legs and brass handles and bags of pellets. Some wood stove dealers may sell both stoves and spas as their main product lines. Stores that sell both are to be reported separately in classification 6309-14. This classification includes the set-up of wood stoves and heaters which can be operated as part of a display area or showroom in the store when performed by employees of this business.

This classification excludes the installation and repair of wood stoves, furnaces, air conditioning units and vacuum cleaner systems which is to be reported separately in classification 0307; masonry work which is to be reported separately

in classification 0302; and chimney cleaning which is to be reported separately in classification 4910.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-13 Stores: Hardware variety, N.O.C., specialty hardware or marine hardware - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of hardware related items. Operations contemplated by this classification include the receipt of merchandise purchased from unrelated business dealers or manufacturers, warehousing of inventory, stocking of shelves, cashiering, customer load out, assistance and delivery. Establishments subject to this classification cater to homeowners and, therefore, do not carry contractor quantities of products for sale. Hardware variety stores applicable to this classification are generally small retail stores (3,000 square feet or less). Hardware variety stores will have a wide assortment of products for sale ranging from paint and painting supplies, electrical and plumbing supplies, to hand or power tools, garden supplies, housewares, and hardware. For purposes of this classification the term "hardware" applies to nails, screws, bolts, hinges, staples, chain, and similar items. Classification 6309-13 is distinguishable from classification 2009 in that the quantity of products sold by hardware variety stores subject to classification 6309-13 is limited to homeowner quantities, the selection of product is limited, and they carry only a limited selection of lumber, if at all. Hardware variety stores may also carry seasonal plants. This classification also applies to specialty hardware or marine hardware stores.

This classification excludes hardware stores that sell lumber or building materials which are to be reported separately in classification 2009.

Special notes: Care should be exercised when assigning classification 6309-13 to a business. All other store and nursery classifications are to be considered before this classification is assigned. It is common for a nursery to have a substantial inventory of hardware and tools, just as it is common for farm supply stores to sell similar products, yet these types of businesses are covered in alternative classifications.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-14 Stores: Hot tub or spa - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of hot tubs and spas. Most dealers subject to this classification have small store operations where a limited supply of spas and hot tubs are displayed. Some may have distribution centers where spas are shipped from the manufacturer and stored until delivered to a showroom or directly to a customer. The majority of spa units are portable and self-contained, which means the plumbing, pump, wiring, and controls are already in place and enclosed in the siding surrounding the tub. They are ready to use once the electricity is hooked up at the customer's site. The other type of spas are referred to as "shells," which are usually set in place in the

ground, then the pump, plumbing, electrical wiring, and any surrounding rockery or structures built around it. Stores that sell spas and hot tubs also stock related items such as, but not limited to, spa or swimming pool chemicals and cleaners, brushes, replacement pumps and parts, filters, and spa accessories such as fragrances. Some may also sell other product lines such as swimming pool shells, wood or pellet stoves and related items such as, but not limited to, lawn furniture, barbecues, or water sports equipment. Operations contemplated by this classification include the receipt of tubs, spas, pools, pool liners, chemicals and other products from manufacturers or unrelated companies, stocking shelves, setting up displays, cashiering, delivery of products to customer locations, instruction on testing and maintaining pool waters, and incidental pump repair in the store; it does not contemplate the repair or service of pumps or pools at customer's location. Establishments that sell both wood stoves and spas are to be reported in this classification. This classification also applies to establishments that rent hot tubs and deliver them to, and pick them up from, the customer's location.

This classification excludes establishments that sell only accessories for tubs or pools which are to be reported separately in classification 6406; establishments engaged in the sale of wood or pellet stoves, but do not sell spas, which are to be reported separately in classification 6309-12; and establishments engaged in the manufacture or installation of hot tubs which are to be reported separately in the classification applicable to the work being performed.

Special notes: Spa and hot tub dealers may be licensed contractors who build swimming or wading pools, in addition to the spas and hot tubs sold. Except for the in-store pump repair, all other electrical or plumbing installation or repair work, pump repair, landscaping, building of structures, pouring of concrete, and servicing of the pool waters are excluded from this classification and are to be reported separately in the classification applicable to the work being performed.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-15 Stores: Floor covering - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of floor coverings. Establishments subject to this classification sell a variety of floor coverings and related items such as, but not limited to, sheet vinyl, floor tile, ceramic wall or countertop tile, wood parquet, floor or area rugs, carpeting, window coverings, bathroom and kitchen accessories, and supplies to install products. Other stores may specialize in only one or a few of these products. Floor covering stores generally consist of a store operation where samples of all product types are displayed. Merchandise is usually ordered from the factory or distributor per customer specifications; however some goods are kept in stock and are available for immediate sale. Operations contemplated by this classification include the receipt of merchandise purchased from unrelated businesses and manufacturers, stocking shelves, cashiering, estimating floor covering needs from plans, blue prints and customer measurements, ordering spe-

cial floor coverings from distributors or manufacturers, and delivering the product to customers.

This classification excludes all installation work and the manufacture of any product sold by floor covering stores, which is to be reported separately in the applicable construction, installation, or manufacturing classification.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-16 Pawn shops

Applies to establishments engaged in loaning money to others in exchange for collateral of new or used merchandise such as, but not limited to, jewelry, video equipment, and computers. It is common for pawn shops to sell new and used merchandise they have taken as collateral for defaulted loans. Operations contemplated by this classification include receiving merchandise from others, stocking of shelves, and cashing.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-17 Stores: Sporting goods - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of a variety of sporting goods. Operations contemplated by this classification include the receipt of merchandise purchased from other unrelated businesses, dealers, or manufacturers, warehousing, stocking of shelves, cashing, and delivery. For purposes of this classification the term "sporting goods" includes, but is not limited to, baseball gloves, bats, balls, fishing poles, tackle, reels, tennis racquets, bicycle helmets, exercise equipment, and specialty clothing and shoes. A store may carry equipment and related items for a number of sports, or specialize in a particular sport such as skiing or fishing.

This classification excludes *stores that specialize in selling bicycles* and related items such as tire pumps, water bottles, locks, shoes and clothing, which are to be reported separately in classification 6309-03, and *stores that specialize in selling guns* and related items such as ammunition, hunting supplies, archery equipment, targets, knives, and clothing which are to be reported separately in classification 6309-02.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-18 Stores: Paint and wallpaper - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of paint and wallpaper supplies. Operations contemplated by this classification include the receipt of merchandise purchased from other unrelated businesses, dealers, or manufacturers, mixing paints and stains, warehousing, stocking of shelves, cashing, and delivery of merchandise to customers. Establishments subject to this classification routinely offer pressure washer and spray units, and ladders for rent or sale which is included in this classification when such sales and rentals are conducted in connection with a

paint and wallpaper store. This classification excludes establishments engaged in the rental of spray paint and pressure washer units which are to be reported separately in classification 1106.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-19 Stores: Sewing machines or vacuum cleaners - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of new or reconditioned sewing machines or vacuum cleaners. Operations contemplated by this classification include the receipt of merchandise purchased from other unrelated businesses, dealers, or manufacturers, warehousing, stocking of shelves, cashing, demonstrating or delivering merchandise to customers, providing instructions or sewing classes to customers, and in-store repair. Sewing machine repair is generally limited and consists mainly of adjusting thread and stitch tensioners, aligning components (needle and foot), replacing electrical motor, lights and belts. Types of sewing machines include sergers, button holers, embroidery machines, and commercial machines such as those used by a tailor or an upholstery shop, but does not include industrial machines such as those used in feed and carpet mills.

This classification excludes fabric stores that may also sell sewing machines which are to be reported separately in classification 6406; and establishments engaged in the repair of industrial sewing machines which are to be reported separately in classification 3402 for shop operations and classification 0603 for field repairs.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-20 Stores: Custom framed art or U-frame - wholesale or retail; Art galleries

Applies to establishments engaged in the wholesale or retail sale of custom framed art such as, but not limited to, posters and pictures. Operations contemplated by this classification include the receipt of merchandise purchased from other unrelated businesses, dealers, or manufacturers, warehousing, stocking of shelves, cashing, cutting matte board, glass and frame material, assembling frames, mounting art, posters or pictures into custom made or premade frames and delivery of merchandise to customers. Custom frame manufacturing covered by this classification is distinguishable from other frame manufacturing covered in classifications 3404, 2909, and 3512 in that custom frame making contemplated in classification 6309-20 consists of cutting frame material purchased from others with a specialized saw and fastening the pieces together with a small air nailer or finish screws. Frame manufacturing operations in other classifications consist of extruding metal or plastic through dies to produce the desired frame material, or planing and molding the dimensional lumber to the desired appearance, cutting material in mass quantities, fastening frames together (mass production oriented) and boxing for shipment. U-frame opera-

tions consist of selling the various components such as, but not limited to, premade frames or precut unassembled frame kits, matte board, glass and prints to customers for customer assembly. This classification also includes establishments that operate art galleries, as the framing activities are similar.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-21 Stores: Hobby and craft - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of hobby and craft supplies. Operations contemplated by this classification include the receipt of merchandise purchased from other unrelated businesses, dealers, or manufacturers, warehousing, stocking of shelves, cashiering, offering craft classes to customers, and delivery of merchandise to customers. Items sold by establishments subject to this classification include, but are not limited to, floral arrangement supplies, pottery supplies, art glass supplies, doll making supplies, jewelry components such as beads and wire, and artist supplies. It is common for establishments subject to this classification to also be involved in custom picture framing in connection with hobby or craft store operation.

This classification excludes the manufacture of hobby and craft goods which is to be reported separately in the classification applicable to the materials and processes and stores that specialize in the sale of stained art goods which are to be reported separately in classification 6309-11.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-704, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-704, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-704, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.16.035, 87-12-032 (Order 87-12), § 296-17-704, filed 5/29/87, effective 7/1/87; 85-24-032 (Order 85-33), § 296-17-704, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-704, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-704, filed 11/30/83, effective 1/1/84; 82-24-047 (Order 82-38), § 296-17-704, filed 11/29/82, effective 1/1/83; Order 76-36, § 296-17-704, filed 11/30/76; Order 75-38, § 296-17-704, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-704, filed 11/9/73, effective 1/1/74.]

WAC 296-17-706 Classification 6402.

6402-00 Stores: Grocery, N.O.C. - retail

Applies to establishments engaged in providing retail sale of a full line of grocery items. To qualify for this classification an establishment must provide for retail sale all of the following items: Canned goods, dairy products, a full line of fresh meats, frozen meats, vegetables and fruits, baked goods, carbonated and alcoholic beverages, juices, household cleaners, laundry and health care products. These stores will generally be of the supermarket size but there may be some smaller stores which are also to be included in this classification if all of the items listed above are in their inventory. Also included in this classification, when performed by employees of the store, are in-store departments or services that are pro-

vided for the customer's convenience such as in-store bakeries, delis, video rental, film developing, florists, and wine departments.

This classification excludes in-store pharmacies which are to be reported separately in classification 6406, espresso street carts or stands and lunch counter/restaurant operations which are to be reported separately in classification 3905; convenience store or mini-markets that do not sell all of the above mentioned items which are to be reported separately in classification 6403; grocery or convenience stores with self-service gasoline operations which are to be reported separately without division of hours in classification 3410; and specialty retail stores that sell only dairy products, fruits and vegetables, soft drinks or wine and/or liquor which are to be reported separately in classification 6403.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-706, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-706, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-706, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 94-12-063, § 296-17-706, filed 5/30/94, effective 6/30/94. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-706, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-706, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-706, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-706, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-706, filed 11/9/73, effective 1/1/74.]

WAC 296-17-707 Classification 6403.

6403-01 Stores: Coffee, tea, or spice - retail

Applies to establishments engaged in the retail sale of specialty coffees, teas, or spices. They may sell coffee/tea in packaged and/or ready to drink forms and may offer a small selection of pastries or cookies for the customers convenience.

This classification excludes espresso street carts or stands and lunch counter/restaurant operations which are to be reported separately in classification 3905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6403-02 Stores: Dairy products - retail

Applies to establishments engaged in the retail sale of dairy products such as, but not limited to, milk, eggs, cheese, and ice cream. As a convenience to their customers, these establishments may offer a limited supply of related foods such as bread. This classification is distinguishable from other 6403 store operations in that the primary products available for sale are dairy products.

This classification excludes espresso street carts or stands and lunch counter/restaurant operations which are to be reported separately in classification 3905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6403-04 Stores: Fruit or vegetable - retail

Applies to establishments primarily engaged in the retail sale of fresh fruits and/or vegetables. These stores are usually found in individual stands at public or municipal street markets, or at roadside stands not located on the farm which may range from a small booth to a store-like operation. Sales at roadside stands away from the farm location or public markets are to be reported in this classification even if vendors grow all their own produce.

This classification excludes establishments that grow their own fruits and vegetables and sell them at their farm location which are to be reported separately in the appropriate agricultural classification as required by the general inclusion provision of the general rules, espresso street carts or stands and lunch counter/restaurant operations which are reported separately in classification 3905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6403-05 Stores: Specialty grocery - retail

Applies to establishments engaged in retail sale of specialty grocery items. Establishments subject to this classification have a limited selection of grocery items which are generally related to ethnic foods and cuisine, gourmet meats, cheeses, or condiments, health food or pet food. This classification also applies to stores that sell U-bake pizza.

This classification excludes establishments engaged in the sale of nutritional supplements such as, but not limited to, vitamins, herbal compounds, protein powders, or energy bars, which are to be reported separately in classification 6406; espresso street carts or stands and lunch counter/restaurant operations which are reported separately in classification 3905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6403-06 Stores: Mini-markets or convenience grocery, N.O.C. - retail

Applies to establishments engaged as retail convenience grocery stores or mini-marts. Generally these stores sell convenience items such as, but not limited to, soft drinks, beer/wine, snack foods, candy and a limited selection of canned or boxed foods. They may also prepare foods such as sandwiches, chicken, jo jos and hot dogs. While these stores may sell a variety of grocery items they are distinguished from stores in classification 6402 in that they do not sell all of the items specified for retail grocery store operations. Generally the difference can be established by determining if the store cuts and sells fresh meat. This classification also applies to food bank operations.

This classification excludes establishments engaged as convenience grocery stores or mini-markets with self-service gasoline operations which are to be reported separately in classification 3410 and espresso street carts or stands and lunch counter/restaurant operations which are to be reported separately in classification 3905.

(2001 Ed.)

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6403-07 Stores: Wine, liquor, or soft drinks - retail

Applies to establishments engaged primarily in the retail sale of wine, liquor, or soft drinks and an assortment of pre-packaged mixed drinks, and related gift items. Establishments in this classification are not operated in connection with a manufacturing, bottling, restaurant, or tavern operation. This classification also applies to liquor stores operated by Native American tribes and to contract state liquor stores operated by nonstate employees. This classification contemplates a minimal amount of mail order sales and locker rentals in a wine cellar operated by a wine store.

This classification excludes state operated liquor stores which are reported separately in classification 5307; establishments engaged in the distillation, brewing, or bottling of alcohol, beer or wine, which often have tasting rooms and gift shops, which are reported separately in classification 3702; and establishments engaged primarily in selling wine-making or beer-making kits and supplies which are reported separately in classification 6406.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-707, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-707, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-707, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-707, filed 5/31/93, effective 7/1/93; 89-24-051 (Order 89-22), § 296-17-707, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 85-24-032 (Order 85-33), § 296-17-707, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-707, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-707, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-707, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-707, filed 11/9/73, effective 1/1/74.]

WAC 296-17-708 Classification 6404.**6404-00 Stores: Florists - wholesale or retail**

Applies to establishments engaged in the wholesale or retail sale of fresh-cut flower arrangements, potted plants, balloon arrangements, or arrangements of artificial or dried flowers and foliage. These shops typically carry related gift items, such as, but not limited to, terrariums, vases, and gift cards. Operations contemplated by this classification include the receipt of flowers, plants, and other merchandise from unrelated businesses, making the arrangements, storing fresh-cut flowers in refrigerated cases, caring for potted plants in a greenhouse, and delivering items sold. Also included in this classification is the assembly and/or decoration of Christmas wreaths. Wreaths may be assembled from fresh greens and decorations added, or decorations may be attached to grapevine wreath bases or metal rings. Establishments in this classification work with hand cutting tools, glue guns, small wires and wooden stakes, floral foam or clay, greenery, wreath bases, and decorative trimmings. This classification also applies to "cottage industries" that make simi-

[Title 296 WAC—p. 407]

lar items, and to establishments primarily engaged in packing holly that was grown by others.

This classification excludes establishments engaged in the planting, cultivating, and/or harvesting of flowers, plants, shrubbery, trees, florist greens, holly, baby's breath or florist greens which are to be reported separately in the classification applicable to the work being performed.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6404-02 Stores: Potted plants or aquariums - wholesale or retail: Sale, lease, or care of

Applies to establishments engaged in the wholesale or retail sale, lease, or care of potted plants or aquariums. Establishments subject to this classification will deliver, set up, service, and maintain plants or aquariums at the customer's location. The plants or aquariums are usually located inside, but may also be placed on extended living areas such as, but not limited to, porches, patios, or decks. Maintenance/care includes, but is not limited to, watering, trimming, pruning, fertilizing, and cleaning. Such establishments will frequently have a small greenhouse facility for caring and storing plants.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6404-03 Stores: Candy or cookie arrangement - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of candy or cookie arrangements in containers such as, but not limited to, mugs, vases, booklets, and novelty items. Typical occupations include, but are not limited to, making arrangements, answering telephones, selling to walk-in customers, cashiering, and delivering the bouquets. This classification does not include any on-premise manufacturing of candies or cookies.

This classification excludes establishments engaged in retail candy sales with on-premise manufacturing which are to be reported separately in classification 3905, and establishments engaged in specialty bake shops which are to be reported separately in classification 3901.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

[Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-708, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-708, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-708, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035, 93-12-093, § 296-17-708, filed 5/31/93, effective 7/1/93; 89-24-051 (Order 89-22), § 296-17-708, filed 12/1/89, effective 1/1/90. Statutory Authority: RCW 51.16.035, 86-12-041 (Order 86-18), § 296-17-708, filed 5/30/86, effective 7/1/86; 85-24-032 (Order 85-33), § 296-17-708, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-708, filed 2/28/85, effective 4/1/85; 83-24-017 (Order 83-36), § 296-17-708, filed 11/30/83, effective 1/1/84; 81-24-042 (Order 81-30), § 296-17-708, filed 11/30/81, effective 1/1/82; Order 73-22, § 296-17-708, filed 11/9/73, effective 1/1/74.]

WAC 296-17-709 Classification 6405.

6405-01 Tire sales and service centers, including automobile or truck care service centers or repair garages operated in connection with a tire service or repair center

Applies to establishments engaged in the sale, installation, and repair of vehicle tires for others. This classification includes, but is not limited to, tire store employees, service managers, and auto care service employees. Services provided include, but are not limited to, tire mounting and balancing, in-shop or mobile service flat repair, alignments, brake service, muffler repair, tune-ups, and oil changes. It is common for tire centers to offer other automotive services such as wiper replacement, radiator flush, battery replacement and even major engine and transmission work which are also included in this classification. This classification is distinguishable from classification 3411 in that classification 6405 applies to any business that installs and services tires regardless of the number of tires sold. Establishments assigned to classification 3411 do not install or service tires. *Classification 3411 is not to be assigned to an establishment assigned classification 6405.*

This classification excludes towing services for hire which are to be reported separately in classification 1109 and tire sales and services centers which are also engaged in tire retreading operations which are to be reported separately in classification 6405-06.

6405-06 Tire rebuilding, retreading and/or recapping

Applies to establishments engaged in rubber tire rebuilding, retreading and/or recapping either at their tire dealership location, or at a location physically separate from the tire store. Rebuilding tires differs from the manufacture of tires in that rebuilding, recapping, or retreading simply restores used tires to a usable condition by bonding new rubber onto the existing work tread and lateral surface. First, tires are inspected for separations and penetrations. To remove the tread pattern, the casing is mounted on a wheel, inflated, and smoothed with a buffer or abrasive file. Any rocks, nail heads, etc., are pulled out with air tools, and the holes repaired with a rubber patch or a strip of rubber applied with an extruder gun. In the hot process, the buffed tire is put on a spinning wheel and unvulcanized tread rubber is wrapped around the tread area of the tire body either manually or mechanically. The tire is then placed inside a curing mold which has a tread design, and heated at 320 degrees for several hours so the rubber expands into the design and forms the tread. After the tire is removed from the vulcanizing mold, it is inflated to high pressure and cooled. In the cold process, commonly referred to as bandage, the new tread is a precured strip or rubber compound with the tread design already molded into it. Only enough old rubber is removed to true the tire and provide a bonding surface. Air hoses or solvents are used to remove contaminants which would interfere with the adhesion process. The tire is inflated to its normal running pressure and a rubber cement is applied over the buffed surface by spray gun or brush. When the cement dries the precured tread is wrapped around the casing. The strip is bonded to the tire casing under pressure and heated at 210 degrees in a curing chamber. This classification excludes tire dealers that do not perform rebuilding, recapping or retreading which

are to be reported separately in classification 6405-01 and the manufacture of tires which is to be reported separately in classification 3513.

[Statutory Authority: RCW 51.16.035. 99-18-068, § 296-17-709, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-709, filed 8/28/98, effective 10/1/98; 96-12-039, § 296-17-709, filed 5/31/96, effective 7/1/96. Statutory Authority: RCW 51.04.020(1) and 51.16.035. 91-12-014, § 296-17-709, filed 5/31/91, effective 7/1/91. Statutory Authority: RCW 51.16.035. 85-24-032 (Order 85-33), § 296-17-709, filed 11/27/85, effective 1/1/86; 85-06-026 (Order 85-7), § 296-17-709, filed 2/28/85, effective 4/1/85; Order 75-38, § 296-17-709, filed 11/24/75, effective 1/1/76; Order 73-22, § 296-17-709, filed 11/9/73, effective 1/1/74.]

WAC 296-17-710 Classification 6406.

This classification applies to specialty retail store operations engaged primarily in the sale of a wide variety of products ranging from collectibles such as stamps, coins, sports cards, and dolls to table top appliances such as portable televisions, blenders, mixers and toasters. This classification is comprised of subclassifications that cover a specific type of retail store operation. One of the subclassifications applies to the sale of products which are not covered by another classification. Although the products sold by establishments subject to this classification will vary by each subclassification, the overall operational activities are similar. Each business covered by this classification will generally employ cashiers and merchandise stockers, as well as other occupations of workers.

Special note: This classification excludes all repair operations unless it is specifically included in the classification, delivery service, outside installation work, and lunch counters and restaurants which are to be reported separately in the classification applicable to the work or service being performed.

Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6406-00 Retail stores, N.O.C.

Applies to establishments engaged in the retail sale of merchandise or services not covered by another classification (N.O.C.). Merchandise includes, but is not limited to, greeting cards, costume jewelry, scarves, tropical fish and birds and related fish or bird supplies, table top appliances such as mixers, blenders, microwave ovens, or table top satellite receiving units, quick print copy or FAX services and related specialty items or services. This classification also applies to establishments that provide inventory services for other businesses.

This classification excludes pet stores that sell dogs or cats and establishments engaged in pet grooming services which are to be reported separately in classification 7308; pet food stores which are to be reported separately in classification 6403; and offset, cold press and similar printing operations which are to be reported separately in classification 4101.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

(2001 Ed.)

6406-01 Stores: Camera or photography supply - retail

Applies to establishments engaged in the retail sale of cameras and photography and dark room supplies such as, but not limited to, batteries, film, processing trays, chemicals, print paper, enlargers, and timers. It is common for these establishments to offer film developing services which may be either a one-hour service or an overnight process. Both types of film developing services are included in this classification when conducted in connection with a camera and photography supply store. This classification is distinguishable from classification 6506 in that establishments covered in classification 6506 are not engaged in the sale of cameras or photo developing equipment.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-03 News and magazine stands - retail

Applies to establishments engaged in the retail sale of newspapers and magazines. Establishments subject to this classification may sell newspapers or magazines from various locations such as, but not limited to, stands at public markets, store operations in malls, or from a street corner.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-09 Arcades: Coin or token operated

Applies to establishments engaged in operating coin- or token-operated arcades. This classification covers attendants, change makers, and security personnel who monitor the game rooms and make change. Attendants may remove tokens and money from machines and may perform minor adjustments such as resetting a jarred machine.

This classification excludes the installation, removal or repair of machines which is to be reported separately in classification 0606.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-11 Stores: Office stationery and machinery - retail

Applies to establishments engaged in the retail sale of office stationery, supplies, and/or machinery. For purposes of this classification "office stationery and supplies" includes, but is not limited to, paper, writing tablets, computer software, pens, pencils, markers, staples, staplers, scissors, paper clips, and binders. "Office machinery or business machinery" includes, but is not limited to, calculators, typewriters, various types of copy machines, fax machines, and desk top and lap top computers.

This classification excludes service and repair of office/business machines which is to be reported separately in classification 4107 and establishments engaged in sale of office furniture which are to be reported separately in classification 6306.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-12 Stores: Fabric, yardage, yarn and needlework supplies - retail

Applies to establishments engaged in the retail sale of fabric, yardage, yarn and needlework supplies. It is common for establishments subject to this classification to have a small inventory of noncommercial/industrial sewing machines and sergers for sale in addition to fabric, sewing notions, patterns, and related supplies. Fabric and yarn stores may also offer sewing and craft classes which are included in this classification when taught by employees of an employer subject to this classification. This classification is distinguishable from sewing machine stores in classification 6309 in that the principle products sold in classification 6406 are fabric and sewing notions while sewing machine stores are not engaged in the sale of fabric or yardage.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-14 Stores: Wind or string musical instruments - retail

Applies to establishments engaged in the retail sale of musical instruments such as, but not limited to, drums, wind instruments, guitars, and banjos. This classification includes music lessons when provided by employees of an employer subject to this classification and includes minor adjustment services such as replacing a drum skin or a broken string on a guitar.

This classification excludes the repair of wind and string musical instruments which is to be reported separately in the applicable repair classification; establishments engaged in the repair of pianos which are to be reported separately in classification 2906; and establishments engaged in the sale of pianos and organs which are to be reported separately in classification 6306.

Special notes: Classification 6406 does not apply to any establishments that sells pianos or organs in addition to wind or string instruments. Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-16 Stores: Drug - retail

Applies to establishments engaged in the retail sale of prescription and nonprescription drugs and/or nutritional supplements such as, but not limited to, vitamins, herbal compounds, and energy bars. Drug stores subject to this classification may also carry a variety of personal care and grooming products and may rent crutches, canes, wheel chairs, and walkers.

This classification excludes establishments engaged in the sale and/or rental of hospital beds, motorized wheel chairs, and other patient appliances which are to be reported separately in classification 6306, and establishments engaged in the sale/rental and service (repair) of motorized mobility aids such as wheelchairs and 3-wheel scooters which are to be reported separately in classification 3309.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-17 Stores: Variety - retail

Applies to establishments engaged in the retail sale of a variety of consumer goods such as, but not limited to, housewares, linens, clothing, toys, and candy. In earlier years establishments subject to this classification were often referred to as "5 and 10 cent stores." Although these stores carry much of the same merchandise as a department store, they are distinguishable in that variety stores are not comprised of specialized departments and do not generally carry the quantity/assortment of products that department stores do.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-18 Private mail box; safety deposit box; computer tape storage facilities - rent or lease

Applies to establishments engaged in renting or leasing private mail boxes, safety deposit boxes, or computer and financial record storage facilities. Establishments subject to this classification will operate a secured facility where they receive and sort their customers' mail, parcels and packages from the U.S. Post Office or other parcel/package delivery companies, and package articles for shipment for their customers. They also provide a secured storage facility equipped with safety deposit boxes which they rent out on a short or long term basis. It is common for these establishments to offer additional services such as FAX, and copying services.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-19 Stores: Coins, stamps, baseball cards, and comic books - retail

Applies to establishments engaged in the retail sale of coins, stamps, baseball cards, comic books, and similar collectibles. Establishments subject to this classification may be engaged exclusively in mail order sales, sell from browse tables at collectible or trade shows, through specialty auctions, or may sell from a store location. Coin and stamp stores routinely sell magazines, periodicals, and supplies that cater to collections or hobbies. Card shops routinely sell other sports memorabilia such as autographed baseballs, footballs and basketballs, framed pictures, POGS and buttons.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-20 Stores: Book, record, cassette, compact disc, and video - retail

Applies to establishments engaged in the retail sale or rental of new or used books, records, cassettes, compact discs or videos. Establishments subject to this classification may be engaged exclusively in mail order sales, sell from browse tables or trade shows, through specialty auctions or may sell from a store location.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-23 Stores: Candy - retail

Applies to establishments engaged in the retail sale of packaged and unpackaged candy they have purchased from others.

This classification excludes establishments engaged in the on-premise manufacture of candy and the subsequent retail sale of these products which are to be reported separately in classification 3905; and establishments engaged in the manufacture of candy or confections for wholesale to retail establishments or distributors which are to be reported separately in classification 3906.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-24 Stores: Cigarette and tobacco - retail

Applies to establishments engaged in the retail sale of cigarettes, tobacco, and related products such as, but not limited to, pipes, pipe cleaning supplies, rolling machines, cigarette papers, lighters, lighter fluid, and cigarette cases.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-25 Stores: Telephones - retail

Applies to establishments engaged in the retail sale of telephones, pagers, and cell phones. Establishments subject to this classification are not a utility company in that they do not operate telephone exchanges and are not regulated by the Utilities and Transportation Commission of Washington. Their operations are limited to the sale of communication hardware. Stores subject to this classification may arrange activation and service for their customer, or the customer may contact the service provider directly.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-27 Stores: Stereo components - retail

Applies to establishments engaged in the retail sale of stereo components. Establishments subject to this classification will sell a variety of audio and video appliances such as, but not limited to, video players, stereos and portable televisions. These establishments may also sell and install automobile stereo speaker systems and car phone systems; however, the installation is not covered in classification 6406-27.

This classification excludes the installation, service or repair of home or car stereos and car phone systems which are to be reported separately in classification 0607, and establishments engaged in the sale of stereo and television console sets, big screen televisions, or other major appliances which are to be reported separately in classification 6306.

Special note: Classification 6306 applies to any establishment that sells TV console sets or big screen TVs, even if the majority of their inventory is stereo components and/or portable TVs. Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

(2001 Ed.)

6406-29 Stores: Toys - retail

Applies to establishments engaged in the retail sale of a variety of toys, games, and related items for persons of all ages. Merchandise includes, but is not limited to, video games, tricycles or bicycles, books, dolls and stuffed animals, outdoor play equipment, and specialty clothing.

This classification excludes establishments engaged in the retail sale of sporting goods and bicycles which are to be reported separately in classification 6309. This classification is distinguishable from businesses in classification 6309 in that the principle products of stores subject to classification 6406 are toys and games, as compared to stores in classification 6309 which are primarily engaged in the sales of sporting goods and bicycles.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-30 Stores: Cosmetics - retail

Applies to establishments engaged in the retail sale of cosmetics and fragrances. Related services usually offered by these types of stores include consultations with clients regarding make-up techniques, styles, and colors.

This classification excludes hair and nail salons which are to be reported separately in classification 6501.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-31 Stores: Housewares - retail

Applies to establishments engaged in the retail sale of housewares such as, but not limited to, pots and pans, flatware, dishes, towels, canister sets, soap dishes, towel bars, waste baskets, plant stands, and curtains or draperies.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-33 Stores: Gift shops, N.O.C. - retail

Applies to establishments engaged in the retail sale of gift items not covered by another classification (N.O.C.) such as, but not limited to, crystal and silver serving pieces, china, cut glass, picture frames, wedding and shower books and invitations, special occasion cards, decorative statues, boxed candy, and ornaments. This merchandise tends to be of a finer selection than the everyday wares common in variety shops.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

PART C MACHINERY AND MACHINE GUARDING

WAC 296-24-150 Machinery and machine guarding—General requirements for all machines—Scope and application. (1) All sections of this chapter which include WAC 296-24-150 in the section number apply to machinery and machine guarding.

(2) All sections which include WAC 296-24-150 in the section number also applies to combination, multipurpose powered machines, commonly referred to as "iron workers," that punch, shear, notch, cope, and form metals or other materials and to single-end punches, double-end punches, structural shearing machines, notching machines, coping machines, beam punches, detail punches, and spacing punches. It also applies to machines similar in construction and function to mechanical power presses, but which are specifically identified by the respective manufacturers as "iron workers," and to machines whose most distinguishing feature is the multiple work stations at which various operations may be performed singly or simultaneously, including, but not limited to, punching, shearing, notching, coping, and forming.

(3) Mechanical powered machines that shear, punch, form, or assemble metal or material by means of tools or dies attached to slides, and are identified by their respective manufacturers as "mechanical power presses" are regulated by sections which include WAC 296-24-195 in the subsection number.

(4) Machines used in the forming of hot metal including hot trimming presses, forging hammers, hot forging presses, upsetters, hot bending and hot metal presses, etc., are regulated by WAC 296-24-200.

[Statutory Authority: Chapter 49.17 RCW. 91-03-044 (Order 90-18), § 296-24-150, filed 1/10/91, effective 2/12/91; 89-11-035 (Order 89-03), § 296-24-150, filed 5/15/89, effective 6/30/89; Order 74-27, § 296-24-150, filed 5/7/74; Order 73-5, § 296-24-150, filed 5/9/73 and Order 73-4, § 296-24-150, filed 5/7/73.]

[Title 296 WAC—p. 610]

WAC 296-24-15001 Machine guarding. (1) Types of guarding. One or more methods of machine guarding shall be provided to protect the operator and other employees in the machine area from hazards such as those created by point of operation, ingoing nip points, rotating parts, flying chips and sparks. Examples of guarding methods are - barrier guards, two-hand tripping devices, electronic safety devices, etc.
