Reviser's note: Surface and ground water rules bearing history notes with filing dates of 3/23/60 or 8/30/60 are rules filed by the then existing department of conservation. Sections 8 and 19, chapter 242, Laws of 1967 (RCW 43.27A.080 and 43.27A.170) affected the application of these rules to the department of water resources.

WAC 508-12-010 Regulation of water right diversions—Personnel. Regulation and control of waters according to rights thereto, shall be made through watermasters and stream patrolmen, or a staff member of the department of ecology. Chapter 90.08 RCW and RCW 43.21.130.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-010, filed 6/9/88; Rule 1, filed 3/23/60. Formerly WAC 134-12-010.]

WAC 508-12-020 Regulation of water right diversions—Regulation of unincorporated partnership ditches. Watermasters shall not attempt to regulate water beyond the points of diversion from the natural stream on unincorporated partnership ditches. Such regulations may be carried on by ditch patrolmen as outlined under RCW 90.03.440. When approved by the department of ecology and water users a district watermaster may serve as a stream or ditch patrolman.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-020, filed 6/9/88; Rule 2, filed 3/23/60. Formerly WAC 134-12-020.]

(2001 Ed.)

WAC 508-12-030 Regulation of water right diversions—Controlling works—Measuring devices. Where controlling works or measuring devices are not installed or maintained to the satisfaction of the department of ecology, proper notice shall be given to the owner to install or repair such controlling works or measuring device. This notice shall allow not less than ten days time to make necessary repairs or installations. In the event the work outlined in the notice is not completed in the specified time, the diversion shall be closed to further flow of water, until such time as the notice has been fully complied with.

WAC 508-12-080 Determination of existing rights to the use of water. Upon the filing of a petition by one or more persons requesting the rights to the use of the waters of a stream or other source of water, the department of ecology shall conduct a reconnaissance survey for the purpose of determining whether or not the interests of the public can best be served by the adjudication of the individual rights thus involved. If an adjudication proceeding is instigated, the department of ecology shall determine the description of lands to be included as well as the record ownerships. Each owner and interested party will be made a party to the proceedings and a lis pendens will be filed with the county auditor. (RCW 90.03.110 and 90.03.120.)

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-080, filed 6/9/88; Rule 8, filed 3/23/60. Formerly WAC 134-12-080.]

WAC 508-12-090 Surface water appropriation procedure—Rights of way. Permits secured through this office do not carry any right of way privileges. Right of way for

[Title 508 WAC—p. 3]

diversion, storage or transmission facilities must be obtained by the permittee from the owner of the property on which such structure or ditch will be located, or by condemnation proceedings.

[Rule 9, filed 3/23/60. Formerly WAC 134-12-090.]

WAC 508-12-100 Surface water appropriation procedure—Applications for permit—Forms. Applications for permit to appropriate surface water shall be made on forms provided by the department of ecology. (Supplements paragraph 5, RCW 43.21.130.)

WAC 508-12-110 Surface water appropriation procedure—Number of applications. It shall be the general rule that an application must be filed for each separate source of water. In special instances one application may cover more than one source of water such as, a group of springs in close relationship to each other and with no intervening property ownership; and, to divert from two or more streams whose confluence is upon lands of the applicant; and, where a common distribution system may be employed. The amount, point of diversion, and purpose of use from each source must be indicated in the application.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-110, filed 6/9/88; Rule 11, filed 3/23/60. Formerly WAC 134-12-110.]

WAC 508-12-120 Surface water appropriation procedure—Maps or sketches. A map must accompany the application showing source of supply, point of diversion, tie to a legal land corner, and general plan of the proposed development. If for irrigation, it must clearly show the lands to be irrigated. For small projects, maps or sketches prepared by the applicant on forms provided by this office will be acceptable if legible and accurate. For larger projects, maps on any reasonable scale prepared by engineers in planning the project may be required. (Supplemental to RCW 90.03.260.)

shall be accepted as payment of initial fee when transmitted with the application.

[Rule 14, filed 3/23/60. Formerly WAC 134-12-140.]

WAC 508-12-150 Surface water appropriation procedure—Affidavit of publication of notice. An affidavit of publication of the notice of water right application executed by the publisher must be filed with the department of ecology as proof of due notice to the public. (RCW 90.03.280.)

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-150, filed 6/9/88; Rule 15, filed 3/23/60. Formerly WAC 134-12-150.]

WAC 508-12-160 Surface water appropriation procedure—No action on permits allowable prior to 30 days after last publication. No action shall be taken toward issuance of a permit or granting a petition for change in point of diversion, purpose or place of use until 30 days after date of last publication of notice as provided in RCW 90.03.280 and 90.03.380. In all instances, RCW 90.03.470(12) shall apply.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-160, filed 6/9/88; Rule 16, filed 3/23/60. Formerly WAC 134-12-160.]

WAC 508-12-170 Surface water appropriation procedure—Protests or objections. (1) Protests or objections to granting a permit or petition for change must be submitted within the prescribed 30 day period and must include a statement of the basis for said objections.

(2) All protests or objections will be thoroughly investigated by the department of ecology which may hold a meeting among the parties for fact-finding purposes.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-170, filed 6/9/88; Rule 17, filed 3/23/60. Formerly WAC 134-12-170.]

WAC 508-12-190 Surface water appropriation procedure—Amendments as to source, quantity, etc. (1) In the event an applicant or permittee should desire to amend the terms of his application or permit regarding source, quantity, point of diversion, purpose, or place of use, the procedure shall be as outlined in RCW 90.03.380 excepting that no certificate of change will issue but the amendments shall be incorporated in the terms of the permit.

(2) Amendment of a permit may be made without affecting priority, only after full consideration of the proposed changes in accordance with the provisions outlined in RCW 90.03.290.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-190, filed 6/9/88; Rule 19, filed 3/23/60. Formerly WAC 134-12-190.]

WAC 508-12-200 Surface water appropriation procedure—Division of land ownership before certificate issued. Where a permit has been issued to a person and the land to which the water right is to become appurtenant has been divided before the issuance of a water right certificate, separate certificates may be issued to each holder of land with the proper share of the water allotted, providing assignments of each share are recorded with the department of ecology. (Supplements RCW 90.03.380.)

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-200, filed 6/9/88; Rule 20, filed 3/23/60. Formerly WAC 134-12-200.]

WAC 508-12-210 Surface water appropriation procedure—Seasonal permits. Seasonal permits for change of point of diversion, purpose and/or place of use of water, shall be in writing and signed by the director of the department of ecology or a duly authorized representative. (RCW 90.03.390.)

WAC 508-12-220 Ground water appropriation procedure—Applicability of foregoing rules. The general application of rules numbered WAC 508-12-080 through 508-12-210 inclusive on surface water applications, shall also apply to the ground water appropriation procedure.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-220, filed 6/9/88; Rule 22, filed 3/23/60. Formerly WAC 134-12-220.]

WAC 508-12-230 Ground water appropriation procedure—Relative rights—Ground and surface water appropriators. Where controversy arises over the relative rights as between ground and surface water appropriators, the basic law of "first in time, first in right" shall apply.

[Rule 23, filed 3/23/60. Formerly WAC 134-12-230.]

WAC 508-12-240 Ground water appropriation procedure—Where proposed construction is near surface water supply. Where a proposed well is to be constructed near a lake, stream, or spring, which is heavily or fully appropriated, the department of ecology may specify a minimum distance between the well location and the surface water supply, or, require that the well casing be installed in such a manner as to insure a break in hydraulic continuity between the well and the shallow ground waters contributing to the surface water supply.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-240, filed 6/9/88; Rule 24, filed 3/23/60. Formerly WAC 134-12-240.]

WAC 508-12-250 Ground water appropriation procedure—Where wells penetrate artesian water zones. Wells penetrating artesian water zones: RCW 90.44.070.

(1) Wells taking water from artesian zones shall contain water-tight casings from the ground surface down through and properly sealed into the confining layer.

(2001 Ed.)

(2) Issuance of permits to take water from an artesian zone shall not be stopped when existing wells penetrating said artesian zone no longer flow at ground surface; rather, a reasonable seasonal lowering of the water table will be permissible to more fully utilize the reservoir capacity of the aquifer.

(3) Where the waste of water through improperly constructed wells has been found and wasting of said water is depriving others of water to which they are entitled, or causing an unreasonable drop in the water table, or threatens permanent damage to the aquifer, the department of ecology shall direct the owner to make necessary repairs to correct the situation. (RCW 90.44.120.)

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-250, filed 6/9/88; Rule 25, filed 3/23/60. Formerly WAC 134-12-250.]

WAC 508-12-260 Reservoir permits—Where required. A reservoir permit will be required whenever it is proposed to construct a barrier across a stream, channel, or water course, and which will actually retain for a beneficial use a portion of the annual runoff of the stream or water course. (For positive determination of the necessity of a reservoir permit, a reservoir shall be defined as any dam or dike storing water to a depth of 10 or more feet at its deepest point, or one that is retaining 10 or more acre-feet of water.) This will also apply to a reservoir adjacent to a stream channel when water will be required to fill the reservoir in addition to a constant diversion to keep it full.

[Rule 26, filed 3/23/60. Formerly WAC 134-12-260.]

WAC 508-12-270 Reservoir permits—Limits on filling. Unless otherwise specified, a reservoir permit will allow the permittee to fill the reservoir once annually and the permit shall specifically state the period during which the water may be used to fill the reservoir. If water in excess of one filling of the reservoir is required, a further application for the additional water must be filed.

[Rule 27, filed 3/23/60. Formerly WAC 134-12-270.]

WAC 508-12-390 Enforcement. In enforcement of this chapter, the department of ecology may impose such sanctions as are appropriate under authorities vested in it, including but not limited to the issuance of regulatory orders under RCW 43.27A.190 and civil penalties under RCW 90.03.600.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-390, filed 6/9/88.]

WAC 508-12-400 Appeals. All final written decisions of the department of ecology pertaining to permits, regulatory orders, and related decisions made pursuant to this chapter shall be subject to review by the pollution control hearings board in accordance with chapter 43.21B RCW.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-400, filed 6/9/88.]

WAC 508-12-410 Regulation review. The department of ecology shall initiate a review of the rules established in this chapter whenever new information, changing conditions,

[Title 508 WAC—p. 5]

or statutory modifications make it necessary to consider revisions.

[Statutory Authority: Chapter 43.27A RCW. 88-13-037 (Order 88-11), § 508-12-410, filed 6/9/88.]

COLUMBIA BASIN PROJECT—GROUND WATERS

WAC

508-14-025	Authority.
508-14-030	Withdrawal of ground waters—Permit required—Certain conditions and areas declared appropriate.
508-14-040	Appeals.
508-14-050	Regulation review.

Reviser's note: Withdrawal of ground water rules filed 5/15/67 are rules filed by the then existing department of conservation. Section 8 and 19, chapter 242, Laws of 1967 (RCW 43.27A.080 and 43.27A.170) effected the application of these rules to the newly created department of water resources. WAC 508-14-010 and 508-14-020 are hereby repealed by Order DE 74-34, filed 12/30/74. WAC 508-14-030 adopted by Order DE 74-34, and filed in the code reviser's office 12/30/74 was filed by the department of ecology.

DISPOSITION OF SECTIONS FORMERLY CODIFIED IN THIS CHAPTER

508-14-010	Columbia Basin project—Withdrawal of ground waters. [Docket No. 67-3 regulation, filed by the department of conservation, 5/15/67; Docket No. 67-2 emergency rule, filed by the department of conservation, 3/17/67.] Repealed by Order DE 74-34, filed 12/30/74. See Title 173 WAC and WAC 508-14-030.
508-14-020	Construction of wells and withdrawal of ground waters underlying those lands within the Columbia Basin project known as the Quincy Basin. [Docket No. 67-4 regulation, filed 8/21/67 by the department of water resources; Rules 67-2 (emergency) and 67-3 of the department of conservation, filed respectively 3/17/67 and 5/15/67.] Repealed by Order DE 74-34, filed 12/30/74. See Title 173 WAC.

WAC 508-14-025 Authority. This chapter is promulgated by the department of ecology pursuant to chapters 43.21, 43.21A, 43.27A, 90.03, 90.44, and 90.54 RCW.

[Statutory Authority: RCW 43.21A.060, 86-04-058 (Order DE 86-02), § 508-14-025, filed 2/4/86.]

WAC 508-14-030 Withdrawal of ground waters—Permit required—Certain conditions and areas declared appropriate. (1)(a) All who are acquainted with the state of Washington know of the Grand Coulee Dam and the Columbia Basin project. In 1943, the congress of the United States passed the Columbia Basin Project Act, 57 Stat. 14 (1943), 16 U.S.C. 835 (1958) so that waters made available by the dam for irrigation purposes could be beneficially used. The state's historical position, as set forth in both state legislation and executive statements, has been one of full cooperation with the federal government to insure that the project's purpose of settling and developing the agricultural lands within said project is realized.

(b) Under state law, subject to existing rights, all natural ground waters of the state and all "artificially stored" ground waters that have been abandoned or forfeited are public ground waters available for appropriation as provided for in chapters 90.44 and 90.03 RCW.

(c) Beneath the surface of the lands within and adjoining the Columbia Basin project are large quantities of naturally

occurring and artificially stored ground water, the source, extent, volume and flow characteristics being generally known, but the depth being largely unknown.

(d) With the development of the Columbia Basin project, by the United States Department of the Interior, Bureau of Reclamation, the ground-water characteristics of the land within the project have, without doubt, undergone change, including a substantial commingling of natural and "artificially stored" ground waters.

(e) Within the Columbia Basin project, but outside the Quincy ground water management subarea, established by chapter 173-124 WAC, and the Odessa ground water management subarea established by chapter 173-128A WAC, certain persons and entities presently claim interests in portions of these commingled waters.

(f) To insure that the public interest is protected as well as the interests of those claiming interests in said ground waters and that at the same time public waters are, when appropriate, made available for beneficial use, this office, in carrying out its duties and obligations, deems it necessary to set forth certain interim policies which shall guide the department in granting authority to make withdrawal from these commingled waters until ground water subareas are established under the procedures set forth in RCW 90.44.130.

(2)(a) Applications filed with the department of ecology pursuant to RCW 90.44.060 requesting permission to withdraw public ground waters within the exterior boundaries of the Columbia Basin project underlying lands within the legal description described in subsection (3) of this rule shall be received, and permits issued if it appears to the department as a tentative conclusion that public ground waters are available; however, all such permits shall be conditioned that if it is subsequently determined by the department that public waters are not available in the amounts authorized for withdrawal by such permits, the department shall, by order of notification, withdraw or modify the authority granted therein as may be appropriate.

(b) No certificates of water right as provided for in RCW 90.44.080, relating to public ground waters underlying lands described in the following subsection (3), shall be issued by the department until such time as a more definite determination can be reached as to the availability of public waters.

508-64-080	Regulation review.

WAC 508-64-010 Background and purpose of regulation. With the passage of time and issuance of an additional number of water rights in each year, competition for rights to use of our limited water resources increases. Conflicts also develop where uses presently authorized compete for water supplies which may vary on seasonal or annual bases, due to changes in hydrologic conditions. For these reasons it becomes necessary to manage our state's water resources so as to insure that those entitled to make beneficial use of water neither waste water in exercising their rights nor use waters by withdrawal or diversion thereof in amounts in excess to that which they are entitled.

One of the tolls of water management vested in the department of ecology is the power to require that those diverting and/or withdrawing waters of the state, both surface and ground, provide a measuring device so as to provide for accurate measurement of waters so utilized. See RCW 90.03.360 and 90.44.020. It has been increasingly apparent that a satisfactory water management program can be carried out only if surface and ground water withdrawals are closely monitored and accurately measured.

Under RCW 43.27A.090(11), the department of ecology is authorized to adopt such regulations as are necessary to carry out the provisions of the surface and ground water statutes of chapters 90.03 and 90.44 RCW. Acting under the authority of RCW 43.27A.090(11) and 90.03.360, the following regulation is adopted for the purpose of setting forth:

- (1) The specifications for meters installed on water withdrawal facilities for pressure systems;
- (2) The installation requirements for a meter;
- (3) The operation and maintenance requirements for a meter; and
- (4) The procedures the department of ecology will follow in determining when installation of a meter shall be required and how notification of this requirement shall be given to the water user.

WAC 508-64-020 Meter specifications. All meters required to be installed, as provided under WAC 508-64-010, shall meet the following requirements:

(1) Meters shall be of the velocity-propeller type with enclosed propeller made of noncorrosive materials. Positive displacement and other types of meters may be used with the express approval of the department of water resources. All meters shall be line meters. For pressures in excess of 100 pounds per square inch, high pressure welded saddle or tube type meters shall be required. Meters shall be complete with meter head, register box with locking hasp, and straightening vanes for attachment to existing pipe or contained within a tube. The saddle or tube-type meters shall be of a construction such that any part of the propeller gears, shafts, totalizer, or any other moving part can be removed for repair with relative ease. The saddle-type meter shall be designed and constructed so as to be suitable for welding to the existing or installed steel pipe but with removable meter-head or designed so that it may be secured to the pipe by anchor bars welded to the pipe with U-bolts, or with threaded straps. All meters shall have the size, serial number, and direction of the flow through the meter properly and clearly indicated.

(2) The meter shall have a rated accuracy of plus or minus 2 percent of actual flow for all rates of flow within the range of flow for which the meter is designed. The meter shall register the full range of discharge from the source of water for which it is to be used.

(3) The meter shall have a visual, mechanical, digital totalizer located on or adjacent to the meter. The register shall be protected.

(4) Units of measurement for irrigation uses shall be in acre-feet. The totalizer shall read directly in acre-feet with six digits to read to the nearest hundredths (0000.00). Both the register and meter unit shall be provided with a method of sealing with a wire or lead seal to prevent unauthorized tampering. For other uses, different units of measurement may be used with the express approval of the department of water resources. All totalizers or registers shall be equipped with a sweep hand with adequate markings or divisions for test purposes.

[Title 508 WAC—p. 8]

(5) Register boxes - the register box shall have a protective hinged cover over the window glass. Register box screws shall be drilled for seal wire holes.

(6) Propeller - the propeller shall be made of polyethylene or equivalent corrosion-resistant material and such that it will operate effectively and without distortion at temperatures between 32 degrees and 100 degrees Fahrenheit. The propeller shall be located in the center of the pipe and normal to the centerline of flow. The measuring propeller, together with its spindle, shall be the same specific gravity as water or less.

WAC 508-64-030 Meter installation requirements. Meters required to be installed, as provided under WAC 508-64-010, shall meet the following installation requirements:

(1) The meter shall be installed in accordance with manufacturer specifications and in such a manner that there shall be a full pipe of water at all times when water is being withdrawn.

(2) Straightening vanes shall be installed in the pipe in the manner recommended by the manufacturer of the meter, or vanes may be part of the tube furnished with tube-type meters or separate units for installation in the discharge pipe upstream of the meter.

(3) There shall be no turnouts or diversions between the source of water and the meter installation, except for faucet or other similar small outlets.

(4) The meter shall be placed in the pipe not less than five pipe diameters downstream from any valves, elbows, or other obstructions which might create turbulent flow, or as recommended by the meter manufacturer. There shall also be at least one pipe diameter of unobstructed flow on the downstream side of the meter.

(5) The meter and register shall not be enclosed in a building or structure in such a manner as to prevent access to the register. The register or meter shelter may be equipped with a lock to prevent tampering or breakage, provided that a key is made available to authorized employees of the department of ecology at the place of business during normal working hours or at the residence in case of private parties.

(6) Provisions shall be made for removal and rating of the meter in accordance with the manufacturer's specifications.

(7) In those cases where wells are authorized for the purpose of supplementing surface waters with water from combined sources not to exceed a total quantity, both sources of water shall be metered.

(8) In the case of artesian wells which flow at times, the meter shall be installed in a manner which will measure both pumped and flowing discharge.

(9) The owner shall cause the department of ecology to be notified within ten days from the installation of the meter.

(10) The meter installation shall be inspected and approved by the department of ecology.

WAC 508-64-040 Meter operation and maintenance.

Meters installed hereunder shall be operated and maintained in accordance with the following:

(1) No withdrawal or diversion of water shall be made unless the meter installation has been inspected and approved by the department of ecology and is in proper operating condition.

(2) Meters shall be repaired and returned to operation as soon as possible upon discovery of a malfunctioning meter. The department of ecology shall be notified immediately of such malfunctioning meter. In all cases the meter reading immediately prior to repair and the reading of the new or repaired meter shall be submitted to the department of ecology on forms provided within ten days following reinstallation of the meter and/or meter head.

(3) Water use data shall be submitted to the department of ecology on forms provided for that purpose at such times as may be required by the department.

(4) Meters shall be kept clear of debris or any other material or vegetative growth which would impede their operation. All meters shall be lubricated as specified by the manufacturer.

(5) Meters which are not properly operated and maintained shall be repaired or replaced upon order of the department of ecology within the time specified within said order.

[Statutory Authority: Chapters 43.21A, 43.27A and 90.44 RCW. 88-13-037 (Order 88-11), § 508-64-040, filed 6/9/88; Order DWR 69-9, § 508-64-040, filed 11/6/69.]

WAC 508-64-050 Meter—When required. Meters shall be installed on water diversion and/or withdrawal facilities existing prior to or constructed subsequent to the effective date hereof whenever it shall appear to the department of ecology that one of the following conditions exist:

(1) The need exists to accurately measure the instantaneous rate of diversion (withdrawal) and/or the total water use by a facility operating over a specified period of time, for purposes of determining if the quantities of water utilized are within the limits of the established rights, or

(2) Studies, inventories and investigations of stream and/or aquifer systems are being conducted by the department of ecology for purposes of determining location, extent, depth, volume and flow of said waters for planning, utilization and management purposes; and accurate determination of existing diversion and/or withdrawals is necessary for proper conduct of such studies, inventories and investigations, or

(3) When it has been established by the department of ecology, or there is reasonable reason to believe that a mining of ground waters is taking place within a defined area and that an accurate determination as to the extent of existing use of ground waters is necessary to properly manage such use for the purpose of maintaining a reasonable or feasible pumping lift (or reasonable or feasible reduction of artesian pressure) within the defined area, or

(4) Conflict in use under established rights exist and accurate determination of the rate of diversion (withdrawal) and/or volumetric use over a given period of time is necessary for a proper resolution of the conflict.

(2001 Ed.)

The requirement that a meter shall be installed on an existing facility shall be given by written notice served upon the owner or person having control thereof, as appropriate, personally or by registered or certified mail. Said notice shall set forth that a meter shall be installed in compliance with the provisions of this chapter and the date by which the meter shall be installed. All meters required to be installed hereunder shall conform to the provisions of WAC 508-64-020 through 508-64-040.

WAC 508-64-060 Unauthorized diversion or withdrawals—Enforcement agent. No waters shall be diverted and/or withdrawn from facilities which do not comply with orders issued pursuant to WAC 508-64-050. In enforcement of this chapter, the department of ecology may impose such sanctions as are appropriate under authorities vested in it, including but not limited to the issuance of regulatory orders under RCW 43.27A.190 and civil penalties under RCW 90.03.600.

[Statutory Authority: Chapters 43.21A, 43.27A and 90.44 RCW. 88-13-037 (Order 88-11), § 508-64-060, filed 6/9/88; Order DWR 69-9, § 508-64-060, filed 11/6/69.]

WAC 508-64-070 Appeals. All final written decisions of the department of ecology pertaining to permits, regulatory orders, and related decisions made pursuant to this chapter shall be subject to review by the pollution control hearings board in accordance with chapter 43.21B RCW.
