

WAC 296-96-07170 What are the requirements of safeties and governors? (1) All inclined private residence elevators must be equipped with a safety capable of stopping and sustaining a car carrying its rated load.

(a) Elevator safeties must be type "A" or "B" or other devices approved by the department and must be operated by a speed governor.

(b) Elevator safeties must operate independently of governor speed action and without delay when a hoist rope breaks.

(2) Speed governors must operate with the safety set at a maximum speed of 140 percent of rated speed and be located where:

(a) If over-travel occurs, they will not be struck by the car or counterweight;

(b) All parts can freely and fully move; and

(c) They are accessible for a complete examination.

(3) If ropes are used, they must be made of iron, steel, Monel metal or phosphor bronze and be at least 1/4 inch in diameter. Tiller rope construction must not be used.

(4) Motor-control circuits and brake-control circuits must be opened either before the safety applies or at the time it applies.

(5) All safeties must apply mechanically. Electrically operated safeties must not be used.

(6) All winding drum type incline elevators that use rope suspensions must be equipped with a manually reset slack-rope device. During a car's descent, if it is obstructed and the hoisting ropes go slack, the slack-rope device must stop power to the elevator motor and brake

(7) Cast iron must not be used to build any elevator safety part that stops and sustains the elevator.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-07170, filed 12/22/00, effective 1/22/01.]

WAC 296-96-07171 How and when are safeties and governors tested? (1) A safety must be tested before the inclined private residence elevator is put into service. It must be tested while the elevator is carrying its rated load.

(2) Governors on instantaneous type safeties must be tested by hand tripping the governor while the elevator is traveling at its rated speed. Creating sufficient slack in the rope and dropping the elevator is the method of testing speed governors located on a elevator or chassis.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-07171, filed 12/22/00, effective 1/22/01.]

WAC 296-96-07180 What are the construction requirements for driving machines and sheaves? (1) Winding drums, traction sheaves, overhead sheaves and deflecting sheaves must:

(a) Be made of cast iron or steel;

(b) Have diameters at least 30 times the diameter of the wire hoisting ropes; and

(c) Have machined rope grooves. EXCEPTION: (1) If 8 x 19 steel ropes are used, drum and sheave diameters may be reduced to 21 times the diameter of the hoisting rope.

[Title 296 WAC—p. 1984]

(2) Existing incline lifts suspended by cables are not required to have machine grooves, except for the first row of cables wrapped on the drum.

(3) The factor of safety, based on the static load (the rated load plus the weight of the car, ropes, counterweights, etc.) to be used in the design of driving machines and sheaves, must be at least:

(a) Eight for driving machines and sheaves built of wrought iron and steel; or

(b) Ten for driving machines built of cast iron, cast steel or other materials.

(4) Set screw type fastenings must not be substituted for keys or pins if connections are subject to torque or tension.

(5) Gears:

(a) When connecting drums or sheaves to the main driving gear, friction gears, clutch mechanisms or couplings must not be used.

(b) Worm gears having cast iron teeth must not be used.

(6) Brakes:

(a) Electric brakes must be of the friction type set by springs and must release electrically.

(b) All brakes must be able to stop and hold a elevator carrying 125 percent of its rated load.

(c) At least one brake must be mounted on the load side of the driving machine's worm shaft. On indirectly driven elevators, brakes must engage when the driving machine fails.

(d) If a single ground or short-circuit, a counter-voltage or a motor field discharge occurs and the operating device is set in the stop position, the brake magnet must set the brake.

(7) Driving machines:

(a) A driving machine may be mounted on a elevator chassis or in a remote location. However, if mounted in a remote location, all sheaves and sprockets must be guarded and positioned so the hoisting ropes and chains remain properly aligned while the elevator is in use.

(b) Screw type machines must not be used.

(c) Hydraulic driving machines must conform to ASME A17.1.

(d) Roped-hydraulic machines may be used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-07180, filed 12/22/00, effective 1/22/01.]

WAC 296-96-07190 What construction requirements apply to terminal stopping switches? A hoistway must be equipped with normal upper and lower terminal stopping switches that are activated by a elevator chassis. These switches must stop the elevator at the normal top and bottom terminals of travel.

(1) A hoistway must be equipped with final terminal stopping switches that are activated by a elevator chassis. These switches must stop the elevator from traveling beyond the normal terminals and prevent it from moving in both directions.

(2) Winding drum machines may use a slack cable switch instead of a bottom final terminal switch.

(3) Normal and final terminal stopping switches must not control the same switches on the controller unless at least two separate and independent switches are used. At least two of

(2001 Ed.)

these separate switches must be closed in order to complete the motor and brake circuits for each direction of travel.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-07190, filed 12/22/00, effective 1/22/01.]

WAC 296-96-07200 What are the requirements for operation of an inclined private residence elevator? (1)

An inclined private residence elevator must be operated by constant pressure or momentary pressure key switches located at each operating station and on the elevator:

(a) The key or code must be entered each time to move the elevator.

(b) Key-operated switches must be of the spring return type and must be operated by a weatherproof cylinder type lock having not less than five pin or five disc combination with the key removable only when the switch is in the off position.

(c) On existing installations with key/button operations, the key must be activated each time to energize the operation.

(2) Emergency stop switches must be provided on or adjacent to the operating station. Stop switches must:

(a) Be of a manually opened and manually closed type;

(b) Have red handles or buttons and be conspicuously marked "STOP;"

(c) Open even if springs fail when springs are used.

(3) Design and installation of control and operating circuits must meet the following:

(a) Control systems based upon the completion or maintenance of an electric circuit must not be used for interrupting power and applying machine brakes at terminals; stopping elevators when an emergency stop switch is open or when any electrical protective device operates; stopping a machine when the safety applies.

(b) If springs are used to activate switches, contact, or circuit breaking relays to stop the elevator at a terminal, the springs must be a restrained compression type.

(4) Hand rope operation must not be used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-07200, filed 12/22/00, effective 1/22/01.]

WAC 296-96-07210 What are the construction requirements for suspension methods? (1) When a chassis is suspended from a driving machine by a wire rope, a single method of suspension may be used. The suspension means may be any one of the following:

(a) Steel elevator wire rope;

(b) Steel aircraft cable; or

(c) Roller chain conforming to ANSI transmission roller chains and sprocket teeth.

(2) Steel tapes must not be used as a suspension method.

(3) The minimum diameter of hoist ropes or cables must be 1/4 inch for elevator wire rope and 3/16 inch for galvanized aircraft cable.

(4) Factor of safety:

(a) The minimum factor of safety for a suspension method is 8 based upon the rope tension while elevating a car carrying its rated load.

(2001 Ed.)

(b) In no case, must the rated breaking strength of the rope be less than 4,000 pounds.

(5) The contact arc of a wire rope on a traction sheave must be sufficient to produce adequate traction under all load conditions.

(6) All wire ropes anchored to a winding drum must have at least one full turn of rope on the drum when the car or counterweight reaches its over-travel limit.

(7) The winding-drum ends of car and counterweight wire ropes must be secured by:

(a) Clamps on the inside of the drum; or

(b) Return loop; or

(c) Properly made individual tapered babbitted sockets; or

(d) Properly attached fittings recommended by wire rope manufacturers.

(e) U-bolt type clamps must not be used.

(8) The ends of wire ropes must be fastened to cars or counterweights by:

(a) Return loop; or

(b) Properly made individual tapered babbitted sockets that conform to ASME A17.1 requirements. (The diameter of the hole in the small end of the socket must not exceed the nominal diameter of the rope by more than 3/32 inch.); or properly attached fittings recommended by wire rope manufacturers.

(c) U-bolt type clamps must not be used.

(9) Rope repair:

(a) Car and counterweight wire ropes cannot be lengthened or repaired by splicing.

(b) If a single wire rope in a set is worn or damaged and needs to be replaced, the entire set must be replaced.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-07210, filed 12/22/00, effective 1/22/01.]

WAC 296-96-07220 What are the requirements for traveling cables? (1) All traveling cables must conform to the National Electrical Code (NEC) in effect at the time of installation or major alteration.

(2) Where circuits through the traveling cable(s) exceed 30 volts, a means must be provided to stop the power automatically if the traveling cables part.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-07220, filed 12/22/00, effective 1/22/01.]

WAC 296-96-07230 What requirements apply to electrical wiring? (1) All wiring must conform to the National Electrical Code (NEC) in effect at the time of installation or major alteration.

(2) If a driving machine is mounted on the elevator chassis, the electrical connections between the elevator and the power source must be able to stop power if a traveling cable parts.

(3) All electrical connections between the elevator and the stationary connections must be insulated flexible conductors conforming to NEC Article 620, Elevators, Dumbwaiters, Escalators, Moving Walks, Wheelchair Lifts, and Stairway Chair Lifts.

[Title 296 WAC—p. 1985]

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-07230, filed 12/22/00, effective 1/22/01.]

WAC 296-96-07240 What are the requirements for track supporting structures? All supporting structures must meet the local building codes.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-07240, filed 12/22/00, effective 1/22/01.]

WAC 296-96-07250 What additional requirements apply to inclined private residence elevators? (1) All inclined private residence elevators must be equipped with:

- (a) A hand crank capable of moving the elevator in accordance with ASME A17.1; and
- (b) A machine brake with a lever to release the brake allowing use of the hand crank.
- (2) Machinery spaces must be protected from weather and accidental contact.
- (3) Guiding members and moving parts of the inclined private residence elevator must be free of brush and other types of material that might either impede the travel or cause deterioration of the equipment over time.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-07250, filed 12/22/00, effective 1/22/01.]

PART C2 - CONSTRUCTION, OPERATION, MAINTENANCE AND INSPECTION OF PRIVATE RESIDENCE CONVEYANCES FOR TRANSPORTING PROPERTY FOR RESIDENTIAL USE

WAC 296-96-08010 What is the scope of these regulations? The rules in this section are the minimum standard for all new, altered, and existing inclined private residence elevators for transporting property for single family use in a private residence. The purpose of this section is to ensure that inclined private residence elevators will be used only for transporting materials and goods, not people, and that no person in proximity of the elevator will be endangered by its operation or failure.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08010, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08020 What is the definition for inclined private residence elevator for transporting property? "Inclined private residence elevator for transporting property" means a device constructed and operated for transporting property from one elevation to another at an angle of inclination of 70 degrees or less from the horizontal. Essentially, it is a car or platform traveling on guides or guiding members in an inclined plane.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08020, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08030 Does the department approve elevators plans and specifications? Yes. (1) Before com-

mencing construction of any inclined private residence elevator for transporting property the owner must submit complete plans and specifications to the department for approval.

(2) Plans and specifications covering the installation of an inclined private residence elevator for transporting property must be endorsed by a professional engineer before the department will approve the plans.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08030, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08035 What are the minimum maintenance requirements for inclined private residence elevators for transporting property? Owners of inclined private residence elevators for transporting property are responsible for ensuring that:

- (1) Elevators and their parts are maintained in a safe condition; and
- (2) All devices and safeguards required by these regulations are maintained in good working order.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08035, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08050 What are the construction requirements for inclined private residence elevator for transporting property for cars, landing gates, and enclosures? (1) Any landing enclosure must have a railing at least 42 inches high to protect all landing platforms and those areas of a building used as landing platforms.

(2) Where gates are not provided at the entrance to the platform, a chain with a sign must be provided to block the landing entrance. The sign must state "Keep off landing until elevator has stopped at platform."

(3) If gates are provided, they must be:

- (a) Either be a horizontally sliding type or a swing type; and
- (b) Equipped with a latch that holds the gate closed and an electrical contact to prevent movement of the elevator when a gate is open.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08050, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08060 What types of bumpers and buffers must be installed on inclined private residence elevators for transporting property? Solid bumpers or spring type buffers may be used. (1) Solid bumpers must:

- (a) Be built of wood or other suitable resilient material;
- (b) Have the ability to resist deterioration from weather; and
- (c) Have sufficient strength to withstand, without failure, the impact of a descending elevator carrying its rated load or counterweight and traveling at 115 percent of its rated speed.

(2) Spring type buffers, if used, must:

- (a) Be built with a minimum stroke of 3/4 inch and with a maximum stroke of 1 1/2 inches; and
- (b) Not fully compress when struck by the elevator carrying its rated load or counterweight and traveling at 115 percent of its rated speed.

(3) Inclined private residence elevators are not required to have bumpers and buffers except when obstructions are encountered.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08060, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08070 What are the requirements for machinery beams and supports? (1) All machinery and sheaves must be sufficiently secured and supported to prevent any part from becoming loose or displaced. Beams directly supporting machinery must be made of steel, sound timber or reinforced concrete.

(2) Beams and support loads must be computed as follows:

(a) The total load on the beams must be equal to the weight of all apparatus resting on the beams plus twice the maximum load suspended from the beams.

(b) The load resting on the beams must include the complete weights of the driving machine, sheaves, controller, etc.

(c) The load suspended from the beams must include the sum of the tensions in all ropes suspended from the beams.

(3) The elevator driving machine or sheaves shall not be fastened to the underside of the supporting beams at the top of the hoistway. EXCEPTION: Cast iron in tension must not be used for supporting members for idler and deflecting sheaves where they are hung beneath beams.

(4) The factor of safety for beams and supports must be no less than:

(a) Five for steel; or

(b) Six for timber and reinforced concrete.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08070, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08080 What are the load and size requirements for car platforms? (1) The rated load of a platform must not exceed 5,000 pounds.

(2) The rated load of the platform must be no less than the load to be carried and must not exceed 50 pounds per square foot of inside net platform area.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08080, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08090 What is the maximum rated speed of an incline elevator? The maximum rated speed of an incline elevator, measured along the incline, is 75 feet per minute.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08090, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08100 What requirements apply to incline elevators? (1) Incline elevator frames and platforms must:

(a) Be built of metal, a combination of metal and wood or other materials of equal strength;

(b) Have a safety factor of at least 5; and

(2001 Ed.)

(c) Be suitably prepared and/or protected for exposure to weather.

(2) Incline elevator chassis must:

(a) Be built of metal, except for the guiding members;

(b) Have a safety factor of at least 5, based upon the elevator's rated load; and

(c) Have the chassis guiding members retained and/or enclosed in guides so that the chassis cannot be derailed.

(3) Cast iron may not be used in the construction of the elevator frame or chassis.

(4) A car may have only one compartment.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08100, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08110 What requirements apply to car enclosures? (1) Car enclosures are not required; however, if provided, the car enclosure must be:

(a) Securely fastened to the car platform so that it cannot become loose or displaced due to ordinary service, application of the elevator safety, or from the elevator coming into contact with the buffer.

(b) Built to withstand a 75 pound pressure, horizontally applied at any point on the wall, without causing a wall deflection that reduces running clearance below 3/4 inch or above 1 inch.

(2) If glass or plastic is used in the car enclosure, it must be weather resistant plastic or tempered safety glass.

(3) Where there is no car enclosure, a means must be provided to secure all materials to the platform.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08110, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08140 Are capacity and data plates required on inclined private residence elevator for transporting property? (1) The manufacturer must install a weather resistant capacity plate. It must be securely fastened to the elevator in a conspicuous place and state the elevator's rated load in pounds using letters at least 1/4 inch high.

(2) The manufacturer must install a metal data plate showing the elevator's weight, speed, suspension means data, manufacturer's name and date of installation. The data plate must be securely fastened in a conspicuous place in the machine area.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08140, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08150 What are the requirements for guide rails, track supports and fastenings? (1) Guides, guide rails, guide rail brackets, splice plates, and fastenings must be made of steel or other metals conforming to the requirements of this section.

(2) Guides, guide rails, guide rail brackets, and their fastenings and supports must, at the point of support, deflect 1/8 inch or less while resisting horizontal forces encountered during loading. When horizontal force is measured at a mid-point between brackets, guide rails must deflect 1/4 inch or less in any direction.

(3) The top and bottom of each guide or guide rail run must not allow the elevator and counterweight guiding members to travel beyond the guide rail ends.

(4) Guides for inclined private residence elevators must have no more stresses and deflection than allowed by the manufacturer's specifications.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08150, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08160 What requirements apply to counterweights? (1) Counterweights, where used, must be in a guide or track.

(2) Counterweights must not be of sufficient weight to cause undue slackening of any elevator hoisting rope or chain during acceleration or retardation of the elevator. Counterweight weight section must be mounted in structural or formed metal frames which are designed to retain weights securely in place.

EXCEPTION: Counterweights may be constructed of a single metal plate.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08160, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08170 What are the requirements of safeties and governors? (1) All inclined private residence elevators for transporting property must have a slack cable safety device capable of stopping and sustaining a car carrying its rated load.

(2) Other types of approved safety devices may be used. If so, such devices must meet the requirements of WAC 296-96-07170.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08170, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08175 How and when are elevator safeties tested? The elevator safety must be tested before the inclined private residence elevators for transporting property is put into service. It must be tested while the elevator is carrying its rated load.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08175, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08180 What are the requirements for driving machines and sheaves? (1) All new winding drums, traction sheaves, overhead sheaves and deflecting sheaves must:

(a) Be made of cast iron or steel;

(b) Have diameters at least 30 times the diameter of the wire hoisting ropes. EXCEPTION: If 8 x 19 steel ropes are used, drum and sheave diameters may be reduced to 21 times the diameter of the hoisting rope; and

(c) Have machined rope grooves.

(2) The factor of safety, based on the static load (the rated load plus the weight of the car, ropes, counterweights, etc.) to be used in the design of driving machines and sheaves, must be at least 5.

[Title 296 WAC—p. 1988]

(3) Set screw type fastenings must not be substituted for keys or pins if connections are subject to torque or tension.

(4) Gears:

(a) When connecting drums or sheaves to the main driving gear, friction gears, clutch mechanisms or couplings must not be used.

(b) Worm gears having cast iron teeth must not be used.

(5) Brakes:

(a) Electric brakes must be of the friction type set by springs and must release electrically.

(b) All brakes must be able to stop and hold a car carrying 125 percent of its rated load.

(c) At least one brake must be mounted on the load side of the driving machine's worm shaft. On indirectly driven lifts, brakes must engage when the driving machine fails.

(d) If a single ground or short-circuit, a counter-voltage or a motor field discharge occurs and the operating device is set in the stop position, the brake magnet must set the brake.

(6) Driving machines:

(a) A driving machine may be mounted on a elevator chassis or in a remote location. However, if mounted in a remote location, all sheaves and sprockets must be guarded and positioned so the hoisting ropes and chains remain properly aligned while the elevator is in use.

(b) Screw type machines must not be used.

(c) Hydraulic driving machines must conform to ASME A17.1.

(d) Roped-hydraulic machines may be used.

(e) Rack and pinion drive may be used.

EXCEPTION: Existing inclined private residence elevators for transporting property may use wrapped cable drums as long as they do not show signs of excessive wear.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08180, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08190 What requirements apply to terminal stopping switches? A hoistway must be equipped with normal upper and lower terminal stopping switches that are activated by the elevator chassis. These switches must stop the elevator at the normal top and bottom terminals of travel.

(1) Winding drum machines may use a slack cable switch as a bottom final terminal switch.

(2) Normal and final terminal stopping switches must not control the same switches on the controller unless at least two separate and independent switches are used. At least two of these separate switches must be closed in order to complete the motor and brake circuits for each direction of travel.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08190, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08200 What are the requirements for operation of an inclined private residence elevators for transporting property? (1) An inclined private residence elevator for transporting property must be operated by constant pressure or momentary pressure key switches located at each operating station/landing:

(a) The key or code must be entered each time to move the elevator.

(b) Key-operated switches must be of the spring return type and must be operated by a weatherproof cylinder type lock having not less than five pin or five disc combination with the key removable only when the switch is in the off position.

(c) On existing installations with key/button operations, the key must be activated each time to energize the operation.

(2) Emergency stop switches must be provided on or adjacent to the operating station. Stop switches must:

(a) Be of a manually opened and manually closed type;

(b) Have red handles or buttons and be conspicuously marked "STOP;"

(c) Open even if springs fail when springs are used.

(3) Design and installation of control and operating circuits must meet the following:

(a) Control systems based upon the completion or maintenance of an electric circuit must not be used for interrupting power and applying machine brakes at terminals, stopping elevators when an emergency stop switch is open or when any electrical protective device operates, or for stopping a machine when the safety applies.

(b) If springs are used to activate switches, contact, or circuit breaking relays to stop the elevator at a terminal, the springs must be a restrained compression type.

(4) Hand rope operation must not be used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08200, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08210 What are the requirements for suspension methods? (1) When a chassis is suspended from a driving machine by a wire rope, a single method of suspension may be used. The suspension means may be any one of the following:

(a) Steel elevator wire rope;

(b) Steel aircraft cable; or

(c) Roller chain conforming to ANSI transmission roller chains and sprocket teeth.

(2) Steel tapes must not be used as a suspension method.

(3) The minimum diameter of hoist ropes or cables must be 3/8 inch for elevator wire rope and 3/16 inch for galvanized aircraft cable.

(4) Factor of safety:

(a) The minimum factor of safety for a suspension method is 5 based upon the rope tension while elevating the elevator carrying its rated load.

(b) In no case, must the rated breaking strength of the rope be less than 4,000 pounds.

(5) The contact arc of a wire rope on a traction sheave must be sufficient to produce adequate traction under all load conditions.

(6) All wire ropes anchored to a winding drum must have at least one full turn of rope on the drum when the car or counterweight reaches its over-travel limit.

(7) The winding-drum ends of car and counterweight wire ropes must be secured by:

(a) Clamps on the inside of the drum;

(b) Return loop;

(2001 Ed.)

(c) Properly made individual tapered babbitted sockets; or

(d) Properly attached fittings recommended by wire rope manufacturers. U-bolt type clamps must not be used.

(8) The ends of wire ropes must be fastened to cars or counterweights by:

(a) Return loop;

(b) Properly made individual tapered babbitted sockets that conform to ASME A17.1 requirements (The diameter of the hole in the small end of the socket must not exceed the nominal diameter of the rope by more than 3/32 inch.); or

(c) Properly attached fittings recommended by wire rope manufacturers. U-bolt type clamps must not be used.

(9) Rope repair:

(a) Car and counterweight wire ropes cannot be lengthened or repaired by splicing.

(b) If a single wire rope in a set is worn or damaged and needs to be replaced, the entire set must be replaced.

(10) A metal or plastic data tag must be securely attached to one of the wire rope fastenings each time the ropes are replaced or reshackled. The data tag must include:

(a) The diameter of the ropes in inches; and

(b) The manufacturer's rated breaking strength.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08210, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08220 What are the requirements for traveling cables? (1) All traveling cables must conform to the National Electrical Code (NEC) in effect at the time of installation or major alteration.

(2) Where circuits through the traveling cable(s) exceed 30 volts, a means must be provided to stop the power automatically if the traveling cables part.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08220, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08230 What requirements apply to electrical wiring? (1) All wiring must conform to the National Electrical Code (NEC) in effect at the time of installation or major alteration.

(2) If a driving machine is mounted on the elevator chassis, the electrical connections between the elevator and the power source must be able to stop power if a traveling cable parts.

(3) All electrical connections between the elevator chassis and the stationary connections must be insulated flexible conductors conforming to NEC Article 620, Elevators, Dumbwaiters, Escalators, Moving Walks, Wheelchair Lifts, and Stairway Chair Lifts.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08230, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08240 What are the requirements for track supporting structures? All supporting structures must meet the local building codes.

[Title 296 WAC—p. 1989]

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08240, filed 12/22/00, effective 1/22/01.]

WAC 296-96-08250 What additional requirements apply to inclined private residence elevators for transporting property? (1) All inclined private residence elevators for transporting property must be equipped with:

(a) A hand crank capable of moving the elevator in accordance with ASME A17.1; and

(b) A machine brake with a lever to release the brake allowing use of the hand crank.

(2) Machinery spaces must be protected from weather and accidental contact.

(3) Metal signs stating "NO RIDERS" in two-inch letters must be conspicuously posted and permanently attached to the elevator and at each landing.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-08250, filed 12/22/00, effective 1/22/01.]

PART C3 - TEMPORARY HOISTS

Personnel Hoists

WAC 296-96-09001 What regulations apply to personnel hoists? All personnel hoists installed must comply with the American National Standard Institute ANSI A10.4-1990 edition or the latest published edition adopted by ANSI, Safety Requirements for Personnel Hoists and Employee Elevators for Construction and Demolition Operations.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-09001, filed 12/22/00, effective 1/22/01.]

WAC 296-96-09002 Can a drop plate be used for temporary hoists? Drop plates for temporary hoists may be allowed provided that they are permanently attached to the elevator.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-09002, filed 12/22/00, effective 1/22/01.]

Material Hoists

WAC 296-96-10001 What regulations apply to material hoists? All material hoists must comply with the American National Standard Institute ANSI A10.5-1992 edition or the latest published edition adopted by ANSI, Safety Requirements for Material Hoists.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-10001, filed 12/22/00, effective 1/22/01.]

[Title 296 WAC—p. 1990]

PART C4 - ADDITIONAL TYPES OF CONVEYANCES

Belt Manlifts

WAC 296-96-11000 What regulations apply to belt manlifts after 1974? All belt manlifts must comply with the USAS A90-1969.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11000, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11001 What regulations apply to belt manlifts prior to 1974?

BELT MANLIFT CODE			
TITLE	DATE INSTALLED		COMMENTS
	FROM	TO	
Existing Belt Manlifts	1962	1974	Used as existing standard for belt manlifts installed in years effective.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11001, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11010 What are the definitions for belt manlifts? "Closed type handhold" a cup-shaped handhold with the handgrip surface uncovered in the direction of travel and covered on the opposite run.

"Factor of safety" is the ratio of the ultimate strength of the material used to manufacture a part to the allowable stress on that part when it is subjected to full load operating conditions.

"Handhold" or "Handgrip" is the device attached to the manlift belt to assist a passenger in maintaining balance when using the manlift. For the purposes of this chapter, the word "handhold" is used for both "handhold" and "handgrip."

"Limit switch" is a safety device that stops power to the manlift motor and applies the brakes if a loaded step passes the top terminal landing.

"Manlift" is a device using a power-driven, endless belt with attached handholds and steps or platforms to transport people from floor to floor.

"Open type handhold" is a handhold with a fully uncovered handgrip surface.

"Rated speed" is the operating speed for which a manlift is designed and installed.

"Step" or "Platform" is the passenger carrying part of a manlift. For the purposes of this chapter, the word "step" is used for both "step" and "platform".

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11010, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11016 What structural requirements apply to belt manlift landings? (1) Vertical clearance between the floor or mounting platform and the lower edge of the conical guard above it must be at least 7 feet, 6 inches. When this clearance is not possible, access to the manlift must be prohibited and the space where the runway passes through the platform floor must be enclosed.

(2) Floor space adjacent to floor openings must be kept clear and free of obstructions at all times.

(3) Adequate lighting (not less than 3 foot-candle power) must be provided at each floor landing whenever the lift is in use.

(4) The landing surfaces at all entrances and exits must provide safe footing and must have a coefficient of friction of at least 0.5 to help insure safe footing.

(5) Emergency landings must be provided so that the maximum distance a person must travel on the emergency ladder between an emergency landing and a floor landing is 25 feet. Emergency landings must:

- (a) Be accessible from both runs of the lift;
- (b) Give access to the emergency ladder; and
- (c) Be completely enclosed with a standard railing and toeboard.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11016, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11019 What structural requirements apply to belt manlift landings? (1) On the ascending side of the lift, all landings must have a beveled guard or cone that meets the following requirements:

(a) Where possible, a cone must make an angle with the horizontal of at least 45 degrees. A cone angle of 60 degrees or more must be used where ceiling heights permit.

(b) Where possible, a guard must extend at least 42 inches outward from any belt handhold. A guard must not extend beyond the upper surface of the floor above.

(c) A cone must be built of sheet steel (at least No. 18 U.S. gauge) or any material of equivalent strength or stiffness. The lower edge of a cone must be rolled to a minimum diameter of 1/2 inch. The interior of a cone must be smooth with no protruding rivets, bolts or screws.

(2) All obstructions must be guarded just like floor openings with the same minimum distances observed.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11019, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11022 What requirements apply to guarding lift entrances and exits? (1) All manlift floor or landing entrances and exits must be guarded by either a maze (staggered railing) or a handrail equipped with self-closing gates.

(2) When a maze is used:

(a) Maze or staggered openings must not allow direct passage between a platform enclosure and the outer floor space;

(b) Rails must be located between 2 and 4 feet from the edge of the opening as measured at right angles to the face of the belt; and

(c) At openings, the intersection of the top rail and the end post must form a bend or standard long sweep "ell."

(3) When a handrail is used:

(a) Rails must be standard guardrails with toeboards and meet the guard rail requirements located in chapter 296-24 WAC, General safety and health standards; and

(2001 Ed.)

(b) Gates must have rounded corners, open outward, and be self-closing.

(4) Unless prevented by building design, all entrances and exits at all landings must be in the same relative location.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11022, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11025 What structural requirements apply to floor opening guards? Except on the entrance or exit side, floor openings at each landing must be guarded.

(1) The guards must be constructed by one of the following methods:

(a) A standard railing and toeboard;

(b) Panels of wire mesh (not less than No. 10 U.S. gauge);

(c) Panels of expanded metal (not less than No. 13 U.S. gauge);

(d) Panels of sheet metal (not less than No. 13 U.S. gauge); or

(e) Metal on a frame of either angle iron (at least 1 1/4 by 1 1/8 inch) or 1 1/4 inch iron pipe.

(2) When a belt manlift is installed in a stairwell, a standard guardrail must be placed between the floor openings and the stairway.

(3) Rails or guards must be:

(a) At least 42 inches high on the up-running side and 66 inches high on the down-running side; and

(b) Be located not more than one foot from the edge of the floor opening.

(4) If a guardrail is used, the section of the guard above the rail may be constructed:

(a) According to WAC 296-96-10025(1); or

(b) Using either vertical or horizontal bars capable of rejecting a 6-inch diameter ball.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11025, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11028 What structural requirements apply to floor landing guards? Expanded metal, sheet metal or wooden guards must be installed on each floor landing to prevent people from placing their hands in areas where step-rollers operate. These guards must be installed on each exposed side of the lift and extend from the floor to a height of 7 feet.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11028, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11031 What requirements apply to bottom landings? (1) Bottom landing clear areas:

(a) Where possible, the clear area of a bottom landing must be at least the size of the area enclosed by guardrails on the floors above;

(b) A clear area must be free of stairs and ladders; and

(c) If a wall on the bottom landing is located in front of the down-running side of the belt, it must be installed at least 48 inches away from the belt face.

[Title 296 WAC—p. 1991]

(2) The lowest landing served by the lift must support the lower (boot) pulley installation.

(3) A mounting platform must be installed on the lowest landing unless the landing floor is at or above the point at which the upper surface of the belt steps assume or leave a horizontal position.

(4) If a mounting platform is installed, it must be located in front of or to one side of the up/down run.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11031, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11034 What requirements apply to top clearance? (1) When the center of the head pulley is more than 6 feet above the top landing, an emergency landing and ladder must be installed.

(2) The location of the emergency landing must be 24 inches below the center of the head pulley.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11034, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11037 What requirements apply to emergency exit ladders? Emergency exit ladders must be:

(1) A fixed metal type;

(2) Accessible from either the "up" or "down" path of the lift;

(3) Installed when the vertical distance between landings exceeds 20 feet; and

(4) Constructed to comply with current general safety standards except enclosed cages need not be built.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11037, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11040 What lighting requirements apply to belt manlifts? (1) When a lift is in operation, both runs must be illuminated at all points with an intensity of at least one foot-candle.

(2) Lighting control in runways must be:

(a) Circuits tied permanently into the building circuits (no switches);

(b) Near the starting switch that controls the lift motor; or

(c) Separate switches located on every landing and with each switch having the capability of turning on all lights throughout the entire runway.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11040, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11045 What drive machine requirements apply to belt manlifts? (1) Belt manlifts must be driven either by directly connected machines or by multiple "V" belts.

(2) Cast iron gears must not be used.

(3) Brakes:

(a) On direct connected machines, the brake must be mechanically applied to the motor shaft and released electronically.

(b) On "V" belt driven machines, the brake must be mechanically applied to the input shaft and released electronically.

(c) All brakes must be capable of stopping and holding the lift while carrying its rated capacity.

(4) Belts fastening:

(a) Belts must be fastened either by a lapped splice or a butt splice with a strap on the belt side opposite the pulley.

(b) For lapped splices on manlifts with travel distances not exceeding 100 feet, the overlap of the belt at the splice must be at least 3 feet; or

(c) For lapped splices exceeding 100 feet, the overlap at the splice must be at least 4 feet.

(d) For butt splices on manlifts with travel distances not exceeding 100 feet, the strap must extend at least 3 feet on one side of the butt; or

(e) For butt splices not exceeding 100 feet, the strap must extend at least 4 feet on one side of the butt.

(f) For 12-inch belts, the joint must be fastened with a minimum of 20 special elevator bolts with minimum diameters of 1/4 inch. To effectively cover the belt joint area, these bolts must be arranged symmetrically in 5 rows.

(g) For a 14-inch belt, the minimum number of bolts is 23.

(h) For a 16-inch belt, the minimum number of bolts is 27.

(5) All installations must use machines designed and constructed to hold the driving pulley when there is shaft failure or overspeed.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11045, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11048 What is an acceptable operating speed for a belt manlift? The maximum belt speed of a belt manlift is 80 feet per minute. No belt manlift may be installed that exceeds this maximum speed limit, and all belt manlifts in a given location should run at approximately the same speed.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11048, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11051 What are the construction requirements for steps? (1) Measured from the belt to the edge of the step, the minimum depth of a step is 12 inches and the maximum depth is 14 inches.

(2) Step width cannot be less than the width of the belt to which it is attached.

(3) Measured from the upper surface of one step to the upper surface of the next step above, the distance between steps must be at least 16 feet and the steps must be equally spaced along the belt.

(4) A step must be attached to the belt so its surface approximates a right angle with the face of the belt enabling the step to travel in basically a horizontal position with the "up" and "down" path of the belt.

(5) The working (upper) surface of a step must be made of either a material having non-slip characteristics (possess-

ing a coefficient of friction of not less than 0.5) or be completely covered with a securely attached non-slip tread.

(6) Step supports (frames) and guides must be sufficiently strong to prevent:

- (a) The disengagement of any step roller;
 - (b) Any appreciable misalignment; or
 - (c) Any visible deformation of the step or its support.
- (7) Steps must have corresponding handholds.

(8) If a step is removed for any reason, the handholds immediately above and below it must be removed before the lift resumes operation.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11051, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11054 What requirements apply to the location and construction of handholds? (1) Handholds attached to the belt must be provided and installed so that they are not less than 4 feet nor more than 4 feet 8 inches above the step tread. These handholds must be available on both the "up" and "down" run of the belt.

(2) All handhold grab surfaces must be at least 4 1/2 inches in width. Fastenings must not come within one inch of the belt edge.

(3) All handholds must be capable of withstanding, without damage, a 300 pound load applied parallel to the belt run.

(4) All handholds must have corresponding steps. When a handhold is removed for any reason, the corresponding step and handhold for the opposite direction of travel must also be removed before the lift resumes operation.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11054, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11057 What requirements apply to "up-limit stops"? (1) Two separate automatic stop devices must be provided to cut off the power and apply the brake when a loaded step passes the upper terminal landing. One of these devices must consist of a switch mechanically operated by the belt or stop roller. The second consist of any of the following:

- (a) A roller switch located above but not in line with the first switch;
- (b) A photocell and light source (an "electric eye"); or
- (c) A switch activated by a lever, rod or plate. (If a plate is used, it should be positioned above the head pulley so it barely clears a passing step.)

(2) The stop device must stop the lift before a loaded step reaches a point 24 inches above the top terminal landing.

(3) Once the lift has stopped, the automatic stop device must be manually reset. Therefore, this device must be located on the top landing where the reset person has a clear view of both the "up" and "down" runs of the lift; and it must be impossible to reset from a step.

(4) Electric stop devices must meet the following requirements:

- (a) All electric switches that directly open the main motor circuit must be multiple type switches;
- (b) Photoelectric devices must be designed and installed so that failure of the light source, the light sensitive element

(2001 Ed.)

or any vacuum tube used in the circuit will result in shutting off power to the driving motor;

(c) In areas where flammable vapors or dust may be present, all electrical installations must be in accordance with the NEC requirements for those installations; and

(d) All controller contacts carrying main motor current must be copper to carbon types unless the circuit is simultaneously broken at two or more points or the contacts are immersed in oil.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11057, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11060 What requirements apply to emergency stops? All belt manlifts must have emergency stop devices that:

(1) Are located within easy reach of the "up" and "down" run of the belt;

(2) Stop power to the lift and apply the lift brake when pulled in the direction of travel;

(3) Have a treadle switch (manual re-set type) that is located below the lowest landing on the belt's "down" side and, if a person fails to get off at the lowest landing, stops the lift and ejects the person from the step as it approaches the boot pulley;

(4) Are made of cotton rope with a wire center, manila or sisal rope, or metal pipe or tubing. Wire rope cannot be used, unless covered with marlin. Rope stops must be at least 3/8 inch in diameter; and

(5) An emergency stop may be used for normal stopping and starting if the lift does not run continuously.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11060, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11066 What are the warning sign requirements? (1) Instructional signs explaining how to use the belt lift must be:

(a) Conspicuously posted on each landing or stenciled on the belt;

(b) Printed in an easily read style with letters at least one inch in height;

(c) Printed in a color that clearly contrasts with the background surface (for example, white or yellow on black or black on white or gray); and

(d) Examples of instructional signs are:

"Face the belt"

"Use the handhold"

"To stop - pull rope"

(2) Warning signs and/or lights must include an illuminated sign or red warning light announcing the top floor and must be within easy view of an ascending passenger.

(a) If a sign, it must be located no more than 2 feet above the top terminal landing and printed in block letters (at least 2-inches in height) displaying the words, "Top floor - get off."

(b) If a red light, it must have at least a 40-watt rating and be located immediately below the upper terminal landing where it will shine in the belt passenger's face.

[Title 296 WAC—p. 1993]

(3) There must be conspicuous signs on each landing that read, "Employees only - Visitors keep off," printed in block letters (at least 2-inches in height) in a color that sharply contrasts with the background.

(4) A sign or red light must be conspicuously posted above the bottom landing announcing its approach. These must be:

(a) If a sign, printed in block letters (at least two-inches in height) that sharply contrast with the background and reads, "Bottom floor - get off".

(b) If a light, rated at least forty watts.

(5) An electronic warning buzzer must be installed 5 feet above the bottom landing on the down side of the belt to warn belt riders of the approaching landing. This warning buzzer must be automatically activated by load weight on a step.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11066, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11070 Can you carry tools and materials on a belt manlift? (1) No freight or packaged goods may be carried on any manlift;

(2) No pipe, lumber, or other construction materials may be handled on any manlift; and

(3) No tools except those which will fit entirely within a pocket of ordinary working clothes may be carried on any manlift, except as follows:

(a) Tools may be carried in a canvas bag not larger than 11 inches by 13 inches;

(b) The bag must have a leather bottom; and

(c) The bag must have loops or handles to be carried in the passenger's hand while riding the manlift. Shoulder straps are prohibited.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11070, filed 12/22/00, effective 1/22/01.]

WAC 296-96-11078 What is required for belt manlift inspections? (1) All manlifts must be inspected by a qualified person, designated by the lift's owner, at least once every 30 days.

(2) The inspection must cover (but is not limited to) the following items:

- Belt and belt tension
- Bottom (boot) and pulley
- Brake
- Clearance
- Drive pulley
- Driving mechanism
- Electrical switches
- Guardrails
- Handholds and fastenings
- Lubrication
- Motor
- Pulley supports
- Rails, rail supports and fastenings
- Rollers and slides
- Signal equipment
- Steps and fastenings
- Warning signs and lights

(3) A written record must be kept of results of each inspection, and it must be made available to all inspectors.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-11078, filed 12/22/00, effective 1/22/01.]

Hand-powered Manlifts

WAC 296-96-14010 What is the scope and application of the department's hand-powered manlift rules? WAC 296-96-14010 through 296-96-14080 apply to the installation, design, and use of all one-person capacity, hand powered, counterweighted elevators that must be inspected according to chapter 70.87 RCW.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14010, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14020 What construction requirements apply to hoistway landings and entrances? (1) Every hoistway landing must be protected on all sides other than the landing opening side with a standard guard rail and intermediate guard rail. All landing except the bottom landing must have a toe board installed on all sides except the landing opening side.

(2) All hoistway entrances must be not less than 6 feet 6 inches in height and in no case may the width exceed the corresponding car dimensions.

(3) All hoistway entrances must be provided with an approved maze or with a hoistway gate which must:

(a) Be at least 36 inches in height;

(b) Extend downward to within one inch of the landing sill;

(c) Be of the self-closing type, designed to swing horizontally out from the hoistway and closing against a full jam stop;

(d) Be located within 4 inches of the edge of the landing sill;

(e) Have a "DANGER" sign conspicuously posted on the landing side of the hoistway gate; and

(f) Withstand a 250 pound horizontal thrust.

(4) On new installations, all projections extending inwardly from a hoistway enclosure at the entrance side of the car platform must be beveled and guarded on their underside by a smooth solid material set at an angle of not less than 60 degrees nor more than 75 degrees from the horizontal when cars are not equipped with gates.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14020, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14025 What are acceptable hoistway clearances? (1) The minimum clearance between a car side and the hoistway enclosure is one inch.

(2) The clearance between a car platform and a landing sill must be at least 1/2 inch but not more than 1 1/2 inches.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14025, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14030 Can there be a habitable space beneath an elevator hoistway or counterweight shaft?

There must not be habitable space below an elevator hoistway or counterweight shaft unless the floor above the space can withstand the impact of a freely falling hoistway car or counterweight dropping on it.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14030, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14035 What construction requirements apply to hoistway guide rails? (1) There must be a minimum of two opposing guide rails extending to a point six inches beyond the full height of travel of the car when the counterweight buffer is fully compressed.

(2) All rails must be attached by bolts, lag screws or other approved methods to a vertical supporting member which must not exceed 1/2 inch deflection with the application of a 250 pound horizontal thrust at any point.

(3) Wood guide rails must be at least 1 1/2 inch by 1 1/2 inch vertical grain fir or equivalent and must not vary more than 3/16 inch in thickness on the sides which the brakes contact. All joints must be kept smooth and even.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14035, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14040 What installation requirements apply to buffer springs? (1) All new installations must have spring buffers installed below the car and counterweights.

(2) All installations must have spring buffers attached below the counterweights.

(3) Hoisting ropes must not allow a car platform to be more than 8 inches above the top landing when the counterweight buffer spring is fully compressed.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14040, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14045 What construction specifications apply to hoistway cars? (1) The car must be built to the following specifications:

(a) The car platform must be no greater than 30 inches on either side (6.25 square feet area).

(b) The car frame and platform must be of steel or sound seasoned wood construction and be designed with a safety factor of not less than 4 for metal and 6 for wood, based on a maximum capacity of 250 pounds.

(c) All frame members must be securely bolted, riveted or welded and braced. If bolted, lock washers or lock nuts must be used.

(d) Where wooden frame members are bolted, large washers or metal plates must be used to minimize the possibility of splitting or cracking the wood.

(2) The sides of the car must be enclosed by a minimum of 2 safety guard rails with the top rail not less than 36 inches nor more than 42 inches from the car floor. Rails must sustain a horizontal thrust of 250 pounds. If solid material is used, it must be smooth surfaced and not less than 1/2 inch thickness, if wood; not less than 16 gauge thickness, if steel; and must

(2001 Ed.)

be constructed from the car floor to a height of not less than 3 feet.

(a) Where the hoistway is not enclosed on the entrance side of the car, a self-locking or drop bar gate must be provided. The car gate may be of the folding type, horizontally swung, provided it swings into the car enclosure. Drop bar gates must be of two bar construction, parallelogram type, and conform to requirements specified for car guard rails.

(b) The car gate must drop into locking slots or be provided with a positive locking type latch capable of withstanding 250 pounds horizontal thrust.

(3) Every car must have a substantial protective top. The front half may be hinged. The protective top may be made from No. 9 U.S. wire gauge screen, No. 11 gauge expanded metal, No. 14 gauge sheet steel, 3/4 inch or heavier plywood. If made of wire screen or metal, the openings must reject a 1/2 inch diameter ball.

(4) Every car must have a proper rack to hold the balance weights.

(5) A sign bearing the following information must be conspicuously posted within the car:

(a) Total load limit in pounds;

(b) "Maximum capacity one person"; and

(c) "For authorized personnel use only."

(6) Every car must be equipped with a spring loaded foot brake which:

(a) Operates independently of the car safeties;

(b) Operates in both directions and will stop and hold the car and its load; and

(c) Locks the car in its position automatically whenever the operator releases the pressure on the foot pedal.

(7) Every car must be equipped with a car safety device which:

(a) Applies to the sides of the main guide rails; and

(b) Stops and holds the car and its load immediately when the hoisting rope breaks.

(8) Every car must have a minimum clearance of 6 feet 6 inches from the top of the car platform to the bottom edge of the crosshead or any other obstruction.

(9) A tool box with minimum dimensions of 4 inches long by 3 inches deep must be provided and firmly attached to the car structure.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14045, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14050 What are the requirements for assembly, installation, and operation of sectional counterweights? (1) The assembly of sectional counterweights must conform to the following requirements:

(a) Rectangular counterweights must be held together by at least two tie rods 1/2 inch in diameter fastened with lock washers and double nuts or other approved means.

(b) One 3/4 inch rod may be used to hold the sections of a round counterweight together. Any additional sections or weights must be secured by an approved means.

(2) The eye bolt for the rope hitch must be attached to the counterweight in a manner that will prevent the eye bolt from coming loose. The eye of eye bolts must be welded to prevent it from opening.

[Title 296 WAC—p. 1995]

(3) Every counterweight runway must be enclosed with substantial unperforated material for its full distance of travel. Inspection openings must be provided at either the top or bottom of the counterweight runway. These openings must be substantially covered at all times except when actually being used for inspection of counterweight fastenings.

(4) Workers must load the counterweight for the proper balance of the heaviest person using the elevator and others must use compensating weights, which must be available, to maintain a balance.

(5) On elevators with travel of 75 feet or more, a compensating chain or cable must be installed to maintain the proper balance of the counterweight to the car and load in all positions.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14050, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14055 What is the minimum acceptable sheave diameter? The minimum sheave diameter must be 40 times the diameter of the rope used. For example, a 3/8 inch rope requires a 15 inch sheave.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14055, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14060 What requirements apply to hoisting ropes? (1) Hoisting ropes must be of good grade traction elevator wire rope and must:

- (a) Be not less than 3/8 inch in diameter;
- (b) Provide a safety factor of 5 based on the maximum weight supported;
- (c) Be of sufficient length to prevent the counterweight from striking the overhead structure when car is at bottom, and prevent the car from striking the overhead before the counterweight is at its lower limit of travel;
- (d) Be fastened at each end by at least 3 or more clamps, with the "U" of the clamp bearing on the dead end of the rope; and
- (e) Where passed around a metal or other object less than three times the diameter of the cable, have a thimble of the correct size inserted in the eye.

(2) Approved sockets or fittings with the wire properly turned back and babbitted may be used in place of clamps noted in subsection (1)(d) of this section.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14060, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14065 What requirements apply to operating ropes? The operating rope must be of soft hemp or cotton at least 3/4 inch in diameter. It must be securely fastened at each end and must be in proper vertical alignment to prevent bending or cutting where it passes through the openings in the platform or the protective top of the car.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14065, filed 12/22/00, effective 1/22/01.]

[Title 296 WAC—p. 1996]

WAC 296-96-14070 Where must hoistway lights be located? Adequate lighting must be installed and operating at each landing and in the shaftway.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14070, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14075 What is the factor of safety for overhead supports? The overhead supporting members must be designed, based upon impact loads, with a safety factor of:

- (1) Nine if wood; and
- (2) Five if steel.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14075, filed 12/22/00, effective 1/22/01.]

WAC 296-96-14080 What additional requirements apply to the installation and operation of hand powered manlifts? (1) Only employees and other authorized personnel may ride in a lift car.

(2) Escape ladders must be installed extending the full length of the hoistway and must be located in a position so that in an emergency a person can safely transfer from the car platform to the ladder. An "IMPAIRED CLEARANCE" sign must be posted at the bottom of a ladder when the face of the ladder is less than 30 inches from any structure.

(3) An automatic safety device which will prevent the car from leaving the landing until manually released by the operator must be installed at the bottom landing.

(4) A fire extinguisher in proper working condition must be available in the car.

(5) A five-year full load test must be performed and documentation submitted to the department. Manlifts with wooden rails must perform a no-load drop test.

(6) An annual no load test must be performed and a tag with the date and company conducting the test must be attached to the conveyance.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-14080, filed 12/22/00, effective 1/22/01.]

Casket Lifts

WAC 296-96-16010 What is the scope of the department's casket lift regulations? (1) The rules in this section, WAC 296-96-16010 through 296-96-16240, apply to hoisting and lowering mechanisms equipped with cars that:

- (a) Move within guides in a substantially vertical direction;
- (b) Have a maximum net inside area of 28 square feet;
- (c) Have a maximum total internal height of 4 feet and a maximum total internal width of 3 1/2 feet; and
- (d) Utilize a series of rollers as a platform to exclusively carry caskets.

(2) A hoistway, hoistway enclosure, and related construction that are in substantial compliance with Part 1, Section 100 of the American Standard Safety Code for Elevators, Dumbwaiters, Escalators and Moving Walks A17.1 and meet the requirements of these casket lift rules.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16010, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16020 What requirements apply to the location and operation of machine rooms and machinery space? (1) Machines and control equipment can be located:

(a) Inside a hoistway enclosure, at the top or bottom, without enclosures or platforms; or

(b) Outside a hoistway if enclosed with a noncombustible material to a height of at least 6 feet.

(2) Machines and control equipment located outside the hoistway must be enclosed in enclosures of incombustible material not less than 6 feet high and have a self-closing and locking door. Control equipment located outside the hoistway may be enclosed in metal cabinet equipped with a self-closing and locking door to prevent access by unauthorized persons.

(3) Permanent electric lighting must be provided in all machine rooms and machinery spaces.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16020, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16030 What equipment can be located in a machine room? Only machinery and equipment required for the operation of the elevator is permitted in the elevator machine room.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16030, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16040 What requirements apply to the location of electrical wiring, pipes and ducts in hoistways and machine rooms? (1) Only electrical wiring raceways and cables directly related to an elevator's operation may be installed inside the hoistway.

(2) Pipes or ducts that convey gases, vapors, or liquids and are not used in connection with the elevator must not be installed in any hoistway, machine room, or machinery space.

(3) Machinery and sheave beams, supports, and foundations must comply with the American Standard Safety Code for Elevators, Dumbwaiters, Escalators and Moving Walks A17.1, Section 105.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16040, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16050 Is a pit required in a casket lift hoistway? A pit is not required in a casket lift hoistway.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16050, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16060 What requirements apply to the size and location of hoistway door openings? (1) The width and height of door openings must not exceed the width and height of the elevator car by more than one inch in each dimension; except one door opening may be of sufficient size

(2001 Ed.)

to permit installing and removing the car, but must not be more than 4 feet 9 inches in height.

(2) The bottom of the door opening must be not less than 24 inches above the floor.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16060, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16070 How must hoistway doors be hung? Hoistway doors must be hung and guided in such a manner that the doors will not be displaced from the guides or tracks when in normal service nor when the doors are subjected to a constant horizontal force of 250 pounds applied at right angles to and approximately the center of the door or to the center of each door section where multi-section doors are used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16070, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16080 Where must hoistway doors be located? Hoistway doors must be located so that the distance from the hoistway face of the doors to the landing sill must not be more than 2 1/2 inches.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16080, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16090 What requirements apply to hoistway doors locks? All hoistway doors must be equipped with a combination mechanical lock and electric contact.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16090, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16100 How should space beneath a hoistway be protected? Where the space below the hoistway is used for a passageway or is occupied by a people, or if unoccupied is not secured against unauthorized access, the cars and counterweights must be equipped with safeties which may be operated as a result of the breaking of the suspension means. Safeties may be of the inertia type without governors.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16100, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16110 What requirements apply to car doors and gates? There must not be more than two entrances to the car.

(1) Each entrance must be provided with a car door or gate which when in a fully-closed position must protect the full width and height of the car entrance opening.

(2) Collapsible type gates, when in a fully closed position, must reject a 4 1/2 inch diameter ball.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16110, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16120 What requirements apply to car enclosures? (1) Elevator cars must be permanently enclosed on all sides and the top.

(2) The enclosure must be securely fastened to the car platform and so supported that it cannot loosen or become displaced in ordinary service.

(3) The enclosure walls must be of sufficient strength and designed and supported so that when subjected to a pressure of 75 pounds applied horizontally at any point on the walls of the enclosure, the deflection will not reduce the running clearance to exceed one inch.

(4) The top of the car enclosure must be designed and installed so as to be capable of sustaining a load of 300 pounds on any square area 2 feet on a side and 100 pounds applied at any point. Simultaneous application of these loads is not required.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16120, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16130 What requirements apply to the construction of car frames and platforms? (1) Every elevator suspended by wire ropes must have a car frame consisting of a crosshead, uprights (stiles), and a plank located approximately at the middle of the car platform and in no case farther from the middle than one-eighth of the distance from the front of the platform.

(2) Car frames must be guided on each guide rail by upper and lower guiding members attached to the frame.

(3) Car frames and outside members of the platform must be made of steel.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16130, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16140 How must car frames and platforms be connected? Connections between members of the car frames and platform must be riveted, bolted, or welded and must meet the following specifications:

(1) Bolts where used through sloping flanges of structural members must have boltheads of the tipped head type or must be fitted with beveled washers.

(2) Nuts used on sloping flanges of structural members must seat on beveled washers.

(3) Welding of parts upon which safe operation depends must be done in accordance with the appropriate standards established by the American Welding Society.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16140, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16150 What is the load capacity of a casket lift car? (1) Driving machines, car and counterweight suspension mechanisms, and overhead beams and supports must be able to sustain a car with a structural load capacity based upon its inside net platform area as shown in American Standard Safety Code for Elevators, Dumbwaiters, Escalators and Moving Walks A17.1, Table 207.1.

(2) A metal plate which gives the rated load in letters and figures not less than 1/4 inch high stamped, etched or raised

on the surface of the plate must be fastened in a conspicuous place in the car.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16150, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16160 What types of casket lift driving machines are allowed? Only drum, traction or plunger type driving machines may be used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16160, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16170 What material and grooving is required for sheaves and drums? Material and grooving for sheaves and drums must be of metal finished grooves and have a pitch diameter not less than 40 times the diameter of the rope.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16170, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16180 What types of brakes must be used on the driving machine? Elevator driving machines must be equipped with a friction brake applied by a spring or springs and released electrically. The brake must be designed to have a capacity sufficient to hold the car at rest with its rated load.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16180, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16190 Where must terminal stopping devices be located? (1) Upper and lower normal stopping devices must be provided at the top and bottom of the hoistway.

(2) Final terminal stopping devices must be provided and arranged to stop electric power to the elevator driving machine motor and brake after the car has passed a terminal landing but so that under normal operating conditions it will not function when the car is stopped by the normal terminal stopping device.

(3) Elevators having traction machines must have final terminal stopping switches located in the hoistway and operated by cams attached to the car.

(4) Elevators having winding-drum machines must have terminal stopping switches located on and operated by the driving machine, which must not be driven by chain, rope or belt. Also, stopping switches must be installed in the hoistway and operated by cams attached to the car or counterweights.

(5) All elevators having winding-drum machines must have a slack rope device with an electric switch of the enclosed manually reset type which will cause the electric power to be removed from the driving machine motor and brake if the hoisting ropes become slack.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16190, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16200 What are the specifications for casket lift ropes and rope connections? (1) Elevator cars and counterweights must be suspended by steel wire ropes. Only iron (low carbon steel) or steel wire ropes with fibre cores, having the commercial classification of "elevator wire rope" may be used for the suspension of elevator cars and for the suspension of counterweights.

(2) The minimum number of hoisting ropes is:

- (a) Three 1/2 inch ropes for traction elevators; and
- (b) Two 1/2 inch ropes for drum type elevators.

(3) Fastenings must be by individual tapered babbitted rope sockets or by other department-approved types.

(4) The rope sockets must be of a type which will develop at least 80 percent of the braking strength of the strongest rope to be used in such fastenings, and U-bolt type rope clips (clamps) must not be used for load line fastenings.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16200, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16210 What specific requirements apply to hydraulic elevators? (1) All hydraulic elevators must be a plunger type with the plunger securely attached to the car platform.

(2) Plungers composed of more than one section must have the joints designed and constructed to carry in tension the weight of all plunger sections below the joints.

(3) Plungers must be provided with solid metal stops to prevent the plunger from traveling beyond the limits of the cylinder. Stops must be designed and constructed so as to stop the plunger from maximum speed in the "up" direction under full pressure without damage to the hydraulic system.

(4) Any leaking hydraulic oil must be collected.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16210, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16220 What requirements apply to valves, supply piping, and fittings? (1) Valves, piping and fittings must not be subjected to working pressures that exceed manufacturer recommendations.

(2) Pipes, especially those that may vibrate, must be sufficiently supported at each joint and fitting so undue stress is eliminated.

(3) A shut-off valve must be installed in the pit.

(4) Each pump must be equipped with a relief valve and all relief valves must be:

- (a) Located between the pump and check valve in a bypass connection;
- (b) A type that cannot be shut off from the hydraulic system; and
- (c) Pre-set to open at a pressure not greater than 125 percent of the working pressure at the pump.

EXCEPTION: Relief valves are not required for centrifugal pumps driven by an induction motor when the shut-off or maximum pressure that the pump develops is no more than 135 percent of the working pressure at the pump.

(5) A check valve must be installed that will hold a car and its rated load at any point whenever a pump stops or pump operating pressure drops below the required minimum.

(2001 Ed.)

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16220, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16230 What type of stopping devices must be installed? Normal stopping devices operated by cams attached to the car must be installed at the top and bottom of the hoistway. Final terminal stopping devices and anti-creep leveling devices are not required.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16230, filed 12/22/00, effective 1/22/01.]

WAC 296-96-16240 What type of operating devices must be used? Only constant pressure or automatic type operating devices located outside the hoistway may be used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-16240, filed 12/22/00, effective 1/22/01.]

Boat Launching Elevators

WAC 296-96-18010 What are the definitions for boat launching elevators? "Boat launching elevator" is a device that:

- (1) Is equipped with a car or platform;
- (2) Moves in guides in a substantially vertical direction;
- (3) Serves to connect one or more floors or landings of a boat launching structure with a beach or water surface; and
- (4) Is used for carrying or handling boats in which people ride.

"Boat launching structure" is any structure that houses and supports any boat launch elevator.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-18010, filed 12/22/00, effective 1/22/01.]

WAC 296-96-18020 Must boat launching elevator cars and platforms be enclosed? All boat launching elevator cars or platforms must be enclosed to a height of at least 6 feet from the floor on all sides where there are no hoistway doors or gates. Enclosures may be built as solid panels or open work which will reject a two inch diameter ball.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-18020, filed 12/22/00, effective 1/22/01.]

WAC 296-96-18030 What electrical wiring requirements apply to boat launching elevators? (1) All electric wiring used in boat launching elevators, except the traveling cable, must be enclosed in rigid metal conduit.

(2) The traveling cable, which is required between the car mounted terminal stopping switch and the hoistway, must be made of flexible, nonmetallic, moisture-retardant, flame-retardant material.

(3) All electrical outlets, switches, junction boxes and fittings used in boat launching elevators must be weather proof.

[Title 296 WAC—p. 1999]

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-18030, filed 12/22/00, effective 1/22/01.]

WAC 296-96-18040 What type of brakes must be used on boat launching elevators? All electric boat launching elevators must be equipped with effective brakes that are applied by springs and released electrically. Brake capacity must be sufficient to hold the elevator and its rated load at rest.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-18040, filed 12/22/00, effective 1/22/01.]

WAC 296-96-18050 What types of stop switches and protective devices are required on boat launching elevators? (1) All electric boat launching elevators must be equipped with:

(a) A bottom terminal stop switch operated by the traveling cable and a float or some other department approved mechanism;

(b) A top terminal stop switch that is located in the hoistway and is operated either by a cam attached to the car or some other department approved mechanism; and

(c) Key-operated, continuous pressure type operating switches that are located outside the hoistway but within sight of the elevator car or platform.

(2) All boat launching elevators operated by a winding drum, must be equipped with a final stop switch that is located on and operated directly by the driving machine. Chains, ropes or belts must not drive final stop switches.

(3) All boat launching elevators driven by a polyphase alternating current motor must be equipped with the following approved relays:

(a) A reverse phase relay that prevents the driving machine motor from starting when either the phase rotation is in the wrong direction or there is a phase failure; and

(b) A main line relay or contact that automatically stops power to the driving machine motor and brake, activating the brake when any safety device is activated.

(4) Hand rope controls must not be used on any boat launch elevator.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-18050, filed 12/22/00, effective 1/22/01.]

WAC 296-96-18060 When must hoisting cables be re-shackled or refastened? The load end of a hoisting cable on all boat launching elevators must be re-shackled or refastened every 12 months.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-18060, filed 12/22/00, effective 1/22/01.]

WAC 296-96-18070 What requirements apply to hoistway gates and doors? (1) All boat launching elevators must have gate-protected hoistway entrances at every landing except those landings located on the beach or at the water surface.

[Title 296 WAC—p. 2000]

(2) All gates must comply with the following minimum requirements:

(a) There must be a full-bodied, balanced type safety gate that protects the full width of the hoistway and must hang, at all points along the gate, within two inches of the landing threshold;

(b) The minimum gate height on top landings is 42 inches and 66 inches on all intermediate landings;

(c) Gates must be constructed of either metal or wood;

(d) Gates must be capable of withstanding a lateral pressure, applied at any point, of 250 pounds without breaking, becoming permanently deformed or being displaced from their guides or tracks;

(e) The openings in grille, lattice or other openwork designed gate bodies, must reject a two-inch diameter ball; and

(f) Gates must be equipped with a department approved combination electric contact and mechanical lock.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-18070, filed 12/22/00, effective 1/22/01.]

WAC 296-96-18080 Must boat launching elevator hoistways be enclosed? The sides of elevator hoistways adjacent to a dock area platform, walkway or ramp must be enclosed. The enclosures must comply with the hoistway safety gate dimension and pressure requirements in WAC 296-96-18070.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-18080, filed 12/22/00, effective 1/22/01.]

Mechanized Parking Garage Equipment

WAC 296-96-20005 What national safety codes has the department adopted for mechanized parking garage equipment? The department has adopted USASI Standard A113.1-1964 "Safety Code for Mechanized Parking Garage Equipment."

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-20005, filed 12/22/00, effective 1/22/01.]

PART D - REGULATIONS FOR EXISTING ELEVATORS, DUMBWAITERS, AND ESCALATORS

Regulations for Existing Electric Elevators, Direct Plunger and Roped Hydraulic Elevators, Escalators used to transport passengers, Electric and Hand-powered Dumbwaiters, Hand-powered Elevators, Inclined Stairway Chairlifts, Inclined and Vertical Wheelchair Lifts, and Sidewalk Elevators

NOTE: The following rules set the minimum standard for existing elevators, dumbwaiters, and escalators, and, where applicable, alterations.

WAC 296-96-23100 Are keys required to be onsite? Yes. The keys to the machine room that are necessary to

(2001 Ed.)

operate the elevator must be readily available to authorized personnel.

NOTE: The department recommends the use of a locked key retainer box in the elevator lobby at the designated level above the hall buttons or by machine room doors at no more than 6 feet above the floor. This key retainer box should be:

- Readily accessible to authorized personnel;
- Clearly labeled "Elevator"; and
- Equipped with a 1-inch cylinder cam lock key #39504.

The department further recommends that:

- Keys for access to elevator machine rooms and for operating elevator equipment are tagged and kept in the key box.

- The key box contains all keys necessary for inspections of the elevator.

- Mechanical hoistway access devices are kept in the machine room.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23100, filed 12/22/00, effective 1/22/01.]

Subpart I

Hoistways and Related Construction for Electric and Hydraulic Elevators

WAC 296-96-23101 What is the scope of Subpart I? Subpart I, Hoistways and Related Construction for Electric and Hydraulic Elevators, is the minimum standard for all existing hydraulic and electric elevators. It applies to other equipment only as referenced in the applicable part.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23101, filed 12/22/00, effective 1/22/01.]

Section 1

Hoistways

WAC 296-96-23110 What structural requirements apply to hoistway enclosures? (1) Local laws and ordinances establish fire-resistant requirements for hoistway enclosures.

(2) When doors and hoistway enclosures are not required to be fire resistant, the hoistway must be enclosed:

(a) With a solid material or a material with openings that will reject a 1/2 inch diameter ball; and

(b) To a height at least 6 feet above each floor or landing and any adjacent stairways treads.

(3) Hoistway enclosures must be supported and braced so as to deflect no more than one inch when subjected to a 100 pound force perpendicularly applied at any point.

(4) Hoistway enclosures adjacent to counterweights must extend the full height of the floor and 6 inches past the counterweight raceway.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23110, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23111 Are guards required for windows in hoistway enclosures? (1) Guards are required on outside hoistway windows if the windows are located:

(a) Ten stories or less above a thoroughfare; or

(b) Three stories or less above the roof of an adjacent building.

(2) Hoistway windows can be guarded by one of the following methods:

(a) By vertical bars at least 5/8 inch in diameter or equivalent, spaced no more than 10 inches apart, permanently and securely fastened in place; and

(b) By metal-sash windows having solid section steel muntins of no less than 1/8 inch thickness, spaced no more than 8 inches apart.

(3) Exterior hoistway windows must be identified with 4-inch high letters marked "elevator."

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23111, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23113 What are the requirements for pipes in hoistways that convey gases, vapors, or liquids?

(1) All steam and hot water pipes in a hoistway must be covered to prevent direct spray onto the elevator car if ruptured, as required in ASME A17.1, Rule 102.2.

(2) All other pipes or ducts currently in a hoistway must be securely fastened to prevent excessive vibration.

(3) Future pipes or ducts must not be installed in a hoistway unless they directly pertain to the elevator's operation.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23113, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23115 What safety requirements apply to inspecting and maintaining overhead sheaves? (1)

Overhead sheave spaces requiring inspection and maintenance must be located so adequate access and decking is available to insure the safety of inspection and maintenance personnel.

(2) Guardrails must be installed where decking does not cover the complete hoistway.

(3) Guardrail and deck supports must be similar to those required for the top of an elevator car and may be made of either wood or metal compatible with the existing hoistway construction.

(4) Inspections and maintenance may be performed from the top of an elevator car if a ladder is not required to perform these functions.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23115, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23116 What requirements apply to car numbers? In any building with more than one elevator, numbers at least two inches in height identifying each car must be located at the main lobby entrance, inside the car, on the machine, and on the disconnect switch.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23116, filed 12/22/00, effective 1/22/01.]

Section 2

Machine Rooms and Machinery Spaces

WAC 296-96-23121 What are the requirements for machine room and machinery space access? Access doors to machine rooms and machinery spaces must be kept closed and locked. The lock must be a spring type which is installed to permit the door to be opened from the inside without a key.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23121, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23122 What type of lighting must be installed in machine rooms and machinery space? Permanent electric lighting must be provided in all machine rooms and machinery spaces. The illumination must be at least 10 foot-candles at floor level.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23122, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23123 What type of service outlets must be installed in elevator cars, hoistways and machinery spaces? Service outlets, where provided, must be permanently grounded.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23123, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23124 What installation requirements apply to pipes conveying gases, vapors, or liquids in machine rooms and machinery spaces? (1) All pipes or ducts currently in machine rooms and machinery spaces must be securely fastened to prevent excessive vibration.

(2) Future pipes or ducts must not be installed in machine rooms and machinery spaces.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23124, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23125 Must elevator machines and control equipment be protected from the weather? Elevator machines and control equipment must be protected from the weather.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23125, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23126 What protective measures should be taken in hoistways, machine rooms and machinery spaces to insure safety? (1) Gears, sprockets, sheaves, cables, tapes, belts and chains must be fitted with suitable guards to prevent accidental contact, where feasible.

(2) Openings in machine room floors above the hoistway must be guarded to prevent tools from falling into the hoistway below.

(3) Ventilation grids where exposed to the hoistway below must be firmly bolted or secured to prevent accidental

[Title 296 WAC—p. 2002]

removal and must be fitted with 1/2 inch wire mesh under the grid.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23126, filed 12/22/00, effective 1/22/01.]

Section 3

Pits

WAC 296-96-23130 What requirements apply to pit access? (1) Pits must be accessible to all authorized personnel.

(2) Access doors, if provided, must be kept closed and locked.

(3) Access ladders must be installed in elevator pits 3 feet or deeper.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23130, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23131 What requirements apply to pit drains? (1) Pit drains directly connected to sewers are prohibited.

(2) Sumps, with or without pumps, are permitted.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23131, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23132 What lighting requirements apply to pits? (1) A permanent lighting fixture producing at least 5 foot-candle at the pit floor must be installed in all pits.

(2) A light switch must be installed and must be accessible from the pit access door.

(3) A permanent grounded outlet must be provided in all pits.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23132, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23133 What requirements apply to counterweight pit guards? (1) Where feasible, unperforated metal guards must be installed in the pit on the open side or sides on all counterweights where spring or solid-type buffers are used or where oil buffers attached to the counterweights are used. Except, where compensating chairs or ropes are attached to the counterweight the guard may be omitted on the side facing the car to which the chains or ropes are attached.

(2) Guards must extend from a point no more than 12 inches above the pit floor to a point at least 7 feet but not more than 8 feet above the floor; and be fastened to a properly reinforced and braced metal frame that is at least equal in strength and stiffness to No. 14 U.S. gauge sheet steel.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23133, filed 12/22/00, effective 1/22/01.]

Section 4 Protection of Space Below Hoistways

WAC 296-96-23140 What requirements apply to any space below a hoistway that is not permanently protected from access? When space below a hoistway is not permanently protected from access, the following requirements apply:

- (1) Counterweights must be equipped with safeties.
- (2) The cars and counterweight must be equipped with spring or oil buffers.
- (3) The car and counterweight buffer supports must be sufficiently strong to withstand without permanent deformation contact with buffers traveling at the following speeds:
 - (a) The governor tripping speed where the safety is governor operated; or
 - (b) 125 percent of the rated speed when the safety is not operated by a governor.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23140, filed 12/22/00, effective 1/22/01.]

Section 5 Hoistway Entrances

WAC 296-96-23150 Are hoistway doors (gates) required? (1) Passenger elevators. Hoistway landing openings must have entrances which guard the full width and height of the openings. The panels of entrances used with automatic-operation passenger elevators must not have hand latches or other hand operated door fastening devices, nor must such panels

(2) Freight elevators. Hoistway landing openings for freight elevators must have entrances which guard the full width of the opening. Gates and doors must meet the following requirements:

- (a) Balanced type vertically sliding hoistway gates must extend from a point not more than 2 inches from the landing threshold to a point at least 66 inches above the threshold.
- (b) Gates must be solid or openwork of a design that will reject a 2 inch diameter ball and be located so that the distance from the hoistway face of the gate to the hoistway edge of the landing sill is no more than 2 1/2 inches.
- (c) Gates must be constructed of metal or wood and be designed and guided so as to withstand a lateral pressure of 100 pounds applied at approximately the center without breaking or becoming permanently deformed and without displacing the gate from its guides or tracks.
- (d) At the top landing, a gate 66 inches high may be used if there is not sufficient clearance for a 6 feet high gate. When the requirements of WAC 296-96-23110 allow nonfire-resistive hoistway enclosures, a gate may be used.
- (e) Gates must be constructed of either metal or wood.
- (f) Gates must withstand a lateral pressure of 100 pounds, applied at approximately their center, without breaking, being permanently deformed or being displaced from their guides or tracks.
- (g) The maximum vertical opening between a landing sill and a door or gate is 2 inches.

(2001 Ed.)

(h) The distance between the gate's hoistway face and the hoistway landing edge must not exceed 2 1/2 inches.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23150, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23151 What requirements apply to hoistway door closing devices? (1) Horizontally sliding doors on automatic-operation elevators must be equipped with door closers that automatically close an open door if the car for any reason leaves the landing zone.

(2) Horizontal swinging single or center-opening doors on automatic-operation elevators must be self-closing.

(3) Door closers are not required for the swinging portion of combination horizontally sliding and swinging doors.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23151, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23152 What requirements apply to hoistway door vision panels? (1) Manually operated or self-closing hoistway doors of the vertically or horizontally sliding type for elevators with automatic or continuous-pressure operation must be provided with a vision panel except at landings of automatic-operation elevators where a hall position indicator is provided.

(2) In multi-section doors, the vision panel is required in one section only but may be placed in all sections.

(3) All horizontally swing doors must have vision panels.

(4) Vision panels may be provided in any type of hoistway door regardless of the type of operation of the elevator. Where provided, vision panels must meet the following requirements:

(a) The area of any single vision panel must be at least 25 square inches with the total area of one or more panels in any hoistway door not exceeding 80 square inches.

(b) Each clear panel opening must reject a 6 inch diameter ball.

(c) Muntins between panel sections must be made of a noncombustible material and of substantial construction. If located on the landing side, they must be flush with the surface of the landing side of the door.

(d) Panel openings must be glazed with clear wire glass at least 1/4 inch thick.

(e) A panel's center must be located at least 54 inches but no more than 66 inches above the landing except, for vertically sliding, biparting, counterbalanced doors it must be located to conform with the dimensions specified to the extent that the door design will permit.

(f) Vision panels in horizontally swing doors must be located for convenient vision when opening the door from the car side.

(g) Wire-glass panels in power-operated doors must be substantially flush with the surface of the landing side of the door.

(h) Vision panel frames must be secured by means of nonreversible screws or other tamper proof fasteners.

(i) Vision panels which do not meet the requirements of (a) through (h) of this section must be protected by protective

grilles made of No. 15 gauge stainless or galvanized steel in accordance with the following specifications:

(i) Grilles must be sized to fit within or over the vision panel frame and completely cover the vision panel opening in the hoistway door.

(ii) Grilles must be secured by means of nonreversible screws or other tamper proof fasteners.

(iii) Grilles must contain openings which are no larger than 3 inches by 3/4 inch, or 3 inches in diameter.

(iv) All edges must be beveled and free of burrs.

(v) Grilles must be installed on the hoistway side of the door.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23152, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23153 What requirements apply to door hangers for horizontal slide doors? Door hangers for horizontal slide type entrances must meet the following requirements:

(1) Means must be provided to prevent the hangers from jumping the track.

(2) Stops must be provided in the entrance assembly to prevent hangers from overrunning the end of the track.

(3) Power-operated doors must be built to withstand, without damage or appreciable deflection, an imposed static load equal to four times the weight of each panel. This static load must be applied successively downward and upward along the vertical centerline of the panel.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23153, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23154 Are astragals required? On a vertically sliding, biparting, counterbalanced hoistway door, a fire-resistive, nonshearing and noncrushing member of either the meeting or overlapping type must be provided on the upper panel to close the distance between the rigid door sections when in contact with the stops. Rigid members which overlap the meeting edge and center-latching devices are prohibited.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23154, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23155 What requirements apply to pull straps? Manually operated, vertical slide, biparting elevator doors which can be operated from the landings must be provided with pull straps on the inside and outside of the upper panel where the lower edge of the upper panel is more than 6 feet 6 inches above the landing when the panel is in the fully open position. The length of the pull straps must be as follows:

(1) The bottom of the strap must be not more than 6 feet 6 inches above the landing when the panel is in the fully opened position.

(2) The length of the strap must not be extended by means of ropes or other materials.

(3) Where pull straps are provided on the car side of doors of elevators which can be operated from the car only,

[Title 296 WAC—p. 2004]

the length of the pull straps must conform to the requirements specified in (1) and (2) of this section.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23155, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23156 What requirements apply to landing sill clearances? The clearance between the car-platform sill and the hoistway edge of any landing sill, or the hoistway side of any vertically sliding counterweighted, or of any vertically sliding counterbalanced biparting hoistway door, must be:

(1) At least 1/2 inch where side car guides are used.

(2) At least 3/4 inch where corner car guides are used.

(3) In all cases, the maximum clearance must not be more than 1 1/2 inch.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23156, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23157 What is the maximum allowable threshold clearance? The maximum distance from the hoistway door or gate face to the hoistway edge of the threshold must not exceed 2 1/4 inches.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23157, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23158 What requirements apply to elevator floor numbers? Elevator hoistways must have floor numbers at least 4 inches high and placed on the walls and/or doors of hoistways at intervals so that a person in a stalled elevator, upon opening the car door 4 inches, could determine the floor position.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23158, filed 12/22/00, effective 1/22/01.]

Section 6

Hoistway Door Locking Devices, Parking Devices, and Access

WAC 296-96-23160 What requirements apply to hoistway door (gate) locking devices? (1) Passenger elevator hoistway doors or gates must be equipped with hoistway-unit system door interlocks.

(2) Freight elevator hoistway doors or gates must be equipped with hoistway-unit system door interlocks or an approved type combination electric contact and mechanical lock.

(3) Combination locks and electric contacts or interlocks must be located so not to be accessible from the landing side when the hoistway doors or gates are closed.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23160, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23161 What requirements apply to elevator parking devices? (1) Elevators that are operated from within the car only must have elevator parking devices

installed at every landing that is equipped with an unlocking device.

(2) On elevators that are not operated from within the car only, a parking device must be provided at one landing and may be provided at other landings. This device must be located at a height no greater than 6 feet 11 inches above the floor.

(3) Parking devices are not required for elevators with hoistway doors that automatically unlock when the car is within the landing zone.

(4) Parking devices must conform to the following specifications:

(a) They must be mechanically or electrically operated.

(b) They must be designed and installed so that friction or sticking or the breaking of any springs used in the device will not permit opening or unlocking a door when the car is outside the landing zone of that floor.

(c) Where springs are used, they must be of the restrained compression type which will prevent separation of the parts in case a spring breaks.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23161, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23162 What requirements apply to hoistway door unlocking devices? Hoistway door unlocking devices or hoistway access switches must be provided on all elevators at one upper landing to permit access to the top of the car and at the lowest landing if this landing is the normal point of access to the pit. Hoistway door unlocking devices may be provided at all landings for emergency use.

(1) Hoistway door unlocking devices must conform to the following specifications:

(a) The device must unlock and permit the opening of the hoistway door from the access landing regardless of the position of the car.

(b) The device must be designed to prevent unlocking the door with common tools.

(c) The operating means for unlocking the door must be available to and used only by inspectors, elevator maintenance and repair personnel, and qualified emergency personnel.

(d) The unlocking-device keyway must be located at a height no greater than 6 feet 11 inches above the floor.

(2) Hoistway access switches must conform to the following specifications:

(a) The switch must be installed only at the access landings.

(b) The switch must be installed adjacent to the hoistway entrance at the access landing with which it is identified.

(c) The switch must be of the continuous-pressure spring-return type and must be operated by a cylinder-type lock having not less than five-pin or five-disk combination with the key removable only when the switch is in the "off" position. The lock must not be operable by any key which will operate locks or devices used for other purposes in the building. The key or combination must be available to and used only by inspectors and elevator maintenance and repair personnel.

(2001 Ed.)

(d) The operation of the switch at either access landing must permit and may initiate and maintain movement of the car with the hoistway door at this landing unlocked or not in the closed position, and with the car door or gate not in the closed position, subject to the following:

(i) The operation of the switch must not render ineffective the hoistway door interlock or electric contact at any other landing.

(ii) The car must not be operated at a speed greater than 150 feet per minute.

(iii) For automatic and continuous-pressure operation elevators: Landing operating devices of continuous-pressure operation elevators and car and landing operating devices of automatic operation elevators must first be made inoperative by means other than the access switch; and power operation of the hoistway door and/or car door or gate is inoperative.

(iv) Automatic operation by a car-leveling device is inoperative.

(v) The top-of-car operating device is inoperative.

(vi) The movement of the car initiated and maintained by the upper access switch must be limited in the down direction to a travel not greater than the height of the car crosshead above the car platform, and limited in the up direction above the upper access landing to the distance the car apron extends below the car platform. Where electrically operated switches, relays, or contractors are used to render inoperative the hoistway-door interlock or electric contact or the car door or gate electric contact, the control circuits must be arranged to conform to the requirements of WAC 296-96-23221 and in addition, to render the normal car and hall operation ineffective in any such switch, relay, or contractor fails to function in the intended manner.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23162, filed 12/22/00, effective 1/22/01.]

Section 7

Power Operation of Doors and Gates

WAC 296-96-23165 What requirements apply to reopening devices for power-operated car doors and gates? (1) A power-operated car door or gate must have a reopening device that stops and reopens the door or gate and the adjacent hoistway door if the car door or gate is obstructed while closing. If the closing kinetic energy is reduced to 2 1/2 feet-lbf or less, the reopening device may be rendered inoperative.

(2) For center opening doors or gates, the reopening device must be designed and installed so that obstruction of either door or gate panel when closing will cause the reopening device to function.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23165, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23166 What requirements apply to photo electric or electric eye door reopening devices? An elevator equipped with a photo electric or electric eye device for reopening of the car and hoistway doors must be provided with a means that will automatically time-out and close the

[Title 296 WAC—p. 2005]

door if it has been obstructed for 20 seconds. The photo electric or electric eye device must not be reactivated until the doors have fully closed. There are two exceptions to this requirement:

(1) The department may authorize hospitals or nursing homes to allow obstructed doors to close within 35 seconds after the expiration of the normal door open time.

(2) When smoke detectors are used to bypass photo electric or electric eye devices the doors are not required to time-out and close except under phase I conditions as authorized by ANSI A17.1-211.3A.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23166, filed 12/22/00, effective 1/22/01.]

Subpart II

Machinery and Equipment for Electric Elevators

WAC 296-96-23200 What is the scope of Subpart II? Subpart II, Machinery and Equipment for Electric Elevators, is a minimum standard for all existing electric elevators. It applies to other equipment only as referenced in the applicable Subpart.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23200, filed 12/22/00, effective 1/22/01.]

Section 1

Buffers and Bumpers

WAC 296-96-23203 What requirements apply to buffers and bumpers? Car and counterweight buffers or bumpers must be provided. Solid bumpers may be used in lieu of buffers where:

- (1) The rated speed is 50 feet per minute or less; or
- (2) Type C safeties are used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23203, filed 12/22/00, effective 1/22/01.]

Section 2

Counterweights

WAC 296-96-23205 What requirements apply to counterweights? On rod type counterweights, the rod nuts must be cotter-pinned and the tie rods must be protected so that the head weight cannot crush the tie rods on buffer engagement.

(1) The weights must be protected so that they cannot be dislodged.

(2) Compensating chains or ropes must be fastened to the counterweight from directly or to a bracket fastened to the frame and must not be fastened to the tie rods.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23205, filed 12/22/00, effective 1/22/01.]

[Title 296 WAC—p. 2006]

Section 3

Car Frames and Platforms

WAC 296-96-23206 What requirements apply to car platforms and frames? Every elevator car must have a platform consisting of a nonperforated floor attached to a platform frame supported by the car frame and extending over the entire area within the car enclosure.

(1) Holes in the floor for the safety plank wrench, etc., must be covered and secured.

(2) The platform frame members and the floor must be designed to withstand the forces developed under the loading conditions for which the elevator is designed and installed.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23206, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23207 What requirements apply to platform guards (aprons)? The entrance side of the platform of passenger and freight elevators equipped with leveling devices or truck-zoning devices must have smooth metal guard plates of not less than 0.0598 inch thick steel, or material of equivalent strength and stiffness, adequately reinforced and braced to the car platform and conforming to the following:

(1) The guard plate must extend no less than the full width of the widest hoistway door opening.

(2) It must have a straight vertical face, extending below the floor surface of the platform, of no less than the depth of the leveling of truck zone, plus 3 inches.

(3) If new guards are installed, the lower portion of the guard must be bent back at an angle of not less than 60 degrees nor more than 75 degrees from the horizontal.

(4) The guard plate must be securely braced and fastened in place to withstand a constant force of not less than 15-lbf applied at right angles to and at any position on its face without permanent deformation.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23207, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23208 What requirements apply to hinged platform sills? Hinged platform sills, where provided, must have electric contacts which will prevent operation of the elevator by the normal operating device unless the hinged sill is within 2 inches of its fully retracted position. The elevator may be operated by the leveling device in the leveling zone with the sill in any position.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23208, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23209 What requirements apply to floating (movable) platforms? Floating (movable) platforms which permit operation of the elevator when the car door or gate is not in the closed position are prohibited.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23209, filed 12/22/00, effective 1/22/01.]

(2001 Ed.)

Section 4 Car Enclosures

WAC 296-96-23215 What requirements apply to car enclosures? Car enclosures for freight and passenger cars must meet the following specifications:

(1) Freight elevator cars:

(a) Cars must be enclosed to a height of at least 6 feet from the floor on the sides where there are no hoistway doors or gates with solid panel or openwork which will reject a 2 inch diameter ball.

(b) On the side of the car adjacent to the counterweight runway and extending 6 inches each side of the counterweight runway, the enclosure must extend to the car top or underside of car crosshead.

(c) If overhead protection is of openwork material, it must reject a 1 1/2 inch ball and shall be sufficiently strong to support 300 pounds applied at any point. Simultaneous application of these loads is not required.

(d) Suitable overhead protection may be installed directly over the area where the operator runs the controls, providing the overhead protection covers sufficient area for safe protection of the operator.

(2) Passenger elevator cars:

(a) Passenger elevator cars must be fully enclosed on all sides and the top, except the opening for entrances

(b) Enclosures must be of metal or wood in conformity with the local fire regulations.

(c) The car top must be sufficiently strong to support a load of 300 pounds applied at any point. Simultaneous application of these loads is not required.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23215, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23216 What requirements apply to the lining materials used on passenger car enclosures? Materials used for passenger car linings must meet the following specifications:

(1) Carpeting without padding may be used for interior finishes provided that it has a Class I rating, a flame spread of 25 or less which must include all assembly components except the adhesive. The adhesive must be a slow-burning type.

(2) Slow-burning combustible materials, other than carpet, may be used for interior finishes provided the materials have a Class II rating or better (flame spread of 75 or less), which must include all assembly components other than the adhesive. Materials must be firmly bonded flat to the enclosure and must not be padded. Fabric with spray-type fireproofing must not be installed in elevators.

(a) Equivalent ratings in watts per centimeter squared as derived in the radiant panel test are also acceptable.

(b) .45 watts/cm squared or higher is equivalent to Class I or better.

(c) .22 watts/cm squared or higher is equivalent to Class II or better.

(d) In the radiant test, the higher the number the better the flame resistance.

(2001 Ed.)

(e) In the Class I and II system, the lower the number, the better the flame resistance.

(f) Smoke density of materials must be less than 450 when tested in accordance with UBC Standard No. 42.-1.

(3) Certification that the materials and assembly meet these requirements must be submitted to the building official.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23216, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23220 What requirements apply to car doors and gates? Car doors or gates are required at each entrance to the elevator car.

(1) Car doors or gates may be horizontal or vertical sliding.

(2) Gates, except collapsible, may be solid or may be openwork of a design to reject a 2 inch diameter ball. Gates must be:

(a) Constructed of metal or wood; and

(b) Designed so as to withstand a lateral pressure of 100 pounds applied at approximately the center without breaking or being permanently deformed and without displacing the gate from its guides or tracks.

(3) Collapsible gates must reject a 3 inch diameter ball when fully closed (extended position) when installed on passenger cars and must reject a 4 1/2 inch ball when fully extended when installed on freight cars. Such gates must not be power-opened for more than one-third of their clear opening distance or for a maximum power opening distance not to exceed 10 inches. Collapsible gates must have at least every fourth vertical member guided at the top and every second vertical member guided at the bottom.

(4) Handles of manually operated collapsible gates nearest the car operating device on elevators operated from the car only must be located so that the nearest handle is not more than 48 inches from the car operating device when the gate is closed and not more than 48 inches above the car floor. Gate handles must be provided with finger guard.

(5) Car doors and gates when in the fully closed position must meet the following specifications:

(a) For passenger cars, they must protect the full width and height of the car entrance opening provided that vertically sliding gates may extend from a point not more than 1 inch above the car floor to a point not less than 6 feet above the floor.

(b) For freight elevators, they must protect the full width of the car entrance opening. Car doors must extend from the car floor to a height of not less than 6 feet above the car floor. Vertically sliding gates must extend from a point not more than 1 inch above the car floor to a point not less than 6 feet above the car floor.

(6) Car doors and gates of electric and electro-hydraulic elevators must be equipped with approved car door or gate electric contacts which will prevent operation of the elevator by the normal operating device unless the car door or gate is in the closed position.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23220, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23221 What requirements apply to the location of car doors and gates? This section does not apply to freight elevators with horizontally swinging doors that are inaccessible to the general public and located in factories, warehouses, garages, and other similar buildings. All other elevators must meet the following requirements:

(1) Doors or gates for automatic or continuous-pressure operation elevators must be located so that the distance from the face of the car door or gate to the face of the hoistway door is no more than the following:

(a) Where a swinging-type hoistway door and a car gate are used, 4 inches.

(b) Where a swinging-type hoistway door and a car door are used, 5 1/2 inches.

(c) Where a sliding-type hoistway door and a car gate or door are used, 5 1/2 inches.

(2) The distances specified must be measured as follows:

(a) Where a multi-section car door and a multi-section hoistway door are used or where one of these doors is multi-section and the other is single section, between the sections of the car door and the hoistway doors nearest to each other.

(b) Where a multi-section car door and a swinging-type hoistway door are used, between the hoistway door and the section of the car door farthest from it. Where space conditions require the use of three-speed car doors, the distance must be measured from the intermediate speed panel.

(c) Where a car gate is used, between the car gate and the section of the hoistway door nearest to the car gate.

(3) Where existing distances are greater than specified by paragraphs (1) and (2) of this section, a space guard of sheet metal must be provided, attached to the hoistway door and/or car door.

(a) The guard is to be mounted to the door by a tamper-proof means.

(b) The bottom of the guard must be no less than 1/8 inch nor more than 1/2 inch from the edge of the sill and must be no more than 1/2 inch above the sill.

(c) The face of the guard must run vertically no less than 40 inches nor more than the height of the lower edge of the vision panel.

(d) The guard must extend the full width of the door.

(e) The top of the guard must be inclined toward the face of the door at an angle of no less than 60 degrees nor more than 75 degrees from the horizontal.

(f) Exposed edges must be beveled or rolled to eliminate sharp edges.

(g) The guard must be sufficiently rigid or reinforced to prevent collapsing or denting.

(h) Mounting of the guard must have proper clearances at the bottom and sides to permit easy closing of the door and must not interfere with the self-closing.

(i) On multi-section horizontally sliding doors only, the leading or fast panel must be fitted with the space guard. For swinging doors, the sides of the guard must be closed if the depth exceeds 5 inches.

(4) On horizontally-sliding doors where existing clearances are greater than specified by subsections (1) and (2) of this section, a vertical sight guard must be mounted to the leading edge of the hoistway door. The sight guard must:

(a) Be mounted with a vertical clearance of no more than 1/2 inch to this sill to a height of no less than 6 feet; and

(b) Project from the door, a distance of no more than 1/2 inch nor less than 1/8 inch from the hoistway edge of the sill.

(5) Only the following devices may be used to render inoperative hoistway door interlocks, the electric contacts of hoistway door combination mechanical locks and electric contacts, or car door or gate electric contacts:

(a) Leveling devices.

(b) Truck-zoning devices.

(c) Hoistway access switch.

(d) Existing devices which do not conform to the above must be removed.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23221, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23222 What control requirements apply to operating circuits? The failure of any single magnetically operated switch, contractor, or relay to release in the intended manner, or the occurrence of a single accidental ground, must not permit the car to start or run if any hoistway door interlock is unlocked or if any hoistway door or car door or gate electric contact is not in the closed position.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23222, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23225 What requirements apply to car emergency exits? (1) Top emergency exits:

(a) Top emergency exit covers must be hinged or otherwise attached to the car top so that the cover can be opened from the top of the car only and opens outward.

(b) The exit cover of the lower compartment of a multideck elevator car must be openable from either compartment.

(2) Side emergency exits:

(a) Side emergency exit doors or panels, where provided, must have a lock arranged so that the door may be opened from the inside of the car only by a special shaped removable key and outside the car by means of a non-removable handle.

(b) Side emergency car exit door panels must open only into the car.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23225, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23226 What requirements apply to car lighting? (1) Car interiors must be equipped with at least 2 electric lights.

(2) Minimum illumination at the car threshold, with the door closed, must be at least:

(a) 5 foot candle (54lx) for passenger elevators; and

(b) 2 1/2 foot candle (27lx) for freight elevators.

(3) The department does not require light control switches, however, if installed they must be located in or adjacent to the car's onboard operating device.

(4) In automatic elevators, the light control switch must be either a key-operated type or located in a fixture with a locked cover.

(5) Light fixtures mounted on car tops must be equipped with a non-key operated switch located in or adjacent to the fixture.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23226, filed 12/22/00, effective 1/22/01.]

Section 5 Safeties

WAC 296-96-23227 What requirements apply to car safeties? Every elevator car suspended by wire ropes must be equipped with safeties. The safety device must be capable of stopping and sustaining the entire car with its rated load in the event of cable severance or overspeed. There must be a switch on the car activated by the setting of the safeties that will stop electric power from the driving machine motor and brake. Car safeties are identified and classified on the basis of performance characteristics after the safety begins to apply pressure on the guide rails.

(1) Type A safeties:

(a) Develop a rapidly increasing pressure on the guide rails during the stopping interval, the stopping distance being very short due to the inherent design of the safety.

(b) Operating force is derived entirely from the mass and the motion of the car or the counterweight being stopped.

(c) Apply pressure on the guide rails through eccentrics, rollers, or similar devices without any flexible medium purposely introduced to limit the retarding force and increase the stopping distance.

(2) Type B safeties:

(a) Apply limited pressure on the guide rails during the stopping interval and provide stopping distances that are related to the mass being stopped and the speed at which application of the safety is initiated.

(b) Retarding forces are reasonably uniform after the safety is fully applied.

(c) Continuous tension in the governor rope may or may not be required to operate the safety during the entire stopping interval.

(d) Minimum and maximum distances are specified on the basis of governor tripping speed.

(3) Type C safeties (Type A with oil buffers):

(a) Develop retarding forces during the compression stroke of one or more oil buffers interposed between the lower members of the car frame and a governor-operated Type A auxiliary safety plank applied on the guide rails.

(b) The stopping distance is equal to the effective stroke of the buffers.

(4) Type G safeties:

(a) Are similar to Type B except for having a gradually increasing retarding force.

(b) May be either of the wedge clamp type or the flexible guide clamp type applied by a cable which unwinds a drum below the car floor.

(5) Slack rope safeties:

(a) Are actuated by the slackening or breaking of the hoisting ropes.

(b) Are not actuated by an overspeed governor.

(2001 Ed.)

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23227, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23228 What is the maximum amount of governor rope movement allowed when operating a safety mechanism? For all Type B safeties, the movement of the governor rope relative to the car or the counterweight, respectively, required to operate the safety mechanism from its fully retracted position to a position where the safety jaws begin to exert pressure against the guide rails must not exceed the following values based on rated speed:

(1) For car safeties:

(a) 200 feet per minute or less: 42 inches.

(b) 201 to 375 feet per minute: 36 inches.

(c) Over 375 feet per minute: 30 inches.

(2) For counterweight safeties: 42 inches for all speeds.

(3) Drum operated car and counterweight safeties requiring continual unwinding of the safety drum rope to fully apply the safety, must be designed so that no less than three turns of the safety rope will remain on the drum after the overspeed test of the safety has been made with rated load in the car.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23228, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23229 What requirements apply to rail lubricants and lubrication plates? Rail lubricants or coating which will reduce the holding power of the safety or prevent its functioning as required must not be used.

(1) A metal plate must be securely attached to the car crosshead in an easily visible location and, where lubricants are to be used, must carry the notation, "Consult manufacturer of the safety for the characteristics of the rail lubricant to be used." If lubricants are not to be used, it should be stated so on the plate.

(2) If lubricants other than those recommended by the manufacturer are used, a safety test should be done to demonstrate that the safety will function as required.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23229, filed 12/22/00, effective 1/22/01.]

Section 6 Speed Governors

WAC 296-96-23235 What requirements apply to speed governors? A speed governor or inertia trip safety or a slack cable must be installed on all elevators and must be designed so that it will activate the car safeties before the car attains a speed of 140 percent of the rated speed. Governor ropes must be at least 3/8 inch in diameter, if iron or steel rope, and at least 3/4 inch, if manila rope. Tiller rope must not be used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23235, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23236 What requirements apply to speed governor overspeed and car safety mechanism switches? (1) A switch must be provided on the speed governor and operated by the overspeed action of the governor when used with Type B and C car safeties of elevators having a rated speed exceeding 150 feet per minute.

(2) A switch must be provided on the speed governor when used with a counterweight safety for any car speed.

(3) For static control, an overspeed switch must be provided regardless of rated speed and it must operate in both directions of travel.

(4) These switches must, when operated, remove power from the driving-machine motor and brake before or at the time of application of the safety.

(5) Switches used to perform the function specified must be positively opened and remain open until manually reset.

(6) Switches operated by the car safety mechanism must be of a type which will not reset unless the car safety mechanism has been returned to the "off" position.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23236, filed 12/22/00, effective 1/22/01.]

**Section 7
Capacity and Loading**

WAC 296-96-23240 What is the minimum rated load for passenger elevators? The rated load in pounds for passenger elevators must be based on the inside net platform areas and must be not less than shown in the table below. The inside net platform areas must be determined as shown in Table 3.7.1 which shows the maximum inside net platform areas for the various common rated loads. If other rated loads are used, they must be at least the following:

(1) For an elevator with an inside net platform area of no more than 50 feet squared, $W=0.667A$ squared + 66.7A.

(2) For an elevator with an inside net platform area of more than 50 feet squared, $W=0.0467A$ squared + 125A - 1367.

NOTE: A = inside net platform area, ft. squared
W = minimum rated load, lb.

MAXIMUM* INSIDE NET PLATFORM AREAS FOR THE VARIOUS RATED LOADS			
Rated Load, lb.	Inside Net Platform Area, ft ²	Rated Load, lb.	Inside Net Platform Area, ft ²
500	7.0	5,000	50.0
600	8.3	6,000	57.7
700	9.6	7,000	65.3
1,000	13.25	8,000	72.9
1,200	15.6	9,000	80.5
1,500	18.9	10,000	88.0
1,800	22.1	12,000	103.0
2,000	24.2	15,000	125.1
2,500	29.1	18,000	146.9
3,000	33.7	20,000	161.2
3,500	38.0	25,000	196.5
4,000	42.2	30,000	231.0
4,500	46.2		

*To allow for variations in cab designs, an increase in the maximum inside net platform area not exceeding 5% will be permitted for the various rated loads.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23240, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23241 What requirements apply to the use of partitions that reduce inside net platform area? When partitions are used in elevator cars to restrict net platform area for passenger use, they must be permanently fastened in place.

(1) Gates, doors, or handrails must not be used as partitions.

(2) Partitions must be installed to permit approximately symmetrical loading.

(3) When conditions do not permit symmetrical loading, guide rails, car frames, and platforms must be capable of sustaining the resulting stresses and deflections.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23241, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23243 What is the minimum rated load for freight elevators? The minimum rated load for freight elevators in pounds must be based on the weight and class of the load to be handled but must in no case be less than the minimum specified in this section for each class of loading based on the inside net platform area. Freight elevators must be designed for one of the following classes of loading:

(1) Class A—General freight loading: Where the load is distributed, the weight of any single piece of freight or of any single hand truck and its load is not more than one-quarter the rated load of the elevator, and the load is handled on and off the car platform manually or by means of hand trucks. For this class of loading, the rated load must be based on not less than 50 lb./ft. squared of inside net platform area.

(2) Class B—Motor vehicle loading: Where the elevator is used solely to carry automobile trucks or passenger automobiles up to the rated load of the elevator. For this class of loading, the rated load must be based on not less than 30 lb./ft. squared of inside net platform area.

(3) Class C—Industrial truck loading: Where the load is carried in transit or is handled on and off the car platform by means of power industrial trucks or by hand trucks having a loaded weight more than one-quarter the rated load of the elevator. For this class of loading the following requirements apply:

(a) The rated load must be based on not less than 50 lb./ft. squared of inside net platform area;

(b) The weight of the loaded industrial truck must not exceed the rated load of the elevator;

(c) The weight of the loaded industrial truck plus any other material carried on the elevator must not exceed the rated load when the industrial truck is also carried;

(d) During loading and unloading, the load on the elevator must in no case exceed 150 percent of the rated load, and where this load exceeds the rated load, the capacity of the brake and the traction relation must be adequate to safely sustain and level at least 150 percent of the rated load.

NOTE: When the entire rated load is placed on the elevator by the industrial truck in increments, the load imposed on the car platform while the last increment is being loaded or

the first increment unloaded will exceed the rated load by the weight of the empty industrial truck.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23243, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23244 What requirements apply to capacity plates? (1) Every elevator must be equipped with a capacity plate or a painted sign that is permanently and securely fastened in place and located in a conspicuous position inside the car. It must indicate the rated load of the elevator in pounds, and for freight elevators, this plate or sign must indicate:

(a) The capacity for lifting one-piece loads;

(b) For freight elevators used for industrial truck loading where the truck is not usually carried by the elevator but used only for loading and unloading, the maximum load the elevator is designed to support while being loaded or unloaded.

(2) Capacity plates must be durable and readily legible. The height of the letters and figures must be at least 1/4 inch for passenger elevators and 1 inch for freight elevators.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23244, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23245 What requirements apply to signs on freight elevators? In addition to the capacity plate or painted sign required by WAC 296-96-23244, two other signs must be installed or painted inside the car in a conspicuous place and permanently and securely fastened to the car enclosure. They must be durable and easily read with 1/2 inch letters, as follows:

(1) In elevators not permitted to carry passengers, the sign must read "This is not a passenger elevator; no persons other than the operator and freight handlers are permitted to ride on this elevator."

(2) In elevators permitted to carry employees, the sign must read "No passengers except employees permitted".

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23245, filed 12/22/00, effective 1/22/01.]

Section 8

Driving Machines and Sheaves

WAC 296-96-23250 What general requirements apply to driving machines and sheaves? (1) Sheaves and drums must be made of cast iron or steel and must have finished grooves for ropes.

(2) Set screws fastenings must not be used in lieu of keys or pins on connections subject to torque or tension.

(3) Friction gearing or a clutch mechanism must not be used to connect a driving-machine drum or sheave to the main driving mechanism, other than in connection with a car leveling device.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23250, filed 12/22/00, effective 1/22/01.]

(2001 Ed.)

WAC 296-96-23255 What requirements apply to winding drum machines? (1) Winding drum machines must be equipped with a slack-rope device with an enclosed switch of the manually reset type which must cause the electric power to be removed from the elevator driving machine motor and brake if the hoisting ropes become slack or broken.

(2) Winding drum machines must be equipped with adjustable machine automatic terminal stop mechanisms set to directly open the main line circuit to the driving machine motor and brake coincident with the opening of the final terminal stopping switch. Chain, belt, or rope-driven mechanisms must not be used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23255, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23256 What requirements apply to indirect-drive machines? (1) Indirect-drive machines, utilizing V belts, tooth drive belts, or chain drives, must have at least three belts or chains operating together in parallel as a set. Belt and chain drive sets must be pre-loaded and matched for length.

(2) Belt set selection must be based upon the manufacturer's rated breaking strength and a safety factor of 10. Chain and sprocket set selection must be based upon the recommendations in the supplementary information section of ASME/ANSI B 29.1, using a service factor of 2.0. Offset links in a chain are permitted. Chain drives and belt drives must be guarded to protect against accidental contact and to prevent foreign objects from interfering with drives.

Sprockets in a chain drive set and also in a driven set must be assembled into a common hub, with teeth cut in line after assembly to assure equal load distribution on all chains. Tooth sheaves for a belt drive must be constructed in a manner to assure equal load distribution on each belt in the set.

Load determination for both the belt and chain sets must be based on the maximum static loading on the elevator car (full load on the car and the car at rest at a position in the hoistway which creates the greatest load, including either the car or counterweight resting on its buffer).

(3) Each belt or chain in a set must be continuously monitored by a broken belt or chain device of the manually reset type which must function to automatically interrupt power to the machine and apply the brake in the event any belt or chain in the set breaks or becomes excessively slack. The driving machine brake must be located on the traction sheave or winding drum assembly side of the driving machine so as to be fully effective in the event the entire belt set or chain set should break.

(4) If one belt or chain of a set is worn, stretched, or damaged so as to require replacement, the entire set must be replaced. Sprockets and toothed sheaves must also be inspected on such occasion and be replaced if noticeably worn.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23256, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23260 What requirements apply to driving machine brakes? The elevator driving machine

[Title 296 WAC—p. 2011]

must be equipped with a friction brake applied by a spring or springs, and released electrically.

The brake must be designed to have a capacity sufficient to hold the car at rest with its rated load. For passenger elevators and freight elevators permitted to carry employees, the brake must be designed to hold the car at rest with an additional load up to 25 percent in excess of the rated load.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23260, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23261 What requirements apply to the application and release of driving machine brakes? Driving machine brakes must not be electrically released until power has been applied to the driving machine motor. All power feed lines to the brake must be opened and the brake must apply automatically when:

- (1) The operating device of a car switch or continuous pressure operation elevator is in the stop position;
- (2) A floor stop device functions;
- (3) Any of the electrical protective devices in WAC 296-96-23272 functions;

Under conditions described in subsection (1) and (2) of this section, the application of the brake may occur on or before the completion of the slowdown and leveling operations.

The brake must not be permanently connected across the armature or field of a direct current elevator driving machine motor.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23261, filed 12/22/00, effective 1/22/01.]

Section 9 Terminal Stopping Devices

WAC 296-96-23262 What requirements apply to normal terminal stopping devices? Enclosed upper and lower normal terminal stopping devices must be provided and arranged to slow down and stop the car automatically, at or near the top and bottom terminal landings. These devices must function independently of the operation of the normal stopping means and of the final terminal stopping device.

(1) Normal stopping devices must be located on the car, in the hoistway, or in the machine room and must be operated by the movement of the car.

(2) Broken rope, tape, or chain switches must be provided in connection with normal terminal stopping devices located in the machine room of traction elevators. These switches must be opened by a failure of the rope, tape, or chain and must cause the electrical power to be removed from the driving machine motor and brake.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23262, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23264 What requirements apply to final terminal-stopping devices? Enclosed upper and lower final terminal electro-mechanical stopping devices must be provided and arranged to prevent movement of the car by the

normal operating devices in either direction of travel after the car has passed a terminal landing. Final terminal stopping devices must be located as follows:

(1) Elevators with winding drum machines must have stopping switches on the machines and also in the hoistway operated by the movement of the car.

(2) Elevators with traction driving machines must have stopping switches in the hoistway operated by the movement of the car.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23264, filed 12/22/00, effective 1/22/01.]

Section 10 Operating Devices and Control Equipment

WAC 296-96-23266 What types of operating devices must not be used? The following types of operating devices must not be used:

- (1) Rope (i.e., shipper rope);
- (2) Rod operating devices activated directly by hand; or
- (3) Rope operating devices activated by wheels, levers, or cranks.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23266, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23268 What requirements apply to car-switch operation elevators? The handles of lever-type operating devices of car-switch operation elevators must be arranged so that they will return to the stop position and latch there automatically when the hand of the operator is removed.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23268, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23269 What requirements apply to passenger elevator emergency stop buttons? Passenger elevator emergency stop buttons or switches must be installed and connected so as to activate the elevator alarm when in the stop position. An optional door hold open switch may be provided, if desired, but such door hold open function must automatically cancel upon activation of a Phase I recall.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23269, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23270 What requirements apply to car top operating devices? (1) Elevators with automatic or continuous-pressure operation must have a continuous-pressure button operating switch mounted on the car top for the purpose of operating the car solely from the top of the car. The device must operate the car at a speed not exceeding 150 feet per minute.

(2) The means for transferring the control of the elevator to the top-of-car operating device must be on the car top and located between the car crosshead and the side of the car nearest the hoistway entrance normally used for access to the car top.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23270, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23272 What electrical protective devices are required? Electrical protective devices must be installed according to the following:

(1) Slack-rope switch: Winding drum machines must be accompanied by a slack-rope device equipped with a slack-rope switch of the enclosed manually reset type which will cause the electric power to be removed from the elevator driving machine motor and brake if the suspension ropes become slack.

(2) Motor-generator running switch: Where generator-field control is used, means must be provided to prevent the application of power to the elevator driving machine motor and brake unless the motor generator set connections are properly switched for the running condition of the elevator. It is not required that the electrical connections between the elevator driving machine motor and the generator be opened in order to remove power from the elevator motor.

(3) Compensating rope sheave switch: Compensating rope sheaves must be provided with a compensating rope sheave switch or switches mechanically opened by the compensating rope sheave before it reaches its upper or lower limit of travel to cause the electric power to be removed from the elevator driving machine motor and brake.

(4) Broken rope, tape, or chain switches used in connection with machine room normal terminal stopping switches: Broken rope, tape, or chain switches which meet the requirements of WAC 296-96-23236 must be provided in connection with normal terminal stopping devices located in machine rooms of traction elevators. These switches must open when a rope, tape, or chain fails.

(5) Stop switch on top of car: A stop switch must be provided on the top of every elevator car, which must cause the electric power to be removed from the elevator driving machine motor and brake, and must:

- (a) Be of the manually operated and closed type;
- (b) Have red operating handles or buttons;
- (c) Be conspicuously and permanently marked "STOP" and indicated the stop and run positions;
- (d) Be positively opened mechanically (opening must not be solely dependent on springs).
- (e) Have red operating handles or buttons;
- (f) Be conspicuously and permanently marked "stop";
- (g) Indicate the "stop" and "run" positions; and
- (h) Be positively opened mechanically and not solely dependent on springs.

(6) Car-safety mechanism switch: A switch is required where a car safety is provided.

(7) Speed governor overspeed switch: A speed governor overspeed switch must be provided when required by WAC 296-96-23236.

(8) Final terminal stopping devices: Final terminal stopping devices must be provided on every elevator.

(9) Emergency terminal speed limiting device: Where reduced stroke oil buffers are provided, emergency terminal speed limiting devices are required.

(2001 Ed.)

(10) Motor generator overspeed protection: Means must be provided to cause the electric power to be removed automatically from the elevator driving machine motor and brake should a motor generator set, driven by a direct current motor, overspeed excessively.

(11) Motor field sensing means: Where direct current is supplied to an armature and shunt field of an elevator driving machine motor, a motor field current sensing means must be provided, which must cause the electric power to be removed from the motor armature and brake unless current is lowing in the shunt field of the motor.

A motor field current sensing means is not required for static control elevators provided with a device to detect an overspeed condition prior to, and independent of, the operation of the governor overspeed switch. This device must cause power to be removed from the elevator driving machine motor armature and machine brake.

(12) Buffer switches for oil buffers used with Type C car safeties: Oil level and compression switches must be provided for all oil buffers used with Type C safeties.

(13) Hoistway door interlocks or hoistway door electric contacts: Hoistway door interlocks or hoistway door electric contacts must be provided for all elevators.

(14) Car door/gate electric contacts: Car door or gate electric contacts must be provided on all elevators.

(15) Normal terminal stopping devices: Normal terminal stopping devices must be provided on every elevator.

(16) Car side emergency exit electric contact: An electric contact must be provided on every car side emergency exit door.

(17) Electric contacts for hinged car platform sills: Hinged car platform sills, where provided, must be equipped with electric contacts.

(18) Stop switch in the elevator pit: A stop switch must be installed in all elevator pits. It must be located between 36 inches to 48 inches above the bottom landing floor and accessible from outside the hoistway.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23272, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23274 What requirements apply to the power supply line disconnect? (1) A disconnect switch or a circuit breaker must be installed and connected into the power supply line to each elevator motor or motor generator set and controller. The power supply line must be equipped with overcurrent protection inside the machine room.

(2) The disconnect switch or circuit breaker must be of the manually closed multipole type and be visible from the elevator driving machine or motor generator set. When the disconnecting means is not within sight of the driving machine, the control panel, or the motor generator set, and additional manually operated switch must be installed adjacent to the remote equipment and connected in the control circuit to prevent starting.

(3) No provision may be made to close the disconnect switch from any other part of the building.

(4) Where there is more than one driving machine in a machine room, disconnect switches or circuit breakers must

be numbered to correspond to the number of the driving machine which they control.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23274, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23276 What requirements apply to phase reversal and failure protection methods? Elevators having polyphase alternating current power supply must be equipped with a means to prevent the starting of the elevator motor if the phase rotation is in the wrong direction or if there is a failure of any phase.

This protection may be considered to be provided in the case of generator field control having alternating current motor-generator driving motors, provided a reversal of phase will not cause the elevator driving machine motor to operate in the wrong direction. Controllers on which switches are operated by polyphase torque motors provide inherent protection against phase reversal or failure.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23276, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23277 What requirements apply to grounding and overcurrent protections? (1) Control and operating circuit requirements must comply with Article 620-61 of the National Electrical Code.

(2) Grounding methods must comply with Articles 620-81 through 620-85 of the National Electrical Code.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23277, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23278 What requirements apply to the absorption of regenerated power? When a power source is used which, in itself, is incapable of absorbing the energy generated by an overhauling load, means for absorbing sufficient energy to prevent the elevator from attaining governor tripping speed or a speed in excess of 125 percent of rated speed, whichever is lesser, must be provided on the load side of each elevator power supply line disconnecting means.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23278, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23279 What requirements apply to door by-pass systems? Door by-pass systems, where used, must conform to the requirements of ASME A17.1, Rule 210.1e.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23279, filed 12/22/00, effective 1/22/01.]

Section 11

Emergency Operation and Signaling Devices

WAC 296-96-23280 What requirements apply to all car emergency signaling devices in all buildings? All elevators must be equipped with an audible signaling device that can be activated by a switch or button marked "alarm". This

[Title 296 WAC—p. 2014]

switch or button must be located in or adjacent to each car's operating panel.

The signaling device must be located inside the building and audible inside the car and outside the hoistway. One signaling device may be used for a group of elevators.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23280, filed 12/22/00, effective 1/22/01.]

Section 12

Suspension Systems and Their Connections

Section 12

Suspension Systems and Their Connections

WAC 296-96-23282 What requirements apply to suspension systems? Cars must be suspended by steel wire ropes attached to the car frame or passing around sheaves attached to the car frame. Only iron (low carbon steel) or steel wire ropes, having the commercial classification "elevator wire rope," or wire rope specifically constructed for elevator use may be used for the suspension of elevator cars and for the suspension of counterweights. The wire material for ropes must be manufactured by the open-hearth or electric furnace process or its equivalent.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23282, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23283 What requirements apply to rope data tags? At each rope renewal, a new metal data tag must be securely attached to one of the wire rope fastenings. Rope data tags must be durable and readily legible. The height of letters and figures must be no less than 1/16 inch. This data tag must bear the following information:

- (1) The diameter in inches;
- (2) The manufacturer's rated breaking strength;
- (3) The grade of material used;
- (4) The month and year the ropes were installed;
- (5) Whether nonpreformed or preformed;
- (6) Construction classification
- (7) Name of the person or firm who installed the ropes;
- (8) Name of the manufacturer of the rope;
- (9) The number of ropes; and
- (10) The date on which the rope was resocketed or other types of fastening changed.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23283, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23284 What is the factor of safety for wire suspension ropes? The factor of safety for wire suspension ropes must at least be equivalent to the values shown in the following table. The factor of safety must be based on the actual rope speed corresponding to the car's rated speed. The factor of safety must be calculated by the following formula:

$$f = S \text{ times } N \text{ over } W$$

where

N = number of runs of rope under load. (For 2:1 roping, twice the number of ropes used. For 3:1 roping, three times, etc.)

S = manufacturer's rated breaking strength of one rope.

W = maximum static load imposed on all car ropes with the car and its rated load at any position in the hoistway.

Table 3.7.1

MAXIMUM FACTORS OF SAFETY FOR SUSPENSION WIRE ROPES					
Rope Speed, fpm	Minimum Factor of Safety		Rope Speed, fpm	Minimum Factor of Safety	
	Passenger	Freight		Passenger	Freight
50	7.60	6.65	605	10.85	9.65
75	7.75	6.85	700	11.00	9.80
100	7.95	7.00	750	11.15	9.90
125	8.10	7.15	800	11.25	10.00
150	2.25	7.30	850	11.35	10.10
175	8.40	7.45	900	11.45	10.15
200	8.60	7.65	950	11.50	10.20
225	8.75	7.75	1000	11.55	10.30
250	8.90	7.90	1050	11.65	10.35
300	9.20	8.20	1100	11.70	10.40
350	9.50	8.45	1150	11.75	10.45
400	9.75	8.70	1200	11.80	10.50
450	10.00	8.90	1250	11.80	10.50
500	10.25	9.15	1300	11.85	10.55
550	10.45	9.30	1350	11.85	10.55
600	10.70	9.50	1400-2000	11.90	10.55

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23284, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23285 What is the minimum number of suspension ropes allowed? All elevators, except freight elevators that do not carry passengers or freight handlers and have no means of operation in the car, must conform to the following requirements:

(1) The minimum number of hoisting ropes used is three for traction elevators and two for drum-type elevators. Where a car counterweight is used, the number of counterweight ropes used must not be less than two.

(2) The minimum diameter of hoisting and counterweight ropes is 3/8 inch. Outer wires of the ropes must be no less than 0.024 inch in diameter. The term "diameter" where used in this section refers to the nominal diameter as given by the rope manufacturer.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23285, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23287 What requirements apply to suspension rope equalizers? Suspension rope equalizers, where provided, must be of the individual-compression spring type.

Equalizers of other type may be used with traction elevators provided the equalizers and fastenings are approved by the authority having jurisdiction on the basis of adequate tensile and fatigue tests made by a qualified laboratory. Such tests must show the ultimate strength of the equalizer and its fastenings in its several parts and assembly, which must be no less than 10 percent in excess of the strength of suspension ropes, provided that equalizers of the single-bar type, or springs in tension, must not be used to attach suspension ropes to cars or counterweights or to dead-end hitch plates.

(2001 Ed.)

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23287, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23288 What requirements apply to securing suspension wire ropes to winding drums? Suspension wire ropes on winding drum machines must have the drum ends of the ropes secured on the inside of the drum by clamps, tapered babbitted sockets, or other means approved by the department.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23288, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23289 What requirements apply to spare rope turns on winding drum machines? Suspension wire ropes of winding drum machines must have the drum ends of the ropes secured on the inside of the drum by clamps or by tapered babbitted sockets, or by other means approved by the department.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23289, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23290 What requirements apply to suspension rope fastenings? Spliced eyes by return loop may continue in service. Suspension rope fastenings must conform to the requirements of ASME A17.1 Rule 212.9 when the ropes are replaced.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23290, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23291 What requirements apply to auxiliary rope fastening devices? Auxiliary rope fastening devices, designed to support cars or counterweights if any regular rope fastenings fail, may be provided subject to approval by the authority having jurisdiction.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23291, filed 12/22/00, effective 1/22/01.]

**Subpart III
Hydraulic Elevators**

WAC 296-96-23300 What is the scope of Subpart III, Hydraulic Elevators? Subpart III, Hydraulic Elevator, is the minimum standard for existing direct plunger and roped hydraulic elevators.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23300, filed 12/22/00, effective 1/22/01.]

**Section 1
Hoistways, Hoistway Enclosures,
and Related Construction**

WAC 296-96-23302 What requirements apply to hoistways, hoistway enclosures and related construction? All hoistways, hoistway enclosures and related construction

must conform to the requirements of Subpart I, Hoistways and Related Construction for Electric and Hydraulic Elevators.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23302, filed 12/22/00, effective 1/22/01.]

Section 2 Mechanical Equipment

WAC 296-96-23304 What requirements apply to buffers and bumpers? Car buffers or bumpers must be provided. Solid bumpers may be used in lieu of buffers where the rated speed is 50 feet per minute or less.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23304, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23307 What requirements apply to car frames and platforms? All car frames and platforms must conform to the requirements of WAC 296-96-23206.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23307, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23309 What requirements apply to car enclosures? Car enclosures must conform to the requirements of WAC 296-96-23215.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23309, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23311 What requirements apply to capacity and loading? Capacity and loading must conform to the requirements of WAC 296-96-23240.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23311, filed 12/22/00, effective 1/22/01.]

Section 3 Driving Machines

WAC 296-96-23313 What requirements apply to driving machine connections? The driving member of a direct plunger driving machine must be attached to the car frame or car platform with fastenings of sufficient strength to support that member.

The connection to the driving machine must be capable of withstanding, without damage, any forces resulting from a plunger stop.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23313, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23316 What requirements apply to plunger stops? Plungers must be provided with solid metal stops and/or other means to prevent the plunger from traveling beyond the limits of the cylinder. Stops must be designed and constructed so as to stop the plunger from maximum speed in the up direction under full pressure without damage

[Title 296 WAC—p. 2016]

to the connection to the driving machine, plunger, plunger connection, or any other parts of the hydraulic system. For rated speeds exceeding 100 feet per minute where a solid metal stop is provided, means other than the normal terminal stopping device (i.e., emergency terminal speed limiting device) must be provided to retard the car to 100 feet per minute with a retardation no greater than gravity, before striking the stop.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23316, filed 12/22/00, effective 1/22/01.]

Section 4 Valves, Supply Piping, and Fittings

WAC 296-96-23318 What requirements apply to pump relief valves? (1) Each pump or group of pumps must be equipped with a relief valve conforming to the following specifications, except as covered by subsection (2) of this section:

(a) The relief valve must be located between the pump and the check valve and must be of such a type and installed in the by-pass connection so that the valve cannot be shut off from the hydraulic system.

(b) The relief valve must be preset to open at a pressure no greater than 125 percent of working pressure.

(c) The size of the relief valve and by-pass must be sufficient to pass the maximum rated capacity of the pump without raising the pressure more than 20 percent above that at which the valve opens. Two or more relief valves may be used to obtain the required capacity.

(d) Relief valves having exposed pressure adjustments, if used, must have their means of adjustment sealed after being set to the correct pressure.

(2) No relief valve is required for centrifugal pumps driven by induction motors, provided the shutoff, or maximum pressure which the pump can develop, is not greater than 135 percent of the working pressure at the pump.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23318, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23321 What requirements apply to check valves? A check valve must be provided and must be installed so that it will hold the elevator car with rated load at any point when the pump stops or the maintained pressure drops below the minimum operating pressure.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23321, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23322 What requirements apply to supply piping and fittings? Supply piping and fittings must be in sound condition and secured in place.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23322, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23323 What requirements apply to flexible hydraulic connections? When flexible hydraulic

connections are replaced, the requirements of ANSI A17.1, Rule 303.1d must be met in all respects. Where flexible connections pass through walls, the replacement must be made with steel piping.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23323, filed 12/22/00, effective 1/22/01.]

Section 5 Tanks

WAC 296-96-23324 What general requirements apply to tanks? (1) All tanks must have sufficient capacity to provide for an adequate liquid reserve to prevent the entrance of air or other gas into the system.

(2) The permissible minimum liquid level must be clearly indicated.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23324, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23325 What requirements apply to pressure tanks? (1) Tanks which may be subjected to vacuum sufficient to cause collapse must be provided with one or more vacuum relief valves with openings of sufficient size to prevent collapse of the tank.

(2) Tanks must be provided with one or more gauge glasses attached directly to the tank and equipped to shut off the liquid automatically in case of failure of the glass. The gauge glass or glasses must be located so as to indicate any level of the liquid between permissible minimum and maximum levels and be equipped with a manual cock at the bottom of the lowest glass.

(3) Tanks must be provided with a pressure gauge which will indicate the pressure correctly to no less than 1 1/2 times the pressure setting of the relief valve. The gauge must be connected to the tank or water column by pipe and fittings with a stop cock in such a manner that it cannot be shut off from the tank except by a stop cock. The stop cock must have a "T" or level handle set in line with the direction of flow through the valve when open.

(4) Tanks must have a 1/4 inch pipe size valve connection for attaching an inspector's pressure gauge when the tank is in service.

(5) Tanks must be equipped with means to render the elevator inoperative if for any reason the liquid level in the tank falls below the permissible minimum.

(6) Tanks must be equipped with means for internal inspection.

(7) Piping and fittings for gauge glasses, relief valves, and pressure gauges must be of a material that will not be corroded by the liquid used in the tank.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23325, filed 12/22/00, effective 1/22/01.]

(2001 Ed.)

Section 6 Terminal Stopping Devices

WAC 296-96-23326 What requirements apply to terminal stopping devices? Terminal stopping devices must conform to the requirements of WAC 296-96-23262.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23326, filed 12/22/00, effective 1/22/01.]

Section 7 Operating Devices and Control Equipment

WAC 296-96-23328 What requirements apply to operating devices? Operating devices must conform to the requirements of WAC 296-96-23266 and 296-96-23268.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23328, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23330 What requirements apply to car top operating devices? Top-of-car operating devices must be provided and must conform to the requirements of WAC 296-96-23270, except for uncounterweighted elevators having a rise of no more than 15 feet.

The bottom normal terminal stopping device may be made ineffective while the elevator is under the control of the top-of-car operating device.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23330, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23332 What requirements apply to anti-creep leveling devices? Each elevator must be provided with an anticreep leveling device conforming to the following specifications:

(1) It must maintain the car within 3 inches of the landing regardless of the position of the hoistway door.

(2) For electrohydraulic elevators, it must operate the car only in the up direction.

(3) For maintained pressure hydraulic elevators, it must operate the car in both directions.

(4) Its operation may depend on the availability of the electric power supply provided that:

(a) The power supply line disconnecting means required by WAC 296-96-23274 is kept in the closed position at all times except during maintenance, repairs, and inspections;

(b) The electrical protective devices required by WAC 296-96-23334 must not cause the power to be removed from the device.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23332, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23334 What requirements apply to electrical protective devices? Electrical protective devices, if provided, must conform with the requirements of WAC 296-96-23272 and operate as follows:

[Title 296 WAC—p. 2017]

(1) The following devices must prevent operation of the elevator by the normal operating device and also the movement of the car in response to the anticreep leveling device:

- (a) Stop switches in the pit;
- (b) Stop switches on top of the car; and
- (c) Car side emergency exit door electric contacts, where such doors are provided.

(2) The following devices must prevent the operation of the elevator by the normal operating device but the anticreep leveling device required by WAC 296-96-23332 must remain operative:

- (a) Emergency stop switches in the car;
- (b) Broken rope, tape, or chain switches on normal terminal stopping devices when such devices are located in the machine room or overhead space;
- (c) Hoistway door interlocks or hoistway door electric contacts;
- (d) Car door or gate electric contacts; and
- (e) Hinged car platform sill electric contacts.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23334, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23336 What requirements apply to power supply line disconnects? Power supply line disconnects must conform to the requirements of WAC 296-96-23274.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23336, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23338 What requirements apply to devices that make hoistway door interlocks or electric contacts and car door (gate) electric contacts inoperative? The installation of these contacts must conform to the requirements of WAC 296-96-23221.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23338, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23340 What requirements apply to control and operating circuits? Control and operating circuits must conform to the requirements of WAC 296-96-23222.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23340, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23342 What requirements apply to emergency operation and signaling devices? Emergency operation and signaling devices must conform to the requirements of WAC 296-96-23280.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23342, filed 12/22/00, effective 1/22/01.]

[Title 296 WAC—p. 2018]

Section 8

Additional Requirements for Counterweighted Hydraulic Elevators

WAC 296-96-23344 What additional requirements apply to counterweighted hydraulic elevators? Counterweighted hydraulic elevators must be roped so that the counterweight must not strike the overhead when the car is resting on its fully compressed buffer. Counterweighted hydraulic elevators must conform to the requirements of WAC 296-96-23205, where applicable.

Where counterweights are provided, counterweight buffers must be provided.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23344, filed 12/22/00, effective 1/22/01.]

Subpart IV Escalators

WAC 296-96-23400 What is the scope of Subpart IV, Escalators? Subpart IV, Escalators, is the minimum standard for existing escalators that are used to transport passengers.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23400, filed 12/22/00, effective 1/22/01.]

Section 1 Construction

WAC 296-96-23405 What requirements apply to balustrades? The balustrade must be totally closed except where the handrail enters the newel base. Gaps between interior panels are permitted provided that they are no wider than 3/16 inch and the edges are rounded or beveled.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23405, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23408 How much clearance is required between skirt panels and step treads? The clearance on each side of the steps between the step tread and the adjacent skirt panel must be no more than 3/16 inch.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23408, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23410 What requirements apply to guards at ceiling or soffit intersections? (1) A solid guard must be provided in the intersection of the angle of the outside balustrade (deck board) and the ceiling or soffit, except as indicated in subsection (2) of this section. The vertical edge of the guard must be a minimum of 8 inches. The escalator side of the vertical face of the guard must be flush with the face of the wellway. The exposed edge of the guard must be rounded and have a minimum width of 1/4 inch.

(2) Guards are not required under the following conditions:

(a) On high decks where the clearance of the outside edge of the deck and the ceiling or soffit is more than 12 inches or where the projected intersection of the outside deck and the ceiling or soffit is more than 24 inches from the centerline of the handrail;

(b) On low decks where the centerline of the handrail is more than 14 inches from the ceiling or soffit.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23410, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23412 What requirements apply to anti-slide devices? On high deck balustrades, anti-slide devices must be provided on decks or combination of decks when the outer edge of the deck is greater than 12 inches from the centerline of the handrail or on adjacent escalators when the distance between the centerline of the handrails is greater than 16 inches.

These devices must consist of raised objects fastened to the decks, not closer than 4 inches to the handrail and spaced not greater than 6 feet apart. The height must be no less than 3/4 inch. There must be no sharp corners or edges.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23412, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23414 What requirements apply to handrails? Each escalator must be equipped with a handrail that moves in the same direction and at substantially the same speed as the steps.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23414, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23416 What requirements apply to handrail guards? Hand or finger guards must be provided at the point where the handrail enters the balustrade.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23416, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23418 What requirements apply to step riser slotting? Escalators with smooth curved surface risers must have either:

(1) Steps having cleated risers provided with vertical cleats which mesh with slots on the adjacent step tread as the steps make the transition from the incline to the horizontal; or

(2) Means to cause the opening of the power circuits to the escalator driving machine motor and brake should a step be displaced against the upthrust track at the upper and lower curves in the passenger carrying line of the track system.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23418, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23420 What requirements apply to step tread slotting? The tread surface of each step must be slotted in a direction parallel to the travel of the steps.

(2001 Ed.)

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23420, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23422 What requirements apply to combplates? There must be a combplate at the entrance and at the exit of every escalator. The combplate teeth must be meshed with and set into the slots in the tread surface so that the points of the teeth are always below the upper surface of the treads.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23422, filed 12/22/00, effective 1/22/01.]

Section 2 Brakes

WAC 296-96-23424 What general requirements apply to escalator brakes? Escalators must be equipped with a brake capable of stopping the up or down traveling escalator with any load up to the brake rated load. The brake must be mechanically or magnetically applied. If the brake is magnetically applied, a ceramic permanent magnet must be used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23424, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23427 What requirements apply to main drive shaft brakes? If the escalator brake is separated from the main drive shaft by a chain used to connect the driving machine to the main drive shaft, a mechanically or magnetically applied brake capable of stopping a down running escalator with brake rated load must be provided on the main drive shaft. If the brake is magnetically applied, a ceramic permanent magnet must be used.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23427, filed 12/22/00, effective 1/22/01.]

Section 3 Operating and Safety Devices

WAC 296-96-23429 What requirements apply to starting switches? Starting switches must be of the key-operated type and must be located so that the escalator steps are within sight.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23429, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23431 What requirements apply to emergency stop buttons? There must be a red stop button in an accessible location at the top and bottom landings of each escalator. The operation of either one of these buttons must cause the interruption of power to the escalator. It must be impossible to start an escalator by means of these buttons. These buttons must be marked "escalator stop button."

[Title 296 WAC—p. 2019]

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23431, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23432 What requirements apply to speed governors? (1) A speed governor must be provided, except as specified in subsection (2) of this section. Its operation must cause the interruption of power to the driving machine if the speed of the steps exceeds a predetermined value, which must be no more than 40 percent above the rated speed.

(2) The speed governor is not required where an alternating current squirrel cage induction motor is used and the motor is directly connected to the driving machine. (NOTE: The governor may be omitted in such case even though a chain is used to connect the sprocket on the driving machine to the sprocket on the main drive shaft.)

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23432, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23434 What requirements apply to broken step-chain devices? A broken step-chain device must be provided to cause the interruption of power to the driving machine if a step chain breaks, and, where no automatic chain tension is provided, if excessive sag occurs in either step chain.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23434, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23436 What requirements apply to brake applications? The brake must automatically stop the escalator when any of the safety devices function.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23436, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23438 What requirements apply to broken drive-chain devices? When the driving machine is connected to the main drive shaft by a chain, a device must be provided which will cause the application of the brake on the main drive shaft and also stop the drive machine if the drive chain parts.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23438, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23440 What requirements apply to skirt obstruction devices? Means must be provided to stop the escalator if an object becomes accidentally caught between the step and the skirt as the step approaches the upper or lower combplate. The device shall be located so that the escalator will stop before that object reaches the combplate.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23440, filed 12/22/00, effective 1/22/01.]

[Title 296 WAC—p. 2020]

WAC 296-96-23442 What requirements apply to rolling shutter devices? Rolling shutters, if used, must be equipped with a device which will be activated as the shutters begin to close to cause the opening of the power circuit to the escalator driving machine motor and brake.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23442, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23444 What requirements apply to reversal stop device? Means must be provided to cause the opening of the power circuit to the driving machine motor and brake in case of accidental reversal of travel while the escalator is operating in the ascending direction.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23444, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23446 What requirements apply to tandem operations? Tandem operation escalators must be electrically interlocked where traffic flow is such that bunching will occur if the escalator is carrying passengers away from the intermediate landing stops.

The electrical interlocks must stop the escalator carrying passengers into the common intermediate landing if the escalator carrying passengers away from the landing stops. These escalators must also be electrically interlocked to assure that they run in the same direction.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23446, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23448 What requirements apply to caution signs? A caution sign must be located at the top and bottom landings of each escalator, readily visible to the boarding passengers. The sign must be of the standard design recognized by the elevator industry and include the following:

- (1) Caution;
- (2) Passenger only;
- (3) Hold handrail;
- (4) Attend children; and
- (5) Avoid sides.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23448, filed 12/22/00, effective 1/22/01.]

Section 4 Lighting of Step Treads

WAC 296-96-23450 What requirements apply to step tread lighting? Step treads must be illuminated throughout their run. The light intensity on the treads must be in accordance with local codes and ordinances for stairways.

It is recommended that the illumination be of uniform intensity and that it not contrast significantly with that of the surrounding area.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23450, filed 12/22/00, effective 1/22/01.]

(2001 Ed.)

Subpart V
Dumbwaiters and Hand-powered Elevators

WAC 296-96-23500 What is the scope of Subpart V, Dumbwaiters and hand-powered elevators? Subpart V, Dumbwaiters and Hand-powered Elevators, is a minimum standard for existing electric and hand-powered dumbwaiters and hand-powered elevators.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23500, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23510 What requirements apply to electric and electro-hydraulic dumbwaiters? (1) Dumbwaiter cars may be constructed of metal or wood and must be in compliance with local ordinances as to fire resistance providing it is constructed to carry its rated load without distortion. The dumbwaiter car must be fully enclosed except for the landing sides. The car floor must not exceed 9 square feet in area and the total inside height must not exceed 4 feet and the maximum capacity must not exceed 500 pounds.

(2) Electrically-operated machines must be equipped with brakes that are electrically released and applied automatically by springs in conformity with the requirements set forth in WAC 296-96-23260.

(3) Dumbwaiters equipped with winding drum machines having a travel of more than 30 feet and a rated load of more than 100 pounds, must be equipped with a slack rope switch which will automatically remove the power from the motor and brake when the hoisting ropes become slack.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23510, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23540 What requirements apply to hand-power elevators and dumbwaiters? (1) Cars of hand-power elevators and dumbwaiters must be enclosed on all sides not used for entrance. Elevator cars upon which an operator is permitted to ride must have no more than one compartment.

(2) Hand elevators having a travel of more than 15 feet must have a car safety, capable of stopping and sustaining the car and rated load. The car safety device need not be operated by a speed governor and may be of the instantaneous type operated as a result of the breaking and slackening of the suspension members.

(3) Hoistway doors for hand-powered elevators must be designed so that they will ensure protection at each landing.

(4) Doors for hand-powered dumbwaiters must be designed so that they will ensure protection at all landings.

(5) Every hoistway door, gate, or entrance of hand elevators and hand dumbwaiters must have conspicuously displayed on the landing side in letters no less than 2 inches high, the words "Danger—Elevator—Keep closed," or "Danger—Dumbwaiter—Keep closed."

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23540, filed 12/22/00, effective 1/22/01.]

(2001 Ed.)

Subpart VI
Alterations, Repairs and Maintenance

WAC 296-96-23600 What is the scope of Part VI, Alterations, Repairs and Maintenance? Subpart VI, Alterations, Repairs and Maintenance, applies to periodic inspections, tests, alterations, and maintenance.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23600, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23610 What requirements apply to routine periodic inspections and tests? The owner or the owner's agent must ensure that her/his conveyances are inspected and tested periodically by a person qualified to perform such services, and a report indicating the date of inspection with all pertinent data included must be posted in the machine room unless otherwise specified in ASME A17.1, Part X.

The inspection and tests must be in compliance with the following sections of ASME A17.1, Part X:

(a) Section 1000, Rule 1000.1, Rule 1000.2, Rule 1000.3;

(b) Section 1001, Rule 1001.1, Rule 1001.2;

(c) Section 1002, Rule 1002.1, Rule 1002.2, Rule 1002.3;

(d) Section 1004, Rule 1004.2;

(e) Section 1005, Rule 1005.1, Rule 1005.2, Rule 1005.3, Rule 1005.4;

(f) Section 1007, Rule 1007.2;

(g) Section 1008, Rule 1008.1, Rule 1008.2; and

(h) Section 1010, Rule 1010.1, Rule 1010.2, Rule 1010.3, Rule 1010.4, Rule 1010.5, Rule 1010.6, Rule 1010.7.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23610, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23620 What requirements apply to alterations, repairs and maintenance? The owner or the owner's agent is responsible for the safe operation, proper maintenance, and alteration of his or her conveyance(s) and must comply with ASME A17.1, Part XII.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23620, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23630 What requirements apply to elevator equipment displaced by seismic activity? Any elevator equipment, hydraulic or cable type, that is displaced as a result of seismic activity must be anchored to conform with current standards, when repaired or reanchored to the building.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23630, filed 12/22/00, effective 1/22/01.]

[Title 296 WAC—p. 2021]

**Subpart VII
Lifts for Physically Handicapped**

WAC 296-96-23700 What is the scope of Subpart VII, Lifts for Physically Handicapped? The department's rules regulating lifting devices for physically handicapped people are described in this subpart.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23700, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23710 What requirements apply to lifts for the physically handicapped? Inclined and vertical chair-lifts and inclined and vertical wheelchair lifts installed only for use by persons with disabilities in locations other than in or at a private residence must be equipped with a standard electric switch Chicago lock with key #2252. This requirement is in addition to ASME A17.1, Part XX, and the Washington State rules and regulations on barrier-free design.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23710, filed 12/22/00, effective 1/22/01.]

**Subpart VIII
Sidewalk Elevators**

WAC 296-96-23800 What is the scope of Subpart VIII, Sidewalk Elevators? Subpart VIII, Sidewalk Elevators, is a minimum standard for existing power sidewalk elevators.

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23800, filed 12/22/00, effective 1/22/01.]

WAC 296-96-23810 What requirements apply to electrically-operated sidewalk elevators? Where the top opening is located in the sidewalk or other area exterior to the building, all electrical equipment on the car or in the hoistway must be weatherproof. The operation of power sidewalk elevators through openings in the sidewalk, or through openings in other exterior areas which are protected by hinged doors or vertically lifting covers, must conform to these following requirements:

(1) The elevator must be operable in both the up and down directions through the opening, only from the sidewalk or other exterior area. The operations must be by means of:

(a) Key-operated continuous pressure type, up and down switches; or

(b) Continuous pressure type up and down operating buttons on the free end of a detachable, flexible cord five feet or less in length.

(c) Continuous pressure type up and down operating buttons may be installed on the elevator car providing the control is so designed that the buttons will not function unless the sidewalk doors are locked in the open position and that a safety screen that will open and close with the car is installed.

(2) Key-operated switches must be of continuous pressure spring-return type, with the key removable only when the switch is in the off position.

[Title 296 WAC—p. 2022]

[Statutory Authority: RCW 70.87.020, 70.87.030, 70.87.034, 70.87.120, 70.87.185 and chapter 70.87 RCW. 01-02-026, § 296-96-23810, filed 12/22/00, effective 1/22/01.]

**Chapter 296-99 WAC
SAFETY STANDARDS FOR GRAIN HANDLING
FACILITIES**

WAC

296-99-010	What safety hazards does this chapter require the employer to control?
296-99-015	What grain-handling operations does this chapter cover?
296-99-020	What definitions apply to this chapter?
296-99-025	What are the requirements for an emergency action plan?
296-99-030	What training must an employer provide for employees?
296-99-035	When must an employer issue a hot work permit?
296-99-040	What practices must an employer follow for entry into grain storage structures?
296-99-045	What information must an employer provide to contractors?
296-99-050	What elements must an employer include in the house-keeping program?
296-99-055	What is the maximum allowable grate opening size?
296-99-060	How must filter collectors be installed?
296-99-065	What preventive maintenance program must an employer implement?
296-99-070	How must grain stream processing equipment be equipped?
296-99-075	How many means of emergency escape must an employer provide?
296-99-080	How must continuous-flow bulk raw grain dryers be equipped and installed?
296-99-085	What special requirements apply to inside bucket elevators?
296-99-090	Reserved.
296-99-093	Reserved.
296-99-095	Reserved.

WAC 296-99-010 What safety hazards does this chapter require the employer to control? This chapter directs the employer to control dust fires, explosions and other safety hazards in grain handling facilities including the waterfront dock areas at marine terminals (chapter 296-56 WAC will not apply).

All provisions from chapters 296-24 and 296-62 WAC also apply. If rules in either of these chapters conflict with rules in chapter 296-99 WAC, chapter 296-99 WAC will prevail.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-010, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-010, filed 11/14/88.]

WAC 296-99-015 What grain-handling operations does this chapter cover? (1) WAC 296-99-010 through 296-99-070 apply to:

- Dry grinding operations of soycake;
- Dry corn mills;
- Dust pelletizing plants;
- Feed mills;
- Flour mills;
- Flat storage structures;
- Grain elevators;
- Rice mills; and
- Soybean flaking operations.

(2) WAC 296-99-075, 296-99-080, and 296-99-085 apply only to grain elevators.

(3) Chapter 296-99 WAC does not apply to alfalfa storage or processing operations if they do not use grain products.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-015, filed 11/3/97, effective 1/1/98; 90-03-029 (Order 89-20), § 296-99-015, filed 1/11/90, effective 2/26/90; 88-23-054 (Order 88-25), § 296-99-015, filed 11/14/88.]

WAC 296-99-020 What definitions apply to this chapter? "Choked leg" means excess material buildup that stops the movement of grain and of the bucket elevator. A bucket elevator is not considered choked if it moves and the boot and discharge are clear.

"Flat storage structure" means a grain storage structure that:

- Can not empty by gravity alone;
- Can be entered through an opening at ground level; and
- Must be entered to remove leftover grain.

"Fugitive grain dust" means combustible grain dust particles, accumulated inside storage structures, that are small enough to pass through a U.S. Standard 40 mesh sieve (425 microns or less).

"Grain" means raw and processed grain of cereal grass seeds and grain products handled in facilities within the scope of WAC 296-99-015(1).

"Grain elevator" means a facility in which bulk raw grains are stored by means of elevating machinery for later shipment.

"Hot work" means work that involves electric or gas welding, cutting, brazing or similar heat-producing tasks that could be a source of ignition.

"Inside bucket elevator" means a bucket elevator with the boot and more than twenty percent of the total leg height (above grade or ground level) inside a grain elevator structure. Bucket elevators used inside of rail or truck dump sheds are not considered inside bucket elevators.

"Lagging" means a covering on drive pulleys used to increase the driving friction between the pulley and the belt.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-020, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-020, filed 11/14/88.]

WAC 296-99-025 What are the requirements for an emergency action plan? The employer must develop and implement an emergency action plan that meets the requirements of WAC 296-24-567.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-025, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-025, filed 11/14/88.]

WAC 296-99-030 What training must an employer provide for employees? (1) The employer must train employees:

- (a) Annually; and
- (b) Whenever a new job assignment exposes an employee to a new hazard.

(2) The employer must ensure that employees are trained in the following:

(2001 Ed.)

(a) General safety precautions against fires and explosions, including how to recognize and prevent the hazards of excess dust accumulation and ignition sources.

(b) Specific procedures and safety practices for job tasks including, but not limited to:

- Cleaning grinding equipment;
- Clearing choked legs;
- Housekeeping;
- Hot work; and
- Preventive maintenance.

(3) The employer must provide additional training for employees who are assigned special tasks, including but not limited to:

(a) Procedures for grain storage entry according to WAC 296-62-145, confined space entry, and how to:

- Control hazardous energy (lockout/tagout) according to WAC 296-24-110;
- Avoid getting buried by moving grain (engulfment);
- Avoid falling from heights; and
- Prevent mechanical hazards.

(b) How to handle flammable or toxic substances.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-030, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-030, filed 11/14/88.]

WAC 296-99-035 When must an employer issue a hot work permit? (1) Before allowing an employee to start any hot work, the employer must:

(a) Issue to the employee a permit that states that all safety precautions required by WAC 296-24-695 are in place; and

(b) Keep the permit on file until the hot work is complete.

(2) The employer may allow an employee to perform hot work without a permit if:

(a) The employer's representative personally monitors the hot work to prevent employee exposure to injury from either fire or explosion during the entire operation; or

(b) The hot work is done in welding shops authorized by the employer; or

(c) The hot work is done in hot work areas authorized by the employer which are located outside of the grain handling structure.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-035, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-035, filed 11/14/88.]

WAC 296-99-040 What practices must an employer follow for entry into grain storage structures? This section applies to employee entry into all grain storage structures.

(1) The employer must ensure that the practice of walking down grain is prohibited. "Walking down grain" means an employee walks on grain to make it flow within or out from a grain storage structure, or an employee is on moving grain.

(2) The employer must ensure that during the entry and occupation of a storage structure the employee uses:

- A body harness with a lifeline; or
- A boatswain's chair that meets the requirements of Part J-1 of chapter 296-24 WAC whenever:

(a) The employee is exposed to a fall hazard such as when entering from the top or above the level of the stored grain; or

(b) The employee is exposed to an engulfment hazard such as when entering at the level of the stored grain, or while walking or standing on the grain. The lifeline must be rigged so that its position and length will prevent the employee from sinking below waist level.

(3) The employer must ensure that during the occupation of storage structures, including walking or standing on grain, employees are protected from hazards related to:

- Mechanical;
- Electrical;
- Hydraulic; and
- Pneumatic equipment.

By using safeguards, lockout-tagout, or other equally effective means. All provisions for the control of hazardous energy (lockout/tagout) from WAC 296-24-110 apply to this chapter.

(4) The employer must ensure that employees are prohibited from entering any storage structure where a build-up of grain overhead (bridging) or on the sides could fall and bury them.

(5) The employer must ensure, as minimum precautions, that employee entry and occupation of all grain storage structures including flat storage structures is done according to all applicable requirements of WAC 296-62-145, confined space, when the storage structure:

- Has limited or restricted means of entry and exit; and
- Is not designed for continuous employee occupancy.

(6) The employer may allow an employee to perform confined space entry work in grain storage structures without a permit if the employer's representative personally monitors the work to prevent employee exposure to illness or injury from atmospheric hazards during the entire operation.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-040, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-040, filed 11/14/88.]

WAC 296-99-045 What information must an employer provide to contractors? (1) The employer must inform contractors working at the grain handling facility of:

(a) General safety rules; and

(b) Specific fire and explosion hazards related to the contractor's work and work area.

(2) The employer must explain the emergency action plan to each contractor.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-045, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-045, filed 11/14/88.]

WAC 296-99-050 What elements must an employer include in the housekeeping program? (1) The employer must develop and enforce a written housekeeping program that:

(a) Establishes frequency and methods for reducing and cleaning up hazardous accumulations of fugitive grain dust;

(b) Identifies priority areas for clean up of hazardous accumulations of fugitive grain dust, including floor areas:

- Within thirty-five feet (10.7 m) of inside bucket elevators;
- Of enclosed grinding equipment; and
- Of enclosed grain dryers located inside the facility; and

(c) Requires that fugitive grain dust is cleaned up immediately whenever accumulations exceed one-eighth inch (.32 cm) at priority housekeeping areas, or provide protection against fire and explosion that is equal to the required clean up.

(2) The employer must prohibit the use of compressed air to blow dust from ledges, walls, and other areas unless all machinery that provides an ignition source in the area is shut down, and all other known potential ignition sources in the area are removed or controlled.

(3) The employer must also ensure that the housekeeping program addresses procedures for removing grain and product spills from work areas. Spills are not considered fugitive grain dust accumulations.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-050, filed 11/3/97, effective 1/1/98; 91-11-070 (Order 91-01), § 296-99-050, filed 5/20/91, effective 6/20/91; 90-03-029 (Order 89-20), § 296-99-050, filed 1/11/90, effective 2/26/90; 88-23-054 (Order 88-25), § 296-99-050, filed 11/14/88.]

WAC 296-99-055 What is the maximum allowable grate opening size? The employer must ensure that receiving-pit feed openings, such as truck or railcar receiving-pits, are covered by grates with maximum openings of two and one-half inches (6.35 cm).

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-055, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-055, filed 11/14/88.]

WAC 296-99-060 How must filter collectors be installed? (1) The employer must ensure that, on a pneumatic dust collection system, each fabric dust filter collector has a monitoring device that will show a pressure drop across the surface of its filter.

(2) The employer must ensure that each filter collector installed after March 30, 1988, is:

(a) Located outside the facility; or

(b) When located inside the facility, protected by an explosion suppression system; or

(c) Isolated by a structure with at least a one hour fire-resistance rating:

- Next to an exterior wall;
- Vented to the outside; and
- The vent and ductwork must resist rupture from intense heat.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-060, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-060, filed 11/14/88.]

WAC 296-99-065 What preventive maintenance program must an employer implement? (1) The employer must implement a written program that covers the requirements of WAC 296-24-110, The control of hazardous energy (lockout/tagout).

(2) The employer must implement preventive maintenance procedures that include the following:

(a) Conducting regularly scheduled inspections for specified machinery.

(b) Preparing written inspection reports kept on file that include:

- The date of each inspection;
- The name of the inspector; and
- The serial number, or other identification of the machinery as described next in (c) of this subsection.

(c) Conducting regularly scheduled inspections and completing immediate repairs of the mechanical equipment and safety controls of the following machinery:

- Grain dryers;
- Grain stream processing equipment;
- Dust collection systems including their filter collectors that malfunction or operate below designed efficiency;
- Overheated bearings; and
- Slipping or misaligned belt drives for inside bucket elevators.

When immediate repairs are not feasible, then the affected machine must be taken out of service.

(d) Performing lubrication and other maintenance according to manufacturers' recommendations or more often when needed, such as when operating records indicate that a more stringent schedule is necessary.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-065, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-065, filed 11/14/88.]

WAC 296-99-070 How must grain stream processing equipment be equipped? The employer must ensure that the following grain stream processing equipment has an effective means of removing ferrous material from the incoming grain:

- Hammer mills;
- Grinders; and
- Pulverizers.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-070, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-070, filed 11/14/88.]

WAC 296-99-075 How many means of emergency escape must an employer provide? The employer must provide the following number of emergency escape means:

Structure	Number of escape means
Galleries (bin decks)	Two
Tunnels of grain elevators constructed after November 14, 1988	Two
Tunnels of grain elevators constructed on or before November 14, 1988	One

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-075, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-075, filed 11/14/88.]

WAC 296-99-080 How must continuous-flow bulk raw grain dryers be equipped and installed? (1) The employer must ensure that all direct-heat grain dryers have automatic controls that:

(a) Shut off the fuel supply in case of power, flame, or ventilation airflow shut-off; and

(b) Stop the grain flow into the dryer if the dryer exhaust gets too hot.

(2) The employer must ensure that each direct-heat grain dryer installed after March 30, 1988, is:

- (a) Located outside the grain elevator; or
- (b) When located inside the grain elevator, protected by a fire or explosion suppression system; or
- (c) Isolated by a structure with at least a one hour fire-resistance rating.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-080, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-080, filed 11/14/88.]

WAC 296-99-085 What special requirements apply to inside bucket elevators? (1) The employer must prohibit jogging of a bucket elevator to free a choked leg.

"Jogging" means to start and stop drive motors repeatedly over short intervals.

(2) The employer must ensure that all belts and lagging purchased after March 30, 1988, are conductive and have a maximum surface electrical resistance of 300 megohms.

(3) The employer must ensure that all bucket elevators have safe access to the head pulley section for inspection of the head pulley, lagging, belt, and discharge throat. The boot section must also have safe access for its clean-out and inspection of the pulley and belt.

- (4) The employer must:
- (a) Mount bearings externally to the leg casing; or
 - (b) Have vibration and temperature monitoring; or
 - (c) Have other means to monitor the condition of bearings mounted inside or partially inside the leg casing.

(5) The employer must ensure that bucket elevators have a motion detection device that will stop the elevator if belt speed is reduced to less than eighty percent of normal operating speed.

- (6) The employer must:
- (a) Ensure that bucket elevators have a belt alignment monitoring device that will initiate an alarm to employees when the belt is not tracking properly; or
 - (b) Use a system to keep the belt tracking properly.

(7) Subsections (5) and (6) of this section do not apply to grain elevators with a permanent storage capacity of less than one million bushels, if daily visual inspection is made of bucket movement and belt tracking.

(8) Subsections (4), (5), and (6) of this section do not apply to the following:

- (a) Bucket elevators with an operational fire and explosion suppression system capable of protecting at least the head and boot section of the bucket elevator; or
- (b) Bucket elevators with pneumatic or other dust control systems or methods that keep the dust concentration inside the bucket elevator at least twenty-five percent below the lower explosive limit at all times during operations.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-085, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-085, filed 11/14/88.]

WAC 296-99-090 Reserved.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-090, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-090, filed 11/14/88.]

WAC 296-99-093 Reserved.

[Statutory Authority: Chapter 49.17 RCW. 97-22-065, § 296-99-093, filed 11/3/97, effective 1/1/98; 88-23-054 (Order 88-25), § 296-99-093, filed 11/14/88.]

WAC 296-99-095 Reserved.

Chapter 296-104 WAC**BOARD OF BOILER RULES—SUBSTANTIVE****WAC**

296-104-001	Administration—To what do these rules apply?
296-104-010	Administration—What are the definitions of terms used in this chapter?
296-104-015	Administration—When and where are the board meetings held?
296-104-017	Administration—How are rules affected if other rules are invalidated?
296-104-018	Administration—How are rules interpreted and revised?
296-104-020	Administration—What are the filing requirements for boilers and pressure vessels before their installation?
296-104-025	Administration—What are the notification requirements following an accident involving a boiler or pressure vessel?
296-104-030	Administration—What is the penalty for operation of unsafe boilers or unfired pressure vessels?
296-104-035	Administration—What are conflicts of interest for inspectors?
296-104-040	Administration—When should inspectors submit inspection reports and on what forms?
296-104-045	Administration—What are the insurance companies' responsibilities?
296-104-050	Administration—What examinations must a boiler inspector take?
296-104-055	Administration—What are the examination fees?
296-104-060	Administration—When shall inspectors' commissions be issued, suspended, or revoked?
296-104-065	Administration—How should a certified or commissioned inspector obtain a Washington state commission?
296-104-100	Inspection—How often must boilers and unfired pressure vessels be inspected?
296-104-102	Inspection—What are the standards for in-service inspection?
296-104-105	Inspection—How much time is required for notification of inspection?
296-104-110	Inspection—What will be done when boilers or unfired pressure vessels are deemed unsafe or defective?
296-104-115	Inspection—What will be done when defective conditions are concealed by covering?
296-104-125	Inspection—Are certificate fees required?
296-104-130	Inspection—When are inspection certificates valid?
296-104-135	Inspection—What are the requirements for restamping of boilers and unfired pressure vessels?
296-104-140	Inspection—How should a state stamp be applied?
296-104-145	Inspection—How are groups of vessels operating as a single unit classified?
296-104-150	Inspection—How are unfired steam boilers classified?
296-104-151	Inspection—What are the requirements for rental boilers?
296-104-155	Inspection—What preparations are necessary prior to internal inspections?
296-104-160	Inspection—What happens if a boiler or unfired pressure vessel is improperly prepared for inspection?
296-104-165	Inspection—When should coverings be removed for inspection?
296-104-170	Inspection—When are shop inspections required?
296-104-180	Inspection—How are radioactive systems inspected?

296-104-200	Construction—What are the standards for new construction?
296-104-205	Construction—What are the requirements for nonstandard new construction?
296-104-210	Construction—What are the requirements for construction of boilers and unfired pressure vessels of special design?
296-104-215	Construction—What are the requirements to use nonstandard boilers and unfired pressure vessels constructed prior to January 1, 1952?
296-104-220	Construction—What are the requirements to use nonstandard second hand boilers and unfired pressure vessels?
296-104-230	Construction—What are the testing requirements for new vessels exempted from code requirements for volume, pressure or temperature?
296-104-235	Construction—What are the requirements for code exempted boiler and unfired pressure vessel safety relief valves?
296-104-240	Construction—When are piping components considered unfired pressure vessels?
296-104-245	Construction—Combustible fluid heaters.
296-104-255	Installation—Clearance at top of boilers.
296-104-256	Installation—Reinstalled standard boiler or unfired pressure vessel.
296-104-260	Installation—Clearance front, back and sides.
296-104-265	Installation—What control and limit devices are required on boilers?
296-104-270	Installation—What are the requirements for an explosion door?
296-104-273	Installation—Pressure vessel clearances.
296-104-300	Installation—When do I need to provide platforms around boilers?
296-104-305	Installation—How many exits are required in boiler rooms?
296-104-307	Installation—What safety pressure relief devices are required on boilers and pressure vessels?
296-104-310	Installation—Where should the discharge from safety valves, blow offs and drains be directed?
296-104-320	Installation—What are the requirements for underground installations?
296-104-325	Installation—What are the requirements for boiler and pressure vessel supports?
296-104-330	Installation—What are the relief or safety valve requirements when pressure reducing valves are used?
296-104-405	Existing installation—How can the maximum allowable working pressure be established for nonstandard boilers or unfired pressure vessels?
296-104-502	Repairs—What are the requirements for nonnuclear boilers and unfired pressure vessel repairs and alterations?
296-104-510	Repairs—Do riveted patches require prior approval?
296-104-515	Repairs—What are the requirements for repair of non-nuclear safety devices?
296-104-520	Repairs—When a lap seam crack is discovered along a riveted longitudinal joint what action is required and what repairs are allowed?
296-104-530	Repairs—Can air or vapor testing be performed?
296-104-535	Repairs—What are the requirements for nuclear repairs/replacement?
296-104-540	Repairs—What are the requirements for nuclear repairs of safety devices?
296-104-700	What are the inspection fees—Certificate fees—Expenses?
296-104-701	What are the civil penalties?

DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER

296-104-002	Approval by director. [Approval, filed 3/23/60.] Repealed by 99-22-026, filed 10/26/99, effective 11/26/99. Statutory Authority: RCW 70.79.030 and 70.79.040.
296-104-107	Inspection—Which unfired pressure vessels in places of public assembly are subject to these rules? [Statutory Authority: RCW 70.79.030 and 70.79.040. 97-20-109, § 296-104-107, filed 9/30/97, effective 10/31/97.] Repealed by 99-22-026, filed 10/26/99, effective 11/26/99. Statutory Authority: RCW 70.79.030 and 70.79.040.
296-104-120	Inspection—Condemned boilers or unfired pressure vessel. [Statutory Authority: RCW 70.79.040. 91-11-107, § 296-104-120, filed 5/22/91, effective 6/22/91; Part III, § 5, filed 3/23/60.] Repealed by 95-19-058,

- filed 9/15/95, effective 10/16/95. Statutory Authority: RCW 70.79.030 and 70.79.040.
- 296-104-195 Pressure vessel clearances. [Statutory Authority: RCW 70.79.040. 90-04-009, § 296-104-195, filed 1/26/90, effective 2/26/90.] Repealed by 96-21-081, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.030 and 70.79.040.
- 296-104-201 Inspection of systems—Standard for water chillers. [Statutory Authority: RCW 70.79.030. 80-14-015 (Order 80-12), § 296-104-201, filed 9/23/80.] Repealed by 86-01-088 (Order 85-26), filed 12/19/85. Statutory Authority: RCW 70.79.040 and 70.79.050.
- 296-104-225 Inspection of systems—Reinstalled boiler or unfired pressure vessel. [Part IV, § 6, filed 3/23/60.] Repealed by 96-21-081, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.030 and 70.79.040.
- 296-104-250 Inspection of systems—Hot water heating systems. [Part IV, § 11, filed 3/23/60.] Repealed by 78-03-057 (Order 78-3), filed 2/22/78. Statutory Authority: RCW 70.79.030.
- 296-104-275 Inspection of systems—Hydro-pneumatic tanks. [Part IV, § 16, filed 3/23/60.] Repealed by 78-03-057 (Order 78-3), filed 2/22/78. Statutory Authority: RCW 70.79.030.
- 296-104-280 Inspection of systems—Electric steam generators. [Part IV, § 17, filed 3/23/60.] Repealed by 78-03-057 (Order 78-3), filed 2/22/78. Statutory Authority: RCW 70.79.030.
- 296-104-285 Unfired pressure vessels in places of public assembly. [Statutory Authority: RCW 70.79.030. 78-03-057 (Order 78-3), § 296-104-285, filed 2/22/78.] Repealed by 99-08-049, filed 4/1/99, effective 5/2/99. Statutory Authority: RCW 70.79.030 and 70.79.040.
- 296-104-315 New installations—Blow off tanks. [Statutory Authority: RCW 70.79.030. 78-03-057 (Order 78-3), § 296-104-315, filed 2/22/78; Part V, § 4, filed 3/23/60.] Repealed by 89-15-025 (Order 89-05), filed 7/13/89, effective 8/13/89. Statutory Authority: Chapter 70.79 RCW.
- 296-104-400 Existing installations—Stamping of existing boilers and unfired pressure vessels. [Statutory Authority: RCW 70.79.040. 90-20-029, § 296-104-400, filed 9/24/90, effective 10/25/90; Part VI, § 1, filed 3/23/60.] Repealed by 97-20-109, filed 9/30/97, effective 10/31/97. Statutory Authority: RCW 70.79.030 and 70.79.040.
- 296-104-410 Existing installations—Noncode steel heating boilers. [Part VI, § 3, filed 3/23/60.] Repealed by 97-20-109, filed 9/30/97, effective 10/31/97. Statutory Authority: RCW 70.79.030 and 70.79.040.
- 296-104-415 Existing installations—Noncode cast iron boilers. [Part VI, § 4, filed 3/23/60.] Repealed by 97-20-109, filed 9/30/97, effective 10/31/97. Statutory Authority: RCW 70.79.030 and 70.79.040.
- 296-104-500 Nonnuclear repairs. [Statutory Authority: RCW 70.79.040. 93-12-014, § 296-104-500, filed 5/21/93, effective 6/21/93; 92-11-070, § 296-104-500, filed 5/20/92, effective 6/20/92. Statutory Authority: RCW 70.79.030. 86-04-059 (Order 86-01), § 296-104-500, filed 2/4/86. Statutory Authority: RCW 70.79.030 and 70.79.330. 84-21-012 (Order 84-20), § 296-104-500, filed 10/5/84; Part VII, § 1, filed 3/23/60.] Repealed by 94-21-002, filed 10/5/94, effective 11/5/94. Statutory Authority: RCW 70.79.040.
- 296-104-501 Nonnuclear alterations. [Statutory Authority: RCW 70.79.040. 93-12-014, § 296-104-501, filed 5/21/93, effective 6/21/93; 92-11-070, § 296-104-501, filed 5/20/92, effective 6/20/92. Statutory Authority: RCW 70.79.030. 86-04-059 (Order 86-01), § 296-104-501, filed 2/4/86.] Repealed by 94-21-002, filed 10/5/94, effective 11/5/94. Statutory Authority: RCW 70.79.040.
- 296-104-505 Repairs—Repairs by fusion welding. [Part VII, § 2, filed 3/23/60.] Repealed by 94-21-002, filed 10/5/94, effective 11/5/94. Statutory Authority: RCW 70.79.040.
- 296-104-525 Repairs—Hydrostatic pressure tests. [Part VII, § 6, filed 3/23/60.] Repealed by 98-22-024, filed 10/28/98, effective 11/28/98. Statutory Authority: RCW 70.79.030 and 70.79.040.
- 296-104-600 General requirements—Conditions not covered by these rules. [Part VIII, § 1, filed 3/23/60.] Repealed by 98-22-024, filed 10/28/98, effective 11/28/98. Statutory Authority: RCW 70.79.030 and 70.79.040.

- 296-104-800 Inspection of systems subject to radioactivity. [Statutory Authority: RCW 70.79.240. 88-01-064 (Order 87-25), § 296-104-800, filed 12/17/87.] Repealed by 98-22-024, filed 10/28/98, effective 11/28/98. Statutory Authority: RCW 70.79.030 and 70.79.040.
- 296-104-801 Nuclear repairs/replacement. [Statutory Authority: RCW 70.79.040. 91-11-106, § 296-104-801, filed 5/22/91, effective 6/22/91.] Repealed by 98-22-024, filed 10/28/98, effective 11/28/98. Statutory Authority: RCW 70.79.030 and 70.79.040.
- 296-104-805 Nuclear repairs—Safety devices. [Statutory Authority: RCW 70.79.040. 91-11-106, § 296-104-805, filed 5/22/91, effective 6/22/91.] Repealed by 98-22-024, filed 10/28/98, effective 11/28/98. Statutory Authority: RCW 70.79.030 and 70.79.040.

WAC 296-104-001 Administration—To what do these rules apply? The following rules and regulations apply to all boilers and unfired pressure vessels except those exempt under RCW 70.79.080. Boilers and unfired pressure vessels listed under RCW 70.79.090 are exempt from inspection and fees, but shall comply with all rules for construction, installation, repairs and general requirements.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-001, filed 10/26/99, effective 11/26/99; Promulgation, filed 3/23/60.]

WAC 296-104-010 Administration—What are the definitions of terms used in this chapter? "Agriculture purposes" shall mean any act performed on a farm in production of crops or livestock, and shall include the storage of such crops and livestock in their natural state, but shall not be construed to include the processing or sale of crops or livestock.

"Attendant" shall mean the person in charge of the operation of a boiler or unfired pressure vessel.

"Automatic operation of a boiler" shall mean unattended control of feed water and fuel in order to maintain the pressure and temperature within the limits set. Controls must be such that the operation follows the demand without interruption. Manual restart may be required when the burner is off because of low water, flame failure, power failure, high temperatures or pressures.

"Board of boiler rules" or "board" shall mean the board created by law and empowered under RCW 70.79.010.

"Boilers and/or pressure vessels" - below are definitions for types of boilers and pressure vessels used in these regulations:

- "Condemned boiler or unfired pressure vessel" shall mean a boiler or unfired pressure vessel that has been inspected and declared unsafe or disqualified by legal requirements by an inspector who has applied a stamping or marking designating its condemnation.
- "Hot water heater" shall mean a closed vessel designed to supply hot water for external use to the system. All vessels must be listed by a nationally recognized testing agency and shall not exceed any of the following limits:
 - * Pressure of 160 psi (1100 kpa);
 - * Temperature of 210 degrees F (99°C);
 - * Capacity of 120 U.S. gallons (454 liters);
 - * Input of 200,000 BTU/hr (58.58 kw).

Each vessel shall be protected with an approved temperature and pressure safety relief valve.

- **"Low pressure heating boiler"** shall mean a steam or vapor boiler operating at a pressure not exceeding 15 psig or a boiler in which water or other fluid is heated and intended for operation at pressures not exceeding 160 psig or temperatures not exceeding 250 degrees F by the direct application of energy from the combustion of fuels or from electricity, solar or nuclear energy including lined potable water heaters.
 - **"Nonstandard boiler or unfired pressure vessel"** shall mean a boiler or unfired pressure vessel that does not bear marking of the codes adopted in WAC 296-104-200.
 - **"Pool heaters"** shall be considered a boiler or unfired pressure vessel unless it meets all of the following criteria:
 - * Appliance used to heat water for swimming pools and spas.
 - * Operates at pump pressure but in no case exceed 15 psig.
 - * Appliance is equipped with a flow switch, or a pressure switch set at a maximum of 15 psig.
 - * There are no intervening stop valves on the inlet or discharge side of the unit. Any valves used for maintaining the appliance must be locked open during operation in accordance with a written program that is acceptable to the inspector.
 - * Discharge piping is not reduced from the engineered sizing of the unit.
 - * Appliance is equipped with an ASME approved pressure relief device set at 15 psig or lower.
 - * Unit is rated at less than 400,000 BTU/hr.
 - * Heating source operation is wired in series with the circulating pump.
 - * Unit is built to the ASME code or approved by a nationally or internationally recognized testing laboratory.
 - **"Power boiler"** shall mean a boiler in which steam or other vapor is generated at a pressure of more than 15 psig for use external to itself or a boiler in which water or other fluid is heated and intended for operation at pressures in excess of 160 psig and/or temperatures in excess of 250 degrees F by the direct application of energy from the combustion of fuels or from electricity, solar or nuclear energy.
 - **"Reinstalled boiler or unfired pressure vessel"** shall mean a boiler or unfired pressure vessel removed from its original setting and reset at the same location or at a new location without change of ownership.
 - **"Rental boiler"** shall mean any power or low pressure heating boiler that is under a rental contract between owner and user.
 - **"Second hand boiler or unfired pressure vessel"** shall mean a boiler or unfired pressure vessel of which both the location and ownership have changed after primary use.
 - **"Standard boiler or unfired pressure vessel"** shall mean a boiler or unfired pressure vessel which bears the marking of the codes adopted in WAC 296-104-200.
 - **"Unfired pressure vessel"** shall mean a closed vessel under pressure excluding:
 - * Fired process tubular heaters;
 - * Pressure containers which are integral parts of components of rotating or reciprocating mechanical devices where the primary design considerations and/or stresses are derived from the functional requirements of the device;
 - * Piping whose primary function is to transport fluids from one location to another;
 - * Those vessels defined as low pressure heating boilers or power boilers.
 - **"Unfired steam boiler"** shall mean a pressure vessel in which steam is generated by an indirect application of heat. It shall not include pressure vessels known as evaporators, heat exchangers, or vessels in which steam is generated by the use of heat resulting from the operation of a processing system containing a number of pressure vessels, such as used in the manufacture of chemical and petroleum products, which will be classed as unfired pressure vessels.
- "Certificate of competency"** shall mean a certificate issued by the state board of boiler rules to a person who has passed an examination prescribed by the board of boiler rules.
- "Code, API-510"** shall mean the Pressure Vessel Inspection Code of the American Petroleum Institute with addenda and revisions, thereto made and approved by the institute which have been adopted by the board of boiler rules in accordance with the provisions of RCW 70.79.030.
- "Code, ASME"** shall mean the boiler and pressure vessel code of the American Society of Mechanical Engineers with amendments thereto made and approved by the council of the society which have been adopted by the board of boiler rules in accordance with the provisions of RCW 70.79.030.
- "Code, NBIC"** shall mean the National Board Inspection Code of the National Board of Boiler and Pressure Vessel Inspectors with addenda and revisions, thereto made and approved by the National Board of Boiler and Pressure Vessel Inspectors and adopted by the board of boiler rules in accordance with the provisions of RCW 70.79.030.
- "Commission"** shall mean an annual state commission/commission card issued to a person in the employ of the state, an insurance company or a company owner/user inspection agency holding a certificate of competency which authorizes them to perform inspections of boilers and/or unfired pressure vessels.
- "Department"** as used herein shall mean the department of labor and industries of the state of Washington.
- "Director"** shall mean the director of the department of labor and industries.
- "Domestic and/or residential purposes"** shall mean serving a private residence or an apartment house of less than six families.
- "Existing installations"** shall mean any boiler or unfired pressure vessel constructed, installed, placed in operation, or contracted for before January 1, 1952.
- "Inspection, external"** shall mean an inspection made while a boiler or unfired pressure vessel is in operation and includes the inspection and demonstration of controls and safety devices required by these rules.
- "Inspection, internal"** shall mean an inspection made when a boiler or unfired pressure vessel is shut down and handholes, manholes, or other inspection openings are open or removed for examination of the interior. An external ultrasonic examination of unfired pressure vessels less than 36" inside diameter shall constitute an internal inspection.

"Inspector" shall mean the chief boiler inspector, a deputy inspector, or a special inspector.

- "Chief inspector" shall mean the inspector appointed under RCW 70.79.100 who serves as the secretary to the board without a vote.
- "Deputy inspector" shall mean an inspector appointed under RCW 70.79.120.
- "Special inspector" shall mean an inspector holding a Washington commission identified under RCW 70.79.130.

"Nationwide engineering standard" shall mean a nationally accepted design method, formulae and practice acceptable to the board.

"Owner" or "user" shall mean a person, firm, or corporation owning or operating any boiler or unfired pressure vessel within the state.

"Owner/user inspection agency" shall mean an owner or user of boilers and/or pressure vessels that maintains an established inspection department, whose organization and inspection procedures meet the requirements of a nationally recognized standard acceptable to the department.

"Place of public assembly" or "assembly hall" shall mean a building or portion of a building used for the gathering together of 50 or more persons for such purposes as deliberation, education, instruction, worship, entertainment, amusement, drinking, or dining or waiting transportation. This shall also include child care centers (those agencies which operate for the care of thirteen or more children), public and private hospitals, nursing and boarding homes.

"Special design" shall mean a design using nationwide engineering standards other than the codes adopted in WAC 296-104-200 or other than allowed in WAC 296-104-230.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW 00-21-024, § 296-104-010, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-010, filed 10/26/99, effective 11/26/99; 98-22-024, § 296-104-010, filed 10/28/98, effective 11/28/98; 96-21-081, § 296-104-010, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.040. 94-21-002, § 296-104-010, filed 10/5/94, effective 11/5/94; 93-12-014, § 296-104-010, filed 5/21/93, effective 6/21/93; 92-11-070, § 296-104-010, filed 5/20/92, effective 6/20/92. Statutory Authority: RCW 70.79.240. 88-01-064 (Order 87-25), § 296-104-010, filed 12/17/87. Statutory Authority: RCW 70.79.040 and 70.79.050. 86-01-088 (Order 85-26), § 296-104-010, filed 12/19/85; Order 72-11, § 296-104-010, filed 7/7/72; Part I, filed 3/23/60.]

WAC 296-104-015 Administration—When and where are the board meetings held? The board of boiler rules shall hold its regular meetings in January, March, May, September and November of each year. The time, place, and date of each regular meeting shall be set by the chairman of the board and published annually. Special meetings may be called by the chair.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-015, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-015, filed 9/15/95, effective 10/16/95. Statutory Authority: RCW 70.79.040. 91-11-107, § 296-104-015, filed 5/22/91, effective 6/22/91. Statutory Authority: RCW 70.79.050. 90-07-082, § 296-104-015, filed 3/21/90, effective 4/21/90. Statutory Authority: RCW 70.79.040 and 70.79.050. 86-01-088 (Order 85-26), § 296-104-015, filed 12/19/85; Order 72-11, § 296-104-015, filed 7/7/72.]

WAC 296-104-017 Administration—How are rules affected if other rules are invalidated? Should any section,

(2001 Ed.)

subsection, sentence, clause, phrase, provision or exemption of these rules be declared unconstitutional or invalid for any reason, such invalidity shall not affect the remaining portion or provisions.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 98-22-024, § 296-104-017, filed 10/28/98, effective 11/28/98.]

WAC 296-104-018 Administration—How are rules interpreted and revised? Stakeholders may request clarifications and interpretations of these rules by contacting the chief inspector. Interpretations will be brought to the board if the inquirer is aggrieved by the interpretation of the chief inspector (RCW 70.79.360). The board will consider written requests for interpretations and revisions to these definitions, rules, and regulations. Inquiries shall be limited to requests for interpretation of the rules or to proposed revisions to the existing rules and shall be submitted in the following format:

(1) Scope. Identify a single rule or closely related rules that are in dispute.

(2) Background. State the purpose of the inquiry, which should be either to obtain an interpretation or to propose a revision to existing rules. Provide concise information needed for the board's understanding of the inquiry, including references to the WAC section as well as other code and/or standards paragraphs.

(3) Inquiry structure. Provide statements in a condensed and precise question format and, where appropriate, compose in such a way that "yes" or "no" (perhaps with provisos) would be an acceptable reply.

(4) Proposed reply. State what it is believed the rule requires. If in the inquirer's opinion a revision to the definitions, rules, and regulations is needed, recommended wording should be provided.

Inquiries shall be submitted by mail to:

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-018, filed 10/26/99, effective 11/26/99. Statutory Authority: RCW 70.79.040. 92-11-070, § 296-104-018, filed 5/20/92, effective 6/20/92.]

WAC 296-104-020 Administration—What are the filing requirements for boilers and pressure vessels before their installation? Manufacturers data reports on boilers and pressure vessels as required by the provisions of the construction codes shall be filed by the owner or his agent with the chief inspector or the National Board of Boiler and Pressure Vessel Inspectors before installation. When the boilers or

pressure vessel are of special design or construction not covered by the construction codes (unless otherwise exempted by the rules and regulations), the owner or user shall apply to the board of boiler rules in writing for permission to install such boilers or pressure vessels and shall supply such details of design and construction as may be required by the board of boiler rules and approval shall be secured before construction is started. When second hand boilers or pressure vessels are to be reinstalled, the owner or user shall file a data report or construction details, as required, and secure approval from the chief inspector before starting installation.

[Statutory Authority: RCW 70.79.030 and 70.79.040, 99-22-026, § 296-104-020, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-020, filed 9/15/95, effective 10/16/95; Order 74-37, § 296-104-020, filed 11/8/74; Part II, § 1, filed 3/23/60.]

WAC 296-104-025 Administration—What are the notification requirements following an accident involving a boiler or pressure vessel? When an accident occurs which renders a boiler or unfired pressure vessel inoperative, the owner or user shall notify the chief inspector, and submit a detailed report of the accident. In cases of accidents, such as explosions or those resulting in personal injury, notice to the chief inspector shall be given immediately by telephone or electronic means designed to assure its earliest possible receipt. Neither the boiler or unfired pressure vessel nor any parts thereof shall be removed or disturbed before an inspection has been made by the chief inspector, or his designee except for the purpose of saving life or limiting consequential damage. The inspector making the investigation and inspection shall report to the chief inspector as soon as possible. The boiler or pressure vessel owner shall be responsible for all costs of the department's investigation.

[Statutory Authority: RCW 70.79.030 and 70.79.040, 99-22-026, § 296-104-025, filed 10/26/99, effective 11/26/99; 96-21-081, § 296-104-025, filed 10/16/96, effective 11/16/96; 95-19-058, § 296-104-025, filed 9/15/95, effective 10/16/95; Part II, § 2, filed 3/23/60.]

WAC 296-104-030 Administration—What is the penalty for operation of unsafe boilers or unfired pressure vessels? In the event that a boiler or unfired pressure vessel is unsafe to operate, the inspection certificate shall be suspended. Any person, firm, partnership, or corporation causing such objects to be operated under pressure without a valid certificate of inspection shall be in violation of RCW 70.79.320 and subject to the penalties specified in WAC 296-104-701.

[Statutory Authority: RCW 70.79.030 and 70.79.040, 99-22-026, § 296-104-030, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-030, filed 9/15/95, effective 10/16/95; Part II, § 3, filed 3/23/60.]

WAC 296-104-035 Administration—What are conflicts of interest for inspectors? Inspectors commissioned by the state of Washington shall not engage in the sale of any service, article, or device or promote any other activity for personal gain relating to boilers or unfired pressure vessels or their appurtenances.

[Statutory Authority: RCW 70.79.030 and 70.79.040, 99-22-026, § 296-104-035, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-035, filed 9/15/95, effective 10/16/95; Part II, § 4, filed 3/23/60.]

[Title 296 WAC—p. 2030]

WAC 296-104-040 Administration—When should inspectors submit inspection reports and on what forms? Inspectors shall submit reports of inspections of boilers and unfired pressure vessels on appropriate forms approved by the chief inspector. Routine reports of inspections shall be submitted within thirty days of inspection. Reports of reinspection after suspension of an inspection certificate shall be submitted by an inspector employed by the in-service inspection agency as soon as notice of corrective action has been received.

[Statutory Authority: RCW 70.79.030 and 70.79.040, 99-22-026, § 296-104-040, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-040, filed 9/15/95, effective 10/16/95; Order 74-37, § 296-104-040, filed 11/8/74; Part II, § 5, filed 3/23/60.]

WAC 296-104-045 Administration—What are the insurance companies' responsibilities? All insurance companies shall notify the chief inspector within thirty days of all boiler and/or unfired pressure vessel risks written, canceled, not renewed or suspended because of unsafe conditions. Special inspectors shall perform all in-service inspections of boilers and unfired pressure vessels insured by their employer. After a repair or alteration the in-service inspector is responsible to assure a Record of Welded Repair form is completed and submitted to the department.

[Statutory Authority: RCW 70.79.030 and 70.79.040, 99-22-026, § 296-104-045, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-045, filed 9/15/95, effective 10/16/95; Part II, § 6, filed 3/23/60.]

WAC 296-104-050 Administration—What examinations must a boiler inspector take? Examination for certificate of competency shall be held at locations selected by the board, four times each year, namely, the first Wednesday and following Thursday of the months of March, June, September and December. Special examinations may be held when considered necessary by the board.

Applicants for examination shall have had at least three years practical experience in the construction, maintenance, repair or operation of high pressure boilers or unfired pressure vessels as a mechanical engineer, steam engineer or boiler maker, or shall have had at least three years experience as an inspector of high pressure boilers and/or unfired pressure vessels. A credit of two years of the required experience will be given to applicants holding an engineering degree from a recognized college of engineering.

Application for examination for certificate of competency shall be in writing upon a form to be furnished by the director stating the school and education of the applicant, a list of employers, period of employment and position held with each employer. Applications containing willful falsification or untruthful statements shall be rejected.

If the applicant's history and experience meet with the approval of the board of boiler rules, the candidate shall be given a written examination. The test will deal with Washington state boilers and unfired pressure vessels law as well as the construction, installation, operation, maintenance and repair of boilers and/or unfired pressure vessels and their appurtenances. If the applicant is accepted on the merits of this examination, a certificate of competency will be issued by the chief inspector.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-050, filed 10/26/99, effective 11/26/99. Statutory Authority: RCW 70.79.040. 94-21-002, § 296-104-050, filed 10/5/94, effective 11/5/94. Statutory Authority: Chapter 70.79 RCW. 89-15-025 (Order 89-05), § 296-104-050, filed 7/13/89, effective 8/13/89. Statutory Authority: RCW 70.79.030. 78-03-057 (Order 78-3), § 296-104-050, filed 2/22/78; Part II, § 7, filed 3/23/60.]

WAC 296-104-055 Administration—What are the examination fees? A fee of sixty dollars will be charged for each applicant sitting for an inspection examination(s). If an applicant fails to pass the examination this fee shall be good for one year during which a reexamination may be taken. Checks for examination fees shall be made payable to the state treasurer.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-055, filed 10/26/99, effective 11/26/99. Statutory Authority: RCW 70.79.040. 93-12-014, § 296-104-055, filed 5/21/93, effective 6/21/93. Statutory Authority: RCW 70.79.030 and 70.79.330. 82-24-025 (Order 82-36), § 296-104-055, filed 11/23/82, effective 1/1/83; Order 74-37, § 296-104-055, filed 11/8/74; Part II, § 8, filed 3/23/60.]

WAC 296-104-060 Administration—When shall inspectors' commissions be issued, suspended, or revoked? Upon the request of any company authorized to insure and insuring against loss from explosion of boilers and/or unfired pressure vessels in this state, or upon the request of any company with an owner/user inspection agency operating boilers and/or unfired pressure vessels in this state, the chief inspector shall issue a commission as a special inspector and an identifying commission card to any inspector actively engaged in boiler and/or unfired pressure vessel inspection in this state as long as he/she:

- Is employed by the requesting company; and
- Has passed the written examination, and holds a certificate of competency as set forth in WAC 296-104-050.

The fee for the commission is twenty-five dollars. The commission shall be held at the home office of the employing company. Inspectors shall carry identifying commission cards while they are inspecting. A commission shall be valid for one year and may be renewed annually at the request of the employing company for a fee of ten dollars. The employing company shall return the commission and the identifying commission card at once to the chief inspector when the inspector to whom the commission was issued is no longer in its employ, or at the request of the chief inspector.

The department may suspend or revoke a certificate of competency and commission issued to an inspector upon ten days notice to the inspector and to the inspector's employer for:

- Incompetency or untrustworthiness;
- Willful falsification of any matter or statement contained in the application, or in the report of any inspection; or
- For other sufficient reason.

The holder of a certificate of competency is entitled to a hearing before the board prior to the revocation or suspension of the certificate of competency. A person whose commission has been suspended, except for untrustworthiness, may apply to the board for reinstatement. A person whose commission has been revoked, except for untrustworthiness, may apply to

the board to take a new examination for a commission after ninety days from the date of the revocation.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-060, filed 10/26/99, effective 11/26/99. Statutory Authority: RCW 70.79.040. 94-21-002, § 296-104-060, filed 10/5/94, effective 11/5/94. Statutory Authority: RCW 70.79.030 and 70.79.330. 82-24-025 (Order 82-36), § 296-104-060, filed 11/23/82, effective 1/1/83; Order 74-37, § 296-104-060, filed 11/8/74; Part II, § 9, filed 3/23/60.]

WAC 296-104-065 Administration—How should a certified or commissioned inspector obtain a Washington state commission? Upon the request of a boiler insurance company authorized to insure and insuring against loss from explosion of boilers and/or unfired pressure vessels in this state, or a company with an owner/user inspection agency, a commission as a special inspector of boilers and/or unfired pressure vessels shall be issued by the chief inspector to an inspector in the employ of such company provided the inspector has had the experience prescribed in RCW 70.79.130 and:

(1) Passed an examination covering the Washington state boilers and unfired pressure vessels law, chapters 70.79 RCW and 296-104 WAC; and

(2) Holds a certificate of competency or commission issued by a state which has adopted one or more sections of the ASME Code, or a national board commission, in either case having taken and passed a written examination equivalent to that required by the state of Washington; or

(3) Is certified by the American Petroleum Institute in accordance with API-510, having taken and passed a written examination equivalent to that required by the state of Washington.

Application for a reciprocal commission shall be made on a form to be furnished by the chief inspector, and shall be accompanied by a copy of the applicant's certificate of competency or a National Board Commission; or an API certificate and evidence of having passed the API examination.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-065, filed 10/26/99, effective 11/26/99; 96-21-081, § 296-104-065, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.040. 94-21-002, § 296-104-065, filed 10/5/94, effective 11/5/94. Statutory Authority: RCW 70.79.030. 78-03-057 (Order 78-3), § 296-104-065, filed 2/22/78; Order 74-37, § 296-104-065, filed 11/8/74; Part II, § 10, filed 3/23/60.]

WAC 296-104-100 Inspection—How often must boilers and unfired pressure vessels be inspected? (1) Power boilers shall be inspected:

(a) Internally and externally while not under pressure - Annually.

(b) Externally while under pressure - Annually.

(2) Organic vapor boilers shall be inspected:

(a) Internally and externally while not under pressure - Biennially.

(b) Externally while under pressure - Annually.

(3) Low pressure heating boilers shall be inspected:

(a) Externally while under pressure - Biennially.

(b) Internally while not under pressure (except where construction does not permit an internal) - Every 4th year.

(c) Internally, all steam heating boilers will have as a minimum, an internal of their low water fuel cutoff - Biennially.

(d) Internally, none required for nonvapor boilers using glycol, oil or adequately treated with a corrosion inhibitor.

(4) **Hot water heaters** shall be inspected:

(a) Externally - Biennially.

(b) Internally - None required.

(5) **Unfired pressure vessels** shall be inspected:

(a) Externally - Biennially.

(b) Internally:

(i) When subject to corrosion and construction permits - Biennially; or

(ii) Vessels in an owner/user inspection program may follow intervals established by the NBIC or API-510, provided nondestructive examination (NDE) is performed at the biennial external inspection; or

(iii) Pulp or paper dryer rolls may be inspected on a five-year basis in accordance with TAPPI TIS 0402-16, provided the owner has established a written inspection program accepted by the inspector that requires the minimums in section 8 of TAPPI TIS 0402-16; or

(iv) Vessels not subject to corrosion do not require an internal.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-100, filed 10/26/99, effective 11/26/99; 98-22-024, § 296-104-100, filed 10/28/98, effective 11/28/98; 95-19-058, § 296-104-100, filed 9/15/95, effective 10/16/95. Statutory Authority: RCW 70.79.040. 94-21-002, § 296-104-100, filed 10/5/94, effective 11/5/94; Part III, § 1, filed 3/23/60.]

WAC 296-104-102 Inspection—What are the standards for in-service inspection? (1) Where a conflict exists between the requirements of the standards listed below and this chapter, this chapter shall prevail.

(2) The standard for inspection of nonnuclear boilers, unfired pressure vessels, and safety devices is the National Board Inspection Code (NBIC), 1998 edition, with addenda. This code may be used on or after the date of issue and becomes mandatory twelve months after adoption by the board as specified in RCW 70.79.050(2).

(3) The standard for inspection of nuclear items is ASME section XI. The ASME Code edition and addenda shall be as specified in the owner in-service inspection program.

(4) Where a petroleum or chemical process industry owner/user inspection agency so chooses, the standard for inspection of unfired pressure vessels used by the owner shall be the API-510 Pressure Vessel Inspection Code, eighth edition, with supplements. This code may be used on or after the date of issue.

(5) TAPPI TIS 0402-16, dated 1995 may be used for both pulp dryers and paper machine dryers when requested by the owner. When requested by the owner, this document becomes a requirement and not a guideline.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-102, filed 10/26/99, effective 11/26/99; 98-22-024, § 296-104-102, filed 10/28/98, effective 11/28/98; 96-21-081, § 296-104-102, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.040. 94-21-002, § 296-104-102, filed 10/5/94, effective 11/5/94.]

WAC 296-104-105 Inspection—How much time is required for notification of inspection? Seven days will be considered sufficient notification. The owner or user shall prepare each boiler and unfired pressure vessel for internal

[Title 296 WAC—p. 2032]

inspection and shall prepare for and apply a hydrostatic pressure test whenever necessary on the date specified by the inspector.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-105, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-105, filed 9/15/95, effective 10/16/95; Part III, § 2, filed 3/23/60.]

WAC 296-104-110 Inspection—What will be done when boilers or unfired pressure vessels are deemed unsafe or defective? Upon inspection of a boiler or unfired pressure vessel or appurtenances, if an inspector finds hazardous conditions such that it is unsafe to operate under pressure, remedial action shall be initiated at once. A red tag indicating "unsafe - do not use" shall be attached to the principle operating control and the owner or user advised that further operation is prohibited until specified repairs or other action are taken. The chief inspector shall be notified immediately, followed by a report on the condition. Any certificate in force is considered suspended. When reinspection establishes that necessary repairs have been made or corrective action taken so that the boiler or unfired pressure vessel is safe to operate, a report of reinspection shall be submitted to the chief inspector. The certificate of inspection will then be reinstated or a new certificate issued as appropriate.

If other defects, but not unsafe conditions, are found, a routine inspection report containing a noncompliance report shall be submitted to the chief inspector. The owner or user shall be allowed to operate the object for a period as specified by the inspector so long as corrective action is completed in the allotted time.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-110, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-110, filed 9/15/95, effective 10/16/95; Part III, § 3, filed 3/23/60.]

WAC 296-104-115 Inspection—What will be done when defective conditions are concealed by covering? If upon an external inspection there is evidence of a leak or crack, enough of the covering of the boiler or unfired pressure vessel shall be removed to satisfy the inspector in order to determine the safety of the boiler or unfired pressure vessel. If the covering cannot be removed at the time, the inspector may order the operation of the boiler or unfired pressure vessel stopped until such time as the covering can be removed and proper examination made.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-115, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-115, filed 9/15/95, effective 10/16/95; Part III, § 4, filed 3/23/60.]

WAC 296-104-125 Inspection—Are certificate fees required? If upon inspection a boiler or unfired pressure vessel is found to be suitable for use and to conform to these rules and regulations, the owner or user shall pay certificate fees as scheduled in WAC 296-104-700 directly to the chief inspector. The inspection process is not complete until the certificate of inspection is posted.

If the owner or user of each boiler or unfired pressure vessel required to be inspected refuses to allow an inspection to be made, or refuses to pay the above fee, the certificate of inspection shall be suspended by the chief inspector until the owner or user complies with the requirements.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-125, filed 10/26/99, effective 11/26/99; Part III, § 6, filed 3/23/60.]

WAC 296-104-130 Inspection—When are inspection certificates valid? An inspection certificate, issued in accordance with RCW 70.79.290, shall be valid until expiration unless some defect or condition affecting the safety of the boiler or unfired pressure vessel is disclosed or the conditions of RCW 70.79.300 apply.

When an agreement exists between the state and the city jurisdictions of Spokane, Seattle or Tacoma, the certificates for portable boilers and unfired pressure vessels will be considered valid.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-130, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-130, filed 9/15/95, effective 10/16/95; Part III, § 7, filed 3/23/60.]

WAC 296-104-135 Inspection—What are the requirements for restamping of boilers and unfired pressure vessels? When the stamping on a boiler or unfired pressure vessel becomes indistinct the inspector shall instruct the owner or user to have it restamped. Request for permission to restamp the boiler or unfired pressure vessel shall be made to the chief inspector and proof of the original stamping shall accompany the request. Restamping authorized by the chief inspector shall be done only in the presence of an inspector, and shall be identical with the original stamping except that it will not be required to restamp the code symbol. Notice of completion of such restamping shall be filed with the chief boiler inspector by the inspector who witnessed the restamping of the boiler or unfired pressure vessel together with a facsimile of the stamping applied.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-135, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-135, filed 9/15/95, effective 10/16/95; Part III, § 8, filed 3/23/60.]

WAC 296-104-140 Inspection—How should a state stamp be applied? Upon completion of the installation, all boilers and unfired pressure vessels shall be inspected by the chief inspector, a deputy inspector, or a special inspector. At the time of this inspection, each boiler or unfired pressure vessel shall be marked with a serial number of the state of Washington followed by the letter "W."

Data sheets shall be made available at the time of first inspection if not filed with the national board.

Washington special numbers when assigned by the chief inspector shall be preceded by the letters "WS."

All rental boilers used in the state of Washington shall be marked with the serial number of the state of Washington followed by the letters "WR." This will indicate that the boiler is a rental unit.

The state of Washington markings, numbers and letters, referenced above, shall not be less than 5/16 inches in height and shall not be concealed by lagging or paint and shall be exposed at all times.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-140, filed 10/26/99, effective 11/26/99; 96-21-081, § 296-104-140, filed 10/16/96, effective 11/16/96; 95-19-058, § 296-104-140, filed 9/15/95, effective 10/16/95; Order 73-1, § 296-104-140, filed 3/22/73; Part III, § 9, filed 3/23/60.]

(2001 Ed.)

WAC 296-104-145 Inspection—How are groups of vessels operating as a single unit classified? A group of unfired pressure vessels operating as a single unit such as the vessels in a refrigeration system, evaporators, ironers and paper machines may be given one number, designating the different vessels of the unit as a-b-c, etc. The inspector's report shall cover all pressure vessels in the system individually. One certificate shall be issued for the unit. Certificate charge shall be as outlined in RCW 70.79.290, for each vessel of the system.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-145, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-145, filed 9/15/95, effective 10/16/95; Part III, § 10, filed 3/23/60.]

WAC 296-104-150 Inspection—How are unfired steam boilers classified? Unfired steam boilers operating at pressures of 50 psi or more shall be inspected as power boilers. Unfired steam boilers operating at less than 50 psi shall be inspected as unfired pressure vessels.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-150, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-150, filed 9/15/95, effective 10/16/95; Part III, § 11, filed 3/23/60.]

WAC 296-104-151 Inspection—What are the requirements for rental boilers? Every rental boiler used in the state of Washington will have an internal inspection completed once a year. An operating inspection under pressure shall be conducted by the chief inspector, a deputy inspector, or a special inspector at each and every rental location before being placed into service.

A rental boiler, which has never been in rental service in the state of Washington, will have a satisfactory hydrostatic test completed along with an initial internal inspection prior to having a state number issued. Each operating inspection will be reported to the state of Washington using the standard inspection form and a copy of this report will be posted on the rental boiler.

Inspections will be the responsibility of the rental boiler owner but may be completed by the user's special inspector.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-151, filed 10/26/99, effective 11/26/99; 96-21-081, § 296-104-151, filed 10/16/96, effective 11/16/96.]

WAC 296-104-155 Inspection—What preparations are necessary prior to internal inspections? The owner or user shall prepare a boiler for internal inspection in the following manner or as required by the inspector:

(1) Water shall be drawn off and the boiler thoroughly washed.

(2) All manhole and handhole plates and wash-out plugs and water column connections shall be removed, the furnace and combustion chambers thoroughly cooled and cleaned.

(3) All grates of internally fired boilers shall be removed.

(4) At each annual inspection brickwork shall be removed as required by the inspector in order to determine the condition of the boiler headers, furnace, supports, or other parts.

(5) The steam gauge shall be removed for testing or evidence of testing shown.

[Title 296 WAC—p. 2033]

(6) Any leakage of steam or hot water into the boiler shall be cut off by disconnecting the pipe or valve at the most convenient point.

(7) The low water cutout shall be disassembled to such a degree as the inspector shall require.

Unfired pressure vessels shall be prepared for internal inspection to the extent deemed necessary by the inspector.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-155, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-155, filed 9/15/95, effective 10/16/95; Part III, § 12, filed 3/23/60.]

WAC 296-104-160 Inspection—What happens if a boiler or unfired pressure vessel is improperly prepared for inspection? If a boiler or unfired pressure vessel has not been properly prepared for an internal inspection, or the owner or user fails to comply with the requirements for hydrostatic test as set forth in these rules, the inspector may decline to make the inspection or test and the certificate of inspection shall be withheld until the owner or user complies with the requirements.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-160, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-160, filed 9/15/95, effective 10/16/95; Part III, § 13, filed 3/23/60.]

WAC 296-104-165 Inspection—When should coverings be removed for inspection? If the boiler or unfired pressure vessel is jacketed such that the longitudinal seams of shells, drums, or domes cannot be seen, or if pertinent information cannot be determined by other means, the following may be ordered by the inspector: Enough of the jacketing, setting wall, or other form of casing or housing shall be removed so that information necessary to determine the safety of the boiler or unfired pressure vessel can be obtained to the satisfaction of the inspector.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-165, filed 10/26/99, effective 11/26/99; 95-19-058, § 296-104-165, filed 9/15/95, effective 10/16/95; Part III, § 14, filed 3/23/60.]

WAC 296-104-170 Inspection—When are shop inspections required? Shop inspections shall be as required in the applicable sections of the ASME Code. Only inspectors holding a national board commission with the appropriate endorsements and a commission issued by the state of Washington shall make shop inspections in this state. Supervisors of inspectors who perform shop inspections in the state need only a National Board Commission with the appropriate endorsements.

Upon request from a boiler or pressure vessel manufacturer holding an ASME Certificate of Authorization within the jurisdiction, the department shall provide inspection services as required by the ASME Code. The manufacturer receiving such inspection services shall reimburse the department for the time and expenses in accordance with the fee schedule established in WAC 296-104-700.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-170, filed 10/26/99, effective 11/26/99; 96-21-081, § 296-104-170, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.040. 90-20-029, § 296-104-170, filed 9/24/90, effective 10/25/90. Statutory Authority: RCW 70.79.030. 78-03-057 (Order 78-3), § 296-104-170, filed 2/22/78; Part III, § 15, filed 3/23/60.]

[Title 296 WAC—p. 2034]

WAC 296-104-180 Inspection—How are radioactive systems inspected? An alternative means of inspection is allowed when a pressure vessel has radioactive contamination that would not allow entering for visual inspection. The inspector and owner shall work out a program of nondestructive examination that shall ascertain the condition of the vessel to assure its integrity.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 98-22-024, § 296-104-180, filed 10/28/98, effective 11/28/98.]

WAC 296-104-200 Construction—What are the standards for new construction? The standards for new construction are:

(1) ASME Boiler and Pressure Vessel Code, 1998 edition, with addenda Sections I, III, IV, VIII, X, and CSD-1 (as referenced in WAC 296-104-265(3));

(2) ASME/ANSI PVHO-1 (Standard for Pressure Vessels for Human Occupancy), 1987 edition; and

(3) Standards of construction meeting the National Board Criteria for Registration of Boilers, Pressure Vessels and Other Pressure Retaining Items, Revision 2, provided they are registered with the National Board.

These codes and standards may be used on or after the date of issue and become mandatory twelve months after adoption by the board as specified in RCW 70.79.050(2). The board recognizes that the ASME Code states that new editions of the code become mandatory on issue and that subsequent addenda become mandatory six months after the date of issue. For nuclear systems, components and parts the time period for addenda becoming mandatory is defined in the Code of Federal Regulations.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-200, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 98-22-024, § 296-104-200, filed 10/28/98, effective 11/28/98; 97-20-109, § 296-104-200, filed 9/30/97, effective 10/31/97; 96-21-081, § 296-104-200, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.040. 93-12-014, § 296-104-200, filed 5/21/93, effective 6/21/93; 92-11-070, § 296-104-200, filed 5/20/92, effective 6/20/92; 91-11-107, § 296-104-200, filed 5/22/91, effective 6/22/91; 90-04-009, § 296-104-200, filed 1/26/90, effective 2/26/90. Statutory Authority: RCW 70.79.040 and 70.79.050. 86-01-088 (Order 85-26), § 296-104-200, filed 12/19/85. Statutory Authority: RCW 70.79.030 and 70.79.330. 84-11-016 (Order 84-09), § 296-104-200, filed 5/10/84; 82-24-025 (Order 82-36), § 296-104-200, filed 11/23/82, effective 1/1/83. Statutory Authority: RCW 70.79.030. 82-05-003 (Order 82-2), § 296-104-200, filed 2/4/82; 81-12-012 (Order 81-10), § 296-104-200, filed 5/28/81; 81-01-114 (Order 80-28), § 296-104-200, filed 12/24/80; 80-05-065 (Order 80-7), § 296-104-200, filed 4/23/80; 79-05-054 (Order 79-7), § 296-104-200, filed 4/30/79; 78-10-096 (Order 78-19), § 296-104-200, filed 10/3/78; Order 77-23, § 296-104-200, filed 11/8/77; Order 77-9, § 296-104-200, filed 5/26/77; Order 75-35, § 296-104-200, filed 10/29/75; Order 74-37, § 296-104-200, filed 11/8/74; Order 73-1, § 296-104-200, filed 3/22/73; Order 72-17, § 296-104-200, filed 9/28/72; Order 72-11, § 296-104-200, filed 7/7/72; Part IV, § 1, filed 3/23/60.]

WAC 296-104-205 Construction—What are the requirements for nonstandard new construction? Those boilers and unfired pressure vessels that are exempted by the codes adopted in WAC 296-104-200 due to volume, temperature or pressure requirements, and are not to be constructed to those codes, must be certified by a nationally recognized testing agency or constructed to WAC 296-104-230. See WAC 296-104-307 for safety pressure relief devices.

(2001 Ed.)

Other boilers and unfired pressure vessels that are not to be constructed to the codes adopted in WAC 296-104-200 may be treated as special designs at the discretion of the board. Nonstandard construction shall not be permitted to avoid standard construction.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-205, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-205, filed 10/16/96, effective 11/16/96; Part IV, § 2, filed 3/23/60.]

WAC 296-104-210 Construction—What are the requirements for construction of boilers and unfired pressure vessels of special design? Boilers and unfired pressure vessels of special design require a special certificate granted by the board. At a minimum the following shall be supplied to obtain board approval for special designs: Drawings, design calculations, and a Washington state professional engineer's evaluation of the design. Upon board approval a Washington special number will be assigned by the chief inspector. The installation will be subject to the regular inspections required by WAC 296-104-100 and any additional conditions as required by the board.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-210, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-210, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.040 and 70.79.050. 86-07-064 (Order 86-02), § 296-104-210, filed 3/19/86; Order 73-1, § 296-104-210, filed 3/22/73; Part IV, § 3, filed 3/23/60.]

WAC 296-104-215 Construction—What are the requirements to use nonstandard boilers and unfired pressure vessels constructed prior to January 1, 1952? Nonstandard boilers and unfired pressure vessels constructed prior to January 1, 1952, may be used provided they have not been moved from their original setting since January 1, 1952.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-215, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 97-20-109, § 296-104-215, filed 9/30/97, effective 10/31/97; 96-21-081, § 296-104-215, filed 10/16/96, effective 11/16/96; Part IV, § 4, filed 3/23/60.]

WAC 296-104-220 Construction—What are the requirements to use nonstandard second hand boilers and unfired pressure vessels? Nonstandard second hand boilers and unfired pressure vessels constructed after January 1, 1952, cannot be used in this state without prior approval of the board of boiler rules. At a minimum the following shall be supplied to obtain board approvals: Drawings, a history, design calculations, and a Washington state professional engineer's evaluation of the design and present condition. Upon board approval a Washington special number will be assigned by the chief inspector. The installation will be subject to the regular inspections required by WAC 296-104-100 and any additional conditions as required by the board.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-220, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-220, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.240. 88-01-064 (Order 87-25), § 296-104-220, filed 12/17/87; Part IV, § 5, filed 3/23/60.]

(2001 Ed.)

WAC 296-104-230 Construction—What are the testing requirements for new vessels exempted from code requirements for volume, pressure or temperature? Boilers or unfired pressure vessels that are not required by the codes adopted in WAC 296-104-200 to be built to those codes (except those exempted in the RCWs), shall be tested as follows:

One boiler or unfired pressure vessel of each design and size taken from the manufacturer's stock at random, shall be subjected to a hydrostatic test of twice the rated maximum allowable working pressure in the presence of an inspector holding a national board commission. The boiler or unfired pressure vessel shall withstand the hydrostatic pressure test without leaks and without exceeding 80% of the boiler or unfired pressure vessel material's yield strength. Samples shall be taken from the longitudinal seam and tests made as outlined in Section IX ASME Code for root and face bends and reduced tensile coupons. Upon successfully passing the above tests, the maximum allowable working pressure will be allowed for all boilers or unfired pressure vessels constructed to identical specifications. The company name, serial number, maximum allowable working pressure, and energy input (if applicable) shall be stamped or marked in a permanent manner on each boiler or unfired pressure vessel. A retest shall be made at the inspector's discretion or by the request of the chief inspector. Any unfired pressure vessels containing water and an air cushion designed for less than 300 psi and 210 degree F, in use prior to January 1, 1997, may be accepted by hydrostatically testing them to twice their maximum allowable working pressure.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-230, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-230, filed 10/16/96, effective 11/16/96; Order 74-37, § 296-104-230, filed 11/8/74; Part IV, § 7, filed 3/23/60.]

WAC 296-104-235 Construction—What are the requirements for code exempted boiler and unfired pressure vessel safety relief valves? The boilers and unfired pressure vessels covered by WAC 296-104-230 shall be protected by the installation of ASME Code relief valves with trial levers, set pressure not to exceed the boiler's or the unfired pressure vessel's design pressure. Relief valves shall be installed on top of the boiler or the unfired pressure vessel or on outlet piping as close as possible to the boiler or unfired pressure vessel, with a minimum of fittings and no valves intervening. The outlet of the relief valve shall be run full size to a safe place and shall not induce stress on the valve.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-235, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-235, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.030. 78-03-057 (Order 78-3), § 296-104-235, filed 2/22/78; Part IV, § 8, filed 3/23/60.]

WAC 296-104-240 Construction—When are piping components considered unfired pressure vessels? When a portion of pipe has significant duties other than the transportation of a liquid, gas, or other material; such as storage, catch basin, scrubber, snubber, absorber, or pulsation dampener, it shall be deemed to be an unfired pressure vessel and shall

[Title 296 WAC—p. 2035]

conform to the rules governing the design, construction, inspection, and stamping of unfired pressure vessels.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-240, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-240, filed 10/16/96, effective 11/16/96; Part IV, § 9, filed 3/23/60.]

WAC 296-104-245 Construction—Combustible fluid heaters. Steam or hot water combustible fluid heaters shall be so designed and constructed that in the event of failure of any part, the combustible fluid cannot enter the boiler water.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-245, filed 10/16/96, effective 11/16/96. Statutory Authority: RCW 70.79.030, 78-03-057 (Order 78-3), § 296-104-245, filed 2/22/78; Part IV, § 10, filed 3/23/60.]

WAC 296-104-255 Installation—Clearance at top of boilers. When boilers are replaced or new boilers installed in either existing or new buildings, a minimum clearance as specified below shall be provided between the top of boiler proper and ceiling:

(1) Power boilers having a steam generating capacity in excess of 5,000 pounds per hour or having a heating surface in excess of 1,000 sq.ft. or input in excess of 5,000,000 btu per hour. Clearance shall be 7 feet.

(2) Low pressure heating boilers which exceed any one of the following limits: 5,000,000 btu input; 5,000 lbs. steam per hour capacity or 1,000 sq.ft. heating surface; and power boilers which do not exceed any of the following limits: 5,000,000 btu input; 5,000 lbs. steam per hour capacity or 1,000 sq. ft. heating surface; and all boilers with manholes on top of boiler except those described in paragraph (1) above 3 feet.

(3) Low pressure heating boilers which do not exceed the above limits and miniature boilers 2 feet.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-255, filed 10/16/96, effective 11/16/96; Part IV, § 12, filed 3/23/60.]

WAC 296-104-256 Installation—Reinstalled standard boiler or unfired pressure vessel. When a stationary standard boiler or unfired pressure vessel is moved and reinstalled it must be inspected by an inspector. The following will be required:

(1) The fittings and appliances must comply with the latest codes adopted in WAC 296-104-200.

(2) For standard vessels moved to Washington state a complete history of inspection, operation and repairs shall be available for all boilers exceeding 200,000 btu/hr and any pressure vessels exceeding 100 cubic feet.

(3) For any power boiler an evaluation by a Washington state professional engineer or an organization holding a valid ASME Certificate of Authorization is required.

The following are required unless waived by the inspector:

- (a) A hydrostatic test up to 150% of the MAWP.
- (b) Nondestructive testing of any parts.
- (c) An operational test.
- (d) Any repairs deemed necessary.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-256, filed 10/16/96, effective 11/16/96.]

WAC 296-104-260 Installation—Clearance front, back and sides. When boilers are replaced or new boilers installed in either existing or new buildings, minimum clearance shall be provided as specified below:

(1) Minimum clearance at sides and back wall shall be one and one-half feet or at the discretion of the inspector the manufacturers recommended clearances may be used if they allow sufficient room for inspection. Boilers having manholes shall have five feet clearance from the manhole opening and any wall, ceiling, or piping that will prevent a person from entering the boiler.

(2) Clearance in front and back shall be sufficient for operation, maintenance, and repair.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-260, filed 10/16/96, effective 11/16/96. Statutory Authority: Chapter 70.79 RCW. 89-15-025 (Order 89-05), § 296-104-260, filed 7/13/89, effective 8/13/89; Part IV, § 13, filed 3/23/60.]

WAC 296-104-265 Installation—What control and limit devices are required on boilers? (1) Installations prior to June 1989: All automatically fired steam, vapor, or hot water boilers except boilers having a constant attendant who has no other duties while the boiler is in operation, shall be equipped with:

(a) An automatic low-water fuel cut-off; and

(b) An automatic water feeding device.

(c) All devices shall be designed so that they may be readily tested at frequent intervals.

(2) Installations after June 1989:

(a) All boilers that are automatically fired low pressure steam heating boilers, small power boilers, and power steam boilers without a constant attendant who has no other duties shall be equipped with:

(i) Two high steam pressure limit controls, the highest of which shall be provided with a manual reset.

(ii) Two low-water fuel cut-offs, one of which shall be provided with a manual reset device and independent of the feed water controller.

(iii) Coil type flash steam boilers may use two high-temperature limit controls, one of which shall have a manual reset. This is instead of the low-water fuel cut-off.

(iv) All control and limit devices shall be independently connected and electrically wired in series.

(b) All automatically fired hot water supply, low-pressure hot water heating boilers, and power hot water boilers shall be equipped with:

(i) Two high-temperature limit controls, the highest of which shall be provided with a manual reset.

(ii) One low-water fuel cut-off with a manual reset and independent of the feed water controller.

(iii) For coil type hot water boilers a low-water flow limit control installed in the circulating water line may be used instead of a low-water fuel cut-off.

(iv) All control and limit devices shall be independently connected and electrically wired in series.

(3) Installations or refits of gas, oil, or combinations of gas or oil after December 1998:

(a) All boilers excluding lined potable water heaters of all BTU input installed or refitted after December 1998, with fuel input ratings of less than 12,500,000 BTU/hr which are

fired by gas, oil, or a combination of gas or oil shall comply with the fuel train requirements defined in ASME CSD-1, as adopted in WAC 296-104-200 where applicable.

(b) Verification of fuel train compliance will be per CSD-1. A CSD-1 report will be filled out and signed by an authorized representative of the manufacturer and/or the installing contractor.

(c) The CSD-1 report must be made available to the authorized inspection agency or the inspector after which a certificate of operation may be issued. The report shall remain in the possession of the boiler owner.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-265, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 98-22-024, § 296-104-265, filed 10/28/98, effective 11/28/98; 97-20-109, § 296-104-265, filed 9/30/97, effective 10/31/97. Statutory Authority: RCW 70.79.240. 88-01-064 (Order 87-25), § 296-104-265, filed 12/17/87; Part IV, § 14, filed 3/23/60.]

WAC 296-104-270 Installation—What are the requirements for an explosion door? Provide substantial deflectors to divert the blast when explosion doors are located within seven feet of the firing floor or an operating platform.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 97-20-109, § 296-104-270, filed 9/30/97, effective 10/31/97; Part IV, § 15, filed 3/23/60.]

WAC 296-104-273 Installation—Pressure vessel clearances. When pressure vessels are replaced or new vessels are installed in either existing or new buildings, a minimum height of eighteen inches shall be provided between the top of the pressure vessel proper and the ceiling and adjacent walls or other structures. All pressure vessels having manholes shall have five feet clearance from manhole openings and any wall, ceiling, or piping that will prevent a person from entering the vessel. Lesser clearances may be acceptable at the discretion of the inspector.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 96-21-081, § 296-104-273, filed 10/16/96, effective 11/16/96.]

WAC 296-104-300 Installation—When do I need to provide platforms around boilers? Provide platforms allowing safe access to each boiler, when the boiler controls, valves, manholes, or casing openings are over ten feet above the floor.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 97-20-109, § 296-104-300, filed 9/30/97, effective 10/31/97; Part V, § 1, filed 3/23/60.]

WAC 296-104-305 Installation—How many exits are required in boiler rooms? (1) For boiler rooms containing a boiler or a combination of boilers of over 2,000 square feet of heating surface, provide at least two exits on opposite sides of the boiler(s).

(2) Each floor elevation change of 10 feet or more must have two exits from that elevation.

(3) All exits shall meet Washington state building codes or local building codes as applicable.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 97-20-109, § 296-104-305, filed 9/30/97, effective 10/31/97; Part V, § 2, filed 3/23/60.]

(2001 Ed.)

WAC 296-104-307 Installation—What safety pressure relief devices are required on boilers and pressure vessels? All boiler and pressure vessels shall be safeguarded by safety valves, safety relief valves, or rupture discs as specified in the ASME Code. As an alternative they may be safeguarded by a fail safe pressure relief control system that is evaluated by a professional engineer licensed by the state of Washington and accepted by the chief inspector.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-307, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 98-22-024, § 296-104-307, filed 10/28/98, effective 11/28/98.]

WAC 296-104-310 Installation—Where should the discharge from safety valves, blow offs and drains be directed? Direct the discharge from safety valves, blow offs and drains to prevent injury to personnel or property. Run the discharge line outside the building from single or multiple safety valves on boilers, pressure vessels or headers with a capacity of 5,000 pounds of steam per hour or more.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 98-22-024, § 296-104-310, filed 10/28/98, effective 11/28/98; 97-20-109, § 296-104-310, filed 9/30/97, effective 10/31/97; Part V, § 3, filed 3/23/60.]

WAC 296-104-320 Installation—What are the requirements for underground installations? Where necessary to install a pressure vessel underground:

(1) It shall be enclosed in a concrete or masonry pit.

(2) If covered the cover shall be removable.

(3) A minimum clearance of 18 inches shall be provided between the pressure vessel proper and the ceiling, adjacent walls, or other structures.

(4) All manhole openings shall have a minimum of 5 feet of clearance from any wall, ceiling, or piping that could prevent a person from entering the pit or vessel.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 97-20-109, § 296-104-320, filed 9/30/97, effective 10/31/97; Part V, § 5, filed 3/23/60.]

WAC 296-104-325 Installation—What are the requirements for boiler and pressure vessel supports? Each boiler or unfired pressure vessel shall be supported by masonry or structural supports of sufficient strength and rigidity to safely support the vessel and its contents. There shall be no excessive vibration in either the vessel or its connecting piping.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 97-20-109, § 296-104-325, filed 9/30/97, effective 10/31/97; Part V, § 6, filed 3/23/60.]

WAC 296-104-330 Installation—What are the relief or safety valve requirements when pressure reducing valves are used? (1) Where pressure reducing valves are used, one or more relief or safety valve(s) and pressure gauge(s) shall be provided on the low pressure side of the reducing valve. The relief or safety valve(s) shall be located as close as possible to the reducing valve. The combined discharge capacity of the relief valves shall be such that the pressure rating of the lower pressure piping or equipment shall not be exceeded in case the reducing valve sticks open. Discharge lines shall comply with WAC 296-104-310.

[Title 296 WAC—p. 2037]

(2) The use of hand-controlled bypasses around reducing valves is permissible. The bypass shall not be greater in capacity than the reducing valve unless the piping or equipment is adequately protected by a relief valve(s) or meets the requirements of the high pressure system.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 97-20-109, § 296-104-330, filed 9/30/97, effective 10/31/97; Part V, § 7, filed 3/23/60.]

WAC 296-104-405 Existing installation—How can the maximum allowable working pressure be established for nonstandard boilers or unfired pressure vessels? The maximum allowable working pressure MAWP shall be established as follows:

(1) For nonstandard steel low pressure steam heating boilers the MAWP shall be computed from the formula in subsection (5) of this section not exceeding 15 psi steam.

(2) For nonstandard steel low pressure water heating boilers the MAWP shall be computed from the formula in subsection (5) of this section not exceeding 160 psi.

(3) For nonstandard cast iron low pressure steam heating boilers the MAWP shall not exceed 15 psi steam.

(4) For nonstandard cast iron low pressure water heating boilers the MAWP shall not exceed 30 psi.

(5) For boilers and unfired pressure vessels not listed above, where the original code of construction is unknown, the following formula will be used.

$$\frac{TS \times t \times E}{R \times FS} = MAWP$$

TS = Tensile Strength in psi as given in ASME Code, when material cannot be identified use 55,000 for steel and 45,000 for wrought iron.

t = thickness in inches of the thinnest part determined by actual measurement.

E = efficiency of longitudinal joint or ligament, whichever is the least, determined by the rules and formula in the ASME Code. When construction methods are not known welded joint efficiency will be 70%.

R = radius of largest course in inches.

FS = Factor of Safety, for boilers shall be a minimum of 5. For boilers with a longitudinal lap seam it shall be a minimum 8. Boilers with a longitudinal lap seam, unless granted a special permit, may only be used at a maximum of 15 psi provided they have passed inspection. The minimum for unfired pressure vessels shall be 4 when less than 20 years old, 4 1/2 when over 20 years old.

(6) For miniature hobby boilers the MAWP shall be computed using the formulas referenced in the ASME Code Section I, but the MAWP may not exceed 150 psi. For these formulas the maximum allowable stress (MAS) value shall be 0.75 times the maximum stress at 400 degrees F. in ASME Code Section II Part D, for listed materials or as set by the department for nonlisted materials.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 98-22-024, § 296-104-405, filed 10/28/98, effective 11/28/98; 97-20-109, § 296-104-405, filed 9/30/97, effective 10/31/97; Part VI, § 2, filed 3/23/60.]

[Title 296 WAC—p. 2038]

WAC 296-104-502 Repairs—What are the requirements for nonnuclear boilers and unfired pressure vessel repairs and alterations? Repairs and alterations to nonnuclear boilers and pressure vessels shall be made in accordance with the rules of the National Board Inspection Code (NBIC) as adopted in WAC 296-104-102.

Repairs/alterations may be made by:

(1) An organization authorized by the jurisdiction and in possession of a valid Certificate of Authorization for use of the "R" symbol stamp, issued by the National Board provided such repairs/alterations are within the scope of the authorization.

(2) An organization authorized by the chief inspector and in possession of a valid ASME Certificate of Authorization provided such repairs/alterations are within the scope of the organization's Quality Control System. The chief inspector may limit or restrict repairs/alterations for cause.

Owner/user special inspectors may only accept repairs/alterations to boilers and unfired pressure vessels operated by their respective companies per RCW 70.79.130.

Where required, a record of welded repairs/alterations, signed by the organization and a commissioned inspector shall be submitted to the chief inspector.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-502, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 99-22-026, § 296-104-502, filed 10/26/99, effective 11/26/99; 98-22-024, § 296-104-502, filed 10/28/98, effective 11/28/98. Statutory Authority: RCW 70.79.040. 94-21-002, § 296-104-502, filed 10/5/94, effective 11/5/94.]

WAC 296-104-510 Repairs—Do riveted patches require prior approval? Yes, prior to applying riveted patches the design of the patch and method of installation shall be approved by the inspector.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 98-22-024, § 296-104-510, filed 10/28/98, effective 11/28/98; Part VII, § 3, filed 3/23/60.]

WAC 296-104-515 Repairs—What are the requirements for repair of nonnuclear safety devices?

The resetting, repairing, and restamping of safety valves and relief valves shall be done by a qualified manufacturer or valve repair organization holding a valid "V," "UV," or "VR" Certificate of Authorization issued by the National Board of Boiler and Pressure Vessel Inspectors. Section IV safety valves shall be repaired only by the valve manufacturer.

Boiler and pressure vessel users, however, may authorize external adjustments to be made to bring their installed safety valves and relief valves, except Section IV safety valves, back to the stamped set pressure. This adjustment shall be witnessed and approved by a National Board Commissioned Inspector. All such external adjustments shall be resealed showing the identification of the organization making the adjustments and the date.

Repairing of noncode relief or safety valves shall not be allowed, except as specified below. Noncode liquid relief valves installed prior to 1-1-85 shall be repaired by an organization holding a valid "V," "UV," or "VR" Certificate of Authorization, but need not be stamped.

[Statutory Authority: RCW 70.79.030 and 70.79.040. 98-22-024, § 296-104-515, filed 10/28/98, effective 11/28/98. Statutory Authority: RCW

(2001 Ed.)

70.79.030, 86-04-059 (Order 86-01), § 296-104-515, filed 2/4/86. Statutory Authority: RCW 70.79.030 and 70.79.330, 84-21-012 (Order 84-20), § 296-104-515, filed 10/5/84; Part VII, § 4, filed 3/23/60.]

WAC 296-104-520 Repairs—When a lap seam crack is discovered along a riveted longitudinal joint what action is required and what repairs are allowed? (1) A "lap seam crack" is a crack found in riveted lap seams, extending parallel to the longitudinal joint and located either between or adjacent to rivet holes.

(2) The shell or drum of any boiler or unfired pressure vessel in which a lap seam crack is discovered along a longitudinal riveted joint shall be immediately discontinued from use.

(3) If the boiler or unfired pressure vessel is not more than 15 years of age, a complete new course of the original thickness may be installed at the discretion of the inspector (and after approval of the chief inspector).

(4) If the boiler or unfired pressure vessel is over 15 years of age the shell or drum of the boiler or unfired pressure vessel shall be replaced.

(5) Patching of a lap seam is prohibited.

[Statutory Authority: RCW 70.79.030 and 70.79.040, 98-22-024, § 296-104-520, filed 10/28/98, effective 11/28/98; Part VII, § 5, filed 3/23/60.]

WAC 296-104-530 Repairs—Can air or vapor testing be performed? Testing by air or vapor at pressures in excess of 15 psig may be performed with special permission from the inspector.

[Statutory Authority: RCW 70.79.030 and 70.79.040, 98-22-024, § 296-104-530, filed 10/28/98, effective 11/28/98. Statutory Authority: RCW 70.79.040, 92-11-070, § 296-104-530, filed 5/20/92, effective 6/20/92; Part VII, § 7, filed 3/23/60.]

WAC 296-104-535 Repairs—What are the requirements for nuclear repairs/replacement? (1) Repairs replacement to all nuclear components, appurtenances, and their supports shall conform to the rules contained in the ASME Section XI Code. The ASME Section XI Code edition and addenda shall be as specified in the owner in-service inspection program plan.

(2) Where a repair/replacement is performed, a report as required by ASME Section XI Code, signed by the owner and the Authorized Nuclear In-service Inspector (ANII) shall be submitted to the jurisdiction.

[Statutory Authority: RCW 70.79.030 and 70.79.040, 98-22-024, § 296-104-535, filed 10/28/98, effective 11/28/98.]

WAC 296-104-540 Repairs—What are the requirements for nuclear repairs of safety devices? All nuclear components shall be safe-guarded by safety devices, as specified in the ASME Section III Code.

(1) The resetting, repair, and restamping of these safety devices shall be performed only by organizations holding a valid ASME "N" Certificate of Authorization to repair ASME Section III Code safety devices.

(2) Nuclear plant owners with an approved ASME Section XI program, may authorize resetting, repairing or replacement of their safety devices.

(2001 Ed.)

(3) Resetting, repairing or replacement activities shall be witnessed and approved by an inspector, with appropriate National Board endorsements.

(4) All repaired safety devices shall be resealed showing the identification of the organization making the repair and the date.

[Statutory Authority: RCW 70.79.030 and 70.79.040, 98-22-024, § 296-104-540, filed 10/28/98, effective 11/28/98.]

WAC 296-104-700 What are the inspection fees—Certificate fees—Expenses? The following fees shall be paid by, or on behalf of, the owner or user upon the completion of the inspection. The inspection fees apply to inspections made by inspectors employed by the state.

Heating boilers:	Internal	External
Cast iron—All sizes	27.05	21.65
All other boilers less than 500 sq. ft.	32.50	21.65
500 sq. ft. to 2500 sq. ft.	54.15	27.05
Each additional 2500 sq. ft. of total heating surface, or any portion thereof	21.65	10.80

Power boilers:	Internal	External
Less than 100 sq. ft.	27.05	21.65
100 sq. ft. to less than 500 sq. ft.	32.50	21.65
500 sq. ft. to 2500 sq. ft.	54.15	27.05
Each additional 2500 sq. ft. of total heating surface, or any portion thereof	21.65	10.80

Pressure vessels:
Automatic utility hot water supply heaters per RCW 70.79.090

5.40

All other pressure vessels:
Square feet shall be determined by multiplying the length of the shell by its diameter.

	Internal	External
Less than 15 sq. ft.	21.65	16.25

15 sq. ft. to less than 50 sq. ft.	32.50	16.25
50 sq. ft. to 100 sq. ft.	37.90	21.65

For each additional 100 sq. ft. or any portion thereof	10.80	37.90
--	-------	-------

Certificate of inspection fees: For objects inspected, the certificate of inspection fee is \$16.25 per object.

Nonnuclear shop inspections, field construction inspections, and special inspection services:

For each hour or part of an hour up to 8 hours	32.50
--	-------

For each hour or part of an hour in excess of 8 hours	48.75
---	-------

[Title 296 WAC—p. 2039]

Nuclear shop inspections, nuclear field construction inspections, and nuclear triennial shop survey and audit:

For each hour or part of an hour up to 8 hours 48.75

For each hour or part of an hour in excess of 8 hours 75.80

Nonnuclear triennial shop survey and audit:
When state is authorized inspection agency:

For each hour or part of an hour up to 8 hours 32.50

For each hour or part of an hour in excess of 8 hours 48.75

When insurance company is authorized inspection agency:

For each hour or part of an hour up to 8 hours 48.75

For each hour or part of an hour in excess of 8 hours 75.80

Expenses shall include:

Travel time and mileage: The department shall charge for its inspectors' travel time from their offices to the inspection sites and return. The travel time shall be charged for at the same rate as that for the inspection, audit, or survey. The department shall also charge the current Washington office of financial management accepted mileage cost fees or the actual cost of purchased transportation. Hotel and meals: Actual cost not to exceed the office of financial management approved rate.

Reinspection fee: Same as the fee for the previous inspection during which discrepancies were reported. The fee will be charged only if the discrepancies are not corrected before the reinspection. The fee shall not exceed \$ 26.00. Washington state specials: For each vessel to be considered by the board for a Washington state special certificate, a fee of \$300.00 must be paid to the department before the board meets to consider the vessel. The board may, at its discretion, prorate the fee when a number of vessels that are essentially the same are to be considered.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-700, filed 10/10/00, effective 11/13/00. Statutory Authority: RCW 70.79.030 and 70.79.040. 99-08-049, § 296-104-700, filed 4/1/99, effective 5/2/99; 98-09-064, § 296-104-700, filed 4/20/98, effective 5/21/98. Statutory Authority: RCW 70.79.040. 93-12-014, § 296-104-700, filed 5/21/93, effective 6/21/93. Statutory Authority: RCW 70.79.030 and 70.79.330. 84-21-012 (Order 84-20), § 296-104-700, filed 10/5/84; 84-11-016 (Order 84-09), § 296-104-700, filed 5/10/84; 82-24-025 (Order 82-36), § 296-104-700, filed 11/23/82, effective 1/1/83; Order 77-23, § 296-104-700, filed 11/8/77; Emergency Order 77-22, § 296-104-700, filed 11/8/77.]

WAC 296-104-701 What are the civil penalties? (1)

An owner, user, or operator of a boiler or pressure vessel that violates a provision of chapter 70.79 RCW, or of the rules

adopted under that chapter, is liable for a civil penalty based on the following schedule.

Operating under pressure a boiler or pressure vessel which the department has condemned, has issued a red tag or has suspended the inspection certificate:

First offense	\$150.00
Second offense	\$300.00
Each additional offense	\$500.00

Each day of such unlawful operation shall be deemed a separate offense.

Operating under pressure a boiler or pressure vessel without a valid inspection certificate:

First offense	\$ 50.00
Second offense	\$100.00
Each additional offense	\$200.00

Each day of such unlawful operation shall be deemed a separate offense.

Installation of a boiler or pressure vessel without meeting prior filing requirements of WAC 296-104-020:

First offense	\$100.00
Second offense	\$200.00
Each additional offense	\$500.00

Performing a repair to a boiler or pressure vessel, involving welding to a pressure retaining part, without meeting requirements of WAC 296-104-502:

First offense	\$150.00
Second offense	\$300.00
Each additional offense	\$500.00

Performing an alteration to a boiler or pressure vessel without meeting requirements of WAC 296-104-502:

First offense	\$150.00
Second offense	\$300.00
Each additional offense	\$500.00

Performing resetting, repair or restamping of safety valves, safety relief valves, or rupture discs, without meeting requirements of WAC 296-104-515:

First offense	\$150.00
Second offense	\$300.00
Each additional offense	\$500.00

Failure of owner to notify chief inspector in case of accident which serves to render a boiler or unfired pressure vessel inoperative, as required by WAC 296-104-025:

Each offense	\$100.00
------------------------	----------

Failure to comply with a noncompliance report requirement:

Within 90 days	\$100.00
Within 91-180 days	\$250.00
Within 181-270 days	\$400.00
Within 271-360 days	\$500.00

(2) The department shall by certified mail notify a person of its determination that the person has violated this section.

(3) Any person aggrieved by an order or act under the boiler and unfired pressure vessels law or under the rules and regulations may, within fifteen days after such order or act, appeal to the board of boiler rules.

(4) Each day that a violation occurs will be a separate offense. A violation will be a second or additional offense only if it occurs within one year from the first violation.

[Statutory Authority: RCW 70.79.030, 70.79.040 and chapter 70.79 RCW. 00-21-024, § 296-104-701, filed 10/10/00, effective 11/13/00. Statutory Authority: Chapter 70.79 RCW. 87-12-003 (Order 87-10), § 296-104-701, filed 5/21/87.]

Chapter 296-115 WAC

SAFETY REQUIREMENTS FOR CHARTER BOATS

WAC

296-115-001	Foreword.
296-115-005	Scope and application.
296-115-010	Appeal of decisions.
296-115-015	Definitions applicable to all sections of this chapter.
296-115-025	Vessel inspection and licensing.
296-115-030	Master's examination and licensing.
296-115-035	Specific inspection requirements.
296-115-040	Construction and arrangement.
296-115-050	General requirements.
296-115-060	Operations.
296-115-070	Rules of navigation.
296-115-100	Violations and setting of penalties.
296-115-120	Annual fee schedule.

WAC 296-115-001 Foreword. This chapter is adopted to implement chapter 88.04 RCW as revised in 1999. The purpose of these rules is to set reasonable guidelines and requirements to provide for the safety and health of passengers and crew on board passenger vessels. It is intended that these rules will be consistent with the rules adopted by the United States Coast Guard under 46 CFR Parts 166 to 199.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-001, filed 11/21/00, effective 1/1/01. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-001, filed 11/13/80.]

WAC 296-115-005 Scope and application. (1) This chapter applies to vessels for hire that carry seven or more passengers when operated in waters within the jurisdiction of the state of Washington. These rules do not apply to vessels in the navigable waters of the United States subject to the jurisdiction of the United States Coast Guard.

(2) Pursuant to chapter 88.04 RCW, the director of the department of labor and industries will administer this chapter.

(3) All rules adopted by the United States Coast Guard pertaining to inland water passenger vessel service and navigation on inland waters will be applied to this chapter unless they conflict with specific provisions of this chapter or chapter 88.04 RCW.

(4) Special consideration. In applying the provisions of this section, the director may allow departures from the specific requirements when special circumstances or arrangements warrant such departures.

(5) The provisions of this chapter do not apply to:

(a) A vessel that is a charter boat but is being used by the documented or registered owner of the charter boat exclusively for the owner's own noncommercial or personal pleasure purposes;

(b) A vessel owned by a person or corporate entity which is donated and used by a person or nonprofit organization to transport passengers for charitable or noncommercial purposes, regardless of whether consideration is directly or indirectly paid to the owner;

(c) A vessel that is rented, leased, or hired by an operator to transport passengers for noncommercial or personal pleasure purposes;

(d) A vessel used exclusively for, or incidental to, an educational purpose; or

(e) A bare boat charter boat.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-005, filed 11/21/00, effective 1/1/01. Statutory Authority: Chapter 49.17 RCW. 91-24-017 (Order 91-07), § 296-115-005, filed 11/22/91, effective 12/24/91; 91-03-044 (Order 90-18), § 296-115-005, filed 1/10/91, effective 2/12/91. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-005, filed 11/13/80.]

WAC 296-115-010 Appeal of decisions. (1) Any person aggrieved by a decision of the Maritime Specialist in Policy & Technical Services (P&TS) may appeal the decision to the director within fifteen working days after receipt of the decision.

(2) The director will give the Maritime Specialist in P&TS notice of the appeal. The Maritime Specialist in P&TS will have ten working days to comment in writing. At the discretion of the director, an informal conference may be held with all affected parties invited to participate.

(3) The director must issue a determining order within twenty working days of the receipt of the appeal or within ten working days following conclusion of an informal conference.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-010, filed 11/21/00, effective 1/1/01. Statutory Authority: Chapter 49.17 RCW. 91-03-044 (Order 90-18), § 296-115-010, filed 1/10/91, effective 2/12/91. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-010, filed 11/13/80.]

WAC 296-115-015 Definitions applicable to all sections of this chapter.

Note: Meaning of words. Unless the context indicates otherwise, words used in this chapter will have the meaning given in this section.

Approved means approved by the director; however, if a provision of this chapter requires approval by an agency or organization other than the department such as nationally recognized testing laboratories or the United States Coast Guard is required, then approval by the specified authority will be accepted.

Authorized person means a person approved or assigned by the employer to perform a specific type of duty or duties or be at a specific location or locations at the workplace.

Bare boat charter means the unconditional lease, rental, or charter of a boat by the owner, or his or her agent, to a person who by written agreement, or contract, assumes all

responsibility and liability for the operation, navigation, and provisioning of the boat during the term of the agreement or contract, except when a captain or crew is required or provided by the owner or owner's agents to be hired by the charterer to operate the vessel.

Carrying passengers or cargo means the transporting of any person or persons or cargo on a vessel for a fee or other consideration.

CFR means Code of Federal Regulations.

Charter boat means a vessel or barge operating on waters of the state of Washington which is not inspected or licensed by the United States Coast Guard and over which the United States Coast Guard does not exercise jurisdiction and which is rented, leased, or chartered to carry more than six persons or cargo.

Commercial means any activity from which the operator, or the person chartering, renting, or leasing a vessel derives a profit, and/or which qualifies as a legitimate business expense under the Internal Revenue Statutes.

Competent person means someone who is capable of identifying existing and predictable hazards in the surroundings or working conditions that are unsanitary, hazardous, or dangerous to employees, and who has authorization to take prompt action to eliminate them.

Confined space means a space that:

- (1) Is large enough and so configured that an employee can bodily enter and perform assigned work; and
- (2) Has limited or restricted means for entry or exit (for example, tanks, vessels, silos, storage bins, hoppers, vaults, and pits are spaces that may have limited means of entry); and
- (3) Is not designed for continuous employee occupancy.

Defect means any characteristic or condition that tends to weaken or reduce the strength of the tool, object, or structure of which it is a part.

Department means the department of labor and industries.

Director means the director of the department of labor and industries, or his/her designated representative.

Employer means any person, firm, corporation, partnership, business trust, legal representative, or other business entity that operates a passenger vessel for hire in this state and employs one or more employees or contracts with one or more persons, the essence of which is the personal labor of such persons. Any person, partnership, or business entity that has no employees, and is covered by the Industrial Insurance Act shall be considered both an employer and an employee.

Enclosed space means any space, other than a confined space, which is enclosed by bulkheads and overhead. It includes cargo holds, tanks, quarters, and machinery and boiler spaces.

Equipment means a system, part, or component of a vessel as originally manufactured, or a system, part, or component manufactured or sold for replacement, repair, or improvement of a system, part, or component of a vessel; an accessory or equipment for, or appurtenance to a vessel; or a marine safety article, accessory, or equipment, including radio equipment, intended for use by a person on board a vessel.

Hazard means a condition, potential or inherent, that is likely to cause injury, death, or occupational disease.

Hazardous substance means a substance that, because it is explosive, flammable, poisonous, corrosive, oxidizing, irritating, or otherwise harmful, is likely to cause death or injury, including all substances listed on the USCG hazardous materials list.

Inspection means the examination of vessels by the director or an authorized representative of the director.

Maritime Specialist in P&TS means a technical and operations specialist in maritime issues located in the department of labor and industries' policy and technical services section.

Passenger means any person or persons, carried on board a vessel in consideration of the payment of a fee or other consideration.

Port means left hand side of a vessel as one faces the bow.

Starboard means right hand side of a vessel as one faces the bow.

Power driven vessel means any vessel propelled by machinery.

Qualified means one who, by possession of a recognized degree, certificate, or professional standing, or who by extensive knowledge, training, and experience, has successfully demonstrated the ability to solve problems relating to the subject matter, the work, or the project.

Safety and health standard means a standard that requires the adoption or use of one or more practices, means, methods, operations, or processes reasonably necessary or appropriate to provide safe or healthful employment and places of employment.

Should means recommended.

Substantial means constructed of such strength, of such material, and of such workmanship, that the object referred to will withstand all normal wear, shock, and usage.

Standard safeguard means a device intended to remove a hazard incidental to the machine, appliance, tool, or equipment to which the device is attached.

Standard safeguards shall be constructed of either metal, wood, other suitable material, or a combination of these. The final determination of the sufficiency of any safeguard rests with the director.

Suitable means that which fits, or has the qualities or qualifications to meet a given purpose, occasion, condition, function, or circumstance.

Under way means a vessel is not at anchor, or made fast to the shore, or aground.

USCG means the United States Coast Guard.

United States Coast Guard Navigation means rules International/Inland, Commandants Instruction M16672.29 as now adopted, or hereafter legally amended by the United States Coast Guard.

Vessel means every description of motorized watercraft, other than a bare boat charter boat, seaplane, or sailboat, used or capable of being used to transport more than six passengers or cargo on water for rent, lease, or hire.

Working day means a calendar day, except Saturdays, Sundays, and legal holidays as set forth in RCW 1.16.050, as now or hereafter amended. The time within which an act is to

be done under the provisions of this chapter shall be computed by excluding the first working day and including the last working day.

Worker, personnel, man, person, employee, and other terms of like meaning, unless the context indicates otherwise means an employee of an employer who is employed in the business of his/her employer whether by way of manual labor or otherwise and every person in this state who is engaged in the employment of or who is working under an independent contract the essence of which is his/her personal labor for an employer whether by manual labor or otherwise.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-015, filed 11/21/00, effective 1/1/01. Statutory Authority: Chapter 49.17 RCW. 95-04-007, § 296-115-015, filed 1/18/95, effective 3/1/95; 91-24-017 (Order 91-07), § 296-115-015, filed 11/22/91, effective 12/24/91; 91-03-044 (Order 90-18), § 296-115-015, filed 1/10/91, effective 2/12/91. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-015, filed 11/13/80.]

WAC 296-115-025 Vessel inspection and licensing.

(1) The department must inspect all vessels to ensure they are safe and seaworthy at least once each year. The department may also inspect a vessel if requested to do so by the owner, operator, or master of the vessel, and after an explosion, fire, or any other accident involving the vessel.

(2) The department may inspect a vessel upon receipt of a complaint from any person or, at the discretion of the department, at any other time.

(3) The department will charge the owner of a vessel a fee for each certification or recertification inspection. This fee will be determined by the director. (See WAC 296-115-120 for fee schedule.)

(4) After the department has inspected a vessel and it is satisfied the vessel is safe and seaworthy, the department will issue a certificate of inspection for that vessel. The certificate will be valid for one year after the date of inspection.

(5) The certificate must set forth the date of the inspection, the names of the vessel and the owner, the number of lifeboats and life preservers required, the number of passengers allowed, and any other information the department may by rule require.

(6)(a) If at any time a vessel is found to be not safe or seaworthy, or not in compliance with the provisions of this chapter, the department may refuse to issue a certificate of inspection until the deficiencies have been corrected and may cancel any certificate of inspection currently issued.

(b) The department must give the owner of the vessel a written statement of the reason(s) the vessel was found to be unsafe, unseaworthy, or not in compliance with the provisions of this chapter, including a specific reference to the statute or rule with which the vessel did not comply.

(7) An inspector of the department may, upon the presentation of his or her credentials to the owner, master, operator, or agent in charge of a vessel, board the vessel without delay to make an inspection. The inspector must inform the owner, master, operator, or agent in charge that his or her intent is to inspect the vessel.

(8) During the inspection, the inspector must have access to all areas of the vessel. The inspector may question pri-

vately the owner, master, operator, or agent in charge of the vessel, or any crew member or passenger on the vessel.

(9) If any person refuses to allow an inspector to board a vessel for an inspection, or refuses to allow access to any areas of the vessel, the department may request a warrant from the superior court for the county in which the vessel is located. The court will grant the warrant:

(a) If there is evidence that the vessel has sustained a fire, explosion, unintentional grounding, or has been involved in any other accident;

(b) If there is evidence that the vessel is not safe or seaworthy; or

(c) Upon a showing that the inspection furthers a general administrative plan for enforcing the safety requirements of the act.

(10) The owner or master of a vessel must post the certificate of inspection behind glass in a conspicuous area of the vessel.

(11) No person will operate a passenger vessel if the vessel does not have a valid certificate of inspection.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-025, filed 11/21/00, effective 1/1/01. Statutory Authority: Chapter 49.17 RCW. 91-03-044 (Order 90-18), § 296-115-025, filed 1/10/91, effective 2/12/91. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-025, filed 11/13/80.]

WAC 296-115-030 Master's examination and licensing.

(1) The registered owner of passenger vessels or barges for hire is responsible to obtain an operator's license from the United States Coast Guard or the department for the master or operator of each vessel. A physical examination will be required.

(2) The department will penalize any person who acts as a master or operator on a vessel without having first received a United States Coast Guard or department license, or without having a valid license in his or her possession, or upon a vessel or class of vessels not specified in the license.

(3) The department may recommend suspension or revocation of a license to the United States Coast Guard for intemperance, incompetence, or a negligent, reckless, or willful disregard for duty.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-030, filed 11/21/00, effective 1/1/01. Statutory Authority: Chapter 49.17 RCW. 89-21-018 (Order 89-10), § 296-115-030, filed 10/10/89, effective 11/24/89. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-030, filed 11/13/80.]

WAC 296-115-035 Specific inspection requirements.

(1) Drydocking or hauling out.

Each vessel subject to the provisions in this section must be drydocked or hauled out at intervals not to exceed sixty months and the underwater hull and appendages, propellers, shafting, stern bearings, rudders, through-hull fittings, sea valves and strainers must be examined to determine that these items are in satisfactory condition.

(2) At the annual inspection the inspector must view the vessel afloat and conduct the following tests and inspections of the hull:

(a) Hull exterior and interior, bulkheads, and weather deck.

(b) Examine and test by operation all watertight closures in the hull, decks, and bulkheads.

(c) Inspect all railings and bulwarks and their attachment to the hull.

(d) Inspect weathertight closures above the weather deck and drainage or water from exposed decks and superstructure.

(3) At the annual inspection the inspector will examine and test the following items:

(a) Main propulsion machinery.

(b) Engine starting system.

(c) Engine control mechanisms.

(d) Auxiliary machinery.

(e) Fuel systems.

(f) Sea valves and bulkhead closure valves.

(g) Bilge and drainage systems.

(h) Electrical system, including circuit protection.

(4) Lifesaving and fire extinguishing equipment. At each annual inspection the inspector must inspect the life saving and fire extinguishing equipment for serviceability.

(5) Miscellaneous systems and equipment. At each annual inspection the marine dock inspector must inspect and test the vessel's steering apparatus, ground tackle, navigation lights, sanitary facilities, pressure vessels, and any other equipment aboard the vessel for serviceability and safety.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-035, filed 11/21/00, effective 1/1/01. Statutory Authority: Chapter 49.17 RCW. 91-03-044 (Order 90-18), § 296-115-035, filed 1/10/91, effective 2/12/91. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-035, filed 11/13/80.]

WAC 296-115-040 Construction and arrangement.

(1) Application.

(a) The requirements of this section apply to all vessels contracted for construction on or after June 7, 1979.

(b) Vessels constructed before the effective date of this chapter must be brought into substantial compliance with the requirements of this section. Where deviation exists and strict compliance is impractical, the director may grant a temporary variance to allow a modification or a permanent variance if the intent of subsection (1)(c) of this section is met.

(c) The intent of the regulations in this part is to provide for a sound, seaworthy vessel, reasonably fit for the service it is intended to provide, and to ensure that the materials, scantlings, fastenings, and workmanship meet this intent. Primary consideration must be given to the provision of a seaworthy hull, protection against fire, means of escape in case of casualty, guards and rails in hazardous places, ventilation of closed spaces, and necessary facilities for passengers and crew.

(2) Hull structure.

(a) In general, compliance with the standards of the United States Coast Guard rules for small passenger vessels or with the standards of a recognized classification society will be considered satisfactory evidence of the structural adequacy of a vessel.

(b) Special consideration will be given by the director to materials or structural requirements not contemplated by the standards of a recognized classification society.

(3) Watertight integrity and subdivision.

(a) All vessels carrying more than forty-nine passengers must have a collision bulkhead and watertight bulkheads (or sufficient air tankage or other internal flotation) so the vessel will remain afloat (with positive stability) with any one main compartment flooded.

(b) All watertight bulkheads required by this part must be of substantial construction so as to be able to remain watertight with water to the top of the bulkhead.

(c) Watertight bulkheads must extend intact to the bulkhead deck. Penetrations must be kept to a minimum and must be watertight.

(d) The weather deck on a flush deck vessel must be watertight and must not obstruct overboard drainage.

(e) Cockpits must be watertight except that companionways may be fitted if they are provided with watertight coamings and weathertight doors. Also, ventilation openings may be provided if they are situated as high in the cockpit as possible and the opening height does not exceed two inches.

(f) Cockpits must be self-bailing. The scuppers installed for this purpose must be located so as to be effective considering probable list and trim.

(g) Well decks must be watertight. Freeing ports may be installed if the provisions of applicable United States Coast Guard standards are followed.

(h) On vessels operating on protected waters, hatches may be weathertight. All hatches must be provided with covers capable of being secured.

(i) The number of openings in the vessel's sides below the weather deck must be kept to a minimum.

(j) Any openings in a vessel's sides, such as portlights, must comply with applicable United States Coast Guard standards.

(4) Stability.

(a) All vessels subject to the provisions of this section must have a stability test, except that the director may dispense with the requirements for a test if he deems that a test is not required, on the basis of sufficient evidence provided by the owner that the vessel's stability is satisfactory for the service for which it is intended.

(b) A letter stating that the vessel has met the stability requirements of this part must be posted in the pilothouse of each vessel.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-040, filed 11/21/00, effective 1/1/01. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-040, filed 11/13/80.]

WAC 296-115-050 General requirements. (1) Application.

(a) The following rules are applicable to all vessels operated within the scope of this chapter.

(b) Where an existing vessel does not comply with a particular requirement of this section, the director may grant a temporary variance to allow time for modifications to be made.

(c) Where an existing vessel does not comply with a specific requirement contained herein but the degree of protection afforded is judged to be adequate for the service in which the vessel is used, the director may grant a permanent variance.

(2) Lifesaving equipment. Where equipment required by this section is required to be of an approved type, the equipment is required to be approved by the USCG.

(3) Lifesaving equipment required.

(a) All vessels carrying passengers must carry life floats or buoyant apparatus for all persons on board.

(b) All life floats or buoyant apparatus must be international orange in color.

(c) In the case of vessels operating not more than one mile from land, the director may permit operation with reduced amounts of life floats or buoyant apparatus, when, in his opinion, it is safe to do so.

(d) Lifeboats, life rafts, dinghies, dories, skiffs, or similar type craft may be substituted for the required life floats or buoyant apparatus if the substitution is approved by the director.

(e) Life floats, buoyant apparatus, or any authorized substitute must have the following equipment:

(i) A life line around the sides at least equivalent to 3/8-inch manila, festooned in bights of at least three feet, with a seine float in the center of each bight.

(ii) Two paddles or oars not less than four feet in length.

(iii) A painter of at least thirty feet in length and of at least two-inch manila or the equivalent.

(f) All vessels must have an approved adult type life preserver for each person carried, with at least ten percent additional of a type suitable for children.

(g) Life preservers must be stowed in readily accessible places in the upper part of the vessel, and each life preserver shall be marked with the vessel's name.

(h) All vessels must carry at least one life ring buoy of an approved type with sixty feet of line attached.

(i) The life ring buoy must be carried in a readily accessible location and must be capable of being cast loose at any time.

(4) Fire protection.

(a) The general construction of a vessel must minimize fire hazards.

(b) Internal combustion engine exhausts, boiler and galley uptakes, and similar sources of ignition must be kept clear of and suitably insulated from woodwork or other combustible material.

(c) Lamp, paint, and oil lockers and similar storage areas for flammable or combustible liquids must be constructed of metal or lined with metal.

(5) Fire protection equipment. Equipment required by this section, when required to be of an approved type, must be of a type approved by the USCG or other agency acceptable to the director.

(6) Fire pumps.

(a) All vessels carrying more than forty-nine passengers must carry an approved power fire pump, and all other vessels must carry an approved hand fire pump. These pumps must be provided with a suitable suction and discharge hose. These pumps may also serve as bilge pumps.

(b) Vessels required to have a power fire pump must also have a fire main system, including fire main, hydrants, hose, and nozzles. The fire hose may be a good commercial grade garden hose of not less than 5/8 inch size.

(7) Fixed fire extinguishing system.

(a) All vessels powered by internal combustion engines using gasoline or other fuel having a flashpoint of 110°F or lower, must have a fixed fire extinguishing system to protect the machinery and fuel tank spaces.

(b) This system must be an approved type using carbon dioxide and have a capacity sufficient to protect the space.

(c) Controls for the fixed system must be installed in an accessible location outside the space protected.

(8) Fire axe. All vessels must have one fire axe located in or near the pilothouse.

(9) Portable fire extinguishers.

(a) All vessels must have a minimum number of portable fire extinguishers of an approved type. The number required will be determined by the director.

(b) Portable fire extinguishers must be inspected at least once a month. Extinguishers found defective must be serviced or replaced.

(c) Portable fire extinguishers must be serviced at least once a year. The required service must consist of discharging and recharging foam and dry chemical extinguishers and weighing and inspecting carbon dioxide extinguishers.

(d) Portable fire extinguishers must be hydrostatically tested at intervals not to exceed those specified in WAC 296-24-59211(2) and Table I (after August 31, 2001, see WAC 296-800-300).

(e) Portable fire extinguishers of the vaporizing liquid type such as carbon tetrachloride and other toxic vaporizing liquids are prohibited and must not be carried on any vessel.

(f) Portable fire extinguishers must be mounted in brackets or hangers near the space protected. The location must be marked in a manner satisfactory to the director.

(10) Means of escape.

(a) Except as otherwise provided in this section, all vessels must be provided with not less than two avenues of escape from all general areas accessible to the passengers or where the crew may be quartered or normally employed. The avenues must be located so that if one is not available the other may be. At least one of the avenues should be independent of watertight doors.

(b) Where the length of the compartment is less than twelve feet, one vertical means of escape will be acceptable under the following conditions:

(i) There is no source of fire in the space, such as a galley stove or heater and the vertical escape is remote from the engine and fuel tank space; or

(ii) The arrangement is such that the installation of two means of escape does not materially improve the safety of the vessel or those aboard.

(11) Ventilation.

(a) All enclosed spaces within the vessel must be properly vented or ventilated. Where such openings would endanger the vessel under adverse weather conditions, means must be provided to close them.

(b) All crew and passenger space must be adequately ventilated in a manner suitable to the purpose of the space.

(12) Crew and passenger accommodations.

(a) Vessels with crew members living aboard must have suitable accommodations.

(b) Vessels carrying passengers must have fixed seating for the maximum number of passengers permitted to be carried.

(c) Fixed seating must be installed with spacing to provide for ready escape in case of fire or other casualty.

(d) Fixed seating must be installed as follows, except that special consideration may be given by the director if escape over the side can be readily accomplished through windows or other openings in the way of the seats:

(i) Aisles not over fifteen feet long must be not less than twenty-four inches wide.

(ii) Aisles over fifteen feet long must be not less than thirty inches wide.

(iii) Where seats are in rows the distance from seat front to seat front must be not less than thirty inches.

(e) Portable or temporary seating may be installed but must be arranged in general as provided for fixed seating.

(13) Toilet facilities and drinking water.

(a) Vessels must be provided with toilets and wash basins as specified in WAC 296-24-12007 and 296-24-12009 (after August 31, 2001, see WAC 296-800-300), except that in the case of vessels used exclusively on short runs of approximately thirty minutes or less, the director may approve other arrangements.

(b) All toilets and wash basins must be fitted with adequate plumbing. Facilities for men and women must be in separate compartments, except in the case of vessels carrying forty-nine passengers and less, the director may approve other arrangements.

(c) Potable drinking water must be provided for all passengers and crew. The provisions of WAC 296-24-12005 applies through August 31, 2001, after August 31, 2001, see WAC 296-800-300.

(d) Covered trash containers must be provided in passenger areas.

(14) Rails and guards.

(a) Except as otherwise provided in this section, rails or equivalent protection must be installed near the periphery of all weather decks accessible to passengers and crews. Where space limitations make deck rails impractical, such as at narrow catwalks in the way of deckhouse sides, hand grabs may be substituted.

(b) Rails must consist of evenly spaced courses. The spacing must not be greater than twelve inches except as provided in WAC 296-115-050 (14)(f). The lower rail courses may not be required where all or part of the space below the upper rail course is fitted with a bulwark, chain link fencing, wire mesh or the equivalent.

(c) On passenger decks of vessels engaged in ferry or excursion type operation, rails must be at least forty-two inches high. The top rail must be pipe, wire, chain, or wood and must withstand at least two hundred pounds of side loading. The space below the top rail must be fitted with bulwarks, chain link fencing, wire mesh, or the equivalent.

(d) On vessels in other than passenger service, the rails must be not less than thirty-six inches high, except that where

vessels are used in special service, the director may approve other arrangements, but in no case less than thirty inches.

(e) Suitable storm rails or hand grabs must be installed where necessary in all passageways, at deckhouse sides, and at ladders and hatches where passengers or crew might have normal access.

(f) Suitable covers, guards, or rails must be installed in the way of all exposed and hazardous places such as gears or machinery. (See WAC 296-24-150 for detailed requirements.)

(15) Machinery installation.

(a) Propulsion machinery.

(i) Propulsion machinery must be suitable in type and design for the propulsion requirements of the hull in which it is installed. Installations meeting the requirements of the USCG or other classification society will be considered acceptable to the director.

(ii) Installations using gasoline as a fuel must meet the requirements of applicable USCG standards.

(iii) Installations using diesel fuel must meet the requirements of applicable USCG standards.

(b) Auxiliary machinery and bilge systems.

(i) All vessels must be provided with a suitable bilge pump, piping and valves for removing water from the vessel.

(ii) Vessels carrying more than forty-nine passengers must have a power operated bilge pump. The source of power must be independent of the propulsion machinery. Other vessels must have a hand operated bilge pump, but may have a power operated pump if it is operated by an independent power source.

(c) Steering apparatus and miscellaneous systems.

(i) All vessels must be provided with a suitable steering apparatus.

(ii) All vessels must be provided with navigation lights and shapes, whistles, fog horns, and fog bells as required by the USCG rules of navigation.

(iii) All vessels must be equipped with a suitable number of portable battery lights for emergency purposes.

(d) Electrical installations. The electrical installations of all vessels must be at least equal to applicable USCG standards, or as approved by the director.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-050, filed 11/21/00, effective 1/1/01. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-050, filed 11/13/80.]

WAC 296-115-060 Operations. (1) This section applies to all passenger vessel operations within the scope of this chapter.

(2) No person will rent, lease, or hire out a charter boat, nor carry, advertise for the carrying of, nor arrange for the carrying of, more than six passengers on a vessel for a fee or other consideration on the waters of the state unless the vessel is in compliance with the provisions of this chapter.

(3) Notice of casualty.

(a) The owner or person in charge of any vessel involved in a marine accident or casualty involving any of the following must report the incident immediately to the department.

(i) Damage to property in excess of one thousand five hundred dollars.

(ii) Major damage affecting the seaworthiness or safety of the vessel.

(iii) Loss of life or an injury to a person that incapacitates the person for more than seventy-two hours.

(b) The report must be in writing to the director and upon receipt of the report the director may request an investigation by a marine dock inspector.

(4) Miscellaneous operating requirements.

(a) In the case of collision, accident, or other casualty involving a vessel the operator, must, so far as he can do so without serious danger to his own vessel or persons aboard, render any necessary assistance to other persons affected by the collision, accident, or casualty to save them from danger. He must also give his name and address and the name of his vessel to any person injured and to the owner of any property damaged.

(b) The person in charge of the vessel must see that the provisions of the certificate of inspection are strictly adhered to. This will not be construed as limiting the person in charge from taking any action in an emergency that he deems necessary to help vessels in distress or to prevent loss of life.

(c) Persons operating vessels must comply with the provisions of the USCG rules of the road for inland waters.

(d) The operator of a vessel must test the vessel's steering gear, signaling whistle, controls, and communication system before getting under way for the day's operation.

(e) Vessels using fuel having a flashpoint of 110°F or lower must not take on fuel when passengers are on board.

(f) All vessels must enforce "no smoking" provisions when fueling. Locations on the vessel where flammable or combustible liquids are stored must be posted "no smoking."

(g) All vessels must prepare and post emergency check-off lists in a conspicuous place accessible to crew and passengers, covering the following:

(i) Man overboard.

(ii) Fire.

(h) The persons in charge must conduct emergency drills to ensure that the crew is familiar with their duties in an emergency.

(i) The carriage of hazardous substances is prohibited on vessels. However, the director may authorize a vessel to carry specific types and quantities of hazardous substances if he deems it necessary.

(j) All areas accessible to passengers or crew must be kept in a clean and sanitary condition. All walking surfaces must be free of slipping or tripping hazards and in good repair.

(5) First-aid training. There must be present or available on all passenger vessels at all times, a person holding a valid certificate of first-aid training.

(6) Valid certification must be achieved by passing a course of first-aid instruction and participation in practical application of the following subject matter.

Bleeding control and bandaging.

Practical methods of artificial respiration, including mouth to mouth and mouth to nose resuscitation.

Closed chest heart massage.

Poisons.

Shock, unconsciousness, stroke.

Burns, scalds.

Sunstroke, heat exhaustion.

Frostbite, freezing, hypothermia.

Strains, sprains, hernias.

Fractures, dislocations.

Proper transportation of the injured.

Bites, stings.

Subjects covering specific health hazards likely to be encountered by co-workers of first-aid students enrolled in the course.

(7) First-aid equipment. A first-aid kit or first-aid room must be provided on all passenger vessels. The size and quantity of first-aid supplies or equipment required must be determined by the number of persons normally dependent upon each kit or equipment. The first-aid kit or supplies must be in a weatherproof container with individually sealed packages for each type of item. The first-aid station or kit location must be posted or on the container.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-060, filed 11/21/00, effective 1/1/01. Statutory Authority: Chapter 49.17 RCW. 91-03-044 (Order 90-18), § 296-115-060, filed 1/10/91, effective 2/12/91. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-060, filed 11/13/80.]

WAC 296-115-070 Rules of navigation. The operation and navigation of all vessels subject to this chapter must be in strict accordance with the United States Coast Guard Navigation Rules International/Inland, Commandants Instruction M16672.29 as now adopted, or hereafter legally amended by the United States Coast Guard.

(1) A copy of the United States Coast Guard Navigation Rules International/Inland, Commandants Instruction M16672.29, must be on board all vessels subject to this chapter at all times when the vessel is under way.

(2) At least annually, where applicable, the operator of each vessel must "swing the vessel" to determine the actual compass readings in relation to true compass headings, and must maintain a record on board the vessel.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-070, filed 11/21/00, effective 1/1/01. Statutory Authority: Chapter 49.17 RCW. 91-03-044 (Order 90-18), § 296-115-070, filed 1/10/91, effective 2/12/91. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-070, filed 11/13/80.]

WAC 296-115-100 Violations and setting of penalties. (1) Violations of the mandatory provisions of this chapter will be subject to penalty. The amount of the penalty will be assessed in accordance with the guidelines and fixed schedules contained herein.

(2) Fixed schedule penalties.

(a) Failure to display certificate of inspection as required: Fifty dollars to owner of the vessel.

(b) Operation of vessel in passenger service without a valid certificate of inspection: To owner of vessel, two hundred dollars per violation; to person who operates vessel, one hundred dollars per violation.

(c) Operation of vessel in passenger service while not in possession of valid USCG/state of Washington operator's license: One hundred dollars per violation to owner of vessel.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and 1999 c 111. 00-23-100, § 296-115-100, filed 11/21/00, effective 1/1/01. Statutory Authority: Chapter 49.17 RCW. 91-03-044 (Order 90-18), § 296-115-100, filed 1/10/91, effective 2/12/91. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-100, filed 11/13/80.]

WAC 296-115-120 Annual fee schedule. (1) The annual license fee for passenger vessels or barges is \$250.00 plus \$2.00 per ton for each vessel.

(2) The fee for an operator's license for passenger vessels or barges is \$50.00 for the first year; this covers application and test costs. The renewal fee is \$25.00 annually.

(3) Additional inspection service when required is at the rate of \$25.00 per hour, plus travel and per diem.

[Statutory Authority: Chapter 49.17 RCW. 89-21-018 (Order 89-10), § 296-115-120, filed 10/10/89, effective 11/24/89. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-115-120, filed 11/13/80.]

Chapter 296-125 WAC

NONAGRICULTURAL EMPLOYMENT OF MINORS

WAC

- 296-125-010 Applicability.
- 296-125-015 Definitions.
- 296-125-018 Minimum age for employment.

MASTER BUSINESS LICENSE/MINOR WORK PERMIT ENDORSEMENT

- 296-125-0200 If I plan to employ minors in my business, what general requirements do I have to satisfy?
- 296-125-0210 Do I need minor work permit endorsements for my business?
- 296-125-0211 What if I employ minors at several different workplaces?
- 296-125-0220 Are there working condition restrictions which may be placed on my minor work permit endorsements?
- 296-125-0221 Do my minor work permit endorsements expire?
- 296-125-0222 Can I renew my minor work permit endorsements?
- 296-125-0223 How long must my minor work permit endorsements stay in force?
- 296-125-0224 Do I need to post my minor work permit endorsements?
- 296-125-0230 Can the department of labor and industries refuse to issue or renew, revoke, suspend or modify my minor work permit endorsements?
- 296-125-0231 Can I appeal the department's refusal to issue or renew, or to revoke, suspend or modify my minor work permit endorsements?
- 296-125-024 House-to-house sales.

PARENT/SCHOOL AUTHORIZATION FORMS

- 296-125-0260 If I employ minors, do I need authorization from the parent or school?
- 296-125-0261 Where can I obtain a parent/school authorization form?
- 296-125-0262 Do parent/school authorization forms expire?
- 296-125-0263 What information must a minor provide on the parent/school authorization form?
- 296-125-0264 What information must an employer provide on the parent/school authorization form?
- 296-125-0265 What information must a parent or legal guardian provide on the parent/school authorization form?
- 296-125-0266 What information must a school provide on the parent/school authorization form?
- 296-125-0267 What if a minor is no longer attending school?
- 296-125-0268 Can a parent, legal guardian or school revoke the work authorization previously given on the parent/school authorization form?
- 296-125-027 Hours of work for minors.

RECORDKEEPING

- 296-125-0275 When I employ minors, what recordkeeping requirements must I satisfy?
- 296-125-0280 What is the department's enforcement authority?

MEAL AND REST BREAKS FOR MINORS

- 296-125-0285 What regulations apply to meal and rest breaks for my fourteen-year-old and fifteen-year-old minors?
- 296-125-0287 What regulations apply to meal and rest breaks for my sixteen-year-old and seventeen-year-old employees?
- 296-125-030 Prohibited and hazardous employment—All minors.
- 296-125-033 Prohibited and hazardous employment—Special restrictions for minors under the age of 16.
- 296-125-043 Minimum wages—Minors.

VARIANCES

- 296-125-0600 What is a variance?
- 296-125-0610 How do I obtain a variance?
- 296-125-0611 What does "good cause" mean?
- 296-125-0620 Are there special requirements that I must satisfy if I request a variance to employ minors under the age of sixteen in house-to-house sales?
- 296-125-0640 What criteria will be used to evaluate my variance request?
- 296-125-0650 Do my variances expire?
- 296-125-0651 Can my variances be renewed?
- 296-125-0660 Can the department of labor and industries revoke, suspend, or modify my variances?
- 296-125-0670 Can I appeal the department's action to revoke, suspend or modify my variances?

SPECIAL VARIANCES

- 296-125-0700 What is a special variance?
- 296-125-0710 What criteria will be followed in evaluating my special variance request?
- 296-125-0720 How can a school district or individual private school qualify for participation in the special variance process?
- 296-125-0721 Where can a school district or individual private school obtain a copy of the special variance process enrollment form?
- 296-125-0722 In addition to completing the enrollment form, what other requirements must be satisfied before a school district or private school can participate in the special variance program?
- 296-125-0723 What is the employer's responsibility in providing information to the minor, the minor's parent or legal guardian, and school officials?
- 296-125-0730 What other information about special variance requests is important?
- 296-125-0740 What are the consequences of submitting an incomplete special variance request form?
- 296-125-0741 Can a school district or private school appeal the department's decision to revoke its participation in the special variance program?
- 296-125-0750 What are the criteria used by a school to evaluate special variance requests?
- 296-125-0760 Do special variances expire?
- 296-125-0770 Can the department of labor and industries revoke, suspend, or modify a special variance?
- 296-125-0771 Can the parties to a special variance revoke it?
- 296-125-0772 Can the department's action to refuse to issue or renew, revoke, suspend or modify a special variance be appealed?

DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER

- 296-125-019 Prerequisites to employing minors. [Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-019, filed 12/11/92, effective 3/1/93.] Repealed by 99-15-071, filed 7/19/99, effective 8/19/99. Statutory Authority: Chapter 49.12 RCW.
- 296-125-020 Minor work permits. [Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-020, filed 12/11/92, effective 3/1/93; Order 76-15, § 296-125-020, filed 5/17/76; Order 71-5, § 296-125-020, filed 5/26/71, effective 7/1/71; Section C, filed 9/18/63; Rulés (part), filed 3/23/60.] Repealed by 99-02-041, filed 12/31/98, effective 1/31/99. Statutory Authority: RCW 49.12.121.
- 296-125-023 Posting. [Order 76-15, § 296-125-023, filed 5/17/76.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.

- 296-125-025 Conditions governing issuance of permits. [Order 74-9, § 296-125-025, filed 3/13/74, effective 4/15/74; Order 71-5, § 296-125-025, filed 5/26/71, effective 7/1/71; Section D, filed 9/18/63; Rules (part), filed 3/12/60.] Repealed by Order 76-15, filed 5/17/76.
- 296-125-026 Parent/school authorization forms. [Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-026, filed 12/11/92, effective 3/1/93.] Repealed by 99-02-041, filed 12/31/98, effective 1/31/99. Statutory Authority: RCW 49.12.121.
- 296-125-028 Meal and rest breaks for minors. [Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-028, filed 12/11/92, effective 3/1/93.] Repealed by 99-02-041, filed 12/31/98, effective 1/31/99. Statutory Authority: RCW 49.12.121.
- 296-125-035 Working conditions. [Section F, filed 9/18/63; Rules (part), filed 3/23/60.] Repealed by Order 71-5, filed 5/26/71, effective 7/1/71.
- 296-125-040 Issuance of permit. [Order 71-5, § 296-125-040, filed 5/26/71, effective 7/1/71; Section G, filed 9/18/63; Rules (part), filed 3/23/60.] Repealed by Order 76-15, filed 5/17/76.
- 296-125-045 Denial of permit. [Order 71-5, § 296-125-045, filed 5/26/71, effective 7/1/71; Section H, filed 9/18/63.] Repealed by Order 76-15, filed 5/17/76.
- 296-125-050 Posting, recordkeeping, and authority to enter, inspect, and investigate. [Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-050, filed 12/11/92, effective 3/1/93; Order 76-15, § 296-125-050, filed 5/17/76; Order 71-5, § 296-125-050, filed 5/26/71, effective 7/1/71; Section I, filed 9/18/63; Rules (part), filed 3/23/60.] Repealed by 99-02-041, filed 12/31/98, effective 1/31/99. Statutory Authority: RCW 49.12.121.
- 296-125-055 Revocation of permits. [Order 76-15, § 296-125-055, filed 5/17/76; Order 71-5, § 296-125-055, filed 5/26/71, effective 7/1/71; Section J, filed 9/18/63; Rules (part), filed 3/23/60.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-060 Variances. [Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-060, filed 12/11/92, effective 3/1/93; Order 76-15, § 296-125-060, filed 5/17/76.] Repealed by 99-02-041, filed 12/31/98, effective 1/31/99. Statutory Authority: RCW 49.12.121.
- 296-125-070 Special variances. [Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068 and 93-04-112, § 296-125-070, filed 12/11/92 and 2/3/93, effective 3/1/93 and 7/1/93.] Repealed by 99-02-041, filed 12/31/98, effective 1/31/99. Statutory Authority: RCW 49.12.121.
- 296-125-110 Applicability. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-110, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-115 Definitions. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-115, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-120 Filing of registration certificate. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-120, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-125 Application for initial and renewed registration. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-125, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-130 Posting. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-130, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-135 Identification cards. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-135, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-140 House to house employment standards. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-140, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-145 Transporting minors out-of-state. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-145, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-155 Recordkeeping. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-155, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-160 Revocation of registration certificate. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-160, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-165 Denial of registration certificate. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-165, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-170 Employment of minors under the age of sixteen. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-170, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.
- 296-125-175 Length of registration period. [Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-175, filed 11/3/89, effective 11/20/89.] Repealed by 93-01-068, filed 12/11/92, effective 3/1/93. Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060.

WAC 296-125-010 Applicability. This chapter applies to every person that employs one or more minors, or who permits, allows, or suffers one or more minors to work at a site or workplace, on premises, or under work conditions controlled by that employer, except for those employers statutorily exempted, as follows: This chapter does not apply to newspaper vendors or carriers; to domestic or casual labor in or about private residences; to parents or stepparents who employ their own children for house-to-house sales; to agricultural labor as defined by RCW 50.04.150; or, to employers expressly exempted by federal statute from the coverage of state law.

[Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-010, filed 12/11/92, effective 3/1/93; Order 76-15, § 296-125-010, filed 5/17/76; Order 74-9, § 296-125-010, filed 3/13/74, effective 4/15/74; Order 71-5, § 296-125-010, filed 5/26/71, effective 7/1/71; Section A, filed 9/18/63; Rules (part), filed 3/23/60.]

WAC 296-125-015 Definitions. For the purposes of this chapter:

(1) "Department" means the Washington state department of labor and industries.

(2) "Employ" means to engage, suffer or permit to work, and includes entering into any arrangement, including a contract, whether implied, express, oral, or written, with a minor

whereby the minor works in house-to-house sales except when a minor is working in house-to-house sales for her or his parent or stepparent. The term "employ" does not include newspaper vendors or carriers, the use of domestic or casual labor in or about private residences, agricultural labor as defined by RCW 50.04.150, or the use of voluntary or donated services performed for an educational, charitable, religious, or nonprofit organization and without expectation or contemplation of compensation for the services performed.

(3) "Employee" means any minor employed by an employer, including minors who work pursuant to any arrangement, including contract, whether implied, express, oral, or written in house-to-house sales, but does not include newspaper vendors or carriers, domestic or casual labor in or about private residences, minors employed in agricultural labor as defined by RCW 50.04.150, or minors employed for house-to-house sales by their parents or stepparents.

(4) "Employer" means any person, association, partnership, private or public corporation that employs or exercises control over the wages, hours, working conditions, or workplace of a minor, and for purposes of house-to-house sales includes any distributor or other person, association, partnership, private or public corporation that enters into any arrangement, including contract, whether implied, express, oral, or written, with a minor whereby the minor works in house-to-house sales; but does not include employers of agricultural labor as defined by RCW 50.04.150, employers of newspaper vendors or carriers, employers of casual labor in or about the employers' private residences, parents or stepparents employing their own minor children for house-to-house sales, the state, a state institution, a state agency, a political subdivision of the state, a municipal corporation, or a quasi-municipal corporation.

(5) "House-to-house sales" means a sale or other transaction in consumer goods, the demonstration of products or equipment, the obtaining of orders for consumer goods, or the obtaining of contracts for services, in which an employee personally solicits the sale or transaction at a place other than the place of business of the employer or the residence of the employee.

(6) "Minor" means a person under the age of eighteen years.

(7) "School holiday" means a day of a school week on which the school at which a minor employee is enrolled is scheduled to be closed. If a minor employee is not enrolled in school, school holidays shall be determined by the schedule of the public school district in which the minor resides.

(8) "School vacation" means the spring break, winter break, and summer break of the school at which a minor employee is enrolled, or if not enrolled the public school district in which a minor resides.

(9) "Transport" means the conveyance, provision of a means of conveyance, or reimbursement or payment for the cost of conveyance at the direction or under the control of an employer or an employer's agent.

(10) "Workplace" means any worksite, premises, or location where minors work.

[Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-015, filed 12/11/92, effective 3/1/93. Stat-

utory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-015, filed 11/3/89, effective 11/20/89; Order 76-15, § 296-125-015, filed 5/17/76; Order 74-9, § 296-125-015, filed 3/13/74, effective 4/15/74; Order 71-5, § 296-125-015, filed 5/26/71, effective 7/1/71; Section B, filed 9/18/63; Rules (part), filed 3/23/60.]

WAC 296-125-018 Minimum age for employment.

(1) Pursuant to RCW 26.28.060, a written order issued by a judge of a superior court of the county in which a minor lives is a prerequisite to the hiring, not otherwise prohibited by federal law, of any minor under the age of fourteen for any labor in or in connection with any store, shop, factory, mine, or inside employment other than inside employment connected with farm or housework.

(2) No employer shall employ a minor under the age of sixteen in house-to-house sales, unless the department has granted a variance to an employer for that specific purpose.

[Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-018, filed 12/11/92, effective 3/1/93.]

MASTER BUSINESS LICENSE/MINOR WORK PERMIT ENDORSEMENT

WAC 296-125-0200 If I plan to employ minors in my business, what general requirements do I have to satisfy?

(1) You must obtain, keep current and post valid minor work permit endorsements issued by the department.

(2) If employing minors for house-to-house sales, you must satisfy the special requirements in WAC 296-125-024 for that activity.

(3) You must obtain and keep on file a completed parent/school authorization form for each minor you employ.

(4) You must keep on file any variances issued to you according to variance and/or special variance sections of this chapter.

(5) If you sponsor bona fide *unpaid* work-based learning programs approved by the office of the superintendent of public instruction or a local school district, you are not required to obtain minor work permit endorsements for those programs.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0200, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0210 Do I need minor work permit endorsements for my business? If you plan to employ one or more minors, you must obtain, keep current and post valid minor work permit endorsements before you:

(1) Employ minors; or

(2) Allow minors to work at your workplace; or

(3) Allow minors to work under work conditions controlled by you.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0210, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0211 What if I employ minors at several different workplaces? (1) You must obtain, keep current and post separate minor work permit endorsements for each workplace at which you employ minors.

(2) In those situations where you place minors in a workplace controlled by another employer, you and the other

employer must obtain, keep current and post minor work permit endorsements at that workplace.

(3) When you employ minors in multiple workplaces, you must obtain, keep current and post minor work permit endorsements at each workplace.

(4) Unless modified or revoked, a single endorsement will allow you to employ any number of minors at the workplace specified on the endorsement.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0211, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0220 Are there working condition restrictions which may be placed on my minor work permit endorsements? Minor work permit endorsements may include restrictions, consistent with this chapter, on minors' working conditions.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0220, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0221 Do my minor work permit endorsements expire? Your minor work permit endorsements will expire one year from the date of issue.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0221, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0222 Can I renew my minor work permit endorsements? You may renew your minor work permit endorsements. However, filing an application for renewal does not automatically result in an extension of your endorsement. The department may refuse to renew your endorsement if you have:

- (1) Failed to satisfy a condition related to the initial issuance of the endorsement; or
- (2) Violated the requirements of this chapter; or
- (3) Any other condition that the department finds is or could be detrimental to the health, safety, or welfare of minors.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0222, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0223 How long must my minor work permit endorsements stay in force? Unless revoked, suspended or modified by the department, your minor work permit endorsements must remain in full force and effect as long as:

- (1) You employ minors; or
- (2) Have minors working at your workplace; or
- (3) Have minors working under work conditions controlled by you.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0223, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0224 Do I need to post my minor work permit endorsements? At least one copy of your minor work permit endorsements and a current copy of the poster required by WAC 296-126-080 must be posted in plain view of all employees at each workplace specified in each endorsement.

(2001 Ed.)

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0224, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0230 Can the department of labor and industries refuse to issue or renew, revoke, suspend or modify my minor work permit endorsements? The department may refuse to issue or renew, revoke, suspend, or modify your minor work permit endorsements if it finds:

(1) A condition related to their issuance has not been satisfied; or

(2) You have violated any requirements of this chapter; or

(3) An existing condition that is or could be detrimental to the health, safety, or welfare of a minor. In this case, the department may issue an order of immediate restraint revoking, suspending or modifying your endorsements. If you appeal the department's action, the order of immediate restraint will remain in force until your appeal is resolved.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0230, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0231 Can I appeal the department's refusal to issue or renew, or to revoke, suspend or modify my minor work permit endorsements? You have the right to appeal such actions by the department. However, your appeal must be filed with the department in writing within thirty days of the department's action according to the procedures established by RCW 49.12.161 and 49.12.400. Your appeal *will not* set aside an order of immediate restraint issued by the department according to RCW 49.12.390.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0231, filed 12/31/98, effective 1/31/99.]

WAC 296-125-024 House-to-house sales. (1) Minimum age. No minor under the age of sixteen years may be employed in house-to-house sales, unless the department grants a variance to an employer for that specific purpose. A variance must be obtained prior to an employer's employment of any minor under the age of sixteen.

(2) Registration certificates. Each employer of minors in house-to-house sales, or person seeking to advertise to employ a person in house-to-house sales with an advertisement specifically stating a minimum age requirement that is under the age of twenty-one, shall receive from the department, and shall maintain, a valid house-to-house sales registration certificate prior to employing a sixteen- or seventeen-year-old minor for house-to-house sales and prior to advertising for employment.

Employers also must obtain and maintain a valid minor work permit, pursuant to WAC 296-125-020, and parent/school authorization forms, pursuant to WAC 296-125-126, prior to employing minors for house-to-house sales. If an employer seeks to transport a minor out of the state of Washington for house-to-house sales, the employer must obtain and keep on file express written authorization from each minor's parent or legal guardian to transport each minor worker out of the state for house-to-house sales.

A valid registration certificate and a valid minor work permit must remain in full force and effect at all times that minors are employed by the employer. When duly issued by

the department, and unless modified, suspended, or revoked, such a certificate will authorize the employer to employ any number of sixteen- or seventeen-year-old minors for house-to-house sales in accordance with the provisions of this chapter and in accordance with any limitations listed on the certificate.

(3) Adult supervision requirements.

(a) The employer shall ensure that there is one adult supervisor for every five minor employees employed in house-to-house sales during all work hours. A supervisor may not supervise more than one group of five minor employees.

(b) The employer shall ensure that each supervisor of minor employees is a responsible adult who is at least twenty-one years of age.

(c) The employer shall ensure that each supervisor has contact, personally or verbally, with each minor employee at least once every fifteen minutes. The contact with minor employees may be made by remote means such as telephone or walkie-talkie, but in any case shall be of such a nature as to provide assurance of the minor's health, safety, and welfare. The employer shall ensure that each supervisor is within one-half mile of each supervised minor employee during all working hours.

(d) The employer shall ensure that each minor employee is returned by the employer or its agent to the minor's home or initial point of contact promptly at the end of the minor's work hours. If the minor is returned to the initial point of contact, the employer shall ensure that the location selected is one in which the minor's safety is the first and foremost consideration. Minors shall be protected from risks of injury including, but not limited to, moving vehicles.

(4) Hours restrictions and rest periods. Minors may not be employed in house-to-house sales prior to 7:00 a.m. or after 9:00 p.m., nor during school hours. In addition, employers of minors in house-to-house sales must comply with the further requirements of WAC 296-125-027, concerning maximum number of hours per day and per week, and WAC 296-125-028, concerning mandatory rest and meal breaks.

(5) Employee identification cards.

(a) An employer shall issue to each minor employed in house-to-house sales an identification card with the employee's picture. The identification cards issued shall be exclusively from forms obtained in blank from the department.

(b) An identification card shall be in the possession of each minor employed in house-to-house sales during all working hours, and shall be shown to each customer or potential customer.

(6) Posting. At least one copy of a valid house-to-house sales registration certificate shall be posted in plain view of all employees at the employer's primary place of business within the state of Washington.

(7) Renewal. House-to-house sales registration certificates shall be valid for a one-year period. The filing of an application for renewal of registration does not result in an automatic extension of the one-year registration period. The department may refuse to renew a registration certificate if the department finds that a condition of the previous registration period has not been satisfied, that the employer has vio-

lated the requirements of this chapter, or that any other condition exists that is or could be detrimental to the health, safety, or welfare of a minor.

(8) Revocation, suspension, and modification. The department may revoke, suspend, or modify an employer's registration for house-to-house sales if the department finds that a condition of registration is not being satisfied, that the employer has violated the requirements of this chapter, or that any other condition exists which is or could be detrimental to the health, safety, or welfare of a minor. In the event the department finds that a condition exists which is or could be detrimental to the health, safety, or welfare of a minor, the department may take emergency action to revoke or suspend a house-to-house sales registration; in such instances, an appeal of the department's action shall not stay the revocation, suspension, or modification during the pendency of the appeal.

(9) Appeals. An appeal of an action by the department to refuse to issue or renew, or to revoke, suspend, or modify an employer's house-to-house sales registration must be filed in writing with the director of the department within thirty days of the department's action. Such appeal shall be conducted in accordance with the rules of practice and procedure established in chapter 296-10 WAC. Such appeal shall not stay the effectiveness of an emergency action taken by the department pursuant to this section.

[Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060, 93-01-068, § 296-125-024, filed 12/11/92, effective 3/1/93.]

PARENT/SCHOOL AUTHORIZATION FORMS

WAC 296-125-0260 If I employ minors, do I need authorization from the parent or school? Before allowing a minor to begin work, you must obtain and keep on file, at the minor's workplace, a fully completed parent/school authorization form. As the employer, it is your responsibility to ensure that the parent/school authorization form is complete.

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0260, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0261 Where can I obtain a parent/school authorization form? Parent/school authorization forms are issued only to employers with a valid minor work permit endorsement and can be obtained by contacting the local labor and industries office or:

Department of Labor and Industries
Employment Standards Section
PO Box 44510
Olympia WA 98504-4510

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0261, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0262 Do parent/school authorization forms expire? All parent/school authorization forms expire each year on the thirtieth day of September. *Therefore, each year, prior to September 30, you must:*

- (1) Obtain a new form for each of your minors; and
- (2) Make sure it is properly completed; and

(3) File it where the minor works.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0262, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0263 What information must a minor provide on the parent/school authorization form? A minor must provide the following personal information:

- (1) Name.
- (2) Address.
- (3) Date of birth*.
- (4) Whether he or she is employed at any other job(s) and the total number of hours worked at that job(s).
- (5) His or her signature.

*Note: The date of birth must be supported by proof. Acceptable forms of proof are:

- A birth certificate and a social security card; or
- A driver's license; or
- A baptismal record and a Social Security card; or
- A notarized statement of a parent or guardian.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0263, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0264 What information must an employer provide on the parent/school authorization form? As the employer, you must provide the following information:

- (1) The location of the minor's workplace(s).
- (2) A description of the minor's duties.
- (3) The earliest and latest hours the minor would be working.
- (4) The total number of hours the minor would work per week.
- (5) Your minor work permit endorsement number and expiration date.
- (6) Your unified business identifier (UBI) number.
- (7) Your signature or the signature of your authorized agent.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0264, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0265 What information must a parent or legal guardian provide on the parent/school authorization form? A parent or legal guardian of a minor must:

- (1) Indicate that he or she authorizes (or does not authorize) the minor to work according to the terms listed by the employer.
- (2) Sign the form.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0265, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0266 What information must a school provide on the parent/school authorization form? (1) If a minor will be working during the school year, an authorized school official from the minor's school must:

- (a) Indicate that the school authorizes (or does not authorize) the minor working according to the terms listed by the employer; and
 - (b) Sign the form as the school's authorized agent.
- (2) Furthermore, if a minor begins work during a school vacation and wishes to continue working after school

(2001 Ed.)

resumes, the employer must obtain school approval before the minor can continue. School approval must be based upon:

- (a) Maintaining an acceptable level of scholastic achievement; and
- (b) Maintaining good school attendance; and
- (c) Making satisfactory progress toward graduation.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0266, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0267 What if a minor is no longer attending school? (1) A parent or guardian must certify a minor's nonenrolled status if the minor is:

- (a) Unmarried and living with a parent or legal guardian; and
- (b) No longer enrolled in school; and
- (c) Has not obtained a certificate of educational competence according to RCW 28A.305.190 or is not enrolled in a bona fide college program.

(2) If a minor is named on a valid marriage certificate or is living independently of a parent or legal guardian, the minor must:

- (a) Certify that he or she is either married or living independently of a parent or guardian; and
- (b) Certify his or her nonenrolled status; and
- (c) Provide the name and location of the last school attended; and
- (d) Provide the name and address or telephone number of an adult emergency contact other than the minor's employer. This contact person must certify that the minor is living independently of a parent or legal guardian.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0267, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0268 Can a parent, legal guardian or school revoke the work authorization previously given on the parent/school authorization form? A parent, legal guardian, or school may revoke authorization at any time by simply notifying the department and the other parties to the authorization.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0268, filed 12/31/98, effective 1/31/99.]

WAC 296-125-027 Hours of work for minors. Employers shall restrict the hours of minors' employment as follows:

- (1) During the school year:
 - (a) Minors may work the following total of hours:
 - (i) Minors under the age of sixteen:
 - (A) Maximum of three hours per day on any school day preceding another school day or otherwise a maximum of eight hours per day;
 - (B) Maximum of six days per week; and
 - (C) Maximum of sixteen hours per week;
 - (D) Except that no minors of this age shall work in house-to-house sales without a variance issued by the department pursuant to WAC 296-125-060(7).
 - (ii) Sixteen- and seventeen-year-old minors:

(A) Maximum of four hours per day on any school day preceding another school day or otherwise a maximum of eight hours per day;

(B) Maximum of six days per week; and

(C) Maximum of twenty hours per week.

(b) Minors shall work during the following hours only:

(i) Minors under the age of sixteen:

(A) No earlier than 7:00 a.m.;

(B) No later than 7:00 p.m. on any day preceding a school day;

(C) No later than 9:00 p.m. on Fridays, Saturdays, and the day preceding a school holiday or vacation, provided that minors employed past 8:00 p.m. in service occupations shall be supervised by a responsible adult employee who is on the premises at all times; and

(D) Not during school hours;

(E) Except that minors of this age shall not be employed in house-to-house sales without a variance issued by the department pursuant to WAC 296-125-060(7).

(ii) Sixteen- and seventeen-year-old minors:

(A) No earlier than 7:00 a.m.;

(B) No later than 10:00 p.m. on any day preceding a school day;

(C) No later than 12:00 a.m. on Fridays, Saturdays, and the day preceding a school holiday or vacation, provided that minors employed past 8:00 p.m. in service occupations shall be supervised by a responsible adult employee who is on the premises at all times; and

(D) Not during school hours, unless the minor has been excused from school attendance by the minor's school district superintendent or her or his authorized agent.

(2) During school vacations:

(a) Minors may work the following total of hours:

(i) Minors under the age of sixteen:

(A) Maximum of eight hours per day;

(B) Maximum of six days per week; and

(C) Maximum of forty hours per week;

(D) Except that no minors of this age shall work in house-to-house sales without a variance issued by the department pursuant to WAC 296-125-060(7).

(ii) Sixteen- and seventeen-year-old minors:

(A) Maximum of eight hours per day;

(B) Maximum of six days per week; and

(C) Maximum of forty-eight hours per week.

(b) Minors shall work during the following hours only:

(i) Minors under the age of sixteen:

(A) No earlier than 7:00 a.m.; and

(B) No later than 9:00 p.m. provided that minors employed past 8:00 p.m. in service occupations shall be supervised by a responsible adult employee who is on the premises at all times.

(ii) Sixteen- and seventeen-year-old minors:

(A) No earlier than 5:00 a.m.; and

(B) No later than 12:00 a.m. provided that minors employed past 8:00 p.m. in service occupations shall be supervised by a responsible adult employee who is on the premises at all times, and except no later than 9:00 p.m. for minors employed in house-to-house sales.

(3) Sixteen- and seventeen-year-old minors who have been issued a certificate of educational competence pursuant

to RCW 28A.305.190, are enrolled in a bona fide college program, are named on a valid certificate of marriage, or are shown as the parent on a valid certificate of birth may work as would be permitted during school vacations.

[Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060 and chapters 49.12 and 43.22 RCW and RCW 43.17.060, 93-01-068 and 93-01-116, § 296-125-027, filed 12/11/92 and 12/21/92, effective 7/1/93; Order 76-15, § 296-125-027, filed 5/17/76.]

RECORDKEEPING

WAC 296-125-0275 When I employ minors, what recordkeeping requirements must I satisfy? (1) You must create and maintain a file for each minor.

(2) The file must be maintained for three years from the last date of the minor's employment.

(3) The file must contain the following:

(a) A copy of the completed parent/school authorization form with any attachments; and

(b) Copies of any variances you obtained according to the requirements of this chapter.

(4) These records must be kept safe and accessible at the place of employment or at a central recordkeeping office where such records are customarily maintained.

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0275, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0280 What is the department's enforcement authority? To enforce the requirements of this chapter, the director or the director's authorized representatives can, without delay:

(1) Enter any workplace where work is or has been performed by a minor, or where employment records are, or are required to be maintained; and

(2) Inspect, transcribe, and copy all pertinent records; and

(3) Inspect and investigate any workplace and all pertinent conditions, structures, machines, apparatus, devices, equipment, supplies, and materials located there; and

(4) Question privately any employer, owner, operator, agent, or employee.

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0280, filed 12/31/98, effective 1/31/99.]

MEAL AND REST BREAKS FOR MINORS

WAC 296-125-0285 What regulations apply to meal and rest breaks for my fourteen-year-old and fifteen-year-old minors? (1) Since the purpose of meal periods and rest breaks is to provide rest from work, they must not be scheduled near the beginning of the work shift.

(2) The following specific regulations apply to your minors who are *fourteen-years-old and fifteen-years-old*:

(a) They must not work more than four hours without being given a meal period. This meal period must be at least thirty minutes in length and be separate and distinct from, and in addition to, the rest breaks mandated by this subsection.

(b) They must be given, on your business's time, a rest break of at least ten minutes for every two hours worked.

(c) When they work four-hour periods, they cannot be required to work more than two hours without being given either a ten-minute rest break or a thirty-minute meal period.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0285, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0287 What regulations apply to meal and rest breaks for my sixteen-year-old and seventeen-year-old employees? (1) The following regulations apply to *meal periods* for your minors who are *sixteen-years-old and seventeen-years-old*:

(a) They must be allowed meal periods of at least thirty minutes in length.

(b) Their meal periods must start no less than two hours but no more than five hours from the beginning of their work shift.

(c) They must not be required to work more than five consecutive hours without a meal period.

(2) The following regulations apply to *rest periods* for your minors who are *sixteen-years-old and seventeen-years-old*:

(a) They must be allowed a rest period of not less than ten minutes, on your time, for each four hours worked.

(b) Their rest periods must be scheduled as near as possible to the midpoint of the work period.

(c) They must receive a rest period at least every three hours.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0287, filed 12/31/98, effective 1/31/99.]

WAC 296-125-030 Prohibited and hazardous employment—All minors. The following employments and occupations as outlined in subsections (1) through (30) of this section, are prohibited for all minors, provided that exemption will be allowed from subsections (5), (8), (9), (11), (13), (15), (16), and (23) of this section when the minor is participating in a bona fide cooperative vocational education program, diversified career experience program, or work experience program certified and monitored by the office of the superintendent of public instruction or the minor employee's school district; further, exemption from the same numbered prohibitions will be allowed for any minor involved in an apprenticeship program registered with the Washington state apprenticeship and training council. The state will not grant variances for employments or occupations prohibited by the United States Department of Labor.

(1) Occupations in or about plants or establishments manufacturing or storing explosives or articles containing explosive components.

(2) Occupations involving regular driving of motor vehicles. Occupations of outside helper or flagger on any public road or highway, work which involves directing moving motor vehicles in or around warehouses or loading/unloading areas including but not limited to loading docks, transfer stations, or landfills, or work which involves towing vehicles. Occasional driving is permissible if: The minor has a valid state driver's license for the type of driving involved; driving is restricted to daylight hours; such driving is only occasional, and is incidental to the minor's employment; vehicle

gross weight is under 6,000 pounds; the minor has completed a state-approved driver education course; and seat belts are provided in the vehicle and the minor has been instructed to use them. Occupations involving occasional operation of a bus are prohibited.

(3) All mining occupations.

(4) Logging occupations and occupations in the operation of any sawmill, lath mill, shingle mill, or cooperage-stock mill.

(5) Occupations involving operation or repair, oiling, cleaning, adjusting, or setting up of any power-driven wood-working machines.

(6) Occupations involving potential exposure to radioactive substances and to ionizing radiation.

(7) Occupations involving operation or repair, oiling, cleaning, adjusting, or setting up of elevators. This includes riding on a manlift.

(8) Occupations involving operation or repair, oiling, cleaning, adjusting, or setting up of power-driven metal-forming, punching, and shearing machines.

(9) Occupations involving slaughtering, meat packing, processing, or rendering.

(10) Occupations involving operation or repair, oiling, cleaning, adjusting, or setting up of power-driven bakery machines.

(11) Occupations involving operation or repair, oiling, cleaning, adjusting, or setting up of power-driven paper-products machines.

(12) Occupations involving manufacturing of brick, tile, and kindred products.

(13) Occupations involving operation or repair, oiling, cleaning, adjusting, or setting up of power-driven circular saws, band saws, and guillotine shears.

(14) Occupations involving wrecking, demolition, and shipbreaking operations.

(15) All roofing operations.

(16) Occupations involving excavations.

(17) Occupations involving operation or repair, oiling, cleaning, adjusting, or setting up of or working in proximity to earth-moving machines, hoisting apparatus, cranes, garbage-compactors, trash-compactors or other compactors, paper-balers or other balers, or other heavy equipment including, but not limited to, graders, bulldozers, earth compactors, backhoes, and tractors. Working in proximity shall mean working within the radius of movement of any portion of the machinery where one could be struck or otherwise injured. It shall not include work in proximity to ski-lift apparatus. This prohibition shall not invalidate activities allowed under subsection (2) of this section.

(18) Work in establishments or workplaces being picketed during the course of a labor dispute.

(19) Work as a nurse's aide/assistant; unless the minor is a student in a bona fide state-certified nursing training program or has successfully completed such a program.

(20) Work as a maid or bellhop in motels or hotels, unless the minor is accompanied by a responsible adult whenever the work requires the minor to enter an assigned guest room, whether or not it is occupied at the time the minor is in the room. Minors may work in unassigned, unoccupied guest rooms unaccompanied by an adult.

(21) Work in sauna or massage parlors, body painting or tattoo studios, or adult entertainment establishments.

(22) Occupations requiring the wearing of personal protective equipment or wearing apparel as defined and required by statutes or rules and regulations administered by the department's division of industrial safety and health as related to hazardous substances exposure and/or hazardous noise exposure per chapters 296-24 and 296-62 WAC; except those occupations where the only requirement is the wearing of gloves, boots, or eye protection if the occupation is not otherwise prohibited by this section or by WAC 296-125-033. This subsection's prohibitions shall not apply if a minor is a student in a bona fide health care career training or vocational education program.

(23) Occupations involving fire fighting and fire suppression duties.

(24) Occupations where there is a risk of exposure to bodily fluids or transmission of infectious agents, including but not limited to hepatitis and HIV, in accordance with standards established by WAC 296-62-08001 (Occupational exposure to blood-borne pathogens), including lab work which entails the cleaning of medical equipment used to draw or store blood or other contaminated tissue; duties which involve venipuncture; and duties involving work with laundry from health care facilities; unless the minor is a student in a bona fide health care career training or vocational education program. State-certified life guards with first aid training are exempt.

(25) Occupations involving potential exposure to hazardous substances which are considered to be carcinogenic, corrosive, highly toxic, toxic sensitizers, or which have been determined to cause reproductive health effects or irreversible end organ damage. This does not include handling of such substances in sealed containers in retail situations. This subsection's prohibitions shall not apply to any consumer product or hazardous substance, as those terms are defined by the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) and the Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) and those statutes' regulations, where the employer of a minor can demonstrate that a product or substance is used in the workplace in the same manner as normal consumer use, and which use results in a duration and frequency of exposure that is not greater than exposures experienced by consumers using the product or substance in conformity with the manufacturer's instructions, provided that such exposures are not otherwise prohibited by subsection (22) of this section.

(26) In selling to passing motorists on the public right of way candy, flowers, or other merchandise or commodities. Selling to motorists from a window counter is not prohibited.

(27) Work performed in or about boiler or engine rooms.

(28) All work performed more than ten feet above ground or floor level.

(29) Work in freezers, meat coolers, and all work in preparing meats for sale (wrapping, sealing, labeling, weighing, pricing, and stocking are permitted if work is performed away from meat-cutting and preparation areas). Occasional entry into freezers or coolers for obtaining stock or placing stock shall not be prohibited.

(30) Service occupations if a minor works past 8:00 p.m., unless the minor is supervised by a responsible adult employee who is on the premises at all times.

[Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-030, filed 12/11/92, effective 3/1/93. Statutory Authority: RCW 43.22.270 and 1989 c 216. 89-23-003, § 296-125-030, filed 11/3/89, effective 11/20/89; Order 77-32, § 296-125-030, filed 12/30/77; Order 76-15, § 296-125-030, filed 5/17/76; Order 74-9, § 296-125-030, filed 3/13/74, effective 4/15/74; Order 71-5, § 296-125-030, filed 5/26/71, effective 7/1/71; Section E, filed 9/18/63; Rules (part), filed 3/23/60.]

WAC 296-125-033 Prohibited and hazardous employment—Special restrictions for minors under the age of 16. Employment of minors under age 16 is subject to the following additional restrictions. They are prohibited from working:

(1) In any manufacturing operations.

(2) In any processing operations (including but not limited to filleting of fish, dressing poultry, cracking nuts, commercial processing, canning, freezing or drying of foods, laundering as performed by commercial laundries and dry cleaning).

(3) In any public messenger service, including but not limited to work that is performed by foot, bicycle, or public transportation.

(4) In occupations connected with transportation, warehouse and storage, communications and public utilities, or construction. (Office work related to these occupations is permitted if none of the minor's work is performed on the transportation media or construction site.)

(5) In the following specific areas of retail, food service or gasoline service station operations:

(a) Maintenance or repair work.

(b) Window washing or other work requiring worker to be positioned at higher than ground or floor level.

(c) Cooking and baking.

(d) Operating, setting up, adjusting, cleaning, oiling or repairing power-driven food slicers and grinders, food choppers and cutters and bakery-type mixers.

(6) In occupations involving work in the operation of amusement parks, street carnivals, and traveling shows.

(7) Loading and unloading goods to or from trucks, railroad cars, or conveyors.

(8) In occupations involving operation or repair, oiling, cleaning, adjusting, or setting up of or working in proximity to any power-driven machinery.

[Statutory Authority: Chapters 43.22 and 49.12 RCW, RCW 26.28.060 and 43.17.060. 93-01-068, § 296-125-033, filed 12/11/92, effective 3/1/93; Order 76-15, § 296-125-033, filed 5/17/76.]

WAC 296-125-043 Minimum wages—Minors. Except where a higher minimum wage is required by Washington state or federal law:

(1) Every employer shall pay to each of his or her employees who have reached their sixteenth or seventeenth year of age a rate of pay per hour which is equal to the hourly rate required by RCW 49.46.020 for employees eighteen years of age or older, whether computed on an hourly, commission, piecework, or other basis, except as may be otherwise provided under this chapter.

(2) Every employer shall pay to each of his or her employees who have not reached their sixteenth year of age a rate of pay per hour that is not less than eighty-five percent of the hourly rate required by RCW 49.46.020 for employees eighteen years of age or older whether computed on an hourly, commission, piecework, or other basis, except as may be otherwise provided under this chapter.

(3) These provisions shall not apply to handicapped minors for whom special handicapped minor work permits have been issued as provided in RCW 49.12.110. The handicapped rate therein shall be set at a rate designed to adequately reflect the individual's earning capacity.

(4) These minimum wage provisions shall not apply when a minor student is in a work place to carry out an occupational training experience assignment directly supervised on the premises by a school official or an employer under contract with a school and when no appreciable benefit is rendered to the employer by the presence of the minor student.

[Statutory Authority: RCW 43.22.270 and 1988 c 236, 89-10-014 (Order 88-32), § 296-125-043, filed 4/24/89, effective 6/1/89; Order 76-15, § 296-125-043, filed 5/17/76.]

VARIANCES

WAC 296-125-0600 What is a variance? A variance is an exception to the rules of this chapter granted for good cause by the director of labor and industries or the director's designee.

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0600, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0610 How do I obtain a variance? You must submit a written application to the director requesting the variance(s). In your application you must specify the reasons why your request should be granted. If necessary, the director may request or receive additional information from you or other interested parties.

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0610, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0611 What does "good cause" mean? At a minimum, "good cause" refers to those situations and circumstances that support your request for a variance. You must be able to demonstrate that the variance will not be harmful to the health, safety, and welfare (including school attendance and performance) of the minor(s) affected. "Good cause" may also include the financial need of the minor's family or an exceptional or special talent manifested by the minor.

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0611, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0620 Are there special requirements that I must satisfy if I request a variance to employ minors under the age of sixteen in house-to-house sales? If you are requesting a variance to employ minors under the age of sixteen in house-to-house sales, you must demonstrate good cause for the variance and file a signed sworn statement

(2001 Ed.)

ensuring that the following minimum requirements will be in force at all times:

(1) All house-to-house sales will be conducted only during daylight hours; and

(2) A responsible adult who is at least twenty-one years of age will accompany the minor at all times; and

(3) No house-to-house sales visits will be conducted in inclement weather; and

(4) The minor will only be employed for a specific time period that cannot exceed six weeks.

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0620, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0640 What criteria will be used to evaluate my variance request? (1) The director or the director's designee may grant your variance request if you:

(a) Possess a valid minor work permit endorsement; and

(b) Demonstrate good cause.

(2) Variances will be granted, as applicable, based on good cause shown, for residential schools, apprenticeship programs registered with the Washington state apprenticeship and training council, and vocational education, diversified career education, work experience, and cooperative education programs accepted and certified by the office of superintendent of public instruction or the local school district for circumstances other than those already exempted in WAC 296-125-030.

(3) Variances from federal regulations will not be issued except where you can show exemption from federal statutes and regulations governing minor work.

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0640, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0650 Do my variances expire? Each of your variances will expire upon the expiration of the minor work permit endorsement that was in effect at the time the variance was issued unless the variance was issued with an earlier expiration date.

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0650, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0651 Can my variances be renewed? When you renew your minor work permit endorsements, you must also apply for new variances that are related to those endorsements.

[Statutory Authority: RCW 49.12.121, 99-02-041, § 296-125-0651, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0660 Can the department of labor and industries revoke, suspend, or modify my variances? The department may revoke, suspend, or modify your variances if it finds:

(1) A condition related to its issuance has not been satisfied; or

(2) You have violated any requirement of this chapter; or

(3) An existing condition that is or could be detrimental to the health, safety, or welfare of a minor including an adverse impact upon their school attendance or performance.

[Title 296 WAC—p. 2057]

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0660, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0670 Can I appeal the department's action to revoke, suspend or modify my variances? You have the right to appeal a department action to revoke, suspend or modify your variances. However, your appeal must be filed with the department in writing within thirty days of the department's action according to the procedures established by RCW 49.12.161 and 49.12.400. Your appeal *will not* set aside an order of immediate restraint issued by the department according to RCW 49.12.390.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0670, filed 12/31/98, effective 1/31/99.]

SPECIAL VARIANCES

WAC 296-125-0700 What is a special variance? (1) A special variance is an exception to specific rules of this chapter. Special variances are granted by a designated school official of a school district or individual private school which

has department approval to participate in the special variance process described in WAC 296-125-0720.

(2) A special variance is used to facilitate flexibility in a sixteen-year-old or seventeen-year-old minor's school and work requirements and may be granted *only* for exceptions to the rules governing:

(a) The maximum hours of work per week during a week when school is in session, up to a maximum of twenty-eight hours per week; and

(b) The maximum hours of work per day during a week when school is in session, up to a maximum of six hours per day.

(3) Special variances will not be granted for sixteen-year-old and seventeen-year-old minors working in house-to-house sales.

(4) When school is in session, minors must not work in excess of the maximum hours per week or per day illustrated in the following chart unless the employer has a current, fully completed and executed special variance on file at the minor's workplace.

Hours of work--Nonagriculture

	14-year-olds and 15-year-olds		16-year-olds and 17-year-olds	
	School	Nonschool	School	Nonschool
Hours a day	3* (weekdays) 8 (Fri.-Sun.)	8	4** (weekdays) 8 (Fri.-Sun.)	8
Hours a week	16	40	20/28***	48
Days a week	6 days	6 days	6 days	6 days
Start	7 a.m.	7 a.m.	7 a.m.	5 a.m.
Quit	7 p.m. (weekdays)	9 p.m.	10 p.m. (Sun.-Thurs.) Midnight (Fri. & Sat.)	Midnight

* 14-year-olds and 15-year-olds can work up to 3 hours on a school day preceding a school day. All other days, 8 hours per day.

** 16-year-olds and 17-year-olds can work up to 4 hours on a school day preceding a school day. All other days, 8 hours per day.

*** Up to 28 hours available through special variances.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0700, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0710 What criteria will be followed in evaluating my special variance request? The designated school official may grant your special variance request if you:

- (1) Possess a valid minor work permit endorsement; and
- (2) Demonstrate good cause; and
- (3) Request the variance for a minor whose school district or individual private school has department approval to participate in the special variance process discussed in WAC 296-125-0720.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0710, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0720 How can a school district or individual private school qualify for participation in the special variance process? Each school district or individual private school seeking to participate in the special variance process must:

- (1) Complete an enrollment form provided by the department; and
- (2) Be approved by the department; and
- (3) Agree to maintain a mandatory recordkeeping system specified by the department; and
- (4) Use the uniform criteria described in WAC 296-125-0750 to evaluate variance requests.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0720, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0721 Where can a school district or individual private school obtain a copy of the special variance process enrollment form? The form can be obtained from:

Department of Labor and Industries
Employment Standards Section

PO Box 44510
Olympia WA 98504-4510

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0721, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0722 In addition to completing the enrollment form, what other requirements must be satisfied before a school district or private school can participate in the special variance program? At a minimum, a school district or private school must agree to all of the following:

- (1) Maintain the recordkeeping system required by the department.
- (2) Designate a school official at each school who is authorized to evaluate and approve/disapprove variance requests.
- (3) Use the uniform criteria discussed in WAC 296-125-0750 to evaluate variance requests.
- (4) Within thirty days of the school's action, forward a copy of each variance approved or denied to the department.
- (5) Give department agents immediate access to all variance files during normal school office hours.
- (6) Be responsible for ensuring that the employer completes all appropriate sections of the special variance request form.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0722, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0723 What is the employer's responsibility in providing information to the minor, the minor's parent or legal guardian, and school officials? (1) The employer must obtain a special variance form from the participating school and provide the following information:

- (a) The minor's work-related duties;
- (b) The maximum hours to be worked each week;
- (c) The length of the minor's work shifts;
- (d) The latest afternoon or evening hour that the minor will work;
- (e) The number of days each week that the minor will be required to work the latest afternoon or evening hour;
- (f) The employer's unified business identifier (UBI) number;
- (g) The expiration dates of the employer's minor work permit endorsements.

(2) The employer must agree to maintain all special variance records according to the terms of WAC 296-125-0275.

(3) Upon completion, the employer must give the form to the minor to complete according to WAC 296-125-0730.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0723, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0730 What other information about special variance requests is important? (1) To be valid, a special variance request form must be completed and signed by the employer, the minor, the minor's authorized school official and the minor's parent or legal guardian.

(2) The special variance, unless revoked, suspended or modified, shall remain in force for the duration of the school year for which it was granted. While the special variance is

(2001 Ed.)

in force, it is the school district's responsibility to monitor it to insure that the conditions under which it was granted are being met.

(3) All minors must complete their section of the variance form *after* the employer section has been completed but *before* the form is submitted to the school, parent, or legal guardian.

(4) All minors must explain why they are requesting a special variance.

(5) The minor's parent or guardian must sign the request form. By signing, the parent or guardian approves or denies the request and attests to the reasons supporting it.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0730, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0740 What are the consequences of submitting an incomplete special variance request form?

(1) An incomplete special variance request form submitted to the department is:

- (a) Invalid; and
- (b) A violation of this chapter; and
- (c) Cause for a school district, an individual private school or an employer to be dropped from the special variance program.

(2) When the department receives an incomplete special variance request form, it must give written notification to the school district or private school that its enrollment in the special variance program is being revoked.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0740, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0741 Can a school district or private school appeal the department's decision to revoke its participation in the special variance program? A school district or private school may appeal a notice of revocation; however, the appeal must be filed with the department in writing within thirty days of its receipt. The written appeal must be sent to the department according to the procedures established by RCW 49.12.161 and 49.12.400. Filing an appeal does not set aside a notice of revocation.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0741, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0750 What are the criteria used by a school to evaluate special variance requests? In evaluating requests for special variances, a school must consider at least the following factors:

- (1) Does the employer hold a current valid minor work permit endorsement?
- (2) What is the student's attendance pattern?
- (3) Is the student making satisfactory academic progress?
- (4) Will the student still have opportunities to participate in extracurricular activities?
- (5) How many school nights will the student work?
- (6) How late in the evening will the student work?
- (7) How long a shift will the student work?

[Title 296 WAC—p. 2059]

(8) How sound is the student's rationale for requesting a variance from the work hour restrictions illustrated in the table in WAC 296-125-0700(4)?

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0750, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0760 Do special variances expire? (1)

Since special variances will be issued only to employers holding valid minor work permit endorsements, each special variance expires on the expiration date of the endorsement that was in effect at the time the special variance was issued.

(2) Upon the renewal of a minor work permit endorsement, an employer must complete a new special variance request form.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0760, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0770 Can the department of labor and industries revoke, suspend, or modify a special variance?

(1) The department may revoke, suspend, or modify a special variance if it finds:

- (a) A condition related to its issuance has not been satisfied; or
- (b) A violation of any requirement of this chapter; or
- (c) An existing condition that is or could be detrimental to the health, safety, or welfare of a minor.

(2) If an employer violates the hour standards in WAC 296-125-027 or the hours specified in any special variance, they will forfeit their participation in the special variance process for one year from the finding of the violation by the department.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0770, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0771 Can the parties to a special variance revoke it? A parent, legal guardian, or school may revoke a special variance at any time by simply giving written notification to the department and the other parties to the variance.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0771, filed 12/31/98, effective 1/31/99.]

WAC 296-125-0772 Can the department's action to refuse to issue or renew, revoke, suspend or modify a special variance be appealed? The department's refusal to issue or renew participation in the special variance process can be appealed, as well as, its decision to revoke or suspend participation. However, the appeal must be filed with the department in writing within thirty days of the department's action according to the procedures established by RCW 49.12.161 and 49.12.400. The appeal *will not* set aside an order of immediate restraint issued by the department according to RCW 49.12.390.

[Statutory Authority: RCW 49.12.121. 99-02-041, § 296-125-0772, filed 12/31/98, effective 1/31/99.]

Reviser's note: For industrial welfare committee appeal procedures, see also chapter 296-129 WAC.

DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER

296-126-098	Wearing apparel. [Statutory Authority: RCW 49.12.091 (as amended by RCW 43.22.282), 97-01-124, § 296-126-098, filed 12/19/96, effective 1/19/97; Order 76-15, § 296-126-098, filed 5/17/76.] Repealed by 98-14-041, filed 6/24/98, effective 7/25/98. Statutory Authority: RCW 49.12.091 and 1998 c 334.
296-126-140	Appeal procedures. [Order 74-9, § 296-126-140, filed 3/13/74, effective 4/15/74.] Repealed by 97-17-064, filed 8/18/97, effective 9/18/97.
296-126-224	Wearing apparel. [Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-224, filed 2/3/78.] Repealed by 97-01-124, filed 12/19/96, effective 1/19/97. Statutory Authority: RCW 49.12.091 (as amended by RCW 43.22.282).

WAC 296-126-001 Applicability. These standards, adopted pursuant to the authority of chapter 49.12 RCW as amended by chapter 16, Laws of 1973 2nd ex. sess., shall apply to any person employed in any industry or occupation within the state of Washington, unless:

- (1) Exempted by the provisions of chapter 49.12 RCW (newspaper vendors or carriers, domestic or casual labor in or about private residences, agricultural labor as defined in RCW 50.04.150, as now or hereafter amended, and sheltered workshops, are all exempt from these provisions);
- (2) Otherwise exempted in rules and regulations adopted by the industrial welfare committee of the state of Washington;
- (3) Exempted by a variance issued under the provisions in WAC 296-126-130;

(4) Such person is an employee of the state or any political subdivision, or municipal corporation to the extent that these rules conflict with any statute, rule or regulation adopted under the authority of the appropriate legislative body.

[Order 74-9, § 296-126-001, filed 3/13/74, effective 4/15/74.]

WAC 296-126-002 Definitions. (1) "Employer" means any person, firm, corporation, partnership, business trust, legal representative, or other business entity which engages in any business, industry, profession, or activity in this state and employs one or more employees, unless exempted by chapter 49.12 RCW or these rules.

(2) "Employee" means an employee who is employed in the business of his employer whether by way of manual labor or otherwise. This definition is not intended, for purposes of these regulations, to include: Any individual registered as a volunteer with a state or federal volunteer program or any person who performs any assigned or authorized duties for an educational, religious, governmental or nonprofit charitable corporation by choice and receives no payment other than reimbursement for actual expenses necessarily incurred in order to perform such volunteer services; any individual employed in a bona fide executive, administrative or professional capacity or in the capacity of commissioned outside salesperson; nor is it intended to include independent contractors where said individuals control the manner of doing the work and the means by which the result is to be accomplished.

(3) "Employ" means to engage, suffer or permit to work.

(4) "Adult" means any person of either sex, eighteen years of age or older.

(5) "Minor" means any person of either sex under eighteen years of age.

(6) "Student learner" means a person enrolled in a bona fide vocational training program accredited by a national or regional accrediting agency recognized by the United States Office of Education, or authorized and approved by the Washington state commission for vocational education, who may be employed part time in a definitely organized plan of instruction.

(7) "Learner" means a worker whose total experience in an authorized learner occupation is less than the period of time allowed as a learning period for that occupation in a learner certificate issued by the director pursuant to regulations of the department of labor and industries.

(8) "Hours worked" shall be considered to mean all hours during which the employee is authorized or required by the employer to be on duty on the employer's premises or at a prescribed work place.

(9) "Conditions of labor" shall mean and include the conditions of rest and meal periods for employees including provisions for personal privacy, practices, methods and means by or through which labor or services are performed by employees and includes bona fide physical qualifications in employment, but shall not include conditions of labor otherwise governed by statutes and rules and regulations relating to industrial safety and health administered by the department.

(2001 Ed.)

(10) "Committee" shall mean the industrial welfare committee as provided by law. The committee's secretary is the supervisor of employment standards in care of the Department of Labor and Industries, General Administration Building, Olympia, Washington 98504.

[Order 76-15, § 296-126-002, filed 5/17/76; Order 74-9, § 296-126-002, filed 3/13/74, effective 4/15/74.]

WAC 296-126-010 Minimum wages—Adults. Except where a higher minimum wage is required by Washington state or federal law, (1) every employer shall pay to each of his or her adult employees wages at a rate of not less than one dollar and eighty cents per hour, and effective January 1, 1975, not less than two dollars per hour, whether computed on an hourly commission, piecework or other basis, except as may be otherwise provided by law or regulation.

(2) These provisions shall not apply to outside commissioned salespersons; or to trainees, learners, student learners, apprentices or handicapped persons for whom special certificates or special permits have been issued as set forth in RCW 49.12.110. These special rates shall be computed as follows: Learners — 85% of the applicable minimum wage; student-learner — 75% of the applicable minimum rate; handicapped — at a rate designed to reflect adequately the individual's earning capacity.

[Order 74-9, § 296-126-010, filed 3/13/74, effective 4/15/74.]

WAC 296-126-020 Minimum wages—Minors. Except where a higher minimum wage is required by Washington state or federal law:

(1) Every employer shall pay to each of his or her employees who have reached their sixteenth or seventeenth year of age a rate of pay per hour which is equal to the hourly rate required by RCW 49.46.020 for employees eighteen years of age or older, whether computed on an hourly, commission, piecework, or other basis, except as may be otherwise provided under this chapter.

(2) Every employer shall pay to each of his or her employees who have not reached their sixteenth year of age a rate of pay per hour that is not less than eighty-five percent of the hourly rate required by RCW 49.46.020 for employees eighteen years of age or older whether computed on an hourly, commission, piecework, or other basis, except as may be otherwise provided under this chapter.

(3) These provisions shall not apply to handicapped minors for whom special handicapped minor work permits have been issued as provided in RCW 49.12.110. The handicapped rate therein shall be set at a rate designed to adequately reflect the individual's earning capacity.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 89-10-014 (Order 88-32), § 296-126-020, filed 4/24/89, effective 6/1/89; Order 74-9, § 296-126-020, filed 3/13/74, effective 4/15/74.]

WAC 296-126-021 Minimum wages—Commissions and piecework. Where employees are paid on a commission or piecework basis, wholly or partially, (1) the amount earned on such basis in each work-week period may be credited as a part of the total wage for that period; and

[Title 296 WAC—p. 2061]

(2) The total wages paid for such period shall be computed on the hours worked in that period resulting in no less than the applicable minimum wage rate.

[Order 74-9, § 296-126-021, filed 3/13/74, effective 4/15/74.]

WAC 296-126-022 Gratuities. For the purposes of these regulations, gratuities received by employees shall not be considered a part of the minimum wage.

[Order 74-9, § 296-126-022, filed 3/13/74, effective 4/15/74.]

WAC 296-126-023 Payment interval. All wages due shall be paid at no longer than monthly intervals to each employee on established regular pay days. To facilitate book-keeping, an employer may implement a regular payroll system in which wages from up to seven days before pay day may be withheld from the pay period covered and included in the next pay period.

[Statutory Authority: RCW 43.22.270, 49.12.020, 49.12.091, 49.12.050, 49.46.020 and 49.46.070. 89-22-016 (Order 89-16), § 296-126-023, filed 10/24/89, effective 11/24/89; Order 74-9, § 296-126-023, filed 3/13/74, effective 4/15/74.]

WAC 296-126-025 Deductions. Except as otherwise provided by law, no employer shall make any deduction from the wage of an employee:

(1) For any cash shortage, walkout (failure of customer to pay), breakage, or loss of equipment, unless it can be shown that the shortage, walkout, breakage or loss was caused by a dishonest or willful act of the employee.

(2) For acceptance of a bad check, unless it can be shown that the employee accepted such a check in violation of procedures previously made known to him or her by the employer.

(3) For any cash shortage from a cash register, drawer or portable depository provided for that purpose, unless the employee has sole access to the cash and has participated in the cash accounting at the beginning of his or her shift and again at the end of said shift. Where a portable cash depository is in use the employer shall provide for periodic withdrawals of cash receipts during the shift to prevent large accumulations of cash.

[Order 74-9, § 296-126-025, filed 3/13/74, effective 4/15/74.]

WAC 296-126-040 Statements furnished. Every employer shall furnish to each employee at the time of payment of wages an itemized statement showing the pay basis (i.e., hours or days worked), rate or rates of pay, gross wages and all deductions therefrom for that pay period.

[Order 74-9, § 296-126-040, filed 3/13/74, effective 4/15/74.]

WAC 296-126-050 Employment records. (1) Every employer shall keep for at least three years a record of the name, address, and occupation of each employee, dates of employment, rate or rates of pay, amount paid each pay period to each such employee and the hours worked.

(2) Every employer shall make the record described in subsection (1) available to the employee, upon request, at any reasonable time.

[Title 296 WAC—p. 2062]

(3) Every employer shall, upon written request by the employee, furnish within ten working days of the request to each employee who is discharged a signed written statement, setting forth the reasons for such discharge and the effective date thereof.

[Statutory Authority: RCW 43.22.270, 49.12.020, 49.12.091, 49.12.050, 49.46.020 and 49.46.070. 89-22-016 (Order 89-16), § 296-126-050, filed 10/24/89, effective 11/24/89; Order 74-9, § 296-126-050, filed 3/13/74, effective 4/15/74.]

WAC 296-126-060 Minor work permits. No minor shall be employed in any occupation or industry unless the employer shall have on file during the period of employment an unexpired work permit issued pursuant to section 15, chapter 16, Laws of 1973 2nd ex. sess., and regulations implementing said section in chapter 296-125 WAC. Such permit will not be issued except upon presentation of such evidence of age as is required by the industrial welfare committee.

[Order 74-9, § 296-126-060, filed 3/13/74, effective 4/15/74.]

WAC 296-126-070 Prohibited action. No employer shall discharge or in any other way discriminate against or penalize any employee who seeks information or a hearing concerning variance requests by an employer or information concerning employment standards, or who has filed a complaint alleging a violation of any employment standard.

[Order 74-9, § 296-126-070, filed 3/13/74, effective 4/15/74.]

WAC 296-126-080 Posting of order. The employer shall keep posted a current copy of these regulations in a form provided by the department. The poster shall be positioned in a readily accessible location and within plain view in each work site where an employee or employees are employed.

[Order 74-9, § 296-126-080, filed 3/13/74, effective 4/15/74.]

WAC 296-126-090 Hours. Any employee who feels the number of hours or other matters relating to overtime employment are detrimental to the health, safety or welfare of the employee may request the department of labor and industries to make an investigation following which the department will issue findings and conclusions. Whenever the circumstances are found to be detrimental to the health, safety or welfare of the employee, the industrial welfare committee may adopt additional or revised employment standards.

[Order 76-15, § 296-126-090, filed 5/17/76.]

WAC 296-126-092 Meal periods—Rest periods. (1) Employees shall be allowed a meal period of at least 30 minutes which commences no less than two hours nor more than five hours from the beginning of the shift. Meal periods shall be on the employer's time when the employee is required by the employer to remain on duty on the premises or at a prescribed work site in the interest of the employer.

(2) No employee shall be required to work more than five consecutive hours without a meal period.

(3) Employees working three or more hours longer than a normal work day shall be allowed at least one 30-minute meal period prior to or during the overtime period.

(4) Employees shall be allowed a rest period of not less than 10 minutes, on the employer's time, for each 4 hours of working time. Rest periods shall be scheduled as near as possible to the midpoint of the work period. No employee shall be required to work more than three hours without a rest period.

(5) Where the nature of the work allows employees to take intermittent rest periods equivalent to 10 minutes for each 4 hours worked, scheduled rest periods are not required.

[Order 76-15, § 296-126-092, filed 5/17/76.]

WAC 296-126-094 General duty—Working conditions. It shall be the responsibility of every employer to maintain conditions within the work place environment that will not endanger the health, safety or welfare of employees. All facilities, equipment, practices, methods, operations and procedures shall be reasonably adequate to protect employees' health, safety and welfare.

[Order 76-15, § 296-126-094, filed 5/17/76.]

WAC 296-126-096 Lifting. Where weights in excess of 20 pounds are to be lifted, carried, pushed or pulled as a normal part of an employee's responsibility:

(1) The lifting, carrying, pushing or pulling duties shall be made known to the prospective employee at the time of recruitment, initial employment or reassignment to a lifting job.

(2) Instruction shall be given such employees on proper lifting techniques in accordance with instructions provided or approved by the department of labor and industries.

(3) Assurance that adequate instructions in weight lifting techniques have been given as provided in (2) shall be furnished the committee or its authorized agent upon request.

[Order 76-15, § 296-126-096, filed 5/17/76.]

WAC 296-126-130 Variance. (1) Upon written application from an employer, a variance from any standard herein may be granted by the industrial welfare committee for good cause shown as authorized by section 8, chapter 16, Laws of 1973 2nd ex. sess. The employer shall give notice to the employees or their representative so that they may submit their written views to the committee on any variance request.

(2) The committee may afford the applicant and any involved employee, or their representatives, the opportunity for oral presentation whenever circumstances of the particular application warrant such additional procedure.

(3) Temporary variance valid for not more than thirty calendar days may be issued by the committee for good cause where immediate action is necessary and warranted pending further review by the committee.

(4) "Good cause" shall mean, but not be limited to, those situations in which the employer finds that his circumstance warrants an alternative procedure and where he is able to demonstrate to the committee that such alternative would not have a harmful effect on the health, safety and welfare of the employees involved.

[Order 74-9, § 296-126-130, filed 3/13/74, effective 4/15/74.]

(2001 Ed.)

WAC 296-126-200 Applicability. WAC 296-126-200 through 296-126-226 shall apply to persons employed in counselor staff occupations in organized seasonal recreational camps as herein defined.

[Statutory Authority: RCW 49.12.091, 78-03-004 (Order 78-1), § 296-126-200, filed 2/3/78.]

WAC 296-126-202 Definitions. (1) "Department" shall mean the department of labor and industries.

(2) "Committee" shall mean the industrial welfare committee of the department of labor and industries.

(3) "Organized camps," as used herein, shall refer to established resident group camps, which are established and maintained for recreation, education, vacation, or religious purposes, for use by organized groups wherein the activities are conducted on a closely supervised basis, and where day-to-day living facilities, including food and lodging, are provided either free-of-charge or by payment of fee.

(4) "Employ" means to engage, suffer, or permit to work.

(5) "Employee" shall mean any person who is employed in a counselor staff occupation in an organized seasonal recreational camp as herein defined.

(6) "Employer" means any person, association, partnership, private or public corporation who employs or exercises control over wages, hours, or working conditions of one or more employees.

(7) "Minor" shall mean any person under eighteen years of age.

(8) "Counselor staff occupations" shall include all work involving duties primarily relating to guidance, instruction, supervision, and care of campers in organized camps, whether such work involves direct charge of, or responsibility for, such activities, or merely assistance to persons in charge; but shall not include preseason training courses. Counselor staff occupations include, but are not limited to: Head counselor, assistant head counselor, specialist counselor or instructor (such as swimming counselor, arts and crafts counselor, etc.), group or division leader, camp parent, teacher, supervising counselor, senior counselor, counselor, general counselor, bunk counselor, assistant counselor, junior counselor, counselor aide, and kitchen helpers working no more than 27 hours in a given work week.

(9) "Resident counselor staff" shall mean staff who receive lodging and meals from the employer.

(10) "Nonresident counselor staff" shall mean staff who do not receive lodging and meals from the employer.

(11) "Counselor I," "Counselor II," and "Counselor III," shall be defined for purposes of this standard as follows: "Counselor I" is one never before employed in any counselor staff occupations; "Counselor II" is one who has had at least one season's employment in a counselor staff occupation; "Counselor III" is one who has had at least three seasons of employment in a counselor staff occupation.

(12) "Season of employment" is defined as a period of not less than six weeks, nor more than 12 weeks in any one calendar year, except that counselors employed less than six weeks in any one season may accumulate their employment experience from year to year to meet the minimum requirements for counselor grade.

[Title 296 WAC—p. 2063]

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-202, filed 2/3/78.]

WAC 296-126-204 Minimum wage. Except as otherwise provided by chapter 49.46 RCW:

(1) The minimum wage for kitchen helpers working in excess of 27 hours per week, camp cooks, and all employees other than counselor staff, shall be no less than \$2.00 per hour for employees 18 years of age or older, and no less than \$1.75 for employees under age 18.

(2) Minimum wage rates for counselor staff occupations shall be as follows:

	MINIMUM WEEKLY RATE	
	Nonresident Employee (6-day week)	Resident Employee (6-day week)
COUNSELOR III	\$66.00	\$51.00
COUNSELOR II	45.00	30.00
COUNSELOR I	36.00	21.00

(3) The minimum daily wage rate for resident or nonresident counselor staff shall be prorated from the six-day basis.

(4) Minimum wage provisions shall not apply to resident campers under the age of 18 who are engaged in an in-training program, which provides prepared instructions and supervision by qualified counselor staff, and which requires no more than 24 on-duty hours weekly. Such resident campers shall (a) carry no responsibility for other campers and no bunk responsibility, except as a defined part of the training program and (b) shall not enter such a program unless their parents or guardians sign an authorization, which includes an outline of the program and a description of the duties and responsibilities involved.

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-204, filed 2/3/78.]

WAC 296-126-206 Limitation on number of employees paid in Counselor I and Counselor II rates. In any week, an employer may pay the Counselor I rate to no more than 30 percent of the total number of employees in counselor staff occupations. Furthermore, the total number of employees paid at the Counselor I and Counselor II rates may not exceed 80 percent of the total staff. In small camps (40 campers or under) where the above percentage limitations may be unworkable, the supervisor of employment standards shall have authority to make reasonable adjustments of these limitations upon a showing that the above limitations will work a hardship.

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-206, filed 2/3/78.]

WAC 296-126-208 Premium pay for resident counselor staff occupations. At termination of employment, a resident counselor staff member shall be entitled to premium payment of an additional 25 percent of the staff member's weekly rate of pay for each week of employment, unless he or she received 24 hours per week off-duty, 12 hours of which must have been in sequence. The 24 hours off-duty time need not have been accumulated in any one week.

[Title 296 WAC—p. 2064]

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-208, filed 2/3/78.]

WAC 296-126-210 Board, lodging, and other services. The minimum wage rates of resident counselor staff shall be subject to no charge by an employer for lodging or meals furnished by the employer or for any other services furnished in connection with camp business within reason.

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-210, filed 2/3/78.]

WAC 296-126-212 Travel expenses. The employer shall pay the fare or make transportation available for any counselor staff member who is required or permitted to supervise, or assist in supervising, campers in transit.

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-212, filed 2/3/78.]

WAC 296-126-214 Records. Records showing the names of employees, dates of employment, wages paid, and days worked by them shall be kept by every employer for a period of at least three years and available for inspection by the representatives of the industrial welfare committee of the department of labor and industries at all reasonable times.

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-214, filed 2/3/78.]

WAC 296-126-216 Agreements. All employees must enter into a written agreement with the camp administration setting forth the remuneration, room and board, special services provided, and the nature of the work assignment as counselors and leaders. Resident camper parental authorizations and employee agreements are to be kept on file for a three-year period.

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-216, filed 2/3/78.]

WAC 296-126-218 Work permits. No minor shall be employed until the employer has applied for and received a permit to employ minors from the department of labor and industries, and has obtained a parental authorization and proof of age document for each minor employee.

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-218, filed 2/3/78.]

WAC 296-126-220 Minors' occupations. No minor worker shall be employed in any occupation which the department of labor and industries, through the industrial welfare committee, shall declare to be particularly hazardous for minors under the age specified in the minor work permit regulation, chapter 296-125 WAC.

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-220, filed 2/3/78.]

WAC 296-126-222 Sanitation and safety. (1) All places of employment shall be maintained in a sanitary condition in conformity with the requirements for sanitation for camps set by the health services division, department of

(2001 Ed.)

social and health services and/or the Washington Industrial Safety and Health Act (WISHA).

(2) All places of employment shall be maintained in a safe condition in conformity with the WISHA standards of the department of labor and industries, division of industrial safety and health.

(3) First aid requirements of the WISHA standards of the department of labor and industries shall be met. In addition, the provision of an infirmary with the full-time services of a physician and/or registered nurse is recommended for camps operated by one organized group for more than two weeks.

(4) Transportation shall be available at all times for use in case of an emergency and shall be of a nature to render reasonable comfort to an injured person.

(5) If preemployment physical examinations, including preventive inoculations, recommended by public health authorities are required of employees, such examinations shall not be at the expense of the employee.

(6) No employee shall be required or permitted to lift or carry excessive weights. Where weights in excess of 20 pounds are to be lifted, carried, pushed, or pulled as a normal part of an employee's responsibility:

(i) The lifting, carrying, pushing or pulling duties shall be made known to the prospective employee at the time of recruitment, initial employment or reassignment to a lifting job.

(ii) Instruction shall be given such employees on proper lifting techniques in accordance with instructions provided or approved by the department of labor and industries.

(iii) Assurance that adequate instruction in weight lifting techniques have been given as provided in (ii) shall be furnished the committee or its authorized agent upon request.

(7) Employee assignments to counseling duties shall be in keeping with the employee's maturity, knowledge, and skills. The health and welfare of the employee shall be considered in the determination of adequate counselor staff-camper ratios. Personnel should be selected on the basis of standards currently prescribed in the American Camping Association Resident Camp standards.

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-222, filed 2/3/78.]

WAC 296-126-226 Penalties. The department shall investigate the complaint of any individual alleging that these standards have been violated. Any employer employing any person in violation of these standards shall upon conviction thereof be punished in accordance with RCW 49.12.170, which states as follows: "Any employer employing any person for whom a minimum wage or standards, conditions, and hours of labor have been specified, at less than said minimum wage, or under standards, or conditions of labor or at hours of labor prohibited by the rules and regulations of the committee; or violating any other of the provisions of this 1973 amendatory act, shall be deemed guilty of a misdemeanor, and shall, upon conviction thereof, be punished by a fine of not less than twenty-five dollars nor more than one thousand dollars."

[Statutory Authority: RCW 49.12.091. 78-03-004 (Order 78-1), § 296-126-226, filed 2/3/78.]

- 296-127-01305 Boilermakers.
- 296-127-01306 Brick masons.
- 296-127-01308 Building service employees (janitors, waxers, and window washers).
- 296-127-01309 Cabinet makers.
- 296-127-01310 Carpenters.
- 296-127-01312 Carpenter tenders.
- 296-127-01313 Carpet and resilient floor layers.
- 296-127-01315 Cement masons.
- 296-127-01317 Drywall applicators (drywall nailers and sheetrock installers).
- 296-127-01318 Drywall finishers (tapers).
- 296-127-01320 Power line construction electricians.
- 296-127-01322 Electronic technicians.
- 296-127-01323 Inside wireman electrician.
- 296-127-01325 Electrical fixture maintenance workers.
- 296-127-01327 Elevator constructors.
- 296-127-01328 Fence erectors and fence laborers.
- 296-127-01329 Flaggers.
- 296-127-01331 Glaziers.
- 296-127-01332 Hod carriers, mason tenders, and mortarmen.
- 296-127-01333 Heating equipment mechanics.
- 296-127-01335 Inland boatmen.
- 296-127-01337 Insulation applicators.
- 296-127-01339 Ironworkers.
- 296-127-01340 Laborers in utilities construction.
- 296-127-01342 Clean-up laborers.
- 296-127-01344 Laborers.
- 296-127-01346 Landscape construction.
- 296-127-01347 Lathers.
- 296-127-01349 Marble setters.
- 296-127-01351 Millwrights.
- 296-127-01352 Metal fabricators.
- 296-127-01354 Operating engineers (equipment operators).
- 296-127-01356 Painters.
- 296-127-01358 Pile drivers.
- 296-127-01360 Plasterers.
- 296-127-01362 Playground and park equipment installers.
- 296-127-01364 Plumbers, pipefitters, and steamfitters.
- 296-127-01367 Refrigeration mechanic.
- 296-127-01369 Remote controlled cleaning, inspection and sealing of underground sewer and water systems.
- 296-127-01370 Roofers.
- 296-127-01372 Sheet metal workers.
- 296-127-01374 Sign makers and sign installers.
- 296-127-01375 Sprinkler fitters.
- 296-127-01376 Stone masons.
- 296-127-01377 Outside telephone line construction.
- 296-127-01378 Telecommunication technicians.
- 296-127-01379 Terrazzo (artificial marble) workers.
- 296-127-01382 Terrazzo workers' helpers, tile and marble setters' helpers (finishers).
- 296-127-01384 Tile setters.
- 296-127-01386 Traffic control stripers.
- 296-127-01387 Power line clearance tree trimming.
- 296-127-01389 Utilities construction (underground sewers and water lines).
- 296-127-01391 Water well drillers, exploration drillers, water well pump installers, and equipment oilers.
- 296-127-014 Usual benefits.
- 296-127-01410 Information concerning prevailing wage usual benefits.
- 296-127-015 Applicability of prevailing wages for supervisors.
- 296-127-017 Notice of wage determinations.
- 296-127-018 Coverage and exemptions of workers involved in the production and delivery of gravel, concrete, asphalt, or similar materials.
- 296-127-019 Survey methodology.
- 296-127-020 Interpretation of phrases used in chapter 39.12 RCW.
- 296-127-021 Apprentice worker.
- 296-127-022 Overtime according to RCW 49.28.065.
- 296-127-023 Building service maintenance.
- 296-127-025 Applicability of joint federal-state standards.

296-127-026	Exemptions for sole owners and their spouses, partnerships, corporations, and employees of public agencies.
296-127-030	Irrigation district exemption.
296-127-040	Statement of intent to pay prevailing wages.
296-127-045	Affidavit of wages paid.
296-127-050	Filing of statements of intent to pay prevailing wages and affidavits of wages paid for contracts under two thousand five hundred dollars.
296-127-060	Director of department of labor and industries to arbitrate disputes—General provisions.
296-127-061	Requests for arbitration.
296-127-062	Conduct of arbitration hearing.
296-127-130	Filing of complaint.
296-127-140	Investigation of complaint.
296-127-150	Notice of violation.
296-127-160	Appeal of notice of violation.
296-127-170	Hearing on notice of violation.
296-127-180	Effect of final decision finding a violation of RCW 39.12.065.
296-127-190	Filing of lien against retainage or bonds.
296-127-200	Surety bond payable to director.
296-127-210	Suit against retainage and bonds.
296-127-220	Distribution of recovery.
296-127-300	Filing and service.
296-127-310	List of violators.
296-127-320	Payroll.
296-127-400	Applicability.
296-127-410	Definitions.
296-127-420	Application for a subprevailing wage certificate.
296-127-430	Conditions for granting a subprevailing wage certificate.
296-127-440	Issuance of a subprevailing wage certificate.
296-127-450	Terms of subprevailing wage certificate.
296-127-460	Renewal of subprevailing wage certificate.
296-127-470	Review.
296-127-990	Severability.

DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER

296-127-016	Coverage and exemptions of workers involved in the production and delivery of materials predominantly used in road construction. [Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 88-22-046 (Order 88-22), § 296-127-016, filed 10/31/88.] Repealed by 92-01-104, filed 12/18/91, effective 1/31/92. Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270.
-------------	--

WAC 296-127-010 Definitions for chapter 296-127

WAC. (1) "Department" means the department of labor and industries.

(2) "Director" means the director of the department or his or her duly authorized deputy or representative.

(3) "Industrial statistician" means the industrial statistician of the department's employment standards, apprenticeship, and crime victims (ESAC) division.

(4) "Assistant director" means the assistant director of the employment standards, apprenticeship, and crime victims (ESAC) division or his or her duly authorized deputy or representative.

(5) "Contractor" means:

(a) The prime contractor, and each and every subcontractor, required to be registered under chapter 18.27 RCW and/or licensed under chapter 19.28 RCW, that performs any work on a public works project site, and/or is required to pay industrial insurance premiums as a construction company.

(b) Employers engaged in shipbuilding and ship repair, building service maintenance, and any fabricator or manufacturer that produces nonstandard items specifically for a public works project.

(c) Employers that contract with contractors or subcontractors for the purpose of the production and/or delivery of materials pursuant to the terms of WAC 296-127-018.

(6) The term municipality shall include every city, county, town, district, political subdivision, or other public agency thereof which is authorized by law to require the execution of public work, except drainage districts, diking districts, diking and drainage improvement districts, drainage improvement districts, diking improvement districts, consolidated diking and drainage improvement districts, consolidated drainage improvement districts, consolidated diking improvement districts, irrigation districts, or any such other districts as shall from time to time be authorized by law for the reclamation or development of waste or undeveloped lands.

(7)(a) The term "public work" shall include:

(i) All work, construction, alteration, enlargement, improvement, repair, and/or demolition that is executed by contract, purchase order, or any other legal agreement and that is executed at the cost of the state of Washington or of any municipality. The source of the funding shall not determine the applicability of the statute, and may include, but is not limited to, such sources as those payments made through contracts with insurance companies on behalf of the insured state or municipality;

(ii) All work, construction, alteration, enlargement, improvement, repair, and/or demolition which, by law, constitutes a lien or charge on any property of the state or of a municipality;

(iii) All work, construction, alteration, repair, or improvement, other than ordinary maintenance that the state or a municipality causes to be performed by a private party through a contract to rent, lease, or purchase at least fifty percent of the project by one or more state agencies or municipalities, pursuant to RCW 39.04.260;

(iv) Maintenance, except ordinary maintenance as defined by (b)(iii) of this subsection, when performed by contract. Maintenance is defined as keeping existing facilities in good usable, operational condition;

(v) Janitorial and building service maintenance as defined by WAC 296-127-023, when performed by contract, on public buildings and/or assets; and

(vi) The fabrication and/or manufacture of nonstandard items produced by contract specifically for a public works project as defined by (a)(i) through (v) of this subsection.

(b) The term "public work" shall not include:

(i) Work, construction, alteration, enlargement, improvement, repair, demolition, and/or maintenance for which no wage or salary compensation is paid, consistent with the requirements of RCW 35.21.278;

(ii) The construction, alteration, repair, or improvement of any municipal street railway system;

(iii) Ordinary maintenance which is defined as work not performed by contract and that is performed on a regularly scheduled basis (e.g., daily, weekly, monthly, seasonally, semiannually, but not less frequently than once per year), to service, check, or replace items that are not broken; or work not performed by contract that is not regularly scheduled but is required to maintain the asset so that repair does not become necessary.

(8) "Contract" means a contract, purchase order, or any other legal agreement in writing for public work to be performed for a fixed or determinable amount, which is duly awarded after advertisement and competitive bid. A contract that is awarded from a small works roster, or under the emergency provisions of state law, need not be advertised.

(9) "Residential construction" means construction, alteration, repair, improvement, or maintenance of single family dwellings, duplexes, apartments, condominiums, and other residential structures not to exceed four stories in height, including basement, when used solely as permanent residences. It does not include the utilities construction (water and sewer lines), or work on streets, or work on other structures (e.g., for recreation and business.)

[Statutory Authority: RCW 39.12.070, 94-01-100, § 296-127-010, filed 12/16/93, effective 1/16/94. Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270, 92-01-104, § 296-127-010, filed 12/18/91, effective 1/31/92; 88-22-046 (Order 88-22), § 296-127-010, filed 10/31/88. Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020, 86-03-063 (Order 85-28), § 296-127-010, filed 1/17/86. Statutory Authority: RCW 39.12.015, 39.12.060 and HB 795, 1982 1st ex.s. c 38, 82-18-041 (Order 82-28), § 296-127-010, filed 8/27/82.]

WAC 296-127-011 Time for determining prevailing wage. (1) Prevailing wage rates for all public work contracts will be determined by the industrial statistician and published on the first business day of February and the first business day of August of each year. These rates shall become effective thirty days after the date of publication. However, the industrial statistician may revise an established prevailing wage rate in response to an administrative or judicial finding overturning the established rate, or at any time necessary to correct an error, with such revision becoming effective thirty days after the date of publication. However, in the event of an emergency as determined by the director of the department, such revised rate shall take effect upon publication.

(2) The department shall establish deadlines for the submission of:

- (a) Completed wage surveys, for inclusion of submitted data in the survey computations;
- (b) Newly ratified collective bargaining agreements for inclusion in the semiannual prevailing wage publication;
- (c) Notice of collectively bargained wage and benefit adjustments, and/or relevant contractual changes, for inclusion in the semiannual prevailing wage publication; and
- (d) Notice of changes in apprenticeship standards and incremental wage rates for inclusion in the semiannual prevailing wage publication.

(3) The applicable prevailing wage rates for a given public works contract will be determined as follows:

(a) For all public works contracts, except janitorial or building service maintenance contracts, the applicable prevailing wage rates shall be the rates that are in effect on the date when bids by prime contractors are due for submission to contract awarding agencies. These rates shall remain in effect for the duration of the contract.

(b) If contracts are not awarded within six months of the date bids are due, the applicable prevailing wage rates shall be those that are in effect on the date the contract is awarded. These rates shall remain in effect for the duration of the contract.

(2001 Ed.)

(4) If a contract for public work is not awarded pursuant to bids, the applicable prevailing wage rates shall be those that are in effect on the date when the contract is executed. These rates shall remain in effect for the duration of the contract.

(5) A schedule of the applicable prevailing wage rates must be included by:

(a) Contract awarding agencies, in the bid specifications and contract documents for each contract.

(b) Contractors, in the bid and/or contract documents provided to subcontractors.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270, 92-01-104, § 296-127-011, filed 12/18/91, effective 1/31/92; 88-22-046 (Order 88-22), § 296-127-011, filed 10/31/88. Statutory Authority: RCW 39.12.015, 39.12.060 and HB 795, 1982 1st ex.s. c 38, 82-18-041 (Order 82-28), § 296-127-011, filed 8/27/82.]

WAC 296-127-013 Scope of work descriptions. (1) In order to determine applicable prevailing wage rates, the director or his/her designee will issue scope of work descriptions for each trade and occupation recognized as being involved in public work.

(2) The scope of work descriptions shall be created using authoritative sources available to the department, such as:

- (a) Washington state apprenticeship and training council approved apprenticeship standards;
- (b) Collective bargaining agreements;
- (c) Dictionaries of occupational titles;
- (d) Experts from organized labor, licensed contractors, and contractors' associations;
- (e) Recognized labor and management industry practice.

(3) The applicable prevailing wage rates for workers employed on public works projects shall be determined by the scopes of work performed by those workers, and not by their specific job titles.

(4) The applicable scope of work description for a public works contract is the scope of work description that is in effect on the date that the bids are due to be submitted to the contract awarding agency. If the contract is not awarded within six months of the bid due date, then the applicable scope of work description shall be that which is in effect on the date that the contract is awarded. The same scope of work description shall remain in effect for the duration of the contract.

(5) In the event a dispute arises regarding a scope of work description following the award of a public works contract, the aggrieved party may request an arbitration hearing pursuant to the provisions of RCW 39.12.060, WAC 296-127-060, 296-127-061, and 296-127-062.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051, 00-15-077, § 296-127-013, filed 7/19/00, effective 7/19/00. Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270, 92-01-104, § 296-127-013, filed 12/18/91, effective 1/31/92; 88-22-046 (Order 88-22), § 296-127-013, filed 10/31/88.]

WAC 296-127-01301 Certified asbestos abatement workers. For the purpose of the Washington state public works law, chapter 39.12 RCW, the department of labor and industries has established the work classification of certified asbestos abatement workers.

Asbestos abatement work may be performed by any worker who is certified as an asbestos remover and encapsulator, except when the work performed is incidental to the normal scope of work of another trade or occupation. Incidental asbestos work includes only that work of short duration which is indistinguishable from the work of another established classification.

This classification does not include work falling within the scope of work for asbestos workers. That work is primarily related to the installation of insulation material around mechanical systems.

Certified asbestos abatement workers perform all of the work, including any cleanup required in connection with the abatement of asbestos, coming within the purpose and scope of chapter 49.26 RCW and chapter 296-65 WAC. WAC 296-65-003 provides definitions which establish the scope of this work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01301, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01303 Heat and frost insulators and asbestos workers. For the purpose of the Washington state public works law, chapter 39.12 RCW, heat and frost insulators and asbestos workers apply insulation materials to mechanical systems to reduce loss or absorption of heat, prevent moisture condensation and to deaden sound and prevent vibration.

The work includes, but is not limited to:

- The preparation and physical distribution on the job site of asbestos, cork, plastic, magnesia or similar insulation materials.

- Insulation of mechanical systems, plumbing, heating systems, any insulation connected with air handling systems, refrigeration piping and related vessels, boilers, tanks, flues breechings, evaporators, turbines, fittings, valves, ducts, flues, vats and all insulation connected with steam, condensate, feedwater and/or chilled water, or insulation of any mechanical system for sound control.

- All cleanup required in connection with heat and frost insulators and asbestos worker's work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01303, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01305 Boilermakers. For the purpose of the Washington state public works law, chapter 39.12 RCW, boilermakers assemble, erect, repair and clean boilers, tanks, vats and pressure vessels according to blueprint specifications, using hand tools and portable power tools and equipment.

The work includes, but is not limited to:

- Locating and marking of reference points for columns or plates on foundations, using master straightedge, squares, transit and measuring tape.

- Using rigging or cranes to lift parts to specified positions.

- Aligning structures or plate sections, using plumb bobs, levels, wedges, dogs or turnbuckles.

- Drilling, reaming, chipping, caulking and grinding of structures and sections and bolting or welding them together.

- Setting of drums and headers and installation of tubes.

[Title 296 WAC—p. 2068]

- And all the cleanup required in connection with boiler-makers work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01305, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01306 Brick masons. For the intents and purposes of the Washington state public works law, chapter 39.12 RCW, the job description for brick masons is as follows:

- Prepare and lay building materials such as brick, concrete block, cinder block, terra cotta block, marble and granite block, and related materials to construct, repair and water-proof structures, such as walls, partitions, arches, sewers, chimneys or smokestacks, piers, abutments, walks and curbstones.

- Measure distance from reference points and mark guidelines on working surface to lay out work.

- Spread soft layer of mortar that serves as base and binder for brick (or block), using trowel.

- Apply mortar to end of brick and position brick in mortar bed.

- Tap brick with trowel to level, align, and embed in mortar, allowing specified thickness of joint. Remove excess mortar from face of brick, using trowel.

- Finish mortar between brick with pointing tool or trowel.

- Break bricks to fit spaces too small for whole brick, using edge of trowel or brick hammer.

- Determine vertical and horizontal alignment of courses, using plumb bob, gauseline and level. Fasten brick or terra cotta veneer to face of structures, with tie wires embedded in mortar between bricks, or in anchor holes in veneer brick.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01306, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01308 Building service employees (janitors, waxers, and window washers). For the purpose of the Washington state public works law, chapter 39.12 RCW, the work of building service employees includes, but is not limited to:

(1) Janitors. Empty trash and damp wipe containers. Dust chairs, sides of desks, top of filing cabinets, panelled walls, doors, ledges and picture frames within easy reach. Damp wipe desk tops, telephones and desk fixtures. Damp mop floors. Vacuum upholstered furniture and draperies. Wash vinyl furniture with cleaning solution. Wash doors and other surfaces and spot wash painted walls. Clean door glass and inside partition glass. Vacuum and shampoo carpets.

(2) Utility janitors. Performs the following duties in addition to those performed by janitors: Waxing of floors (when not performed by traveling waxers), high wall and ceiling washing requiring the use of a ladder, and minor repairs and maintenance necessary to the operation of the building.

(3) Waxers. Waxing of floors.

(4) Window washers. Washing of all windows, other than inside partition glass and door glass, washing of painted walls, (when not done as a prerequisite to repainting) and wall paper cleaning.

(2001 Ed.)

(5) And all the cleanup required in connection with building service employees.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01308, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01309 Cabinet makers. For the purpose of the Washington state public works law, chapter 39.12 RCW, cabinet makers set up and operate a variety of woodworking machines and use various hand tools to fabricate and repair wooden cabinets, sashes, doors, and furniture in a shop or plant.

The work includes, but is not limited to:

- Study blueprints or drawings of articles to be constructed or repaired and plan sequences of cutting or shaping operations to be performed.

- Mark outline or dimensions of parts on paper or lumber stock, according to blueprint or drawing specifications. Match materials for color, grain or texture.

- Set up and operate woodworking machines, such as: Power saws, jointer, mortiser, tenoner, molder and shaper to cut and shape parts from woodstock.

- Trim component parts of joints to assure snug fit, using hand tools, such as: Planes, chisels, or wood files. Bore holes for insertion of screws or dowels by hand or using boring machine. Glue, fit and clamp parts and subassemblies together to form a complete unit, using clamps or clamping machine. Drive nails or other fasteners into joints at designated places to reinforce joints.

- Sand and scrape surfaces and joints of articles to prepare articles for finishing. Dip, brush or spray assembled articles with protective or decorative materials, such as stain, varnish, or paint.

- Install hardware such as: Hinges, catches and drawer pulls.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01309, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01310 Carpenters. For the purpose of the Washington state public works law, chapter 39.12 RCW, carpenters construct, erect, install and repair structures, structural members and fixtures made of wood, plywood, wall-board and materials that take the place of wood, such as plastic, metals, composites, and fiberglass, using carpenter hand tools and power tools.

The work includes, but is not limited to:

- Build rough wooden structures, such as concrete forms, scaffolds, wooden bridges, trestles, coffer dams, tunnel and sewer support; welding and burning.

- Install ladders, handrails, walkways, platforms and gangways.

- Install door and window bucks (rough frames in which finished frames are inserted) in building frame work and brace them with boards nailed to frame work.

- Install subflooring in buildings.

- Nail plaster grounds (wood or metal strips) to studding.

- Fit and nail sheathing on outer walls and roofs on buildings.

- Construct, erect, install and repair commercial, industrial and residential structures.

- Select specified type of lumber or other materials.

- Prepare layout, using rule, framing square and calipers.
- Mark cutting and assembling lines on materials, using pencil, chalk, and marking gauge.

- Shape materials to prescribed measurements, using saws, chisels and planes.

- Assemble, cut and shape materials and fasten them together with nails, dowel pins, or glue.

- Verify trueness of structure with plumb bob and carpenter's level.

- Apply decorative paneling to walls.

- Erect frame work for structures and lay subflooring.

- Cover subfloor with building paper to keep out moisture and lay hardwood, parquet and wood-strip-lock floors by nailing floors to subfloor or cementing them to mastic or asphalt base.

- Build stairs and layout and install partitions and cabinets.

- Install metal roof decking and metal siding, regardless of the fastening method, or what it is fastened to.

- Install all other types of siding, regardless of composition, fastening method, or what it is fastened to.

- Fit and install prefabricated wooden cabinets, window frames, door frames, doors, weather stripping, interior and exterior trim, and finish hardware, such as locks, letter drops and kick plates.

- Apply acoustical tile to ceilings and walls of buildings to reduce reflecting of sound and to decorate rooms.

- Cement tile to masonry surface.

- Nail channels or wood furring strips to surfaces to provide mounting for tile.

- Place building paper between tile and furring strip to keep out moisture.

- Nail, screw, or staple tile to wooden furring strips.

- Nail or screw moulding to walls to support and seal joint between ceiling tile and wall. Hang dry lines to wall mauling.

- Drive hanger inserts into reinforced concrete ceiling, suspend and bend hanger wires at points touching dry lines.

- Thread wires through holes in main runners and cut and attach cross supports to suspended runners and wall mauling.

- Cut tiles for fixtures and borders and insert tiles into supporting frame work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01310, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01312 Carpenter tenders. For the purpose of the Washington state public works law, chapter 39.12 RCW, carpenter tenders are laborers who assist carpenters engaged in construction, erection, installation and repair of wooden structures and fixtures. Carpenter tenders perform a variety of routine tasks which do not require the use of carpenter tools, such as:

- Cleaning materials, equipment, tools and work areas.

- Moving and lifting building materials, tools and supplies.

- Handing materials, tools and supplies to carpenters.

- Dismantling temporary wooden structures.

- Assisting carpenters in stripping forms and shoring.

- Cleaning and moving forms.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01312, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01313 Carpet and resilient floor layers. For the purpose of the Washington state public works law, chapter 39.12 RCW, carpet and resilient floor layers do the measuring, cutting, sewing, taping, fitting, laying and installing of oil cloth, matting, linen, carpet, synthetic turf, linoleum, vinyl, plastic, rubber, cork, mastic, asphalt, mastipave, tile and chalkboard, nonslip or abrasive materials, resilient, decorative seamless surface coatings (except terrazzo, magnesite and latex built-up floors) and all other resilient coverings on floors, walls, counters, table tops and ceilings when cemented, tacked or otherwise applied to a base, whether used as shock-absorbing, sound-absorbing, or decorative coverings.

The work includes, but is not limited to:

- Handling of the materials at the site of installation.
- Sweeping, scraping, sanding, or chipping dirt and irregularities from base surfaces and filling cracks with putty, plaster, or cement grout to form smooth, clean foundations.
- All necessary preparation work and finish work, such as drilling holes for sockets and pins, installation of underlayment, sanding and filling, fitting of metal edgings, metal corners and caps and fitting devices for attachment of such materials.
- Spreading of adhesive cement over floor to cement foundation material to the floor. Laying covering on cement. Rolling finished floor to smooth it out and press cement into base and covering.
- All the cleanup required in connection with carpet and resilient floor layers work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01313, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01315 Cement masons. For the purpose of the Washington state public works law, chapter 39.12 RCW, cement masons perform all work where finishing tools are used.

The work includes, but is not limited to:

- The setting of screeds, the rodding (buildings), shaping, smoothing and finishing of the surfaces of freshly poured concrete floors, walls, sidewalks, curbs, steps and stairways, the finishing of extruded barrier rails, or any other concrete surface requiring finishing, using hand tools or power tools, including floats, trowels, screeds and straightedge.
- The removing of rough or defective spots from concrete surfaces, using grinder or chisel and hammer and patching holes with fresh concrete or epoxy compound preparatory to sacking. (The finishing of a large surface of patched holes.)
- The moulding of expansion joints and edges, using edging tools, jointers and straightedge.
- The application of penetrating sealer and primer protective coatings to concrete floors and steps for the first twenty-four hours after pouring, when part of the finishing process.
- The installation of seamless composition floors and the installation and finishing of epoxy based coatings or poly-

ter based linings to all surfaces, when the coatings or linings are applied by spraying or troweling.

- Sandblasting or waterblasting for architectural finish or preparatory to patching.
- The setting of all forms one board high.
- The cutting of joints with concrete saw for the control of cracks in buildings and contiguous to buildings.
- The setting of concrete curb, gutter and sidewalk forms as a composite crew with laborers.
- All cleanup work required in connection with the above work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01315, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01317 Drywall applicators (drywall nailers and sheetrock installers). For the purpose of the Washington state public works law, chapter 39.12 RCW, drywall applicators install plasterboard or other wallboards to ceilings and interior walls of buildings, using hand tools and portable power tools.

The work includes, but is not limited to:

- Installing horizontal and vertical metal studs for attachment of wallboard on interior walls.
- Cutting angle iron and channel iron to specified size and suspending angle iron grid and channel iron from ceiling, using wire.
- Cutting wallboard to size.
- Cutting openings for electrical and other outlets.
- Nailing wallboard to wall and ceiling supports.
- Trimming rough edges from wallboard to maintain even joints.
- Nailing prefabricated metal pieces around windows and doors and between dissimilar materials to protect drywall edges.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01317, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01318 Drywall finishers (tapers). For the purpose of the Washington state public works law, chapter 39.12 RCW, drywall finishers perform all the preparatory work and finishing work involved in covering interior walls and ceilings with decorative or protective finish materials.

The work includes, but is not limited to:

- Handling of all materials after the initial unloading at the job site, including the distribution to the points of application.
- Erecting, moving and dismantling of all scaffolding.
- All preparatory work of taping, sealing, finishing and sanding of joints between plasterboard or other wallboard.
- Spotting, caulking, pointing and sealing of cracks and holes in walls and ceilings.
- Applying protective coverings prior to the application of the finish materials.
- Spackling of surfaces and application of texture finishes where adhesive materials are used.
- Applying all primers, sealers, decorative or protective finish materials, regardless of the method of application.
- Installing metal moulding at corners instead of sealant and tape.

- Removing all drywall material scraps and all cleaning work, including scraping of floors.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01318, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01320 Power line construction electricians. For the purpose of the Washington state public works law, chapter 39.12 RCW, power line construction electricians erect, maintain and repair transmission poles (whether built of wood, metal or other material), fabricated metal transmission towers, outdoor substations, switch racks, or similar electrical structures, electric cables and related auxiliary equipment for high-voltage transmission and distribution power lines used to conduct energy between generating stations, substations and consumers.

The work includes, but is not limited to:

- The moving of men, tools, or equipment. The sorting, loading and moving of materials from the first drop. The handling, assembling and erecting of all necessary materials.
- The trenching, digging, and backfilling of vaults, holes for poles and anchors (by hand or mechanical equipment), guying, fastening to the stub-in on concrete footings or pads, assembling of the grillage, grounding of all structures, the stringing and installation of transformers.
- Constructing, repairing and maintaining highway and street lighting systems and highway and street traffic signal systems.

- Trimming trees and brush prior to the construction of new power lines, during repair of damaged lines, or as part of routine maintenance of the lines (tree trimmers).

- All the cleanup required in connection with line construction electrician work.

All the classifications listed below work under the supervision of linemen and assist linemen.

(1) Groundmen. Performs the following tasks:

- Manual digging of pole holes, anchor holes and trenches.
- Assists in framing of poles, pulling guys.
- Assembles and erects fixtures.
- Tamping and compacting.
- Driving of 1/2 to 3/4 ton pickup truck.

(2) Head groundman. Performs the following tasks:

- Manual digging of pole holes, anchor holes, and trenches.
- Assists in framing of poles, pulling guys.
- Assembles and erects fixtures.
- Tamping and compacting.
- Driving of 1/3 to 3/4 ton pickup truck for material or man haul.

(3) Line equipment operators. They operate caterpillars, trucks equipped with winch and/or boom, hydraulically operated backhoes with or without front end loaders, mounted booms, and any other equipment that does not come within the scope of heavy equipment operators.

(4) Heavy line equipment operators. They operate any piece of equipment which, in accordance with manufacturer's recommended specifications is capable of operating with one hundred or more aggregate feet of boom, be it crane, backhoe, clam shell, drag line, or shovel.

(2001 Ed.)

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01320, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01322 Electronic technicians. For the purpose of the Washington state public works law, chapter 39.12 RCW, the scope of work for electronic technicians is as follows:

(1) The installation, operation, inspection, maintenance, repair and service of:

- (a) Radio, television and recording systems and devices.
- (b) Systems for paging, intercommunication, public address, wired music, clocks, security and surveillance systems and mobile radio systems.
- (c) Fire alarm and burglar systems.

(2) The installation of nonmetallic conduits and incidental shielded metallic conduits of no longer than ten feet nor larger than one inch, when installed for the specific purpose of carrying low voltage wiring.

(3) Pulling wiring through the type of conduit described under subsection (2) of this section, when the wiring is installed for the specific purpose of carrying low voltage electricity.

(4) All the cleanup required in connection with electronic technician's work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01322, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01323 Inside wireman electrician. For the purpose of the Washington state public works law, chapter 39.12 RCW, inside wireman electricians plan the layout, install and repair conduit, wiring, electrical fixtures, apparatus, and control equipment in buildings and adjacent yards to provide electricity for power and lighting.

(1) They assemble, install and maintain all electrical lighting, electric heating and cooling equipment, standby motor generators, electric heat pumps, under-floor duct and luminous ceilings.

They install, repair and maintain highway and street lighting systems and highway and street traffic signal systems.

The work includes, but is not limited to:

- The handling and moving of any electrical materials, equipment and apparatus on the job site.
 - Welding, burning, brazing, bending, drilling and shaping of all copper, silver, aluminum, angle iron and brackets to be used in connection with the installation and erection of electrical wiring and equipment.
 - Measuring, cutting, bending, threading, forming, assembling and installing of electrical conduit, using such tools as hacksaw, pipe threader and conduit bender.
 - Pulling wiring through conduit.
 - The installation of conduit and interduct raceways for fiber optic cable and the pulling of fiber optic cable through these raceways, except telephone conduit and cable.
- Cutting holes in floors and walls for electrical conduit:
- With point and hammer.
 - Core-drilled.
 - Chasing and channeling necessary to complete any electrical work, including the fabrication and installation of duct and manhole forms incidental to electrical installation.

- Splicing wires by stripping insulation from terminal leads with knife or pliers, twisting or soldering wires together and applying tape or terminal caps.
- Installation and maintenance of lighting fixtures.
- Connecting wiring to lighting fixtures and power equipment.

Assembling and installing of conduit switches, relays, junction boxes, circuit breaker panels, and related accessories and controls.

- Testing continuity of circuit to insure electrical compatibility and safety of components.
- All cleanup required in connection with electrical work.

(2) The following power line construction classifications may assist journeymen wireman in the installation, repair and maintenance of highway and signal lighting systems and highway and street traffic signal systems:

(a) Groundmen.

- Performs the following tasks:
 - Manual digging of pole holes, anchor holes and trenches.
 - Assembles and erects fixtures.
 - Assists in framing of poles, pulling guys.
 - Tamping and compacting.
 - Driving of 1/2 or 3/4 ton pickup truck.

(b) Head groundman.

- Performs the following tasks:
 - Manual digging of pole holes, anchor holes and trenches.
 - Assists in framing of poles, pulling guys.
 - Assembles and erects fixtures.
 - Tamping and compacting.
 - Driving of 1/3 or 3/4 ton pickup truck for materials or man haul.

(c) Line equipment operators. Operate caterpillars, trucks equipped with winch and/or boom, hydraulically operated backhoes with or without front end loaders, mounted booms, and any other equipment that does not come within the scope of heavy equipment operators.

(d) Heavy line equipment operators. Operate any piece of equipment which, in accordance with manufacturer's recommended specifications is capable of operating with one hundred or more aggregate feet of boom, be it crane, backhoe or clam shell, drag line, or shovel.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01323, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01325 Electrical fixture maintenance workers. For the purpose of chapter 39.12 RCW, Washington state prevailing wage law, the prevailing wage for electrical fixture maintenance worker is required for the following work:

Cleaning of all types of lighting fixtures, luminous ceilings, all types of diffused areas and ceiling lighting. The work also includes replacement of lamps, ballasts, sockets and the installation of energy efficiency upgrades. This work must be limited to nonresidential fixture bodies, but may also include replacement or retrofitting of remote located ballasts with approved products.

[Title 296 WAC—p. 2072]

Work beyond that which is described above must be paid at another electrical classification such as inside wireman electrician or residential electrician. Electrical fixture maintenance worker does not include installation of new fixtures or branch circuits, movement or relocation of existing fixtures, or alteration of existing branch circuits.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01325, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01327 Elevator constructors. For the purpose of the Washington state public works law, chapter 39.12 RCW, elevator constructors assemble and install electric and hydraulic freight and passenger elevators, escalators, and dumbwaiters.

The work includes, but is not limited to:

- Studies blueprints and lays out location of framework, counterbalance rails, motor pump, cylinder, and plunger foundations.
 - Drills holes in concrete or structural steel members with portable electric drill, secures anchor bolts or welds brackets to support rails and framework, and verifies alignment with plumb bob and level.
 - Cuts prefabricated sections of framework, rails, and other elevator components to specified dimensions, using acetylene torch, power saw, and disc grinder.
 - Installs cables, counterweights, pumps, motor foundations, escalator drives, guide rails, elevator cars, and control panels.
 - Positions electric motor and equipment on top of elevator shaft, using hoists and cable slings.
 - Connects electrical wiring to control panels and electric motors.
 - Installs safety and control devices.
 - All cleanup required in connection with the installation of elevators.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01327, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01328 Fence erectors and fence laborers. For the purpose of the Washington state public works law, chapter 39.12 RCW, fence erectors and fence laborers erect and repair metal and wooden fences and fence gates around industrial establishments (schools, playgrounds, etc.), residences, farms and along highways using power tools and hand tools.

The work of the fence erectors includes, but is not limited to:

- (1) Fence erector.
 - Lays out fence line, using tape measure, and marks for postholes.
 - Digs postholes with mechanical posthole digger or power-driven auger.
 - Aligns posts, using line or by sighting along edges of posts.
 - Verifies vertical alignment of posts with plumb bob or spirit level.
 - Attaches fence-rail support to post, using hammer and pliers.
 - Cuts metal tubing, using pipe cutter, and inserts tubing through rail support.

(2001 Ed.)

- Completes top fence rail of metal fence by connecting tube sections, using metal sleeves.
- Attaches rails or tension wire along bottoms of posts to form fencing frame.
- May weld metal parts together, using portable gas welding equipment.
- Stretches wire, wire mesh, barbed wire, or chain link fencing between posts and attaches fencing to frame.
- Assembles gate and fastens in position, using hand tools.
- Saws required length of lumber to make rails for wooden fence.
- Nails top and bottom rails to fence posts, or inserts them in slots on posts.
- Nails pointed slats to rails to construct picket fence.
- Erects alternate panel, basket weave, and louvered fences.

(2) Fence laborer. In addition to assisting the fence erector in the performance of the tasks described above, the work of the fence laborer includes, but is not limited to:

- Digs holes for posts with spade or posthole digger.
- Blasts rock formations with dynamite to facilitate digging of holes.
- Sets metal or wooden posts in upright position in holes.
- Mixes concrete by hand or by use of a cement mixer.
- Pours concrete around base of posts or tamps soil into holes to embed posts.
- All the cleanup required in connection with the erection of fences.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01328, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01329 Flaggers. For the intents and purposes of the Washington state public works law, chapter 39.12 RCW, the scope of work for flaggers is as follows:

- Controls and directs pedestrian and vehicular traffic through construction projects using sign, hand and flag signals, warning paddles and radio communication.
- Informs drivers of detour routes through construction sites. Distributes signs, markers, flares, barricades, cones and other traffic control devices along construction sites in designated patterns.
- Is responsible for the safety of the workers and the public on construction sites.
- Must have completed a Washington state approved flagging course, or the equivalent.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01329, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01331 Glaziers. For the purpose of the Washington state public works law, chapter 39.12 RCW, glaziers select, cut, prepare, handle, install or remove all window glass, plate glass, and all other types of glass, including structural glass, mirror glass, tempered and laminated glass, safety or protection glass, all types of insulating glass units, all plastics or other similar materials when used in place of glass and when set or glazed with putty, moulding rubber, cement, lead and all types of mastic, or other materials used in place of same.

(2001 Ed.)

Glaziers install the above materials in windows, louvers, doors, partitions, skylights, and on building fronts, walls, ceilings and tables, whether the materials are set in wood, stone, cement, or metal of all types.

The work includes, but is not limited to:

- Install mirrors of all types.
- Mark outline or pattern on glass and cut glass, using glasscutter. Break off excess glass by hand or with notched tool.
- Fasten glass panes into wood sash with glazier's points and spread smooth putty around edge of panes with knife to seal joints.
- Install metal window and door frames into which glass panels are to be fitted, such as fixed or sliding patio doors and vented, fixed or sliding windows.
- Bolt metal hinges, handles, locks, and other hardware to prefabricated glass doors. Set glass doors in frame and fit hinges.
- Install metal-framed glass enclosures for showers, bath tubs, and skylights where the glass installation and frame assembly is a single operation.
- Install mirror or structural glass on building fronts, walls, ceilings, or tables, using mastic, screws or decorative moulding.
- All the cleanup required in connection with glazing work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01331, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01332 Hod carriers, mason tenders, and mortarmen. For the purpose of the Washington state public works law, chapter 39.12 RCW, hod carriers, mason tenders and mortarmen assist bricklayers and masons.

The work includes, but is not limited to:

- The mixing, packing, wheeling and tempering of mortar and fire clay.
- The mixing, handling and conveying of all other materials used by bricklayers and masons (e.g., brick, tile, stone and cast stone), whether done by hand or any other process (e.g., operation of forklifts, hoisting equipment and pumping equipment).
- Building of scaffolds, trestles, boxes and swinging staging.
- Hanging of cables and placing of putlogs.
- Carrying bricks and mortar in a hod.
- Cleaning and clearing of all debris.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01332, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01333 Heating equipment mechanics. For the purpose of the Washington state public works law, chapter 39.12 RCW, heating equipment mechanics replace the gas and oil burners in furnaces or replace complete furnaces, but they do not install the original furnaces.

The work includes, but is not limited to:

- Removal of old burner.
- Installation of new burner.
- Connection of fuel lines.
- Installation of instrumentation lines.
- Installation of new fan.

- Firing off.
- Setting burner on correct ratio.
- All cleanup required in connection with the installation of heating equipment.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01333, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01335 Inland boatmen. For the purpose of the Washington state public works law, chapter 39.12 RCW, inland boatmen man the tugs and launches (but not outboard-powered skiffs) engaged in construction, dredge tending, pile driving, diver tending and geodetic surveying.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01335, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01337 Insulation applicators. For the purpose of the Washington state public works law, chapter 39.12 RCW, insulation applicators install all the insulation material in floors, walls, sound rated partitions and ceilings.

They also install insulation materials on roofs, when the material must be measured, cut and nailed to the inside or outside of an existing roofing system.

The insulation materials installed by insulation applicators include, but are not limited to:

- Batt insulation, semi-rigid and rigid insulation, blown spray and foam-type insulation, regardless of method of installation, attachment or connection.

- All the cleanup required in connection with insulation applicators.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01337, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01339 Ironworkers. For the purpose of the Washington state public works law, chapter 39.12 RCW, ironworkers perform all work in connection with field fabrication and/or erection, installation, removal, wrecking and dismantling of structural, architectural and reinforcing iron and steel, ornamental lead, bronze, brass, copper and aluminum, and plastics or other materials when used in place thereof.

The work performed by ironworkers includes, but is not limited to:

- Steel and metal houses and packaged buildings.
- Bridges, viaducts, cableways, tramways, monorails.
- Locks, gates, metal forms, railings (including pipe).
- Steel towers, energy producing windmill type towers, nuclear reactors.
- Frames in support of boilers.
- The installation of metal siding and metal roof decking, regardless of the fastening method, or what it is fastened to.
- All reinforcing work in connection with field fabrication, handling, burning, welding and tying of all materials used to reinforce concrete structures.
- The signaling, rigging, hoisting, aligning, bolting, riveting, or welding of structural-steel members.
- The unloading, loading, distributing, stockpiling, hoisting, rigging, and handling of materials used by ironworkers and all cleanup work.

Work process:

(1) Structural:

- (a) Erecting:
 - Connecting
 - Fitting
 - Hooking on
 - Bolting up
 - Torquing
 - Signaling
 - Preengineered buildings
 - Sheeting
- (b) Rigging:
 - Cranes
 - Derricks
 - Land rigs
 - Cable splicing
- (c) Maintenance of equipment:
 - Dismantling
 - Field rigging
 - Moving field equipment
- (2) Welding:
 - (a) Acetylene welding
 - (b) Electric arc welding
 - (c) Cutting and burning
 - (d) Heliarc.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01339, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01340 Laborers in utilities construction. For the purpose of the Washington state public works law, chapter 39.12 RCW, the work for laborers includes, but is not limited to:

- (1) Pipe layer.
 - Shoring, building of manholes and catch basins.
 - Sealing, doping and wrapping of the pipe after the joints have been welded and before the pipe is lowered into the trench or ditch.
 - Joining ductile iron pipe by using screws, bolts, fittings, caulking or any other method for making joints in the industry, when the pipe will not be under pressure. Lowering the pipe into the trench or ditch.
- (2) Topman. Assists the pipe layer from the surface, he does not work in the trench or ditch.
- (3) General laborer.
 - Performs all other laborers' work which is not done by pipe layers and topmen.
 - Responsible for all cleanup required in connection with utilities construction work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01340, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01342 Clean-up laborers. For the intents and purposes of the Washington state public works law, chapter 39.12 RCW, the scope of work for clean-up laborers is as follows:

Performs general clean-up in buildings during construction when too much rubbish has accumulated.

Cleans areas where the next phase of construction will take place.

Performs final clean-up after the construction has been completed.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01342, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01344 Laborers. For the intents and purposes of the Washington state public works law, chapter 39.12 RCW, laborers perform a variety of tasks such as:

- Erect and repair guard rails, median rails, guide and reference posts, sign posts and right of way markers along highways.

- Mix, pour and spread asphalt, gravel and other materials, using hand tools, and mix, pour, spread and rod concrete.

- Lift, carry and hold building materials, tools and supplies.

- Measure distances from grade stakes, drive stakes and stretch tight line.

- Bolt, nail, align and block up under forms.

- Signal operators of construction equipment to facilitate alignment, movement and adjustment of machinery to conform to grade specifications.

- Level earth to fine grade specifications, using pick and shovel.

- Mix concrete, using portable mixer.

- Position, join, align, wrap and seal pipe sections.

- The placement and testing of plastic conduit for electrical cable, when the conduit is buried underground.

- Erect scaffolding, shoring and braces.

- Mop, or spread bituminous compounds over surfaces for protection (outside buildings).

- Spray material such as water, sand, steam, vinyl, or stucco through hoses to clean, coat or seal surfaces.

- Apply caulking compounds by hand or with caulking gun to seal crevices.

- The application of penetrating sealer and primer protective coatings to concrete floors and steps when safe to walk on.

- Installation of plastic panels on the inside of existing window frames for insulation (instead of storm windows). The panels are held in place magnetically (with metal brackets) and with self-taping screws.

The cleaning and grinding of concrete floors and walls by high pressure waterblasting or sandblasting preparatory to the application of waterproofing.

- The removing of rough or defective spots from concrete surfaces, using grinder or chisel and hammer and patching holes with fresh concrete or epoxy compound when not preparatory to sacking (finishing a large surface of patched holes).

- The setting of concrete curb, gutter and sidewalk forms as a composite crew with cement masons.

- The laying of concrete, granite and brick pavers in beds of sand.

- General clean-up required after damage caused by water or fire.

All cleanup work required in connection with the above work. Clean tools, equipment, materials and work areas:

(1) When the clean-up is performed for more than one trade (usually employed by general contractor).

(2) When assisting those trades for which laborers have been specifically designated as tenders, e.g., carpenter tender, cement finisher tender, etc.

(2001 Ed.)

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01344, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01346 Landscape construction. For the purposes of the Washington state public works law, chapter 39.12 RCW, landscape construction involves the beautification of a plot of land by changing its natural features through the addition or modification of lawns, trees, bushes, etc.

(1) Landscape construction includes:

- Constructing or maintaining lawns, yards, gardens or other landscaped surfaces.

- Mixing and spreading mulches, ground covers, soil amendments, decorative bark or decorative rock.

- Seeding, sodding or hydroseeding.

- Applying chemicals or fertilizers.

- Planting trees, shrubs or plants.

- Installing, servicing or repairing above ground lawn or landscape sprinkler systems.

- Installing, servicing or repairing underground lawn or landscape sprinkler systems to a maximum depth of three feet below finish grade.

- Assembling or placing premanufactured trellis work, play equipment, benches or picnic tables.

- Constructing rock walls to a maximum height of four feet.

- Land clearing.

- Spreading top soil to a maximum depth of six inches below finish grade.

- Trenching to a maximum depth of three feet below finish grade.

- Installing french drains or other subsurface water collection systems to a maximum depth of three feet below finish grade.

- Hauling top soil, plants or other landscaping materials in trucks with only one rear axle.

(2) Landscape construction does not include:

- Any activity or task (including those mentioned above) when performed preparatory to any nonlandscaping construction work.

- Constructing roads, footpaths, trails or rock walls more than four feet high.

- Custom fabrication of trellis work, play equipment, benches or picnic tables.

- Constructing restrooms, shelters or similar structures.

- Installing sewer systems, storm sewer systems, catch basins, vaults or drainage systems for impervious surfaces (such as parking lots).

- Installing drainage systems or underground sprinkler systems more than three feet below final grade.

- Land clearing, dozing, grading, excavating or hauling except as permitted above.

- Tree falling or bucking.

- Subgrade preparation.

- The use of power equipment with more than ninety horsepower.

- The use of trucks with more than one rear axle except hydroseeders.

- Demolition of structures.

[Title 296 WAC—p. 2075]

- Asphalt or concrete work except incidental anchorage for play equipment, benches or picnic tables.
- Welding.
- Installing agricultural irrigation systems.
- Encapsulation of landfills.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01346, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01347 Lathers. For the purpose of the Washington state public works law, chapter 39.12 RCW, a lather erects horizontal metal framework to which laths are fastened, using nails, bolts, and studgun. Drills holes in floor and ceiling and drives ends of wooden or metal studs into holes to provide anchor for furring or rockboard laths.

Cuts and shapes lath and other materials, using hand tools and power tools.

Nails, clips or fastens all types of wood, wire and metal laths, plasterboard, wallboard, rockboard, gypsum, sheetrock and acoustical materials which take the place of same to walls, ceilings, and partitions of buildings to provide supporting base for plaster, fireproofing or acoustical material.

Erects all metal plastering accessories which are covered and/or serve as ground, guard, stock or screed for plaster materials, including wire mesh.

The work includes, but is not limited to:

- Installs all carrying bars and purlins (pieces of horizontal timber), light iron and metal furring (thin strips of wood or metal to create air space) of all descriptions, such as rods, channels, flatiron, t-bar, h-bar and other ceiling bars or systems for the receipt of lath and board.
- Wires plasterer's channels to overhead structural framework to provide support for plaster or acoustical ceiling tile.
- Nails, plaster grounds (wood or metal strips) to studing to provide a guide for plasters.
- Handles, moves, hoists and stores on the job site all materials used by lathers and does all the cleanup required in connection with lather work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01347, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01349 Marble setters. For the purpose of the Washington state public works law, chapter 39.12 RCW, marble setters cut, trim and set marble slabs in floors and walls of buildings and repair and polish slabs previously set in buildings.

The work includes, but is not limited to:

- Cutting, trimming and facing marble to specified size, using cutting, power sawing, and facing equipment and hand tools.
- Drilling holes in slabs and attaching brackets.
- Spreading mortar on bottom of slabs and on sides of adjacent slabs.
- Setting blocks in position, tamping them into place, and anchoring bracket attachments with wire.
- Filling joints with grout and removing excess grout from marble with a sponge.
- Cleaning and beveling cracks or chips on slabs, using power tools and hand tools.

[Title 296 WAC—p. 2076]

• Heating cracked or chipped areas with blowtorch and filling defects with composition mastic that matches grain of marble.

• Polishes marble and other ornamental stone to high luster, using power tools or by hand.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01349, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01351 Millwrights. For the purpose of the Washington state public works law, chapter 39.12 RCW, millwrights install machinery and equipment according to layout plans, blueprints, and other drawings in industrial establishments, using hoists, lift trucks, hand tools and power tools. They read blueprints and schematic drawings to determine work procedures.

The work includes, but is not limited to:

- Dismantle machines, using hammers, wrenches, crow-bars, and other hand held tools.
- Move machinery and equipment, using hoists, dollies, rollers, and trucks.
- Assemble and install equipment, such as shafting, conveyors, and tram rails, using hand tools and power tools.
- Construct foundation for machines, using hand tools and building materials, such as wood, cement, and steel.
- Align machines and equipment, using hoists, jacks, hand tools, squares, rules, micrometers, and plumb bobs.
- Assemble machines and bolt, weld, rivet, or otherwise fasten them to foundation or other structures, using hand tools and power tools.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01351, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01352 Metal fabricators. For the purpose of the Washington state public works law, chapter 39.12 RCW, metal fabricators fabricate and assemble structural or ornamental metal products, such as frame work or shells for machinery, tanks, stacks, and metal parts for buildings and bridges.

The work includes, but is not limited to:

- Develop layout and plan sequences of operation.
- Design and construct templates and fixtures.
- Locate and mark bending and cutting lines onto work-piece.
- Operate a variety of machines and equipment to fabricate metal products, such as brakes, saws rolls, shears, flame cutters, drill presses, bending machines, welding machines, and punch and forming presses.
- Set up and operate machine tools associated with fabricating shops, such as radial drill presses, end mills and edge planers, to turn, drill and mill metal to specific dimensions.
- Weld, forge weld, braze, solder, rivet or bolt components together to assemble workpiece.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01352, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01354 Operating engineers (equipment operators). For the purpose of the Washington state public works law, chapter 39.12 RCW, operating engineers operate, repair and maintain all types of self-propelled

(2001 Ed.)

mechanically, electrically, electronically, hydraulic, automatic or remote controlled equipment on construction projects.

The work includes, but is not limited to, the following types of construction and equipment:

(1) Type of construction.

(a) Heavy and highway.

- Roads, streets, highways, grading and paving, excavation of earth and rock, viaducts, bridges, abutments, retaining walls, alleys, sidewalks, guard rails, fences, parkways, parking areas, athletic fields, railroads, airport grading, surfacing and drainage, pile driving, water supply, water development, reclamation, irrigation, drainage and flood control projects, water mains, pipe lines, sanitation and sewer projects, all common ditches, dams, aqueducts, canals, reservoirs, intakes, channels, levees, dikes, revetments, jetties, quarrying of breakwater or riprap stone, foundations pile driving piers, docks, locks, river and harbor projects, breakwaters, dredging, channel-cutoffs, duct lines, subways, shafts, tunnels, drilling, soil testing, clearing and grubbing, land leveling, quarrying, demolition and site clearing, tramways, soil stabilization, landscaping, beautification projects, hoisting or related work done by helicopters.

- Oil or gas refineries, nuclear power plants, industrial complexes and incidental structures.

- It shall also include any work relating to off-shore drilling and pipe lines.

(b) Building.

- Construction, erection, alteration, repair, modification, demolition, addition or improvement, in whole or in part, of any building structure.

- It shall include the installation, operation, maintenance and repair of equipment, and other facilities used in connection with the performance of such building construction.

(c) Material supply. Operations such as quarries, sand and gravel plants, screening plants, asphalt plants, ready-mix concrete or batch plants and prestressed concrete plants (excluding established plants) that are established at the job site.

(2) Type of equipment.

(a) Self-propelled.

- Asphalt machines, backhoes, blades, boring equipment, brooms, chippers, compactors, compressors, concrete saws, cranes, derricks, dozers, drilling equipment, hoists, lifts, loaders, motor graders, pavement breakers, paving machines, pumps, rollers, scrapers, screeds, shovels, tractors, and trenchers.

(b) Stationary.

- Asphalt plants, concrete batch plants, crushing plants, and screening plants.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01354, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01356 Painters. For the intents and purposes of the Washington state public works law, chapter 39.12 RCW, the job description for painters is as follows:

(1) Preparation of surfaces.

(a) Washing, cleaning and smoothing of surfaces, using sandpaper, brushes or steel wool.

(2001 Ed.)

(b) Removal of old paint or other coatings from surfaces, using paint remover, scraper, wire brush or by sandblasting.

(c) Filling of nail holes, cracks and joints with putty, plaster or other fillers.

(2) Color matching and mixing.

(3) Application of paint, varnish, stain, enamel, lacquer, vinyl, wallpaper and other materials of whatever kind or quality applied to walls or ceilings with paste or adhesive using brushes, spray gun or paint rollers.

(4) Application of polyurethane elastomers, vinyl plastics, neoprene, resin, polyester and epoxy as waterproofing or protective coatings to any kind of surfaces (except roofs) when applied with brushes, spray guns or rollers.

(5) Application of sprayed on fire retardant foam.

(6) Texturing and decorating.

(7) Erecting of scaffolding or setting up of ladders to perform the work above ground level.

(8) Responsible for all the cleanup required in connection with painters work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01356, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01358 Pile drivers. For the purpose of the Washington state public works law, chapter 39.12 RCW, the work of a pile driver includes, but is not limited to:

Pile driver (pile buck).

- The preparation, aligning, plumbing, setting, stressing, testing, pulling, welding, cutting off and capping of piling of any type including steel pile and concrete pile and the splicing, barking, heading and shoeing of piling and the rigging and signaling connected with all of the above.

- Operating engineer pile driver.

- Operating any power equipment used for pile driving, such as cranes equipped with drophammers and drums and hoists on A-frame type fixed leads on floating rigs.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01358, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01360 Plasterers. For the purpose of the Washington state public works law, chapter 39.12 RCW, plasterers apply gypsum, portland cement, stucco, imitation stone, and kindred materials and products to interior walls, ceilings, and partitions and to exterior walls of buildings, and finish those materials and products.

The work includes, but is not limited to:

- The spreading of plaster over laths, masonry, or any other base, using trowel and smoothing the plaster with darby and float for uniform thickness.

- The application of all the various manufacturer's brand names of "thin coat" or "plaster veneer."

- The application of all bonding agents and mastic.

- Roughing of undercoat with wire or metal scraper to provide bond for succeeding coats of plaster.

- The application of all malleable plastic materials and epoxy materials.

- The setting in place of plasterboard, insulationboard, "styro-foam and bead-board," ground, locks, patent dots, cork plates, brownstone and acoustical tile, fiberglass reinforcement and finished products.

- The plastering of joints, nail holes, and bruises on wall-board.
- The grouting and filling of door bucks, runners and similar installations.
- The application of scratchcoat, browncoat, and finish-coat of plaster to wood, metal, or board laths successively to all ceilings and walls when finished with terrazzo or tile, and the application of any plastic material to same.
- The fireproofing of all building assemblies with plaster materials, sprayed fiberglass or similar materials, whether applied to gypsum, metal lath or directly.
- All waterproofing work, such as the cutting and placing of nylon mesh and the plastering and finish of all exterior wall insulation and plaster finish systems.
- The application of crushed stone, marble or ceramic chips and broken glass where embedded in plaster, cement, plastic, or similar materials.
- The placing of acoustic blocks with any plastic material, regardless of thickness.
- The placing, by any method, of plaster or composition caps and ornaments.
- Creating decorative textures in finish coat by marking surface of coat with brush and trowel or by spattering it with small stones ("stucco") where plastering equipment and/or materials are used.
- The operation and control of all types of plastering machines, including power trowels and floats.
- All cleanup work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01360, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01362 Playground and park equipment installers. For the intents and purposes of the Washington state public works law, chapter 39.12 RCW, the job description for playground and park equipment installers is as follows:

- Construction and placement of play equipment, benches and picnic tables in school grounds and parks.
- Responsible for all the cleanup required in connection with installation of playground and park equipment.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01362, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01364 Plumbers, pipefitters, and steamfitters. For the purpose of the Washington state public works law, chapter 39.12 RCW, plumbers, pipefitters and steamfitters assemble, install, and maintain piping systems, fixtures and equipment for the transportation of water, steam, gas, air, sewage, oil, fuels, liquids, gases, or similar substances.

The work includes, but is not limited to:

- (1) Piping systems installed in structures (e.g., buildings, industrial plants, etc.).
 - (a) The handling and moving of any plumbing, pipefitting and steamfitting materials, supplies, and equipment on the job site.
 - (b) Cutting, threading, and bending pipe.
 - (c) Joining pipes by use of screws, bolts, fittings, solder, welding and caulking, or any other method of making joints in the pipefitting industry.

[Title 296 WAC—p. 2078]

(d) Assembling, installing, and repairing valves, pipe fittings, and pumps.

(e) Testing the piping system.

(f) Installing and repairing plumbing fixtures, such as sinks, bathtubs, water heaters, and water softeners.

(g) Cutting holes in floors and walls for pipes:

- With point and hammer.

- Core-drilled.

(h) Responsible for all cleanup required in connection with plumbers, pipefitters and steamfitters work.

(2) Distribution lines (e.g., water mains, sewer mains, oil and gas lines, etc.).

(a) The handling and moving of any plumbing, pipefitting and steamfitting materials, supplies, and equipment on the job site.

(b) Steel pipe: Welding of pipe joints and joining pipes with screws, bolts, fittings, solder, caulking, or any other method for making joints in the industry.

(c) Ductile iron pipe: Joining pipes by using any method for making joints in the industry, when the pipe will be under pressure.

Assembling, installing, and repairing valves and pumps.

(d) Testing the piping system.

(e) Responsible for all cleanup required in connection with plumbers, pipefitters and steamfitters work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01364, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01367 Refrigeration mechanic. For the purpose of Washington state public works law, chapter 39.12 RCW, refrigeration mechanics install industrial, commercial, residential, and marine refrigeration systems involved in cold storage, ice making, cooling, heating, air conditioning, humidifying, dehumidifying or dehydrating and charge (pump gas or fluid in the system), start, test, service, and repair the installed systems.

The work includes, but is not limited to:

- Lay out reference points for the installation of the structural and functional components, using tape, transit, plumb bob, level, and square.

- Lay out and drill holes and cut chases and channels, set and erect belts, inserts, stands, brackets, hangers, supports, sleeves, thimbles, conduits and hoses.

- Lay out, cut, thread, bend and connect pipe to functional components and water or power system of premises.

- Move, lift, and install all compressors, pumps, motors, controls, switches, gauges, valves, condensers, evaporators, and other fixtures and appurtenances included in such systems.

- Bolt, rivet, weld, braze and solder parts to structural and functional components.

- All clean-up work required in connection with refrigeration mechanics' work.

- Excluded is the installation of sheet metal duct work leading to and/or from units described above.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01367, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01369 Remote controlled cleaning, inspection and sealing of underground sewer and water

(2001 Ed.)

systems. For the purpose of the Washington state public works law, chapter 39.12 RCW, this special method of repairing in-place, underground sewer and water pipes, includes the following work:

- Cleaning of interior pipe surface.
- Closed circuit television inspection.
- Electronic air testing of joints, cracks and breaks.
- Internal sealing of joints, cracks and breaks with chemical grout.
- All the above functions must be performed by remote control.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01369, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01370 Roofers. For the purpose of the Washington state public works law, chapter 39.12 RCW, roofers apply and install any and all types of roofing materials, other than sheet metal. The work of roofers includes, but is not limited to:

(1) The installation of slate and tile and all substitute materials taking the place of slate and tile, with necessary metal flashing to make water-tight.

All cementing in, on or around slate and tile roofs.

All laying of felt or paper beneath the slate and tile.

All dressing, punching and cutting of all roof slate or tile either by hand or machinery.

(2) The installation of all forms of plastic, slate, slag, gravel; asphalt and composition roofing; rock asphalt mastic when used for damp and waterproofing; prepared paper; compressed paper, and chemically prepared paper with or without coating.

The installation of all damp resisting preparations when applied on roofs with mop, three-knot brush, roller, swab or spray system.

(3) The installation of all forms of elastomeric and/or plastic (elasto-plastic) roofing systems, both sheet and liquid applied, whether single-ply or multi-ply.

All types of aggregates, blocks, bricks or stones used to ballast these elasto-plastic systems.

All types of aggregates used as a ballast for inverted roofing membrane assembly, or roof of similar construction where the insulation is laid over the roofing membrane.

All sealing and caulking of seams and joints on these elasto-plastic systems to insure water-tightness.

All liquid-type elasto-plastic preparation for roofing, damp or waterproofing when applied with a squeegee, trowel, roller or spray equipment.

All sheet-type elasto-plastic systems, whether single or multi-ply, for waterproofing.

All priming of surfaces to be roofed, damp or waterproofed, whether done by roller, mop, swab, three-knot brush, or spray systems.

All types of preformed panels used in waterproofing.

(4) The application of all types of spray-in-place foams such as urethane or polyurethane, and the coatings that are applied over them.

(5) The application of roof insulation, when the insulation material is applied as an integral part of the roofing system, whether the insulation material is applied as the first, last or any other layer in between.

(2001 Ed.)

(6) The handling, hoisting and storing of all roofing, damp and waterproofing materials.

(7) The tear-off and/or removal of any type of roofing, including roofing materials containing asbestos, all spudding, sweeping, vacuuming and/or cleanup of any and all areas of any type where a roof is to be relayed, and all other cleanup required in connection with roofing work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01370, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01372 Sheet metal workers. For the purpose of the Washington state public works law, chapter 39.12 RCW, sheet metal workers perform the following work:

(1) The handling, conditioning, assembling, installing, servicing, repairing, altering and dismantling of the duct work for the heating, ventilation and air conditioning systems regardless of the materials used and the setting and the servicing of all equipment and all supports and reinforcements in connection therewith.

(2) The installation of expansion and discharge valves, air filters, and water filters in heating, ventilation and air conditioning systems.

(3) The testing and balancing of air-handling equipment and duct work.

(4) The handling, conditioning, assembling, installing, repairing and dismantling (except when a building is demolished) of cornices, gutters and down spouts.

(5) The installation of metal siding and metal roof decking, regardless of the fastening method, or what it is fastened to.

(6) The installation of furnaces and any and all sheet metal work in connection with or incidental to commercial kitchen equipment or refrigerating plants.

(7) The handling, moving, hoisting and storing of all sheet metal materials on the job site and all the cleanup required in connection with sheet metal work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01372, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01374 Sign makers and sign installers. For the purpose of the Washington state public works law, chapter 39.12 RCW, sign makers and sign installers fabricate, install, repair, alter, maintain and dismantle commercial signs, bulletins and poster panels.

The work includes, but is not limited to:

(1) Electric and luminous tube signs.

- The manufacture of all luminous tubes, which includes the coating and processing of tubes and the bending, repairing and pumping for all tubes.

- The shop assembly and fabrication of signs and displays and the installation, alteration, repair and dismantling of all electric and neon sign displays.

- The wiring, assembly, service and electrical maintenance of all such displays.

- The installation and servicing of fluorescent lighting fixtures.

(2) Painted and photographed signs.

- The preparing of sign surfaces, patterns and layouts.

- Applying all decals.

[Title 296 WAC—p. 2079]

- Preparing and pouncing of patterns and tracing all patterns.
 - Designing, cutting out of all letters made of wood or like materials, such as plastic, masonite, wallboard, cardboard.
 - Priming, finishing and gilding of letters.
 - Use of stencil knife, perforating wheel and friskit cutting.
 - Applying and/or hanging of all cut-out letters.
 - All pictorial work on signs, screen process work in its entirety including photography and operation of projector and mimeograph.
 - Erecting commercial signs, bulletins and poster panels.
 - Repainting of all signs, including painting of capping on bulletins and poster panels, by spraying and use of rollers.
 - All work on banners, cloth, plastic, paper and cardboard, walls, bulletins, windows, truck lettering and all lettering on any surface.
 - The use of stencil knife on sandblasted signs.
 - The layout and application of all vinyl letters.
- (3) All the cleanup required in connection with sign making and installing.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01374, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01375 Sprinkler fitters. For the purpose of the Washington state public works law, chapter 39.12 RCW, sprinkler fitters perform the installation, adjustments and corrections, maintenance, repair and dismantling of all fire protection and fire control systems and the installation of all piping for tubing, appurtenances and equipment pertaining thereto.

The work includes, but is not limited to:

- (1) Underground water mains, fire hydrants and hydrant mains, stand pipes and hose connections to sprinkler systems and overhead piping.
- (2) Sprinkler tank heaters.
- (3) Air lines and thermal systems used in connection with sprinkler and alarm systems and all tanks and pumps connected thereto.
- (4) Co² and cardox systems, dry chemical systems, halon and foam systems and all other fire protection systems.
- (5) Cutting holes in floors and walls for pipes:
 - With point and hammer.
 - Core-drilled.
- (6) The unloading, handling and storing of all the above.
- (7) All cleanup work.

Excluded are steam fire protection systems and stand pipes not connected to automatic sprinkler systems.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01375, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01376 Stone masons. For the purpose of the Washington state public works law, chapter 39.12 RCW, stone masons shape and set stone blocks to build stone structures, such as piers, walls and abutments, and lay walks, curbstones, or special types of masonry, such as alberene (acid-resistant soapstone) for vats, tanks, and floors, using mason's tools.

The work includes, but is not limited to:

- Shaping stone blocks preparatory to setting, using chisel, hammer, and other shaping tools.
- Spreading mortar over stone and foundation with trowel and setting stone in place by hand or with the aid of a crane.
- Aligning stone with plumbline and finishing joints between stone with a pointing trowel.
- Spreading mortar along mortar guides to insure joints of uniform thickness.
- Cleaning surface of finished structure and removing mortar, using muriatic acid and brush.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01376, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01377 Outside telephone line construction. For the purpose of the Washington state public works law, chapter 39.12 RCW, outside telephone line construction includes, but is not limited to, the following work:

- (1) Head groundman. Operates light equipment and drives vehicles.
- (2) Telephone equipment operator - light. Operates backhoes, trenching machines and small cable plows.
- (3) Telephone equipment operator - heavy. Operates bulldozers, trenchers, backhoes, cable plows and plows pulling other equipment.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01377, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01378 Telecommunication technicians. For the purpose of the Washington state public works law, chapter 39.12 RCW, telecommunications technicians install, inspect, maintain, repair and service telecommunication systems.

The work includes, but is not limited to:

- (1) Main distribution frame (MDF). The distribution frame where the permanent outside lines entering a building terminate and the subscriber's line multiple cabling and truck multiple cabling originate. It is usually located on the ground floor of a building.
- (2) Intermediate distribution frames (IDF). Distribution frames which provide flexibility in allocating the subscriber's number to the line or equipment in the office which is to be associated with the particular line. These frames are located on each floor of a building.
- (3) Blocks. Subpanels. They are connecting devices where large feed cables terminate at the distribution frames.
- (4) Common equipment or key service unit. Consists of a backboard assembly, an equipment mounting frame, for connecting external telephones and Pacific Northwest Bell lines.
- (5) Instruments, terminals, sets. Communications equipment at either end of a circuit. Equipment at a subscriber's or user's terminal including such items as telephones.
- (6) Ancillary equipment. Add-on equipment such as bells, buzzers, speakerphones, headsets, automatic dialers, recorders, etc.
- (7) Telephone cable.
 - (a) Network channel service cable owned by the telephone companies.
 - (b) Riser cables between floors of a building.

(c) Distribution cables installed on each floor of a building in the floor or the ceiling.

(d) Inside wires between the telephone and the connection to the distribution cable.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01378, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01379 Terrazzo (artificial marble) workers. For the purpose of the Washington state public works law, chapter 39.12 RCW, terrazzo workers create durable and decorative surfaces on floors, walls and ceilings.

The work includes, but is not limited to:

(1) Spreading a one-half inch mixture of sand, cement, and water with trowel to form a base over walls, ceilings, and concrete floors where terrazzo is to be applied.

(2) The cutting and setting of metal or wooden strips into the terrazzo base so that the top edges form a design or pattern and define the level of the finished floor surface.

(3) Spreading a mixture of cement terrazzo, magnesite terrazzo, polyacrylate terrazzo, epoxy matrix terrazzo, exposed aggregate, rustic or rough washed for the interior or exterior of buildings, over a terrazzo base with float and trowel to form the finished surface.

(4) Spreading of any other kind of mixture of plastics composed of chips or granules of marble, granite, blue stone, enamel, mother-of-pearl, quartz, ceramic colored quartz and all other kinds of chips or granules when mixed with cement, rubber, neoprene, vinyl, magnesium, chloride or any other resinous or chemical substances used for seamless flooring systems, and all other binding materials when used on any part of the interior and exterior of buildings and on fountains, swimming pools, etc.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01379, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01382 Terrazzo workers' helpers, tile and marble setters' helpers (finishers). For the purpose of the Washington state public works law, chapter 39.12 RCW, the scope of work for terrazzo workers' helpers, tile and marble setters' helpers includes, but is not limited to:

- Handling, moving, hoisting, storing and distributing sand, mortar, cement, lime, terrazzo, tile, marble, stone, slate or any other materials that may be used by terrazzo workers, tile layers, marble setters and stone masons.

- Performing all rigging.

- Installing and dismantling of scaffolding or staging.

- Mixing mortar and grout.

- All preparation prior to installation, such as helping with the bedding and cutting, priming, and the installation of ties and wire lath.

- Grinding, cleaning, washing, rubbing and polishing of all tile and marble.

- Applying protective coverings, such as soap compounds, paper products, varnishes and lacquers and all types of tapes and polyethylene coverings.

- Cleanup of the job site.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01382, filed 7/19/00, effective 7/19/00.]

(2001 Ed.)

WAC 296-127-01384 Tile setters. For the purpose of the Washington state public works law, chapter 39.12 RCW, tile setters apply tile to floors, walls, ceilings, stair treads, promenade roof decks, garden walks, swimming pools, and all places where tiles may be used to form a finished surface for practical use, sanitary finish or decorative purpose.

The tile is defined as all burned clay products, as used in the tile industry, either glazed or unglazed, and all composition materials and all substitute materials in single units up to and including 15" x 20" x 2" (except quarry tiles larger than 9" x 1 1/4"), and all mixtures in the form of cement, plastics and metals that are used as a finished surface.

The work includes, but is not limited to:

- Measuring and cutting metal lath to size for walls and ceilings with tin snips. Tacking lath to wall and ceiling surfaces with staple gun or hammer. Spreading plaster base over lath with trowel and leveling plaster to specified thickness, using screed.

- Spreading concrete on subfloors with trowel and leveling it with screed.

- Spreading mastic or other adhesive base on roof deck, using serrated spreader to form base for promenade tile.

- Cutting and shaping tile with tile cutters and biters.

- Positioning tile and tapping it with trowel handle to affix tile to plaster or adhesive base.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01384, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01386 Traffic control stripers. For intents and purposes of the Washington state public works law, chapter 39.12 RCW, the scope of work for traffic control stripers is as follows:

(1) All painting, application and installing of lines, arrows, bumpers, curbs, etc., on parking lots, air fields, highways, game courts and other such surfaces.

(2) The handling, painting and installing of all car stops, stop signs and any other type sign installed for the purpose of regulating traffic on such surfaces.

(3) The installation of plastic, metal or composition button, or lines used instead of paint.

(4) Installation of parking gates, ticket spitters and other similar mechanical and automatic control devices.

(5) Seal coating, slurry coating and other surface protection.

(6) Line removal; chemical sand and hydro-blast, paint and button.

(7) Installation of guard rail and posts and similar protective devices.

(8) Manufacturing and installation of all car stops, per example: Metal, wood, concrete, plastic, etc., and all similar traffic regulators.

(9) Manufacturing, painting, stenciling, servicing, repairing, placing and removal of traffic safety and control devices (barricades).

(10) The preparation and maintenance of all surfaces as outlined above.

(11) Responsible for all the cleanup required in connection with traffic control stripers work.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01386, filed 7/19/00, effective 7/19/00.]

[Title 296 WAC—p. 2081]

WAC 296-127-01387 Power line clearance tree trimming. For the purpose of the Washington state public works law, chapter 39.12 RCW, the scope of work for power line clearance tree trimmers, chippermen and power line clearance tree trimmer apprentices is as follows:

(1) Power line clearance tree trimmer.

- Trims trees to clean right of way for electrical power lines to minimize storm and short-circuit hazards.
- Climbs trees to reach branches interfering with wires and transmission towers, using climbing equipment, or may work from bucket of extended truck boom to reach limbs.
- Prunes treetops, limbs and branches, using saws or pruning shears.
- Falls trees interfering with power service, using chain-saw.
- Repairs trees damaged by storms or lighting, by trimming jagged stumps and painting them to prevent bleeding of sap.

- Removes broken limbs from wires, using hooked extension pole.

(2) Chipperman.

- Assists tree trimmer in clearing trees, branches and brush interfering with electrical power lines. He performs all this work on the ground.
- Hoists tools and equipment to tree trimmers and lowers tree tops, limbs and branches with rope or block and tackle. Positions and steadies ladders. Operates the wood chipper (turns on and off). Saws and chops up tree trunks, tree tops, limbs, branches, and brush and leads them into the chipper. Drives the truck which tows the chipper.

- This classification is being phased out. To be used only for employees hired as "chippermen" prior to July 1, 1985.

(3) Power line clearance tree trimmer apprentice.

- Assist tree trimmer in clearing trees, branches and brush interfering with electrical power lines. He performs all his work on the ground.
- Hoists tools and equipment to tree trimmer and lowers tree tops, limbs and branches with rope of block and tackle. Positions and steadies ladders. Operates the wood chipper (turns it on and off). Saws and chips up tree trunks, tree tops, limbs, branches, and brush and feeds them into the chipper. Drives the truck which tows the chipper.
- Drags tree trunks, limbs, branches, and brush to the chipper, when the chipper is stationed a considerable distance from the location where the tree trimming is done.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01387, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01389 Utilities construction (underground sewers and water lines). For the purpose of the Washington state public works law, chapter 39.12 RCW, utilities construction is defined as follows:

The construction, alteration, repair or improvement of water mains, sanitary sewer mains, underground storm sewers and branch lines to buildings but not underneath buildings, within cities, towns, suburbs and subdivisions. The work includes, but is not limited to:

(1) Clearance of right of way preparatory to the excavation of trenches or ditches.

[Title 296 WAC—p. 2082]

(2) Excavation and trimming of trenches or ditches (including establishing and maintaining grade).

(3) Shoring, building of manholes, catch basins, etc.

(4) Distribution of pipe and skids, placing of skids and pipe over the trench or ditch.

(5) The cleaning, sealing, doping and wrapping of the pipe after the joints have been welded and before lowering the pipe into the trench and alignment.

(6) Lowering of the pipe and the removal of the skids.

(7) Backfilling, compaction and resurfacing of trenches or ditches (e.g., asphalt work necessary to cover the trench or ditch, but all other asphalt work is excluded).

(8) Clean-up and restoration of right of way (e.g., restore landscaping).

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01389, filed 7/19/00, effective 7/19/00.]

WAC 296-127-01391 Water well drillers, exploration drillers, water well pump installers, and equipment oilers.

For the purpose of the Washington state public works law, chapter 39.12 RCW, the work of water well drillers, exploration drillers, water well pump installers, and equipment oilers includes, but is not limited to:

(1) Water well drillers. The drilling of wells for:

(a) Commercial water supplies.

(b) Irrigation water supplies.

(c) Water supplies for any other purpose.

(d) Dewatering, or similar purposes.

(2) Exploration drillers.

(a) Hole drilling for geologic or hydrologic information.

(b) Core drilling for geologic information.

(3) Water well pump installers. The installation of water well pumps for all purposes, except commercial water supplies.

(4) Equipment oilers. Assist the drillers and pump installers in the performance of the tasks described above.

[Statutory Authority: Chapter 39.12 RCW, RCW 43.22.270 and 43.22.051. 00-15-077, § 296-127-01391, filed 7/19/00, effective 7/19/00.]

WAC 296-127-014 Usual benefits. (1) Employers are not required to establish "usual benefit" programs. If an employer chooses not to provide such benefits, however, wages paid must be at the full prevailing wage rate as defined by RCW 39.12.010.

(2) To be deemed a "usual benefit," the following requirements must be satisfied:

(a) Employer payments for the usual benefit shall be made only in conformance with all applicable federal and state laws, including the requirements of the Employment Retirement Income Security Act of 1974, as amended, and of the Internal Revenue Service; and

(b) Employee payments toward the usual benefit, through self-contribution, payroll deduction, or otherwise, shall not constitute a credit to the employer for prevailing wage purposes.

(3) "Usual benefits" are limited to the following:

(a) Health and welfare payments. This is medical insurance, which may include dental, vision, and life insurance. Insurance programs providing protection against industrial accidents or occupational illnesses which are mandated by

(2001 Ed.)

state or federal statutes, and all related mandatory forms of protection, shall not qualify as health and welfare insurance.

(b) Employer payments on behalf of a person employed for the purpose of providing retirement income.

(c) Vacation payments made either directly to the employees or into a vacation fund, provided these benefits are paid to the employees.

(d) Apprentice training fund. Payments made to training programs approved or recognized by the Washington state apprenticeship and training council.

(e) Paid holidays. Payments made to employees for specified holidays.

(4) Any fringe benefits required by other local, state, or federal laws do not qualify as "usual benefits."

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 92-01-104, § 296-127-014, filed 12/18/91, effective 1/31/92; 88-22-046 (Order 88-22), § 296-127-014, filed 10/31/88.]

WAC 296-127-01410 Information concerning prevailing wage usual benefits. (1) Contractors and employers shall conform to all posting and employee notification requirements provided by applicable federal and state laws concerning usual benefits plans.

(2) Contractors and employers must have, and make available to the department upon request, copies of all documents concerning usual benefits, as identified in WAC 296-127-014, for which employer payments are made.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 92-01-104, § 296-127-01410, filed 12/18/91, effective 1/31/92.]

WAC 296-127-015 Applicability of prevailing wages for supervisors. Determinations as to whether individuals are workers, laborers, or mechanics are based on the scope of work actually performed by the individuals, rather than the title of their occupations.

(1) Where additional supervisory duties are required of workers, laborers, or mechanics by statute or regulation, the industrial statistician shall establish a rate of pay for a work classification to be called "journey level in charge." These rates shall be published in the semiannual prevailing wage publication.

(2) Supervisors (e.g., foremen, general foremen, superintendents, etc.,) are entitled to receive at least the journey level prevailing rate of wage for performing manual or physical labor:

(a) For each hour spent in the performance of manual or physical labor if it is for more than twenty percent but less than fifty percent of their hours worked on a public works project during any given week.

(b) For all hours worked in any given week if they perform manual or physical labor for fifty percent or more of their hours worked on a public works project during such week.

(3) If supervisors subject to the journey level prevailing wage rate are paid a salary, the compensation (salary divided by number of hours worked) must be equal to or greater than the prevailing wage rate for the type of work performed.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 92-01-104, § 296-127-015, filed 12/18/91, effective 1/31/92; 88-22-046 (Order 88-22), § 296-127-015, filed 10/31/88.]

(2001 Ed.)

WAC 296-127-017 Notice of wage determinations. Current prevailing wage data will be furnished by the office of the industrial statistician upon request.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 92-01-104, § 296-127-017, filed 12/18/91, effective 1/31/92. Statutory Authority: RCW 39.12.015, 39.12.060 and HB 795, 1982 1st ex.s. c 38. 82-18-041 (Order 82-28), § 296-127-017, filed 8/27/82.]

WAC 296-127-018 Coverage and exemptions of workers involved in the production and delivery of gravel, concrete, asphalt, or similar materials. The materials covered under this section are sand, gravel, crushed rock, concrete mix, asphalt, or other similar materials.

(1) Workers are subject to the provisions of chapter 39.12 RCW when they are employed by a contractor as defined by WAC 296-127-010 (5)(c) and:

(a) They are engaged for a public works project in the production of the above-listed materials in a sand or gravel pit, rock quarry, concrete mixing plant, or other similar facility; or

(b) They are engaged in the transportation of the above-listed materials for use on a public works project, whether or not they perform any work on the project site.

(2) All workers, regardless of by whom employed, are subject to the provisions of chapter 39.12 RCW when:

(a) They deliver any of the above-listed materials to a public works project site and perform any spreading, leveling, rolling, or otherwise participate in any incorporation of the materials into the project; or

(b) They wait at or near a public works project site to participate in the incorporation of any of the above-listed materials into the project; or

(c) They remove any materials from a public works construction site pursuant to contract requirements or specifications (e.g., excavated materials, materials from demolished structures, cleanup materials, etc.); or

(d) They work in a materials production facility (e.g., batch plant, borrow pit, rock quarry, etc.,) which is established for a public works project for the specific, but not necessarily exclusive, purpose of supplying materials for the project.

(3) Workers are not subject to the provisions of chapter 39.12 RCW when:

(a) The employees' duties do not include spreading, leveling, rolling, or otherwise participating in the incorporation of the delivered materials into a public works project, and they are employed by an established materials supplier either in the production or delivery of sand, gravel, crushed rock, concrete mix, asphalt or other similar materials;

(b) They are employed by a common or contract carrier trucking company principally or exclusively engaged in the hauling or delivery of such products, and the employees' duties do not include spreading, leveling, rolling, or otherwise participating in the incorporation of the delivered materials into a public works project; or

(c) Their employer is engaged in the production and stockpiling of such materials for unspecified future use by the state of Washington or by municipalities as defined by RCW 39.04.010.

(4) The applicable prevailing wage rate shall be determined by the locality in which the work is performed. Workers subject to the provisions of chapter 39.12 RCW, as outlined in subsection (1) of this section, who produce such materials at an off-site facility shall be paid the applicable prevailing wage rates for the county in which the off-site facility is located. Workers subject to the provisions of chapter 39.12 RCW, as outlined in subsection (1) of this section, who deliver such materials to a public works project site shall be paid the applicable prevailing wage rates for the county in which the public works project is located.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 92-01-104 and 92-08-101, § 296-127-018, filed 12/18/91 and 4/1/92, effective 8/31/92.]

WAC 296-127-019 Survey methodology. (1) The industrial statistician shall establish prevailing wage rates by:

(a) Conducting wage and hour surveys for established trades and occupations;

(b) Adopting the wage and benefit adjustments established in collective bargaining agreements for those trades or occupations where the most recently established prevailing wage rates were derived from a collective bargaining agreement; and/or

(c) In instances when the procedures established in (a) and (b) of this subsection are not feasible, employing other methods deemed appropriate by the industrial statistician as set out in subsection (8) of this section.

(2) The department will determine the identity of employers to be surveyed for a specific trade or occupation by:

(a) Mailing trade and occupation questionnaires to all contractors whose registration under chapter 18.27 RCW or license under chapter 19.28 RCW is active;

(b) Mailing trade and occupation questionnaires to Washington state department of transportation prequalified contractors; and

(c) Compiling and maintaining lists of employers that are not required to be registered under chapter 18.27 RCW or licensed under chapter 19.28 RCW, but that employ workers in building service maintenance, in shipbuilding or ship repair, in the fabrication and/or manufacture of nonstandard items produced specifically for a public works project, and/or in the production and delivery of materials as defined in WAC 296-127-018. Trades and occupations utilized by the shipbuilding and ship repair industries shall not have their survey data combined with their construction counterparts, for the purpose of establishing prevailing wage rates for that industry.

(3)(a) Wage survey forms will be mailed to:

(i) Those contractors and employers whose businesses currently are active and were active during the established survey period, and whose response to the trade and occupation questionnaire indicates that they employ one or more of the trades or occupations being surveyed; and

(ii) Labor unions representing workers in the trades or occupations being surveyed.

(b) The department annually shall mail to state-wide trade associations and statewide labor organizations a proposed schedule of trades intended to be surveyed during the

upcoming fiscal year. In addition, the department shall notify those statewide trade associations and labor organizations, reasonably known to be affected, of the mailing of wage surveys.

(4) Data reported on survey forms may be verified by the department, and will be used only when submitted on behalf of or by:

(a) Individual contractors identified by a contractor registration number that currently is valid, and was valid during the established survey period;

(b) Employers that are not required to be registered under chapter 18.27 RCW or licensed under chapter 19.28 RCW, that directly employ and supervise workers as employees in building service maintenance, in shipbuilding or ship repair, in the manufacture of nonstandard items specifically produced for a public works project, or in the production and delivery of materials, as defined in WAC 296-127-018;

(c) Labor unions submitting wage and hour data on behalf of contractors and/or employers who are signatory to those unions' collective bargaining agreements covering the trade or occupation being surveyed; or

(d) Interested parties providing wage and hour data by trade and occupation from certified payroll records and/or from hours reported by trade and occupation on affidavits of wages paid, according to guidelines established by the department.

(5) The department shall use affidavit forms that include a requirement that contractors report the actual number of hours worked by each trade and occupation utilized on the public works project for which the affidavit is filed.

(6) Valid data reported on wage surveys shall be calculated, as follows:

(a) If the majority of hours reported for a trade or occupation in the largest city in a county is paid at the same wage rate, then that rate shall be established as the prevailing wage rate.

(b) If the same wage rate is not reported to have been paid for the majority of hours reported in the largest city in a county for a trade or occupation, then the average wage rate shall be established as the prevailing wage rate, based on a weighted average of the hours, wages, and benefits reported in the largest city.

(c) If a statistically significant number of hours fails to be reported for the largest city in a county, then the average wage rate for the county is established as the prevailing wage, based on a weighted average.

(d) If there fails to be reported for an entire county, sufficient hours to validate the survey data, that county's hours shall be combined with those reported for other counties that are adjacent, until the established hours threshold for validation has been met.

(7) Survey data will not be accepted if the data report the hours and wages of those who are exempt from the prevailing wage requirements of chapter 39.12 RCW, as defined in WAC 296-127-026.

(8)(a) The industrial statistician may utilize alternative methods to establish prevailing wage rates consistent with the terms of (b) of this subsection. These methods include, but are not limited to:

(i) The use of wage and hour data from the department of employment security;

(ii) The use of wage and hour data from the industrial insurance division of the department of labor and industries;

(iii) The use of data from surveys performed by the United States Department of Labor, wage and hour division; or

(iv) The use of wage and hour data reported to the department on affidavits of wages paid.

(b) These alternative methods will not be used for trades or occupations for which surveys had been completed as of the effective date of this section unless a subsequent survey produces insufficient data. In addition, these alternative methods may be used under circumstances that include, but are not limited to, the following:

(i) To establish prevailing wage rates for a new trade or occupation where a survey is not immediately feasible;

(ii) In response to an administrative or judicial determination of invalid wage rate or scope of work description;

(iii) In response to changes or additions in licensing, safety, or other requirements of other state agencies, departments or divisions; or

(iv) To establish rates for industries and trades and occupations generally not surveyed, in order to meet the requirement of having established wage rates for publication in contract or bid specifications as required by RCW 39.12.030.

(9) Any party that submits false information under this section shall, after a determination to that effect has been issued by the director after a hearing pursuant to chapter 34.05 RCW, forfeit as a civil penalty the sum of five hundred dollars.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270, 92-01-104, § 296-127-019, filed 12/18/91, effective 1/31/92; 88-22-046 (Order 88-22), § 296-127-019, filed 10/31/88.]

WAC 296-127-020 Interpretation of phrases used in chapter 39.12 RCW. (1) The "acceptance date of the public works project" referred to in RCW 39.12.065 is the date that the contract awarding agency formally accepts the completed public works project pursuant to state law.

(2) RCW 39.12.050 and 39.12.065 refer to "inadvertent filing or reporting error." The department defines an error as "inadvertent" if it is made by a contractor, as defined by WAC 296-127-010(5), or employer that shows that the error was made notwithstanding the use of due care by the contractor or employer. The burden of proving that an error is inadvertent rests with the contractor or employer charged with the error.

(3) The definition of "locality" in RCW 39.12.010(2) contains the phrase "wherein the physical work is being performed." The department interprets this phrase to mean the actual work site. For example, if nonstandard items specifically produced for public works projects are prefabricated in a county other than the county wherein the public works project is to be completed, the wage for the off-site prefabrication shall be the applicable prevailing wage for the county in which the actual prefabrication takes place. Workers who deliver such nonstandard items, as well as materials pursuant to the terms of WAC 296-127-018, shall be paid the applica-

(2001 Ed.)

ble prevailing wage for the county in which the public works project is located.

(4) In the implementation and enforcement of RCW 39.12.050 the terms "contractor" and "subcontractor" include an entity, however organized, with substantially identical corporate and/or operational structure to an entity that has been found to violate RCW 39.12.050. The factors used to determine substantial identity shall include an assessment of whether there is: Substantial continuity of the same business operation; use of the same machinery and/or equipment; similarity of jobs and types of working conditions; continuity of supervisors; and similarity of product or services.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270, 92-01-104, § 296-127-020, filed 12/18/91, effective 1/31/92. Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020, 86-03-063 (Order 85-28), § 296-127-020, filed 1/17/86. Statutory Authority: RCW 39.12.015, 39.12.060 and HB 795, 1982 1st ex.s. c 38, 82-18-041 (Order 82-28), § 296-127-020, filed 8/27/82.]

WAC 296-127-021 Apprentice worker. Any apprentice employed on public works projects for whom an apprenticeship agreement is registered and approved by the state apprenticeship council pursuant to chapter 49.04 RCW within 60 days of hiring may be considered an apprentice and paid the applicable prevailing hourly rate for an apprentice of that trade for all hours worked.

[Statutory Authority: RCW 39.12.015, 39.12.060 and House Bill 795, 1982 1st ex.s. c 38, 82-18-041 (Order 82-28), § 296-127-021, filed 8/27/82.]

WAC 296-127-022 Overtime according to RCW 49.28.065. (1) Work performed on public works contracts will not require the payment of overtime rates for the first two hours worked in excess of eight hours per day when the employer and employee voluntarily enter into an agreement wherein the employee will work up to ten hours per day in a four-day week to accomplish forty hours of work.

(2) Recognizing that there may be days when a full ten hours of work is not available, the remainder of the forty hours may be made up on another work day or days within the same work week, except work performed on Saturdays, Sundays, and holidays is subject to the established prevailing overtime provisions for a given trade or occupation, as provided in chapter 39.12 RCW.

(3) For the purpose of this section an agreement must:

(a) Have been authorized by employees who bargained collectively with their employers through representatives of their own choosing; or

(b) Be obtained in writing, signed, and dated by both parties; and

(c) Be entered into individually with each employee; and

(d) Be entered into separately for each public works project, except that an employer, at its option, may obtain an annual authorization; and

(e) State the name of the public works project with specificity; and

(f) Be entered into voluntarily by the employer and employee.

(4) Each employer must retain copies of the individual employee authorization agreements required pursuant to subsection (3) of this section for three years from the date of

acceptance of the public works project by the contract awarding agency. Absence of an authorization record for an employee shall be deemed per se evidence of lack of that employee's authorization. Such records are payroll records, subject to the requirements of WAC 296-127-320.

(5) It is prohibited to work more than ten hours in any calendar day on a public works project except in cases of extraordinary emergency, such as danger to life or property.

(6) Notwithstanding the above provisions, overtime rates must be paid for all hours worked in excess of forty hours per week.

(7) This section provides a minimum public works overtime standard, and does not supersede prevailing overtime wage rates established under the authority of chapter 39.12 RCW.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 92-01-104, § 296-127-022, filed 12/18/91, effective 1/31/92. Statutory Authority: RCW 43.22.270. 88-19-055 (Order 88-21), § 296-127-022, filed 9/15/88.]

WAC 296-127-023 Building service maintenance.

The "public building service maintenance contracts" referred to in RCW 39.12.020 shall mean janitorial service contracts and cover only work performed by janitors, waxers, sham-pooers, and window cleaners.

For all building service maintenance contracts, the prevailing wage rates which are in effect on the date when the bids are required to be submitted to the contract awarding public agency are the minimum prevailing wage rates which must be paid for the first year of such contracts and thereafter. However, any building service maintenance contract of more than one year duration, must include wage increase language recognizing the potential for future variance in applicable prevailing wage(s) and specifying that the wages which a contractor shall pay its employees must be altered annually to recognize and follow the most recently promulgated increases in prevailing wages each year after the first year of the contract period. The cost of the increases in the wages due employees shall be borne by the contract awarding agency.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 88-22-046 (Order 88-22), § 296-127-023, filed 10/31/88.]

WAC 296-127-025 Applicability of joint federal-state standards. (1) When a public works project is subject to the provisions of the Washington state public works law, chapter 39.12 RCW, and the Federal Davis-Bacon and related acts, the contractor and every subcontractor on that project must pay at least the Washington state prevailing wage rates, if they are higher than the federal prevailing wage rates for the project unless specifically preempted by federal law.

(2) When the federal prevailing wage rates are higher than the Washington state prevailing wage rates, the contractor shall pay the federal rate as required by federal law.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 92-01-104, § 296-127-025, filed 12/18/91, effective 1/31/92; 88-22-046 (Order 88-22), § 296-127-025, filed 10/31/88.]

WAC 296-127-026 Exemptions for sole owners and their spouses, partnerships, corporations, and employees

[Title 296 WAC—p. 2086]

of public agencies. The prevailing wage requirements of chapter 39.12 RCW do not apply to:

(1) Sole owners and their spouses.

(2) Any partner who owns at least thirty percent of a partnership.

(3) The president, vice-president and treasurer of a corporation if each one owns at least thirty percent of the corporation.

(4) Workers regularly employed on monthly or per diem salary by the state or any political subdivision created by its laws.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 88-22-046 (Order 88-22), § 296-127-026, filed 10/31/88.]

WAC 296-127-030 Irrigation district exemption.

Contracts awarded by irrigation districts for the reclamation or development of waste or undeveloped lands are not covered by the prevailing wage law, pursuant to RCW 39.04.010. Any work, construction alteration, repair or improvement that is not solely for the reclamation or development of waste or undeveloped land is covered by the prevailing wage laws and therefore subject to all the laws and regulations contained in and adopted pursuant to chapter 39.12 RCW.

[Statutory Authority: RCW 39.12.015, 39.12.060 and House Bill 795, 1982 1st ex.s. c 38. 82-18-041 (Order 82-28), § 296-127-030, filed 8/27/82.]

WAC 296-127-040 Statement of intent to pay prevailing wages. (1) All statements of intent to pay prevailing wages submitted to the industrial statistician of the department shall be accompanied by a fee of twenty-five dollars for each statement. Fees shall be made payable to the department of labor and industries.

(2) Any agency, division, or department of the state of Washington which through agreement with the department certifies statements of intent for its own contracts shall provide to the industrial statistician each month the number of statements of intent certified and quarterly shall send a fee of twenty dollars for each statement of intent to pay prevailing wages it has certified. This fee shall be sent to the industrial statistician and be made payable to the department of labor and industries.

[Statutory Authority: RCW 39.12.070. 94-01-100, § 296-127-040, filed 12/16/93, effective 1/16/94. Statutory Authority: RCW 43.22.270. 90-24-053, § 296-127-040, filed 12/3/90, effective 1/3/91. Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 88-22-046 (Order 88-22), § 296-127-040, filed 10/31/88. Statutory Authority: RCW 39.12.015, 39.12.060 and House Bill 795, 1982 1st ex.s. c 38. 82-18-041 (Order 82-28), § 296-127-040, filed 8/27/82.]

WAC 296-127-045 Affidavit of wages paid. (1) All affidavits of wages paid submitted to the industrial statistician of the department shall be accompanied by a fee of twenty-five dollars for each affidavit of wages paid. All fees shall be made payable to the department of labor and industries.

(2) Any agency, division, or department of the state of Washington which through agreement with the department certifies affidavits of wages paid for its own contracts shall provide to the industrial statistician each month the number

of affidavit of wages paid it has certified and quarterly shall send a fee of twenty dollars for each affidavit of wages paid it has certified. This fee shall be sent to the industrial statistician and be made payable to the department of labor and industries.

[Statutory Authority: RCW 39.12.070, 94-01-100, § 296-127-045, filed 12/16/93, effective 1/16/94. Statutory Authority: RCW 43.22.270, 90-24-053, § 296-127-045, filed 12/3/90, effective 1/3/91. Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270, 88-22-046 (Order 88-22), § 296-127-045, filed 10/31/88. Statutory Authority: RCW 39.12.015, 39.12.060 and House Bill 795, 1982 1st ex.s. c 38, 82-18-041 (Order 82-28), § 296-127-045, filed 8/27/82.]

WAC 296-127-050 Filing of statements of intent to pay prevailing wages and affidavits of wages paid for contracts under two thousand five hundred dollars. A contract awarding agency may, as part of a public works contract, enter into an agreement with a contractor to approve statements of intent to pay prevailing wages and affidavits of wages paid on behalf of the department for contracts wherein the total amount does not exceed two thousand five hundred dollars as provided in RCW 39.12.040(2), pursuant to the following terms:

(1) The agreement must be incorporated into the bid specifications and contract document;

(2) Statement of intent forms and affidavit of wages paid forms, provided by the department, must be filed with the contract awarding agency by the contractor prior to the disbursement of public funds;

(3) Contract awarding agencies must retain copies of all statements of intent to pay prevailing wages received pursuant to this section for a period of not less than three years;

(4) Contract awarding agencies must send to the department copies of all affidavits of wages paid received pursuant to this section within thirty days of receipt from the contractor;

(5) The contract awarding agency shall accept full responsibility and liability for payment of any valid wage claims directly to the claimant;

(6) The contract awarding agency may proceed against any contractor found to have violated the provisions of the statute, and may debar such contractor from consideration for future contracts for up to one year and will provide the department with the names and contractor registration or other employer identification numbers of any such debarred contractors within thirty days of the debarment; and

(7) Contract awarding agencies and contractors shall not enter into contracts or agreements to perform public work that subdivide or otherwise disaggregate any public works project of more than two thousand five hundred dollars, to enable such public works project to be awarded pursuant to this section.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270, 92-01-104, § 296-127-050, filed 12/18/91, effective 1/31/92.]

WAC 296-127-060 Director of department of labor and industries to arbitrate disputes—General provisions.

(1) The contract executed between a public authority and the successful bidder or contractor and all of his subcontractors shall contain a provision that in case any dispute arises as to

(2001 Ed.)

what are the prevailing rates of wages for a specific trade, craft or occupation and such dispute cannot be adjusted by the parties in interest, including labor and management representatives, the matter shall be referred for arbitration to the director, and his decision shall be final, conclusive, and binding on all parties involved in the dispute.

(2) In exercising his authority to hear and decide disputes the director shall consider among other things, timeliness, the nature of the relief sought, matters of undue hardship or injustice, or public interest. A "timely" request for arbitration is one received within 30 days after the contract has been awarded.

(3) Any party in interest who is seeking a modification or other change in a wage determination under RCW 39.12.015, and who has requested the industrial statistician to make such modification or other change and the request has been denied, after appropriate reconsideration by the assistant director shall have a right to petition for arbitration of the determination.

(a) For purpose of this section, the term "party in interest" is considered to include, without limitation:

(i) Any contractor, or an association representing a contractor, who is likely to seek or to work under a contract containing a particular wage determination, or any worker, laborer or mechanic, or any council of unions or any labor organization which represents a laborer or mechanic who is likely to be employed or to seek employment under a contract containing a particular wage determination, and

(ii) Any public agency concerned with the administration of a proposed contract or a contract containing a particular wage determination issued pursuant to chapter 39.12 RCW.

(b) For good cause shown, the director may permit any party in interest to intervene or otherwise participate in any proceeding held by the director. A petition to intervene or otherwise participate shall be in writing, and shall state with precision and particularity:

(i) The petitioner's relationship to the matters involved in the proceedings, and

(ii) The nature of the presentation which he would make. Copies of the petition shall be served on all parties or interested persons known to be participating in the proceeding, who may respond to the petition. Appropriate service shall be made of any response.

[Statutory Authority: RCW 39.12.015, 39.12.060 and House Bill 795, 1982 1st ex.s. c 38, 82-18-041 (Order 82-28), § 296-127-060, filed 8/27/82.]

WAC 296-127-061 Requests for arbitration. (1) The petition for arbitration (original and four copies) shall be filed with Director, Department of Labor and Industries, General Administration Building, Olympia, Washington 98504. In addition, copies of the petition shall be served personally or by mail upon each of the following:

(a) The public agency or agencies involved,

(b) The industrial statistician, and

(c) Any other person (or the authorized representatives of such person) known to be interested in the subject matter of the petition.

(2) The director shall under no circumstances request any administering agency to postpone any contract perfor-

mance because of the filing of a petition. This is a matter which must be resolved directly with the administering agency by the petitioner or other party in interest.

(3) A petition for arbitration of a wage determination shall:

(a) Be in writing and signed by the petitioner or his counsel (or other authorized representative), and

(b) Identify clearly the wage determination, location of project or projects in question, and the agency concerned, and

(c) State that the petitioner has requested reconsideration of the wage determination in question and describe briefly the action taken in response to the request, and

(d) Contain a short and plain statement of the grounds for review, and

(e) Be accompanied by supporting data, views, or arguments, and

(f) Be accompanied by a filing fee of \$75.00. Fees shall be made payable to the department of labor and industries.

[Statutory Authority: RCW 39.12.015, 39.12.060 and House Bill 795, 1982 1st ex.s. c 38. 82-18-041 (Order 82-28), § 296-127-061, filed 8/27/82.]

WAC 296-127-062 Conduct of arbitration hearing.

(1) Interested persons other than the petitioner shall have a reasonable opportunity as specified by the director in particular cases to submit to the director written data, views, or arguments relating to the petition. Such material (original and four copies) shall be filed with the Director, Department of Labor and Industries, General Administration Building, Olympia, Washington 98504 and be accompanied by a filing fee of \$35.00. Fees shall be made payable to the department of labor and industries. Copies of any such material shall be served on the petitioner and other interested persons.

(2) Each party in interest shall have the right to appear in person or by or with counsel or other qualified representatives in any proceeding before the director. If all parties agree, oral testimony may be waived and arguments submitted in writing.

(3) Upon his own initiative or upon motion of any interested person or party, the director may consolidate in any proceeding or concurrently consider two or more appeals which involve substantially the same persons or parties, or issues which are the same or closely related, if he finds that such consolidation or concurrent review will contribute to an efficient review and to the ends of justice, and it will not unduly delay consideration of any such appeals.

(4) The director shall prescribe the time and place for hearing. The director shall schedule the hearing within 45 days of the request. For good cause shown, the director may allow a continuance at the request of a party in interest.

(a) With respect to any proceeding before him, the director may upon his own initiative or upon the request of any interested person or party direct the interested persons or parties to appear before the director at a specified time and place in order to simplify the issues presented or to take up any other matters which may tend to expedite or otherwise facilitate the disposition of the proceeding.

(b) All papers submitted to the director under this section shall be filed with the Department of Labor and Industries, General Administration Building, Olympia, Washington 98504. An original and four copies of all papers shall be sub-

mitted. Service under this part shall be by the filing party or interested person; service may be personal or may be by mail. Service by mail is complete on mailing.

(5) The final disposition shall be by the director.

(a) The director may decline review of any case whenever in his judgment a review would be inappropriate or because of the lack of timeliness, the nature of the relief sought, or other reasons.

(b) The director shall decide the case upon the basis of all relevant matter contained in the entire record before him but the director may utilize his experience, technical competence, and specialized knowledge in evaluating the evidence.

(c) Upon reasonable notice to the parties or interested persons, the director may vary the procedures specified in this part in particular cases.

(6) The director may allow all parties a period of ten days for filing post-hearing briefs prior to closing the record and concluding the hearing.

(7) The director shall issue a written decision within 30 days of the conclusion of the hearing. A copy shall be sent to each party in interest.

[Statutory Authority: RCW 39.12.015, 39.12.060 and House Bill 795, 1982 1st ex.s. c 38. 82-18-041 (Order 82-28), § 296-127-062, filed 8/27/82.]

WAC 296-127-130 Filing of complaint. Any interested party, as defined in RCW 39.12.010(4) may file with the department a complaint alleging a violation of the prevailing wage laws. The complaint must describe the alleged violation and identify the alleged violator. It would aid the department's investigation if the complaint also specifies:

(1) The name and address of the complainant;

(2) The address of the alleged violator;

(3) The name and address of the public agency that awarded the contract;

(4) The date the public agency accepted the completed public work (if applicable);

(5) The specific rates of wages paid by the violator and the rates that allegedly should be paid;

(6) The exact amount of prevailing wages that are alleged to remain unpaid; and

(7) The date the bids were due on the public works project.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020. 86-03-063 (Order 85-28), § 296-127-130, filed 1/17/86.]

WAC 296-127-140 Investigation of complaint. (1) The department shall investigate a complaint filed by an interested party unless the complaint was filed more than thirty days after the date the public agency accepted the public work that gave rise to the complaint. The department may, in its sole discretion, investigate a complaint filed more than thirty days after the acceptance date. However, the department may not charge a contractor with a violation of RCW 39.12.065 if the complaint is filed after the thirty-day limit.

The department's investigation shall determine whether a violation of RCW 39.12.065 or 39.12.050, or both, or of any other provision of chapter 39.12 RCW, occurred.

(2) If the department's investigation substantiates a complaint that alleges that a contractor has violated RCW 39.12.065, the department is required to attempt to collect

unpaid wages for the contractor's employees. During the investigation, the department should be able to identify the affected employees. The department shall direct to the affected employees the best notice practicable under the circumstances, including individual notice to all employees who can be identified through reasonable effort. The notice shall inform the employee that (a) the department's final order, whether favorable or not, will apply to all employees; (b) any employee may, if he or she desires, move to intervene as a party in any hearing held as a result of the investigation; and (c) that the employee may have a private right of action to collect unpaid prevailing wages.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020, 86-03-063 (Order 85-28), § 296-127-140, filed 1/17/86.]

WAC 296-127-150 Notice of violation. (1) If the department determines after its investigation that there is reasonable cause to believe that the prevailing wage law has been violated, the department shall notify the violator of its determination. The notice of violation shall be served on the violator personally or by certified mail.

(2) The notice of violation shall:

- (a) Describe concisely the violation;
- (b) Specify which statute or statutes were violated;
- (c) If known, identify the laborers, workers, and mechanics who are affected by the violation;
- (d) If known, state the amount of unpaid prevailing wages the violator owes;
- (e) State that an employee cannot by contract or agreement waive the right to receive the prevailing wage;
- (f) State the penalty that the department will assess for a violation, if any, of RCW 39.12.065 and 39.12.050; and
- (g) State the date the complaint was filed with the department.

(3) RCW 39.12.065 and 39.12.050 establish the penalty amounts.

(4) If the notice alleges a violation of RCW 39.12.065, the department shall serve a copy of the notice of violation on the violator's sureties under chapters 39.08, 18.27, 19.28, and 60.28 RCW.

(5) The notice of violation shall inform the violator and, if a violation of RCW 39.12.065 is alleged, its sureties that they may request a hearing on the violations, the amount of unpaid prevailing wages owed, or the penalties assessed. The notice shall specify that if no hearing is requested within thirty days of the date of issuance of the notice the director shall issue a final, unappealable order finding that the violation did occur, ordering the violator to pay any unpaid prevailing wages, and assessing penalties.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020, 86-03-063 (Order 85-28), § 296-127-150, filed 1/17/86.]

WAC 296-127-160 Appeal of notice of violation. The violator or any of its sureties who are interested in the matter may request a hearing on a notice of violation. One original and four copies of the request must be filed with the director within thirty days after the date the department issued the notice. The party requesting the hearing must also serve a copy of the notice on all interested sureties and, if the requestor is a surety, on the violator.

(2001 Ed.)

The request for hearing must be in writing and must specify:

- (1) The name and address of the party requesting the hearing;
- (2) The notice of violation that is being appealed;
- (3) The items of the notice of violation that the requestor believes are erroneous; and
- (4) The reasons the notice of violation is erroneous.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020, 86-03-063 (Order 85-28), § 296-127-160, filed 1/17/86.]

WAC 296-127-170 Hearing on notice of violation. (1) The director may hear the appeal personally or may delegate the authority to hold the hearing and draft a proposed decision to an administrative law judge pursuant to chapter 34.12 RCW. The plaintiff in the hearing shall be the department, and the defendants shall be the violator and its interested sureties. The department shall have the burden of proving, by a preponderance of the evidence, that the violations occurred and that any wages were unpaid as stated in the notice.

(2) Any interested party may upon motion, be allowed to intervene as a plaintiff in the hearing. "Standing" shall be construed broadly to effectuate the remedial purposes of the prevailing wage law. An interested party, whether or not admitted as a plaintiff, may submit written arguments and affidavits. The parties shall be given an opportunity to respond to or rebut any arguments and affidavits before the person presiding over the hearing makes his or her decision.

(3) The hearing shall be conducted in accordance with the Uniform procedure rules, chapter 1-08 WAC.

(4) If the director presides over the hearing, the director shall issue a final decision that includes findings of fact and conclusions of law, and if appropriate an order to pay unpaid prevailing wages, a penalty, or both.

(5) If an administrative law judge presides over the hearing, she or he shall issue a proposed decision that includes findings of fact, conclusions of law, and if appropriate an order to pay unpaid prevailing wages, a penalty, or both. The proposed decision shall be served by certified mail or personally on the violator, the interested sureties, the department, and any interested parties who have intervened as plaintiffs. Any of these parties, if aggrieved by the proposed decision, may appeal to the director within thirty days after the date of issuance of the proposed decision. If none of the parties appeals within thirty days, the proposed decision may not be appealed either to the director or the courts.

(6) An appellant must file with the director an original and four copies of its notice of appeal. The notice of appeal must specify which findings and conclusions are erroneous. The appellant must attach to the notice the written arguments supporting its appeal.

The appellant must serve a copy of the notice of appeal and the arguments on the other parties. The respondent parties must file with the director their written arguments within thirty days after the date the notice of appeal and the arguments were served upon them.

(7) The director shall review the proposed decision in accordance with the Administrative Procedure Act, chapter 34.04 RCW. The director may: Allow the parties to present oral arguments as well as the written arguments; require the

parties to specify the portions of the record on which the parties rely; require the parties to submit additional information by affidavit or certificate; remand the matter to the administrative law judge for further proceedings; and require a departmental employee to prepare a summary of the record for the director to review. The director shall issue a final decision that can affirm, modify, or reverse the proposed decision.

(8) The director shall serve the final decision on all parties. Any aggrieved party may appeal the final decision to superior court pursuant to RCW 34.04.130 unless the final decision affirms an unappealed proposed decision. If no party appeals within the period set by RCW 34.04.130, the director's decision is conclusive and binding on all parties.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020. 86-03-063 (Order 85-28), § 296-127-170, filed 1/17/86.]

WAC 296-127-180 Effect of final decision finding a violation of RCW 39.12.065. If the director issues a final decision that includes a finding that a contractor violated RCW 39.12.065 and that the contractor owes unpaid prevailing wages, and the finding is not timely appealed or is affirmed by the courts, the findings and the decision are res judicata in any action by the department or by any interested party who was a plaintiff at the hearing, against the contractor and its sureties to recover the unpaid prevailing wages. The findings and decision are not res judicata in any action by an interested party who was not a plaintiff at the hearing.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020. 86-03-063 (Order 85-28), § 296-127-180, filed 1/17/86.]

WAC 296-127-190 Filing of lien against retainage or bonds. (1) Upon receipt of a timely complaint that a contractor has violated RCW 39.12.065, and that the contractor owes unpaid prevailing wages, the department may file a lien against the retainage or bond obtained by the contractor under RCW 60.28.010.

(2) Upon issuance by the director of a final decision that finds that a contractor has violated RCW 39.12.065 or 39.12.050, and that sets a civil penalty for the violation, the department shall file liens for the penalty amount against the retainage and bonds the contractor obtained under RCW 39.12.065 (2)(c), 39.08.010, and 60.28.010.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020. 86-03-063 (Order 85-28), § 296-127-190, filed 1/17/86.]

WAC 296-127-200 Surety bond payable to director. (1) RCW 39.12.065 (2)(c) authorizes the director to require a contractor to obtain a surety bond "running to the director in the amount of the violation found." The intent and wording indicates that the director may require such a bond only after issuing a final decision finding that the contractor has violated RCW 39.12.065.

(2) The director may demand that a violating contractor post the bond when:

(a) The director has issued a final decision that finds that the contractor owes unpaid prevailing wages or a penalty, whether or not the decision has been appealed to the courts; and

(b) The retainage or bonds provided under RCW 60.28.010, 18.27.040, and 19.28.120 are or may be insufficient to pay the amount of prevailing wages or the penalty owed.

(3) A contractor may at any time voluntarily obtain a bond running to the director to guarantee the payment of the prevailing wages and any penalty. The contractor may allow the director to satisfy any claim for unpaid wages or the penalty from this bond instead of from the retainage or bonds obtained under RCW 60.28.010, 18.27.040, 19.28.120, and 39.08.010.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020. 86-03-063 (Order 85-28), § 296-127-200, filed 1/17/86.]

WAC 296-127-210 Suit against retainage and bonds. (1) If the director issues a final decision that includes a finding that the contractor has violated RCW 39.12.065 or 39.12.050, and the finding is not timely appealed or is affirmed by the courts, the department may file suit against the appropriate retainage and bonds to recover the amount of unpaid prevailing wages or the civil penalty.

(2) The department may, before issuance of a final decision, file suit against the appropriate retainage and bonds to recover unpaid prevailing wages if the filing of a suit is necessary to preserve the claim. The suit shall be held in abeyance pending the exhaustion of administrative remedies.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020. 86-03-063 (Order 85-28), § 296-127-210, filed 1/17/86.]

WAC 296-127-220 Distribution of recovery. (1) Upon making a recovery pursuant to RCW 39.12.065(2) against a contractor's retainage or bonds, the department shall distribute the proceeds and any award of attorneys' fees and costs as follows:

(a) The recovery shall be paid to the employees of the violator who did not receive the correct prevailing wage. The distribution among employees shall be based on the evidence of wage loss produced at the hearing on the violation.

(b) Next shall be paid the costs the department incurred in making the recovery. The department shall pay these costs from the attorney's fees and costs awarded by the courts.

(2) A contractor who is the subject of an investigation or who has received a notice of violation may choose not to contest the matter and may tender to the department the amount of unpaid prevailing wages the department determines is owed. The department, after identifying and notifying the affected employees pursuant to WAC 296-127-140, shall accept the tender if the contractor in writing acknowledges that the department, by accepting the tendered amount, does not absolve the contractor from liability to any employee for unpaid prevailing wages.

(3) If an employee for whom the department has recovered unpaid prevailing wages cannot be found, the department shall retain the wages for the one-year period required by RCW 63.29.150. After the statutory period has lapsed, the department shall pay the wages to the department of revenue in accordance with RCW 63.29.170.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020. 86-03-063 (Order 85-28), § 296-127-220, filed 1/17/86.]

WAC 296-127-300 Filing and service. All papers required to be filed with the director under this chapter or chapter 39.12 RCW shall be addressed to Director, Department of Labor and Industries, General Administration Building, Olympia, WA. 98504.

Filing and service shall be made as allowed by WAC 1-08-090 through 1-08-140.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020. 86-03-063 (Order 85-28), § 296-127-300, filed 1/17/86.]

WAC 296-127-310 List of violators. The department shall maintain a list of all contractors who are forbidden to bid on a public works project, or to have a bid accepted, pursuant to RCW 39.12.065(3) or 39.12.050. To the extent required by RCW 39.12.065(3) and 39.12.050, the industrial statistician shall refuse to certify any statement of intent to pay the prevailing wage or affidavit of wages paid that he or she determines was submitted by a contractor on the list. Because the department receives a large number of requests for certification, the department shall not be liable to any person or entity for certifying a statement or an affidavit of a contractor on the list.

The industrial statistician shall make the list available upon request.

[Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020. 86-03-063 (Order 85-28), § 296-127-310, filed 1/17/86.]

WAC 296-127-320 Payroll. (1) Each contractor shall keep accurate payroll records for three years from the date of acceptance of the public works project by the contract awarding agency, showing the name, address, Social Security number, trade or occupation, straight time rate, hourly rate of usual benefits as defined by WAC 296-127-014(1), and overtime hours worked each day and week, including any employee authorizations executed pursuant to WAC 296-127-022, and the actual rate of wages paid, for each laborer, worker, and mechanic employed by the contractor for work performed on a public works project.

(2) A contractor shall, within ten days after it receives a written request, from the department or from any interested party as defined by RCW 39.12.010(4), file a certified copy of the payroll records with the agency that awarded the public works contract and with the department.

(3) A contractor's noncompliance with this section shall constitute a violation of RCW 39.12.050.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 92-01-104, § 296-127-320, filed 12/18/91, effective 1/31/92. Statutory Authority: RCW 39.12.050, 39.12.065, 43.22.270 and 51.04.020. 86-03-063 (Order 85-28), § 296-127-320, filed 1/17/86.]

WAC 296-127-400 Applicability. WAC 296-127-400 through 296-127-470 are issued pursuant to RCW 39.12.022, authorizing the director of the department of labor and industries, to the extent necessary in order to prevent curtailment of opportunities for employment, to issue special subprevailing wage certificates for employment of individuals whose earning capacity is impaired by physical or mental deficiency or injury at wages lower than the prevailing rate applicable under RCW 39.12.020. Subprevailing wage certificates shall be subject to the conditions prescribed in these regulations.

(2001 Ed.)

[Statutory Authority: RCW 39.12.022. 90-19-061, § 296-127-400, filed 9/17/90, effective 10/18/90.]

WAC 296-127-410 Definitions. For the purposes of WAC 296-127-400 through 296-127-470:

(1) "Developmental disability" means a disability attributable to mental retardation, cerebral palsy, epilepsy, autism, or another neurological or other condition of an individual found by the secretary of social and health services to be closely related to mental retardation or to require treatment similar to that required for individuals with mental retardation, which disability originates before the individual attains age eighteen, which has continued or can be expected to continue indefinitely, and which constitutes a substantial handicap to the individual.

(2) "Handicapped worker" means an individual whose earning capacity for the work to be performed is impaired by physical or mental deficiency or injury.

(3) "Prevailing rate" means the prevailing rate of wage as defined in RCW 39.12.010 and as determined by the industrial statistician.

[Statutory Authority: RCW 39.12.022. 90-19-061, § 296-127-410, filed 9/17/90, effective 10/18/90.]

WAC 296-127-420 Application for a subprevailing wage certificate. (1) Nonprofit vocational rehabilitation programs may apply for a subprevailing wage certificate authorizing the employment of one or more handicapped workers with a developmental disability at less than the prevailing rate. An application for each worker shall be filed with the office of the industrial statistician not less than annually upon forms approved by the director or an authorized representative of the director.

(2) The application shall be signed jointly by the employer, the handicapped worker for whom such application is being made, and by the parent or guardian of the handicapped worker except as otherwise authorized by the director or an authorized representative of the director.

[Statutory Authority: RCW 39.12.022. 90-19-061, § 296-127-420, filed 9/17/90, effective 10/18/90.]

WAC 296-127-430 Conditions for granting a subprevailing wage certificate. (1) A subprevailing wage certificate may be issued to a nonprofit vocational rehabilitation program if the application is in proper form and sets forth facts showing:

(a) A wage below prevailing rate is necessary to prevent curtailment of the handicapped worker's opportunities for employment;

(b) The handicap impairs the earning capacity of the worker for the work to be performed;

(c) The percentage of full productivity at which the handicapped worker functions; and

(d) A description of the duties to be performed by each handicapped worker;

(e) The nature of the disability; and

(f) An addendum containing a detailed explanation of the nature of the disability.

(2) The industrial statistician shall not require a nonprofit vocational rehabilitation program to provide the information

required in subsection (1)(f) of this section if it provides a notarized copy of a federal certificate granted by the United States department of labor under section 14(c) of the Federal Fair Labor Standards Act and any documentation deemed necessary by the industrial statistician identifying the workers with a developmental disability, a description of the duties to be performed, and the percentage of productivity at which each worker functions.

(3) The director or an authorized representative of the director may require the submission of additional information to that required by subsection (1) or (2) of this section shown on the application and may require the handicapped worker to take a medical examination where it is deemed necessary in order to determine whether or not the issuance of a certificate is justified.

[Statutory Authority: RCW 39.12.022. 90-19-061, § 296-127-430, filed 9/17/90, effective 10/18/90.]

WAC 296-127-440 Issuance of a subprevailing wage certificate. If the application and other available information indicate that the requirements of this regulation are satisfied, the director or an authorized representative of the director may issue a subprevailing wage certificate. If issued, copies of the subprevailing wage certificate shall be mailed to the employer, the handicapped worker, and to the parent or guardian of the handicapped worker. If denied, the employer, the handicapped worker, and the parent or guardian of the handicapped worker shall be given written notice of the denial.

[Statutory Authority: RCW 39.12.022. 90-19-061, § 296-127-440, filed 9/17/90, effective 10/18/90.]

WAC 296-127-450 Terms of subprevailing wage certificate. (1) A subprevailing wage certificate shall specify, among other things, the names of the handicapped workers, the name of the employer, the duties to be performed by the handicapped worker, the percentage of the prevailing rate authorized to be paid, and the period of time during which that percentage of the prevailing rate may be paid. A certificate shall also indicate that the percentage of the prevailing rate to be paid a handicapped worker shall change to reflect an increase or decrease in the worker's productivity when the worker's productivity is determined to change.

(2) A subprevailing wage certificate shall be effective for a period of one year or less as designated by the director or an authorized representative of the director. A handicapped worker employed under such certificate may be paid at the specified percentage of the prevailing rate only during the effective period of the certificate.

(3) Notwithstanding the requirements of chapter 49.46 RCW and its administrative regulations, the percentage of the prevailing rate authorized to be paid shall be fixed at a figure designed to reflect adequately the percentage of productivity at which the handicapped worker functions.

(4) Any money received by a handicapped worker by reason of any state or federal pension or compensation program for handicapped persons shall not be considered as offsetting any part of the wage or remuneration due the handicapped worker by the employer.

[Title 296 WAC—p. 2092]

(5) A handicapped worker shall be paid not less than one and one-half times the rate specified in the subprevailing wage certificate for hours worked in excess of forty hours per workweek or eight hours per day.

(6) The terms of any subprevailing wage certificate, including the percentage of the prevailing rate authorized to be paid, may be amended by the director or an authorized representative of the director upon written notice to the parties concerned, if the facts justify such amendment.

[Statutory Authority: RCW 39.12.022. 90-19-061, § 296-127-450, filed 9/17/90, effective 10/18/90.]

WAC 296-127-460 Renewal of subprevailing wage certificate. Application for renewal of any subprevailing wage certificate shall be filed in the same manner as an original application. An application for renewal shall include the most recent evaluation conducted within the past year of the productivity level at which the handicapped worker functions. If such application has been filed prior to the expiration date of the certificate, the certificate shall remain in effect until the application for renewal has been granted or denied.

[Statutory Authority: RCW 39.12.022. 90-19-061, § 296-127-460, filed 9/17/90, effective 10/18/90.]

WAC 296-127-470 Review. Any person aggrieved by any action of the director or an authorized representative of the director taken pursuant to this regulation may, within fifteen days after notice of such action has been mailed, file with the director a petition for review of the action complained of, setting forth grounds for seeking such review. If reasonable grounds exist, the director or an authorized representative of the director may grant such review and to the extent deemed appropriate afford all interested persons an opportunity to be heard on such review.

[Statutory Authority: RCW 39.12.022. 90-19-061, § 296-127-470, filed 9/17/90, effective 10/18/90.]

WAC 296-127-990 Severability. If any provision of this chapter or its application to any persons or circumstances is held invalid by state or federal court, the remainder of the chapter or the application of the provision to other persons or circumstances is not affected.

[Statutory Authority: Chapters 39.04 and 39.12 RCW and RCW 43.22.270. 92-01-104, § 296-127-990, filed 12/18/91, effective 1/31/92.]

	DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER		
		296-128-446	Minor work permits. [Order 71-5, § 296-128-446, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
296-128-410	Counselor staff occupations in organized seasonal recreational camps—Women and minors. [Industrial Welfare Order 11-63, filed 9/13/63; Minimum Wage and Welfare Order 54, filed 3/23/60.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.	296-128-4461	Posting of order. [Order 71-5, § 296-128-4461, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
296-128-415	Food processing industry—Women and minors. [Industrial Welfare Order 5-62, filed 11/25/64; Minimum Wage and Welfare Order 51, filed 3/23/60.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.	296-128-4462	Separability. [Order 71-5, § 296-128-4462, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
296-128-420	Fresh fruit and vegetable packing industry—Women and minors. [Industrial Welfare Order 6-62, filed 11/25/64; Minimum Wage and Welfare Order 52, filed	296-128-4463	Penalties. [Order 71-5, § 296-128-4463, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.

- 296-128-450 Office workers—Women and minors. [Industrial Welfare Order 13-63, filed 11/25/64; Minimum Wage Order 43, filed 3/23/60; Statement of interpretation of applicability of Industrial Welfare Committee Order 13-63, office workers, filed 11/25/64.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-455 Personal service industry—Women and minors. [Industrial Welfare Order 4-62, filed 11/25/64.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-460 Public housekeeping industrial—Women and minors. [Order 71-5 (Industrial Welfare Order No. 9-71), § 296-128-460, filed 5/26/71, effective 7/1/71; Industrial Welfare Order 9-62, filed 11/25/64; Minimum Wage Order 46, filed 3/23/60.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4601 Applicability. [Order 71-5, § 296-128-4601, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4602 Definitions. [Order 71-5, § 296-128-4602, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4603 Minimum wages. [Order 71-5, § 296-128-4603, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4604 Deductions. [Order 71-5, § 296-128-4604, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4605 Statements furnished. [Order 71-5, § 296-128-4605, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4606 Records. [Order 71-5, § 296-128-4606, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4607 Meals and lodging. [Order 71-5, § 296-128-4607, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4608 Meal and rest periods. [Order 71-5, § 296-128-4608, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4609 Working conditions. [Order 71-5, § 296-128-4609, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-461 Uniforms. [Order 71-5, § 296-128-461, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4611 Minor work permits. [Order 71-5, § 296-128-4611, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4612 Posting of order. [Order 71-5, § 296-128-4612, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4613 Separability. [Order 71-5, § 296-128-4613, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-4614 Penalties. [Order 71-5, § 296-128-4614, filed 5/26/71, effective 7/1/71.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-465 Telephone and telegraph industry—Women and minors. [Industrial Welfare Order 12-63, filed 11/25/64; Minimum Wage and Welfare Order 53, filed 3/23/60.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.
- 296-128-470 Theatrical amusement and recreation industry—Women and minors. [Industrial Welfare Order 7-62, filed 11/25/64; Minimum Wage Order 45, filed 3/23/60.] Repealed by Order 77-32, filed 12/30/77. Later promulgation, see chapter 296-125 WAC.

RECORDKEEPING PROVISIONS

WAC 296-128-010 Records required. For all employees who are subject to RCW 49.46.020, employers shall be required to keep and preserve payroll or other records containing the following information and data with respect to each and every employee to whom said section of said act applies:

(1) Name in full, and on the same record, the employee's identifying symbol or number if such is used in place of name on any time, work, or payroll records. This shall be the same name as that used for Social Security record purposes;

(2) Home address;

(3) Occupation in which employed;

(4) Date of birth if under 18;

(5) Time of day and day of week on which the employee's workweek begins. If the employee is part of a workforce or employed in or by an establishment all of whose workers have a workweek beginning at the same time on the same day, a single notation of the time of the day and beginning day of the workweek for the whole workforce or establishment will suffice. If, however, any employee or group of employees has a workweek beginning and ending at a different time, a separate notation shall then be kept for that employee or group of employees;

(6) Hours worked each workday and total hours worked each workweek (for purposes of this section, a "workday" shall be any consecutive 24 hours);

(7) Total daily or weekly straight-time earnings or wages; that is, the total earnings or wages due for hours worked during the workday or workweek, including all earnings or wages due during any overtime worked, but exclusive of overtime excess compensation;

(8) Total overtime excess compensation for the workweek; that is, the excess compensation for overtime worked which amount is over and above all straight-time earnings or wages also earned during overtime worked;

(9) Total additions to or deductions from wages paid each pay period. Every employer making additions to or deductions from wages shall also maintain a record of the dates, amounts, and nature of the items which make up the total additions and deductions;

(10) Total wages paid each pay period;

(11) Date of payment and the pay period covered by payment;

(12) Employer may use symbols where names or figures are called for so long as such symbols are uniform and defined.

[Regulation 294.7.001 (part), filed 12/30/60.]

WAC 296-128-011 Special recordkeeping requirements. (1) In addition to the records required by WAC 296-128-010, employers who employ individuals as truck or bus drivers subject to the provisions of the Federal Motor Carrier Act shall maintain records indicating the base rate of pay, the overtime rate of pay, the hours worked by each employee for each type of work, and the formulas and projected work hours used to substantiate any deviation from payment on an hourly basis pursuant to WAC 296-128-012. The records

shall indicate the period of time for which the base rate of pay and the overtime rate of pay are in effect.

For the purposes of this section and WAC 296-128-012, "base rate of pay" means the amount of compensation paid per hour or per unit of work in a workweek of forty hours or less. A base rate of pay shall be established in advance of the work performed and may be based on hours or work units such as mileage, performance of specified duties, or a specified percentage of the gross proceeds charged for specified work. A base rate of pay shall not be established that will result in compensation at less than the minimum wage prescribed in RCW 49.46.020. "Overtime rate of pay" means the amount of compensation paid for hours worked within the state of Washington in excess of forty hours per week and shall be at least one and one-half times the base rate of pay.

(2) The records required by this section shall be made available by the employer at the request of the department. Any current or past employee may obtain copies of the formula, the base rate of pay, the overtime rate of pay, and that employee's records. Job applicants seeking employment by the employer as truck or bus drivers subject to the provisions of the Federal Motor Carrier Act, may obtain copies of the formula, the base rate of pay, and the overtime rate of pay.

[Statutory Authority: RCW 43.22.270, 49.46.130 and 1989 c 104, 89-22-120, § 296-128-011, filed 11/1/89, effective 12/2/89.]

WAC 296-128-012 Overtime for truck and bus drivers.

(1)(a) The compensation system under which a truck or bus driver subject to the provisions of the Federal Motor Carrier Act is paid shall include overtime pay at least reasonably equivalent to that required by RCW 49.46.130 for working within the state of Washington in excess of forty hours a week. To meet this requirement, an employer may, with notice to a truck or bus driver subject to the provisions of the Federal Motor Carrier Act, establish a rate of pay that is not on an hourly basis and that includes in the rate of pay compensation for overtime. An employer shall substantiate any deviation from payment on an hourly basis to the satisfaction of the department by using the following formula or an alternative formula that, at a minimum, compensates hours worked within the state of Washington in excess of forty hours per week at an overtime rate of pay and distributes the projected overtime pay over the average number of hours projected to be worked. The following formula is recommended for establishing a uniform rate of pay to compensate work that is not paid on an hourly basis and for which compensation for overtime is included:

1. Define work unit first. E.g., miles, loading, unloading, other.
2.
$$\frac{\text{Average number of work units}}{\text{per hour}} = \frac{\text{Average number of work units accomplished per week}}{\text{Average number of hours projected to be worked per week}}$$
3. Weekly Base Rate = Number of units per hour x 40 hours x base rate of pay

4. Weekly Overtime rate = $\frac{\text{Number of units per hour} \times \text{number of hours over 40} \times \text{overtime rate of pay}}$
5. Total weekly pay = Weekly base rate plus weekly overtime rate
6. Uniform rate of pay = $\frac{\text{Total weekly pay}}{\text{Total work units}}$

Example: A truck driver is paid on a mileage basis for a two hundred thirty mile trip performed about ten times a week. The base rate of pay is twenty cents a mile. The overtime rate of pay is thirty cents a mile. The average length of the trip is four and one-half hours.

1. $\frac{2300 \text{ mi.}}{\text{per week}} \div \frac{45 \text{ hours}}{\text{per week}} = \frac{51.1 \text{ miles}}{\text{per hour}}$
2. (a) 51.1 miles/hour times 40 hours times .20/ mile= \$408.80
 (b) 51.1 miles/hour times 5 hours= 255.5 miles
 (c) 255.5 miles times .30/mile= \$76.65
 (d) \$408.80 plus \$76.65= \$485.45 divided by 2300 miles= 21.1 cents mile

(b) In using a formula to determine a rate of pay, the average number of hours projected to be worked and the average number of work units accomplished per week shall reflect the actual number of hours worked and work units projected to be accomplished by persons performing the same type of work over a representative time period within the past two years consisting of at least twenty-six consecutive weeks.

(c) The department may evaluate alternative rates of pay and formulas used by employers in order to determine whether the rates of pay established under this section result in the driver receiving compensation reasonably equivalent to one and one-half times the base rate of pay for actual hours worked within the state of Washington in excess of forty hours per week.

(2) Where an employee receives a different base rate of pay depending on the type of work performed, the rate that is paid or used for hours worked within the state of Washington in excess of forty hours per week shall be at least the overtime rate of pay for the type of work in which most hours were worked.

[Statutory Authority: RCW 43.22.270, 49.46.130 and 1989 c 104, 89-22-120, § 296-128-012, filed 11/1/89, effective 12/2/89.]

WAC 296-128-015 Definitions of workday and workweek.

(1) A workweek is a fixed and regularly recurring period of 168 hours or seven consecutive 24 hour periods. It may begin on any day of the week and any hour of the day, and need not coincide with a calendar week.

(2) A workday is a fixed and regularly recurring period of 24 hours. It may begin at any hour of a calendar day and must begin at the same time each calendar day.

[Regulation 294.7.001 (part), filed 12/30/60.]

WAC 296-128-020 Term for keeping records. Unless otherwise specifically authorized by the director all records required under WAC 296-128-010 shall be kept for a period of at least three years.

[Regulation 294.7.001 (part), filed 12/30/60.]

WAC 296-128-025 Place for keeping records and availability for inspection. Each employer shall keep the records required by this regulation safe and accessible at the place or places of employment or at one or more established central recordkeeping offices where such records are customarily maintained. All such records shall be open at any time to inspection and transcription or copying by the director and his duly authorized representative and to the employee, upon request for that employee's work record, at any reasonable time.

[Statutory Authority: RCW 43.22.270, 49.12.020, 49.12.091, 49.12.050, 49.46.020 and 49.46.070. 89-22-016 (Order 89-16), § 296-128-025, filed 10/24/89, effective 11/24/89; Regulation 294.7.001 (part), filed 12/30/60.]

WAC 296-128-030 Petitions for exceptions. (1) Submission of petitions for relief. Any employer or group of employers who, due to peculiar conditions under which he or they must operate, desires authority to maintain records in a manner other than required in this regulation, or to be relieved of preserving certain records for the period specified in the regulation, may submit a written petition to the director setting forth the authority desired and the reasons therefor.

(2) **Action on petitions.** If, on review of the petition and after completion of any necessary investigation supplementary thereto, the director shall find that the authority prayed for, if granted, will not hamper or interfere with enforcement of the provisions of the act or any regulation or orders issued thereunder, he may then grant such authority but limited by such conditions as he may determine are requisite, and subject to subsequent revocation. Where the authority granted hereunder is sought to be revoked for failure to comply with the conditions determined by the director to be requisite to its existence, the employer or groups of employers involved shall be notified in writing of the facts constituting such failure and afforded an opportunity to achieve or demonstrate compliance.

(3) **Compliance after submission of petitions.** The submission of a petition or the delay of the director in acting upon such petition shall not relieve any employer or group of employers from any obligations to comply with all the requirements of the regulations in this part applicable to him or them. However the director shall give notice of the denial of any petition with due promptness.

[Regulation 294.7.001 (part), filed 12/30/60.]

WAC 296-128-035 Payment interval. All wages due shall be paid at no longer than monthly intervals to each employee on established regular pay days. To facilitate book-keeping, an employer may implement a regular payroll system in which wages from up to seven days before pay day may be withheld from the pay period covered and included in the next pay period.

[Statutory Authority: RCW 43.22.270, 49.12.020, 49.12.091, 49.12.050, 49.46.020 and 49.46.070. 89-22-016 (Order 89-16), § 296-128-035, filed 10/24/89, effective 11/24/89.]

HANDICAPPED WORKERS

WAC 296-128-050 Applicability of this regulation. This regulation is issued pursuant to RCW 49.46.060, Wash-
[Title 296 WAC—p. 2096]

ington minimum wage and hour law, which authorized the director of the department of labor and industries, to the extent necessary in order to prevent curtailment of opportunities for employment, to issue special certificates for employment of individuals whose earning capacity is impaired by age or physical or mental deficiency or injury at wages lower than the minimum wage applicable under RCW 49.46.020. Such certificates shall be subject to the conditions prescribed in this regulation.

[§ 1, Regulation 294.6.005, filed 12/30/60.]

WAC 296-128-055 Definition. "Handicapped worker" means an individual whose earning capacity is impaired by age or physical or mental deficiency or injury for the work he is to perform.

[§ 2, Regulation 294.6.005, filed 12/30/60.]

WAC 296-128-060 Application for certificate. (1) Application for a certificate authorizing the employment of handicapped workers shall be made upon forms made available by the director or his authorized representatives.

(2) The application shall set forth, among other things, the nature of the disability, a description of the occupation at which the handicapped worker is to be employed, and the wage the employer proposes to pay the handicapped worker per hour. The nature of the disability must be set out in detail.

(3) The application shall be signed jointly by the employer and the handicapped worker for whom such application is being made, except as otherwise authorized by the director or his authorized representative.

[§ 3, Regulation 294.6.005, filed 12/30/60.]

WAC 296-128-065 Conditions for granting a certificate. (1) If the application is in proper form and sets forth facts showing:

(a) A subminimum wage is necessary to prevent curtailment of the handicapped worker's opportunities for employment;

(b) the handicap impairs the earning capacity of the worker for the work he is to perform, a certificate may be issued.

(2) The director or his authorized representative may require the submission of additional information to that shown on the application and may require the handicapped worker to take a medical examination where it is deemed necessary in order to determine whether or not the issuance of a certificate is justified.

[§ 4, Regulation 294.6.005, filed 12/30/60.]

WAC 296-128-070 Issuance of certificate. If the application and other available information indicate that the requirements of this regulation are satisfied, the director or his authorized representative shall issue a certificate. Otherwise he shall deny a certificate. If issued, copies of the certificate shall be mailed to the employer and the handicapped worker and if denied, the employer and the handicapped worker shall be given written notice of the denial.

[§ 5, Regulation 294.6.005, filed 12/30/60.]

WAC 296-128-075 Terms of certificate. (1) A certificate shall specify, among other things, the name of the handicapped worker, the name of the employer, the occupation in which the handicapped worker is to be employed, the authorized subminimum wage rate and the period of time during which such wage rate may be paid.

(2) A certificate shall be effective for a period to be designated by the director or his authorized representative and a handicapped worker employed under such certificate may be paid subminimum wages only during the effective period of the certificate.

(3) The wage rate set in the certificate shall be fixed at a figure designed to reflect adequately the handicapped worker's earning capacity. No wage rate shall be fixed at less than 75 percent of the applicable minimum wage under RCW 49.46.020 unless, after investigation a lower rate appears to be clearly justified.

(4) Any money received by a handicapped worker by reason of any state or federal pension or compensation program for handicapped persons shall not be considered as offsetting any part of the wage or remuneration due the handicapped worker by the employer.

(5) The worker or trainee shall be paid not less than one and one-half times the regular rate for hours worked in excess of 40 in the workweek or 8 in the workday.

(6) The terms of any certificate, including the subminimum wage rate specified therein, may be amended by the director or his authorized representative upon written notice to the parties concerned, if the facts justify such amendment.

[§ 6, Regulation 294.6.005, filed 12/30/60.]

WAC 296-128-080 Renewal of certificate. Application for renewal of any certificate shall be filed in the same manner as an original application. If such application has been filed prior to the expiration date of the certificate, the certificate shall remain in effect until the application for renewal has been granted or denied.

[§ 7, Regulation 294.6.005, filed 12/30/60.]

WAC 296-128-085 Review. Any person aggrieved by any action of the director or his authorized representative taken pursuant to this regulation may, within 15 days after notice of such action has been mailed, file with the director a petition for review of the action complained of, setting forth grounds for seeking such review. If reasonable grounds exist, the director or his authorized representative may grant such review and to the extent deemed appropriate afford all interested persons an opportunity to be heard on such review.

[§ 8, Regulation 294.6.005, filed 12/30/60.]

WAC 296-128-090 Amendment of this regulation. Any person desiring revision of any of the terms of this regulation may submit in writing to the director a petition setting forth the changes desired and the reasons for proposing them. If the director believes that reasonable cause for amendment of this regulation is set forth he will schedule a hearing in accordance with RCW 49.46.080.

[§ 9, Regulation 294.6.005, filed 12/30/60.]

(2001 Ed.)

EMPLOYMENT OF LEARNERS

WAC 296-128-100 Authority. This regulation is promulgated in accordance with RCW 49.46.060.

[§ 1, Regulation 294.6.003, filed 3/23/60.]

WAC 296-128-105 Definitions. As used in this regulation:

(1) A "learner" is a worker whose total experience in an authorized learner occupation is less than the period of time allowed as a learning period for that occupation in a learner certificate issued pursuant to these regulations.

(2) An "experienced worker" is a worker whose total experience in an authorized learner occupation is at least equal to the period of time allowed as a learning period for that occupation in a learner certificate issued pursuant to these regulations.

(3) "Experienced worker available for employment" means an experienced worker residing within the area from which the employer customarily draws its labor supply or within a reasonable commuting distance of such area, and who is willing and able to accept employment with the employer; or an experienced worker residing outside of the area from which the employer customarily draws its labor supply, who has in fact made himself available for employment.

[§ 2, Regulation 294.6.003, filed 3/23/60.]

WAC 296-128-110 Application for learner certificate. (1) Whenever the employment of learners at wages lower than the minimum wage applicable under RCW 49.46.020 is believed necessary to prevent curtailment of opportunities for employment by a specified employer, an application for a certificate authorizing the employment of such learners at subminimum wage rates may be filed by the employer with the director of the department of labor and industries or his authorized representative.

(2) Application must be made on the official form provided by the department and furnish all information called for on said form.

(3) Separate application must be made with respect to each establishment or place of business operated by the applicant and in which he desires to employ learners at subminimum wage rates.

[§ 3, Regulation 294.6.003, filed 3/23/60.]

WAC 296-128-115 Procedure for action upon an application. (1) Upon receipt of an application for a learner certificate or renewal of such certificate the director or his authorized representative shall consider all relevant facts and, subject to the conditions specified in WAC 296-128-120, shall issue or deny a learner certificate or, in appropriate circumstances, provide an opportunity to interested parties to present their views on the application prior to granting or denying a learner certificate.

(2) If a learner certificate is granted, notice of such fact and the terms of the certificate shall be posted at the employer's place of business for 15 days after receipt thereof and any interested person may file with the director written

requests for reconsideration or review. Such application should set forth the applicant's interest in the review and the reasons he seeks review.

(3) If a learner certificate is denied, notice of such denial shall be mailed to the employer and it shall be without prejudice to the subsequent filing of an application.

[§ 4, Regulation 294.6.003, filed 3/23/60.]

WAC 296-128-120 Conditions governing issuance of learner certificates. The following conditions shall govern the issuance of a special certificate authorizing the employment of learners at subminimum wage rates:

(1) An adequate supply of qualified experienced workers is not available for employment; the experienced workers presently employed in occupations in which learners are requested, are afforded an opportunity for full time employment; learners are available for employment; and the granting of a certificate is necessary to prevent curtailment of employment opportunities.

(2) Reasonable efforts have been made to obtain experienced workers, including the placement of an order with the employment security office of the state of Washington.

(3) The issuance of a learner certificate will not tend to create unfair competitive labor cost advantages nor have the effect of impairing or depressing wage or working standards established for experienced workers for work of a like or comparable character in the industry.

(4) Abnormal labor conditions such as a strike, lock-out or other similar condition do not exist at the place of business for which a learner certificate is requested.

(5) There are no serious outstanding violations of the provisions of learner certificates previously issued to the employer, nor have there been any serious violations of the Washington Minimum Wage and Hour Act which provide reasonable grounds to believe that the terms of a certificate may not be complied with.

(6) The occupation or occupations in which learners are to receive training require a sufficient degree of skill to necessitate an appreciable training period.

(7) Learners shall be afforded every reasonable opportunity for continued employment upon completion of the learning period.

(8) Unless otherwise specified in the learner certificate, a learning program shall not exceed 480 hours of employment, and the total hours worked in any establishment by learners shall not exceed 10 percent of the total hours normally worked by experienced workers in such establishment: *Provided*, That where less than 10 experienced workers are employed by an employer, a learner certificate may authorize the employment of learners for a maximum of 40 hours per week under a bona fide learner program.

[§ 5, Regulation 294.6.003, filed 3/23/60.]

WAC 296-128-125 Terms and conditions of employment under learner certificates. (1) A learner certificate, if issued, shall specify, among other things:

(a) The number or proportion of learners authorized to be employed on any one day;

(b) The occupations in which learners may be employed;

[Title 296 WAC—p. 2098]

(c) The subminimum wage rates permitted for each learner occupation during the authorized learning period; which shall not be less than 85 percent of the minimum wage specified in RCW 49.46.020, as it may be amended, unless otherwise specified in the certificate;

(d) The learning period for each authorized learner occupation;

(e) The effective and expiration dates of the certificate.

(2) A learner certificate may be issued for a period of not longer than one year. A renewal certificate will not be issued without a clear showing that conditions set forth in WAC 296-128-120 still prevail.

(3) Learners hired pursuant to a learner certificate prior to the date on which such certificate expires may be continued in employment at the authorized subminimum wage rate for the duration of their authorized learning period even though the certificate expired before the learning period is completed.

(4) A copy of the learner certificate shall be posted by the employer during its effective period in a conspicuous place in the department where learners are to be employed.

(5) No learner shall be hired under a learner certificate if, at the time the employment begins, experienced workers capable of equaling the performance of a worker of minimum acceptable skill are available for employment.

(6) No learner shall be hired under a learner certificate while abnormal labor conditions exist such as a strike, lock-out, or other similar conditions in the place of business for which a learner certificate has been issued.

(7) The number of hours of previous employment in a learner occupation for which the learner has been hired must be deducted from the authorized learning period if within the three years immediately preceding the hiring of such learner he has been employed in the learner occupation for less than the total number of hours authorized as a learning period and shall also be deducted from the authorized learning period all hours spent in pertinent training in a vocational training school on the occupation for which the learner has been employed.

(8) No provision of any learner certificate will excuse noncompliance with higher standards applicable to learners which may be established under any other state law, federal law, or trade union agreement.

(9) Unless otherwise specified in the learner certificate a learning program shall not exceed 480 hours of employment and the total hours worked in any establishment by learners shall not exceed 10 percent of the total hours normally worked by experienced workers in such establishment: *Provided*, That where less than 10 experienced workers are employed by an employer a learner certificate may authorize the employment of learners for a maximum of 40 hours per week under a bona fide learner program.

[§ 6, Regulation 294.6.003, filed 3/23/60.]

WAC 296-128-130 Records to be kept by employers of learners. The director or his authorized representative may specify additional records to be kept by employers of learners as a condition to compliance with the learner certificate.

[§ 7, Regulation 294.6.003, filed 3/23/60.]

WAC 296-128-135 Amendment and revocation of learner certificate. The director may amend or revoke a learner certificate when it is necessary by reason of changes in these regulations, or where the employer has violated its terms, or where the certificate was obtained by misleading or false statements, or where changed conditions warrant it in the opinion of the director.

[§ 8, Regulation 294.6.003, filed 3/23/60.]

WAC 296-128-140 Supplemental regulations. (1) Upon application of any person or persons, representing any industry or branch thereof, or upon his own motion, the director, if he deems it advisable, may, after appropriate and timely notice to interested parties, cause a hearing to be held to determine the need for employment of learners at wages lower than the minimum wage applicable under RCW 49.46.020 in order to prevent curtailment of employment opportunities in any industry or branch thereof; and if such need is found to exist, determine the occupations which require a learning period and the limitations as to wages, time, number, proportion, and length of learning period. Such hearing shall be held before the director or his duly authorized representative. Following such hearing the director may, by supplemental regulations, prescribe the conditions under which special certificates shall be issued for the employment of learners in such industry or branch thereof, if he finds that there is a need therefor to prevent curtailment of opportunities for employment.

(2) At such hearing the director may cause to be brought before him or his authorized representative any witness whose testimony he deems material to the subject matter before him.

[§ 9, Regulation 294.6.003, filed 3/23/60.]

WAC 296-128-145 Reconsideration and review. (1) Any person aggrieved by the action of the director or his authorized representative denying or granting a learner certificate may within 15 days after mailing of notice of such action file a written request for reconsideration with the director.

(2) A request for a reconsideration shall be accompanied by a statement of the additional evidence which the applicant believes may materially affect the decision.

(3) A request for review shall be granted where reasonable grounds are set forth in the request and if such review is granted all interested persons shall be afforded an opportunity to be heard.

[§ 10, Regulation 294.6.003, filed 3/23/60.]

WAC 296-128-150 Procedure for amendment. The director may at any time upon his own motion or upon written request of any interested persons setting forth reasonable grounds therefor amend or revoke any of the terms of this regulation or of any supplemental regulations promulgated in accordance with WAC 296-128-140 after hearing as provided in RCW 49.46.080.

[§ 11, Regulation 294.6.003, filed 3/23/60.]

(2001 Ed.)

STUDENT LEARNERS

WAC 296-128-175 Applicability of the regulation. This regulation is issued in accordance with RCW 49.46.060, to provide for the employment under special certificates of student learners at wages less than the minimum provided in RCW 49.46.020, in order to prevent curtailment of opportunities for employment. Such certificates shall be subject to the terms and conditions hereinafter set forth.

[§ 1, Regulation 294.6.004, filed 3/23/60.]

WAC 296-128-180 Definitions. (1) A "student learner" is a student who is receiving instruction in an accredited school, college, or university, and who is employed on a part-time basis in a bona fide vocational training program, or in a job-training program established by an accredited school and approved by the director of the department of labor and industries.

(2) A "bona fide vocational training program" is one authorized and approved by the state board of vocational education and provides for part-time employment which may be scheduled for part of the workday or workweek, for alternating weeks or for other limited periods during the year, supplemented by and integrated with a definitely organized plan of instruction designed to teach technical knowledge or related industrial information given as a regular part of the student learner's course by an accredited school, college, or university.

[§ 2, Regulation 294.6.004, filed 3/23/60.]

WAC 296-128-185 Application for certificate. (1) Whenever the employment of a student learner at wages lower than the minimum wage applicable under RCW 49.46.020 is believed necessary to prevent curtailment of opportunities for employment, an application for a special certificate authorizing the employment of such student learner at subminimum wages shall be filed by the employer with the director of the department of labor and industries or his authorized representative.

(2) Application shall be on forms furnished by the department of labor and industries and must be signed by the employer, an appropriate school official and the student learner. Such application shall, among other things, show: The nature of the training program; the total number of workers employed by the employer; the number and hourly wage rate of experienced workers employed in the occupation in which the student learner is to be trained; the hourly wage rate or progressive wage schedule which the employer proposes to pay the student learner; the age of the student learner; the period of employment training at subminimum wages; the number of hours of employment training a week; the number of hours of school instruction a week.

[§ 3, Regulation 294.6.004, filed 3/23/60.]

WAC 296-128-190 Procedure for action upon application. (1) Upon receipt of application for the employment of a student learner the director or his authorized representative shall either issue a special certificate or deny the application. To the extent deemed necessary the director or his authorized

representative may provide an opportunity to interested persons to be heard on the application prior to granting or denying it.

(2) If a special certificate is issued it shall be mailed to the employer and a copy of it shall be mailed to the school official who signs the application.

[§ 4, Regulation 294.6.004, filed 3/23/60.]

WAC 296-128-195 Conditions governing issuance of special student learner certificate. The following conditions must be satisfied before a special certificate may be issued authorizing employment of student learners at subminimum wages:

(1) Any training program under which the student learner will be employed must be a bona fide vocational training program as defined in WAC 296-128-180 or be a part of a job-training program established by the governing body of the school and approved by the director of the department of labor and industries.

(2) The employment of the student learner at subminimum wages must be necessary to prevent curtailment of opportunities for employment.

(3) The occupation for which the student learner is receiving preparatory training must require a sufficient degree of skill to necessitate a substantial learning period.

(4) The employment of a student learner must not have the effect of displacing a worker employed in the establishment in which the student learner is to be employed.

(5) The employment of the student learner at subminimum wages must not tend to impair or depress the wage rates or working standards established for experienced workers for work of a like or comparable nature.

(6) The issuance of such a certificate must not tend to prevent the development of apprenticeships or must not impair established apprenticeship standards in the occupation or industry involved.

[§ 5, Regulation 294.6.004, filed 3/23/60.]

WAC 296-128-200 Terms and conditions of special student learner certificate. (1) The special student learner certificate if issued shall specify among other things: (a) The name of the student learner; (b) the name and address of the employer; (c) the name of the school which provides the related school instruction; (d) the occupation in which the student is to be trained; (e) the maximum number of hours of employment training in any one week at a specified subminimum wage rate; (f) the number of hours per week in which the student is engaged in his school training program; (g) the effective and expiration dates of the certificate.

(2) The subminimum wage rate shall be not less than 75 percent of the minimum wage provided in RCW 49.46.020.

(3) Unless otherwise authorized by the director or his authorized representative the number of hours of employment training each week at subminimum wages pursuant to certificate, when added to the hours of school instruction shall not exceed 40 hours: Provided, however, That when school is not in session on any school day or school week, the student learner may work a number of hours in addition to the weekly number of hours of employment training authorized

[Title 296 WAC—p. 2100]

by the certificate, provided that the hours do not exceed 8 in such day or 40 in such week.

(4) Unless otherwise authorized by the director or his authorized representative the total number of hours worked by all student learners employed by an employer shall not exceed 10 percent of the total hours worked by all regular employees of said employer in the establishment in which such student learners are employed.

[§ 6, Regulation 294.6.004, filed 3/23/60.]

WAC 296-128-205 Term of special certificate. A special student learner certificate may be issued for a period not to exceed the length of one school year unless the director finds that a longer period is justified by extraordinary circumstances.

[§ 7, Regulation 294.6.004, filed 3/23/60.]

WAC 296-128-210 Review. Any person aggrieved by the action of the director or his authorized representative in denying or granting a special student learner certificate may within 15 days after the mailing of notice of such action file a written request for review which will be granted where such request sets forth reasonable grounds therefor. To the extent the director or his authorized representative deems it necessary he shall afford all persons interested in said review an opportunity to be heard.

[§ 8, Regulation 294.6.004, filed 3/23/60.]

WAC 296-128-215 Amendment of this regulation. Any person desiring revision of any of the terms of this regulation may submit in writing to the director a petition setting forth the changes desired and the reasons for proposing them. If the director believes that reasonable cause for amendment of this regulation is set forth he will schedule a hearing in accordance with RCW 49.46.080.

[§ 9, Regulation 294.6.004, filed 3/23/60.]

APPRENTICES

WAC 296-128-225 Employment of apprentices at subminimum wages. The director or his authorized representative, to the extent necessary to prevent curtailment of employment opportunities, shall issue special certificates to employers or apprenticeship committees as defined in RCW 49.04.040 authorizing the employment of apprentices in skilled trades at wages lower than the minimum wage applicable under RCW 49.46.020, subject to the limitations and conditions set forth in this regulation.

[§ 1, Regulation 294.6.002, filed 12/30/60.]

WAC 296-128-230 Definition of apprentice. The term "apprentice" shall mean a person at least 16 years of age who is covered by a written agreement registered with the Washington state apprenticeship council providing for not less than 4,000 hours of reasonably continuous employment for such person, and for his participation in an approved schedule of work experience through employment which should be sup-

plemented by 144 hours per year of related technical instruction.

[§ 2, Regulation 294.6.002, filed 12/30/60.]

WAC 296-128-235 Registration of apprenticeship agreement. Before an apprentice may be employed at subminimum wages, the employer or apprenticeship committee shall have submitted an apprenticeship agreement for registration with the director of apprenticeship or the apprenticeship council of the department of labor and industries.

[§ 3, Regulation 294.6.002, filed 12/30/60.]

WAC 296-128-240 Procedure for issuing certificates authorizing employment of apprentices at subminimum wages. (1) Upon being informed by the director of apprenticeship that such apprenticeship agreement has been accepted for registration in accordance with RCW 49.04.030, and that such agreement calls for employment of apprentices at subminimum wages, the director, or his authorized representative, may issue a special certificate in accordance with WAC 296-128-225. Otherwise, he shall deny the special certificate.

(2) The special certificate, if issued, shall be mailed to the employer or apprenticeship committee and a copy shall be mailed to the apprentice. If the certificate is denied, the employer or apprenticeship committee will be so notified by mail.

(3) A special certificate will not be issued where there are serious outstanding violations involving an employer for whom a special certificate is being requested, or where there are any serious outstanding violations of a certificate previously issued, or where there have been any serious violations of the act which provide reasonable grounds to conclude that the terms of a certificate may not be complied with, if issued.

[§ 4, Regulation 294.6.002, filed 12/30/60.]

WAC 296-128-245 Terms of special certificate. (1) Each special certificate shall specify the conditions and limitations under which it is granted, including the name of the apprentice, the skilled trade in which he is to be employed, the subminimum wage rates and the periods of time during which such wage rates may be paid.

(2) The terms of any special certificate, including the wages specified therein may be amended for cause.

[§ 5, Regulation 294.6.002, filed 12/30/60.]

WAC 296-128-250 Hearing procedure. The director or his authorized representative may conduct an investigation, which may include a hearing, prior to issuing or denying an application for special certificate. To the extent he deems appropriate, the director, or his authorized representative, may provide an opportunity for other interested persons to be heard prior to granting or denying an apprentice certificate.

[§ 6, Regulation 294.6.002, filed 12/30/60.]

(2001 Ed.)

EMPLOYMENT OF STUDENT WORKERS

WAC 296-128-275 Applicability. The regulations hereinafter set forth are issued pursuant to RCW 49.46.060 to provide for the employment by educational institutions under special certificates of student workers as learners at wages lower than the minimum wage applicable under RCW 49.46.020. Such certificates shall be subject to the terms and conditions hereinafter set forth.

[§ 1, Regulation 294.6.001, filed 3/23/60.]

WAC 296-128-280 Definitions. As used in the regulations:

(1) A "student worker" is a student who is receiving instruction in a bona fide educational program in an educational institution and who is employed on a part-time basis by the educational institution from which the student is receiving his instruction, for the purpose of enabling the student to defray part of his school expenses.

(2) "Department" means department of labor and industries.

(3) "Director" means director of department of labor and industries.

(4) "Supervisor" means supervisor of wage and hour division of the department of labor and industries.

[§ 2, Regulation 294.6.001, filed 3/23/60.]

WAC 296-128-285 Filing applications. Whenever the employment of student workers as learners at wages lower than the minimum wage applicable under RCW 49.46.020 is believed necessary to prevent curtailment of opportunities for employment in a specified educational institution, applications for special certificates authorizing the employment of such student workers as learners at subminimum wage rates may be filed by an appropriate official of the educational institution with the director, supervisor, or duly authorized representative of the wage and hour division of the department of labor and industries on official forms furnished by the department.

[§ 3, Regulation 294.6.001, filed 3/23/60.]

WAC 296-128-290 Issuing or denying certificates. Upon receipt of an application for the employment of student workers as learners, the director or his authorized representative shall issue or deny a special certificate authorizing employment of student workers. To the extent he deems appropriate, the director or his authorized representative may provide an opportunity to other interested persons to present data and views on the application prior to granting or denying a student worker certificate. If a student worker certificate is granted, it shall be mailed to the educational institution. If a student worker certificate is denied, notice of such denial shall be mailed to the educational institution and such denial shall be without prejudice to the filing of any subsequent application.

[§ 4, Regulation 294.6.001, filed 3/23/60.]

WAC 296-128-295 Conditions governing issuance of certificates. The following conditions shall govern the issuance of a special certificate authorizing the employment of student workers as learners by an educational institution at subminimum wage rates:

(1) The employment of the student workers at subminimum wages authorized by the certificate must be necessary to prevent curtailment of opportunities for employment in a specified educational institution.

(2) The issuance of the student worker certificate will not tend to create unfair competitive labor cost advantages nor have the effect of impairing or depressing wage or working standards established for experienced workers for work of a like or comparable character in the industry or community.

(3) The occupations to be filled by the student workers shall not be in the production of goods or services which would be sold in competition with privately owned businesses, nor in enterprises operated by the educational institution in competition with privately owned businesses.

(4) There have been no serious outstanding violations of the provisions of a student workers certificate previously issued to the educational institution, nor have there been any serious violations of the act which provide reasonable grounds to conclude that the terms of a student worker certificate may not be complied with, if issued.

[§ 5, Regulation 294.6.001, filed 3/23/60.]

WAC 296-128-300 Data required on certificate. The student worker certificate, if issued, shall specify, among other things:

(1) The name and address of the educational institution employing the student workers;

(2) The occupations in which the student workers are employed;

(3) The number of student workers to be employed in any one day;

(4) The authorized subminimum wage rate to be paid for each occupation;

(5) The effective and expiration dates of the certificate.

[§ 6, Regulation 294.6.001, filed 3/23/60.]

WAC 296-128-305 Wage rate. The subminimum wage rate shall be not less than 75 percent of the minimum wage rate established by RCW 49.46.020, as it may be amended.

[§ 7, Regulation 294.6.001, filed 3/23/60.]

WAC 296-128-310 Records. In addition to any other records required by reason of the Washington Minimum Wage and Hour Act, the educational institution shall keep and maintain the following records specifically relating to student workers employed at subminimum wage rates:

(1) Each student worker employed under a student worker certificate shall be designated as such on the payroll records kept by the institution, with each student worker's occupation and rate of pay being shown.

(2) The records required including a copy of any special certificate issued, shall be kept and made available for inspection at all times for at least three years from the effective date of the certificate.

[Title 296 WAC—p. 2102]

[§ 8, Regulation 294.6.001, filed 3/23/60.]

WAC 296-128-315 Amending and revoking certificates. The director of the department of labor and industries or his authorized representative may amend the provisions of a student worker certificate or he may revoke such certificate where it is shown to his satisfaction that its provisions have not been complied with.

[§ 9, Regulation 294.6.001, filed 3/23/60.]

WAC 296-128-400 Minors. (1) Applicability of order. This order shall apply to all minors employed in any industry or establishment in the state of Washington who are not expressly covered by another minimum wage and welfare order issued by the industrial welfare committee, except: Minors employed:

(a) By common carrier railroads, sleeping car companies and freight or express companies subject to regulations of federal law.

(b) In agricultural labor.

(c) In domestic work or chores performed in or about private residences.

(d) In a vocational education, work experience or apprentice training program, when such program is properly supervised by school personnel or in accordance with written agreements and approved training schedules.

(e) Directly by a telephone or telegraph company. This order shall not apply to newspaper vendors and newspaper carriers.

(2) Definitions. For the purpose of this order:

(a) A "minor" is a person of either sex under the age of eighteen years.

(b) The term "employee" shall mean any minor who is employed to work in any industry or establishment in the state of Washington other than those expressly excluded by the foregoing paragraphs.

(c) The term "employer" shall mean any person, association, corporation, co-partnership, or municipal corporation, engaged in any industry or establishment covered by this order and who (or which) employs any minor covered by this order:

(d) The term "agricultural labor" shall mean employment.

(i) On a farm, in the employ of any person in connection with the cultivating of the soil, or in connection with raising or harvesting any agricultural or horticultural commodity, including raising, shearing, feeding, caring for, training and management of livestock, bees, poultry, and furbearing animals and wildlife, or in the employ of the owner or tenant or other operator of a farm in connection with the operation, management, conservation, improvement, or maintenance of such farm and its tools and equipment; or

(ii) In handling, planting, packing, packaging, grading, storing, or delivering to storage or to a market or to a carrier for transportation to market, any agricultural or horticultural commodity; but only if such service is performed as an incident to ordinary farming operations, or, in the case of fruits and vegetables in their raw and natural state, as an incident to the preparation of such fruits and vegetables for market. The provisions of this paragraph shall not be deemed to be appli-

(2001 Ed.)

cable with respect to services performed in connection with commercial canning or commercial freezing or any other commercial processing which changes the character of the product from its raw and natural state or in connection with any agricultural or horticultural commodity after its delivery to a terminal market for distribution for consumption.

(3) Minimum wages.

(a) Minimum wages for all minors covered by this order, in the state of Washington shall be fifty cents per hour, regardless of the manner in which they are computed, except when another order (or orders) issued by the industrial welfare committee of the state of Washington provides a different minimum.

(b) Whenever the administrator of the wage and hour division of the United States department of labor shall issue a certificate or certificates permitting the employment of learners, apprentices, messengers, and handicapped workers, at wage rates below the minimums herein fixed, the payment of wages in accordance with such permits shall not constitute a violation of this order.

(4) Hours.

(a) No minor shall be employed more than five hours without a meal period, on the employee's time, of at least thirty minutes.

(b) There shall be a rest period on the employer's time of ten minutes in every four-hour period of employment.

(c) Minors 14 and 15 years of age shall not be employed more than eight hours in any one day or six days in any one week. In computing the hours, one-half the total attendance hours in school shall be included. When school is not in session said minors shall not be employed more than forty hours in any one week.

(d) Minors 16 and 17 years of age shall not be employed more than eight hours in any one day or six days in any one week except in seasonal industries or in cases of emergency.

(e) Minors 14 and 15 years of age shall not be permitted to work after the hours of 7:00 p.m. or before 6 a.m. (pacific standard time), unless such employment is specifically authorized by the terms of this order, or by a permit specifically authorizing such employment issued by the industrial welfare committee of the state department of labor and industries, or its duly designated agent for the issuance of such permit.

(f) Minor boys 14 and 15 years of age may be issued permits to work in approved amusement industries not more than six days a week and not later than 7:00 p.m. (pacific standard time).

(g) Minors 16 and 17 years of age attending school may be employed after 7:00 p.m. (pacific standard time) for such hours not exceeding eight hours in any one day, and in such employments, as shall be specifically authorized in the individual permits issued to each minor, when upon investigation by the supervisor of women and minors in industry the conditions of employment are found not detrimental to the welfare of the minors or their school program. Such permits shall not be issued to girls unless satisfactory assurance is given the industrial welfare committee of the state department of labor and industries or its authorized agent that such minors are to be safely conveyed to their homes.

(5) Work permits and proof of age certificates.

(a) No minor shall be employed in any occupation covered by this order unless the employer has on file during the period of employment an unexpired work certificate or permit issued by the industrial welfare committee of the state department of labor and industries or its duly designated agent for the issuance of such permit. Such permit will not be issued except upon presentation of such evidence of age as is required by the industrial welfare committee.

(b) The issuance of a certificate or permit to work shall not authorize or excuse a violation of the state of Washington compulsory school attendance law, and shall not be issued to any minor legally required to attend school when school is in session except with the approval of the school authorities.

(6) Employment prohibited to all minors.

(a) No minor shall be employed in any occupation which the state department of labor and industries, through its industrial welfare committee, shall upon due notice and hearing find and by order declare to be particularly hazardous for the employment of minors under the ages specified in such order as detrimental to their health or morals.

(b) No minor shall be permitted to work in any of the following occupations:

(i) In any place where intoxicating liquor is served in the same room.

(ii) As driver or helper on state licensed motor vehicles in traffic congested areas.

(iii) In operating, tending or in dangerous proximity to dangerous power driven machinery.

(iv) In connection with the commercial operation of a 35 millimeter projection machine in a motion picture theatre or public building.

(v) To give signals to engineers in logging operations, or to receive and forward signals.

(vi) As an engineer, or within dangerous proximity to any cables, rigging or hazardous machinery.

(7) Employment prohibited to all minor girls. No minor girl shall be employed as:

(a) A shaker in a laundry, except on hand towels, handkerchiefs, napkins and similar small articles.

(b) In or in connection with a barber shop.

(c) A canvasser or peddler from house to house.

(d) An elevator operator.

(e) A clerk selling cigars or tobacco.

(f) A hotel messenger.

(g) A cabaret performer.

(h) In shooting galleries, penny arcades, bowling alleys.

(i) A public messenger (i.e., one whose services are available to the public for hire), except that girls 16 and 17 years of age will be permitted as building messengers in buildings within a radius of three blocks from one another.

(8) Employment entirely prohibited to minors under 16 years of age. Minors under sixteen years of age shall not be permitted to operate machinery in connection with processing or manufacturing plants.

(9) Employments prohibited to minors under 14 years of age. Minors under fourteen years of age shall not be employed in the following occupations unless such employment is specifically authorized by a permit issued by a judge of the superior court of the state of Washington:

- (a) In stock room work in warehouses.
- (b) As clerks in mercantile establishments.
- (c) In offices as errand or office maintenance workers.
- (d) In cafes as bus boys or dishwashers or helpers.
- (e) As service station attendants.
- (f) In other occupations which the industrial welfare committee, after due notice and hearing, shall have determined to be hazardous or detrimental to the welfare of the minor.

(10) **Employment of minors 14 to 18 years of age.** Minors 14 to 18 years of age may be employed in any occupation or industry except where such employment is expressly prohibited by this order or by statute of the state of Washington, provided that all the conditions and requirements of this order are complied with.

(11) **Working conditions.**

(a) All places where minors are employed shall be maintained in a safe and sanitary condition. The requirements for safety, sanitation and first aid shall be in conformity with the safety standards, rules and regulations as adopted by the division of safety of the department of labor and industries.

(b) Every room in which minors are employed shall be adequately heated and ventilated, and supplied with adequate natural or artificial light in accordance with the general safety standards of the department of labor and industries.

(c) Each such room shall be provided with a smooth, tight floor, which can be kept clean and sanitary. Where wet processes are employed, the floors must be adequately drained so that there will be no unreasonable depth of liquid at any point. Where floors are wet, wooden racks or grating of an adequate height shall be provided at such points.

(d) Toilet rooms shall be provided for women and female minors sufficiently separated and isolated to insure privacy, which rooms shall be maintained in a sanitary condition, adequately lighted, heated and ventilated. A sufficient number of wash bowls or sink space shall be located either within the toilet room or adjacent to the toilet room. Any wash bowls or sinks not so located shall be installed in an approved location. Sufficient soap and either individual or paper towels shall be provided.

(e) Employers shall provide for adequate keeping of employee's outer clothing during working hours, and for their work clothes during nonworking hours. When the occupation requires a change of clothing, a suitable space adequately heated shall be provided where employees may make such change in privacy.

(f)(i) A suitable rest room for women and female minors shall be provided, and shall be properly ventilated and heated.

(ii) An adequate cloak room shall be provided.

(iii) An adequate lunch room furnished with tables and chairs, and facilities for heating water shall be provided: Provided, however, That where less than ten women and female minors are regularly employed, the supervisor of women and minors in industry, upon application and showing, may permit a modified compliance with the foregoing part of this section or any part of the same.

(g) No female minor shall be required or permitted to lift or carry an excessive weight.

(h) No female minor shall be knowingly employed for a period of four weeks before confinement for pregnancy or four weeks thereafter.

(12) **Records.** Records showing the name of minors employed, dates of employment, wages paid and the hours worked by them, shall be kept by the employer and available for inspection by the representatives of the industrial welfare committee of the state department of labor and industries at all reasonable times.

(13) **Posting of order.** The employer shall post a copy of this order in all places where minor workers are employed.

(14) **Separability.** If the application of any provision of this order, or any section, subsection, subdivision, sentence, clause, phrase, word or portion of this order shall be held invalid or unconstitutional, the remaining provisions thereof shall not be affected thereby but shall continue to be given full force and effect as if the part so held invalid or unconstitutional had not been included therein.

(15) **Penalties.** The supervisor of women and minors in industry shall investigate the complaint of any individual alleging that this order has been violated. Any person employing a minor in violation of this order shall upon conviction thereof be punished in accordance with the applicable laws of the state of Washington, RCW 49.12.170, now states as follows: "Any person employing a woman or minor for whom a minimum wage or standard conditions of labor have been specified, at less than said minimum wage, or under conditions of labor prohibited by order of the committee; or violating any other of the provisions of RCW 49.12.010 through 49.12.180, shall be deemed guilty of a misdemeanor, and shall, upon conviction thereof, be punished by a fine of not less than twenty-five dollars nor more than one hundred dollars."

[Minimum Wage and Welfare Order No. 49, filed 3/23/60.]

WAC 296-128-500 Purpose. This regulation is adopted in accordance with chapter 49.46 RCW to define the terms "bona fide executive, administrative, or professional capacity or in the capacity of outside salesman" and to establish a procedure for computing overtime pay.

[Order 76-5, § 296-128-500, filed 2/24/76.]

WAC 296-128-510 Executive. The term "individual employed in a bona fide executive . . . capacity" in RCW 49.46.010 (5)(c) shall mean any employee:

(1) Whose primary duty consists of the management of the enterprise in which he is employed or of a customarily recognized department or subdivision thereof; and

(2) Who customarily and regularly directs the work of two or more other employees therein; and

(3) Who has the authority to hire or fire other employees or whose suggestions and recommendations as to the hiring or firing and as to the advancement and promotion or any other change of status of other employees will be given particular weight; and

(4) Who customarily and regularly exercises discretionary powers; and

(5) Who does not devote more than 20 percent, or, in the case of an employee of a retail or service establishment who

does not devote as much as 40 percent, of his hours worked in the work week to activities which are not directly and closely related to the performance of the work described in paragraphs (1) through (4) of this section: Provided, That this paragraph (5) shall not apply in the case of an employee who is in sole charge of an independent establishment or a physically separated branch establishment, or who owns at least a 20 percent interest in the enterprise in which he is employed; and

(6) Who is compensated for his services on a salary basis at a rate of not less than \$155 per week exclusive of board, lodging, and other facilities: Provided, That an employee who is compensated on a salary rate of not less than \$250 per week (exclusive of board, lodging, or other facilities), and whose primary duty consists of the management of the enterprise in which he is employed or of a customarily recognized department or subdivision thereof, and includes the customary and regular direction of the work of two or more other employees therein, shall be deemed to meet all of the requirements of this section.

[Order 76-5, § 296-128-510, filed 2/24/76.]

WAC 296-128-520 Administrative. The term "individual employed in a bona fide . . . administrative . . . capacity" in RCW 49.46.010 (5)(c) shall mean any employee:

(1) Whose primary duty consists of the performance of office or non-manual field work directly related to management policies or general business operations of his employer or his employer's customers; or

(2) The performance of functions in the administration of a school system, or educational establishment or institution, or of a department or subdivision thereof, in work directly related to the academic instruction or training carried on therein; and

(3) Who customarily and regularly exercises discretion and independent judgment; and

(a) Who regularly and directly assists a proprietor, or an employee employed in a bona fide executive or administrative capacity (as such terms are defined in this regulation), or

(b) Who performs under only general supervision work along specialized or technical lines requiring special training, experience or knowledge, or

(c) Who executes under only general supervision special assignments and tasks; and

(4) Who does not devote more than 20 percent, or, in the case of an employee of a retail or service establishment who does not devote as much as 40 percent of his hours worked in the work week to activities which are not directly and closely related to the performance of the work described in paragraphs (1) through (3) of this section; and

(a) Who is compensated for his services on a salary or fee basis at a rate of not less than \$155 per week exclusive of board, lodging, or other facilities; or

(b) Who, in the case of academic administrative personnel is compensated for his services as required by paragraph (4)(a) of this section, or on a salary basis which is at least equal to the entrance salary for teachers in the school system, educational establishment, or institution by which he is employed: Provided, That an employee who is compensated on a salary or fee basis at a rate of not less than \$250 per week

(2001 Ed.)

(exclusive of board, lodging, or other facilities), and whose primary duty consists of the performance of office or non-manual work directly related to management policies or general business operations of his employer or his employer's customers; which includes work requiring the exercise of discretion and independent judgment, shall be deemed to meet all of the requirements of this section.

[Order 76-5, § 296-128-520, filed 2/24/76.]

WAC 296-128-530 Professional. The term "individual employed in a bona fide . . . professional capacity" in RCW 49.46.010 (5)(c) shall mean any employee:

(1) Whose primary duty consists of the performance of work:

(a) Requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study, as distinguished from a general academic education and from an apprenticeship, and from training in the performance of routine mental, manual, or physical processes, or

(b) Original and creative in character in a recognized field of artistic endeavor (as opposed to work which can be produced by a person endowed with general manual or intellectual ability and training), and the result of which depends primarily on the intention, imagination, or talent of the employee; or

(c) Teaching, tutoring, instructing, or lecturing in the activity of imparting knowledge and who is employed and engaged in this activity as a teacher in the school system or educational establishment or institution by which he is employed; and

(2) Whose work requires the consistent exercise of discretion and judgment in its performance; and

(3) Whose work is predominantly intellectual and varied in character (as opposed to routine mental, manual, mechanical or physical work) and is of such a character that the output produced or the result accomplished cannot be standardized in relation to a given period of time; and

(4) Who does not devote more than 20 percent of his hours worked in the work week to activities which are not an essential part of and necessarily incident to the work described in paragraphs (1) through (3) of this section; and

(5) Who is compensated for his services on a salary or fee basis at a rate of not less than \$170 per week exclusive of board, lodging, or facilities: Provided, That this paragraph (5) shall not apply in the case of an employee who is the holder of a valid license or certificate permitting the practice of law, medicine, or dentistry and who is actually engaged in the practice thereof: Provided, That an employee who is compensated on a salary or fee basis at a rate of not less than \$250 per week (exclusive of board, lodging, or other facilities), and whose primary duty consists of the performance of work either requiring knowledge of an advanced type in a field of science or learning, which includes work requiring the consistent exercise of discretion and judgment, or requiring invention, imagination, or talent in a recognized field of artistic endeavor, shall be deemed to meet all of the requirements of this section.

[Order 76-5, § 296-128-530, filed 2/24/76.]

WAC 296-128-535 Are professional computer employees exempt from the Washington Minimum Wage Act? (1) Any employee who is a computer system analyst, computer programmer, software engineer, software developer or other similarly skilled worker will be considered a "professional employee" and will be exempt from the minimum wage and overtime provisions of the Washington Minimum Wage Act if:

(a) Their primary duty is of one of the following:

(i) Applying systems analysis techniques and procedures to determine hardware, software, or system functional specifications for any user of such services; or

(ii) Following user or system design specifications to design, develop, document, analyze, create, test or modify any computer system, application or program, including prototypes; or

(iii) Designing, documenting, testing, creating or modifying computer systems, applications or programs for machine operation systems; or

(iv) Any combination of the above primary duties whose performance requires the same skill level; and

(b) Their rate of pay is at least \$27.63 per hour.

(2) **This professional exemption only applies to highly skilled employees who:**

(a) Possess a high degree of theoretical knowledge and understanding of computer system analysis, programming and software engineering; and

(b) Have the ability to practically apply that theoretical knowledge and understanding to highly specialized computer fields; and

(c) Generally attain the necessary level of expertise and skill to qualify for an exemption through a combination of education and experience in the field; and

(d) Consistently exercise discretion and judgment in the application of their special knowledge as opposed to performing purely mechanical or routine tasks; and

(e) Engage in work that is predominantly intellectual and inherently varied in character as opposed to work that is routinely mental, manual, mechanical, or physical.

(3) While many employees who qualify for this exemption hold a bachelor's or higher degree, **no degree is required for this exemption.**

(4) This professional exemption **does not apply to:**

(a) Trainees or employees in entry level positions learning to become proficient in computer systems analysis, programming and software engineering; or

(b) Employees in computer systems analysis, programming and software engineering positions who have not attained a level of skill and expertise which allows them to generally work independently and without close supervision; or

(c) Employees engaged in the operation of computers; or

(d) Employees engaged in the manufacture, repair or maintenance of computer hardware and related equipment; or

(e) Employees covered by a collective bargaining agreement.

[Statutory Authority: RCW 49.46.010 (5)(c), 98-02-027, § 296-128-535, filed 12/31/97, effective 2/1/98.]

[Title 296 WAC—p. 2106]

WAC 296-128-540 Outside salesman. The term "individual employed in the capacity of outside salesman" in RCW 49.46.010 (5)(c) shall mean any employee:

(1) Who is employed for the purpose of and who is customarily and regularly engaged away from his employer's place or places of business, as well as on the premises (where the employee regulates his own hours and the employer has no control over the total number of hours worked) in the following alternative activities:

(a) In making sales; including any sale, exchange, contract to sell, consignment for sale, shipment for sale or other disposition; or

(b) In obtaining orders or contracts for services or for the use of facilities for which a consideration will be paid by the client or customer; or

(c) In demonstrating products or equipment for sale; or

(d) In the sale of services and performance of the service sold when the compensation to the employee is computed on a commission basis; and

(2) Whose hours of work of a nature other than that described in (1)(a), (b), (c) and (d) of this section do not exceed 20 percent of the hours worked in the work week by nonexempt employees of the employer: Provided, That work performed incidental to and in conjunction with the employee's own outside sales or solicitations, including incidental deliveries and collections, shall not be regarded as nonexempt work; and

(3) Who is compensated by the employer on a guaranteed salary, commission or fee basis and who is advised of his status as "outside salesman."

[Order 76-5, § 296-128-540, filed 2/24/76.]

WAC 296-128-550 Regular rate of pay. The regular rate of pay shall be the hourly rate at which the employee is being paid, but may not be less than the established minimum wage rate. Employees who are compensated on a salary, commission, piece rate or percentage basis, rather than an hourly wage rate, unless specifically exempt, are entitled to one and one-half times the regular rate of pay for all hours worked in excess of 40 per week. The overtime may be paid at one and one-half times the piecework rate during the overtime period, or the regular rate of pay may be determined by dividing the amount of compensation received per week by the total number of hours worked during that week. The employee is entitled to one and one-half times the regular rate arrived at for all hours worked in excess of 40 per week.

[Order 76-5, § 296-128-550, filed 2/24/76.]

WAC 296-128-560 Compensating time off in lieu of overtime pay. The provisions of chapter 49.46 RCW requiring one and one-half times the regular rate of pay for hours worked in excess of 40 per week does not apply to any person who requests compensating time off in lieu of overtime pay. Therefore, compensating time may be as agreed upon by the employer and the individual employee at the request of the employee, but may not be imposed by the employer in lieu of overtime pay upon any employee who has not so requested such compensating time off.

[Order 76-5, § 296-128-560, filed 2/24/76.]

Chapter 296-130 WAC
FAMILY CARE

WAC

296-130-010	Declaration of purpose.
296-130-020	Definitions.
296-130-030	Employee rights.
296-130-035	Employee complaints.
296-130-040	Prohibited action.
296-130-050	Posting.
296-130-060	Notices of infraction.
296-130-065	Service on employers.
296-130-070	Appeal of infraction notice.
296-130-080	Penalty assessment.
296-130-500	Collective bargaining not impaired.

WAC 296-130-010 Declaration of purpose. It is in the public interest for employers to accommodate employees by providing reasonable leaves from work for family reasons. This chapter serves to establish a minimum standard allowing an employee to use the employee's accrued sick leave to care for a child of the employee.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-18-044 (Order 88-20), § 296-130-010, filed 8/31/88.]

WAC 296-130-020 Definitions. (1) "Employer" means any person, firm, corporation, partnership, business trust, legal representative, or other business entity which engages in any business, industry, profession, or activity in this state and employs one or more employees. Employer also includes the state, any state institution, any state agency, political subdivisions of the state, and any municipal corporation or quasi-municipal corporation.

(2) "Employee" means a worker who is employed in the business of an employer. "Employee," for the purposes of this chapter, also includes workers performing in an executive, administrative, professional, or outside sales capacity.

(3) "Employ" means to engage, suffer, or permit to work.

(4) "Accrued sick leave" means leave which the employee has accumulated by earning a certain number of hours or days per month or per year which the employee is entitled to use to continue his or her normal compensation during absences due to illness, accident, or other conditions which require medical treatment or supervision, and which is provided for by a collective bargaining agreement, employer/employee agreement, employer policy, ordinance, or civil service rule.

It does not include annual leave, vacation leave, or personal leave. It does not include any benefit which includes leave granted by short-term or long-term disability plans except in a case where those plans include a separate and identifiable component which allows the employee to accumulate by earning a certain number of hours or days per month or per year which the employee is entitled to use to continue his or her normal compensation in absence due to illness, accident, or other conditions which require medical treatment or supervision which is provided for by a collective bargaining agreement, employer/employee agreement, employee/employer policy, ordinance, or civil service rule. In a case where a short-term or long-term disability plan includes a separate and identifiable component which allows the employee to accumulate leave by earning a certain number of hours or days per month or per year which the

(2001 Ed.)

employee is entitled to use to continue his or her normal compensation in absence due to illness, accident, or other conditions which require medical treatment or supervision, only that separate identifiable portion shall be considered accrued sick leave.

(5) "Child of the employee" means any child under the age of eighteen who is:

(a) The natural offspring of the employee;

(b) The adopted child of the employee;

(c) The natural or adopted child of the employee's spouse; or

(d) Is under the employee's legal guardianship, legal custody, or foster care.

(6) "Health condition that requires treatment or supervision" shall include:

(a) Any medical condition requiring medication that the child cannot self medicate;

(b) Any medical or mental health condition which would endanger the child's safety or recovery without the presence of a parent or guardian; or

(c) Any condition warranting preventive health care such as physical, dental, optical or immunization services, when a parent must be present to authorize and when sick leave may otherwise be used for the employee's preventive health care.

(7) "Infraction" means an alleged violation of RCW 49.12.____ (chapter 236, Laws of 1988) as cited by the department.

(8) "Administrative law judge" means any person appointed by the chief administrative law judge, as defined in RCW 34.12.020(2) to preside at contested cases convened under RCW 49.12.____ (chapter 236, Laws of 1988).

(9) "Department" means the department of labor and industries.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-18-044 (Order 88-20), § 296-130-020, filed 8/31/88.]

WAC 296-130-030 Employee rights. An employer shall allow an employee to use the employee's accrued sick leave, when such benefit exists, to care for the child of the employee under the age of eighteen with a health condition that requires treatment or supervision as defined in WAC 296-130-020(6). In all other instances the same benefits and requirements that would govern the employee's personal use of accrued sick leave shall apply to the use of sick leave for the child's treatment or supervision. Nothing in this section requires an employer to provide sick leave.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-18-044 (Order 88-20), § 296-130-030, filed 8/31/88.]

WAC 296-130-035 Employee complaints. (1) An employee who believes that his or her employer has not complied with RCW 49.12.____ (chapter 236, Laws of 1988), or with the rules promulgated thereto, may file a complaint with the department within six months of the alleged violation. The complaint should contain the following:

(a) The name and address of the employee making the complaint;

(b) The name, address, and telephone number of the employer against whom the complaint is made;

[Title 296 WAC—p. 2107]

(c) A statement of the specific fact which constitute the alleged violation, including the date(s) on which the alleged violation occurred.

(2) Upon receipt of a complaint, the department shall forward written notice of the complaint to the employer, along with a warning of prohibited actions as stated in WAC 296-130-040.

(3) The department may investigate any complaint it deems appropriate. If the department determines that a violation of this chapter has occurred, it may issue a notice of infraction pursuant to WAC 296-130-060.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-23-117 (Order 88-29), § 296-130-035, filed 11/23/88.]

WAC 296-130-040 Prohibited action. No employer shall discharge or in any other way discriminate against or penalize any employee because he/she sought any information about family leave provisions, has filed a complaint alleging a violation of the chapter or exercised any right granted under the law. Nothing in this section however, shall prohibit an employer from applying its attendance policies.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-18-044 (Order 88-20), § 296-130-040, filed 8/31/88.]

WAC 296-130-050 Posting. (1) The department shall furnish each employer a poster describing an employee's rights and an employer's obligations provided in this chapter.

(2) The employer shall keep posted a current edition department poster stipulating the provisions of this chapter. The employer shall display this poster in a conspicuous place.

(3) The employer shall post its leave policies, if any, in a conspicuous place accessible to the employees at the employer's place of business.

(4) The posting requirement for employees whose leave policies are specified by individual contracts may be satisfied by stating that leave for such employees will be governed by the terms of such contracts.

(5) Employers with informal leave policies which are established on a case-by-case basis may satisfy the posting requirement by posting a statement explaining that policy.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-18-044 (Order 88-20), § 296-130-050, filed 8/31/88.]

WAC 296-130-060 Notices of infraction. The department may issue a notice of infraction to an employer who violates RCW 49.12.____ (chapter 236, Laws of 1988). The employment standards supervisor shall direct that notices of infraction contain the following when issued.

(1) A statement that the notice represents a determination that the infraction has been committed by the employer named in the notice and that the determination shall be final unless contested;

(2) A statement that the infraction is a noncriminal offense for which imprisonment shall not be imposed as a sanction;

(3) A statement of the specific violation which necessitated issuance of the infraction;

(4) A statement of the penalty involved if the infraction is established;

[Title 296 WAC—p. 2108]

(5) A statement informing the employer of the right to a hearing conducted pursuant to chapter 34.04 RCW if requested within twenty days of issuance of the infraction;

(6) A statement that at any hearing to contest the notice of infraction the state has the burden of proving, by a preponderance of the evidence, that the infraction was committed, and that the employer may subpoena witnesses including the agent that issued the notice of infraction;

(7) If a notice of infraction is personally served upon a supervisory or managerial employee of a firm or corporation, the department shall within ten days of service send a copy of the notice by certified mail to the employer;

(8) Constructive service may be made by certified mail directed to the employer named in the notice of infraction.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-18-044 (Order 88-20), § 296-130-060, filed 8/31/88.]

WAC 296-130-065 Service on employers. (1) If an employer is a corporation or a partnership, the department need not serve the employer personally. In such a case, if no officer or partner of a violating employer is present, the department may issue a notice of infraction to any supervisor or managerial employee.

(2) If the department serves a notice of infraction on a supervisory or managerial employee, and not on an officer, or partner of the employer, the department shall mail by certified mail a copy of the notice of infraction to the employer. The department shall mail a second copy by ordinary mail.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-18-044 (Order 88-20), § 296-130-065, filed 8/31/88.]

WAC 296-130-070 Appeal of infraction notice. (1) If an employer desires to contest the notice of infraction issued, the employer shall file two copies of a notice of appeal with the department at the office designated on the notice of infraction, within twenty days of issuance of the infraction.

(2) The department shall conduct a hearing in accordance with chapter 34.04 RCW and chapter 10-08 WAC.

(3) Employers may appear before the administrative law judge through counsel, or may represent themselves. The department shall be represented by the attorney general.

(4) All relevant evidence shall be admissible in a hearing convened pursuant to RCW 49.12.____ (chapter 236, Laws of 1988). Admission of evidence is subject to RCW 34.04.100 and 34.04.105 of the Administrative Procedure Act of Washington.

(5) The administrative law judge shall issue a proposed decision that includes findings of fact, conclusions of law, and if appropriate, any legal penalty. The proposed decision shall be served by certified mail or personally on the employer and the department. The employer or department may appeal to the director within thirty days after the date of issuance of the proposed decision. If none of the parties appeals within thirty days, the proposed decision may not be appealed either to the director or the courts.

(6) An appellant must file with the director an original and four copies of its notice of appeal. The notice of appeal must specify which findings and conclusions are erroneous. The appellant must attach to the notice the written arguments supporting its appeal.

(2001 Ed.)

The appellant must serve a copy of the notice of appeal and the arguments on the other parties. The respondent parties must file with the director their written arguments within thirty days after the date the notice of appeal and the arguments were served upon them.

(7) The director shall review the proposed decision in accordance with the Administrative Procedure Act, chapter 34.04 RCW. The director may: Allow the parties to present oral arguments as well as the written arguments; require the parties to specify the portions of the record on which the parties rely; require the parties to submit additional information by affidavit or certificate; remand the matter to the administrative law judge for further proceedings; and require a departmental employee to prepare a summary of the record for the director to review. The director shall issue a final decision that can affirm, modify, or reverse the proposed decision.

(8) The director shall serve the final decision on all parties. Any aggrieved party may appeal the final decision to superior court pursuant to RCW 34.04.130 unless the final decision affirms an unappealed proposed decision. If no party appeals within the period set by RCW 34.04.130, the director's decision is conclusive and binding on all parties.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-18-044 (Order 88-20), § 296-130-070, filed 8/31/88.]

WAC 296-130-080 Penalty assessment. An employer found to have committed an infraction under RCW 49.12.____ (chapter 236, Laws of 1988) may be assessed the maximum penalty of a fine of two hundred dollars for the first noncompliance violation. An employer that continues to violate the terms of the statute may be subject to a fine not to exceed one thousand dollars for each violation.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-18-044 (Order 88-20), § 296-130-080, filed 8/31/88.]

WAC 296-130-500 Collective bargaining not impaired. Nothing in this chapter shall be deemed to interfere with, impede, or in any way diminish the right of employees to bargain collectively with their employers through representatives of their own choosing in order to establish leave benefits in excess of the applicable minimum under the provisions of this chapter.

[Statutory Authority: RCW 43.22.270 and 1988 c 236. 88-18-044 (Order 88-20), § 296-130-500, filed 8/31/88.]

296-131-140	Variations.

WAC 296-131-001 Applicability. These standards, adopted pursuant to sections 83 through 86, chapter 380, Laws of 1989, shall apply to persons employed in agricultural labor as defined in RCW 50.04.150 and WAC 296-131-005. The standards in this chapter beginning at WAC 296-131-100 shall apply only to minors employed in agricultural labor. The standards in this chapter do not apply to the immediate family members of the officers of any business engaged in agricultural production of crops or livestock.

[Statutory Authority: RCW 49.30.030, 90-14-038, § 296-131-001, filed 6/29/90, effective 11/1/90. Statutory Authority: RCW 43.22.270, 1989 c 380 and chapter 49.46 RCW. 89-22-015 (Order 89-15), § 296-131-001, filed 10/24/89, effective 11/24/89.]

WAC 296-131-005 Definitions. For the purpose of these rules:

(1) A "minor" is a person of either gender, employed in agricultural labor, who is under the age of eighteen years.

(2) "Agricultural labor" is defined as services performed:

(a) On a farm, in the employ of any person, in connection with the cultivation of the soil, or in connection with raising or harvesting any agricultural or horticultural commodity, including raising, shearing, feeding, caring for, training, and management of livestock, bees, poultry, and furbearing animals and wildlife, or in the employ of the owner or tenant or other operator of a farm in connection with the operation, management, conservation, improvement, or maintenance of such farm and its tools and equipment; or

(b) In packing, packaging, grading, storing, or delivering to storage, or to market or to a carrier for transportation to market, any agricultural or horticultural commodity; but only if such service is performed as incident to ordinary farming operations.

"Agricultural labor" does not include employment in commercial packing houses, commercial storage establishments, commercial canning, commercial freezing, or any other commercial processing with respect to services performed in connection with the cultivation, raising, harvesting and processing of oysters or raising and harvesting of mushrooms or in connection with any agricultural or horticultural commodity after its delivery to a terminal market for distribution for consumption.

(3) "Department" means the department of labor and industries.

(4) "Director" means the director of the department of labor and industries.

(5) "Employ" means to engage, suffer, or permit to work in agricultural labor.

(6) "Employee" means any person employed by an employer, except those who are members of the immediate family of an employer.

(7) "Employer" means any person, firm, corporation, partnership, business trust, legal representative, or other business entity that engages in any agricultural activity in this state and employs one or more employees.

[Statutory Authority: RCW 49.30.030, 90-14-038, § 296-131-005, filed 6/29/90, effective 11/1/90.]

WAC 296-131-006 Authority to enter, inspect, and investigate places of employment and records, and to conduct interviews. In order to carry out the purposes of this chapter, the director or the director's authorized representative is authorized:

(1) To enter without delay any work site or area or other environment where work is performed by an employee or where employment records are, or are required to be, maintained; and

(2) To inspect, transcribe, and copy all pertinent records, and to inspect and investigate any such place of employment and all pertinent conditions, structures, machines, apparatus, devices, equipment, and materials therein, and to question privately any employer, owner, operator, agent, or employee.

[Statutory Authority: RCW 49.30.030 and 43.22.310, 92-15-099, § 296-131-006, filed 7/20/92, effective 8/20/92.]

WAC 296-131-010 Payment interval. All wages due shall be paid at no longer than monthly intervals to each employee on established regular pay days, unless federal law requires more frequent pay intervals. To facilitate bookkeeping, an employer may implement a regular payroll system in which wages from up to seven days before pay day may be withheld from the pay period covered and included in the next pay period.

[Statutory Authority: RCW 43.22.270, 1989 c 380 and chapter 49.46 RCW, 89-22-015 (Order 89-15), § 296-131-010, filed 10/24/89, effective 11/24/89.]

WAC 296-131-015 Pay statements. A pay statement shall be provided to each employee at the time wages are paid. The pay statement shall identify the employee, show the number of hours worked or the number of days worked based on an eight-hour day, the rate or rates of pay, the number of piece work units earned if paid on a piece work basis, the gross pay, the pay period, all deductions and the purpose of each deduction for the respective pay period. A pay statement shall also include the employer's name, address, and telephone number.

[Statutory Authority: RCW 43.22.270, 1989 c 380 and chapter 49.46 RCW, 89-22-015 (Order 89-15), § 296-131-015, filed 10/24/89, effective 11/24/89.]

WAC 296-131-017 Employment records. (1) Every employer shall keep for at least three years a record of the name, address, and occupation of each employee, dates of employment, rate or rates of pay, amount paid each pay period to each such employee and the hours worked.

(2) Every employer shall make the records described in subsection (1) of this section available to the director or the director's authorized representative at any time for inspection and transcription or copying and to the employee, upon request for that employee's work record, at any reasonable time.

[Statutory Authority: RCW 43.22.270, 1989 c 380 and chapter 49.46 RCW, 89-22-015 (Order 89-15), § 296-131-017, filed 10/24/89, effective 11/24/89.]

[Title 296 WAC—p. 2110]

WAC 296-131-020 Meals and rest periods. (1) Every employee employed more than five hours shall receive a meal period of at least thirty minutes. Employees working eleven or more hours in a day shall be allowed at least one additional thirty-minute meal period.

(2) Every employee shall be allowed a rest period of at least ten minutes, on the employer's time, in each four-hour period of employment. For purposes of computing the minimum wage on a piecework basis, the time allotted an employee for rest periods shall be included in the number of hours for which the minimum wage must be paid.

[Statutory Authority: RCW 49.30.030, 90-14-037, § 296-131-020, filed 6/29/90, effective 8/1/90.]

WAC 296-131-100 Permits to employ minors. (1) Within three days after the commencement of employment of one or more minors, an employer shall file with the department an application for a permit to employ minors. When validated by the supervisor of employment standards, this permit will authorize the employer to employ for one year any number of minor workers at the workplace specified in accordance with the conditions of the permit and the regulations established in this chapter.

(2) An employer shall at all times employ minors in accordance with the regulations established in this chapter, regardless whether the employer has filed with the department an application for a permit to employ minors as required in subsection (1) of this section.

(3) The department shall annually publicize the requirements of this chapter through departmental publications and other appropriate means designed to assist employers in complying with the law.

[Statutory Authority: RCW 49.30.030, 90-14-038, § 296-131-100, filed 6/29/90, effective 11/1/90.]

WAC 296-131-105 Parental and school authorization. (1) An employer of a minor shall be required to annually obtain written authorization from a minor's parent before employing the minor.

(2) Except when performing intermittent weekend work, a minor who is legally required to attend school and who is working during the school year shall obtain from his or her school written authorization to work a specified number of hours per day and per week up to the maximum permitted in WAC 296-131-120, based on an evaluation of the impact of work on the student's academic performance. School authorization is not required for high school graduates.

(3) The parental and school authorization required by this chapter shall be on forms supplied by the department and shall be kept on file by the employer.

(4) Neither parent nor school authorization is required for minors who are emancipated by court order.

(5) For purposes of this section, "intermittent weekend work" is defined as work during the weekend arranged to be performed after the end of the preceding school week. Work performed after the beginning of the next school day is not considered to be intermittent weekend work and requires school authorization. Work during more than two weekends per quarter is not considered to be intermittent weekend work.

[Statutory Authority: RCW 49.30.030. 90-14-038, § 296-131-105, filed 6/29/90, effective 11/1/90.]

WAC 296-131-110 Posting. (1) At least one copy of a valid permit to employ minors shall be posted in a conspicuous place at the workplace specified in the permit.

(2) An informational poster supplied by the department, describing in English and Spanish the rights of agricultural employees under this chapter, also shall be posted in a conspicuous place at the workplace specified in the permit.

[Statutory Authority: RCW 49.30.030. 90-14-038, § 296-131-110, filed 6/29/90, effective 11/1/90.]

WAC 296-131-115 Age of employment. No minor under the age of fourteen shall be employed in agriculture at any time except as follows: Minors twelve and thirteen years of age may be employed in the hand harvest of berries, bulbs, and cucumbers and in the hand cultivation of spinach during weeks when school is not in session.

[Statutory Authority: RCW 49.30.030. 90-14-038, § 296-131-115, filed 6/29/90, effective 11/1/90.]

WAC 296-131-120 Hours of work for minors in agriculture. (1) Minors legally required to attend school may not be employed during school hours except by special permission from school officials as provided in RCW 28A.27.010 and 28A.27.090.

(2)(a) Minors under the age of sixteen may work up to three hours a day on school days, up to eight hours a day on nonschool days and up to twenty-one hours a week during weeks when school is in session. Minors under the age of sixteen may work up to eight hours a day and up to forty hours a week during weeks when school is not in session.

(b) Except as otherwise provided, on days when school is in session, minors under the age of sixteen may not be employed before 7:00 a.m. nor after 8:00 p.m. On days when school is not in session, minors under the age of sixteen may not be employed before 5:00 a.m. nor after 9:00 p.m. On days when school is in session, minors under the age of sixteen employed in animal agriculture or whose employment in crop production requires daily attention to irrigation, may be employed beginning at 6:00 a.m.

(3)(a) Minors who are sixteen and seventeen years of age may work up to twenty-eight hours a week, up to four hours a day on school days and up to eight hours a day on nonschool days during weeks when school is in session. Minors who are sixteen and seventeen years of age may work up to ten hours per day and up to fifty hours per week during weeks when school is not in session. Minors who are sixteen and seventeen years of age may work up to sixty hours per week in the mechanical harvest of peas, wheat, and hay during weeks when school is not in session.

(b) Minors who are sixteen and seventeen years of age may not be employed before 5:00 a.m. nor after 10:00 p.m. Minors who are sixteen and seventeen years of age may not work later than 9:00 p.m. on more than two consecutive nights preceding a school day.

(4) Except for minors employed in dairy or livestock production, in the harvest of hay, or whose employment in

(2001 Ed.)

crop production requires daily attention to irrigation, no minor shall be employed more than six days in any one week.

(5) The provisions of this section shall not apply to minors sixteen years of age and older who can demonstrate emancipation by either (a) providing a marriage certificate as proof of marriage, or (b) providing a birth certificate that names the minor as a parent. Copies of such documents must be retained by the employer for one year, pursuant to the requirements of WAC 296-131-130.

[Statutory Authority: RCW 49.30.030 and 43.22.310. 92-15-099, § 296-131-120, filed 7/20/92, effective 8/20/92. Statutory Authority: RCW 49.30.030. 90-14-038, § 296-131-120, filed 6/29/90, effective 11/1/90.]

WAC 296-131-125 Prohibited and hazardous employment. (1) Employment in the following occupations in agriculture is prohibited to minors under the age of sixteen:

(a) Operating a tractor of over 20 PTO horsepower, or connecting or disconnecting an implement or any of its parts to or from such a tractor.

(b) Operating or assisting to operate (including starting, stopping, adjusting, feeding, or any other activity involving physical contact associated with the operation) any of the following machines:

(i) Corn picker, cotton picker, grain combine, hay mower, forage harvester, hay baler, potato digger, or mobile pea viner;

(ii) Feed grinder, crop dryer, forage blower, auger conveyor, or the unloading mechanism of a nongravity-type self-unloading wagon or trailer; or

(iii) Power post-hole digger, power post driver, or non-walking type rotary tiller.

(c) Operating or assisting to operate (including starting, stopping, adjusting, feeding, or any other activity involving physical contact associated with the operation) any of the following machines:

(i) Trencher or earthmoving equipment;

(ii) Fork lift; or

(iii) Potato combine.

(d) Working on a farm in a yard, pen, or stall occupied by

a:

(i) Bull, boar, or stud horse maintained for breeding purposes; or

(ii) Sow with suckling pigs, or cow with newborn calf (with umbilical cord present).

(e) Felling, bucking, skidding, loading, or unloading timber with butt diameter of more than six inches.

(f) Working from a ladder or scaffold (painting, repairing, or building structures, pruning trees, picking fruit, etc.) at a height of over twenty feet.

(g) Driving a bus, truck, or automobile when transporting passengers, or riding on a tractor as a passenger or helper.

(h) Working inside:

(i) A fruit, forage, or grain storage designed to retain an oxygen deficient or toxic atmosphere;

(ii) An upright silo within two weeks after silage has been added or when a top unloading device is in operating position;

(iii) A manure pit; or

(iv) A horizontal silo while operating a tractor for packing purposes.

(i) Working in any manufacturing occupation.

(j) Working in any processing operations, including food processing.

(k) Working in transportation, warehouse, and storage or construction.

(l) Work in or about engine or boiler rooms.

(m) Work in freezers, meat coolers, and all work in preparing meats for sale. (Wrapping, sealing, labeling, weighing, pricing, and stocking are permitted if work is performed away from meat-cutting and preparation areas.)

(2) Employment in the following occupations in agriculture is prohibited to all minors:

(a) Handling, mixing, loading or applying (including cleaning or decontaminating equipment, disposal or return of empty containers, or serving as a flagman for aircraft applying) agricultural chemicals classified under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 135 et seq.) as Category I of toxicity, identified by the word "poison" and the "skull and crossbones" on the label; or Category II of toxicity, identified by the word "warning" on the label.

(b) Handling or using a blasting agent, including but not limited to, dynamite, black powder, sensitized ammonium nitrate, blasting caps, and primer cord.

(c) Transporting, transferring, or applying anhydrous ammonia.

(d) Work involving circular, band or chain saws, power driven wood working machines, power driven metal forming, punching and shearing machines, and guillotine shears.

(e) Work involving slaughtering, meat packing, or processing and rendering.

(f) Work involving wrecking and demolition.

(g) Work involving roofing.

(h) Work involving mechanical excavation.

(i) Work in any place where a strike or lockout exists.

(3) The employment prohibited by subsection (1) of this section shall not apply to the employment of any minor as a vocational agriculture student-learner in any of the occupations described in subsection (1)(a), (b), (c), (d), (e), or (f) of this section when each of the following requirements are met:

(a) The student-learner is enrolled in a vocational education training program in agriculture under a recognized state or local educational authority, or in a substantially similar program conducted by a private school;

(b) Such student-learner is employed under a written agreement which provides that the work of the student-learner is incidental to his training; that such work shall be intermittent, for short periods of time, and under the direct and close supervision of a qualified and experienced person; that safety instruction shall be given by the school and correlated by the employer with on-the-job training; and that a schedule of organized and progressive work processes to be performed on the job have been prepared;

(c) Such written agreement contains the name of the student-learner, and is signed by the employer and by a person authorized to represent the educational authority or school; and

(d) Copies of each such agreement are kept on file by both the educational authority or school and by the employer.

(4) The employment prohibited by subsection (1) of this section shall not apply to the employment of any minor in

those occupations for which the minor has successfully completed one or more federal extension service training programs described in 29 C.F.R. section 570.72(b) and who has been instructed by the employer in the safe and proper operation of the specific equipment to be used, who is continuously and closely supervised by the employer where feasible or, where not feasible, in work such as cultivating, whose safety is checked by the employer at least at midmorning, noon, and midafternoon, or during the first and second halves of the workday, whichever is more frequent.

(5) The employment prohibited by subsection (1) of this section shall not apply to the employment of any minor in those occupations for which the minor has successfully completed one or more of the vocational agriculture training programs described in 29 C.F.R. section 570.72(c) and who has been instructed by the employer in the safe and proper operation of the specific equipment to be used, who is continuously and closely supervised by the employer where feasible or, where not feasible, in work such as cultivating, whose safety is checked by the employer at least at midmorning, noon, and midafternoon, or during the first and second halves of the workday, whichever is more frequent.

(6) No minor shall be permitted to ride in or work in the vicinity of a vehicle driven by any person who is under the age of sixteen or anyone who does not possess a valid driver's license.

(7) No minor shall be employed in agriculture in the harvest of any crop to which agricultural chemicals described in subsection (2)(a) of this section have been applied, prior to the expiration of the preharvest interval or within fourteen days after the application if no preharvest interval has been established.

(8) If, upon inspection or investigation, the director or the director's designee believes that an employer is violating this section creating a danger from which there is a substantial probability that death or serious physical harm could result to a minor employee, the director or the director's designee may issue an order under RCW 34.05.479 immediately restraining the condition, practice, method, process, or means creating the danger and suspend the employer's permit authorizing employment of minors until action is taken to avoid, correct, or remove the danger.

(9) A copy of the federal regulations referenced in subsections (4) and (5) of this section may be obtained from the department upon request.

[Statutory Authority: RCW 49.30.030. 90-14-038, § 296-131-125, filed 6/29/90, effective 11/1/90.]

WAC 296-131-126 Lifting. Where weights in excess of twenty pounds are to be lifted, carried, pushed, or pulled as a normal part of an employee's responsibility, the employer shall instruct minors on correct weight lifting techniques prior to the commencement of work and display a poster developed by the department illustrating correct weight lifting techniques.

[Statutory Authority: RCW 49.30.030. 90-14-038, § 296-131-126, filed 6/29/90, effective 11/1/90.]

WAC 296-131-130 Recordkeeping. In addition to the records required under WAC 296-131-017, an employer is

responsible for obtaining and keeping on file for one year the following information concerning each minor employee:

(1) Proof of age by means of a copy of one of the following: Birth certificate; driver's license; baptismal record; Bible record; insurance policy at least one year old indicating the date of birth; witnessed statement of the parent or guardian; or a completed federal employment eligibility verification (Form I-9);

(2) Parental authorization required by WAC 296-131-105;

(3) School authorization required by WAC 296-131-105;

(4) Documentation of emancipation as provided by WAC 296-131-120(5).

Every employer shall make the records described in this section available to the director or the director's authorized representative at any time for inspection and transcription or copying and to the employee, upon request for that employee's work record, at any reasonable time.

[Statutory Authority: RCW 49.30.030 and 43.22.310. 92-15-099, § 296-131-130, filed 7/20/92, effective 8/20/92. Statutory Authority: RCW 49.30.030, 90-14-038, § 296-131-130, filed 6/29/90, effective 11/1/90.]

WAC 296-131-135 Revocation of permits. (1) The department may revoke any employer's permit to employ minors upon a showing that the conditions of its issuance are not being met, or that other conditions exist which are detrimental to the health, safety, or welfare of the minor.

(2) The department may refuse to issue or renew a permit to employ minors. If the department refuses to issue or renew a permit, it shall send the employer a notice of denial. The notice of denial shall explain the grounds for denial of the permit. The department may refuse to renew a permit if the conditions of its initial issuance are not being met.

(3) Any employer aggrieved by any action taken by the department under this section may appeal the action or decision by filing notice of the appeal with the director within thirty days of the department's action or decision. Upon receipt of an appeal, a hearing shall be held in accordance with chapter 34.05 RCW. The director shall issue all final orders after the hearing. Final orders are subject to appeal in accordance with chapter 34.05 RCW. Orders not appealed within the time period specified in chapter 34.05 RCW are final and binding.

[Statutory Authority: RCW 49.30.030, 90-14-038, § 296-131-135, filed 6/29/90, effective 11/1/90.]

WAC 296-131-140 Variances. (1) Upon written application from an employer or an organization representing employers, a variance permitting employment of minors otherwise prohibited under WAC 296-131-120 or 296-131-125 may be granted for good cause shown. The employer or the organization representing employers shall give written notice to the employees so that they may submit their views to the department on any variance request.

(2) The department may afford the applicant and any involved employee, or employee representatives, the opportunity for oral presentation whenever circumstances of the particular application warrant.

(3) "Good cause" shall mean, but not be limited to, those situations in which the employer demonstrates that (a) the

(2001 Ed.)

granting of the variance would not have a harmful effect upon the health, safety, or welfare of the minor employees involved; (b) the granting of the variance would not have a deleterious effect on school attendance or the academic performance of minors; and (c) the variance is necessary to meet usual crop cultural or harvest requirements.

(4) Upon application from an employer or an organization representing employers a variance permitting employment of minors otherwise prohibited under these rules may be granted by the director or an authorized representative of the director in response to a weather emergency.

[Statutory Authority: RCW 49.30.030, 90-14-038, § 296-131-140, filed 6/29/90, effective 11/1/90.]

WAC 296-133-010 Intent and purpose. These rules are adopted pursuant to the authority of section 8, chapter 156, Laws of 1972 ex. sess., (hereinafter referred to as the "act") as supplementary to the act for the purpose of providing rules of procedure to aid and assist the department of labor and industries, its authorized agents, and interested parties in proceedings under the act. The department of labor and industries, (hereinafter referred to as "department") and its authorized agents may waive any requirements of these rules, unless a party shows that it would be prejudiced by such waiver or unless the rule to be waived involves a mandatory provision of the act.

[Order 72-13, § 296-133-010, filed 7/31/72.]

WAC 296-133-020 Policy. It is the policy of the department to expedite the settlement of labor disputes between health care activities and their employees and to promote peace in labor relations and nothing in these rules should be construed to prevent the department and its authorized agents, where not inconsistent with the intent and purpose of the act, from using its best efforts to adjust through conciliation any labor dispute arising between employers, employees or employee organizations subject to the provisions of the act.

[Order 72-13, § 296-133-020, filed 7/31/72.]

WAC 296-133-030 Construction. These rules shall be liberally construed to effectuate the purposes and provisions of the act.

[Order 72-13, § 296-133-030, filed 7/31/72.]

WAC 296-133-040 General. Any terms used in these rules that are defined in the act shall have the same meaning as set forth therein.

[Order 72-13, § 296-133-040, filed 7/31/72.]

WAC 296-133-050 Petitioner. "Petitioner" shall mean any person, employer or employee association authorized to request the department to take action under the provisions of the act or these rules.

[Order 72-13, § 296-133-050, filed 7/31/72.]

WAC 296-133-060 Authorized agent. "Authorized agent" of the department shall mean the director, the supervisor of industrial relations, a labor mediator or a hearing officer specifically authorized by the director to conduct proceedings under the act.

[Order 72-13, § 296-133-060, filed 7/31/72.]

WAC 296-133-070 Employee association or organization—Qualifications. In order to qualify as an employee association as referred to in section 3 of the act, any such organization or association:

(1) Upon request by the authorized agent, or any party of interest, must produce authentic records of how, when and by whom the organization was formed.

(2) Shall have a written constitution and/or bylaws which plainly indicates that one of the primary purposes of the organization or association is to represent employees in labor relations matters with employers and is consistent with the requirements of the act and is available for review by any member.

(3) The constitution and/or bylaws must provide:

(a) An approved, customary or recognized method for the nomination and election of officers in accordance with accepted parliamentary procedures, the terms of such officers not to exceed four years.

(b) An approved method of financial record keeping and a financial audit at least once a year, which audit is available to any member for review.

(c) That at least four regular meetings must be held each year with adequate notice of meetings to all members.

[Title 296 WAC—p. 2114]

(d) That a specific and reasonable minimum number of members or a percentage of the membership must be present to form a quorum before any organization business may be transacted at regular or special meetings.

[Order 72-13, § 296-133-070, filed 7/31/72.]

WAC 296-133-080 Bargaining representative—Selection of—Petition. Applications to the department regarding the selection of a bargaining representative to represent employees of a bargaining unit of an employer shall be by petition on such form or forms as may be provided by the department. A written petition may be accepted by the department if the petition contains substantially the same information required by the forms provided by the department.

[Order 72-13, § 296-133-080, filed 7/31/72.]

WAC 296-133-090 Filing of petition. The petition for certification, decertification or amendment of certification of the representative of a bargaining unit must be filed either:

(1) With the Supervisor, Division of Industrial Relations, Department of Labor and Industries, General Administration Building, Olympia, Washington 98504; or

(2) If the health care activity is situated in western Washington with the Labor Mediator, Division of Industrial Relations, Department of Labor and Industries, 300 West Harrison Street, Seattle, Washington 98119; or

(3) If the health care activity is situated in eastern Washington with the Labor Mediator, Division of Industrial Relations, Department of Labor and Industries, North 1322 Post Street, Spokane, Washington 99207.

[Order 72-13, § 296-133-090, filed 7/31/72.]

WAC 296-133-100 Contents of petition—General. Petitions for the certification, decertification, or amendment of certification of an employee representative of a bargaining unit shall contain the following:

(1) A statement as to whether the petition is filed by a health care activities employee organization, a health care activities employee or a health care activities employer.

[Order 72-13, § 296-133-100, filed 7/31/72.]

WAC 296-133-110 Contents of petition filed by employee or employee organization. Petitions for certification decertification or amendment of certification filed by a health care activities employee organization or a health care activities employees, shall contain:

(1) A description of the bargaining unit which the petitioner claims to be appropriate, a statement as to whether there is any disagreement between the petitioner and interested parties as to the nature and scope of the proposed bargaining unit; and statement that the petitioner is authorized to represent at least thirty percent of the employees within the proposed bargaining unit.

(2) The names and addresses of any persons or employee organizations, known to the petitioner, who claim to represent any employees in the proposed appropriate bargaining unit; the expiration dates and brief descriptions of any collec-

tive bargaining agreements which may be in effect between an employer and an employee organization covering all or a portion of the employees in the proposed bargaining unit.

(3) The number and job titles of the employees in the proposed bargaining unit.

(4) A statement that the employer declines to recognize the petitioner as the employee representative, or that the health care activities employer is about to recognize another employee organization as the exclusive bargaining representative or the presently recognized or certified employee organization is no longer the representative of the employees in the proposed bargaining unit.

(5) The name, affiliation, if any, and the address of the petitioner.

(6) Whether a work stoppage or picketing is in progress at the health care activity and, if so, the approximate number of employees participating and the date that such work stoppage or picketing commenced.

(7) Any other relevant factual information.

(8) A specific statement of the relief or remedy that the petitioner seeks the department to invoke.

[Order 72-13, § 296-133-110, filed 7/31/72.]

WAC 296-133-120 Contents of petition filed by employer. Petitions for certification or amendment of certification of a bargaining representative filed by a health care activities employer, shall contain:

(1) A factual statement setting forth that one or more individuals or employee organizations has presented to the petitioner a claim to be recognized as the exclusive bargaining representative of all employees in a bargaining unit claimed to be appropriate; the job titles of the employees of such bargaining unit; the number of employees in such unit; and a statement of reasons as to whether the petitioner agrees or disagrees as to the nature or scope of such requested bargaining unit.

(2) The name or names, affiliation, if any, and addresses of individuals or employee organizations known to the petitioner making such claim for recognition as to the exclusive bargaining representative of employees in the health care activity.

(3) A statement regarding whether the petitioner has contracts with any employee organization or other representatives of employees, and if so, the expiration dates of such agreements.

(4) A statement as to whether or not a work stoppage or picketing is in progress at the health care activity involved, and if so, the approximate number of employees participating, and the date such work stoppage or picketing commenced.

(5) A statement of other relevant facts.

(6) A statement regarding the remedy or relief the petitioner requests the department to invoke.

[Order 72-13, § 296-133-120, filed 7/31/72.]

WAC 296-133-130 Intervention. Any third party having a legitimate interest in any proceedings commenced under the act may file a petition seeking intervention in such proceedings setting forth facts sufficient to establish such

(2001 Ed.)

interests and setting forth in such petition the remedy or relief the petitioner seeks the department to invoke.

For the purposes of third party intervention, "legitimate interest" means that the petitioner must allege in the petition for intervention and be prepared to prove if requested that it is authorized to represent at least thirty percent of the employees within a proposed bargaining unit before leave to intervene may be granted. Any employee organization which has a signed, valid collective bargaining agreement encompassing the proposed bargaining unit or any portion thereof shall be considered to have a legitimate interest upon presentation to the department of an executed authentic copy of such collective bargaining agreement.

[Order 72-13, § 296-133-130, filed 7/31/72.]

WAC 296-133-140 Conferences—Notice of hearing.

Upon the filing of petition for certification, decertification or amendment of certification of an exclusive bargaining representative of employees and the determination of an appropriate bargaining unit, an authorized agent shall confer with and may hold informal conferences with the known interested parties in an effort to ascertain the agreed upon facts of the controversy. The authorized agent shall encourage the parties to agree upon an appropriate bargaining unit within the limitations of the act. Whenever the authorized agent shall determine that the parties are unable to agree upon an appropriate bargaining unit, and is unable to settle the controversy without hearing, a hearing shall be conducted. Notice of such hearing, with the time and place of such hearing, shall be given to all parties by mail at least six days prior to the date of hearing, excluding Saturdays, Sundays and legal holidays. Within a reasonable time following the determination of an appropriate bargaining unit, the authorized agent shall provide for a bargaining representation election in accordance with the provisions of section 3 of the act and as further provided in these rules.

[Order 72-13, § 296-133-140, filed 7/31/72.]

WAC 296-133-150 Petition—Amendments or withdrawals. At any time prior to the issuance of the written notice of a bargaining representation election, a petitioning party may, subject to the discretion of the authorized agent, amend or withdraw his petition.

[Order 72-13, § 296-133-150, filed 7/31/72.]

WAC 296-133-160 Unit determinations—Considerations. Whenever the department is called upon to make a determination of an appropriate bargaining unit within a health care activity, within the limitations of the act, the department shall consider the duties, skills and working conditions of the health care activities employees; the history of collective bargaining by the health care activities employees and their bargaining representative within the proposed bargaining unit and in the health care industry; the extent of organization among the health care activities employees; the desires of such employees and the affect of the proposed bargaining unit upon the efficiency of administration of the health care activity.

[Order 72-13, § 296-133-160, filed 7/31/72.]

WAC 296-133-170 Representation questions—Timeliness. The department will not consider any question of representation within any bargaining unit or subdivision thereof in any health care activity within which in the preceding twelve-month period a valid election has been held. Nor will the department entertain any petition giving rise to the question of representation within any bargaining unit or portion thereof with a health care activity having a collective bargaining agreement in effect, except during the period not more than ninety nor less than sixty days prior to the expiration date of any such agreement. A collective bargaining agreement which contains a provision for automatic renewal or extension of the agreement or which is effective for a term of more than three years shall not be deemed to be a valid collection bargaining agreement for the purposes of this section.

[Order 72-13, § 296-133-170, filed 7/31/72.]

WAC 296-133-180 Employee lists. Health care activities employers shall furnish a current list of the names and addresses of all employees in a proposed or agreed upon bargaining unit prior to any scheduled representation hearing. The lists of such employees shall be available upon request to any organization which has been qualified under these rules and meeting the requirements of section 3 of the act.

[Order 72-13, § 296-133-180, filed 7/31/72.]

WAC 296-133-190 Authorization cards—Acceptability. In order to be acceptable as evidence of representation for the purposes of the thirty percent requirements of section 3 of the act, individual authorization cards must be signed and dated by the employee expressing his intention to be represented by a specific bargaining representative. A card signed and dated six months or more prior to the date on which examination of cards for representation purposes commences shall be considered invalid and not acceptable for representation purposes.

[Order 72-13, § 296-133-190, filed 7/31/72.]

WAC 296-133-200 Conduct of election. In the event a representation election is conducted for the purposes of certification, the following rules shall apply:

(1) Notice of election shall be given to all interested parties, and shall be prominently posted by the employer at a place or places within the health care services facility reasonably accessible to all employees. Notices of election shall be sent by mail to all interested parties no less than ten days prior to the date of the election excluding Saturdays, Sundays and legal holidays. Notices of election shall contain the following information; the date of election, hours and place of election, a list of employees eligible to vote, a description of the bargaining unit and a listing of employee organizations from which eligible employees may choose by ballot as well as a choice that such employees do not wish to be represented by any bargaining representative.

(2) Employee shall be deemed eligible to vote in an election for the certification of an exclusive bargaining representative of the employees of an appropriate bargaining unit who are regularly employed within the bargaining unit, either full or part time, and who are in the employ of the employer

within fourteen days prior to the date of the issuance of the notice of election and on the date of election, except, supervisors as defined in section 2, subsection 5 of the act, and guards as defined in section 2, subsection 6 of the act, unless the bargaining unit is exclusively devoted to employees serving in the capacity of guards. Employees otherwise eligible to vote in a certification election may be permitted to vote by absentee ballot upon the filing of an affidavit with the authorized agent indicating that such person is eligible to vote in the certification election and that by reason of physical incapacity will be unable to be present at the balloting place on the date of election. The casting of ballots in a representation election by proxy will not be permitted.

(3) Each of the interested parties may designate one person as observer at the polls. Unless otherwise stipulated by the interested parties, observers must be nonsupervisory employees of the health care activities employer.

(4) Any observer, or the authorized agent, for good cause may challenge any employee's eligibility to vote. A challenged ballot shall be placed in an envelope bearing no identifying marks. It shall be placed in another envelope upon which shall be written the name of the employee desiring to cast a ballot, the reasons for which the ballot was challenged, by whom it was challenged, the polling place at which it was challenged, and the envelope shall be sealed and initialed by the authorized agent.

(5) The challenged ballots previously placed in separate envelopes shall be placed in a sealed envelope marked "challenged ballots" and sent along with the tally sheet to the authorized agent. The challenged ballots shall not be opened or counted unless the counting of such ballots might affect the results of the election. If the challenged ballots might affect the results of the election, the authorized agent shall conduct an investigation into and if requested conduct a formal hearing on the validity of the challenges made. If it is concluded that the challenge was properly made, that ballot shall be excluded from the count. Otherwise, such ballot shall be counted as cast.

(6) Ballots may not be tallied until after the time for the closing of the polls unless all eligible voters have cast their ballot.

(7) Within five days after the tally of the ballots has been furnished, any party may file with the authorized agent an original and three copies of objections to the conduct of the election, or conduct affecting the results of the election, which shall contain a short factual statement of the reasons for the objections. Such filing must be timely, whether or not the challenged ballots are sufficient in number to affect the results of the election. Copies of such objections shall immediately be served by mail upon the other parties by the party filing them. If objections are filed to the conduct of the election, or conduct affecting the result of the election, the authorized agent shall investigate such objections. If the objections to the conduct of the election were sustained and the objections would affect the results of the election, the authorized agent, if requested by one of the interested parties, shall conduct a formal hearing.

[Order 72-13, § 296-133-200, filed 7/31/72.]

WAC 296-133-210 Run-off election procedure.

Where more than one employee organization is on the ballot, and neither of the three or more choices receives votes from a majority of the votes cast in the election, a run-off election shall be held. The run-off ballot shall contain the two choices which receive the largest and second largest number of votes.

[Order 72-13, § 296-133-210, filed 7/31/72.]

WAC 296-133-220 Certification.

If no timely objections are filed, the authorized agent will certify, as an exclusive bargaining representative, the employee organization which receives votes from a majority of the employees who vote in the election or any run-off election or will certify that no employee organization receive votes from a majority of the employees who voted in the election or any run-off election. A copy of such certification shall be mailed to all interested parties within ten days of certification, along with a certification of the results of the election.

[Order 72-13, § 296-133-220, filed 7/31/72.]

WAC 296-133-230 Unfair labor practices—Who may file.

Any employee or employee organization or a health care activities employer may file in writing an unfair labor practice charge with the department of labor and industries, alleging an unfair labor practice as set forth in the applicable provisions of sections 4 and 5 of the act: Provided, That this section and other sections of these rules relating to unfair labor practice charges, shall not be construed to prohibit an employee, an employee organization or an employer from instituting court proceedings as authorized under section 7 of the act without first having exhausted the remedies provided by these rules, except, in those cases in which an employee, an employee organization or an employer requests the director of labor and industries to exercise the authority invested in him to institute court proceedings to seek relief from the commission of an unfair labor practice. Any decision by a court rendered upon the merits of an unfair labor practice charge pursuant to a legal action instituted under the authority of section 7 shall be deemed res judicata and a bar to maintaining proceedings under this section and other sections of these rules relating to unfair labor practice charges.

[Order 72-13, § 296-133-230, filed 7/31/72.]

WAC 296-133-240 Filing of charges.

Unfair labor practice charges shall be filed on such form or forms provided by the department and shall contain the following:

- (1) The name and address of the health care activities employer.
- (2) The name and address of the person or organization who is filing the charges.
- (3) The statement as to the basis of the charge which shall be specific as to facts, names, addresses, dates and places.
- (4) A statement as to whether or not the complainant has instituted legal proceedings under the authority of section 7 of the act seeking relief from the alleged commission of an unfair labor practice.
- (5) The unfair labor practice charges shall be verified under oath in substantially the following form:

(2001 Ed.)

....., being first sworn on oath, deposes and says: That he is the complainant named in the foregoing unfair labor practice charges, that he has read the unfair labor practice charges, knows the contents thereof and believes the same to be true and correct to the best of his knowledge and belief.

.....
(Signature of Complainant)

Subscribed and sworn to before me on this
..... day of 1972.

.....
Notary Public in and for the
State of Washington, Residing at

[Order 72-13, § 296-133-240, filed 7/31/72.]

WAC 296-133-250 Actionable charges—Dismissals.

Upon receipt of an unfair labor practice charge, the department shall determine whether or not the complainant has alleged actionable charges of unfair labor practices under the provisions of the act. If the department finds that actionable charges have been alleged by the complainant, the department may give notice of not less than three days to the parties to the controversy that an informal hearing conference will be held at which conference testimony and evidence will be taken under oath to determine whether such charges are factually meritorious or frivolous. If the charges are found to be actionable charges and the evidence obtained at the informal hearing conference discloses that the charges are made in good faith and give rise to substantial questions of fact or law, the department shall issue a complaint and schedule the matter for hearing. If the informal hearing conference discloses that the unfair labor practice charges are frivolous and not made in good faith and do not give rise to substantial questions of fact or law, the unfair labor practice charges shall be dismissed and those persons or organizations named in such charges shall be notified in writing of such dismissal and the reasons for the dismissal. If the department finds that actionable charges have not been alleged under the provisions of the act, the unfair labor practice charges shall be dismissed and those persons or organizations named in such charges shall be notified in writing of such dismissal and the reasons for the dismissal.

[Order 72-13, § 296-133-250, filed 7/31/72.]

WAC 296-133-260 Remedial orders.

Remedial orders may be issued by the department which shall afford an appropriate remedy or relief consistent with the provisions of the act and the findings and conclusions of the authorized agent, which may include the prominent posting of such remedial orders within the health care activity at such place or places reasonably accessible to all employees for periods of time not to exceed six months.

[Order 72-13, § 296-133-260, filed 7/31/72.]

WAC 296-133-270 Extensions of time.

Whenever in these rules provision is made for the conducting of a hearing by the authorized agent for the purpose of taking testimony and evidence after the giving of a notice of the time and place

of such hearing, the authorized agent may upon his own motion change the time for such hearing to a later date and change the place for such hearing. In addition, any party to the hearing process may upon written application to the authorized agent upon the basis of good cause shown in such application be granted an extension of time and a change of the date or place or both for such hearing which is reasonably convenient to the parties.

[Order 72-13, § 296-133-270, filed 7/31/72.]

WAC 296-133-280 Impasse-determination. Whenever either a health care activities employer or the exclusive bargaining representative of the bargaining unit of such health care activity are of the opinion that an impasse has arisen between the parties in the process of collective bargaining, either party may request the department in writing to determine whether an impasse exists in the collective bargaining process.

For the purpose of these rules and supplementary to section 9 of the act, an impasse in the collective bargaining process will be presumed to have been reached when the parties have not agreed upon a collective bargaining contract and an issue or issues remain upon which neither party is willing to agree, nor make in good faith concessions or make further concessions in good faith, nor agree upon any good faith proposal nor make further proposals in good faith for the settlement of any issue remaining unresolved.

For the purpose of these rules and supplementary to the act, the terms "collective bargaining" means the performance of the mutual obligations of the employer and the bargaining representative of the employees to meet at reasonable times, to confer in good faith with respect to wages, hours and other terms and conditions of employment, or the negotiations of an agreement, or any question arising thereunder, and the execution of a written contract incorporating any agreement reached, but such obligation does not compel either party to agree to a proposal or require the making of a concession.

In any case in which the department is requested to determine whether an impasse has been reached in the collective bargaining process, the authorized agent shall request the parties representing the employer, and the parties representing the exclusive bargaining representative in the negotiations to meet and confer with the authorized agent for the purpose of an informal hearing conference to enable a determination of the facts to be made as to whether an impasse has been reached in the collective bargaining process. For that purpose the authorized agent may take evidence and testimony under oath. If the authorized agent determines that an impasse has been reached in the collective bargaining process, he shall forthwith enter findings and conclusions forming the basis of his belief that an impasse has been reached and setting forth therein the specific issues remaining unresolved between the parties which constitute the impasse accompanied by an order declaring an impasse and ordering the parties to forthwith choose and impanel a board of arbitrators pursuant to the provisions of section 9 of the act. Which order shall further require the parties to furnish copies of the authorized agent's findings and conclusions and order declaring an impasse to each member of the panel of arbitrators for

[Title 296 WAC—p. 2118]

their guidance upon the subject of the issues remaining unresolved constituting the impasse.

If an impasse is found not to have been reached in the process of collective bargaining, the authorized agent shall enter findings and conclusions and order the parties to resume the process of collective bargaining.

[Order 72-13, § 296-133-280, filed 7/31/72.]

WAC 296-133-290 Administrative appeals to the director. Any employer or employee of a health care activity or employee organization or other person or organization who was a party in the proceeding before the authorized agent and aggrieved by any action taken or decision made by any authorized agent may appeal such action or decision to the director of the department of labor and industries by filing a notice of such appeal with the director of the department of labor and industries and the authorized agent within thirty days of such action or decision. The notice of appeal shall be accompanied by a concise numbered statement of the assignments of error which are to be relied upon and are the subject of the appeal. Copies of the notice of appeal and assignments of error shall be served upon all parties to the proceeding before the authorized agent. Proof of such service shall be filed in the office of the director. The notice of appeal may in the discretion of the director suspend such action or decision of the authorized agent pending the determination of the appeal by the director. The director shall review the record and written briefs on appeal filed by the respective parties and may bear oral argument regarding the issues on appeal. The director shall decide the issues raised by the appeal and shall notify all parties in writing of his decision. The decision of the director in the absence of an appeal to the superior court pursuant to the Administrative Procedure Act shall be final at the expiration of thirty days from the date of filing of such decision.

[Order 72-13, § 296-133-290, filed 7/31/72.]

WAC 296-133-300 Appeal briefs. Typewritten memoranda of authority or appeal briefs shall be filed in the office of the director by the respective parties to the appeal thirty days following the filing of the notice of appeal. Any party to the appeal filing an appeal brief may request that a hearing of oral arguments upon the appeal be held before the director. Parties to the appeal not filing an appeal brief will not be granted oral hearing of arguments before the director nor permitted to present oral arguments to the director at any hearing that may be held for the presentation of arguments on appeal. The time and place for hearing oral arguments, when requested, will be fixed at the expiration of the time for filing briefs and notice of any such hearing will be sent to all parties to the appeal.

[Order 72-13, § 296-133-300, filed 7/31/72.]

WAC 296-133-310 Appeal briefs—Contents. In addition to the cover or title pages of the brief and any index, appeal briefs shall consist of the following subdivisions, titled with distinctive type and in the order indicated:

(1) Statement of the case. Under this heading the following shall be included: A brief statement of the nature of the

(2001 Ed.)

case which is the subject of the appeal and a clear and concise statement of the facts appropriate to an understanding of the nature of the controversy, with page references to the record on appeal.

(2) Assignments of error. Each error relied upon and served with the notice of appeal shall be clearly pointed out and discussed under the appropriately designed headings. No alleged error of the authorized agent will be considered unless the same be definitely pointed out in the assignments of error in the appellant's brief. Whenever error is assigned to any findings of fact or conclusion of the authorized agent, so much of the findings or conclusions claimed to be erroneous shall be set out verbatim in the brief.

(3) Argument of counsel for appellant shall set forth and discuss the authorities in support of the position of the appellant and shall be appropriately designed and arranged for discussion and argument of the assignments of error and the issues arising out of such assignments of error with references where appropriate to the record on appeal.

(4) Argument of counsel for respondent. The brief of respondent on appeal need not contain a subdivision containing the assignments of error on appeal, but in the argument of counsel for respondent there shall be directed, under appropriately titled sections, argument and discussion in opposition to the assignments of error of the appellant, or in support of the decision of rulings of the authorized agent and where appropriate with supporting references to the pages of the record on appeal.

[Order 72-13, § 296-133-310, filed 7/31/72.]

WAC 296-133-320 Record on appeal. Upon receipt of a copy of the notice of appeal, the authorized agent shall promptly cause to be prepared and forwarded to the office of the director the record on appeal which shall include, a transcript of the proceedings of any hearing held by the authorized agent, the originals of all exhibits or documentary evidence admitted in evidence or rejected in evidence by the authorized agent and any other papers or evidence before the authorized agent relied upon in arriving at his decision. All exhibits shall be appropriately and plainly marked for reference. In addition the authorized agent shall certify in the appropriately titled case the record on appeal as containing all of the evidence, matters and things coming before the authorized agent at the hearing, or relied upon in making his findings, conclusions, decision and any remedial order. A copy of the record on appeal, or any portion thereof, may be obtained by any party to the appeal upon payment to the authorized agent of the reasonable cost per page.

[Order 72-13, § 296-133-320, filed 7/31/72.]

Chapter 296-134 WAC FAMILY LEAVE

WAC

296-134-001	Declaration of purpose.
296-134-010	Definitions.
296-134-030	Entitlement to leave.
296-134-040	Notice.
296-134-050	Medical confirmation.
296-134-060	Leave from same employer.
296-134-070	Returning to employment.
296-134-090	Penalties.

(2001 Ed.)

WAC 296-134-001 Declaration of purpose. It is in the public interest that employers provide reasonable leave upon the birth or adoption of a child or to allow for the care of a child under eighteen years old with a terminal health condition. This chapter serves to implement chapter 11, Laws of 1989 1st ex. sess., establishing a minimum standard for employee leave in furtherance of family stability and economic security.

These rules are not comprehensive and should be implemented in conjunction with the statutory requirements of chapter 49.78 RCW.

[Statutory Authority: 1989 1st ex. s. c 11. 89-23-044, § 296-134-001, filed 11/13/89, effective 12/14/89.]

WAC 296-134-010 Definitions. For the purposes of this chapter:

(1) "Chapter" means this chapter of the Washington Administrative Code or chapter 11, Laws of 1989 1st ex. sess.

(2) "Department" means the department of labor and industries.

(3) "Employee" means a person, other than an independent contractor, employed by an employer on a continuous basis for the previous fifty-two weeks for at least an average of thirty-five hours a week. In computing the average number of hours worked, hours over fifty hours a week shall not be included.

A person is employed on a continuous basis despite a temporary interruption in the performance of the person's job duties if (a) the interruption is caused by the employee taking authorized leave; (b) the interruption is caused by the employer's temporary cessation of all or most operations and the employees do not qualify for unemployment compensation benefits due to a continuing employment relationship, e.g., school employees; or (c) the employee qualified for unemployment compensation benefits as a "stand-by" worker as defined in WAC 192-12-150 for time periods of two weeks or less.

(4) "Employer" means any person, firm, corporation, partnership, business trust, legal representative, or other business entity which engages in any business, industry, profession, or activity in this state, and any unit of local government, which (a) employed a daily average on one hundred or more employees during the last calendar quarter at the place where the employee requesting leave reports for work, or (b) employed a daily average of one hundred or more employees within a twenty mile radius of the place where the employee requesting leave reports for work, the employer maintains a central hiring location and customarily transfers employees among workplaces.

Any employer that has demonstrated the ability to transfer employees between workplaces within the twenty mile radius for the purpose of covering a temporary labor shortage or a permanent or temporary reassignment is considered to be an employer that customarily transfers employees.

A "central hiring location" is an office of the employer or its agent where two or more of the following functions are performed for two or more workplaces:

(i) Employment applications are accepted or screened;

[Title 296 WAC—p. 2119]

(ii) Preemployment or employment interviews are conducted;

(iii) Hiring decisions are made.

"Employer" also includes the state, state institutions, and state agencies.

(5) "Infraction" means a violation of chapter 11, Laws of 1989 1st ex. sess. or this chapter, as found by the department.

(6) "Workweek" means a fixed and regularly recurring period of one hundred sixty-eight hours or seven consecutive twenty-four hour periods. It may begin on any day of the week and any hour of the day, and need not coincide with a calendar week.

[Statutory Authority: 1989 1st ex.s. c 11. 89-23-044, § 296-134-010, filed 11/13/89, effective 12/14/89.]

WAC 296-134-030 Entitlement to leave. (1) Subject to restrictions within the statute and these rules, an employee is entitled to twelve workweeks of family leave during any twenty-four month period. Use of family leave shall not preclude an employee from using other leave to which the employee is entitled during that period according to the terms of the appropriate collective bargaining agreement or employer leave policy.

(2) Employers may limit or deny family leave to designated key personnel or the highest paid ten percent of the employer's employees in the state.

(a) Designated key personnel may not exceed ten percent of the employer's employees in the state. Key personnel shall be designated based upon criteria determined by the employer which may not include the employee's age or gender or other criteria for the purpose of evading the requirements of this chapter. Any designation of key personnel shall take effect thirty days after the employee is notified.

(b) If the employer chooses to limit or deny family leave to the highest paid ten percent of the employer's employees within the state, the employer shall within forty-five days after a determination notify the employees who fall within the highest paid ten percent. In calculating the highest paid ten percent of the employer's employees within the state, the employer shall include total wages, salary, or bonuses paid. An employer may not limit or deny family leave to the highest paid ten percent of the employer's employees until thirty days after the employees are notified. The notice shall be good for up to one year regardless of changes in compensation and may be changed no more than once in any twelve-month period.

[Statutory Authority: 1989 1st ex.s. c 11. 89-23-044, § 296-134-030, filed 11/13/89, effective 12/14/89.]

WAC 296-134-040 Notice. (1) An employee planning to take family leave to care for a newborn or newly adopted child shall provide the employer with written notice at least thirty days in advance of the anticipated date of delivery or adoption, stating the dates during which the employee intends to take family leave. This notice is not intended to substitute for notice to take maternity disability leave which an employer may require.

(2) Failure of an employee to provide written notice of the intention to take family leave for any authorized reason

[Title 296 WAC—p. 2120]

shall allow an employer to increase or reduce the leave requested by up to three weeks.

[Statutory Authority: 1989 1st ex.s. c 11. 89-23-044, § 296-134-040, filed 11/13/89, effective 12/14/89.]

WAC 296-134-050 Medical confirmation. An employer seeking confirmation by an employee's health care provider regarding the date of a child's birth, the date on which incapacity or disability commenced or will probably commence and its probable duration, or the fact that a child has a terminal health condition, shall notify the employee within seven calendar days or five working days of receipt of the employee's notice of leave except where the employer requires medical confirmation as part of the initial leave request. If disputes arise regarding premature birth, incapacitation of the mother, maternity disability, or the terminal condition of a child, the opinions of additional health care providers shall be obtained within fourteen calendar days or ten working days of the employer's receipt of the opinion of the employee's health care provider except where the employee is unable to schedule an appointment or otherwise fails to cooperate or where the employee's doctor is responsible for the delay.

[Statutory Authority: 1989 1st ex.s. c 11. 89-23-044, § 296-134-050, filed 11/13/89, effective 12/14/89.]

WAC 296-134-060 Leave from same employer. When both parents of a child are employed by the same employer, the employer may limit the family leave to a total of twelve workweeks during a twenty-four month period. For purposes of this section, an "employer" is the same entity as that defined in WAC 296-134-010(4) for determining the scope of this chapter. Each state agency or institution shall be considered a separate employer.

[Statutory Authority: 1989 1st ex.s. c 11. 89-23-044, § 296-134-060, filed 11/13/89, effective 12/14/89.]

WAC 296-134-070 Returning to employment. (1) Subject to the exceptions in subsections (2) and (3) of this section, an employee who exercises any right to family leave under this chapter shall be entitled, upon return from leave or during any reduced leave schedule, to the same position, with the same pay, benefits, hours and shift, as held when the leave commenced, or to a position with equivalent benefits and pay at a workplace within twenty miles of the employee's workplace when leave commenced. Upon a written request of the employee, the employer shall provide a written explanation to the employee if the employee is not allowed to return to the same position.

(2) If the employer's circumstances have changed so that the employee cannot be reinstated to the same position or to a position with equivalent pay and benefits, an employee returning from family leave shall be reinstated in any position which is vacant and for which the employee meets the minimum qualifications. The filling of a position held by an employee on family leave does not by itself constitute changed circumstances.

(3) Reinstatement of an employee returning from family leave need not occur as provided under subsection (1) or (2) of this section if:

(a) The specific job is eliminated by a bona fide restructuring, or a reduction-in-force resulting from lack of funds or lack of work;

(b) The employee's workplace is completely shut down at the time for at least thirty days;

(c) The employer moves the workplace of the employee to a location at least sixty miles from the location of the workplace with leave commenced;

(d) An employee on family leave takes a position with another employer outside the home; or

(e) The employee fails to provide the required notice of intent to take family leave or fails to return on the established ending date of leave.

[Statutory Authority: 1989 1st ex.s. c 11. 89-23-044, § 296-134-070, filed 11/13/89, effective 12/14/89.]

WAC 296-134-090 Penalties. (1) The department may fine an employer up to two hundred dollars for the first infraction of this chapter or its enabling legislation.

(2) An employer that commits three or more infractions within a two-year period shall be considered an employer that continues to violate the statute, subject to a fine of up to one thousand dollars for each infraction. An infraction that affects more than one employee and that an employer refuses to correct within a reasonable time after notification by the department, such as the employer's refusal to display in a conspicuous place a poster informing employees of their rights under this chapter, shall also constitute a continuing violation, subject to a fine of up to one thousand dollars for each day the infraction continues.

[Statutory Authority: 1989 1st ex.s. c 11. 89-23-044, § 296-134-090, filed 11/13/89, effective 12/14/89.]

**Chapter 296-150C WAC
COMMERCIAL COACHES**

WAC

- 296-150C-0010 Authority, purpose, and scope.
- 296-150C-0020 What definitions apply to this chapter?
- 296-150C-0030 How is this chapter enforced?
- 296-150C-0040 Will you keep my manufacturing information confidential?
- 296-150C-0050 Can you prohibit the sale or lease of my commercial coach?
- 296-150C-0060 Who handles consumer complaints about commercial coaches?
- 296-150C-0070 Do you have reciprocal agreements with other states to inspect commercial coaches?
- 296-150C-0080 Do you allow a local enforcement agency to inspect commercial coaches at the manufacturing location?
- 296-150C-0100 What happens if I disagree with your decision regarding my compliance with this chapter?
- 296-150C-0110 Do you have an advisory board to address commercial coach issues?
- 296-150C-0120 Where can I obtain technical assistance regarding commercial coaches?
- 296-150C-0140 Do you allow the use of alternate materials, alternate design and method of construction?

INSIGNIA

- 296-150C-0200 Who must obtain commercial coach insignia?
- 296-150C-0210 What are the insignia requirements?
- 296-150C-0220 How do I obtain insignia information and the required forms?
- 296-150C-0230 What are the insignia application requirements?
- 296-150C-0240 What documentation do you need to perform an alteration inspection?
- 296-150C-0250 How do I replace lost or damaged insignia?

(2001 Ed.)

DESIGN PLAN

- 296-150C-0300 When is design-plan approval required?
- 296-150C-0310 Who can approve design plans?

DESIGN-PLAN APPROVAL BY THE DEPARTMENT

- 296-150C-0320 What must I provide with my request for commercial coach design-plan approval by the department?
- 296-150C-0340 What must an engineering analysis for design plans include?
- 296-150C-0350 What must test procedures and results for design plans include?
- 296-150C-0380 What happens if you approve my design plan?
- 296-150C-0390 If my design plan is not approved, how much time do I have to submit a corrected design plan?
- 296-150C-0400 What happens after my design plan is approved?
- 296-150C-0410 When does my design plan expire?
- 296-150C-0415 Who approves addendums to design plans approved by the department?

DESIGN-PLAN APPROVAL BY A LICENSED PROFESSIONAL OR FIRM

- 296-150C-0420 Who can be authorized to approve design plans?
- 296-150C-0430 What information must a professional or firm provide to be authorized to approve design plans?
- 296-150C-0440 How will I know whether I am authorized to approve design plans?
- 296-150C-0450 How long is a licensed professional or firms authorization effective?
- 296-150C-0460 What information must a manufacturer provide when a professional or firm does the design-plan approval?
- 296-150C-0470 What happens after we receive the professional or firm approved design plan and information?
- 296-150C-0480 Do you have a list of professionals or firms that are authorized to approve design plans?
- 296-150C-0490 Who approves addendums to design plans approved by a professional or firm?

INSPECTIONS PRIOR TO ISSUANCE OF AN INSIGNIA

- 296-150C-0500 When is an inspection required?
- 296-150C-0510 How do I request an inspection?
- 296-150C-0520 What happens if my commercial coach passes inspection?
- 296-150C-0530 Am I charged if I request an inspection but I am not prepared?
- 296-150C-0540 Who inspects commercial coach installation at the building site?
- 296-150C-0550 Do you allow a commercial coach to be completed at the installation site?
- 296-150C-0560 What happens if I receive a notice of noncompliance after inspection of the alteration to my commercial coach?

USED COMMERCIAL COACHES WITHOUT AN INSIGNIA

- 296-150C-0580 Must I obtain an insignia for used commercial coaches?
- 296-150C-0590 How do I obtain insignia for used commercial coaches?

MANUFACTURER'S NOTICE TO THE DEPARTMENT

- 296-150C-0700 Must manufacturers of commercial coaches notify you if they manufacture at more than one location?
- 296-150C-0710 Must manufacturers of commercial coaches notify you of a change in business name or address?
- 296-150C-0720 Must manufacturers of commercial coaches notify you of a change in business ownership?

COMMERCIAL COACH CONSTRUCTION CODE

GENERAL

- 296-150C-0800 What manufacturing codes apply to commercial coaches?
- 296-150C-0805 Are there any special requirements for portable school classrooms?
- 296-150C-0810 Construction definitions.

STRUCTURAL

- 296-150C-0820 What are the basic structural requirements of a commercial coach?
- 296-150C-0830 Fastening of structural systems.
- 296-150C-0840 Live loads.
- 296-150C-0850 Roof loads.
- 296-150C-0860 Snow loads.
- 296-150C-0870 Standard wind loads.

- 296-150C-0880 Windstorm protection—Provisions for support and anchoring.
 296-150C-0900 Interior walls and partitions.
 296-150C-0910 Minimum uniform and concentrated live loads.
 296-150C-0920 Design load deflection.
 296-150C-0930 Structural load tests.
- CONSTRUCTION**
- 296-150C-0940 Fastening of structural systems.
 296-150C-0950 Roof coverings/membrane/weather resistant.
 296-150C-0960 What requirements apply to commercial coach roof trusses?
 296-150C-0970 Roof construction.
 296-150C-0990 Sealing wall exterior openings.
 296-150C-1000 Drilling or notching of wood wall structural members.
 296-150C-1020 Wall construction.
 296-150C-1030 Fire-blocking.
 296-150C-1040 Floors.
 296-150C-1050 Drilling or notching of wood joist structural members.
 296-150C-1060 Fastening of structural systems.
 296-150C-1070 Floor closure material.
 296-150C-1080 What design and construction requirements apply to a commercial coach chassis?

MATERIALS

- 296-150C-1090 Standards for equipment and installations.
 296-150C-1100 Flame-spread limitations.
 296-150C-1110 Combustible limitations.
 296-150C-1120 Kitchen cabinet protection.
 296-150C-1130 Insulation standards.
 296-150C-1140 Room sizes.
 296-150C-1150 Hallways.
 296-150C-1160 Accessibility standards.
 296-150C-1170 What are the lighting and ventilation requirements of a commercial coach?
 296-150C-1175 Glass and glazed openings.
 296-150C-1180 Commercial coach exits.
 296-150C-1190 Interior privacy.
 296-150C-1195 Fire warning equipment—Automatic smoke detectors.
 296-150C-1200 Installation instructions.
 296-150C-1210 Table: Number of ties required per side of commercial coach.

ELECTRICAL

- 296-150C-1220 Electrical—General.
 296-150C-1230 Electrical definitions.
 296-150C-1240 Branch circuit and feeder calculations.
 296-150C-1250 Disconnecting means and branch circuit protective equipment.
 296-150C-1260 Power supply—Feeder assembly equipment.
 296-150C-1270 Identification of feeder assembly connection.
 296-150C-1280 Wiring methods—Wiring of expandable or multiple units.
 296-150C-1290 Under-chassis wiring.
 296-150C-1300 Equipment mounting.
 296-150C-1303 How must storage batteries be installed in a commercial coach?
 296-150C-1310 Grounding—General.
 296-150C-1320 Dielectric strength test.

MECHANICAL

- 296-150C-1330 Mechanical—General.
 296-150C-1340 Mechanical definitions.
 296-150C-1345 May the electrical disconnect required for mechanical equipment be inside of or mounted on the equipment?
 296-150C-1346 When HVAC equipment is supplied with more than one CFM rating, which rating do I use?
 296-150C-1350 LPG system enclosure and mounting.
 296-150C-1360 Gas piping—Piping design.
 296-150C-1370 Gas piping—Expandable or multiple commercial coaches.
 296-150C-1380 Concealed tubing.
 296-150C-1390 Gas piping—Pipe-joint compound.
 296-150C-1400 Gas piping—Hangers and supports.
 296-150C-1410 Gas piping—Electrical ground.
 296-150C-1420 Identification of gas supply connections.
 296-150C-1430 Gas piping system openings.
 296-150C-1440 Gas piping—Valves.
 296-150C-1450 Gas piping—Testing for leakage before appliances are connected.
 296-150C-1460 Gas piping—Testing for leakage after appliances are connected.

VENTILATION AND INDOOR AIR QUALITY

- 296-150C-1470 Ventilation and indoor air quality—General.
 296-150C-1480 Ventilation and indoor air quality definitions.
 296-150C-1490 Appliances—Installation.
 296-150C-1500 Safety devices—Water heater relief valves.
 296-150C-1510 Air ducts—Expandable or multiple commercial coach connections.
 296-150C-1520 Air ducts—Duct and plenum insulation.
- PLUMBING**
- 296-150C-1530 Plumbing—General.
 296-150C-1540 Plumbing—Definitions.
 296-150C-1545 Does the department require a water system expansion tank be installed?
 296-150C-1550 Drainage—Cap or plug.
 296-150C-1560 Drainage—Clearance from drain outlet.
 296-150C-1570 Water supply connection.

COMMERCIAL COACH FEES

- 296-150C-3000 Commercial coach fees.

DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER

- 296-150C-0330 What must I provide with my request for a commercial coach vendor unit design-plan approval by the department? [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0330, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-0980 Wall coverings. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0980, filed 10/23/96, effective 11/25/96.] Repealed by 98-14-078, filed 6/30/98, effective 7/31/98. Statutory Authority: Chapter 43.22 RCW.
- 296-150C-1580 What manufacturing codes apply when converting structures to vendor units? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1580, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1580, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1590 Is a structural analysis required when converting a vehicle or structure to a vendor unit? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1590, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1590, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1600 What are the live load requirements of a vendor unit? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1600, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1600, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1610 Design load deflection. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1610, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1620 Structural load tests. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1620, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1630 Roof coverings/membrane/weather resistant. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1630, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.

- 296-150C-1640 Floors. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1640, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1650 Floor closure material. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1650, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1660 Chassis approval. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1660, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1670 Standards for equipment and installations. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1670, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1680 Flame-spread limitations. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1680, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1690 Cabinet protection. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1690, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1700 Insulation standards. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1700, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1710 Light and ventilation. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1710, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1720 What requirements apply to vending unit exits? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1720, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1720, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1730 What code and installation requirements apply to vendor unit electrical systems? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1730, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1730, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1740 What are the mechanical requirements for a vendor unit? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1740, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1740, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1750 What are the LPG system enclosure and mounting requirements for a vendor unit? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1750, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1751 What are the fuel gas piping design requirements for a vendor unit? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1751, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1752 Can gas tubing be concealed in a vendor unit? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1752, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1753 What are the pipe-joint compound requirements for gas piping in a vendor unit? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1753, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1754 What are the gas piping hanger and support requirements for a vendor unit? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1754, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1755 What are the electrical bonding requirements for gas piping in a vendor unit? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1755, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1756 How are gas supply connections in a vendor unit identified? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1756, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1757 What requirements apply to gas piping system openings? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1757, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1758 Are gas piping shut-off valves required in a vendor unit? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1758, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1759 What requirements apply to testing for gas piping leaks before vendor unit appliances are connected? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1759, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1760 What requirements apply to testing for gas piping leaks after vendor unit appliances are connected? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1760, filed 6/30/98, effective 7/31/98.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1770 Appliances—Installation. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1770, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1780 Safety devices—Water heater relief valves. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1780, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1790 Plumbing—General. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1790, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1800 Plumbing—Definitions. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1800, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1810 Drainage—Cap or plug. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1810, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
- 296-150C-1820 Drainage—Clearance from drain outlet. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1820, filed 10/23/96, effective 11/25/96.]

296-150C-1830 Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.
 Water supply connection. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1830, filed 10/23/96, effective 11/25/96.] Repealed by 00-01-188, filed 12/22/99, effective 2/8/00. Statutory Authority: RCW 43.22.480.

WAC 296-150C-0010 Authority, purpose, and scope.

(1) This chapter is authorized by RCW 43.22.340 through 43.22.435 covering the construction, alteration and approval of commercial coaches sold, leased, or used in Washington state.

(2) This chapter applies to the approval of commercial coach manufacturers, dealers and to any person who manufactures or alters the plumbing, mechanical, or electrical system or the body or frame of a commercial coach.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0010, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0020 What definitions apply to this chapter? "Alteration" is the replacement, addition, modification, or removal of any equipment or installation that affects the construction, fire and life safety, or the plumbing, mechanical, and electrical systems of a commercial coach.

The following are not considered alterations:

- Repairs with approved parts;
- Modification of a fuel-burning appliance according to the listing agency's specifications; or
- Adjustment and maintenance of equipment.

"Approved" is approved by the department of labor and industries.

"Building site" is a tract, parcel, or subdivision of land on which a commercial coach will be installed.

"Consumer" is a person or organization, excluding a manufacturer or dealer of commercial coaches, who buys or leases a commercial coach.

"Commercial coach" is a structure (referred to as a unit) that:

- Can be transported in one or more sections;
- Is used for temporary commercial purposes;
- Is built on a permanent chassis;
- Conforms to the construction standards of this chapter;
- May include plumbing, mechanical, electrical and other systems.

Note: A commercial coach may not be used as a single-family dwelling. A commercial coach does not have to be placed on a permanent foundation.

"Damaged in transit" means damage that affects the integrity of a structural design or any of the systems.

"Dealer" is a person, company, or corporation whose business is leasing, selling, offering for lease or sale, buying, or trading commercial coaches.

"Department" is the department of labor and industries. The department may be referred to as "we" or "us" in this chapter. Note: You may contact us at: Department of Labor and Industries, Specialty Compliance, PO Box 44440, Olympia, WA 98504-4440.

[Title 296 WAC—p. 2124]

"Design plan" is a plan for the construction or alteration of a commercial coach or conversion of a vehicle to a commercial coach including floor plans, elevation drawings, specifications, engineering data, or test results necessary for a complete evaluation of the design.

"Design option" is a design that a manufacturer may use as an option to its commercial coach design plan.

"Equipment" is all material, appliances, devices, fixtures, fittings, or accessories used in the manufacture, assembly, conversion to, or alteration of a commercial coach.

"Factory assembled structure (FAS) advisory board" is a board authorized to advise the director of the department regarding the issues and adoption of rules relating to commercial coaches. (See RCW 43.22.420.)

"Insignia" is a label that we attach to a commercial coach to verify that the structure meets the requirements of this chapter and the applicable codes.

"Install" is to erect, construct, assemble, or set a commercial coach in place.

"Labeled" is to bear the department's insignia.

"Listed" is a piece of equipment or apparatus that has been approved by a testing agency to the appropriate standard.

"Local enforcement agency" is an agency of city or county government with power to enforce local regulations governing the installation of a commercial coach.

"Master design plan" is a design plan that expires when a new state building code has been adopted.

"One-year design plan" is a design plan that expires one year after approval or when a new state building code has been adopted.

"System" is part of a commercial coach designed to serve a particular function. Examples include structural, plumbing, electrical, or mechanical systems.

[Statutory Authority: RCW 43.22.480. 00-01-187, § 296-150C-0020, filed 12/22/99, effective 2/8/00. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-0020, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0020, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0030 How is this chapter enforced?

(1) To enforce this chapter, we or another governmental inspection agency will inspect each commercial coach manufactured, sold, leased, or used in Washington state as required by this chapter. (See WAC 296-150C-0070 - reciprocal agreements.)

(2) We will inspect all commercial coach alterations.

(3) We will conduct inspections during normal work hours or at other reasonable times.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0030, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0040 Will you keep my manufacturing information confidential? We will only release manufacturing information such as design plans, specifications, and test results according to the requirements of the Public

Records Act (see RCW 42.17.310 (1)(h)) unless we are ordered to do so by a court or otherwise required by law.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150C-0040, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0040, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0050 Can you prohibit the sale or lease of my commercial coach? (1) We may prohibit the sale or lease of your commercial coach because it is unlawful for any person to sell, lease, or offer for sale a commercial coach within this state if it violates any of the requirements of this chapter. (See RCW 43.22.345.)

(2) If an inspection reveals that a commercial coach violates this chapter, we may post a notice prohibiting the sale or lease of a commercial coach.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0050, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0060 Who handles consumer complaints about commercial coaches? (1) Consumer may file complaints within one year of the date of manufacture.

(2) The complaint should be in writing and describe the item(s) that may not comply with this chapter.

(3) After we receive the complaint, we will send the manufacturer and the dealer a copy of the complaint.

(4) The manufacturer and/or dealer have thirty days to respond. We shall base our actions on the response.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0060, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0070 Do you have reciprocal agreements with other states to inspect commercial coaches?

(1) We have entered into reciprocal agreements with states who have inspection standards equal or greater than our standard.

(2) When we have a reciprocal agreement with another state:

(a) The reciprocal state inspects the commercial coaches manufactured in that state before shipment into Washington to ensure compliance with our laws. After inspection, the reciprocal state applies our insignia.

(b) The department inspects commercial coaches manufactured in Washington before shipment into the reciprocal state to ensure compliance with their laws. After inspection, we apply the insignia of the reciprocal state.

(3) We have reciprocal agreements on file.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0070, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0080 Do you allow a local enforcement agency to inspect commercial coaches at the manufacturing location? (1) A local enforcement agency (city or county), under contract with us, can inspect commercial coaches. In some cases, their contract may be limited to spe-

(2001 Ed.)

cific portions of an inspection at specified manufacturing locations.

(2) After approving a unit, the local enforcement agency will attach the insignia, which indicates that the unit has passed inspection.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0080, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0100 What happens if I disagree with your decision regarding my compliance with this chapter? (1) If we determine that you are in violation of this chapter, you will receive a notice of noncompliance. (See WAC 296-150C-0560.)

(2) If you disagree with our decision, you can send us a written request for a hearing, stating why you disagree.

(3) After we receive your hearing request, we will:

(a) Schedule a hearing within thirty days after we receive your request.

(b) Notify you of the time, date, and place for the hearing. If you fail to appear, your case will be dismissed.

(c) Hear your case.

(d) Send you written notice of our decision.

If you disagree with our decision, you may appeal it under the Administrative Procedure Act (chapter 34.05 RCW).

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150C-0100, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0100, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0110 Do you have an advisory board to address commercial coach issues? The factory assembled structures (FAS) board advises us on issues relating to body and frame design, construction, alterations, plumbing, mechanical, electrical, installation, inspections, and rule adoption for commercial coaches. (See RCW 43.22.420.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0110, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0120 Where can I obtain technical assistance regarding commercial coaches? We offer field technical service to commercial coach manufacturers for an hourly fee. (See WAC 296-150C-3000.) Field technical service may include evaluation, consultation, plan examination, interpretation, and clarification of technical data relating to the application of our rules. It does not include inspections.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0120, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0140 Do you allow the use of alternate materials, alternate design and method of construction? An applicant may apply for the use of alternate materials, alternate design and methods of construction different from the requirements of this chapter by filing a written request with the department.

(1) Responsibilities of applicant. The applicant must submit in writing the following information and sign and date the request.

(a) The applicant's name, address and phone number;

(b) The specific requirement or requirements from which the alternate material, alternate design or method of construction is requested;

(c) Justification that the requirements of this chapter cannot be met without using alternate materials, alternate design or method of construction;

(d) How the use of alternate materials, alternate design or method of construction will achieve the same result as the requirement and any specific alternative measures to be taken to show the alternate provides the same level of protection to life, safety and health as the requirements.

The department has a form that you may use for your request. Contact the department at the address shown in the definition section.

(2) Responsibilities of the department. The department will provide a written response to the applicant within thirty days of receipt of the written request. The written response will state the acceptance or denial of the request, including the reasons for the department's decision. At a minimum the department will base its decision based on:

(a) The applicant's request as described in subsection (1) of this section;

(b) Research into the request;

(c) Expert advise.

(3) Applicant's response to denials. The applicant may appeal the department's decision by following the procedure in WAC 296-150C-0100.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150C-0140, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150C-0140, filed 6/4/99, effective 7/5/99.]

INSIGNIA

WAC 296-150C-0200 Who must obtain commercial coach insignia? (1) You must obtain an insignia from us for each commercial coach manufactured, sold, leased, or used in Washington state.

(2) You do not need an insignia for a commercial coach:

(a) When a unit has been used outside of the state for six months before being brought into Washington state (see RCW 43.22.380); or

(b) If a unit was manufactured prior to July 1, 1968. (See RCW 43.22.370.)

Note: All commercial coaches must have insignia if they are altered, this includes the exceptions in subsection (2)(a) and (b) of this section.

(3) You must obtain an insignia when commercial coaches are altered in Washington state.

(4) You must obtain an alteration insignia when a commercial coach is damaged in transit after leaving the manufacturing location or during an on-site installation, and an alteration or repair is necessary. The insignia indicates the commercial coach was altered or repaired.

(5) You must have an approved design plan and pass our inspection before we will attach an insignia.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150C-0200, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0200, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0210 What are the insignia requirements? (1) If you are applying for insignia, you must have your design plan approved and your commercial coach inspected and approved by us.

(2) If you are a manufacturer, dealer or owner applying for an alteration insignia, your alteration must be inspected and approved by us. Approval of the design plan may also be required.

(3) We will attach the insignia to your commercial coach after:

(a) We receive the required forms and fees from you (see WAC 296-150C-3000); and

(b) Your commercial coach has passed final inspection.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0210, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0220 How do I obtain insignia information and the required forms? Upon request, we will provide you with a packet of information that includes the required forms.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0220, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0230 What are the insignia application requirements? (1) If you are requesting insignia for commercial coaches that you intend to manufacture under a *new design plan*, your completed application must include:

(a) A completed design-plan approval request form;

(b) One complete set of design plans, specifications, engineering analysis, and test procedures and results, plus one additional set for each manufacturing location where the design plan will be used.

(c) At least one set of design plans must have an original wet stamp from a professional engineer or architect licensed in Washington state. We will retain the set with the original wet stamp; and

(d) A one-time initial filing fee, the design-plan fee (if you want us to approve your design plan), and the fee for each insignia. (See WAC 296-150C-3000.)

(2) If you are requesting insignia under an *approved design plan*, your completed application must include:

(a) A completed insignia application form; and

(b) The fee for each commercial coach insignia (see WAC 296-150C-3000).

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0230, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0240 What documentation do you need to perform an alteration inspection? (1) If you alter a commercial coach, we must inspect the alteration.

(2) Before we perform an alteration inspection and attach an alteration insignia, you must send us:

- (a) A description of the proposed alteration;
- (b) Applicable specifications, engineering analysis, test procedures and results for design-plan review;
- (c) The plan review fee (if you want us to approve your design plan);
- (d) The inspection fee; and
- (e) The insignia application and fee. (See WAC 296-150C-3000.)

(3) A design plan review is not required if the alteration can be made without altering any of the existing structure.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0240, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0250 How do I replace lost or damaged insignia? (1) If an insignia is lost or damaged after it is placed on a commercial coach, you may obtain a replacement insignia.

(2) You should contact us and provide the following information:

- (a) Your name, address, and telephone number;
- (b) The name of the manufacturer or person converting the vendor unit;
- (c) The serial number;
- (d) The manufacturer number (CC#) if available;
- (e) The insignia number if available; and
- (f) The required fee. (See WAC 296-150C-3000.)

(3) If we can determine that your unit previously had an insignia, we will:

(a) Perform an inspection to ensure that no unauthorized remodeling has occurred;

Note: If unauthorized remodeling has occurred see WAC 296-150C-0200;

(b) Attach an insignia to your unit once we receive your insignia fee. (See WAC 296-150C-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0250, filed 10/23/96, effective 11/25/96.]

DESIGN PLAN

WAC 296-150C-0300 When is design-plan approval required? Design plans for commercial coaches are required for units that are sold, leased, or used in Washington state and must be approved when:

- (1) You build a new unit;
- (2) You modify an approved design plan through addendums;
- (3) You add options to an approved design plan through addendums; or
- (4) You change the occupancy classification of the building.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0300, filed 10/23/96, effective 11/25/96.]

(2001 Ed.)

WAC 296-150C-0310 Who can approve design plans? (1) Design plans can be approved by us or by a licensed professional or firm authorized by us. (See WAC 296-150C-0420 and 296-150C-0430.)

(2) All electrical design plans for new or altered electrical installations for educational institutions, health care facilities, and other buildings required by chapter 296-46 WAC, Safety standards—Installing electric wires and equipment—Administrative rules, must be reviewed and approved by us.

(3) A professional cannot approve plans submitted under a reciprocal agreement.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-0310, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0310, filed 10/23/96, effective 11/25/96.]

DESIGN-PLAN APPROVAL BY THE DEPARTMENT

WAC 296-150C-0320 What must I provide with my request for commercial coach design-plan approval by the department? All requests for design-plan approval must include:

- (1) A completed design-plan approval request form;
- (2) Two sets of design plans plus elevation drawings, specifications, engineering analysis, and test results and procedures necessary for a complete evaluation of the design; (See WAC 296-150C-0340 and 296-150C-0350.)

(3) At least one set of design plans must have an original wet stamp from a professional engineer or architect licensed in Washington state. All new, renewed, and resubmitted plans, specifications, reports and structural calculations prepared by or prepared under his or her direct supervision shall be signed, dated and stamped with their seal. Specifications, reports, and structural calculations may be stamped only on the first sheet, provided this first sheet identifies all of the sheets that follow are included and identified in the same manner. Plans that have not been prepared by or under the engineer's or architect's supervision shall be reviewed by them and they shall prepare a report concerning the plans reviewed. This report shall:

- (a) Identify which drawings have been reviewed by drawing number and date;
- (b) Include a statement that the plans are in compliance with current Washington state regulations; and
- (c) The report shall be stamped and signed by the reviewer.

Any deficiencies shall be corrected on the drawings before submitting to the department or be included in the report and identify as to how they are to be corrected. This report shall be attached to the plan(s) that were reviewed. We will retain the set with the original wet stamp;

- (4) Receipt of a one-time initial design plan filing fee and the initial design plan fee (see WAC 296-150C-3000);
- (5) A "key drawing" to show the arrangement of modules if the plan covers three or more modules;
- (6) The occupancy class of the commercial coach according to the occupancy classifications in The Uniform Building Code;
- (7) All plans required by WAC 296-46-140 (Plan review for educational, institutional or health care facilities and other

buildings) must be reviewed by the department. The department's fee for this plan review is listed in the fee table in WAC 296-150C-3000, Commercial coach fees.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150C-0320, filed 6/4/99, effective 7/5/99. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-0320, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0320, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0340 What must an engineering analysis for design plans include? (1) The engineering analysis must show that the structural design meets the requirements of this chapter.

(2) An engineering analysis must be conducted according to accepted engineering practices and must be signed by a professional engineer or architect licensed in Washington. (See WAC 296-150C-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0340, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0350 What must test procedures and results for design plans include? (1) Tests to a design must be witnessed by a professional engineer or architect licensed in Washington or by a departmental employee.

(2) Test reports must contain the following items:

(a) A description of the methods or standards that applied to the test;

(b) Drawings and a description of the item tested;

(c) A description of the test set-up;

(d) The procedure used to verify the correct load;

(e) The procedure used to measure each condition;

(f) Test data, including applicable graphs and observations of the characteristics and behavior of the item tested; and

(g) Analysis, comments, and conclusion.

(3) The written test procedures and conclusions must reference the applicable design plan.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0350, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0380 What happens if you approve my design plan? (1) Your design plan will be approved if it meets the requirements of this chapter.

(2) We will send you an approved copy of the design plan with the design-plan approval number.

(3) You must keep copies of the approved design plan available for inspection at each location where the commercial coach is built.

(4) If your design plan is not approved, you will be notified in writing of plan deficiencies. You may send a corrected design plan to us. (See WAC 296-150C-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0380, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0390 If my design plan is not approved, how much time do I have to submit a corrected

[Title 296 WAC—p. 2128]

design plan? (1) You have ninety days to correct and resubmit your original design plan and send us the resubmittal fee after we notify you of plan deficiencies. After ninety days, your initial design plan is returned to you.

(2) If you submit your corrected design plan after ninety days, the initial design plan fee is required instead of the resubmittal fee. (See WAC 296-150C-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0390, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0400 What happens after my design plan is approved? Once your design plan is approved, we will inspect each commercial coach.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0400, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0410 When does my design plan expire? *Commercial Coach - Master Design Plan:*

(1) Your commercial coach master design plan expires when there is a code change. You must submit new design plans for approval when there is a state building code cycle change. You may use your approved master design plans to order insignia as long as they comply with the applicable codes.

Commercial Coach - One-Year Design Plan:

(2) Your commercial coach one-year design plan expires either one year after approval or when there is a code change. You must submit new design plans for approval when there is a state building code cycle change. You may use your design plans to order insignia as long as they comply with the applicable codes.

(3) All National Electrical Code amendments may be incorporated by an addendum to your design plan.

Note: The State Building Code is on a three-year code cycle which coincides with the State Building Code Council amendment cycle. The National Electrical Code (NEC) cycle, however, does not coincide with the other code cycles.

[Statutory Authority: RCW 43.22.480. 00-01-187, § 296-150C-0410, filed 12/22/99, effective 2/8/00. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-0410, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0410, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0415 Who approves addendums to design plans approved by the department? You must have us approve an addendum to a design plan, if we initially approved your design plan.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0415, filed 10/23/96, effective 11/25/96.]

DESIGN-PLAN APPROVAL BY A LICENSED PROFESSIONAL OR FIRM

WAC 296-150C-0420 Who can be authorized to approve design plans? (1) A professional engineer, architect or firm licensed by the state of Washington according to the

(2001 Ed.)

Engineers Registration Act, chapter 18.43 RCW and/or the Architects Registration Act, chapter 18.08 RCW; or

(2) A professional engineer, architect or firm licensed in another state that has licensing or certification requirements that meet or exceed Washington requirements.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0420, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0430 What information must a professional or firm provide to be authorized to approve design plans? (1) Name, a copy of your certificate of registration, and address of the professional engineer or architect; or

(2) Name, a copy of your certificate of authority, and address of the firm; and

(3) A description of the services the professional engineer, architect, or firm will provide; and

(4) A description of the professional's area(s) of expertise and qualifications which include:

(a) A summary of the professional's or firm's experience; and

(b) Verification of experience in your area of expertise such as structural, mechanical, plumbing, energy, electrical, fire and life safety, and ventilation and indoor air quality.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0430, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0440 How will I know whether I am authorized to approve design plans? Within sixty days after you submit the information requested in WAC 296-150C-0430, we will send you a letter either approving or denying your authorization request.

(1) If we approve your request, your name is added to the list of licensed professionals and firms authorized to approve design plans.

(a) We will authorize a professional to approve portions of a design plan within his or her area of expertise; and

(b) We will authorize an engineering or architectural firm to approve plans if the firm employs or contracts with professionals within the area of expertise necessary for the design plan.

(2) If we do not approve your request, we will notify you in writing why we are denying your request for authorization. If you disagree with our decision, you can send us a written request for a hearing, stating why you disagree. (See WAC 296-150C-0100.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0440, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0450 How long is a licensed professional or firms authorization effective? Your authorization to approve design plans is effective until your license expires, is revoked or is suspended.

(1) You must notify us of your license renewal at least fifteen days before your license expires, to prevent your name from being removed from our licensed professional and firm list.

(2001 Ed.)

(2) You must notify us immediately if your license is revoked or suspended. Your name is then removed from the list of licensed professionals and firms authorized to approve design plans.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0450, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0460 What information must a manufacturer provide when a professional or firm does the design-plan approval? You must provide the following information with your approved design plans:

(1) A completed departmental design-plan approval request form;

(2) Two or more sets of design plans plus elevation drawings, specifications, engineering analysis, and test results and procedures necessary for a complete evaluation of the design. These design plans must have an original wet stamp, be signed, and dated by the approving professional(s) (see WAC 296-150C-0340 and 296-150C-0350);

(3) A cover sheet on the design plan noting which professional approved each portion of the design plan;

(4) A copy of the authorization letter from us;

(5) The design plan fee for design plans approved by professionals or firms; (see WAC 296-150C-3000.)

(6) A professional who designs and certifies that the commercial coach design meets state requirements cannot also approve the design plan in the plan approval process;

(7) A professional cannot approve those electrical designs listed in WAC 296-150C-0310(2); and

(8) A professional cannot approve plans submitted under a reciprocal agreement.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-0460, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0460, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0470 What happens after we receive the professional or firm approved design plan and information? (1) After we receive your approved design plans and information, we will review the information and assign a plan approval number. We will send a copy of the design plan with the plan approval number to the manufacturer.

(2) We may periodically audit design plans approved by a professional engineer, architect, or firm to ensure compliance with design plan requirements. The department's periodic audit should not be construed as certifying that the plans are safe.

(3) If the audit reveals that the design plans approved by the professionals and firms do not comply with this chapter, you will be notified and required to pay our fees for review and approval of the design plans. (See WAC 296-150C-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0470, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0480 Do you have a list of professionals or firms that are authorized to approve design plans? We will maintain a list of the licensed professionals

and firms that are authorized to approve design plans for commercial coaches.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0480, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0490 Who approves addendums to design plans approved by a professional or firm? (1) You must have the professional or firm approve an addendum to a design plan, if they initially approved your design plan.

(2) If the professional or firm who approved your design plan is no longer on the department list you may have us approve your addendum.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0490, filed 10/23/96, effective 11/25/96.]

INSPECTIONS PRIOR TO ISSUANCE OF AN INSIGNIA

WAC 296-150C-0500 When is an inspection required? (1) Before we issue an insignia, each unit manufactured or converted must be inspected as many times as required to show compliance with this chapter.

Note: Each commercial coach must have a serial number so we can track inspections.

(2) Before we issue an insignia, each commercial coach must be inspected at the manufacturing location as many times as required. Inspections may include but are not limited to:

(a) A "cover" inspection during construction of the unit before the electrical, plumbing, mechanical, and structural systems are covered;

(b) Insulation and vapor barrier inspection, if required; and

(c) A final inspection after the commercial coach is complete.

(3) If we discover a violation during inspection, we will issue a notice of noncompliance. You can correct the violation during the inspection. If you cannot correct the violation during inspection, you must leave the item uncovered until we approve your correction.

(4) If a commercial coach is damaged in transit to the building site or during on-site installation, it must be inspected. This is considered an alteration inspection. (See WAC 296-150C-0240.)

(5) Approved design plans must be available in compliance with the applicable sections of the adopted state codes.

(6) Once your unit is inspected and approved we will attach the insignia.

[Statutory Authority: RCW 43.22.480. 00-01-187, § 296-150C-0500, filed 12/22/99, effective 2/8/00. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-0500, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0500, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0510 How do I request an inspection? (1) You must contact us, and we will let you know

[Title 296 WAC—p. 2130]

where your request for inspection should be submitted. Our address is noted in the definition of department.

(2) We must receive in-state inspection requests at least seven calendar days prior to the date that you want the inspection.

(3) We must receive out-of-state inspection requests at least fourteen calendar days prior to the date that you want the inspection.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0510, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0520 What happens if my commercial coach passes inspection? If your commercial coach passes inspection and you have met the other requirements of this chapter, we will attach the insignia.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0520, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0530 Am I charged if I request an inspection but I am not prepared? (1) If you ask us to inspect a commercial coach within Washington state but you are not prepared when we arrive, you must pay the inspection fee and travel. (See WAC 296-150C-3000.)

(2) If you ask us to inspect a commercial coach outside Washington state but you are not prepared when we arrive, you must pay the inspection fee, travel, and per diem expenses. (See WAC 296-150C-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0530, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0540 Who inspects commercial coach installation at the building site? The local enforcement agency (city or county) must approve the installation.

Note: The local enforcement agency may not open the concealed construction of a commercial coach to inspect it if our insignia is attached.

Note: Alterations to commercial coaches must be inspected and approved by us.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0540, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0550 Do you allow a commercial coach to be completed at the installation site? Commercial coaches must be completed at the manufacturing location before an insignia is attached.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0550, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0560 What happens if I receive a notice of noncompliance after inspection of the alteration to my commercial coach? (1) If your commercial coach alteration does not pass our inspection, you will receive a notice of noncompliance. The notice of noncompliance explains what items must be corrected.

(2) You have twenty days after receiving the notice of noncompliance to send us a written response to explain how you will correct the violations.

(3) You are not allowed to sell, lease, offer for sale or use the altered commercial coach until you correct the violations. We must inspect and approve the corrections, and you must pay the inspection and insignia fees, if required (see WAC 296-150C-3000).

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-0560, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0560, filed 10/23/96, effective 11/25/96.]

USED COMMERCIAL COACHES WITHOUT AN INSIGNIA

WAC 296-150C-0580 Must I obtain an insignia for used commercial coaches? All used commercial coaches that are to be installed on a building site or used in Washington state must have an insignia of approval from us. (See exceptions WAC 296-150C-0200 (1)(a)(b).)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0580, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0590 How do I obtain insignia for used commercial coaches? We consider used commercial coaches as new units for purposes of insignia approval. To obtain insignia, you must:

- (1) Have the design plan approved (see WAC 296-150C-0300 through 296-150C-0480);
- (2) Purchase insignia (see WAC 296-150C-0200 through 296-150C-0230); and
- (3) Pass a unit inspection (see WAC 296-150C-0500 through 296-150C-0560).

Note: You will be required to open up as much of the construction of the unit as is necessary for inspection to show compliance with your approved design plan.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0590, filed 10/23/96, effective 11/25/96.]

MANUFACTURER'S NOTICE TO THE DEPARTMENT

WAC 296-150C-0700 Must manufacturers of commercial coaches notify you if they manufacture at more than one location? (1) If you are manufacturing commercial coaches at more than one location, approved design plans must be available at each manufacturing location.

(2) You must send us the following information for each manufacturing location:

- (a) Company name;
- (b) Mailing and physical address; and
- (c) Phone and FAX number if available.

(3) You must update this information as it changes.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0700, filed 10/23/96, effective 11/25/96.]

(2001 Ed.)

WAC 296-150C-0710 Must manufacturers of commercial coaches notify you of a change in business name or address? (1) If you are moving you must notify us in writing prior to a change of business name or address.

(2) Your notice must include the change of name and address.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0710, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0720 Must manufacturers of commercial coaches notify you of a change in business ownership? (1) When a manufacturer changes ownership, the new owner must notify us in writing immediately.

(2) A new owner may continue to manufacture the units according to a prior approved design plan if the prior owner provides written releases of the design plan.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0720, filed 10/23/96, effective 11/25/96.]

COMMERCIAL COACH CONSTRUCTION CODE

GENERAL

WAC 296-150C-0800 What manufacturing codes apply to commercial coaches? (1) All design, construction, and installations of commercial coaches must conform with the following codes and the requirements of this chapter:

(a) The latest adopted version of the Washington State Ventilation and Indoor Air Quality Code, as adopted by chapter 51-13 WAC;

(b) The structural and other requirements of this chapter;

(c) Occupancy classification only from chapter 3 of The Uniform Building Code, 1997 edition as adopted and amended by chapter 51-40 WAC, except commercial coaches must not be group H or R-3 occupancy;

(d) Accessibility requirements of chapter 11 of The Uniform Building Code, 1997 edition as adopted and amended by chapter 51-40 WAC;

(e) Table 16-A Uniform and concentrated floor loads and footnotes of The Uniform Building Code, 1997 edition as adopted and amended by chapter 51-40 WAC;

(f) The Uniform Mechanical Code, 1997 edition as adopted and amended by chapter 51-42 WAC except when conflicting with the provisions of this chapter, this chapter controls;

(g) The National Electrical Code as referenced in chapter 19.28 RCW and chapter 296-46 WAC;

(h) The latest adopted version of the Washington State Energy Code, as adopted by chapter 51-11 WAC;

(i) The Uniform Plumbing Code, 1997 edition as adopted and amended by chapters 51-46 and 51-47 WAC;

(j) Where there is a conflict between codes, an earlier named code takes precedent over a later named code. Where, in any specific case, different sections of this code specify different materials, methods of construction or other requirements, the most restrictive governs. Where there is a conflict between a general requirement and a special requirement, the specific requirement must be applicable.

(2) All construction methods and installations must use accepted engineering practices, provide minimum health and safety to the occupants of commercial coaches and the public, and demonstrate journeyman quality of work of the various trades.

(3) Requirements for any size, weight, or quality of material modified by the terms "minimum," "not less than," "at least," and similar expressions are minimum standards. The manufacturer may exceed these rules provided the deviation does not result in inferior installation or defeat the purpose and intent of this chapter.

Note: The codes, RCW's and WAC's referenced in this rule are available to view at the Washington State Library, the Washington State Law Library, and may also be available at your local library.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-0800, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0800, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0805 Are there any special requirements for portable school classrooms? In addition to the requirements in this chapter, the department of health has rules regulating primary and secondary schools in chapter 246-366 WAC. One of those requirements in WAC 246-366-050(2) is that "Instructional areas shall have a minimum average ceiling height of 8 feet."

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150C-0805, filed 6/4/99, effective 7/5/99.]

WAC 296-150C-0810 Construction definitions. The following definitions and the definitions in each of the state codes adopted in WAC 296-150C-0800 apply to commercial coach construction.

"Anchoring system" is the means used to secure a commercial coach to ground anchors or to other approved fastening devices. It may include straps, cables, turnbuckles, bolts, fasteners, or other components.

"Ceiling height" is the clear vertical distance from the finished floor to the finished ceiling.

"Chassis" means that portion of the transportation system comprised of the following: Drawbar coupling mechanism and frame.

EXCEPTION: The running gear assembly shall not be considered as part of the chassis.

"Dead load" is the vertical load resulting from the weight of all permanent structural and nonstructural parts of a commercial coach including walls, floors, roof, partitions, and fixed service equipment.

"Diagonal tie" is a tie intended primarily to resist horizontal or shear forces and secondarily may resist vertical, uplift, and overturning forces.

"Dormitory" is a room designed to be occupied by more than two persons.

"Exit" is a continuous and unobstructed means of egress to a public way.

"Frame" means the fabricated rigid substructure, which provides support to the affixed commercial coach structure both during transport and onsite. It is considered a part of the commercial coach.

[Title 296 WAC—p. 2132]

"Glazed opening" is a glazed skylight or an exterior window or glazing of a door of a commercial coach.

"Gross floor area" is the net floor area within the enclosing walls of a room where the ceiling is at least five feet high.

"Habitable room" is a room or enclosed floor space arranged for living, eating, food preparation, or dormitory sleeping purposes. It does not include bathrooms, toilet compartments, foyers, hallways, or other accessory floor spaces. Any reference to "habitable dwelling" in this chapter means a temporary structure not used as a single family dwelling.

"Interior finish" is the surface material of walls, fixed or movable partitions, ceilings and other exposed interior surfaces affixed to the commercial coach structure, including paint and wallpaper. Decorations or furnishings attached to the commercial coach structure are considered part of the interior finish.

"Live load" is the weight superimposed by the use and occupancy of the commercial coach, including wind load and snow load, but not including dead load.

"Perimeter blocking" is support placed under exterior walls.

"Shear wall" is a wall designed and constructed to transfer lateral loads.

"Tiedown" is a device designed to anchor a commercial coach to ground anchors.

"Use" or "occupancy classification" is the designed purpose of a commercial coach according to The Uniform Building Code.

"Wind load" is the lateral or vertical pressure or uplift created by wind blowing in any direction.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150C-0810, filed 6/4/99, effective 7/5/99. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0810, filed 10/23/96, effective 11/25/96.]

STRUCTURAL

WAC 296-150C-0820 What are the basic structural requirements of a commercial coach? Each commercial coach must be designed and constructed as a completely integrated structure capable of sustaining the design-load requirements of this chapter. It shall be capable of:

(1) Transmitting these loads to stabilizing devices without causing unsafe deformation or abnormal structural movement; and

(2) Withstanding the adverse effects of transportation shock and vibration as an integrated structure.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-0820, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0820, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0830 Fastening of structural systems. Roof framing must be securely fastened to wall framing, walls to floor structure, and floor structure to chassis. This must secure and maintain continuity between the floor and chassis and resist wind uplift, overturning, and sliding as imposed by design loads.

(2001 Ed.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0830, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0840 Live loads. (1) The design live loads must be established according to this chapter and must be considered to be uniformly distributed.

(2) The roof live load must not be considered as acting simultaneously with the wind load. The roof and the floor live loads must not be considered as resisting the overturning moment due to wind. The roof live load and the floor live load must be considered to act both simultaneously and separately in order to determine the critical design loading for stresses and deflections.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0840, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0850 Roof loads. All roofs must be designed to sustain loads as follows:

(1) Dead loads plus a minimum unit live load of 30 lb/ft² (2 months load duration); and

(2) A vertical net uplift load of 9 lb/ft² (1 day load duration).

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0850, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0860 Snow loads. The roof of a commercial coach must be designed for the loads to which it will be subjected in areas where snow records or experience indicate snow loads in excess of 30 lb/ft².

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0860, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0870 Standard wind loads. The commercial coach and each wind resisting part must be designed for the following wind loads:

Horizontal	15 lb/ft ²	(1 day load duration)
Vertical upward	9 lb/ft ²	(1 day load duration)
Vertical downward	(see WAC 296-150C-0850 Roof loads)	

A commercial coach must be designed for higher wind loads if area records or experience indicate that it will be subjected to wind loads in excess of the above loads if required by the local jurisdiction.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0870, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0880 Windstorm protection—Provisions for support and anchoring. (1) Each commercial coach must have provisions for support and anchoring systems that, when properly designed and installed, will resist overturning and lateral movement of the commercial coach as imposed by the respective design loads. Support and anchoring systems can be installed according to the Table in WAC 296-150C-1210 or designed by a professional engineer.

(2001 Ed.)

(2) The manufacturer of each commercial coach is required to make provision for the support and anchoring systems but is not required to provide the anchoring equipment or stabilizing devices.

(3) The manufacturer must provide printed instructions with each commercial coach specifying the location and required capacity of stabilizing devices on which the design is based.

Single-Wide Commercial Coaches:

(4) The provisions made for anchoring systems must be based on the following design criteria for single-wide commercial coaches:

(a) The minimum number of ties required per side is noted in WAC 296-150C-1210.

(b) Ties must be as evenly spaced as practicable along the length of the commercial coach. No more than eight feet open-end spacing must occur on each end.

(c) If continuous straps are provided as vertical ties, they must be positioned at rafters and studs. If a vertical tie and diagonal tie are located at the same place, both ties may be connected to a single ground anchor, as long as, the anchor used is capable of carrying both loads.

(d) Add-on sections of expandable commercial coaches must have provisions for vertical ties at the exposed ends.

Double-Wide Commercial Coaches:

(5) Double-wide commercial coaches require only diagonal ties specified in the table in WAC 296-150C-1210. The ties must be placed along the outer side walls.

(6) Protection must be provided at sharp corners where the anchoring system requires the use of external cables or straps. Protection must also be provided to minimize damage to roofing or siding by the cable or strap.

(7) Anchoring equipment must be capable of resisting an allowable working load equal to or exceeding 3,150 pounds and must be capable of withstanding a 50 percent overload (4,725 pounds total) without failure of either the anchoring equipment or the attachment point on the commercial coach.

(8) Exposed anchoring equipment must have a resistance to weather deterioration at least equal to that provided by a coating of zinc on steel of at least 0.30 ounces per square foot of surface coated.

(a) Slit or cut edges of zinc-coated steel strapping do not need to be zinc-coated.

(b) Type 1, Class B, Grade 1 steel strapping, 1 1/4 inches wide and 0.035 inch thick, conforming with Federal Specification QQ-S-781-G, meets the requirements of this paragraph.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0880, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0900 Interior walls and partitions. Interior walls and partitions must be:

(1) Constructed with structural capacity adequate for the intended purpose; and

(2) Capable of resisting a horizontal load of at least five pounds per square foot without exceeding the deflections specified in WAC 296-150C-0920.

[Title 296 WAC—p. 2133]

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0900, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0910 Minimum uniform and concentrated live loads. See use or occupancy of the 1997 edition of The Uniform Building Code for group occupancy loads.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150C-0910, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0910, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0920 Design load deflection. When a structural assembly is subjected to total design live loads, the deflection for structural framing members must not exceed the following:

L = The clear span between supports or two times the length of a cantilever.

Floor	L/240
Roof and ceiling	L/180
Headers, beams, girders	L/180
Walls and partitions	L/180

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0920, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0930 Structural load tests. (1) A structural assembly or subassembly tested for qualification must sustain the design dead load plus the superimposed design live loads (see WAC 296-150C-0840) equal to 1.75 times the required live loads for a period of twelve hours without failure of the assembly or subassembly, unless otherwise specified in this chapter.

(2) An assembly or subassembly failure is defined as a rupture, fracture, or residual deflection which is greater than the limits set in WAC 296-150C-0920. The type and quality of material used in each test assembly or subassembly must be identified. The assembly or subassembly tested must represent the minimum quality of material.

(3)(a) Nationally recognized standards or engineering practices must be used for structural load tests for commercial coaches.

(b) Tests must be witnessed by a professional engineer or architect.

Note: We will provide test procedure forms upon request.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0930, filed 10/23/96, effective 11/25/96.]

CONSTRUCTION

WAC 296-150C-0940 Fastening of structural systems. Roof framing must be securely fastened to wall framing, walls to floor structure, and floor structure to chassis to secure and maintain continuity between the floor and chassis and to resist wind uplift, overturning, and sliding as imposed by design loads.

[Title 296 WAC—p. 2134]

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0940, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0950 Roof coverings/membrane/weather resistant. (1)(a) The roof covering must be securely fastened in an approved manner to the supporting roof construction and must provide weather protection for the commercial coach and the occupants. The roof covering must be installed according to the manufacturer's instructions and approved by us.

(b) Roofing membranes must be rigid enough to prevent deflection that would permit ponding of water or separation of seams due to snow or wind or during assembly or transportation.

(2) Exterior covering materials, including metal coverings, must be moisture and weather-resistant and contain corrosion resistant fasteners to prevent wind and rain deterioration.

Note: Electro-plated, electro-deposited zinc, and electro-galvanized staples are not considered corrosion resistant materials.

(3) All exterior openings or penetrations into the commercial coach around piping, ducts, plenums, or vents must be sealed with moisture resistant material.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0950, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0960 What requirements apply to commercial coach roof trusses? (1) The construction of roof trusses must be approved by a professional engineer. Roof trusses may be produced by one of the following methods:

(a) Use of graded materials when an approved testing agency certifies truss construction and load requirements are met; the testing agency must prepare an approved quality control program which allows them to test the trusses with appropriate testing procedures.

(b) Use of nongraded materials, if each truss is tested in an approved testing jig at the manufacturer's site with a load equivalent to full design load (1.75 times the full design load sustained for 12 hours). See WAC 296-150C-0930.

(2)(a) Representative trusses must be tested from the production line, when we request. The approved testing agency or engineer must submit the testing report to us.

(b) All test reports are to be stamped, signed, and dated by the approved testing agency or engineer who performs the test.

(c) These tests must not occur more than two times a year per design unless there are problems with the roof trusses.

(d) The manufacturer is required to maintain an acceptable quality level not exceeding one percent using acceptable sampling procedures.

Note: The acceptable quality level is defined as the maximum allowable percentage of defective units.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150C-0960, filed 6/4/99, effective 7/5/99. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-0960, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360,

(2001 Ed.)

[43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0960, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0970 Roof construction. (1) All roofs must be framed and tied into the framework and supporting walls to form an integral part of the commercial coach.

(2) All trusses must be laterally braced.

(3) All roof decks must be designed and built with sufficient slope or camber to assure adequate drainage, or must be designed to support maximum loads including possible ponding of water due to deflection.

(4) Cutting roof framework members for passage of electrical, plumbing, or mechanical systems is prohibited except where substantiated by engineering analysis.

(5) Electrical, plumbing, or mechanical systems must not penetrate the roofing membrane unless the penetration point is adequately sealed.

(6) Ventilation. Enclosed attics and enclosed rafter spaces formed where ceilings are applied directly to the underside of roof rafters shall have cross ventilation for each separate space by ventilating openings protected against the entrance of rain and snow. Where eave or cornice vents are installed, insulation shall not block the free flow of air. A minimum of 1 inch of air space shall be provided between the insulation and roof sheathing. The net free ventilating area shall not be less than 1/150 of the space ventilated, except:

(a) The area may be 1/300, provided 50 percent of the required opening area is provided by ventilators located in the upper portion of the space to be ventilated at least 3 feet above eave or cornice vents; or

(b) A vapor barrier not exceeding 1 perm is installed on the warm side of the attic insulation.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150C-0970, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0970, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-0990 Sealing wall exterior openings.

All exterior wall openings or penetrations into the commercial coach around piping, ducts, plenums, or vents must be sealed with moisture-resistant material.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-0990, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1000 Drilling or notching of wood wall structural members. (1) **Cutting and notching.** In exterior walls and bearing partitions, any wood stud may be cut or notched to a depth not exceeding 25 percent of its width. Cutting or notching of studs to a depth not greater than 40 percent of the width of the stud is permitted in nonbearing partitions supporting no loads other than the weight of the partition.

(2) **Bored holes.** A hole not greater in diameter than 40 percent of the stud width may be bored in any wood stud. Bored holes not greater than 60 percent of the width of the stud are permitted in nonbearing partitions or in any wall where each bored stud is doubled, provided not more than two such successive doubled studs are so bored.

(2001 Ed.)

In no case shall the edge of the bored hole be nearer than 5/8 inch (16mm) to the edge of the stud. Bored holes shall not be located at the same section of stud as a cut or notch.

(3) Drilling or notching of studs greater than allowed in subsection (1) or (2) of this section must be substantiated by engineering analysis.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1000, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1020 Wall construction. Walls must be of sufficient strength to withstand the load requirements of this chapter. The connections between the bearing walls, floor, and roof framework members must be fabricated to provide support for the material used to enclose the commercial coach and to provide for the transfer of all lateral and vertical loads to the floor and the chassis.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1020, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1030 Fire-blocking. (1) Fire-blocking must be provided in commercial coaches to cut off all concealed draft openings in all stud walls and partitions, including furred spaces at the ceiling and floor levels and at ten foot intervals both vertical and horizontal.

(2) Fire-blocking must be provided around vents, pipes, ducts, chimneys, fireplaces, and similar openings which afford a passage for fire at ceiling and floor levels, with non-combustible material.

(3) Fire blocking must be two inch nominal lumber, gypsum board, cement asbestos board, mineral fiber or other approved materials securely fastened in place.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1030, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1040 Floors. (1) Wood floors or sub-floors in kitchens, bathrooms (including toilet compartments), laundry rooms, water heater compartments, and any other areas subject to excessive moisture must be moisture resistant; or they must be made moisture resistant by sealing or by an overlay of nonabsorbent material applied with water-resistant adhesive.

(2) Carpeting cannot be used under a heat producing appliance unless the appliance is listed for such use.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1040, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1050 Drilling or notching of wood joist structural members. (1) Notches on the ends of joists must not exceed one-fourth the joist depth, unless substantiated by engineering design or approved tests.

(2) Holes bored in joists must not be within two inches of the top or bottom of the joist, and the diameter of any such hole must not exceed one-third of the depth of the joist.

(3) Notches in the top or bottom of the joists must not exceed one-sixth the depth and must not be located in the middle third of the span.

(4) Joists in transverse floor framing systems, which do not have perimeter blocking, must not be drilled or notched, unless substantiated by engineering design or approved tests.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1050, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1060 Fastening of structural systems. Roof framing must be securely fastened to wall framing, walls to floor structure, and floor structure to chassis to secure and maintain continuity between these elements to resist wind uplift, overturning and sliding imposed by the design loads.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1060, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1070 Floor closure material. The closure material must meet ASTM D-781 standard or equal and be installed as follows:

(1) Fibrous material (with or without patches) must meet or exceed the level of 48 inch-pounds of puncture resistance as tested.

(2) The material must be installed according to installation instructions furnished by the supplier of the material.

(3) Patching material must be suitable for patches and the patch life must be equivalent to the material life.

(4) Floor closure material around piping, ducts, plenums, or vents must prevent damage to the underside of the commercial coach due to air, water, insects, dust, and must be rodent resistant.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150C-1070, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1070, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1080 What design and construction requirements apply to a commercial coach chassis? Each commercial coach chassis must be designed and constructed to be capable of:

(1) Effectively sustaining the design loads consisting of the dead load plus five PSF load on the floor and the superimposed dynamic load resulting from highway movement, in no case shall the dynamic load be required to exceed twice the dead load; and

(2) Accepting the shock and vibration from the roadway and towing vehicle through the use of adequate running gear assemblies.

(3) In the set up mode, the commercial coach must be designed to accommodate a fifty PSF floor load.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150C-1080, filed 6/4/99, effective 7/5/99. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1080, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1080, filed 10/23/96, effective 11/25/96.]

[Title 296 WAC—p. 2136]

MATERIALS

WAC 296-150C-1090 Standards for equipment and installations. The manufacturer's equipment and installation specifications must be followed. Other approved standards are acceptable when:

- Installed according to the manufacturer's installation instructions; and
- Approved by a listing or testing agency.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1090, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1100 Flame-spread limitations. (1) The interior finish of all walls and partitions must have a flame-spread rating not exceeding two hundred except as otherwise specified in this section. The flame-spread limitation does not apply to:

(a) Molding, trim, windows, doors, or series of doors four feet wide or less;

(b) Permanently attached decorative items such as pictures or accent panels constituting a maximum of ten percent of the aggregate wall surface in any room or space or more than thirty-two square feet in surface area, whichever is less.

(2) All ceiling interior finish must have a maximum flame-spread rating of two hundred, excluding molding and trim two inches wide or less.

(3) Furnace and water heater spaces must be enclosed by walls, ceiling, and doors having an interior finish with a maximum flame-spread of twenty-five.

(4) Combustible kitchen cabinet doors, countertops, exposed bottom and end panels must have a maximum flame-spread of twenty-five. Cabinet rails, stiles, mullions, and toe strips are exempted.

(5) Exposed interior finishes adjacent to the cooking range must have a flame-spread of fifty. Adjacent surfaces are the exposed vertical surfaces between the range top and the overhead cabinets or ceiling and within six horizontal inches of the cooking range.

(6) Finish surfaces of plastic bath tubs, shower units and tub or shower doors must have a flame-spread of two hundred.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1100, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1110 Combustible limitations. (1) The exposed wall adjacent to the cooking range, must be fifty flame-spread or less, such as 5/16 inch gypsum board or material having equivalent fire protective properties.

(2) All openings for pipes and vents in furnace and water heater spaces shall be tight-fitted or fire-stopped.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1110, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1120 Kitchen cabinet protection. The bottom and sides of combustible kitchen cabinets over cooking ranges or tops including a space of six inches from the edge of the burners must be protected with at least mate-

(2001 Ed.)

rials rated at 25 or less flame-spread covered with at least twenty-six gauge sheet metal (.017 stainless steel, .024 aluminum or .020 copper) or equivalent protection. The protective metal over the range must form a hood with at least a three-inch eyebrow (measuring horizontally from face of cabinet). The hood must be centered over and at least as wide as the top of the cooking range.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1120, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1130 Insulation standards. Insulation standards for commercial coaches must comply with the Washington State Energy Code, unless another state law supersedes the Washington State Energy Code.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1130, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1140 Room sizes. (1) Every habitable room must have a minimum ceiling height of not less than seven feet.

(2) No habitable room, except a kitchen, must be less than five feet in any clear horizontal dimension.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1140, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1150 Hallways. (1) Hallways in structures required to meet accessibility standards must have a minimum horizontal dimension that conforms to accessibility standards set by the Washington state Uniform Building Code.

(2) Hallways in nonaccessible construction site trailers must have a minimum horizontal dimension of 32 inches.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1150, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1160 Accessibility standards. When applicable, a commercial coach must meet the accessibility standards set by the Washington State Building Code in RCW 19.27.030(5).

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1160, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1170 What are the lighting and ventilation requirements of a commercial coach? (1) Habitable rooms must be provided with exterior windows or doors having a total glazed area of at least ten percent of the floor area, or they must have artificial light.

(2) An area equal to a minimum of five percent of the floor area must be available for unobstructed ventilation. Glazed areas do not need to be opened if a mechanical ventilation system is provided. The mechanical ventilation system must be capable of producing a change of air in the room every thirty minutes with at least one-fifth of the air supply taken from outside the commercial coach.

(2001 Ed.)

(3) Each bathroom must be provided with artificial light and with external windows or a mechanical exhaust must be provided. The external window must have at least 1/2 square feet of glazed area fully able to open. A mechanical ventilation system must be capable of producing a change of air every twelve minutes. Any mechanical ventilation system must exhaust directly to the outside of the commercial coach.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1170, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1170, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1175 Glass and glazed openings. The provisions of this section shall apply to the installation of glass or glazed openings, including hazardous locations.

(1) Standards. Standards for material shall meet UBC Standard 24-1 for flat glass and UBC Standard 24-2 for safety glazing.

(2) Identification. Flat glass shall bear the manufacturer's label designating the type and thickness of glass. Safety glazing shall have the manufacturer's identification etched or ceramic fired on the glass and be visible when the unit is glazed.

(3) Wind loads. Exterior glass and glazing shall be capable of withstanding a wind pressure of 20 pounds per square foot.

(4) Hazardous locations. The following shall be considered specific hazardous locations for the purposes of glazing:

(a) Glazing in ingress and egress doors;

(b) Glazing in fixed and sliding panels of sliding door assemblies and panels in swinging doors other than wardrobe doors;

(c) Glazing in storm doors;

(d) Glazing in fixed or operable panels adjacent to a door where the nearest exposed edge of the glazing is within a 24-inch arc of either vertical edge of the door in a closed position;

(e) Glazing in a fixed or operable panel, other than locations in (d) of this subsection, that meets all of the following conditions:

(i) Exposed area of an individual pane greater than 9 square feet.

(ii) Exposed bottom edge less than 18 inches above the floor;

(f) Shower doors and tub enclosures.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150C-1175, filed 8/22/00, effective 9/30/00.]

WAC 296-150C-1180 Commercial coach exits. When applicable, a commercial coach must comply with Uniform Building Code, Chapter 11 Accessibility and with the following requirements:

(1) Commercial coaches must have at least two exterior doors that are remote from each other. Remote means that in:

(a) Single-wide units the doors may not be less than twelve feet apart; and

(b) Multi-wide units the doors may not be less than twenty feet apart, center to center from each other measured

in a straight line direction regardless of the length of travel between doors.

Exception: A commercial coach that is twenty-four feet long or less needs only one exit door, unless it has a dormitory sleeping area.

(2) Exterior doors must be constructed for exterior use. Exterior doors must provide at least a thirty-five inch wide by seventy-nine inch high clear opening (36" x 80" door). Each swinging exterior door must have a key-operated lock that has a deadlock latch. A deadlock with a passage set installed below the deadlock may be used as an acceptable alternate for each exterior door. The locking mechanism must be engaged or disengaged by the use of a lever or other device from the interior of the commercial coach. Locks must not require the use of a key for operation from the inside.

(3) Every room designed for dormitory sleeping, unless it has an exterior exit door, must have at least one window which can be opened from the inside without using tools. This window must provide a clear opening of at least twenty-two inches in its smallest dimension and five square feet in area with the bottom of the opening not more than three feet above the floor. If a screen or storm window is used it must be readily removable without using tools.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1180, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1190 Interior privacy. If a commercial coach interior door, such as a bathroom door, has a privacy lock, the lock must contain an emergency release. The emergency release must be on the outside to permit entry when the door is locked from the inside.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1190, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1195 Fire warning equipment—Automatic smoke detectors. (1) At least one smoke detector (which may be a single station smoke detector) must be installed in each commercial coach to protect each separate bedroom. Smoke detectors must meet the requirements of the Standard for Single and Multiple Station Smoke Detectors of the Underwriters Laboratories Inc. (UL 217). All dormitories must have at least one installed smoke detector.

(2) A smoke detector must be installed in the hallway or area next to the bedroom, and must be mounted, where possible, between the commercial area and the first bedroom door on an interior wall. Where mounting cannot be achieved due to limited interior wall space, the smoke detector must be located as close as practical to the first bedroom door on an interior wall. Commercial coaches having bedrooms separated by one or a combination of common use areas (such as a kitchen, dining area, or a commercial area, but, not a bathroom) must have at least two smoke detectors, one smoke detector protecting each bedroom.

(3) Smoke detectors must be installed per their listing. The smoke detector mounting must be attached to an electrical outlet box and the detector must be permanently wired into a general purpose electrical circuit. There must be no

switches in the circuits to the detectors other than the circuit breaker serving the circuits.

(4) The commercial coach manufacturer must provide a copy of the testing and maintenance instructions supplied by the manufacturer of the smoke detector for the information of the consumer and users of the commercial coach.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1195, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1200 Installation instructions. The manufacturer must provide printed instructions upon request for each commercial coach specifying the following:

- (1) The location and required capacity of stabilizing devices, such as tie downs, piers, and blocking;
- (2) Devices and methods used to connect all components and systems including, chassis and utilities; and
- (3) Leveling, including releveling.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1200, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1210 Table: Number of ties required per side of commercial coach.

NUMBER OF TIES REQUIRED PER
SIDE OF COMMERCIAL COACH

Note: This table is based on a minimum working load per anchor of three thousand one hundred fifty pounds with a fifty percent overload (four thousand seven hundred twenty-five pounds total).

Length of Commercial Coach (Feet)	No. of Vertical Ties	No. of Diagonal Ties
00-40	2	3
41-46	2	3
47-49	2	3
50-54	2	3
55-58	2	4
59-64	2	4
65-70	2	4

(1) Double-width commercial coaches require only the diagonal ties specified, and these must be placed along the outer side walls;

(2) Length of commercial coach (as used in this table) means length excluding draw bar;

(3) Diagonal ties in this method must deviate at least forty degrees from a vertical direction; or

(4) The number of ties required can be designed by a professional engineer.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1210, filed 10/23/96, effective 11/25/96.]

ELECTRICAL

WAC 296-150C-1220 Electrical—General. This chapter applies to the installation of electrical equipment in any commercial coach bearing or required to bear a department insignia.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1220, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1230 Electrical definitions. Definitions contained in the current adopted edition National Electrical Code (NEC), and the following definitions apply to the commercial coach electrical standards in this chapter.

"**Converter**" is a device that changes electrical energy from one form to another, as from alternating current to direct current.

"**Feeder assembly**" or "**subpanel**" is the overhead or under-chassis feeder conductor, including the grounding conductor, fittings, and equipment, or power-supply cord approved for commercial coach.

The feeder assembly or subpanel is used in commercial coaches and designed to deliver energy from the source of electrical supply to the distribution panelboard within the commercial coach.

"**Low voltage**" is an electromotive force rated at thirty-two volts or less, supplied from a transformer, converter, or battery.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1230, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1240 Branch circuit and feeder calculations. Branch circuit and feeder calculations must be determined according to the National Electrical Code.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1240, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1250 Disconnecting means and branch circuit protective equipment. (1) The branch circuit equipment may be combined with the disconnecting means as a single assembly. Such a combination may be designated as a distribution panelboard. If a fused distribution panelboard is used, the maximum fuse size for the mains must be plainly marked with lettering at least 1/4 inch high and visible when fuses are changed.

Note: See the National Electrical Code concerning identification of each disconnecting means and each feeder or branch circuit at the point where it originated and type of marking needed.

(2) Plug fuses and fuseholders must be tamper-resistant, Type "S," enclosed in dead-front fuse panelboards.

(3) A single disconnecting means must be provided in each commercial coach. It must consist of a circuit breaker or a switch, fuses, and their accessories installed in a readily accessible location near the point of entrance of the supply cord or conductors into the commercial coach. The main circuit breakers or fuses must be plainly marked "main." This equipment must contain a solderless type of grounding connector or bar for the purposes of grounding, with sufficient terminals for all grounding conductors. The neutral bar termination of the grounded circuit conductors must be insulated.

(4) The disconnecting equipment must have a rating suitable for the connected load. The distribution equipment, either circuit breaker or fused type, must be located a mini-

(2001 Ed.)

imum of twenty-four inches from the bottom of such equipment to the floor level of the commercial coach. There must be an accessible space of at least thirty inches wide by thirty-six inches deep by seventy-eight inches high in front of the electrical disconnect equipment. The main circuit breakers or switches must be plainly marked "main." There must be a label attached to the panelboard stating:

"This panelboard must be connected by a feeder assembly having overcurrent protection rated at not more than _____ amperes." (The correct ampere rating must be marked in the blank space.)

(5) Branch circuit distribution equipment must be installed in each commercial coach and must include overcurrent protection for each branch circuit consisting of either circuit breakers or fuses.

(6) The branch circuit overcurrent devices must be rated:

(a) Not more than the circuit conductors; and

(b) Not more than one hundred fifty percent of the rating of a single appliance rated ten amperes or more; but

(c) Not more than the overcurrent protection rating marked on the motor-operated appliance. A device not approved for branch circuit protection, such as a thermal cut-out or motor overload protective device, must not be considered as the overcurrent device protecting the circuit.

(7) A 20-ampere fuse or circuit breaker must be considered adequate protection for fixture leads, cords for portable appliances and No. 14 AWG (American Wire Gauge) tap conductors, not over six feet long, for recessed lighting fixtures.

(8) If more than one outlet or load is on a branch circuit, a 15-ampere receptacle must be considered protected by a 20-ampere fuse or circuit breaker.

(9) When circuit breakers are provided for branch circuit protection, 240-volt circuits must be protected by two-pole common or companion trip circuit breakers.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1250, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1260 Power supply—Feeder assembly equipment. A commercial coach must be provided with feeder assembly equipment, installed by the manufacturer according to National Electrical Code and the provisions of this chapter. The assembly must be either:

(1) One overhead assembly containing the required number of insulated color-coded feeder conductors, one of which must be a grounding conductor; or

(2) One under-vehicle assembly consisting of conduit running from the commercial coach branch circuit panelboard to the underside of the commercial coach. Conduit must be sized in accordance with the National Electrical Code; or

(3) Other installations approved by the department.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1260, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1270 Identification of feeder assembly connection. (1) Each commercial coach equipped with a 120-volt electrical system must have a label, permanently

[Title 296 WAC—p. 2139]

attached on the outside wall adjacent to the point of entrance of the feeder assembly, that reads:

"THIS CONNECTION IS FOR 110-125 VOLT AC SERVICE. DO NOT CONNECT HIGHER VOLTAGE."

(2) Each commercial coach equipped with a 120/240-volt AC electrical system must have a label, permanently attached on the outside wall, adjacent to the point of entrance of the supply assembly or permanently installed feeders, that reads:

"THIS CONNECTION IS FOR 120/240 VOLT AC _____ AMPERE SERVICE." (The correct service rating shall be stamped in the blank space.)

(3) Each commercial coach equipped with a 480/277-volt electrical system must have a label, permanently attached on the outside wall, adjacent to the point of entrance of the supply assembly or permanently installed feeders, that reads:

"THIS CONNECTION IS FOR 480/277 VOLT AC _____ AMPERE SERVICE." (The correct service rating shall be stamped in the blank space.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1270, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1280 Wiring methods—Wiring of expandable or multiple units. (1) Where circuits in expandable or multiple units are designed to be energized from one main panelboard, permanent-type wiring methods and materials must be used for connecting the units to each other.

(2) Commercial coaches may have individual branch circuit panelboards installed in each unit subject to the requirements of this chapter.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1280, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1290 Under-chassis wiring. Outdoor or under-chassis wiring (120/240 volts) exposed to moisture and mechanical damage must be protected by rigid metal conduit, electrical metallic tubing, liquid-tight flexible metal conduit, or nonmetallic conduit. The conductors shall be type RW, TW, or equivalent.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1290, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1300 Equipment mounting. Electrical equipment must be securely mounted to prevent displacement during transit. Meter bases must not be mounted on commercial coaches.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1300, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1303 How must storage batteries be installed in a commercial coach? Storage batteries subject to the provisions of this standard must be securely attached to the commercial coach. They must be installed in an area which is vapor-tight to the interior and ventilated directly to the exterior of the coach. When batteries are installed in a

[Title 296 WAC—p. 2140]

compartment, the compartment must be ventilated with openings of not less than two square inches at the top and two square inches at the bottom. Batteries must not be installed in a compartment containing spark or flame producing equipment, except in an engine generator compartment if the only charging source is the generator itself.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150C-1303, filed 6/30/98, effective 7/31/98.]

WAC 296-150C-1310 Grounding—General. Grounding of both electrical and nonelectrical metal parts in a commercial coach must be through connection to a grounding bus in the commercial coach distribution panel. The grounding bus must be grounded through the green conductor in the supply cord. It may also be grounded through the feeder wiring to the service ground in the service-entrance equipment located adjacent to the commercial coach location. Do not connect either the frame of the commercial coach or the frame of any appliance to the neutral conductor in the commercial coach.

(1) The insulated neutral requirements are as follows:

(a) The grounded (neutral) circuit conductor must be insulated from the grounding conductors, from equipment enclosures, and from other grounded parts.

(b) The grounded (neutral) circuit terminals in the distribution panels and in ranges, clothes dryers, counter-mounted cooking units, and wall-mounted ovens must be insulated from the equipment enclosure.

(c) Bonding screws, straps, or buses in the distribution panel or in appliances *must be removed and discarded*.

(d) Connections of ranges and clothes dryers with 120/240 volt, 3-wire ratings must be made with 4-conductor cord and 3-pole, 4-wire grounding-type plugs or by type AC metalclad cable or individual conductors enclosed in flexible metal conduit.

(e) Type NM or type SE cable must not be used to connect a range or a dryer. This does not prohibit the use of type NM or type SE cable between the branch circuit overcurrent protective device and a junction box or range or dryer receptacle.

(f) For 120-volt rated devices, a 3-conductor cord and 2-pole, 3-wire grounding-type plug is permitted.

(2) The following equipment grounding means must be used:

(a) The green grounding wire in the supply cord or permanent feeder wiring must be connected to the grounding bus in the distribution panel or disconnecting means.

(b) In the electrical system, all exposed metal parts, enclosures, frames, lamp fixture canopies, etc., must be effectively bonded to the grounding terminal or enclosure of the distribution panel.

(c) Cord-connected appliances must be grounded by means of an approved cord with grounding conductor and grounding-type attachment plug.

(3) The following bonding requirements of noncurrent-carrying metal parts must apply:

(a) All exposed noncurrent-carrying metal parts that may become energized must be effectively bonded to the grounding terminal or enclosure of the distribution panelboard. A

bonding conductor must be connected between each distribution panelboard and an accessible terminal on the chassis.

(b) Grounding terminals must be of the solderless type and approved as pressure-terminal connectors recognized for the wire size used.

(c) The bonding conductor must be solid or stranded, insulated or bare and must be No. 8 copper minimum or equal. It must be routed so as not to be exposed to physical damage.

(d) Metallic gas, water, and waste pipes and metallic air circulating ducts must be considered bonded if they are connected to the terminal on the chassis by clamps, solderless connectors or by suitable grounding-type straps.

(e) Any metallic roof and exterior covering must be considered bonded if:

(i) The metal panels overlap one another and are securely attached to the wood or metal frame parts by metallic fasteners;

(ii) The lower panel of the metallic exterior covering is secured at a cross member of the chassis by two metal fastener straps per commercial coach unit or section at opposite ends; and

(iii) The bonding strap must be a minimum of 30 gauge galvanized metal and must be a minimum of four inches wide.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1310, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1320 Dielectric strength test. (1)(a)

The wiring of each commercial coach must be subjected to a one-minute, 900-volt, dielectric strength test between live parts (including neutral) and the commercial coach ground. All switches must be closed during the test. (Closed switches are in the on position.)

(b) The test may also be performed at 1,080 volts for one second. This test must be performed after branch circuits are complete and after fixtures or appliances are installed.

Exception: Fixtures and appliances are not required to withstand the dielectric strength test.

(2) Each commercial coach designed with a 480-volt electrical system must be subjected to a one-minute 1,275-volt dielectric strength test between current-carrying conductors and the coach ground. The test may also be performed at 1,500 volts for one second.

(3) Low-voltage circuit conductors in each commercial coach must withstand the applied potential without electrical breakdown of a one-minute, 500-volt, or a one-second, 600-volt, dielectric strength test. The potential must be applied between live and grounded conductors.

(4) The test is to be performed by the manufacturer and witnessed by the inspector.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1320, filed 10/23/96, effective 11/25/96.]

MECHANICAL

WAC 296-150C-1330 Mechanical—General. This chapter applies to the installation of mechanical, ventilation,

(2001 Ed.)

and indoor air quality equipment in any commercial coach bearing or required to bear a department insignia. Mechanical, ventilation, and indoor air quality equipment and installations in or on a commercial coach shall be installed according to the requirements of the Uniform Mechanical Code, the Washington State Ventilation and Indoor Air Quality Code, the rules of this chapter, and the conditions of the equipment approval or listing agency.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1330, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1340 Mechanical definitions. Definitions contained in the current adopted edition of the Uniform Mechanical Code, and the following definitions apply to the commercial coaches.

"Accessible" is having access to a fixture, connection, appliance, or equipment that requires the removal of an access panel, door, or similar obstruction.

"Appliance compartment" is a room having a floor area not in excess of twice the largest plan area of the room's appliance or appliances plus clearances required in this chapter.

"Automatic pilot device" is a device employed with gas-burning equipment that will either automatically shut off the gas supply to the burner being served or automatically activate, electrically or otherwise, a gas shut-off device when the pilot flame is extinguished.

"Btuh" is British thermal units per hour.

"Clearance" is the distance between the appliance, chimney, vent, or chimney or vent connector, or plenum and the nearest surface.

"Combustible material" is a material adjacent to or in contact with a heat-producing appliance, vent connector, chimney, or steam and hot water pipes, made of or surfaced with wood, compressed paper, plant fibers, or other products that will ignite and burn. Such material must be considered combustible even though flame-proofed, fire-retardant treated, or plastered.

"Connector-gas appliance" is a flexible or semi-rigid connector listed as conforming to ANSI Standard Z21.24, Metal Connectors for Gas Appliances, used to convey fuel gas, three feet or less in length (six feet or less for gas ranges), between a gas outlet and a gas appliance in the same room.

"Fuel gas piping system" is the arrangement of piping, tubing, fittings, connectors, valves, and devices designed and intended to supply or control the flow of fuel gas to an appliance.

"Gas" is fuel gas, such as natural gas, manufactured gas, undiluted liquefied petroleum gas (vapor phase only), liquefied petroleum air-gas mixtures, or mixtures of these gases that would ignite in the presence of oxygen.

"Gas-supply connection" is the terminal end or connection to which a gas-supply connector is attached.

"Input rating" is the maximum fuel-burning capacity of any warm-air furnace, recessed heater, or burner expressed in British thermal units per hour.

"Liquefied petroleum gases (LPG)" is any material that is composed predominantly of propane, propylene,

butanes (normal butane or isobutane), and butylenes, or any mixture of them.

"Quick-disconnect device" is a hand-operated means of connecting and disconnecting a gas supply or connecting gas systems and is equipped with an automatic device to shut off the gas supply when disconnected.

"Readily accessible" is having direct access without the necessity of removing any panel, door, or similar obstruction.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1340, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1345 May the electrical disconnect required for mechanical equipment be inside of or mounted on the equipment? The electrical disconnect shall not be inside of or mounted on the equipment.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150C-1345, filed 6/4/99, effective 7/5/99.]

WAC 296-150C-1346 When HVAC equipment is supplied with more than one CFM rating, which rating do I use? Where HVAC equipment manufacturers show multiple cubic feet per minute (CFM) ratings and/or multiple water gauge ratings, you must use the highest rated capacity.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150C-1346, filed 8/22/00, effective 9/30/00.]

WAC 296-150C-1350 LPG system enclosure and mounting. (1) LPG containers must not be installed, nor stored temporarily, inside any commercial coach.

Exception: This prohibition does not apply to completely self-contained hand torches, lanterns, or similar equipment with containers having a maximum water capacity of two and one-half pounds (approximately one pound LPG capacity).

(2)(a) Containers, control valves and regulating equipment, when installed, must be mounted on the "A" frame of the commercial coach or installed in a compartment that is *vapor-tight* to the inside of the commercial coach and accessible only from the outside.

(b) The compartment must be ventilated at top and bottom to diffuse vapors. The compartment must be ventilated with two vents having an aggregate area of not less than two percent of the floor area of the compartment and must open without restriction to the outside. The required vents must be equally distributed between the floor and ceiling of the compartment. If the lower vent is located in the access door or wall, the bottom edge of the vent shall be flush with the floor level of the compartment. The top vent must be located in the access door or wall with the bottom of the vent not more than twelve inches below the ceiling level of the compartment. All vents must have an unrestricted discharge to the outside atmosphere. Access doors or panels of compartments must not be equipped with locks or require special tools or knowledge to open.

(3) Doors, hoods, domes, or portions of housings and enclosures required to be removed or opened for container replacement must incorporate means for clamping them firmly in place and preventing them from working loose dur-

[Title 296 WAC—p. 2142]

ing transit. Provisions must be incorporated in the assembly to hold the containers firmly in position and prevent their movement during transit.

(4) LPG containers must be mounted on a substantial support or a base secured firmly to the commercial coach chassis. Neither the container nor its support can extend below the commercial coach frame.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1350, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1360 Gas piping—Piping design.

Commercial coaches requiring fuel gas for any purpose must be equipped with a gas piping system that is designed for LPG only or combination LPG and natural gas.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1360, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1370 Gas piping—Expandable or multiple commercial coaches. Where gas piping is to be installed in more than one portion of an expandable or multiple commercial coach, the design and construction must be as follows:

(1) There must be only one point of cross over, readily accessible from the exterior of the commercial coach.

(2) The connector between units must be a listed flexible gas connector approved for exterior use.

(3) A shut-off valve must be located on the supply side of the connection. Both a flexible gas connector that is approved for exterior use and a quick disconnect type of connector must be tested and approved to IAPMO TSC-9 standard or equal; and both must have a shut-off valve installed that is tested and approved to ANSI Z21.15 standard or equal.

(4) Protective caps or plugs must be permanently attached to the coach and used to seal the system when not in use.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1370, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1380 Concealed tubing. (1) Tubing must not be run inside walls, floors, partitions, or roofs.

(2) If tubing passes through walls, floors, partitions, roofs, or similar installations, the tubing must be protected by the use of weather resistant grommets that snugly fit both the tubing and the hole through which the tubing passes.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1380, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1390 Gas piping—Pipe-joint compound. (1) Screw joints must be made tight with pipe-joint compound that is insoluble in liquefied petroleum gas.

(2) Pipe-joint compound must be approved for the type of gas used. The pipe-joint compound must be applied to the male threads only.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1390, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1400 Gas piping—Hangers and supports. (1) All gas piping must be adequately supported by galvanized or equivalently protected metal straps or hangers at intervals of not more than four feet, except where adequate support and protection is provided by structural members.

(2) Gas pipe supply connections must be rigidly anchored to a structural member within six inches of the supply connections.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1400, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1410 Gas piping—Electrical ground. (1) Gas piping must not be used for an electrical ground.

(2) The gas line must be bonded.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1410, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1420 Identification of gas supply connections. A label must be permanently attached on the outside of the exterior wall of the commercial coach adjacent to the gas supply connection which provides the following information:

(1) The type of system (i.e., liquid petroleum system or natural gas system or combination liquid petroleum and natural gas system);

(2) The appropriate Btuh input rating; and

(3) If excess ("or more") Btuh input is allowed.

*For example: Natural Gas System
250,000 Btuh
Or More*

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1420, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1430 Gas piping system openings. All openings in the gas piping system must be closed gas-tight with threaded pipe plugs or pipe caps.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1430, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1440 Gas piping—Valves. (1) In addition to any valve on the appliance, a shut-off valve must be installed in the fuel piping outside of each gas appliance but inside the commercial coach structure and upstream of the union or connector. The shut-off valve must be located within six feet of a cooking appliance and within three feet of any other appliance. A shut-off valve may serve more than one appliance if located as required above.

(2) Shut-off valves used in connection with gas piping must be of a type designed for use with liquefied petroleum gas. Shut-off valves must be tested and approved to ANSI Z21.15 standard or equal.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1440, filed 10/23/96, effective 11/25/96.]

(2001 Ed.)

WAC 296-150C-1450 Gas piping—Testing for leakage before appliances are connected. (1) The piping system must stand a pressure of at least ten psi gauge for a period of not less than fifteen minutes without showing any drop in pressure.

(2) Pressure must be measured with a gauge calibrated to be read in increments of not greater than one-tenth pound.

(3) The source of pressure must be isolated before the pressure tests are made. Before a test is begun, the temperature of the ambient air and of the piping must be approximately the same, and constant air temperature must be maintained throughout the test.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1450, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1460 Gas piping—Testing for leakage after appliances are connected. (1) After gas appliances have been connected, the gas-piping system must be subjected to a pressure test with the burner valves closed. The test consists of air at not less than ten inches nor more than fourteen inches pressure of water column (six to eight ounces). The system must hold this pressure for a period of not less than ten minutes with no leakage. Before beginning the test, the temperature of the gas-piping system and the test air must be equalized, and this shall be maintained throughout the test.

(2) Appliance shut-off valves ahead of gas cooking appliances may be closed for the performance of this test. When the test is satisfactorily performed, these valves must be opened and, while the system is under pressure, the appliance connectors must be tested with an approved leak detector or approved bubble solution.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1460, filed 10/23/96, effective 11/25/96.]

VENTILATION AND INDOOR AIR QUALITY

WAC 296-150C-1470 Ventilation and indoor air quality—General. Ventilation and indoor air quality equipment and installations in or on a commercial coach must be made according to the requirements of the Washington State Ventilation and Indoor Air Quality Code, the Uniform Mechanical Code, the rules of this chapter, and the conditions of the equipment approval.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1470, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1480 Ventilation and indoor air quality definitions. Definitions contained in the current adopted edition of the Washington State Ventilation and Indoor Air Quality Code and the Uniform Mechanical Code and the following definitions apply to the commercial coach ventilation and indoor air quality rules in this chapter.

"**Duct**" is a conduit or passageway for conveying air to or from heating, cooling, air conditioning, or ventilation equipment, not including the plenum.

"Plenum" is an air compartment that is part of an air-distributing system to which one or more ducts are connected.

- A **furnace-supply plenum** is a plenum attached directly to, or an integral part of, the air-supply outlet of the furnace.
- A **furnace-return plenum** is a plenum attached directly to, or an integral part of, the return inlet of the furnace.

"Vent connector" is a pipe for conveying products of combustion from a fuel-burning appliance to a vent.

"Water heater" is an appliance for heating water for domestic purposes other than for space heating.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1480, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1490 Appliances—Installation. In addition to requirements of the Washington State Ventilation and Indoor Air Quality Code:

(1) The installation of each appliance must conform to the manufacturer's installation instructions. The manufacturer's instructions must be attached to the appliance.

(2) Combustion air inlets and flue gas outlets must be listed as components of the appliance and must be completely separated. The required separation may be obtained by:

(a) The installation of direct vent system (sealed combustion system) appliances; or

(b) The installation of appliances within enclosures so that the appliance combustion system and venting system are separate from the interior atmosphere of the commercial coach. There must not be any door, removable access panel, or other opening into the enclosure from inside the commercial coach. Any openings for ducts, piping, wiring, etc., must be sealed.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1490, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1500 Safety devices—Water heater relief valves. In addition to requirements of the Washington State Ventilation and Indoor Air Quality Code:

(1) All water heaters must be installed with approved fully automatic valve or valves designed to provide temperature and pressure relief. Temperature and pressure relief valves must be tested and approved to ANSI Z21.22 standard or equal.

(2) Any temperature relief valve or combined pressure and temperature relief valve installed for this purpose must have the temperature sensing element immersed in the hottest water within the upper six inches of the tank. It must be set to start relieving at a pressure of 150 psi or the rated working pressure of the tank, whichever is lower, and at or below a water temperature of 210 degrees Fahrenheit.

(3) Relief valves must be provided with full-sized drains. Drains must be directed to the exterior sides of the unit, exiting at least six inches above the ground, and each drain pipe must exhaust with a ninety degree downward turn. Drain lines must be of a material approved for hot water distribution

[Title 296 WAC—p. 2144]

and must drain fully by gravity, must not be trapped, and must not have their outlets threaded.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1500, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1510 Air ducts—Expandable or multiple commercial coach connections. In addition to the requirements of the Uniform Mechanical Code and the Washington State Energy Code air ducts for:

(1) An expandable or multiple commercial coach may have ducts of the heating system installed in the various units. The points of connection must be so designed and constructed that when the commercial coach is fully expanded or coupled, the resulting duct joint will conform to the requirements of this chapter.

(2) Installation instructions for supporting the crossover duct from the commercial coach must be provided for on-site installation. The duct must not touch the ground.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1510, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1520 Air ducts—Duct and plenum insulation. Every heating and cooling duct and plenum must be installed according to the Uniform Mechanical Code and the Washington State Energy Code.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1520, filed 10/23/96, effective 11/25/96.]

PLUMBING

WAC 296-150C-1530 Plumbing—General. This chapter also applies to the installation of plumbing equipment in any commercial coach bearing or required to bear a department insignia. Plumbing fixtures, equipment, and installations in commercial coaches must conform to the provisions of the Uniform Plumbing Code and the amendments adopted by the State Building Code Council, except part 1, unless specifically exempted or required by this section.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1530, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1540 Plumbing—Definitions. The definitions listed below, in addition to the Uniform Plumbing Code definitions apply to this chapter.

"**Drain outlet**" is the discharge end of the commercial coach main drain to which a drain connector may be attached.

"**Main drain**" is the principal artery of the commercial coach drainage system to which drainage branches may be connected.

"**Water-supply connection**" is the fitting or point of connection of the commercial coach water distribution system designed for connection to a water connector.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1540, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1545 Does the department require a water system expansion tank be installed? The department will only require that a tee be installed in an accessible location for the future addition of an expansion tank where one may be installed if required.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150C-1545, filed 6/4/99, effective 7/5/99.]

WAC 296-150C-1550 Drainage—Cap or plug. Drain outlets must be equipped with a watertight cap or plug that is permanently attached to the vehicle.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1550, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1560 Drainage—Clearance from drain outlet. The drain outlet and couplers must have a min-

imum clearance of three inches in any direction from all parts of the structure or appurtenances and at least eighteen inches unrestricted clearance directly in front of the drain outlet.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1560, filed 10/23/96, effective 11/25/96.]

WAC 296-150C-1570 Water supply connection. (1) Each commercial coach equipped with a water distribution system must have a water-supply connection that terminates within eighteen inches of the outside wall of the commercial coach.

(2) Water-supply connections must be equipped with a watertight cap or plug that is permanently attached to the commercial coach.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-1570, filed 10/23/96, effective 11/25/96.]

COMMERCIAL COACH FEES

WAC 296-150C-3000 Commercial coach fees.

WAC 296-150C-3000 COMMERCIAL COACH FEES	
INITIAL FILING FEE	\$28.00
DESIGN PLAN FEES:	
INITIAL FEE - MASTER DESIGN	\$192.00
INITIAL FEE - ONE YEAR DESIGN	\$78.75
RENEWAL FEE	\$33.50
RESUBMIT FEE	\$56.25
ADDENDUM (Approval expires on same date as original plan)	\$56.25
ELECTRICAL PLAN REVIEW (When required by WAC 296-46-140. Plan review for educational, institutional or health care facilities and other buildings)	
Electrical Plan submission fee	\$56.25
Service/feeder Ampacity:	
0 - 100	\$25.00
101 - 200	\$31.25
201 - 400	\$58.25
401 - 600	\$68.75
601 - 800	\$88.50
801 - 1000	\$108.25
Over 1000	\$117.50
Over 600 volts surcharge	\$18.75
Thermostats:	
First	\$11.25
Each additional	\$3.00
Low voltage fire alarm and burglar alarm:	
Each control panel and up to four circuits or zones	\$10.25
Each additional circuit or zone	\$2.00
Generators, refer to appropriate service/feeder ampacity fees	
<i>Note: Altered services or feeders shall be charged the above rate per the service/feeder ampacity fees.</i>	
Supplemental submissions of plans (resubmittals, addendums, renewals, code updates, etc.) shall be charged per hour or fraction of an hour*	\$66.50
MEDICAL GAS PLAN REVIEW:	
SUBMISSION FEE	\$54.00
FIRST STATION	\$54.00
EACH ADDITIONAL STATION	\$20.00

WAC 296-150C-3000 COMMERCIAL COACH FEES	
RECIPROCAL PLAN REVIEW:	
INITIAL FEE - MASTER DESIGN	\$85.75
INITIAL FEE - ONE YEAR DESIGN	\$52.00
RENEWAL FEE	\$52.00
ADDENDUM	\$52.00
PLANS APPROVED BY PROFESSIONALS	\$39.25
APPROVAL OF EACH SET OF DESIGN PLANS BEYOND FIRST TWO SETS	\$10.75
DEPARTMENT INSPECTION FEES	
INSPECTION/REINSPECTION (Per hour* plus travel time* and mileage**)	\$56.25
TRAVEL (Per hour)	\$56.25
PER DIEM**	
HOTEL***	
MILEAGE**	
RENTAL CAR***	
PARKING***	
AIRFARE***	
DEPARTMENT AUDIT FEES:	
AUDIT (Per hour*)	\$56.25
TRAVEL (Per hour*)	\$56.25
PER DIEM**	
HOTEL***	
MILEAGE**	
RENTAL CAR***	
PARKING***	
AIRFARE***	
INSIGNIA FEES:	
FIRST SECTION	\$16.50
EACH ADDITIONAL SECTION	\$10.75
ALTERATION	\$28.00
REISSUED-LOST/DAMAGED	\$10.75
OTHER FEES:	
FIELD TECHNICAL SERVICE (Per hour* plus travel time* and mileage**)	\$56.25
PUBLICATION PRINTING AND DISTRIBUTION OF RCW'S AND WAC'S (One free copy per year)	\$10.75
* Minimum charge of 1 hour; time spent greater than 1 hour is charged in 1/2 hour increments	
** Per state guidelines	
*** Actual charges incurred	

[Statutory Authority: Chapters 43.22, 18.27, 70.87 and 19.28 RCW. 99-12-080, § 296-150C-3000, filed 5/28/99, effective 6/28/99. Statutory Authority: Chapters 18.106, 18.27 and 43.22 RCW. 98-12-041, § 296-150C-3000, filed 5/29/98, effective 6/30/98. Statutory Authority: RCW 70.87.030, 18.27.070, [18.27.]075, 43.22.350, [43.22.]355, [43.22.]434 and [43.22.]480(2). 97-11-053, § 296-150C-3000, filed 5/20/97, effective 6/30/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150C-3000, filed 10/23/96, effective 11/25/96.]

Chapter 296-150F WAC

FACTORY-BUILT HOUSING AND COMMERCIAL STRUCTURES

WAC

296-150F-0010	Authority, purpose, and scope.
296-150F-0020	What definitions apply to this chapter?
296-150F-0030	How is this chapter enforced?
296-150F-0040	Will you keep my manufacturing information confidential?
296-150F-0050	Can you prohibit the installation of factory-built housing and commercial structures?
296-150F-0070	Do you have reciprocal agreements with other states to inspect factory-built housing and commercial structures, and components?
296-150F-0080	Do you allow a local enforcement agency to inspect factory-built housing, commercial structures, and components at the manufacturing location?
296-150F-0100	What happens if I disagree with your decision regarding my compliance with this chapter?

296-150F-0110	Do you have an advisory board to address factory-built housing and commercial structure issues?
296-150F-0120	Where can I obtain technical assistance regarding factory-built housing and commercial structures?
296-150F-0130	How do I register a complaint?
296-150F-0140	Do you allow the use of alternate materials, alternate design and method of construction?
INSIGNIA	
296-150F-0200	Who must purchase factory-built housing and commercial structure insignia?
296-150F-0210	What are the insignia requirements?
296-150F-0220	How do I obtain insignia information and the required forms?
296-150F-0230	What are the insignia application requirements?
296-150F-0250	How do I replace lost or damaged insignia?
DESIGN PLAN	
296-150F-0300	When is design plan approval required?
296-150F-0310	Who can approve design plans?
DESIGN-PLAN APPROVAL BY THE DEPARTMENT	
296-150F-0320	What must I provide with my request for design-plan approval by the department?
296-150F-0340	What must an engineering analysis for design plans include?
296-150F-0350	What must the test procedures and results for design plans include?
296-150F-0380	What happens if you approve my design plan?
296-150F-0390	If my design plan is not approved, how much time do I have to submit a corrected design plan?
296-150F-0400	What happens after my design plan is approved?
296-150F-0410	When does my design plan expire?

296-150F-0415 Who approves addendums to design plans approved by the department?

DESIGN-PLAN APPROVAL BY A LICENSED PROFESSIONAL OR FIRM

- 296-150F-0420 Who can be authorized to approve design plans?
- 296-150F-0430 What information must a professional or firm provide to be authorized to approve design plans?
- 296-150F-0440 How will I know whether I am authorized to approve design plans?
- 296-150F-0450 How long is a licensed professional or firms authorization effective?
- 296-150F-0460 What information must a manufacturer provide when a professional or firm does the design plan approval?
- 296-150F-0470 What happens after we receive the professional or firm approved design plan and information?
- 296-150F-0480 Do you have a list of professionals or firms that are authorized to submit design plans?
- 296-150F-0490 Who approves addendums to design plans approved by a professional or firm?

INSPECTIONS PRIOR TO ISSUANCE OF AN INSIGNIA

- 296-150F-0500 When is an inspection required?
- 296-150F-0510 How do I request an inspection?
- 296-150F-0520 What happens if my factory-built house or commercial structure passes inspection?
- 296-150F-0530 Am I charged if I request an inspection but I am not prepared?
- 296-150F-0540 Who inspects factory-built housing and commercial structures for installation at the building site?
- 296-150F-0550 Do you notify the local enforcement agency after your final inspection of factory-built structures at a manufacturing location?

USED FACTORY-BUILT STRUCTURES WITHOUT AN INSIGNIA

- 296-150F-0580 Must I obtain an insignia for used factory-built structures?
- 296-150F-0590 How do I obtain insignia for used factory-built structures?

CODES FOR FACTORY-BUILT HOUSING, COMMERCIAL STRUCTURES, AND COMPONENTS

- 296-150F-0600 What manufacturing codes apply to factory-built housing and commercial structures?
- 296-150F-0605 May the required toilet facilities be located in an adjacent building?
- 296-150F-0610 Do you require the exit doors to be one-half the diagonal distance apart if each area served has its own exit door?
- 296-150F-0615 May the electrical disconnect required for mechanical equipment be inside of or mounted on the equipment?
- 296-150F-0620 Does the department require a water system expansion tank be installed?
- 296-150F-0625 Are there any special requirements for portable school classrooms?
- 296-150F-0630 When HVAC equipment is supplied with more than one CFM rating, which rating do I use?

MANUFACTURER'S NOTICE TO THE DEPARTMENT

- 296-150F-0700 Must manufacturers of factory-built housing and commercial structures notify you if they manufacture at more than one location?
- 296-150F-0710 Must manufacturers of factory-built housing and commercial structures notify you of a change in business name or address?
- 296-150F-0720 Must manufacturers of factory-built housing and commercial structures notify you of a change in business ownership?

FACTORY-BUILT HOUSING AND COMMERCIAL STRUCTURE FEES

- 296-150F-3000 Factory-built housing and commercial structure fees.

WAC 296-150F-0010 Authority, purpose, and scope.

(1) This chapter is authorized by RCW 43.22.420, 43.22.434 and 43.22.450 through 43.22.490, covering the construction and approval of factory-built housing and commercial structures before occupancy.

(2) This chapter applies to the approval:

(2001 Ed.)

(a) Of factory-built structures used for residences or commercial purposes; and

(b) After occupancy of a factory-built house or commercial structure, all inspections are done by the local enforcement agency.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0010, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0020 What definitions apply to this chapter? "Approved" is approved by the department of labor and industries.

"Building site" is a tract, parcel, or subdivision of land on which a factory-built house or commercial structure will be installed.

"Closed construction" is a factory-built house, commercial structure, or component that is not open for visible inspection at the building site. It may enclose factory-installed structural, mechanical, electrical, plumbing, or other systems and equipment.

"Commercial structure" is a structure designed or used for human habitation (such as a dormitory) or human occupancy for industrial, educational, assembly, professional, or commercial purposes. It may also include a component.

"Component" is a discrete element that cannot be inspected at the time of installation either in the factory or in a site-built unit, but is:

- Designed to be installed in a structure;
- Manufactured as a unit; and
- Designed for a particular function or group of functions.

A component may be a floor, wall panel, roof panel, plumbing wall, electrical service wall, or heating assembly.

It may also be a service core. A service core is a factory assembled, three-dimensional section of a building. It may include mechanical, electrical, plumbing, and related systems. It may be a complete kitchen, bathroom, or utility room. Service cores are referred to as "wet boxes," "mechanical cores," or "utility cores."

Note: A roof truss is not considered a component.

"Damaged in transit" is damage that effects the integrity of the structural design or damage to any other system referenced in the codes required by the State Building Code, or other applicable codes.

"Department" is the department of labor and industries. The department may also be referred to as "we" or "us" in this chapter. Note: You may contact us at: Department of Labor and Industries, Specialty Compliance, PO Box 44440, Olympia, WA 98504-4440.

"Design plan" is a plan for the construction of factory-built housing, commercial structures, or components that includes floor plans, elevation drawings, specifications, engineering data, or test results necessary for a complete evaluation of the design.

"Design option" is a design that a manufacturer may use as an option to its design plan.

"Equipment" is all material, appliances, devices, fixtures, fittings, or accessories used in the manufacture, assembly, installation, or alteration of factory-built housing, commercial structures, and components.

"Factory assembled structure (FAS) advisory board" is a board authorized to advise the director of the department regarding the issues and adoption of rules relating to factory-built housing, commercial structures and components. (See RCW 43.22.420.)

"Factory-built housing" is housing designed for human occupancy such as a single-family dwelling. The structure of any room is entirely or substantially prefabricated or assembled at a place other than a building site. It may also include a component. A factory-built house is also referred to as a "modular" structure. Factory-built housing does not include manufactured (mobile) housing. (See RCW 43.22.450(3).)

"Insignia" is a label that we attach to a structure to verify that a factory-built house or commercial structure meets the requirements of this chapter. It could also be a stamp or label attached to a component to verify that it meets the requirements of this chapter.

"Install" is to erect or set in place a structure at a building site. It may also be the construction or assembly of a component as part of a factory-built house or commercial structure.

"Listed" is a piece of equipment, a component, or an installation that appears in a list published by a testing or listing agency and is suitable for use in a specified manner.

"Listing agency" is an organization whose business is approving equipment, components, or installations for publication.

"Local enforcement agency" is an agency of city or county government with power to enforce local regulations governing the installation of factory-built housing and commercial structures.

"Master design plan" is a design plan that expires when a new State Building Code has been adopted.

"Manufacturing" is making, fabricating, forming, or assembling a factory-built house, commercial structure, or component.

"One-year design plan" is a design plan that expires one year after approval or when a new State Building Code has been adopted.

"Repair" is the replacement, addition, modification, or removal of any construction, equipment, system, or installation to correct damage in transit or during on-site installation before occupancy.

"Unit" is a factory-built house, commercial structure, or component.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150F-0020, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0020, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0030 How is this chapter enforced?

(1) To enforce this chapter, we or another governmental inspection agency will inspect each factory-built house and commercial structure that is sited in Washington. Inspections

[Title 296 WAC—p. 2148]

will be conducted during normal work hours or at other reasonable times. (See WAC 296-150F-0070.)

(2) We will inspect each unit as required by the codes. (See WAC 296-150F-0500.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0030, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0040 Will you keep my manufacturing information confidential? We will only release manufacturing information such as design plans, specifications, and test results according to the requirements of the Public Records Act (see RCW 42.17.310 (1)(h)) unless we are ordered to do so by a court or otherwise required by law.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150F-0040, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0040, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0050 Can you prohibit the installation of factory-built housing and commercial structures?

(1) We may prohibit the installation of factory-built housing and commercial structures if they do not conform to the requirements of this chapter. (See RCW 43.22.465.)

(2) If an inspection reveals that a factory-built home or commercial structure violates this chapter, we may obtain a temporary injunction enjoining the installation of any non-conforming structure. The injunction may be made permanent at the discretion of the court.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150F-0050, filed 6/4/99, effective 7/5/99.]

WAC 296-150F-0070 Do you have reciprocal agreements with other states to inspect factory-built housing and commercial structures, and components? (1) We have entered into reciprocal agreements with states who have construction standards that are equal to or greater than our standards for factory-built housing and commercial structures.

(2) When we have a reciprocal agreement with another state:

(a) The reciprocal state inspects factory-built housing, commercial structures, and components manufactured in that state before shipment into Washington to ensure compliance with our laws. After inspection, the reciprocal state applies our insignia.

(b) The department inspects factory-built housing, commercial structures, and components manufactured in Washington before shipment into the reciprocal state to ensure compliance with their laws. After inspection, we apply the insignia of the reciprocal state.

(3) We have reciprocal agreements on file.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0070, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0080 Do you allow a local enforcement agency to inspect factory-built housing, commercial structures, and components at the manufacturing location? (1) A local enforcement agency (city or county), under

(2001 Ed.)

contract with us, can inspect factory-built housing, commercial structures, and components. In some cases their contract may be limited to specific portions of an inspection at specified manufacturing locations.

(2) After approving a unit, the local enforcement agency will attach the insignia, which indicates the unit has passed inspection.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0080, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0100 What happens if I disagree with your decision regarding my compliance with this chapter? (1) If we determine you are in violation of this chapter, you will receive a notice of noncompliance.

(2) If you disagree with our decision, you can send us a written request for a hearing, stating why you disagree.

(3) After we receive your hearing request, we will:

(a) Schedule a hearing within thirty days after we receive your request.

(b) Notify you of the time, date, and place for the hearing. If you fail to appear, your case will be dismissed.

(c) Hear your case.

(d) Send you written notice of our decision.

If you disagree with our decision, you may appeal it under the Administrative Procedure Act (chapter 34.05 RCW).

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150F-0100, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0100, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0110 Do you have an advisory board to address factory-built housing and commercial structure issues? The factory assembled structures (FAS) board advises us on issues relating to structural, plumbing, mechanical, electrical, installation, inspections, and rules for factory-assembled structures. (See RCW 43.22.420.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0110, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0120 Where can I obtain technical assistance regarding factory-built housing and commercial structures? We provide field technical service to factory-built housing and commercial structure manufacturers for an hourly fee. Field technical service may include an evaluation, consultation, plan examination, interpretation, and clarification of technical data relating to the application of our rules. It does not include inspections.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0120, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0130 How do I register a complaint?

A person who believes that a structure or component does not meet the requirements of this chapter may register a complaint with the department. The complaint must be in writing and must specifically describe the alleged violations of this

(2001 Ed.)

chapter. Upon receipt of the complaint, the department will forward a copy to the appropriate manufacturer and/or dealer and they shall have thirty days to respond to it. If the department determines that an inspection is necessary, the manufacturer/dealer shall pay the department for the cost of the inspection. The cost of the inspection is based upon the fee schedule in WAC 296-150F-3000 and includes the hourly inspection fee, travel costs and other expenses incurred as a result of the inspection.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150F-0130, filed 6/30/98, effective 7/31/98.]

WAC 296-150F-0140 Do you allow the use of alternate materials, alternate design and method of construction? An applicant may apply for the use of alternate materials, alternate design and methods of construction different from the requirements of this chapter by filing a written request with the department.

(1) Responsibilities of applicant. The applicant must submit in writing the following information and sign and date the request.

(a) The applicant's name, address and phone number;

(b) The specific requirement or requirements from which the alternate material, alternate design or method of construction is requested;

(c) Justification that the requirements of this chapter cannot be met without using alternate materials, alternate design or method of construction;

(d) How the use of alternate materials, alternate design or method of construction will achieve the same result as the requirement and any specific alternative measures to be taken to show the alternate provides the same level of protection to life, safety and health as the requirements.

The department has a form that you may use for your request. Contact the department at the address shown in the definition section.

(2) Responsibilities of the department. The department will provide a written response to the applicant within thirty days of receipt of the written request. The written response will state the acceptance or denial of the request, including the reasons for the department's decision. At a minimum the department will base its decision based on:

(a) The applicant's request as described in subsection (1) of this section;

(b) Research into the request;

(c) Expert advice.

(3) Applicant's response to denials. The applicant may appeal the departments decision by following the procedure in WAC 296-150F-0100.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150F-0140, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150F-0140, filed 6/4/99, effective 7/5/99.]

INSIGNIA

WAC 296-150F-0200 Who must purchase factory-built housing and commercial structure insignia? (1) You must obtain insignia from us for each factory-built house,

[Title 296 WAC—p. 2149]

commercial structure and component sited in Washington state.

(2) If you are a Washington state manufacturer, you do not need to purchase our insignia for your factory-built housing, commercial structures and components sold outside of Washington state.

(3) You must have an approved design plan and have passed inspection before an insignia can be attached to your factory-built home or commercial structure by us or our authorized agent.

(4) If a unit is damaged in transit after leaving the manufacturing location or during an on-site installation, and a repair is necessary, you must purchase an insignia from us. The insignia indicates that the unit was repaired.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150F-0200, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0200, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0210 What are the insignia requirements? (1) If you are applying for insignia for factory-built housing, commercial structures and components you must have your design plan approved and your units and components inspected and approved by us.

(2) We will attach the insignia after:

(a) We receive the required forms and fees from you (see WAC 296-150F-3000); and

(b) Your unit or component has passed final inspection. (See WAC 296-150F-0500.)

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150F-0210, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0210, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0220 How do I obtain insignia information and the required forms? Upon request, we will provide you with a packet of information that includes the required forms.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0220, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0230 What are the insignia application requirements? (1) If you are requesting insignia for units that you intend to manufacture under a *new design plan*, your completed application must include:

(a) A completed design plan approval request form;

(b) One complete set of design plans, specifications, engineering analysis, test procedures and results, plus one additional set for each manufacturing location where the design plan will be used;

(c) At least one set of design plans must have an original wet stamp from a professional engineer or architect licensed in Washington state. We will retain the set with the original wet stamp; and

(d) A one-time initial filing fee, the design plan fee (if we approve your design plan) and the fee for each insignia. (See WAC 296-150F-3000.)

(2) If you are requesting insignia under an *approved design plan*, your completed application must include:

- (a) A completed application for insignia form; and
- (b) The fee for each insignia requested. (See WAC 296-150F-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0230, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0250 How do I replace lost or damaged insignia? (1) If an insignia is lost or damaged after it is attached to your factory-built house, commercial structure, or component, you may obtain a replacement insignia.

(2) You should contact us and provide the following information:

(a) Your name, address, and telephone number;

(b) The name of the manufacturer;

(c) The serial number;

(d) The manufacturer number (M#), if available;

(e) The insignia number, if available; and

(f) The required fee. (See WAC 296-150F-3000.)

(3) If we can determine that your unit previously had an insignia, we will attach an insignia to your unit once we receive your insignia fee. (See WAC 296-150F-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0250, filed 10/23/96, effective 11/25/96.]

DESIGN PLAN

WAC 296-150F-0300 When is design plan approval required? Design plans for factory-built housing and commercial structures prior to installation at the building site in Washington must be approved when:

(1) You build a new unit;

(2) You modify an approved design plan through an addendum; or

(3) You add options to an approved design plan through an addendum.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0300, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0310 Who can approve design plans? (1) Design plans can be approved by us or by a licensed professional or firm authorized by us (see WAC 296-150F-0420 and 296-150F-0430).

(2) All electrical design plans for new or altered electrical installations for educational institutions, health care facilities, and other buildings (see chapters 296-46, 296-130, 296-140, and 296-150 WAC Table 1 or 2) must be reviewed and approved by us.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0310, filed 10/23/96, effective 11/25/96.]

DESIGN-PLAN APPROVAL BY THE DEPARTMENT

WAC 296-150F-0320 What must I provide with my request for design-plan approval by the department? All requests for design-plan approval must include:

- (1) A completed design-plan approval request form;

(2) One complete set of design plans, specifications, engineering analysis, test procedures and results plus one additional set for each manufacturing location where the design plan will be used (see WAC 296-150F-0340 and 296-150F-0350);

(3) At least one set of design plans must have an original wet stamp from a professional engineer or architect licensed in Washington state. All new, renewed, and resubmitted plans, specifications, reports and structural calculations prepared by or prepared under his or her direct supervision shall be signed, dated and stamped with their seal. Specifications, reports, and structural calculations may be stamped only on the first sheet, provided this first sheet identifies all of the sheets that follow are included and identified in the same manner. Plans that have not been prepared by or under the engineer's or architect's supervision shall be reviewed by them and they shall prepare a report concerning the plans reviewed. This report shall:

(a) Identify which drawings have been reviewed by drawing number and date;

(b) Include a statement that the plans are in compliance with current Washington state regulations; and

(c) The report shall be stamped and signed by the reviewer.

Any deficiencies shall be corrected on the drawings before submitting to the department or be included in the report and identify as to how they are to be corrected. This report shall be attached to the plan(s) that were reviewed. We will retain the set with the original wet stamp;

(4) A one-time initial filing fee and the design-plan fee (see WAC 296-150F-3000); and

(5) A "key drawing" to show the arrangement of modules if the plan covers three or more modules.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150F-0320, filed 6/4/99, effective 7/5/99. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0320, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0340 What must an engineering analysis for design plans include? (1) The engineering analysis must show that the structural design meets the requirements of this chapter.

(2) An engineering analysis must be conducted according to accepted engineering practices and must be signed by a professional engineer or architect licensed in Washington state.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0340, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0350 What must the test procedures and results for design plans include? (1) Tests to a design for a factory-built home or commercial structure must be witnessed by a professional engineer or architect licensed in Washington state.

(2) Test reports must contain the following items:

(a) A description of the methods or standards that applied to the test;

(b) Drawings and a description of the item tested;

(2001 Ed.)

(c) A description of the test set-up;
 (d) The procedure used to verify the correct load;
 (e) The procedure used to measure each condition;
 (f) Test data, including applicable graphs and observations of the characteristics and behavior of the item tested; and

(g) Analysis, comments, and conclusion.

(3) The written test procedures, results and conclusions must reference the applicable design plan.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0350, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0380 What happens if you approve my design plan? (1) Your design plan will be approved if it meets the requirements of this chapter.

(2) We will send you an approved copy of the design plan with the design-plan approval number.

(3) You must keep copies of the approved design plan at each location where a factory-built house, commercial structure, or component is built.

(4) If your design plan is not approved, you will be notified in writing of plan deficiencies. You may send a corrected design plan to us. (See WAC 296-150F-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0380, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0390 If my design plan is not approved, how much time do I have to submit a corrected design plan? (1) You have ninety days to correct and resubmit your original design plan and send us the resubmittal fee after we notify you of plan deficiencies. After ninety days, your initial design plan is returned to you.

(2) If you submit your corrected design plan after ninety days, you must send the initial design plan fee instead of the resubmittal fee. (See WAC 296-150F-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0390, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0400 What happens after my design plan is approved? Once your design plan is approved, we will inspect each related factory-built house, commercial structure, or component.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0400, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0410 When does my design plan expire? Master design plan:

(1) Your master design plan expires when there is a code change. You must submit new design plans for approval when there is a State Building Code cycle change. You may use your approved master design plans to order insignia as long as they comply with the applicable codes.

One-year design plan:

(2) Your factory-built home or commercial structure one-year design plan expires either one year after approval or when there is a code change. You must submit new design

plans for approval when there is a State Building Code cycle change. You may use your design plan to order insignia as long as they comply with the applicable codes.

(3) All National Electrical Code amendments may be incorporated by an addendum to your design plan.

Note: The State Building Code is on a three-year code cycle which coincides with the State Building Code council amendment cycle. The National Electrical Code (NEC) cycle, however, does not coincide with the other code cycles.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0410, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0415 Who approves addendums to design plans approved by the department? You must have us approve an addendum to a design plan, if we initially approved your design plan.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0415, filed 10/23/96, effective 11/25/96.]

DESIGN-PLAN APPROVAL BY A LICENSED PROFESSIONAL OR FIRM

WAC 296-150F-0420 Who can be authorized to approve design plans? (1) A professional engineer, architect or firm licensed by the state of Washington according to the Engineers Registration Act, chapter 18.43 RCW and/or the Architects Registration Act, chapter 18.08 RCW; or

(2) A professional engineer, architect or firm licensed in another state that has licensing or certification requirements that meet or exceed Washington requirements.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0420, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0430 What information must a professional or firm provide to be authorized to approve design plans? (1) Name, a copy of your certificate of registration, and address of the professional engineer or architect; or

(2) Name, a copy of your certificate of authority, and address of the firm; and

(3) A description of the services the professional engineer, architect, or firm will provide; and

(4) A description of the professional's area(s) of expertise and qualifications which include:

(a) A summary of the professional's or firm's experience; and

(b) Verification of experience in your area of expertise such as structural, mechanical, plumbing, energy, electrical, fire and life safety, and ventilation and indoor air quality.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0430, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0440 How will I know whether I am authorized to approve design plans? Within sixty days after you submit the information requested in WAC 296-

[Title 296 WAC—p. 2152]

150F-0430, we will send you a letter either approving or denying your authorization request.

(1) If we approve your request, your name is added to the list of licensed professionals and firms authorized to approve design plans.

(a) We will authorize a professional to approve portions of a design plan within his or her area of expertise; and

(b) We will authorize an engineering or architectural firm to approve plans if the firm employs or contracts with professionals within the area of expertise necessary for the design plan.

(2) If we do not approve your request, we will notify you in writing why we are denying your request for authorization. If you disagree with our decision, you can send us a written request for a hearing, stating why you disagree. (See WAC 296-150F-0100.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0440, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0450 How long is a licensed professional or firms authorization effective? Your authorization to approve design plans is effective until your license expires, is revoked or is suspended.

(1) You must notify us of your license renewal at least fifteen days before your license expires, to prevent your name from being removed from our licensed professional and firm list.

(2) You must notify us immediately if your license is revoked or suspended. Your name is then removed from the list of licensed professionals and firms authorized to approve design plans.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0450, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0460 What information must a manufacturer provide when a professional or firm does the design plan approval? You must provide the following information with your approved design plan:

(1) A completed departmental design plan approval request form;

(2) Two or more sets of the design plans plus elevation drawings, specifications, engineering analysis, and test results and procedures necessary for a complete evaluation of the design. These design plans must have an original wet stamp, be signed, and dated by the approving professional(s) (see WAC 296-150F-0340 and 296-150F-0350);

(3) A cover sheet on the design plan noting which professional approved each portion of the design plan;

(4) A copy of the authorization letter from us;

(5) The design plan fee for design plans approved by professionals or firms (see WAC 296-150F-3000);

(6) A professional who designs and certifies that the factory-built home or commercial structure design meets state requirements cannot also approve the design plan in the plan approval process;

(7) A professional cannot approve those electrical designs listed in WAC 296-150F-0310(2); and

(8) A professional cannot approve plans submitted under a reciprocal agreement.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150F-0460, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0460, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0470 What happens after we receive the professional or firm approved design plan and information? (1) After we receive your approved design plans and information, we will review the information and assign a plan approval number. We will send a copy of the design plan with the plan approval number to the manufacturer.

(2) We may periodically audit design plans approved by a professional engineer, architect, or firm to ensure compliance with design plan requirements. The department's periodic audit should not be construed as certifying that the plans are safe.

(3) If the audit reveals that the design plans approved by the professionals and firms do not comply with this chapter, you will be notified and required to pay our fees for review and approval of the design plans. (See WAC 296-150F-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0470, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0480 Do you have a list of professionals or firms that are authorized to submit design plans? We will maintain a list of the licensed professionals and firms that are authorized to approve design plans for factory-built housing and commercial structures.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0480, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0490 Who approves addendums to design plans approved by a professional or firm? (1) You must have the professional or firm approve an addendum to a design plan, if they initially approved your design plan.

(2) If the professional or firm who approved your design plan is no longer on the department list you may have us approve your addendum.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0490, filed 10/23/96, effective 11/25/96.]

INSPECTIONS PRIOR TO ISSUANCE OF AN INSIGNIA

WAC 296-150F-0500 When is an inspection required? (1) Before we issue an insignia, each factory-built house, commercial structure, and component must be inspected at the manufacturing location as many times as are required by the codes. (See WAC 296-150F-0600.) Inspections may include:

(a) A "cover" inspection during construction of the unit before the electrical, plumbing, mechanical, and structural systems are covered;

(b) Insulation and vapor barrier inspection, if required;

(2001 Ed.)

(c) Other required code inspections;
(d) A final inspection after the factory-built house, commercial structure, or component is complete;

Note: Each factory-built house, commercial structure, and component must have a serial number to enable us to track inspections.

(2) If we discover a violation during inspection, we will issue a notice of noncompliance. You can correct the violation during the inspection. If you cannot correct the violation during inspection, you must leave the item uncovered until we approve your correction.

(3) After a unit is manufactured but before occupancy, we must inspect a factory-built house or commercial structure if it is damaged in transit to the building site or during on-site installation. This is considered a repair inspection. (See WAC 296-150F-0540.)

(4) Approved design plans must be available in compliance with the applicable sections of adopted state codes.

(5) Once your unit is inspected and approved we will attach the insignia.

(6) Components shall be identified as having been approved by attaching an insignia to the first component and all additional components for one job site shall have a label issued by the department as having been approved.

Note: We only inspect factory-built housing and commercial structures before occupancy. After occupancy, the local enforcement agency is the inspection agency.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150F-0500, filed 8/22/00, effective 9/30/00. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150F-0500, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0500, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0510 How do I request an inspection? (1) You must contact us, and we will let you know where your request for inspection should be submitted. Our address is noted in the definition of department.

(2) We must receive in-state inspection requests at least seven calendar days prior to the date that you want the inspection.

(3) We must receive out-of-state inspection requests at least fourteen calendar days prior to the date that you want the inspection.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0510, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0520 What happens if my factory-built house or commercial structure passes inspection?

(1) If your factory-built house or commercial structure passes inspection and you have met the other requirements of this chapter, we will attach the insignia.

(2) After our final inspection, we will send a notice to the local enforcement agency (NLEA) indicating whether further inspection is necessary. (See WAC 296-150F-0550.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0520, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0530 Am I charged if I request an inspection but I am not prepared? (1) If you ask us to inspect a factory-built house or commercial structure within Washington state but you are not prepared when we arrive, you must pay the minimum inspection fee and travel. (See WAC 296-150F-3000.)

(2) If you ask us to inspect a factory-built home, commercial structure, or component outside Washington state but you are not prepared when we arrive, you must pay the minimum inspection fee, travel, and per diem expenses. (See WAC 296-150F-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0530, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0540 Who inspects factory-built housing and commercial structures for installation at the building site? (1) The local enforcement agency (city or county) must approve the installation.

(2) The local enforcement agency may also request a set of design plans and specifications for the unit from you.

(3) After the unit is manufactured but before occupancy, we must inspect a factory-built house or commercial structure if it is damaged in transit to the building site or during on-site installation. This is considered a repair inspection.

Note: The local enforcement agency may not open the concealed construction of a factory-built house or commercial structure to inspect if our insignia is attached.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0540, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0550 Do you notify the local enforcement agency after your final inspection of factory-built structures at a manufacturing location? After we perform a final inspection of a factory-built, commercial structure, or component, we will send a notice to the local enforcement agency (NLEA) that:

(1) Specifies what connections, standards, and incomplete items the local enforcement agency must check when the unit is installed; and/or

(2) Estimates the expected time of arrival of the factory-built house or commercial structure to the site.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0550, filed 10/23/96, effective 11/25/96.]

USED FACTORY-BUILT STRUCTURES WITHOUT AN INSIGNIA

WAC 296-150F-0580 Must I obtain an insignia for used factory-built structures? All used factory-built housing and commercial structures that are to be installed on a building site in Washington state must have an insignia of approval from us prior to being installed on a building site.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0580, filed 10/23/96, effective 11/25/96.]

[Title 296 WAC—p. 2154]

WAC 296-150F-0590 How do I obtain insignia for used factory-built structures? We consider used factory-built housing and commercial structures as new structures for purposes of insignia approval. To obtain insignia, you must:

(1) Have the design plan approved by us (see WAC 296-150F-0300 through 296-150F-0480);

(2) Purchase insignia (see WAC 296-150F-0200 through 296-150F-0230); and

(3) Pass a unit inspection (see WAC 296-150F-0500 through 296-150F-0550).

Note: You will be required to open up as much of the construction of the unit as is necessary for inspection to show compliance with your approved design plan.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0590, filed 10/23/96, effective 11/25/96.]

CODES FOR FACTORY-BUILT HOUSING, COMMERCIAL STRUCTURES, AND COMPONENTS

WAC 296-150F-0600 What manufacturing codes apply to factory-built housing and commercial structures? (1) All design, construction, installations, and alterations of factory-built housing, commercial structures, and components must conform with the following codes and the requirements of this chapter:

(a) The State Building Code, chapter 19.27 RCW;

Note: The Uniform Building Code reference to "building official" means the chief prefabricated building specialist or authorized representative at the department of labor and industries.

(b) The Energy Related Building Standards, chapter 19.27A RCW;

(c) The National Electrical Code as referenced in chapter 19.28 RCW and chapters 296-46 and 296-401 WAC.

(2) All construction methods and installations must use accepted engineering practices, provide minimum health and safety to the occupants of factory-built structures and the public, and demonstrate journeyman quality of work of the various trades.

(3) Requirements for any size, weight, or quality of material modified by the terms "minimum," "not less than," "at least," and similar expressions are minimum standards. The manufacturer may exceed these standards, provided the deviation does not result in inferior installation or defeat the purpose and intent of the standard.

Note: The codes, RCW's, and WAC's referenced in this rule are available for reference at the Washington State Library, the Washington State Law Library, and may be available at your local library.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0600, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0605 May the required toilet facilities be located in an adjacent building? Under the following conditions, the department will allow the required toilet facilities to be located in adjacent building(s):

(1) The manufacturer shall note in the plan submittal that the requirements of UBC Chapter 29, Section 2902 and Table

29-A, as amended by the state building code must be verified by the building official; and

(2) A Notification to Local Enforcement Agency (NLEA) must accompany each unit so that the requirements of UBC Chapter 29, Section 2902 and Table 29-A as amended by the state building code can be verified by the building official.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150F-0605, filed 6/4/99, effective 7/5/99.]

WAC 296-150F-0610 Do you require the exit doors to be one-half the diagonal distance apart if each area served has its own exit door? If the area served has an occupant load requiring only one exit and a building contains more than one area where each area is served by individual exits, and a personnel door is added between adjoining rooms, a personnel door in the partition wall will not be construed to create a larger area served. The exits will not be required to be one-half of the diagonal apart.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150F-0610, filed 6/4/99, effective 7/5/99.]

WAC 296-150F-0615 May the electrical disconnect required for mechanical equipment be inside of or mounted on the equipment? The electrical disconnect shall not be inside of or mounted on the equipment.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150F-0615, filed 6/4/99, effective 7/5/99.]

WAC 296-150F-0620 Does the department require a water system expansion tank be installed? The department will only require that a tee be installed in an accessible location for the future addition of an expansion tank where one may be installed if required.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150F-0620, filed 6/4/99, effective 7/5/99.]

WAC 296-150F-0625 Are there any special requirements for portable school classrooms? In addition to the requirements in the state building code, the department of health has rules regulating primary and secondary schools in chapter 246-366 WAC. One of those requirements is that "Instructional areas shall have a minimum average ceiling height of 8 feet."

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150F-0625, filed 6/4/99, effective 7/5/99.]

WAC 296-150F-0630 When HVAC equipment is supplied with more than one CFM rating, which rating do

I use? Where HVAC equipment manufacturers show multiple cubic feet per minute (CFM) ratings and/or multiple water gauge ratings, you must use the highest rated capacity.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150F-0630, filed 8/22/00, effective 9/30/00.]

MANUFACTURER'S NOTICE TO THE DEPARTMENT

WAC 296-150F-0700 Must manufacturers of factory-built housing and commercial structures notify you if they manufacture at more than one location? (1) If you are manufacturing factory-built housing and commercial structures at more than one location, approved design plans must be available at each manufacturing location.

(2) You are required to send us the following information for each manufacturing location:

- (a) Company name;
- (b) Mailing and physical address; and
- (c) Phone and FAX number if available.

(3) You must update this information as it changes.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0700, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0710 Must manufacturers of factory-built housing and commercial structures notify you of a change in business name or address? (1) If you are moving, notify us in writing prior to a change of business name or address.

(2) Your notice must include the change of name and address.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0710, filed 10/23/96, effective 11/25/96.]

WAC 296-150F-0720 Must manufacturers of factory-built housing and commercial structures notify you of a change in business ownership? (1) When a manufacturer changes ownership, the new owner must notify us in writing immediately.

(2) A new owner may continue to manufacture the units according to a prior approved design plan if the prior owner releases the design plan.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-0720, filed 10/23/96, effective 11/25/96.]

FACTORY-BUILT HOUSING AND COMMERCIAL STRUCTURE FEES

WAC 296-150F-3000 Factory-built housing and commercial structure fees.

WAC 296-150F-3000 FACTORY-BUILT HOUSING AND COMMERCIAL STRUCTURES	
INITIAL FILING FEE	\$39.25
DESIGN PLAN FEES:	
INITIAL FEE - MASTER DESIGN (CODE CYCLE)	\$192.00

WAC 296-150F-3000 FACTORY-BUILT HOUSING AND COMMERCIAL STRUCTURES	
INITIAL FEE - ONE YEAR DESIGN	\$112.75
RENEWAL FEE	\$39.25
RESUBMIT FEE	\$56.25
ADDENDUM (Approval expires on same date as original plan.)	\$56.25
ELECTRICAL PLAN REVIEW (When required by WAC 296-46-140, Plan review for educational, institutional or health care facilities and other buildings):	
Electrical Plan submission fee	\$56.25
Service/feeder Ampacity:	
0 - 100	\$25.00
101 - 200	\$31.25
201 - 400	\$58.25
401 - 600	\$68.75
601 - 800	\$88.50
801 - 1000	\$108.25
Over 1000	\$117.50
Over 600 volts surcharge	\$18.75
Thermostats:	
First	\$11.25
Each additional	\$3.00
Low voltage fire alarm and burglar alarm:	
Each control panel and up to four circuits or zones	\$10.25
Each additional circuit or zone	\$2.00
Generators, refer to appropriate service/feeder ampacity fees	
<i>Note: Altered services or feeders shall be charged the above rate per the service/feeder ampacity fees.</i>	
Supplemental submissions of plans (resubmittals, addendums, renewals, code updates, etc.) will be charged per hour or fraction of an hour*	\$66.50
MEDICAL GAS PLAN REVIEW:	
SUBMISSION FEE	\$54.00
FIRST STATION	\$54.00
EACH ADDITIONAL STATION	\$20.00
RECIPROCAL PLAN REVIEW:	
INITIAL FEE-MASTER DESIGN	\$85.75
INITIAL FEE-ONE YEAR DESIGN	\$52.00
RENEWAL FEE	\$52.00
ADDENDUM	\$52.00
PLANS APPROVED BY PROFESSIONALS	\$39.25
APPROVAL OF EACH SET OF DESIGN PLANS BEYOND FIRST TWO SETS	\$10.75
DEPARTMENT INSPECTION FEES	
INSPECTION/REINSPECTION (Per hour* plus travel time* and mileage**)	\$56.25
TRAVEL (Per hour*)	\$56.25
PER DIEM**	
HOTEL***	
MILEAGE**	
RENTAL CAR***	
PARKING***	
AIRFARE***	
DEPARTMENT AUDIT FEES:	
AUDIT (Per hour*)	\$56.25
TRAVEL (Per hour*)	\$56.25
PER DIEM**	
HOTEL***	
MILEAGE**	
RENTAL CAR***	
PARKING***	
AIRFARE***	
INSIGNIA FEES:	
FIRST SECTION	\$158.00
EACH ADDITIONAL SECTION	\$15.50

WAC 296-150F-3000 FACTORY-BUILT HOUSING AND COMMERCIAL STRUCTURES	
REISSUED-LOST/DAMAGED	\$39.25
OTHER FEES:	
FIELD TECHNICAL SERVICE (Per hour* plus travel time* and mileage**)	\$56.25
NOTIFICATION TO LOCAL ENFORCEMENT AGENCY (NLEA)	\$23.25
PUBLICATION PRINTING AND DISTRIBUTION OF RCW'S AND WAC'S (One free copy per year)	\$10.75
* Minimum charge of 1 hour; time spent greater than 1 hour is charged in 1/2 hour increments.	
** Per state guidelines.	
*** Actual charges incurred.	

[Statutory Authority: Chapters 43.22, 18.27, 70.87 and 19.28 RCW. 99-12-080, § 296-150F-3000, filed 5/28/99, effective 6/28/99. Statutory Authority: Chapters 18.106, 18.27 and 43.22 RCW. 98-12-041, § 296-150F-3000, filed 5/29/98, effective 6/30/98. Statutory Authority: RCW 70.87.030, 18.27.070, [18.27.]075, 43.22.350, [43.22.]355, [43.22.]434 and [43.22.]480(2). 97-11-053, § 296-150F-3000, filed 5/20/97, effective 6/30/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150F-3000, filed 10/23/96, effective 11/25/96.]

**Chapter 296-150M WAC
MANUFACTURED HOMES**

WAC

- 296-150M-0010 Authority, purpose, and scope.
- 296-150M-0020 What definitions apply to this chapter?
- 296-150M-0040 Will you keep my manufacturing information confidential?
- 296-150M-0050 Can I sell or lease a manufactured home that has been posted with a prohibited sale or lease notice?
- 296-150M-0060 Who handles consumer complaints about manufactured homes?
- 296-150M-0100 What happens if I disagree with your decision regarding my compliance with the federal standards, ANSI, or this chapter?
- 296-150M-0120 Where can I obtain technical assistance regarding manufactured (mobile) homes?
- 296-150M-0140 Do you allow the use of alternate materials, alternate design and method of construction?

INSIGNIA

- 296-150M-0200 What labels or insignia are required on my manufactured home?
- 296-150M-0250 How do I replace a lost or damaged insignia?
- 296-150M-0260 How do I replace a lost or damaged HUD label?

ALTERATIONS AND INSPECTIONS

ALTERATION APPROVAL

- 296-150M-0300 What approval do I need to alter a manufactured home?
- 296-150M-0306 What codes are used when altering a manufactured (mobile) home?
- 296-150M-0307 How may I obtain a copy of the Manufactured Home Construction and Safety Standards, Part 24, CFR 3280?
- 296-150M-0309 How do I apply for alteration approval and obtain an alteration insignia?
- 296-150M-0310 What happens if I fail to get your approval prior to altering a manufactured home?
- 296-150M-0320 What must I provide to request approval of an alteration?
- 296-150M-0330 How do I obtain alteration insignia information and the forms you require?
- 296-150M-0331 Does my alteration permit expire?
- 296-150M-0340 What must an engineering analysis for design plans include?
- 296-150M-0350 What must the test procedures and results for design plans include?
- 296-150M-0360 When is design plan approval required for an alteration?
- 296-150M-0370 How do I obtain alteration design plan approval?
- 296-150M-0380 How will I know whether you have approved my design plan?
- 296-150M-0390 If my design plan is not approved, how much time do I have to submit a corrected plan?

INSPECTION

- 296-150M-0500 When must an inspection be requested?

- 296-150M-0530 Am I charged if I request an inspection but am not prepared when you arrive?

INSTALLATION REQUIREMENTS

INSTALLATION, PERMIT, INSPECTION, DISPUTE

- 296-150M-0600 Who establishes standards for installation of manufactured homes?
- 296-150M-0610 What instructions are used for a manufactured home installation?
- 296-150M-0614 How may I obtain a copy of the American National Standards Institute (ANSI) A225.1-Manufactured Homes Installation?
- 296-150M-0615 What are the requirements for temporary placement of manufactured (mobile) homes?
- 296-150M-0620 Do local enforcement agencies have special requirements for installing manufactured homes in hazardous areas?
- 296-150M-0630 Who may install a manufactured home?
- 296-150M-0640 Does a person who installs a manufactured home need an installation permit?
- 296-150M-0650 Does a manufactured home installation require an inspection?
- 296-150M-0655 How does the local enforcement agency gain access to the manufacturer's installation instructions?
- 296-150M-0660 What are the requirements for on-site structures and who regulates them?
- 296-150M-0670 What happens if a dispute arises concerning an installation requirement?

MANUFACTURED HOME FEES

- 296-150M-3000 Manufactured home fees.

**DISPOSITION OF SECTIONS FORMERLY
CODIFIED IN THIS CHAPTER**

- 296-150M-0400 How do I apply for alteration approval and obtain an alteration insignia? [Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150M-0400, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0400, filed 10/23/96, effective 11/25/96.] Repealed by 99-13-010, filed 6/4/99, effective 7/5/99. Statutory Authority: RCW 43.22.340 and 43.22.480.
- 296-150M-0700 Acceptable types of ground cover. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0700, filed 10/23/96, effective 11/25/96.] Repealed by 98-14-078, filed 6/30/98, effective 7/31/98. Statutory Authority: Chapter 43.22 RCW.
- 296-150M-0710 Clearance under manufactured homes. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0710, filed 10/23/96, effective 11/25/96.] Repealed by 98-14-078, filed 6/30/98, effective 7/31/98. Statutory Authority: Chapter 43.22 RCW.
- 296-150M-0720 Water heater relief lines. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0720, filed 10/23/96, effective 11/25/96.] Repealed by 98-18-036, filed 8/27/98, effective 9/27/98. Statutory Authority: Chapters 43.22 and 34.05 RCW and Executive Order 97-02.
- 296-150M-0730 Heat pump. [Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0730, filed 10/23/96, effective 11/25/96.] Repealed by 98-14-078, filed 6/30/98, effective 7/31/98. Statutory Authority: Chapter 43.22 RCW.

WAC 296-150M-0010 Authority, purpose, and scope. (1) This chapter is authorized by RCW 43.22.340 through 43.22.445. The law requires that any alteration to a manufactured home be approved by the department. A manufactured home with an approved alteration requires an alteration insignia. Alteration insignia can be purchased from us.

(2) The United States Department of Housing and Urban Development (HUD), manufactured housing standards division, has given us the authority to act as a manufactured home production Inspection Primary Inspection Agency (IPIA) and enforce 24 CFR 3280. As an IPIA:

(a) We are required to inspect every manufactured home built in Washington state sometime during production;

(b) We are authorized to audit the quality control program and the performance of quality control inspectors of manufactured home factories located in Washington state;

(c) We are authorized to supply a HUD label to the manufacturer following our inspection and approval of the manufactured home and the manufacturer's quality control program; and

(d) We are authorized to remove HUD labels according to the guidelines stated in the IPIA inspector's manual.

Note: A copy of our IPIA approval letter is on file at the department.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0010, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0020 What definitions apply to this chapter? "Alteration" is the replacement, addition, modification, or removal of any equipment or installation that affects the construction, planning considerations, fire safety, or the plumbing, mechanical, and electrical systems of a manufactured home. The installation of whole-house water treatment equipment that requires cutting into the existing plumbing is considered an alteration and requires a permit, an inspection and an alteration insignia.

The following are not considered alterations:

- Repairs to equipment with approved parts; or
- Modification of a fuel-burning appliance according to the listing agency's specifications; or
- Adjustment and maintenance of equipment.

"Alteration insignia" is an insignia issued by the department of labor and industries to verify that an alteration to a manufactured home meets the requirements of federal law 24 CFR 3280 and this chapter.

"Anchoring system" is the means used to secure a mobile home to ground anchors or to other approved fastening devices. It may include straps, cables, turnbuckles, bolts, fasteners, and other components.

"ANSI" is the American National Standards Institute, Inc., and the institute's rules applicable to manufactured homes, ANSI A225.1 Manufactured Homes Installation, 1994 edition, except section 3.5.2 - Ground Cover and section 4.1.3.3 - Clearance.

"Authority having jurisdiction" means that either the department of labor and industries or the local jurisdiction is responsible for establishing specific manufactured home standards. The authority for specific manufactured home standards is divided as follows:

- The department of labor and industries establishes standards for manufactured home installation and alterations and performs alteration inspections;
- The local jurisdiction establishes standards for manufactured homes governing the building site and performs installation inspections.

"Building site" is a tract, parcel, or subdivision of land on which a manufactured home is installed.

"DAPIA" is a Design Approval Primary Inspection Agency as approved by the United States Department of Housing and Urban Development.

"Department" is the department of labor and industries. The department may be referred to as "we" or "us" in this chapter. Note: You may contact us at: Department of Labor and Industries, Specialty Compliance, PO Box 44440, Olympia, WA 98504-4440.

"Design plan" is a design submitted to the department for approval of a manufactured home structural alteration.

"Equipment" means the appliances used in the alteration or installation of a manufactured home.

Examples of appliances that require an alteration inspection include:

- Furnace;
- Water heater;
- Air conditioner; and
- Heat pump.

Examples of appliances that do not require an alteration inspection include:

- Microwave oven;
- Washer;
- Dryer; and
- Dishwasher and range that are connected to their source of power by a plug-in cord.

"Equivalent air conditioning/heat pump components" is equipment that performs the same function and is compatible with the equipment of another manufacturer, sometimes referred to as mix and match.

"Footing" is the portion of a support system that transmits loads from the manufactured home to the ground.

"Foundation skirting" or "skirting" is the material that surrounds and encloses the space under the manufactured home.

"Homeowner" is an individual who owns a manufactured home. Dealers, distributors, and developers are not regarded as homeowners.

"HUD" is the United States Department of Housing and Urban Development with headquarters located in Washington, D.C.

"Installation" is the activity needed to prepare a building site and to set a manufactured home within that site. Site means a tract, parcel, or subdivision of land including a mobile home park.

"IPIA" is a manufactured home production Inspection Primary Inspection Agency approved by the United States Department of Housing and Urban Development. The department of labor and industries is the IPIA for Washington state.

"Local enforcement agency" is an agency of city or county government with power to enforce local regulations

governing the building site and installation of a manufactured home.

"Manufactured home" is a single-family dwelling built according to the Department of Housing and Urban Development Manufactured Home Construction and Safety Standards Act, which is a national, preemptive building code. A manufactured home also:

- Includes plumbing, heating, air conditioning, and electrical systems;
- Is built on a permanent chassis; and
- Can be transported in one or more sections with each section at least eight feet wide and forty feet long when transported; or when installed on the site is three hundred twenty square feet or greater (see RCW 46.04.302).

Note: Total square feet is based on exterior dimensions measured after installation using the longest horizontal projections. Dimensions may not include bay windows but may include projections containing interior space such as cabinets and expandable rooms.

Exception: A structure that meets the requirements of a manufactured home as set out in 24 CFR 3282.7(u), except the size requirements is considered a manufactured home, if the manufacturer files with the secretary of HUD a certificate noted in CFR 3282.13.

"Mobile home" is a factory-built dwelling built prior to June 15, 1976, to standards other than the HUD Code, and acceptable under applicable state codes in effect at the time of construction or introduction of the home into the state. Mobile homes have not been built since the introduction of the HUD Manufactured Home Construction and Safety Standards Act. For the purposes of this chapter references to manufactured homes include mobile homes.

"Park site" is the installation location of a manufactured home within a residential area for manufactured homes.

"Structural alteration-custom design" is a design that can only be used once.

"Structural alteration-master design" is a design plan that can be used more than once. The master plan expires when there is a code change applicable to the design.

"System" is part of a manufactured home designed to serve a particular function such as structural, plumbing, mechanical, or electrical functions.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150M-0020, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150M-0020, filed 6/4/99, effective 7/5/99. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150M-0020, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0020, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0040 Will you keep my manufacturing information confidential? We will only release manufacturing information such as design plans for structural alterations according to the requirements of the Public Records Act (see RCW 42.17.310 (1)(h)) unless we are ordered to do so by a court or otherwise required by law.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150M-0040, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0040, filed 10/23/96, effective 11/25/96.]

(2001 Ed.)

WAC 296-150M-0050 Can I sell or lease a manufactured home that has been posted with a prohibited sale or lease notice? (1) If we find your manufactured home violates this chapter or federal standards in 24 CFR 3280, we may attach a prohibited sale or lease notice to your unit.

(2) You may not sell, lease, or offer for sale a manufactured home that is posted with a prohibited sale or lease notice.

(3) A prohibited sale or lease notice shall remain posted until the code violation is corrected, we inspect and approve the correction, and you pay the required fees. (See WAC 296-150M-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0050, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0060 Who handles consumer complaints about manufactured homes? The Washington state department of community, trade and economic development (CTED), office of manufactured housing section, handles consumer complaints about manufactured homes. CTED is the state administrative agency (SAA) for the United States Department of Housing and Urban Development for the federal manufactured home program.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0060, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0100 What happens if I disagree with your decision regarding my compliance with the federal standards, ANSI, or this chapter? (1) If we determine that you are in violation with the federal standards, ANSI A225.1, or this chapter, you will receive a notice of noncompliance.

(2) If you disagree with our decision, you can submit a written request for a hearing, stating why you disagree.

(3) After we receive your hearing request, we will:

(a) Schedule a hearing within thirty days after we receive your request.

(b) Notify you of the time, date, and place for the hearing. If you fail to appear, your case will be dismissed.

(c) Hear your case.

(d) Send you written notice of our decision.

If you disagree with our decision, you may appeal it under the Administrative Procedure Act (chapter 34.05 RCW).

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150M-0100, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0100, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0120 Where can I obtain technical assistance regarding manufactured (mobile) homes? We provide field technical service on manufactured (mobile) homes for an hourly fee. Field technical service may include an evaluation, consultation, plan examination, interpretation, and clarification of technical data relating to the application of our rules.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150M-0120, filed 6/4/99, effective 7/5/99.]

WAC 296-150M-0140 Do you allow the use of alternate materials, alternate design and method of construction? When altering a manufactured home, an applicant may apply for the use of alternate materials, alternate design and methods of construction different from the requirements of this chapter by filing a written request with the department.

(1) Responsibilities of applicant. The applicant must submit in writing the following information and sign and date the request.

(a) The applicant's name, address and phone number;

(b) The specific requirement or requirements from which the alternate material, alternate design or method of construction is requested;

(c) Justification that the requirements of this chapter cannot be met without using alternate materials, alternate design or method of construction;

(d) How the use of alternate materials, alternate design or method of construction will achieve the same result as the requirement and any specific alternative measures to be taken to show the alternate provides the same level of protection to life, safety and health as the requirements.

The department has a form that you may use for your request. Contact the department at the address shown in the definition section.

(2) Responsibilities of the department. The department will provide a written response to the applicant within thirty days of receipt of the written request. The written response will state the acceptance or denial of the request, including the reasons for the department's decision. At a minimum the department will base its decision based on:

(a) The applicant's request as described in subsection (1) of this section;

(b) Research into the request;

(c) Expert advice.

(3) Applicant's response to denials. The applicant may appeal the department's decision by following the procedure in WAC 296-150M-0100.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150M-0140, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150M-0140, filed 6/4/99, effective 7/5/99.]

INSIGNIA

WAC 296-150M-0200 What labels or insignia are required on my manufactured home? (1) A HUD label must be attached to the exterior of each section of a manufactured home built on or after June 15, 1976.

(2) An alteration insignia must be attached to the exterior of a manufactured home. It should be placed next to the HUD label or to the Washington state insignia.

(3) If your manufactured home does not have a HUD label or a Washington state insignia, we will attach the alteration insignia to the exterior end wall opposite the hitch end of the manufactured home. It must be placed approximately

[Title 296 WAC—p. 2160]

one foot above the floor line and one foot from the edge of the manufactured home.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0200, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0250 How do I replace a lost or damaged insignia? (1) If an alteration insignia or a Washington state insignia is lost or damaged after it is placed on a manufactured home, you should notify us in writing immediately. You should provide the following information:

(a) Your name, address, and telephone number;

(b) The name and address of the previous owner and date of approval, if you are replacing an alteration insignia that was obtained before you purchased the manufactured home;

(c) The vehicle identification number or serial number and model;

(d) The insignia or label number if available;

(e) The design plan approval number, if available; and

(f) The insignia replacement fee and any inspection fees.

(See WAC 296-150M-3000.)

Note: Washington state insignia (not HUD insignia) were attached to manufactured homes prior to June 15, 1976.

(2) After we receive your notice and payment for replacing the insignia, we may inspect your manufactured home to assure that the replacement insignia reflects compliance with your original insignia.

(3) If your home complies with your original insignia approval, we will attach a replacement alteration insignia or Washington state insignia to your manufactured home.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0250, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0260 How do I replace a lost or damaged HUD label? (1) If a HUD label is lost or damaged after it is placed on a manufactured home, you should notify the manufacturer's production Inspection Primary Inspection Agency (IPIA) in writing immediately. The department of labor and industries is the IPIA for builders of manufactured homes in Washington state.

(2) If your manufactured home complies with federal standards that were in effect the date your home was built, the IPIA may replace your lost or damaged HUD label.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0260, filed 10/23/96, effective 11/25/96.]

ALTERATIONS AND INSPECTIONS

ALTERATION APPROVAL

WAC 296-150M-0300 What approval do I need to alter a manufactured home? If you alter a manufactured home in Washington state, you must obtain our approval prior to making an alteration. This includes:

(1) Alterations made by an owner, or contractor; and

(2) Alterations made by a dealer after a manufactured home is sold.

(2001 Ed.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0300, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0306 What codes are used when altering a manufactured (mobile) home? Alterations to a manufactured (mobile) home must be in compliance with the Manufactured Home Construction and Safety Standards, 24 CFR Part 3280, as adopted by the Secretary for the Department of Housing and Urban Development (HUD) and the amendments to that federal standard adopted in this WAC chapter. The department will accept the following provisions, which supersede the applicable requirements in 24 CFR Part 3280.

(1) Tested equivalent air conditioning/heat pump components that have been tested and listed for use with a particular furnace by a nationally recognized testing laboratory.

(2) Pellet stoves for installation that have been listed by a department approved testing laboratory. For a current list of approved laboratories, contact any department field office or the department at the address shown in WAC 296-150M-0020.

Note: The replacement of exterior siding is an alteration and requires the approval of the department and an alteration insignia.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150M-0306, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150M-0306, filed 6/4/99, effective 7/5/99. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150M-0306, filed 6/30/98, effective 7/31/98.]

WAC 296-150M-0307 How may I obtain a copy of the Manufactured Home Construction and Safety Standards, Part 24, CFR 3280? Copies of the federal standard may be obtained by writing to:

Director
Manufactured Housing Standards Division
Department of Housing and Urban Development
451 Seventh Street Southwest
Washington, D.C. 20410

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150M-0307, filed 6/30/98, effective 7/31/98.]

WAC 296-150M-0309 How do I apply for alteration approval and obtain an alteration insignia? (1) To apply for alteration approval and the alteration insignia, you must:

(a) Complete an alteration permit form and an application for alteration insignia. We will provide the forms upon request.

(b) Submit the completed forms to us, with the first hour of inspection fee and alteration insignia fee. Alterations requiring more than one inspection shall have the first hour inspection fee paid to the department prior to any inspection. (See WAC 296-150M-3000.)

(2) Request inspection of your alteration at least five days before the date you want the inspection.

(3) Once we approve your alteration, we will attach the alteration insignia to your manufactured home.

(2001 Ed.)

Note: Specifications, engineering data, and test results should be available for our inspector. If applicable, your approved design plan must also be available during the inspection.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150M-0309, filed 6/4/99, effective 7/5/99.]

WAC 296-150M-0310 What happens if I fail to get your approval prior to altering a manufactured home?

(1) If you alter a manufactured home without getting our approval and an alteration insignia, your manufactured (mobile) home cannot be sold or leased.

(2) We may remove any Washington state insignia(s) attached to your manufactured (mobile) home.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150M-0310, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0310, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0320 What must I provide to request approval of an alteration? (1) For approval of an alteration, you must complete and return our alteration permit application form. The application must contain:

(a) A description of the proposed alteration(s);

(b) Applicable specifications, engineering data, test procedures and results; and

(c) Payment of the alteration permit fee, alteration insignia fee, and any inspection fees. (See WAC 296-150M-3000.)

(2) For approval of a structural alteration, we must approve the design plan. This is in addition to the requirements stated in subsection (1) of this section. (See WAC 296-150M-0370.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0320, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0330 How do I obtain alteration insignia information and the forms you require? Upon request, we will provide you with the forms and the fee schedules needed to obtain an alteration insignia or you can contact any department of labor and industries office for the forms. Our address is noted in the definition of department.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0330, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0331 Does my alteration permit expire? Yes, your alteration permit will expire one year after the date of purchase. Alteration permits purchased prior to January 1, 1998, will expire on December 31, 1998. Alteration permits purchased after January 1, 1998, will expire one year after the date of purchase.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150M-0331, filed 6/30/98, effective 7/31/98.]

WAC 296-150M-0340 What must an engineering analysis for design plans include? (1) The engineering analysis must show that the structural design meets the requirements of this chapter.

(2) An engineering analysis must be conducted according to accepted engineering practices and must be signed by a professional engineer or architect licensed in Washington or by a DAPIA who approved the original design plan.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0340, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0350 What must the test procedures and results for design plans include? (1) Tests to an alteration design must be performed and evaluated by a professional engineer or architect licensed in Washington or by a DAPIA who approved the original design plan.

(2) Test reports must contain the following items:

- (a) A description of the methods or standards that applied to the test;
- (b) Drawings and a description of the item tested;
- (c) A description of the test set-up;
- (d) The procedure used to verify the correct load;
- (e) The procedure used to measure each condition;
- (f) Test data, including applicable graphs and observations of the characteristics and behavior of the item tested;
- (g) Engineering data; and
- (h) Analysis, comments, and conclusion.

(3) The written test procedures, results, and conclusions must reference the applicable structural alteration design plan.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0350, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0360 When is design plan approval required for an alteration? (1) Design plan approval is required when you make a structural alteration to your manufactured home.

(2) A structural alteration is a change to the body or frame of a manufactured home. For example:

- (a) An alteration is made if you change the size of a room or the pitch of a roof on your manufactured home.
- (b) Any addition such as a carport that adds structural load to the manufactured home and is not fully self-supporting is an alteration.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0360, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0370 How do I obtain alteration design plan approval? (1) You must have your design plan approved by:

- (a) A Design Approval Primary Inspection Agency (DAPIA), if they approved the initial design plan; or
- (b) A professional engineer or architect who is licensed in Washington state.

(2) You must submit two copies of your alteration design plan with the appropriate fee to us for review and approval. (See WAC 296-150M-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0370, filed 10/23/96, effective 11/25/96.]

[Title 296 WAC—p. 2162]

WAC 296-150M-0380 How will I know whether you have approved my design plan? (1) Your design plan will be approved if it meets the requirements of this chapter and federal standards in 24 CFR 3280.

(2) We will send you an approved copy of your design plan with the plan approval number.

(3) If your design plan is not approved, you will be notified in writing of plan deficiencies. You may send a corrected design plan to us. (See WAC 296-150M-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0380, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0390 If my design plan is not approved, how much time do I have to submit a corrected plan? (1) You have ninety days to correct and resubmit your original design plan and send us the resubmittal fee after we notify you of plan deficiencies. After ninety days, your initial design plan is returned to you.

(2) If you submit your corrected design plan after ninety days, you must send the initial design plan fee instead of the resubmittal fee. (See WAC 296-150M-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0390, filed 10/23/96, effective 11/25/96.]

INSPECTION

WAC 296-150M-0500 When must an inspection be requested? (1) You must request an inspection by us, if you are altering a manufactured home.

(2) You must request an inspection by the local enforcement agency, for manufactured home installations.

(3) The installation of manufactured homes must be enforced and fees charged by the counties and cities in the same manner the State Building Code is enforced under RCW 19.27.050.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0500, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0530 Am I charged if I request an inspection but am not prepared when you arrive? If you ask us to inspect your manufactured home or your alteration, but you are not prepared when we arrive, you must pay the minimum inspection fee. (See WAC 296-150M-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0530, filed 10/23/96, effective 11/25/96.]

INSTALLATION REQUIREMENTS

INSTALLATION, PERMIT, INSPECTION, DISPUTE

WAC 296-150M-0600 Who establishes standards for installation of manufactured homes? (1) The director of labor and industries is responsible for establishing uniform installation standards where possible and practical for persons or entities engaged in performing the installation of manufactured homes within the state.

(2) Local jurisdictions may adopt additional installation requirements only for those installation situations not covered by federal standards. For example, local jurisdictions may impose noise control construction ordinances, prescribe the frost depth and soil bearing capacity at the installation site, and adopt requirements to protect manufactured homes in hazardous areas, (see WAC 296-150M-0620).

Also, local jurisdictions may impose their requirements for snow and wind loads as long as all structures within their jurisdiction are required to comply with the same standard and provided those installing the manufactured home are given options in satisfying that standard. Such an option might include, but not be limited to, allowing an installer to erect an additional structure, which meets local standards, and protects the manufactured home. For example, an installer could erect a free standing ramada over a manufactured home to protect it from local snow loads.

Local jurisdictions **may not**:

(a) Dictate foundation design and construction which is built according to either the manufacturer's installation instructions or a design created by an engineer or architect licensed in Washington state.

(b) Impose regulations on smoke detectors because they are regulated by federal standards.

[Statutory Authority: RCW 43.22.340 and 43.22.480, 99-13-010, § 296-150M-0600, filed 6/4/99, effective 7/5/99. Statutory Authority: Chapter 43.22 RCW, 98-14-078, § 296-150M-0600, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480, 96-21-146, § 296-150M-0600, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0610 What instructions are used for a manufactured home installation? To the extent that the installation of a manufactured home is not covered by a manufacturer's, engineer's or architect's instructions, the manufactured home shall comply with the installation requirements of this section.

(1) Installation of a new manufactured home.

(a) The initial manufactured home installation must be conducted according to the manufacturer's instructions.

(b) If the manufacturer's instructions do not address an aspect of the installation, you may request:

(i) Specific instructions from the manufacturer; or

(ii) Specific instructions from a professional engineer or architect licensed in Washington state.

For example:

(A) A manufactured home is installed over a basement and the manufacturer's instructions do not address this application;

(B) A manufactured home is installed on a site where the specific soil bearing capacity is not addressed in the manufacturer's instructions.

(c) All manufactured homes installed in Washington state must be permanently anchored except for those installed on dealer lots. On dealer lots, temporary sets are permitted without anchoring being installed. A manufactured home must be anchored according to the manufacturer's installation instructions or according to the design of a professional engineer or architect licensed in Washington state. Local jurisdictions **may not** prescribe anchoring methods.

(d) A manufactured home must have a skirting around its entire perimeter. It must be installed per the manufacturer's installation instructions or if the manufacturer is not specific, to the standards in this section. It must be vented and allow access to the under floor area per the manufacturer's installation instructions or per the standards below if the manufacturer's instructions are not available.

If the manufacturer's skirting and access instructions are not specific, skirting, ventilation and access shall be installed as follows:

(i) Skirting:

- Skirting must be made of materials suitable for ground contact.
- Metal fasteners must be made of galvanized, stainless steel or other corrosion resistant material.
- Ferrous metal members in contact with the earth, except those made of galvanized or stainless steel, must be coated with an asphaltic emulsion.
- Skirting must not trap water between the skirting and siding or trim.
- All skirting must be recessed behind the siding or trim.

(ii) Ventilation:

For homes sited in a flood plain, contact the local jurisdiction regarding proper skirting ventilation. Except for those manufactured homes sited in a flood plain, all skirting must be vented as follows:

- Vent openings must be covered with corrosion-resistant wire mesh to prevent the entrance of rodents. The size of the mesh opening cannot exceed 1/4 inch.
- Vent openings must have a net area of not less than one square foot for each one hundred fifty square feet of under floor area.
- Vent openings must be located as close to corners and high as practical and they must provide cross ventilation on at least two opposite sides.

(iii) Access:

- Access to the under floor area of a manufactured home must have a finished opening at least eighteen inches by twenty-four inches in size.
- The access opening must be located so that all areas under a manufactured home are available for inspection.
- The access opening must be covered and that cover must be made of metal, pressure treated wood or vinyl.

(e) A manufactured home site must be prepared per the manufacturer's installation manual or per ANSI A225.1, 1994 edition, section 3.

(f) Heat duct crossovers must be installed per the manufacturer's installation instruction manual or per ANSI A225.1 or the following instructions if the manufacturer's instructions are not available:

Heat duct crossovers must be supported at least one inch above the ground by strapping or blocking. They must be installed to avoid standing water. Also, they must be installed to prevent compression, sharp bends and to minimize stress at the connections.

(g) Dryer vents must exhaust to the exterior side of the wall or skirting. Dryer ducts outside the manufactured home

shall comply with the dryer manufacturer's specifications or shall be made of metal with smooth interior surfaces.

(h) Hot water tank pressure relief lines must exhaust to the exterior side of the exterior wall or skirting and must exhaust downward. The end of the pipe must be at least six inches but not more than two feet above the ground.

(i) Water piping must be protected against freezing as per the manufacturer's installation instructions or by use of a heat tape listed for use with manufactured homes and installed per the heat tape manufacturer's installation instructions.

(j) The testing of water lines, waste lines, gas lines and electrical systems must be as per the manufacturer's installation instructions. If the manufacturer's installation instructions require testing of any of these systems, the local jurisdiction is responsible for verifying that the tests have been performed and passed. Electrical connections and testing are the responsibility of the electrical section of labor and industries except where a city has assumed the electrical inspection responsibilities for their jurisdiction. In that case, the city's electrical inspectors are responsible for the electrical connections and testing.

(k) During the installation process, a ground cover must be installed under all manufactured homes. The ground cover must be a minimum of six-mil *black* polyethylene sheeting or its equivalent (exception to ANSI A225.1 (3.5.2)). The ground cover may be omitted if the under floor area of the home has a concrete slab floor with a minimum thickness of three and one-half inches.

(l) Clearances underneath manufactured homes must be maintained at a minimum of eighteen inches beneath at least seventy-five percent of the lowest member of the main frame (I-beam or channel beam) and the ground or footing. No more than twenty-five percent of the lowest member of the main frame of the home shall be less than eighteen inches above the ground or footing. **In no case** shall clearance be less than twelve inches **anywhere** under the home (exception to ANSI A225.1 (4.1.3.3)).

(m) Heat pump and air conditioning condensation lines must be extended to the exterior of the manufactured home.

(2) Installation of a relocated manufactured (mobile) home.

(a) A relocated manufactured home installation should be conducted according to the manufacturer's installation instructions.

(b) If the manufacturer's instructions are unavailable, you may use either:

(i) The American National Standard Institute (ANSI) standard ANSI A225.1-Manufactured Homes Installation, 1994 edition instructions; or

(ii) The instructions of a professional engineer or architect licensed in Washington state.

(c) If either (b)(i) or (ii) is used, all of the requirements of WAC 296-150M-0610 (1)(c) through (m) must also be followed.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150M-0610, filed 6/4/99, effective 7/5/99. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150M-0610, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0610, filed 10/23/96, effective 11/25/96.]

[Title 296 WAC—p. 2164]

WAC 296-150M-0614 How may I obtain a copy of the American National Standards Institute (ANSI) A225.1-Manufactured Homes Installation? Copies of the standard are available from:

Publications/Communications

National Conference of States on Building Codes and Standards, Inc.

505 Huntmar Park Drive, Suite 210

Herndon, Virginia 22070

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150M-0614, filed 6/4/99, effective 7/5/99.]

WAC 296-150M-0615 What are the requirements for temporary placement of manufactured (mobile) homes? Manufactured (mobile) homes placed on temporary display or in storage by a manufacturer, dealer or distributor in excess of thirty days shall be:

(1) Supported under each main frame beam by supports located within two feet of each end and within four feet of the front and rear axle and other supports so that no span shall exceed sixteen feet; and

(2) Made weathertight at any marriage line joint at the roof and wall lines.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150M-0615, filed 6/4/99, effective 7/5/99.]

WAC 296-150M-0620 Do local enforcement agencies have special requirements for installing manufactured homes in hazardous areas? (1) Local enforcement agencies may have special installation requirements for manufactured homes installed in hazardous areas.

(2) A hazardous area is:

(a) An area recognized as a flood plain by the local jurisdiction; or

(b) An area considered hazardous due to the probability of earthquake. In such areas, local jurisdictions may require an earthquake resistant bracing system designed for the earthquake zone in which the home is located by the home manufacturer or by a registered professional engineer or architect.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150M-0620, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0620, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0630 Who may install a manufactured home? (1) A manufactured home may be installed by:

- A homeowner;
- A certified installer;
- An individual who is supervised by an on-site certified installer; or
- A specialty trades person, for certain aspects of installation.

(2) A certified installer must be a registered contractor or his or her employee, or an employee of a registered dealership. (See chapter 43.63B RCW for details to which aspects of installation require the presence of a certified installer.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0630, filed 10/23/96, effective 11/25/96.]

(2001 Ed.)

WAC 296-150M-0640 Does a person who installs a manufactured home need an installation permit? (1) A dealer, owner or agent must not deliver a manufactured home to its site without verifying that an installation permit has been obtained; and

(2) Any permit fees set by the local enforcement agency must be paid in full and included with the permit application.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150M-0640, filed 6/4/99, effective 7/5/99. Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150M-0640, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0640, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0650 Does a manufactured home installation require an inspection? All manufactured home installations must be inspected and approved by the local enforcement agency.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0650, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0655 How does the local enforcement agency gain access to the manufacturer's installation instructions? A manufacturer's installation manual shall be provided for the inspecting jurisdiction whenever any portions of the manufacturer's installation instructions have been used for any portion of the installation.

(1) The installation instructions shall be located between the I-beam and the bottom board within five feet of the main electrical feeder when the skirting has not been installed.

(2) When the skirting has been installed, the installation instructions shall be located between the I-beam and the bottom board within five feet of the access opening.

(3) Instructions shall be returned to such location when the inspection is completed.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150M-0655, filed 6/4/99, effective 7/5/99.]

WAC 296-150M-0660 What are the requirements for on-site structures and who regulates them? On-site structures, sometimes referred to as auxiliary structures, such as, but not limited to, carports, decks and steps should be self-supporting.

(1) Local enforcement agency jurisdiction.

(a) On-site self-supporting structures that do not use any of the systems in the manufactured home are inspected by the local enforcement agency and they should be contacted for specific on-site structure requirements.

(b) Awnings and carports that are self-supported by a beam next to a manufactured (mobile) home are inspected by the local enforcement agency. Note: The awning or carport may be flashed to the manufactured (mobile) home.

(2) Department of labor and industries jurisdiction.

(a) On-site structures that are not self-supporting or use one or more of the systems of the manufactured home require an inspection by us and by the local enforcement agency.

(b) Awnings and carports that are attached to the manufactured (mobile) home without the benefit of a self-supported beam require approval and inspection by the department. Note: This attachment must be designed and approved by an engineer or an architect licensed in Washington state. Furthermore, these stamped plans must be submitted to the department and approved before an inspection can be conducted.

(c) Attached garages:

(i) If the manufactured (mobile) home is built "garage ready" (one hour fire wall, dormer, etc.) at the factory and is installed by the manufacturer, an alteration inspection may not be required.

(ii) If the manufactured (mobile) home is not built "garage ready" at the factory, an alteration inspection is required for all changes made to it.

[Statutory Authority: Chapter 43.22 RCW. 98-14-078, § 296-150M-0660, filed 6/30/98, effective 7/31/98. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0660, filed 10/23/96, effective 11/25/96.]

WAC 296-150M-0670 What happens if a dispute arises concerning an installation requirement? (1) If a dispute arises between any person, business, or local enforcement agency concerning an installation requirement of ANSI A225.1 or this chapter, the issue may be submitted to the factory assembled structures advisory (FAS) board.

(2) The board may provide an opinion on the requirement.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150M-0670, filed 10/23/96, effective 11/25/96.]

MANUFACTURED HOME FEES

WAC 296-150M-3000 Manufactured home fees.

WAC 296-150M-3000 MANUFACTURED HOME FEES	
INITIAL FILING FEE	\$28.00
DESIGN PLAN FEES:	
STRUCTURAL ALTERATION-MASTER DESIGN (CODE CYCLE)	\$112.75
STRUCTURAL ALTERATION - ONE YEAR DESIGN	\$78.75
RENEWAL FEE	\$33.75
RESUBMITTAL FEE	\$56.25
ADDENDUM (Approval expires on the same date as original plan.)	\$56.25
DEPARTMENT INSPECTION FEES:	
INSPECTION (Per hour*)	\$56.25

WAC 296-150M-3000 MANUFACTURED HOME FEES	
OTHER REQUIRED INSPECTIONS (Per hour*)	\$56.25
ALL REINSPECTIONS (Per hour*)	\$56.25
INSIGNIA FEES:	
ALTERATION	\$28.00
REISSUED - LOST/DAMAGED	\$16.50
IPIA	
DEPARTMENT AUDIT FEES	
REGULARLY SCHEDULED IPIA AUDIT:	
First inspection on each section (one time only)	\$25.75
Second and succeeding inspections of unlabelled sections (Per hour*)	\$56.25
OTHER IPIA FEES:	
Red tag removal during a regularly scheduled IPIA audit (Per hour* separate from other fees)	\$56.25
Red tag removal at a time other than a regularly scheduled IPIA audit (Per hour* plus travel time* and mileage**)	\$56.25
Increased frequency surveillance (Per hour* plus travel time* and mileage**)	\$56.25
Attendance at manufacturers training classes (Per hour* only)	\$56.25
Subpart "I" investigations (Per hour* plus travel time* and mileage**)	\$56.25
Alterations to a labelled unit (Per hour* plus travel time* and mileage**)	\$56.25
IPIA Issues/Responses (Per hour* Plus travel time* and mileage**)	\$56.25
Monthly surveillance during a regularly scheduled IPIA audit (Per hour* plus travel time* and mileage**)	\$56.25
Monthly surveillance at a time other than a regularly scheduled IPIA audit (Per hour* plus travel time* and mileage**)	\$56.25
Plant certifications, recertifications and addenda updates (Per hour* plus travel time* and mileage per each inspector)	\$56.25
Response to HBT Audit during a regularly scheduled IPIA audit (Per hour*)	\$56.25
Response to HBT Audit at a time other than a regularly scheduled IPIA audit (Per hour* plus travel time* and mileage**)	\$56.25
Alternative construction (AC) letter inspections at placement site (Per hour* plus travel time* and mileage**)	\$56.25
Replacement of HUD labels (Per hour* plus travel time* and mileage**)	\$56.25
OTHER FEES:	
FIELD TECHNICAL SERVICE (Per hour plus travel time* and mileage**)	\$56.25
PUBLICATION PRINTING AND DISTRIBUTION OF RCWs AND WACs (One free copy per year)	\$10.75
NOTE: Local jurisdictions may have other fees that apply.	
* Minimum charge of 1 hour; time spent greater than 1 hour is charged in 1/2 hour increments.	
** Per state guidelines.	
*** Actual charges incurred.

296-150P-0350	If my design plan is not approved, how much time do I have to submit a correct plan?
QUALITY CONTROL PROGRAM/MANUAL	
296-150P-0400	What constitutes an acceptable quality control program/manual for state-plan insignia?
296-150P-0410	How do I apply to have my quality control manual approved?
296-150P-0420	What happens if my quality control manual is approved?

DESIGN PLAN/QUALITY CONTROL MANUAL—REVIEW,
CHANGE/ADDENDUM, EXPIRATION, AND RENEWAL

- 296-150P-0440 Do I need approval to change my design plan or quality control manual after I receive state-plan approval?
296-150P-0450 When does state-plan insignia approval expire?

INSPECTION

- 296-150P-0600 When does a manufacturer, individual builder, or a dealer need to request a recreational park trailer inspection?
296-150P-0610 How do I request a recreational park trailer inspection and what documentation is required?
296-150P-0620 What happens if my recreational park trailer passes inspection?
296-150P-0630 What happens if my recreational park trailer does not pass inspection?
296-150P-0640 Am I charged if I request an inspection but I am not prepared?

AUDIT

- 296-150P-0700 What does our annual quality control program audit for state-plan insignia include?

LOSS OF STATE-PLAN APPROVAL

- 296-150P-0710 Can you withdraw my state-plan insignia approval?
296-150P-0720 What happens if my state-plan insignia approval is withdrawn?

RECREATIONAL PARK TRAILER ALTERATIONS

- 296-150P-1000 Who needs approval to alter a recreational park trailer?
296-150P-1010 Must I purchase a separate insignia for an alteration?
296-150P-1020 How do I apply for alteration approval and obtain the alteration insignia?

MANUFACTURER'S NOTICE TO THE DEPARTMENT

- 296-150P-2000 Must state-plan manufacturers notify you if they manufacture at more than one location?
296-150P-2010 Must state-plan manufacturers notify you if they change a business name or address?
296-150P-2020 Must state-plan manufacturers notify you of a change in business ownership?
296-150P-2030 Must state-plan manufacturers notify you of their Washington dealers?

RECREATIONAL PARK TRAILER FEES

- 296-150P-3000 Recreational park trailer fees.

WAC 296-150P-0010 Authority, purpose, and scope.

(1) This chapter is authorized by RCW 43.22.335 through 43.22.434 and covers the requirements for:

(a) Obtaining state-plan status if you manufacture recreational park trailers for sale or lease in Washington state.

(b) Obtaining state-plan insignia if you manufacture recreational park trailers for sale or lease in Washington state.

(2) This chapter applies to:

(a) Manufacturers, dealers and individuals who build for sale, sell, or lease recreational park trailers in Washington state; and

(b) Manufacturers, dealers, and individuals who alter recreational park trailers for sale or lease in Washington state.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0010, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0020 What definitions apply to this chapter? "Alteration" is the replacement, addition, modification, or removal of any equipment or material that affects the fire and life safety provisions, structural system, plumbing systems, fuel systems and equipment or electrical systems of a recreational park trailer.

The following changes are not considered alterations for purposes of this chapter:

(2001 Ed.)

- Repairs with approved parts;
- Modification of a fuel-burning appliance according to the terms of its listing; and
- Adjustment and maintenance of equipment.

"**Alteration insignia**" is an insignia which indicates a recreational park trailer alteration was approved by the department.

"**ANSI**" is the American National Standards Institute, Inc., and the institute's rules applicable to recreational park trailers. For the purposes of this chapter, references to ANSI mean ANSI A119.5 Recreational Park Trailers, 1998 edition.

"**Approved**" is approved by the department of labor and industries.

"**Audit**" by the department is the department inspection of a manufacturer's quality control procedures, comprehensive plans, and recreational park trailers.

"**Comprehensive design plan**" consists of the design plans and copies of drawings such as:

- Floor plans relating to fire and life safety, structural, electrical, plumbing, liquefied petroleum (LP) and/or natural gas systems and appliances and air conditioning systems, if applicable to the plan of each recreational park trailer.

- Plumbing line drawings which describe the size, length and location of gas piping lines, liquid and body waste lines, liquid and body waste tanks, and potable water tanks.

- Electrical drawings. (See WAC 296-150P-0330.)

"**Consumer**" is a person or organization who buys or leases recreational park trailers.

"**Dealer**" is a person or organization whose business is offering recreational park trailers for sale or lease.

"**Department**" is the department of labor and industries. The department may be referred to as "we" or "us" in this chapter. Note: You may contact us at: Department of Labor and Industries, Specialty Compliance, PO Box 44430, Olympia, WA 98504-4430.

"**Equipment**" is all material, appliances, fixtures, and accessories used in the manufacture or alteration of recreational park trailers.

"**Manual**" is a reference containing instructions, procedures, responsibilities and other information used to implement and maintain the quality control program of a recreational park trailer manufacturer.

"**National Electrical Code**" see Appendix 'C' of ANSI A119.2 for reference to the appropriate edition to use for compliance.

"**Recreational park trailer**" is a trailer-type unit that is primarily designed to provide temporary living quarters for recreational, camping or seasonal use, that meets the following criteria:

- Built on a single chassis, mounted on wheels;
- Having a gross trailer area not exceeding 400 square feet (37.15 square meters) in the set-up mode; and
- Certified by the manufacturer as complying with ANSI A119.5.

"**Quality control**" is the plan and method for ensuring that the manufacture, fabrication, assembly, installation, storing, handling, and use of materials complies with this chapter and ANSI.

"State-plan insignia" is an insignia which is obtained under the state design-plan approval process.

"System" is a part of a recreational park trailer that is designed to serve a particular function such as plumbing, electrical, heating, mechanical or structural system.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150P-0020, filed 6/4/99, effective 7/5/99. Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0020, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0030 How is this chapter enforced?

(1) We enforce this chapter through the state-plan insignia approval process (see WAC 296-150P-0300 through 296-150P-0720).

(2) Recreational park trailer inspections occur where the recreational park trailers are manufactured, sold, or leased. We conduct inspections during normal work hours or at other reasonable times. We may require you to remove a part of the recreational park trailer in order to conduct our inspection.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0030, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0040 Will you keep my manufacturing information confidential? We will only release manufacturing information, such as design plans, specifications, test results, and manuals, according to the Public Records Act (see RCW 42.17.310 (1)(h)) unless we are ordered to do so by a court or otherwise required by law.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0040, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0050 Can you prohibit the sale or lease of my recreational park trailer? (1) We may prohibit the sale or lease of your recreational park trailer because it is unlawful for any person to sell, lease, or offer for sale a recreational park trailer within this state if it violates any of the requirements of this chapter (see RCW 43.22.345).

(2) If an inspection reveals that a recreational park trailer violates this chapter, we may post a notice prohibiting the sale or lease of a recreational park trailer.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150P-0050, filed 6/4/99, effective 7/5/99.]

WAC 296-150P-0060 Who handles consumer complaints about recreational park trailers? (1) Consumers may file complaints with us, if they have reason to believe a manufacturer and/or dealer is in violation of this chapter and ANSI.

(2) The complaint should be in writing and describe the items that may not comply with this chapter and ANSI.

(3) After we receive the complaint, we will send the manufacturer and/or the dealer a copy of the complaint. The manufacturer and/or dealer has thirty days to respond to the complaint.

(4) If we decide an inspection is warranted and specific code violation(s) are found during the inspection, the manufacturer or dealer is charged for the inspection.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0060, filed 7/31/97, effective 12/1/97.]

[Title 296 WAC—p. 2168]

WAC 296-150P-0100 What happens if I disagree with the department's decision regarding my compliance with this chapter and ANSI? (1) If we determine that you are in violation of this chapter and ANSI, you will receive a notice of noncompliance and we may withdraw your certification. (See WAC 296-150P-0710.)

(2) If you disagree with our decision, you can send us a written request for a hearing, stating why you disagree.

(3) After we receive your hearing request, we will:

(a) Schedule a hearing within thirty days after we receive your request.

(b) Notify you of the time, date, and place for the hearing. If you fail to appear, your case will be dismissed.

(c) Hear your case.

(d) Send you written notice of our decision.

If you disagree with our decision, you may appeal it under the Administrative Procedure Act (chapter 34.05 RCW).

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0100, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0110 Do you have an advisory board to address recreational park trailer issues? The factory assembled structures (FAS) board advises us on issues relating to plumbing, heating, electrical, installation, alterations, inspections, and rules for recreational park trailers. (See RCW 43.22.420.)

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0110, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0120 Where can I obtain technical assistance regarding recreational park trailers? We provide field technical service to recreational park trailer manufacturers for an hourly fee (see WAC 296-150P-3000). Field technical service may include an evaluation, consultation, plan examination, interpretation, and clarification of technical data relating to the application of our rules. It does not include inspections.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0120, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0130 Do you allow recreational park trailers to be displayed without an insignia? We allow one recreational park trailer to be displayed without an insignia, if you:

(1) Get written approval from us in advance of displaying the unit; we should receive your written request at least thirty days prior to display of the unit. Your request must include:

- (a) The model and serial number of the unit;
- (b) The location where the unit will be displayed; and
- (c) The date(s) the unit will be displayed.

(2) Are licensed in Washington state through the department of licensing;

(3) Have your approval letter available at the display;

(4) Place three visible signs on the display unit:

- (a) One at the main entry door;
- (b) One inside the front of the unit; and
- (c) One inside the back of the unit.

The signs must read: NOT FOR SALE - DISPLAY ONLY.

The letters on the sign must be one inch or higher.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0130, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0140 Do you allow the use of alternate materials, alternate design and method of construction? An applicant may apply for the use of alternate materials, alternate design and methods of construction different from the requirements of this chapter by filing a written request with the department.

(1) Responsibilities of applicant. The applicant must submit in writing the following information and sign and date the request.

(a) The applicant's name, address and phone number;

(b) The specific requirement or requirements from which the alternate material, alternate design or method of construction is requested;

(c) Justification that the requirements of this chapter cannot be met without using alternate materials, alternate design or method of construction;

(d) How the use of alternate materials, alternate design or method of construction will achieve the same result as the requirement and any specific alternative measures to be taken to show the alternate provides the same level of protection to life, safety and health as the requirements.

The department has a form that you may use for your request. Contact the department at the address shown in the definition section.

(2) Responsibilities of the department. The department will provide a written response to the applicant within thirty days of receipt of the written request. The written response will state the acceptance or denial of the request, including the reasons for the department's decision. At a minimum the department will base its decision based on:

(a) The applicant's request as described in subsection (1) of this section;

(b) Research into the request;

(c) Expert advice.

(3) Applicant's response to denials. The applicant may appeal the department's decision by following the procedure in WAC 296-150P-0100.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150P-0140, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150P-0140, filed 6/4/99, effective 7/5/99.]

REQUIREMENTS FOR INSIGNIA AND OTHER IDENTIFICATION

WAC 296-150P-0200 Who should obtain recreational park trailer insignia? (1) If you manufacture recreational park trailers to be sold or leased in Washington, you must purchase a state-plan insignia for each recreational park trailer.

(2) Individuals that build recreational park trailers to sell or lease in Washington must purchase an insignia.

(2001 Ed.)

(3) If you have a recreational park trailer with a state-plan insignia and you plan to alter or have another person alter it, you must obtain an alteration insignia from us.

Note: You do not need to purchase our insignia if you manufacture recreational park trailers in Washington for sale outside the state.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0200, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0210 How do I obtain insignia information and the forms you require? Upon request, we will provide you with a packet of information that includes required forms and fee schedule for obtaining the state-plan insignia. Our address is noted in the definition of department.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0210, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0220 How do I obtain insignia based on state-plan approval? (1) If you are approved to purchase insignia based on state-plan approval, you may purchase the insignia by submitting the insignia application with the required fees. (See WAC 296-150P-3000.)

(2) The application must include:

(a) A signed statement from you certifying that you are manufacturing your units according to your approved design plans and your quality control program; and

(b) A list of the approved design plans against which you will apply the insignia.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0220, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0250 How do I replace lost or damaged insignia? (1) If an insignia is lost or damaged after it is placed on a recreational park trailer and you are the manufacturer or owner, you must notify us in writing immediately.

(2) Your notification should include the following information:

(a) Your name, address, and telephone number;

(b) The recreational park trailer serial number;

(c) The insignia number and design-plan approval number, if applicable; and

(d) The required fee. (See WAC 296-150P-3000.)

(3) If we can determine that your unit previously had an insignia, we will attach the insignia to your recreational park trailer once we receive your insignia fee. (See WAC 296-150P-3000.)

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0250, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0280 What other identification is required? Every new recreational park trailer manufactured, offered for sale or lease, or sold or leased in Washington must also have a vehicle identification number (VIN) label in compliance with the Federal Department of Transportation (DOT) safety standards.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0280, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0290 When and where should the insignia and the identification label be attached to the recreational park trailer? (1) Insignia must be attached to the finished recreational park trailer before it leaves the approved manufacturer's location.

(2) The state-plan insignia must be attached adjacent to the main door, on the strike side of the door, at least twelve inches above the floor line. The strike side of the door is opposite the hinge side of the door.

(3) The alteration insignia must be attached next to the certification insignia.

(4) The identification number (VIN) label must be attached on the recreational park trailer as required by the Federal Department of Transportation. Any other identification label must be attached next to the certification insignia or on the exterior front half of the left side of the recreational park trailer, at least six inches above the floor line.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0290, filed 7/31/97, effective 12/1/97.]

STATE PLAN

WAC 296-150P-0300 What is required to obtain insignia based on state-plan approval? If you want to obtain insignia based on state-plan approval, you must:

(1) Have your design plan and quality control manual approved by us; and

(2) Pass a quality control program audit which includes a random inspection of your recreational park trailers.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0300, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0310 What is required after I am approved as a state-plan manufacturer? Once you have obtained approval as a state-plan manufacturer:

(1) You are required to submit comprehensive design plans to us for approval;

(2) You can inspect your own recreational park trailer based upon your quality control manual specifications; and

(3) You are subject to a semiannual audit at your manufacturing location(s).

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0310, filed 7/31/97, effective 12/1/97.]

DESIGN PLAN

WAC 296-150P-0320 How do I apply for design-plan approval? Upon request, we will send you a design-plan approval request form.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0320, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0330 What is required for comprehensive design-plan approval? If you are the manufacturer applying for state-plan approval:

(1) You must submit two sets of comprehensive design plans (do not send originals) to us for approval. Design plans must be accompanied by the initial filing fee, if appropriate, and the design-plan fee. (See WAC 296-150P-3000.)

[Title 296 WAC—p. 2170]

(2) Your comprehensive design plan must indicate compliance with the appropriate ANSI standards in the following plans and drawings:

(a) Floor plans relating to fire and life safety, electrical, plumbing, liquefied petroleum (LP) and/or natural gas systems and appliances, and air conditioning systems, if applicable, of each recreational park trailer.

(b) Plumbing line drawings which describe the size, length and location of gas piping lines, liquid and body waste lines, liquid and body waste tanks, and potable water tanks.

(c) Electrical drawings.

(d) Structural drawings showing compliance with ANSI A119.5, Chapter 5.

Note: We will provide a check list with detailed requirements for each type of plan upon request.

(3) Current comprehensive design plans must be available at each manufacturing location.

(4) You must have an approved quality control manual. (See WAC 296-150P-0400, 296-150P-0410.)

Note: You do not need a quality control manual if you are an individual asking us to inspect a recreational park trailer.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0330, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0340 What happens if you approve my design plan? (1) Your design plan will be approved if it complies with the requirements of this chapter and ANSI.

(2) We will send you an approved copy of the design plan with the approval number.

(3) You must keep copies of the approved design plan for all models produced at the manufacturing location.

(4) If your design plan is not approved, you will be notified in writing of plan deficiencies. You may send a corrected design plan to us.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0340, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0350 If my design plan is not approved, how much time do I have to submit a correct plan? (1) You have ninety days to correct and resubmit your original design plan and send us the resubmittal fee once we notify you of plan deficiencies. After ninety days, your initial design plan is returned to you.

(2) If you submit your corrected design plan after ninety days, you must send the initial design-plan fee instead of the resubmittal fee. (See WAC 296-150R-3000.)

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0350, filed 7/31/97, effective 12/1/97.]

QUALITY CONTROL PROGRAM/MANUAL

WAC 296-150P-0400 What constitutes an acceptable quality control program/manual for state-plan insignia? Your quality control program must implement your approved quality control manual. The quality control manual must provide instructions, procedures, and assign responsibilities to assure quality control requirements are met when the recreational park trailers are manufactured. The minimum quality control manual requirements are:

(1) An organization chart which identifies quality assurance positions and describes quality control responsibilities and accountability for the following plant personnel: General manager, plant production manager, plant foreperson, lead persons, production, quality control, sales, engineering, purchasing, and receiving staff;

(2) A method to distribute all comprehensive design plans and installation instructions or other documentation that ensures all products used are installed correctly in all recreational park trailer models produced at each manufacturing location;

(3) Procedures for maintaining the quality assurance of each recreational park trailer model;

(4) Drawings and procedures displaying manufacturing processes including a schematic plant layout;

(5) Descriptions of production stations, including surgehold stations, on-site or off-site repair-rework locations, and off-line construction sites. Descriptions should identify by station and location the work, tests, or inspections performed and the job title of the person performing the quality control review;

(6) Inspection and equipment maintenance instructions, including jig maintenance, check-off lists, and other documentation verifying quality control performance and accountability;

(7) Coordination of staff duties ensuring smooth transition of manufacturing responsibilities during the shift change;

(8) Instructions regarding the identification, control, and handling of damaged goods or materials that do not comply with existing rules and ANSI;

(9) Information about recreational park trailer material storage and environmental control including protection from the weather and the elimination of scrap and age-dated materials which have exceeded their life;

(10) Verification that testing equipment is properly calibrated and that your gauges are accurate;

(11) Information about production line testing which includes descriptions of procedures, test equipment, and the location of each test. The information should demonstrate accountability for test completion, for rework and repair, and for retesting;

(12) Instructions, procedures, descriptions, and responsibilities for insignia storage, security, application, and inventory;

(13) Procedures for mixed production lines, for variable production rates, for new or substitute personnel, and for new or changed inspections and tests;

(14) Instructions, procedures, and responsibilities for keeping recreational park trailer records which include the unit serial number, model, plan approval number, dealer location or destination, insignia number, inspection, and test results;

(15) Information about your quality control training program; and

(16) Procedures for introducing new designs, models, materials and equipment to staff that ensures products are built according to the standards and the manufacturer's instructions.

(2001 Ed.)

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0400, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0410 How do I apply to have my quality control manual approved? We will provide the form and instructions upon request.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0410, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0420 What happens if my quality control manual is approved? (1) Your quality control manual will be approved if it meets the requirements of this chapter and ANSI.

(2) We will send you an approved copy of your quality control manual.

(3) If your quality control manual is not approved, you will be notified in writing of the deficiencies. You may send us a corrected quality control manual.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0420, filed 7/31/97, effective 12/1/97.]

DESIGN PLAN/QUALITY CONTROL MANUAL— REVIEW, CHANGE/ADDENDUM, EXPIRATION, AND RENEWAL

WAC 296-150P-0440 Do I need approval to change my design plan or quality control manual after I receive state-plan approval? (1) Once you have received state-plan approval and you want to change your design plan or quality control manual, we must approve the changes/addenda.

(2) You should send design plan or quality control manual changes to us thirty days before you want the changes/addenda to take effect.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0440, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0450 When does state-plan insignia approval expire? (1) As a state-plan manufacturer, your approval for insignia is based upon approval of your design plan and quality control manual. Design plans are considered approved until a new ANSI code edition is adopted or unless revisions to ANSI prior to code changes would not support our design-plan approval.

(2) If, after the new ANSI code edition is adopted, your design plan and quality control manual remain identical (you may change the model name or designation) to your original design plan, you only need to submit the new plan fee and the plan approval request. **(Do not send plans.)**

Note: ANSI codes are normally adopted for a three-year period.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0450, filed 7/31/97, effective 12/1/97.]

INSPECTION

WAC 296-150P-0600 When does a manufacturer, individual builder, or a dealer need to request a recreational park trailer inspection? If you are a manufacturer, individual builder, or a dealer, you must request a recreational park trailer inspection by us:

[Title 296 WAC—p. 2171]

- (1) If you have approval of your design plan and quality control manual and need to complete the state-plan process;
- (2) If you are making a recreational park trailer alteration which must be inspected and approved by us; or
- (3) If you are correcting a violation which must be inspected and approved by us.

Note: An individual who is building a recreational park trailer to own, sell, or lease must obtain an identification number from the state patrol prior to our issuance of certification insignia.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0600, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0610 How do I request a recreational park trailer inspection and what documentation is required? (1) Complete an inspection application which can be obtained from us.

(2) Send the completed application, application fee, and inspection fee to us prior to the date you would like an inspection performed. (See WAC 296-150P-3000.)

(3) During the inspection, have your approved design plans, specifications, and test results available for our inspector.

(4) A recreational park trailer inspection will be completed in two or more phases. The "cover" inspection during the construction of the unit before the electrical, plumbing, mechanical, heating, and structural systems are covered. The final inspection takes place after the recreational park trailer is complete.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0610, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0620 What happens if my recreational park trailer passes inspection? (1) If your recreational park trailer passes inspection and you have met the other requirements of this chapter and ANSI, you will be approved to purchase state-plan insignia from us.

(2) If you send your insignia application and fee to us prior to the inspection, we will attach your insignia when we approve the recreational park trailer.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0620, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0630 What happens if my recreational park trailer does not pass inspection? (1) If your recreational park trailer does not pass inspection, you will receive a notice of noncompliance.

(2) You have ten days after receiving the notice of noncompliance to send us a written response explaining how you will correct the violation(s) and prevent its reoccurrence.

(3) You are not allowed to move, sell or lease a recreational park trailer until:

- (a) You correct the violation(s);
- (b) We inspect and approve the correction(s); and
- (c) You pay the inspection fee and the insignia fee, if required. (See WAC 296-150P-3000.)

(4) If you fail to make the corrections, the sale or lease of your recreational park trailer is prohibited by RCW 43.22.340 until the corrections are made.

[Title 296 WAC—p. 2172]

Note: You will be allowed to return a recreational park trailer to the manufacturing location or to another location for correction with our approval.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0630, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0640 Am I charged if I request an inspection but I am not prepared? (1) If you ask us to inspect recreational park trailers within Washington state but are not prepared when we arrive, you must pay the minimum inspection fee and travel.

(2) If you ask us to inspect recreational park trailers outside Washington state but are not prepared when we arrive, you must pay the minimum inspection fee, travel, and per diem expenses.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0640, filed 7/31/97, effective 12/1/97.]

AUDIT

WAC 296-150P-0700 What does our annual quality control program audit for state-plan insignia include? (1) During your annual audit for state-plan insignia, we will review your quality control program and randomly inspect your recreational park trailer.

(2) If our audit indicates that you are complying with the requirements of this chapter and ANSI, you may purchase state-plan insignia.

(3) If we discover a quality control program deficiency or a recreational park trailer violation during our audit, you will receive a notice of noncompliance and cannot purchase state-plan insignia until the deficiency or violation is corrected.

(a) You can correct the deficiency or violation during the audit; or

(b) You have fourteen days after receiving the notice of noncompliance to send us a written response explaining your correction of the deficiency or violation; and

(c) You are subject to a follow-up audit.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0700, filed 7/31/97, effective 12/1/97.]

LOSS OF STATE-PLAN APPROVAL

WAC 296-150P-0710 Can you withdraw my state-plan insignia approval? Should you fail to meet the requirements of this chapter or ANSI after you have been approved to purchase state-plan insignia, we will withdraw your certification.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0710, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-0720 What happens if my state-plan insignia approval is withdrawn? If your state-plan insignia approval is withdrawn because you have failed to comply with this chapter and ANSI:

(1) You must return any issued but unused insignia to us; and

(2) You cannot sell or lease recreational park trailers in Washington.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-0720, filed 7/31/97, effective 12/1/97.]

RECREATIONAL PARK TRAILER ALTERATIONS

WAC 296-150P-1000 Who needs approval to alter a recreational park trailer? Any alteration by a manufacturer, dealer, or individual to a recreational park trailer with state-certified insignia must be approved by us before the alteration is made. "Alteration" is defined in WAC 296-150P-0020.

Note: We may remove your insignia if you alter or have someone alter a recreational park trailer without our approval.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-1000, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-1010 Must I purchase a separate insignia for an alteration? You are required to purchase an alteration insignia from us.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-1010, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-1020 How do I apply for alteration approval and obtain the alteration insignia? (1) To apply for alteration approval and the alteration insignia, you must:

(a) Complete an alteration permit form and an application for alteration insignia. We will provide the forms.

(b) Submit the completed forms, with the inspection fee and altered recreational park trailer insignia fee, to us. (See WAC 296-150P-3000.)

(2) Our recreational park trailer inspection of the alteration will be in two or more phases. The "cover" inspection during the alteration of the unit before the electrical, plumbing, mechanical, heating, structural or other systems are covered. The final inspection takes place after the alteration inspection is complete.

(3) Once we approve your alteration, we will attach the alteration insignia.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-1020, filed 7/31/97, effective 12/1/97.]

MANUFACTURER'S NOTICE TO THE DEPARTMENT

WAC 296-150P-2000 Must state-plan manufacturers notify you if they manufacture at more than one location?

(1) We must approve each recreational park trailer manufacturing location producing units for sale or lease in Washington state.

(2) You must send us the following information for each manufacturing location when you are certified:

- (a) Company name;
 - (b) Mailing and physical address;
 - (c) Phone and FAX number if available;
 - (d) Type of recreational park trailer(s) manufactured;
 - (e) Contact person for plan review; and
 - (f) Contact person for plant audit.
- (3) You must update the information as it changes.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-2000, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-2010 Must state-plan manufacturers notify you if they change a business name or address? (1)

If you are moving your business from an approved manufacturing location, the new location must be approved before shipping units from that location for sale or lease in Washington state.

(2) You must notify us in writing prior to a change of business name or address.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-2010, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-2020 Must state-plan manufacturers notify you of a change in business ownership? (1) When a recreational park trailer manufacturing business changes ownership, the new owner must notify us in writing immediately.

(2) A new owner may continue to manufacture recreational park trailers using approved design plans or comprehensive design plans according to this chapter.

(3) The department will perform an audit of the manufacturer after the ownership change to ensure you are meeting the requirements of this chapter and ANSI.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-2020, filed 7/31/97, effective 12/1/97.]

WAC 296-150P-2030 Must state-plan manufacturers notify you of their Washington dealers? (1) You must send us the following information about yourself and each of your Washington dealers when you are certified:

- (a) Dealership name;
- (b) Mailing and physical address;
- (c) Phone and FAX number if available;
- (d) Type of recreational park trailer(s); and
- (e) Contact person.

(2) You must update this information as it changes.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-2030, filed 7/31/97, effective 12/1/97.]

RECREATIONAL PARK TRAILER FEES

WAC 296-150P-3000 Recreational park trailer fees.

WAC 296-150P-3000 RECREATIONAL PARK TRAILER FEES	
INITIAL FILING FEE	\$28.00
DESIGN PLAN FEES:	
NEW PLAN REVIEW FEE WITHOUT STRUCTURAL REQUIREMENTS	\$78.75
NEW PLAN REVIEW FEE WITH STRUCTURAL REQUIREMENTS	\$104.00

WAC 296-150P-3000 RECREATIONAL PARK TRAILER FEES	
RESUBMITTAL FEE	\$56.25
ADDENDUM (Approval expires on same date as original plan.)	\$56.25
QUALITY CONTROL/MANUAL FEES:	
INITIAL APPROVAL	\$10.75
RESUBMITTAL FEE	\$56.25
ADDENDUM	\$56.25
DEPARTMENT AUDIT FEES:	
AUDIT (per hour)*	\$56.25
TRAVEL (per hour)*	\$56.25
PER DIEM**	
HOTEL***	
MILEAGE**	
RENTAL CAR***	
PARKING***	
AIRFARE***	
DEPARTMENT INSPECTION FEES:	
INSPECTION (per hour)*	\$56.25
TRAVEL (per hour)*	\$56.25
PER DIEM**	
HOTEL***	
MILEAGE**	
RENTAL CAR***	
PARKING***	
AIRFARE***	
INSIGNIA FEES:	
STATE CERTIFIED	\$10.50
ALTERATION	\$28.00
REISSUED-LOST/DAMAGED	\$10.50
OTHER FEES:	
FIELD TECHNICAL SERVICE (per hour* plus travel time* and mileage**)	\$56.25
PUBLICATION PRINTING AND DISTRIBUTION OF RCWs AND WACs (One free copy per year)	\$10.75
* Minimum charge of 1 hour; time spent greater than 1 hour is charged in 1/2 hour increments.	
** Per state guidelines.	
*** Actual charges incurred.

Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150P-3000, filed 7/31/97, effective 12/1/97.]

**Chapter 296-150R WAC
RECREATIONAL VEHICLES**

WAC

- 296-150R-0010 Authority, purpose, and scope.
- 296-150R-0020 What definitions apply to this chapter?
- 296-150R-0030 How is this chapter enforced?
- 296-150R-0040 Will you keep my manufacturing information confidential?
- 296-150R-0050 Can you prohibit the sale or lease of my recreational vehicle?
- 296-150R-0060 Who handles consumer complaints about recreational vehicles?
- 296-150R-0100 What happens if I disagree with the department's decision regarding my compliance with this chapter and ANSI?
- 296-150R-0110 Do you have an advisory board to address recreational vehicle issues?
- 296-150R-0120 Where can I obtain technical assistance regarding recreational vehicles?
- 296-150R-0130 Do you allow recreational vehicles to be displayed without an insignia?
- 296-150R-0140 Do you allow the use of alternate materials, alternate design and method of construction?

REQUIREMENTS FOR INSIGNIA AND OTHER VEHICLE IDENTIFICATION

- 296-150R-0200 Who should obtain recreational vehicle insignia?
- 296-150R-0210 How do I obtain insignia information and the forms you require?
- 296-150R-0220 How do I obtain insignia based on state-plan approval?
- 296-150R-0230 How do I obtain insignia based on self-certification approval?
- 296-150R-0250 How do I replace lost or damaged insignia?
- 296-150R-0280 What other vehicle identification is required?
- 296-150R-0290 When and where should the insignia and the vehicle identification label be attached to the vehicle?

STATE PLAN

- 296-150R-0300 What is required to obtain insignia based on state-plan approval?
- 296-150R-0310 What is required after I am approved as a state-plan manufacturer?

DESIGN PLAN

- 296-150R-0320 How do I apply for design-plan approval?
- 296-150R-0330 What is required for comprehensive design-plan approval?
- 296-150R-0340 What happens if you approve my design plan?
- 296-150R-0350 If my design plan is not approved, how much time do I have to submit a corrected plan?

QUALITY CONTROL PROGRAM/MANUAL

- 296-150R-0400 What constitutes an acceptable quality control program/manual for state-plan insignia?
- 296-150R-0410 How do I apply to have my quality control manual approved?
- 296-150R-0420 What happens if my quality control manual is approved?

DESIGN PLAN/QUALITY CONTROL MANUAL—REVIEW,
CHANGE/ADDENDUM, EXPIRATION, AND RENEWAL

- 296-150R-0440 Do I need approval to change my design plan or quality control manual after I receive state-plan approval?
296-150R-0450 When does state-plan insignia approval expire?

INSPECTION

- 296-150R-0600 When does a manufacturer, individual builder, or a dealer need to request a vehicle inspection?
296-150R-0610 How do I request a vehicle inspection and what documentation is required?
296-150R-0620 What happens if my vehicle passes inspection?
296-150R-0630 What happens if my vehicle does not pass inspection?
296-150R-0640 Am I charged if I request an inspection but I am not prepared?

AUDIT

- 296-150R-0700 What does our annual quality control program audit for state-plan insignia include?

LOSS OF STATE-PLAN APPROVAL

- 296-150R-0710 Can you withdraw my state-plan insignia approval?
296-150R-0720 What happens if my state-plan insignia approval is withdrawn?

SELF-CERTIFICATION

AUDIT TO RECEIVE SELF-CERTIFICATION

- 296-150R-0800 What is required for self-certification?
296-150R-0810 What does the initial self-certification audit include?
296-150R-0820 How will I know if I am approved for self-certification?
296-150R-0830 What are the self-certification fees?

SELF-CERTIFICATION COMPREHENSIVE DESIGN PLAN/QUALITY CONTROL PROGRAM/QUALITY CONTROL MANUAL

- 296-150R-0840 What is required for comprehensive design plan approval for self-certification?
296-150R-0850 What constitutes an acceptable quality control program/manual for self-certification?
296-150R-0860 After becoming self-certified, do I need approval to change my comprehensive design plan?
296-150R-0870 After becoming self-certified, do I need approval to change my quality control manual?

AUDIT AFTER SELF-CERTIFICATION

- 296-150R-0900 When do you audit self-certified manufacturers?
296-150R-0910 After I am self-certified, what does an audit include?

LOSS OF SELF-CERTIFICATION

- 296-150R-0920 Can you withdraw my self-certification?
296-150R-0930 What happens if my self-certification is withdrawn?

VEHICLE ALTERATIONS

- 296-150R-1000 Who needs approval to alter a recreational vehicle?
296-150R-1010 Must I purchase a separate insignia for an alteration?
296-150R-1020 How do I apply for alteration approval and obtain the alteration insignia?

MANUFACTURER'S NOTICE TO THE DEPARTMENT

- 296-150R-2000 Must state-plan and self-certified manufacturers notify you if they manufacture at more than one location?
296-150R-2010 Must state-plan and self-certified manufacturers notify you if they change a business name or address?
296-150R-2020 Must state-plan and self-certified manufacturers notify you of a change in business ownership?
296-150R-2030 Must state-plan and self-certified manufacturers notify you of their Washington dealers?

RECREATIONAL VEHICLE AND PARK TRAILER FEES

- 296-150R-3000 Recreational vehicle fees.

WAC 296-150R-0010 Authority, purpose, and scope.

(1) This chapter is authorized by RCW 43.22.335 through 43.22.434 and covers the requirements for:

(a) Obtaining state-plan or self-certified status if you manufacture recreational vehicles for sale or lease in Washington state.

(2001 Ed.)

(b) Obtaining state-plan or self-certified insignia if you manufacture recreational vehicles for sale or lease in Washington state.

(2) This chapter applies to:

(a) Manufacturers, dealers and individuals who build for sale, sell, or lease recreational vehicles in Washington state; and

(b) Manufacturers, dealers, and individuals who alter recreational vehicles for sale or lease in Washington state.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0010, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0010, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0020 What definitions apply to this chapter? "Alteration" is the replacement, addition, modification, or removal of any equipment or material that affects the fire and life safety provisions, plumbing systems, fuel systems and equipment or electrical systems of a recreational vehicle.

The following changes are not considered alterations for purposes of this chapter:

- Repairs with approved parts;
- Modification of a fuel burning appliance according to the terms of its listing; and
- Adjustment and maintenance of equipment.

"**Alteration insignia**" is an insignia which indicates a vehicle alteration was approved by the department.

"**ANSI**" is the American National Standards Institute, Inc., and the institute's rules applicable to recreational vehicles. For the purposes of this chapter, references to ANSI mean ANSI A119.2 Recreational Vehicles, 1996 edition. Effective September 1, 1999, the 1999 edition shall become effective.

"**Approved**" is approved by the department of labor and industries.

"**Audit**" by the department can be either a comprehensive audit or a performance audit. A comprehensive audit is the department inspection of a manufacturer's quality control procedures, comprehensive plans, and vehicles. A performance audit is the department's review of the manufacturer's audit performed by the industry association or other independent auditor.

"**Comprehensive design plan**" consists of the design plans and copies of drawings such as:

- Floor plans relating to fire and life safety, electrical, plumbing, liquefied petroleum (LP) and/or natural gas systems and appliances and air conditioning systems, if applicable to the plan of each vehicle.
- Plumbing line drawings which describe the size, length and location of gas piping lines, liquid and body waste lines, liquid and body waste tanks, and potable water tanks.
- Electrical drawings. (See WAC 296-150R-0330 and 296-150R-0820.)

"**Consumer**" is a person or organization who buys or leases recreational vehicles.

"**Dealer**" is a person or organization whose business is offering recreational vehicles for sale or lease.

"Department" is the department of labor and industries. The department may be referred to as "we" or "us" in this chapter. Note: You may contact us at: Department of Labor and Industries, Specialty Compliance, PO Box 44430, Olympia, WA 98504-4430.

"Equipment" is all material, appliances, fixtures, and accessories used in the manufacture or alteration of recreational vehicles or park trailers.

"Manual" is a reference containing instructions, procedures, responsibilities and other information used to implement and maintain the quality control program of a recreational vehicle manufacturer.

"National Electrical Code" see Chapter 5 of ANSI A119.2 for reference to the appropriate edition to use for compliance.

"Quality control" is the plan and method for ensuring that the manufacture, fabrication, assembly, installation, storing, handling, and use of materials complies with this chapter and ANSI.

"Recreational vehicle" is a vehicular type unit primarily designed as temporary living quarters for recreational camping, travel, or seasonal use that either has its own motive power or is mounted on, or towed by, another vehicle. Recreational vehicles include: Camping trailers, fifth-wheel trailers, motor homes, travel trailers, and truck campers.

"Self-certification insignia" is an insignia which is obtained under the self-certification approval process.

"State-plan insignia" is an insignia which is obtained under the state design-plan approval process.

"System" is a part of a recreational vehicle that is designed to serve a particular function such as plumbing, electrical, heating, or mechanical system.

"Vehicle" for the purposes of this chapter, is a recreational vehicle.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150R-0020, filed 6/4/99, effective 7/5/99. Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0020, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0020, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0030 How is this chapter enforced?

(1) We enforce this chapter through:

(a) The state plan insignia approval process (see WAC 296-150R-0300 through 296-150R-0720); or

(b) The self-certification insignia approval process (see WAC 296-150R-0800 through 296-150R-0930).

(2) Vehicle inspections occur where the recreational vehicles are manufactured, sold, or leased. We conduct inspections during normal work hours or at other reasonable times. We may require you to remove a part of the recreational vehicle in order to conduct our inspection.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0030, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0030, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0040 Will you keep my manufacturing information confidential? We will only release manu-

[Title 296 WAC—p. 2176]

facturing information, such as design plans, specifications, test results, and manuals, according to the Public Records Act (see RCW 42.17.310 (1)(h)) unless we are ordered to do so by a court or otherwise required by law.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0040, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0040, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0050 Can you prohibit the sale or lease of my recreational vehicle? (1) We may prohibit the sale or lease of your recreational vehicle because it is unlawful for any person to sell, lease, or offer for sale a recreational vehicle within this state if it violates any of the requirements of this chapter (see RCW 43.22.345).

(2) If an inspection reveals that a recreational vehicle violates this chapter, we may post a notice prohibiting the sale or lease of the recreational vehicle.

[Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150R-0050, filed 6/4/99, effective 7/5/99.]

WAC 296-150R-0060 Who handles consumer complaints about recreational vehicles? (1) Consumers may file complaints with us, if they have reason to believe a manufacturer and/or dealer is in violation of this chapter and ANSI.

(2) The complaint should be in writing and describe the items that may not comply with this chapter and ANSI.

(3) After we receive the complaint, we will send the manufacturer and/or the dealer a copy of the complaint. The manufacturer and/or dealer has thirty days to respond to the complaint.

(4) If we decide an inspection is warranted and specific code violation(s) are found during the inspection, the manufacturer or dealer is charged for the inspection.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0060, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0060, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0100 What happens if I disagree with the department's decision regarding my compliance with this chapter and ANSI? (1) If we determine that you are in violation of this chapter and ANSI, you will receive a notice of noncompliance and we may withdraw your certification. (See WAC 296-150R-0710, 296-150R-0920.)

(2) If you disagree with our decision, you can send us a written request for a hearing, stating why you disagree.

(3) After we receive your hearing request, we will:

(a) Schedule a hearing within thirty days after we receive your request.

(b) Notify you of the time, date, and place for the hearing. If you fail to appear, your case will be dismissed.

(c) Hear your case.

(d) Send you written notice of our decision.

If you disagree with our decision, you may appeal it under the Administrative Procedure Act (chapter 34.05 RCW).

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0100, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0100, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0110 Do you have an advisory board to address recreational vehicle issues? The factory assembled structures (FAS) board advises us on issues relating to plumbing, heating, electrical, installation, alterations, inspections, and rules for recreational vehicles. (See RCW 43.22.420.)

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0110, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0110, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0120 Where can I obtain technical assistance regarding recreational vehicles? We provide field technical service to recreational vehicle manufacturers for an hourly fee (see WAC 296-150R-3000). Field technical service may include an evaluation, consultation, plan examination, interpretation, and clarification of technical data relating to the application of our rules. It does not include inspections.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0120, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0120, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0130 Do you allow recreational vehicles to be displayed without an insignia? We allow one recreational vehicle to be displayed without an insignia, if you:

(1) Get written approval from us in advance of displaying the unit; we should receive your written request at least thirty days prior to display of the unit. Your request must include:

- (a) The model and serial number of the unit;
- (b) The location where the unit will be displayed; and
- (c) The date(s) the unit will be displayed.

(2) Are licensed in Washington state through the department of licensing;

(3) Have your approval letter available at the display;

(4) Place three visible signs on the display unit:

- (a) One at the main entry door;
- (b) One inside the front of the unit; and
- (c) One inside the back of the unit.

The signs must read: *Not For Sale - Display Only*.

The letters on the sign must be one inch or higher.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0130, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0130, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0140 Do you allow the use of alternate materials, alternate design and method of construction? An applicant may apply for the use of alternate materials, alternate design and methods of construction different

from the requirements of this chapter by filing a written request with the department.

(1) Responsibilities of applicant. The applicant must submit in writing the following information and sign and date the request.

(a) The applicant's name, address and phone number;

(b) The specific requirement or requirements from which the alternate material, alternate design or method of construction is requested;

(c) Justification that the requirements of this chapter cannot be met without using alternate materials, alternate design or method of construction;

(d) How the use of alternate materials, alternate design or method of construction will achieve the same result as the requirement and any specific alternative measures to be taken to show the alternate provides the same level of protection to life, safety and health as the requirements.

The department has a form that you may use for your request. Contact the department at the address shown in the definition section.

(2) Responsibilities of the department. The department will provide a written response to the applicant within thirty days of receipt of the written request. The written response will state the acceptance or denial of the request, including the reasons for the department's decision. At a minimum the department will base its decision based on:

(a) The applicant's request as described in subsection (1) of this section;

(b) Research into the request;

(c) Expert advice.

(3) Applicant's response to denials. The applicant may appeal the department's decision by following the procedure in WAC 296-150R-0100.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150R-0140, filed 8/22/00, effective 9/30/00. Statutory Authority: RCW 43.22.340 and 43.22.480. 99-13-010, § 296-150R-0140, filed 6/4/99, effective 7/5/99.]

REQUIREMENTS FOR INSIGNIA AND OTHER VEHICLE IDENTIFICATION

WAC 296-150R-0200 Who should obtain recreational vehicle insignia? (1) If you manufacture recreational vehicles to be sold or leased in Washington, you must purchase either a state-plan or self-certified insignia for each vehicle.

(2) Individuals that build recreational vehicles to sell or lease in Washington must purchase an insignia.

(3) If you have a vehicle with either a state-plan or self-certified insignia and you plan to alter or have another person alter it, you must obtain an alteration insignia from us.

Note: You do not need to purchase our insignia if you manufacture recreational vehicles in Washington for sale outside the state.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0200, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0200, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0210 How do I obtain insignia information and the forms you require? Upon request, we will provide you with a packet of information that includes required forms and fee schedule for obtaining the state-plan or self-certified insignia. Our address is noted in the definition of department.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0210, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0220 How do I obtain insignia based on state-plan approval? (1) If you are approved to purchase insignia based on state-plan approval, you may purchase the insignia by submitting the insignia application with the required fees. (See WAC 296-150R-3000.)

(2) The application must include:

(a) A signed statement from you certifying that you are manufacturing your units according to your approved design plans and your quality control program; and

(b) A list of the approved design plans against which you will apply the insignia.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0220, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0230 How do I obtain insignia based on self-certification approval? If you are approved to purchase insignia based on self-certification approval, you may purchase the insignia by submitting the insignia application with the required fees. (See WAC 296-150R-3000.) The application must include the design plan with a signed statement from you certifying that you are manufacturing your units according to your comprehensive design plans and your quality control program.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0230, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0250 How do I replace lost or damaged insignia? (1) If an insignia is lost or damaged after it is placed on a recreational vehicle and you are the manufacturer or owner, you must notify us in writing immediately.

(2) Your notification should include the following information:

(a) Your name, address, and telephone number;

(b) The vehicle identification number or serial number and model;

(c) The insignia number and design-plan approval number, if applicable; and

(d) The required fee. (See WAC 296-150R-3000.)

(3) If we can determine that your unit previously had an insignia, we will attach the insignia to your vehicle once we receive your insignia fee. (See WAC 296-150R-3000.)

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0250, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0250, filed 10/23/96, effective 11/25/96.]

[Title 296 WAC—p. 2178]

WAC 296-150R-0280 What other vehicle identification is required? Every *new* recreational vehicle manufactured, offered for sale or lease, or sold or leased in Washington must also have a vehicle identification number (VIN) label in compliance with the Federal Department of Transportation (DOT) safety standards.

Note: Truck campers do not require a vehicle identification number (VIN). They have a manufacturer's serial number.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0280, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0280, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0290 When and where should the insignia and the vehicle identification label be attached to the vehicle? (1) Insignia must be attached to the finished vehicle before it leaves the approved manufacturer's location.

(2) The state-plan or self-certification insignia must be attached adjacent to the main door, on the strike side of the door, at least twelve inches above the floor line. The strike side of the door is opposite the hinge side of the door.

(3) The alteration insignia must be attached next to the certification insignia.

(4) The vehicle identification number (VIN) label must be attached on the vehicle as required by the Federal Department of Transportation. Any other vehicle identification label must be attached next to the certification insignia or on the exterior front half of the left side of the vehicle, at least six inches above the floor line.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0290, filed 10/23/96, effective 11/25/96.]

STATE PLAN

WAC 296-150R-0300 What is required to obtain insignia based on state-plan approval? If you want to obtain insignia based on state-plan approval, you must:

(1) Have your design plan and quality control manual approved by us; and

(2) Pass a quality control program comprehensive audit which includes a random inspection of your vehicles.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0300, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0310 What is required after I am approved as a state-plan manufacturer? Once you have obtained approval as a state-plan manufacturer:

(1) You are required to submit comprehensive design plans to us for approval;

(2) You can inspect your own vehicles based upon your quality control manual specifications; and

(3) You are subject to an annual comprehensive audit at your manufacturing location(s).

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0310, filed 10/23/96, effective 11/25/96.]

(2001 Ed.)

DESIGN PLAN

WAC 296-150R-0320 How do I apply for design-plan approval? Upon request, we will send you a design-plan approval request form.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0320, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0330 What is required for comprehensive design-plan approval? If you are the manufacturer applying for state-plan approval:

(1) You must submit two sets of comprehensive design plans (do not send originals) to us for approval. Design plans must be accompanied by the initial filing fee, if appropriate, and the design plan fee. (See WAC 296-150R-3000.)

(2) Your comprehensive design plan must indicate compliance with the appropriate ANSI standards in the following plans and drawings:

(a) Floor plans relating to fire and life safety, electrical, plumbing, liquefied petroleum (LP) and/or natural gas systems and appliances, and air conditioning systems, if applicable, of each vehicle.

(b) Plumbing line drawings which describe the size, length and location of gas piping lines, liquid and body waste lines, liquid and body waste tanks, and potable water tanks.

(c) Electrical drawings.

Note: We will provide a check list with detailed requirements for each type of plan upon request.

(3) Current comprehensive design plans must be available at each manufacturing location.

(4) You must have an approved quality control manual. (See WAC 296-150R-0400, 296-150R-0410.)

Note: You do not need a quality control manual if you are an individual asking us to inspect a vehicle.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0330, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0340 What happens if you approve my design plan? (1) Your design plan will be approved if it complies with the requirements of this chapter and ANSI.

(2) We will send you an approved copy of the design plan with the approval number.

(3) You must keep copies of the approved design plan for all models produced at the manufacturing location.

(4) If your design plan is not approved, you will be notified in writing of plan deficiencies. You may send a corrected design plan to us.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0340, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0350 If my design plan is not approved, how much time do I have to submit a corrected plan? (1) You have ninety days to correct and resubmit your original design plan and send us the resubmittal fee once we notify you of plan deficiencies. After ninety days, your initial design plan is returned to you.

(2001 Ed.)

(2) If you submit your corrected design plan after ninety days, you must send the initial design plan fee instead of the resubmittal fee. (See WAC 296-150R-3000.)

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0350, filed 10/23/96, effective 11/25/96.]

QUALITY CONTROL PROGRAM/MANUAL

WAC 296-150R-0400 What constitutes an acceptable quality control program/manual for state-plan insignia? Your quality control program must implement your approved quality control manual. The quality control manual must provide instructions, procedures, and assign responsibilities to assure quality control requirements are met when vehicles are manufactured. The minimum quality control manual requirements are:

(1) An organization chart which identifies quality assurance positions and describes quality control responsibilities and accountability for the following plant personnel: General manager, plant production manager, plant foreperson, lead persons, production, quality control, sales, engineering, purchasing, and receiving staff;

(2) A method to distribute all comprehensive design plans and installation instructions or other documentation that ensures all products used are installed correctly in all recreational vehicle models produced at each manufacturing location;

(3) Procedures for maintaining the quality assurance of each vehicle model;

(4) Drawings and procedures displaying manufacturing processes including a schematic plant layout;

(5) Descriptions of production stations, including surgehold stations, on-site or off-site repair-rework locations, and off-line construction sites. Descriptions should identify by station and location the work, tests, or inspections performed and the job title of the person performing the quality control review;

(6) Inspection and equipment maintenance instructions, including jig maintenance, check-off lists, and other documentation verifying quality control performance and accountability;

(7) Coordination of staff duties ensuring smooth transition of manufacturing responsibilities during the shift change;

(8) Instructions regarding the identification, control, and handling of damaged goods or materials that do not comply with existing rules and ANSI;

(9) Information about recreational vehicle material storage and environmental control including protection from the weather and the elimination of scrap and age-dated materials which have exceeded their life;

(10) Verification that testing equipment is properly calibrated and that your gauges are accurate;

(11) Information about production line testing which includes descriptions of procedures, test equipment, and the location of each test. The information should demonstrate accountability for test completion, for rework and repair, and for retesting;

(12) Instructions, procedures, descriptions, and responsibilities for insignia storage, security, application, and inventory;

(13) Procedures for mixed production lines, for variable production rates, for new or substitute personnel, and for new or changed inspections and tests;

(14) Instructions, procedures, and responsibilities for keeping vehicle records which include the unit serial number, model, plan approval number, dealer location or destination, insignia number, inspection, and test results;

(15) Information about your quality control training program; and

(16) Procedures for introducing new designs, models, materials and equipment to staff that ensures products are built according to the standards and the manufacturer's instructions.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0400, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0400, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0410 How do I apply to have my quality control manual approved? We will provide the form and instructions upon request.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0410, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0420 What happens if my quality control manual is approved? (1) Your quality control manual will be approved if it meets the requirements of this chapter and ANSI.

(2) We will send you an approved copy of your quality control manual.

(3) If your quality control manual is not approved, you will be notified in writing of the deficiencies. You may send us a corrected quality control manual.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0420, filed 10/23/96, effective 11/25/96.]

DESIGN PLAN/QUALITY CONTROL MANUAL— REVIEW, CHANGE/ADDENDUM, EXPIRATION, AND RENEWAL

WAC 296-150R-0440 Do I need approval to change my design plan or quality control manual after I receive state-plan approval? (1) Once you have received state-plan approval and you want to change your design plan or quality control manual, we must approve the changes/addendums.

(2) You should send design plan or quality control manual changes to us thirty days before you want the changes/addendums to take effect.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0440, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0450 When does state-plan insignia approval expire? As a state-plan manufacturer, your

[Title 296 WAC—p. 2180]

approval for insignia is based upon approval of your design plan and quality control manual. Design plans are considered approved until a new ANSI code edition is adopted or unless revisions to ANSI prior to code changes would not support our design plan approval.

Note: ANSI codes are normally adopted for a three-year period.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0450, filed 10/23/96, effective 11/25/96.]

INSPECTION

WAC 296-150R-0600 When does a manufacturer, individual builder, or a dealer need to request a vehicle inspection? If you are a manufacturer, individual builder, or a dealer, you must request a vehicle inspection by us:

(1) If you have approval of your design plan and quality control manual and need to complete the state-plan process;

(2) If you are making a vehicle alteration which must be inspected and approved by us; or

(3) If you are correcting a violation which must be inspected and approved by us.

Note: An individual who is building a vehicle to own, sell, or lease must obtain a vehicle identification number from the state patrol prior to our issuance of certification insignia.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0600, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0610 How do I request a vehicle inspection and what documentation is required? (1) Complete an inspection application which can be obtained from us.

(2) Send the completed application, application fee, and inspection fee to us prior to the date you would like an inspection performed. (See WAC 296-150R-3000.)

(3) During the inspection, have your approved design plans, specifications, and test results available for our inspector.

(4) A vehicle inspection will be completed in two phases. The "cover" inspection during the construction of the unit before the electrical, plumbing, mechanical, heating, and structural systems are covered. The final inspection takes place after the vehicle is complete.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0610, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0620 What happens if my vehicle passes inspection? (1) If your vehicle passes inspection and you have met the other requirements of this chapter and ANSI, you will be approved to purchase state-plan insignia from us.

(2) If you send your insignia application and fee to us prior to the inspection, we will attach your insignia when we approve the vehicle.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0620, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0630 What happens if my vehicle does not pass inspection? (1) If your vehicle does not pass inspection, you will receive a notice of noncompliance.

(2) You have ten days after receiving the notice of noncompliance to send us a written response explaining how you will correct the violation(s) and prevent its reoccurrence.

(3) You are not allowed to move, sell or lease a vehicle until:

(a) You correct the violation(s);

(b) We inspect and approve the correction(s); and

(c) You pay the inspection fee and the insignia fee, if required. (See WAC 296-150R-3000.)

(4) If you fail to make the corrections, the sale or lease of your vehicle is prohibited by RCW 43.22.340 until the corrections are made.

Note: You will be allowed to return a vehicle to the manufacturing location or to another location for correction with our approval.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0630, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0640 Am I charged if I request an inspection but I am not prepared? (1) If you ask us to inspect recreational vehicles within Washington state but are not prepared when we arrive, you must pay the minimum inspection fee and travel.

(2) If you ask us to inspect recreational vehicles outside Washington state but are not prepared when we arrive, you must pay the minimum inspection fee, travel, and per diem expenses.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0640, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0640, filed 10/23/96, effective 11/25/96.]

AUDIT

WAC 296-150R-0700 What does our annual quality control program audit for state-plan insignia include? (1) During your annual comprehensive audit for state-plan insignia, we will review your quality control program and randomly inspect your vehicles.

(2) If our comprehensive audit indicates that you are complying with the requirements of this chapter and ANSI, you may purchase state-plan insignia.

(3) If we discover a quality control program deficiency or a vehicle violation during our comprehensive audit, you will receive a notice of noncompliance and cannot purchase state-plan insignia until the deficiency or violation is corrected.

(a) You can correct the deficiency or violation during the comprehensive audit; or

(b) You have fourteen days after receiving the notice of noncompliance to send us a written response explaining your correction of the deficiency or violation;

(c) You are subject to a follow-up comprehensive audit.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0700, filed 10/23/96, effective 11/25/96.]

(2001 Ed.)

LOSS OF STATE-PLAN APPROVAL

WAC 296-150R-0710 Can you withdraw my state-plan insignia approval? Should you fail to meet the requirements of this chapter and ANSI after you have been approved to purchase state-plan insignia, we will withdraw your certification.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0710, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0720 What happens if my state-plan insignia approval is withdrawn? If your state-plan insignia approval is withdrawn because you have failed to comply with this chapter and ANSI:

(1) You must return any issued but unused insignia to us; and

(2) You cannot sell or lease vehicles in Washington.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0720, filed 10/23/96, effective 11/25/96.]

SELF-CERTIFICATION

AUDIT TO RECEIVE SELF-CERTIFICATION

WAC 296-150R-0800 What is required for self-certification? If you want to be self-certified, you must:

(1) Send us a written request for self-certification;

(2) Have us approve your self-certification quality control manual;

(3) Have us approve your comprehensive design plans for the current models you sell in Washington state if you do not already have approved design plans;

(4) Initially be audited by us, and then be audited at least every six months by an industry association or independent inspection auditor who conducts quality control audits;

(5)(a) The manufacturer must designate an industry association or other independent auditor to perform audits of the manufacturer at least every six months.

(b) The manufacturer must provide written approval from the auditor designated under (a) of this subsection and provide a copy of such approval to the department. The approval form must allow us to review all documentation and information collected by the auditor during the auditor's periodic audits of the manufacturer. The department shall conduct a performance audit of the industry association or other independent inspection auditor at least once every two years.

(c) If the designated auditor refuses to allow the department to conduct a performance audit, then the department may conduct a performance audit of the manufacturer's quality control program. If both the designated auditor and manufacturer refuse to allow a performance audit, then the department may conduct a comprehensive audit as authorized by RCW 43.22.355(4).

Note: If you do not use an industry association or independent inspection auditor to conduct your quality control audits, you may apply for insignia under the state-plan process for insignia approval.

[Title 296 WAC—p. 2181]

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0800, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0810 What does the initial self-certification audit include? During the initial self-certification comprehensive audit, we will:

- (1) Review your quality control program;
- (2) Review your comprehensive design plans; and
- (3) Randomly inspect your vehicles.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0810, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0820 How will I know if I am approved for self-certification? (1) If the initial self-certification comprehensive audit indicates that you are complying with this chapter and ANSI, we will send you a self-certification approval letter. Once you are approved as self-certified you may purchase self-certification insignia.

(2) If we discover a quality control program deficiency or a vehicle violation during our initial audit, you will receive a notice of noncompliance and cannot purchase the self-certification insignia until the deficiency or violation is corrected.

(a) You can correct the deficiency or violation during the audit; or

(b) You have fourteen days after receiving the notice of noncompliance to send us a written response explaining your correction of the deficiency or violation;

(c) You are subject to a follow-up comprehensive audit, to verify correction of the deficiency or violation.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0820, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0830 What are the self-certification fees? (1) If you are a new manufacturer applying for self-certification, you must pay the initial filing fee, the quality control manual fee, the audit fee, travel and per diem expenses.

(2) If you are a current state-plan manufacturer applying for self-certification who has approved design plans with the department, you must pay the self-certification quality control manual fee, the audit fee, travel and per diem expenses.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0830, filed 10/23/96, effective 11/25/96.]

SELF-CERTIFICATION COMPREHENSIVE DESIGN PLAN/QUALITY CONTROL PROGRAM/QUALITY CONTROL MANUAL

WAC 296-150R-0840 What is required for comprehensive design plan approval for self-certification? (1) If you are a *new manufacturer* applying for self-certification:

(a) You must send us two sets of comprehensive design plans (do not send originals) for approval. Design plans must be accompanied by the appropriate fees. (See WAC 296-150R-3000.)

[Title 296 WAC—p. 2182]

(b) Your comprehensive design plan must indicate compliance with the appropriate ANSI standards in the following plans and drawings:

(i) Floor plans relating to fire and life safety, electrical, plumbing, liquefied petroleum (LP) and/or natural gas systems and appliances, and air conditioning systems, if applicable to the plan of each vehicle.

(ii) Plumbing line drawings which describe the size, length and location of gas piping lines, liquid and body waste lines, liquid and body waste tanks, and potable water tanks.

(iii) Electrical drawings.

Note: We will provide you with a check list with detailed requirements for each type of plan upon request.

(c) Current comprehensive design plans must be available at each manufacturing location.

(2) If you are a state-plan approved manufacturer applying for self-certification, you must have approved comprehensive design plans on file with us and at each manufacturing location.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0840, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0850 What constitutes an acceptable quality control program/manual for self-certification?

Your quality control program must implement your approved quality control manual. The quality control manual must provide instructions, procedures, and assign responsibilities to assure quality control expectations are met when vehicles are manufactured. The minimum quality control manual requirements are:

(1) An organization chart which identifies quality assurance positions and describes quality control responsibilities and accountability for the following plant personnel: General manager, plant production manager, plant foreperson, lead persons, production, quality control, sales, engineering, purchasing and receiving staff;

(2) A method to distribute all comprehensive design plans and installation instructions or other documentation that ensures all products used are installed correctly in all recreational vehicle models produced at each manufacturing location;

(3) Procedures for maintaining the quality assurance of each vehicle model;

(4) Drawings and procedures displaying manufacturing processes including a schematic plant layout;

(5) Descriptions of production stations, including surge-hold stations, on-site or off-site repair-rework locations, and off-line construction sites. Descriptions should identify by station and location the work, tests, or inspections performed and the job title of the person performing the quality control review;

(6) Inspection and equipment maintenance instructions, including jig maintenance, check-off lists, and other documentation verifying quality control performance and accountability;

(7) Coordination of staff duties ensuring smooth transition of manufacturing responsibilities during the shift change;

(2001 Ed.)

(8) Instructions regarding the identification, control, and handling of damaged goods or materials that do not comply with existing rules and ANSI;

(9) Information about recreational vehicle material storage and environmental control including protection from the weather and the elimination of scrap and age-dated materials which have exceeded their life;

(10) Verification that testing equipment is properly calibrated and that your gauges are accurate;

(11) Information about production line testing which includes descriptions of procedures, test equipment, and the location of each test. The information should demonstrate accountability for test completion, for rework and repair, and for retesting;

(12) Instructions, procedures, descriptions, and responsibilities for insignia storage, security, application, and inventory;

(13) Procedures for mixed production lines, for variable production rates, for new or substitute personnel, and for new or changed inspections and tests;

(14) Instructions, procedures, and responsibilities for keeping vehicle records which include the unit serial number, model, plan approval number (if applicable), dealer location or destination, insignia number, inspection, and test results;

(15) Information about your quality control training program;

(16) Procedures for introducing new designs, models, materials and equipment to staff that ensures products are built according to the standards and the manufacturer's instructions; and

(17) Written authorization as required in WAC 296-150R-0800(5).

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-0850, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0850, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0860 After becoming self-certified, do I need approval to change my comprehensive design plan? (1) Once you are self-certified, you are not required to send us your comprehensive design plans nor are we required to approve your comprehensive design plan changes.

(2) You are required to maintain your comprehensive design plans for each model at each manufacturing location where the models are produced.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0860, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0870 After becoming self-certified, do I need approval to change my quality control manual? Once you are self-certified, you are required to have any changes to your quality control manual approved by us.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0870, filed 10/23/96, effective 11/25/96.]

(2001 Ed.)

AUDIT AFTER SELF-CERTIFICATION

WAC 296-150R-0900 When do you audit self-certified manufacturers? (1) We audit self-certified manufacturers, if we have reason to believe, you are not complying with this chapter and ANSI.

(2) Reasons to believe that you may not be complying with this chapter and ANSI may include, but are not limited to:

(a) Consolidation of manufacturing locations or relocation of your manufacturing plant;

(b) Complaints from dealers, consumers, or other interested parties that you are not complying with this chapter and ANSI;

(c) Change of business ownership; or

(d) Noncompliance with the requirements of this chapter.

(3) A comprehensive or performance audit based on WAC 296-150R-0800 (5)(c).

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0900, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0910 After I am self-certified, what does an audit include? A performance audit after you are self-certified includes:

(1) A review of your quality control program;

(2) Verification that you are manufacturing vehicles according to this chapter and ANSI; and

(3) Verification that your comprehensive design plans are available at all locations where the vehicles are manufactured.

Note: Our audit may include a review of the comprehensive design plans at your manufacturing location.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0910, filed 10/23/96, effective 11/25/96.]

LOSS OF SELF-CERTIFICATION

WAC 296-150R-0920 Can you withdraw my self-certification? Should you fail to meet the requirements of this chapter and ANSI after you have been approved for self-certification, your self-certification can be withdrawn.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0920, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-0930 What happens if my self-certification is withdrawn? If your self-certification is withdrawn because you have failed to comply with this chapter and ANSI:

(1) You must return any issued but unused insignia to us; and

(2) You cannot sell or lease vehicles in Washington.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-0930, filed 10/23/96, effective 11/25/96.]

VEHICLE ALTERATIONS

WAC 296-150R-1000 Who needs approval to alter a recreational vehicle? (1) Any alteration by a manufacturer, dealer, or individual to a vehicle with state-certified insignia must be approved by us before the alteration is made. "Alteration" is defined in WAC 296-150R-0020.

(2) Any alteration by a manufacturer, dealer, or individual to a vehicle with self-certified insignia after it leaves the manufacturer's location must be approved by us before the alteration is made.

Note: We may remove your insignia if you alter or have someone alter a vehicle without our approval.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-1000, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-1000, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-1010 Must I purchase a separate insignia for an alteration? You are required to purchase an alteration insignia from us.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-1010, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-1020 How do I apply for alteration approval and obtain the alteration insignia? (1) To apply for alteration approval and the alteration insignia, you must:

(a) Complete an alteration permit form and an application for alteration insignia. We will provide the forms.

(b) Submit the completed forms, with the inspection fee and altered vehicle insignia fee, to us. (See WAC 296-150R-3000.)

(2) Our vehicle inspection of the alteration will be in two phases. The "cover" inspection during the alteration of the unit before the electrical, plumbing, mechanical, heating, or other systems are covered. The final inspection takes place after the vehicle is complete.

(3) Once we approve your alteration, we will attach the alteration insignia.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-1020, filed 10/23/96, effective 11/25/96.]

MANUFACTURER'S NOTICE TO THE DEPARTMENT

WAC 296-150R-2000 Must state-plan and self-certified manufacturers notify you if they manufacture at more than one location? (1) We must approve each recreational vehicle manufacturing location producing units for sale or lease in Washington state.

(2) You must send us the following information for each manufacturing location when you are certified:

- (a) Company name;
- (b) Mailing and physical address;
- (c) Phone and FAX number if available;
- (d) Type of recreational vehicle(s) manufactured;
- (e) Contact person for plan review; and

(f) Contact person for plant audit.

(3) You must update the information as it changes.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-2000, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-2000, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-2010 Must state-plan and self-certified manufacturers notify you if they change a business name or address? (1) If you are moving your business from an approved manufacturing location, the new location must be approved before shipping units from that location for sale or lease in Washington state.

(2) You must notify us in writing prior to a change of business name or address.

(2) You must notify us in writing prior to a change of business name or address.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-2010, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-2020 Must state-plan and self-certified manufacturers notify you of a change in business ownership? (1) When a recreational vehicle manufacturing business changes ownership, the new owner must notify us in writing immediately.

(2) A new owner may continue to manufacture vehicles using approved design plans or comprehensive design plans according to this chapter.

(3) The department will perform a comprehensive audit of the manufacturer after the ownership change to ensure you are meeting the requirements of this chapter and ANSI.

[Statutory Authority: RCW 43.22.340 and 43.22.420. 97-16-043, § 296-150R-2020, filed 7/31/97, effective 12/1/97. Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-2020, filed 10/23/96, effective 11/25/96.]

WAC 296-150R-2030 Must state-plan and self-certified manufacturers notify you of their Washington dealers? (1) You must send us the following information about yourself and each of your Washington dealers when you are certified:

(a) Dealership name;

(b) Mailing and physical address;

(c) Phone and FAX number if available;

(d) Type of recreational vehicle(s); and

(e) Contact person.

(2) You must update this information as it changes.

[Statutory Authority: RCW 43.22.340, [43.22.]355, [43.22.]360, [43.22.]432, [43.22.]440 and [43.22.]480. 96-21-146, § 296-150R-2030, filed 10/23/96, effective 11/25/96.]

**Chapter 296-150T WAC
FACTORY-BUILT TEMPORARY WORKER
HOUSING STRUCTURES**

WAC

- 296-150T-0010 Authority, purpose, and scope.
- 296-150T-0020 What definitions apply to this chapter?
- 296-150T-0030 How is this chapter enforced?
- 296-150T-0040 Will you keep my manufacturing information confidential?
- 296-150T-0050 Can you prohibit the installation of factory-built temporary worker housing structures?
- 296-150T-0070 Do you have reciprocal agreements with other states to inspect factory-built temporary worker housing structures?
- 296-150T-0080 Do you allow a local enforcement agency to inspect factory-built temporary worker housing at the manufacturing location?
- 296-150T-0100 What happens if I disagree with your decision regarding my compliance with this chapter?
- 296-150T-0110 Do you have an advisory board to address factory-built temporary worker housing structure issues?
- 296-150T-0120 Where can I obtain technical assistance regarding factory-built temporary worker housing structures?
- 296-150T-0130 How do I register a complaint?
- 296-150T-0140 Do you allow the use of alternate materials, alternate design and method of construction?

INSIGNIA

- 296-150T-0200 Who must purchase factory-built temporary worker housing insignia?
- 296-150T-0210 What are the insignia requirements?
- 296-150T-0220 How do I obtain insignia information and the required forms?
- 296-150T-0230 What are the insignia application requirements?
- 296-150T-0250 How do I replace lost or damaged insignia?

DESIGN PLAN

- 296-150T-0300 When is design plan approval required?

DESIGN-PLAN APPROVAL

- 296-150T-0320 What must I provide with my request for design-plan approval by the department?
- 296-150T-0340 What must an engineering analysis for design plans include?
- 296-150T-0350 What must the test procedures and results for design plans include?
- 296-150T-0380 What happens if you approve my design plan?
- 296-150T-0390 If my design plan is not approved, how much time do I have to submit a corrected design plan?
- 296-150T-0400 What happens after my design plan is approved?
- 296-150T-0410 When does my design plan expire?

INSPECTIONS PRIOR TO ISSUANCE OF AN INSIGNIA

- 296-150T-0500 When is an inspection required?
- 296-150T-0510 How do I request an inspection?
- 296-150T-0520 What happens if my factory-built temporary worker housing structure passes inspection?
- 296-150T-0530 Am I charged if I request an inspection but I am not prepared?
- 296-150T-0540 Who inspects factory-built temporary worker housing structures for installation at the temporary worker housing site?
- 296-150T-0550 Do you notify the department of health after your final inspection of factory-built structures at a manufacturing location?

USED FACTORY-BUILT STRUCTURES WITHOUT AN INSIGNIA

- 296-150T-0580 Must I obtain an insignia for used factory-built structures?
- 296-150T-0590 How do I obtain insignia for used factory-built structures?

CODES FOR FACTORY-BUILT TEMPORARY WORKER HOUSING

- 296-150T-0600 What manufacturing codes apply to factory-built temporary worker housing?

MANUFACTURER'S NOTICE TO THE DEPARTMENT

- 296-150T-0700 Must manufacturers of factory-built temporary worker housing structures notify you if they manufacture at more than one location?
- 296-150T-0710 Must manufacturers of factory-built temporary worker housing structures notify you of a change in business name or address?
- 296-150T-0720 Must manufacturers of factory-built temporary worker housing structures notify you of a change in business ownership?

FACTORY-BUILT TEMPORARY WORKER HOUSING FEES

- 296-150T-3000 Factory-built temporary worker housing fees.

WAC 296-150T-0010 Authority, purpose, and scope.
(1) This chapter is authorized by RCW 43.22.420, 43.22.434

and 43.22.450 through 43.22.490 and 43.70.337, covering the construction and approval of factory-built temporary worker housing.

(2) This chapter applies to the approval:

(a) Of factory-built temporary worker housing structures; and

(b) After occupancy of a factory-built temporary worker housing structure, all inspections are done by the department of health.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0010, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0020 What definitions apply to this chapter? "Approved" is approved by the department of labor and industries.

"Damaged in transit" is damage that effects the integrity of the structural design or damage to any other system referenced in the codes required by the temporary worker housing construction standard.

"Department" is the department of labor and industries. The department may also be referred to as "we" or "us" in this chapter. Note: You may contact us at: Department of Labor and Industries, Specialty Compliance, PO Box 44440, Olympia, WA 98504-4440.

"Department of health" is the state agency responsible for adopting by rule a "temporary worker housing construction standard." You may contact them for copies of the "temporary worker housing construction standards" at: Department of Health, PO Box 47852, Olympia, WA 98504-7852.

"Design option" is a design that a manufacturer may use as an option to its design plan.

"Design plan" is a plan for the construction of factory-built temporary worker housing that includes floor plans, elevation drawings, specifications, engineering data, or test results necessary for a complete evaluation of the design. The design plan expires one year after approval or when a new temporary worker housing construction standard becomes effective or the electrical code as adopted by chapter 296-46 WAC adopts a new code. Electrical code changes if minor may be made by submitting an addendum.

"Equipment" is all material, appliances, devices, fixtures, fittings, or accessories used in the manufacture, assembly, installation, or alteration of factory-built temporary worker housing structures.

"Factory assembled structure (FAS) advisory board" is a board authorized to advise the director of the department regarding the issues and adoption of rules relating to factory-built temporary worker housing structures. (See RCW 43.22.420.)

"Factory-built temporary worker housing" is housing designed and constructed to the requirements in chapter 246-359 WAC, "temporary worker housing construction standard" as promulgated by the department of health for human occupancy. The structure which is entirely or substantially prefabricated or assembled at a place other than a building site. (See RCW 43.22.450(3).)

"Insignia" is a label that we attach to a structure to verify that a factory-built temporary worker housing structure meets the requirements of this chapter.

"Install" is to erect or set in place a structure at a building site. It may also be the construction or assembly of a component as part of a factory-built temporary worker housing.

"Listed" is a piece of equipment, a component, or an installation that appears in a list published by a testing or listing agency and is suitable for use in a specified manner.

"Listing agency" is an organization whose business is approving equipment, components, or installations for publication.

"Local enforcement agency" is the department of health with power to enforce regulations governing the installation of factory-built temporary worker housing.

"Manufacturing" is making, fabricating, forming, or assembling a factory-built temporary worker housing structure.

"Repair" is the replacement, addition, modification, or removal of any construction, equipment, system, or installation to correct damage in transit or during on-site installation before occupancy.

"Unit" is a factory-built temporary worker structure.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0020, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0030 How is this chapter enforced?

(1) To enforce this chapter, we or another governmental inspection agency will inspect each factory-built temporary worker housing structure that is sited in Washington. Inspections will be conducted during normal work hours or at other reasonable times. (See WAC 296-150T-0070.)

(2) We will inspect each unit as required by the temporary worker housing construction standard and the electrical code. (See WAC 296-150T-0500.)

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0030, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0040 Will you keep my manufacturing information confidential? We will only release manufacturing information such as design plans, specifications, and test results according to the requirements of the Public Records Act (see RCW 42.17.310 (1)(h)) unless we are ordered to do so by a court or otherwise required by law.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0040, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0050 Can you prohibit the installation of factory-built temporary worker housing structures? (1) We may prohibit the installation of factory-built temporary worker housing structures if they do not conform to the requirements of this chapter. (See RCW 43.22.465.)

(2) If an inspection reveals that a factory-built temporary worker housing structure violates this chapter, we may obtain a temporary injunction enjoining the installation of any non-conforming structure. The injunction may be made permanent at the discretion of the court.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0050, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0070 Do you have reciprocal agreements with other states to inspect factory-built temporary worker housing structures? (1) We may enter into reciprocal agreements with states who have construction standards that are equal to or greater than our standards for factory-built structures.

(2) When we have a reciprocal agreement with another state:

(a) The reciprocal state inspects factory-built temporary worker housing structures manufactured in that state before shipment into Washington to ensure compliance with our laws. After inspection, the reciprocal state applies our insignia.

(b) The department inspects factory-built structures manufactured in Washington before shipment into the reciprocal state to ensure compliance with their laws. After inspection, we apply the insignia of the reciprocal state.

(3) Reciprocal agreements shall remain on file.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0070, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0080 Do you allow a local enforcement agency to inspect factory-built temporary worker housing at the manufacturing location? (1) A local enforcement agency (city or county), under contract with us, can inspect factory-built temporary worker housing. In some cases their contract may be limited to specific portions of an inspection at specified manufacturing locations.

(2) After approving a unit, the local enforcement agency will attach the insignia, which indicates the unit has passed inspection.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0080, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0100 What happens if I disagree with your decision regarding my compliance with this chapter? (1) If we determine you are in violation of this chapter, you will receive a notice of noncompliance.

(2) If you disagree with our decision, you can send us a written request for a hearing, stating why you disagree.

(3) After we receive your hearing request, we will:

(a) Schedule a hearing within thirty days after we receive your request. The hearing and proceedings will be conducted according to the Administrative Procedure Act (chapter 34.05 RCW).

(b) Notify you of the time, date, and place for the hearing. If you fail to appear, your case will be dismissed.

(c) Hear your case.

(d) Send you written notice of our decision.

If you disagree with our decision, you may appeal it under the Administrative Procedure Act (chapter 34.05 RCW).

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0100, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0110 Do you have an advisory board to address factory-built temporary worker housing structure issues? The factory assembled structures (FAS) board advises us on issues relating to structural, plumbing, mechan-

[Title 296 WAC—p. 2188]

ical, electrical, installation, inspections, and rules for factory-assembled structures. (See RCW 43.22.420.)

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0110, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0120 Where can I obtain technical assistance regarding factory-built temporary worker housing structures? We provide field technical service to factory-built temporary worker housing manufacturers for an hourly fee. Field technical service may include an evaluation, consultation, plan examination, interpretation, and clarification of technical data relating to the application of our rules. It does not include inspections.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0120, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0130 How do I register a complaint?

A person who believes that a structure or component does not meet the requirements of this chapter may register a complaint with the department. The complaint must be in writing and must specifically describe the alleged violations of this chapter. Upon receipt of the complaint, the department will forward a copy to the appropriate manufacturer and/or dealer and they shall have thirty days to respond to it. If the department determines that an inspection is necessary, the manufacturer/dealer shall pay the department for the cost of the inspection. The cost of the inspection is based upon the fee schedule in WAC 296-150T-3000 and includes the hourly inspection fee, travel costs and other expenses incurred as a result of the inspection.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0130, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0140 Do you allow the use of alternate materials, alternate design and method of construction? An applicant may apply for the use of alternate materials, alternate design and methods of construction different from the requirements of this chapter by filing a written request with the department.

(1) Responsibilities of applicant. The applicant must submit in writing the following information and sign and date the request.

(a) The applicant's name, address and phone number;

(b) The specific requirement or requirements from which the alternate material, alternate design or method of construction is requested;

(c) Adequate justification that the requirements of this chapter cannot be met without using alternate materials, alternate design or method of construction;

(d) How the use of alternate materials, alternate design or method of construction will achieve the same result as the requirement and any specific alternative measures to be taken to show the alternate provides the same level of protection to life, safety and health as the requirements.

The department has a form that you may use for your request. Contact the department at the address shown in the definition section.

(2) Responsibilities of the department. The department will provide a written response to the applicant within thirty

(2001 Ed.)

days of receipt of the written request. The written response will state the acceptance or denial of the request, including the reasons for the department's decision. At a minimum the department will base its decision based on:

- (a) The applicant's request as described in subsection (1) of this section;
- (b) Research into the request;
- (c) Expert advice.
- (3) Applicant's response to denials. The applicant may appeal the department's decision by following the procedure in WAC 296-150T-0100.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0140, filed 5/28/99, effective 6/28/99.]

INSIGNIA

WAC 296-150T-0200 Who must purchase factory-built temporary worker housing insignia? (1) You must obtain insignia from us for each factory-built temporary worker housing unit sited in Washington state.

(2) You must have an approved design plan and have passed inspection before an insignia can be attached to your factory-built temporary worker housing structure by us or our authorized agent.

(3) If a unit is damaged in transit after leaving the manufacturing location or during an on-site installation, and a repair is necessary, you must purchase a new insignia from us. The new insignia indicates that the unit was repaired.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0200, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0210 What are the insignia requirements? (1) If you are applying for insignia for factory-built temporary worker housing structures you must have your design plan approved and your units inspected and approved by us.

(2) We will attach the insignia after:

- (a) We receive the required forms and fees from you (see WAC 296-150T-3000); and
- (b) Your unit or component has passed final inspection. (See WAC 296-150T-0500.)

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0210, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0220 How do I obtain insignia information and the required forms? Upon request, we will provide you with a packet of information that includes the required forms.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0220, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0230 What are the insignia application requirements? (1) If you are requesting insignia for units that you intend to manufacture under a *new design plan*, your completed application must include:

- (a) A completed design plan approval request form;
- (b) One complete set of design plans, specifications, engineering analysis if required, test procedures and results if

(2001 Ed.)

required, plus one additional set for each manufacturing location where the design plan will be used;

(c) If required, at least one set of design plans must have an original wet stamp from a professional engineer or architect licensed in Washington state. We will retain the set with the original wet stamp; and

(d) A one-time initial filing fee, the design plan fee (if we approve your design plan) and the fee for each insignia. (See WAC 296-150T-3000.)

(2) If you are requesting insignia under an *approved design plan*, your completed application must include:

- (a) A completed application for insignia form; and
- (b) The fee for each insignia requested. (See WAC 296-150T-3000.)

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0230, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0250 How do I replace lost or damaged insignia? (1) If an insignia is lost or damaged after it is attached to your factory-built temporary worker housing structure you may obtain a replacement insignia.

(2) You should contact us and provide the following information:

- (a) Your name, address, and telephone number;
- (b) The name of the manufacturer;
- (c) The serial number;
- (d) The manufacturer number (T#), if available;
- (e) The insignia number, if available; and
- (f) The required fee. (See WAC 296-150T-3000.)

(3) If we can determine that your unit previously had an insignia, we will attach an insignia to your unit once we receive your insignia fee. (See WAC 296-150T-3000.)

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0250, filed 5/28/99, effective 6/28/99.]

DESIGN PLAN

WAC 296-150T-0300 When is design plan approval required? Design plans for factory-built temporary worker housing structures prior to installation at the building site in Washington must be approved when:

- (1) You build a new unit;
- (2) You modify an approved design plan through an addendum; or
- (3) You add options to an approved design plan through an addendum.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0300, filed 5/28/99, effective 6/28/99.]

DESIGN-PLAN APPROVAL

WAC 296-150T-0320 What must I provide with my request for design-plan approval by the department? All requests for design-plan approval must include:

- (1) A completed design-plan approval request form;
- (2) One complete set of design plans, specifications, engineering analysis when required, test procedures and results plus one additional set for each manufacturing loca-

tion where the design plan will be used (see WAC 296-150T-0340 and 296-150T-0350);

(3) If required, at least one set of design plans must have an original wet stamp from a professional engineer or architect licensed in Washington state. All new, renewed, and resubmitted plans, specifications, reports and structural calculations prepared by or prepared under his or her direct supervision shall be signed, dated and stamped with their seal. Specifications, reports, and structural calculations may be stamped only on the first sheet, provided this first sheet identifies all of the sheets that follow are included and identified in the same manner. Plans that have not been prepared by or under the engineer's or architect's supervision shall be reviewed by them and they shall prepare a report concerning the plans reviewed. This report shall:

(a) Identify which drawings have been reviewed by drawing number and date;

(b) Include a statement that the plans are in compliance with current Washington state regulations; and

(c) The report shall be stamped and signed by the reviewer.

Any deficiencies shall be corrected on the drawings before submitting to the department or be included in the report and identify as to how they are to be corrected. This report shall be attached to the plan(s) that were reviewed. We will retain the set with the original wet stamp;

(4) A one-time initial filing fee and the design-plan fee (see WAC 296-150T-3000); and

(5) A "key drawing" to show the arrangement of modules if the plan covers three or more modules.

[Statutory Authority: RCW 43.22.480, 99-12-079, § 296-150T-0320, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0340 What must an engineering analysis for design plans include? (1) The engineering analysis if required must show that the structural design meets the requirements of this chapter.

(2) An engineering analysis if required must be conducted according to accepted engineering practices and must be signed by a professional engineer or architect licensed in Washington state.

[Statutory Authority: RCW 43.22.480, 99-12-079, § 296-150T-0340, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0350 What must the test procedures and results for design plans include? (1) Tests to a design for a factory-built temporary worker housing structure must be witnessed by a professional engineer or architect licensed in Washington state.

(2) Test reports must contain the following items:

(a) A description of the methods or standards that applied to the test;

(b) Drawings and a description of the item tested;

(c) A description of the test set-up;

(d) The procedure used to verify the correct load;

(e) The procedure used to measure each condition;

(f) Test data, including applicable graphs and observations of the characteristics and behavior of the item tested; and

(g) Analysis, comments, and conclusion.

[Title 296 WAC—p. 2190]

(3) The written test procedures, results and conclusions must reference the applicable design plan.

[Statutory Authority: RCW 43.22.480, 99-12-079, § 296-150T-0350, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0380 What happens if you approve my design plan? (1) Your design plan will be approved if it meets the requirements of this chapter.

(2) We will send you an approved copy of the design plan with the design-plan approval number.

(3) You must keep copies of the approved design plan at each location where a factory-built temporary worker housing structure is built.

(4) If your design plan is not approved, you will be notified in writing of plan deficiencies. You may send a corrected design plan to us. (See WAC 296-150T-3000.)

[Statutory Authority: RCW 43.22.480, 99-12-079, § 296-150T-0380, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0390 If my design plan is not approved, how much time do I have to submit a corrected design plan? (1) You have ninety days to correct and resubmit your original design plan and send us the resubmittal fee after we notify you of plan deficiencies. After ninety days, your initial design plan is returned to you.

(2) If you submit your corrected design plan after ninety days, you must send the initial design plan fee instead of the resubmittal fee. (See WAC 296-150T-3000.)

[Statutory Authority: RCW 43.22.480, 99-12-079, § 296-150T-0390, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0400 What happens after my design plan is approved? Once your design plan is approved, we will inspect each related factory-built temporary worker housing structure.

[Statutory Authority: RCW 43.22.480, 99-12-079, § 296-150T-0400, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0410 When does my design plan expire? Your factory-built temporary worker housing design plan expires either one year after approval or when there is a code change. You must submit new design plans for approval when there is a change to the temporary worker housing construction standard. You may use your design plan to order insignia as long as they comply with the applicable codes.

All National Electrical Code amendments may be incorporated by an addendum to your design plan.

[Statutory Authority: RCW 43.22.480, 99-12-079, § 296-150T-0410, filed 5/28/99, effective 6/28/99.]

INSPECTIONS PRIOR TO ISSUANCE OF AN INSIGNIA

WAC 296-150T-0500 When is an inspection required? (1) Before we issue an insignia, each factory-built temporary worker housing structure must be inspected at the manufacturing location as many times as are required by the temporary worker housing construction standard. (See WAC 296-150T-0600.) Inspections may include:

(a) A "cover" inspection during construction of the unit before the electrical, plumbing, mechanical, and structural systems are covered;

(b) Insulation inspection, if installed;

(c) A final inspection after the factory-built temporary worker housing structure is complete;

Note: Each factory-built temporary worker housing structure must have a serial number to enable us to track inspections.

(2) If we discover a violation during inspection, we will issue a notice of noncompliance. You can correct the violation during the inspection. If you cannot correct the violation during inspection, you must leave the item uncovered until we approve your correction.

(3) After a unit is manufactured but before occupancy, we must inspect a factory-built temporary worker housing structure if it is damaged in transit to the building site or during on-site installation. This is considered a repair inspection. (See WAC 296-150T-0540.)

(4) Approved design plans must be available for all inspections.

(5) Once your unit is inspected and approved we will attach the insignia.

Note: We only inspect factory-built temporary worker housing structures before occupancy. After occupancy, the department of health agency is the inspection agency.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0500, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0510 How do I request an inspection? (1) You must contact us, and we will let you know where your request for inspection should be submitted. Our address is noted in the definition of department.

(2) We must receive in-state inspection requests at least seven calendar days prior to the date that you want the inspection.

(3) We must receive out-of-state inspection requests at least fourteen calendar days prior to the date that you want the inspection.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0510, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0520 What happens if my factory-built temporary worker housing structure passes inspection? (1) If your factory-built temporary worker housing structure passes inspection and you have met the other requirements of this chapter, we will attach the insignia.

(2) After our final inspection, we will send a notice to the local enforcement agency (NLEA) indicating whether further inspection is necessary. (See WAC 296-150T-0550.)

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0520, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0530 Am I charged if I request an inspection but I am not prepared? (1) If you ask us to inspect a factory-built temporary worker housing structure within Washington state but you are not prepared when we arrive, you must pay the minimum inspection fee and travel. (See WAC 296-150T-3000.)

(2001 Ed.)

(2) If you ask us to inspect a factory-built home, commercial structure, or component outside Washington state but you are not prepared when we arrive, you must pay the minimum inspection fee, travel, and per diem expenses. (See WAC 296-150T-3000.)

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0530, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0540 Who inspects factory-built temporary worker housing structures for installation at the temporary worker housing site? (1) The department of health must approve the installation.

(2) The department of health may also request a set of design plans and specifications for the unit from you.

(3) After the unit is manufactured but before occupancy, we must inspect a factory-built temporary worker housing structure if it is damaged in transit to the temporary worker housing site or during on-site installation. This is considered a repair inspection.

Note: The department of health may not open the concealed construction of a factory-built temporary worker housing structure to inspect if our insignia is attached.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0540, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0550 Do you notify the department of health after your final inspection of factory-built structures at a manufacturing location? After we perform a final inspection of a factory-built temporary worker housing structure we will send a notice to the department of health that:

(1) Specifies what connections, standards, and incomplete items the department of health must check when the unit is installed; and/or

(2) Estimates the expected time of arrival of the factory-built temporary worker housing structure to the site.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0550, filed 5/28/99, effective 6/28/99.]

USED FACTORY-BUILT STRUCTURES WITHOUT AN INSIGNIA

WAC 296-150T-0580 Must I obtain an insignia for used factory-built structures? All used factory-built housing and commercial structures that are to be for temporary worker housing must have an insignia of approval from us prior to being installed as temporary worker housing.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0580, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0590 How do I obtain insignia for used factory-built structures? We consider used factory-built housing and commercial structures as new structures for purposes of use as temporary worker housing and an insignia approval as temporary worker housing must be obtained. To obtain insignia, you must:

(1) Have the design plan approved by us (see WAC 296-150T-0300 through 296-150T-0480);

[Title 296 WAC—p. 2191]

(2) Purchase insignia (see WAC 296-150T-0200 through 296-150T-0230); and

(3) Pass a unit inspection (see WAC 296-150T-0500 through 296-150T-0550).

Note: You will be required to open up as much of the construction of the unit as is necessary for inspection to show compliance with your approved design plan.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0590, filed 5/28/99, effective 6/28/99.]

CODES FOR FACTORY-BUILT TEMPORARY WORKER HOUSING

WAC 296-150T-0600 What manufacturing codes apply to factory-built temporary worker housing? (1) All design, construction, installations, and alterations of factory-built temporary worker housing structures must conform with the following codes and the requirements of this chapter:

(a) The temporary worker housing construction code, chapter 246-359 WAC;

(b) The National Electrical Code as referenced in chapter 19.28 RCW and in chapter 296-46 WAC.

(2) All construction methods and installations must comply with chapter 246-359 WAC and use accepted engineering practices when used, provide minimum health and safety to the occupants of factory-built temporary worker housing structures and the public, and demonstrate journey person quality of work of the various trades.

(3) Requirements for any size, weight, or quality of material modified by the terms "minimum," "not less than," "at least," and similar expressions are minimum standards. The manufacturer may exceed these standards, provided the deviation does not result in inferior installation or defeat the purpose and intent of the standard.

Note: The codes, RCW's, and WAC's referenced in this rule are available for reference at the Washington State Library, the Washington State Law Library, and may be available at your local library.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0600, filed 5/28/99, effective 6/28/99.]

MANUFACTURER'S NOTICE TO THE DEPARTMENT

WAC 296-150T-0700 Must manufacturers of factory-built temporary worker housing structures notify you if they manufacture at more than one location? (1) If you are manufacturing factory-built temporary worker housing structures at more than one location, approved design plans must be available at each manufacturing location.

(2) You are required to send us the following information for each manufacturing location:

(a) Company name;

(b) Mailing and physical address; and

(c) Phone and FAX number if available.

(3) You must update this information as it changes.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0700, filed 5/28/99, effective 6/28/99.]

[Title 296 WAC—p. 2192]

WAC 296-150T-0710 Must manufacturers of factory-built temporary worker housing structures notify you of a change in business name or address? (1) If you are moving, notify us in writing prior to a change of business name or address.

(2) Your notice must include the change of name and address.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0710, filed 5/28/99, effective 6/28/99.]

WAC 296-150T-0720 Must manufacturers of factory-built temporary worker housing structures notify you of a change in business ownership? (1) When a manufacturer changes ownership, the new owner must notify us in writing immediately.

(2) A new owner may continue to manufacture the units according to a prior approved design plan if the prior owner releases the design plan.

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-0720, filed 5/28/99, effective 6/28/99.]

FACTORY-BUILT TEMPORARY WORKER HOUSING FEES

WAC 296-150T-3000 Factory-built temporary worker housing fees.

WAC 296-150T-3000 TEMPORARY WORKER HOUSING FEES	
INITIAL FILING FEE	\$39.25
DESIGN PLAN FEES:	
INITIAL ONE YEAR DESIGN	\$112.75
RENEWAL FEE	\$39.25
RESUBMIT FEE	\$56.25
ADDENDUM (Approval expires on same date as original plan)	\$56.25
Supplemental submissions of plans (resubmittals, addendums, renewals, code updates, etc.) shall be charged per hour or fraction of an hour*	\$66.50
APPROVAL OF EACH SET OF DESIGN PLANS BEYOND FIRST TWO SETS	\$10.75
DEPARTMENT INSPECTION FEES	
INSPECTION/REINSPECTION (Per hour* plus travel time* and mileage**)	\$56.25
TRAVEL (Per hour*)	\$56.25
PER DIEM**	
HOTEL***	
MILEAGE**	
RENTAL CAR***	
PARKING***	
AIRFARE***	
DEPARTMENT AUDIT FEES:	
AUDIT (Per hour*)	\$56.25
TRAVEL (Per hour*)	\$56.25
PER DIEM**	
HOTEL***	
MILEAGE**	
RENTAL CAR***	
PARKING***	
AIRFARE***	
INSIGNIA FEES:	
FIRST SECTION	\$158.00
EACH ADDITIONAL SECTION	\$15.50
REISSUED-LOST/DAMAGED	\$39.25
OTHER FEES:	
FIELD TECHNICAL SERVICE (Per hour* plus travel time* and mileage**)	\$56.25
NOTIFICATION TO LOCAL ENFORCEMENT AGENCY (NLEA)	\$23.25
PUBLICATION PRINTING AND DISTRIBUTION OF RCW'S AND WAC'S (One free per year)	\$10.75
* Minimum charge of 1 hour; time spent greater than 1 hour is charged in 1/2 hour increments	
** Per state guidelines	
*** Actual charges incurred	

[Statutory Authority: RCW 43.22.480. 99-12-079, § 296-150T-3000, filed 5/28/99, effective 6/28/99.]

Chapter 296-150V WAC

CONVERSION VENDOR UNITS AND MEDICAL UNITS

WAC

- 296-150V-0010 Authority, purpose, and scope.
- 296-150V-0020 What definitions apply to this chapter?
- 296-150V-0030 How is this chapter enforced?
- 296-150V-0040 Is manufacturing information kept confidential?
- 296-150V-0050 Can you prohibit the sale or lease of a conversion vendor unit or medical unit?

- 296-150V-0060 Who handles consumer complaints about conversion vendor units or medical units?
- 296-150V-0070 Do you have reciprocal agreements with other states to inspect conversion vendor units and medical units?
- 296-150V-0080 Do you allow a local enforcement agency to inspect conversion vendor units and medical units at the manufacturing location?
- 296-150V-0100 What happens if I disagree with your decision regarding my compliance with this chapter?
- 296-150V-0110 Do you have an advisory board to address conversion vendor unit and medical unit issues?
- 296-150V-0120 Where can I obtain technical assistance regarding conversion vendor units or medical units?
- 296-150V-0140 Do you allow the use of alternate materials, design, or method of construction?
- 296-150V-0200 Who must obtain conversion vendor unit or medical unit insignia?

296-150V-0210	What are the insignia requirements?	296-150V-1410	What are the electrical bonding requirements for gas piping in a conversion vendor unit or medical unit?
296-150V-0220	How do I obtain insignia information and the required forms?	296-150V-1420	How are gas supply connections in a conversion vendor unit or medical unit identified?
296-150V-0230	What are the insignia application requirements?	296-150V-1430	What requirements apply to gas piping system openings?
296-150V-0240	What documentation do you need to perform an alteration inspection?	296-150V-1440	Are gas piping shut-off valves required in a conversion vendor unit or medical unit?
296-150V-0250	How do I replace lost or damaged insignia?	296-150V-1450	What requirements apply to testing for gas piping leaks before conversion vendor unit or medical unit appliances are connected?
296-150V-0300	When is design-plan approval required?	296-150V-1460	What requirements apply to testing for gas piping leaks after conversion vendor unit or medical unit appliances are connected?
296-150V-0310	Who can approve design plans?	296-150V-1470	What are the requirements for appliance installations?
296-150V-0320	What must I provide with my request for conversion vendor unit or medical unit design-plan approval by the department?	296-150V-1530	What general plumbing requirements apply?
296-150V-0340	When is an engineering analysis or structural load test for design plans required?	296-150V-1540	What are the plumbing definitions?
296-150V-0350	What must test procedures and results for design plans include?	296-150V-1550	What requirements apply to drain outlets?
296-150V-0380	What happens if you approve my design plan?	296-150V-1560	What is the minimum clearance for drain outlets?
296-150V-0390	If my design plan is not approved, how much time do I have to submit a corrected design plan?	296-150V-1570	What requirements apply to water-supply connections?
296-150V-0400	What happens after my design plan is approved?	296-150V-1580	What requirements apply to water heater relief valves and safety devices?
296-150V-0410	When does my design plan expire?	296-150V-1590	What requirements apply to waste holding tanks for conversion vendor units?
296-150V-0415	Who approves addendums to design plans?	296-150V-3000	Conversion vendor units and medical units—Fees.
296-150V-0500	When is an inspection required?		
296-150V-0510	How do I request an inspection?		
296-150V-0520	What happens if my conversion vendor unit or medical unit passes inspection?		
296-150V-0530	Am I charged if I request an inspection but I am not prepared?		
296-150V-0540	Who inspects a conversion vendor unit or medical unit installation at the building site or event location?		
296-150V-0550	Do you allow a conversion vendor unit or medical unit to be completed at the installation site?		
296-150V-0560	What happens if I receive a notice of noncompliance after inspection of the alteration to my conversion vendor unit or medical unit?		
296-150V-0580	Must I obtain an insignia for used conversion vendor units or medical units?		
296-150V-0590	How do I obtain insignia for used conversion vendor units or medical units?		
296-150V-0700	Must manufacturers of conversion vendor units and medical units notify you if they manufacture at more than one location?		
296-150V-0710	Must manufacturers of conversion vendor units and medical units notify you of a change in business name or address?		
296-150V-0720	Must manufacturers of conversion vendor units and medical units notify you of a change in business ownership?		
296-150V-0800	What manufacturing codes apply to conversion vendor units or medical units?		
296-150V-0930	When are structural load tests or structural calculations required?		
296-150V-0950	What requirements apply to roof coverings?		
296-150V-1040	Are there floor requirements?		
296-150V-1070	What requirements apply to floor closure material?		
296-150V-1090	What are the standards for equipment and installations?		
296-150V-1100	What are the flame-spread limitations?		
296-150V-1110	Combustible limitations.		
296-150V-1120	What are the standards for wall and cabinet protection?		
296-150V-1170	What are the light and ventilation requirements?		
296-150V-1180	What requirements apply to conversion vendor unit exits on all units approved after December 31, 1999?		
296-150V-1185	What exit door requirements apply to self-propelled medical unit exits?		
296-150V-1190	Interior privacy locks.		
296-150V-1220	What code and installation requirements apply to conversion vendor unit or medical unit electrical systems?		
296-150V-1303	How must storage batteries be installed in a conversion vendor unit or medical unit?		
296-150V-1330	What are the mechanical requirements for a conversion vendor unit or medical unit?		
296-150V-1350	What are the LPG system enclosure and mounting requirements for a conversion vendor unit or medical unit?		
296-150V-1360	What are the fuel gas piping design requirements for a conversion vendor unit or medical unit?		
296-150V-1380	Can gas tubing be concealed in a conversion vendor unit or medical unit?		
296-150V-1390	What are the pipe-joint compound requirements for gas piping in a conversion vendor unit or medical unit?		
296-150V-1400	What are the gas piping hanger and support requirements for a conversion vendor unit or medical unit?		

WAC 296-150V-0010 Authority, purpose, and scope.

(1) This chapter is authorized by RCW 43.22.340 through 43.22.434 covering the construction, alteration, and approval of conversion vendor units and medical units sold, leased, or used in Washington state.

(2) This chapter applies to the approval of conversion vendor unit and medical unit manufacturers, dealers, and to any person who manufactures or alters the plumbing, mechanical, or electrical system of a conversion vendor unit or medical unit.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0010, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0020 What definitions apply to this chapter? "Alteration" is the replacement, addition, modification, or removal of any equipment or installation that affects the construction for concentrated floor loads, fire and life safety, or the plumbing, mechanical, and electrical systems of a conversion vendor unit or medical unit.

The following are not considered alterations:

- Repairs with approved parts;
- Modifications of a fuel-burning appliance according to the listing agency's specifications; or
- Adjustment and maintenance of equipment.

"Approved" is approved by the department of labor and industries.

"Consumer" is a person or organization, excluding a manufacturer or dealer of conversion vendor units or medical units, who buys or leases a conversion vendor unit or medical unit.

"Conversion vendor unit" means a motor vehicle or other structure that has been converted or built for the purpose of being used for commercial sales at temporary locations. The units must be 8 feet 6 inches or less in width (exterior floor measurement) in the set-up position, and the inside working area must be less than 40 feet in length (interior floor measurement). Conversion vendor units:

- Are transported in only one section;
- Are designed for highway use;

- Are temporarily occupied for distribution of items, e.g., food;
- Are built on a permanent chassis; and
- Include at least one of the following systems: Plumbing, mechanical or 120 and/or 240 volt electrical.

"Damaged in transit" means damage that affects the integrity of a concentrated floor load design or any of the systems.

"Dealer" is a person, company, or corporation whose business is leasing, selling, offering for lease or sale, buying, or trading conversion vendor units, or medical units.

"Department" is the department of labor and industries. The department may be referred to as "we" or "us" in this chapter. Note: You may contact us at: Department of Labor and Industries, Specialty Compliance, P.O. Box 44440, Olympia, WA 98504-4440.

"Design plan" is a plan for the construction or alteration of a conversion vendor unit or medical unit or conversion of a vehicle to a conversion vendor unit or medical unit including floor plans, specifications, or test results necessary for a complete evaluation of the design, if applicable.

"Design option" is a design that a manufacturer may use as an option to its conversion vendor unit or medical unit design plan.

"Equipment" is all material, appliances, devices, fixtures, fittings, or accessories used in the manufacture, assembly, conversion to, or alteration of a conversion vendor unit or medical unit.

"Factory assembled structure (FAS) advisory board" is a board authorized to advise the director of the department regarding the issues and adoption of rules relating to conversion vendor units and medical units.

"Insignia" is a label that we attach to a conversion vendor unit or medical unit to verify that the structure meets the requirements of this chapter and the applicable codes.

"Install" is to erect, construct, assemble, or set a conversion vendor unit or medical unit in place.

"Labeled" is to bear the department's insignia.

"Listed" is a piece of equipment or apparatus that has been approved by a testing agency to the appropriate standard.

"Local enforcement agency" is an agency of city or county government with power to enforce local regulations governing the installation of a conversion vendor unit or medical unit.

"Medical unit" is a type of self-propelled unit used to provide medical examinations, treatments, and medical and dental services or procedures, not including emergency response vehicles, and which:

- Is transportable;
- Is temporarily placed and used;
- Is built on a permanent chassis;
- Includes at least one system;
- Is for temporary use only.

"One-year design plan" is a design plan that expires one year after approval or when a new state building code has been adopted.

(2001 Ed.)

"System" is part of a conversion vendor unit or medical unit designed to serve a particular function. Examples include plumbing, electrical, or mechanical systems.

"Temporary locations" means a maximum of thirty days on a site.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0020, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0030 How is this chapter enforced?

(1) To enforce this chapter, we or another governmental inspection agency will inspect each conversion vendor unit or medical unit manufactured, sold, leased, or used in Washington state as required by this chapter.

(2) We will inspect all alterations.

(3) We will conduct inspections during normal work hours or at other reasonable times.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0030, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0040 Is manufacturing information kept confidential? We will only release manufacturing information such as design plans, specifications, and test results according to the requirements of the Public Records Act (see RCW 42.17.310 (1)(h)) unless we are ordered to do so by a court or otherwise required by law.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0040, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0050 Can you prohibit the sale or lease of a conversion vendor unit or medical unit? (1) We may prohibit the sale or lease of your conversion vendor unit or medical unit because it is unlawful for any person to sell, lease, or offer for sale a conversion vendor unit or medical unit within this state if it violates any of the requirements of this chapter.

(2) If an inspection reveals that a conversion vendor unit or medical unit violates this chapter, we may post a notice prohibiting the sale or lease of a conversion vendor unit or medical unit.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0050, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0060 Who handles consumer complaints about conversion vendor units or medical units?

(1) Consumers may file complaints within one year of the date of manufacture.

(2) The complaint should be in writing and describe the item(s) that may not comply with this chapter.

(3) After we receive the complaint, we will send the manufacturer and the dealer a copy of the complaint.

(4) The manufacturer and/or dealer have thirty days to respond. We will base our actions on the response.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0060, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0070 Do you have reciprocal agreements with other states to inspect conversion vendor units and medical units? (1) We will enter into reciprocal agree-

ments with states that have inspection standards equal or greater than our standard.

(2) When we have a reciprocal agreement with another state:

(a) The reciprocal state inspects the conversion vendor units and medical units manufactured in that state before shipment into Washington to ensure compliance with our laws. After inspection, the reciprocal state applies our insignia.

(b) The department inspects conversion vendor units and medical units manufactured in Washington before shipment into the reciprocal state to ensure compliance with their laws. After inspection, we apply the insignia of the reciprocal state.

(3) We have reciprocal agreements on file.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0070, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0080 Do you allow a local enforcement agency to inspect conversion vendor units and medical units at the manufacturing location? (1) A local enforcement agency (city or county), under contract with us, can inspect conversion vendor units and medical units. In some cases, another agency's contracts may be limited to specific portions of an inspection at specified manufacturing locations.

(2) After approving a unit, the local enforcement agency will attach the insignia which indicates that the unit has passed inspection.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0080, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0100 What happens if I disagree with your decision regarding my compliance with this chapter? (1) If we determine that you are in violation of this chapter, you will receive a notice of noncompliance.

(2) If you disagree with our decision, you can send us a written request for a hearing, stating why you disagree.

(3) After we receive your hearing request, we will:

(a) Schedule a hearing within thirty days after we receive your request;

(b) Notify you of the time, date, and place for the hearing. If you fail to appear, your case will be dismissed;

(c) Hear your case;

(d) Send written notice of our decision to you.

(4) If you disagree with our decision, you may appeal it under the Administrative Procedure Act, chapter 34.05 RCW.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0100, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0110 Do you have an advisory board to address conversion vendor unit and medical unit issues? The factory assembled structures (FAS) board advises us on issues relating to plumbing, mechanical, electrical, inspections, and rule adoption for conversion vendor units and medical units. (See RCW 43.22.420.)

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0110, filed 8/31/99, effective 10/1/99.]

[Title 296 WAC—p. 2196]

WAC 296-150V-0120 Where can I obtain technical assistance regarding conversion vendor units or medical units? We offer field technical service to conversion vendor unit and medical unit manufacturers for an hourly fee. (See WAC 296-150V-3000.) Field technical service may include evaluation, consultation, plan examination, interpretation, and clarification of technical data relating to the application of our rules. It does not include inspections.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0120, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0140 Do you allow the use of alternate materials, design, or method of construction? An applicant may apply for the use of alternate materials, design, or methods of construction different from the requirements of this chapter by filing a written request with the department.

(1) **Responsibilities of the applicant.** The applicant must submit in writing the following information:

(a) Name, address, and phone number;

(b) The specific requirement or requirements from which the alternate material, design, or method of construction is requested;

(c) Justification that the requirements of this chapter cannot be met without using alternate materials, design, or method of construction;

(d) How the use of alternate materials, design, or method of construction will achieve the same result as the requirement and any specific alternative measures to be taken to show the alternate provides the same level of protection to life, safety and health as the requirements;

The department has a form that you may use for your request. Please contact us at the address shown in WAC 296-150V-0020, Definitions.

(2) **Responsibilities of the department.** The department will provide a written response to the applicant within thirty days of receipt of the written request. The written response will state the acceptance or denial of the request, including the reasons for the department's decision. At a minimum the department will base its decision on:

(a) The applicant's request as described in subsection (1) of this section;

(b) Research into the request;

(c) Expert advice.

(3) **Applicant's response to denials.** The applicant may appeal the department's decision by following the procedure in WAC 296-150V-0100.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150V-0140, filed 8/22/00, effective 9/30/00. Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0140, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0200 Who must obtain conversion vendor unit or medical unit insignia? (1) You must obtain an insignia from us for each conversion vendor unit or medical unit manufactured, sold, leased, or used in Washington state.

(2) You do not need an insignia for a conversion vendor unit or medical unit:

(a) When a unit has been used outside of the state for six months before being brought into Washington state (see RCW 43.22.380); or

(b) If a unit was manufactured prior to July 1, 1968. (See RCW 43.22.370.)

(3) You must obtain an insignia when conversion vendor units or medical units are altered in Washington state.

(4) You must obtain an alteration insignia when a conversion vendor unit or medical unit is damaged in transit after leaving the manufacturing location or during an on-site installation and an alteration or repair is necessary. The insignia indicates the conversion vendor unit or medical unit was altered or repaired.

(5) You must have an approved design plan and pass our inspection before we will attach an insignia.

Note: All conversion vendor units and medical units must have insignia if they are altered; this includes the exceptions in subsection (2)(a) and (b) of this section.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0200, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0210 What are the insignia requirements? (1) If you are applying for insignia, you must have your design plan approved and your conversion vendor unit or medical unit inspected and approved by us.

(2) If you are a manufacturer, dealer, or owner applying for an alteration insignia, your alteration must be inspected and approved by us. Approval of the design plan may also be required.

(3) We will attach the insignia to your conversion vendor unit or medical unit after:

(a) We receive from you the required forms and fees listed in WAC 296-150V-3000; and

(b) Your conversion vendor unit or medical unit has passed final inspection.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0210, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0220 How do I obtain insignia information and the required forms? Upon request, we will provide you with a packet of information that includes the required forms. Our address is noted in the definition of "department" in WAC 296-150V-0020.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0220, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0230 What are the insignia application requirements? (1) If you are requesting insignia for conversion vendor units or medical units that you intend to manufacture under a new design plan, your completed application must include:

(a) A completed design plan approval request form;

(b) One complete set of design plans, specifications, engineering analysis and test procedures and results (when applicable), plus one additional set for each manufacturing location where the design plan will be used;

(c) At least one set of design plans must have an original wet stamp from a professional engineer or architect licensed in Washington state. We will retain the set with the original wet stamp; and

(2001 Ed.)

(d) A one-time initial filing fee, the design plan fee, and the fee for each insignia (see WAC 296-150V-3000).

(2) If you are requesting insignia under an approved design plan, your completed application must include:

(a) A completed insignia application form; and

(b) The fee for each conversion vendor unit or medical unit insignia (see WAC 296-150V-3000).

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0230, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0240 What documentation do you need to perform an alteration inspection? If you alter a conversion vendor unit or medical unit, we must inspect the alteration.

(1) Before we perform an alteration inspection and attach an alteration insignia, you must send us:

(a) Description of the proposed alteration;

(b) The plan review fee;

(c) The inspection fee; and

(d) The insignia application and fee.

(2) A design plan review is not required if the alteration can be made without altering any of the existing structure.

Note: All fees are listed in WAC 296-150V-3000 at the end of this chapter.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0240, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0250 How do I replace lost or damaged insignia? (1) If an insignia is lost or damaged after it is placed on a conversion vendor unit or medical unit, you may obtain a replacement insignia by contacting us and providing the following:

(a) Your name, address, and telephone number;

(b) The name of the manufacturer or person converting the conversion vendor unit or medical unit;

(c) The serial number;

(d) The manufacturer number (V#) if available;

(e) The insignia number if available;

(f) The required fee from WAC 296-150V-3000; and

(2) If we can determine that your unit previously had an insignia, we will:

(a) Perform an inspection to ensure that no unauthorized remodeling has occurred; and

(b) Attach an insignia to your unit once we receive your insignia fee listed in WAC 296-150V-3000.

Note: If unauthorized remodeling has occurred see WAC 296-150V-0200.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0250, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0300 When is design-plan approval required? Design plans for conversion vendor units and medical units are required for units that are sold, leased, or used in Washington state and must be approved when:

(1) You build a new unit;

(2) You modify an approved design plan through addendums;

(3) You add options to an approved design plan through addendums.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0300, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0310 Who can approve design plans? Your design plan must be approved by the department.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0310, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0320 What must I provide with my request for conversion vendor unit or medical unit design-plan approval by the department? (1) All requests for design-plan approval must include:

- (a) A completed design-plan approval request form;
- (b) Two sets of design plans, specifications and test results and procedures necessary for a complete evaluation of the design;
- (c) Receipt of the design-plan fee listed in WAC 296-150V-3000;
- (d) Receipt of the initial design-plan filing fee and the initial design-plan fee.

(2) If a structural analysis or test is required for a concentrated floor load, at least one set of design plans must have an original wet stamp from a professional engineer or architect licensed in Washington state. All new, renewed, and resubmitted plans, specifications, reports and structural calculations prepared by or prepared under the engineer or architect's direct supervision shall be signed, dated and stamped with his or her seal. Specifications, reports, and structural calculations may be stamped only on the first sheet, provided this first sheet identifies all of the sheets that follow are included and identified in the same manner. Plans that have not been prepared by or under the engineer's or architect's supervision shall be reviewed and he or she must prepare a report concerning the plans. This report must:

- (a) Identify which drawings have been reviewed by drawing number and date;
 - (b) Include a statement that the plans are in compliance with current Washington state regulations; and
 - (c) Be stamped and signed by the reviewer.
- (3) Any deficiencies shall be corrected on the drawings before submitting to the department or be included in the report and identify as to how they are to be corrected. This report shall be attached to the plan(s) that were reviewed. We will retain the set with the original wet stamp.

(4) All plans required by WAC 296-46-140, plan review for health care facilities, require a separate electrical plan review and electrical plan review fees (see fees in WAC 296-150V-3000).

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0320, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0340 When is an engineering analysis or structural load test for design plans required? An engineering analysis or structural load test may be required when there are concentrated loads of 500 pounds or more in a 16 square feet or less area.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0340, filed 8/31/99, effective 10/1/99.]

[Title 296 WAC—p. 2198]

WAC 296-150V-0350 What must test procedures and results for design plans include? (1) Test to a design must be witnessed by a professional engineer or architect licensed in Washington or by a department employee.

- (2) Test reports must contain the following items:
 - (a) A description of the methods or standards that applied to the test;
 - (b) Drawings and a description of the item tested;
 - (c) A description of the test set-up;
 - (d) The procedure used to verify the correct load;
 - (e) The procedure used to measure each condition;
 - (f) Test data, including applicable graphs and observations of the characteristics and behavior of the item tested; and
 - (g) Analysis, comments, and conclusion.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0350, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0380 What happens if you approve my design plan? (1) Your design plan will be approved if it meets the requirements of this chapter.

(2) We will send you an approved copy of the design plan with the design-plan approval number.

(3) You must keep copies of the approved design plan available for inspection at each location where the conversion vendor unit or medical unit is built.

(4) If your design plan is not approved, you will be notified in writing of plan deficiencies. You may send a corrected design plan to us along with the resubmittal fee listed in WAC 296-150V-3000.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0380, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0390 If my design plan is not approved, how much time do I have to submit a corrected design plan? (1) You have ninety days to correct and resubmit your original design plan and send us the resubmittal fee after we notify you of plan deficiencies. After ninety days, your initial design plan is returned to you.

(2) If you submit your corrected design plan after ninety days, the initial design-plan fee is required instead of the resubmittal fee. (See WAC 296-150V-3000.)

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0390, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0400 What happens after my design plan is approved? Once your design plan is approved, we will inspect each conversion vendor unit and medical unit.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0400, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0410 When does my design plan expire? (1) Your conversion vendor unit or medical unit one-year design plan expires either one year after approval or when there is an electrical code change. You must submit new design plans for approval when there is a state building code cycle change. You may use your design plans to order insignia as long as they comply with the applicable codes.

(2001 Ed.)

(2) All National Electrical Code (NEC) amendments may be incorporated by an addendum to your design plan.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0410, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0415 Who approves addendums to design plans? Any addendums to a design plan must be approved by the department.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0415, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0500 When is an inspection required? (1) Before we issue an insignia, each unit manufactured or converted must be inspected as many times as required to show compliance with this chapter.

(2) Before we issue an insignia, a conversion vendor unit or medical unit must be inspected at the manufacturing location as many times as required. Inspections may include, but are not limited to:

(a) A "cover" inspection during construction of the unit before the electrical, plumbing, mechanical, and structural systems (if required) are covered;

(b) Insulation and vapor barrier inspection, if required; and

(c) A final inspection after the conversion vendor unit or medical unit is complete.

(3) If we discover a violation during inspection, we will issue a notice of noncompliance. You can correct the violation during the inspection. If you cannot correct the violation during inspection, you must leave the item uncovered until we approve your correction.

(4) If a conversion vendor unit or medical unit is damaged in transit to the building site or during on-site installation, it must be inspected. This is considered an alteration inspection. (See WAC 296-150V-0240.)

(5) Approved plans must be available.

(6) Once your unit is inspected and approved we will attach the insignia. Before we issue an insignia, each conversion vendor unit or medical unit is inspected as follows:

(a) Inspection(s) during conversion or alteration of a conversion vendor unit or medical unit; and

(b) A final inspection after the conversion vendor unit or medical unit is complete.

Note: Each conversion vendor unit or medical unit must have a serial number so we can track inspections.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0500, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0510 How do I request an inspection? You must contact us and we will let you know where your request for inspection should be submitted. Our address is noted in the definition of department in WAC 296-150V-0020.

(1) We must receive in-state inspection requests at least seven calendar days prior to the date that you want the inspection.

(2) We must receive out-of-state inspection requests at least fourteen calendar days prior to the date that you want the inspection.

(2001 Ed.)

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0510, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0520 What happens if my conversion vendor unit or medical unit passes inspection? If your conversion vendor unit or medical unit passes inspection and you have met the other requirements of this chapter, we will attach the insignia.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0520, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0530 Am I charged if I request an inspection but I am not prepared? (1) If you ask us to inspect a conversion vendor unit or medical unit within Washington state but you are not prepared when we arrive, you must pay the inspection fee and travel (see WAC 296-150V-3000).

(2) If the inspection is outside of Washington state and you are not prepared, you must pay the inspection fee, travel, and per diem expenses (see WAC 296-150V-3000).

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150V-0530, filed 8/22/00, effective 9/30/00. Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0530, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0540 Who inspects a conversion vendor unit or medical unit installation at the building site or event location? The local enforcement agency (city or county) must approve the installation. Alterations to conversion vendor units or medical units must be inspected and approved by us.

Note: The local enforcement agency may not open the concealed construction of a conversion vendor unit or medical unit to inspect it if our insignia is attached.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0540, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0550 Do you allow a conversion vendor unit or medical unit to be completed at the installation site? No. Conversion vendor units or medical units must be completed at the manufacturing location before an insignia is attached.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0550, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0560 What happens if I receive a notice of noncompliance after inspection of the alteration to my conversion vendor unit or medical unit? (1) If your conversion vendor unit or medical unit alteration does not pass our inspection, you will receive a notice of noncompliance. The notice of noncompliance explains what items must be corrected.

(2) You have twenty days after receiving the notice of noncompliance to send us a written response to explain how you will correct the violations.

(3) You are not allowed to sell, lease, offer for sale or use the altered conversion vendor unit or medical unit until you correct the violations. We must inspect and approve the cor-

rections, and you must pay any required inspection and insignia fees listed in WAC 296-150V-3000.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0560, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0580 Must I obtain an insignia for used conversion vendor units or medical units? All used conversion vendor units or medical units that are to be installed on a building site or used in Washington state must have an insignia of approval from us, with the exception of those in WAC 296-150V-0200(2).

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0580, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0590 How do I obtain insignia for used conversion vendor units or medical units? We consider used conversion vendor units and medical units as new units for purposes of insignia approval. To obtain insignia, you must:

- (1) Have the design plan approved (see WAC 296-150V-0300 and 296-150V-0320);
- (2) Purchase insignia (see WAC 296-150V-0200 through 296-150V-0230); and
- (3) Pass a unit inspection (see WAC 296-150V-0500 through 296-150V-0560).

Note: You will be required to open up as much of the construction of the unit as is necessary for inspection to show compliance with your approved design plan.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0590, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0700 Must manufacturers of conversion vendor units and medical units notify you if they manufacture at more than one location? (1) If you are manufacturing conversion vendor units and medical units at more than one location, approved design plans must be available at each manufacturing location.

(2) You must send us the following information for each manufacturing location:

- (a) Company name;
 - (b) Mailing and physical address; and
 - (c) Phone and FAX number, if available.
- (3) You must update this information as it changes.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0700, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0710 Must manufacturers of conversion vendor units and medical units notify you of a change in business name or address? If you are moving you must notify us in writing prior to a change of business name or address and include the change of name and address.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0710, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0720 Must manufacturers of conversion vendor units and medical units notify you of a change in business ownership? (1) When a manufacturer changes ownership, the new owner must notify us in writing immediately.

[Title 296 WAC—p. 2200]

(2) A new owner may continue to manufacture the units according to a prior approved design plan if the prior owner provides written releases of the design plan.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0720, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0800 What manufacturing codes apply to conversion vendor units or medical units? (1) A conversion vendor unit or medical unit must comply with the following codes where applicable:

(a) The Uniform Mechanical Code, with the amendments made by the Washington State Building Code Council, chapter 51-42 WAC;

(b) The National Electrical Code as referenced in chapter 19.28 RCW and chapter 296-46 WAC, installing electric wires and equipment;

(c) The Uniform Plumbing Code 1997 edition with the amendments under chapter 19.27 RCW;

(d) The Washington State Building Code Council, chapter 51-40 WAC, Uniform Building Code, Chapter 11, Accessibility as applies to the exterior of the unit relating to customer service facilities in section 1105.4.7; and

(e) The Washington State Energy Code, chapter 51-11 WAC, and the Washington State Ventilation and Indoor Air Quality Code, chapter 51-13 WAC, when heating and/or air conditioning is installed.

(2) Provide minimum health and safety to the occupants of conversion vendor units and medical units and the public, and demonstrate journeyman quality of work of the various trades.

(3) Requirements for any size, weight, or quality of material modified by the terms "minimum," "not less than," "at least," and similar expressions are minimum standards. The conversion vendor unit or medical unit may exceed these rules provided the deviation does not result in inferior installation or defeat the purpose and intent of this chapter.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0800, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0930 When are structural load tests or structural calculations required? (1) A structural analysis is required when a unit has a concentrated floor load of 500 pounds or more in a 16 square feet or less area.

(2) The structural load test can be used as an alternative.

(a) A structural assembly tested for qualification must sustain the design dead load plus the superimposed design live loads for vendor units and medical units assembly.

(b) An assembly failure is defined as a rupture, fracture, or residual deflection which is greater than the limits.

Note: We will provide test procedure forms upon request.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0930, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-0950 What requirements apply to roof coverings? (1) The roof covering must be securely fastened in an approved manner to the supporting roof construction and must provide weather protection for the vendor unit and the occupants.

(2) Exterior covering materials, including metal coverings, must be moisture and weather resistant and contain corrosion resistant fasteners to prevent wind and rain deterioration.

Note: Electro-plated, electro-deposited zinc, and electro-galvanized staples are not considered corrosion-resistant materials.

(3) All exterior openings or penetrations into the conversion vendor unit or medical unit around piping, ducts, plenums, or vents must be sealed with moisture-resistant material.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-0950, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1040 Are there floor requirements?

Wood floors must be made moisture resistant by an overlay of nonabsorbent material applied with water-resistant adhesive.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1040, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1070 What requirements apply to floor closure material? (1) Floor closure material around piping, ducts, plenums, or vents must prevent damage to the underside of the vendor unit due to air, water, insects, dust, and be rodent resistant.

(2) The floor closure material must meet ASTM D-781 standard or equal and be installed as follows:

(a) Fibrous material (with or without patches) must meet or exceed the level of 48 inch-pounds of puncture resistance as tested.

(b) Patching material must be installed according to installation instructions furnished by the supplier of the material.

(c) The material must be suitable for patches and the patch life must be equivalent to the material life.

Note: ASTM D-781 is a puncture test for bottom board materials.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1070, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1090 What are the standards for equipment and installations? (1) The manufacturer's equipment and installation specifications must be followed. Other approved standards are acceptable when:

(a) Installed according to the manufacturer's installation instructions; and

(b) Approved by a listing or testing agency.

(2) No solid fuel (e.g., charcoal) appliances may be installed in a conversion vendor unit or medical unit.

Note: Gas furnaces, gas water heaters, and gas refrigerators must be sealed combustion or completely separated from the interior of the conversion vendor unit or medical unit.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1090, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1100 What are the flame-spread limitations? The flame-spread requirements are that all walls and ceilings must be of 200 flame-spread or less.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1100, filed 8/31/99, effective 10/1/99.]

(2001 Ed.)

WAC 296-150V-1110 Combustible limitations. (1)

The exposed wall adjacent to the cooking range must be 50 flame-spread or less, such as 5/16 inch gypsum board or material having equivalent fire protective properties.

(2) All openings for pipes and vents in furnace and water heater spaces shall be tight-fitted or fire-stopped.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1110, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1120 What are the standards for wall and cabinet protection? The bottom and sides of combustible cabinets over cooking appliances or tops including a space of 6 inches from the edge of the burners must be protected with at least 5/16 inch sheetrock with a 25 flame-spread. This material must be behind deep-fat fryers, grills, ranges, and other cooking appliances. It must extend 6 inches beyond the edge of the appliance and range hood.

(1) Range hoods for commercial equipment must meet the requirements of the mechanical code such as fire suppression, etc.

(2) Range hoods for noncommercial equipment may be of a residential type.

(3) The hood must be centered over and at least as wide as the top of the cooking appliance.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1120, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1170 What are the light and ventilation requirements? Each bathroom must be provided with artificial light and with a window having at least 1/2 square feet of glazed area that can be fully opened, except where a mechanical ventilation system is installed. Any mechanical ventilation system must exhaust directly to the outside of the conversion vendor unit or medical unit.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1170, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1180 What requirements apply to conversion vendor unit exits on all units approved after December 31, 1999? At least one conversion vending unit exit or medical unit exit must meet the following requirements:

(1) Exterior doors must be constructed for exterior use.

(2) The exterior door must be at least a 28 inch wide clear opening by 72 inches high.

(3) Locks must be operable from the interior of the unit without use of a key.

(4) Exit doors may either be hinged or sliding. Roll-up doors may not be used to meet the requirements of this section.

(5) Existing units with doors less than 28 inches in width must have a second means of exit. The second means of exit for converted units shall be 24 inches by 17 inches, and for newly built units exits must be a minimum of 5 square feet of openable area.

Exception: When there are employees, a minimum of 28 inches clear opening must be provided.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150V-1180, filed 8/22/00, effective 9/30/00.]

Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1180, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1185 What exit door requirements apply to self-propelled medical unit exits? Exit door(s) on self-propelled medical units must meet the following requirements:

- (1) Exterior doors must be constructed for exterior use.
- (2) The exterior door must be at least a 28 inches wide clear opening by 72 inches high.
- (3) Locks must be operable from the interior of the unit without use of a key.
- (4) Exit doors may either be hinged or sliding. Roll-up doors may not be used to meet the requirements of this section.
- (5) Units over 24 feet in length must have a minimum of 2 exit doors.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1185, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1190 Interior privacy locks. If a conversion vendor unit or medical unit has an interior door, such as a bathroom door, which has a privacy lock, the lock must contain an emergency release. The emergency release must be on the outside to permit entry when the door is locked from the inside.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1190, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1220 What code and installation requirements apply to conversion vendor unit or medical unit electrical systems? The electrical system in any conversion vendor unit or medical unit must comply with Article 551 of the National Electrical Code (NEC) as referenced in chapter 19.28 RCW and the following:

- (1) Appliances must be installed per Articles 422, Appliances.
- (2) Generators must be installed per Article 445, Generators.
- (3) On a 120 volt system a 3-wire system can be used. On a 240 volt system a 4-wire system must be used.

Exception: Sign circuits required by Article 600 will not be required.

[Statutory Authority: RCW 43.22.340, 43.22.350, 43.22.355, 43.22.360, 43.22.400, 43.22.432, 43.22.433, 43.22.434, 43.22.450, 43.22.480, and 43.22.485. 00-17-148, § 296-150V-1220, filed 8/22/00, effective 9/30/00. Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1220, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1303 How must storage batteries be installed in a conversion vendor unit or medical unit? Storage batteries subject to the provisions of this standard must be securely attached to the conversion vendor unit or medical unit. They must be installed in an area which is vapor-tight to the interior and ventilated directly to the exterior of the unit. When batteries are installed in a compartment, the compartment must be ventilated with openings of not less than 2 square inches at the top and 2 square inches at the bottom. Batteries must not be installed in a compartment containing spark or flame producing equipment, except in an

engine generator compartment if the only charging source is the generator itself.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1303, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1330 What are the mechanical requirements for a conversion vendor unit or medical unit? When mechanical and ventilation equipment is installed in or on a conversion vendor unit or medical unit, it must be installed according to the requirements of the Uniform Mechanical Code, and to the conditions of the equipment approval or listing.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1330, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1350 What are the LPG system enclosure and mounting requirements for a conversion vendor unit or medical unit? (1) LPG containers must not be installed, nor stored temporarily, inside any unit. Exception: This prohibition does not apply to completely self-contained hand torches, lanterns, or similar equipment with containers having a maximum water capacity of two and one-half pounds (approximately one pound LPG capacity).

(2) Containers, control valves and regulating equipment, when installed, must meet one of the following requirements:

(a) Be mounted on the "A" frame and not lower than the bottom of the trailer frame; or

(b) Installed in a compartment that is vapor-tight to the inside of the conversion vendor unit or medical unit and accessible only from the outside; or

(c) Be mounted on the chassis or to the floor and neither the container nor its supports may be lower than the top of the axle height.

(3) The compartment must be ventilated at top and bottom to diffuse vapors. The compartment must be ventilated with two vents having an aggregate area of not less than two percent of the floor area of the compartment and must open without restriction to the outside. The required vents must be equally distributed between the floor and ceiling of the compartment. If the lower vent is located in the access door or wall, the bottom edge of the vent must be flush with the floor level of the compartment. The top vent must be located in the access door or wall with the bottom of the vent not more than 12 inches below the ceiling level of the compartment. All vents must have an unrestricted discharge to the outside atmosphere. Access doors or panels of compartments must not be equipped with locks or require special tools or knowledge to open.

(4) Doors, hoods, domes, or portions of housings and enclosures required to be removed or opened for container replacement must incorporate means for clamping them firmly in place and preventing them from working loose during transit. Provisions must be incorporated in the assembly to hold the containers firmly in position and prevent their movement during transit.

(5) LPG containers must be mounted on a substantial support or a base secured firmly to the conversion vendor unit or medical unit chassis. Neither the container nor its support

can extend below the conversion vendor unit or medical unit frame.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1350, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1360 What are the fuel gas piping design requirements for a conversion vendor unit or medical unit? Conversion vendor units or medical units requiring fuel gas for any purpose must be equipped with a gas piping system that is designed for LPG only or combination LPG and natural gas.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1360, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1380 Can gas tubing be concealed in a conversion vendor unit or medical unit? (1) Tubing must not be run inside walls, floors, partitions, or roofs.

(2) If tubing passes through walls, floors, partitions, roofs, or similar installations, the tubing must be protected by the use of weather resistant grommets that snugly fit both the tubing and the hole through which the tubing passes.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1380, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1390 What are the pipe-joint compound requirements for gas piping in a conversion vendor unit or medical unit? (1) Screw joints must be made tight with pipe-joint compound that is insoluble in liquefied petroleum gas.

(2) Pipe-joint compound must be approved for the type of gas used. The pipe-joint compound must be applied to the male threads only.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1390, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1400 What are the gas piping hanger and support requirements for a conversion vendor unit or medical unit? (1) All gas piping must be adequately supported by galvanized or equivalently protected metal straps or hangers at intervals of not more than 4 feet, except where adequate support and protection is provided by structural members.

(2) Gas pipe supply connections must be rigidly anchored to a structural member within 6 inches of the supply connections.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1400, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1410 What are the electrical bonding requirements for gas piping in a conversion vendor unit or medical unit? (1) Gas piping must not be used for an electrical ground.

(2) The gas line must be bonded.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1410, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1420 How are gas supply connections in a conversion vendor unit or medical unit identi-

(2001 Ed.)

fied? A label must be permanently attached on the outside of the exterior wall of the conversion vendor unit or medical unit adjacent to the gas supply connection which provides the following information:

(1) The type of system (i.e., liquid petroleum system or natural gas system or combination liquid petroleum and natural gas system);

(2) The appropriate Btuh input rating; and

(3) If excess ("or more") Btuh input is allowed.

(4) An example of a label would be: Natural Gas System, 250,000 Btuh or more.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1420, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1430 What requirements apply to gas piping system openings? All openings in the gas piping system must be closed gas-tight with threaded pipe plugs or pipe caps.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1430, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1440 Are gas piping shut-off valves required in a conversion vendor unit or medical unit? (1) In addition to any valve on the appliance, a shut-off valve must be installed in the fuel piping outside of each gas appliance but inside the conversion vendor unit or medical unit structure and upstream of the union or connector. The shut-off valve must be located within six feet of a cooking appliance and within three feet of any other appliance. A shut-off valve may serve more than one appliance if located as required above.

(2) Shut-off valves used in connection with gas piping must be of a type designed for use with liquefied petroleum gas. Shut-off valves must be tested and approved to ANSI Z21.15 standard or equal.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1440, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1450 What requirements apply to testing for gas piping leaks before conversion vendor unit or medical unit appliances are connected? (1) The piping system must stand a pressure of at least 10 psi gauge for a period of not less than 15 minutes without showing any drop in pressure.

(2) Pressure must be measured with a gauge calibrated to be read in increments of not greater than 1/10 pound.

(3) The source of pressure must be isolated before the pressure tests are made. Before a test is begun, the temperature of the ambient air and of the piping must be approximately the same, and constant air temperature must be maintained throughout the test.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1450, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1460 What requirements apply to testing for gas piping leaks after conversion vendor unit or medical unit appliances are connected? (1) After gas appliances have been connected, the gas-piping system must be subjected to a pressure test with the burner valves closed.

[Title 296 WAC—p. 2203]

The test consists of air at not less than 10 inches nor more than 14 inches pressure of water column (6 to 8 ounces). The system must hold this pressure for a period of not less than 10 minutes with no leakage. Before beginning the test, the temperature of the gas-piping system and the test air must be equalized, and this shall be maintained throughout the test.

(2) Appliance shut-off valves ahead of gas cooking appliances may be closed for the performance of this test. When the test is satisfactorily performed, these valves must be opened and, while the system is under pressure, the appliance connectors must be tested with an approved leak detector or approved bubble solution.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1460, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1470 What are the requirements for appliance installations? (1) The installation of each appliance must conform to the manufacturer's installation instructions. The manufacturer's instructions must be attached to the appliance.

(2) Combustion air inlets and flue gas outlets must be listed as components of the appliance and must be completely separated. The required separation may be obtained by:

(a) The installation of direct vent system (sealed combustion system) appliances; or

(b) The installation of appliances within enclosures so that the appliance combustion system and venting system are separate from the interior atmosphere of the conversion vendor unit or medical unit. There must not be any door, removable access panel, or other opening into the enclosure from the inside of the conversion vendor unit or medical unit. Any openings for ducts, piping, wiring, etc., must be sealed.

(3) Ranges, cooktops, and ovens must not burn outside combustion air.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1470, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1530 What general plumbing requirements apply? This chapter also applies to the installation of plumbing equipment in any conversion vendor unit or medical unit bearing or required to bear a department insignia. Plumbing fixtures, equipment, and installations in conversion vendor units and medical units must conform to the provisions of the Uniform Plumbing Code and the amendments adopted by the State Building Code Council, except part 1, unless specifically exempted or required by this section. However, the following exceptions apply:

(1) We will allow a 1-1/4 inch drain for handwashing sinks with an antisiphon vent.

(2) An antisiphon vent will be allowed on one and two compartment sinks in units as long as there is one vent to the exterior so the system will function. Sinks with three or more compartments must be installed as required by the Uniform Plumbing Code.

(3) Vent pipes may terminate through the roof or through the sidewall at a point as high as possible and not less than six feet from ground level.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1530, filed 8/31/99, effective 10/1/99.]

[Title 296 WAC—p. 2204]

WAC 296-150V-1540 What are the plumbing definitions? Definitions contained in the Uniform Plumbing Code apply to this chapter:

"**Drain outlet**" is the discharge end of the conversion vendor unit or medical unit main drain to which a drain connector may be attached.

"**Main drain**" is the principal artery of the conversion vendor unit or medical unit drainage system to which drainage branches may be connected.

"**Water-supply connection**" is the fitting or point of connection of the conversion vendor unit or medical unit water distribution system to a water connector.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1540, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1550 What requirements apply to drain outlets? Drain outlets must be equipped with a watertight cap or plug that must be permanently attached to the unit.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1550, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1560 What is the minimum clearance for drain outlets? The drain outlet and couplers must have a minimum clearance of 3 inches in any direction from all parts of the structure or appurtenances and with at least 18 inches unrestricted clearance directly in front of the drain outlet.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1560, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1570 What requirements apply to water-supply connections? Water-supply connections must be equipped with a watertight cap or plug that must be permanently attached to the vehicle.

Note: The department of health may have more restrictive requirements. Before modifying your unit to comply with these requirements, be sure to contact that agency.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1570, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1580 What requirements apply to water heater relief valves and safety devices? (1) All water heaters must be installed with approved fully automatic valve or valves designed to provide temperature and pressure relief. Temperature and pressure relief valves must be tested and approved to ANSI Z21.22 standard or equal.

(2) Any temperature relief valve or combined pressure and temperature relief valve installed for this purpose must have the temperature sensing element immersed in the hottest water within the upper 6 inches of the tank. It must be set to start relieving at a pressure of 150 psi or the rated working pressure of the tank, whichever is lower, and at or below a water temperature of 210 degrees Fahrenheit.

(3) Relief valves must be provided with full-sized drains. Drains must be directed to the exterior of the unit, exiting at least 6 inches above the ground, and must exhaust downward. Drain lines must be of a material approved for hot water dis-

tribution and must drain fully by gravity, must not be trapped, and must not have their outlets threaded.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1580, filed 8/31/99, effective 10/1/99.]

WAC 296-150V-1590 What requirements apply to waste holding tanks for conversion vendor units? Conversion vendor units may use either portable waste holding tanks approved by the department of health or permanently mounted waste holding tanks.

(1) All portable waste holding tanks must be listed for the intended use and used per their listing.

(2) All permanently mounted waste holding tanks must meet the following specifications:

(a) Tanks must be listed for the intended use, installed per their listing, and be securely installed to prevent displacement during transportation;

(b) Tanks must be easily removable for service, repair or replacement without having to remove any permanent construction;

(c) Neither the inlet nor vent fitting may extend downward into the tank more than 1-1/2 inches;

(d) The drain opening must be located at the lowest point of the tank;

(e) Tanks must be vented at the highest point in the top of the tank by one of the following methods:

(i) A 1-1/4 inch diameter vent pipe;

(ii) A continuous vent serving as a drain from one additional fixture provided the drain portion is increased one pipe size larger than the connected trap arm;

(iii) Two or more vented drains when at least one is wet-vented and each drain is separately connected to the top of the tank;

(f) A fullway termination valve must be installed in the tank; and

(g) No drain connection may be made between liquid and body waste holding tanks upstream of fullway termination valves.

[Statutory Authority: Chapter 43.22 RCW. 99-18-069, § 296-150V-1590, filed 8/31/99, effective 10/1/99.]

Chapter 296-155 WAC

SAFETY STANDARDS FOR CONSTRUCTION WORK

WAC

**PART A
GENERAL SAFETY AND HEALTH PROVISIONS**

- 296-155-001 Foreword.
- 296-155-003 Subsections, subdivisions, items, subitems, and segments.
- 296-155-005 Purpose and scope.
- 296-155-006 Equipment approval by nonstate agency or organization.
- 296-155-007 Incorporation of standards of national organization.
- 296-155-008 Incorporation of standards of federal agency.
- 296-155-009 Equipment whether or not owned by, or under control of the employer.
- 296-155-010 Variance and procedure.
- 296-155-012 Definitions applicable to all sections of this chapter.
- 296-155-015 Education and first-aid standards.
- 296-155-020 Housekeeping.
- 296-155-030 Acceptable certifications.
- 296-155-035 General requirements.
- 296-155-040 Safe place standards.

**PART B-1
OCCUPATIONAL HEALTH AND ENVIRONMENTAL CONTROL**

- 296-155-100 Management's responsibility.
- 296-155-105 Employee's responsibility.
- 296-155-110 Accident prevention program.
- 296-155-115 Safety bulletin board.
- 296-155-120 First-aid training and certification.
- 296-155-125 First-aid supplies.
- 296-155-130 First-aid station.
- 296-155-140 Sanitation.
- 296-155-145 Occupational noise exposure.
- 296-155-150 Ionizing radiation.
- 296-155-155 Nonionizing radiation.
- 296-155-160 Gases, vapors, fumes, dusts, and mists.
- 296-155-165 Lighting and illumination.
- 296-155-170 Ventilation.
- 296-155-173 Methyleneedianiline.
- 296-155-17301 Scope and application.
- 296-155-17303 Definitions.
- 296-155-17305 Permissible exposure limits.
- 296-155-17307 Communication among employers.
- 296-155-17309 Emergency situations.
- 296-155-17311 Exposure monitoring.
- 296-155-17313 Regulated areas.
- 296-155-17315 Methods of compliance.
- 296-155-17317 Respiratory protection.
- 296-155-17319 Protective work clothing and equipment.
- 296-155-17321 Hygiene facilities and practices.
- 296-155-17323 Communication of hazards to employees.
- 296-155-17325 Housekeeping.
- 296-155-17327 Medical surveillance.
- 296-155-17329 Medical removal.
- 296-155-17331 Recordkeeping.
- 296-155-17333 Observation of monitoring.
- 296-155-17337 Appendices.
- 296-155-17339 Startup dates.
- 296-155-17341 Appendix A to WAC 296-155-173—Substance data sheet, for 4-4'-methyleneedianiline.
- 296-155-17343 Appendix B to WAC 296-155-173—Substance technical guidelines, MDA.
- 296-155-17345 Appendix C to WAC 296-155-173—Medical surveillance guidelines for MDA.

- 296-155-17652 Appendix B to WAC 296-155-176—Employee standard summary.
- 296-155-17654 Appendix C to WAC 296-155-176—Medical surveillance guidelines.

**PART B-2
HAZARD COMMUNICATION**

- 296-155-180 Hazard communication.

**PART C
PERSONAL PROTECTIVE AND LIFE SAVING EQUIPMENT**

- 296-155-200 General requirements.
- 296-155-201 Definitions applicable to this chapter.
- 296-155-203 Confined spaces.
- 296-155-20301 Definitions.
- 296-155-20307 Confined space work on sewer systems under construction.
- 296-155-205 Head protection.
- 296-155-210 Hearing protection.
- 296-155-211 Leg protection.
- 296-155-212 Foot protection.
- 296-155-215 Eye and face protection.
- 296-155-220 Respiratory protection.
- 296-155-235 Working over or adjacent to water.
- 296-155-240 Sterilization of protective equipment.

**PART C-1
FALL RESTRAINT AND FALL ARREST**

- 296-155-245 Reserve.
- 296-155-24501 Scope and application.
- 296-155-24503 Definitions.
- 296-155-24505 Fall protection work plan.
- 296-155-24507 Reserve.
- 296-155-24510 Fall restraint, fall arrest systems.
- 296-155-24515 Guarding of low pitched roof perimeters.
- 296-155-24519 Reserve.
- 296-155-24520 Leading edge control zone.
- 296-155-24521 Safety monitor system.
- 296-155-24522 Reserve.
- 296-155-24523 Appendix A to Part C-1—Determining roof widths non-mandatory guidelines for complying with WAC 296-155-24515 (2)(b).
- 296-155-24524 Reserve.
- 296-155-24525 Appendix B to Part C-1—Fall restraint and fall arrest (employer information only).

**PART D
FIRE PROTECTION AND PREVENTION**

- 296-155-250 Definitions applicable to this part.
- 296-155-260 Fire protection.

296-155-265 Fire prevention.
 296-155-270 Flammable and combustible liquids.
 296-155-275 Liquefied petroleum gas (LP-gas).
 296-155-280 Temporary heating devices.

**PART E
 SIGNS, SIGNALS, AND BARRICADES**

296-155-300 Accident prevention signs and tags.
 296-155-305 Signaling.
 296-155-310 Barricades.
 296-155-315 Definitions applicable to this part.

**PART F
 MATERIAL HANDLING, STORAGE,
 USE AND DISPOSAL**

296-155-325 General requirements for storage.
 296-155-329 Qualified person—Rigging.
 296-155-330 Rigging equipment for material handling.
 296-155-335 Disposal of waste materials.
 296-155-34901 Table F-1.
 296-155-34902 Table F-2.
 296-155-34903 Table F-3.
 296-155-34904 Table F-4.
 296-155-34905 Table F-5.
 296-155-34906 Table F-6.
 296-155-34907 Table F-7.
 296-155-34908 Table F-8.
 296-155-34909 Table F-9.
 296-155-34910 Table F-10.
 296-155-34911 Table F-11.
 296-155-34912 Table F-12.
 296-155-34913 Table F-13.
 296-155-34914 Table F-14.
 296-155-34915 Table F-15.
 296-155-34916 Table F-16.
 296-155-34917 Table F-17.
 296-155-34918 Table F-18.
 296-155-34919 Table F-19.
 296-155-34920 Table F-20.

**PART G
 TOOLS—HAND AND POWER**

296-155-350 General requirements.
 296-155-355 Hand tools.
 296-155-360 Power-operated hand tools.
 296-155-363 Safety requirements for powder actuated fastening systems, in accordance with ANSI A10.3-1985, Safety Requirements for Powder Actuated Fastening Systems.
 296-155-36301 Scope.
 296-155-36303 Purpose.
 296-155-36305 Definitions applicable to this section.
 296-155-36307 Requirements.
 296-155-36309 Power loads.
 296-155-36311 Fasteners.
 296-155-36313 Operation.
 296-155-36315 Limitations of use.
 296-155-36317 Maintenance and storage.
 296-155-36319 Authorized instructor.
 296-155-36321 Qualified operator.
 296-155-365 Abrasive wheels and tools.
 296-155-367 Masonry saws.
 296-155-370 Woodworking tools.
 296-155-375 Jacks—Lever and ratchet, screw, and hydraulic.
 296-155-380 Air receivers.

**PART H
 WELDING AND CUTTING**

296-155-400 Gas welding and cutting.
 296-155-405 Arc welding and cutting.
 296-155-407 Protective clothing.
 296-155-410 Fire prevention.
 296-155-415 Ventilation and protection in welding, cutting, and heating.
 296-155-420 Welding, cutting, and heating in way of preservative coatings.

**PART I
 ELECTRICAL**

296-155-426 Introduction.
 296-155-428 General requirements.
 296-155-429 Lockout and tagging of circuits.
 296-155-432 Maintenance of equipment.

296-155-434 Environmental deterioration of equipment.
 296-155-437 Batteries and battery charging.
 296-155-441 Applicability.
 296-155-444 General requirements.
 296-155-447 Wiring design and protection.
 296-155-449 Wiring methods, components, and equipment for general use.
 296-155-452 Specific purpose equipment and installations.
 296-155-456 Hazardous (classified) locations.
 296-155-459 Special systems.
 296-155-462 Definitions applicable to this part.

**PART J
 STAIRWAYS AND LADDERS**

296-155-475 Scope and application.
 296-155-47501 Definitions applicable to this part.
 296-155-476 General requirements.
 296-155-477 Stairways.
 296-155-480 Ladders.
 296-155-48060 Training requirements.
 296-155-48080 Appendix A.
 296-155-48090 Reserved.

**PART J-1
 SCAFFOLDS**

296-155-481 Scope and application.
 296-155-482 Definitions applicable to this part.
 296-155-483 General requirements.
 296-155-484 Additional requirements applicable to specific types of scaffolds.
 296-155-485 Reserved.
 296-155-487 Manually propelled elevating work platforms.
 296-155-488 Self propelled elevating work platforms.
 296-155-489 Boom supported elevating work platforms.
 296-155-490 Aerial lifts.
 296-155-493 Training.
 296-155-494 Non-Mandatory Appendix A to Part J-1, Scaffold Specifications.
 296-155-496 Non-Mandatory Appendix C to Part J-1, List of National Consensus Standards.
 296-155-497 Non-Mandatory Appendix D to Part J-1, List of Training Topics for Scaffold Erectors and Dismantlers.
 296-155-498 Non-Mandatory Appendix E to Part J-1, Drawings and Illustrations.

**PART K
 FLOOR OPENINGS, WALL OPENINGS
 AND STAIRWAYS**

296-155-500 Definitions applicable to this part.
 296-155-505 Guardrails, handrails and covers.
 296-155-50503 Roofing brackets.
 296-155-50505 Reserved.
 296-155-510 Reserved.
 296-155-515 Ramps, runways, and inclined walkways.

**PART L
 CRANES, DERRICKS, HOISTS, ELEVATORS,
 AND CONVEYORS**

296-155-525 Cranes and derricks.
 296-155-526 Crane attached personnel platforms.
 296-155-527 Appendix A to WAC 296-155-525.
 296-155-528 Crane or derrick suspended personnel platforms.
 296-155-530 Material hoists, personnel hoists, and elevators.
 296-155-535 Base-mounted drum hoists.
 296-155-540 Overhead hoists.
 296-155-545 Conveyors.
 296-155-550 Aerial cableways.
 296-155-555 Gin poles.
 296-155-560 Concrete bucket towers.
 296-155-565 Hoisting engines.
 296-155-570 Rigging—Wire rope.
 296-155-575 Helicopters and helicopter cranes.
 296-155-576 Figure L-1.
 296-155-59901 Table 1.
 296-155-59902 Table 2.
 296-155-59903 Table 3.
 296-155-59904 Table 4.
 296-155-59905 Table 5.
 296-155-59906 Table 6.
 296-155-59907 Table 7.
 296-155-59908 Table 8.
 296-155-59909 Table 9.
 296-155-59910 Table 10.

296-155-59911	Table 11.
296-155-59912	Table 12.
296-155-59913	Table 13.
296-155-59914	Table 14.
296-155-59915	Table 15.
296-155-59916	Table 16.
296-155-59917	Table 17.
296-155-59918	Table 18.
296-155-59919	Table 19.
296-155-59920	Table 20.

**PART M
MOTOR VEHICLES, MECHANIZED EQUIPMENT,
AND MARINE OPERATIONS**

296-155-600	Definitions applicable to this part.
296-155-605	Equipment.
296-155-610	Motor vehicles.
296-155-615	Material handling equipment.
296-155-617	Servicing multipiece and single-piece rim wheels.
296-155-61701	Scope.
296-155-61703	Definitions.
296-155-61705	Employee training.
296-155-61707	Tire servicing equipment.
296-155-61709	Wheel component acceptability.
296-155-61711	Safe operating procedure—Multipiece rim wheels.
296-155-61713	Safe operating procedure—Single-piece rim wheels.
296-155-620	Pile driving equipment.
296-155-625	Site clearing.
296-155-630	Marine operations and equipment.

**PART N
EXCAVATION, TRENCHING, AND SHORING**

296-155-650	Scope, application, and definitions applicable to this part.
296-155-655	General protection requirements.
296-155-657	Requirements for protective systems.
296-155-66103	Reserved.
296-155-66105	Reserved.
296-155-66109	Reserved.
296-155-664	Appendices.
296-155-66401	Appendix A—Soil classification.
296-155-66403	Appendix B—Sloping and benching.
296-155-66405	Appendix C—Timber shoring for trenches.
296-155-66407	Appendix D—Aluminum hydraulic shoring for trenches.
296-155-66409	Appendix E—Alternatives to timber shoring.
296-155-66411	Appendix F—Selection of protective systems.

**PART O
CONCRETE, CONCRETE FORMS, SHORING,
AND MASONRY CONSTRUCTION**

296-155-675	Scope, application, and definitions applicable to this part.
296-155-680	General provisions.
296-155-681	Safe walking surfaces on concrete structural members.
296-155-682	Requirements for equipment and tools.
296-155-683	Concrete finishing.
296-155-684	Requirements for cast in place concrete.
296-155-685	Tubular welded frame shoring.
296-155-686	Tube and coupler shoring.
296-155-687	Single post shores.
296-155-688	Vertical slip forms.
296-155-689	Placing and removal of forms.
296-155-690	Appendix to WAC 296-155-684 cast in place concrete.
296-155-691	Precast concrete and tilt-up operations.
296-155-694	Requirements for lift-slab construction operations.
296-155-695	Miscellaneous concrete construction.
296-155-697	Requirements for masonry construction.
296-155-699	Appendix A to Part O—References to Part O of chapter 296-155 WAC.

**PART P
STEEL ERECTION**

296-155-700	General requirements.
296-155-705	Flooring requirements.
296-155-710	Structural steel assembly.
296-155-715	Bolting, riveting, fitting-up, and plumbing-up.
296-155-720	Safe walking surfaces on structural members.

**PART Q
UNDERGROUND CONSTRUCTION**

296-155-725	Definitions applicable to this part.
296-155-730	Tunnels and shafts.

296-155-735	Caissons.
296-155-740	Cofferdams.
296-155-745	Compressed air.
296-155-74501	Appendix A—Decompression tables.

**PART R
MISCELLANEOUS CONSTRUCTION REQUIREMENTS**

296-155-755	Roofing, insulating and waterproofing.
296-155-765	Rock crushing, gravel washing, and hot mix plants.
296-155-770	Moving of structures.

**PART S
DEMOLITION**

296-155-775	Preparatory operations.
296-155-780	Stairs, passageways, and ladders.
296-155-785	Chutes.
296-155-790	Removal of materials through floor openings.
296-155-795	Removal of walls, masonry sections, and chimneys.
296-155-800	Manual removal of floors.
296-155-805	Removal of walls, floors, and material with equipment.
296-155-810	Catch platforms.
296-155-815	Storage.
296-155-820	Removal of steel construction.
296-155-825	Mechanical demolition.
296-155-830	Selective demolition by explosives.

**PART U
POWER DISTRIBUTION AND TRANSMISSION LINES
Refer to chapter 296-45 WAC, "Safety standards for electrical workers."**

**PART V
ROLLOVER PROTECTIVE STRUCTURES
AND OVERHEAD PROTECTION**

296-155-950	Rollover protective structures (ROPS) for material handling equipment.
296-155-955	Minimum performance criteria for rollover protective structures for designated scrapers, loaders, dozers, graders, and crawler tractors.
296-155-960	Protective frame (ROPS) test procedures and performance requirements for wheel-type agricultural and industrial tractors used in construction.
296-155-965	Overhead protection for operators of agricultural and industrial tractors.

**DISPOSITION OF SECTIONS FORMERLY
CODIFIED IN THIS CHAPTER**

296-155-135	First-aid room. [Order 74-26, § 296-155-135, filed 5/7/74, effective 6/6/74.] Repealed by 00-01-038, filed 12/7/99, effective 2/1/00. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
296-155-17335	Effective date. [Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17335, filed 2/3/93, effective 3/15/93.] Repealed by 99-10-071, filed 5/4/99, effective 9/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
296-155-17349	Appendix E to WAC 296-155-173—Methylenedianiline—Qualitative and quantitative fit testing procedures. [Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17349, filed 2/3/93, effective 3/15/93.] Repealed by 99-10-071, filed 5/4/99, effective 9/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
296-155-17351	Appendix E-1—Qualitative protocols. [Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17351, filed 2/3/93, effective 3/15/93.] Repealed by 99-10-071, filed 5/4/99, effective 9/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
296-155-17353	Appendix E-1-a—Isoamyl acetate (banana oil) protocol. [Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17353, filed 2/3/93, effective 3/15/93.] Repealed by 99-10-071, filed 5/4/99, effective 9/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
296-155-17355	Appendix E-1-b—Saccharin solution aerosol protocol. [Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17355, filed 2/3/93, effective 3/15/93.] Repealed by 99-10-071, filed 5/4/99, effective 9/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
296-155-17357	Appendix E-1-c—Irritant fume protocol. [Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-

- 15), § 296-155-17357, filed 2/3/93, effective 3/15/93.] Repealed by 99-10-071, filed 5/4/99, effective 9/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
- 296-155-17359 Appendix E-2—Quantitative fit test procedures. [Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17359, filed 2/3/93, effective 3/15/93.] Repealed by 99-10-071, filed 5/4/99, effective 9/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
- 296-155-175 Scope and application. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-175, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17505 Definitions. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17505, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17510 Permissible exposure limits (pel). [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17510, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17515 Communication among employers. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17515, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17520 Identification. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17520, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17525 Regulated areas. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17525, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17530 Exposure monitoring. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17530, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17532 Methods of compliance. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17532, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17535 Respiratory protection. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17535, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17540 Protective clothing. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17540, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17545 Hygiene facilities and practices. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17545, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17550 Communication of hazards to employees. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17550, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17555 Housekeeping. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17555, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17560 Medical surveillance. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17560, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17565 Recordkeeping. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17565, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17570 Dates. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17570, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17575 Appendices. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-17575, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-17635 Startup dates. [Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17635, filed 10/29/93, effective 12/10/93.] Repealed by 99-10-071, filed 5/4/99, effective 9/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
- 296-155-17656 Appendix D to WAC 296-155-176—Qualitative and quantitative fit test protocols. [Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17656, filed 10/29/93, effective 12/10/93.] Repealed by 99-10-071, filed 5/4/99, effective 9/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.
- 296-155-177 Appendix A—WISHA reference method—Mandatory. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-177, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-179 Appendix B—Detailed procedure for asbestos, tremolite, anthophyllite, and actinolite sampling and analysis—Nonmandatory. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-179, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-181 Appendix C—Qualitative and quantitative fit testing procedures—Mandatory. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-181, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-183 Appendix D—Medical questionnaires—Mandatory. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-183, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-185 Appendix E—Interpretation and classification of chest roentgenograms—Mandatory. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-185, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-187 Appendix F—Work practices and engineering controls for major asbestos removal, renovation, and demolition operations—Nonmandatory. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-187, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-189 Appendix G—Work practices and engineering controls for small-scale, short-duration asbestos renovation and maintenance operations—Nonmandatory. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-189, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-191 Appendix H—Substance technical information for asbestos—Nonmandatory. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-191, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-193 Appendix I—Medical surveillance guidelines for asbestos, tremolite, anthophyllite, and actinolite—Nonmandatory. [Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-193, filed 4/27/87.] Repealed by 87-24-051 (Order 87-24), filed 11/30/87. Statutory Authority: Chapter 49.17 RCW.
- 296-155-225 Safety belts, droplines, lifelines, and lanyards. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-

	074 (Order 86-14), § 296-155-225, filed 1/21/86; Order 76-29, § 296-155-225, filed 9/30/76; Order 74-26, § 296-155-225, filed 5/7/74, effective 6/6/74.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.	296-155-48507	Table J-5. [Order 76-29, Table J-5 (codified as WAC 296-155-48507), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-5, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-229	Qualified person—Rigging. [Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060. 98-13-069, § 296-155-229, filed 6/15/98, effective 8/15/98.] Decodified by 98-16-067, filed 8/4/98, effective 8/4/98. Later promulgation, see WAC 296-155-329.	296-155-48508	Table J-6. [Order 76-29, Table J-6 (codified as WAC 296-155-48508), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-6, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-230	Safety nets. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-230, filed 1/21/86; Order 74-26, § 296-155-230, filed 5/7/74, effective 6/6/74.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.	296-155-48509	Table J-7. [Order 76-29, Table J-7 (codified as WAC 296-155-48509), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-7, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-425	Definitions applicable to this part. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-425, filed 1/21/86; Order 74-26, § 296-155-425, filed 5/7/74, effective 6/6/74.] Repealed by 88-11-021 (Order 88-04), filed 5/11/88. Statutory Authority: Chapter 49.17 RCW.	296-155-48510	Table J-8. [Order 76-29, Table J-8 (codified as WAC 296-155-48510), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-8, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-430	General requirements. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-430, filed 1/21/86; Order 77-20, § 296-155-430, filed 10/18/77; Order 77-12, § 296-155-430, filed 7/11/77; Order 74-26, § 296-155-430, filed 5/7/74, effective 6/6/74.] Repealed by 88-11-021 (Order 88-04), filed 5/11/88. Statutory Authority: Chapter 49.17 RCW.	296-155-48511	Table J-9. [Order 76-29, Table J-9 (codified as WAC 296-155-48511), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-9, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-435	Grounding and bonding. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-435, filed 1/21/86; Order 74-26, § 296-155-435, filed 5/7/74, effective 6/6/74.] Repealed by 88-11-021 (Order 88-04), filed 5/11/88. Statutory Authority: Chapter 49.17 RCW.	296-155-48512	Table J-10. [Order 76-29, Table J-10 (codified as WAC 296-155-48512), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-10, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-440	Equipment installation and maintenance. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-440, filed 1/21/86; Order 74-26, § 296-155-440, filed 5/7/74, effective 6/6/74.] Repealed by 88-11-021 (Order 88-04), filed 5/11/88. Statutory Authority: Chapter 49.17 RCW.	296-155-48513	Table J-11. [Order 76-29, Table J-11 (codified as WAC 296-155-48513), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-11, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-450	Battery rooms and battery charging. [Order 74-26, § 296-155-450, filed 5/7/74, effective 6/6/74.] Repealed by 88-11-021 (Order 88-04), filed 5/11/88. Statutory Authority: Chapter 49.17 RCW.	296-155-48514	Table J-12. [Order 76-29, Table J-12 (codified as WAC 296-155-48514), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-12, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-455	Hazardous locations. [Order 74-26, § 296-155-455, filed 5/7/74, effective 6/6/74.] Repealed by 88-11-021 (Order 88-04), filed 5/11/88. Statutory Authority: Chapter 49.17 RCW.	296-155-48515	Table J-13. [Order 76-29, Table J-13 (codified as WAC 296-155-48515), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-13, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-48501	Figure J-1. [Order 76-29, Figure J-1 (codified as WAC 296-155-48501), filed 9/30/76; Order 74-26, § 296-155-485 (part), Figure J-1, filed 5/7/74, effective 6/6/74.] Repealed by 82-08-026 (Order 82-10), filed 3/30/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-155-48516	Table J-14. [Order 76-29, Table J-14 (codified as WAC 296-155-48516), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-14, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-48502	Figure J-2. [Order 76-29, Figure J-2 (codified as WAC 296-155-48502), filed 9/30/76; Order 74-26, § 296-155-485 (part), Figure J-2, filed 5/7/74, effective 6/6/74.] Repealed by 82-08-026 (Order 82-10), filed 3/30/82. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-155-48517	Table J-15. [Order 76-29, Table J-15 (codified as WAC 296-155-48517), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-15, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-48503	Table J-1. [Order 76-29, Table J-1 (codified as WAC 296-155-48503), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-1, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.	296-155-48518	Table J-16. [Order 76-29, Table J-16 (codified as WAC 296-155-48518), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-16, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-48504	Table J-2. [Order 76-29, Table J-2 (codified as WAC 296-155-48504), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-2, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.	296-155-48519	Table J-17. [Order 76-29, Table J-17 (codified as WAC 296-155-48519), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-17, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-155-48505	Table J-3. [Order 76-29, Table J-3 (codified as WAC 296-155-48505), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-3, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.	296-155-48523	Manually propelled mobile ladder stands and scaffolds (towers). [Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-48523, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-48523, filed 1/21/86.] Repealed by 98-05-046,
296-155-48506	Table J-4. [Order 76-29, Table J-4 (codified as WAC 296-155-48506), filed 9/30/76; Order 74-26, § 296-155-485 (part), Table J-4, filed 5/7/74, effective 6/6/74.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.		

- filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
- 296-155-48525 Manually propelled elevating work platforms. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-74 (Order 86-14), § 296-155-48525, filed 1/21/86.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
- 296-155-48527 Self propelled elevating work platforms. [Statutory Authority: Chapter 49.17 RCW. 92-17-022 (Order 92-06), § 296-155-48527, filed 8/10/92, effective 9/10/92. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-48527, filed 1/21/86.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
- 296-155-48529 Boom supported elevating work platforms. [Statutory Authority: Chapter 49.17 RCW. 92-17-022 (Order 92-06), § 296-155-48529, filed 8/10/92, effective 9/10/92; 91-03-044 (Order 90-18), § 296-155-48529, filed 1/10/91, effective 2/12/91; 89-11-035 (Order 89-03), § 296-155-48529, filed 5/15/89, effective 6/30/89. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-48529, filed 1/21/86.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
- 296-155-48531 Vehicle mounted elevating and rotating aerial devices. [Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-48531, filed 4/25/95, effective 10/1/95; 94-15-096 (Order 94-07), § 296-155-48531, filed 7/20/94, effective 9/20/94; 92-17-022 (Order 92-06), § 296-155-48531, filed 8/10/92, effective 9/10/92; 91-03-044 (Order 90-18), § 296-155-48531, filed 1/10/91, effective 2/12/91; 90-17-051 (Order 90-10), § 296-155-48531, filed 8/13/90, effective 9/24/90. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-48531, filed 1/21/86.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
- 296-155-48533 Crane or derrick suspended personnel platforms. [Statutory Authority: RCW 49.17.040, [49.17].050 and [49.17].060. 96-24-051, § 296-155-48533, filed 11/27/96, effective 2/1/97. Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-48533, filed 4/25/95, effective 10/1/95; 94-15-096 (Order 94-07), § 296-155-48533, filed 7/20/94, effective 9/20/94; 91-03-044 (Order 90-18), § 296-155-48533, filed 1/10/91, effective 2/12/91; 90-03-029 (Order 89-20), § 296-155-48533, filed 1/11/90, effective 2/26/90; 89-11-035 (Order 89-03), § 296-155-48533, filed 5/15/89, effective 6/30/89. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-48533, filed 1/21/86.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
- 296-155-48536 Forklift elevated work platforms. [Statutory Authority: Chapter 49.17 RCW and RCW 49.17.040, [49.17].050 and [49.17].060. 92-22-067 (Order 92-06), § 296-155-48536, filed 10/30/92, effective 12/8/92. Statutory Authority: Chapter 49.17 RCW. 89-11-035 (Order 89-03), § 296-155-48536, filed 5/15/89, effective 6/30/89.] Repealed by 98-05-046, filed 2/13/98, effective 4/15/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
- 296-155-50501 Appendix—Roofs. [Statutory Authority: RCW 49.17.040 and 49.17.240. 81-13-053 (Order 81-9), § 296-155-50501, filed 6/17/81.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.
- 296-155-580 Aerial lifts. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-580, filed 1/21/86; Order 74-26, § 296-155-580, filed 5/7/74, effective 6/6/74.] Repealed by 90-17-051 (Order 90-10), filed 8/13/90, effective 9/24/90. Statutory Authority: Chapter 49.17 RCW.
- 296-155-65505 Sewage piping system. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-65505, filed 1/21/86.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.
- 296-155-660 Specific excavation requirements. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-660, filed 1/21/86. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240. 81-13-053 (Order 81-9), § 296-155-660, filed 6/17/81; Order 76-29, § 296-155-660, filed 9/30/76; Order 74-26, § 296-155-660, filed 5/7/74, effective 6/6/74.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.
- 296-155-66005 Borrow pits. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-66005, filed 1/21/86.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.
- 296-155-665 Specific trenching requirements. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-665, filed 1/21/86; 85-10-004 (Order 85-09), § 296-155-665, filed 4/19/85. Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240. 81-13-053 (Order 81-9), § 296-155-665, filed 6/17/81; Order 77-12, § 296-155-665, filed 7/11/77; Order 76-29, § 296-155-665, filed 9/30/76; Order 74-26, § 296-155-665, filed 5/7/74, effective 6/6/74.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.
- 296-155-66501 Table N-1. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-66501, filed 1/21/86; 82-13-045 (Order 82-22), § 296-155-66501, filed 6/11/82; Order 76-29, Table N-1 (codified as WAC 296-155-66501), filed 9/30/76; Order 74-26, § 296-155-665 (part), Table N-1, filed 5/7/74, effective 6/6/74.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.
- 296-155-66502 Table N-2. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-66502, filed 1/21/86; Order 76-29, Table N-2 (codified as WAC 296-155-66502), filed 9/30/76; Order 74-26, § 296-155-665 (part), Table N-2, filed 5/7/74, effective 6/6/74.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.
- 296-155-66503 Table N-3. [Order 76-29, Table N-3 (codified as WAC 296-155-66503), filed 9/30/76; Order 74-26, § 296-155-665 (part), Table N-3, filed 5/7/74, effective 6/6/74.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.
- 296-155-66504 Table N-4. [Order 76-29, Table N-4 (codified as WAC 296-155-66504), filed 9/30/76; Order 74-26, § 296-155-665 (part), Table N-4, filed 5/7/74, effective 6/6/74.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.
- 296-155-66505 Table N-5. [Statutory Authority: RCW 49.17.040, 49.17.050 and 49.17.240. 81-13-053 (Order 81-9), § 296-155-66505, filed 6/17/81; Order 76-29, Table N-5 (codified as WAC 296-155-66505), filed 9/30/76; Order 74-26, § 296-155-665 (part), Table N-5, filed 5/7/74, effective 6/6/74.] Repealed by 91-03-044 (Order 90-18), filed 1/10/91, effective 2/12/91. Statutory Authority: Chapter 49.17 RCW.
- 296-155-692 Requirements for lift -slab operations. [Statutory Authority: Chapter 49.17 RCW. 89-11-035 (Order 89-03), § 296-155-692, filed 5/15/89, effective 6/30/89.] Repealed by 90-03-029 (Order 89-20), filed 1/11/90, effective 2/26/90. Statutory Authority: Chapter 49.17 RCW.
- 296-155-750 Masonry construction. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-750, filed 1/21/86; Order 74-26, § 296-155-750, filed 5/7/74, effective 6/6/74.] Repealed by 89-11-035 (Order 89-03), filed 5/15/89, effective 6/30/89. Statutory Authority: Chapter 49.17 RCW.
- 296-155-760 Concrete finishing. [Order 74-26, § 296-155-760, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-850 Definitions applicable to this part. [Order 74-26, § 296-155-850, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-855 General provisions. [Order 74-26, § 296-155-855, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order

- 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-860 Blaster qualifications. [Order 74-26, § 296-155-860, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-865 Surface transportation of explosives. [Order 74-26, § 296-155-865, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-870 Underground transportation of explosives. [Order 74-26, § 296-155-870, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-875 Storage of explosives and blasting agents. [Order 74-26, § 296-155-875, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-880 Loading of explosives or blasting agents. [Order 74-26, § 296-155-880, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-885 Initiation of explosive charges—Electric blasting. [Order 74-26, § 296-155-885, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-890 Use of safety fuse. [Order 76-29, § 296-155-890, filed 9/30/76; Order 74-26, § 296-155-890, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-895 Use of detonating cord. [Order 74-26, § 296-155-895, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-900 Firing the blast. [Order 74-26, § 296-155-900, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-905 Inspection after blasting. [Order 74-26, § 296-155-905, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-910 Misfires. [Order 74-26, § 296-155-910, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-915 Underwater blasting. [Order 74-26, § 296-155-915, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
- 296-155-920 Blasting in excavation work under compressed air. [Order 74-26, § 296-155-920, filed 5/7/74, effective 6/6/74.] Repealed by 86-03-074 (Order 86-14), filed 1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050.

Reviser's note: Order 74-26, filed May 7, 1974, both repealed chapter 296-40 WAC, entitled "Safety Standards—Construction Work," and adopted this new chapter as a replacement. The effective date of this order is June 6, 1974.

PART A GENERAL SAFETY AND HEALTH PROVISIONS

WAC 296-155-001 Foreword. (1) This chapter has been compiled with the purpose of consolidating safety and health construction safety standards into one chapter of the Washington Administrative Code, by the promulgation of the standards contained herein. It is also the intent that the safety standards of the Washington state department of labor and industries, will be at least as effective as those adopted by the U.S. Department of Labor and administered by the Occupational Safety and Health Administration as published in the Code of Federal Regulations. The department of labor and industries is incorporating many of the preexisting construc-

tion safety standards and adding new standards under this chapter.

(2) Attention is called to the fact that certain Washington state standards contain standards and/or regulations applicable to all industries. These include, but are not limited to: The code for boilers and pressure vessels; the code for pressure piping; the general industrial safety and health standards; the general occupational health standards; regulations of the department of social and health services.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-001, filed 7/20/94, effective 9/20/94; Order 76-29, § 296-155-001, filed 9/30/76; Order 74-26, § 296-155-001, filed 5/7/74, effective 6/6/74.]

WAC 296-155-003 Subsections, subdivisions, items, subitems, and segments. (1) That portion of section numeration appearing after the chapter designation appears in either a three digit or a five digit format (e.g. WAC 296-24-330 and 296-24-30002). The final two digits of the section number are implied decimal extensions of the first three digits and represent a further division of the three digit enumeration.

(2) Sections of this chapter may be divided into subsections (1), (2), (3), etc., which may in turn be divided into subdivisions (a), (b), (c), etc., which may be further divided into items (i), (ii), (iii), etc., which may be further divided into subitems (A), (B), (C), etc., which may be further divided into segments (aa) [(I)], (bb) [(II)], (cc) [(III)], etc., all according to the following hierarchy, e.g.

Sections	296-24-330 and 296-24-33002
Subsections	(1) (2)
Subdivisions	(a) (b)
Items	(i) (ii)
Subitems	(A) (B)
Segments	I II

Note: "Part" as used in this standard means a major division of this chapter relating to a specific topic or topics and containing various related sections.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-003, filed 1/21/86; Order 74-26, § 296-155-003, filed 5/7/74, effective 6/6/74.]

WAC 296-155-005 Purpose and scope. (1) The standards included in this chapter apply throughout the state of Washington, to any and all work places subject to the Washington Industrial Safety and Health Act (chapter 49.17 RCW), where construction, alteration, demolition, related inspection, and/or maintenance and repair work, including painting and decorating, is performed. These standards are minimum safety requirements with which all industries must comply when engaged in the above listed types of work.

(2) If a provision of this chapter conflicts with a provision of the general safety and health standard (chapter 296-24 WAC) or the general occupational health standard (chapter 296-62 WAC), the provision of this chapter shall prevail. When a provision of this chapter conflicts with a provision of

another vertical safety standard applying to the place of work, the provisions of the vertical standard of specific application shall prevail.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-005, filed 1/21/86. Statutory Authority: RCW 49.17.040, 49.17.050, 49.17.240, chapters 42.30 and 43.22 RCW. 80-17-014 (Order 80-20), § 296-155-005, filed 11/13/80; Order 76-29, § 296-155-005, filed 9/30/76; Order 74-26, § 296-155-005, filed 5/7/74, effective 6/6/74.]

WAC 296-155-006 Equipment approval by nonstate agency or organization. Whenever a provision of this chapter states that only that equipment or those processes approved by an agency or organization other than the department of labor and industries, such as the Underwriters Laboratories or the Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health (NIOSH), shall be utilized, that provision shall be construed to mean that approval of such equipment or process by the designated agency or group shall be prima facie evidence of compliance with the provisions of this chapter.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-006, filed 7/20/94, effective 9/20/94; Order 74-26, § 296-155-006, filed 5/7/74, effective 6/6/74.]

WAC 296-155-007 Incorporation of standards of national organization. Whenever a provision of this chapter incorporates by reference a national code or portion thereof which has been adopted by and is currently administered by another state agency, compliance with those provisions adopted and administered by such other state agency, if from a more recent edition of such national code, will be deemed to be prima facie evidence of compliance with the provisions of this chapter.

[Order 74-26, § 296-155-007, filed 5/7/74, effective 6/6/74.]

WAC 296-155-008 Incorporation of standards of federal agency. (1) Whenever a provision of this chapter incorporates therein provisions of the Code of Federal Regulations (CFR) and changes thereto, or any other regulations adopted by an agency of the federal government, that provision of this chapter shall be construed to mean that compliance with such regulations shall be prima facie evidence of compliance with the provisions of this chapter.

(2) Whenever a provision of this chapter incorporates therein provisions of the Code of Federal Regulations, the provisions so incorporated shall be those in effect on the date of effectiveness of this chapter, unless the content of the incorporating section specifies otherwise.

[Order 76-29, § 296-155-008, filed 9/30/76; Order 74-26, § 296-155-008, filed 5/7/74, effective 6/6/74.]

WAC 296-155-009 Equipment whether or not owned by, or under control of the employer. (1) It is the employer's responsibility to ensure that any defective equipment or tools are not used.

(2) When any tool or piece of equipment fails to meet the requirements of any safety standard or recognized safe practice, the tool or equipment shall not be used.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-009, filed 1/21/86.]

(2001 Ed.)

WAC 296-155-010 Variance and procedure. Realizing that conditions may exist in operations under which certain state standards will not have practical application, the director of the department of labor and industries or his/her authorized representative may, pursuant to this section, sections eight or nine of the Washington Industrial Safety and Health Act (chapter 80, Laws of 1973, RCW 49.17.080 and 49.17.090) and appropriate administrative rules of this state and the department of labor and industries and upon receipt of application and after adequate investigation by the department, permit a variation from these requirements when other means of providing an equivalent measure of protection are afforded. Such variation granted shall be limited to the particular case or cases covered in the application for variance and may be revoked for cause. The order granting a variance shall be conspicuously posted on the premises and shall remain posted during the time it is in effect. A copy of the variance shall be available at the work site. All requests for variances from safety and health standards included in this chapter, shall be made in writing to the director of the department of labor and industries at Olympia, Washington, or his/her duly authorized representative, Department of Labor and Industries, P.O. Box 44600, Olympia, Washington 98504-4600.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-010, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-010, filed 1/21/86; Order 74-26, § 296-155-010, filed 5/7/74, effective 6/6/74.]

WAC 296-155-012 Definitions applicable to all sections of this chapter.

Note: Unless the context indicates otherwise, words used in this chapter shall have the meaning given in this section. Certain parts of this chapter contain definitions as they apply to that particular part.

"Approved" means approved by the director of the department of labor and industries or his/her authorized representative: Provided, however, That should a provision of this chapter state that approval by an agency or organization other than the department of labor and industries is required, such as Underwriters' Laboratories or the bureau of mines, the provisions of WAC 296-155-006 shall apply.

"Assistant director" means the individual in charge of the division of consultation and compliance, department of labor and industries, or an authorized representative.

"Authorized person" means a person approved or assigned by the employer to perform a specific type of duty or duties or be at a specific location or locations at the workplace.

"Competent person" means one who is capable of identifying existing and predictable hazards in the surroundings or working conditions which are unsanitary, hazardous, or dangerous to employees, and who has authorization to take prompt corrective action to eliminate them.

"Confined space" means a space that:

(1) Is large enough and so configured that an employee can bodily enter and perform assigned work; and

(2) Has limited or restricted means for entry or exit (for example, tanks, vessels, silos, storage bins, hoppers, vaults, and pits are spaces that may have limited means of entry); and

(3) Is not designed for continuous employee occupancy.

"Construction work" shall mean and include all or any part of excavation, construction, erection, alteration, repair, demolition, and dismantling, of buildings and other structures and all operations in connection therewith; the excavation, construction, alteration and repair of sewers, trenches, caissons, conduits, pipe lines, roads and all operations pertaining thereto; the moving of buildings and other structures, and to the construction, alteration, repair, or removal of wharfs, docks, bridges, culverts, trestles, piers, abutments or any other construction, alteration, repair or removal work related thereto.

"Defect" means any characteristic or condition which tends to weaken or reduce the strength of the tool, object, or structure of which it is a part.

"Department" means the department of labor and industries.

"Designated person" means "authorized person" as defined in this section.

"Director" means the director of the department of labor and industries, or his/her designated representative.

"Division" means the division of consultation and compliance of the department.

"Employer" means any person, firm, corporation, partnership, business trust, legal representative, or other business entity which engages in any business, industry, profession, or activity in this state and employs one or more employees or who contracts with one or more persons, the essence of which is the personal labor of such person or persons and includes the state, counties, cities, and all municipal corporations, public corporations, political subdivisions of the state, and charitable organizations: Provided, that any person, partnership, or business entity not having employees, and who is covered by the industrial insurance act shall be considered both an employer and an employee.

"Equipment" means all machinery, devices, tools, facilities, safeguards, and protective construction used in connection with construction operations.

"Ground fault circuit interrupter" means a fast acting circuit breaker that is sensitive to very low levels of current leakage to ground. The device is designed to limit the electric shock to a current and time duration below that which can cause serious injury.

"Hazard" means that condition, potential or inherent, which is likely to cause injury, death, or occupational disease.

"Hazardous substance" means a substance which, by reason of being explosive, flammable, poisonous, corrosive, oxidizing, irritating, or otherwise harmful, is likely to cause death or injury.

"Maintenance" means the work of keeping a building, machine, roadway, etc., in a state of good repair.

"Part" means a major division, of this chapter, relating to a specific topic or topics and containing various sections, subsections, etc.

"Permit-required confined space (permit space)" means a confined space that has one or more of the following characteristics:

(1) Contains or has a potential to contain a hazardous atmosphere;

(2) Contains a material that has the potential for engulfing an entrant;

(3) Has an internal configuration such that an entrant could be trapped or asphyxiated by inwardly converging walls or by a floor which slopes downward and tapers to a smaller cross-section; or

(4) Contains any other recognized serious safety or health hazard.

"Qualified" means one who, by possession of a recognized degree, certificate, or professional standing, or who by extensive knowledge, training, and experience, has successfully demonstrated their ability to solve or resolve problems relating to the subject matter, the work, or the project.

"Repair" means to restore a building, machine, roadway, etc., to an original state after damage or decay.

"Safety factor" means the ratio of the ultimate breaking strength of a member or piece of material or equipment to the actual working stress or safe load when in use.

"Safety and health standard" means a standard which requires the adoption or use of one or more practices, means, methods, operations, or processes reasonably necessary or appropriate to provide safe or healthful employment and places of employment.

"Shall" means that the provision(s) of the standard are mandatory.

"Substantial" means constructed of such strength, of such material, and of such workmanship, that the object referred to will withstand all normal wear, shock and usage.

"Standard safeguard" means a device designed and constructed with the object of removing the hazard of accident incidental to the machine, appliance, tool, building, or equipment to which it is attached.

Standard safeguards shall be constructed of either metal or wood or other suitable material or a combination of these. The final determination of the sufficiency of any safeguard rests with the director of the department of labor and industries through the division of consultation and compliance.

"Suitable" means that which fits, or has the qualities or qualifications to meet a given purpose, occasion, condition, function, or circumstance.

"Working day" means a calendar day, except Saturdays, Sundays, and legal holidays as set forth in RCW 1.16.050, as now or hereafter amended, and for the purposes of the computation of time within which an act is to be done under the provisions of this chapter, shall be computed by excluding the first working day and including the last working day.

"Worker," "personnel," "man," "person," "employee," and other terms of like meaning, unless the context of the provision containing such term indicates otherwise, mean an employee of an employer who is employed in the business of their employer whether by way of manual labor or otherwise and every person in this state who is engaged in the employment of or who is working under an independent contract the essence of which is their personal labor for an employer whether by manual labor or otherwise.

"Work place" means any plant, yard, premises, room, or other place where an employee or employees are employed for the performance of labor or service over which the employer has the right of access or control, and includes, but

is not limited to, all work places covered by industrial insurance under Title 51 RCW, as now or hereafter amended.

Abbreviations used in this chapter:

"ANSI" means American National Standards Institute.

"API" means American Petroleum Institute.

"ASA" means American Standards Association.

"ASAE" means American Society of Agricultural Engineers.

"ASHRE" means American Society of Heating and Refrigeration Engineers.

"ASME" means American Society of Mechanical Engineers.

"ASTM" means American Society of Testing and Materials.

"AWS" means American Welding Society.

"BTU" means British thermal unit.

"BTUH" means British thermal unit per hour.

"CFM" means cubic feet per minute.

"CFR" means Code of Federal Register.

"CGA" means Compressed Gas Association.

"CIE" means Commission Internationale de l'Eclairage.

"DOT" means department of transportation.

"FRP" means fiberglass reinforced plastic.

"GPM" means gallons per minute.

"ICC" means Interstate Commerce Commission.

"ID" means inside diameter.

"LPG" means liquefied petroleum gas.

"MCA" means Manufacturing Chemist Association.

"MSHA" means United States Department of Labor, Mine Safety and Health Administration.

"NBFU" means National Board of Fire Underwriters.

"NEMA" means National Electrical Manufacturing Association.

"NFPA" means National Fire Protection Association.

"NTP" means normal temperature and pressure.

"OD" means outside diameter.

"PSI" means pounds per square inch.

"PSIA" means pounds per square inch absolute.

"PSIG" means pounds per square inch gauge.

"RMA" means Rubber Manufacturers Association.

"SAE" means Society of Automotive Engineers.

"TFI" means The Fertilizer Institute.

"TSC" means Trailer Standard Code.

"UL" means Underwriters' Laboratories, Inc.

"USASI" means United States of America Standards Institute.

"USC" means United States Code.

"USCG" means United States Coast Guard.

"WAC" means Washington Administrative Code.

"WISHA" means Washington Industrial Safety and Health Act of 1973.

[Statutory Authority: Chapter 49.17 RCW. 95-04-007, § 296-155-012, filed 1/18/95, effective 3/1/95. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-012, filed 1/21/86; Order 74-26, § 296-155-012, filed 5/7/74, effective 6/6/74.]

WAC 296-155-015 Education and first-aid standards. It shall be the duty of every employer to comply with such standards and systems of education for safety as shall be, from time to time, prescribed for such employer by the

(2001 Ed.)

director of labor and industries or by statute. Refer to WAC 296-155-100 through 296-155-135 for additional requirements.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-015, filed 7/20/94, effective 9/20/94; Order 74-26, § 296-155-015, filed 5/7/74, effective 6/6/74.]

WAC 296-155-020 Housekeeping. (1) All places of employment shall be kept clean to the extent that the nature of the work allows.

(2) To facilitate cleaning, every floor, working surface, and passageway shall be kept free from protruding nails, splinters, loose boards or openings.

(3) Cleaning and sweeping shall be performed in such a manner as to minimize the contamination of the air with dust.

(4) In areas where workers may pass or perform duties, all debris and accumulations of material shall be removed. Hoses and electrical conductors across aisles or passageways shall be covered or suspended overhead so that there is no tripping hazard.

(5) Where mechanical handling equipment is used, sufficient safe clearances shall be allowed for aisles, at loading docks, through doorways and wherever turns or passages must be made. Such aisles and passageways shall be marked.

(6) Storage of material shall not create a hazard. Bags, containers, bundles, construction materials and other equipment shall be stored in tiers, stacked, blocked or interlocked. They shall be limited in height so that they are stable and secure against falling, sliding, or collapse.

(7) Free access shall be maintained at all times to all exits, fire alarm boxes, fire extinguishing equipment, and any other emergency equipment. Free access means clear of all obstructions.

(8) Working and storage areas shall be kept free from accumulation of materials that pose hazards of tripping, fire, explosion, or pest harborage. Vegetation control shall be exercised.

(9) All lunchrooms, washrooms and restrooms shall be kept in a clean and sanitary condition. Garbage cans in lunchrooms and restrooms shall be equipped with fitted covers and the contents disposed of daily.

(10) During the course of construction, alteration, repair or demolition of buildings and structures, employers shall ensure continuous clean-up of their work area, including removal of all rubble, scrap, boxes, crates and excess material to trash disposal areas.

(11) Containers shall be provided for the collection and separation of waste, trash, oily or used rags, and other refuse. Containers used for garbage and other oily, flammable or hazardous wastes, such as caustics, acids, harmful dusts or similar materials shall be equipped with covers. Common garbage and other waste shall be disposed of at frequent and regular intervals. Chemical agents or substances which might react to create a hazardous condition shall be stored and disposed of separately. All hazardous wastes which are subject to the requirements of chapter 173-303 WAC shall be handled, accumulated and disposed of in accordance with that chapter.

(12) All floors and walkways shall be maintained in good condition. Loose or broken components shall be

repaired or replaced. Secure footing shall be ensured on all floors and walkways.

[Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-020, filed 1/21/86; Order 74-26, § 296-155-020, filed 5/7/74, effective 6/6/74.]

WAC 296-155-030 Acceptable certifications. (1) Pressure vessels. Current and valid certification by an insurance company or regulatory authority shall be deemed as acceptable evidence of safe installation, inspection, testing of pressure vessels provided by the employer.

(2) Boilers. Boilers provided by the employer shall be deemed to be in compliance with the requirements of this section when evidence of current and valid certification by an insurance company or regulatory authority attesting to the safe installation, inspection, and testing is presented.

(3) Other requirements. Regulations prescribing specific requirements for other types of pressure vessels and similar equipment are contained in Parts D and M of this chapter.

[Order 74-26, § 296-155-030, filed 5/7/74, effective 6/6/74.]

WAC 296-155-035 General requirements. (1) The use of any machinery, tool, material, or equipment which is not in compliance with any applicable requirements of this chapter is prohibited. Such machine, tool, material, or equipment shall either be identified as unsafe by tagging or locking the controls to render them inoperable or shall be physically removed from its place of operation.

(2) The employer shall permit only those employees qualified by training or experience to operate equipment and machinery.

(3) Employees shall use safeguards provided for their protection.

(4) Suitable clothing shall be worn for the job. Sufficient and proper clothing shall be worn to assist in preventing scratches, abrasions, slivers, sunburn, hot liquid burns, or similar hazards. Loose or ragged clothing, scarfs or ties shall not be worn while working around moving machinery.

(5) Where work is in progress above workers, a catch platform or other means shall be provided to protect those working below. All workers shall be notified. One completed floor shall be maintained between workers and steel or concrete work above.

(6) Employees shall report to their employers the existence of any unsafe equipment or method or any other hazard which, to their knowledge is unsafe and where such unsafe equipment or method or other hazard exists in violation of this chapter it shall be corrected.

(7) Nothing herein contained shall prevent the use of existing equipment during its lifetime provided it shall be properly safeguarded, maintained in good condition, be in conformity with applicable safety and health standards, and shall conform to safety factors for the material used, as herein provided.

(8) As construction progresses, the component parts of structures shall be secured or braced to prevent collapse or failure.

(9) Prompt and safe removal of injured employees from elevated work locations, trenches and excavations shall be ensured prior to commencement of work.

[Title 296 WAC—p. 2216]

[Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-035, filed 1/21/86; Order 74-26, § 296-155-035, filed 5/7/74, effective 6/6/74.]

WAC 296-155-040 Safe place standards. (1) Each employer shall furnish to each employee a place of employment free from recognized hazards that are causing or likely to cause serious injury or death to employees.

(2) Every employer shall require safety devices, furnish safeguards, and shall adopt and use practices, methods, operations, and processes which are reasonably adequate to render such employment and place of employment safe. Every employer shall do everything reasonably necessary to protect the life and safety of employees.

(3) No employer shall require any employee to go or be in any employment or place of employment which is hazardous to the employee.

(4) No employer shall fail or neglect:

(a) To provide and use safety devices and safeguards.

(b) To adopt and use methods and processes reasonably adequate to render the employment and place of employment safe.

(c) To do everything reasonably necessary to protect the life and safety of employees.

(5) No employer, owner, or lessee of any real property shall construct or cause to be constructed any place of employment that is hazardous to the employee.

(6) No person shall do any of the following:

(a) Remove, displace, damage, destroy or carry off any safety device, safeguard, notice, or warning, furnished for use in any employment or place of employment.

(b) Interfere in any way with the use thereof by any other person.

(c) Interfere with the use of any method or process adopted for the protection of any employee, including themselves, in such employment, or place of employment.

(d) Fail or neglect to do everything reasonably necessary to protect the life and safety of employees.

(7) The use of intoxicants or debilitating drugs while on duty is prohibited. Employees under the influence of intoxicants or drugs shall not be permitted in or around worksites. This subsection (7) shall not apply to employees taking prescription drugs or narcotics as directed and prescribed by a physician, provided such use does not endanger the employee or others.

[Statutory Authority: Chapter 49.17 RCW, 94-15-096 (Order 94-07), § 296-155-040, filed 7/20/94, effective 9/20/94; Order 74-26, § 296-155-040, filed 5/7/74, effective 6/6/74.]

PART B-1 OCCUPATIONAL HEALTH AND ENVIRONMENTAL CONTROL

WAC 296-155-100 Management's responsibility. (1) It shall be the responsibility of management to establish, supervise, and enforce, in a manner which is effective in practice:

(a) A safe and healthful working environment.

(b) An accident prevention program as required by these standards.

(2001 Ed.)

(c) Training programs to improve the skill and competency of all employees in the field of occupational safety and health.

(2) Employees required to handle or use poisons, caustics, and other harmful substances shall be instructed regarding the safe handling and use, and be made aware of the potential hazards, personal hygiene, and personal protective measures required.

(3) In job site areas where harmful plants or animals are present, employees who may be exposed shall be instructed regarding the potential hazards, and how to avoid injury, and the first aid procedures to be used in the event of injury.

(4) Employees required to handle or use flammable liquids, gases, or toxic materials shall be instructed in the safe handling and use of these materials and made aware of the specific requirements contained in Parts B, D, and other applicable parts of this standard.

(5) Permit-required confined spaces. The requirements of chapters 296-24, 296-62 and 296-155 WAC apply.

(6) The employer shall ensure that work assignments place no employee in a position or location not within ordinary calling distance of another employee able to render assistance in case of emergency.

Note: This subsection does not apply to operators of motor vehicles, watchpersons or other jobs which, by their nature, are single employee assignments. However, a definite procedure for checking the welfare of all employees during working hours should be instituted and all employees so advised.

(7) Each employer shall post and keep posted a notice or notices (Job Safety and Health Protection - Form F416-081-000) to be furnished by the department of labor and industries, informing employees of the protections and obligations provided for in the act and that for assistance and information, including copies of the act, and of specific safety and health standards employees should contact the employer or the nearest office of the department of labor and industries. Such notice or notices shall be posted by the employer at each establishment in a conspicuous place or places where notices to employees are customarily posted. Each employer shall take steps to assure that such notices are not altered, defaced, or covered by other material.

[Statutory Authority: Chapter 49.17 RCW. 95-04-007, § 296-155-100, filed 1/18/95, effective 3/1/95; 94-15-096 (Order 94-07), § 296-155-100, filed 7/20/94, effective 9/20/94; 91-24-017 (Order 91-07), § 296-155-100, filed 11/22/91, effective 12/24/91. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-100, filed 1/21/86; Order 76-6, § 296-155-100, filed 3/1/76; Order 74-26, § 296-155-100, filed 5/7/74, effective 6/6/74.]

WAC 296-155-105 Employee's responsibility. (1) Employees shall coordinate and cooperate with all other employees in an attempt to eliminate accidents.

(2) Employees shall study and observe all safety standards governing their work.

(3) Employees shall apply the principles of accident prevention in their daily work and shall use proper safety devices and protective equipment as required by their employment or employer.

(4) Employees shall properly care for all personal protective equipment.

(2001 Ed.)

(5) Employees shall make a report, on the day of the incident, to their immediate supervisor, of each industrial injury or occupational illness, regardless of the degree of severity.

[Order 74-26, § 296-155-105, filed 5/7/74, effective 6/6/74.]

WAC 296-155-110 Accident prevention program. (1) Exemptions. Workers of employers whose primary business is other than construction, who are engaged solely in maintenance and repair work, including painting and decorating, are exempt from the requirement of this section provided:

(a) The maintenance and repair work, including painting and decorating, is being performed on the employer's premises, or facility.

(b) The length of the project does not exceed one week.

(c) The employer is in compliance with the requirements of WAC 296-24-040 Accident prevention programs, and WAC 296-24-045, Safety and health committee plan.

(2) Each employer shall develop a formal accident-prevention program, tailored to the needs of the particular plant or operation and to the type of hazard involved. The department may be contacted for assistance in developing appropriate programs.

(3) The following are the minimal program elements for all employers:

A safety orientation program describing the employer's safety program and including:

(a) How, where, and when to report injuries, including instruction as to the location of first-aid facilities.

(b) How to report unsafe conditions and practices.

(c) The use and care of required personal protective equipment.

(d) The proper actions to take in event of emergencies including the routes of exiting from areas during emergencies.

(e) Identification of the hazardous gases, chemicals, or materials involved along with the instructions on the safe use and emergency action following accidental exposure.

(f) A description of the employer's total safety program.

(g) An on-the-job review of the practices necessary to perform the initial job assignments in a safe manner.

(4) Each accident-prevention program shall be outlined in written format.

(5) Every employer shall conduct crew leader-crew safety meetings as follows:

(a) Crew leader-crew safety meetings shall be held at the beginning of each job, and at least weekly thereafter.

(b) Crew leader-crew meetings shall be tailored to the particular operation.

(6) Crew leader-crew safety meetings shall address the following:

(a) A review of any walk-around safety inspection conducted since the last safety meeting.

(b) A review of any citation to assist in correction of hazards.

(c) An evaluation of any accident investigations conducted since the last meeting to determine if the cause of the unsafe acts or unsafe conditions involved were properly identified and corrected.

(d) Attendance shall be documented.

(e) Subjects discussed shall be documented.

Note: Subcontractors and their employees may, with the permission of the general contractor, elect to fulfill the requirements of subsection (5)(a) and (b) of this section by attending the prime contractors crew leader-crew safety meeting. Any of the requirements of subsections (6)(a), (b), (c), and (7) of this section not satisfied by the prime contractors safety meetings shall be the responsibility of the individual employers.

(7) Minutes of each crew leader-crew meeting shall be prepared and a copy shall be maintained at the location where the majority of the employees of each construction site report for work each day.

(8) Minutes of crew leader-crew safety meetings shall be retained by the employer for at least one year and shall be made available for review by personnel of the department, upon request.

(9) Every employer shall conduct walk-around safety inspections as follows:

(a) At the beginning of each job, and at least weekly thereafter, a walk-around safety inspection shall be conducted jointly by one member of management and one employee, elected by the employees, as their authorized representative.

(b) The employer shall document walk-around safety inspections and such documentation shall be available for inspection by personnel of the department.

(c) Records of walk-around inspections shall be maintained by the employer until the completion of the job.

[Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050. 00-08-078, § 296-155-110, filed 4/4/00, effective 7/1/00. Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-110, filed 7/20/94, effective 9/20/94; 92-09-148 (Order 92-01), § 296-155-110, filed 4/22/92, effective 5/25/92. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-110, filed 1/21/86; Order 74-26, § 296-155-110, filed 5/7/74, effective 6/6/74.]

WAC 296-155-115 Safety bulletin board. There shall be installed and maintained in every fixed establishment (the place where employees regularly report to work) employing eight or more persons, a safety bulletin board sufficient in size to display and post safety bulletins, newsletters, posters, accident statistics and other safety educational material.

[Order 74-26, § 296-155-115, filed 5/7/74, effective 6/6/74.]

WAC 296-155-120 First-aid training and certification. This section is designed to assure that all employees in this state are afforded quick and effective first-aid attention in the event of an on the job injury. To achieve this purpose the presence of personnel trained in first-aid procedures at or near those places where employees are working is required. Compliance with the provisions of this section may require the presence of more than one first-aid trained person.

(1) The first-aid training requirements of the general safety and health standards, chapter 296-24 WAC, Part A-1 apply within the scope of chapter 296-155 WAC.

(2) Each employer must have available at all worksites, where a crew is present, a person or persons holding a valid first-aid certificate.

(3) All crew leaders, supervisors or persons in direct charge of one or more employees must have a valid first-aid certificate.

[Title 296 WAC—p. 2218]

(4) For the purposes of this section, a crew means a group of two or more employees working at any worksite.

Note: The requirement that all crew leaders, supervisors or person in direct charge of one or more employees (subsection (3) of this section) applies even if other first-aid trained person(s) are available. In emergencies, crew leaders will be permitted to work up to thirty days without having the required certificate, providing an employee in the crew or another crew leaders in the immediate work area has the necessary certificate.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 00-01-038, § 296-155-120, filed 12/7/99, effective 2/1/00. Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-120, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-120, filed 1/21/86; Order 74-26, § 296-155-120, filed 5/7/74, effective 6/6/74.]

WAC 296-155-125 First-aid supplies. (1) The first-aid kits and supplies requirements of the general safety and health standards, chapter 296-24 WAC, Part A-1 apply within the scope of chapter 296-155 WAC.

(2) All vehicles used to transport work crews must be equipped with first-aid supplies.

(3) When practical, a poster must be fastened and maintained either on or in the cover of each first-aid kit and at or near all phones plainly stating the worksite address or location, and the phone numbers of emergency medical responders for the worksite.

(4) Requirements of WAC 296-62-130, Emergency washing facilities, apply within the scope of chapter 296-155 WAC.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 00-01-038, § 296-155-125, filed 12/7/99, effective 2/1/00. Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-125, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-125, filed 1/21/86; Order 74-26, § 296-155-125, filed 5/7/74, effective 6/6/74.]

WAC 296-155-130 First-aid station. Employers with fifty or more employees per shift at one location must establish a first-aid station in accordance with the requirements in chapter 296-24 WAC, Part A-1.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 00-01-038, § 296-155-130, filed 12/7/99, effective 2/1/00. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-130, filed 1/21/86; Order 74-26, § 296-155-130, filed 5/7/74, effective 6/6/74.]

WAC 296-155-140 Sanitation. (1) Potable water.

(a) An adequate supply of potable water shall be provided in all places of employment.

(b) Portable containers used to dispense drinking water shall be capable of being tightly closed and equipped with a tap. Water shall not be dipped from containers.

(c) Any container used to distribute drinking water shall be clearly marked as to the nature of its contents and not used for any other purpose.

(d) The common drinking cup is prohibited.

(e) Where single service cups (to be used but once) are supplied, both a sanitary container for the unused cups and a receptacle for disposing of the used cups shall be provided.

(f) All water containers used to furnish drinking water shall be thoroughly cleaned at least once each week or more often as conditions require.

(g) The requirements of this subsection do not apply to mobile crews or to normally unattended work locations as long as employees working at these locations have transportation immediately available, within the normal course of their duties, to nearby facilities otherwise meeting the requirements of this section.

(h) The following definitions apply:

(i) Mobile crew: A work crew that routinely moves to a different work location periodically. Normally a mobile crew is not at the same location all day.

(ii) Normally unattended work location: An unattended site that is visited occasionally by one or more employees.

(iii) Nearby facility: A sanitary facility that is within three minutes travel by the transportation provided.

(iv) "Potable water" means water which meets the quality standards for drinking purposes of state or local authority having jurisdiction or water that meets the quality standards prescribed by the United States Environmental Protection Agency's National Interim Primary Drinking Water Regulations, published in 40 CFR Part 141, and 40 CFR 147.2400.

(2) Wash water.

(a) Clean, tepid wash water, between 70 and 100 degrees Fahrenheit, shall be provided at all construction sites.

(b) Individual hand towels shall be provided. Both a sanitary container for the unused towels and a receptacle for disposal of used towels shall be provided.

(c) Hand soap, industrial hand cleaner or similar cleansing agents shall be provided. Cleansing agents shall be adequate to remove any paints, coatings, herbicides, insecticides or other contaminants.

(d) The requirements of this subsection do not apply to mobile crews or to normally unattended work locations as long as employees working at these locations have transportation immediately available, within the normal course of their duties, to nearby facilities otherwise meeting the requirements of this section.

(e) Gasoline or solvents shall not be used for personal cleaning.

(f) Wash water areas will be maintained in a dry condition. Slipping or other hazards shall be eliminated from the wash water area before it is acceptable for use.

(3) Nonpotable water.

(a) Outlets for nonpotable water, such as water for industrial or fire fighting purposes only, shall be identified by signs meeting the requirements of Part E of this chapter, to indicate clearly that the water is unsafe and is not to be used for drinking, washing or cooking purposes.

(b) There shall be no cross-connection, open or potential, between a system furnishing potable water, a system furnishing nonpotable water or a system furnishing wash water.

(4) Toilets.

(a) The provisions of this section apply to both portable chemical toilets and to flush toilets, except where flush toilets are used the requirements of WAC 296-24-12007 (1)(a) shall apply instead of (b) of this subsection.

(b) Accessible toilets shall be provided for employees according to the following table:

TABLE B-1

<u>Number of Employees</u>	<u>Toilets Required</u>
1 - 10	1
11 - 25	2
26 - 40	3
41 - 60	4
61 - 80	5
Over 80	one additional toilet for each additional twenty employees or any fraction thereof.

(c) When the employer provides both flush and portable chemical toilets, the number of employees allowed to be served by the flush toilets, per WAC 296-24-12007 (1)(a) will be calculated. That number will be subtracted from the total number of employees and the employer will be required to provide an adequate number of portable chemical toilets for the number of remaining employees, as required by (b) of this subsection.

(d) Toilets shall be maintained in clean, sanitary and functional condition. Internal latches shall be provided to secure the units from inadvertent entry. Where there are twenty or more employees consisting of both sexes, facilities shall be provided for each sex.

(i) Each unit shall be properly cleaned on a routine basis.

(ii) Chemicals, toilet tissue and sanitary seat covers shall be maintained in a supply sufficient for use during the entire shift.

(iii) Any defective or inadequate unit shall be immediately removed from service.

(e) Specifications. The following specifications apply:

(i) A noncaustic chemical toilet (portable chemical toilet) is a self-contained unit equipped with a waste receiving chemical holding container.

(ii) Portable chemical toilets consisting of only a holding tank, commonly referred to as "elevator units" or "elevator toilets" are not acceptable. "Elevator units" may be used if they are individually located in a lockable room which affords privacy. When this type unit is used in a private individual lockable room the entire room will be considered a toilet facility, as such the room will meet all requirements of toilet facilities and be inspected in accordance with subsection (5)(b)(iii) of this section.

(iii) Rooms, buildings or shelters housing toilets shall be of sound construction, easy to clean, provide shelter and provide privacy. The toilet rooms shall be ventilated to the outside and adequately lighted. All openings into the toilet room shall be covered with 16-mesh screen.

(iv) Toilets shall be serviced on a regular schedule. Servicing shall include the use of a disinfectant for cleaning urinals and seats, removing waste from containers, recharging containers with an odor controlling chemical and installing an adequate supply of toilet tissue and seat covers.

(v) Service shall be performed in accordance with local codes by approved servicing organizations. Waste shall be disposed of or discharged in accordance with requirements of local health department regulations.

(vi) Waste containers shall be fabricated from impervious materials, e.g. plastic, steel, fiberglass or their equivalent. Containers shall be water tight and capable of containing the chemical waste in a sanitary manner. The container shall be fitted to the building in a manner so as to prevent insects from entering from the exterior of the building. Containers shall be adequate in size to be used by the number of persons, according to the schedule for minimum requirements, without filling the container to more than half of its volume before regularly scheduled servicing.

(vii) Removal of waste shall be handled in a clean and sanitary manner by means of a vacuum hose and received by a leak-proof tank truck. All valves on the tank shall be leak-proof.

(viii) Provisions shall be made so service trucks have a clear approach and convenient access to the toilets to be serviced.

(ix) Disposal of waste from tank trucks shall be in accordance with local health department requirements. In the absence of provisions by local health departments, waste must be disposed of through municipal or district sanitary sewage systems. Municipal or area sanitary sewage districts shall provide sewage disposal locations and facilities which are adequate and convenient for duly authorized toilet service organizations.

(f) The requirements of this subsection do not apply to mobile crews or to normally unattended work locations as long as employees working at these locations have transportation immediately available, within the normal course of their duties, to nearby facilities otherwise meeting the requirements of this section.

(5)(a) On multi-employer worksites, the prime contractor shall ensure that the requirements of this section are met. Each employer is responsible for seeing that facilities for their own employees are provided.

(b) Each employer shall ensure, at the beginning of each shift, that the sanitation facilities required by this section are inspected. If any facility or unit fails to meet the following requirements, immediate corrective action shall be taken. Such action shall be documented and maintained at the site for at least 72 hours. Inspection shall establish:

(i) Potable water: Sufficient supply of water, sufficient supply of cups, container integrity, cleanliness of unit and area, capacity of trash receptacle (empty).

(ii) Wash water: Sufficient supply of clean water, proper temperature, sufficient supply of towels, sufficient supply of cleansing agents, container integrity, cleanliness of unit and area without the presence of physical hazards, capacity of trash receptacle (empty).

(iii) Toilets: Sufficient supply of toilet tissue and sanitary seat covers, capacity and condition of chemical agent, capacity and condition of holding tank, cleanliness of unit and area without the presence of physical hazards, physical and structural condition of unit, condition of lock, condition of toilet seat and tissue holder, absence of all foreign debris.

(c) The location of the facilities required by subsections (1), (2) and (4) of this section shall be as close as practical to the highest concentration of employees.

(i) On multistory structures they shall be furnished on every third floor.

(ii) At all sites they shall be located within 200 feet horizontally of all employees.

(iii) The requirements of subsection (5)(c)(i) and (ii) do not apply to mobile crews or to normally unattended work locations as long as employees working at these locations have transportation immediately available, within the normal course of their duties, to nearby facilities otherwise meeting the requirements of this section.

(6) Food handling. All employees' food service facilities and operations shall meet the applicable laws, ordinances and regulations of the jurisdictions in which they are located.

(7) Temporary sleeping quarters. When temporary sleeping quarters are provided, they shall be heated, ventilated and lighted.

[Statutory Authority: Chapter 49.17 RCW, 94-15-096 (Order 94-07), § 296-155-140, filed 7/20/94, effective 9/20/94; 89-11-035 (Order 89-03), § 296-155-140, filed 5/15/89, effective 6/30/89. Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-140, filed 1/21/86; Order 74-26, § 296-155-140, filed 5/7/74, effective 6/6/74.]

WAC 296-155-145 Occupational noise exposure. The occupational noise exposure requirements of the general occupational health standards, chapter 296-62 WAC, shall apply.

[Statutory Authority: RCW 49.17.040 and 49.17.050, 85-01-022 (Order 84-24), § 296-155-145, filed 12/11/84; 83-15-017 (Order 83-19), § 296-155-145, filed 7/13/83, effective 9/12/83; Order 76-29, § 296-155-145, filed 9/30/76; Order 74-26, § 296-155-145, filed 5/7/74, effective 6/6/74.]

WAC 296-155-150 Ionizing radiation. (1) In construction and related activities involving the use of sources of ionizing radiation, the pertinent provisions of the Nuclear Regulatory Commission's Standards for Protection Against Radiation, relating to protection against occupational radiation exposure, shall apply.

(2) Any activity which involves the use of radioactive material or x-ray, whether or not under license from the Nuclear Regulatory Commission, shall be performed by competent persons specially trained in the proper and safe operation of such equipment. In the case of materials used under commission license, only persons actually licensed, or competent persons under direction and supervision of the licensee shall perform such work.

[Statutory Authority: Chapter 49.17 RCW, 94-15-096 (Order 94-07), § 296-155-150, filed 7/20/94, effective 9/20/94; Order 74-26, § 296-155-150, filed 5/7/74, effective 6/6/74.]

WAC 296-155-155 Nonionizing radiation. (1) Only qualified and trained employees shall be assigned to install, adjust, and operate laser equipment.

(2) Proof of qualification of the laser equipment operator shall be available and in possession of operator at all times.

(3) Employees, when working in areas in which a potentially hazardous exposure (see WAC 296-62-09005(4)) to direct or reflected laser radiation exists, shall be provided with antilaser eye protection devices specified in Part C of this chapter.

(4) Areas in which Class II and III lasers are used shall be posted with standard laser warning placards.

(5) Beam shutters or caps shall be utilized, or the laser turned off, when laser transmission is not actually required. When the laser is left unattended for a substantial period of time, such as during lunch hour, overnight, or at change of shifts, the laser shall be turned off.

(6) Only mechanical or electronic means shall be used as a detector for guiding the internal alignment of the laser.

(7) The laser beam shall not be directed at employees.

(8) When it is raining or snowing, or when there is dust or fog in the air, and it is impracticable to cease laser system operation, employees shall be kept out of range of the area of source and target during such weather conditions.

(9) Laser equipment shall bear a conspicuously displayed label to indicate hazard classification. This label shall be prepared in accordance with 21 CFR 1040.10.

(10) Only Class I, II, or III laser equipment shall be used. Class IV laser equipment shall not be used.

(11) Laser unit in operation shall be set up above the heads of the employees, when possible.

(12) Employees shall not be exposed to radiofrequency/microwave radiation in excess of the permissible exposure limits specified in WAC 296-62-09005.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-155, filed 1/21/86; 85-01-022 (Order 84-24), § 296-155-155, filed 12/11/84; Order 74-26, § 296-155-155, filed 5/7/74, effective 6/6/74.]

WAC 296-155-160 Gases, vapors, fumes, dusts, and mists. (1) Exposure of employees to inhalation, ingestion, skin absorption, or contact with any material or substance at a concentration above those specified in the general occupational health standards, WAC 296-62-07515 shall be avoided.

(2) To achieve compliance with subsection (1) of this section, administrative or engineering controls must first be implemented whenever feasible. When such controls are not feasible to achieve full compliance, protective equipment or other protective measures shall be used to keep the exposure of employees to air contaminants within the limits prescribed in WAC 296-62-07515. Any equipment and technical measures used for this purpose must first be approved for each particular use by a competent industrial hygienist or other technically qualified person. Whenever respirators are used, their use shall comply with WAC 296-155-220.

(3) Whenever internal combustion equipment exhausts in enclosed spaces, tests shall be made and recorded to ensure that employees are not exposed to unsafe concentrations of toxic gases or oxygen deficient atmospheres. See chapter 296-62 WAC, the general occupational health standards.

(4) Whenever any employee is exposed to asbestos, the provisions of the general occupational health standards, chapter 296-62 WAC shall apply.

(5) Subsections (1) and (2) of this section do not apply to the exposure of employees to formaldehyde. Whenever any employee is exposed to formaldehyde, the requirements of WAC 296-62-07540 shall apply.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-160, filed 7/20/94, effective 9/20/94; 88-14-108 (Order 88-11), § 296-155-160, filed 7/6/88; 87-24-051 (Order 87-24), § 296-155-160, filed 11/30/87. Statutory Authority: RCW 49.17.050(2) and 49.17.040. 87-10-008 (Order 87-06), § 296-155-160, filed 4/27/87. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-160, filed

(2001 Ed.)

1/21/86. Statutory Authority: RCW 49.17.040 and 49.17.050. 83-24-013 (Order 83-34), § 296-155-160, filed 11/30/83; Order 74-26, § 296-155-160, filed 5/7/74, effective 6/6/74.]

WAC 296-155-165 Lighting and illumination. (1) Lighting which is adjusted to provide a margin of safety in production and inspection tasks shall be provided and maintained. The minimum level of task lighting in all indoor work places shall be an average of ten foot-candles measured thirty inches above the floor. MSHA approved cap lights are acceptable for use in tunnel headings.

(2) Whenever general lighting of an entire area is not provided, illumination sufficient to provide visibility of potentially hazardous objects and emergency control equipment shall be supplied. The minimum level of nontask lighting in all indoor work places shall be an average of three foot-candles measured thirty inches above the floor.

(3) Diffusion and distribution of artificial and natural light. Artificial light sources shall be installed with regard to mounting height, spacing and reflectors or other suitable accessories so as to secure a reasonably uniform distribution of illumination and to avoid glare and sharply defined shadows which could temporarily reduce a person's ability to see clearly.

Note: This section establishes minimal levels of illumination for safety purposes only. Guidelines pertaining to optimal levels of lighting and illumination may be found in Practice for Industrial Lighting ANSI/IES RP7-1979.

(4) The minimum levels specified in subsections (1) and (2) of this section represent averages with the lowest level in an area to be no less than fifty percent of the indicated value.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-165, filed 1/21/86; Order 74-26, § 296-155-165, filed 5/7/74, effective 6/6/74.]

WAC 296-155-170 Ventilation. (1) General. Whenever hazardous substances such as dusts, fumes, mists, vapors, or gases exist or are produced in the course of construction work, their concentrations shall not exceed the limits specified in WAC 296-155-160(1). When ventilation is used as an engineering control method, the system shall be installed and operated according to the requirements of this section.

(2) Local exhaust ventilation. Local exhaust ventilation when used as described in (1) shall be designed to prevent dispersion into the air of dusts, fumes, mists, vapors, and gases in concentrations causing harmful exposure. Such exhaust systems shall be so designed that dusts, fumes, mists, vapors, or gases are not drawn through the work area of employees.

(3) Design and operation. Exhaust fans, jets, ducts, hoods, separators, and all necessary appurtenances, including refuse receptacles, shall be so designed, constructed, maintained and operated as to ensure the required protection by maintaining a volume and velocity of exhaust air sufficient to gather dusts, fumes, vapors, or gases from said equipment or process, and to convey them to suitable points of safe disposal, thereby preventing their dispersion in harmful quantities into the atmosphere where employees work.

(4) Duration of operations.

(a) The exhaust system shall be in operation continually during all operations which it is designed to serve. If the employee remains in the contaminated zone, the system shall continue to operate after the cessation of said operations, the length of time to depend upon the individual circumstances and effectiveness of the general ventilation system.

(b) Since dust capable of causing disability is, according to the best medical opinion, of microscopic size, tending to remain for hours in suspension in still air, it is essential that the exhaust system be continued in operation for a time after the work process or equipment served by the same shall have ceased, in order to ensure the removal of the harmful elements to the required extent.

Note: For the same reason, employees wearing respiratory equipment should not remove same immediately until a clear atmosphere has been established.

(5) Disposal of exhaust materials. The air outlet from every dust separator, and the dusts, fumes, mists, vapors, or gases collected by an exhaust or ventilating system shall discharge to the outside atmosphere. Collecting systems which return air to work area may be used if concentrations which accumulate in the work area air do not result in harmful exposure to employees. Dust and refuse discharged from an exhaust system shall be disposed of in such a manner that it will not result in harmful exposure to employees.

[Order 74-26, § 296-155-170, filed 5/7/74, effective 6/6/74.]

WAC 296-155-173 Methylene-dianiline.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-173, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17301 Scope and application. (1) This section applies to all construction work as defined in WAC 296-155-005, in which there is exposure to MDA, including but not limited to the following:

(a) Construction, alteration, repair, maintenance, or renovation of structures, substrates, or portions thereof, that contain MDA;

(b) Installation or the finishing of surfaces with products containing MDA;

(c) MDA spill/emergency cleanup at construction sites; and

(d) Transportation, disposal, storage, or containment of MDA or products containing MDA on the site or location at which construction activities are performed.

(2) Except as provided in subsection (7) of this section and WAC 296-155-17311(5), this standard does not apply to the processing, use, and handling of products containing MDA where initial monitoring indicates that the product is not capable of releasing MDA in excess of the action level under the expected conditions of processing, use, and handling which will cause the greatest possible release; and where no "dermal exposure to MDA" can occur.

(3) Except as provided in subsection (7) of this section, this standard does not apply to the processing, use, and handling of products containing MDA where objective data are reasonably relied upon which demonstrate the product is not capable of releasing MDA under the expected conditions of processing, use, and handling which will cause the greatest

possible release; and where no "dermal exposure to MDA" can occur.

(4) Except as provided in subsection (7) of this section, this standard does not apply to the storage, transportation, distribution, or sale of MDA in intact containers sealed in such a manner as to contain the MDA dusts, vapors, or liquids, except for the provisions of WAC 296-62-054 and 296-155-17309.

(5) Except as provided in subsection (7) of this section, this standard does not apply to materials in any form which contain less than 0.1% MDA by weight or volume.

(6) Except as provided in subsection (7) of this section, this standard does not apply to "finished articles containing MDA."

(7) Where products containing MDA are exempted under subsections (2) and (6) of this section, the employer shall maintain records of the initial monitoring results or objective data supporting that exemption and the basis for the employer's reliance on the data, as provided in the record-keeping provision of WAC 296-155-17331.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17301, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17303 Definitions. For the purpose of this standard, the following definitions shall apply:

(1) "Action level" means a concentration of airborne MDA of 5 ppb as an 8-hour time-weighted average.

(2) "Authorized person" means any person specifically authorized by the employer whose duties require the person to enter a regulated area, or any person entering such an area as a designated representative of employees for the purpose of exercising the right to observe monitoring and measuring procedures under WAC 296-155-17333, or any other person authorized by the act or regulations issued under the act.

(3) "Container" means any barrel, bottle, can, cylinder, drum, reaction vessel, storage tank, commercial packaging, or the like, but does not include piping systems.

(4) "Decontamination area" means an area outside of, but as near as practical to, the regulated area, consisting of an equipment storage area, wash area, and clean change area, which is used for the decontamination of workers, materials, and equipment contaminated with MDA.

(5) "Dermal exposure to MDA" occurs where employees are engaged in the handling, application, or use of mixtures or materials containing MDA, with any of the following nonairborne forms of MDA:

(a) Liquid, powdered, granular, or flaked mixtures containing MDA in concentrations greater than 0.1% by weight or volume; and

(b) Materials other than "finished articles" containing MDA in concentrations greater than 0.1% by weight or volume.

(6) "Director" means the director of the department of labor and industries.

(7) "Emergency" means any occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which results in an unexpected and potentially hazardous release of MDA.

(8) "Employee exposure" means exposure to MDA which would occur if the employee were not using respirators or protective work clothing and equipment.

(9) "Finished article containing MDA" is defined as a manufactured item:

(a) Which is formed to a specific shape or design during manufacture;

(b) Which has end use function(s) dependent in whole or part upon its shape or design during end use; and

(c) Where applicable, is an item which is fully cured by virtue of having been subjected to the conditions (temperature, time) necessary to complete the desired chemical reaction.

(10) "Historical monitoring data" means monitoring data for construction jobs that meet the following conditions:

(a) The data upon which judgments are based are scientifically sound and were collected using methods that are sufficiently accurate and precise;

(b) The processes and work practices that were in use when the historical monitoring data were obtained are essentially the same as those to be used during the job for which initial monitoring will not be performed;

(c) The characteristics of the MDA-containing material being handled when the historical monitoring data were obtained are the same as those on the job for which initial monitoring will not be performed;

(d) Environmental conditions prevailing when the historical monitoring data were obtained are the same as those on the job for which initial monitoring will not be performed; and

(e) Other data relevant to the operations, materials, processing, or employee exposures covered by the exception are substantially similar. The data must be scientifically sound, the characteristics of the MDA containing material must be similar, and the environmental conditions comparable.

(11) "4,4' methylenedianiline" or "MDA" means the chemical 4,4'-diaminodiphenylmethane, Chemical Abstract Service Registry Number 101-77-9, in the form of a vapor, liquid, or solid. The definition also includes the salts of MDA.

(12) "Regulated areas" means areas where airborne concentrations of MDA exceed or can reasonably be expected to exceed, the permissible exposure limits, or where "dermal exposure to MDA" can occur.

(13) "STEL" means short-term exposure limit as determined by any 15-minute sample period.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17303, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17305 Permissible exposure limits.

The employer shall assure that no employee is exposed to an airborne concentration of MDA in excess of ten parts per billion (10 ppb) as an 8-hour time-weighted average and a STEL of one hundred parts per billion (100 ppb).

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17305, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17307 Communication among employers. On multi-employer worksites, an employer performing work involving the application of MDA or materials

(2001 Ed.)

containing MDA for which establishment of one or more regulated areas is required shall inform other employers on the site of the nature of the employer's work with MDA and of the existence of, and requirements pertaining to, regulated areas.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17307, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17309 Emergency situations. (1) Written plan.

(a) A written plan for emergency situations shall be developed for each construction operation where there is a possibility of an emergency. The plan shall include procedures where the employer identifies emergency escape routes for her or his employees at each construction site before the construction operation begins. Appropriate portions of the plan shall be implemented in the event of an emergency.

(b) The plan shall specifically provide that employees engaged in correcting emergency conditions shall be equipped with the appropriate personal protective equipment and clothing as required in WAC 296-155-17317 and 296-155-17319 until the emergency is abated.

(c) The plan shall specifically include provisions for alerting and evacuating affected employees as well as the applicable elements prescribed in WAC 296-24-567, "Employee emergency plans and fire prevention plans."

(2) Alerting employees. Where there is the possibility of employee exposure to MDA due to an emergency, means shall be developed to promptly alert employees who have the potential to be directly exposed. Affected employees not engaged in correcting emergency conditions shall be evacuated immediately in the event that an emergency occurs. Means shall also be developed for alerting other employees who may be exposed as a result of the emergency.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17309, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17311 Exposure monitoring. (1) General.

(a) Determinations of employee exposure shall be made from breathing zone air samples that are representative of each employee's exposure to airborne MDA over an 8-hour period. Determination of employee exposure to the STEL shall be made from breathing zone air samples collected over a 15 minute sampling period.

(b) Representative employee exposure shall be determined on the basis of one or more samples representing full shift exposure for each shift for each job classification in each work area where exposure to MDA may occur.

(c) Where the employer can document that exposure levels are equivalent for similar operations in different work shifts, the employer shall only be required to determine representative employee exposure for that operation during one shift.

(2) Initial monitoring. Each employer who has a workplace or work operation covered by this standard shall perform initial monitoring to determine accurately the airborne concentrations of MDA to which employees may be exposed unless:

(a) The employer can demonstrate, on the basis of objective data, that the MDA-containing product or material being handled cannot cause exposures above the standard's action level, even under worst-case release conditions; or

(b) The employer has historical monitoring or other data demonstrating that exposures on a particular job will be below the action level.

(3) Periodic monitoring and monitoring frequency.

(a) If the monitoring required by subsection (2)(b) of this section reveals employee exposure at or above the action level, but at or below the PELs, the employer shall repeat such monitoring for each such employee at least every 6 months.

(b) If the monitoring required by subsection (2)(b) of this section reveals employee exposure above the PELs, the employer shall repeat such monitoring for each such employee at least every 3 months.

(c) Employers who are conducting MDA operations within a regulated area can forego periodic monitoring if the employees are all wearing supplied-air respirators while working in the regulated area.

(d) The employer may alter the monitoring schedule from every three months to every six months for any employee for whom two consecutive measurements taken at least 7 days apart indicate that the employee exposure has decreased to below the PELs but above the action level.

(4) Termination of monitoring.

(a) If the initial monitoring required by subsection (2)(b) of this section reveals employee exposure to be below the action level, the employer may discontinue the monitoring for that employee, except as otherwise required by subsection (5) of this section.

(b) If the periodic monitoring required by subsection (3) of this section reveals that employee exposures, as indicated by at least two consecutive measurements taken at least 7 days apart, are below the action level the employer may discontinue the monitoring for that employee, except as otherwise required by subsection (5) of this section.

(5) Additional monitoring. The employer shall institute the exposure monitoring required under subsections (2)(b) and (c) of this section when there has been a change in production process, chemicals present, control equipment, personnel, or work practices which may result in new or additional exposures to MDA, or when the employer has any reason to suspect a change which may result in new or additional exposures.

(6) Accuracy of monitoring. Monitoring shall be accurate, to a confidence level of 95 percent, to within plus or minus 25 percent for airborne concentrations of MDA.

(7) Employee notification of monitoring results.

(a) The employer shall, within 15 working days after the receipt of the results of any monitoring performed under this standard, notify each employee of these results, in writing, either individually or by posting of results in an appropriate location that is accessible to affected employees.

(b) The written notification required by subdivision (a) of this subsection shall contain the corrective action being taken by the employer or any other protective measures which have been implemented to reduce the employee exposure to or below the PELs, wherever the PELs are exceeded.

(8) Visual monitoring. The employer shall make routine inspections of employee hands, face, and forearms potentially exposed to MDA. Other potential dermal exposures reported by the employee must be referred to the appropriate medical personnel for observation. If the employer determines that the employee has been exposed to MDA the employer shall:

(a) Determine the source of exposure;

(b) Implement protective measures to correct the hazard; and

(c) Maintain records of the corrective actions in accordance with WAC 296-155-17327.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17311, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17313 Regulated areas. (1) Establishment.

(a) Airborne exposures. The employer shall establish regulated areas where airborne concentrations of MDA exceed, or can reasonably be expected to exceed, the permissible exposure limits.

(b) Dermal exposures. Where employees are subject to "dermal exposure to MDA" the employer shall establish those work areas as regulated areas.

(2) Demarcation. Regulated areas shall be demarcated from the rest of the workplace in a manner that minimizes the number of persons potentially exposed.

(3) Access. Access to regulated areas shall be limited to authorized persons.

(4) Personal protective equipment and clothing. Each person entering a regulated area shall be supplied with, and required to use, the appropriate personal protective clothing and equipment in accordance with WAC 296-155-17317 and 296-155-17319.

(5) Prohibited activities. The employer shall ensure that employees do not eat, drink, smoke, chew tobacco or gum, or apply cosmetics in regulated areas.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17313, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17315 Methods of compliance. (1) Engineering controls and work practices and respirators.

(a) The employer shall use one or any combination of the following control methods to achieve compliance with the permissible exposure limits prescribed by WAC 296-155-17317.

(i) Local exhaust ventilation equipped with HEPA filter dust collection systems;

(ii) General ventilation systems;

(iii) Use of work practices; or

(iv) Other engineering controls such as isolation and enclosure that the director can show to be feasible.

(b) Wherever the feasible engineering controls and work practices which can be instituted are not sufficient to reduce employee exposure to or below the PELs, the employer shall use them to reduce employee exposure to the lowest levels achievable by these controls and shall supplement them by the use of respiratory protective devices which comply with the requirements of WAC 296-155-17317.

(2) Special provisions. For workers engaged in spray application methods, respiratory protection must be used in addition to feasible engineering controls and work practices to reduce employee exposure to or below the PELs.

(3) Prohibitions. Compressed air shall not be used to remove MDA unless the compressed air is used in conjunction with an enclosed ventilation system designed to capture the dust cloud created by the compressed air.

(4) Employee rotation. The employer shall not use employee rotation as a means of compliance with the exposure limits prescribed in WAC 296-155-17305.

(5) Compliance program.

(a) The employer shall establish and implement a written program to reduce employee exposure to or below the PELs by means of engineering and work practice controls, as required by subsection (1) of this section, and by use of respiratory protection where permitted under this section.

(b) Upon request this written program shall be furnished for examination and copying to the director, affected employees, and designated employee representatives. The employer shall review and, as necessary, update such plans at least once every 12 months to make certain they reflect the current status of the program.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17315, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17317 Respiratory protection. (1)

General. For employees who use respirators required by this section, the employer must provide respirators that comply with the requirements of this section. Respirators must be used during:

(a) Periods necessary to install or implement feasible engineering and work-practice controls.

(b) Work operations, such as maintenance and repair activities and spray application processes, for which engineering and work-practice controls are not feasible.

(c) Work operations for which feasible engineering and work-practice controls are not yet sufficient to reduce employee exposure to or below the PELs.

(d) Emergencies.

(2) Respirator program. The employer must implement a respiratory protection program as required by chapter 296-62 WAC, Part E (except WAC 296-62-07130(1) and 296-62-07150 through 296-62-07156).

(3) Respirator selection.

(a) The employer must select the appropriate respirator from Table 1 of this section.

Table 1.—Respiratory Protection for MDA

Airborne concentration of MDA or condition of use	Respirator type
a. Less than or equal to 10xPEL	(1) Half-mask respirator with HEPA ¹ cartridge. ²
b. Less than or equal to 50xPEL	(1) Full facepiece respirator with HEPA ¹ cartridge or canister. ²
c. Less than or equal to 1000xPEL	(1) Full facepiece powered air-purifying respirator with HEPA ¹ cartridges. ²
d. Greater than 1000xPEL or unknown	(1) Self-contained breathing concentration apparatus with full facepiece in positive pressure mode;

(2001 Ed.)

Table 1.—Respiratory Protection for MDA

Airborne concentration of MDA or condition of use	Respirator type
e. Escape	(2) Full facepiece positive-pressure demand supplied-air respirator with auxiliary self-contained air supply. (1) Any full facepiece air-purifying respirator with HEPA ¹ cartridges; ² (2) Any positive pressure or continuous flow self-contained breathing apparatus with full facepiece or hood.
f. Fire fighting	(1) Full facepiece self-contained breathing apparatus in positive pressure mode.

Note: Respirators assigned for higher environmental concentration may be used at lower concentrations.

¹High efficiency particulate in air filter (HEPA) means a filter that is at least 99.97 percent efficient against mono-dispersed particles of 0.3 micrometers or larger.

²Combination HEPA/organic vapor cartridges shall be used whenever MDA in liquid form or a process requiring heat is used.

(b) An employee who cannot use a negative-pressure respirator must be given the option of using a positive-pressure respirator, or a supplied-air respirator operated in the continuous-flow or pressure-demand mode.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-10-071, § 296-155-17317, filed 5/4/99, effective 9/1/99. Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17317, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17319 Protective work clothing and equipment. (1) Provision and use. Where employees are subject to dermal exposure to MDA, where liquids containing MDA can be splashed into the eyes, or where airborne concentrations of MDA are in excess of the PEL, the employer shall provide, at no cost to the employee, and ensure that the employee uses, appropriate protective work clothing and equipment which prevent contact with MDA such as, but not limited to:

(a) Aprons, coveralls, or other full-body work clothing;
(b) Gloves, head coverings, and foot coverings; and
(c) Face shields, chemical goggles; or
(d) Other appropriate protective equipment which comply with WAC 296-24-078.

(2) Removal and storage.
(a) The employer shall ensure that, at the end of their work shift, employees remove MDA-contaminated protective work clothing and equipment that is not routinely removed throughout the day in change areas provided in accordance with the provisions in WAC 296-155-17321.

(b) The employer shall ensure that, during their work shift, employees remove all other MDA-contaminated protective work clothing or equipment before leaving a regulated area.

(c) The employer shall ensure that no employee takes MDA-contaminated work clothing or equipment out of the decontamination areas, except those employees authorized to do so for the purpose of laundering, maintenance, or disposal.

(d) MDA-contaminated work clothing or equipment shall be placed and stored and transported in sealed, impermeable bags, or other closed impermeable containers.

[Title 296 WAC—p. 2225]

(e) Containers of MDA-contaminated protective work clothing or equipment which are to be taken out of decontamination areas or the workplace for cleaning, maintenance, or disposal, shall bear labels warning of the hazards of MDA.

(3) Cleaning and replacement.

(a) The employer shall provide the employee with clean protective clothing and equipment. The employer shall ensure that protective work clothing or equipment required by this section is cleaned, laundered, repaired, or replaced at intervals appropriate to maintain its effectiveness.

(b) The employer shall prohibit the removal of MDA from protective work clothing or equipment by blowing, shaking, or any methods which allow MDA to reenter the workplace.

(c) The employer shall ensure that laundering of MDA-contaminated clothing shall be done so as to prevent the release of MDA in the workplace.

(d) Any employer who gives MDA-contaminated clothing to another person for laundering shall inform such person of the requirement to prevent the release of MDA.

(e) The employer shall inform any person who launders or cleans protective clothing or equipment contaminated with MDA of the potentially harmful effects of exposure.

(4) Visual examination.

(a) The employer shall ensure that employees' work clothing is examined periodically for rips or tears that may occur during performance of work.

(b) When rips or tears are detected, the protective equipment or clothing shall be repaired and replaced immediately.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17319, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17321 Hygiene facilities and practices. (1) General.

(a) The employer shall provide decontamination areas for employees required to work in regulated areas or required by WAC 296-155-17319 to wear protective clothing. Exception: In lieu of the decontamination area requirement specified in this subsection, the employer may permit employees engaged in small scale, short duration operations, to clean their protective clothing or dispose of the protective clothing before such employees leave the area where the work was performed.

(b) Change areas. The employer shall ensure that change areas are equipped with separate storage facilities for protective clothing and street clothing, in accordance with WAC 296-24-12011.

(c) Equipment area. The equipment area shall be supplied with impermeable, labeled bags and containers for the containment and disposal of contaminated protective clothing and equipment.

(2) Shower area.

(a) Where feasible, shower facilities shall be provided which comply with WAC 296-24-12009(3) wherever the possibility of employee exposure to airborne levels of MDA in excess of the permissible exposure limit exists.

(b) Where dermal exposure to MDA occurs, the employer shall ensure that materials spilled or deposited on the skin are removed as soon as possible by methods which do not facilitate the dermal absorption of MDA.

(3) Lunch areas.

(a) Whenever food or beverages are consumed at the worksite and employees are exposed to MDA the employer shall provide clean lunch areas where MDA levels are below the action level and where no dermal exposure to MDA can occur.

(b) The employer shall ensure that employees wash their hands and faces with soap and water prior to eating, drinking, smoking, or applying cosmetics.

(c) The employer shall ensure that employees do not enter lunch facilities with contaminated protective work clothing or equipment.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17321, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17323 Communication of hazards to employees. (1) Signs and labels.

(a) The employer shall post and maintain legible signs demarcating regulated areas and entrances or accessways to regulated areas that bear the following legend:

DANGER MDA MAY CAUSE CANCER LIVER TOXIN
AUTHORIZED PERSONNEL ONLY
RESPIRATORS AND PROTECTIVE CLOTHING
MAY BE REQUIRED TO BE WORN IN THIS AREA

(b) The employer shall ensure that labels or other appropriate forms of warning are provided for containers of MDA within the workplace. The labels shall comply with the requirements of WAC 296-62-05411 and shall include one of the following legends:

(i) For pure MDA

DANGER CONTAINS MDA MAY CAUSE CANCER LIVER TOXIN

(ii) For mixtures containing MDA

DANGER CONTAINS MDA CONTAINS MATERIALS
WHICH MAY CAUSE CANCER LIVER TOXIN

(2) Material safety data sheets (MSDS). Employers shall obtain or develop, and shall provide access to their employees to, a material safety data sheet (MSDS) for MDA.

(3) Information and training.

(a) The employer shall provide employees with information and training on MDA, in accordance with WAC 296-62-054 through 296-62-05415, at the time of initial assignment and at least annually thereafter.

(b) In addition to the information required under WAC 296-62-054, the employer shall:

(i) Provide an explanation of the contents of this section, including Appendices A and B of this section, and indicate to employees where a copy of the standard is available;

(ii) Describe the medical surveillance program required under WAC 296-155-17327, and explain the information contained in Appendix C of this standard; and

(iii) Describe the medical removal provision required under WAC 296-155-17327.

(4) Access to training materials.

(a) The employer shall make readily available to all affected employees, without cost, all written materials relating to the employee training program, including a copy of this regulation.

(b) The employer shall provide to the director, upon request, all information and training materials relating to the employee information and training program.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17323, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17325 Housekeeping. (1) All surfaces shall be maintained as free as practicable of visible accumulations of MDA.

(2) The employer shall institute a program for detecting MDA leaks, spills, and discharges, including regular visual inspections of operations involving liquid or solid MDA.

(3) All leaks shall be repaired and liquid or dust spills cleaned up promptly.

(4) Surfaces contaminated with MDA may not be cleaned by the use of compressed air.

(5) Shoveling, dry sweeping, and other methods of dry clean-up of MDA may be used where HEPA-filtered vacuuming and/or wet cleaning are not feasible or practical.

(6) Waste, scrap, debris, bags, containers, equipment, and clothing contaminated with MDA shall be collected and disposed of in a manner to prevent the reentry of MDA into the workplace.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17325, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17327 Medical surveillance. (1) General.

(a) The employer shall make available a medical surveillance program for employees exposed to MDA under the following circumstances:

(i) Employees exposed at or above the action level for 30 or more days per year;

(ii) Employees who are subject to dermal exposure to MDA for 15 or more days per year;

(iii) Employees who have been exposed in an emergency situation;

(iv) Employees whom the employer, based on results from compliance with WAC 296-155-17311(8) has reason to believe are being dermally exposed; and

(v) Employees who show signs or symptoms of MDA exposure.

(b) The employer shall ensure that all medical examinations and procedures are performed by or under the supervision of a licensed physician at a reasonable time and place, and provided without cost to the employee.

(2) Initial examinations.

(a) Within 150 days of the effective date of this standard, or before the time of initial assignment, the employer shall provide each employee covered by subsection (1)(a) of this section with a medical examination including the following elements:

A detailed history which includes:

(i) Past work exposure to MDA or any other toxic substances;

(ii) A history of drugs, alcohol, tobacco, and medication routinely taken (duration and quantity); and

(iii) A history of dermatitis, chemical skin sensitization, or previous hepatic disease.

(iv) A physical examination which includes all routine physical examination parameters, skin examination, and examination for signs of liver disease.

(v) Laboratory tests including:

(A) Liver function tests; and

(B) Urinalysis.

(vi) Additional tests as necessary in the opinion of the physician.

(b) No initial medical examination is required if adequate records show that the employee has been examined in accordance with the requirements of this section within the previous six months prior to the effective date of this standard or prior to the date of initial assignment.

(3) Periodic examinations.

(a) The employer shall provide each employee covered by this section with a medical examination at least annually following the initial examination. These periodic examinations shall include at least the following elements:

(i) A brief history regarding any new exposure to potential liver toxins, changes in drug, tobacco, and alcohol intake, and the appearance of physical signs relating to the liver and the skin;

(ii) The appropriate tests and examinations including liver function tests and skin examinations; and

(iii) Appropriate additional tests or examinations as deemed necessary by the physician.

(b) If in the physician's opinion the results of liver function tests indicate an abnormality, the employee shall be removed from further MDA exposure in accordance with WAC 296-155-17329. Repeat liver function tests shall be conducted on advice of the physician.

(4) Emergency examinations. If the employer determines that the employee has been exposed to a potentially hazardous amount of MDA in an emergency situation under WAC 296-155-17309, the employer shall provide medical examinations in accordance with subsection (3)(a) and (b). If the results of liver function testing indicate an abnormality, the employee shall be removed in accordance with WAC 296-155-17329. Repeat liver function tests shall be conducted on the advice of the physician. If the results of the tests are normal, tests must be repeated two to three weeks from the initial testing. If the results of the second set of tests are normal and on the advice of the physician, no additional testing is required.

(5) Additional examinations. Where the employee develops signs and symptoms associated with exposure to MDA, the employer shall provide the employee with an additional medical examination including liver function tests. Repeat liver function tests shall be conducted on the advice of the physician. If the results of the tests are normal, tests must be repeated two to three weeks from the initial testing. If the results of the second set of tests are normal and on the advice of the physician, no additional testing is required.

(6) Multiple physician review mechanism.

(a) If the employer selects the initial physician who conducts any medical examination or consultation provided to an

employee under this section, and the employee has signs or symptoms of occupational exposure to MDA (which could include an abnormal liver function test), and the employee disagrees with the opinion of the examining physician, and this opinion could affect the employee's job status, the employee may designate an appropriate and mutually acceptable second physician:

(i) To review any findings, determinations, or recommendations of the initial physician; and

(ii) To conduct such examinations, consultations, and laboratory tests as the second physician deems necessary to facilitate this review.

(b) The employer shall promptly notify an employee of the right to seek a second medical opinion after each occasion that an initial physician conducts a medical examination or consultation pursuant to this section. The employer may condition its participation in, and payment for, the multiple physician review mechanism upon the employee doing the following within 15 days after receipt of the foregoing notification, or receipt of the initial physician's written opinion, whichever is later:

(i) The employee informing the employer that he or she intends to seek a second medical opinion; and

(ii) The employee initiating steps to make an appointment with a second physician.

(c) If the findings, determinations, or recommendations of the second physician differ from those of the initial physician, then the employer and the employee shall assure that efforts are made for the two physicians to resolve any disagreement.

(d) If the two physicians have been unable to quickly resolve their disagreement, then the employer and the employee through their respective physicians shall designate a third physician:

(i) To review any findings, determinations, or recommendations of the prior physicians; and

(ii) To conduct such examinations, consultations, laboratory tests, and discussions with the prior physicians as the third physician deems necessary to resolve the disagreement of the prior physicians.

(e) The employer shall act consistent with the findings, determinations, and recommendations of the second physician, unless the employer and the employee reach a mutually acceptable agreement.

(f) Information provided to the examining physician.

(i) The employer shall provide the following information to the examining physician:

(A) A copy of this regulation and its appendices;

(B) A description of the affected employee's duties as they relate to the employee's potential exposure to MDA;

(C) The employee's current actual or representative MDA exposure level;

(D) A description of any personal protective equipment used or to be used; and

(E) Information from previous employment related medical examinations of the affected employee.

(ii) The employer shall provide the foregoing information to a second physician under this section upon request either by the second physician, or by the employee.

(g) Physician's written opinion.

(i) For each examination under this section, the employer shall obtain, and provide the employee with a copy of, the examining physician's written opinion within 15 days of its receipt. The written opinion shall include the following:

(A) The occupationally pertinent results of the medical examination and tests;

(B) The physician's opinion concerning whether the employee has any detected medical conditions which would place the employee at increased risk of material impairment of health from exposure to MDA;

(C) The physician's recommended limitations upon the employee's exposure to MDA or upon the employee's use of protective clothing or equipment and respirators; and

(D) A statement that the employee has been informed by the physician of the results of the medical examination and any medical conditions resulting from MDA exposure which require further explanation or treatment.

(ii) The written opinion obtained by the employer shall not reveal specific findings or diagnoses unrelated to occupational exposures.

[Statutory Authority: Chapter 49.17 RCW, 93-04-111 (Order 92-15), § 296-155-17327, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17329 Medical removal. (1) Temporary medical removal of an employee.

(a) Temporary removal resulting from occupational exposure. The employee shall be removed from work environments in which exposure to MDA is at or above the action level or where dermal exposure to MDA may occur, following an initial examination (WAC 296-155-17327(2)), periodic examinations (WAC 296-155-17327(3)), an emergency situation (WAC 296-155-17327(4)), or an additional examination (WAC 296-155-17327(5)) in the following circumstances:

(i) When the employee exhibits signs and/or symptoms indicative of acute exposure to MDA; or

(ii) When the examining physician determines that an employee's abnormal liver function tests are not associated with MDA exposure but that the abnormalities may be exacerbated as a result of occupational exposure to MDA.

(b) Temporary removal due to a final medical determination.

(i) The employer shall remove an employee from work having an exposure to MDA at or above the action level or where the potential for dermal exposure exists on each occasion that a final medical determination results in a medical finding, determination, or opinion that the employee has a detected medical condition which places the employee at increased risk of material impairment to health from exposure to MDA.

(ii) For the purposes of this section, the phrase "final medical determination" shall mean the outcome of the physician review mechanism used pursuant to the medical surveillance provisions of this section.

(iii) Where a final medical determination results in any recommended special protective measures for an employee, or limitations on an employee's exposure to MDA, the employer shall implement and act consistent with the recommendation.

(2) Return of the employee to former job status.

(a) The employer shall return an employee to her or his former job status:

(i) When the employee no longer shows signs or symptoms of exposure to MDA, or upon the advice of the physician.

(ii) When a subsequent final medical determination results in a medical finding, determination, or opinion that the employee no longer has a detected medical condition which places the employee at increased risk of material impairment to health from exposure to MDA.

(b) For the purposes of this section, the requirement that an employer return an employee to his or her former job status is not intended to expand upon or restrict any rights an employee has or would have had, absent temporary medical removal, to a specific job classification or position under the terms of a collective bargaining agreement.

(3) Removal of other employee special protective measure or limitations. The employer shall remove any limitations placed on an employee or end any special protective measures provided to an employee pursuant to a final medical determination when a subsequent final medical determination indicates that the limitations or special protective measures are no longer necessary.

(4) Employer options pending a final medical determination. Where the physician review mechanism used pursuant to the medical surveillance provisions of this section has not yet resulted in a final medical determination with respect to an employee, the employer shall act as follows:

(a) Removal. The employer may remove the employee from exposure to MDA, provide special protective measures to the employee, or place limitations upon the employee, consistent with the medical findings, determinations, or recommendations of the physician who has reviewed the employee's health status.

(b) Return. The employer may return the employee to her or his former job status, and end any special protective measures provided to the employee, consistent with the medical findings, determinations, or recommendations of any of the physicians who have reviewed the employee's health status, with two exceptions:

(i) If the initial removal, special protection, or limitation of the employee resulted from a final medical determination which differed from the findings, determinations, or recommendations of the initial physician; or

(ii) The employee has been on removal status for the preceding six months as a result of exposure to MDA, then the employer shall await a final medical determination.

(5) Medical removal protection benefits.

(a) Provisions of medical removal protection benefits. The employer shall provide to an employee up to six months of medical removal protection benefits on each occasion that an employee is removed from exposure to MDA or otherwise limited pursuant to this section.

(b) Definition of medical removal protection benefits. For the purposes of this section, the requirement that an employer provide medical removal protection benefits means that the employer shall maintain the earnings, seniority, and other employment rights and benefits of an employee as though the employee had not been removed from normal exposure to MDA or otherwise limited.

(c) Follow-up medical surveillance during the period of employee removal or limitations. During the period of time that an employee is removed from normal exposure to MDA or otherwise limited, the employer may condition the provision of medical removal protection benefits upon the employee's participation in follow-up medical surveillance made available pursuant to this section.

(d) Workers' compensation claims. If a removed employee files a claim for workers' compensation payments for an MDA-related disability, then the employer shall continue to provide medical removal protection benefits pending disposition of the claim. To the extent that an award is made to the employee for earnings lost during the period of removal, the employer's medical removal protection obligation shall be reduced by such amount. The employer shall receive no credit for workers' compensation payments received by the employee for treatment-related expenses.

(e) Other credits. The employer's obligation to provide medical removal protection benefits to a removed employee shall be reduced to the extent that the employee receives compensation for earnings lost during the period of removal either from a publicly or employer-funded compensation program, or receives income from employment with any employer made possible by virtue of the employee's removal.

(f) Employees who do not recover within the 6 months of removal. The employer shall take the following measures with respect to any employee removed from exposure to MDA:

(i) The employer shall make available to the employee a medical examination pursuant to this section to obtain a final medical determination with respect to the employee;

(ii) The employer shall assure that the final medical determination obtained indicates whether or not the employee may be returned to her or his former job status, and, if not, what steps should be taken to protect the employee's health;

(iii) Where the final medical determination has not yet been obtained, or once obtained indicates that the employee may not yet be returned to her or his former job status, the employer shall continue to provide medical removal protection benefits to the employee until either the employee is returned to former job status, or a final medical determination is made that the employee is incapable of ever safely returning to her or his former job status; and

(iv) Where the employer acts pursuant to a final medical determination which permits the return of the employee to her or his former job status despite what would otherwise be an unacceptable liver function test, later questions concerning removing the employee again shall be decided by a final medical determination. The employer need not automatically remove such an employee pursuant to the MDA removal criteria provided by this section.

(6) Voluntary removal or restriction of an employee. Where an employer, although not required by this section to do so, removes an employee from exposure to MDA or otherwise places limitations on an employee due to the effects of MDA exposure on the employee's medical condition, the employer shall provide medical removal protection benefits to the employee equal to that required by subsection (5) of this section.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17329, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17331 Recordkeeping. (1) Objective data for exempted operations.

(a) Where the employer has relied on objective data that demonstrate that products made from or containing MDA are not capable of releasing MDA or do not present a dermal exposure problem under the expected conditions of processing, use, or handling to exempt such operations from the initial monitoring requirements under WAC 296-155-17311(2), the employer shall establish and maintain an accurate record of objective data reasonably relied upon in support of the exemption.

(b) The record shall include at least the following information:

- (i) The product qualifying for exemption;
- (ii) The source of the objective data;
- (iii) The testing protocol, results of testing, and/or analysis of the material for the release of MDA;
- (iv) A description of the operation exempted and how the data support the exemption; and
- (v) Other data relevant to the operations, materials, processing, or employee exposures covered by the exemption.

(c) The employer shall maintain this record for the duration of the employer's reliance upon such objective data.

(2) Historical monitoring data.

(a) Where the employer has relied on historical monitoring data that demonstrate that exposures on a particular job will be below the action level to exempt such operations from the initial monitoring requirements under WAC 296-155-17311(2), the employer shall establish and maintain an accurate record of historical monitoring data reasonably relied upon in support of the exemption.

(b) The record shall include information that reflect the following conditions:

(i) The data upon which judgments are based are scientifically sound and were collected using methods that are sufficiently accurate and precise;

(ii) The processes and work practices that were in use when the historical monitoring data were obtained are essentially the same as those to be used during the job for which initial monitoring will not be performed;

(iii) The characteristics of the MDA-containing material being handled when the historical monitoring data were obtained are the same as those on the job for which initial monitoring will not be performed;

(iv) Environmental conditions prevailing when the historical monitoring data were obtained are the same as those on the job for which initial monitoring will not be performed; and

(v) Other data relevant to the operations, materials, processing, or employee exposures covered by the exception.

(c) The employer shall maintain this record for the duration of the employer's reliance upon such historical monitoring data.

(3) The employer may utilize the services of competent organizations such as industry trade associations and employee associations to maintain the records required by this section.

(4) Exposure measurements.

(a) The employer shall keep an accurate record of all measurements taken to monitor employee exposure to MDA.

(b) This record shall include at least the following information:

- (i) The date of measurement;
- (ii) The operation involving exposure to MDA;
- (iii) Sampling and analytical methods used and evidence of their accuracy;
- (iv) Number, duration, and results of samples taken;
- (v) Type of protective devices worn, if any; and
- (vi) Name, Social Security number, and exposure of the employees whose exposures are represented.

(c) The employer shall maintain this record for at least thirty years in accordance with chapter 296-62 WAC, Part B.

(5) Medical surveillance.

(a) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance by WAC 296-155-17327 in accordance with chapter 296-62 WAC, Part B.

(b) The record shall include at least the following information:

(i) The name and Social Security number of the employee;

(ii) A copy of the employee's medical examination results, including the medical history, questionnaire responses, results of any tests, and physician's recommendations;

(iii) Physician's written opinions;

(iv) Any employee medical complaints related to exposure to MDA; and

(v) A copy of the information provided to the physician as required by WAC 296-155-17327.

(c) The employer shall ensure that this record is maintained for the duration of employment plus thirty years in accordance with chapter 296-62 WAC, Part B.

(d) A copy of the employee's medical removal and return to work status.

(6) Training records. The employer shall maintain all employee training records for one year beyond the last date of employment.

(7) Availability.

(a) The employer, upon written request, shall make all records required to be maintained by this section available to the assistant secretary and the director for examination and copying.

(b) The employer, upon request, shall make any exposure records required by WAC 296-155-17311 and 296-155-17327 available for examination and copying to affected employees, former employees, designated representatives, and the director, in accordance with WAC 296-62-05201 through 296-62-05209 and 296-62-05213 through 296-62-05223.

(c) The employer, upon request, shall make employee medical records required by WAC 296-155-17327 and this section available for examination and copying to the subject employee, anyone having the specific written consent of the subject employee, and the director in accordance with chapter 296-62 WAC, Part B.

(8) Transfer of records.

(a) The employer shall comply with the requirements concerning transfer of records set forth in WAC 296-62-05215.

(b) Whenever the employer ceases to do business and there is no successor employer to receive and retain the records for the prescribed period, the employer shall notify the director at least 90 days prior to disposal and, upon request, transmit them to the director.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17331, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17333 Observation of monitoring. (1)

Employee observation. The employer shall provide affected employees, or their designated representatives, an opportunity to observe the measuring or monitoring of employee exposure to MDA conducted pursuant to WAC 296-155-17311.

(2) Observation procedures. When observation of the measuring or monitoring of employee exposure to MDA requires entry into areas where the use of protective clothing and equipment or respirators is required, the employer shall provide the observer with personal protective clothing and equipment or respirators required to be worn by employees working in the area, assure the use of such clothing and equipment or respirators, and require the observer to comply with all other applicable safety and health procedures.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17333, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17337 Appendices. The information contained in Appendices A, B, C, and D of this standard is not intended by itself, to create any additional obligations not otherwise imposed by this standard nor detract from any existing obligation.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-10-071, § 296-155-17337, filed 5/4/99, effective 9/1/99. Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17337, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17339 Startup dates. Compliance with all obligations of this standard commence March 3, 1993, except as follows:

(1) Initial monitoring under WAC 296-155-17311(2) shall be completed as soon as possible but no later than June 3, 1993.

(2) Medical examinations under WAC 296-155-17327, shall be completed as soon as possible but no later than August 14, 1993.

(3) Emergency plans required by WAC 296-155-17309 shall be provided and available for inspection and copying as soon as possible but no later than July 13, 1993.

(4) Initial training and education shall be completed as soon as possible but no later than July 13, 1993.

(5) Decontamination and lunch areas under WAC 296-155-17321 shall be in operation as soon as possible but no later than March 3, 1993.

(6) Respiratory protection required by WAC 296-155-17317 shall be provided as soon as possible but no later than July 13, 1993.

(2001 Ed.)

(7) Written compliance plans required by WAC 296-155-17315(5) shall be completed and available for inspection and copying as soon as possible but no later than July 13, 1993.

(8) WISHA shall enforce the permissible exposure limits in WAC 296-155-17305 no earlier than July 13, 1993.

(9) Engineering controls needed to achieve the PELs must be in place March 3, 1993.

(10) Personal protective clothing required by WAC 296-155-17317 shall be available July 13, 1993.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17339, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17341 Appendix A to WAC 296-155-173—Substance data sheet, for 4-4'-methylenedianiline.

(1) Substance identification.

(a) Substance: Methylenedianiline (MDA).

(b) Permissible exposure:

(i) Airborne: Ten parts per billion parts of air (10 ppb), time-weighted average (TWA) for an 8-hour workday and an action level of five parts per billion parts of air (5 ppb).

(ii) Dermal: Eye contact and skin contact with MDA are not permitted.

(c) Appearance and odor: White to tan solid; amine odor.

(2) Health hazard data.

(a) Ways in which MDA affects your health. MDA can affect your health if you inhale it or if it comes in contact with your skin or eyes. MDA is also harmful if you happen to swallow it. Do not get MDA in eyes, on skin, or on clothing.

(b) Effects of overexposure.

(i) Short-term (acute) overexposure: Overexposure to MDA may produce fever, chills, loss of appetite, vomiting, jaundice. Contact may irritate skin, eyes, and mucous membranes. Sensitization may occur.

(ii) Long-term (chronic) exposure. Repeated or prolonged exposure to MDA, even at relatively low concentrations, may cause cancer. In addition, damage to the liver, kidneys, blood, and spleen may occur with long-term exposure.

(iii) Reporting signs and symptoms: You should inform your employer if you develop any signs or symptoms which you suspect are caused by exposure to MDA including yellow staining of the skin.

(3) Protective clothing and equipment.

(a) Respirators. Respirators are required for those operations in which engineering controls or work practice controls are not adequate or feasible to reduce exposure to the permissible limit. If respirators are worn, they must be certified by the National Institute for Occupational Safety and Health (NIOSH) under 42 CFR part 84, and cartridges or canisters must be replaced as necessary to maintain the effectiveness of the respirator. If you experience difficulty breathing while wearing a respirator, you may request a positive-pressure respirator from your employer. You must be thoroughly trained to use the assigned respirator, and the training will be provided by your employer. MDA does not have a detectable odor except at levels well above the permissible exposure limits. Do not depend on odor to warn you when a respirator canister is exhausted. If you can smell MDA while wearing a respirator, proceed immediately to fresh air. If you experi-

ence difficulty breathing while wearing a respirator, tell your employer.

(b) Protective clothing. You may be required to wear coveralls, aprons, gloves, face shields, or other appropriate protective clothing to prevent skin contact with MDA. Where protective clothing is required, your employer is required to provide clean garments to you, as necessary, to assure that the clothing protects you adequately. Replace or repair impervious clothing that has developed leaks. MDA should never be allowed to remain on the skin. Clothing and shoes which are not impervious to MDA should not be allowed to become contaminated with MDA, and if they do, the clothing and shoes should be promptly removed and decontaminated. The clothing should be laundered to remove MDA or discarded. Once MDA penetrates shoes or other leather articles, they should not be worn again.

(c) Eye protection. You must wear splashproof safety goggles in areas where liquid MDA may contact your eyes. Contact lenses should not be worn in areas where eye contact with MDA can occur. In addition, you must wear a face shield if your face could be splashed with MDA liquid.

(4) Emergency and first aid procedures.

(a) Eye and face exposure. If MDA is splashed into the eyes, wash the eyes for at least 15 minutes. See a doctor as soon as possible.

(b) Skin exposure. If MDA is spilled on your clothing or skin, remove the contaminated clothing and wash the exposed skin with large amounts of soap and water immediately. Wash contaminated clothing before you wear it again.

(c) Breathing. If you or any other person breathes in large amounts of MDA, get the exposed person to fresh air at once. Apply artificial respiration if breathing has stopped. Call for medical assistance or a doctor as soon as possible. Never enter any vessel or confined space where the MDA concentration might be high without proper safety equipment and at least one other person present who will stay outside. A life line should be used.

(d) Swallowing. If MDA has been swallowed and the patient is conscious, do not induce vomiting. Call for medical assistance or a doctor immediately.

(5) Medical requirements. If you are exposed to MDA at a concentration at or above the action level for more than 30 days per year, or exposed to liquid mixtures more than 15 days per year, your employer is required to provide a medical examination, including a medical history and laboratory tests, within 60 days of the effective date of this standard and annually thereafter. These tests shall be provided without cost to you. In addition, if you are accidentally exposed to MDA (either by ingestion, inhalation, or skin/eye contact) under conditions known or suspected to constitute toxic exposure to MDA, your employer is required to make special examinations and tests available to you.

(6) Observation of monitoring. Your employer is required to perform measurements that are representative of your exposure to MDA and you or your designated representative are entitled to observe the monitoring procedure. You are entitled to observe the steps taken in the measurement procedure and to record the results obtained. When the monitoring procedure is taking place in an area where respirators or personal protective clothing and equipment are required to

be worn; you and your representative must also be provided with, and must wear, the protective clothing and equipment.

(7) Access to records. You or your representative are entitled to see the records of measurements of your exposure to MDA upon written request to your employer. Your medical examination records can be furnished to your physician or designated representative upon request by you to your employer.

(8) Precautions for safe use, handling, and storage.

(a) Material is combustible. Avoid strong acids and their anhydrides. Avoid strong oxidants. Consult supervisor for disposal requirements.

(b) Emergency clean-up. Wear self-contained breathing apparatus and fully clothe the body in the appropriate personal protective clothing and equipment.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-10-071, § 296-155-17341, filed 5/4/99, effective 9/1/99. Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17341, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17343 Appendix B to WAC 296-155-173—Substance technical guidelines, MDA. (1) Identification.

(a) Substance identification.

(i) Synonyms: CAS No. 101-77-9. 4,4'-methylenedianiline; 4,4'-methylenebis(aniline); methylenedianiline; dianilinomethane.

(ii) Formula: $C_{13}H_{14}N_2$.

(b) Physical data.

(2) Appearance and odor: White to tan solid; amine odor.

(a) Molecular weight: 198.26.

(b) Boiling point: 398-399 degrees C. at 760 mm Hg.

(c) Melting point: 88-93 degrees C. (190-100 degrees F.).

(d) Vapor pressure: 9 mm Hg at 232 degrees C.

(e) Evaporation rate (n-butyl acetate=1): Negligible.

(f) Vapor density (Air=1): Not applicable.

(g) Volatile fraction by weight: Negligible.

(h) Specific gravity (Water=1): Slight.

(i) Heat of combustion: -8.40 kcal/g.

(j) Solubility in water: Slightly soluble in cold water, very soluble in alcohol, benzene, ether, and many organic solvents.

(3) Fire, explosion, and reactivity hazard data.

(a) Flash point: 190 degrees C. (374 degrees F.) Set-flash closed cup.

(b) Flash point: 226 degrees C. (439 degrees F.) Cleveland open cup.

(c) Extinguishing media: Water spray; dry chemical; carbon dioxide.

(d) Special fire fighting procedures: Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes.

(e) Unusual fire and explosion hazards: Fire or excessive heat may cause production of hazardous decomposition products.

(4) Reactivity data.

(a) Stability: Stable.

(b) Incompatibility: Strong oxidizers.

(c) Hazardous decomposition products: As with any other organic material, combustion may produce carbon monoxide. Oxides of nitrogen may also be present.

(d) Hazardous polymerization: Will not occur.

(5) Spill and leak procedures.

(a) Sweep material onto paper and place in fiber carton.

(b) Package appropriately for safe feed to an incinerator or dissolve in compatible waste solvents prior to incineration.

(c) Dispose of in an approved incinerator equipped with afterburner and scrubber or contract with licensed chemical waste disposal service.

(d) Discharge treatment or disposal may be subject to federal, state, or local laws.

(e) Wear appropriate personal protective equipment.

(6) Special storage and handling precautions.

(a) High exposure to MDA can occur when transferring the substance from one container to another. Such operations should be well ventilated and good work practices must be established to avoid spills.

(b) Pure MDA is a solid with a low vapor pressure. Grinding or heating operations increase the potential for exposure.

(c) Store away from oxidizing materials.

(d) Employers shall advise employees of all areas and operations where exposure to MDA could occur.

(7) Housekeeping and hygiene facilities.

(a) The workplace should be kept clean, orderly, and in a sanitary condition. The employer should institute a leak and spill detection program for operations involving MDA in order to detect sources of fugitive MDA emissions.

(b) Adequate washing facilities with hot and cold water are to be provided and maintained in a sanitary condition. Suitable cleansing agents should also be provided to assure the effective removal of MDA from the skin.

(8) Common operations. Common operations in which exposure to MDA is likely to occur include the following: Manufacture of MDA; manufacture of methylene diisocyanate; curing agent for epoxy resin structures; wire coating operations; and filament winding.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17343, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17345 Appendix C to WAC 296-155-173—Medical surveillance guidelines for MDA. (1) Route of entry. Inhalation; skin absorption; ingestion. MDA can be inhaled, absorbed through the skin, or ingested.

(2) Toxicology. MDA is a suspect carcinogen in humans. There are several reports of liver disease in humans and animals resulting from acute exposure to MDA. A well documented case of an acute cardiomyopathy secondary to exposure to MDA is on record. Numerous human cases of hepatitis secondary to MDA are known. Upon direct contact MDA may also cause damage to the eyes. Dermatitis and skin sensitization have been observed. Almost all forms of acute environmental hepatic injury in humans involve the hepatic parenchyma and produce hepatocellular jaundice. This agent produces intrahepatic cholestasis. The clinical picture consists of cholestatic jaundice, preceded or accompanied by abdominal pain, fever, and chills. Onset in about 60% of all observed cases is abrupt with severe abdominal pain. In about

30% of observed cases, the illness presented and evolved more slowly and less dramatically, with only slight abdominal pain. In about 10% of the cases only jaundice was evident. The cholestatic nature of the jaundice is evident in the prominence of itching, the histologic predominance of bile stasis, and portal inflammatory infiltration, accompanied by only slight parenchymal injury in most cases, and by the moderately elevated transaminase values. Acute, high doses, however, have been known to cause hepatocellular damage resulting in elevated SGPT, SGOT, alkaline phosphatase, and bilirubin. Absorption through the skin is rapid. MDA is metabolized and excreted over a 48-hour period. Direct contact may be irritating to the skin, causing dermatitis. Also MDA which is deposited on the skin is not thoroughly removed through washing. MDA may cause bladder cancer in humans. Animal data supporting this assumption is not available nor is conclusive human data. However, human data collected on workers at a helicopter manufacturing facility where MDA is used suggests a higher incidence of bladder cancer among exposed workers.

(3) Signs and symptoms. Skin may become yellow from contact with MDA. Repeated or prolonged contact with MDA may result in recurring dermatitis (red-itchy, cracked skin) and eye irritation. Inhalation, ingestion, or absorption through the skin at high concentrations may result in hepatitis, causing symptoms such as fever and chills, nausea and vomiting, dark urine, anorexia, rash, right upper quadrant pain, and jaundice. Corneal burns may occur when MDA is splashed in the eyes.

(4) Treatment of acute toxic effects/emergency situation. If MDA gets into the eyes, immediately wash eyes with large amounts of water. If MDA is splashed on the skin, immediately wash contaminated skin with mild soap or detergent. Employee should be removed from exposure and given proper medical treatment. Medical tests required under the emergency section of the medical surveillance (WAC 296-155-17327(4)) must be conducted. If the chemical is swallowed do not induce vomiting but remove by gastric lavage.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17345, filed 2/3/93, effective 3/15/93.]

WAC 296-155-17347 Appendix D to WAC 296-155-173—Sampling and analytical methods for MDA monitoring and measurement procedures. Measurements taken for the purpose of determining employee exposure to MDA are best taken so that the representative average 8-hour exposure may be determined from a single 8-hour sample or two 4-hour samples. Short-time interval samples (or grab samples) may also be used to determine average exposure level if a minimum of five measurements are taken in a random manner over the 8-hour work shift. Random sampling means that any portion of the work shift has the same chance of being sampled as any other. The arithmetic average of all such random samples taken on one work shift is an estimate of an employee's average level of exposure for that work shift. Air samples should be taken in the employee's breathing zone (air that would most nearly represent that inhaled by the employee). There are a number of methods available for monitoring employee exposures to MDA. The method OSHA currently uses is included below. The employer how-

ever has the obligation of selecting any monitoring method which meets the accuracy and precision requirements of the standard under her or his unique field conditions. The standard requires that the method of monitoring must have an accuracy, to a 95 percent confidence level, of not less than plus or minus 25 percent for the select PEL.

WISHA methodology.

Sampling procedure.

Apparatus:

Samples are collected by use of a personal sampling pump that can be calibrated within +/-5% of the recommended flow rate with the sampling filter in line. Samples are collected on 37 mm Gelman type A/E glass fiber filters treated with sulfuric acid. The filters are prepared by soaking each filter with 0.5 mL of 0.26N H₂SO₄. (0.26 N H₂SO₄ can be prepared by diluting 1.5 mL of 36N H₂SO₄ to 200 mL with deionized water.) The filters are dried in an oven at 100 degrees C. for one hour and then assembled into three-piece 37 mm polystyrene cassettes without backup pads. The front filter is separated from the back filter by a polystyrene spacer. The cassettes are sealed with shrink bands and the ends are plugged with plastic plugs. After sampling, the filters are carefully removed from the cassettes and individually transferred to small vials containing approximately 2 mL deionized water. The vials must be tightly sealed. The water can be added before or after the filters are transferred. The vials must be sealable and capable of holding at least 7 mL of liquid. Small glass scintillation vials with caps containing Teflon liners are recommended.

Reagents:

Deionized water is needed for addition to the vials.

Sampling technique:

Immediately before sampling, remove the plastic plugs from the filter cassettes. Attach the cassette to the sampling pump with flexible tubing and place the cassette in the employee's breathing zone. After sampling, seal the cassettes with plastic plugs until the filters are transferred to the vials containing deionized water. At some convenient time within 10 hours of sampling, transfer the sample filters to vials. Seal the small vials lengthwise. Submit at least one blank filter with each sample set. Blanks should be handled in the same manner as samples, but no air is drawn through them. Record sample volumes (in L of air) for each sample, along with any potential interferences.

Retention efficiency:

A retention efficiency study was performed by drawing 100 L of air (80% relative humidity) at 1 L/min through sample filters that had been spiked with 0.814 micro-g MDA. Instead of using backup pads, blank acid-treated filters were used as backups in each cassette. Upon analysis, the top filters were found to have an average of 91.8% of the spiked amount. There was no MDA found on the bottom filters, so the amount lost was probably due to the slight instability of the MDA salt.

Extraction efficiency:

The average extraction efficiency for six filters spiked at the target concentration is 99.6%. The stability of extracted and

derivatized samples was verified by reanalyzing the above six samples the next day using fresh standards. The average extraction efficiency for the reanalyzed samples is 98.7%.

Recommended air volume and sampling rate. The recommended air volume is 100 L. The recommended sampling rate is 1 L/min.

Interferences (sampling):

MDI appears to be a positive interference. It was found that when MDI was spiked onto an acid-treated filter, the MDI converted to MDA after air was drawn through it. Suspected interferences should be reported to the laboratory with submitted samples.

Safety precautions (sampling):

Attach the sampling equipment to the employees so that it will not interfere with work performance or safety. Follow all safety procedures that apply to the work area being sampled.

Analytical procedure:

Apparatus:

The following are required for analysis. A GC equipped with an electron capture detector. For this evaluation a Hewlett Packard 5880 Gas Chromatograph equipped with a Nickel 63 High Temperature Electron Capture Detector and a Linearizer was used. A GC column capable of separating the MDA derivative from the solvent and interferences. A 6 ft x 2 mm ID glass column packed with 3% OV-101 coated on 100/120 Gas Chrom Q or a 25 meter DB-1 or DB-5 capillary column is recommended for this evaluation. An electronic integrator or some other suitable means of measuring peak areas or heights. Small resealable vials with Teflon-lined caps capable of holding 4 mL. A dispenser or pipet for toluene capable of delivering 2.9 mL. Pipets (or repipets with plastic or Teflon tips) capable of delivering 1 mL for the sodium hydroxide and buffer solutions. A repipet capable of delivering 25 micro-L HFAA. Syringes for preparation of standards and injection of standards and samples into a GC. Volumetric flasks and pipets to dilute the pure MDA in preparation of standards. Disposable pipets to transfer the toluene layers after the samples are extracted.

Reagents:

0.5 NaOH prepared from reagent grade NaOH. Toluene, pesticide grade. Burdick and Jackson distilled in glass toluene was used. Heptafluorobutyric acid anhydride (HFAA). HFAA from Pierce Chemical Company was used. pH 7.0 phosphate buffer, prepared from 136 g potassium dihydrogen phosphate and 1 L deionized water. The pH is adjusted to 7.0 with saturated sodium hydroxide solution. 4,4'-methylenedianiline (MDA), reagent grade.

Standard preparation:

Concentrated stock standards are prepared by diluting pure MDA with toluene. Analytical standards are prepared by injecting micro-L amounts of diluted stock standards into vials that contain 2.0 mL toluene. 25 micro-L HFAA are added to each vial and the vials are capped and shaken for 10 seconds. After 10 min, 1 mL of buffer is added to each vial. The vials are recapped and shaken for 10 seconds. After allowing the layers to separate, aliquots of the toluene (upper) layers are removed with a syringe and analyzed by GC. Analytical standard concentrations should bracket sample con-

centrations. Thus, if samples fall out of the range of prepared standards, additional standards must be prepared to ascertain detector response.

Sample preparation:

The sample filters are received in vials containing deionized water. 1 mL of 0.5N NaOH and 2.0 mL toluene are added to each vial. The vials are recapped and shaken for 10 min. After allowing the layers to separate, approximately 1 mL aliquots of the toluene (upper) layers are transferred to separate vials with clean disposable pipets. The toluene layers are treated and analyzed.

Analysis:

GC conditions.

Zone temperatures: Column—220 degrees C. Injector—235 degrees C. Detector—335 degrees C. Gas flows, N₂ Column—30 mL/min He Purge—Column 0.9 mL/min. (capillary) with 30 mL/min. ArCH₄ (95/5) make up gas Injection volume: 5.0 uL Column: 6 ft x 1/8 in ID glass, 3% OV-101 on 100/120 Gas Chrom Q or 25 Retention time of MDA derivative: 2.5 to 3.5, depending on column and flow.

Chromatogram. Peak areas or heights are measured by an integrator or other suitable means. A calibration curve is constructed by plotting response (peak areas or heights) of standard injections versus micro-g of MDA per sample. Sample concentrations must be bracketed by standards.

Interferences (analytical):

Any compound that gives an electron capture detector response and has the same general retention time as the HFAA derivative of MDA is a potential interference. Suspected interferences reported to the laboratory with submitted samples by the industrial hygienist must be considered before samples are derivatized. GC parameters may be changed to possibly circumvent interferences. Retention time on a single column is not considered proof of chemical identity. Analyte identity should be confirmed by GC/MS if possible.

Calculations:

The analyte concentration for samples is obtained from the calibration curve in terms of micro-g MDA per sample. The extraction efficiency is 100%. If any MDA is found on the blank, that amount is subtracted from the sample amounts. The air concentrations are calculated using the following formulae. $\text{micro-}\mu\text{g}/\text{m}^3 = (\text{micro-}\mu\text{g MDA per sample}) (1000) / (\text{L of air sampled})$ $\text{ppb} = (\text{micro-}\mu\text{g}/\text{m}^3) (24.46) / (198.3) = (\text{micro-}\mu\text{g}/\text{m}^3) (0.1233)$ where 24.46 is the molar volume at 25 degrees C. and 760 mm Hg.

Safety precautions (analytical). Avoid skin contact and inhalation of all chemicals. Restrict the use of all chemicals to a fume hood if possible. Wear safety glasses and a lab coat at all times while in the lab area.

[Statutory Authority: Chapter 49.17 RCW. 93-04-111 (Order 92-15), § 296-155-17347, filed 2/3/93, effective 3/15/93.]

WAC 296-155-174 Cadmium. (1) Scope. This standard applies to all occupational exposures to cadmium and cadmium compounds, in all forms, in all construction work where an employee may potentially be exposed to cadmium. Construction work is defined as work involving construction,

(2001 Ed.)

alteration, and/or repair, including but not limited to the following:

- (a) Wrecking, demolition, or salvage of structures where cadmium or materials containing cadmium are present;
- (b) Use of cadmium containing-paints and cutting, brazing, burning, grinding, or welding on surfaces that were painted with cadmium-containing paints;
- (c) Construction, alteration, repair, maintenance, or renovation of structures, substrates, or portions thereof, that contain cadmium, or materials containing cadmium;
- (d) Cadmium welding; cutting and welding cadmium-plated steel; brazing or welding with cadmium alloys;
- (e) Installation of products containing cadmium;
- (f) Electrical grounding with cadmium-welding, or electrical work using cadmium-coated conduit;
- (g) Maintaining or retrofitting cadmium-coated equipment;
- (h) Cadmium contamination/emergency cleanup; and
- (i) Transportation, disposal, storage, or containment of cadmium or materials containing cadmium on the site or location at which construction activities are performed.

(2) Definitions.

(a) Action level (AL) is defined as an airborne concentration of cadmium of 2.5 micrograms per cubic meter of air (2.5 $\mu\text{g}/\text{m}^3$), calculated as an 8-hour time-weighted average (TWA).

(b) Authorized person means any person authorized by the employer and required by work duties to be present in regulated areas or any person authorized by WISHA or regulations issued under it to be in regulated areas.

(c) Competent person, in accordance with WAC 296-155-012(4), means a person designated by the employer to act on the employer's behalf who is capable of identifying existing and potential cadmium hazards in the workplace and the proper methods to control them in order to protect workers, and has the authority necessary to take prompt corrective measures to eliminate or control such hazards. The duties of a competent person include at least the following: Determining prior to the performance of work whether cadmium is present in the workplace; establishing, where necessary, regulated areas and assuring that access to and from those areas is limited to authorized employees; assuring the adequacy of any employee exposure monitoring required by this standard; assuring that all employees exposed to air cadmium levels above the PEL wear appropriate personal protective equipment and are trained in the use of appropriate methods of exposure control; assuring that proper hygiene facilities are provided and that workers are trained to use those facilities; and assuring that the engineering controls required by this standard are implemented, maintained in proper operating condition, and functioning properly.

(d) Director means the director of the department of labor and industries or authorized representative.

(e) Employee exposure and similar language referring to the air cadmium level to which an employee is exposed means the exposure to airborne cadmium that would occur if the employee were not using respiratory protective equipment.

(f) Final medical determination is the written medical opinion of the employee's health status by the examining

physician under subsection (12)(c) through (l) of this section or, if multiple physician review under subsection (12)(m) of this section or the alternative physician determination under subsection (12)(n) of this section is invoked, it is the final, written medical finding, recommendation or determination that emerges from that process.

(g) High-efficiency particulate air (HEPA) filter means a filter capable of trapping and retaining at least 99.97 percent of mono-dispersed particles of 0.3 micrometers in diameter.

(h) Regulated area means an area demarcated by the employer where an employee's exposure to airborne concentrations of cadmium exceeds, or can reasonably be expected to exceed the permissible exposure limit (PEL).

(i) This section means this cadmium standard.

(3) Permissible exposure limit (PEL). The employer shall assure that no employee is exposed to an airborne concentration of cadmium in excess of five micrograms per cubic meter of air ($5 \mu\text{g}/\text{m}^3$), calculated as an 8-hour time-weighted average exposure (TWA).

(4) Exposure monitoring

(a) General.

(i) Prior to the performance of any construction work where employees may be potentially exposed to cadmium, the employer shall establish the applicability of this standard by determining whether cadmium is present in the workplace and whether there is the possibility that employee exposures will be at or above the action level. The employer shall designate a competent person who shall make this determination. Investigation and material testing techniques shall be used, as appropriate, in the determination. Investigation shall include a review of relevant plans, past reports, material safety data sheets, and other available records, and consultations with the property owner and discussions with appropriate individuals and agencies.

(ii) Where cadmium has been determined to be present in the workplace, and it has been determined that there is a possibility the employee's exposure will be at or above the action level, the competent person shall identify employees potentially exposed to cadmium at or above the action level.

(iii) Determinations of employee exposure shall be made from breathing-zone air samples that reflect the monitored employee's regular, daily 8-hour TWA exposure to cadmium.

(iv) Eight-hour TWA exposures shall be determined for each employee on the basis of one or more personal breathing-zone air samples reflecting full shift exposure on each shift, for each job classification, in each work area. Where several employees perform the same job tasks, in the same job classification, on the same shift, in the same work area, and the length, duration, and level of cadmium exposures are similar, an employer may sample a representative fraction of the employees instead of all employees in order to meet this requirement. In representative sampling, the employer shall sample the employee(s) expected to have the highest cadmium exposures.

(b) Specific.

(i) Initial monitoring. Except as provided for in (b)(iii) of this subsection, where a determination conducted under (a)(i) of this subsection shows the possibility of employee exposure to cadmium at or above the action level, the employer shall conduct exposure monitoring as soon as practicable that is

representative of the exposure for each employee in the workplace who is or may be exposed to cadmium at or above the action level.

(ii) In addition, if the employee periodically performs tasks that may expose the employee to a higher concentration of airborne cadmium, the employee shall be monitored while performing those tasks.

(iii) Where the employer has objective data, as defined in subsection (14)(b) of this section, demonstrating that employee exposure to cadmium will not exceed airborne concentrations at or above the action level under the expected conditions of processing, use, or handling, the employer may rely upon such data instead of implementing initial monitoring.

(iv) Where a determination conducted under (a) or (b) of this subsection is made that a potentially exposed employee is not exposed to airborne concentrations of cadmium at or above the action level, the employer shall make a written record of such determination. The record shall include at least the monitoring data developed under (b)(i) through (iii) of this subsection, where applicable, and shall also include the date of determination, and the name and Social Security number of each employee.

(c) Monitoring frequency (periodic monitoring).

(i) If the initial monitoring or periodic monitoring reveals employee exposures to be at or above the action level, the employer shall monitor at a frequency and pattern needed to assure that the monitoring results reflect with reasonable accuracy the employee's typical exposure levels, given the variability in the tasks performed, work practices, and environmental conditions on the job site, and to assure the adequacy of respiratory selection and the effectiveness of engineering and work practice controls.

(ii) If the initial monitoring or the periodic monitoring indicates that employee exposures are below the action level and that result is confirmed by the results of another monitoring taken at least seven days later, the employer may discontinue the monitoring for those employees whose exposures are represented by such monitoring.

(d) Additional monitoring. The employer also shall institute the exposure monitoring required under (b)(i) and (c) of this subsection whenever there has been a change in the raw materials, equipment, personnel, work practices, or finished products that may result in additional employees being exposed to cadmium at or above the action level or in employees already exposed to cadmium at or above the action level being exposed above the PEL, or whenever the employer or competent person has any reason to suspect that any other change might result in such further exposure.

(e) Employee notification of monitoring results.

(i) No later than five working days after the receipt of the results of any monitoring performed under this section, the employer shall notify each affected employee individually in writing of the results. In addition, within the same time period, the employer shall post the results of the exposure monitoring in an appropriate location that is accessible to all affected employees.

(ii) Wherever monitoring results indicate that employee exposure exceeds the PEL, the employer shall include in the written notice a statement that the PEL has been exceeded

and a description of the corrective action being taken by the employer to reduce employee exposure to or below the PEL.

(f) Accuracy of measurement. The employer shall use a method of monitoring and analysis that has an accuracy of not less than plus or minus 25 percent ($\pm 25\%$), with a confidence level of 95 percent, for airborne concentrations of cadmium at or above the action level and the permissible exposure limit.

(5) Regulated areas.

(a) Establishment. The employer shall establish a regulated area wherever an employee's exposure to airborne concentrations of cadmium is, or can reasonably be expected to be in excess of the permissible exposure limit (PEL).

(b) Demarcation. Regulated areas shall be demarcated from the rest of the workplace in any manner that adequately establishes and alerts employees of the boundaries of the regulated area, including employees who are or may be incidentally in the regulated areas, and that protects persons outside the area from exposure to airborne concentrations of cadmium in excess of the PEL.

(c) Access. Access to regulated areas shall be limited to authorized persons.

(d) Provision of respirators. Each person entering a regulated area shall be supplied with and required to use a respirator, selected in accordance with subsection (7)(b) of this section.

(e) Prohibited activities. The employer shall assure that employees do not eat, drink, smoke, chew tobacco or gum, or apply cosmetics in regulated areas, or carry the products associated with any of these activities into regulated areas or store such products in those areas.

(6) Methods of compliance.

(a) Compliance hierarchy.

(i) Except as specified in (a)(ii) of this subsection, the employer shall implement engineering and work practice controls to reduce and maintain employee exposure to cadmium at or below the PEL, except to the extent that the employer can demonstrate that such controls are not feasible.

(ii) The requirement to implement engineering controls to achieve the PEL does not apply where the employer demonstrates the following:

(A) The employee is only intermittently exposed; and

(B) The employee is not exposed above the PEL on 30 or more days per year (12 consecutive months).

(iii) Wherever engineering and work practice controls are not sufficient to reduce employee exposure to or below the PEL, the employer nonetheless shall implement such controls to reduce exposures to the lowest levels achievable. The employer shall supplement such controls with respiratory protection that complies with the requirements of subsection (7) of this section and the PEL.

(iv) The employer shall not use employee rotation as a method of compliance.

(b) Specific operations.

(i) Abrasive blasting. Abrasive blasting on cadmium or cadmium-containing materials shall be conducted in a manner that will provide adequate protection.

(ii) Heating cadmium and cadmium-containing materials. Welding, cutting, and other forms of heating of cadmium or cadmium-containing materials shall be conducted in

accordance with the requirements of WAC 296-155-415 and 296-155-420, where applicable.

(c) Prohibitions.

(i) High speed abrasive disc saws and similar abrasive power equipment shall not be used for work on cadmium or cadmium-containing materials unless they are equipped with appropriate engineering controls to minimize emissions, if the exposure levels are above the PEL.

(ii) Materials containing cadmium shall not be applied by spray methods, if exposures are above the PEL, unless employees are protected with supplied-air respirators with full facepiece, hood, helmet, suit, operated in positive pressure mode and measures are instituted to limit overspray and prevent contamination of adjacent areas.

(d) Mechanical ventilation.

(i) When ventilation is used to control exposure, measurements that demonstrate the effectiveness of the system in controlling exposure, such as capture velocity, duct velocity, or static pressure shall be made as necessary to maintain its effectiveness.

(ii) Measurements of the system's effectiveness in controlling exposure shall be made as necessary within five working days of any change in production, process, or control that might result in a significant increase in employee exposure to cadmium.

(iii) Recirculation of air. If air from exhaust ventilation is recirculated into the workplace, the system shall have a high efficiency filter and be monitored to assure effectiveness.

(iv) Procedures shall be developed and implemented to minimize employee exposure to cadmium when maintenance of ventilation systems and changing of filters is being conducted.

(e) Compliance program.

(i) Where employee exposure to cadmium exceeds the PEL and the employer is required under (a) of this subsection to implement controls to comply with the PEL, prior to the commencement of the job the employer shall establish and implement a written compliance program to reduce employee exposure to or below the PEL. To the extent that engineering and work practice controls cannot reduce exposures to or below the PEL, the employer shall include in the written compliance program the use of appropriate respiratory protection to achieve compliance with the PEL.

(ii) Written compliance programs shall be reviewed and updated as often and as promptly as necessary to reflect significant changes in the employer's compliance status or significant changes in the lowest air cadmium level that is technologically feasible.

(iii) A competent person shall review the comprehensive compliance program initially and after each change.

(iv) Written compliance programs shall be provided upon request for examination and copying to the director, or authorized representatives, affected employees, and designated employee representatives.

(7) Respirator protection.

(a) General. For employees who use respirators required by this section, the employer must provide respirators that comply with the requirements of this section. Respirators must be used during:

(i) Periods necessary to install or implement feasible engineering and work-practice controls when employee exposures exceed the PEL.

(ii) Maintenance and repair activities, and brief or intermittent operations, for which employee exposures exceed the PEL and engineering and work-practice controls are not feasible or are not required.

(iii) Work operations in regulated areas specified in subsection (5) of this section.

(iv) Work operations for which the employer has implemented all feasible engineering and work-practice controls, and such controls are not sufficient to reduce exposures to or below the PEL.

(v) Emergencies.

(vi) Work operations for which an employee, who is exposed to cadmium at or above the action level, requests a respirator.

(vii) Work operations for which engineering controls are not required under (a)(ii) of this subsection to reduce employee exposures that exceed the PEL.

(b) Respirator program.

(i) The employer must implement a respiratory protection program as required by chapter 296-62 WAC, Part E (except WAC 296-62-07130(1) and 296-62-07150 through 296-62-07156).

(ii) If an employee has breathing difficulty during fit testing or respirator use, the employer must provide the employee with a medical examination as required by subsection (12)(f)(ii) of this section to determine if the employee can use a respirator while performing the required duties.

(iii) No employees must use a respirator when, based on their recent medical examination, the examining physician determines that the employee will be unable to continue to function normally while using a respirator. If the physician determines the employee must be limited in, or removed from, their current job because of the employee's inability to use a respirator, the job limitation or removal must be conducted as required by (k) and (l) of this subsection.

(c) Respirator selection.

(i) The employer must select the appropriate respirator from Table 1 of this section.

Airborne concentration or condition of use ^a	Required respirator type ^b
10 x or less	A half-mask, air-purifying respirator equipped with a HEPA ^c filter. ^d
25 x or less	A powered air-purifying respirator ("PAPR") with a loose-fitting hood or helmet equipped with a HEPA filter, or a supplied-air respirator with a loose-fitting hood or helmet facepiece operated in the continuous flow mode.

Airborne concentration or condition of use ^a	Required respirator type ^b
50 x or less	A full facepiece air-purifying respirator equipped with a HEPA filter, or a powered air-purifying respirator with a tight-fitting half-mask equipped with a HEPA filter, or a supplied air respirator with a tight-fitting half-mask operated in the continuous flow mode.
250 x or less	A powered air-purifying respirator with a tight-fitting full facepiece equipped with a HEPA filter, or a supplied-air respirator with a tight-fitting full facepiece operated in the continuous flow mode.
1000 x or less	A supplied-air respirator with half-mask or full facepiece operated in the pressure demand or other positive pressure mode.
>1000 x or unknown concentrations	A self-contained breathing apparatus with a full facepiece operated in the pressure demand or other positive pressure mode, or a supplied-air respirator with a full facepiece operated in the pressure demand or other positive pressure mode and equipped with an auxiliary escape type self-contained breathing apparatus operated in the pressure demand mode.
Fire fighting	A self-contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode.

Note: ^a Concentrations expressed as multiple of the PEL.
^b Respirators assigned for higher environmental concentrations may be used at lower exposure levels. Quantitative fit testing is required for all tight-fitting air purifying respirators where airborne concentration of cadmium exceeds 10 times the TWA PEL ($10 \times 5 \mu\text{g}/\text{m}^3 = 50 \mu\text{g}/\text{m}^3$). A full facepiece respirator is required when eye irritation is experienced.
^c HEPA means High Efficiency Particulate Air.
^d Fit testing, qualitative or quantitative, is required.
 Source: Respiratory Decision Logic, NIOSH, 1987.

(ii) The employer shall provide a powered, air-purifying respirator (PAPR) instead of a negative-pressure respirator when an employee entitled to a respirator chooses to use this type of respirator and such a respirator will provide adequate protection to the employee.

(8) Emergency situations. The employer shall develop and implement a written plan for dealing with emergency situations involving substantial releases of airborne cadmium.

The plan shall include provisions for the use of appropriate respirators and personal protective equipment. In addition, employees not essential to correcting the emergency situation shall be restricted from the area and normal operations halted in that area until the emergency is abated.

(9) Protective work clothing and equipment

(a) Provision and use. If an employee is exposed to airborne cadmium above the PEL or where skin or eye irritation is associated with cadmium exposure at any level, the employer shall provide at no cost to the employee, and assure that the employee uses, appropriate protective work clothing and equipment that prevents contamination of the employee and the employee's garments. Protective work clothing and equipment includes, but is not limited to:

(i) Coveralls or similar full-body work clothing;

(ii) Gloves, head coverings, and boots or foot coverings; and

(iii) Face shields, vented goggles, or other appropriate protective equipment that complies with WAC 296-155-215.

(b) Removal and storage.

(i) The employer shall assure that employees remove all protective clothing and equipment contaminated with cadmium at the completion of the work shift and do so only in change rooms provided in accordance with subsection (10)(a) of this section.

(ii) The employer shall assure that no employee takes cadmium-contaminated protective clothing or equipment from the workplace, except for employees authorized to do so for purposes of laundering, cleaning, maintaining, or disposing of cadmium-contaminated protective clothing and equipment at an appropriate location or facility away from the workplace.

(iii) The employer shall assure that contaminated protective clothing and equipment, when removed for laundering, cleaning, maintenance, or disposal, is placed and stored in sealed, impermeable bags or other closed, impermeable containers that are designed to prevent dispersion of cadmium dust.

(iv) The employer shall assure that containers of contaminated protective clothing and equipment that are to be taken out of the change rooms or the workplace for laundering, cleaning, maintenance or disposal shall bear labels in accordance with subsection (13)(c) of this section.

(c) Cleaning, replacement, and disposal.

(i) The employer shall provide the protective clothing and equipment required by (a) of this subsection in a clean and dry condition as often as necessary to maintain its effectiveness, but in any event at least weekly. The employer is responsible for cleaning and laundering the protective clothing and equipment required by this subsection to maintain its effectiveness and is also responsible for disposing of such clothing and equipment.

(ii) The employer also is responsible for repairing or replacing required protective clothing and equipment as needed to maintain its effectiveness. When rips or tears are detected while an employee is working they shall be immediately mended, or the worksuit shall be immediately replaced.

(iii) The employer shall prohibit the removal of cadmium from protective clothing and equipment by blowing, shaking, or any other means that disperses cadmium into the air.

(iv) The employer shall assure that any laundering of contaminated clothing or cleaning of contaminated equipment in the workplace is done in a manner that prevents the release of airborne cadmium in excess of the permissible exposure limit prescribed in subsection (3) of this section.

(v) The employer shall inform any person who launders or cleans protective clothing or equipment contaminated with cadmium of the potentially harmful effects of exposure to cadmium, and that the clothing and equipment should be laundered or cleaned in a manner to effectively prevent the release of airborne cadmium in excess of the PEL.

(10) Hygiene areas and practices.

(a) General. For employees whose airborne exposure to cadmium is above the PEL, the employer shall provide clean change rooms, handwashing facilities, showers, and lunchroom facilities that comply with WAC 296-155-140.

(b) Change rooms. The employer shall assure that change rooms are equipped with separate storage facilities for street clothes and for protective clothing and equipment, which are designed to prevent dispersion of cadmium and contamination of the employee's street clothes.

(c) Showers and handwashing facilities.

(i) The employer shall assure that employees whose airborne exposure to cadmium is above the PEL shower during the end of the work shift.

(ii) The employer shall assure that employees who are exposed to cadmium above the PEL wash their hands and faces prior to eating, drinking, smoking, chewing tobacco or gum, or applying cosmetics.

(d) Lunchroom facilities.

(i) The employer shall assure that the lunchroom facilities are readily accessible to employees, that tables for eating are maintained free of cadmium, and that no employee in a lunchroom facility is exposed at any time to cadmium at or above a concentration of 2.5 $\mu\text{g}/\text{m}^3$.

(ii) The employer shall assure that employees do not enter lunchroom facilities with protective work clothing or equipment unless surface cadmium has been removed from the clothing and equipment by HEPA vacuuming or some other method that removes cadmium dust without dispersing it.

(11) Housekeeping.

(a) All surfaces shall be maintained as free as practicable of accumulations of cadmium.

(b) All spills and sudden releases of material containing cadmium shall be cleaned up as soon as possible.

(c) Surfaces contaminated with cadmium shall, wherever possible, be cleaned by vacuuming or other methods that minimize the likelihood of cadmium becoming airborne.

(d) HEPA-filtered vacuuming equipment or equally effective filtration methods shall be used for vacuuming. The equipment shall be used and emptied in a manner that minimizes the reentry of cadmium into the workplace.

(e) Shoveling, dry or wet sweeping, and brushing may be used only where vacuuming or other methods that minimize the likelihood of cadmium becoming airborne have been tried and found not to be effective.

(f) Compressed air shall not be used to remove cadmium from any surface unless the compressed air is used in con-

junction with a ventilation system designed to capture the dust cloud created by the compressed air.

(g) Waste, scrap, debris, bags, containers, personal protective equipment, and clothing contaminated with cadmium and consigned for disposal shall be collected and disposed of in sealed impermeable bags or other closed, impermeable containers. These bags and containers shall be labeled in accordance with subsection (13)(b) of this section.

(12) Medical surveillance.

(a) General.

(i) Scope.

(A) Currently exposed—The employer shall institute a medical surveillance program for all employees who are or may be exposed at or above the action level and all employees who perform the following tasks, operations, or jobs: Electrical grounding with cadmium-welding; cutting, brazing, burning, grinding, or welding on surfaces that were painted with cadmium-containing paints; electrical work using cadmium-coated conduit; use of cadmium containing paints; cutting and welding cadmium-plated steel; brazing or welding with cadmium alloys; fusing of reinforced steel by cadmium welding; maintaining or retrofitting cadmium-coated equipment; and, wrecking and demolition where cadmium is present. A medical surveillance program will not be required if the employer demonstrates that the employee:

(I) Is not currently exposed by the employer to airborne concentrations of cadmium at or above the action level on 30 or more days per year (twelve consecutive months); and

(II) Is not currently exposed by the employer in those tasks on 30 or more days per year (twelve consecutive months).

(B) Previously exposed—The employer shall also institute a medical surveillance program for all employees who might previously have been exposed to cadmium by the employer prior to the effective date of this section in tasks specified under (a)(i)(A) of this subsection, unless the employer demonstrates that the employee did not in the years prior to the effective date of this section work in those tasks for the employer with exposure to cadmium for an aggregated total of more than 12 months.

(ii) To determine an employee's fitness for using a respirator, the employer shall provide the limited medical examination specified in (f) of this subsection.

(iii) The employer shall assure that all medical examinations and procedures required by this section are performed by or under the supervision of a licensed physician, who has read and is familiar with the health effects WAC 296-62-07441, Appendix A, the regulatory text of this section, the protocol for sample handling and lab selection in WAC 296-62-07451, Appendix F, and the questionnaire of WAC 296-62-07447, Appendix D.

(iv) The employer shall provide the medical surveillance required by this section, including multiple physician review under (m) of this subsection without cost to employees, and at a time and place that is reasonable and convenient to employees.

(v) The employer shall assure that the collecting and handling of biological samples of cadmium in urine (CdU), cadmium in blood (CdB), and beta-2 microglobulin in urine (B₂-M) taken from employees under this section is done in a

manner that assures their reliability and that analysis of biological samples of cadmium in urine (CdU), cadmium in blood (CdB), and beta-2 microglobulin in urine (B₂-M) taken from employees under this section is performed in laboratories with demonstrated proficiency to perform the particular analysis. (See WAC 296-62-07451, Appendix F.)

(b) Initial examination.

(i) For employees covered by medical surveillance under (a)(i) of this subsection, the employer shall provide an initial medical examination. The examination shall be provided to those employees within 30 days after initial assignment to a job with exposure to cadmium or no later than 90 days after the effective date of this section, whichever date is later.

(ii) The initial medical examination shall include:

(A) A detailed medical and work history, with emphasis on: Past, present, and anticipated future exposure to cadmium; any history of renal, cardiovascular, respiratory, hematopoietic, reproductive, and/or musculo-skeletal system dysfunction; current usage of medication with potential nephrotoxic side-effects; and smoking history and current status; and

(B) Biological monitoring that includes the following tests:

(I) Cadmium in urine (CdU), standardized to grams of creatinine (g/Cr);

(II) Beta-2 microglobulin in urine (B₂-M), standardized to grams of creatinine (g/Cr), with pH specified, as described in WAC 296-62-07451, Appendix F; and

(III) Cadmium in blood (CdB), standardized to liters of whole blood (lwb).

(iii) Recent examination: An initial examination is not required to be provided if adequate records show that the employee has been examined in accordance with the requirements of (b)(ii) of this subsection within the past 12 months. In that case, such records shall be maintained as part of the employee's medical record and the prior exam shall be treated as if it were an initial examination for the purposes of (c) and (d) of this subsection.

(c) Actions triggered by initial biological monitoring.

(i) If the results of the biological monitoring tests in the initial examination show the employee's CdU level to be at or below 3 µg/g Cr, B₂-M level to be at or below 300 µg/g Cr and CdB level to be at or below 5 µg/lwb, then:

(A) For employees who are subject to medical surveillance under (a)(i)(A) of this subsection because of current or anticipated exposure to cadmium, the employer shall provide the minimum level of periodic medical surveillance in accordance with the requirements in (d)(i) of this subsection; and

(B) For employees who are subject to medical surveillance under (a)(i)(B) of this subsection because of prior but not current exposure, the employer shall provide biological monitoring for CdU, B₂-M, and CdB one year after the initial biological monitoring and then the employer shall comply with the requirements of (d)(vi) of this subsection.

(ii) For all employees who are subject to medical surveillance under (a)(i) of this subsection, if the results of the initial biological monitoring tests show the level of CdU to exceed 3 µg/g Cr, the level of B₂-M to be in excess of 300 µg/g Cr,

or the level of CdB to be in excess of 5 µg/lwb, the employer shall:

(A) Within two weeks after receipt of biological monitoring results, reassess the employee's occupational exposure to cadmium as follows:

(I) Reassess the employee's work practices and personal hygiene;

(II) Reevaluate the employee's respirator use, if any, and the respirator program;

(III) Review the hygiene facilities;

(IV) Reevaluate the maintenance and effectiveness of the relevant engineering controls;

(V) Assess the employee's smoking history and status;

(B) Within 30 days after the exposure reassessment, specified in (c)(ii)(A) of this subsection, take reasonable steps to correct any deficiencies found in the reassessment that may be responsible for the employee's excess exposure to cadmium; and

(C) Within 90 days after receipt of biological monitoring results, provide a full medical examination to the employee in accordance with the requirements of (d)(ii) of this subsection. After completing the medical examination, the examining physician shall determine in a written medical opinion whether to medically remove the employee. If the physician determines that medical removal is not necessary, then until the employee's CdU level falls to or below 3 µg/g Cr, B₂-M level falls to or below 300 µg/g Cr and CdB level falls to or below 5 µg/lwb, the employer shall:

(I) Provide biological monitoring in accordance with (b)(ii)(B) of this subsection on a semiannual basis; and

(II) Provide annual medical examinations in accordance with (d)(ii) of this subsection.

(iii) For all employees who are subject to medical surveillance under (a)(i) of this subsection, if the results of the initial biological monitoring tests show the level of CdU to be in excess of 15 µg/g Cr, or the level of CdB to be in excess of 15 µg/lwb, or the level of B₂-M to be in excess of 1,500 µg/g Cr, the employer shall comply with the requirements of (c)(ii)(A) and (B) of this subsection. Within 90 days after receipt of biological monitoring results, the employer shall provide a full medical examination to the employee in accordance with the requirements of (d)(ii) of this subsection. After completing the medical examination, the examining physician shall determine in a written medical opinion whether to medically remove the employee. However, if the initial biological monitoring results and the biological monitoring results obtained during the medical examination both show that: CdU exceeds 15 µg/g Cr; or CdB exceeds 15 µg/lwb; or B₂-M exceeds 1500 µg/g Cr, and in addition CdU exceeds 3 µg/g Cr or CdB exceeds 5 µg/liter of whole blood, then the physician shall medically remove the employee from exposure to cadmium at or above the action level. If the second set of biological monitoring results obtained during the medical examination does not show that a mandatory removal trigger level has been exceeded, then the employee is not required to be removed by the mandatory provisions of this section. If the employee is not required to be removed by the mandatory provisions of this section or by the physician's determination, then until the employee's CdU level falls to or

below 3 µg/g Cr, B₂-M level falls to or below 300 µg/g Cr and CdB level falls to or below 5 µg/lwb, the employer shall:

(A) Periodically reassess the employee's occupational exposure to cadmium;

(B) Provide biological monitoring in accordance with (b)(ii)(B) of this subsection on a quarterly basis; and

(C) Provide semiannual medical examinations in accordance with (d)(ii) of this subsection.

(iv) For all employees to whom medical surveillance is provided, beginning on January 1, 1999, and in lieu of (c)(iii) of this subsection, whenever the results of initial biological monitoring tests show the employee's CdU level to be in excess of 7 µg/g Cr, or B₂-M level to be in excess of 750 µg/g Cr, or CdB level to be in excess of 10 µg/lwb, the employer shall comply with the requirements of (c)(ii)(A) and (B) of this subsection. Within 90 days after receipt of biological monitoring results, the employer shall provide a full medical examination to the employee in accordance with the requirements of (d)(ii) of this subsection. After completing the medical examination, the examining physician shall determine in a written medical opinion whether to medically remove the employee. However, if the initial biological monitoring results and the biological monitoring results obtained during the medical examination both show that: CdU exceeds 7 µg/g Cr; or CdB exceeds 10 µg/lwb; or B₂-M exceeds 750 µg/g Cr, and in addition CdU exceeds 3 µg/g Cr or CdB exceeds 5 µg/liter of whole blood, then the physician shall medically remove the employee from exposure to cadmium at or above the action level. If the second set of biological monitoring results obtained during the medical examination does not show that a mandatory removal trigger level has been exceeded, then the employee is not required to be removed by the mandatory provisions of this section. If the employee is not required to be removed by the mandatory provisions of this section or by the physician's determination, then until the employee's CdU level falls to or below 3 µg/g Cr, B₂-M level falls to or below 300 µg/g Cr and CdB level falls to or below 5 µg/lwb, the employer shall:

(A) Periodically reassess the employee's occupational exposure to cadmium;

(B) Provide biological monitoring in accordance with (b)(ii)(B) of this subsection on a quarterly basis; and

(C) Provide semiannual medical examinations in accordance with (d)(ii) of this subsection.

(d) Periodic medical surveillance.

(i) For each employee who is covered by medical surveillance under (a)(i)(A) of this subsection because of current or anticipated exposure to cadmium, the employer shall provide at least the minimum level of periodic medical surveillance, which consists of periodic medical examinations and periodic biological monitoring. A periodic medical examination shall be provided within one year after the initial examination required by (b) of this subsection and thereafter at least biennially. Biological sampling shall be provided at least annually either as part of a periodic medical examination or separately as periodic biological monitoring.

(ii) The periodic medical examination shall include:

(A) A detailed medical and work history, or update thereof, with emphasis on: Past, present, and anticipated

future exposure to cadmium; smoking history and current status; reproductive history; current use of medications with potential nephrotoxic side-effects; any history of renal, cardiovascular, respiratory, hematopoietic, and/or musculo-skeletal system dysfunction; and as part of the medical and work history, for employees who wear respirators, questions 3 through 11 and 25 through 32 in WAC 296-62-07447, Appendix D;

(B) A complete physical examination with emphasis on: Blood pressure, the respiratory system, and the urinary system;

(C) A 14 inch by 17 inch, or a reasonably standard sized posterior-anterior chest x-ray (after the initial x-ray, the frequency of chest x-rays is to be determined by the examining physician);

(D) Pulmonary function tests, including forced vital capacity (FVC) and forced expiratory volume at 1 second (FEV1);

(E) Biological monitoring, as required in (b)(ii)(B) of this subsection;

(F) Blood analysis, in addition to the analysis required under (b)(ii)(B) of this subsection, including blood urea nitrogen, complete blood count, and serum creatinine;

(G) Urinalysis, in addition to the analysis required under (b)(ii)(B) of this subsection, including the determination of albumin, glucose, and total and low molecular weight proteins;

(H) For males over 40 years old, prostate palpation, or other at least as effective diagnostic test(s); and

(I) Any additional tests or procedures deemed appropriate by the examining physician.

(iii) Periodic biological monitoring shall be provided in accordance with (b)(ii)(B) of this subsection.

(iv) If the results of periodic biological monitoring or the results of biological monitoring performed as part of the periodic medical examination show the level of the employee's CdU, B₂-M, or CdB to be in excess of the levels specified in (c)(ii) and (iii) of this subsection; or, beginning on January 1, 1999, in excess of the levels specified in (c)(ii) or (iv) of this subsection, the employer shall take the appropriate actions specified in (c)(ii) through (iv) of this subsection, respectively.

(v) For previously exposed employees under (a)(i)(B) of this subsection:

(A) If the employee's levels of CdU did not exceed 3 µg/g Cr, CdB did not exceed 5 µg/lwb, and B₂-M did not exceed 300 µg/g Cr in the initial biological monitoring tests, and if the results of the follow-up biological monitoring required by (c)(i)(B) of this subsection one year after the initial examination confirm the previous results, the employer may discontinue all periodic medical surveillance for that employee.

(B) If the initial biological monitoring results for CdU, CdB, or B₂-M were in excess of the levels specified in (c)(i) of this subsection, but subsequent biological monitoring results required by (c)(ii) through (iv) of this subsection show that the employee's CdU levels no longer exceed 3 µg/g Cr, CdB levels no longer exceed 5 µg/lwb, and B₂-M levels no longer exceed 300 µg/g Cr, the employer shall provide bio-

logical monitoring for CdU, CdB, and B₂-M one year after these most recent biological monitoring results. If the results of the follow-up biological monitoring specified in this section, confirm the previous results, the employer may discontinue all periodic medical surveillance for that employee.

(C) However, if the results of the follow-up tests specified in (d)(v)(A) or (B) of this subsection indicate that the level of the employee's CdU, B₂-M, or CdB exceeds these same levels, the employer is required to provide annual medical examinations in accordance with the provisions of (d)(ii) of this subsection until the results of biological monitoring are consistently below these levels or the examining physician determines in a written medical opinion that further medical surveillance is not required to protect the employee's health.

(vi) A routine, biennial medical examination is not required to be provided in accordance with (c)(i) and (d) of this subsection if adequate medical records show that the employee has been examined in accordance with the requirements of (d)(ii) of this subsection within the past 12 months. In that case, such records shall be maintained by the employer as part of the employee's medical record, and the next routine, periodic medical examination shall be made available to the employee within two years of the previous examination.

(e) Actions triggered by medical examinations. If the results of a medical examination carried out in accordance with this section indicate any laboratory or clinical finding consistent with cadmium toxicity that does not require employer action under (b), (c), or (d) of this subsection, the employer shall take the following steps and continue to take them until the physician determines that they are no longer necessary.

(i) Periodically reassess: The employee's work practices and personal hygiene; the employee's respirator use, if any; the employee's smoking history and status; the respiratory protection program; the hygiene facilities; the maintenance and effectiveness of the relevant engineering controls; and take all reasonable steps to correct the deficiencies found in the reassessment that may be responsible for the employee's excess exposure to cadmium.

(ii) Provide semiannual medical reexaminations to evaluate the abnormal clinical sign(s) of cadmium toxicity until the results are normal or the employee is medically removed; and

(iii) Where the results of tests for total proteins in urine are abnormal, provide a more detailed medical evaluation of the toxic effects of cadmium on the employee's renal system.

(f) Examination for respirator use.

(i) To determine an employee's fitness for respirator use, the employer shall provide a medical examination that includes the elements specified in (f)(i)(A) through (D) of this subsection. This examination shall be provided prior to the employee's being assigned to a job that requires the use of a respirator or no later than 90 days after this section goes into effect, whichever date is later, to any employee without a medical examination within the preceding 12 months that satisfies the requirements of this section.

(A) A detailed medical and work history, or update thereof, with emphasis on: Past exposure to cadmium; smok-

ing history and current status; any history of renal, cardiovascular, respiratory, hematopoietic, and/or musculo-skeletal system dysfunction; a description of the job for which the respirator is required; and questions 3 through 11 and 25 through 32 in WAC 296-62-07447, Appendix D;

(B) A blood pressure test;

(C) Biological monitoring of the employee's levels of CdU, CdB and B₂-M in accordance with the requirements of (b)(ii)(B) of this subsection, unless such results already have been obtained within the twelve months; and

(D) Any other test or procedure that the examining physician deems appropriate.

(ii) After reviewing all the information obtained from the medical examination required in (f)(i) of this subsection, the physician shall determine whether the employee is fit to wear a respirator.

(iii) Whenever an employee has exhibited difficulty in breathing during a respirator fit test or during use of a respirator, the employer, as soon as possible, shall provide the employee with a periodic medical examination in accordance with (d)(ii) of this subsection to determine the employee's fitness to wear a respirator.

(iv) Where the results of the examination required under (f)(i), (ii), or (iii) of this subsection are abnormal, medical limitation or prohibition of respirator use shall be considered. If the employee is allowed to wear a respirator, the employee's ability to continue to do so shall be periodically evaluated by a physician.

(g) Emergency examinations.

(i) In addition to the medical surveillance required in (b) through (f) of this subsection, the employer shall provide a medical examination as soon as possible to any employee who may have been acutely exposed to cadmium because of an emergency.

(ii) The examination shall include the requirements of (d)(ii), of this subsection, with emphasis on the respiratory system, other organ systems considered appropriate by the examining physician, and symptoms of acute overexposure, as identified in Appendix A, WAC 296-62-07441 (2)(b)(i) and (ii) and (4).

(h) Termination of employment examination.

(i) At termination of employment, the employer shall provide a medical examination in accordance with (d)(ii) of this subsection, including a chest x-ray where necessary, to any employee to whom at any prior time the employer was required to provide medical surveillance under (a)(i) or (g) of this subsection. However, if the last examination satisfied the requirements of (d)(ii) of this subsection and was less than six months prior to the date of termination, no further examination is required unless otherwise specified in (c) or (e) of this subsection;

(ii) In addition, if the employer has discontinued all periodic medical surveillance under (d)(v) of this subsection, no termination of employment medical examination is required.

(i) Information provided to the physician. The employer shall provide the following information to the examining physician:

(i) A copy of this standard and appendices;

(ii) A description of the affected employee's former, current, and anticipated duties as they relate to the employee's occupational exposure to cadmium;

(iii) The employee's former, current, and anticipated future levels of occupational exposure to cadmium;

(iv) A description of any personal protective equipment, including respirators, used or to be used by the employee, including when and for how long the employee has used that equipment; and

(v) Relevant results of previous biological monitoring and medical examinations.

(j) Physician's written medical opinion.

(i) The employer shall promptly obtain a written, signed, medical opinion from the examining physician for each medical examination performed on each employee. This written opinion shall contain:

(A) The physician's diagnosis for the employee;

(B) The physician's opinion as to whether the employee has any detected medical condition(s) that would place the employee at increased risk of material impairment to health from further exposure to cadmium, including any indications of potential cadmium toxicity;

(C) The results of any biological or other testing or related evaluations that directly assess the employee's absorption of cadmium;

(D) Any recommended removal from, or limitation on the activities or duties of the employee or on the employee's use of personal protective equipment, such as respirators;

(E) A statement that the physician has clearly and carefully explained to the employee the results of the medical examination, including all biological monitoring results and any medical conditions related to cadmium exposure that require further evaluation or treatment, and any limitation on the employee's diet or use of medications.

(ii) The employer shall promptly obtain a copy of the results of any biological monitoring provided by an employer to an employee independently of a medical examination under (b) and (d) of this subsection, and, in lieu of a written medical opinion, an explanation sheet explaining those results.

(iii) The employer shall instruct the physician not to reveal orally or in the written medical opinion given to the employer specific findings or diagnoses unrelated to occupational exposure to cadmium.

(k) Medical removal protection (MRP).

(i) General.

(A) The employer shall temporarily remove an employee from work where there is excess exposure to cadmium on each occasion that medical removal is required under (c), (d), or (f) of this subsection and on each occasion that a physician determines in a written medical opinion that the employee should be removed from such exposure. The physician's determination may be based on biological monitoring results, inability to wear a respirator, evidence of illness, other signs or symptoms of cadmium-related dysfunction or disease, or any other reason deemed medically sufficient by the physician.

(B) The employer shall medically remove an employee in accordance with (k) of this subsection regardless of

whether at the time of removal a job is available into which the removed employee may be transferred.

(C) Whenever an employee is medically removed under (k) of this subsection, the employer shall transfer the removed employee to a job where the exposure to cadmium is within the permissible levels specified in subsection (12) of this section as soon as one becomes available.

(D) For any employee who is medically removed under the provisions of (k)(i) of this subsection, the employer shall provide follow-up medical examinations semiannually until, in a written medical opinion, the examining physician determines that either the employee may be returned to his/her former job status or the employee must be permanently removed from excess cadmium exposure.

(E) The employer may not return an employee who has been medically removed for any reason to his/her former job status until a physician determines in a written medical opinion that continued medical removal is no longer necessary to protect the employee's health.

(ii) Where an employee is found unfit to wear a respirator under (f)(ii) of this subsection, the employer shall remove the employee from work where exposure to cadmium is above the PEL.

(iii) Where removal is based upon any reason other than the employee's inability to wear a respirator, the employer shall remove the employee from work where exposure to cadmium is at or above the action level.

(iv) Except as specified in (k)(v) of this subsection, no employee who was removed because his/her level of CdU, CdB and/or B₂-M exceeded the trigger levels in (c) or (d) of this subsection may be returned to work with exposure to cadmium at or above the action level until the employee's levels of CdU fall to or below 3 µg/g Cr, CdB fall to or below 5 µg/lwb, and B₂-M fall to or below 300 µg/g Cr.

(v) However, when in the examining physician's opinion continued exposure to cadmium will not pose an increased risk to the employee's health and there are special circumstances that make continued medical removal an inappropriate remedy, the physician shall fully discuss these matters with the employee, and then in a written determination may return a worker to his/her former job status despite what would otherwise be unacceptably high biological monitoring results. Thereafter and until such time as the employee's biological monitoring results have decreased to levels where he/she could have been returned to his/her former job status, the returned employee shall continue medical surveillance as if he/she were still on medical removal. Until such time, the employee is no longer subject to mandatory medical removal. Subsequent questions regarding the employee's medical removal shall be decided solely by a final medical determination.

(vi) Where an employer, although not required by this section to do so, removes an employee from exposure to cadmium or otherwise places limitations on an employee due to the effects of cadmium exposure on the employee's medical condition, the employer shall provide the same medical removal protection benefits to that employee under (l) of this subsection as would have been provided had the removal been required under (k) of this subsection.

(l) Medical removal protection benefits.

(i) The employer shall provide medical removal protection benefits to an employee for up to a maximum of 18 months each time, and while the employee is temporarily medically removed under (k) of this subsection.

(ii) For purposes of this section, the requirement that the employer provide medical removal protection benefits means that the employer shall maintain the total normal earnings, seniority, and all other employee rights and benefits of the removed employee, including the employee's right to his/her former job status, as if the employee had not been removed from the employee's job or otherwise medically limited.

(iii) Where, after 18 months on medical removal because of elevated biological monitoring results, the employee's monitoring results have not declined to a low enough level to permit the employee to be returned to his/her former job status:

(A) The employer shall make available to the employee a medical examination pursuant to this section in order to obtain a final medical determination as to whether the employee may be returned to his/her former job status or must be permanently removed from excess cadmium exposure; and

(B) The employer shall assure that the final medical determination indicates whether the employee may be returned to his/her former job status and what steps, if any, should be taken to protect the employee's health.

(iv) The employer may condition the provision of medical removal protection benefits upon the employee's participation in medical surveillance provided in accordance with this section.

(m) Multiple physician review.

(i) If the employer selects the initial physician to conduct any medical examination or consultation provided to an employee under this section, the employee may designate a second physician to:

(A) Review any findings, determinations, or recommendations of the initial physician; and

(B) Conduct such examinations, consultations, and laboratory tests as the second physician deems necessary to facilitate this review.

(ii) The employer shall promptly notify an employee of the right to seek a second medical opinion after each occasion that an initial physician provided by the employer conducts a medical examination or consultation pursuant to this section. The employer may condition its participation in, and payment for, multiple physician review upon the employee doing the following within fifteen (15) days after receipt of this notice, or receipt of the initial physician's written opinion, whichever is later:

(A) Informing the employer that he or she intends to seek a medical opinion; and

(B) Initiating steps to make an appointment with a second physician.

(iii) If the findings, determinations, or recommendations of the second physician differ from those of the initial physician, then the employer and the employee shall assure that efforts are made for the two physicians to resolve any disagreement.

(iv) If the two physicians have been unable to quickly resolve their disagreement, then the employer and the

employee, through their respective physicians, shall designate a third physician to:

(A) Review any findings, determinations, or recommendations of the other two physicians; and

(B) Conduct such examinations, consultations, laboratory tests, and discussions with the other two physicians as the third physician deems necessary to resolve the disagreement among them.

(v) The employer shall act consistently with the findings, determinations, and recommendations of the third physician, unless the employer and the employee reach an agreement that is consistent with the recommendations of at least one of the other two physicians.

(n) Alternate physician determination. The employer and an employee or designated employee representative may agree upon the use of any alternate form of physician determination in lieu of the multiple physician review provided by (m) of this subsection, so long as the alternative is expeditious and at least as protective of the employee.

(o) Information the employer must provide the employee.

(i) The employer shall provide a copy of the physician's written medical opinion to the examined employee within five working days after receipt thereof.

(ii) The employer shall provide the employee with a copy of the employee's biological monitoring results and an explanation sheet explaining the results within five working days after receipt thereof.

(iii) Within 30 days after a request by an employee, the employer shall provide the employee with the information the employer is required to provide the examining physician under (i) of this subsection.

(p) Reporting. In addition to other medical events that are required to be reported on the OSHA Form No. 200, the employer shall report any abnormal condition or disorder caused by occupational exposure to cadmium associated with employment as specified in Chapter (V)(E) of the Bureau of Labor Statistics Recordkeeping Guidelines for Occupational Injuries and Illnesses.

(13) Communication of cadmium hazards to employees

(a) General. In communications concerning cadmium hazards, employers shall comply with the requirements of WISHA's Hazard Communication Standard, chapter 296-62 WAC, Part C, including but not limited to the requirements concerning warning signs and labels, material safety data sheets (MSDS), and employee information and training. In addition, employers shall comply with the following requirements:

(b) Warning signs.

(i) Warning signs shall be provided and displayed in regulated areas. In addition, warning signs shall be posted at all approaches to regulated areas so that an employee may read the signs and take necessary protective steps before entering the area.

(ii) Warning signs required by (b)(i) of this subsection shall bear the following information:

Danger, Cadmium, Cancer Hazard, Can Cause Lung and Kidney Disease, Authorized Personnel Only, Respirators Required in This Area

(iii) The employer shall assure that signs required by this section are illuminated, cleaned, and maintained as necessary so that the legend is readily visible.

(c) Warning labels.

(i) Shipping and storage containers containing cadmium, cadmium compounds, or cadmium contaminated clothing, equipment, waste, scrap, or debris shall bear appropriate warning labels, as specified in (c)(ii) of this subsection.

(ii) The warning labels shall include at least the following information:

Danger, Contains Cadmium, Cancer Hazard, Avoid Creating Dust, Can Cause Lung and Kidney Disease

(iii) Where feasible, installed cadmium products shall have a visible label or other indication that cadmium is present.

(d) Employee information and training.

(i) The employer shall institute a training program for all employees who are potentially exposed to cadmium, assure employee participation in the program, and maintain a record of the contents of such program.

(ii) Training shall be provided prior to or at the time of initial assignment to a job involving potential exposure to cadmium and at least annually thereafter.

(iii) The employer shall make the training program understandable to the employee and shall assure that each employee is informed of the following:

(A) The health hazards associated with cadmium exposure, with special attention to the information incorporated in WAC 296-62-07441, Appendix A;

(B) The quantity, location, manner of use, release, and storage of cadmium in the workplace and the specific nature of operations that could result in exposure to cadmium, especially exposures above the PEL;

(C) The engineering controls and work practices associated with the employee's job assignment;

(D) The measures employees can take to protect themselves from exposure to cadmium, including modification of such habits as smoking and personal hygiene, and specific procedures the employer has implemented to protect employees from exposure to cadmium such as appropriate work practices, emergency procedures, and the provision of personal protective equipment;

(E) The purpose, proper selection, fitting, proper use, and limitations of respirators and protective clothing;

(F) The purpose and a description of the medical surveillance program required by subsection (12) of this section;

(G) The contents of this section and its appendices; and

(H) The employee's rights of access to records under chapter 296-62 WAC, Part B.

(iv) Additional access to information and training program and materials.

(A) The employer shall make a copy of this section and its appendices readily available to all affected employees and shall provide a copy without cost if requested.

(B) Upon request, the employer shall provide to the director or authorized representative, all materials relating to the employee information and the training program.

(e) Multi-employer workplace. In a multi-employer workplace, an employer who produces, uses, or stores cadmium in a manner that may expose employees of other employers to cadmium shall notify those employers of the potential hazard in accordance with WAC 296-62-05409 of the hazard communication standard.

(14) Recordkeeping.

(a) Exposure monitoring.

(i) The employer shall establish and keep an accurate record of all air monitoring for cadmium in the workplace.

(ii) This record shall include at least the following information:

(A) The monitoring date, shift, duration, air volume, and results in terms of an 8-hour TWA of each sample taken, and if cadmium is not detected, the detection level;

(B) The name, Social Security number, and job classification of all employees monitored and of all other employees whose exposures the monitoring result is intended to represent, including, where applicable, a description of how it was determined that the employee's monitoring result could be taken to represent other employee's exposures;

(C) A description of the sampling and analytical methods used and evidence of their accuracy;

(D) The type of respiratory protective device, if any, worn by the monitored employee and by any other employee whose exposure the monitoring result is intended to represent;

(E) A notation of any other conditions that might have affected the monitoring results;

(F) Any exposure monitoring or objective data that were used and the levels.

(iii) The employer shall maintain this record for at least thirty (30) years, in accordance with WAC 296-62-05207.

(iv) The employer shall also provide a copy of the results of an employee's air monitoring prescribed in subsection (4) of this section to an industry trade association and to the employee's union, if any, or, if either of such associations or unions do not exist, to another comparable organization that is competent to maintain such records and is reasonably accessible to employers and employees in the industry.

(b) Objective data for exemption from requirement for initial monitoring.

(i) For purposes of this section, objective data are information demonstrating that a particular product or material containing cadmium or a specific process, operation, or activity involving cadmium cannot release dust or fumes in concentrations at or above the action level even under the worst-case release conditions. Objective data can be obtained from an industry-wide study or from laboratory product test results from manufacturers of cadmium-containing products or materials. The data the employer uses from an industry-wide survey must be obtained under workplace conditions closely resembling the processes, types of material, control methods, work practices, and environmental conditions in the employer's current operations.

(ii) The employer shall maintain the record for at least 30 years of the objective data relied upon.

(c) Medical surveillance.

(i) The employer shall establish and maintain an accurate record for each employee covered by medical surveillance under (a)(i) of this subsection.

(ii) The record shall include at least the following information about the employee:

(A) Name, Social Security number, and description of duties;

(B) A copy of the physician's written opinions and of the explanation sheets for biological monitoring results;

(C) A copy of the medical history, and the results of any physical examination and all test results that are required to be provided by this section, including biological tests, x-rays, pulmonary function tests, etc., or that have been obtained to further evaluate any condition that might be related to cadmium exposure;

(D) The employee's medical symptoms that might be related to exposure to cadmium; and

(E) A copy of the information provided to the physician as required by subsection (12)(i) of this section.

(iii) The employer shall assure that this record is maintained for the duration of employment plus thirty (30) years, in accordance with WAC 296-62-05207.

(iv) At the employee's request, the employer shall promptly provide a copy of the employee's medical record, or update as appropriate, to a medical doctor or a union specified by the employee.

(d) Training. The employer shall certify that employees have been trained by preparing a certification record which includes the identity of the person trained, the signature of the employer or the person who conducted the training, and the date the training was completed. The certification records shall be prepared at the completion of training and shall be maintained on file for one (1) year beyond the date of training of that employee.

(e) Availability.

(i) Except as otherwise provided for in this section, access to all records required to be maintained by (a) through (d) of this subsection shall be in accordance with the provisions of WAC 296-62-052.

(ii) Within 15 days after a request, the employer shall make an employee's medical records required to be kept by (c) of this subsection available for examination and copying to the subject employee, to designated representatives, to anyone having the specific written consent of the subject employee, and after the employee's death or incapacitation, to the employee's family members.

(f) Transfer of records. Whenever an employer ceases to do business and there is no successor employer or designated organization to receive and retain records for the prescribed period, the employer shall comply with the requirements concerning transfer of records set forth in WAC 296-62-05215.

(15) Observation of monitoring.

(a) Employee observation. The employer shall provide affected employees or their designated representatives an opportunity to observe any monitoring of employee exposure to cadmium.

(b) Observation procedures. When observation of monitoring requires entry into an area where the use of protective clothing or equipment is required, the employer shall provide

the observer with that clothing and equipment and shall assure that the observer uses such clothing and equipment and complies with all other applicable safety and health procedures.

(16) Appendices.

(a) Compliance with the fit testing requirements in WAC 296-62-07201 through 296-62-07248, Appendices A-1, A-2 and A-3 of chapter 296-62 WAC, Part E, are mandatory.

(b) Except where portions of WAC 296-62-07441, 296-62-07443, 296-62-07447, 296-62-07449, and 296-62-07451, Appendices A, B, D, E, and F, respectively, to this section are expressly incorporated in requirements of this section, these appendices are purely informational and are not intended to create any additional obligations not otherwise imposed or to detract from any existing obligations.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-10-071, § 296-155-174, filed 5/4/99, effective 9/1/99. Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-174, filed 7/20/94, effective 9/20/94; 93-21-075 (Order 93-06), § 296-155-174, filed 10/20/93, effective 12/1/93; 93-07-044 (Order 93-01), § 296-155-174, filed 3/13/93, effective 4/27/93.]

WAC 296-155-176 Lead.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-176, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17603 Scope. WAC 296-155-176, Lead, applies to all construction work where an employee may be occupationally exposed to lead. All construction work excluded from coverage in the general industry standard for lead by WAC 296-62-07521 (1)(b) is covered by this standard. Construction work is defined as work for construction, alteration and/or repair, including painting and decorating. It includes but is not limited to the following:

- (1) Demolition or salvage of structures where lead or materials containing lead are present;
- (2) Removal or encapsulation of materials containing lead;
- (3) New construction, alteration, repair, or renovation of structures, substrates, or portions thereof, that contain lead, or materials containing lead;
- (4) Installation of products containing lead;
- (5) Lead contamination/emergency cleanup;
- (6) Transportation, disposal, storage, or containment of lead or materials containing lead on the site or location at which construction activities are performed; and
- (7) Maintenance operations associated with the construction activities described in this section.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17603, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17605 Definitions. (1) Action level means employee exposure, without regard to the use of respirators, to an airborne concentration of lead of 30 micrograms per cubic meter of air (30 $\mu\text{g}/\text{m}^3$) calculated as an 8-hour time-weighted average (TWA).

(2) Competent person means one who is capable of identifying existing and predictable lead hazards in the surroundings or working conditions and who has authorization to take prompt corrective measures to eliminate them.

(2001 Ed.)

(3) Director means the director of labor and industries, or his/her designated representative.

(4) Lead means metallic lead, all inorganic lead compounds, and organic lead soaps. Excluded from this definition are all other organic lead compounds.

(5) This section means WAC 296-155-176 through 296-155-17656.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17605, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17607 Permissible exposure limit. (1) The employer shall assure that no employee is exposed to lead at concentrations greater than fifty micrograms per cubic meter of air (50 $\mu\text{g}/\text{m}^3$) averaged over an 8-hour period.

(2) If an employee is exposed to lead for more than 8 hours in any work day the employees' allowable exposure, as a time weighted average (TWA) for that day, shall be reduced according to the following formula:

Allowable employee exposure (in $\mu\text{g}/\text{m}^3$) = 400 divided by hours worked in the day.

(3) When respirators are used to limit employee exposure as required by this section and all the requirements of WAC 296-155-17611(1) and 296-155-17613 have been met, employee exposure may be considered to be at the level provided by the protection factor of the respirator for those periods the respirator is worn. Those periods may be averaged with exposure levels during periods when respirators are not worn to determine the employee's daily TWA exposure.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17607, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17609 Exposure assessment. (1) General.

(a) Each employer who has a workplace or operation covered by this standard shall initially determine if any employee may be exposed to lead at or above the action level.

(b) For the purposes of this section, employee exposure is that exposure which would occur if the employee were not using a respirator.

(c) With the exception of monitoring under subsection (3) of this section, where monitoring is required by this standard, the employer shall collect personal samples representative of a full shift including at least one sample for each job classification in each work area either for each shift or for the shift with the highest exposure level.

(d) Full shift personal samples shall be representative of the monitored employee's regular, daily exposure to lead.

(2) Protection of employees during assessment of exposure.

(a) With respect to the lead related tasks listed in this subdivision, where lead is present, until the employer performs an employee exposure assessment as required in this section and documents that the employee performing any of the listed tasks is not exposed above the PEL, the employer shall treat the employee as if the employee were exposed above the PEL, and not in excess of ten (10) times the PEL, and shall implement employee protective measures prescribed in subdivision (e) of this subsection. The tasks covered by this requirement are:

(i) Where lead containing coatings or paint are present: Manual demolition of structures (e.g. dry wall), manual scraping, manual sanding, heat gun applications, and power tool cleaning with dust collection systems;

(ii) Spray painting with lead paint.

(b) In addition, with regard to tasks not listed in subdivision (a), where the employer has any reason to believe that an employee performing the task may be exposed to lead in excess of the PEL, until the employer performs an employee exposure assessment as required by this section and documents that the employee's lead exposure is not above the PEL the employer shall treat the employee as if the employee were exposed above the PEL and shall implement employee protective measures as prescribed in subdivision (e) of this subsection.

(c) With respect to the tasks listed in this subdivision, where lead is present, until the employer performs an employee exposure assessment as required in this section, and documents that the employee performing any of the listed tasks is not exposed in excess of 500 $\mu\text{g}/\text{m}^3$, the employer shall treat the employee as if the employee were exposed to lead in excess of 500 $\mu\text{g}/\text{m}^3$ and shall implement employee protective measures as prescribed in subdivision (e) of this subsection. Where the employer does establish that the employee is exposed to levels of lead below 500 $\mu\text{g}/\text{m}^3$, the employer may provide the exposed employee with the appropriate respirator prescribed for such use at such lower exposures, in accordance with Table 1 of WAC 296-155-17613. The tasks covered by this requirement are:

(i) Using lead containing mortar; lead burning;

(ii) Where lead containing coatings or paint are present: Rivet busting; power tool cleaning without dust collection systems; cleanup activities where dry expendable abrasives are used; and abrasive blasting enclosure movement and removal.

(d) With respect to the tasks listed in this subdivision, where lead is present, until the employer performs an employee exposure assessment as required in this section and documents that the employee performing any of the listed tasks is not exposed to lead in excess of 2,500 $\mu\text{g}/\text{m}^3$ (50 x PEL), the employer shall treat the employee as if the employee were exposed to lead in excess of 2,500 $\mu\text{g}/\text{m}^3$ and shall implement employee protective measures as prescribed in (e) of this subsection. Where the employer does establish that the employee is exposed to levels of lead below 2,500 $\mu\text{g}/\text{m}^3$, the employer may provide the exposed employee with the appropriate respirator prescribed for use at such lower exposures, in accordance with Table I of this WAC 296-155-17613. Protection described in this section is required where lead containing coatings or paint are present on structures when performing:

(i) Abrasive blasting;

(ii) Welding;

(iii) Cutting; and

(iv) Torch burning.

(e) Until the employer performs an employee exposure assessment as required by this section and determines actual employee exposure, the employer shall provide to employees

performing the tasks described in (a) through (d) of this subsection with interim protection as follows:

(i) Appropriate respiratory protection in accordance with WAC 296-155-17613.

(ii) Appropriate personal protective clothing and equipment in accordance with WAC 296-155-17615.

(iii) Change areas in accordance with WAC 296-155-17619(2).

(iv) Hand washing facilities in accordance with WAC 296-155-17619(5).

(v) Biological monitoring in accordance with WAC 296-155-17621 (1)(a), to consist of blood sampling and analysis for lead and zinc protoporphyrin levels, and

(vi) Training as required by WAC 296-155-17625 (1)(a) regarding Part C of chapter 296-62 WAC, Hazard communication; training as required by WAC 296-155-17625 (2)(c), regarding use of respirators; and training in accordance with WAC 296-155-100.

(3) Basis of initial determination.

(a) Except as provided by (c) and (d) of this subsection the employer shall monitor employee exposures and shall base initial determinations on the employee exposure monitoring results and any of the following, relevant considerations:

(i) Any information, observations, or calculations which would indicate employee exposure to lead;

(ii) Any previous measurements of airborne lead; and

(iii) Any employee complaints of symptoms which may be attributable to exposure to lead.

(b) Monitoring for the initial determination where performed may be limited to a representative sample of the exposed employees who the employer reasonably believes are exposed to the greatest airborne concentrations of lead in the workplace.

(c) Where the employer has previously monitored for lead exposures, and the data were obtained within the past 12 months during work operations conducted under workplace conditions closely resembling the processes, type of material, control methods, work practices, and environmental conditions used and prevailing in the employer's current operations, the employer may rely on such earlier monitoring results to satisfy the requirements of subdivision (a) of this subsection and subsection (5) of this section if the sampling and analytical methods meet the accuracy and confidence levels of subsection (9) of this section.

(d) Where the employer has objective data, demonstrating that a particular product or material containing lead or a specific process, operation or activity involving lead cannot result in employee exposure to lead at or above the action level during processing, use, or handling, the employer may rely upon such data instead of implementing initial monitoring.

(i) The employer shall establish and maintain an accurate record documenting the nature and relevancy of objective data as specified in WAC 296-155-17629(4), where used in assessing employee exposure in lieu of exposure monitoring.

(ii) Objective data, as described in subdivision (d) of this subsection, is not permitted to be used for exposure assessment in connection with subsection (2) of this section.

(4) Positive initial determination and initial monitoring.

(a) Where a determination conducted under subsections (1), (2) and (3) of this section shows the possibility of any employee exposure at or above the action level the employer shall conduct monitoring which is representative of the exposure for each employee in the workplace who is exposed to lead.

(b) Where the employer has previously monitored for lead exposure, and the data were obtained within the past 12 months during work operations conducted under workplace conditions closely resembling the processes, type of material, control methods, work practices, and environmental conditions used and prevailing in the employer's current operations, the employer may rely on such earlier monitoring results to satisfy the requirements of (a) of this subsection if the sampling and analytical methods meet the accuracy and confidence levels of subsection (9) of this section.

(5) Negative initial determination. Where a determination, conducted under subsections (1), (2), and (3) of this section is made that no employee is exposed to airborne concentrations of lead at or above the action level the employer shall make a written record of such determination. The record shall include at least the information specified in subsection (3)(a) of this section and shall also include the date of determination, location within the worksite, and the name and social security number of each employee monitored.

(6) Frequency.

(a) If the initial determination reveals employee exposure to be below the action level further exposure determination need not be repeated except as otherwise provided in subsection (7) of this section.

(b) If the initial determination or subsequent determination reveals employee exposure to be at or above the action level but at or below the PEL the employer shall perform monitoring in accordance with this section at least every 6 months. The employer shall continue monitoring at the required frequency until at least two consecutive measurements, taken at least 7 days apart, are below the action level at which time the employer may discontinue monitoring for that employee except as otherwise provided in subsection (7) of this section.

(c) If the initial determination reveals that employee exposure is above the PEL the employer shall perform monitoring quarterly. The employer shall continue monitoring at the required frequency until at least two consecutive measurements, taken at least 7 days apart, are at or below the PEL but at or above the action level at which time the employer shall repeat monitoring for that employee at the frequency specified in subdivision (b) of this subsection, except as otherwise provided in subsection (7) of this section. The employer shall continue monitoring at the required frequency until at least two consecutive measurements, taken at least 7 days apart, are below the action level at which time the employer may discontinue monitoring for that employee except as otherwise provided in subsection (7) of this section.

(7) Additional exposure assessments. Whenever there has been a change of equipment, process, control, personnel or a new task has been initiated that may result in additional employees being exposed to lead at or above the action level or may result in employees already exposed at or above the action level being exposed above the PEL, the employer shall

conduct additional monitoring in accordance with this section.

(8) Employee notification.

(a) Within 5 working days after completion of the exposure assessment the employer shall notify each employee in writing of the results which represent that employee's exposure.

(b) Whenever the results indicate that the representative employee exposure, without regard to respirators, is at or above the PEL the employer shall include in the written notice a statement that the employee's exposure was at or above that level and a description of the corrective action taken or to be taken to reduce exposure to below that level.

(9) Accuracy of measurement. The employer shall use a method of monitoring and analysis which has an accuracy (to a confidence level of 95%) of not less than plus or minus 25 percent for airborne concentrations of lead equal to or greater than 30 $\mu\text{g}/\text{m}^3$.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17609, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17611 Methods of compliance. (1) Engineering and work practice controls. The employer shall implement engineering and work practice controls, including administrative controls, to reduce and maintain employee exposure to lead to or below the permissible exposure limit to the extent that such controls are feasible. Wherever all feasible engineering and work practices controls that can be instituted are not sufficient to reduce employee exposure to or below the permissible exposure limit prescribed in WAC 296-155-17607, the employer shall nonetheless use them to reduce employee exposure to the lowest feasible level and shall supplement them by the use of respiratory protection that complies with the requirements of WAC 296-155-17613.

(2) Compliance program.

(a) Prior to commencement of the job each employer shall establish and implement a written compliance program to achieve compliance with WAC 296-155-17607.

(b) Written plans for these compliance programs shall include at least the following:

(i) A description of each activity in which lead is emitted; e.g., equipment used, material involved, controls in place, crew size, employee job responsibilities, operating procedures and maintenance practices;

(ii) A description of the specific means that will be employed to achieve compliance and, where engineering controls are required engineering plans and studies used to determine methods selected for controlling exposure to lead;

(iii) A report of the technology considered in meeting the PEL;

(iv) Air monitoring data which documents the source of lead emissions;

(v) A detailed schedule for implementation of the program, including documentation such as copies of purchase orders for equipment, construction contracts, etc.;

(vi) A work practice program which includes under requirements in WAC 296-155-17615, 296-155-17617, and 296-155-17619, and incorporates other relevant work practices such as those specified in subsection (5) of this section;

(vii) An administrative control schedule required by sub-section (4) of this section, if applicable;

(viii) Other relevant information.

(c) The compliance program shall provide for frequent and regular inspections of job sites, materials, and equipment to be made by a competent person.

(d) Written programs shall be submitted upon request to any affected employee or authorized employee representatives, and the director, and shall be available at the worksite for examination and copying by the director.

(e) Written programs shall be revised and updated at least every 6 months to reflect the current status of the program.

(3) Mechanical ventilation. When ventilation is used to control lead exposure, the employer shall evaluate the mechanical performance of the system in controlling exposure as necessary to maintain its effectiveness.

(4) Administrative controls. If administrative controls are used as a means of reducing employees TWA exposure to lead, the employer shall establish and implement a job rotation schedule which includes:

(a) Name or identification number of each affected employee;

(b) Duration and exposure levels at each job or work station where each affected employee is located; and

(c) Any other information which may be useful in assessing the reliability of administrative controls to reduce exposure to lead.

(5) The employer shall ensure that, to the extent relevant, employees follow good work practices such as described in Appendix B, WAC 296-155-17652.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17611, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17613 Respiratory protection. (1)

General. For employees who use respirators required by WAC 296-155-176, the employer must provide respirators that comply with the requirements of this section. Respirators must be used during:

(a) Periods when an employee's exposure to lead exceeds the PEL.

(b) Work operations for which engineering controls and work-practices are not sufficient to reduce employee exposures to or below the PEL.

(c) Periods when an employee requests a respirator.

(d) Periods when respirators are required to provide interim protection of employees while they perform the operations as specified in WAC 296-155-17609(2).

(2) Respirator program.

(a) The employer must implement a respiratory protection program as required by chapter 296-62 WAC, Part E (except WAC 296-62-07130(1) and 296-62-07150 through 296-62-07156).

(b) If an employee has breathing difficulty during fit testing or respirator use, the employer must provide the employee with a medical examination as required by WAC 296-155-17621 (3)(a)(ii) to determine whether or not the employee can use a respirator while performing the required duty.

(3) Respirator selection.

(a) The employer must select the appropriate respirator or combination of respirators from Table I of this section.

(b) The employer must provide a powered air-purifying respirator when an employee chooses to use such a respirator and it will provide adequate protection to the employee.

Table I.— Respiratory Protection for Lead Aerosols

Airborne concentration of lead or condition of use	Required respirator ^a
Not in excess of 500 µg/m ³	1/2 mask air purifying respirator with high efficiency filters. ^{b, c} 1/2 mask supplied air respirator operated in demand (negative pressure) mode.
Not in excess of 1,250 µg/m ³	Loose fitting hood or helmet powered air purifying respirator with high efficiency filters. ^c Hood or helmet supplied air respirator operated in a continuous-flow mode— e.g., type CE abrasive blasting respirators operated in a continuous-flow mode.
Not in excess of 2,500 µg/m ³	Full facepiece air purifying respirator with high efficiency filters. ^c Tight fitting powered air purifying respirator with high efficiency filters. ^c Full facepiece supplied air respirator operated in demand mode. 1/2 mask or full facepiece supplied air respirator operated in a continuous-flow mode. Full facepiece self-contained breathing apparatus (SCBA) operated in demand mode.
Not in excess of 50,000 µg/m ³	1/2 mask supplied air respirator operated in pressure demand or other positive-pressure mode.
Not in excess of 100,000 µg/m ³	Full facepiece supplied air respirator operated in pressure demand or other positive-pressure mode—e.g., type CE abrasive blasting respirators operated in a positive-pressure mode.
Greater than 100,000 µg/m ³ unknown concentration, or fire fighting	Full facepiece SCBA operated in pressure demand or other positive pressure mode.

^a Respirators specified for higher concentrations can be used at lower concentrations of lead.

^b Full facepiece is required if the lead aerosols cause eye or skin irritation at the use concentrations.

^c A high efficiency particulate filter (HEPA) means a filter that is 99.97 percent efficient against particles of 0.3 micron size or larger.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-10-071, § 296-155-17613, filed 5/4/99, effective 9/1/99. Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17613, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17615 Protective work clothing and equipment. (1) Provision and use.

Where an employee is exposed to lead above the PEL without regard to the use of respirators, where employees are exposed to lead compounds which may cause skin or eye irritation (e.g., lead arsenate, lead azide), and as protection for employees performing tasks as specified in WAC 296-155-17609(2), the employer shall provide at no cost to the employee and assure that the employee uses appropriate protective work clothing and equipment that prevents contamination of the employee and the employee's garments such as, but not limited to:

(a) Coveralls or similar full-body work clothing;

(b) Gloves, hats, and shoes or disposable shoe coverlets;

and

(c) Face shields, vented goggles, or other appropriate protective equipment which complies with WAC 296-24-078.

(2) Cleaning and replacement.

(a) The employer shall provide the protective clothing required in subsection (1) of this section in a clean and dry condition at least weekly, and daily to employees whose exposure levels without regard to a respirator are over 200 $\mu\text{g}/\text{m}^3$ of lead as an 8-hour TWA.

(b) The employer shall provide for the cleaning, laundering, and disposal of protective clothing and equipment required by subsection (1) of this section.

(c) The employer shall repair or replace required protective clothing and equipment as needed to maintain their effectiveness.

(d) The employer shall assure that all protective clothing is removed at the completion of a work shift only in change areas provided for that purpose as prescribed in WAC 296-155-17619(2).

(e) The employer shall assure that contaminated protective clothing which is to be cleaned, laundered, or disposed of, is placed in a closed container in the change area which prevents dispersion of lead outside the container.

(f) The employer shall inform in writing any person who cleans or launders protective clothing or equipment of the potentially harmful effects of exposure to lead.

(g) The employer shall assure that the containers of contaminated protective clothing and equipment required by subdivision (e) of this subsection are labelled as follows:

Caution: Clothing contaminated with lead. Do not remove dust by blowing or shaking. Dispose of lead contaminated wash water in accordance with applicable local, state, or federal regulations.

(h) The employer shall prohibit the removal of lead from protective clothing or equipment by blowing, shaking, or any other means which disperses lead into the air.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17615, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17617 Housekeeping. (1) All surfaces shall be maintained as free as practicable of accumulations of lead.

(2) Clean-up of floors and other surfaces where lead accumulates shall wherever possible, be cleaned by vacuuming or other methods that minimize the likelihood of lead becoming airborne.

(3) Shoveling, dry or wet sweeping, and brushing may be used only where vacuuming or other equally effective methods have been tried and found not to be effective.

(4) Where vacuuming methods are selected, the vacuums shall be equipped with HEPA filters and used and emptied in a manner which minimizes the reentry of lead into the workplace.

(5) Compressed air shall not be used to remove lead from any surface unless the compressed air is used in conjunction with a ventilation system designed to capture the airborne dust created by the compressed air.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17617, filed 10/29/93, effective 12/10/93.]

(2001 Ed.)

WAC 296-155-17619 Hygiene facilities and practices. (1) The employer shall assure that in areas where employees are exposed to lead above the PEL without regard to the use of respirators, food or beverage is not present or consumed, tobacco products are not present or used, and cosmetics are not applied.

(2) Change areas.

(a) The employer shall provide clean change areas for employees whose airborne exposure to lead is above the PEL, and as protection for employees performing tasks as specified in WAC 296-155-17609(2), without regard to the use of respirators.

(b) The employer shall assure that change areas are equipped with separate storage facilities for protective work clothing and equipment and for street clothes which prevent cross-contamination.

(c) The employer shall assure that employees do not leave the workplace wearing any protective clothing or equipment that is required to be worn during the work shift.

(3) Showers.

(a) The employer shall provide shower facilities, where feasible, for use by employees whose airborne exposure to lead is above the PEL.

(b) The employer shall assure, where shower facilities are available, that employees shower at the end of the work shift and shall provide an adequate supply of cleansing agents and towels for use by affected employees.

(4) Eating facilities.

(a) The employer shall provide lunchroom facilities or eating areas for employees whose airborne exposure to lead is above the PEL, without regard to the use of respirators.

(b) The employer shall assure that lunchroom facilities or eating areas are as free as practicable from lead contamination and are readily accessible to employees.

(c) The employer shall assure that employees whose airborne exposure to lead is above the PEL, without regard to the use of a respirator, wash their hands and face prior to eating, drinking, smoking or applying cosmetics.

(d) The employer shall assure that employees do not enter lunchroom facilities or eating areas with protective work clothing or equipment unless surface lead dust has been removed by vacuuming, downdraft booth, or other cleaning method that limits dispersion of lead dust.

(5) Hand washing facilities.

(a) The employer shall provide adequate handwashing facilities for use by employees exposed to lead in accordance with WAC 296-155-140.

(b) Where showers are not provided the employer shall assure that employees wash their hands and face at the end of the work-shift.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17619, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17621 Medical surveillance. (1) General.

(a) The employer shall make available initial medical surveillance to employees occupationally exposed on any day to lead at or above the action level. Initial medical surveillance consists of biological monitoring in the form of blood

[Title 296 WAC—p. 2251]

sampling and analysis for lead and zinc protoporphyrin levels.

(b) The employer shall institute a medical surveillance program in accordance with subsections (2) and (3) of this section for all employees who are or may be exposed by the employer at or above the action level for more than 30 days in any consecutive 12 months;

(c) The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician.

(d) The employer shall make available the required medical surveillance including multiple physician review under subsection (3)(c) without cost to employees and at a reasonable time and place.

(2) Biological monitoring.

(a) Blood lead and ZPP level sampling and analysis. The employer shall make available biological monitoring in the form of blood sampling and analysis for lead and zinc protoporphyrin levels to each employee covered by subsection (1)(a) and (b) of this section on the following schedule:

(i) For each employee covered by subsection (1)(b) of this section, at least every 2 months for the first 6 months and every 6 months thereafter;

(ii) For each employee covered by subsection (1)(a) or (b) of this section whose last blood sampling and analysis indicated a blood lead level at or above 40 µg/dl, at least every two months. This frequency shall continue until two consecutive blood samples and analyses indicate a blood lead level below 40 µg/dl; and

(iii) For each employee who is removed from exposure to lead due to an elevated blood lead level at least monthly during the removal period.

(b) Follow-up blood sampling tests. Whenever the results of a blood lead level test indicate that an employee's blood lead level exceeds the numerical criterion for medical removal under WAC 296-155-17623 (1)(a), the employer shall provide a second (follow-up) blood sampling test within two weeks after the employer receives the results of the first blood sampling test.

(c) Accuracy of blood lead level sampling and analysis. Blood lead level sampling and analysis provided pursuant to this WAC 296-155-176 shall have an accuracy (to a confidence level of 95 percent) within plus or minus 15 percent or 6 µg/dl, whichever is greater, and shall be conducted by a laboratory approved by OSHA.

(d) Employee notification.

(i) Within five working days after the receipt of biological monitoring results, the employer shall notify each employee in writing of their blood lead level; and

(ii) The employer shall notify each employee whose blood lead level exceeds 40 µg/dl that the standard requires temporary medical removal with Medical Removal Protection benefits when an employee's blood lead level exceeds the numerical criterion for medical removal under WAC 296-155-17623 (1)(a).

(3) Medical examinations and consultations.

(a) Frequency. The employer shall make available medical examinations and consultations to each employee covered by subsection (1)(b) of this section on the following schedule:

(i) At least annually for each employee for whom a blood sampling test conducted at any time during the preceding 12 months indicated a blood lead level at or above 40 µg/dl;

(ii) As soon as possible, upon notification by an employee either that the employee has developed signs or symptoms commonly associated with lead intoxication, that the employee desires medical advice concerning the effects of current or past exposure to lead on the employee's ability to procreate a healthy child, that the employee is pregnant, or that the employee has demonstrated difficulty in breathing during a respirator fitting test or during use; and

(iii) As medically appropriate for each employee either removed from exposure to lead due to a risk of sustaining material impairment to health, or otherwise limited pursuant to a final medical determination.

(b) Content. The content of medical examinations made available pursuant to subdivision (a)(ii) and (iii) of this subsection shall be determined by an examining physician and, if requested by an employee, shall include pregnancy testing or laboratory evaluation of male fertility. Medical examinations made available pursuant to subdivision (a)(i) of this subsection shall include the following elements:

(i) A detailed work history and a medical history, with particular attention to past lead exposure (occupational and non-occupational), personal habits (smoking, hygiene), and past gastrointestinal, hematologic, renal, cardiovascular, reproductive and neurological problems;

(ii) A thorough physical examination, with particular attention to teeth, gums, hematologic, gastrointestinal, renal, cardiovascular, and neurological systems. Pulmonary status should be evaluated if respiratory protection will be used;

(iii) A blood pressure measurement;

(iv) A blood sample and analysis which determines:

(A) Blood lead level;

(B) Hemoglobin and hematocrit determinations, red cell indices, and examination of peripheral smear morphology;

(C) Zinc protoporphyrin;

(D) Blood urea nitrogen; and,

(E) Serum creatinine;

(v) A routine urinalysis with microscopic examination; and

(vi) Any laboratory or other test relevant to lead exposure which the examining physician deems necessary by sound medical practice.

(c) Multiple physician review mechanism.

(i) If the employer selects the initial physician who conducts any medical examination or consultation provided to an employee by WAC 296-155-176, the employee may designate a second physician:

(A) To review any findings, determinations or recommendations of the initial physician; and

(B) To conduct such examinations, consultations, and laboratory tests as the second physician deems necessary to facilitate this review.

(ii) The employer shall promptly notify an employee of the right to seek a second medical opinion after each occasion that an initial physician conducts a medical examination or consultation pursuant to WAC 296-155-176. The employer may condition its participation in, and payment for, the multiple physician review mechanism upon the employee doing

the following within fifteen days after receipt of the foregoing notification, or receipt of the initial physician's written opinion, whichever is later:

(A) The employee informing the employer that they intend to seek a second medical opinion; and

(B) The employee initiating steps to make an appointment with a second physician.

(iii) If the findings, determinations or recommendations of the second physician differ from those of the initial physician, then the employer and the employee shall assure that efforts are made for the two physicians to resolve any disagreement.

(iv) If the two physicians have been unable to quickly resolve their disagreement, then the employer and the employee through their respective physicians shall designate a third physician:

(A) To review any findings, determinations or recommendations of the prior physicians; and

(B) To conduct such examinations, consultations, laboratory tests and discussions with the prior physicians as the third physician deems necessary to resolve the disagreement of the prior physicians.

(v) The employer shall act consistent with the findings, determinations and recommendations of the third physician, unless the employer and the employee reach an agreement which is otherwise consistent with the recommendations of at least one of the three physicians.

(d) Information provided to examining and consulting physicians.

(i) The employer shall provide an initial physician conducting a medical examination or consultation under WAC 296-155-176 with the following information:

(A) A copy of this regulation for lead including all Appendices;

(B) A description of the affected employee's duties as they relate to the employee's exposure;

(C) The employee's exposure level or anticipated exposure level to lead and to any other toxic substance (if applicable);

(D) A description of any personal protective equipment used or to be used;

(E) Prior blood lead determinations; and

(F) All prior written medical opinions concerning the employee in the employer's possession or control.

(ii) The employer shall provide the foregoing information to a second or third physician conducting a medical examination or consultation under WAC 296-155-176 upon request either by the second or third physician, or by the employee.

(e) Written medical opinions.

(i) The employer shall obtain and furnish the employee with a copy of a written medical opinion from each examining or consulting physician which contains only the following information:

(A) The physician's opinion as to whether the employee has any detected medical condition which would place the employee at increased risk of material impairment of the employee's health from exposure to lead;

(B) Any recommended special protective measures to be provided to the employee, or limitations to be placed upon the employee's exposure to lead;

(C) Any recommended limitation upon the employee's use of respirators, including a determination of whether the employee can wear a powered air purifying respirator if a physician determines that the employee cannot wear a negative pressure respirator; and

(D) The results of the blood lead determinations.

(ii) The employer shall instruct each examining and consulting physician to:

(A) Not reveal either in the written opinion or orally, or in any other means of communication with the employer, findings, including laboratory results, or diagnoses unrelated to an employee's occupational exposure to lead; and

(B) Advise the employee of any medical condition, occupational or nonoccupational, which dictates further medical examination or treatment.

(f) Alternate physician determination mechanisms. The employer and an employee or authorized employee representative may agree upon the use of any alternate physician determination mechanism in lieu of the multiple physician review mechanism provided by subdivision (c) of this subsection so long as the alternate mechanism is as expeditious and protective as the requirements contained in this section.

(4) Chelation.

(a) The employer shall assure that any person whom he retains, employs, supervises or controls does not engage in prophylactic chelation of any employee at any time.

(b) If therapeutic or diagnostic chelation is to be performed by any person in subdivision (a) of this subsection, the employer shall assure that it be done under the supervision of a licensed physician in a clinical setting with thorough and appropriate medical monitoring and that the employee is notified in writing prior to its occurrence.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17621, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17623 Medical removal protection.

(1) Temporary medical removal and return of an employee.

(a) Temporary removal due to elevated blood lead level. The employer shall remove an employee from work having an exposure to lead at or above the action level on each occasion that a periodic and a follow-up blood sampling test conducted pursuant to WAC 296-155-176 indicate that the employee's blood lead level is at or above 50 µg/dl; and

(b) Temporary removal due to a final medical determination.

(i) The employer shall remove an employee from work having an exposure to lead at or above the action level on each occasion that a final medical determination results in a medical finding, determination, or opinion that the employee has a detected medical condition which places the employee at increased risk of material impairment to health from exposure to lead.

(ii) For the purposes of WAC 296-155-176, the phrase "final medical determination" means the written medical opinion on the employees' health status by the examining physician or, where relevant, the outcome of the multiple physician review mechanism or alternate medical determina-

tion mechanism used pursuant to the medical surveillance provisions of WAC 296-155-176.

(iii) Where a final medical determination results in any recommended special protective measures for an employee, or limitations on an employee's exposure to lead, the employer shall implement and act consistent with the recommendation.

(c) Return of the employee to former job status.

(i) The employer shall return an employee to their former job status:

(A) For an employee removed due to a blood lead level at or above 50 µg/dl when two consecutive blood sampling tests indicate that the employee's blood lead level is at or below 40 µg/dl;

(B) For an employee removed due to a final medical determination, when a subsequent final medical determination results in a medical finding, determination, or opinion that the employee no longer has a detected medical condition which places the employee at increased risk of material impairment to health from exposure to lead.

(ii) For the purposes of WAC 296-155-176, the requirement that an employer return an employee to their former job status is not intended to expand upon or restrict any rights an employee has or would have had, absent temporary medical removal, to a specific job classification or position under the terms of a collective bargaining agreement.

(d) Removal of other employee special protective measure or limitations. The employer shall remove any limitations placed on an employee or end any special protective measures provided to an employee pursuant to a final medical determination when a subsequent final medical determination indicates that the limitations or special protective measures are no longer necessary.

(e) Employer options pending a final medical determination. Where the multiple physician review mechanism, or alternate medical determination mechanism used pursuant to the medical surveillance provisions of WAC 296-155-176, has not yet resulted in a final medical determination with respect to an employee, the employer shall act as follows:

(i) Removal. The employer may remove the employee from exposure to lead, provide special protective measures to the employee, or place limitations upon the employee, consistent with the medical findings, determinations, or recommendations of any of the physicians who have reviewed the employee's health status.

(ii) Return. The employer may return the employee to their former job status, end any special protective measures provided to the employee, and remove any limitations placed upon the employee, consistent with the medical findings, determinations, or recommendations of any of the physicians who have reviewed the employee's health status, with two exceptions.

(A) If the initial removal, special protection, or limitation of the employee resulted from a final medical determination which differed from the findings, determinations, or recommendations of the initial physician or;

(B) If the employee has been on removal status for the preceding eighteen months due to an elevated blood lead level, then the employer shall await a final medical determination.

(2) Medical removal protection benefits.

(a) Provision of medical removal protection benefits. The employer shall provide an employee up to eighteen (18) months of medical removal protection benefits on each occasion that an employee is removed from exposure to lead or otherwise limited pursuant to WAC 296-155-176.

(b) Definition of medical removal protection benefits. For the purposes of WAC 296-155-176, the requirement that an employer provide medical removal protection benefits means that, as long as the job the employee was removed from continues, the employer shall maintain the total normal earnings, seniority and other employment rights and benefits of an employee, including the employee's right to their former job status as though the employee had not been medically removed from the employee's job or otherwise medically limited.

(c) Follow-up medical surveillance during the period of employee removal or limitation. During the period of time that an employee is medically removed from their job or otherwise medically limited, the employer may condition the provision of medical removal protection benefits upon the employee's participation in follow-up medical surveillance made available pursuant to WAC 296-155-176.

(d) Workers' compensation claims. If a removed employee files a claim for workers' compensation payments for a lead-related disability, then the employer shall continue to provide medical removal protection benefits pending disposition of the claim. To the extent that an award is made to the employee for earnings lost during the period of removal, the employer's medical removal protection obligation shall be reduced by such amount. The employer shall receive no credit for workers' compensation payments received by the employee for treatment-related expenses.

(e) Other credits. The employer's obligation to provide medical removal protection benefits to a removed employee shall be reduced to the extent that the employee receives compensation for earnings lost during the period of removal either from a publicly or employer-funded compensation program, or receives income from employment with another employer made possible by virtue of the employee's removal.

(f) Voluntary removal or restriction of an employee. Where an employer, although not required by WAC 296-155-176 to do so, removes an employee from exposure to lead or otherwise places limitations on an employee due to the effects of lead exposure on the employee's medical condition, the employer shall provide medical removal protection benefits to the employee equal to that required by subdivisions (a) and (b) of this subsection.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17623, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17625 Employee information and training. (1) General.

(a) The employer shall communicate information concerning lead hazards according to the requirements of WISHA's Hazard Communication Standard for the construction industry, part C of chapter 296-62 WAC, including but not limited to the requirements concerning warning signs and labels, material safety data sheets (MSDS), and employee

information and training. In addition, employers shall comply with the following requirements:

(b) For all employees who are subject to exposure to lead at or above the action level on any day or who are subject to exposure to lead compounds which may cause skin or eye irritation (e.g., lead arsenate, lead azide), the employer shall provide a training program in accordance with subsection (2) of this section and assure employee participation.

(c) The employer shall provide the training program as initial training prior to the time of job assignment or prior to the start up date for this requirement, whichever comes last.

(d) The employer shall also provide the training program at least annually for each employee who is subject to lead exposure at or above the action level on any day.

(2) Training program. The employer shall assure that each employee is trained in the following:

(a) The content of this standard and its appendices;

(b) The specific nature of the operations which could result in exposure to lead above the action level;

(c) The training requirements for respiratory protection as required by chapter 296-62 WAC, Part E (see WAC 296-62-07117, 296-62-07172, and 296-62-07186 through 296-62-07190);

(d) The purpose and a description of the medical surveillance program, and the medical removal protection program including information concerning the adverse health effects associated with excessive exposure to lead (with particular attention to the adverse reproductive effects on both males and females and hazards to the fetus and additional precautions for employees who are pregnant);

(e) The engineering controls and work practices associated with the employee's job assignment including training of employees to follow relevant good work practices described in Appendix B, WAC 296-155-17652;

(f) The contents of any compliance plan in effect;

(g) Instructions to employees that chelating agents should not routinely be used to remove lead from their bodies and should not be used at all except under the direction of a licensed physician; and

(h) The employee's right of access to records under Part B, chapter 296-62 WAC.

(3) Access to information and training materials.

(a) The employer shall make readily available to all affected employees a copy of this standard and its appendices.

(b) The employer shall provide, upon request, all materials relating to the employee information and training program to affected employees and their designated representatives, and the director.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-10-071, § 296-155-17625, filed 5/4/99, effective 9/1/99. Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17625, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17627 Signs. (1) General.

(a) The employer may use signs required by other statutes, regulations or ordinances in addition to, or in combination with, signs required by this section.

(2001 Ed.)

(b) The employer shall assure that no statement appears on or near any sign required by this section which contradicts or detracts from the meaning of the required sign.

(2) Signs.

(a) The employer shall post the following warning signs in each work area where an employees exposure to lead is above the PEL.

WARNING
LEAD WORK AREA
POISON
NO SMOKING OR EATING

(b) The employer shall assure that signs required by this section are illuminated and cleaned as necessary so that the legend is readily visible.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17627, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17629 Recordkeeping. (1) Exposure assessment.

(a) The employer shall establish and maintain an accurate record of all monitoring and other data used in conducting employee exposure assessments as required in WAC 296-155-17609.

(b) Exposure monitoring records shall include:

(i) The date(s), number, duration, location and results of each of the samples taken if any, including a description of the sampling procedure used to determine representative employee exposure where applicable;

(ii) A description of the sampling and analytical methods used and evidence of their accuracy;

(iii) The type of respiratory protective devices worn, if any;

(iv) Name, social security number, and job classification of the employee monitored and of all other employees whose exposure the measurement is intended to represent; and

(v) The environmental variables that could affect the measurement of employee exposure.

(c) The employer shall maintain monitoring and other exposure assessment records in accordance with the provisions of part B, chapter 296-62 WAC.

(2) Medical surveillance.

(a) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance as required by WAC 296-155-17621.

(b) This record shall include:

(i) The name, Social Security number, and description of the duties of the employee;

(ii) A copy of the physician's written opinions;

(iii) Results of any airborne exposure monitoring done on or for that employee and provided to the physician; and

(iv) Any employee medical complaints related to exposure to lead.

(c) The employer shall keep, or assure that the examining physician keeps, the following medical records:

(i) A copy of the medical examination results including medical and work history required by WAC 296-155-17621;

[Title 296 WAC—p. 2255]

(ii) A description of the laboratory procedures and a copy of any standards or guidelines used to interpret the test results or references to that information;

(iii) A copy of the results of biological monitoring.

(d) The employer shall maintain or assure that the physician maintains medical records in accordance with the provisions of part B, chapter 296-62 WAC.

(3) Medical removals.

(a) The employer shall establish and maintain an accurate record for each employee removed from current exposure to lead pursuant to WAC 296-155-17623.

(b) Each record shall include:

(i) The name and social security number of the employee;

(ii) The date of each occasion that the employee was removed from current exposure to lead as well as the corresponding date on which the employee was returned to their former job status;

(iii) A brief explanation of how each removal was or is being accomplished; and

(iv) A statement with respect to each removal indicating whether or not the reason for the removal was an elevated blood lead level.

(c) The employer shall maintain each medical removal record for at least the duration of an employee's employment.

(4) Objective data for exemption from requirement for initial monitoring.

(a) For purposes of WAC 296-155-176, objective data are information demonstrating that a particular product or material containing lead or a specific process, operation, or activity involving lead cannot release dust or fumes in concentrations at or above the action level under any expected conditions of use. Objective data can be obtained from an industry-wide study or from laboratory product test results from manufacturers of lead containing products or materials. The data the employer uses from an industry-wide survey must be obtained under workplace conditions closely resembling the processes, types of material, control methods, work practices and environmental conditions in the employer's current operations.

(b) The employer shall maintain the record of the objective data relied upon for at least 30 years.

(5) Availability. The employer shall make available upon request all records required to be maintained by this section to affected employees, former employees, and their designated representatives, and to the director for examination and copying.

(6) Transfer of records.

(a) Whenever the employer ceases to do business, the successor employer shall receive and retain all records required to be maintained by this section.

(b) Whenever the employer ceases to do business and there is no successor employer to receive and retain the records required to be maintained by WAC 296-155-176 for the prescribed period, these records shall be transmitted to the director.

(c) At the expiration of the retention period for the records required to be maintained by WAC 296-155-176, the employer shall notify the director at least 3 months prior to

the disposal of such records and shall transmit those records to the director if requested within the period.

(d) The employer shall also comply with any additional requirements involving transfer of records set forth in WAC 296-62-05215.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17629, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17631 Observation of monitoring. (1) Employee observation. The employer shall provide affected employees or their designated representatives an opportunity to observe any monitoring of employee exposure to lead conducted pursuant to WAC 296-155-17609.

(2) Observation procedures.

(a) Whenever observation of the monitoring of employee exposure to lead requires entry into an area where the use of respirators, protective clothing or equipment is required, the employer shall provide the observer with and assure the use of such respirators, clothing and equipment, and shall require the observer to comply with all other applicable safety and health procedures.

(b) Without interfering with the monitoring, observers shall be entitled to:

(i) Receive an explanation of the measurement procedures;

(ii) Observe all steps related to the monitoring of lead performed at the place of exposure; and

(iii) Record the results obtained or receive copies of the results when returned by the laboratory.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17631, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17650 Appendix A to WAC 296-155-176—Substance data sheet for occupational exposure to lead. The information contained in the appendices to WAC 296-155-176 is not intended by itself, to create any additional obligations not otherwise imposed by this standard nor detract from any existing obligation.

(1) Substance identification.

(a) Substance: Pure lead (Pb) is a heavy metal at room temperature and pressure and is a basic chemical element. It can combine with various other substances to form numerous lead compounds.

(b) Compounds covered by the standard: The word "lead" when used in this standard means elemental lead, all inorganic lead compounds and a class of organic lead compounds called lead soaps. This standard does not apply to other organic lead compounds.

(c) Uses: Exposure to lead occurs in several different occupations in the construction industry, including demolition or salvage of structures where lead or lead-containing materials are present; removal or encapsulation of lead-containing materials, new construction, alteration, repair, or renovation of structures that contain lead or materials containing lead; installation of products containing lead. In addition, there are construction related activities where exposure to lead may occur, including transportation, disposal, storage, or containment of lead or materials containing lead on construction sites, and maintenance operations associated with construction activities.

(d) Permissible exposure: The permissible exposure limit (PEL) set by the standard is 50 micrograms of lead per cubic meter of air ($50 \mu\text{g}/\text{m}^3$), averaged over an 8-hour workday.

(e) Action level: The standard establishes an action level of 30 micrograms of lead per cubic meter of air ($30 \mu\text{g}/\text{m}^3$), averaged over an 8-hour workday. The action level triggers several ancillary provisions of the standard such as exposure monitoring, medical surveillance, and training.

(2) Health hazard data.

(a) Ways in which lead enters your body. When absorbed into your body in certain doses, lead is a toxic substance. The object of the lead standard is to prevent absorption of harmful quantities of lead. The standard is intended to protect you not only from the immediate toxic effects of lead, but also from the serious toxic effects that may not become apparent until years of exposure have passed. Lead can be absorbed into your body by inhalation (breathing) and ingestion (eating). Lead (except for certain organic lead compounds not covered by the standard, such as tetraethyl lead) is not absorbed through your skin. When lead is scattered in the air as a dust, fume respiratory tract. Inhalation of airborne lead is generally the most important source of occupational lead absorption. You can also absorb lead through your digestive system if lead gets into your mouth and is swallowed. If you handle food, cigarettes, chewing tobacco, or make-up which have lead on them or handle them with hands contaminated with lead, this will contribute to ingestion. A significant portion of the lead that you inhale or ingest gets into your blood stream. Once in your blood stream, lead is circulated throughout your body and stored in various organs and body tissues. Some of this lead is quickly filtered out of your body and excreted, but some remains in the blood and other tissues. As exposure to lead continues, the amount stored in your body will increase if you are absorbing more lead than your body is excreting. Even though you may not be aware of any immediate symptoms of disease, this lead stored in your tissues can be slowly causing irreversible damage, first to individual cells, then to your organs and whole body systems.

(b) Effects of overexposure to lead.

(i) Short term (acute) overexposure. Lead is a potent, systemic poison that serves no known useful function once absorbed by your body. Taken in large enough doses, lead can kill you in a matter of days. A condition affecting the brain called acute encephalopathy may arise which develops quickly to seizures, coma, and death from cardiorespiratory arrest. A short term dose of lead can lead to acute encephalopathy. Short term occupational exposures of this magnitude are highly unusual, but not impossible. Similar forms of encephalopathy may, however, arise from extended, chronic exposure to lower doses of lead. There is no sharp dividing line between rapidly developing acute effects of lead, and chronic effects which take longer to acquire. Lead adversely affects numerous body systems, and causes forms of health impairment and disease which arise after periods of exposure as short as days or as long as several years.

(ii) Long-term (chronic) overexposure. Chronic overexposure to lead may result in severe damage to your blood-forming, nervous, urinary and reproductive systems. Some common symptoms of chronic overexposure include loss of

appetite, metallic taste in the mouth, anxiety, constipation, nausea, pallor, excessive tiredness, weakness, insomnia, headache, nervous irritability, muscle and joint pain or soreness, fine tremors, numbness, dizziness, hyperactivity and colic. In lead colic there may be severe abdominal pain. Damage to the central nervous system in general and the brain (encephalopathy) in particular is one of the most severe forms of lead poisoning. The most severe, often fatal, form of encephalopathy may be preceded by vomiting, a feeling of dullness progressing to drowsiness and stupor, poor memory, restlessness, irritability, tremor, and convulsions. It may arise suddenly with the onset of seizures, followed by coma, and death. There is a tendency for muscular weakness to develop at the same time. This weakness may progress to paralysis often observed as a characteristic "wrist drop" or "foot drop" and is a manifestation of a disease to the nervous system called peripheral neuropathy. Chronic overexposure to lead also results in kidney disease with few, if any, symptoms appearing until extensive and most likely permanent kidney damage has occurred. Routine laboratory tests reveal the presence of this kidney disease only after about two-thirds of kidney function is lost. When overt symptoms of urinary dysfunction arise, it is often too late to correct or prevent worsening conditions, and progression to kidney dialysis or death is possible. Chronic overexposure to lead impairs the reproductive systems of both men and women. Overexposure to lead may result in decreased sex drive, impotence and sterility in men. Lead can alter the structure of sperm cells raising the risk of birth defects. There is evidence of miscarriage and stillbirth in women whose husbands were exposed to lead or who were exposed to lead themselves. Lead exposure also may result in decreased fertility, and abnormal menstrual cycles in women. The course of pregnancy may be adversely affected by exposure to lead since lead crosses the placental barrier and poses risks to developing fetuses. Children born of parents either one of whom were exposed to excess lead levels are more likely to have birth defects, mental retardation, behavioral disorders or die during the first year of childhood. Overexposure to lead also disrupts the blood-forming system resulting in decreased hemoglobin (the substance in the blood that carries oxygen to the cells) and ultimately anemia. Anemia is characterized by weakness, pallor and fatigability as a result of decreased oxygen carrying capacity in the blood.

(iii) Health protection goals of the standard. Prevention of adverse health effects for most workers from exposure to lead throughout a working lifetime requires that a worker's blood lead level (BLL, also expressed as PbB) be maintained at or below forty micrograms per deciliter of whole blood ($40 \mu\text{g}/\text{dl}$). The blood lead levels of workers (both male and female workers) who intend to have children should be maintained below $30 \mu\text{g}/\text{dl}$ to minimize adverse reproductive health effects to the parents and to the developing fetus. The measurement of your blood lead level (BLL) is the most useful indicator of the amount of lead being absorbed by your body. Blood lead levels are most often reported in units of milligrams (mg) or micrograms (μg) of lead ($1 \text{ mg} = 1000 \mu\text{g}$) per 100 grams (100g), 100 milliliters (100 ml) or deciliter (dl) of blood. These three units are essentially the same. Some-time BLLs are expressed in the form of mg% or $\mu\text{g}\%$. This is

a shorthand notation for 100g, 100 ml, or dl. (References to BLL measurements in this standard are expressed in the form of $\mu\text{g}/\text{dl}$.)

BLL measurements show the amount of lead circulating in your blood stream, but do not give any information about the amount of lead stored in your various tissues. BLL measurements merely show current absorption of lead, not the effect that lead is having on your body or the effects that past lead exposure may have already caused. Past research into lead-related diseases, however, has focused heavily on associations between BLLs and various diseases. As a result, your BLL is an important indicator of the likelihood that you will gradually acquire a lead-related health impairment or disease.

Once your blood lead level climbs above 40 $\mu\text{g}/\text{dl}$, your risk of disease increases. There is a wide variability of individual response to lead, thus it is difficult to say that a particular BLL in a given person will cause a particular effect. Studies have associated fatal encephalopathy with BLLs as low as 150 $\mu\text{g}/\text{dl}$. Other studies have shown other forms of diseases in some workers with BLLs well below 80 $\mu\text{g}/\text{dl}$. Your BLL is a crucial indicator of the risks to your health, but one other factor is also extremely important. This factor is the length of time you have had elevated BLLs. The longer you have an elevated BLL, the greater the risk that large quantities of lead are being gradually stored in your organs and tissues (body burden). The greater your overall body burden, the greater the chances of substantial permanent damage. The best way to prevent all forms of lead-related impairments and diseases—both short term and long term—is to maintain your BLL below 40 $\mu\text{g}/\text{dl}$. The provisions of the standard are designed with this end in mind.

Your employer has prime responsibility to assure that the provisions of the standard are complied with both by the company and by individual workers. You, as a worker, however, also have a responsibility to assist your employer in complying with the standard. You can play a key role in protecting your own health by learning about the lead hazards and their control, learning what the standard requires, following the standard where it governs your own actions, and seeing that your employer complies with provisions governing employee actions.

(iv) Reporting signs and symptoms of health problems. You should immediately notify your employer if you develop signs or symptoms associated with lead poisoning or if you desire medical advice concerning the effects of current or past exposure to lead or your ability to have a healthy child. You should also notify your employer if you have difficulty breathing during a respirator fit test or while wearing a respirator. In each of these cases, your employer must make available to you appropriate medical examinations or consultations. These must be provided at no cost to you and at a reasonable time and place. The standard contains a procedure whereby you can obtain a second opinion by a physician of your choice if your employer selected the initial physician.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17650, filed 10/29/93, effective 12/10/93.]

WAC 296-155-17652 Appendix B to WAC 296-155-176—Employee standard summary. This appendix sum-

[Title 296 WAC—p. 2258]

marizes key provisions of the standard for lead in construction that you as a worker should become familiar with.

(1) Permissible exposure limit (PEL)—WAC 296-62-17607.

The standard sets a permissible exposure limit (PEL) of 50 micrograms of lead per cubic meter of air (50 $\mu\text{g}/\text{m}^3$), averaged over an 8-hour workday which is referred to as a time-weighted average (TWA). This is the highest level of lead in air to which you may be permissibly exposed over an 8-hour workday. However, since this is an 8-hour average, short exposures above the PEL are permitted so long as for each 8-hour work day your average exposure does not exceed this level. This standard, however, takes into account the fact that your daily exposure to lead can extend beyond a typical 8-hour workday as the result of overtime or other alterations in your work schedule. To deal with this situation, the standard contains a formula which reduces your permissible exposure when you are exposed more than 8 hours. For example, if you are exposed to lead for 10 hours a day, the maximum permitted average exposure would be 40 $\mu\text{g}/\text{m}^3$.

(2) Exposure assessment—WAC 296-155-17609.

If lead is present in your workplace in any quantity, your employer is required to make an initial determination of whether any employee's exposure to lead exceeds the action level (30 $\mu\text{g}/\text{m}^3$ averaged over an 8-hour day). Employee exposure is that exposure which would occur if the employee were not using a respirator. This initial determination requires your employer to monitor workers' exposures unless the employee has objective data which can demonstrate conclusively that no employee will be exposed to lead in excess of the action level. Where objective data is used in lieu of actual monitoring the employer must establish and maintain an accurate record, documenting its relevancy in assessing exposure levels for current job conditions. If such objective data is available, the employer need proceed no further on employee exposure assessment until such time that conditions have changed and the determination is no longer valid.

Objective data may be compiled from various sources, e.g., insurance companies and trade associations and information from suppliers or exposure data collected from similar operations. Objective data may also comprise previously-collected sampling data including area monitoring. If it cannot be determined through using objective data that worker exposure is less than the action level, your employer must conduct monitoring or must rely on relevant previous personal sampling, if available. Where monitoring is required for the initial determination, it may be limited to a representative number of employees who are reasonably expected to have the highest exposure levels. If your employer has conducted appropriate air sampling for lead in the past 12 months, they may use these results, provided they are applicable to the same employee tasks and exposure conditions and meet the requirements for accuracy as specified in the standard. As with objective data, if such results are relied upon for the initial determination, your employer must establish and maintain a record as to the relevancy of such data to current job conditions.

If there have been any employee complaints of symptoms which may be attributable to exposure to lead or if there is any other information or observations which would indi-

cate employee exposure to lead, this must also be considered as part of the initial determination. If this initial determination shows that a reasonable possibility exists that any employee may be exposed, without regard to respirator, over the action level, your employer must set up an air monitoring program to determine the exposure level representative of each employee exposed to lead at your workplace. In carrying out this air monitoring program, your employer is not required to monitor the exposure of every employee, but they must monitor a representative number of employees and job types. Enough sampling must be done to enable each employee's exposure level to be reasonably represent full shift exposure. In addition, these air samples must be taken under conditions which represent each employee's regular, daily exposure to lead. Sampling performed in the past 12 months may be used to determine exposures above the action level if such sampling was conducted during work activities essentially similar to present work conditions.

The standard lists certain tasks which may likely result in exposures to lead in excess of the PEL and, in some cases, exposures in excess of 50 times the PEL. If you are performing any of these tasks, your employer must provide you with appropriate respiratory protection, protective clothing and equipment, change areas, hand washing facilities, biological monitoring, and training until such time that an exposure assessment is conducted which demonstrates that your exposure level is below the PEL.

If you are exposed to lead and air sampling is performed, your employer is required to notify you in writing within 5 working days of the air monitoring results which represent your exposure. If the results indicate that your exposure exceeds the PEL (without regard to your use of a respirator), then your employer must also notify you of this in writing, and provide you with a description of the corrective action that has been taken or will be taken to reduce your exposure.

Your exposure must be rechecked by monitoring, at least every six months if your exposure is at or over the action level but below the PEL. Your employer may discontinue monitoring for you if 2 consecutive measurements, taken at least 7 days apart, are at or below the action level. Air monitoring must be repeated every 3 months if you are exposed over the PEL. Your employer must continue monitoring for you at this frequency until 2 consecutive measurements, taken at least 7 days apart, are below the PEL but above the action level, at which time your employer must repeat monitoring of your exposure every six months and may discontinue monitoring only after your exposure drops to or below the action level. However, whenever there is a change of equipment, process, control, or personnel or a new type of job is added at your workplace which may result in new or additional exposure to lead, your employer must perform additional monitoring.

(3) Methods of compliance—WAC 296-155-17611.

Your employer is required to assure that no employee is exposed to lead in excess of the PEL as an 8-hour TWA. The standard for lead in construction requires employers to institute engineering and work practice controls including administrative controls to the extent feasible to reduce employee exposure to lead. Where such controls are feasible but not adequate to reduce exposures below the PEL they must be

used nonetheless to reduce exposures to the lowest level that can be accomplished by these means and then supplemented with appropriate respiratory protection.

Your employer is required to develop and implement a written compliance program prior to the commencement of any job where employee exposures may reach the PEL as an 8-hour TWA. The standard identifies the various elements that must be included in the plan. For example, employers are required to include a description of operations in which lead is emitted, detailing other relevant information about the operation such as the type of equipment used, the type of material involved, employee job responsibilities, operating procedures and maintenance practices. In addition, your employer's compliance plan must specify the means that will be used to achieve compliance and, where engineering controls are required, include any engineering plans or studies that have been used to select the control methods. If administrative controls involving job rotation are used to reduce employee exposure to lead, the job rotation schedule must be included in the compliance plan. The plan must also detail the type of protective clothing and equipment, including respirator, housekeeping and hygiene practices that will be used to protect you from the adverse effects of exposure to lead.

The written compliance program must be made available, upon request, to affected employees and their designated representatives, and the director.

Finally, the plan must be reviewed and updated at least every 6 months to assure it reflects the current status in exposure control.

(4) Respiratory protection—WAC 296-155-17613.

Your employer is required to select respirator from the types listed in Table I of the Respiratory Protection section of the standard (see WAC 296-155-17613). Any respirator chosen must be certified by the National Institute for Occupational Safety and Health (NIOSH) under the provisions of 42 CFR part 84. This respirator selection table will enable your employer to choose a type of respirator that will give you a proper amount of protection based on your airborne lead exposure. Your employer may select a type of respirator that provides greater protection than that required by the standard; that is, one recommended for a higher concentration of lead than is present in your workplace. For example, a powered air-purifying respirator (PAPR) is much more protective than a typical negative pressure respirator, and may also be more comfortable to wear. A PAPR has a filter, cartridge, or canister to clean the air, and a power source which continuously blows filtered air into your breathing zone. Your employer might make a PAPR available to you to ease the burden of having to wear a respirator for long periods of time. The standard provides that you can obtain a PAPR upon request.

Your employer must also start a Respiratory Protection Program. This program must include written procedures for the proper selection, use, cleaning, storage, and maintenance of respirator.

Your employer must ensure that your respirator facepiece fits properly. Proper fit of a respirator facepiece is critical to your protection from airborne lead. Obtaining a proper fit on each employee may require your employer to make available several different types of respirator masks. To ensure that your respirator fits properly and that facepiece

leakage is minimal, your employer must give you either a qualitative or quantitative fit test as specified in WAC 296-62-07201 through 296-62-07248, Appendices A-1, A-2 and A-3 of chapter 296-62 WAC, Part E.

(5) Protective work clothing and equipment—WAC 296-155-17615.

If you are exposed to lead above the PEL as an 8-hour TWA, without regard to your use of a respirator, or if you are exposed to lead compounds such as lead arsenate or lead azide which can cause skin and eye irritation, your employer must provide you with protective work clothing and equipment appropriate for the hazard. If work clothing is provided, it must be provided in a clean and dry condition at least weekly, and daily if your airborne exposure to lead is greater than 200 $\mu\text{g}/\text{m}^3$. Appropriate protective work clothing and equipment can include coveralls or similar full-body work clothing, gloves, hats, shoes or disposable shoe coverlets, and face shields or vented goggles. Your employer is required to provide all such equipment at no cost to you. In addition, your employer is responsible for providing repairs and replacement as necessary, and also is responsible for the cleaning, laundering or disposal of protective clothing and equipment.

The standard requires that your employer assure that you follow good work practices when you are working in areas where your exposure to lead may exceed the PEL. With respect to protective clothing and equipment, where appropriate, the following procedures should be observed prior to beginning work:

- ◆ Change into work clothing and shoe covers in the clean section of the designated changing areas;
- ◆ Use work garments of appropriate protective gear, including respirator before entering the work area; and
- ◆ Store any clothing not worn under protective clothing in the designated changing area.

Workers should follow these procedures upon leaving the work area:

- ◆ HEPA vacuum heavily contaminated protective work clothing while it is still being worn. At no time may lead be removed from protective clothing by any means which result in uncontrolled dispersal of lead into the air;
- ◆ Remove shoe covers and leave them in the work area;
- ◆ Remove protective clothing and gear in the dirty area of the designated changing area. Remove protective coveralls by carefully rolling down the garment to reduce exposure to dust.
- ◆ Remove respirator last; and
- ◆ Wash hands and face.

Workers should follow these procedures upon finishing work for the day (in addition to procedures described above):

- ◆ Where applicable, place disposal coveralls and shoe covers with the abatement waste;
- ◆ Contaminated clothing which is to be cleaned, laundered or disposed of must be placed in closed containers in the change room.
- ◆ Clean protective gear, including respirator, according to standard procedures;
- ◆ Wash hands and face again.

If showers are available, take a shower and wash hair. If shower facilities are not available at the work site, shower immediately at home and wash hair.

(6) Housekeeping—WAC 296-155-17617.

Your employer must establish a housekeeping program sufficient to maintain all surfaces as free as practicable of accumulations of lead dust. Vacuuming is the preferred method of meeting this requirement, and the use of compressed air to clean floors and other surfaces is generally prohibited unless removal with compressed air is done in conjunction with ventilation systems designed to contain dispersal of the lead dust. Dry or wet sweeping, shoveling, or brushing may not be used except where vacuuming or other equally effective methods have been tried and do not work. Vacuums must be used equipped with a special filter called a high-efficiency particulate air (HEPA) filter and emptied in a manner which minimizes the reentry of lead into the workplace.

(7) Hygiene facilities and practices—WAC 296-155-17619.

The standard requires that hand washing facilities be provided where occupational exposure to lead occurs. In addition, change areas, showers (where feasible), and lunchrooms or eating areas are to be made available to workers exposed to lead above the PEL. Your employer must assure that except in these facilities, food and beverage is not present or consumed, tobacco products are not present or used, and cosmetics are not applied, where airborne exposures are above the PEL. Change rooms provided by your employer must be equipped with separate storage facilities for your protective clothing and equipment and street clothes to avoid cross-contamination. After showering, no required protective clothing or equipment worn during the shift may be worn home. It is important that contaminated clothing or equipment be removed in change areas and not be worn home or you will extend your exposure and expose your family since lead from your clothing can accumulate in your house, car, etc.

Lunchrooms or eating areas may not be entered with protective clothing or equipment unless surface dust has been removed by vacuuming, downdraft booth, or other cleaning method. Finally, workers exposed above the PEL must wash both their hands and faces prior to eating, drinking, smoking or applying cosmetics.

All of the facilities and hygiene practices just discussed are essential to minimize additional sources of lead absorption from inhalation or ingestion of lead that may accumulate on you, your clothes, or your possessions. Strict compliance with these provisions can virtually eliminate several sources of lead exposure which significantly contribute to excessive lead absorption.

(8) Medical surveillance—WAC 296-155-17621.

The medical surveillance program is part of the standard's comprehensive approach to the prevention of lead-related disease. Its purpose is to supplement the main thrust of the standard which is aimed at minimizing airborne concentrations of lead and sources of ingestion. Only medical surveillance can determine if the other provisions of the standard have affectively protected you as an individual. Compliance with the standard's provision will protect most workers

from the adverse effects of lead exposure, but may not be satisfactory to protect individual workers:

- ◆ Who have high body burdens of lead acquired over past years,
- ◆ Who have additional uncontrolled sources of nonoccupational lead exposure,
- ◆ Who exhibit unusual variations in lead absorption rates, or
- ◆ Who have specific nonwork related medical conditions which could be aggravated by lead exposure (e.g., renal disease, anemia).

In addition, control systems may fail, or hygiene and respirator programs may be inadequate. Periodic medical surveillance of individual workers will help detect those failures. Medical surveillance will also be important to protect your reproductive ability—regardless of whether you are a man or woman.

All medical surveillance required by the standard must be performed by or under the supervision of a licensed physician. The employer must provide required medical surveillance without cost to employees and at a reasonable time and place. The standard's medical surveillance program has two parts—periodic biological monitoring and medical examinations. Your employer's obligation to offer you medical surveillance is triggered by the results of the air monitoring program. Full medical surveillance must be made available to all employees who are or may be exposed to lead in excess of the action level for more than 30 days a year and whose blood lead level exceeds 40 µg/dl. Initial medical surveillance consisting of blood sampling and analysis for lead and zinc protoporphyrin must be provided to all employees exposed at any time (1 day) above the action level.

Biological monitoring under the standard must be provided at least every 2 months for the first 6 months and every 6 months thereafter until your blood lead level is below 40 µg/dl. A zinc protoporphyrin (ZPP) test is a very useful blood test which measures an adverse metabolic effect of lead on your body and is therefore an indicator of lead toxicity.

If your BLL exceeds 40 µg/dl the monitoring frequency must be increased from every 6 months to at least every 2 months and not reduced until two consecutive BLLs indicate a blood lead level below 40 µg/dl. Each time your BLL is determined to be over 40 µg/dl, your employer must notify you of this in writing within five working days of their receipt of the test results. The employer must also inform you that the standard requires temporary medical removal with economic protection when your BLL exceeds 50 µg/dl. (See Discussion of medical removal protection—WAC 296-155-17623.) Anytime your BLL exceeds 50 µg/dl your employer must make available to you within two weeks of receipt of these test results a second follow-up BLL test to confirm your BLL. If the two tests both exceed 50 µg/dl, and you are temporarily removed, then your employer must make successive BLL tests available to you on a monthly basis during the period of your removal.

Medical examinations beyond the initial one must be made available on an annual basis if your blood lead level exceeds 40 µg/dl at any time during the preceding year and you are being exposed above the airborne action level of 30 µg/m³ for 30 or more days per year. The initial examination

will provide information to establish a baseline to which subsequent data can be compared.

An initial medical examination to consist of blood sampling and analysis for lead and zinc protoporphyrin must also be made available (prior to assignment) for each employee being assigned for the first time to an area where the airborne concentration of lead equals or exceeds the action level at any time. In addition, a medical examination or consultation must be made available as soon as possible if you notify your employer that you are experiencing signs or symptoms commonly associated with lead poisoning or that you have difficulty breathing while wearing a respirator or during a respirator fit test. You must also be provided a medical examination or consultation if you notify your employer that you desire medical advice concerning the effects of current or past exposure to lead on your ability to procreate a healthy child.

Finally, appropriate follow-up medical examinations or consultations may also be provided for employees who have been temporarily removed from exposure under the medical removal protection provisions of the standard. (See subsection (9), below.)

The standard specifies the minimum content of preassignment and annual medical examinations. The content of other types of medical examinations and consultations is left up to the sound discretion of the examining physician. Preassignment and annual medical examinations must include:

- ◆ A detailed work history and medical history;
- ◆ A thorough physical examination, including an evaluation of your pulmonary status if you will be required to use a respirator;
- ◆ A blood pressure measurement; and
- ◆ A series of laboratory tests designed to check your blood chemistry and your kidney function.

In addition, at any time upon your request, a laboratory evaluation of male fertility will be made (microscopic examination of a sperm sample), or a pregnancy test will be given.

The standard does not require that you participate in any of the medical procedures, tests, etc. which your employer is required to make available to you. Medical surveillance can, however, play a very important role in protecting your health. You are strongly encouraged, therefore, to participate in a meaningful fashion. The standard contains a multiple physician review mechanism which will give you a chance to have a physician of your choice directly participate in the medical surveillance program. If you are dissatisfied with an examination by a physician chosen by your employer, you can select a second physician to conduct an independent analysis. The two doctors would attempt to resolve any differences of opinion, and select a third physician to resolve any firm dispute. Generally your employer will choose the physician who conducts medical surveillance under the lead standard—unless you and your employer can agree on the choice of a physician or physicians. Some companies and unions have agreed in advance, for example, to use certain independent medical laboratories or panels of physicians. Any of these arrangements are acceptable so long as required medical surveillance is made available to workers.

The standard requires your employer to provide certain information to a physician to aid in their examination of you. This information includes:

- ◆ The standard and its appendices,
- ◆ A description of your duties as they relate to occupational lead exposure,
- ◆ Your exposure level or anticipated exposure level,
- ◆ A description of any personal protective equipment you wear,
- ◆ Prior blood lead level results, and
- ◆ Prior written medical opinions concerning you that the employer has.

After a medical examination or consultation the physician must prepare a written report which must contain:

- ◆ The physician's opinion as to whether you have any medical condition which places you at increased risk of material impairment to health from exposure to lead,
- ◆ Any recommended special protective measures to be provided to you,
- ◆ Any blood lead level determinations, and
- ◆ Any recommended limitation on your use of respirator.

This last element must include a determination of whether you can wear a powered air purifying respirator (PAPR) if you are found unable to wear a negative pressure respirator.

The medical surveillance program of the lead standard may at some point in time serve to notify certain workers that they have acquired a disease or other adverse medical condition as a result of occupational lead exposure. If this is true, these workers might have legal rights to compensation from public agencies, their employers, firms that supply hazardous products to their employers, or other persons. Some states have laws, including worker compensation laws, that disallow a worker who learns of a job-related health impairment to sue, unless the worker sues within a short period of time after learning of the impairment. (This period of time may be a matter of months or years.) An attorney can be consulted about these possibilities. It should be stressed that WISHA is in no way trying to either encourage or discourage claims or lawsuits. However, since results of the standard's medical surveillance program can significantly affect the legal remedies of a worker who has acquired a job-related disease or impairment, it is proper for WISHA to make you aware of this.

The medical surveillance section of the standard also contains provisions dealing with chelation. Chelation is the use of certain drugs (administered in pill form or injected into the body) to reduce the amount of lead absorbed in body tissues. Experience accumulated by the medical and scientific communities has largely confirmed the effectiveness of this type of therapy for the treatment of very severe lead poisoning. On the other hand, it has also been established that there can be a long list of extremely harmful side effects associated with the use of chelating agents. The medical community has balanced the advantages and disadvantages resulting from the use of chelating agents in various circumstances and has established when the use of these agents is acceptable. The standard includes these accepted limitations due to a history of abuse of chelation therapy by some lead companies. The most widely used chelating agents are calcium disodium EDTA, (Ca Na₂ EDTA), Calcium Disodium Versenate (Versenate), and d-penicillamine (penicillamine or Cupramine).

The standard prohibits "prophylactic chelation" of any employee by any person the employer retains, supervises or controls. "Prophylactic chelation" is the routine use of chelating or similarly acting drugs to prevent elevated blood levels in workers who are occupationally exposed to lead, or the use of these drugs to routinely lower blood lead levels to pre-designated concentrations believed to be "safe". It should be emphasized that where an employer takes a worker who has no symptoms of lead poisoning and has chelation carried out by a physician (either inside or outside of a hospital) solely to reduce the worker's blood lead level, that will generally be considered prophylactic chelation. The use of a hospital and a physician does not mean that prophylactic chelation is not being performed. Routine chelation to prevent increased or reduce current blood lead levels is unacceptable whatever the setting.

The standard allows the use of "therapeutic" or "diagnostic" chelation if administered under the supervision of a licensed physician in a clinical setting with thorough and appropriate medical monitoring. Therapeutic chelation responds to severe lead poisoning where there are marked symptoms. Diagnostic chelation involved giving a patient a dose of the drug then collecting all urine excreted for some period of time as an aid to the diagnosis of lead poisoning.

In cases where the examining physician determines that chelation is appropriate, you must be notified in writing of this fact before such treatment. This will inform you of a potentially harmful treatment, and allow you to obtain a second opinion.

(9) Medical removal protection—WAC 296-155-17623.

Excessive lead absorption subjects you to increased risk of disease. Medical removal protection (MRP) is a means of protecting you when, for whatever reasons, other methods, such as engineering controls, work practices, and respirator, have failed to provide the protection you need. MRP involves the temporary removal of a worker from their regular job to a place of significantly lower exposure without any loss of earnings, seniority, or other employment rights or benefits. The purpose of this program is to cease further lead absorption and allow your body to naturally excrete lead which has previously been absorbed. Temporary medical removal can result from an elevated blood lead level, or a medical opinion. For up to 18 months, or for as long as the job the employee was removed from lasts, protection is provided as a result of either form of removal. The vast majority of removed workers, however, will return to their former jobs long before this eighteen month period expires.

You may also be removed from exposure even if your blood lead level is below 50 µ/dl if a final medical determination indicates that you temporarily need reduced lead exposure for medical reasons. If the physician who is implementing your employers medical program makes a final written opinion recommending your removal or other special protective measures, your employer must implement the physician's recommendation. If you are removed in this manner, you may only be returned when the doctor indicates that it is safe for you to do so.

The standard does not give specific instructions dealing with what an employer must do with a removed worker. Your job assignment upon removal is a matter for you, your

employer and your union (if any) to work out consistent with existing procedures for job assignments. Each removal must be accomplished in a manner consistent with existing collective bargaining relationships. Your employer is given broad discretion to implement temporary removals so long as no attempt is made to override existing agreements. Similarly, a removed worker is provided no right to veto an employer's choice which satisfies the standard.

In most cases, employers will likely transfer removed employees to other jobs with sufficiently low lead exposure. Alternatively, a worker's hours may be reduced so that the time weighted average exposure is reduced, or they may be temporarily laid off if no other alternative is feasible.

In all of these situation, MRP benefits must be provided during the period of removal—i.e., you continue to receive the same earnings, seniority, and other rights and benefits you would have had if you had not been removed. Earnings includes more than just your base wage; it includes overtime, shift differentials, incentives, and other compensation you would have earned if you had not been removed. During the period of removal you must also be provided with appropriate follow-up medical surveillance. If you were removed because your blood lead level was too high, you must be provided with a monthly blood test. If a medical opinion caused your removal, you must be provided medical tests or examinations that the doctor believes to be appropriate. If you do not participate in this follow up medical surveillance, you may lose your eligibility for MRP benefits.

When you are medically eligible to return to your former job, your employer must return you to your "former job status." This means that you are entitled to the position, wages, benefits, etc., you would have had if you had not been removed. If you would still be in your old job if no removal had occurred that is where you go back. If not, you are returned consistent with whatever job assignment discretion your employer would have had if no removal had occurred. MRP only seeks to maintain your rights, not expand them or diminish them.

If you are removed under MRP and you are also eligible for worker compensation or other compensation for lost wages, your employer's MRP benefits obligation is reduced by the amount that you actually receive from these other sources. This is also true if you obtain other employment during the time you are laid off with MRP benefits.

The standard also covers situations where an employer voluntarily removes a worker from exposure to lead due to the effects of lead on the employee's medical condition, even though the standard does not require removal. In these situations MRP benefits must still be provided as though the standard required removal. Finally, it is important to note that in all cases where removal is required, respirator cannot be used as a substitute. Respirator may be used before removal becomes necessary, but not as an alternative to a transfer to a low exposure job, or to a lay-off with MRP benefits.

(10) Employee information and training—WAC 296-155-17625.

Your employer is required to provide an information and training program for all employees exposed to lead above the action level or who may suffer skin or eye irritation from lead compounds such as lead arsenate or lead azide. The program

must train these employees regarding the specific hazards associated with their work environment, protective measures which can be taken, including the contents of any compliance plan in effect, the danger of lead to their bodies (including their reproductive systems), and their rights under the standard. All employees must be trained prior to initial assignment to areas where there is a possibility of exposure over the action level.

This training program must also be provided at least annually thereafter unless further exposure above the action level will not occur.

(11) Signs—WAC 296-155-17627.

The standard requires that the following warning sign be posted in work areas where the exposure to lead exceeds the PEL:

WARNING
LEAD WORK AREA
· POISON
NO SMOKING OR EATING

These signs are to be posted and maintained in a manner which assures that the legend is readily visible.

(12) Recordkeeping—WAC 296-155-17629.

Your employer is required to keep all records of exposure monitoring for airborne lead. These records must include the name and job classification of employees measured, details of the sampling and analytical techniques, the results of this sampling, and the type of respiratory protection being worn by the person sampled. Such records are to be retained for at least 30 years. Your employer is also required to keep all records of biological monitoring and medical examination results. These records must include the names of the employees, the physician's written opinion, and a copy of the results of the examination. Medical records must be preserved and maintained for the duration of employment plus 30 years. However, if the employee's duration of employment is less than one year, the employer need not retain that employee's medical records beyond the period of employment if they are provided to the employee upon termination of employment.

Recordkeeping is also required if you are temporarily removed from your job under the medical removal protection program. This record must include your name and Social Security number, the date of your removal and return, how the removal was or is being accomplished, and whether or not the reason for the removal was an elevated blood lead level. Your employer is required to keep each medical removal record only for as long as the duration of an employee's employment.

The standard requires that if you request to see or copy environmental monitoring, blood lead level monitoring, or medical removal records, they must be made available to you or to a representative that you authorize. Your union also has access to these records. Medical records other than BLL's must also be provided upon request to you, to your physician or to any other person whom you may specifically designate. Your union does not have access to your personal medical records unless you authorize their access.

(13) Observation of monitoring—WAC 296-155-17631.

When air monitoring for lead is performed at your workplace as required by this standard, your employer must allow

you or someone you designate to act as an observer of the monitoring. Observers are entitled to an explanation of the measurement procedure, and to record the results obtained. Since results will not normally be available at the time of the monitoring, observers are entitled to record or receive the results of the monitoring when returned by the laboratory. Your employer is required to provide the observer with any personal protective devices required to be worn by employees working in the area that is being monitored. The employer must require the observer to wear all such equipment and to comply with all other applicable safety and health procedures.

(14) Startup date—WAC 296-155-17635.

Employer obligations under the standard begin as of that date with full implementation of engineering controls as soon as possible but no later than within 4 months, and all other provisions completed as soon as possible, but no later than within 2 months from the effective date.

(15) For additional information.

(a) A copy of the standard for lead in construction can be obtained free of charge by calling or writing to the department of labor and industries, Post Office Box 44620, Mail-stop 44620, Olympia, Washington 98504-4620: Telephone (360) 956-5527.

(b) Additional information about the standard, its enforcement, and your employer's compliance can be obtained from the nearest office listed in your telephone directory under the state of Washington, department of labor and industries.

WAC 296-155-17654 Appendix C to WAC 296-155-176—Medical surveillance guidelines. (1) Introduction.

The primary purpose of the Washington Industrial Safety and Health Act of 1973 is to assure, so far as possible, safe and healthful working conditions for every working man and woman. The occupational health standard for lead in construction is designed to protect workers exposed to inorganic lead including metallic lead, all inorganic lead compounds and organic lead soaps.

Under this standard occupational exposure to inorganic lead is to be limited to 50 $\mu\text{g}/\text{m}^3$ (micrograms per cubic meter) based on an 8 hour time-weighted average (TWA). This permissible exposure limit (PEL) must be achieved through a combination of engineering, work practice and administrative controls to the extent feasible. Where these controls are in place but are found not to reduce employee exposures to or below the PEL, they must be used nonetheless, and supplemented with respirators to meet the 50 $\mu\text{g}/\text{m}^3$ exposure limit.

The standard also provides for a program of biological monitoring for employees exposed to lead above the action level at any time, and additional medical surveillance for all employees exposed to levels of inorganic lead above 30 $\mu\text{g}/\text{m}^3$ (TWA) for more than 30 days per year and whose BLL exceeds 40 $\mu\text{g}/\text{dl}$.

The purpose of this document is to outline the medical surveillance provisions of the standard for inorganic lead in construction, and to provide further information to the physician regarding the examination and evaluation of workers exposed to inorganic lead.

Subsection (2) provides a detailed description of the monitoring procedure including the required frequency of blood testing for exposed workers, provisions for medical removal protection (MRP), the recommended right of the employee to a second medical opinion, and notification and recordkeeping requirements of the employer. A discussion of the requirements for respirator use and respirator monitoring and WISHA's position on prophylactic chelation therapy are also included in this subsection.

Subsection (3) discusses the toxic effects and clinical manifestations of lead poisoning and effects of lead intoxication on enzymatic pathways in heme synthesis. The adverse effects on both male and female reproductive capacity and on the fetus are also discussed.

Subsection (4) outlines the recommended medical evaluation of the worker exposed to inorganic lead, including details of the medical history, physical examination, and recommended laboratory tests, which are based on the toxic effects of lead as discussed in subsection (3).

Subsection (5) provides detailed information concerning the laboratory tests available for the monitoring of exposed workers. Included also is a discussion of the relative value of each test and the limitations and precautions which are necessary in the interpretation of the laboratory results.

(2) Medical surveillance and monitoring requirements for workers exposed to inorganic lead.

Under the standard for inorganic lead in the construction industry, initial medical surveillance consisting of biological monitoring to include blood lead and ZPP level determination shall be provided to employees exposed to lead at or above the action level on any one day. In addition, a program of biological monitoring is to be made available to all employees exposed above the action level at any time and additional medical surveillance is to be made available to all employees exposed to lead above 30 $\mu\text{g}/\text{m}^3$ TWA for more than 30 days each year and whose BLL exceeds 40 $\mu\text{g}/\text{dl}$. This program consists of periodic blood sampling and medical evaluation to be performed on a schedule which is defined by previous laboratory results, worker complaints or concerns, and the clinical assessment of the examining physician.

Under this program, the blood lead level (BLL) of all employees who are exposed to lead above 30 $\mu\text{g}/\text{m}^3$ for more than 30 days per year or whose blood lead is above 40 $\mu\text{g}/\text{dl}$ but exposed for no more than 30 days per year is to be determined at least every two months for the first six months of exposure and every six months thereafter. The frequency is increased to every two months for employees whose last blood lead level was 40 $\mu\text{g}/\text{dl}$ or above. For employees who are removed from exposure to lead due to an elevated blood lead, a new blood lead level must be measured monthly. A zinc protoporphyrin (ZPP) measurement is strongly recommended on each occasion that a blood lead level measurement is made.

An annual medical examination and consultation performed under the guidelines discussed in subsection (4) is to be made available to each employee exposed above $30 \mu\text{g}/\text{m}^3$ for more than 30 days per year for whom a blood test conducted at any time during the preceding 12 months indicated a blood lead level at or above $40 \mu\text{g}/\text{dl}$. Also, an examination is to be given to all employees prior to their assignment to an area in which airborne lead concentrations reach or exceed the $30 \mu\text{g}/\text{m}^3$ for more than 30 days per year. In addition, a medical examination must be provided as soon as possible after notification by an employee that the employee has developed signs or symptoms commonly associated with lead intoxication, that the employee desires medical advice regarding lead exposure and the ability to procreate a healthy child, or that the employee has demonstrated difficulty in breathing during a respirator fitting test or during respirator use. An examination is also to be made available to each employee removed from exposure to lead due to a risk of sustaining material impairment to health, or otherwise limited or specially protected pursuant to medical recommendations.

Results of biological monitoring or the recommendations of an examining physician may necessitate removal of an employee from further lead exposure pursuant to the standard's medical removal protection (MRP) program. The object of the MRP program is to provide temporary medical removal to workers either with substantially elevated blood lead levels or otherwise at risk of sustaining material health impairment from continued substantial exposure to lead.

Under the standard's ultimate worker removal criteria, a worker is to be removed from any work having an eight hour TWA exposure to lead of $30 \mu\text{g}/\text{m}^3$ when their blood lead level reaches $50 \mu\text{g}/\text{dl}$ and is confirmed by a second follow-up blood lead level performed within two weeks after the employer receives the results of the first blood sampling test. Return of the employee to their job status depends on a worker's blood lead level declining to $40 \mu\text{g}/\text{dl}$.

As part of the standard, the employer is required to notify in writing each employee whose blood lead level exceeds $40 \mu\text{g}/\text{dl}$. In addition each such employee is to be informed that the standard requires medical removal with MRP benefits, discussed below, when an employee's blood lead level exceeds the above defined limit.

In addition to the above blood lead level criterion, temporary worker removal may also take place as a result of medical determinations and recommendations. Written medical opinions must be prepared after each examination pursuant to the standard. If the examining physician includes a medical finding, determination or opinion that the employee has a medical condition which places the employee at increased risk of material health impairment from exposure to lead, then the employee must be removed from exposure to lead at or above $30 \mu\text{g}/\text{m}^3$. Alternatively, if the examining physician recommends special protective measures for an employee (e.g., use of a powered air purifying respirator) or recommends limitations on an employee's exposure to lead, then the employer must implement these recommendations.

Recommendations may be more stringent than the specific provisions of the standard. The examining physician, therefore, is given broad flexibility to tailor special protective

procedures to the needs of individual employees. This flexibility extends to the evaluation and management of pregnant workers and male and female workers who are planning to raise children. Based on the history, physical examination, and laboratory studies, the physician might recommend special protective measures or medical removal for an employee who is pregnant or who is planning to conceive a child when, in the physician's judgment, continued exposure to lead at the current job would pose a significant risk. The return of the employee to their former job status, or the removal of special protections or limitations, depends upon the examining physician determining that the employee is no longer at increased risk of material impairment or that special measures are no longer needed.

During the period of any form of special protection or removal, the employer must maintain the worker's earnings, seniority, and other employment rights and benefits (as though the worker had not been removed) for a period of up to 18 months or for as long as the job the employee was removed from lasts if less than 18 months. This economic protection will maximize meaningful worker participation in the medical surveillance program, and is appropriate as part of the employer's overall obligation to provide a safe and healthful workplace. The provisions of MRP benefits during the employee's removal period may, however, be conditioned upon participation in medical surveillance.

The lead standard provides for a multiple physician review in cases where the employee wishes a second opinion concerning potential lead poisoning or toxicity. If an employee wishes a second opinion, they can make an appointment with a physician of their choice. This second physician will review the findings, recommendations or determinations of the first physician and conduct any examinations, consultations or tests deemed necessary in an attempt to make a final medical determination. If the first and second physicians do not agree in their assessment they must try to resolve their differences. If they cannot reach an agreement then they must designate a third physician to resolve the dispute.

The employer must provide examining and consulting physicians with the following specific information: A copy of the lead regulations and all appendices, a description of the employee's duties as related to exposure, the exposure level or anticipated level to lead and any other toxic substances (if applicable), a description of personal protective equipment used, blood lead levels, and all prior written medical opinions regarding the employee in the employer's possession or control. The employer must also obtain from the physician and provide the employee with a written medical opinion containing blood lead levels, the physicians's opinion as to whether the employee is at risk of material impairment to health, any recommended protective measures for the employee if further exposure is permitted, as well as any recommended limitations upon an employee's use of respirators.

Employers must instruct each physician not to reveal to the employer in writing or in any other way their findings, laboratory results, or diagnoses which are felt to be unrelated to occupational lead exposure. They must also instruct each physician to advise the employee of any occupationally or

non-occupationally related medical condition requiring further treatment or evaluation.

The standard provides for the use of respirators where engineering and other primary controls are not effective. However, the use of respirator protection shall not be used in lieu of temporary medical removal due to elevated blood lead levels or findings that an employee is at risk of material health impairment. This is based on the numerous inadequacies of respirators including skin rash where the facepiece makes contact with the skin, unacceptable stress to breathing in some workers with underlying cardiopulmonary impairment, difficulty in providing adequate fit, the tendency for respirators to create additional hazards by interfering with vision, hearing, and mobility, and the difficulties of assuring the maximum effectiveness of a complicated work practice program involving respirators. Respirators do, however, serve a useful function where engineering and work practice controls are inadequate by providing supplementary, interim, or short-term protection, provided they are properly selected for the environment in which the employee will be working, properly fitted to the employee, maintained and cleaned periodically, and worn by the employee when required.

In its standard on occupational exposure to inorganic lead in the construction industry, WISHA has prohibited prophylactic chelation. Diagnostic and therapeutic chelation are permitted only under the supervision of a licensed physician with appropriate medical monitoring in an acceptable clinical setting. The decision to initiate chelation therapy must be made on an individual basis and take into account the severity of symptoms felt to be a result of lead toxicity along with blood lead levels, ZPP levels, and other laboratory tests as appropriate. EDTA and penicillamine which are the primary chelating agents used in the therapy of occupational lead poisoning have significant potential side effects and their use must be justified on the basis of expected benefits to the worker. Unless frank and severe symptoms are present, therapeutic chelation is not recommended, given the opportunity to remove a worker from exposure and allow the body to naturally excrete accumulated lead. As a diagnostic aid, the chelation mobilization test using CA-EDTA has limited applicability. According to some investigators, the test can differentiate between lead-induced and other nephropathies. The test may also provide an estimation of the mobile fraction of the total body lead burden.

Employers are required to assure that accurate records are maintained on exposure assessment, including environmental monitoring, medical surveillance, and medical removal for each employee. Exposure assessment records must be kept for at least 30 years. Medical surveillance records must be kept for the duration of employment plus 30 years except in cases where the employment was less than one year. If duration of employment is less than one year, the employer need not retain this record beyond the term of employment if the record is provided to the employee upon termination of employment. Medical removal records also must be maintained for the duration of employment. All records required under the standard must be made available upon request to the director. Employers must also make environmental and biological monitoring and medical removal records available to affected employees and to former

employees or their authorized employee representatives. Employees or their specifically designated representatives have access to their entire medical surveillance records.

In addition, the standard requires that the employer inform all workers exposed to lead at or above 30 $\mu\text{g}/\text{m}^3$ of the provisions of the standard and all its appendices, the purpose and description of medical surveillance and provisions for medical removal protection if temporary removal is required. An understanding of the potential health effects of lead exposure by all exposed employees along with full understanding of their rights under the lead standard is essential for an effective monitoring program.

(3) Adverse health effects of inorganic lead.

Although the toxicity of lead has been known for 2,000 years, the knowledge of the complex relationship between lead exposure and human response is still being refined. Significant research into the toxic properties of lead continues throughout the world, and it should be anticipated that our understanding of thresholds of effects and margins of safety will be improved in future years. The provisions of the lead standard are founded on two prime medical judgments: First, the prevention of adverse health effects from exposure to lead throughout a working lifetime requires that worker blood lead levels be maintained at or below 40 $\mu\text{g}/\text{dl}$ and second, the blood lead levels of workers, male or female, who intend to parent in the near future should be maintained below 30 $\mu\text{g}/\text{dl}$ to minimize adverse reproductive health effects to the parents and developing fetus. The adverse effects of lead on reproduction are being actively researched and WISHA encourages the physician to remain abreast of recent developments in the area to best advise pregnant workers or workers planning to conceive children.

The spectrum of health effects caused by lead exposure can be subdivided into five developmental stages: Normal, physiological changes of uncertain significance, pathophysiological changes, overt symptoms (morbidity), and mortality. Within this process there are no sharp distinctions, but rather a continuum of effects. Boundaries between categories overlap due to the wide variation of individual responses and exposures in the working population. WISHA's development of the lead standard focused on pathophysiological changes as well as later stages of disease.

(a) Heme synthesis inhibition. The earliest demonstrated effect of lead involves its ability to inhibit at least two enzymes of the heme synthesis pathway at very low blood levels. Inhibition of delta aminolevulinic acid dehydrase (ALA-D) which catalyzes the conversion of delta-aminolevulinic acid (ALA) to protoporphyrin is observed at a blood lead level below 20 $\mu\text{g}/\text{dl}$. At a blood lead level of 40 $\mu\text{g}/\text{dl}$, more than 20% of the population would have 70% inhibition of ALA-D. There is an exponential increase in ALA excretion at blood lead levels greater than 40 $\mu\text{g}/\text{dl}$.

Another enzyme, ferrochelatase, is also inhibited at low blood lead levels. Inhibition of ferrochelatase leads to increased free erythrocyte protoporphyrin (FEP) in the blood which can then bind to zinc to yield zinc protoporphyrin. At a blood lead level of 50 $\mu\text{g}/\text{dl}$ or greater, nearly 100% of the population will have an increase in FEP. There is also an exponential relationship between blood lead levels greater

than 40 µg/dl and the associated ZPP level, which has led to the development of the ZPP screening test for lead exposure.

While the significance of these effects is subject to debate, it is WISHA's position that these enzyme disturbances are early stages of a disease process which may eventually result in the clinical symptoms of lead poisoning. Whether or not the effects do progress to the later stages of clinical disease, disruption of these enzyme processes over a working lifetime is considered to be a material impairment of health.

One of the eventual results of lead-induced inhibition of enzymes in the heme synthesis pathway is anemia which can be asymptomatic if mild but associated with a wide array of symptoms including dizziness, fatigue, and tachycardia when more severe. Studies have indicated that lead levels as low as 50 µg/dl can be associated with a definite decreased hemoglobin, although most cases of lead-induced anemia, as well as shortened red-cell survival times, occur at lead levels exceeding 80 µg/dl. Inhibited hemoglobin synthesis is more common in chronic cases whereas shortened erythrocyte life span is more common in acute cases.

In lead-induced anemias, there is usually a reticulocytosis along with the presence of basophilic stippling, and ringed sideroblasts, although none of the above are pathognomonic for lead-induced anemia.

(b) Neurological effects. Inorganic lead has been found to have toxic effects on both the central and peripheral nervous systems. The earliest stages of lead-induced central nervous system effects first manifest themselves in the form of behavioral disturbances and central nervous system symptoms including irritability, restlessness, insomnia and other sleep disturbances, fatigue, vertigo, headache, poor memory, tremor, depression, and apathy. With more severe exposure, symptoms can progress to drowsiness, stupor, hallucinations, delirium, convulsions and coma.

The most severe and acute form of lead poisoning which usually follows ingestion or inhalation of large amounts of lead is acute encephalopathy which may arise precipitously with the onset of intractable seizures, coma, cardiorespiratory arrest, and death within 48 hours.

While there is disagreement about what exposure levels are needed to produce the earliest symptoms, most experts agree that symptoms definitely can occur at blood lead levels of 60 µg/dl whole blood and therefore recommend a 40 µg/dl maximum. The central nervous system effects frequently are not reversible following discontinued exposure or chelation therapy and when improvement does occur, it is almost always only partial.

The peripheral neuropathy resulting from lead exposure characteristically involves only motor function with minimal sensory damage and has a marked predilection for the extensor muscles of the most active extremity. The peripheral neuropathy can occur with varying degrees of severity. The earliest and mildest form which can be detected in workers with blood lead levels as low as 50 µg/dl is manifested by slowing of motor nerve conduction velocity often without clinical symptoms. With progression of the neuropathy there is development of painless extensor muscle weakness usually involving the extensor muscles of the fingers and hand in the most

active upper extremity, followed in severe cases by wrist drop or, much less commonly, foot drop.

In addition to slowing of nerve conduction, electromyographical studies in patients with blood lead levels greater than 50 µg/dl have demonstrated a decrease in the number of acting motor unit potentials, an increase in the duration of motor unit potentials, and spontaneous pathological activity including fibrillations and fasciculations. Whether these effects occur at levels of 40 µg/dl is undetermined.

While the peripheral neuropathies can occasionally be reversed with therapy, again such recovery is not assured particularly in the more severe neuropathies and often improvement is only partial. The lack of reversibility is felt to be due in part to segmental demyelination.

(c) Gastrointestinal. Lead may also affect the gastrointestinal system producing abdominal colic or diffuse abdominal pain, constipation, obstipation, diarrhea, anorexia, nausea and vomiting. Lead colic rarely develops at blood lead levels below 80 µg/dl.

(d) Renal. Renal toxicity represents one of the most serious health effects of lead poisoning. In the early stages of disease nuclear inclusion bodies can frequently be identified in proximal renal tubular cells. Renal function remains normal and the changes in this stage are probably reversible. With more advanced disease there is progressive interstitial fibrosis and impaired renal function. Eventually extensive interstitial fibrosis ensues with sclerotic glomeruli and dilated and atrophied proximal tubules; all represent end stage kidney disease. Azotemia can be progressive, eventually resulting in frank uremia necessitating dialysis. There is occasionally associated hypertension and hyperuricemia with or without gout.

Early kidney disease is difficult to detect. The urinalysis is normal in early lead nephropathy and the blood urea nitrogen and serum creatinine increase only when two-thirds of kidney function is lost. Measurement of creatinine clearance can often detect earlier disease as can other methods of measurement of glomerular filtration rate. An abnormal Ca-EDTA mobilization test has been used to differentiate between lead-induced and other nephropathies, but this procedure is not widely accepted. A form of Fanconi syndrome with aminoaciduria, glycosuria, and hyperphosphaturia indicating severe injury to the proximal renal tubules is occasionally seen in children.

(e) Reproductive effects. Exposure to lead can have serious effects on reproductive function in both males and females. In male workers exposed to lead there can be a decrease in sexual drive, impotence, decreased ability to produce healthy sperm, and sterility. Malformed sperm (teratospermia), decreased number of sperm (hypospermia), and sperm with decreased motility (asthenospermia) can all occur. Teratospermia has been noted at mean blood lead levels of 53 µg/dl and hypospermia and asthenospermia at 41 µg/dl. Furthermore, there appears to be a dose-response relationship for teratospermia in lead exposed workers.

Women exposed to lead may experience menstrual disturbances including dysmenorrhea, menorrhagia and amenorrhea. Following exposure to lead, women have a higher frequency of sterility, premature births, spontaneous miscarriages, and stillbirths.

Germ cells can be affected by lead and cause genetic damage in the egg or sperm cells before conception and result in failure to implant, miscarriage, stillbirth, or birth defects.

Infants of mothers with lead poisoning have a higher mortality during the first year and suffer from lowered birth weights, slower growth, and nervous system disorders.

Lead can pass through the placental barrier and lead levels in the mother's blood are comparable to concentrations of lead in the umbilical cord at birth. Transplacental passage becomes detectable at 12-14 weeks of gestation and increases until birth.

There is little direct data on damage to the fetus from exposure to lead but it is generally assumed that the fetus and newborn would be at least as susceptible to neurological damage as young children. Blood lead levels of 50-60 µg/dl in children can cause significant neurobehavioral impairments and there is evidence of hyperactivity at blood levels as low as 25 µg/dl. Given the overall body of literature concerning the adverse health effects of lead in children, WISHA feels that the blood lead level in children should be maintained below 30 µg/dl with a population mean of 15 µg/dl. Blood lead levels in the fetus and newborn likewise should not exceed 30 µg/dl.

Because of lead's ability to pass through the placental barrier and also because of the demonstrated adverse effects of lead on reproductive function in both the male and female as well as the risk of genetic damage of lead on both the ovum and sperm, WISHA recommends a 30 µg/dl maximum permissible blood lead level in both males and females who wish to bear children.

(f) Other toxic effects. Debate and research continue on the effects of lead on the human body. Hypertension has frequently been noted in occupationally exposed individuals although it is difficult to assess whether this is due to lead's adverse effects on the kidney or if some other mechanism is involved. Vascular and electrocardiographic changes have been detected but have not been well characterized. Lead is thought to impair thyroid function and interfere with the pituitary-adrenal axis, but again these effects have not been well defined.

(4) Medical evaluation.

The most important principle in evaluating a worker for any occupational disease including lead poisoning is a high index of suspicion on the part of the examining physician. As discussed in section (3), lead can affect numerous organ systems and produce a wide array of signs and symptoms, most of which are non-specific and subtle in nature at least in the early stages of disease. Unless serious concern for lead toxicity is present, many of the early clues to diagnosis may easily be overlooked.

The crucial initial step in the medical evaluation is recognizing that a worker's employment can result in exposure to lead. The worker will frequently be able to define exposures to lead and lead containing materials but often will not volunteer this information unless specifically asked. In other situations the worker may not know of any exposures to lead but the suspicion might be raised on the part of the physician because of the industry or occupation of the worker. Potential occupational exposure to lead and its compounds occur in many occupations in the construction industry, including

demolition and salvaging operations, removal or encapsulation of materials containing lead, construction, alteration, repair or renovation of structures containing lead, transportation, disposal, storage or containment of lead or lead-containing materials on construction sites, and maintenance operations associated with construction activities.

Once the possibility for lead exposure is raised, the focus can then be directed toward eliciting information from the medical history, physical exam, and finally from laboratory data to evaluate the worker for potential lead toxicity.

A complete and detailed work history is important in the initial evaluation. A listing of all previous employment with information on job description, exposure to fumes or dust, known exposures to lead or other toxic substances, a description of any personal protective equipment used, and previous medical surveillance should all be included in the worker's record. Where exposure to lead is suspected, information concerning on-the-job personal hygiene, smoking or eating habits in work areas, laundry procedures, and use of any protective clothing or respiratory protection equipment should be noted. A complete work history is essential in the medical evaluation of a worker with suspected lead toxicity, especially when long term effects such as neurotoxicity and nephrotoxicity are considered.

The medical history is also of fundamental importance and should include a listing of all past and current medical conditions, current medications including proprietary drug intake, previous surgeries and hospitalizations, allergies, smoking history, alcohol consumption, and also non-occupational lead exposures such as hobbies (hunting, riflery). Also known childhood exposures should be elicited. Any previous history of hematological, neurological, gastrointestinal, renal, psychological, gynecological, genetic, or reproductive problems should be specifically noted.

A careful and complete review of systems must be performed to assess both recognized complaints and subtle or slowly acquired symptoms which the worker might not appreciate as being significant. The review of symptoms should include the following:

- ◆ General—weight loss, fatigue, decreased appetite.
- ◆ Head, eyes, ears, nose, throat (HEENT)—headaches, visual disturbances or decreased visual acuity, hearing deficits or tinnitus, pigmentation of the oral mucosa, or metallic taste in mouth.
- ◆ Cardio-pulmonary—shortness of breath, cough, chest pains, palpitations, or orthopnea.
- ◆ Gastrointestinal—nausea, vomiting, heartburn, abdominal pain, constipation or diarrhea.
- ◆ Neurologic—irritability, insomnia, weakness (fatigue), dizziness, loss of memory, confusion, hallucinations, incoordination, ataxia, decreased strength in hands or feet, disturbances in gait, difficulty in climbing stairs, or seizures.
- ◆ Hematologic—pallor, easy fatigability, abnormal blood loss, melena.
- ◆ Reproductive (male and female and spouse where relevant)—history of infertility, impotence, loss of libido, abnormal menstrual periods, history of miscarriages, stillbirths, or children with birth defects.
- ◆ Musculo-skeletal—muscle and joint pains.

The physical examination should emphasize the neurological, gastrointestinal, and cardiovascular systems. The

worker's weight and blood pressure should be recorded and the oral mucosa checked for pigmentation characteristic of a possible Burtonian or lead line on the gingiva. It should be noted, however, that the lead line may not be present even in severe lead poisoning if good oral hygiene is practiced.

The presence of pallor on skin examination may indicate an anemia which, if severe, might also be associated with a tachycardia. If an anemia is suspected, an active search for blood loss should be undertaken including potential blood loss through the gastrointestinal tract.

A complete neurological examination should include an adequate mental status evaluation including a search for behavioral and psychological disturbances, memory testing, evaluation for irritability, insomnia, hallucinations, and mental clouding. Gait and coordination should be examined along with close observation for tremor. A detailed evaluation of peripheral nerve function including careful sensory and motor function testing is warranted. Strength testing particularly of extensor muscle groups of all extremities is of fundamental importance.

Cranial nerve evaluation should also be included in the routine examination.

The abdominal examination should include auscultation for bowel sounds and abdominal bruits and palpation for organomegaly, masses, and diffuse abdominal tenderness.

Cardiovascular examination should evaluate possible early signs of congestive heart failure. Pulmonary status should be addressed particularly if respirator protection is contemplated.

As part of the medical evaluation, the lead standard requires the following laboratory studies:

- ◆ Blood lead level.
- ◆ Hemoglobin and hematocrit determinations, red cell indices, and examination of the peripheral blood smear to evaluate red blood cell morphology.
- ◆ Blood urea nitrogen.
- ◆ Serum creatinine.
- ◆ Routine urinalysis with microscopic examination.
- ◆ A zinc protoporphyrin level.

In addition to the above, the physician is authorized to order any further laboratory or other tests which they deem necessary in accordance with sound medical practice. The evaluation must also include pregnancy testing or laboratory evaluation of male fertility if requested by the employee. Additional tests which are probably not warranted on a routine basis but may be appropriate when blood lead and ZPP levels are equivocal include delta aminolevulinic acid and coproporphyrin concentrations in the urine, and dark-field illumination for detection of basophilic stippling in red blood cells.

If an anemia is detected further studies including a careful examination of the peripheral smear, reticulocyte count, stool for occult blood, serum iron, total iron binding capacity, bilirubin, and, if appropriate, vitamin B12 and folate may be of value in attempting to identify the cause of the anemia.

If a peripheral neuropathy is suspected, nerve conduction studies are warranted both for diagnosis and as a basis to monitor any therapy.

If renal disease is questioned, a 24 hour urine collection for creatinine clearance, protein, and electrolytes may be

indicated. Elevated uric acid levels may result from lead-induced renal disease and a serum uric acid level might be performed.

An electrocardiogram and chest x-ray may be obtained as deemed appropriate.

Sophisticated and highly specialized testing should not be done routinely and where indicated should be under the direction of a specialist.

(5) Laboratory evaluation.

The blood lead level at present remains the single most important test to monitor lead exposure and is the test used in the medical surveillance program under the lead standard to guide employee medical removal. The ZPP has several advantages over the blood lead level. Because of its relatively recent development and the lack of extensive data concerning its interpretation, the ZPP currently remains an ancillary test.

This section will discuss the blood lead level and ZPP in detail and will outline their relative advantages and disadvantages. Other blood tests currently available to evaluate lead exposure will also be reviewed.

The blood lead level is a good index of current or recent lead absorption when there is no anemia present and when the worker has not taken any chelating agents. However, blood lead levels along with urinary lead levels do not necessarily indicate the total body burden of lead and are not adequate measures of past exposure. One reason for this is that lead has a high affinity for bone and up to 90% of the body's total lead is deposited there. A very important component of the total lead body burden is lead in soft tissue (liver, kidney, and brain). This fraction of the lead body burden, the biologically active lead, is not entirely reflected by blood lead levels since it is a function of the dynamics of lead absorption, distribution, deposition in bone and excretion. Following discontinuation of exposure to lead, the excess body burden is only slowly mobilized from bone and other relatively stable body stores and excreted. Consequently, a high blood lead level may only represent recent heavy exposure to lead without a significant total body excess and likewise a low blood lead level does not exclude an elevated total body burden of lead.

Also due to its correlation with recent exposures, the blood lead level may vary considerably over short time intervals.

To minimize laboratory error and erroneous results due to contamination, blood specimens must be carefully collected after thorough cleaning of the skin with appropriate methods using lead-free blood containers and analyzed by a reliable laboratory. Under the standard, samples must be analyzed in laboratories which are approved by OSHA. Analysis is to be made using atomic absorption spectrophotometry, anodic stripping voltammetry or any method which meets the accuracy requirements set forth by the standard.

The determination of lead in urine is generally considered a less reliable monitoring technique than analysis of whole blood primarily due to individual variability in urinary excretion capacity as well as the technical difficulty of obtaining accurate 24 hour urine collections. In addition, workers with renal insufficiency, whether due to lead or some other cause, may have decreased lead clearance and consequently urine lead levels may underestimate the true lead bur-

den. Therefore, urine lead levels should not be used as a routine test.

The zinc protoporphyrin test, unlike the blood lead determination, measures an adverse metabolic effect of lead and as such is a better indicator of lead toxicity than the level of blood lead itself. The level of ZPP reflects lead absorption over the preceding 3 to 4 months, and therefore is a better indicator of lead body burden. The ZPP requires more time than the blood lead to read significantly elevated levels; the return to normal after discontinuing lead exposure is also slower. Furthermore, the ZPP test is simpler, faster, and less expensive to perform and no contamination is possible. Many investigators believe it is the most reliable means of monitoring chronic lead absorption.

Zinc protoporphyrin results from the inhibition of the enzyme ferrochelatase which catalyzes the insertion of an iron molecule into the protoporphyrin molecule, which then becomes heme. If iron is not inserted into the molecule then zinc, having a greater affinity for protoporphyrin, takes the place of the iron, forming ZPP.

An elevation in the level of circulating ZPP may occur at blood lead levels as low as 20-30 $\mu\text{g}/\text{dl}$ in some workers. Once the blood lead level has reached 40 $\mu\text{g}/\text{dl}$ there is more marked rise in the ZPP value from its normal range of less than 100 $\mu\text{g}/\text{dl}$ 100 ml. Increases in blood lead levels beyond 40 $\mu\text{g}/100\text{ g}$ are associated with exponential increases in ZPP.

Whereas blood lead levels fluctuate over short time spans, ZPP levels remain relatively stable. ZPP is measured directly in red blood cells and is present for the cell's entire 120 day life-span. Therefore, the ZPP level in blood reflects the average ZPP production over the previous 3-4 months and consequently the average lead exposure during that time interval.

It is recommended that a hematocrit be determined whenever a confirmed ZPP of 50 $\mu\text{g}/100\text{ ml}$ whole blood is obtained to rule out a significant underlying anemia. If the ZPP is in excess of 100 $\mu\text{g}/100\text{ ml}$ and not associated with abnormal elevations in blood lead levels, the laboratory should be checked to be sure that blood leads were determined using atomic absorption spectrophotometry anodic stripping voltammetry, or any method which meets the accuracy requirements set forth by the standard by an OSHA approved laboratory which is experienced in lead level determinations. Repeat periodic blood lead studies should be obtained in all individuals with elevated ZPP levels to be certain that an associated elevated blood lead level has not been missed due to transient fluctuations in blood leads.

ZPP has a characteristic fluorescence spectrum with a peak at 594 nm which is detectable with a hematofluorimeter. The hematofluorimeter is accurate and portable and can provide on-site, instantaneous results for workers who can be frequently tested via a finger prick.

Careful attention must be given to calibration and quality control procedures. Limited data on blood lead-ZPP correlations and the ZPP levels which are associated with the adverse health effects discussed in subsection (3) are the major limitations of the test. Also it is difficult to correlate ZPP levels with environmental exposure and there is some variation of response with age and sex. Nevertheless, the ZPP

promises to be an important diagnostic test for the early detection of lead toxicity and its value will increase as more data is collected regarding its relationship to other manifestations of lead poisoning.

Levels of delta-aminolevulinic acid (ALA) in the urine are also used as a measure of lead exposure. Increasing concentrations of ALA are believed to result from the inhibition of the enzyme delta-aminolevulinic acid dehydrase (ALA-D). Although the test is relatively easy to perform, inexpensive, and rapid, the disadvantages include variability in results, the necessity to collect a complete 24 hour urine sample which has a specific gravity greater than 1.010, and also the fact that ALA decomposes in the presence of light.

The pattern of porphyrin excretion in the urine can also be helpful in identifying lead intoxication. With lead poisoning, the urine concentrations of coproporphyrins I and II, porphobilinogen and uroporphyrin I rise. The most important increase, however, is that of coproporphyrin III; levels may exceed 5,000 $\mu\text{g}/\text{l}$ in the urine in lead poisoned individuals, but its correlation with blood lead levels and ZPP are not as good as those of ALA. Increases in urinary porphyrins are not diagnostic of lead toxicity and may be seen in porphyria, some liver diseases, and in patients with high reticulocyte counts.

Summary. The Washington Industrial Safety and Health Act's standard for inorganic lead in the construction industry places significant emphasis on the medical surveillance of all workers exposed to levels of inorganic lead above 30 $\mu\text{g}/\text{m}^3$ TWA. The physician has a fundamental role in this surveillance program, and in the operation of the medical removal protection program.

Even with adequate worker education on the adverse health effects of lead and appropriate training in work practices, personal hygiene and other control measures, the physician has a primary responsibility for evaluating potential lead toxicity in the worker. It is only through a careful and detailed medical and work history, a complete physical examination and appropriate laboratory testing that an accurate assessment can be made. Many of the adverse health effects of lead toxicity are either irreversible or only partially reversible and therefore early detection of disease is very important.

This document outlines the medical monitoring program as defined by the occupational safety and health standard for inorganic lead. It reviews the adverse health effects of lead poisoning and describes the important elements of the history and physical examinations as they relate to these adverse effects. Finally, the appropriate laboratory testing for evaluating lead exposure and toxicity is presented.

It is hoped that this review and discussion will give the physician a better understanding of the WISHA standard with the ultimate goal of protecting the health and well-being of the worker exposed to lead under their care.

[Statutory Authority: Chapter 49.17 RCW. 93-22-054 (Order 93-07), § 296-155-17654, filed 10/29/93, effective 12/10/93.]

PART B-2 HAZARD COMMUNICATION

WAC 296-155-180 Hazard communication. General.

The employer shall develop and maintain a hazard communication program as required by chapter 296-62 WAC, Part C, which will provide information to all employees relative to hazardous chemicals or substances to which they are exposed, or may become exposed, in the course of their employment.

[Statutory Authority: Chapter 49.17 RCW. 94-16-145, § 296-155-180, filed 8/3/94, effective 9/12/94; 89-11-035 (Order 89-03), § 296-155-180, filed 5/15/89, effective 6/30/89.]

PART C PERSONAL PROTECTIVE AND LIFE SAVING EQUIPMENT

WAC 296-155-200 General requirements. (1) Application.

(a) Protective equipment, including personal protective equipment for eyes, face, head, hearing, and extremities, protective clothing, respiratory devices, and protective shields and barriers, shall be used, and maintained in a sanitary and reliable condition wherever it is necessary by reason of hazards of processes or environment, chemical hazards, radiological hazards, or mechanical irritants encountered in a manner capable of causing injury or impairment in the function of any part of the body through absorption, inhalation or physical contact.

(b) Employee owned equipment. Where employees provide their own protective equipment, the employer shall be responsible to assure its adequacy, including proper maintenance and sanitation of such equipment.

(c) Design. All personal protective equipment shall be of safe design and construction for the work to be performed.

(2) Construction personnel shall comply with plant or job safety practices and procedures, peculiar to particular industries and plants, relating to protective equipment and procedures when engaged in construction work in such plants or job sites.

(3) The employer is responsible for requiring the wearing of appropriate personal protective equipment in all operations where there is an exposure to hazardous conditions or where this part indicates a need for using such equipment to reduce the hazards to the employees.

(4) Where there is a danger of contact with moving parts of machinery, or the work process is such that a hazard exists:

(a) The clothing of employees shall fit closely about the body.

(b) Dangling neck wear, bracelets, wristwatches, rings, or similar articles shall not be worn by employees.

(5) Employees, whose duties are performed in areas and under circumstances where they are exposed to the danger of moving vehicles, shall wear work vests of highly visible materials, or equivalent distinguishing apparel.

(6) Employers shall ensure that employees wear no less than a short sleeved shirt, long pants, and shoes. Employees shall wear no less than a short sleeved shirt, long pants, and shoes. Shoes shall meet the requirements of WAC 296-155-212.

Note: For additional personal protective and life saving equipment requirements, refer to the general safety and health standards, WAC 296-24-075 through 296-24-092.

(2001 Ed.)

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-200, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-200, filed 1/21/86; Order 76-29, § 296-155-200, filed 9/30/76; Order 74-26, § 296-155-200, filed 5/7/74, effective 6/6/74.]

WAC 296-155-201 Definitions applicable to this chapter. (1) "Catenary life line" means a horizontal rope between two fixed anchorages, independent of the work surface, to which the lanyard is attached, either by tying or by means of a sliding connection. A catenary life line shall be capable of supporting a minimum dead weight of 5,400 pounds per person, applied at the midpoint of the line.

(2) "Contaminant" means any material which by reason of its action upon, within, or to a person or object is likely to cause physical harm.

(3) "Dropline" means a vertical rope from a fixed anchorage, independent of the work surface, to which the lanyard is affixed or tied.

(4) "Fixed anchorage" means a secure point of attachment, not a part of the work surface, for droplines, lifelines, catenary life lines, or lanyards. The fixed anchorage and its appurtenances shall be capable of supporting a minimum dead weight of 5,400 pounds per worker.

(5) "Lanyard" means a rope, suitable for supporting one person. One end is fastened to a safety belt or harness and the other end is secured to a substantial object or a safety line.

(6) "Lifeline" means a rope, suitable for supporting one person, to which a lanyard or safety belt (or harness) is attached.

(7) "O.D." means optical density and refers to the light refractive characteristics of a lens.

(8) "Radiant energy" means energy that travels outward in all directions from its source.

(9) "Safety belt" means a device, usually worn around the waist which, by reason of its attachment to a lanyard and lifeline or a structure, will prevent a worker from falling.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-201, filed 1/21/86; Order 76-6, § 296-155-201, filed 3/1/76.]

WAC 296-155-203 Confined spaces. All work conducted in a confined space shall comply with the provisions of chapter 296-62 WAC Part M, and the following sections.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-203, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-203, filed 1/21/86.]

WAC 296-155-20301 Definitions. Confined space means a space that:

(1) Is large enough and so configured that an employee can bodily enter and perform assigned work; and

(2) Has limited or restricted means for entry or exit (for example, tanks, vessels, silos, storage bins, hoppers, vaults, and pits are spaces that may have limited means of entry); and

(3) Is not designed for continuous employee occupancy.

"Corrosives" means substances which in contact with living tissue cause destruction of the tissue by chemical action.

[Title 296 WAC—p. 2271]

"Hazardous atmosphere" means an atmosphere that may expose employees to the risk of death, incapacitation, impairment of ability to self-rescue (that is, escape unaided from a permit space), injury, or acute illness from one or more of the following causes:

- (1) Flammable gas, vapor, or mist in excess of ten percent of its lower flammable limit (LFL);
- (2) Airborne combustible dust at a concentration that meets or exceeds its LFL;

Note: This concentration may be approximated as a condition in which the dust obscures vision at a distance of five feet (1.52m) or less.

(3) Atmospheric oxygen concentration below 19.5 percent or above 23.5 percent;

(4) Atmospheric concentration of any substance for which a dose or a permissible exposure limit is published in chapter 296-62 WAC, general occupational health standards, and which could result in employee exposure in excess of its dose or permissible exposure limit;

Note: An atmospheric concentration of any substance that is not capable of causing death, incapacitation, impairment of ability to self-rescue, injury, or acute illness due to its health effects is not covered by this provision.

(5) Any other atmospheric condition that is immediately dangerous to life or health.

Note: For air contaminants for which WISHA has not determined a dose or permissible exposure limit, other sources of information, such as material safety data sheets that comply with the Hazard Communication Standard, chapter 296-62 WAC, Part C, published information, and internal documents can provide guidance in establishing acceptable atmospheric conditions.

"Irritants" means substances which on immediate, prolonged, or repeated contact with normal living tissue will induce a local inflammatory reaction.

"Oxygen deficient atmospheres" means atmospheres at sea level having less than 19.5% oxygen by volume or having a partial pressure of 148 millimeters of mercury or less. This may deviate when working at higher altitudes and should be determined for an individual location. Factors such as acclimatization, physical condition of persons involved, etc., must be considered for such circumstances and conditions. (See chapter 296-62 WAC, Part M, permit-required confined spaces.)

"Toxicants" means substances which have the inherent capacity to produce personal injury or illness to persons by absorption through any body surface.

[Statutory Authority: RCW 49.17.040, [49.17].050 and [49.17].060. 95-17-036, § 296-155-20301, filed 8/9/95, effective 9/25/95. Statutory Authority: Chapter 49.17 RCW. 95-04-007, § 296-155-20301, filed 1/18/95, effective 3/1/95; 91-24-017 (Order 91-07), § 296-155-20301, filed 11/22/91, effective 12/24/91. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-20301, filed 1/21/86.]

WAC 296-155-20307 Confined space work on sewer systems under construction. New systems under construction or new installations which have not yet been connected to a used system, may substitute forced ventilation for the testing requirements of chapter 296-62 WAC Part M provided:

(1) Ventilation is effectively provided at least five minutes prior to entry into the confined space;

(2) Ventilation is provided, as required by WAC 296-62-110, et seq., which supplies a continuous flow of air;

(3) Ventilation exhaust is discharged so as to present no hazard to other employees;

(4) An attendant is provided at the surface when there are employees in the manhole or pipe. The attendant shall not leave the manhole unattended until such time as all employees are out and the cover has been replaced; and

(5) All other requirements for confined spaces are observed. See chapter 296-62 WAC Part M.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-20307, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-20307, filed 1/21/86.]

WAC 296-155-205 Head protection. (1) All employees on any construction site shall be provided an individual hard hat which meets all requirements of (a) and (b) of this subsection. Employers shall provide individual hard hats at no cost to the employees.

(a) Hard hats for the protection of employees against impact and/or penetration of falling and flying objects shall meet the specifications contained in American National Standards Institute, Z89.1-1969, Safety Requirements for Industrial Head Protection.

(b) Hard hats for the head protection of employees exposed to high voltage electrical shock and burns shall meet the specifications contained in American National Standards Institute, Z89.2-1971.

(2) All employees must have their individual hard hats on site and readily available at all times.

(3) All employees shall wear a hard hat on any construction site whenever there is a potential exposure to danger of flying or falling objects to persons working or occupying the area.

Note: The hard hat may be removed whenever there is no potential exposure to a hazard.

(4) Employees working on asphalt paving crews when they are exposed to extreme temperatures from hot mix and when they are not exposed to falling objects need not wear protective hard hats. Flaggers working in conjunction with asphalt paving operations shall wear protective hard hats.

(5) Caps with metal buttons or metal visors shall not be worn around electrical hazards.

(6) Employees working near moving machinery or in locations which present a hair-catching or fire hazard shall wear caps, nets or other head and face protection that will completely contain the hair.

[Statutory Authority: Chapter 49.17 RCW. 91-11-070 (Order 91-01), § 296-155-205, filed 5/20/91, effective 6/20/91; 89-11-035 (Order 89-03), § 296-155-205, filed 5/15/89, effective 6/30/89. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-205, filed 1/21/86; Order 74-26, § 296-155-205, filed 5/7/74, effective 6/6/74.]

WAC 296-155-210 Hearing protection. The hearing protection requirements of the general occupational health standards, chapter 296-62 WAC, shall apply.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 83-24-013 (Order 83-34), § 296-155-210, filed 11/30/83; Order 74-26, § 296-155-210, filed 5/7/74, effective 6/6/74.]

WAC 296-155-211 Leg protection. Employees whose duties require them to operate a power chain saw shall wear flexible ballistic nylon pads, sewn or otherwise fastened into the trousers, or other equivalent protection that will protect the vulnerable areas of the legs.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-211, filed 1/21/86.]

WAC 296-155-212 Foot protection. (1) Substantial footwear, made of leather or other equally firm material, shall be worn by employees in any occupation in which there is a danger of injury to the feet through falling or moving objects, or from burning, scalding, cutting, penetration, or like hazard.

(a) The soles and heels of such footwear shall be of a material that will not create a slipping hazard.

(b) Shoes made of leather or other firm materials that have soft athletic-type soles which would protect employees from foot injuries and at the same time, provide soft and firm footing while working under specialty requirements or with specialty materials are acceptable if meeting safety shoe requirements established by OSHA or ANSI.

(c) Footwear that has deteriorated to a point where it does not provide the required protection shall not be used.

(2) Calks or other suitable footwear, which will afford reasonable protection from slipping, shall be worn while working on logs, poles, pilings, or similar forest products.

(3) Traditional tennis shoes, shoes with canvas tops, or thin or soft soled athletic shoes, open toed sandals, slippers, dress shoes or other similar type shoes shall not be worn. Soft or athletic-type soles with uppers of leather or other substantial material may be used where firm footing is desired and where minimal danger of injury to feet from falling or moving objects.

(4) Safety-toe footwear for employees shall meet the requirements and specifications in American National Standard for Men's Safety-Toe Footwear, Z41.1-1967.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-212, filed 7/20/94, effective 9/20/94; 89-11-035 (Order 89-03), § 296-155-212, filed 5/15/89, effective 6/30/89. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-212, filed 1/21/86; Order 74-26, § 296-155-212, filed 5/7/74, effective 6/6/74.]

WAC 296-155-215 Eye and face protection. (1) General.

(a) Employees shall use eye and face protection equipment when machines or operations present potential eye or face injury from physical, chemical, or radiation agents.

(b) Eye and face protection equipment required by this part shall meet the requirements specified in American National Standards Institute, Z87.1-1968, Practice for Occupational and Educational Eye and Face Protection.

(c) Employees whose vision requires the use of corrective lenses in spectacles, when required by this regulation to wear eye protection, shall be protected by goggles or spectacles of one of the following types:

(i) Spectacles whose protective lenses provide optical correction;

(2001 Ed.)

(ii) Goggles that can be worn over corrective spectacles without disturbing the adjustment of the spectacles.

(iii) Goggles that incorporate corrective lenses mounted behind the protective lenses.

(d) Face and eye protection equipment shall be kept clean and in good repair. The use of this type equipment with structural or optical defects shall be prohibited.

(e) Table C-1 shall be used as a guide in the selection of face and eye protection for the hazards and operations noted.

(f) Protectors shall meet the following minimum requirements:

(i) They shall provide adequate protection against the particular hazards for which they are designed.

(ii) They shall be reasonably comfortable when worn under the designated conditions.

(iii) They shall fit snugly and shall not unduly interfere with the movements of the wearer.

(iv) They shall be durable.

(v) They shall be capable of being disinfected.

(vi) They shall be easily cleanable.

(g) Every protector shall be distinctly marked to facilitate identification only of the manufacturer.

(h) When limitations or precautions are indicated by the manufacturer, they shall be transmitted to the user and care taken to see that such limitations and precautions are strictly observed.

- 8A. CHIPPING GOGGLES, coverspec type, clear safety lenses (not illustrated)
- **9. WELDING GOGGLES, coverspec type, tinted plate lens
10. FACE SHIELD (available with plastic or mesh window)
11. WELDING HELMETS

* Nonside shield spectacles are available for limited hazard use requiring only frontal protection.

** See Table C-2 in (2) of this section, Filter lens shade numbers for protection against radiant energy.

APPLICATIONS		
OPERATION	HAZARDS	RECOMMENDED PROTECTORS: Underscored Numbers Signify Preferred Protection
ACETYLENE-BURNING	SPARKS, HARMFUL RAYS, MOLTEN	
ACETYLENE-CUTTING	METAL, FLYING PARTICLES	<u>7</u> , <u>8</u> , <u>9</u>
ACETYLENE-WELDING		
CHEMICAL HANDLING	SPLASH, ACID BURNS, FUMES	<u>2</u> , <u>10</u> (for severe exposure add <u>10</u> over <u>2</u>)
CHIPPING	FLYING PARTICLES	<u>1</u> , <u>3</u> , <u>4</u> , <u>5</u> , <u>6</u> , <u>7A</u> , <u>8A</u>
ELECTRIC (ARC) WELDING	SPARKS, INTENSE RAYS, MOLTEN METAL	<u>9</u> , <u>11</u> (<u>11</u> in combination with <u>4</u> , <u>5</u> , <u>6</u> , in tinted lenses, advisable)
FURNACE OPERATIONS	GLARE, HEAT, MOLTEN METAL	<u>7</u> , <u>8</u> , <u>9</u> (for severe exposure add <u>10</u>)
GRINDING-LIGHT	FLYING PARTICLES	<u>1</u> , <u>3</u> , <u>4</u> , <u>5</u> , <u>6</u> , <u>10</u>
GRINDING-HEAVY	FLYING PARTICLES	<u>1</u> , <u>3</u> , <u>7A</u> , <u>8A</u> (for severe exposure add <u>10</u>)
LABORATORY	CHEMICAL SPLASH, GLASS BREAKAGE	<u>2</u> (10 when in combination with <u>4</u> , <u>5</u> , <u>6</u>)
MACHINING	FLYING PARTICLES	<u>1</u> , <u>3</u> , <u>4</u> , <u>5</u> , <u>6</u> , <u>10</u>
MOLTEN METALS	HEAT, GLARE, SPARKS, SPLASH	<u>7</u> , <u>8</u> (<u>10</u> in combination with <u>4</u> , <u>5</u> , <u>6</u> , in tinted lenses)
SPOT WELDING	FLYING PARTICLES, SPARKS	<u>1</u> , <u>3</u> , <u>4</u> , <u>5</u> , <u>6</u> , <u>10</u>

(2) Protection against radiant energy. (a) Selection of shade numbers for welding filter. Table C-2 shall be used as a guide for the selection of the proper shade numbers of filter lenses or plates used in welding. Shades more dense than those listed may be used to suit the individual's needs.

TABLE C-2
FILTER LENS SHADE NUMBERS FOR PROTECTION AGAINST RADIANT ENERGY

Welding Operation	Shade number
Shielded metal-arc welding 1/16-, 3/32-, 1/8-, 5/32-inch diameter electrodes	10
Gas-shielded arc welding (nonferrous) 1/16-, 3/32-, 1/8-, 5/32-inch diameter electrodes	11
Gas-shielded arc welding (ferrous) 1/16-, 3/32-, 1/8-, 5/32-inch diameter electrodes	12
Shielded metal-arc welding 3/16-, 7/32-, 1/4-inch diameter electrodes	12
5/16-, 3/8-inch diameter electrodes	14
Atomic hydrogen welding	10-14
Carbon-arc welding	14
Soldering	2
Torch brazing	3 or 4
Light cutting, up to 1 inch	3 or 4
Medium cutting, 1 inch to 6 inches	4 or 5
Heavy cutting, over 6 inches	5 or 6
Gas welding (light), up to 1/8-inch	4 or 5
Gas welding (medium), 1/8-inch to 1/2-inch	5 or 6
Gas welding (heavy), over 1/2-inch	6 or 9

(b) Laser protection.

(i) Employees whose occupation or assignment requires potentially hazardous exposure (see WAC 296-62-09005(4)) to laser radiation shall wear suitable laser safety goggles which will protect for the specific wavelength of the laser and be of optical density (O.D.) adequate for the energy involved. Table C-3 lists the maximum power or energy density for which adequate protection is afforded by glasses of optical densities from 5 through 8.

TABLE C-3

SELECTING LASER SAFETY GLASS		
INTENSITY	ATTENUATION	
CW maximum power density (watts/cm ²)	Optical density (O.D.)	Attenuation factor
10 ⁻²	5	10 ⁵
10 ⁻¹	6	10 ⁶
1.0	7	10 ⁷
10.0	8	10 ⁸

Output levels falling between lines in this table shall require the higher optical density.

(ii) All protective goggles shall bear a label identifying the following data:

- (a) The laser wavelengths for which use is intended;
- (b) The optical density of those wavelengths.
- (c) The visible light transmission.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-215, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 85-01-022 (Order 84-24), § 296-155-215, filed 12/11/84; Order 74-26, § 296-155-215, filed 5/7/74, effective 6/6/74.]

WAC 296-155-220 Respiratory protection. The respiratory protection requirements applicable to construction work under this section are identical to those set forth in chapter 296-62 WAC, Part E.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-10-071, § 296-155-220, filed 5/4/99, effective 9/1/99. Statutory Authority: RCW 49.17.040 and 49.17.050. 83-15-017 (Order 83-19), § 296-155-220, filed 7/13/83, effective 9/12/83; Order 74-26, § 296-155-220, filed 5/7/74, effective 6/6/74.]

WAC 296-155-235 Working over or adjacent to water. (1) When an employee is employed under conditions which expose them to a risk of drowning, they shall wear a U.S. Coast Guard approved life saving device, unless it can be shown that conditions, such as shallow water, are such that flotation would not be achieved.

(2) Prior to and after each use, the buoyant life saving device shall be inspected for defects which would alter their strength or buoyancy. Defective units shall not be used.

(3) Ring buoys with at least 90 feet of line shall be provided and readily available for emergency rescue operations. Distance between ring buoys shall not exceed 200 feet.

(4) At least one lifesaving skiff shall be immediately available at locations where employees are working over or adjacent to water. Each skiff, or skiffs, shall:

- (a) Be suitable for conditions where used.
- (b) Be equipped with oar locks securely attached to gunwales, oars, one boat hook, and one cork ring buoy with fifty feet of suitable line attached.

(5) Whenever boats or skiffs cannot be used, due to swift currents, life lines close to the water surface shall be provided and, wherever practicable, a line shall be stretched across the stream with tag lines.

(6) Where workers are transported by boat or barge, only such number of persons shall be carried that can be safely accommodated on fixed seats. Capacity showing number of persons shall be plainly marked on vessel.

(7) All workers shall be provided with a U.S. Coast Guard approved buoyant life saving device while transported

in open boats and/or barges, and where deemed necessary by the department, workers shall wear same while in transport.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-235, filed 7/20/94, effective 9/20/94; Order 74-26, § 296-155-235, filed 5/7/74, effective 6/6/74.]

WAC 296-155-240 Sterilization of protective equipment. Goggles, gloves, respirators and other protectors shall not be interchanged among employees for use unless they have been thoroughly cleaned since last use.

[Order 74-26, § 296-155-240, filed 5/7/74, effective 6/6/74.]

PART C-1

FALL RESTRAINT AND FALL ARREST

WAC 296-155-245 Reserve.

[Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-24-051, § 296-155-245, filed 11/27/96, effective 2/1/97. Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-245, filed 4/25/95, effective 10/1/95.]

WAC 296-155-24501 Scope and application. This section sets forth requirements for employers to provide and enforce the use of fall protection for employees in construction, alteration, repair, maintenance (including painting and decorating), demolition workplaces, and material handling covered under chapter 296-155 WAC.

Note: See Appendix B for additional standards that require the use of fall restraint and/or fall arrest protection.

[Statutory Authority: RCW 49.17.010, [49.17.]040, and [49.17.]050. 00-14-058, § 296-155-24501, filed 7/3/00, effective 10/1/00. Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-24-051, § 296-155-24501, filed 11/27/96, effective 2/1/97. Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-24501, filed 4/25/95, effective 10/1/95; 91-03-044 (Order 90-18), § 296-155-24501, filed 1/10/91, effective 2/12/91.]

WAC 296-155-24503 Definitions. **Anchorage** means a secure point of attachment for lifelines, lanyards, or deceleration devices which is capable of withstanding the forces specified in the applicable sections of chapter 296-155 WAC.

Approved means, for the purpose of this section; tested and certified by the manufacturer, or any recognized national testing laboratory, to possess the strength requirements specified in this section.

Body belt means a Type 1 safety belt used in conjunction with lanyard or lifeline for fall restraint only.

Full body harness means a configuration of connected straps to distribute a fall arresting force over at least the thighs, shoulders and pelvis, with provisions for attaching a lanyard, lifeline, or deceleration devices.

Full body harness system means a Class III full body harness and lanyard which is attached to an anchorage meeting the requirements of chapter 296-155 WAC, Part C-1; or attached to a horizontal or vertical lifeline which is properly secured to an anchorage(s) capable of withstanding the forces specified in the applicable sections of chapter 296-155 WAC.

Catenary line - see horizontal lifeline.

Competent person means an individual knowledgeable of fall protection equipment, including the manufacturers recommendations and instructions for the proper use, inspec-

(2001 Ed.)

tion, and maintenance; and who is capable of identifying existing and potential fall hazards; and who has the authority to take prompt corrective action to eliminate those hazards; and who is knowledgeable of the rules contained in this section regarding the erection, use, inspection, and maintenance of fall protection equipment and systems.

Connector means a device which is used to couple (connect) parts of the personal fall arrest system and positioning device systems together. It may be an independent component of the system, such as a carabiner, or it may be an integral component of part of the system (such as a buckle or deer ring sewn into a body belt or body harness, or a snap hook spliced or sewn to a lanyard or self-retracting lanyard).

Continuous fall protection means the design and use of a fall protection system such that no exposure to an elevated fall hazard occurs. This may require more than one fall protection system or a combination of prevention or protection measures.

Control zone means the area between the warning line and the unprotected sides and edges of the walking/working surface.

Deceleration device means any mechanism, such as a rope grab, ripstitch lanyard, specifically woven lanyard, tearing or deforming lanyards, automatic self-retracting lifelines/lanyards, etc., which serves to dissipate a substantial amount of energy during a fall arrest, or otherwise limit the energy imposed on an employee during fall arrest.

Deceleration distance means the additional vertical distance a falling employee travels, excluding lifeline elongation and free fall distance, before stopping, from the point at which the deceleration device begins to operate. It is measured as the distance between the location of an employee's body belt or body harness attachment point at the moment of activation (at the onset of fall arrest forces) of the deceleration device during a fall, and the location of that attachment point after the employee comes to a full stop.

Drop line means a vertical lifeline secured to an upper anchorage for the purpose of attaching a lanyard or device.

Failure means load refusal, breakage, or separation of component parts. Load refusal is the point where the ultimate strength is exceeded.

Fall arrest system means the use of multiple, approved safety equipment components such as; body harnesses, lanyards, deceleration devices, droplines, horizontal and/or vertical lifelines and anchorages, interconnected and rigged as to arrest a free fall. Compliance with anchorage strength requirements specified in the applicable sections of chapter 296-155 WAC, Part C-1 shall constitute approval of the anchorage.

Fall protection work plan means a written planning document in which the employer identifies all areas on the job site where a fall hazard of 10 feet or greater exists. The plan describes the method or methods of fall protection to be utilized to protect employees, and includes the procedures governing the installation use, inspection, and removal of the fall protection method or methods which are selected by the employer. (See WAC 296-155-24505.)

Fall restraint system means an approved device and any necessary components that function together to restrain

an employee in such a manner as to prevent that employee from falling to a lower level. When standard guardrails are selected, compliance with applicable sections governing their construction and use shall constitute approval.

Fall distance means the actual distance from the worker's support to the level where a fall would stop.

Free fall means the act of falling before a personal fall arrest system begins to apply force to arrest the fall.

Free fall distance means the vertical displacement of the fall arrest attachment point on the employee's body belt or body harness between onset of the fall and just before the system begins to apply force to arrest the fall. This distance excludes deceleration distance, and lifeline/lanyard elongation, but includes any deceleration device slide distance or self-retracting lifeline/lanyard extension before they operate and fall arrest forces occur.

Hardware means snap hooks, D rings, bucklers, carabiners, adjusters, O rings, that are used to attach the components of a fall protection system together.

Horizontal lifeline means a rail, rope, wire, or synthetic cable that is installed in a horizontal plane between two anchorages and used for attachment of a worker's lanyard or lifeline device while moving horizontally; used to control dangerous pendulum like swing falls.

Lanyard means a flexible line of webbing, rope, or cable used to secure a body belt or harness to a lifeline or an anchorage point usually 2, 4, or 6 feet long.

Leading edge means the advancing edge of a floor, roof, or formwork which changes location as additional floor, roof, or formwork sections are placed, formed, or constructed. Leading edges not actively under construction are considered to be "unprotected sides and edges," and positive methods of fall arrest or fall restraint shall be required to protect exposed workers.

Lifeline means a vertical line from a fixed anchorage or between two horizontal anchorages, independent of walking or working surfaces, to which a lanyard or device is secured. Lifeline as referred to in this text is one which is part of a fall protection system used as back-up safety for an elevated worker.

Locking snap hook means a connecting snap hook that requires two separate forces to open the gate; one to deactivate the gatekeeper and a second to depress and open the gate which automatically closes when released; used to minimize roll out or accidental disengagement.

Low pitched roof means a roof having a slope equal to or less than 4 in 12.

Mechanical equipment means all motor or human propelled wheeled equipment except for wheelbarrows, mop-carts, robotic thermoplastic welders and robotic crimpers.

Positioning belt means a single or multiple strap that can be secured around the worker's body to hold the user in a work position; for example, a lineman's belt, a rebar belt, or saddle belt.

Positioning device system means a body belt or body harness system rigged to allow an employee to be supported on an elevated vertical surface, such as a wall, and work with both hands free while leaning.

Restraint line means a line from a fixed anchorage or between two anchorages to which an employee is secured in such a way as to prevent the worker from falling to a lower level.

Roll out means unintentional disengagement of a snap hook caused by the gate being depressed under torque or contact while twisting or turning; a particular concern with single action snap hooks that do not have a locking gatekeeper.

Roof means the exterior surface on the top of a building. This does not include floors or form work which, because a building has not been completed, temporarily become the top surface of a building.

Roofing work means the hoisting, storage, application, and removal of roofing materials and equipment, including related insulation, sheet metal, and vapor barrier work, but not including the construction of the roof deck.

Rope grab means a fall arrester that is designed to move up or down a lifeline suspended from a fixed overhead or horizontal anchorage point, or lifeline, to which the belt or harness is attached. In the event of a fall, the rope grab locks onto the lifeline rope through compression to arrest the fall. The use of a rope grab device is restricted for all restraint applications. (Refer to WAC 296-155-24510 (1)(b)(iii)).

Safety line - see lifeline.

Safety monitor system means a system of fall restraint used in conjunction with a warning line system only, where a competent person as defined by this part, having no additional duties, monitors the proximity of workers to the fall hazard when working between the warning line and the unprotected sides and edges including, the leading edge of a low pitched roof or walking/working surface.

Self retracting lifeline means a deceleration device which contains a drum wound line which may be slowly extracted from, or retracted onto, the drum under slight tension during normal employee movement, and which after onset of a fall, automatically locks the drum and arrests the fall.

Shock absorbing lanyard means a flexible line of webbing, cable, or rope used to secure a body belt or harness to a lifeline or anchorage point that has an integral shock absorber.

Single action snap hook means a connecting snap hook that requires a single force to open the gate which automatically closes when released.

Snap hook means a self-closing connecting device with a gatekeeper latch or similar arrangement that will remain closed until manually opened. This includes single action snap hooks that open when the gatekeeper is depressed and double action snap hooks that require a second action on a gatekeeper before the gate can be opened.

Static line - see horizontal lifeline.

Strength member means any component of a fall protection system that could be subject to loading in the event of a fall.

Steep roof means a roof having a slope greater than 4 in 12.

Unprotected sides and edges means any side or edge (except at entrances to points of access) of a floor, roof, ramp

or runway where there is no wall or guardrail system as defined in WAC 296-155-505(7).

Walking/working surface means for the purpose of this section, any area whose dimensions are 45 inches or greater in all directions, through which workers pass or conduct work.

Warning line system means a barrier erected on a walking and working surface or a low pitch roof (4 in 12 or less), to warn employees that they are approaching an unprotected fall hazard(s).

Work area means that portion of a walking/working surface where job duties are being performed.

[Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050. 00-14-058, § 296-155-24503, filed 7/3/00, effective 10/1/00. Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-24-051, § 296-155-24503, filed 11/27/96, effective 2/1/97. Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-24503, filed 4/25/95, effective 10/1/95; 91-03-044 (Order 90-18), § 296-155-24503, filed 1/10/91, effective 2/12/91.]

WAC 296-155-24505 Fall protection work plan. (1)

The employer shall develop and implement a written fall protection work plan including each area of the work place where the employees are assigned and where fall hazards of 10 feet or more exist.

(2) The fall protection work plan shall:

- (a) Identify all fall hazards in the work area.
 - (b) Describe the method of fall arrest or fall restraint to be provided.
 - (c) Describe the correct procedures for the assembly, maintenance, inspection, and disassembly of the fall protection system to be used.
 - (d) Describe the correct procedures for the handling, storage, and securing of tools and materials.
 - (e) Describe the method of providing overhead protection for workers who may be in, or pass through the area below the work site.
 - (f) Describe the method for prompt, safe removal of injured workers.
 - (g) Be available on the job site for inspection by the department.
- (3) Prior to permitting employees into areas where fall hazards exist the employer shall:

(a) Ensure that employees are trained and instructed in the items described in subsection (2)(a) through (f) of this section.

(b) Inspect fall protection devices and systems to ensure compliance with WAC 296-155-24510.

(4) Training of employees:

(a) The employer shall ensure that employees are trained as required by this section. Training shall be documented and shall be available on the job site.

(b) "Retraining." When the employer has reason to believe that any affected employee who has already been trained does not have the understanding and skill required by subsection (1) of this section, the employer shall retrain each such employee. Circumstances where retraining is required include, but are not limited to, situations where:

- Changes in the workplace render previous training obsolete; or
- Changes in the types of fall protection systems or equipment to be used render previous training obsolete; or
- Inadequacies in an affected employee's knowledge or use of fall protection systems or equipment indicate that the employee has not retained the requisite understanding or skill.

Note: The following appendices to Part C-1 of this chapter serve as nonmandatory guidelines to assist employers in complying with the appropriate requirements of Part C-1 of this chapter.

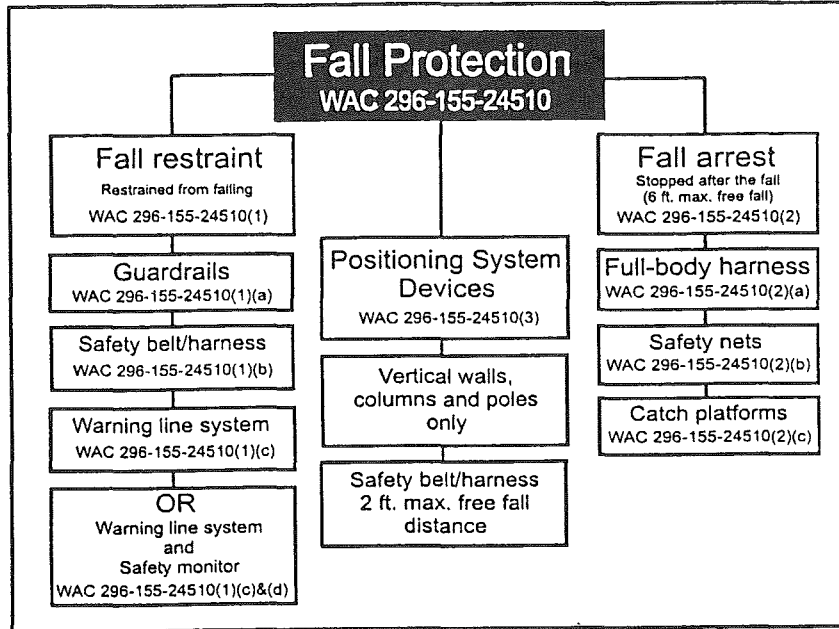

[Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050. 00-14-058, § 296-155-24505, filed 7/3/00, effective 10/1/00. Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-24-051, § 296-155-24505, filed 11/27/96, effective 2/1/97. Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-24505, filed 4/25/95, effective 10/1/95; 91-03-044 (Order 90-18), § 296-155-24505, filed 1/10/91, effective 2/12/91.]

WAC 296-155-24507 Reserve.

[Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-24-051, § 296-155-24507, filed 11/27/96, effective 2/1/97. Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-24507, filed 4/25/95, effective 10/1/95.]

WAC 296-155-24510 Fall restraint, fall arrest systems. When employees are exposed to a hazard of falling from a location 10 feet or more in height, the employer shall ensure that fall restraint, fall arrest systems or positioning device systems are provided, installed, and implemented according to the following requirements.

(1) Fall restraint protection shall consist of:

(a) Standard guardrails as described in chapter 296-155 WAC, Part K.

(b) Safety belts and/or harness attached to securely rigged restraint lines.

(i) Safety belts and/or harness shall conform to ANSI Standard:

- Class I body belt
- Class II chest harness
- Class III full body harness
- Class IV suspension/position belt

(ii) All safety belt and lanyard hardware assemblies shall be capable of withstanding a tensile loading of 4,000 pounds without cracking, breaking, or taking a permanent deformation.

(iii) Rope grab devices are prohibited for fall restraint applications unless they are part of a fall restraint system designed specifically for the purpose by the manufacturer, and used in strict accordance with the manufacturer's recommendations and instructions.

(iv) The employer shall ensure component compatibility.

(v) Components of fall restraint systems shall be inspected prior to each use for mildew, wear, damage, and other deterioration, and defective components shall be removed from service if their function or strength have been adversely affected.

(vi) Anchorage points used for fall restraint shall be capable of supporting 4 times the intended load.

(vii) Restraint protection shall be rigged to allow the movement of employees only as far as the sides and edges of the walking/working surface.

(c) A warning line system as prescribed in WAC 296-155-24515(3) and supplemented by the use of a safety monitor system as prescribed in WAC 296-155-24521 to protect workers engaged in duties between the forward edge of the warning line and the unprotected sides and edges, including

the leading edge, of a low pitched roof or walking/working surface.

(d) Warning line and safety monitor systems as described in WAC 296-155-24515 (3) through (4)(f) and 296-155-24520 respectively are prohibited on surfaces exceeding a 4 in 12 pitch, and on any surface whose dimensions are less than 45 inches in all directions.

(2) Fall arrest protection shall consist of:

(a) Full body harness system.

(i) An approved Class III full body harness shall be used.

(ii) Body harness systems or components subject to impact loading shall be immediately removed from service and shall not be used again for employee protection unless inspected and determined by a competent person to be undamaged and suitable for reuse.

(iii) All safety lines and lanyards shall be protected against being cut or abraded.

(iv) The attachment point of the body harness shall be located in the center of the wearer's back near shoulder level, or above the wearer's head.

(v) Body harness systems shall be rigged to minimize free fall distance with a maximum free fall distance allowed of 6 feet, and such that the employee will not contact any lower level.

(vi) Hardware shall be drop forged, pressed or formed steel, or made of materials equivalent in strength.

(vii) Hardware shall have a corrosion resistant finish, and all surfaces and edges shall be smooth to prevent damage to the attached body harness or lanyard.

(viii) When vertical lifelines (droplines) are used, not more than one employee shall be attached to any one lifeline.

Note: The system strength needs in the following items are based on a total combined weight of employee and tools of no more than 310 pounds. If combined weight is more than 310 pounds, appropriate allowances must be made or the system will not be deemed to be in compliance.

(ix) Full body harness systems shall be secured to anchorages capable of supporting 5,000 pounds per employee except: When self retracting lifelines or other deceleration devices are used which limit free fall to two feet, anchorages shall be capable of withstanding 3,000 pounds.

(x) Vertical lifelines (droplines) shall have a minimum tensile strength of 5,000 pounds (22.2 kN), except that self retracting lifelines and lanyards which automatically limit free fall distance to two feet (.61 m) or less shall have a minimum tensile strength of 3,000 pounds (13.3 kN).

(xi) Horizontal lifelines shall be designed, installed, and used, under the supervision of a qualified person, as part of a complete personal fall arrest system, which maintains a safety factor of at least two.

(xii) Lanyards shall have a minimum tensile strength of 5,000 pounds (22.2 kN).

(xiii) All components of body harness systems whose strength is not otherwise specified in this subsection shall be capable of supporting a minimum fall impact load of 5,000 pounds (22.2 kN) applied at the lanyard point of connection.

(xiv) Dee-rings and snap-hooks shall be proof-tested to a minimum tensile load of 3,600 pounds (16 kN) without cracking, breaking, or taking permanent deformation.

(xv) Snap-hooks shall be a locking type snap-hook designed and used to prevent disengagement of the snap-hook by the contact of the snap-hook keeper by the connected member.

(xvi) Unless the snap-hook is designed for the following connections, snap-hooks shall not be engaged:

- (A) Directly to webbing, rope or wire rope;
- (B) To each other;
- (C) To a dee-ring to which another snap-hook or other connector is attached;
- (D) To a horizontal lifeline; or
- (E) To any object which is incompatibly shaped or dimensioned in relation to the snap-hook such that unintentional disengagement could occur by the connected object being able to depress the snap-hook keeper and release itself.

(xvii) Full body harness systems shall be inspected prior to each use for mildew, wear, damage, and other deterioration, and defective components shall be removed from service if their function or strength have been adversely affected.

(b) Safety net systems. Safety net systems and their use shall comply with the following provisions:

(i) Safety nets shall be installed as close as practicable under the surface on which employees are working, but in no case more than 30 feet (9.1 m) below such level unless specifically approved in writing by the manufacturer. The potential fall area to the net shall be unobstructed.

(ii) Safety nets shall extend outward from the outermost projection of the work surface as follows:

Vertical distance from working level to horizontal plane of net	Minimum required horizontal distance of outer edge of net from the edge of the working surface
Up to 5 feet	8 feet
More than 5 feet up to 10 feet	10 feet
More than 10 feet	13 feet

(iii) Safety nets shall be installed with sufficient clearance under them to prevent contact with the surface or structures below when subjected to an impact force equal to the drop test specified in (b)(iv) of this subsection.

(iv) Safety nets and their installations shall be capable of absorbing an impact force equal to that produced by the drop test specified in (b)(iv)(A) and (B) of this subsection.

(A) Except as provided in (b)(iv)(B) of this subsection, safety nets and safety net installations shall be drop-tested at the job site after initial installation and before being used as a fall protection system, whenever relocated, after major repair, and at 6-month intervals if left in one place. The drop-test shall consist of a 400 pound (180 kg) bag of sand 30 ± 2 inches (76 ± 5 cm) in diameter dropped into the net from the highest walking/working surface at which employees are exposed to fall hazards, but not from less than 42 inches (1.1 m) above that level.

(B) When the employer can demonstrate that it is unreasonable to perform the drop-test required by (b)(iv)(A) of this subsection, the employer (or a designated competent person) shall certify that the net and net installation is in compliance with the provisions of (b)(iii) and (b)(iv)(A) of this subsection by preparing a certification record prior to the net being used as a fall protection system. The certification record must include an identification of the net and net installation for which the certification record is being prepared; the date that it was determined that the identified net and net installation were in compliance with (b)(iii) of this subsection and the signature of the person making the determination and certification. The most recent certification record for each net and net installation shall be available at the job site for inspection.

(v) Defective nets shall not be used. Safety nets shall be inspected at least once a week for wear, damage, and other deterioration. Defective components shall be removed from service. Safety nets shall also be inspected after any occurrence which could affect the integrity of the safety net system.

(vi) Materials, scrap pieces, equipment, and tools which have fallen into the safety net shall be removed as soon as possible from the net and at least before the next work shift.

(vii) The maximum size of each safety net mesh opening shall not exceed 36 square inches (230 cm²) nor be longer than 6 inches (15 cm) on any side, and the opening, measured center-to-center of mesh ropes or webbing, shall not be longer than 6 inches (15 cm). All mesh crossings shall be secured to prevent enlargement of the mesh opening.

(viii) Each safety net (or section of it) shall have a border rope for webbing with a minimum breaking strength of 5,000 pounds (22.2 kN).

(ix) Connections between safety net panels shall be as strong as integral net components and shall be spaced not more than 6 inches (15 cm) apart.

(c) Catch platforms.

(i) A catch platform shall be installed within 10 vertical feet of the work area.

(ii) The catch platforms width shall equal the distance of the fall but shall be a minimum of 45 inches wide and shall be equipped with standard guardrails on all open sides.

(3) Positioning device systems. Positioning device systems and their use shall conform to the following provisions:

(a) Positioning devices shall be rigged such that an employee cannot free fall more than 2 feet (.61 m).

(b) Positioning devices shall be secured to an anchorage capable of supporting at least twice the potential impact load of an employee's fall or 3,000 pounds (13.3 kN), whichever is greater.

(c) Connectors shall be drop forged, pressed or formed steel, or made of equivalent materials.

(d) Connectors shall have a corrosion-resistant finish, and all surfaces and edges shall be smooth to prevent damage to interfacing parts of this system.

(e) Connecting assemblies shall have a minimum tensile strength of 5,000 pounds (22.2 kN).

(f) Dee-rings and snap-hooks shall be proof-tested to a minimum tensile load of 3,600 pounds (16 kN) without cracking, breaking, or taking permanent deformation.

(g) Snap-hooks shall be a locking type snap-hook designed and used to prevent disengagement of the snap-hook by the contact of the snap-hook keeper by the connected member.

(h) Unless the snap-hook is designed for the following connections, snap-hooks shall not be engaged:

(i) Directly to webbing, rope or wire rope;

(ii) To each other;

(iii) To a dee-ring to which another snap-hook or other connector is attached;

(iv) To a horizontal lifeline; or

(v) To any object which is incompatibly shaped or dimensioned in relation to the snap-hook such that unintentional disengagement could occur by the connected object being able to depress the snap-hook keeper and release itself.

(i) Positioning device systems shall be inspected prior to each use for wear, damage, and other deterioration, and defective components shall be removed from service.

(j) Body belts, harnesses, and components shall be used only for employee protection (as part of a personal fall arrest system or positioning device system) and not to hoist materials.

(4) Droplines or lifelines used on rock scaling operations, or in areas where the lifeline may be subjected to cutting or abrasion, shall be a minimum of 7/8 inch wire core manila rope. For all other lifeline applications, a minimum of 3/4 inch manila or equivalent, with a minimum breaking strength of 5,000 pounds, shall be used.

(5) Safety harnesses, lanyards, lifelines or droplines, independently attached or attended, shall be used while performing the following types of work when other equivalent type protection is not provided:

(a) Work performed in permit required confined spaces and other confined spaces shall follow the procedures as described in chapter 296-62 WAC, Part M.

(b) Work on hazardous slopes, or dismantling safety nets, working on poles or from boatswains chairs at elevations greater than six feet (1.83 m), swinging scaffolds or other unguarded locations.

(c) Work on skips and platforms used in shafts by crews when the skip or cage does not occlude the opening to within one foot (30.5 cm) of the sides of the shaft, unless cages are provided.

(6) Canopies, when used as falling object protection, shall be strong enough to prevent collapse and to prevent penetration by any objects which may fall onto the canopy.

Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-24510, filed 4/25/95, effective 10/1/95; 95-04-007, § 296-155-24510, filed 1/18/95, effective 3/1/95; 93-19-142 (Order 93-04), § 296-155-24510, filed 9/22/93, effective 11/1/93; 91-24-017 (Order 91-07), § 296-155-24510, filed 11/22/91, effective 12/24/91; 91-03-044 (Order 90-18), § 296-155-24510, filed 1/10/91, effective 2/12/91.]

WAC 296-155-24515 Guarding of low pitched roof perimeters. (1) General provisions. During the performance of work on low pitched roofs with a potential fall hazard greater than 10 feet, the employer shall ensure that employees engaged in such work be protected from falling from all unprotected sides and edges of the roof as follows:

(a) By the use of a fall restraint or fall arrest systems, as defined in WAC 296-155-24510; or

(b) By the use of a warning line system erected and maintained as provided in subsection (3) of this section and supplemented for employees working between the warning line and the roof edge by the use of a safety monitor system as described in WAC 296-155-24521.

(c) Mechanical equipment shall be used or stored only in areas where employees are protected by a warning line system, or fall restraint, or fall arrest systems as described in WAC 296-155-24510. Mechanical equipment may not be used or stored where the only protection is provided by the use of a safety monitor.

(2) Exceptions.

(a) The provisions of subsection (1)(a) of this section do not apply at points of access such as stairways, ladders, and ramps, or when employees are on the roof only to inspect, investigate, or estimate roof level conditions. Roof edge materials handling areas and materials storage areas shall be guarded as provided in subsection (4) of this section.

(b) Employees engaged in roofing on low-pitched roofs less than 50 feet wide, may elect to use a safety monitor system without warning lines.

Note: See Appendix A to Part C-1—Determining roof widths nonmandatory guidelines for complying with WAC 296-155-24515 (2)(b).

(3) Warning lines systems.

(a) Warning lines shall be erected around all sides of the work area.

(i) When mechanical equipment is not being used, the warning line shall be erected not less than six feet (1.8 meters) from the edge of the roof.

(ii) When mechanical equipment is being used, the warning line shall be erected not less than six feet (1.8 meters) from the roof edge which is parallel to the direction of mechanical equipment operation, and not less than 10 feet (3.1 meters) from the roof edge which is perpendicular to the direction of mechanical equipment operation.

(b) The warning line shall consist of a rope, wire, or chain and supporting stanchions erected as follows:

(i) The rope, wire, or chain shall be flagged at not more than six foot (1.8 meter) intervals with high visibility material.

(ii) The rope, wire, or chain shall be rigged and supported in such a way that its lowest point (including sag) is no less than 36 inches (91.4 cm) from the roof surface and its highest point is no more than 42 inches (106.7 cm) from the roof surface.

(iii) After being erected, with the rope, wire or chain attached, stanchions shall be capable of resisting, without tipping over, a force of at least 16 pounds (71 Newtons) applied horizontally against the stanchion, 30 inches (0.76 meters) above the roof surface, perpendicular to the warning line, and in the direction of the roof edge.

(iv) The rope, wire, or chain shall have a minimum tensile strength of 200 pounds (90 kilograms), and after being attached to the stanchions, shall be capable of supporting, without breaking, the loads applied to the stanchions.

(v) The line shall be attached at each stanchion in such a way that pulling on one section of the line between stanchions will not result in slack being taken up in adjacent sections before the stanchion tips over.

(c) Access paths shall be erected as follows:

(i) Points of access, materials handling areas, and storage areas shall be connected to the work area by a clear access path formed by two warning lines.

(ii) When the path to a point of access is not in use, a rope, wire, or chain, equal in strength and height to the warning line, shall be placed across the path at the point where the path intersects the warning line erected around the work area.

(4) Roof edge materials handling areas and materials storage. Employees working in a roof edge materials handling or materials storage area located on a low pitched roof with a ground to eave height greater than 10 feet shall be protected from falling along all unprotected roof sides and edges of the area.

(a) When guardrails are used at hoisting areas, a minimum of four feet of guardrail shall be erected on each side of the access point through which materials are hoisted.

(b) A chain or gate shall be placed across the opening between the guardrail sections when hoisting operations are not taking place.

(c) When guardrails are used at bitumen pipe outlet, a minimum of four feet of guardrail shall be erected on each side of the pipe.

(d) When safety belt/harness systems are used, they shall not be attached to the hoist.

(e) When fall restraint systems are used, they shall be rigged to allow the movement of employees only as far as the roof edge.

(f) Materials shall not be stored within six feet of the roof edge unless guardrails are erected at the roof edge.

WAC 296-155-24519 Reserve.

[Statutory Authority: RCW 49.17.040, [49.17].050 and [49.17].060. 96-24-051, § 296-155-24519, filed 11/27/96, effective 2/1/97. Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-24519, filed 4/25/95, effective 10/1/95.]

WAC 296-155-24520 Leading edge control zone. (1)

When performing leading edge work, the employer shall ensure that a control zone be established according to the following requirements:

(a) The control zone shall begin a minimum of 6 feet back from the leading edge to prevent exposure by employees who are not protected by fall restraint or fall arrest systems.

(b) The control zone shall be separated from other areas of the low pitched roof or walking/working surface by the erection of a warning line system.

(c) The warning line system shall consist of wire, rope, or chain supported on stanchions, or a method which provides equivalent protection.

(d) The spacing of the stanchions and support of the line shall be such that the lowest point of the line (including sag) is not less than 36 inches from the walking/working surface, and its highest point is not more than 42 inches (106.7 cm) from the walking/working surface.

(e) Each line shall have a minimum tensile strength of 200 pounds (90 kilograms).

(f) Each line shall be flagged or clearly marked with high visibility materials at intervals not to exceed 6 feet.

(g) After being erected with the rope, or chain attached, stanchions shall be capable of resisting without tipping over, a force of at least 16 pounds (71 Newtons) applied horizontally against the stanchions 30 inches (0.76 meters) above the roof surface, perpendicular to the warning line and in the direction of the roof edge.

(2) When positive means of fall restraint as described in WAC 296-155-24510 (1)(a) through (d), or fall arrest as described in WAC 296-155-24510 (2) through (6) are not utilized, a safety monitor system as described in WAC 296-155-24521 shall be implemented to protect employees working between the forward edge of the warning line and the leading edge.

[Statutory Authority: RCW 49.17.010, [49.17].040, and [49.17].050. 00-14-058, § 296-155-24520, filed 7/3/00, effective 10/1/00. Statutory Authority: RCW 49.17.040, [49.17].050 and [49.17].060. 96-24-051, § 296-155-24520, filed 11/27/96, effective 2/1/97. WAC 296-155-24521 Safety monitor system. (1) A safety monitor system (SMS) may be used in conjunction with a warning line system as a method of guarding against falls during work on low pitched roofs and leading edge work only.

(2) When selected, the employer shall ensure that the safety monitor system shall be addressed in the fall protection work plan, include the name of the safety monitor(s) and the extent of their training in both the safety monitor and warning line systems, and shall ensure that the following requirements are met.

(3) The safety monitor system shall not be used when adverse weather conditions create additional hazards.

(4) A person acting in the capacity of safety monitor(s) shall be trained in the function of both the safety monitor and warning lines systems, and shall:

(a) Be a competent person as defined in WAC 296-155-24503.

(b) Have control authority over the work as it relates to fall protection.

(c) Be instantly distinguishable over members of the work crew.

(d) Engage in no other duties while acting as safety monitor.

(e) Be positioned in relation to the workers under their protection, so as to have a clear, unobstructed view and be able to maintain normal voice communication.

(f) Not supervise more than eight exposed workers at one time.

(g) Warn the employee when it appears that the employee is unaware of a fall hazard or is acting in an unsafe manner.

(5) Control zone:

(a) Workers shall be distinguished from other members of the crew by wearing highly visible, distinctive, and uniform apparel readily distinguishing them from other members of the crew only while in the control zone.

(b) The employer shall ensure that each employee working in a control zone promptly comply with fall hazard warnings from safety monitors.

Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-24-051, § 296-155-24521, filed 11/27/96, effective 2/1/97. Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-24521, filed 4/25/95, effective 10/1/95; 91-03-044 (Order 90-18), § 296-155-24521, filed 1/10/91, effective 2/12/91.]

WAC 296-155-24522 Reserve.

[Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-24-051, § 296-155-24522, filed 11/27/96, effective 2/1/97. Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-24522, filed 4/25/95, effective 10/1/95.]

WAC 296-155-24523 Appendix A to Part C-1—Determining roof widths nonmandatory guidelines for complying with WAC 296-155-24515 (2)(b). (1) This appendix serves as a guideline to assist employers complying with the requirements of WAC 296-155-24515 (2)(b). WAC 296-155-24515 (2)(b) allows the use of a safety monitoring system alone as a means of providing fall protection during the performance of roofing operations on low-sloped roofs 50 feet (15.25 m) or less in width. Each example in the appendix shows a roof plan or plans and indicates where each roof or roof area is to be measured to determine its width. Section views or elevation views are shown where appropriate. Some examples show "correct" and "incorrect" subdivisions of irregularly shaped roofs divided into smaller, regularly shaped areas. In all examples, the dimension selected to be the width of an area is the lesser of the two primary dimensions of the area, as viewed from above. Example A shows that on a simple rectangular roof, width is the lesser of the two primary overall dimensions. This is also the case with

roofs which are sloped toward or away from the roof center, as shown in Example B.

(2) Many roofs are not simple rectangles. Such roofs may be broken down into subareas as shown in Example C. The process of dividing a roof area can produce many different configurations. Example C gives the general rule of using dividing lines of minimum length to minimize the size and number of the areas which are potentially less than 50 feet (15.25 m) wide. The intent is to minimize the number of roof areas where safety monitoring systems alone are sufficient protection.

(3) Roofs which are comprised of several separate, non-contiguous roof areas, as in Example D, may be considered as a series of individual roofs. Some roofs have penthouses, additional floors, courtyard openings, or similar architectural features; Example E shows how the rule for dividing roofs into subareas is applied to such configurations. Irregular, non-rectangular roofs must be considered on an individual basis, as shown in Example F.

Correct

Incorrect

Correct

Incorrect

Such roofs are to be divided into subareas by using dividing lines of minimum length to minimize the size and number of the areas which are potentially less than or equal to 50 feet (15.25 m) in width, in order to limit the size of roof areas where the safety monitoring system alone can be used (WAC 296-155-24515(2) (b)). Dotted lines are used in the examples to show the location of dividing lines, (W) denotes incorrect measurements of width.

PART D FIRE PROTECTION AND PREVENTION

WAC 296-155-250 Definitions applicable to this part.

(1) "Approved" for the purpose of this part, means equipment that has been listed or approved by a nationally recognized testing laboratory such as Factory Mutual Engineering Corp., or Underwriters' Laboratories, Inc., federal agencies such as United States Mine Safety and Health Administration or United States Coast Guard, which issue approvals for such equipment, or the department of labor and industries.

(2) "Closed container" means a container so sealed by means of a lid or other device that neither liquid nor vapor will escape from it at ordinary temperatures.

(3) "Combustible liquid" means any liquid having a flashpoint at or above 100°F (37.8°C). Combustible liquids shall be divided into two classes as follows:

(a) "Class II liquids" shall include those with flashpoints at or above 100°F (37.8°C) and below 140°F (60°C), except any mixture having components with flashpoints of 200°F (93.3°C) or higher, the volume of which make up 99 percent or more of the total volume of the mixture.

(b) "Class III liquids" shall include those with flashpoints at or above 140°F (60°C). Class III liquids are subdivided into two subclasses:

(i) "Class IIIA liquids" shall include those with flashpoints at or above 140°F (60°C) and below 200°F (93.3°C), except any mixture having components with flashpoints of 200°F (93.3°C), or higher, the total volume of which make up 99 percent or more of the total volume of the mixture.

(ii) "Class IIIB liquids" shall include those with flashpoints at or above 200°F (93.3°C). This section does not cover Class IIIB liquids. Where the term "Class III liquids" is used in this section, it shall mean only Class IIIA liquids.

(c) When a combustible liquid is heated for use to within 30°F (16.7°C) of its flashpoint, it shall be handled in accordance with the requirements for the next lower class of liquids.

(4) "Combustion" means any chemical process that involves oxidation sufficient to produce light or heat.

(5) "Fire brigade" means an organized group of employees that are knowledgeable, trained, and skilled in the safe evacuation of employees during emergency situations and in assisting in fire fighting operations.

(6) "Fire resistance" means so resistant to fire that, for specified time and under conditions of a standard heat intensity, it will not fail structurally and will not permit the side away from the fire to become hotter than a specified temperature. For purposes of this part, fire resistance shall be determined by the Standard Methods of Fire Tests of Building Construction and Materials, NFPA 251-72.

(7) "Flammable" means capable of being easily ignited, burning intensely or having a rapid rate of flame spread.

(8) "Flammable liquid" means any liquid having a flashpoint below 100°F (37.8°C), except any mixture having components with flashpoints of 100°F (37.8°C) or higher, the total of which make up 99 percent or more of the total volume of the mixture. Flammable liquids shall be known as Class I liquids. Class I liquids are divided into three classes as follows:

(a) Class IA shall include liquids having flashpoints below 73°F (22.8°C) and having a boiling point below 100°F (37.8°C).

(b) Class IB shall include liquids having flashpoints below 73°F (22.8°C) and having a boiling point at or above 100°F (37.8°C).

(c) Class IC shall include liquids having flashpoints at or above 73°F (22.8°C) and below 100°F (37.8°C).

(9) "Flashpoint" means the minimum temperature at which a liquid gives off vapor within a test vessel in sufficient concentration to form an ignitable mixture with air near the surface of the liquid, and shall be determined as follows:

(a) For a liquid which has a viscosity of less than 45 SUS at 100°F (37.8°C), does not contain suspended solids, and does not have a tendency to form a surface film while under test, the procedure specified in the Standard Method of Test for Flashpoint by Tag Closed Tester (ASTM D-56-70) shall be used.

(b) For a liquid which has a viscosity of 45 SUS or more at 100°F (37.8°C), or contains suspended solids, or has a tendency to form a surface film while under test, the Standard Method of Test for Flashpoint by Pensky-Martens Closed Tester (ASTM D-93-71) shall be used, except that the methods specified in Note 1 to section 1.1 of ASTM D-93-71 may be used for the respective materials specified in the note.

(10) "Liquified petroleum gases" "LPG" and "LP Gas" mean and include any material which is composed predominantly of any of the following hydrocarbons, or mixtures of them, such as propane, propylene, butane (normal butane or isobutane), and butylenes.

(11) "Portable tank" means a closed container having a liquid capacity more than 60 U.S. gallons, and not intended for fixed installation.

(12) "Safety can" means an approved closed container, of not more than 5 gallons capacity, having a spring-closing lid and spout cover and so designed that it will safely relieve internal pressure when subjected to fire exposure.

(13) "Salamander" means a portable heating device, solid or liquid fueled, which is not vented to the outdoor atmosphere.

(14) "Vapor pressure" means the pressure, measured in pounds per square inch (absolute), exerted by a volatile liquid as determined by the "Standard Method of Test for Vapor Pressure of Petroleum Products (Reid Method)," (ASTM D-323-68).

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-250, filed 1/21/86; Order 74-26, § 296-155-250, filed 5/7/74, effective 6/6/74.]

WAC 296-155-260 Fire protection. (1) General requirements.

(a) The employer shall be responsible for development of a fire protection program to be followed throughout all phases of construction and demolition work, and the employer shall provide for fire fighting equipment as specified in this part. As fire hazards occur, there shall be no delay in providing necessary equipment.

(b) Access to all available fire fighting equipment shall be maintained at all times.

(c) All fire fighting equipment, provided by the employer, shall be conspicuously located.

(d) All fire fighting equipment shall be periodically inspected by a competent person, and maintained in operating condition. Defective equipment shall be immediately replaced.

(e) As warranted by the project, the employer shall provide a trained and equipped fire fighting organization (fire brigade) to assure adequate protection to life.

(2) Water supply.

(a) A temporary or permanent water supply, of sufficient volume, duration, and pressure, required to properly operate fire fighting equipment shall be made available as soon as combustible materials accumulate.

(b) Where underground water mains are to be provided, they shall be installed, completed, and made available for use as soon as practicable.

(3) Portable fire fighting equipment.

(a) A fire extinguisher, rated not less than 2A, shall be provided for each 3,000 square feet of a combustible building area, or major fraction thereof. Travel distance from any point of the protected area to the nearest fire extinguisher shall not exceed a horizontal distance of 100 feet.

Note: One 55-gallon open drum of water with two fire pails may be substituted for a fire extinguisher having a 2A rating.

(b) A 1/2-inch diameter garden-type hose line, not to exceed 100 feet in length and equipped with a nozzle, may be substituted for a 2A-rated fire extinguisher, provided it is capable of discharging a minimum of 5 gallons per minute with a minimum hose stream range of 30 feet horizontally. The garden-type hose lines shall be mounted on conventional racks or reels. The number and location of hose racks or reels shall be such that at least one hose stream can be applied to all points in the area.

(c) One or more fire extinguishers, rated not less than 2A, shall be provided on each floor. In multistory buildings, where combustibles are present, at least one fire extinguisher shall be located adjacent to a stairway.

(d) Extinguishers and water drums, subject to freezing, shall be protected from freezing.

(e) A fire extinguisher, rated not less than 10B, shall be provided within 50 feet of wherever more than 5 gallons of flammable or combustible liquids or 5 pounds of flammable gas are being used on the jobsite. This requirement does not apply to the integral fuel tanks of motor vehicles.

(f) Carbon tetrachloride and other toxic vaporizing liquid fire extinguishers are prohibited.

(g) Portable fire extinguishers shall be inspected periodically and maintained in accordance with Maintenance and Use of Portable Fire Extinguishers, NFPA No. 10A-1981 and the general safety and health standards, chapter 296-24 WAC, Part G-3.

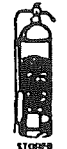

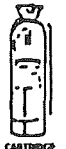

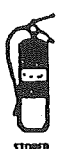

(h) Fire extinguishers which have been listed or approved by a nationally recognized testing laboratory, shall be used to meet the requirements of this part. (See Table D-1)

Note: One hundred feet, or less, of 1-1/2 inch hose, with a nozzle capable of discharging water at 25 gallons or more per minute, may be substituted for a fire extinguisher rated not more than 2A in the designated area provided that the hose line can reach all points in the area.

(i) If fire hose connections are not compatible with local fire fighting equipment, the contractor shall provide adapters, or equivalent, to permit connections.

(j) During demolition involving combustible materials, charged hose lines, supplied by hydrants, water tank trucks with pumps, or equivalent, shall be made available.

(4) Fixed fire fighting equipment.

(a) Sprinkler protection.

(i) If the facility being constructed includes the installation of automatic sprinkler protection, the installation shall closely follow the construction and be placed in service as soon as applicable laws permit following completion of each story.

(ii) During demolition or alterations, existing automatic sprinkler installations shall be retained in service as long as reasonable. The operation of sprinkler control valves shall be permitted only by properly authorized persons.

Note: Modification of sprinkler systems to permit alterations or additional demolition should be expedited so that the automatic protection may be returned to service as quickly as possible. Sprinkler control valves shall be checked daily at close of work to ascertain that the protection is in service.

(b) Standpipes. In all structures in which standpipes are required, or where standpipes exist in structures being altered, they shall be brought up as soon as applicable laws

(2001 Ed.)

permit, and shall be maintained as construction progresses in such a manner that they are always ready for fire protection use. The standpipes shall be provided with Siamese fire department connections on the outside of the structure, at the street level, which shall be conspicuously marked. There shall be at least one standard hose outlet at each floor.

(5) Fire alarm devices.

(a) An alarm system, e.g., telephone system, siren, etc., shall be established by the employer whereby employees on the site and the local fire department can be alerted for an emergency.

(b) The alarm code and reporting instructions shall be conspicuously posted at phones and at employee entrances.

(6) Fire cutoffs.

(a) Fire walls and exit stairways, required for the completed buildings, shall be given construction priority. Fire doors, with automatic closing devices, shall be hung on openings as soon as practical.

(b) Fire cutoffs shall be retained in buildings undergoing alterations or demolition until operations necessitate their removal.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-260, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-260, filed 1/21/86; Order 76-6, § 296-155-260, filed 3/1/76; Order 74-26, § 296-155-260, filed 5/7/74, effective 6/6/74.]

Reviser's note: RCW 34.05.395 requires the use of underlining and deletion marks to indicate amendments to existing rules, and deems ineffectual changes not filed by the agency in this manner. The bracketed material in the above section does not appear to conform to the statutory requirement.

WAC 296-155-265 Fire prevention. (1) Ignition hazards.

(a) Electrical wiring and equipment for light, heat, or power purposes shall be installed in compliance with the requirements of Part I of this standard.

(b) Internal combustion engine powered equipment shall be so located that exhausts are well away from combustible materials. When exhausts are piped to outside the building under construction, a clearance of at least 6 inches shall be maintained between such piping and combustible material.

(c) Smoking shall be prohibited at or in the vicinity of operations which constitute a fire hazard, and shall be conspicuously posted: "No smoking or open flame."

(d) Portable battery powered lighting equipment, used in connection with the storage, handling, or use of flammable gases or liquids, shall be of the type approved for the hazardous locations.

(e) The nozzle of air, inert gas, and steam lines or hoses, when used in the cleaning or ventilation of tanks and vessels that contain hazardous concentrations of flammable gases or vapors, shall be bonded to the tank or vessel shell. Bonding devices shall not be attached or detached in hazardous concentrations of flammable gases or vapors.

(f) Workers shall not take open lights or open flames near or in an open sewer manhole, gas main, conduit or other similar place until the absence of explosive or harmful gases has been assured. Open lights or flames shall not be carried into areas and enclosures where flammable vapors or exposed low flash point solvents exist. Only approved and suitable protected lights shall be used.

(2) Temporary buildings.

(a) No temporary building shall be erected where it will adversely affect any means of exit.

(b) Temporary buildings, when located within another building or structure, shall be of either noncombustible construction or of combustible construction having a fire resistance of not less than 1 hour.

(c) Temporary buildings, located other than inside another building and not used for the storage, handling, or use of flammable or combustible liquids, flammable gases, explosives, or blasting agents, or similar hazardous occupancies, shall be located at a distance of not less than 10 feet from another building or structure. Groups of temporary buildings, not exceeding 2,000 square feet in aggregate, shall, for the purpose of this part, be considered a single temporary building.

(3) Open yard storage.

(a) Combustible materials shall be piled with due regard to the stability of piles and in no case higher than 20 feet.

(b) Driveways between and around combustible storage piles shall be at least 15 feet wide and maintained free from accumulation of rubbish, equipment, or other articles or materials. Driveways shall be so spaced that a maximum grid system unit of 50 feet by 150 feet is produced.

(c) The entire storage site shall be kept free from accumulation of unnecessary combustible materials. Weeds and grass shall be kept down and a regular procedure provided for the periodic cleanup of the entire area.

(d) When there is a danger of an underground fire, that land shall not be used for combustible or flammable storage.

(e) Method of piling shall be solid wherever possible and in orderly and regular piles. No combustible material shall be stored outdoors within 10 feet of a building or structure.

(f) Portable fire extinguishing equipment, suitable for the fire hazard involved, shall be provided at convenient, conspicuously accessible locations in the yard area. Portable fire extinguishers, rated not less than 2A, shall be placed so that maximum travel distance to the nearest unit shall not exceed 100 feet.

(4) Indoor storage.

(a) Storage shall not obstruct, or adversely affect, means of exit.

(b) All materials shall be stored, handled, and piled with due regard to their fire characteristics.

(c) Noncompatible materials, which may create a fire hazard, shall be segregated by a barrier having a fire resistance of at least 1 hour.

(d) Material shall be piled to minimize the spread of fire internally and to permit convenient access for firefighting. Stable piling shall be maintained at all times. Aisle space shall be maintained to safely accommodate the widest vehicle that may be used within the building for fire-fighting purposes.

(e) Clearance of at least 36 inches shall be maintained between the top level of the stored material and the sprinkler deflectors.

(f) Clearance shall be maintained around lights and heating units to prevent ignition of combustible materials.

(g) A clearance of 24 inches shall be maintained around the path of travel of fire doors unless a barricade is provided, in which case no clearance is needed. Material shall not be stored within 36 inches of a fire door opening.

[Statutory Authority: Chapter 49.17 RCW. 88-23-054 (Order 88-25), § 296-155-265, filed 11/14/88; Order 74-26, § 296-155-265, filed 5/7/74, effective 6/6/74.]

WAC 296-155-270 Flammable and combustible liquids. (1) General requirements.

(a) Only approved containers and portable tanks shall be used for storage and handling of flammable and combustible liquids. Approved metal safety cans, or department of transportation approved containers shall be used for the handling and use of flammable liquids in quantities five gallons or less, except that this shall not apply to those flammable liquid materials which are highly viscid (extremely hard to pour), which may be used and handled in original shipping containers. For quantities of one gallon or less, only the original container may be used for storage, use, and handling of flammable liquids.

(b) Flammable or combustible liquids shall not be stored in areas used for exits, stairways, or normally used for the safe passage of people.

(c) Flammable and combustible liquid containers shall be legibly marked to indicate their contents. Each storage container for flammable or combustible liquids, with a capacity of 50 gallons or more, shall have the contents of the container identified by a sign of clearly visible contrasting colors with letters at least 3 inches high, painted on the container at the discharge valve and at the fill point.

(d) Gasoline shall not be used as a solvent or a cleaning agent.

(2) Indoor storage of flammable and combustible liquids.

(a) No more than 25 gallons of flammable or combustible liquids shall be stored in a room outside of an approved storage cabinet. For storage of liquid petroleum gas, see WAC 296-155-275.

(b) Quantities of flammable and combustible liquid in excess of 25 gallons shall be stored in an acceptable or approved cabinet meeting the following requirements:

(i) Acceptable wooden storage cabinets shall be constructed in the following manner, or equivalent: The bottom, sides, and top shall be constructed of an exterior grade of plywood at least 1 inch in thickness, which shall not break down or delaminate under standard fire test conditions. All joints shall be rabbeted and shall be fastened in two directions with flathead wood screws, when more than one door is used, there shall be a rabbeted overlap of not less than 1 inch. Steel hinges shall be mounted in such a manner as to not lose their holding capacity due to loosening or burning out of the screws when subjected to fire. Such cabinets shall be painted inside and out with fire retardant paint.

(ii) Approved metal storage cabinets will be acceptable.

(iii) Cabinets shall be labeled in conspicuous lettering, "Flammable—Keep fire away."

(c) Not more than 60 gallons of flammable or 120 gallons of combustible liquids shall be stored in any one storage cabinet. Not more than three such cabinets may be located in a single storage area. Quantities in excess of this shall be stored in an inside storage room.

(d)(i) Inside storage room shall be constructed to meet the required fire-resistive rating for their use. Such construction shall comply with the test specifications set forth in Standard Methods of Fire Test of Building Construction and Material, NFPA 251-1972.

(ii) Where an automatic extinguishing system is provided, the system shall be designed and installed in an approved manner. Openings to other rooms or buildings shall be provided with noncombustible liquid-tight raised sills or ramps at least 4 inches in height, or the floor in the storage area shall be at least 4 inches below the surrounding floor. Openings shall be provided with approved self-closing fire doors. The room shall be liquid-tight where the walls join the floor. A permissible alternate to the sill or ramp is an open-trenched trench, inside of the room, which drains to a safe location. Where other portions of the building or other buildings are exposed, windows shall be protected as set forth in the Standard for Fire Doors and Windows, NFPA No. 80-1983, for Class E or F openings. Wood of at least 1-inch nominal thickness may be used for shelving, racks, dunnage, scuffboards, floor overlay and similar installations.

(iii) Materials which will react with water and create a fire hazard shall not be stored in the same room with flammable or combustible liquids.

(iv) Storage in inside storage rooms shall comply with Table D-2 following:

TABLE D-2

Fire protection provided	Fire resistance	Maximum size	Total allowable quantities gals./sq. ft./floor area
Yes	2 hrs.	500 sq. ft.	10
No	2 hrs.	500 sq. ft.	4
Yes	1 hr.	150 sq. ft.	5
No	1 hr.	150 sq. ft.	2

Note: Fire protection system shall be sprinkler, water spray, carbon dioxide or other system approved by a nationally recognized testing laboratory for this purpose.

(v) Electrical wiring and equipment located in inside storage rooms shall be approved for Class 1, Division 1, hazardous locations. For definition of Class 1, Division 1, hazardous locations, see WAC 296-155-456.

(vi) Every inside storage room shall be provided with either a gravity or a mechanical exhausting system. Such system shall commence not more than 12 inches above the floor and be designed to provide for a complete change of air within the room at least 6 times per hour. If a mechanical exhausting system is used, it shall be controlled by a switch located outside of the door. The ventilating equipment and any lighting fixtures shall be operated by the same switch. An electric pilot light shall be installed adjacent to the switch if flammable liquids are dispensed within the room. Where gravity ventilation is provided, the fresh air intake, as well as the exhausting outlet from the room, shall be on the exterior of the building in which the room is located.

(vii) In every inside storage room there shall be maintained one clear aisle at least 3 feet wide. Containers over 30 gallons capacity shall not be stacked one upon the other.

(viii) Flammable and combustible liquids in excess of that permitted in inside storage rooms shall be stored outside of buildings in accordance with subsection (3) of this section.

(3) Storage outside buildings.

(a) Storage of containers (not more than 60 gallons each) shall not exceed 1,100 gallons in any one pile or area. Piles or groups of containers shall be separated by a 5-foot clearance. Piles or groups of containers shall not be nearer than 20 feet to a building.

(b) Within 200 feet of each pile of containers, there shall be a 12-foot-wide access way to permit approach of fire control apparatus.

(c) The storage area shall be graded in a manner to divert possible spills away from buildings or other exposures, or shall be surrounded by a curb or earth dike at least 12 inches high. When curbs or dikes are used, provisions shall be made for draining off accumulations of ground or rain water, or spills of flammable or combustible liquids. Drains shall terminate at a safe location and shall be accessible to operation under fire conditions.

(d) Outdoor portable tank storage.

(i) Portable tanks shall not be nearer than 20 feet from any building. Two or more portable tanks, grouped together, having a combined capacity in excess of 2,200 gallons, shall be separated by a 5-foot-clear area. Individual portable tanks exceeding 1,100 gallons shall be separated by a 5-foot-clear area.

(ii) Within 200 feet of each portable tank, there shall be a 12-foot-wide access way to permit approach of fire control apparatus.

(e) Storage areas shall be kept free of weeds, debris, and other combustible material not necessary to the storage.

(f) Portable tanks, not exceeding 660 gallons, shall be provided with emergency venting and other devices, as required by chapters III and IV of NFPA 30-1972, The Flammable and Combustible Liquids Code.

(g) Portable tanks, in excess of 660 gallons, shall have emergency venting and other devices, as required by chapters II and III of the Flammable and Combustible Liquids Code, NFPA 30-1972.

(4) Fire control for flammable or combustible liquid storage.

(a) At least one portable fire extinguisher, having a rating of not less than 20-B units, shall be located outside of, but not more than 10 feet from, the door opening into any room used for storage of more than 60 gallons of flammable or combustible liquids.

(b) At least one portable fire extinguisher having a rating of not less than 20-B units shall be located not less than 25 feet, nor more than 75 feet, from any flammable liquid storage area located outside.

(c) When sprinklers are provided, they shall be installed in accordance with the Standard for the Installation of Sprinkler Systems, NFPA 13-1972.

(d) At least one portable fire extinguisher having a rating of not less than 20-B:C units shall be provided on all tank trucks or other vehicles used for transporting and/or dispensing flammable or combustible liquids.

(5) Dispensing liquids.

(a) Areas in which flammable or combustible liquids are transferred at the same time, in quantities greater than 5 gallons from one tank or container to another tank or container, shall be separated from other operations by 25-foot distance or by construction having a fire-resistance of at least 1 hour. Drainage or other means shall be provided to control spills. Adequate natural or mechanical ventilation shall be provided to maintain the concentration of flammable vapor at or below 10 percent of the lower flammable limit.

(b) Transfer flammable liquids from one container to another shall be done only when containers are electrically interconnected (bonded).

(c) Flammable or combustible liquids shall be drawn from or transferred into vessels, containers, or tanks within a building or outside only through a closed piping system, from safety cans, by means of a device drawing through the top, or from a container, or portable tanks, by gravity or pump, through an approved self-closing valve. Transferring by means of air pressure on the container or portable tank is prohibited.

(d) The dispensing units shall be protected against collision damage.

(e) Dispensing devices and nozzles for flammable liquids shall be of an approved type, as required by WAC 296-24-33015.

(6) Handling liquids at point of final use.

(a) Flammable liquids shall be kept in closed containers when not actually in use.

(b) Leakage or spillage of flammable or combustible liquids shall be disposed of promptly and safely.

(c) Flammable liquids shall be used only where there are no open flames or other sources of ignition within 50 feet of the operation, unless conditions warrant greater clearance.

(7) Service and refueling areas.

(a) Flammable or combustible liquids shall be stored in approved closed containers, in tanks located underground, or in aboveground portable tanks.

(b) The tank trucks shall comply with the requirements covered in the Standard for Tank Vehicles for Flammable and Combustible Liquids, NFPA No. 385-1977.

(c) The dispensing hose shall be an approved type.

(d) The dispensing nozzle shall be an approved automatic-closing type.

(e) Underground tanks shall not be abandoned.

(f) Clearly identified and easily accessible switch(es) shall be provided at a location remote from dispensing devices to shut off the power to all dispensing devices in the event of an emergency.

(g)(i) Heating equipment of an approved type may be installed in the lubrication or service area where there is no dispensing or transferring of flammable liquids, provided the bottom of the heating unit is at least 18 inches above the floor and is protected from physical damage.

(ii) Heating equipment installed in lubrication or service areas, where flammable liquids are dispensed, shall be of an approved type for garages, and shall be installed at least 8 feet above the floor.

(h) There shall be no smoking or open flames in the areas used for fueling, servicing fuel systems for internal combustion engines, receiving or dispensing of flammable or combustible liquids.

(i) Conspicuous and legible signs prohibiting smoking shall be posted.

(j) The motor of any equipment being fueled shall be shut off during the fueling operation.

(k) Each service or fueling area shall be provided with at least one fire extinguisher having a rating of not less than 20BC located so that an extinguisher will be within 75 feet of each pump, dispenser, underground fill pipe opening, and lubrication or service area.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050. 99-17-094, § 296-155-270, filed 8/17/99, effective 12/1/99. Statutory Authority: Chapter 49.17 RCW. 88-23-054 (Order 88-25), § 296-155-270, filed 11/14/88. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-270, filed 1/21/86; Order 74-26, § 296-155-270, filed 5/7/74, effective 6/6/74.]

WAC 296-155-275 Liquefied petroleum gas (LP-gas). (1) Approval of equipment and systems.

(a) Each system shall have containers, valves, connectors, manifold valve assemblies, and regulators of an approved type.

(b) All cylinders shall meet the department of transportation specification identification requirements published in 49 CFR Part 178, Shipping Container Specifications.

(2) Welding on LP-gas containers. Welding is prohibited on containers.

(3) Container valves and container accessories.

(a) Valves, fittings, and accessories connected directly to the container, including primary shut off valves, shall have a rated working pressure of at least 250 p.s.i.g. and shall be of material and design suitable for LP-gas service.

(b) Connections to containers, except safety relief connections, liquid level gauging devices, and plugged openings, shall have shutoff valves located as close to the container as practicable.

(4) Safety devices.

(a) Every container and every vaporizer shall be provided with one or more approved safety relief valves or devices. These valves shall be arranged to afford free vent to the outer air with discharge not less than 5 feet horizontally away from any opening into a building which is below such discharge.

(b) Shutoff valves shall not be installed between the safety relief device and the container, or the equipment or piping to which the safety relief device is connected, except that a shutoff valve may be used where the arrangement of this valve is such that full required capacity flow through the safety relief device is always afforded.

(c) Container safety relief devices and regulator relief vents shall be located not less than 5 feet in any direction from air openings into sealed combustion system appliances or mechanical ventilation air intakes.

(5) Dispensing.

(a) Filling of fuel containers for trucks or motor vehicles from bulk storage containers shall be performed not less than 10 feet from the nearest masonry-walled building, or not less than 25 feet from the nearest building or other construction and, in any event, not less than 25 feet from any building opening.

(b) Filling of portable containers or containers mounted on skids from storage containers shall be performed not less than 50 feet from the nearest building.

(6) Requirements for appliances.

(a) LP-gas consuming appliances shall be approved types.

(b) Any appliance that was originally manufactured for operation with a gaseous fuel other than LP-gas, and is in good condition, may be used with LP-gas only after it is properly converted, adapted, and tested for performance with LP-gas before the appliance is placed in use.

(7) Containers and regulating equipment installed outside of buildings or structures. Containers shall be upright upon firm foundations or otherwise firmly secured. The possible effect on the outlet piping of settling shall be guarded against by a flexible connection or special fitting.

(8) Containers and equipment used inside of buildings or structures.

(a) When operational requirements make portable use of containers necessary, and their location outside of buildings or structures is impractical, containers and equipment are permitted to be used inside of buildings or structures in accordance with (b) through (k) of this subsection. In addition, there may be provisions of this section that are applicable to the particular use or occupancy.

(b) "Containers in use" means connected for use.

(c) Systems utilizing containers having a water capacity greater than 2 1/2-pounds (nominal 1 pound LP-gas capacity)

shall be equipped with excess flow valves. Such excess flow valves shall be either integral with the container valves or in the connections to the container valve outlets.

(d) Regulators, when required, shall be either directly connected to the container valves or to manifolds connected to the container valves. The regulator shall be suitable for use with LP-gas. Manifolds and fittings connecting containers to pressure regulator inlets shall be designed for at least 250 p.s.i.g. service pressure.

(e) Valves on containers having water capacity greater than 50 pounds (nominal 20 pounds LP-gas capacity) shall be protected from damage while in use or storage.

(f) Aluminum piping or tubing shall not be used.

(g) Hose shall be designed for a working pressure of at least 250 p.s.i.g. Design, construction, and performance of hose, and hose connections shall have their suitability determined by listing by a nationally recognized testing agency. The hose length shall be as short as practical. Hoses shall be long enough to permit compliance with spacing provisions of (a) through (m) of this subsection, without kinking or straining, or causing hose to be so close to a burner as to be damaged by heat.

(h) Portable heaters, including salamanders, shall be equipped with an approved automatic device to shut off the flow of gas to the mainburner, and pilot if used, in the event of flame failure. Such heaters, having inputs above 50,000 BTU per hour, shall be equipped with either a pilot, which must be lighted and proved before the main burner can be turned on, or an electrical ignition system.

Note: The provisions of this subdivision do not apply to portable heaters under 7,500 BTU per hour input when used with containers having a maximum water capacity of 2 1/2 pounds.

(i) Container valves, connectors, regulators, manifolds, piping, and tubing shall not be used as structural supports for heaters.

(j) Containers, regulating equipment, manifolds, pipe, tubing, and hose shall be located to minimize exposure to high temperatures or physical damage.

(k) Containers having a water capacity greater than 2 1/2 pounds (nominal 1 pound LP-gas capacity) connected for use shall stand on a firm and substantially level surface and, when necessary, shall be secured in an upright position.

(l) The maximum water capacity of individual containers shall be 245 pounds (nominal 100 pounds LP-gas capacity).

(m) For temporary heating, heaters (other than integral heater-container units) shall be located at least 6 feet from any LP-gas container. This shall not prohibit the use of heaters specifically designed for attachment to the container or to a supporting standard, provided they are designed and installed so as to prevent direct or radiant heat application from the heater onto the containers. Blower and radiant type heaters shall not be directed toward any LP-gas container within 20 feet.

(n) If two or more heater-container units, of either the integral or nonintegral type, are located in an unpartitioned area on the same floor, the container or containers of each unit shall be separated from the container or containers of any other unit by at least 20 feet.

(o) When heaters are connected to containers for use in an unpartitioned area on the same floor, the total water capacity of containers, manifolded together for connection to a heater or heaters, shall not be greater than 735 pounds (nominal 300 pounds LP-gas capacity). Such manifolds shall be separated by at least 20 feet.

(p) Storage of containers awaiting use shall be in accordance with subsections (10) and (11) of this section.

(9) Multiple container systems.

(a) Valves in the assembly of multiple container systems shall be arranged so that replacement of containers can be made without shutting off the flow of gas in the system. This provision is not to be construed as requiring an automatic changeover device.

(b) Heaters shall be equipped with an approved regulator in the supply line between the fuel cylinder and the heater unit. Cylinder connectors shall be provided with an excess flow valve to minimize the flow of gas in the event the fuel line becomes ruptured.

(c) Regulators and low-pressure relief devices shall be rigidly attached to the cylinder valves, cylinders, supporting standards, the building walls, or otherwise rigidly secured, and shall be so installed or protected from the elements.

(10) Storage of LPG containers. Storage of LPG within building is prohibited.

(11) Storage outside of buildings.

(a) Storage outside of buildings, for containers awaiting use, shall be located from the nearest building or group of buildings, in accordance with Table D-3:

TABLE D-3

Quantity of LP-gas stored:	Distance (feet)
500 lbs. or less	0
501 to 6,000 lbs.	10
6,001 to 10,000 lbs.	20
Over 10,000 lbs.	25

(b) Containers shall be in a suitable ventilated enclosure or otherwise protected against tampering, or possible damage by vehicular traffic.

(12) Fire protection. Storage locations shall be provided with at least one approved portable fire extinguisher having a rating of not less than 20-B:C.

[Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-275, filed 1/21/86; Order 76-29, § 296-155-275, filed 9/30/76; Order 74-26, § 296-155-275, filed 5/7/74, effective 6/6/74.]

WAC 296-155-280 Temporary heating devices. (1) Ventilation.

(a) Fresh air shall be supplied in sufficient quantities to maintain the health and safety of workers. Where natural means of fresh air supply is inadequate, mechanical ventilation shall be provided.

(b) When heaters are used in confined spaces, special care shall be taken to provide sufficient ventilation in order to ensure proper combustion, maintain the health and safety of workers, and limit temperature rise in the area.

(2) Clearance and mounting.

(a) Temporary heating devices shall be installed to provide clearance to combustible material not less than the amount shown in Table D-4.

(b) Temporary heating devices, which are listed for installation with lesser clearances than specified in Table D-4, may be installed in accordance with their approval.

TABLE D-4

Heating appliances	Minimum clearance, (inches)		
	Sides	Rear	Chimney connector
Room heater, circulating type	12	12	18
Room heater, radiant type	36	36	18

(c) Heaters not suitable for use on wood floors shall not be set directly upon them or other combustible materials. When such heaters are used, they shall rest on suitable heat insulating material or at least 1-inch concrete, or equivalent. The insulating material shall extend beyond the heater 2 feet or more in all directions.

(d) Heaters used in the vicinity of combustible tarpaulins, canvas, or similar coverings shall be located at least 10 feet from the coverings. The coverings shall be securely fastened to prevent ignition or upsetting of the heater due to wind action on the covering or other material.

(3) Stability. Heaters, when in use, shall be set horizontally level, unless otherwise permitted by the manufacturer's markings.

(4) Oil-fired heaters.

(a) Flammable liquid-fired heaters shall be equipped with a primary safety control to stop the flow of fuel in the event of flame failure. Barometric or gravity oil feed shall not be considered a primary safety control.

(b) Heaters designed for barometric or gravity oil feed shall be used only with the integral tanks.

(c) Heaters specifically designed and approved for use with separate supply tanks may be directly connected for gravity feed, or an automatic pump, from a supply tank.

(5) Salamanders.

(a) Coverage. The use of solid fuel salamanders is prohibited in buildings and on scaffolds.

(b) General requirements.

(i) All solid fuel salamanders shall be designed and constructed for use with solid fuel, that is, coal or coke.

(ii) Solid fuel salamanders shall be equipped with a cover designed as part of the unit, to prevent spillage of burning material in case of tipover.

(iii) Salamanders shall be assembled in accordance with the instructions issued by the manufacturer.

(iv) The safeguards engineered into the product shall be maintained and any replacement shall be equivalent thereto.

(v) Salamanders shall be stored in such a manner as to prevent deterioration or damage to the unit.

(c) Operation.

(i) Manufacturers' instructions shall be followed by the user.

(ii) Each time a salamander is placed in operation it shall be checked to insure that it is functioning properly. Its operation shall be checked periodically thereafter.

(iii) When concentrations of carbon monoxide attain quantities greater than 35 parts per million (0.0035 percent)

to air volume at employee breathing levels, the salamander shall be extinguished unless additional natural or mechanical ventilation is provided to reduce the carbon monoxide content to permissible limits.

(iv) Tests for presence of carbon monoxide shall be made by a qualified person within 1 hour after the start of each shift and at least every 3 hours thereafter. If concentrations of carbon monoxide reach 20 parts per million to air volume, tests shall be made more frequently to determine if there is a continuing increase of carbon monoxide concentration.

(v) Records of all tests including the date, time, results obtained, and person making tests, shall be maintained for the duration of the project.

(vi) No persons shall be permitted to be within the area being heated by the salamanders except under the following circumstances: When tending the salamanders; when testing the atmosphere; or in emergency situations.

(vii) No employee shall be permitted to enter the heated area until notification is given to another person located outside. Periodic checks shall be made to ensure the health and safety of employees entering the heated area.

(viii) When a salamander is being used, the responsibility for its operation and maintenance shall be assigned to a qualified employee.

(ix) Salamanders shall not be moved, handled, or serviced while hot or burning, or while component parts are hot to the touch.

(x) Salamanders, when in use, shall be set level with the horizontal unless otherwise permitted by the manufacturer's markings. Salamanders shall be designed so as not to tip over when placed on a surface inclined 25° to the horizontal.

(xi) If equivalent protection and safety is afforded by alternative design, the 25° limitation may be reduced.

(xii) Salamanders not suitable for use on wood floors shall not be set directly upon them or other combustible materials. When such salamanders are used they shall rest on suitable insulating material or at least 1-inch concrete or equivalent. The insulating material shall extend beyond the salamander 2 feet or more in all directions.

(xiii) Salamanders used in the vicinity of tarpaulins, canvas, or similar coverings shall be located a safe distance from coverings and other combustible materials. The coverings shall be securely fastened to prevent ignition of the covering or upsetting of the salamanders due to wind action on the covering or other material.

(xiv) Salamanders in use shall be protected to prevent flame extinguishment.

(d) Ventilation.

(i) Fresh air shall be supplied in sufficient quantities to maintain the health and safety of employees. Where natural means for fresh air supply is inadequate, mechanical ventilation shall be provided. Particular attention shall be given to confined spaces and pockets where heat and fumes may accumulate and employees may be present (roof areas, peaks, basement).

(ii) When salamanders are used in confined spaces, special care shall be taken to provide sufficient ventilation in order to assure proper combustion, maintain the health and safety of employees, and limit temperature rise in the area.

(e) Fueling.

(i) Salamanders shall be refueled only by a person trained in such operations.

(ii) Only a 1 day's supply of heater fuel shall be stored inside a building in the vicinity of the salamander. General fuel storage shall be outside the structure.

(iii) All fuel storage shall be maintained a minimum of 25 feet from source of ignition.

(f) Maintenance.

(i) The user shall comply with the maintenance instructions as provided by the manufacturer.

(ii) Equipment showing evidence of deterioration or damage that constitutes a safety or health hazard shall be removed from service.

(iii) Salamander repairs shall be performed in accordance with the manufacturer's recommendations, and replacement parts shall be equal to, the equivalent of, or the same as the original salamander equipment.

[Statutory Authority: Chapter 49.17 RCW, 94-15-096 (Order 94-07), § 296-155-280, filed 7/20/94, effective 9/20/94; Order 76-29, § 296-155-280, filed 9/30/76; Order 74-26, § 296-155-280, filed 5/7/74, effective 6/6/74.]

PART E SIGNS, SIGNALS, AND BARRICADES

WAC 296-155-300 Accident prevention signs and tags. (1) General. Signs and symbols required by this section shall be visible at all times when work is being performed, and shall be removed or covered promptly when the hazards no longer exist.

(2) Danger signs.

(a) Danger signs (see Figure E-1) shall be used only where an immediate hazard exists.

(b) Danger signs shall have red as the predominating color for the upper panel; black outline on the borders; and a white lower panel for additional sign wording.

(3) Caution signs.

(a) Caution signs (see Figure E-2) shall be used only to warn against potential hazards or to caution against unsafe practices.

(b) Caution signs shall have yellow as the predominating color; black upper panel and borders; yellow lettering of "caution" on the black panel; and the lower yellow panel for additional sign wording. Black lettering shall be used for additional wording.

FIGURE E-1

[Statutory Authority: Chapter 49.17 RCW. 93-19-142 (Order 93-04), § 296-155-300, filed 9/22/93, effective 11/1/93; 93-01-067 (Order 92-15), § 296-155-300, filed 12/11/92, effective 1/15/93. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-300, filed 1/21/86; Order 74-26, § 296-155-300, filed 5/7/74, effective 6/6/74.]

(4) Exit signs.

(a) Every exit sign shall have the word "exit" in plainly legible letters not less than 6 inches high, with the principal strokes of letters not less than three-fourths-inch wide.

(b) Every exit sign shall be distinctive in color and shall provide contrast with decorations, interior finish, or other signs.

(5) Safety instruction signs. Safety instruction signs, when used, shall be white with green upper panel with white letters to convey the principal message. Any additional wording on the sign shall be black letters on the white background.

(6) Directional signs. Directional signs, other than automotive traffic signs specified in subsection (7) of this section, shall be white with a black panel and a white directional symbol. Any additional wording on the sign shall be black letters on the white background.

(7) Traffic signs.

(a) Construction areas shall be posted with legible traffic signs at points of hazard.

(b) All traffic control signs or devices used for protection of construction workers shall conform to and be set up according to American National Standards Institute D6.1-1988, Manual on Uniform Traffic Control Devices for Streets and Highways as amended by the Washington state department of transportation (M24-OT (HT)).

(8) Accident prevention tags.

(a) Accident prevention tags shall be used as a temporary means of warning employees of an existing hazard, such as defective tools, equipment, etc. They shall not be used in place of, or as a substitute for, accident prevention signs.

(b) Specifications for accident prevention tags similar to those in Table E-1 shall apply.

(i) Additional rules. American National Standards Institute (ANSI) Z35.1-1972, Specifications for Accident Prevention signs, and Z35.2-1968, Specifications for Accident Prevention Tags, contain rules which are additional to the rules prescribed in this section. The employer shall comply with ANSI Z35.1-1972 and Z35.2-1968 with respect to rules not specifically prescribed in this part.

WAC 296-155-305 Signaling. Flaggers.

(1) When operations are such that signs, signals, and barricades do not provide the necessary protection on or adjacent to a highway or street, flaggers or other appropriate traffic controls shall be provided.

(2) Signaling directions by flaggers shall conform to American National Standards Institute D6.1-1988, Manual on Uniform Traffic Control Devices for Streets and Highways, as amended by the Washington state department of transportation. (M24-01 (HT).)

(3) Hand signaling by flaggers shall be by use of sign paddles at least 18 inches in diameter with series "C" letters at least 6 inches high or lights approved by the transportation commission. When hand signaling is done in periods of darkness, the sign paddles must be reflectorized or illuminated as required by ANSI D6.1-1988, Manual on Uniform Traffic Control Devices. The "STOP" side of the paddle shall have a red background with white lettering. When a paddle has a "SLOW" side, the background shall be orange and the lettering black. Colors shall conform to ANSI D6.1 current edition.

(4) Flaggers shall wear an orange warning garment and a yellow protective helmet while flagging. Warning garments worn at night shall be of reflectorized material. Yellow is specified as the color of helmets; the issue is clearly one of high visibility. Other colors providing equal visibility than the specified yellow will be acceptable. The iridescent or reflectorized hard hats, available in several colors, which provide "high visibility" in both day and night applications, will meet standard specifications.

(5) Each flagger shall be trained every three years in accordance with the American National Standards Institute (ANSI) D6.1-1988 Manual on Uniform Traffic Control Devices as amended by the Washington state department of transportation (M 24-01 (HT)).

Note: Personnel that have not completed a flagging course may be assigned duties as flaggers only during emergencies when a sudden, generally unexpected, set of circumstances demands immediate attention.

(6) Each flagger shall have in their possession a valid certificate which verifies completion of the training prescribed in subsection (5) of this section. Each certificate shall contain the date the card expires.

[Statutory Authority: Chapter 49.17 RCW. 93-19-142 (Order 93-04), § 296-155-305, filed 9/22/93, effective 11/1/93; 93-01-067 (Order 92-15), § 296-155-305, filed 12/11/92, effective 1/15/93; 89-11-035 (Order 89-03), § 296-155-305, filed 5/15/89, effective 6/30/89. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-305, filed 1/21/86; Order 76-6, § 296-155-305, filed 3/1/76; Order 74-26, § 296-155-305, filed 5/7/74, effective 6/6/74.]

WAC 296-155-310 Barricades. Barricades for protection of employees shall conform to the portions of the American National Standards Institute D6.1-1988, Manual on Uniform Traffic Control Devices for Streets and Highways, as amended by the Washington state department of highways, (M24-01 (HT)), relating to barricades.

[Statutory Authority: Chapter 49.17 RCW. 93-19-142 (Order 93-04), § 296-155-310, filed 9/22/93, effective 11/1/93; Order 74-26, § 296-155-310, filed 5/7/74, effective 6/6/74.]

WAC 296-155-315 Definitions applicable to this part.

(1) "Barricade" means an obstruction to deter the passage of persons or vehicles.

(2) "Signs" are the warnings of hazard, temporarily or permanently affixed or placed, at locations where hazards exist.

(3) "Signals" are moving signs, provided by workers, such as flagger, or by devices, such as flashing lights, to warn of possible or existing hazards.

(4) "Tags" are temporary signs, usually attached to a piece of equipment or part of a structure, to warn of existing or immediate hazards.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-315, filed 7/20/94, effective 9/20/94; Order 76-6, § 296-155-315, filed 3/1/76.]

PART F

MATERIAL HANDLING, STORAGE, USE AND DISPOSAL

WAC 296-155-325 General requirements for storage. (1) General.

(a) All materials stored in tiers shall be stacked, racked, blocked, interlocked, or otherwise secured to prevent sliding, falling or collapse.

(b) Maximum safe load limits of floors within buildings and structures, in pounds per square foot, shall be conspicuously posted in all storage areas, except for floor or slab on grade. Maximum safe loads shall not be exceeded.

(c) Aisles and passageways shall be kept clear to provide for the free and safe movement of material handling equipment or employees. Such areas shall be kept in good repair.

(d) When a difference in road or working levels exist, means such as ramps, blocking, or grading shall be used to ensure the safe movement of vehicles between the two levels.

(2) Material storage.

(a)(i) Material stored inside buildings under construction shall not be placed within 6 feet of any hoistway or inside floor openings, nor within 10 feet of an exterior wall which does not extend above the top of the material stored.

(ii) Temporary floors, used in steel erection, concrete forms and shoring (i.e., stripped forms, shoring jacks, clamps, steel rods or pipes, base plates, etc.) placed within

close proximity to an open-sided floor for movement to another tier for placement, shall be considered "in-process equipment and subject to the provisions contained in Parts "O" and "P" of this standard. When this type equipment is to be left overnight or for longer periods of time it shall be anchored and braced to prevent displacement in any direction. In addition this equipment shall be subject to the provisions of this subsection while in "interim storage."

(b) Each employee required to work on stored material in silos, hoppers, tanks, and similar storage areas shall be equipped with personal fall arrest equipment meeting the requirements of chapter 296-155 WAC, Part C-1.

(c) Noncompatible materials shall be segregated in storage.

(d) Bagged materials shall be stacked by stepping back the layers and cross-keying the bags at least every 10 bags high.

(i) When cement and lime is delivered in paper bags they shall be carefully handled to prevent the bags bursting.

(ii) Cement and lime bags shall not be piled more than ten bags high except when stored in bins or enclosures built for the purpose of storage.

(iii) When bags are removed from the pile, the length of the pile shall be kept at an even height, and the necessary step backs every five bags maintained.

(iv) Persons handling cement and lime bags shall wear eye protection which prevents contact between the substance and the worker's eyes (such as goggles or other sealed eye protection) and shall wear long sleeve shirts with close fitting collar and cuffs.

(v) Persons shall be warned against wearing clothing that has become hard and stiff with cement.

(vi) Persons shall be instructed to report any susceptibility of their skin to cement and lime burns.

(vii) A hand cream or vaseline and eye wash shall be provided and kept ready for use to prevent burns.

(viii) Lime shall be stored in a dry place to prevent a premature slacking action that may cause fire.

(e) Materials shall not be stored on scaffolds or runways in excess of supplies needed for immediate operations.

(f) Brick stacks shall not be more than 7 feet in height. When a loose brick stack reaches a height of 4 feet, it shall be tapered back 2 inches in every foot of height above the 4-foot level.

(i) Brick shall never be stacked, for storage purposes, on scaffolds or runways.

(ii) When delivering brick on scaffolds inside the wall lines in wheelbarrows, they shall be dumped toward the inside of the building and not toward the wall.

(iii) Blocks shall always be stacked and not thrown in a loose pile.

(g) When masonry blocks are stacked higher than 6 feet, the stack shall be tapered back one-half block per tier above the 6-foot level.

(i) When blocks are stacked inside a building, the piles shall be so distributed as not to overload the floor on which they stand.

(ii) Blocks shall not be dropped or thrown from an elevation or delivered through chutes.

(h) Lumber:

(i) Used lumber shall have all nails withdrawn before stacking.

(ii) Lumber shall be stacked on level and solidly supported sills.

(iii) Lumber shall be so stacked as to be stable and self-supporting.

(iv) Lumber stacks shall not exceed 20 feet in height provided that lumber to be handled manually shall not be stacked more than 16 feet high.

(v) All stored lumber shall be stacked on timber sills to keep it off the ground. Sills shall be placed level on solid supports.

(vi) Cross strips shall be placed in the stacks when they are stacked more than four feet high.

(i) Structural steel, poles, pipe, bar stock, and other cylindrical materials, unless racked, shall be stacked and blocked so as to prevent spreading or tilting.

(i) Persons handling reinforcing steel shall wear heavy gloves.

(ii) When bending of reinforcing steel is done on the job, a strong bench shall be provided, set up on even dry ground or a floor for the persons to work on.

(iii) Structural steel shall be carefully piled to prevent danger of members rolling off or the pile toppling over.

(iv) Structural steel shall be kept in low piles, consideration being given to the sequence of use of the members.

(v) Corrugated and flat iron shall be stacked in flat piles, with the piles not more than four feet high and spacing strips shall be placed between each bundle.

(j) Sand, gravel and crushed stone.

(i) Stock piles shall be frequently inspected to prevent their becoming unsafe by continued adding to or withdrawing from the stock.

(ii) If material becomes frozen, it shall not be removed in a manner that would produce an overhang.

[Statutory Authority: Chapter 49.17 RCW. 95-10-016, § 296-155-325, filed 4/25/95, effective 10/1/95; 94-15-096 (Order 94-07), § 296-155-325, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-325, filed 1/21/86; Order 74-26, § 296-155-325, filed 5/7/74, effective 6/6/74.]

WAC 296-155-329 Qualified person—Rigging. Qualified person - A person who, by possession of a recognized degree or certificate of professional standing, or who, by extensive knowledge, training, and experience, has successfully demonstrated the ability to solve or resolve problems relating to the subject matter.

Also has authorization or authority by the nature of their position to take prompt corrective measures to eliminate them. The person shall be knowledgeable in the requirements of this part.

[Recodified as § 296-155-329, filed 8/4/98, effective 8/4/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060. 98-13-069, § 296-155-229, filed 6/15/98, effective 8/15/98.]

WAC 296-155-330 Rigging equipment for material handling. (1) General.

[Title 296 WAC—p. 2298]

(a) Rigging equipment for material handling shall be inspected prior to use on each shift and as necessary during its use to ensure that it is safe. Defective rigging equipment shall be removed from service.

(b) Rigging equipment shall not be loaded in excess of its recommended safe working load, as prescribed in Tables F-1 through F-20 in this part and shall comply with ANSI/ASME B30.9-1996.

(c) Rigging equipment, when not in use, shall be removed from the immediate work area so as not to present a hazard to employees.

(d) Special rigging accessories (i.e., spreader bars, grabs, hooks, clamps, etc.) or other lifting accessories shall be marked with the rated capacity. All components shall be proof-tested to 125 percent of the rated load prior to the first use. Permanent records shall be maintained on the job site for all special rigging accessories.

(2) Alloy steel chains. Chains used for overhead lifting shall be proof tested alloy steel.

(a) Welded alloy steel chain slings shall have permanently affixed durable identification stating size, grade, rated capacity, and sling manufacturer.

(b) Hooks, rings, oblong links, pear-shaped links, welded or mechanical coupling links, or other attachments, when used with alloy steel chains, shall have a rated capacity at least equal to that of the chain.

(c) The use of job or shop hooks and links, or makeshift fasteners, formed from bolts, rods, etc., or other such attachments, shall be prohibited.

(d) Rated capacity (working load limit) for alloy steel chain slings shall conform to the values shown in Table F-1.

(e) Whenever wear at any point of any chain link exceeds that shown in Table F-2, the assembly shall be removed from service.

(f) If at any time any three foot length of chain is found to have stretched one-third the length of a link it shall be discarded.

(g) The practice of placing bolts, nails, or cold shuts between two links to shorten chains is prohibited.

(h) Splicing broken chains by inserting a bolt between two links with the heads of the bolt and the nut sustaining the load, or passing one link through another and inserting a bolt or nail to hold it, is prohibited.

(i) Wherever annealing of chains is attempted, it shall be done in properly equipped annealing furnaces and under the direct supervision of a competent person.

(3) Wire rope.

(a) Table F-3 through F-14 shall be used to determine the safe working loads of various sizes and classifications of improved plow steel wire rope and wire rope slings with various types of terminals. For sizes, classifications, and grades not included in these tables, the safe working load recommended by the manufacturer for specific, identifiable products shall be followed, provided that a safety factor of not less than 5 is maintained.

(b) Protruding ends of strands in splices on slings and bridles shall be covered or blunted.

(c) Wire rope shall not be secured by knots.

(d) The following limitations shall apply to the use of wire rope:

(i) An eye splice made in any wire rope shall have not less than three full tucks.

Note: This requirement shall not preclude the use of another form of splice or connection which can be shown to be as efficient and which is not otherwise prohibited.

(ii) Except for eye splices in the ends of wires and for endless rope slings, each wire rope used in hoisting or lowering, or in pulling loads, shall consist of one continuous piece without knot or splice.

(iii) Wire rope shall not be used, if in any length of eight diameters, the total number of visible broken wires exceeds 10 percent of the total number of wires, or if the rope shows other signs of excessive wear, corrosion, or defect.

(e) When U-bolt wire rope clips are used to form eyes, Table F-20 shall be used to determine the number and spacing of clips.

(f) When used for eye splices, the U-bolt shall be applied so that the "U" section is in contact with the dead end of the rope.

(g) U-Bolt wire rope clips shall be made of drop-forged steel.

Note: See Table F-20 for number of clamps and spacing requirements.

CORRECT METHOD OF ATTACHING WIRE ROPE CLIPS

U-Bolt of all clips on dead end of rope

(h) Slings shall not be shortened with knots or bolts or other makeshift devices.

(i) Thimbles shall be used in cable eyes whenever practicable.

(j) The clamp nuts shall be tightened up frequently during the operation to prevent slipping.

(4) Natural rope, and synthetic fiber.

(a) General. When using natural or synthetic fiber rope slings, Tables F-15, F-16, F-17 and F-18 shall apply.

(b) All splices in rope slings provided by the employer shall be made in accordance with fiber rope manufacturers' recommendations.

(i) In manila rope, eye splices shall contain at least three full tucks, and short splices shall contain at least six full tucks (three on each side of the centerline of the splice).

(ii) In layed synthetic fiber rope, eye splices shall contain at least four full tucks, and short splices shall contain at least eight full tucks (four on each side of the centerline of the splice).

(iii) Strand end tails shall not be trimmed short (flush with the surface of the rope) immediately adjacent to the full tucks. This precaution applies to both eye and short splices and all types of fiber rope. For fiber ropes under 1-inch diameter, the tails shall project at least six rope diameters beyond the last full tuck. For fiber ropes 1-inch diameter and larger,

the tails shall project at least 6 inches beyond the last full tuck. In applications where the projecting tails may be objectionable, the tails shall be tapered and spliced into the body of the rope using at least two additional tucks (which will require a tail length of approximately six rope diameters beyond the last full tuck).

(iv) For all eye splices, the eye shall be sufficiently large to provide an included angle of not greater than 60° at the splice when the eye is placed over the load or support.

(v) Knots shall not be used in lieu of splices.

(vi) All fibre rope used for hoisting purposes or for the support of scaffolds, or any part thereof, shall be of high grade Manila hemp (abaca). Fibre rope used for the support of scaffolds, or any part thereof, except rope used for lashing or tying purposes, shall be not less than 3/4-inch in diameter.

(vii) The maximum safe working load for fibre rope shall not exceed the maximum strength as shown in the following table:

**STRENGTH OF HIGH GRADE MANILA (ABACA) ROPE
COMMON LAY THREE STRAND**

Approximate Diameter in inches	Circumference in inches	Safe Load in Pounds
3/16 (6 yarns)	1/2	98
1/4 (6 yarns)	3/4	116
5/16 (6 yarns)	1	200
3/8 (12 yarns)	1 1/8	241
7/16 (15 yarns)	1 1/4	291
15/32 (18 yarns)	1 3/8	350
1/2 (21 yarns)	1 1/2	408
9/16	1 3/4	526
5/8	2	666
3/4	2 1/4	816
13/16	2 1/2	983
7/8	2 3/4	1,166
1	3	1,366
1 1/16	3 1/4	1,683
1 1/8	3 1/2	1,833
1 1/4	3 3/4	2,083
1 5/16	4	2,365
1 3/8	4 1/4	2,666
1 1/2	4 1/2	2,916

Note: This table is based on data contained in the U.S. Department of Commerce circular of the Bureau of Standards, No. 324.

(5) Synthetic webbing (nylon, polyester, and polypropylene).

(a) The employer shall have each synthetic web sling marked or coded to show:

- (i) Name or trademark of manufacturer.
 - (ii) Rated capacities for the type of hitch.
 - (iii) Type of material.
- (b) Rated capacity shall not be exceeded.

(6) Shackles and hooks.

(a) Table F-19 shall be used to determine the safe working loads of various sizes of shackles, except that higher safe working loads are permissible when recommended by the manufacturer for specific, identifiable products, provided that a safety factor of not less than 5 is maintained.

(b) The manufacturer's recommendations shall be followed in determining the safe working loads of the various sizes and types of specific and identifiable hooks. All hooks for which no applicable manufacturer's recommendations are

available shall be tested to twice the intended safe working load before they are initially put into use. The employer shall maintain a record of the dates and results of such tests.

(c) Hooks shall not be modified by welding and/or drilling unless written approval by the manufacturer has been received.

(d) No open hook shall be used to hoist a bucket, cage, spreader, or skip, nor in any circumstances where the dislodgment of the hook could cause a risk of injury to workers. A safety-hook, mousing, or shackle shall be employed in such circumstances.

(e) When shackles are used, shackle pins shall be secured to prevent accidental withdrawal.

(7) Slings.

(a) When slings are provided as a part of the hoisting equipment, every precaution shall be taken to keep them in a serviceable condition.

(i) Wire rope slings shall be frequently inspected and oiled.

(ii) Slings shall not be left where they can be damaged by traffic or form stumbling hazards.

(iii) Blocks or heavy bagging shall be used at corners of the load to protect the sling from sharp bending.

(iv) Wire rope which has been welded or been subject to welding of any kind shall not be used.

(v) The wire rope shall not be burned off with heat. This may weld the ends of the wires and strands together.

(b) When a load is lifted by a multiple rope sling the sling shall be so arranged that the strain can be equalized between the ropes.

(i) When using a sling with both ends engaged in the hoisting block, the sling shall be adjusted so as to equalize the stress.

(ii) Slings shall be placed on the load at safe lifting angles.

(8) Material handling—General.

(a) When necessary to store building material on public thoroughfares, care shall be exercised to see that it is so piled or stacked as to be safe against collapse or falling over.

(b) Material shall be so located as not to interfere with, or present a hazard to employees, traffic or the public.

(9) Placing and removal of forms.

(a) When moved or raised by crane, cableway, A-frame, or similar mechanical device, forms shall be securely attached to slings having a minimum safety factor of five. Use of No. 9 tie wire, fiber rope, and similar makeshift lashing shall be prohibited.

(b) Taglines shall be used in moving panels or other large sections of forms by crane or hoist.

(c) All hoisting equipment, including hoisting cable used to raise and move forms shall have a minimum safety factor incorporated in the manufacturer's design, and the manufacturer's recommended loading shall not be exceeded. Field-fabricated or shop-fabricated hoisting equipment shall be designed or approved by a registered professional engineer, incorporating a minimum safety factor of five in its design. Panels and built-up form sections shall be equipped with metal hoisting brackets for attachment of slings.

(10) Precast concrete and tilt-up operations.

(a) It shall be the responsibility of the contractor to use accessories which are designed to be compatible.

(b) The design capacity of all lifting devices and accessories shall be known. The devices and accessories with the appropriate capacity shall be used.

(c) Prior to pouring the panels of a tilt-up type construction job, a set of plans or job specifications, including lifting procedures, shall be drawn up.

(i) These plans shall be at the job site and made available upon request.

(ii) Any changes made in the rigging procedure of a tilt-up panel or slab shall provide the same degree of safety as required by the original plans.

(iii) The plans or specifications shall contain the following information:

(A) The type, size, and location of all lifting inserts.

(B) The type, size, and location of all brace inserts or fittings for guy wires in each panel and floor or support.

(C) The size of braces or guys to be used.

(D) The compression strength which concrete panels must attain prior to being lifted.

(iv) The following conditions shall be included in the erection process and shall be incorporated in the design plan:

(A) Inserts to be installed for lifting sections of tilt-up precast panels shall be designed mechanically to maintain a safety factor of three.

(B) Lifting inserts which are embedded or otherwise attached to precast concrete members, other than the tilt-up members, shall be capable of supporting at least four times the maximum intended load applied or transmitted to them.

(C) The compression strength of the concrete shall be such that when the proper type, size, and amount of inserts are installed a minimum safety factor of two will be maintained.

(v) Lifting hardware shall be capable of supporting at least five times the maximum intended load applied or transmitted to the lifting hardware.

(vi) Lifting bolts or other lifting devices which have been bent, worn, or are otherwise defective shall be discarded.

(vii) Manufactured products shall not be altered in a manner which would reduce the safe working load to less than its original value.

(viii) Inserts shall be positioned so that bolts, or lifting devices, when inserted, will be perpendicular to the face on which they are placed.

(d) Design of the panels and layout of the pour shall be made in such a manner so that when picking, the top of the panel will be away from the crane. If this is not possible, the contractor shall consult with a representative of the department and the crane company involved to determine the procedure to be followed in lifting and placing in its permanent position safely. Panels shall be lifted and handled in such a manner that they will not strike the hoisting equipment, in case of failure.

(e) A qualified rigging person shall be designated and shall consult with the crane operator on lifting procedures prior to making the pick. The qualified rigging person shall be located in such a position during the pick of the panel that they can observe both the crane operator and the employees working in the immediate area.

- (11) Rigging in prestressed and post tensioned.
 - (a) Stressed members shall be handled at pick points specifically designated on the manufacturer's drawings.
 - (b) Stressed members shall be lifted with lifting devices recommended by the manufacturer or the engineer in charge.
 - (c) No one shall be allowed under stressed members during lifting and erection.

[Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060. 98-13-069, § 296-155-330, filed 6/15/98, effective 8/15/98. Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-330, filed 7/20/94, effective 9/20/94. WAC 296-155-335 Disposal of waste materials. (1) Whenever materials are dropped more than 20 feet to any point lying outside the exterior walls of the building, an enclosed chute of wood, or equivalent material, shall be used. For the purpose of this subsection, an enclosed chute is a slide, closed in on all sides, through which material is moved from a high place to a lower one.

(2) When debris is dropped without the use of chutes, the area onto which the material is dropped shall be completely enclosed with barricades not less than 42 inches high and not less than 20 feet back from the projected edge of the opening above. Signs warning of the hazard of falling materials shall be posted at each level. Removal shall not be permitted in this lower area until debris handling ceases above.

(3) All scrap lumber, waste material, and rubbish shall be removed from the immediate work area as the work progresses.

(4) Disposal of waste material or debris by burning shall comply with local fire regulations.

(5) All solvent waste, oily rags, and flammable liquids shall be kept in fire resistant covered containers until removed from the worksite.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-335, filed 1/21/86; Order 74-26, § 296-155-335, filed 5/7/74, effective 6/6/74.]

3/32	7 x 7	0.51	0.39	0.38	0.29	0.89	0.67
1/8	7 x 7	0.95	0.71	0.71	0.53	1.6	1.2
3/16	7 x 7	2.1	1.5	1.5	1.2	3.6	2.7
3/16	6 x 19	1.7	1.3	1.3	0.98	3.0	2.2
1/4	6 x 19	3.1	2.3	2.3	1.7	5.3	4.0
5/16	6 x 19	4.8	3.6	3.6	2.7	8.3	6.2
3/8	6 x 19	6.8	5.1	5.1	3.8	12.0	8.9
7/16	6 x 19	9.3	6.9	6.9	5.2	16.0	12.0
1/2	6 x 19	12.0	9.0	9.0	6.7	21.0	15.0
9/16	6 x 19	15.0	11.0	11.0	8.5	26.0	20.0
5/8	6 x 19	19.0	14.0	14.0	10.0	32.0	24.0
3/4	6 x 19	27.0	20.0	20.0	15.0	46.0	35.0
7/8	6 x 19	36.0	27.0	27.0	20.0	62.0	47.0
1	6 x 19	47.0	35.0	35.0	26.0	81.0	61.0

* These values only apply when the D/d ratio is 20 or greater where:
D = Diameter of curvature around which the body of the sling is bent.
d = Diameter of component rope.

(2001 Ed.)

PART G
TOOLS—HAND AND POWER

WAC 296-155-350 General requirements. (1) Condition of tools. All hand and power tools and similar equipment, whether furnished by the employer or the employee, shall be maintained in a safe condition.

(2) Guarding.

(a) When power operated tools are designed to accommodate guards, they shall be equipped with such guards when in use.

(b) Belts, gears, shafts, pulleys, sprockets, spindles, drums, fly wheels, chains, or other reciprocating, rotating or moving parts of equipment shall be guarded if such parts are exposed to contact by employees or otherwise create a hazard. Guarding shall meet the requirements as set forth in American National Standards Institute, B15.1-1953 (R1958), Safety Code for Mechanical Power-Transmission Apparatus.

(3) Personal protective equipment. Employees using hand and power tools and exposed to the hazard of falling, flying, abrasive, and splashing objects, or exposed to harmful dusts, fumes, mists, vapors, or gases shall use the particular personal protective equipment necessary to protect them from the hazard. All personal protective equipment shall meet the requirements and be maintained according to Parts B and C of this chapter.

(4) Switches.

(a) Scope. This subsection does not apply to concrete vibrators, concrete breakers, powered tampers, jack hammers, rock drills, and similar hand operated power tools.

(b) All hand-held powered platen sanders, grinders with wheels 2-inch diameter or less, routers, planers, laminate trimmers, nibblers, shears, scroll saws, and jigsaws with blade shanks one-fourth of an inch wide or less may be equipped with only a positive "on-off" control.

(c) All hand-held powered drills, tappers, fastener drivers, horizontal, vertical, and angle grinders with wheels greater than 2 inches in diameter, disc sanders, belt sanders, reciprocating saws, saber saws, and other similar operating powered tools shall be equipped with a momentary contact "on-off" control and may have a lock-on control provided that turn-off can be accomplished by a single motion of the same finger or fingers that turn it on.

(d) All other hand-held powered tools, such as circular saws, chain saws, and percussion tools, shall be equipped with a constant pressure switch that will shut off the power when the pressure is released.

(e) Disconnect switches. All fixed power driven tools shall be provided with a disconnect switch that can either be locked or tagged in the off position.

(f) Self-feed. Automatic feeding devices shall be installed on machines whenever the nature of the work will permit. Feeder attachments shall have the feed rolls or other moving parts covered or guarded so as to protect the operator from hazardous points.

[Order 74-26, § 296-155-350, filed 5/7/74, effective 6/6/74.]

WAC 296-155-355 Hand tools. (1) Employers shall not issue or permit the use of unsafe hand tools.

(2) Wrenches, including adjustable, pipe, end, and socket wrenches shall not be used when jaws are sprung or worn to the point that slippage occurs.

(3) Nails shall not be cut with an axe.

(4) Impact tools, such as drift pins, wedges, and chisels, shall be kept free of mushroomed heads.

(5) The wooden handles of tools shall be kept free of splinters or cracks and shall be kept tight in the tool.

[Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-355, filed 1/21/86; Order 74-26, § 296-155-355, filed 5/7/74, effective 6/6/74.]

WAC 296-155-360 Power-operated hand tools. (1) Electric power-operated tools.

(a) Electric power operated tools shall either be of the approved double-insulated type or grounded in accordance with Part I of this chapter.

(b) The use of electric cords for hoisting or lowering tools shall not be permitted.

(2) Pneumatic power tools.

(a) Pneumatic power tools and hose sections shall be secured by threaded couplings, quick disconnect couplings or by 100 pound tensile strength safety chain or equivalent across each connection to prevent the tool or hose connections from becoming accidentally disconnected.

(b) Safety clips or retainers shall be securely installed and maintained on pneumatic impact (percussion) tools to prevent attachments from being accidentally expelled.

(c) All pneumatically driven nailers, staplers, and other similar equipment provided with automatic fastener feed, shall have a safety device on the muzzle to prevent the tool from ejecting fasteners, unless the muzzle is in contact with the work surface.

EXCEPTION: Pneumatic nailers or staplers utilizing "fine wire" brads or staples do not require a muzzle contact safety device, provided:

(1) The overall weight of the fastening device does not exceed the weight of standard 18 gauge wire, 1-1/2 inches long.

(2) The operator and any other person within 12 feet of the point of operation wear approved eye protection.

Note: The normal maximum diameter tolerance for manufacturing standard 18 gauge wire is .045 inches.

(d) Compressed air shall not be used at the nozzle for cleaning purposes except where reduced to less than 30 p.s.i. and then only with effective chip guarding and personal pro-

(2001 Ed.)

ective equipment which meets the requirements of Part C of this chapter.

Note: The above requirement does not apply to concrete form, mill scale and similar cleaning purposes. Concrete form, mill scale, and similar cleaning may be performed with air pressure exceeding 30 p.s.i. provided the nozzle and/or cleaning pipe is at least three feet long with a quick-closing (deadman) valve between the hose and the nozzle or pipe. The operator and all other employees within range of flying debris shall be protected by eye or face protection as specified in WAC 296-155-215.

(e) The manufacturer's safe operating pressure for hoses, pipes, valves, filters, and other fittings shall not be exceeded.

(f) The use of hoses for hoisting or lowering tools shall not be permitted.

(g) All hoses exceeding 1/2-inch inside diameter shall have a safety device at the source of supply or branch line to reduce pressure in case of hose failure.

(h) Airless spray guns of the type which atomize paints and fluids at high pressures (1,000 pounds or more per square inch) shall be equipped with automatic or visible manual safety devices which will prevent pulling of the trigger to prevent release of the paint or fluid until the safety device is manually released.

(i) In lieu of the above, a diffuser nut which will prevent high pressure, high velocity release, while the nozzle tip is removed, plus a nozzle tip guard which will prevent the tip from coming into contact with the operator, or other equivalent protection, shall be provided.

(j) Abrasive blast cleaning nozzles. The blast cleaning nozzles shall be equipped with an operating valve which must be held open manually. A support shall be provided on which the nozzle may be mounted when it is not in use.

(3) Fuel powered tools.

(a) All fuel powered tools shall be stopped while being refueled, serviced, or maintained, and fuel shall be transported, handled, and stored in accordance with Part D of this chapter.

(b) When fuel powered tools are used in enclosed spaces, the applicable requirements for concentrations of toxic gases and use of personal protective equipment as outlined in Parts B and C of this chapter shall apply.

(4) Hydraulic power tools.

(a) The fluid used in hydraulic powered tools shall be fire resistant fluid approved under schedule 30 of the Bureau of Mines, U.S. Department of the Interior, and shall retain its operating characteristics at the most extreme temperatures to which it will be exposed.

(b) The manufacturer's safe operating pressures for hoses, valves, pipes, filters, and other fittings shall not be exceeded.

[Statutory Authority: Chapter 49.17 RCW, 94-15-096 (Order 94-07), § 296-155-360, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-360, filed 1/21/86; Order 76-29, § 296-155-360, filed 9/30/76; Order 76-6, § 296-155-360, filed 3/1/76; Order 74-26, § 296-155-360, filed 5/7/74, effective 6/6/74.]

WAC 296-155-363 Safety requirements for powder actuated fastening systems, in accordance with ANSI A10.3-1985, Safety Requirements for Powder Actuated Fastening Systems.

[Statutory Authority: Chapter 49.17 RCW, 91-11-070 (Order 91-01), § 296-155-363, filed 5/20/91, effective 6/20/91. Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-363, filed 1/21/86.]

WAC 296-155-36301 Scope. This standard provides safety requirements for a powder actuated fastening tool or machine which propels a stud, pin, fastener, or other object for the purpose of affixing it by penetration to another object.

This standard does not apply to devices designed for attaching objects to soft construction materials, such as wood, plaster, tar, dry wallboard, and the like, or to stud welding equipment.

[Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-36301, filed 1/21/86.]

WAC 296-155-36303 Purpose. The purpose of this standard is to provide reasonable safety for life, limb, and property, by establishing requirements for design, construction, operation, service, and storage of powder actuated fastening tools, fasteners and power loads.

[Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-36303, filed 1/21/86.]

WAC 296-155-36305 Definitions applicable to this section. (1) Angle control - a safety feature designed to prevent a tool from operating when tilted beyond a predetermined angle.

(2) Approved - meeting the requirements of this standard and acceptable to the department of labor and industries.

(3) Cased power load - a power load with the propellant contained in a closed case.

(4) Caseless power load - a power load with the propellant in solid form not requiring containment.

(5) Chamber (noun) - the location in the tool into which the power load is placed and in which it is actuated.

(6) Chamber (verb) - to fit the chamber according to manufacturer's specifications.

(7) Fasteners - any pins (unthreaded heads) or studs (threaded heads) driven by powder actuated tools.

(8) Fixture - a special shield that provides equivalent protection where the standard shield cannot be used.

(9) Head - that portion of a fastener that extends above the work surface after being properly driven.

(10) Misfire - a condition in which the power load fails to ignite after the tool has been operated.

(11) Powder actuated fastening system - a method comprising the use of a powder actuated tool, a power load, and a fastener.

(12) Powder actuated tool (also known as tool) - a tool that utilizes the expanding gases from a power load to drive a fastener.

(13) Power load - the energy source used in powder actuated tools.

(14) Qualified operator - a person who meets the requirements of WAC 296-155-36321 (1) and (2).

(15) Shield - a device, attached to the muzzle end of a tool, which is designed to confine flying particles.

(16) Spalled area - a damaged and nonuniform concrete or masonry surface.

(17) Test velocity - the measurement of fastener velocity performed in accordance with WAC 296-155-36307 (1)(m).

(18) Tools - tools can be divided into two types: Direct acting and indirect acting; and three classes: Low velocity, medium velocity, and high velocity.

(a) Direct acting tool - a tool in which the expanding gas of the power load acts directly on the fastener to be driven.

(b) Indirect acting tool - a tool in which the expanding gas of the power load acts on a captive piston, which in turn drives the fastener.

(c) Low-velocity tool - a tool whose test velocity has been measured ten times while utilizing the highest velocity combination of:

(i) The lightest commercially available fastener designed for that specific tool;

(ii) The strongest commercially available power load that will properly chamber in the tool;

(iii) The piston designed for that tool and appropriate for that fastener; that will produce an average test velocity from the ten tests not in excess of 100 meters per second (328 feet per second) with no single test having a velocity of over 108 m/s (354 ft/s).

(d) Medium-velocity tool - a tool whose test velocity has been measured ten times while utilizing the highest velocity combination of:

(i) The lightest commercially available fastener designed for the tool;

(ii) The strongest commercially available power load that will properly chamber in the tool;

(iii) The piston designed for that tool and appropriate for that fastener; that will produce an average test velocity from ten tests in excess of 100 m/s (328 ft/s) but not in excess of 150 m/s (492 ft/s) with no single test having a velocity of 160 m/s (525 ft/s).

(e) High-velocity tool - a tool whose test velocity has been measured ten times while utilizing the combination of:

(i) The lightest commercially available fastener designed for the tool;

(ii) The strongest commercially available power load which will properly chamber in the tool; that will produce an average velocity from the ten tests in excess of 150 m/s (492 ft/s).

[Statutory Authority: Chapter 49.17 RCW, 94-15-096 (Order 94-07), § 296-155-36305, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-36305, filed 1/21/86.]

WAC 296-155-36307 Requirements. (1) General.

(a) The tool shall be designed to prevent inadvertent actuation.

(b) The tool shall be designed to prevent actuation when dropped in any attitude from a height of 3 meters (10 ft) onto a smooth, hard surface such as concrete or steel, if such actuation can propel a fastener or any part thereof in free flight.

(c) Actuation of the tool shall be dependent upon at least two separate and distinct operations by the operator, with at least one operation being separate from the operation of holding the tool against the work surface.

(d) The tool shall be designed not to be operable other than against a work surface with a force on the work surface

equal to 22 newtons (5 lb) greater than the weight of the tool or a minimum impact energy of 4 joules (3 ft-lb).

(e) All tools shall be designed so that compatible protective shields or fixtures, designed, built, and supplied by the manufacturer of the tool, can be used (see WAC 296-155-36307 (2)(b), (3)(b), (4)(b) and 296-155-36313(8)).

(f) The tool shall be designed so that a determinable means of varying the power levels is available for selecting a power level adequate to perform the desired work (see WAC 296-155-36309(5)).

(g) The tool shall be designed so that all principal functional parts can be checked for foreign matter that may affect operation.

(h) The tool shall be designed so that all parts will be of adequate strength to resist maximum stresses imposed upon actuation when the tool is used in accordance with the manufacturer's instructions and is powered by any commercially available power load which will properly chamber in the tool.

(i) Each tool shall bear a legible permanent model designation, which shall serve as a means of identification. Each tool shall also bear a legible, permanent manufacturer's unique serial number.

(j) A lockable container shall be provided for each tool. The words "POWDER ACTUATED TOOL" shall appear in plain sight on the outside of the container. The following notice shall be attached on the inside cover of the container:

"WARNING - POWDER ACTUATED TOOL. TO BE USED ONLY BY A QUALIFIED OPERATOR AND KEPT UNDER LOCK AND KEY WHEN NOT IN USE."

(k) Each tool shall bear a durable warning label with the following statement, or the equivalent:

"WARNING - FOR USE ONLY BY QUALIFIED OPERATORS ACCORDING TO MANUFACTURER'S INSTRUCTION MANUAL."

(l) Each tool shall be supplied with the following:

- (i) Operator's instruction and service manual.
- (ii) Power load chart.
- (iii) Tool inspection record.
- (iv) Service tools and accessories.

(m) In determining tool test velocities, the velocity of the fastener shall be measured in free flight at a distance of 2 meters (6-1/2 ft) from the muzzle end of the tool, using accepted ballistic test methods.

(2) Design requirements - low-velocity class.

(a) Low-velocity tools, indirect-acting (piston) type, as defined in WAC 296-155-36305, shall meet the requirements of WAC 296-155-36307(1).

(b) A shield shall be supplied with each tool.

(3) Design requirements - medium-velocity class.

(a) Medium-velocity tools, indirect-acting (piston) type, as defined in WAC 296-155-36305, shall meet the requirements of WAC 296-155-36307(1).

(b) The tool shall have a shield at least 63 mm (2-1/2 in) in diameter mounted perpendicular to, and concentric with, the muzzle end, when it is indexed to the center position. A special shield or fixture may be used when it provides equivalent protection.

(2001 Ed.)

(c) The tool shall be designed so that it cannot be actuated unless it is equipped with a shield or fixture.

(d) The tool shall be designed with angle control so that it will not actuate when equipped with the standard shield indexed to the center position if the bearing surface of the shield is tilted more than 12 degrees from a flat surface.

(4) Design requirements - high-velocity class.

(a) High-velocity tools, direct-acting or indirect-acting type, as defined in WAC 296-155-36305, shall meet the requirements of WAC 296-155-36307(1).

(b) The tool shall have a shield at least 88 mm (3-1/2 in) in diameter mounted perpendicular to, and concentric with, the muzzle end, when it is indexed to the center position. A special shield or fixture may be used when it provides equivalent protection.

(c) The tool shall be designed so that it cannot be actuated unless it is equipped with a shield or fixture.

(d) The tool shall be designed with angle control so that it will not actuate when equipped with the standard shield indexed to the center position, if the bearing surface of the shield is tilted more than eight degrees from a flat surface.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-36307, filed 1/21/86.]

WAC 296-155-36309 Power loads. (1) Identification of cased power loads. Cased power loads shall be coded to identify power load levels by case color and power load color as specified in Table G-1.

(2) Identification of caseless power loads. Caseless power loads shall be coded to identify power load levels by power load color as specified in Table G-1 and by configuration.

(3) Power load use limitation. No power load (cased or caseless) shall be used if it will properly chamber in any existing commercially available tool and will cause a fastener to have a test velocity in excess of the maximum test velocities specified for the said tool.

(4) Identification of power load packages. Power load packages shall provide a visual number-color indication of the power level of the power load as specified in Table G-1.

**TABLE G-1
Power Load Identification**

Power Level	Color Identification		Nominal velocity	
			Meters per Second (± 13.5)	Feet per Second (± 45)
1	Brass	Gray	91	300
2	Brass	Brown	119	390
3	Brass	Green	146	480
4	Brass	Yellow	174	570
5	Brass	Red	201	660
6	Brass	Purple	229	750
7	Nickel	Gray	256	840
8	Nickel	Brown	283	930
9	Nickel	Green	311	1020
10	Nickel	Yellow	338	1110
11	Nickel	Red	366	1200
12	Nickel	Purple	393	1290

Note: The nominal velocity applies to a 9.53 mm (3/8-in) diameter 22.7-gram (350-grain) ballistic slug fired in a test device

and has no reference to actual fastener velocity developed in any specific tool.

(5) Optional power load variation. Where means other than power loads of varying power levels are to be used to control penetration, such means shall provide an equivalent power level variation.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-36309, filed 1/21/86.]

WAC 296-155-36311 Fasteners. Fasteners for use in powder actuated tools shall be designed and manufactured to function compatibly with these tools and, when used in masonry, concrete, or steel, to effect properly the application for which they are recommended.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-36311, filed 1/21/86.]

WAC 296-155-36313 Operation. (1) Acceptable tools. Only tools meeting the requirements of this standard shall be used.

(2) Qualified operators. Only qualified operators shall operate tools.

(3) Use lowest velocity. The lowest velocity class of tool that will properly set the fastener shall be used.

(4) Operating limitations. Tools shall be operated in strict accordance with the manufacture's instructions.

(5) Personal protection. Eye or face protection, or both, shall be worn by operators, assistants, and adjacent personnel when tool is in use. Hearing protection shall be used when making fastenings in confined areas.

(6) Daily inspections. Each day, prior to use, the operator shall inspect the tool to determine that it is in proper working condition in accordance with the testing methods recommended by the manufacture of the tool.

(7) Defective tools. Any tool found not to be in proper working condition shall be immediately removed from service and tagged "DEFECTIVE"; it shall not be used until it has been properly repaired in accordance with the manufacture's instructions.

(8) Proper accessories. The proper shield, fixture, adapter, or accessory, suited for the application, as recommended and supplied by the manufacture, shall be used.

(9) Proper loads and fasteners. Only those types of fasteners and power loads recommended by the tool manufacture for a particular tool, or those providing the same level of safety and performance, shall be used.

(10) Questionable material. Before fastening into any questionable material, the operator shall determine its suitability by using a fastener as a center punch. If the fastener point does not easily penetrate, is not blunted, and does not fracture the material, initial test fastenings shall then be made in accordance with the tool manufacture's recommendations. (See WAC 296-155-36315(3).)

(11) Tool safety. No tool shall be loaded unless it is being prepared for immediate use. If the work is interrupted after loading, the tool shall be unloaded at once.

(12) Powder actuated magazine or clip-fed tools are not considered loaded unless a power load is actually in the ram (firing chamber), even though the magazine or clip is inserted

in the tool. If work is interrupted, the firing chamber shall be cleared and the magazine or clip removed.

(13) Pointing tools. Tools shall not be loaded until just prior to the intended firing time. Neither loaded nor empty tools are to be pointed at any person; hands shall be kept clear of the open barrel end.

(14) Tool perpendicular to work. The tool shall always be held perpendicular to the work surface when fastening into any material, except for specific applications recommended by the tool manufacture.

(15) Misfires. In the event of a misfire, the operator shall hold the tool firmly against the work surface for a period of thirty seconds and then follow the explicit instructions set forth in the manufacture's instructions.

(16) Different power levels. Power loads of different power levels and types shall be kept in separate compartments or containers.

(17) Signs. A sign, at least 20 x 25 cm (8 x 10 in), using boldface type no less than 2.5 cm (1 in) in height, shall be posted in plain sight on all construction projects where tools are used. The sign shall bear wording similar to the following: "POWDER ACTUATED TOOL IN USE."

[Statutory Authority: Chapter 49.17 RCW. 91-11-070 (Order 91-01), § 296-155-36313, filed 5/20/91, effective 6/20/91; 89-11-035 (Order 89-03), § 296-155-36313, filed 5/15/89, effective 6/30/89. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-36313, filed 1/21/86.]

WAC 296-155-36315 Limitations of use. (1) Explosive and flammable atmospheres. The tool shall not be used in an explosive or flammable atmosphere.

(2) Unattended tools prohibited. A tool shall never be left unattended in a place where it would be available to unauthorized persons.

(3) Fasteners in hard, brittle areas. Fasteners shall not be driven into very hard or brittle materials including, but not limited to, cast iron, glazed tile, hardened steel, glass block, natural rock, hollow tile, or most brick. (See WAC 296-155-36313(10).)

(4) Fasteners in soft materials. Fasteners shall not be driven into easily penetrated or thin materials, or materials of questionable resistance, unless backed by a material that will prevent the fastener from passing completely through the other side.

(5) Fasteners in steel. Fasteners shall not be driven closer than 13 mm (1/2 in) from the edge of steel except for specific applications recommended by the tool manufacturer.

(6) Fasteners in masonry. Fasteners shall not be driven closer than 7.5 cm (3 in) from the unsupported edge of masonry materials except for specific applications recommended by the tool manufacturer.

(7) Fasteners in concrete. Fasteners shall not be driven into concrete unless material thickness is at least three times the fastener shank penetration.

(8) Fasteners in spalls. Fasteners shall not be driven into any spalled area.

(9) Fasteners in existing holes. Fasteners shall not be driven through existing holes unless a specific guide means, as recommended and supplied by the tool manufacturer, is used to ensure positive alignment.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-36315, filed 1/21/86.]

WAC 296-155-36317 Maintenance and storage. (1)

Use of tools. The tool shall be serviced and inspected for worn or damaged parts at regular intervals as recommended by the tool manufacturer. Prior to the tool being put back into use, all worn or damaged parts shall be replaced by a qualified person using only parts supplied by the tool manufacturer. A record of this inspection shall be noted and dated on the tool inspection record.

(2) Instruction manuals. Instruction manuals, maintenance tools, and accessories supplied with the tool shall be stored in the tool container when not in use.

(3) Security. Powder actuated tools and power loads shall be locked in a container and stored in a safe place when not in use and shall be accessible only to authorized personnel.

[Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-36317, filed 1/21/86.]

WAC 296-155-36319 Authorized instructor. (1)

Operator qualifications. Only persons trained and authorized by the tool manufacturer or by an authorized representative of the tool manufacturer shall be qualified to instruct and qualify operators for the manufacturer's powder actuated tools.

(2) Instructor qualifications. All authorized instructors shall have read and be familiar with this standard, and shall be capable of:

(a) Disassembling, servicing, and reassembling the tool.

(b) Recognizing any worn or damaged parts or defective operation.

(c) Recognizing and clearly identifying the colors used to identify power load levels.

(d) Using the tool correctly within the limitations of its use.

(e) Training and testing operators prior to issuing a qualified operator's card.

(3) Instructor's card. All authorized instructors shall have in their possession a valid authorized instructor's card issued and signed by an authorized representative of the manufacturer. The card shall be wallet size of approximately 6 x 9 cm (2-1/2 x 3-1/2 in), and the face of the card shall bear text similar to that shown in Figure G-1.

(4) List of instructors. A list of all instructors authorized by the manufacturer to instruct and qualify operators shall be maintained by the tool manufacturer and be made available to the department of labor and industries.

(5) Revocation of instructor card. Instructor's card may be revoked by the authorizing agent or the department of labor and industries, if the instructor is known to have issued a qualified operator's card in violation of any regulation contained in this standard. When an instructor is no longer authorized to issue qualified operator's cards, cards shall be surrendered to the authorizing agent or the department of labor and industries.

(2001 Ed.)

AUTHORIZED INSTRUCTOR

..... Powder Actuated Tools Date.
 (MAKE)
 Card No. Social Security No.
 This certifies that
 (NAME OF INSTRUCTOR)
 has received the prescribed training in the operation and maintenance of
 powder actuated tools manufactured by
 and is qualified
 (NAME OF MANUFACTURER)
 to train and certify operators of
 (MAKE)
 powder actuated tools.
 Model(s)
 Authorized by
 I have received instruction by the manufacturer's authorized representative
 in the training of operators of the above tools and agree to conform to all
 rules and regulations governing the instruction of tool operators.
 Date of Birth

 (SIGNATURE)

Figure G-1

Sample of Authorized Instructor's Card

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-36319, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-36319, filed 1/21/86.]

WAC 296-155-36321 Qualified operator. (1) Operator qualifications. The operator shall be trained by an authorized instructor to be familiar with the provisions of this standard and the instructions provided by the manufacturer for operation and maintenance. The operator shall also be capable of:

(a) Reading and understanding the manufacturer's instruction manual.

(b) Cleaning the tool correctly.

(c) Recognizing any worn or damaged parts or defective operation.

(d) Recognizing the number-color code system used in this standard to identify power load levels. In the event the operator is unable to distinguish the colors used, the operator shall be given special instruction which will enable the operator to avoid error.

(e) Using a tool correctly within the limitations of its use and demonstrate competence by operating the tool in the presence of the instructor.

(2) Operator examination. After training, the operator shall substantiate competency by completing satisfactorily a written examination provided by the manufacturer of the tool.

(a) The operator's written examination shall consist of questions to establish the operator's competence with respect to:

(i) The requirements of this standard;

(ii) The powder actuated fastening system; and

(iii) The specific details of operation and maintenance of the tool(s) involved.

(b) The examination shall provide a statement, attested to by the instructor, that the applicant can (or cannot) readily distinguish the colors used to identify power load levels (see WAC 296-155-36309).

(3) Operator's card. Each applicant who meets the requirements as set forth in subsections (1) and (2) of this section shall receive a qualified operator's card, issued and

signed by both the instructor and applicant. While using the tool, the operator shall carry this card.

(4) Card features. The qualified operator's card supplied by the manufacturer shall be wallet size of approximately 6 x 9 cm (2-1/2 x 3-1/2 in), and the face of the card shall bear text similar to that shown in Figure G-2.

(5) Revocation notation. There shall be printed on the card a notation reading:

"Revocation of card - Failure to comply with any of the rules and regulations for safe operation of powder actuated fastening tools shall be cause for the immediate revocation of this card."

QUALIFIED OPERATOR

Sample of Qualified Operation's Card

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-36321, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-36321, filed 1/21/86.]

WAC 296-155-365 Abrasive wheels and tools. (1)

Power. All grinding machines shall be supplied with sufficient power to maintain the spindle speed at safe levels under all conditions of normal operation.

(2) Guarding.

(a) Grinding machines shall be equipped with safety guards in conformance with the requirements of American National Standards Institute, B7.1-1978, Safety Code for the Use, Care and Protection of Abrasive Wheels.

(b) Guard design. The safety guard shall cover the spindle end, nut, and flange projections. The safety guard shall be mounted so as to maintain proper alignment with the wheel, and the strength of the fastenings shall exceed the strength of the guard, except:

(i) Safety guards on all operations where the work provides a suitable measure of protection to the operator, may be so constructed that the spindle end, nut, and outer flange are exposed; and where the nature of the work is such as to entirely cover the side of the wheel, the side covers of the guard may be omitted; and

(ii) The spindle end, nut, and outer flange may be exposed on machines designed as portable saws.

(3) Use of abrasive wheels.

(a) Floor stand and bench mounted abrasive wheels, used for external grinding, shall be provided with safety guards (protection hoods). The maximum angular exposure of the grinding wheel periphery and sides shall be not more than 90°, except that when work requires contact with the wheel below the horizontal plane of the spindle, the angular exposure shall not exceed 125°. In either case, the exposure shall begin not more than 65° above the horizontal plane of the spindle. Safety guards shall be strong enough to withstand the effect of a bursting wheel.

(b) Floor and bench-mounted grinders shall be provided with work rests which are rigidly supported and readily adjustable. Such work rests shall be adjusted to a distance not to exceed one-eighth inch from the surface of the wheel. The work rest may be omitted when contacts of the work piece with the grinding surface below the horizontal plane of the spindle are necessary and unavoidable, or where the size or shape of the work piece precludes use of the work rest.

(c) Cup type wheels used for external grinding shall be protected by either a revolving cup guard or a band type guard in accordance with the provisions of the American National Standards Institute, B7.1-1978, Safety Requirements for the Use, Care, and Protection of Abrasive Wheels. Abrasive wheels shall only be used on machines provided with safety guards, except the following:

(i) Wheels used for internal work while within the work being ground.

(ii) Mounted wheels, 2 inches and smaller in diameter used in portable operations.

(iii) Types 16, 17, 18, 18R and 19 cones and plugs, and threaded hole pot balls where the work offers protection or where the size does not exceed 3 inches in diameter by 5 inches in length.

(iv) Metal centered diamond lapidary wheels either notched, segmented or continuous rim used with a coolant deflector, when operated at speeds up to 3500 surface feet per minute (S.F.P.M.).

(v) Type 1 wheels not larger than 2 inches in diameter and not more than 1/2 inch thick, operating at peripheral speeds less than 1800 SFPM when mounted on mandrels driven by portable drills.

(vi) Type 1 reinforced wheels not more than 3 inches in diameter and 1/4 inch in thickness, operating at peripheral speeds not exceeding 9500 SFPM, provided that safety glasses and face shield are worn.

(vii) Valve seat grinding wheels.

(d) Portable abrasive wheels used for internal grinding shall be provided with safety flanges (protection flanges) meeting the requirements of subdivision (f) of this subsection, except as follows:

(i) When wheels 2 inches or less in diameter which are securely mounted on the end of a steel mandrel are used;

(ii) If the wheel is entirely within the work being ground while in use.

(e) When safety guards are required, they shall be so mounted as to maintain proper alignment with the wheel, and the guard and its fastenings shall be of sufficient strength to retain fragments of the wheel in case of accidental breakage. The maximum angular exposure of the grinding wheel periphery and sides shall not exceed 180°.

(f) When safety flanges are required, they shall be used only with wheels designed to fit the flanges. Only safety flanges, of a type and design and properly assembled so as to ensure that the pieces of the wheel will be retained in case of accidental breakage, shall be used.

(g) All abrasive wheels shall be closely inspected and ring-tested before mounting to ensure that they are free from cracks or defects.

(h) Grinding wheels shall fit freely on the spindle and shall not be forced on. The spindle nut shall be tightened only enough to hold the wheel in place.

(i) All employees using abrasive wheels shall be protected by eye protection equipment in accordance with the requirements of Part C of this chapter, except when adequate eye protection is afforded by eye shields which are permanently attached to the bench or floor stand.

(4) Other requirements. All abrasive wheels and tools used by employees shall meet other applicable requirements of American National Standards Institute, B7.1-1978, Safety Code for the Use, Care and Protection of Abrasive Wheels.

[Statutory Authority: Chapter 49.17 RCW, 94-15-096 (Order 94-07), § 296-155-365, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-365, filed 1/21/86; Order 74-26, § 296-155-365, filed 5/7/74, effective 6/6/74.]

WAC 296-155-367 Masonry saws. (1) Guarding.

(a) Masonry saws shall be guarded by semicircular enclosures over the blade.

(b) A method for retaining blade fragments shall be incorporated into the design of the semicircular enclosure.

(2) Safety latch. A safety latch shall be installed on notched saws to prevent the motor and cutting head assembly from lifting out of the notches.

(3) Blade speed. Blade speed shall be maintained in accordance with the manufacturer's specifications.

(4) Exhaust and eye protection.

(a) All table mounted masonry saws shall be equipped with a mechanical means of exhausting dust into a covered receptacle or be provided with water on the saw blade for dust control. The operator and any nearby worker shall wear appropriate eye protection in accordance with WAC 296-155-215.

(b) All portable hand-held masonry saw operators shall wear appropriate eye and respiratory protection in accordance with WAC 296-155-215 and chapter 296-62 WAC, Part E.

(5) Grounding. The motor frames of all stationary saws shall be grounded through conduit, water pipe, or a driven ground. Portable saws shall be grounded through three-pole cords attached to grounded electrical systems.

(6) Inspection. Masonry saws shall be inspected at regular intervals and maintained in safe operating condition.

[Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050, 99-10-071, § 296-155-367, filed 5/4/99, effective 9/1/99. Statutory Authority: Chapter 49.17 RCW, 90-17-051 (Order 90-10), § 296-155-367, filed 8/13/90, effective 9/24/90. Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-367, filed 1/21/86.]

WAC 296-155-370 Woodworking tools. (1) Speeds.

No saw shall be operated in excess of the manufacturers recommended speed.

(2001 Ed.)

(2) Guarding. All portable, hand held power-driven circular saws shall be equipped with guards above and below the base plate or shoe. The upper guard shall cover the saw to the depth of the teeth, except for the minimum arc required to permit the base to be tilted for bevel cuts. The lower guard shall cover the saw to the depth of the teeth, except for the minimum arc required to allow proper retraction and contact with the work. When the tool is withdrawn from the work, the lower guard shall automatically and instantly return to the covering position.

(3) Hand-fed table saws.

(a) Each circular hand-fed table saw shall be provided with a hood-type guard that will cover the blade at all times when the blade is not in use. This may be accomplished by the use of a guard that will automatically adjust to the thickness of the material being cut, or by a fixed or manually adjusted guard. If a fixed or manually adjusted guard is used, the space between the bottom of the guard and the material being cut shall not exceed 3/8 inch if 1-1/2 inches or more from the blade, and 1/4 inch if closer than 1-1/2 inches.

(b) When the blade is in use, the hood-type guard shall enclose that portion of the blade above the material.

(c) Hood-type guards shall be so designed and constructed as to resist blows and strains incidental to reasonable operation, adjusting, and handling, in order to protect the operator from flying splinters and broken saw teeth.

(d) The hood shall be so mounted as to ensure that its operation will be positive, reliable, and in alignment with the saw. The mounting shall be adequate to resist any reasonable side thrust or other force that would disrupt alignment.

(e) Where a hood-type guard cannot be used because of unusual shapes or cuts, a jig or fixture that will provide equal safety for the operator shall be used. On the completion of such operations, the guard shall be immediately replaced.

(f) A push stick shall be used on short or narrow stock when there is a possibility of the hand contacting the cutting tool.

(g) Each hand-fed circular rip saw shall be equipped with a spreader to minimize the possibility of material squeezing the saw or of material kickbacks. The spreader shall be made of tempered steel, or its equivalent, and shall be slightly thinner than the saw kerf. It shall be of sufficient width to provide adequate stiffness or rigidity to resist any reasonable side thrust or blow tending to bend or throw it out of position. The spreader shall be attached so that it will remain in true alignment with the blade, even when either the saw or table is tilted, and should be placed so that there is not more than 1/2-inch space between the spreader and the back of the blade when the recommended saw blade is in its maximum "up" position. If a blade smaller than the maximum permissible size is used, the spreader shall be moved to within 1/2 inch of the blade. The provision of a spreader in connection with grooving, dadoing, or rabbeting is not required. On the completion of such operations, the spreader shall be immediately replaced.

(h) Each hand-fed circular rip saw shall be provided with antikickback devices so located as to oppose the thrust or tendency of the saw blade to pick up the material or throw it back toward the operator. These devices shall be designed to

provide holding power for all the thicknesses of material being cut.

(4) Radial saws.

(a) Hoods and guards. Each saw shall be provided with a device that will completely enclose the upper portion of the blade down to a point that includes the end of the saw arbor. The upper hood shall be so constructed as to protect the operator from flying splinters and broken saw teeth, and to deflect sawdust away from the operator. The sides of the lower exposed portion of the saw blade shall be guarded from the tips of the blade teeth inward radially with no greater than 3/8-inch gullet exposure. The device shall automatically adjust itself to the thickness of the stock and remain in contact with the stock being cut for the 90° blade positions (0° bevel) throughout the full working range of miter position. A permanent label not less than 1-1/2 inches X 3/4 inch shall be affixed to the guard visible from the normal operating position, reading as follows:

WARNING: TO AVOID INJURY, SHUT OFF POWER BEFORE CLEARING A JAMMED LOWER GUARD

Such a label shall be colored standard danger red or orange in accordance with American National Standard Safety Color Code for Marking Physical Hazards, Z53.1-1979.

(b) Spreaders. When radial saws are used for ripping, a spreader shall be provided and shall be aligned with the saw blade.

(c) Antikickback devices. Antikickback devices located on both sides of the saw blade on the outfeed side, so as to oppose the thrust or tendency of the blade to pick up the material or to throw it back toward the operator, shall be used on each radial saw used for ripping. These devices shall be designed to provide adequate holding power for all the thicknesses of material being cut.

(d) Adjustable stops and return devices. An adjustable stop shall be provided to prevent the forward travel of the blade beyond the position necessary to complete the cut. A limit chain or other equally effective device shall be provided to prevent the saw blade from sliding beyond the edge of the table; or the table shall be extended to eliminate over-run.

(e) On any manually operated saw, installation shall be such that the front of the machine is slightly higher than the rear, or some other means shall be provided so that the cutting head will not roll or move out on the arm away from the column as a result of gravity or vibration. A permanent label not less than 1-1/2 inches X 3/4 inch shall be affixed to the cutting head visible from the normal crosscut operating position, reading as follows:

WARNING: TO AVOID INJURY, RETURN CARRIAGE TO THE FULL REAR POSITION AFTER EACH CROSSCUT TYPE OF OPERATION

Such a label shall be colored standard caution yellow in accordance with American National Standard Z53.1-1979.

(f) Direction of feed. Ripping and ploughing shall be against the direction in which the saw blade turns. The direction of the saw blade rotation shall be conspicuously marked on the hoods. In addition, a permanent label not less than 1-1/2 inches X 3/4 inch shall be affixed to the end of the guard at which the blade teeth exit the upper guard during opera-

tion. The label shall be at approximately the level of the arbor and shall read as follows:

DANGER: TO AVOID INJURY, DO NOT FEED MATERIAL INTO CUTTING TOOL FROM THIS END

Such a label shall be colored standard red or orange in accordance with American National Standard, Z53.1-1979.

(5) All woodworking tools and machinery shall meet any other applicable requirements of American National Standards Institute, 01.1-1971, Safety Code for Woodworking Machinery.

(6) The control switch on all stationary radial arm saws shall be placed at the front of the saw or table and shall be properly recessed or hooded to prevent accidental contact.

(a) A firm level working area shall be provided at the front of all stationary radial arm saws. The area shall be kept free of all stumbling hazards.

(b) A push stick or similar device shall be used for pushing short material through power saws.

(7) Circular power miter saws. The requirements of subsection (4)(a) of this section applies to guarding circular power miter saws.

(8) Personal protective equipment. All personal protective equipment required for use shall conform to the requirements of Part C of this chapter.

[Statutory Authority: Chapter 49.17 RCW. 89-11-035 (Order 89-03), § 296-155-370, filed 5/15/89, effective 6/30/89. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-370, filed 1/21/86; Order 74-26, § 296-155-370, filed 5/7/74, effective 6/6/74.]

WAC 296-155-375 Jacks—Lever and ratchet, screw, and hydraulic. General requirements.

(1) The manufacturer's rated capacity shall be legibly marked on all jacks and this capacity shall not be exceeded.

(2) All jacks shall have a positive stop to prevent over-travel.

(3) Specially designed jacks constructed for specific purposes shall meet the approval of the department of labor and industries before being placed in service.

(4) Control parts shall be so designed that the operator will not be subjected to hazard.

(5) Blocking. When it is necessary to provide a firm foundation, the base of the jack shall be blocked or cribbed. Where there is a possibility of slippage of the metal cap of the jack, a wood block shall be placed between the cap and the load.

(6) Operation and maintenance.

(a) After the load has been raised, it shall immediately be cribbed, blocked, or otherwise secured.

(b) Hydraulic jacks exposed to freezing temperatures shall be supplied with an adequate antifreeze liquid.

(c) All jacks shall be properly lubricated at regular intervals. The lubricating instructions of the manufacturer should be followed, and only lubricants recommended by the manufacturer should be used.

(7) Each jack shall be thoroughly inspected at times which depend upon the service conditions. Inspections shall be not less frequent than the following:

(a) For constant or intermittent use at one locality, once every six months;

(b) For jacks sent out of shop for special work, when sent out and when returned;

(c) For a jack subjected to abnormal load or shock, immediately before and immediately thereafter.

(8) Repair or replacement parts shall be examined for possible defects.

(9) Jacks which are out of order shall be tagged accordingly, and shall not be used until repairs are made.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-375, filed 7/20/94, effective 9/20/94; 93-04-111 (Order 92-15), § 296-155-375, filed 2/3/93, effective 3/15/93; 91-11-070 (Order 91-01), § 296-155-375, filed 5/20/91, effective 6/20/91; Order 74-26, § 296-155-375, filed 5/7/74, effective 6/6/74.]

WAC 296-155-380 Air receivers. (1) Application. This section applies to compressed air receivers, and other equipment used in providing and utilizing compressed air for performing operations such as cleaning, drilling, hoisting, and chipping. On the other hand, however, this section does not deal with the special problems created by using compressed air to convey materials nor the problems created when persons work in compressed air as in tunnels and caissons. These standards are not intended to apply to compressed air machinery and equipment used on transportation vehicles such as steam railroad cars, electric railway cars, and automotive equipment.

(2) New and existing equipment.

(a) All new air receivers installed after the effective date of these standards shall be constructed in accordance with the 1968 Edition of the A.S.M.E. Boiler and Pressure Vessel Code, section VIII.

(b) All safety valves used shall be constructed, installed, and maintained in accordance with the A.S.M.E. Boiler and Pressure Vessel Code, section VIII Edition 1968.

(3) Installation. Air receivers shall be so installed that all drains, handholes, and manholes therein are easily accessible. Air receivers should be supported with sufficient clearance to permit a complete external inspection and to avoid corrosion of external surfaces. Under no circumstances shall an air receiver be buried underground or located in an inaccessible place. The receiver should be located as close to the compressor or after-cooler as is possible in order to keep the discharge pipe short.

(4) Drains and traps. All air receivers having an internal and external operating pressure exceeding 15 psi with no limitation on size, and air receivers having an inside diameter exceeding six inches, with no limitation on pressure, if subject to corrosion, shall be supplied with a drain pipe and valve at the lowest point in the vessel; or a pipe may be used extending inward from any other location to within one-quarter inch of the lowest point. Adequate automatic traps may be installed in addition to drain valves. The drain valve on the air receiver shall be opened and the receiver completely drained frequently and at such intervals as to prevent the accumulation of oil and water in the receiver.

(5) Gages and valves.

(a) Every air receiver shall be equipped with an indicating pressure gage (so located as to be readily visible) and with one or more spring-loaded safety valves. The total relieving capacity of such safety valves shall be such as to

prevent pressure in the receiver from exceeding the maximum allowable working pressure of the receiver by more than ten percent.

(b) No valve of any type shall be placed between the air receiver and its safety valve or valves.

(c) Safety appliances, such as safety valves, indicating devices and controlling devices, shall be constructed, located, and installed so that they cannot be readily rendered inoperative by any means, including the elements.

(d) All safety valves shall be tested frequently and at regular intervals to determine whether they are in good operating condition.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-380, filed 7/20/94, effective 9/20/94.]

PART H WELDING AND CUTTING

WAC 296-155-400 Gas welding and cutting. (1) Transporting, moving, and storing compressed gas cylinders.

(a) Valve protection caps shall be in place and secured.

(b) When cylinders are hoisted, they shall be secured on a cradle, slingboard, or pallet. They shall not be hoisted or transported by means of magnets or choker slings.

(c) Cylinders shall be moved by tilting and rolling them on their bottom edges. They shall not be intentionally dropped, struck, or permitted to strike each other violently.

(d) When cylinders are transported by powered vehicles, they shall be secured in a vertical position.

(e) Valve protection caps shall not be used for lifting cylinders from one vertical position to another. Bars shall not be used under valves or valve protection caps to pry cylinders loose when frozen. Warm, not boiling, water shall be used to thaw cylinders loose.

(f) Unless cylinders are firmly secured on a special carrier intended for this purpose, regulators shall be removed and valve protection caps put in place before cylinders are moved.

(g) A suitable cylinder truck, chain, or other steadying device shall be used to keep cylinders from being knocked over while in use. Such cylinders are not considered to be "in storage."

(h) When a job is finished, when cylinders are empty or when cylinders are moved at any time, the cylinder valve shall be closed.

(i) Compressed gas cylinders shall be secured in an upright position at all times except, if necessary, for short periods of time while cylinders are actually being hoisted or carried.

(j) Oxygen. Oxygen cylinders in storage shall be separated from fuel-gas cylinders or combustible materials (especially oil or grease), a minimum distance of 20 feet or by a noncombustible barrier at least 5 feet high having a fire-resistance rating of at least one-half hour.

(2) Placing cylinders.

(a) Cylinders shall be kept far enough away from the actual welding or cutting operation so that sparks, hot slag, or flame will not reach them. When this is impractical, fire-resistant shields shall be provided.

(b) Cylinders shall be placed where they cannot become part of an electrical circuit. Electrodes shall not be struck against a cylinder to strike an arc.

(c) Fuel gas cylinders shall be placed with valve end up whenever they are in use. They shall not be placed in a location where they would be subject to open flame, hot metal, or other sources of artificial heat.

(d) Cylinders containing oxygen or acetylene or other fuel gas shall not be taken into confined spaces.

(3) Treatment of cylinders.

(a) Cylinders, whether full or empty, shall not be used as rollers or supports.

(b) No person other than the gas supplier shall attempt to mix gases in a cylinder. No one except the owner of the cylinder or person authorized by the owner, shall refill a cylinder. No one shall use a cylinder's contents for purposes other than those intended by the supplier. All cylinders used shall meet the department of transportation requirements, Specification for Cylinders, (49 CFR Part 178, Subpart C).

(c) No damaged or defective cylinder shall be used.

(4) Use of fuel gas. The employer shall thoroughly instruct employees in the safe use of fuel gas, as follows:

(a) Before a regulator to a cylinder valve is connected, the valve shall be opened slightly and closed immediately. (This action is generally termed "cracking" and is intended to clear the valve of dust or dirt that might otherwise enter the regulator.) The person cracking the valve shall stand to one side of the outlet, not in front of it. The valve of a fuel gas cylinder shall not be cracked where the gas would reach welding work, sparks, flame, or other possible sources of ignition.

(b) The cylinder valve shall always be opened slowly to prevent damage to the regulator. For quick closing, valves on fuel gas cylinders shall not be opened more than 1 1/2 turns. When a special wrench is required, it shall be left in position on the stem of the valve while the cylinder is in use so that the fuel gas flow can be shut off quickly in case of an emergency. In the case of manifolded or coupled cylinders, at least one such wrench shall always be available for immediate use. Nothing shall be placed on top of a fuel gas cylinder, when in use, which may damage the safety device or interfere with the quick closing of the valve.

(c) Fuel gas shall not be used from cylinders through torches or other devices which are equipped with shutoff valves without reducing the pressure through a suitable regulator attached to the cylinder valve or manifold.

(d) Before a regulator is removed from a cylinder valve, the cylinder valve shall always be closed and the gas released from the regulator.

(e) If, when the valve on a fuel gas cylinder is opened, there is found to be a leak around the valve stem, the valve shall be closed and the gland nut tightened. If this action does not stop the leak, the use of the cylinder shall be discontinued, and it shall be properly tagged and removed from the work area. In the event that fuel gas should leak from the cylinder valve, rather than from the valve stem, and the gas cannot be shut off, the cylinder shall be properly tagged and removed from the work area. If a regulator attached to a cylinder valve will effectively stop a leak through the valve seat, the cylinder need not be removed from the work area.

(f) If a leak should develop at a fuse plug or other safety device, the cylinder shall be removed from the work area.

(g) Cylinders not having fixed hand wheels shall have keys, handles, or nonadjustable wrenches on valve stems while in service. In multiple cylinder installations one and only one key or handle is required for each manifold.

(5) Fuel gas and oxygen manifolds.

(a) Fuel gas and oxygen manifolds shall bear the name of the substance they contain in letters at least 1-inch high which shall be either painted on the manifold or on a sign permanently attached to it.

(b) Fuel gas and oxygen manifolds shall be placed in safe, well ventilated, and accessible locations. They shall not be located within enclosed spaces.

(c) Manifold hose connections, including both ends of the supply hose that lead to the manifold, shall be such that the hose cannot be interchanged between fuel gas and oxygen manifolds and supply header connections. Adapters shall not be used to permit the interchange of hose. Hose connections shall be kept free of grease and oil.

(d) When not in use, manifold and header hose connections shall be capped.

(e) Nothing shall be placed on top of a manifold, when in use, which will damage the manifold or interfere with the quick closing of the valves.

(6) Hose.

(a) Fuel gas hose and oxygen hose shall be easily distinguishable from each other. The contrast may be made by different colors or by surface characteristics readily distinguishable by the sense of touch. Oxygen and fuel gas hoses shall not be interchangeable. A single hose having more than one gas passage shall not be used.

(b) When parallel sections of oxygen and fuel gas hose are taped together, not more than 4 inches out of 12 inches shall be covered by tape.

(c) All hose in use, carrying acetylene, oxygen, natural or manufactured fuel gas, or any gas or substance which may ignite or enter into combustion, or be in any way harmful to employees, shall be inspected at the beginning of each working shift. Defective hose shall be removed from service.

(d) Hose which has been subject to flashback, or which shows evidence of severe wear or damage, shall be tested to twice the normal pressure to which it is subject, but in no case less than 300 p.s.i. Defective hose, or hose in doubtful condition, shall not be used.

(e) Hose couplings shall be of the type that cannot be unlocked or disconnected by means of a straight pull without rotary motion.

(f) Boxes used for the storage of gas hose shall be ventilated.

(g) Hoses, cables, and other equipment shall be kept clear of passageways, ladders and stairs.

(7) Torches.

(a) Clogged torch tip openings shall be cleaned with suitable cleaning wires, drills, or other devices designed for such purpose.

(b) Torches in use shall be inspected at the beginning of each working shift for leaking shutoff valves, hose couplings, and tip connections. Defective torches shall not be used.

(c) Torches shall be lighted by friction lighters or other approved devices, and not by matches or from hot work.

(8) Regulators and gauges. Oxygen and fuel gas pressure regulators, including their related gauges, shall be in proper working order while in use.

(9) Oil and grease hazards. Oxygen cylinders and fittings shall be kept away from oil or grease. Cylinders, cylinder caps and valves, couplings, regulators, hose, and apparatus shall be kept free from oil or greasy substances and shall not be handled with oily hands or gloves. Oxygen shall not be directed at oily surfaces, greasy clothes, or within a fuel oil or other storage tank or vessel.

(10) Additional rules. For additional details not covered in this Part, applicable portions of American National Standards Institute, Z49.1-1973, Safety in Welding and Cutting, shall apply.

[Statutory Authority: Chapter 49.17 RCW, 94-15-096 (Order 94-07), § 296-155-400, filed 7/20/94, effective 9/20/94. Statutory Authority: RCW 49.17.040 and 49.17.050, 86-03-074 (Order 86-14), § 296-155-400, filed 1/21/86; Order 74-26, § 296-155-400, filed 5/7/74, effective 6/6/74.]

WAC 296-155-405 Arc welding and cutting. (1) Manual electrode holders.

(a) Only manual electrode holders which are specifically designed for arc welding and cutting, and are of a capacity capable of safely handling the maximum rated current required by the electrodes, shall be used.

(b) Any current-carrying parts passing through the portion of the holder which the arc welder or cutter grips in the hand, and the outer surfaces of the jaws of the holder, shall be fully insulated against the maximum voltage encountered to ground.

(2) Welding cables and connectors.

(a) All arc welding and cutting cables shall be of the completely insulated, flexible type, capable of handling the maximum current requirements of the work in progress, taking into account the duty cycle under which the arc welder or cutter is working.

(b) Only cable free from repair or splices for a minimum distance of 10 feet from the cable end to which the electrode holder is connected shall be used, except that cables with standard insulated connectors or with splices whose insulating quality is equal to that of the cable are permitted.

(c) When it becomes necessary to connect or splice lengths of cable one to another, substantial insulated connectors of a capacity at least equivalent to that of the cable shall be used. If connections are effected by means of cable lugs, they shall be securely fastened together to give good electrical contact, and the exposed metal parts of the lugs shall be completely insulated.

(d) Cables in need of repair shall not be used. When a cable, other than the cable lead referred to in subdivision (b) of this subsection, becomes worn to the extent of exposing bare conductors, the portion thus exposed shall be protected by means of rubber and friction tape or other equivalent insulation.

(3) Ground returns and machine grounding.

(a) A ground return cable shall have a safe current carrying capacity equal to or exceeding the specified maximum output capacity of the arc welding or cutting unit which it ser-

vices. When a single ground return cable services more than one unit, its safe current-carrying capacity shall equal or exceed the total specified maximum output capacities of all the units which it services.

(b) Pipelines containing gases or flammable liquids, or conduits containing electrical circuits, shall not be used as a ground return. For welding on natural gas pipelines, the technical portions of regulations issued by the Department of Transportation, Office of Pipeline Safety, Minimum Federal Safety Standards for Gas Pipelines shall apply. (49 CFR Part 192, Subpart C.)

(c) When a structure or pipeline is employed as a ground return circuit, it shall be determined that the required electrical contact exist at all joints. The generation of an arc, sparks, or heat at any point shall cause rejection of the structures as a ground circuit.

(d) When a structure or pipeline is continuously employed as a ground return circuit, all joints shall be bonded, and periodic inspections shall be conducted to ensure that no condition of electrolysis or fire hazard exists by virtue of such use.

(e) The frames of all arc welding and cutting machines shall be grounded either through a third wire in the cable containing the circuit conductor or through a separate wire which is grounded at the source of the current. Grounding circuits, other than by means of the structure, shall be checked to ensure that the circuit between the ground and the grounded power conductor has resistance low enough to permit sufficient current to flow to cause the fuse or circuit breaker to interrupt the current.

(f) All ground connections shall be inspected to ensure that they are mechanically strong and electrically adequate for the required current.

(4) Operating instructions. Employers shall instruct employees in the safe means of arc welding and cutting as follows:

(a) When electrode holders are to be left unattended, the electrodes shall be removed and the holders shall be so placed or protected that they cannot make electrical contact with employees or conducting objects.

(b) Hot electrode holders shall not be dipped in water; to do so may expose the arc welder or cutter to electric shock.

(c) When the arc welder or cutter has occasion to leave work or to stop work for any appreciable length of time, or when the arc welding or cutting machine is to be moved, the power supply switch to the equipment shall be opened.

(d) Any faulty or defective equipment shall be reported to the supervisor.

(e) See WAC 296-155-452 for additional requirements.

(5) Shielding. Whenever practical, all arc welding and cutting operations shall be shielded by noncombustible or flameproof screens which will protect employees and other persons working in the vicinity from the direct rays of the arc.

(6) Employee protection. Where welding or cutting operations are being performed in areas where it is possible for molten slag to contact other employees, those employees shall be protected from being burned by providing overhead protection, barricading the impact area, or other effective means.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-405, filed 7/20/94, effective 9/20/94; 88-23-054 (Order 88-25), § 296-155-405, filed 11/14/88. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-405, filed 1/21/86; Order 74-26, § 296-155-405, filed 5/7/74, effective 6/6/74.]

WAC 296-155-407 Protective clothing. (1) General requirements. Employees exposed to the hazards created by welding, cutting, or brazing operations shall be protected by personal protective equipment in accordance with the requirements of chapter 296-24 WAC, Part A-2 and Part I. Appropriate protective clothing required for any welding operation will vary with the size, nature and location of the work to be performed.

(2) Specified protective clothing. Protective means which may be employed are as follows:

(a) Except when engaged in light work, all welders should wear flameproof gauntlet gloves.

(b) Flameproof aprons made of leather, or other suitable material may also be desirable as protection against radiated heat and sparks.

(c) Woolen clothing preferable to cotton because it is not so readily ignited and helps protect the welder from changes in temperature. Cotton clothing, if used, should be chemically treated to reduce its combustibility. All outer clothing such as jumpers or overalls should be reasonably free from oil or grease.

(d) Sparks may lodge in rolled-up sleeves or pockets of clothing, or cuffs of overalls or trousers. It is therefore recommended that sleeves and collars be kept buttoned and pockets be eliminated from the front of overalls and aprons. Trousers or overalls should not be turned up on the outside.

Note: For heavy work, fire-resistant leggings, high boots, or other equivalent means should be used.

(e) In production work a sheet metal screen in front of the worker's legs can provide further protection against sparks and molten metal in cutting operations.

(f) Capes or shoulder covers made of leather or other suitable materials should be worn during overhead welding or cutting operations. Leather skull caps may be worn under helmets to prevent head burns.

(g) Where there is exposure to sharp or heavy falling objects, or a hazard of bumping in confined spaces, hard hats or head protectors shall be used.

[Statutory Authority: Chapter 49.17 RCW. 95-04-007, § 296-155-407, filed 1/18/95, effective 3/1/95. Statutory Authority: RCW 49.17.040 and 49.17.050. 86-03-074 (Order 86-14), § 296-155-407, filed 1/21/86.]

WAC 296-155-410 Fire prevention. (1) When practical, objects to be welded, cut, or heated shall be moved to a designated safe location or, if the objects to be welded, cut, or heated cannot be readily moved, all movable fire hazards in the vicinity shall be taken to a safe place, or otherwise protected.

(2) If the object to be welded, cut, or heated cannot be moved and if all the fire hazards cannot be removed, positive means shall be taken to confine the heat, sparks, and slag, and to protect the immovable fire hazards from them.

(3) No welding, cutting, or heating shall be done where the application of flammable paints, or the presence of other

flammable compounds, or heavy dust concentrations creates a hazard.

(4) Suitable fire extinguishing equipment shall be immediately available in the work area and shall be maintained in a state of readiness for instant use.

(5) When the welding, cutting, or heating operation is such that normal fire prevention precautions are not sufficient, additional personnel shall be assigned to guard against fire while the actual welding, cutting, or heating operation is being performed, and for a sufficient period of time after completion of the work to ensure that no possibility of fire exists. Such personnel shall be instructed as to the specific anticipated fire hazards and how the firefighting equipment provided is to be used.

(6) When welding, cutting, or heating is performed on walls, floors, and ceilings, since direct penetration of sparks or heat transfer may introduce a fire hazard to an adjacent area, the same precautions shall be taken on the opposite side as are taken on the side on which the welding is being performed.

(7) For the elimination of possible fire in enclosed spaces as a result of gas escaping through leaking or improperly closed torch valves, the gas supply to the torch shall be positively shut off at some point outside the enclosed space whenever the torch is not to be used or whenever the torch is left unattended for a substantial period of time, such as during the lunch period. Overnight and at the change of shifts, the torch and hose shall be removed from the confined space. Open end fuel gas and oxygen hoses shall be immediately removed from enclosed spaces when they are disconnected from the torch or other gas-consuming device.

(8) Except when the contents are being removed or transferred, drums, pails, and other containers, which contain or have contained flammable liquids, shall be kept closed. Empty containers shall be removed to a safe area apart from hot work operations or open flames.

(9) Drums, containers, or hollow structures which have contained toxic or flammable substances shall, before welding, cutting, or heating is undertaken on them, either be filled with water or thoroughly cleaned of such substances and ventilated and tested. For welding, cutting and heating on steel pipelines containing natural gas, the pertinent portions of regulations issued by the Department of Transportation, Office of Pipeline Safety, Minimum Federal Safety Standards for Gas Pipelines, shall apply. (49 CFR Part 192, Subpart C.)

(10) Before heat is applied to a drum, container, or hollow structure, a vent or opening shall be provided for the release of any built-up pressure during the application of heat.

[Order 74-26, § 296-155-410, filed 5/7/74, effective 6/6/74.]

WAC 296-155-415 Ventilation and protection in welding, cutting, and heating. (1) Mechanical ventilation. For purposes of this section, mechanical ventilation shall meet the following requirements:

(a) Mechanical ventilation shall consist of either general mechanical ventilation systems or local exhaust systems.

(b) General mechanical ventilation shall be of sufficient capacity and so arranged as to produce the number of air

changes necessary to maintain welding fumes and smoke within safe limits, as defined in Part B of this chapter.

(c) Local exhaust ventilation shall consist of freely movable hoods intended to be placed by the welder or burner as close as practicable to the work. This system shall be of sufficient capacity and so arranged as to remove fumes and smoke at the source and keep the concentration of them in the breathing zone within safe limits as defined in Part B of this chapter.

(d) Contaminated air exhausted from a working space shall be discharged into the open air or otherwise clear of the source of intake air.

(e) All air replacing that withdrawn shall be clean and respirable.

(f) Oxygen shall not be used for ventilation purposes, comfort cooling, blowing dust from clothing, or for cleaning the work area.

(2) Welding, cutting, and heating in confined spaces.

(a) Except as provided in subdivision (b) of this subsection and subdivision (b) of subsection (3) of this section, either general mechanical or local exhaust ventilation meeting the requirements of subsection (1) of this section shall be provided whenever welding, cutting, or heating is performed in a confined space.

(b) When sufficient ventilation cannot be obtained without blocking the means of access, employees in the confined space shall be protected by air line respirators in accordance with the requirements of Part C of this chapter, and an employee on the outside of such a confined space shall be assigned to maintain communication with those working within it and to aid them in an emergency.

(3) Welding, cutting, or heating of metals of toxic significance.

(a) Welding, cutting, or heating in any enclosed spaces involving the metals specified in this subsection shall be performed with either general mechanical or local exhaust ventilation meeting the requirements of subsection (1) of this section:

(i) Zinc-bearing base or filler metals or metals coated with zinc-bearing materials.

(ii) Lead base metals;

(iii) Cadmium-bearing filler materials;

(iv) Chromium-bearing metals or metals coated with chromium-bearing materials.

(b) Welding, cutting, or heating in any enclosed spaces involving the metals specified in this subdivision shall be performed with local exhaust ventilation in accordance with the requirements of subsection (1) of this section, or employees shall be protected by air line respirators in accordance with the requirements of Part C of this chapter.

(i) Metals containing lead, other than as an impurity, or metals coated with lead-bearing materials;

(ii) Cadmium-bearing or cadmium-coated base metals;

(iii) Metals coated with mercury-bearing metals;

(iv) Beryllium-containing base or filler metals. Because of its high toxicity, work involving beryllium shall be done with both local exhaust ventilation and air line respirators.

(c) Employees performing such operations in the open air shall be protected by filter-type respirators in accordance with the requirements of Part C of this chapter, except that

(2001 Ed.)

employees performing such operations on beryllium-containing base or filler metals shall be protected by air line respirators in accordance with the requirements of Part C of this chapter.

(d) Other employees exposed to the same atmosphere as the welders or burners shall be protected in the same manner as the welder or burner.

(4) Inert-gas metal-arc welding.

(a) Since the inert-gas metal-arc welding process involves the production of ultra-violet radiation of intensities of 5 to 30 times that produced during shielded metal-arc welding, the decomposition of chlorinated solvents by ultra-violet rays, and the liberation of toxic fumes and gases, employees shall not be permitted to engage in, or be exposed to the process until the following special precautions have been taken:

(i) The use of chlorinated solvents shall be kept at least 200 feet, unless shielded, from the exposed arc, and surfaces prepared with chlorinated solvents shall be thoroughly dry before welding is permitted on such surfaces.

(ii) Employees in the area not protected from the arc by screening shall be protected by filter lenses meeting the requirements of Part C of this chapter. When two or more welders are exposed to each other's arc, filter lens goggles of a suitable type, meeting the requirements of Part C of this chapter shall be worn under welding helmets. Hand shields to protect the welder against flashes and radiant energy shall be used when either the helmet is lifted or the shield is removed.

(iii) Welders and other employees who are exposed to radiation shall be suitably protected so that the skin is covered completely to prevent burns and other damage by ultra-violet rays. Welding helmets and hand shields shall be free of leaks and openings, and free of highly reflective surfaces.

(iv) When inert-gas metal-arc welding is being performed on stainless steel, the requirements of subdivision (b) of subsection (3) of this section shall be met to protect against dangerous concentrations of nitrogen dioxide.

(5) General welding, cutting, and heating.

(a) Welding, cutting, and heating, not involving conditions or materials described in subsections (2), (3), or (4) of this section, may normally be done without mechanical ventilation or respiratory protective equipment, but where, because of unusual physical or atmospheric conditions, an unsafe accumulation of contaminants exists, suitable mechanical ventilation or respiratory protective equipment shall be provided.

(b) Employees performing any type of welding, cutting, or heating shall be protected by suitable eye protective equipment in accordance with the requirements of Part C of this chapter.

[Order 74-26, § 296-155-415, filed 5/7/74, effective 6/6/74.]

WAC 296-155-420 Welding, cutting, and heating in way of preservative coatings. (1) Before welding, cutting, or heating is commenced on any surface covered by a preservative coating whose flammability is not known, a test shall be made by a competent person to determine its flammability. Preservative coatings shall be considered to be highly flammable when scrapings burn with extreme rapidity.

(2) Precautions shall be taken to prevent ignition of highly flammable hardened preservative coatings. When coatings are determined to be highly flammable, they shall be stripped from the area to be heated to prevent ignition.

(3) Protection against toxic preservative coatings:

(a) In enclosed spaces, all surfaces covered with toxic preservatives shall be stripped of all toxic coatings for a distance of at least 4 inches from the area of heat application, or the employees shall be protected by air line respirators, meeting the requirements of Part C of this chapter.

(b) In the open air, employees shall be protected by a respirator, in accordance with requirements of Part C of this chapter.

(4) The preservative coatings shall be removed a sufficient distance from the area to be heated to ensure that the temperature of the unstripped metal will not be appreciably raised. Artificial cooling of the metal surrounding the heating area may be used to limit the size of the area required to be cleaned.

[Order 74-26, § 296-155-420, filed 5/7/74, effective 6/6/74.]

PART I ELECTRICAL

WAC 296-155-426 Introduction. This part addresses electrical safety requirements that are necessary for the practical safeguarding of employees involved in construction work and is divided into four major divisions and applicable definitions as follows:

(1) Introduction and definitions. Definitions applicable to this part are contained in WAC 296-155-462.

(2) Installation safety requirements. Installation safety requirements are contained in WAC 296-155-441 through 296-155-459. Included in this category are electric equipment and installations used to provide electric power and light on jobsites.

(3) Safety-related work practices. Safety-related work practices are contained in WAC 296-155-428 and 296-155-429. In addition to covering the hazards arising from the use of electricity at jobsites, these regulations also cover the hazards arising from the accidental contact, direct or indirect, by employees with all energized lines, above or below ground, passing through or near the jobsite.

(4) Safety-related maintenance and environmental considerations. Safety-related maintenance and environmental considerations are contained in WAC 296-155-432 and 296-155-434.

(5) Safety requirements for special equipment. Safety requirements for special equipment are contained in WAC 296-155-437.

[Statutory Authority: Chapter 49.17 RCW, 88-11-021 (Order 88-04), § 296-155-426, filed 5/11/88.]

WAC 296-155-428 General requirements. (1) Protection of employees.

(a) No employer shall permit an employee to work in such proximity to any part of an electric power circuit that the employee could contact the electric power circuit in the course of work, unless the employee is protected against elec-

tric shock by de-energizing the circuit and grounding it or by guarding it effectively by insulation or other means.

(b) No person, firm, corporation, or agent of same, shall require or permit any employee to perform any function in proximity to electrical conductors or to engage in any excavation, construction, demolition, repair, or other operation, unless and until danger from accidental contact with said electrical conductors has been effectively guarded by de-energizing the circuit and grounding it or by guarding it by effective insulation or other effective means.

(c) In work areas where the exact location of underground electric powerlines is unknown, no activity which may bring employees into contact with those powerlines shall begin until the powerlines have been positively and unmistakably de-energized and grounded.

(d) Before work is begun the employer shall ascertain by inquiry or direct observation, or by instruments, whether any part of an energized electric power circuit, exposed or concealed, is so located that the performance of the work may bring any person, tool, or machine into physical or electrical contact with the electric power circuit. The employer shall post and maintain proper warning signs where such a circuit exists. The employer shall advise employees of the location of such lines, the hazards involved, and the protective measures to be taken.

(e) No work shall be performed, no material shall be piled, stored or otherwise handled, no scaffolding, commercial signs, or structures shall be erected or dismantled, nor any tools, machinery or equipment operated within the specified minimum distances from any energized high voltage electrical conductor capable of energizing the material or equipment; except where the electrical distribution and transmission lines have been de-energized and visibly grounded at point of work, or where insulating barriers not a part of or an attachment to the equipment have been erected, to prevent physical contact with the lines, equipment shall be operated proximate to, under, over, by, or near energized conductors only in accordance with the following:

(i) For lines rated 50 kV. or below, minimum clearance between the lines and any part of the equipment or load shall be ten feet.

(ii) For lines rated over 50 kV. minimum, clearance between the lines and any part of the equipment or load shall be ten feet plus 0.4 inch or each 1 kV. over 50 kV., or twice the length of the line insulator but never less than ten feet.

(f) Work on energized equipment. Only qualified persons shall work on electric circuit parts of equipment that have not been deenergized under the procedures of WAC 296-155-429(4). Such persons shall be capable of working safely on energized circuits and shall be familiar with the proper use of special precautionary techniques, personal protective equipment, insulating and shielding materials, and insulated tools.

(g) Overhead electric lines. Where overhead electric conductors are encountered in proximity to a work area, the employer shall be responsible for:

(i) Ascertaining the voltage and minimum clearance distance required; and

(ii) Maintaining the minimum clearance distance; and

(iii) Ensuring that the requirements of this section are complied with.

(h) If relocation of the electrical conductors is necessary, arrangements shall be made with the owners of the lines for such relocation.

(i) Barriers.

(i) Barriers shall be of such character and construction as to effectively provide the necessary protection without creating other hazards or jeopardizing the operation of the electrical circuits.

(ii) Barriers installed within the ten feet clearance from conductors shall be installed only under the supervision of authorized and qualified persons and this shall include a representative of the electrical utility or owner involved.

(j) Exceptions.

(i) These rules do not apply to the construction, reconstruction, operation, and maintenance, of overhead electrical lines, structures, and associated equipment by authorized and qualified electrical workers.

(ii) These rules do not apply to authorized and qualified employees engaged in the construction, reconstruction, operation, and maintenance, of overhead electrical circuits or conductors and associated equipment of rail transportation systems or electrical generating, transmission, distribution and communication systems which are covered by chapters 296-45 and 296-32 WAC.

(k) Special precautions must be taken.

(i) When handling any winch lines, guy wires, or other free cable, wire or rope in the vicinity of any electrical conductors.

(ii) When pulling a winch line, or other cable or rope under energized electrical conductors from a boom, mast, pile driver, etc., in such a manner as to make possible an approach to within ten feet of a conductor.

(iii) When there is possibility of a winch line, cable, etc., either becoming disconnected or breaking under load because of excessive strain and flipping up into overhead conductors.

(iv) When placing steel, concrete reinforcement, wire mesh, etc.

(v) When handling pipe or rod sections in connection with digging wells or test holes.

(vi) When moving construction equipment, apparatus, machinery, etc., all such movements must avoid striking supporting structures, guy wires, or other elements of the electrical utility system causing the conductors to so swing or move as to decrease clearances to less than ten feet from construction equipment, or to cause them to come together.

(l) Warning sign required.

(i) An approved durable warning sign legible at twelve feet, reading "It is unlawful to operate this equipment within ten feet of electrical conductors" shall be posted and maintained in plain view of the operator at the controls of each crane, derrick, shovel, drilling rig, pile driver or similar apparatus which is capable of vertical, lateral or swinging motion.

(ii) A similar sign shall be installed on the outside of the equipment and located as to be readily visible to mechanics or other persons engaged in the work operation.

(iii) Signs shall be not less than 6" x 8" dimensions with the word "WARNING" or "DANGER" in large letters and painted

red across the top and the other letters in black painted on yellow background.

(m) Any overhead wire shall be considered to be an energized line until the owner of such line or the electrical utility authorities indicate that it is not an energized line and it has been visibly grounded.

(2) Passageways and open spaces.

(a) Barriers or other means of guarding shall be provided to ensure that workspace for electrical equipment will not be used as a passageway during periods when energized parts of electrical equipment are exposed.

(b) Working spaces, walkways, and similar locations shall be kept clear of cords so as not to create a tripping hazard to employees.

(3) Load ratings. In existing installations, no changes in circuit protection shall be made to increase the load in excess of the load rating of the circuit wiring.

(4) Fuses. When fuses are installed or removed with one or both terminals energized, special tools insulated for the voltage shall be used.

(5) Cords and cables.

(a) Worn or frayed electric cords or cables shall not be used.

(b) Extension cords shall not be fastened with staples, hung from nails, or suspended by wire.

(6) Interlocks. Only a qualified person following the requirements of this section may defeat an electrical safety interlock, and then only temporarily while they are working on the equipment. The interlock systems shall be returned to its operable condition when this work is completed.

(7) Portable electric equipment—Handling. Portable equipment shall be handled in a manner which will not cause damage. Flexible electric cords connected to equipment shall not be used for raising or lowering the equipment. Flexible cords shall not be fastened with staples or otherwise hung in such a fashion as could damage the outer jacket or insulation.

(8) Visual inspection. When an attachment plug is to be connected to a receptacle (including any on a cord set), the relationship of the plug and receptacle contacts shall first be checked to ensure they are of proper mating configurations.

(9) Connecting attachment plugs.

(a) Employees' hands shall not be wet when plugging and unplugging flexible cords and cord- and plug-connected equipment, if energized equipment is involved.

(b) Energized plug and receptacle connections shall be handled only with insulating protective equipment if the condition of the connection could provide a conducting path to the employee's hand (if, for example, a cord connector is wet from being immersed in water).

(c) Locking-type connectors shall be properly secured after connection.

(10) Routine opening and closing circuits. Load rated switches, circuit breakers, or other devices specifically designed as disconnecting means shall be used for the opening, reversing, or closing of circuits under load conditions. Cable connectors not of the load-break type, fuses, terminal lugs, and cable splice connections shall not be used for such purposes, except in an emergency.

(11) Reclosing circuits after protective device operation. After a circuit is deenergized by a circuit protective device,

the circuit shall not be manually reenergized until it has been determined that the equipment and circuit can be safely energized. This repetitive manual reclosing of circuit breakers or reenergizing circuits through replaced fuses is prohibited.

Note: When it can be determined from the design of the circuit and the overcurrent devices involved that the automatic operation of a device was caused by an overload rather than a fault connection, no examination of the circuit or connected equipment is needed before the circuit is reenergized.

(12) Test instruments and equipment—Use. Only qualified persons shall perform testing work on electric circuits or equipment.

(13) Visual inspection. Test instruments and equipment and all associated test leads, cables, power cords, probes, and connectors shall be visually inspected for external defects and damage before the equipment is used. If there is a defect or evidence of damage that might expose an employee to injury, the defective or damaged item shall be removed from service, and no employee shall use it until necessary repairs and tests to render the equipment safe have been made.

(14) Rating of equipment. Test instruments and equipment and their accessories shall be rated for the circuits and equipment to which they will be connected and shall be designed for the environment in which they will be used.

(15) Occasional use of flammable or ignitable materials. Where flammable materials are present only occasionally, electric equipment capable of igniting them shall not be used, unless measures are taken to prevent hazardous conditions from developing. Such materials include, but are not limited to: Flammable gases, vapors, or liquids; combustible dust; and ignitable fibers or flyings.

(16) Work on energized equipment. Only qualified persons shall work on electric circuit parts of equipment that have not been deenergized under the procedures of WAC 296-155-429(4). Such persons shall be capable of working safely on energized circuits and shall be familiar with the proper use of special precautionary techniques, personal protective equipment, insulating and shielding materials, and insulated tools.

(17) Overhead lines. If work is to be performed near overhead lines, the lines shall be deenergized and grounded, or other protective measures shall be provided before work is started. If the lines are to be deenergized, arrangements shall be made with the person or organization that operates or controls the electric circuits involved to deenergize and ground them. If protective measures, such as guarding, isolating, or insulating, these precautions shall prevent employees from contacting such lines directly with any part of their body or indirectly through conductive materials, tools, or equipment.

(18) Unqualified persons. When an unqualified person is working in an elevated position, or on the ground, near overhead lines, the location shall be such that the person and the longest conductive object they may contact cannot come closer to any unguarded, energized overhead line than the following distances:

(a) For voltages to ground 50kV or below—10 ft.;

(b) For voltages to ground over 50kV—10 ft. plus 0.4 inch for every 1kV over 50kV.

(19) Qualified persons. When a qualified person is working in the vicinity of overhead lines, whether in an elevated position or on the ground, the person shall not approach or take any conductive object without an approved insulating handle closer to exposed energized parts that are shown in subsection (1)(e) of this section unless:

(a) The person is insulated from the energized part (gloves, with sleeves if necessary), rated for the voltage involved are considered to be insulation of the person from the energized part on which work is performed; or

(b) The energized part is insulated both from all other conductive objects at a different potential and from the person; or

(c) The person is insulated from all conductive objects at a potential different from that of the energized part.

(20) Vehicular and mechanical equipment.

(a) Any vehicle or mechanical equipment capable of having parts of its structure elevated near energized overhead lines shall be operated so that a clearance of 10 ft. is maintained. If the voltage is higher than 50kV, the clearance shall be increased 0.4 inch for every 1kV over the voltage. However, under any of the following conditions, the clearance may be reduced:

(i) If the vehicle is in transit with its structure lowered, the clearance may be reduced to 4 ft. If the voltage is higher than 50kV, the clearance shall be increased 0.4 inch for every 1kV over that voltage.

(ii) If insulating barriers are installed to prevent contact with the lines, and if the barriers are rated for the voltage of the line being guarded and are not a part of or an attachment to the vehicle or its raised structure, the clearance may be reduced to a distance within the designed working dimensions of the insulating barrier.

(b) If the equipment is an aerial lift insulated for the voltage involved, and if the work is performed by a qualified person, the clearance (between the uninsulated portion of the aerial lift and the power line) may be reduced to the distance given in (a) through (d) of this subsection.

(c) Employees standing on the ground shall not contact the vehicle or mechanical equipment or any of its attachments, unless:

(i) The employee is using protective equipment rated for the voltage; or

(ii) The equipment is located so that no uninsulated part of its structure (that portion of the structure that provides a conductive path to employees on the ground) can come closer to the line than permitted in this section.

(d) If any vehicle or mechanical equipment capable of having parts of its structure elevated near energized overhead lines is of grounding shall not stand at the grounding location whenever there is a possibility of overhead line contact. Additional precautions, such as the use of barricades or insulation, shall be taken to protect employees from hazardous ground potentials, depending on earth resistivity and fault currents, which can develop within the first few feet or more outward from the grounding point.

(21) Illumination.

(a) Employees shall not enter spaces containing exposed energized parts, unless illumination is provided that enables the employees to perform the work safely.

(b) Where lack of illumination or an obstruction precludes observation of the work to be performed, employees shall not perform tasks near exposed energized parts. Employees shall not reach blindly into areas which may contain energized parts.

(22) Confined or enclosed space (such as a manhole or vault) that contains exposed energized parts, the employer shall provide, and the employee shall use, protective shields, protective barriers, or insulating materials as necessary to avoid inadvertent contact with these parts. Doors, hinged panels, and the like shall be secured to prevent their swinging into an employee and causing the employee to contact exposed energized parts.

(23) Conductive materials and equipment. Conductive materials and equipment that are in contact with any part of an employee's body shall be handled in a manner that will prevent them from contacting exposed energized conductors or circuit parts. If an employee handle long dimensional conductive objects (such as ducts and pipes) practices (such as the use of insulation, guarding, and material handling techniques) which will minimize the hazard.

(24) Portable ladders. Portable ladders shall have non-conductive siderails if they are used where the employee or the ladder could contact exposed energized parts.

(25) Conductive apparel. Conductive articles of jewelry and clothing (such as watch bands, bracelets, rings, key chains, necklaces, metalized aprons, cloth with conductive thread, or metal headgear) shall not be worn if they might contact exposed energized parts.

(26) Housekeeping duties.

(a) Where live parts present an electrical contact hazard, employees shall not perform housekeeping duties at such close distances to the parts that there is a possibility of contact, unless adequate safeguards (such as insulating equipment or barriers) are provided.

(b) Electrically conductive cleaning materials (including conductive solids such as steel wool, metalized cloth, and silicon carbide, as well as conductive liquid solutions) shall not be used in proximity to energized parts unless procedures are followed which will prevent electrical contact.

[Statutory Authority: Chapter 49.17 RCW. 94-15-096 (Order 94-07), § 296-155-428, filed 7/20/94, effective 9/20/94; 92-23-017 (Order 92-13), § 296-155-428, filed 11/10/92, effective 12/18/92; 88-11-021 (Order 88-04), § 296-155-428, filed 5/11/88.]

WAC 296-155-429 Lockout and tagging of circuits.

(1) Controls. Controls that are deactivated during the course of work on energized or deenergized equipment or circuits shall be tagged and padlocked in the open position.

(2) Equipment and circuits. Equipment or circuits that are de-energized shall be rendered inoperative and have tags and locked padlocks attached at all points where such equipment or circuits can be energized.

(3) Tags. Tags shall be placed to identify plainly the equipment or circuits being worked on.

(4) Lockout and tagging. While any employee is exposed to contact with parts of fixed electric equipment or circuits which have been deenergized, the circuits energizing the parts shall be locked out or tagged or both according to the requirements of this section. The requirements shall be fol-

lowed in the order in which they are presented (i.e., (a) of this subsection first, then (b) of this subsection).

Note 1: As used in this section, fixed equipment refers to equipment fastened in connected by permanent wiring methods.

Note 2: Lockout and tagging procedures that comply with chapter 296-24 WAC, Part A-4 will also be deemed to comply with this subsection provided that:

1. The procedures address the electrical safety hazards covered by this part; and
2. The procedures also incorporate the requirements of (c)(iv) and (d)(ii) of this subsection.

(a) Procedures. The employer shall maintain a written copy of the procedures outlined in this subsection and shall make it available for inspection by employees and by the director and his/her authorized representative.

Note: The written procedures may be in the form of a copy of this section, WAC 296-155-429.

(b) Deenergizing equipment.

(i) Safe procedures for deenergizing circuits and equipment shall be determined before circuits or equipment are deenergized.

(ii) The circuits and equipment to be worked on shall be disconnected from all electric energy sources. Control circuit devices, such as push buttons, selector switches, and interlocks, shall not be used as the sole means for deenergizing circuits or equipment. Interlocks for electric equipment shall not be used as a substitute for lockout and tagging procedures.

(iii) Stored electric energy which might endanger personnel shall be released. Capacitors shall be discharged and high capacitance elements shall be short-circuited and grounded, if the stored electric energy might endanger personnel.

Note: If the capacitors or associated equipment are handled in meeting this requirement, they shall be treated as energized.

(iv) Stored nonelectrical energy in devices that could reenergize electric circuit parts shall be blocked or relieved to the extent that the circuit parts could not be accidentally energized by the device.

(c) Application of locks and tags.

(i) A lock and a tag shall be placed on each disconnecting means used to deenergize circuits and equipment on which work is to be performed, except as provided in (c)(iii) and (v) of this subsection. The lock shall be attached to prevent persons from operating the disconnecting means unless they resort to undue force or the use of tools.

(ii) Each tag shall contain a statement prohibiting unauthorized operation of the disconnecting means and removal of the tag.

(iii) If a lock cannot be applied, or if the employer can demonstrate that tagging procedures will provide a level of safety equivalent to that obtained by the use of a lock, a tag may be used without a lock.

(iv) A tag used without a lock, as permitted by item (iii) of this subsection, shall be supplemented by at least one additional safety measure that provides a level of safety equivalent to that obtained by the use of a lock. Examples of additional safety measures include the removal of an isolating circuit element, blocking of a controlling switch, or opening of an extra disconnecting device.

(v) A lock may be placed without a tag only under the following conditions:

(A) Only one circuit or piece of equipment is deenergized; and

(B) The lockout period does not extend beyond the work shifts; and

(C) Employees exposed to the hazards associated with reenergizing the circuit or equipment are familiar with this procedure.

(d) Verification of deenergized condition. The requirements of this subsection shall be met before any circuits or equipment can be considered and worked as deenergized.

(i) A qualified person shall operate the equipment operating controls or otherwise verify that the equipment cannot be restarted.

(ii) A qualified person shall use test equipment to test the circuit elements and electrical parts of equipment to which employees will be exposed and shall verify that the circuit elements and equipment parts are deenergized. The test shall also determine if any energized conditions exist as a result of inadvertently induced voltage or unrelated voltage backfeed even though specific parts of the circuit have been deenergized and presumed to be safe. If the circuit to be tested is over 600 volts, nominal, the test equipment shall be checked for proper operation immediately before and immediately after this test.

(e) Reenergizing equipment. These requirements shall be met, in the order given, before circuits or equipment are reenergized, even temporarily.

(i) A qualified person shall conduct tests and visual inspections, as necessary, to verify that all tools, electrical jumpers, shorts, grounds, and other such devices have been removed, so that the circuits and equipment can be safely energized.

(ii) Employees exposed to the hazards associated with reenergizing the circuit or equipment shall be warned to stay clear of circuits and equipment.

(iii) Each lock and tag shall be removed by the employee who applied it or under his or her direct supervision. However, if this employee is absent from the work place, then the lock or tag may be removed by a qualified person designated to perform this task provided that:

(A) The employer ensures that the employee who applied the lock or tag is not available at the work place; and

(B) The employer ensures that the employee is aware that the lock or tag has been removed before he or she resumes work at that work place.

(iv) There shall be a visual determination that all employees are clear of the circuits and equipment.

[Statutory Authority: Chapter 49.17 RCW. 96-17-056, § 296-155-429, filed 8/20/96, effective 10/15/96; 94-15-096 (Order 94-07), § 296-155-429, filed 7/20/94, effective 9/20/94; 88-11-021 (Order 88-04), § 296-155-429, filed 5/11/88.]

WAC 296-155-432 Maintenance of equipment. The employer shall ensure that all wiring components and utilization equipment in hazardous locations are maintained in a dust-tight, dust-ignition-proof, or explosion-proof condition, as appropriate. There shall be no loose or missing screws,

[Title 296 WAC—p. 2326]

gaskets, threaded connections, seals, or other impairments to a tight condition.

[Statutory Authority: Chapter 49.17 RCW. 88-11-021 (Order 88-04), § 296-155-432, filed 5/11/88.]

WAC 296-155-434 Environmental deterioration of equipment. (1) Deteriorating agents.

(a) Unless identified for use in the operating environment, no conductors or equipment shall be located:

(i) In damp or wet locations;

(ii) Where exposed to gases, fumes, vapors, liquids, or other agents having a deteriorating effect on the conductors or equipment; or

(iii) Where exposed to excessive temperatures.

(b) Control equipment, utilization equipment, and busways approved for use in dry locations only shall be protected against damage from the weather during building construction.

(2) Protection against corrosion. Metal raceways, cable armor, boxes, cable sheathing, cabinets, elbows, couplings, fittings, supports, and support hardware shall be of materials appropriate for the environment in which they are to be installed.

[Statutory Authority: Chapter 49.17 RCW. 88-11-021 (Order 88-04), § 296-155-434, filed 5/11/88.]

WAC 296-155-437 Batteries and battery charging.

(1) General requirements.

(a) Batteries of the unsealed type shall be located in enclosures with outside vents or in well ventilated rooms and shall be arranged so as to prevent the escape of fumes, gases, or electrolyte spray into other areas.

(b) Ventilation shall be provided to ensure diffusion of the gases from the battery and to prevent the accumulation of an explosive mixture.

(c) Racks and trays shall be substantial and shall be treated to make them resistant to the electrolyte.

(d) Floors shall be of acid resistant construction unless protected from acid accumulations.

(e) Face shields, aprons, and rubber gloves shall be provided for and worn by workers handling acids or batteries.

(f) Facilities for quick drenching of the eyes and body shall be provided within 25 feet (7.62 m) of battery handling areas.

(g) Facilities shall be provided for flushing and neutralizing spilled electrolyte and for fire protection.

(2) Charging.

(a) Battery charging installations shall be located in areas designated for that purpose.

(b) Charging apparatus shall be protected from damage by trucks.

(c) When batteries are being charged, the vent caps shall be kept in place to avoid electrolyte spray. Vent caps shall be maintained in functioning condition.

[Statutory Authority: Chapter 49.17 RCW. 88-11-021 (Order 88-04), § 296-155-437, filed 5/11/88.]

WAC 296-155-441 Applicability. (1) Covered. WAC 296-155-441 through 296-155-459 contain installation safety

(2001 Ed.)

requirements for electrical equipment and installations used to provide electric power and light at the jobsite. These sections apply to installations, both temporary and permanent, used on the jobsite; but these sections do not apply to existing permanent installations that were in place before the construction activity commenced.

Note: If the electrical installation is made in accordance with the National Electrical Code ANSI/NFPA 70-1984, exclusive of formal interpretations and tentative interim amendments, it will be deemed to be in compliance with WAC 296-155-444 through 296-155-459, except for WAC 296-155-447 (2)(a) and 296-155-449 (1)(b)(ii)(E), (F), (G), and (J).

(2) Not covered. WAC 296-155-441 through 296-155-459 do not cover installations used for the generation, transmission, and distribution of electric energy, including related communication, metering, control, and transformation installations. (However, these regulations do cover portable and vehicle-mounted generators used to provide power for equipment used at the jobsite.) See chapter 296-44 WAC, Safety standards—Electrical Construction Code, for the construction of power distribution and transmission lines.

[Statutory Authority: Chapter 49.17 RCW. 88-11-021 (Order 88-04), § 296-155-441, filed 5/11/88.]

WAC 296-155-444 General requirements. (1) Approval. All electrical conductors and equipment shall be approved.

(2) Examination, installation, and use of equipment.

(a) Examination. The employer shall ensure that electrical equipment is free from recognized hazards that are likely to cause death or serious physical harm to employees. Safety of equipment shall be determined on the basis of the following considerations:

(i) Suitability for installation and use in conformity with the provisions of this part. Suitability of equipment for an identified purpose may be evidenced by listing, labeling, or certification for that identified purpose.

(ii) Mechanical strength and durability, including, for parts designed to enclose and protect other equipment, the adequacy of the protection thus provided.

(iii) Electrical insulation.

(iv) Heating effects under conditions of use.

(v) Arcing effects.

(vi) Classification by type, size, voltage, current capacity, specific use.

(vii) Other factors which contribute to the practical safeguarding of employees using or likely to come in contact with the equipment.

(b) Installation and use. Listed, labeled, or certified equipment shall be installed and used in accordance with instructions included in the listing, labeling, or certification.

(3) Interrupting rating. Equipment intended to break current shall have an interrupting rating at system voltage sufficient for the current that must be interrupted.

(4) Mounting and cooling of equipment.

(a) Mounting. Electric equipment shall be firmly secured to the surface on which it is mounted. Wooden plugs driven into holes in masonry, concrete, plaster, or similar materials shall not be used.

(b) Cooling. Electrical equipment which depends upon the natural circulation of air and convection principles for cooling of exposed surfaces shall be installed so that room air flow over such surfaces is not prevented by walls or by adjacent installed equipment. For equipment designed for floor mounting, clearance between top surfaces and adjacent surfaces shall be provided to dissipate rising warm air. Electrical equipment provided with ventilating openings shall be installed so that walls or other obstructions do not prevent the free circulation of air through the equipment.

(5) Splices. Conductors shall be spliced or joined with splicing devices designed for the use or by brazing, welding, or soldering with a fusible metal or alloy. Soldered splices shall first be so spliced or joined as to be mechanically and electrically secure without solder and then soldered. All splices and joints and the free ends of conductors shall be covered with an insulation equivalent to that of the conductors or with an insulating device designed for the purpose.

(6) Arcing parts. Parts of electric equipment which in ordinary operation produce arcs, sparks, flames, or molten metal shall be enclosed or separated and isolated from all combustible material.

(7) Marking. Electrical equipment shall not be used unless the manufacturer's name, trademark, or other descriptive marking by which the organization responsible for the product may be identified is placed on the equipment and unless other markings are provided giving voltage, current, wattage, or other ratings as necessary. The marking shall be of sufficient durability to withstand the environment involved.

(8) Identification of disconnecting means and circuits. Each disconnecting means required by this part for motors and appliances shall be legibly marked to indicate its purpose, unless located and arranged so the purpose is evident. Each service, feeder, and branch circuit, at its disconnecting means or overcurrent device, shall be legibly marked to indicate its purpose, unless located and arranged so the purpose is evident. These markings shall be of sufficient durability to withstand the environment involved.

(9) Construction site. Precautions shall be taken to make any necessary open wiring inaccessible to unauthorized personnel.

(10) 600 volts, nominal, or less. This subsection applies to equipment operating at 600 volts, nominal, or less.

(a) Working space about electric equipment. Sufficient access and working space shall be provided and maintained about all electric equipment to permit ready and safe operation and maintenance of such equipment.

(i) Working clearances. Except as required or permitted elsewhere in this part, the dimension of the working space in the direction of access to live parts operating at 600 volts or less and likely to require examination, adjustment, servicing, or maintenance while alive shall not be less than indicated in Table I-1. In addition to the dimensions shown in Table I-1, workspace shall not be less than 30 inches (762 mm) wide in front of the electric equipment. Distances shall be measured from the live parts if they are exposed, or from the enclosure front or opening if the live parts are enclosed. Walls constructed of concrete, brick, or tile are considered to be grounded. Working space is not required in back of assem-

blies such as dead-front switchboards or motor control centers where there are no renewable or adjustable parts such as fuses or switches on the back and where all connections are accessible from locations other than the back.

Table I-1
Working Clearances

Nominal Voltage to Ground	Minimum Clear Distance for Conditions ¹		
	(a) Feet ²	(b) Feet ²	(c) Feet ²
0-150	3	3	3
151-600	3	3 1/2	4

¹ Conditions (a), (b), and (c) are as follows: (a) Exposed live parts on one side and no live or grounded parts on the other side of the working space, or exposed live parts on both sides effectively guarded by insulating material. Insulated wire or insulated busbars operating at not over 300 volts are not considered live parts. (b) Exposed live parts on one side and grounded parts on the other side. (c) Exposed live parts on both sides of the workspace not guarded provided in condition (a) with the operator between.

² Note: For International System of Units (SI): One foot=0.3048m.

(ii) Clear spaces. Working space required by this part shall not be used for storage. When normally enclosed live parts are exposed for inspection or servicing, the working space, if in a passageway or general open space, shall be guarded.

(iii) Access and entrance to working space. At least one entrance shall be provided to give access to the working space about electric equipment.

(iv) Front working space. Where there are live parts normally exposed on the front of switchboards or motor control centers, the working space in front of such equipment shall not be less than 3 feet (914 mm).

(v) Headroom. The minimum headroom of working spaces about service equipment, switchboards, panelboards, or motor control centers shall be 6 feet 3 inches (1.91 m).

(b) Guarding of live parts.

(i) Except as required or permitted elsewhere in this part, live parts of electric equipment operating at 50 volts or more shall be guarded against accidental contact by cabinets or other forms of enclosures, or by any of the following means:

(A) By location in a room, vault, or similar enclosure that is accessible only to qualified persons.

(B) By partitions or screens so arranged that only qualified persons will have access to the space within reach of the live parts. Any openings in such partitions or screens shall be so sized and located that persons are not likely to come into accidental contact with the live parts or to bring conducting objects into contact with them.

(C) By location on a balcony, gallery, or platform so elevated and arranged as to exclude unqualified persons.

(D) By elevation of 8 feet (2.44 m) or more above the floor or other working surface and so installed as to exclude unqualified persons.

(ii) In locations where electric equipment would be exposed to physical damage, enclosures or guards shall be so arranged and of such strength as to prevent such damage.

(iii) Entrances to rooms and other guarded locations containing exposed live parts shall be marked with conspicuous warning signs forbidding unqualified persons to enter.

(11) Over 600 volts, nominal.

(a) General. Conductors and equipment used on circuits exceeding 600 volts, nominal, shall comply with all applicable provisions of subsections (1) through (7) of this section and with the following provisions which supplement or modify those requirements. The provisions of (b), (c), and (d) of this subsection do not apply to equipment on the supply side of the service conductors.

(b) Enclosure for electrical installations. Electrical installations in a vault, room, closet or in an area surrounded by a wall, screen, or fence, access to which is controlled by lock and key or other equivalent means, are considered to be accessible to qualified persons only. A wall, screen, or fence less than 8 feet (2.44 m) in height is not considered adequate to prevent access unless it has other features that provide a degree of isolation equivalent to an 8 foot (2.44 m) fence. The entrances to all buildings, rooms or enclosures containing exposed live parts or exposed conductors operating at over 600 volts, nominal, shall be kept locked or shall be under the observation of a qualified person at all times.

(i) Installations accessible to qualified persons only. Electrical installations having exposed live parts shall be accessible to qualified persons only and shall comply with the applicable provisions of (c) of this subsection.

(ii) Installations accessible to unqualified persons. Electrical installations that are open to unqualified persons shall be made with metal-enclosed equipment or shall be enclosed in a vault or in an area, access to which is controlled by a lock. Metal-enclosed switchgear, unit substations, transformers, pull boxes, connection boxes, and other similar associated equipment shall be marked with appropriate caution signs. If equipment is exposed to physical damage from vehicular traffic, guards shall be provided to prevent such damage. Ventilating or similar openings in metal-enclosed equipment shall be designed so that foreign objects inserted through these openings will be deflected from energized parts.

(c) Workspace about equipment. Sufficient space shall be provided and maintained about electric equipment to permit ready and safe operation and maintenance of such equipment. Where energized parts are exposed, the minimum clear workspace shall not be less than 6 feet 6 inches (1.98 m) high (measured vertically from the floor or platform,) or less than 3 feet (914 mm) wide (measured parallel to the equipment.) The depth shall be as required in Table I-2. The workspace shall be adequate to permit at least a ninety degree opening of doors or hinged panels.

(i) Working space. The minimum clear working space in front of electric equipment such as switchboards, control panels; switches, circuit breakers, motor controllers, relays, and similar equipment shall not be less than specified in Table I-2 unless otherwise specified in this part. Distances shall be measured from the live parts if they are exposed, or from the enclosure front or opening if the live parts are enclosed. However, working space is not required in back of equipment such as deadfront switchboards or control assemblies where there are no renewable or adjustable parts (such as fuses or switches) on the back and where all connections are accessible from locations other than the back. Where rear access is required to work on de-energized parts on the back of

enclosed equipment, a minimum working space of 30 inches (762 mm) horizontally shall be provided.

Table I-2
Minimum Depth of Clear Working
Space in Front of electric Equipment

Nominal Voltage to Ground	Minimum Clear Distance for Conditions ¹		
	(a)	(b)	(c)
	Feet ²	Feet ²	Feet ²
601 to 2,500	3	4	5
2,501 to 9,000	4	5	6
9,001 to 25,000	5	6	9
25,001 to 75kV	6	8	10
Above 75kV	8	10	12

¹ Conditions (a), (b), and (c) are as follows: (a) Exposed live parts on one side and no live or grounded parts on the other side of the working space, or exposed live parts on both sides effectively guarded by insulating materials. Insulated wire or insulated busbars operating at not over 300 volts are not considered live parts. (b) Exposed live parts on one side and grounded parts on the other side. Walls constructed of concrete, brick, or the tile are considered to be grounded surfaces. (c) Exposed live parts on both sides of the workspace (not guarded as provided in Condition (a)) with the operator between.

² Note: For S1 units: One foot = 0.3048m.

(ii) Lighting outlets and points of control. The lighting outlets shall be so arranged that persons changing lamps or making repairs on the lighting system will not be endangered by live parts or other equipment. The points of control shall be so located that persons are not likely to come in contact with any live part or moving part of the equipment while turning on the lights.

(iii) Elevation of unguarded live parts. Unguarded live parts above working space shall be maintained at elevations not less than specified in Table I-3.

Table I-3
Elevation of Unguarded
Energized Parts Above Working Space

Nominal Voltage to Between Phases	Minimum Elevation
601 to 7,500	8 feet 6 inches ¹
7,501 to 35,000	9 feet
Over 35kV	9 feet + 0.37 inches per kV above 35kV

¹ Note: For S1 units: One inch = 25.4mm, one foot = 0.3048m.

(d) Entrance and access to workspace. At least one entrance not less than 24 inches (610 mm) wide and 6 feet 6 inches (1.98 m) high shall be provided to give access to the working space about electric equipment. On switchboard and control panels exceeding 48 inches (1.22 m) in width, there shall be one entrance at each end of such board where practicable. Where bare energized parts at any voltage or insulated energized parts above 600 volts are located adjacent to such entrance, they shall be guarded.

(12) Welding and cutting equipment. Welding and cutting equipment shall meet the requirements specified in Parts D and H of this chapter.

[Statutory Authority: Chapter 49.17 RCW. 93-19-142 (Order 93-04), § 296-155-444, filed 9/22/93, effective 11/1/93; 92-23-017 (Order 92-13), § 296-155-444, filed 11/10/92, effective 12/18/92; 88-11-021 (Order 88-04), § 296-155-444, filed 5/11/88.]

WAC 296-155-447 Wiring design and protection. (1)

Use and identification of grounded and grounding conductors.

(a) Identification of conductors. A conductor used as a grounded conductor shall be identifiable and distinguishable from all other conductors. A conductor used as an equipment grounding conductor shall be identifiable and distinguishable from all other conductors.

(b) Polarity of connections. No grounded conductor shall be attached to any terminal or lead so as to reverse designated polarity.

(c) Use of grounding terminals and devices. A grounding terminal or grounding-type device on a receptacle, cord connector, or attachment plug shall not be used for purposes other than grounding.

(2) Branch circuits.

(a) Ground-fault protection.

(i) General. The employer shall use either ground-fault circuit interrupters as specified in (a)(ii) of this subsection or an assured equipment grounding conductor program as specified in (a)(iii) of this subsection to protect employees on construction sites. These requirements are in addition to any other requirements for equipment grounding conductors.

(ii) Ground-fault circuit interrupters. All 120-volt, single-phase, 15-ampere and 20-ampere receptacle outlets on construction sites, which are not a part of the permanent wiring of the building or structure and which are in use by employees, shall have approved ground-fault circuit interrupters for personnel protection. Receptacles on a two-wire, single-phase portable or vehicle-mounted generator rated not more than 5kW, where the circuit conductors of the generator are insulated from the generator frame and all other grounded surfaces, need not be protected with ground-fault circuit interrupters.

(iii) Assured equipment grounding conductor program. The employer shall establish and implement an assured equipment grounding conductor program on construction sites covering all cord sets, receptacles which are not a part of the building or structure, and equipment connected by cord and plug which are available for use or used by employees. This program shall comply with the following minimum requirements:

(A) A written description of the program, including the specific procedures adopted by the employer, shall be available at the jobsite for inspection and copying by the director and any affected employee.

(B) The employer shall designate one or more competent persons (as defined in WAC 296-155-012(4)) to implement the program, and to perform continuing tests and inspections as required.

(C) Each cord set, attachment cap, plug and receptacle of cord sets, and any equipment connected by cord and plug, except cord sets and receptacles which are fixed and not exposed to damage, shall be visually inspected before each day's use for external defects, such as deformed or missing pins or insulation damage, and for indications of possible internal damage. Equipment found damaged or defective shall not be used until repaired.

(D) The following tests shall be performed on all cord sets, receptacles which are not a part of the permanent wiring

of the building or structure, and cord-connected and plug-connected equipment required to be grounded:

(I) All equipment grounding conductors shall be tested for continuity and shall be electrically continuous.

(II) Each receptacle and attachment cap or plug shall be tested for correct attachment of the equipment grounding conductor. The equipment grounding conductor shall be connected to its proper terminal.

(III) Each outlet receptacle, or power source shall be tested to ensure proper polarity.

(E) All required tests shall be performed:

(I) Before first use;

(II) Before equipment is returned to service following any repairs;

(III) Before equipment is used after any incident which can be reasonably suspected to have caused damage (for example, when a cord set is run over); and

(IV) At intervals not to exceed 3 months, except that cord sets and receptacles which are fixed and not exposed to damage shall be tested at intervals not exceeding 6 months.

(F) The employer shall not make available or permit the use by employees of any equipment which has not met the requirements of (a)(iii) of this subsection.

(G) Tests performed as required in this subsection shall be recorded. This test record shall identify each receptacle, cord set, and cord-connected and plug-connected equipment that passed the test and shall indicate the last date it was tested or the interval for which it was tested. This record shall be kept by means of logs, color coding, or other effective means and shall be maintained until replaced by a more current record. The record shall be made available on the jobsite for inspection by the director and any affected employee.

(b) Outlet devices. Outlet devices shall have an ampere rating not less than the load to be served and shall comply with the following:

(i) Single receptacles. A single receptacle installed on an individual branch circuit shall have an ampere rating of not less than that of the branch circuit.

(ii) Two or more receptacles. Where connected to a branch circuit supplying two or more receptacles or outlets, receptacle ratings shall conform to the values listed in Table I-4.

(iii) Receptacles used for the connection of motors. The rating of an attachment plug or receptacle used for cord-connection and plug-connection of a motor to a branch circuit shall not exceed 15 amperes at 125 volts or 10 amperes at 250 volts if individual overload protection is omitted.

Table I-4
Receptacle Ratings for Various Size Circuits

Circuit Rating Amperes	Receptacle Rating Amperes
15	Not Over 15
20	15 or 20
30	30
40	40 or 50
50	50

(3) Outside conductors and lamps.

(a) 600 volts, nominal, or less. (a)(i) through (iv)(D) of this subsection apply to branch circuit, feeder, and service

conductors rated 600 volts, nominal, or less and run outdoors as open conductors.

(i) Conductors on poles. Conductors supported on poles shall provide a horizontal climbing space not less than the following:

(A) Power conductors below communication conductors: 30 inches (762 mm).

(B) Power conductors alone or above communication conductors: 300 volts or less—24 inches (610 mm); more than 300 volts—30 inches (762 mm).

(C) Communication conductors below power conductors: With power conductors 300 volts or less—24 inches (610 mm); more than 300 volts—30 inches (762 mm).

(ii) Clearance from ground. Open conductors shall conform to the following minimum clearances:

(A) 10 feet (3.05 m)—above finished grade, sidewalks, or from any platform or projection from which they might be reached.

(B) 12 feet (3.66 m)—over areas subject to vehicular traffic other than truck traffic.

(C) 15 feet (4.57 m)—over areas other than those specified in (a)(ii)(D) of this subsection that are subject to truck traffic.

(D) 18 feet (5.49 m)—over public streets, alleys, roads, and driveways.

(iii) Clearance from building openings. Conductors shall have a clearance of at least 3 feet (914 mm) from windows, doors, fire escapes, or similar locations. Conductors run above the top level of a window are considered to be out of reach from that window and, therefore, do not have to be 3 feet (914 mm) away.

(iv) Clearance over roofs. Conductors above roof space accessible to employees on foot shall have a clearance from the highest point of the roof surface of not less than 8 feet (2.44 m) vertical clearance for insulated conductors, not less than 10 feet (3.05 m) vertical or diagonal clearance for covered conductors, and not less than 15 feet (4.57 m) for bare conductors, except that:

(A) Where the roof space is also accessible to vehicular traffic, the vertical clearance shall not be less than 18 feet (5.49 m); or

(B) Where the roof space is not normally accessible to employees on foot, fully insulated conductors shall have a vertical or diagonal clearance of not less than 3 feet (914 mm); or

(C) Where the voltage between conductors is 300 volts or less and the roof has a slope of not less than 4 inches (102 mm) in 12 inches (305 mm), the clearance from roofs shall be at least 3 feet (914 mm); or

(D) Where the voltage between conductors is 300 volts or less and the conductors do not pass over more than 4 feet (1.22 m) of the overhang portion of the roof and they are terminated at a through-the-roof raceway or support, the clearance from roofs shall be at least 18 inches (457 mm).

(b) Location of outdoor lamps. Lamps for outdoor lighting shall be located below all live conductors, transformers, or other electric equipment, unless such equipment is controlled by a disconnecting means that can be locked in the open position or unless adequate clearances or other safeguards are provided for relamping operations.

(4) Services.

(a) Disconnecting means.

(i) General. Means shall be provided to disconnect all conductors in a building or other structure from the service-entrance conductors. The disconnecting means shall plainly indicate whether it is in the open or closed position and shall be installed at a readily accessible location nearest the point of entrance of the service-entrance conductors.

(ii) Simultaneous opening of poles. Each service disconnecting means shall simultaneously disconnect all ungrounded conductors.

(b) Services over 600 volts, nominal. The following additional requirements apply to services over 600 volts, nominal.

(i) Guarding. Service-entrance conductors installed as open wires shall be guarded to make them accessible only to qualified persons.

(ii) Warning signs. Signs warning of high voltage shall be posted where unauthorized employees might come in contact with live parts.

(5) Overcurrent protection.

(a) 600 volts, nominal, or less. The following requirements apply to overcurrent protection of circuits rated 600 volts, nominal, or less.
