WAC 232-12-002 Fish and wildlife commission members' recusal requirements for commissioners with beneficial interests in certain commission decisions and transactions. (1) Commission members must comply with subsection (2) of this section when the following circumstances apply or it is reasonably foreseeable that they will apply:

(a) The member is beneficially interested, directly or indirectly, in a contract, sale, lease, purchase, or grant that may be made by, through, or under the supervision of the Commission, in whole or in part; or

(b) The member accepts, directly or indirectly, any compensation, gratuity or reward from any other person beneficially interested in a contract, sale, lease, purchase, or grant that may be made by, through, or under the supervision of the Commission, in whole or in part; or

(c) The member either owns a beneficial interest in, or is an officer, agent, employee or member of, an entity which is engaged in a transaction involving the Commission.

(2) If required by subsection (1) of this section, the member must:

(a) Recuse himself or herself from discussions by the Commission, regarding the specific contract, sale, lease, purchase, grant, or transaction; and

(b) Recuse himself or herself from any vote by the Commission on the specific contract, sale, lease, purchase, grant, or transaction; and

(c) Refrain from attempting to influence any other member or employee in any discussion or vote regarding the specific contract, sale, lease, purchase, grant, or transaction.

(3) Definitions. The following definitions apply to this section:

(a) "Transaction involving the Commission" means a proceeding, application, submission, request for a ruling or other determination, contract, claim, case, or other similar matter that the Commission member in question believes, or has reason to believe:

(i) Is, or will be, the subject of Commission action; or

(ii) Is one to which the Commission is or will be a party; or

(iii) Is one in which the Commission has a direct and substantial proprietary interest.

(b) "Transaction involving the Commission" does not include the following: preparation, consideration, or enactment of legislation, including appropriation of moneys in a budget, or the performance of legislative duties by a Commission member; or a claim, case, lawsuit, or similar matter if the Commission member did not participate in the underlying transaction involving the Commission that is the basis for

the claim, case, or lawsuit. Rule making is not a transaction involving the Commission.

(c) "Commission action" means any action on the part of the Commission, including, but not limited to:

(i) A decision, determination, finding, ruling, or order; and

(ii) A grant, payment, award, license, contract, transaction, sanction, or approval, or the denial thereof, or failure to act with respect to a decision, determination, finding, ruling, or order.

(4) Under subsection (1)(b), "any other person" has a beneficial interest in a contract, sale, lease, purchase, or grant when the other person bids or otherwise seeks to be awarded the contract, sale, lease, purchase, or grant.

(5) The prohibitions contained in subsection (2) do not prohibit the member from using his or her general expertise to educate and provide general information on the subject area to other Commission members.

(6) If recusal occurs pursuant to the State Ethics law, chapter 42.52 RCW, or rules adopted pursuant to the State Ethics law, the Commission member must disclose to the public the reasons for his or her recusal from any Commission action whenever recusal occurs. The Commission staff must record each such recusal and basis for the recusal.

EXAMPLES:

EXAMPLE ONE: The Commission is composed of individuals who often are employed in the private sector. The governor appoints members of the Commission. In making these appointments, the governor is required to seek to maintain a balance reflecting all aspects of fish and wildlife. Commission members are appointed because they have general knowledge of the habit and distribution of fish and wildlife and are often recommended by interest groups, such as sport fishers, commercial fishers, hunters, private landowners, and environmentalists. A Commission member is employed by a company that provides contract facilitation services. The Commission is in the process of selecting a contractor to conduct a series of public meetings on fishing in Washington. The company which employs the member of the Commission has bid for the contract. The Commission member may use his or her general expertise to educate Commissioners about desirable public meeting design elements for a successful public involvement project like the one the Commission wants to conduct. The Commission member is prohibited from participating in the Commission discussion and analysis establishing criteria for selecting a contractor and is prohibited from participating in the Commission vote to select a contractor (see WAC 232-12-002 (1)(c)). The Commission member would publicly announce his or her recusal and the reasons for it, and the Commission staff would record this information as part of the public record.

EXAMPLE TWO: The Commission contracts with King Software (hypothetical company) to provide computer systems for tracking recreational license purchases. King Software's contract with the Commission is almost expired, and the Commission must seek bids from software companies for the next contract period. The Commission issues a request for bids to various software companies who offer suitable soft-

ware, including Fishsoft, Inc. (hypothetical company). Approximately nine months ago, one Commission member worked for Fishsoft, Inc. and received compensation from that company. The Commission member subsequently left Fishsoft, Inc. The Commission member is not required to recuse himself or herself from selecting a contractor for the Commission's computer license system. Fishsoft, Inc. did not have a beneficial interest in the Commission's contract until it bid on the contract. Therefore, Fishsoft, Inc. was not a person beneficially interested in the contract when the Commission member received the compensation (see WAC 232-12-002(4)). However, if the Commission member received compensation from Fishsoft, Inc. after it bid on the contract, the Commission member would be required to disclose the fact that he or she received the compensation from a bidder and recuse himself or herself from the Commission's specific discussion and the vote awarding the contract (see WAC 232-12-002 (1)(b))). The Commission staff would record this information into the public record. Again, the Commission member could participate in discussions using his or her general expertise to educate and provide general information on the subject area to the other Commission members.

WAC 232-12-016 Nonnative aquatic species. The following provisions apply to nonnative aquatic species except nonnative species in ballast water, which are provided for in chapter 220-77 WAC. The definitions of invasive species, prohibited aquatic animal species, regulated aquatic animal species, unregulated aquatic animal species, unlisted aquatic animal species and aquatic plant species as used in this section are the same as in RCW 77.08.010.

(1) Request for designation of unlisted aquatic animal species prior to release. Unlisted nonnative aquatic animal species must be reviewed and designated for classification by the commission as either regulated aquatic animal species or unregulated aquatic animal species prior to approval for release into state waters. A request for classification of an unlisted nonnative aquatic animal species shall be treated as a petition to amend WAC 220-12-090, and made on the OFM-01 form. Upon receipt of a petition, the department shall initially classify the species as a prohibited species until the review is complete. In addition to the OFM-01 form, a person requesting classification must provide the following information in order to present a complete request for designation for classification:

(a) Common and scientific name, reason for release, source of the animals proposed for release, and number of animals proposed for release.

(b) Native range of the species, assessment of potential positive and negative impacts of the release, citation of available scientific literature on release of the species in other nonnative locales, known potential for displacement of native species, hybridization with or predation upon native species, and disease or parasite transmission.

(c) Estimate of technical and economic feasibility of eradicating or controlling spread of the species once it is introduced into state waters.

(2) Provisions applying to prohibited aquatic animal species.

(a) Zebra mussels: It is unlawful to import live aquatic organisms, including plants, for release into state waters from any state or Canadian province east of the Continental Divide without each importation being accompanied by a zebra mussel-free certificate issued by the department and signed by the supplier of the aquatic organisms. The original receiver in the state of Washington of the shipment of aquatic organisms is required to retain the zebra mussel-free certificate for two years. Secondary receivers, while in possession of live aquatic organisms, are required to retain invoices or other records showing who was the original receiver.

(b) Scientific research or display: The director may authorize, by prior written permit, a person to possess prohibited aquatic animal species for scientific research or display, provided:

(i) Specimens are confined to a secure facility, defined as an enclosure that will prevent the escape or release of prohibited aquatic animal species into a natural watercourse, and specimens are inaccessible to wildlife or other animals that could transport prohibited aquatic animal species.

(ii) Specimens are not transferred to any other facility without written approval by the director or designee.

(iii) All zebra mussels are incinerated or chemically preserved at the conclusion of the project, and the enclosure, holding waters and all equipment are disinfected. All other prohibited aquatic animal species must be killed at the conclusion of the project and either chemically preserved or disposed of in a landfill.

(iv) The permittee provides an annual report to the department, no later than January 31 of the following year, on a form provided by the department, describing the number, size and location of prohibited aquatic animal species enclosures and general nature of the research.

(c) Monitoring and control programs: The director may authorize persons working within the scope and supervision of a department-sponsored monitoring and control program to capture, possess and destroy prohibited aquatic animal species, provided:

(i) The persons have completed a mandatory training program and are certified by the department;

(ii) The persons have a permit authorized by the director or designee in possession;

(iii) All prohibited aquatic animal species are disposed of in accordance with the monitoring and control program; and

(iv) Participants submit a report to the department within thirty days of any monitoring or control activity in accordance with the specifications outlined in the monitoring and control program.

(d) Capture of prohibited species in state waters. Prohibited aquatic animal species that are captured in state waters and not immediately returned to the water from which they were captured must be killed before removing the prohibited aquatic animal species from within the riparian perimeter of the body of water.

(e) Prohibited aquatic animals held in commercial and personal possession prior to classification. A person who possessed a prohibited aquatic animal species prior to the time the species was classified as prohibited may continue to hold the animal or animals for the life of the animals, provided:

(i) The person must maintain proof of possession prior to the classification.

(ii) The animals may not be transferred to another owner within the state.

(iii) The person must comply with all provisions of this section.

(iv) The animals must be prevented from reproducing, or if prevention is impracticable, the progeny must be destroyed.

(3) Infested waters.

(a) The following bodies of waters are infested with invasive aquatic plants or prohibited aquatic animal species. In these waters:

(i) It is unlawful to use aquatic animals from these waters for bait in the infested waters or any other waters.

(ii) All aquatic vegetation must be removed from lines, nets, motors, and all other equipment when the equipment is removed from the infested waters.

(iii) It is unlawful to transport water from these bodies of water, and bait containers, live wells, and bilges must be emptied before leaving the riparian perimeter of the body of water, except:

Supplemental wire required to attain a height of eight feet may be smooth, barbed, or woven wire (at least 12-1/2 gauge) with strands spaced not more than six inches apart.

(b) Perimeter fences constructed of high tensile wire must be supported by a post or stay at minimum intervals of eight feet.

(iv) Corners braced with wood or with an equivalent material as approved by the director.

(g) Fences must be maintained at all times to prevent captive wildlife from escaping or resident wildlife ungulates (hoofed animals) from entering the enclosure. If such animals do pass through, under, or over the fence because of any topographic feature or other conditions, the person possessing wildlife must immediately supplement the fence to prevent continued passage.

(h) For any fence existing prior to February 13, 1993, a person may petition the director in writing for a variance from the above fencing requirements. Any such petition must be filed no later than May 31, 1993 and must identify all aspects in which the existing fence does not meet the fencing requirements contained herein. Such testing shall be at the possessor's expense. Animals which are deemed by department of wildlife biologists upon examination to exhibit either: behavioral (vocalization), morphological (size, rump patch, color) or biochemical indications of such influence (hemoglobin, superoxide dismutase, transferrin and post-transferrin, or others to be developed) may not be imported.

(b) A person currently holding any member of the genus *Cervus elaphus* identified in subsection (2) herein must submit records of genetic tests, conducted by a professionally recognized laboratory to identify red deer genetic influence (genetic material from any member of any subspecies, race, or species of the elk-red deer-wapiti complex *Cervus elaphus* not indigenous to the state of Washington), for each individual cervid to the director within 90 days of passage of this rule. Such testing shall be at the possessor's expense. If the director determines that destruction of wildlife, quarantine, disinfection, or sterilization of facilities is required, a written order shall be issued to the possessor describing the procedure to be followed and the time period for carrying out such actions. Such activities shall be at the expense of the possessor.

(i) An approved quarantine facility is one that meets criteria set by the Washington state department of agriculture.

(ii) The quarantine area must meet the tests of isolation, separate feed and water, escape security, and allowances for the humane holding and care of its occupants for extended periods of time.

(b) Should the imposition of a quarantine become necessary, the possessor of any wildlife must provide an on-site quarantine facility or make arrangements at such possessor's expense to transport such wildlife to an approved quarantine facility.

(20) Seizure

(a) The department of wildlife may seize any unlawfully possessed wildlife.

(b) The cost of any seizure and/or holding of wildlife may be charged to the possessor of such animals.

WAC 232-12-073 Advanced hunter education. (1) In order to provide for additional hunting opportunity, on species, in areas, or at times when a higher proficiency and demonstrated skill level is needed for resource protection or public safety, the department establishes the advanced hunter education program. Persons who successfully pass the master hunter level of advanced hunter education are entitled to exercise the privileges of participation in special hunts

(2003 Ed.)

restricted to master hunters. It is unlawful for any person to participate in a hunt restricted to master hunters if such person has not successfully passed the advanced hunter education master hunter course and such person possesses a valid master hunter identification card while participating in such a hunt, and it is unlawful to participate in a hunt restricted to master hunters if the person's master hunter status has been suspended or revoked. Violation of this subsection shall be enforced under RCW 77.15.400 (1)(c) for wild birds, RCW 77.15.410 (1)(b) for big game, and RCW 77.15.430 (1)(b) for wild animals other than big game.

(2) The advanced hunter education program has three levels, with the following proficiency requirements:

(a) Sharpshooter education: This program emphasizes marksmanship, with the goal of humanely killing game animals with the least number of shots. Successful graduates of the sharpshooter course must demonstrate above average shooting skills. The cost of applying for sharpshooter education is five dollars, and on successfully passing sharpshooter education each graduate will receive a certificate of completion and an advanced hunter education patch.

(b) Conservationist education: This program emphasizes habitat restoration and land use practices that maximize protection for wildlife. Successful graduates of the conservationist course will have spent a minimum of twelve hours participating in landowner-sportsman or wildlife-related projects. The cost of applying for conservationist education is five dollars, and on successfully passing conservationist education each graduate will receive a certificate of completion and an advanced hunter education patch.

(c) Master hunter education: In addition to both sharpshooter and conservationist education, the master hunter program emphasizes ethical behavior while hunting, a detailed knowledge of hunting statutes and rules, and specialized knowledge in how to hunt in damage control hunts that successfully remove problem animals while maximizing public safety. Both extensive home study and passing a rigorous test are prerequisites for achieving the master hunter graduate status. The cost of applying for master hunter education is twenty dollars, and on successfully passing master hunter education each graduate will be issued a certificate, an advanced hunter education patch, and a master hunter identification card. The master hunter identification card is valid for five consecutive years from the date of issuance. The card will be renewed for an additional five years if, during the period of validity, the master hunter education graduate completes twelve hours of conservationist education, consisting of participating in landowner-sportsman or wildlife-related projects.

(3) Master hunters are held to the highest ethical standards while hunting, and are expected to respect all recreational and trapping laws. Accordingly, should a master hunter violate the trapping or recreational fishing or hunting laws, that person's master hunter status will be suspended or revoked as provided in this subsection. The grounds for suspension and revocation are proof by a preponderance of the evidence that the master hunter has committed a violation of law. A criminal conviction is a rebuttable presumption that the violation occurred. Any person who has master hunter status revoked or suspended under this subsection has the

right to an administrative hearing to contest the agency action, and such hearing will be held pursuant to chapter 34.05 RCW, the Administrative Procedure Act.

(a) A two-year suspension of master hunter status will be imposed for any hunting or hunting related violation.

(b) A five-year suspension of master hunter status and a requirement to retake the master hunter course will be imposed for:

(i) Any conviction resulting in a suspension of recreational hunting or fishing privileges or in a trapping privilege suspension;

(ii) Any violations that involve two big game animals; or

(iii) Any violation that involves twice or more the daily limit of game or fish.

(c) A lifetime revocation of master hunter status will be imposed for:

(i) Any conviction resulting in a second suspension of hunting or fishing privileges or in a second trapping privilege suspension;

(ii) Any violation while recreational hunting or fishing privileges, trapping privileges, or master hunter status is suspended; or

(iii) Any violations that involve three or more big game animals.

(4) Prize value: Total prize value per contest will not exceed \$1,000 when trout, steelhead, char, whitefish, grayling, or kokanee are included as target species; provided that contests wherein other species not listed above are targeted, or where bass or walleye are the targeted species and at least 90 percent of bass or walleye are released alive and in good condition after the contest, may qualify for no limitation on amount of prize.

(5) Legal requirements, all contests:

(a) Fishing contest permits must be in the possession of the contest sponsor or official at the contest site.

(b) Contests are restricted to the species and waters approved on the permit. Only those species listed as a target of the contest may be retained by contest participants during bass or walleye contests where all contestants fish at the same time and place.

(c) Sponsors must report contest information requested by the department within 30 days after the contest has ended. Subsequent contest permits will not be issued for one year after the date of the contest for which the report was not returned if this requirement is not fulfilled.

(d) Contest participants may not restrict public access at boat launches.

(e) Contests where all participants expect to fish at the same time from boats on lakes or reservoirs will not last longer than three consecutive days and have the following limits per water:

ACRES	CONTESTS PER DAY	BOATS PER CONTEST DAY
Less than 300	1	15
301 - 3,000	1	35
3,001 - 6,000	2	50
6,001 - 10,000	2	100

* No more than four weekend days per month nor more than two weekends per month may be scheduled on any water when contestants fish at the same time, and are allowed to fish from boats.

(f) It is unlawful for the fishing contest permittee or any of the contest participants to fail to comply with the conditions of the fishing contest permit, or of general fishing rules not specifically exempted by this permit. Failure of the permittee or any of the contestants to comply with all provisions of the contest permit or of other fishing regulations during a contest may lead to revocation of the permit and result in

denial of fishing contest permits to the permittee and related organizations or individuals sponsoring contests for two years.

(6) Special regulations, bass and walleye contests:

(a) In any contest targeting either bass or walleye, all live bass or walleye must be released alive into the water from which they were caught after being weighed and/or measured. At the end of each day's competition, if the mortality of target fish caught that day exceeds 10%, the contest will be suspended. Suspended contests may be continued (within assigned permit dates) only if the cause of the high mortality can be positively identified, and the cause of the mortality (high waves, equipment deficiency, etc.) ceases or is corrected by contest officials.

(b) During bass and walleye contests only, participants may continue to fish while holding up to five fish in possession, as long as one fish is released immediately upon catching a fish which would make the angler in excess of five fish if kept. The fish released may come either from the one just caught, or from the livewell, but at no time may the angler have more than five fish in the livewell.

(c) During bass contests, contestants may not use live bait.

(d) During bass and walleye contests participants may retain up to five bass and walleye of any size to be weighed in. A tournament angler may not be in possession of more than five bass or walleye from the water being fished, except as authorized under (6)(e) below.

(e) The contest director or director designee may exceed possession limits for bass or walleye for the purpose of transporting fish from a weigh-in site to an open-water area. During transportation, the transport boat must not leave the water the fish were caught from and a copy of the contest permit must be on board during actual fish transport.

(f) Livewell dimensions: During walleye tournaments, all livewells used to hold walleye must be at least 34 inches in length and have a water capacity of at least 20 gallons. Not more than 6 walleye may be placed in a single livewell. All livewells must have both a functional freshwater pump and backup aeration capability.

(g) Boat identification: All boats used for fishing in bass and walleye contests must be clearly identified according to criteria established by the department.

(7) Zebra mussel decontamination. Prior to participating in a Washington state fishing contest:

(a) All contest participants are required to sign a zebra mussel decontamination statement that their boats and/or boat trailers have or have not been in physical contact with any waters east of the Continental Divide for thirty days immediately preceding the contest and, if the boat and/or trailer has been in contact with such waters the participant must complete a decontamination report indicating that the following actions have been taken:

(i) A physical inspection has been made of the hull, motor, trailer, livewell and bilge by the contest director or designee, and any zebra mussels, if found, have been disposed of in a garbage container; and

(ii) The vessel has been decontaminated by the hull having been:

(B) Washed with a household bleach solution of one part bleach to 19 parts water, or the equivalent;

(iii) The motor has been run in a household bleach solution of one part bleach to 19 parts water, or the equivalent, for a minimum of one minute; and

WAC 232-12-181 Livestock grazing on department of wildlife lands. All persons wishing to apply for a grazing lease should contact the Washington Department of Wildlife, 600 North Capitol Way, Olympia, Washington 98504.

(1) The director is authorized to enter into grazing leases when the director determines that a grazing lease will benefit wildlife management programs and will be in the public interest. Except for temporary permits, each grazing lease shall first be submitted to the commission, which may review the lease to determine whether it will benefit wildlife or improve public hunting, fishing or recreation without adverse impact on wildlife. If, within 30 days, the commission has not disapproved the lease, the director shall be deemed authorized to enter into that lease.

(2) The director shall advertise and sell a license to use department lands for grazing at public auction to the highest bidder. The director is authorized to reject any and all bids if it is determined to be in the best interest of the department to do so. The director may negotiate a grazing lease without using the public auction process only when the director determines that benefits to wildlife would be equal to or greater than the cash or monetary payments foregone.

(3) The term of each grazing lease shall be no greater than five years. When an existing lease expires or is about to expire, and the director wishes to continue to permit grazing on the subject parcel, then a modified public auction process shall be used. A minimum bid based on market value shall be established prior to the public auction. The last previous or the existing lessee shall be provided the option of meeting the highest bid made at public auction. The director may grant a term longer than five years only with the prior approval of the commission. The director may permit exceptions to the public auction process only when the director determines that benefits to wildlife would be equal to or greater than the cash or monetary payment foregone.

(4) A temporary permit may be granted by the director to satisfy an immediate, short-term need where benefits to wildlife management programs and the public interest can be demonstrated. The term of a temporary permit shall not exceed two weeks and no fee need be charged.

(5) The director may approve a grazing lease where a grazing management plan which includes objectives and site characteristics, pasture rotation schedule, on-off dates, number of AUM's, and a monitoring plan has been developed by the agency. The director shall inspect the site of a grazing lease no less than two times each year. The director shall retain the right to alter provisions of the plan to reduce acre-

age available or the number of animals using the area when such change is, in the judgment of the director, required to benefit fish or wildlife management, public hunting and fishing, or other recreational uses. The director may not enter into any grazing lease not accompanied by a grazing management plan unless the commission has approved it.

(6) The director may cancel a lease (1) for noncompliance with the terms and conditions of the lease, or (2) if the area described in the lease is included in a land use plan determined by the agency to be a higher and better use, or (3) if the property is sold or conveyed, or (4) if damage to wildlife or wildlife habitat occurs.

(7) All lands covered by any agreement shall at all times be open to public hunting, fishing and other wildlife recreational uses unless such lands have been closed by action of the commission or emergency order of the director.

WAC 232-12-243 Public safety cougar removals. (1) Definitions:

As used in this section and in the context of public safety cougar removals, the following definitions apply:

(a) "Confirmed" means qualified department staff is led to believe a cougar(s) was at the scene of the incident by interview of the complainant or observation of evidence at the scene.

(b) "Human-cougar safety incident" means aggressive or unusual behavior by a cougar which presents an actual or perceived threat to an individual.

(c) "Livestock or pet depredation" means incidents where livestock and/or pets are killed and/or injured by cougar.

(d) "Marginal cougar habitat" means those areas usually dominated by urban/suburban, developed lands with relatively high human densities.

(e) "Nuisance activity" means incidents associated with property disturbance, property damage, or livestock/pet harassment.

(f) "Preferred cougar habitat" means those areas usually dominated by rural, undeveloped lands with relatively low human densities.

(g) "Public safety need" means there exists a reasonable threat to human safety or property by one or more cougar, as indicated by the level of confirmed human-cougar safety incidents or livestock/pet depredations, and confirmed cougar sightings or nuisance activities.

(h) "Removal" means the act of killing one or more cougar with the aid of dogs.

(i) "Sighting" means a direct observation of one or more cougar, in urban or rural settings, near individuals or residences; typically more than chance observations.

(j) "Human-cougar interaction" means a human-cougar safety incident, livestock or pet depredation, cougar nuisance activity, or cougar sighting event.

(k) "Dog hunter" means a person that owns and hunts with dogs that are capable of detecting, tracking and treeing a cougar.

(2) Public safety cougar removal authorization: The commission authorizes the director to issue public safety cougar removal permits consistent with this rule. Prior to issuing public safety cougar removal permits, the department shall use other practical alternatives to address a public safety need, including livestock or pet depredations. Other practical alternatives may include, but are not limited to, general cougar hunting seasons, general public information, educational programs, information to recreational hunters, cougar depredation/kill permits, and department capture and relocation/euthanasia of specific cougars.

[Title 232 WAC—p. 37]

(3) Public safety cougar removal criteria:

(a) The commission determines that when the above practical alternatives have been utilized within a game management unit, eleven confirmed human-cougar interactions per year, of which at least four must be confirmed human-cougar safety incidents or livestock/pet depredations, therein demonstrating that the practical alternatives have been inadequate to address the public safety need. The director then is authorized by the commission to remove one or more cougar, with the aid of dogs, in a selected area of that game management unit or nearby geographic area suitable for the use of dogs. The commission authorizes the director to remove one cougar per one hundred twenty square kilometers of complaint area in preferred cougar habitat, and one cougar per four hundred thirty square kilometers of complaint area in marginal cougar habitat.

(b) If warranted by conditions of this rule, public safety cougar removal(s) will be conducted annually between December 1st and March 15th in selected areas of game management units designated by the director to address a public safety need presented by one or more cougar.

(c) The department shall not target more than one hundred nine cougar during a public safety cougar removal period unless otherwise authorized by the commission.

(a) Application for a permit must be made on a form provided by the department. It must be submitted at least thirty days prior to acquisition of the wildlife or aquatic plants intended for release or planting, and must provide all information indicated.

(b) Permits will only be issued if the director determines there will be no adverse impact on the wildlife or wildlife habitat of the state.

(c) Each permit shall require that at least thirty days prior to planting or release of wildlife or aquatic plants they must be made available for inspection by the director. It shall be the responsibility of the applicant to show that the wildlife will not pose a disease threat. If the director is not satisfied that the wildlife or aquatic plants do not pose a disease threat, they shall not be released or planted in the state. Director approval for release or planting may be withdrawn for cause.

(d) Each permit shall require that an applicant intending to release wildlife in the state shall report immediately to the director the outbreak of any disease among the wildlife intended to be released. If the director determines that such outbreak presents a threat to the wildlife of the state, the director may immediately order such action as necessary including quarantine or destruction of stock, sterilization of enclosures and facilities, cessation of activities, and disposal of wildlife in a manner satisfactory to the director.

The director may plant aquatic plants or release animal species, subspecies, or hybrids which have been planted or released previously in Washington if they do not pose a disease threat and if planting or release will not cause adverse impact on the wildlife or wildlife habitat of the state. Before releasing any species, subspecies, or hybrid of animal not already existing in the wild in Washington, the director shall report to the commission on the planned release, stating the basis for determining that the planned release fulfills the criteria set forth herein. The director may release nonnative species, subspecies, or hybrids not previously released in Washington only if the director in his or her sole discretion has determined that:

(a) There is no reasonable expectation of adverse impact on the wildlife or wildlife habitat of the state and there is an adequate plan for evaluating such impact following the release;

(b) The commission has classified the species, subspecies, or hybrids to be released pursuant to RCW 77.12.020;

(c) Suitable habitat is available;

(d) The nonnative species, subspecies, or hybrids to be released are free of exotic pathogens;

WAC 232-12-292 Bald eagle protection rules.

Purpose

1.1 The purpose of these rules is to protect the habitat and thereby maintain the population of the bald eagle so that the species is not classified as threatened, endangered or sensitive in Washington state. This can best be accomplished by promoting cooperative efforts to manage for eagle habitat needs through a process which is sensitive to the landowner goals as well. The following rules are designed to promote such cooperative management.

Authority

2.1 These rules are promulgated pursuant to RCW 77.12.655.

Definitions

3.1 "Communal roost site" means all of the physical features surrounding trees used for night roosting that are important to the suitability of the roost for eagle use. These features include flight corridors, sources of disturbance, trees in which eagles spend the night, trees used for perching during arrival or departure and other

trees or physical features, such as hills, ridges, or cliffs that provide wind protection.

3.2 "Cultural activities" means activities conducted to foster the growth of agricultural plants and animals.

3.3 "Department" means department of fish and wildlife.

3.4 "Endangered" means a species which is seriously threatened with extirpation throughout all or a significant portion of its range within Washington.

3.5 "Government entities" means all agencies of federal, state and local governments.

3.6 "Landowner" means any individual, private, partnership, nonprofit, municipal, corporate, city, county, or state agency or entity which exercises control over a bald eagle habitat whether such control is based on legal or equitable title, or which manages or holds in trust land in Washington state.

3.7 "Nest tree" means any tree that contains a bald eagle nest or has contained a nest.

3.8 "Nest site" means all of the physical features surrounding bald eagle nests that are important to normal breeding behavior. These features include alternate and potential nest trees, perch trees, vegetative screening, foraging area, frequently used flight paths, and sources of disturbance. This site is also referred to as the territory defended by a breeding pair of eagles.

3.9 "Perch tree" means a tree that is consistently used by eagles. It is often close to a nest or feeding site and is used for resting, hunting, consumption of prey, mating display and as a sentry post to defend the nest.

3.10 "Predicides" means chemicals used to kill or control problem wildlife.

3.11 "Region" means an ecological/geographic area that forms a unit with respect to eagles, e.g., Hood Canal, lower Columbia River, outer coast and south Puget Sound.

3.12 "Sensitive" means any wildlife species native to the state of Washington that is vulnerable or declining and is likely to become endangered or threatened in a significant portion of its range within the state without cooperative management or removal of threats.

3.13 "Site management plan" means a legal agreement between the department and the landowner for management of a bald eagle nest or roost site. This plan may be a list of conditions on a permit or a more detailed, site-specific plan.

3.14 "Threatened" means a species that could become endangered within Washington without active management or removal of threats.

Applicability and operation

4.1 The department shall make available to other governmental entities, interest groups, landowners and indi-

viduals information regarding the location and use pattern of eagle nests and communal roosts.

- 4.2 The department shall itself and through cooperative efforts (such as memoranda of understandings pursuant to chapter 39.34 RCW) work with other government agencies and organizations to improve the data base for nest and communal roost site activity and productivity and to protect eagle habitats through site management plans.
- 4.3 The department's goal shall be to identify, catalog and prioritize eagle nest or communal roost sites. The department shall notify permitting agencies of nesting or roost site locations.
- 4.4 When a landowner applies for a permit for a land-use activity that involves land containing or adjacent to an eagle nest or communal roost site, the permitting agency shall notify the department.

If the department determines that the proposed activity would adversely impact eagle habitat, a site management plan shall be required. The department, a permitting agency, or wildlife biologist may work with the landowner to develop a plan. The department has final approval authority on all plans.

- 4.5 It is recognized that normal on-going agricultural activities of land preparation, cultivating, planting, harvesting, other cultural activities, grazing and animal-rearing activities in existing facilities do not have significant adverse consequences for eagles and therefore do not require a site management plan. New building construction, conversion of lands from agriculture to other uses, application of pesticides and aerial pesticide spraying, may, following a conference with the department, be subject to the site management planning process described in these rules.
- 4.6 Emergency situations, such as insect infestation of crops, requires immediate action on the site management plan or special permission to address the impending crisis by the department.

Site management plan for bald eagle habitat protection

- 5.1 The purpose of the site management plan is to provide for the protection of specific bald eagle habitat in such a way as to recognize the special characteristics of the site and the landowner's property rights, goals and pertinent options. To this end, every land owner shall have fair access to the process including available incentives and benefits. Any relevant factor may be considered, including, but not limited to, the following:
- 5.1.1 The status of the eagle population in the region.
- 5.1.2 The useful life of the nest or communal roost trees and condition of the surrounding forest; the topography; accessibility and visibility; and existing and alternative flight paths, perch trees, snags and potential alternative nest and communal roost trees.

- 5.1.3 Eagle behavior and historical use patterns, available food sources, and vulnerability to disturbance.
- 5.1.4 The surrounding land-use conditions, including degree of development and human use.
- 5.1.5 Land ownership, landowner ability to manage, and flexibility of available landowner options.
- 5.1.6 Appropriate and acceptable incentive mechanisms such as conservation easements, transfer or purchase of development rights, leases, mutual covenants, or land trade or purchase.
- 5.1.7 Published recommendations for eagle habitat protection of other government entities such as the U.S. Fish and Wildlife Service.

5.2 The site management plan may provide for

- 5.2.1 Tailoring the timing, duration or physical extent of activities to minimize disturbance to the existing eagle habitat and, where appropriate, identifying and taking steps to encourage and create alternative eagle habitat; and
- 5.2.2 Establishing a periodic review of the plan to monitor whether:
- The plan requires amendment in response to changing eagle and landowner circumstances
 - The terms of the plan comply with applicable laws and regulations,
 - The parties to the plan are complying with its terms.

- 5.3 The site management plan may also provide for implementing landowner incentive and compensation mechanisms through which the existing eagle habitat can be maintained or enhanced.

Guidelines for acquisition of bald eagle habitat

- 6.1 Real property interests may be acquired and agreements entered into which could enhance protection of bald eagle habitat. These include fee simple acquisition, land trades, conservation easements, transfer or purchase of development rights, leases, and mutual covenants. Acquisition shall be dependent upon having a willing seller and a willing buyer. Whatever interest or method of protection is preferable will depend on the particular use and ownership characteristics of a site. In discussing conservation objectives with private or public landowners, the department shall explore with the landowner the variety of protection methods which may be appropriate and available.
- 6.2 The following criteria and priorities shall be considered by the department when it is contemplating acquiring an interest in a bald eagle habitat.

- 6.2.1 Site considerations:

- a) Relative ecological quality, as compared to similar habitats
 - b) Ecological viability—the ability of the habitat and eagle use to persist over time
 - c) Defensibility—the existence of site conditions adequate to protect the eagle habitat from unnatural encroachments
 - d) Manageability—the ability to manage the site to maintain suitable eagle habitat
 - e) Proximity to food source
 - f) Proximity to other protected eagle habitat
 - g) Proximity to department land or other public land
 - h) Eagle population density and history of eagle use in the area
 - i) The natural diversity of native species, plant communities, aquatic types, and geologic features on the site.
- 6.2.2 Other considerations
- a) Ownership
 - b) Degree of threat
 - c) Availability of funding
 - d) Existence of willing donor or seller and prior agency interest
 - e) Cost

In general, priority shall be given to the most threatened high quality eagle habitats with associated natural values which require the least management.

Resolution of site management plan disputes

- 7.1 The department and the landowner shall attempt to develop a mutually agreeable site management plan within 30 days of the original notice to the department.
- 7.2 Should agreement not be reached, the landowner may request an informal settlement conference with the department.
- 7.3 If the landowner chooses not to use the informal settlement conference process or if resolution is not reached, the department shall within 15 days provide a site management plan to the landowner.
- 7.4 Upon issuance of a final site management plan, the landowner may initiate a formal appeal of the department's decision. The appeal shall be conducted according to the Administrative Procedure Act, chapter 34.05 RCW and the model rules of procedure, chapter 10-08 WAC.

A request for an appeal shall be in writing and shall be received by the department during office hours within thirty days of the issuance of the final site management plan. Requests for appeal shall be mailed to Department of Fish and Wildlife, 600 Capitol Way N., Olym-

pia, Washington 98501-1091, or hand delivered to 1111 Washington Street S.E., Wildlife Program, Fifth floor. If there is no timely request for an appeal, the site management plan shall be unappealable.

The written request for an appeal shall be plainly labeled as "request for formal appeal" and shall contain the following:

- (a) The name, address, and phone number of the person requesting the appeal;
- (b) The specific site management plan that the person contests;
- (c) The date of the issuance of the site management plan;
- (d) Specific relief requested; and
- (e) The attorney's name, address, and phone number, if the person is represented by legal counsel.

The appeal may be conducted by the director, the director's designee, or by an administrative law judge (ALJ) appointed by the office of administrative hearings. If conducted by an ALJ, the ALJ shall issue an initial order pursuant to RCW 34.05.461. The director or the director's designee shall review the initial order and enter a final order as provided by RCW 34.05.464.

Penalties

- 8.1 Failure of a landowner to comply with the processes set forth in these rules or with the provisions of a site management plan approved by the department constitutes a misdemeanor as set forth in RCW 77.15.130.

[Statutory Authority: RCW 77.12.047, 77.12.655, 77.12.020, 02-02-062 (Order 01-283), § 232-12-292, filed 12/28/01, effective 1/28/02. Statutory Authority: RCW 77.12.655, 86-21-010 (Order 283), § 232-12-292, filed 10/3/86.]

WAC 232-12-297 Endangered, threatened, and sensitive wildlife species classification.

Purpose

- 1.1 The purpose of this rule is to identify and classify native wildlife species that have need of protection and/or management to ensure their survival as free-ranging populations in Washington and to define the process by which listing, management, recovery, and delisting of a species can be achieved. These rules are established to ensure that consistent procedures and criteria are followed when classifying wildlife as endangered, or the protected wildlife subcategories threatened or sensitive.

Definitions

For purposes of this rule, the following definitions apply:

- 2.1 "Classify" and all derivatives means to list or delist wildlife species to or from endangered, or to or from the protected wildlife subcategories threatened or sensitive.
- 2.2 "List" and all derivatives means to change the classification status of a wildlife species to endangered, threatened, or sensitive.

- 2.3 "Delist" and its derivatives means to change the classification of endangered, threatened, or sensitive species to a classification other than endangered, threatened, or sensitive.
- 2.4 "Endangered" means any wildlife species native to the state of Washington that is seriously threatened with extinction throughout all or a significant portion of its range within the state.
- 2.5 "Threatened" means any wildlife species native to the state of Washington that is likely to become an endangered species within the foreseeable future throughout a significant portion of its range within the state without cooperative management or removal of threats.
- 2.6 "Sensitive" means any wildlife species native to the state of Washington that is vulnerable or declining and is likely to become endangered or threatened in a significant portion of its range within the state without cooperative management or removal of threats.
- 2.7 "Species" means any group of animals classified as a species or subspecies as commonly accepted by the scientific community.
- 2.8 "Native" means any wildlife species naturally occurring in Washington for purposes of breeding, resting, or foraging, excluding introduced species not found historically in this state.
- 2.9 "Significant portion of its range" means that portion of a species' range likely to be essential to the long term survival of the population in Washington.

Listing criteria

- 3.1 The commission shall list a wildlife species as endangered, threatened, or sensitive solely on the basis of the biological status of the species being considered, based on the preponderance of scientific data available, except as noted in section 3.4.
- 3.2 If a species is listed as endangered or threatened under the federal Endangered Species Act, the agency will recommend to the commission that it be listed as endangered or threatened as specified in section 9.1. If listed, the agency will proceed with development of a recovery plan pursuant to section 11.1.
- 3.3 Species may be listed as endangered, threatened, or sensitive only when populations are in danger of failing, declining, or are vulnerable, due to factors including but not restricted to limited numbers, disease, predation, exploitation, or habitat loss or change, pursuant to section 7.1.
- 3.4 Where a species of the class Insecta, based on substantial evidence, is determined to present an unreasonable risk to public health, the commission may make the determination that the species need not be listed as endangered, threatened, or sensitive.

Delisting criteria

- 4.1 The commission shall delist a wildlife species from endangered, threatened, or sensitive solely on the basis of the biological status of the species being considered, based on the preponderance of scientific data available.
- 4.2 A species may be delisted from endangered, threatened, or sensitive only when populations are no longer in danger of failing, declining, are no longer vulnerable, pursuant to section 3.3, or meet recovery plan goals, and when it no longer meets the definitions in sections 2.4, 2.5, or 2.6.

Initiation of listing process

- 5.1 Any one of the following events may initiate the listing process.
 - 5.1.1 The agency determines that a species population may be in danger of failing, declining, or vulnerable, pursuant to section 3.3.
 - 5.1.2 A petition is received at the agency from an interested person. The petition should be addressed to the director. It should set forth specific evidence and scientific data which shows that the species may be failing, declining, or vulnerable, pursuant to section 3.3. Within 60 days, the agency shall either deny the petition, stating the reasons, or initiate the classification process.
 - 5.1.3 An emergency, as defined by the Administrative Procedure Act, chapter 34.05 RCW. The listing of any species previously classified under emergency rule shall be governed by the provisions of this section.
 - 5.1.4 The commission requests the agency review a species of concern.
- 5.2 Upon initiation of the listing process the agency shall publish a public notice in the Washington Register, and notify those parties who have expressed their interest to the department, announcing the initiation of the classification process and calling for scientific information relevant to the species status report under consideration pursuant to section 7.1.

Initiation of delisting process

- 6.1 Any one of the following events may initiate the delisting process:
 - 6.1.1 The agency determines that a species population may no longer be in danger of failing, declining, or vulnerable, pursuant to section 3.3.
 - 6.1.2 The agency receives a petition from an interested person. The petition should be addressed to the director. It should set forth specific evidence and scientific data which shows that the species may no longer be failing, declining, or vulnerable, pursuant to section 3.3. Within 60 days, the agency shall either deny the petition, stating the reasons, or initiate the delisting process.
 - 6.1.3 The commission requests the agency review a species of concern.

- 6.2 Upon initiation of the delisting process the agency shall publish a public notice in the Washington Register, and notify those parties who have expressed their interest to the department, announcing the initiation of the delisting process and calling for scientific information relevant to the species status report under consideration pursuant to section 7.1.

Species status review and agency recommendations

- 7.1 Except in an emergency under 5.1.3 above, prior to making a classification recommendation to the commission, the agency shall prepare a preliminary species status report. The report will include a review of information relevant to the species' status in Washington and address factors affecting its status, including those given under section 3.3. The status report shall be reviewed by the public and scientific community. The status report will include, but not be limited to an analysis of:
- 7.1.1 Historic, current, and future species population trends
 - 7.1.2 Natural history, including ecological relationships (e.g. food habits, home range, habitat selection patterns).
 - 7.1.3 Historic and current habitat trends.
 - 7.1.4 Population demographics (e.g. survival and mortality rates, reproductive success) and their relationship to long term sustainability.
 - 7.1.5 Historic and current species management activities.
- 7.2 Except in an emergency under 5.1.3 above, the agency shall prepare recommendations for species classification, based upon scientific data contained in the status report. Documents shall be prepared to determine the environmental consequences of adopting the recommendations pursuant to requirements of the State Environmental Policy Act (SEPA).
- 7.3 For the purpose of delisting, the status report will include a review of recovery plan goals.

Public review

- 8.1 Except in an emergency under 5.1.3 above, prior to making a recommendation to the commission, the agency shall provide an opportunity for interested parties to submit new scientific data relevant to the status report, classification recommendation, and any SEPA findings.
- 8.1.1 The agency shall allow at least 90 days for public comment.

Final recommendations and commission action

- 9.1 After the close of the public comment period, the agency shall complete a final status report and classification recommendation. SEPA documents will be prepared, as necessary, for the final agency recommendation for classification. The classification recommendation will be presented to the commission for action.

The final species status report, agency classification recommendation, and SEPA documents will be made available to the public at least 30 days prior to the commission meeting.

- 9.2 Notice of the proposed commission action will be published at least 30 days prior to the commission meeting.

Periodic species status review

- 10.1 The agency shall conduct a review of each endangered, threatened, or sensitive wildlife species at least every five years after the date of its listing. This review shall include an update of the species status report to determine whether the status of the species warrants its current listing status or deserves reclassification.
- 10.1.1 The agency shall notify any parties who have expressed their interest to the department of the periodic status review. This notice shall occur at least one year prior to end of the five year period required by section 10.1.
- 10.2 The status of all delisted species shall be reviewed at least once, five years following the date of delisting.
- 10.3 The department shall evaluate the necessity of changing the classification of the species being reviewed. The agency shall report its findings to the commission at a commission meeting. The agency shall notify the public of its findings at least 30 days prior to presenting the findings to the commission.
- 10.3.1 If the agency determines that new information suggests that classification of a species should be changed from its present state, the agency shall initiate classification procedures provided for in these rules starting with section 5.1.
 - 10.3.2 If the agency determines that conditions have not changed significantly and that the classification of the species should remain unchanged, the agency shall recommend to the commission that the species being reviewed shall retain its present classification status.
- 10.4 Nothing in these rules shall be construed to automatically delist a species without formal commission action.

Recovery and management of listed species

- 11.1 The agency shall write a recovery plan for species listed as endangered or threatened. The agency will write a management plan for species listed as sensitive. Recovery and management plans shall address the listing criteria described in sections 3.1 and 3.3, and shall include, but are not limited to:
- 11.1.1 Target population objectives
 - 11.1.2 Criteria for reclassification
 - 11.1.3 An implementation plan for reaching population objectives which will promote cooperative management and be sensitive to landowner needs and property rights. The plan will specify resources needed from and impacts to the department, other

agencies (including federal, state, and local), tribes, landowners, and other interest groups. The plan shall consider various approaches to meeting recovery objectives including, but not limited to regulation, mitigation, acquisition, incentive, and compensation mechanisms.

- 11.1.4 Public education needs
- 11.1.5 A species monitoring plan, which requires periodic review to allow the incorporation of new information into the status report.
- 11.2 Preparation of recovery and management plans will be initiated by the agency within one year after the date of listing.
 - 11.2.1 Recovery and management plans for species listed prior to 1990 or during the five years following the adoption of these rules shall be completed within 5 years after the date of listing or adoption of these rules, whichever comes later. Development of recovery plans for endangered species will receive higher priority than threatened or sensitive species.
 - 11.2.2 Recovery and management plans for species listed after five years following the adoption of these rules shall be completed within three years after the date of listing.
 - 11.2.3 The agency will publish a notice in the Washington Register and notify any parties who have expressed interest to the department interested parties of the initiation of recovery plan development.
 - 11.2.4 If the deadlines defined in sections 11.2.1 and 11.2.2 are not met the department shall notify the public and report the reasons for missing the deadline and the strategy for completing the plan at a commission meeting. The intent of this section is to recognize current department personnel resources are limiting and that development of recovery plans for some of the species may require significant involvement by interests outside of the department, and therefore take longer to complete.
- 11.3 The agency shall provide an opportunity for interested public to comment on the recovery plan and any SEPA documents.

Classification procedures review

- 12.1 The agency and an ad hoc public group with members representing a broad spectrum of interests, shall meet as needed to accomplish the following:
 - 12.1.1 Monitor the progress of the development of recovery and management plans and status reviews, highlight problems, and make recommendations to the department and other interested parties to improve the effectiveness of these processes.
 - 12.1.2 Review these classification procedures six years after the adoption of these rules and report its findings to the commission.

Authority

- 13.1 The commission has the authority to classify wildlife as endangered under RCW 77.12.020. Species classified as endangered are listed under WAC 232-12-014, as amended.
- 13.2 Threatened and sensitive species shall be classified as subcategories of protected wildlife. The commission has the authority to classify wildlife as protected under RCW 77.12.020. Species classified as protected are listed under WAC 232-12-011, as amended.

WAC 232-12-807 Operations and procedures. The department of game is a public service agency whose statutory responsibility is to preserve, protect, and perpetuate all forms of wildlife in the state of Washington and to serve the public by providing the maximum amount of wildlife-oriented recreation consistent with sound biological management.

The state game commission consists of six members appointed by the governor. They serve a term of six years each. Terms are arranged so that appointments of two members expire every two years. By law, three commissioners are appointed from eastern Washington and three from western Washington. The game commission establishes regulations, sets overall policies to guide the department, and appoints the director of game. The director is responsible for all activities of the department of game and reports directly to the game commission.

Organization of the department of game is one of decentralized management. A deputy director and two assistant directors aid in the operation and administration of the department. The Olympia staff consists of seven division administrators who head up areas of program planning and coordination. Completing the staff is a planning section and a special assistant to the director for federal affairs.

The fisheries management division is responsible for research, program development, planning and coordination of management for all fish classified as game fish.

The wildlife management division is responsible for research, planning, program development, and coordination of management for all wildlife in the state other than fish. Major activities of this division relate to big game species, a variety of small game including birds, nonhunted wildlife, and management of wildlife areas.

The habitat management division is responsible for research, planning, program development and coordination for protection, restoration, and enhancement of wildlife and fish habitat areas through the use of environmental laws and public education. A major portion of this program is related

to cooperative contractual agreements with other land managers and private landholders.

The enforcement division is responsible for planning, program development, and coordination of enforcement and wildlife control activities.

The engineering and lands division is responsible for engineering and design, construction, maintenance, surveying, land acquisition, and property management services. The division also prepares and implements the department's capital budget.

The management services division has responsibility for the budget development, accounting, federal aid coordination, payroll, printing, mailing, purchasing, vendor payments, warehouse services, safety, maintenance of archives, department's license management, and data processing.

The information and education division is responsible for planning and program development of the hunter education and safety training, project WILD for school children, various publications, trapper training, interpretive displays, newsletters, news releases, and radio and television public service announcements.

The department of game has six administrative regions in the state; three on the eastside, three on the westside. Each region is administered by a regional supervisor who is responsible for all department programs within his assigned region. They are assisted by program managers for the key areas of enforcement, habitat, wildlife, and fisheries. Program implementation is carried out primarily by field agents and biological or production staff.

The game commission, through the public meeting process, establishes all rules and regulations that govern departmental activities. This includes establishment of hunting and fishing seasons; approval of land acquisitions or exchanges; coordination with other federal, state, county, or city programs; and adjudication of requests for license reinstatements when individual privileges have been revoked in accordance with RCW's.

The game commission holds four statutory meetings each year in January, April, July, and October, and other special meetings as necessary to conduct its business.

officer is responsible for the following: The implementation of the department's rules and regulations regarding release of public records, regarding the administration or enforcement of chapter 1, Laws of 1973 and these rules, coordinating the staff of the department in this regard, and generally insuring compliance by the staff with the public records and disclosure requirements of chapter 1, Laws of 1973.

A. To apply for special hunting season permits for deer, elk, cougar, or black bear applicants must have a valid Washington big game hunting license and a valid transport tag for the appropriate species. To apply for a particular hunt, each applicant for deer or elk must have the proper transport tag as identified in the special deer or elk permit regulations.

B. No refunds or exchanges for deer, elk, cougar, or black bear hunting licenses or transport tags will be made for persons applying for special hunting season permits after the permit drawing has been held.

holder restriction does not apply to mountain goat permits acquired before 1999, raffle or auction hunt authorizations, or youth-only moose hunts.

B. Successful applicants under this section must purchase the appropriate hunting license within fifteen days of notification by the department. Failure to purchase forfeits the permit to an alternate applicant.

4. Special hunting season permit applications:

A. Group applications will be accepted for any species with a group size larger than one. Maximum group sizes are determined for each species. If a group application is drawn, all hunters in the group will receive a special hunting season permit and each hunter in the group can take an animal.

- i. Maximum group size for deer is 12.
- ii. Maximum group size for elk is 12.
- iii. Maximum group size for bear is 2.
- iv. Maximum group size for cougar is 2.
- v. Maximum group size for mountain goat is 2.

The applicant's points will be restored to the level prior to the permit drawing.

Special Provisions for Goose Management Areas 2A and 2B:

The Canada goose season for Goose Management Areas 2A and 2B will be closed early if dusky Canada goose harvests exceed area quotas which collectively total 80 geese. The fish and wildlife commission has authorized the director to implement emergency area closures in accordance with the following quotas: A total of 80 duskys, to be distributed 10 for Zone 1 (Ridgefield NWR); 25 for Zone 2 (Cowlitz County south of the Kalama River); 20 for Zone 3 (Clark County except Ridgefield NWR); 10 for Zone 4 (Cowlitz County north of the Kalama River and Wahkiakum County); 10 for Zone 5 (Pacific County); and 5 for Zone 6 (Grays Harbor County). Hunters who maintained a valid 2001-02 written authorization will be mailed a 2002-03 authorization card prior to the 2002-03 season. Hunters who fail a test must wait 28 days before retesting, and will not be issued a reciprocal authorization until that time. Information on training materials and testing dates/locations is available at the Olympia and regional offices.

With written authorization, hunters will receive a harvest report. Hunters must carry the authorization card and harvest report while hunting. Immediately after taking a Canada goose (dusky, lesser/Taverner, cackling, or other subspecies) into possession, hunters must record in ink the information required on the harvest report. Hunters must go directly to the nearest check station and have geese tagged when leaving a hunt site, before 6:00 p.m. If a hunter takes the season bag limit of one dusky Canada goose or does not comply with requirements listed above regarding checking of birds and recording harvest on the harvest report, written authorization will be invalidated and the hunter will not be able to hunt Canada geese in Goose Management Areas 2A and 2B for the remainder of the season and the special late Canada goose season.
