Reviser's note: Later promulgation, see chapter 296-46B WAC.

Chapter 296-18 INDUSTRIAL INSURANCE AND MEDICAL AID CLASSIFICATION MANUAL

Reviser's note: The classification of occupations was enacted by the legislature as section 1, chapter 247, Laws of 1947. They were revised by the director from time to time under the authority of RCW 51.12.030, 51.12.040, and 51.16.100. As so revised, they were reenacted by the legislature as chapter 51.20 RCW, which was part of chapter 23, Laws of 1961, which reenacted the entire industrial insurance law as Title 51 RCW. The classification as originally published in the WAC conforms to the 1961 statute. The effective date of chapter 23, Laws of 1961 was February 14, 1961.

Chapter 51.20 RCW and its parallels in chapter 231, Laws of 1961, have subsequently been repealed by section 39, chapter 93, Laws of 1972 ex. sess.

296-44-253	Switchboards—Switchboard grounding. [§ 17 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-27847	Grade N construction. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-27847, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].-060.
296-44-256	Switchboards—Guarding live parts on switchboards. [§ 17 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-280	General requirements applying to overhead and underground lines—Installation and maintenance. [§ 21 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-259	Switchboards—Instrument cases. [§ 17 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-283	General requirements applying to overhead and underground lines—Accessibility. [§ 21 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-262	Lightning arresters—Location. [§ 18 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-286	General requirements applying to overhead and underground lines—Inspection and tests of lines and equipment. [§ 21 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-263	Loading for Grades B, C, and D. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-263, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].-060.	296-44-289	General requirements applying to overhead and underground lines—Isolation and guarding. [§ 21 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-26309	General loading requirements and maps. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-26309, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.	296-44-292	General requirements applying to overhead and underground lines—Grounding of circuits and equipment. [§ 21 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-26321	Conductor loading. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-26321, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].-060.		

296-44-295	General requirements applying to overhead and underground lines—Arrangement of switches. [§ 21 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-313	Clearances—Horizontal clearances of supporting structures from other objects. [§ 23 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-29501	Line insulation. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-29501, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. 296-44-337	Clearances—Clearances of vertical and lateral conductors from other wires and surfaces on the same support. [§ 23 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-36563	Communication protective requirements. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-36563, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-44-340	Grades of construction—General. [§ 24 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-36575	Induced voltage. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-36575, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050, [49.17].060.
296-44-343	Grades of construction—Application of grades of construction to different situations. [§ 24 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-367	Strength requirements—Grade D construction. [§ 26 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-346	Grades of construction—Grades of construction for conductors. [§ 24 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-370	Strength requirements—Grade N construction. [§ 26 (part), filed 3/23/60, effective 12/1/58.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-44-349	Grades of construction—Grades of supporting structures. [§ 24 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-373	Line insulators—Application of rule. [§ 27 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-350	Safety rules for the installation and maintenance of underground electric-supply and communication lines. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-350, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.	296-44-376	Line insulators—Material and marking. [§ 27 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-35009	Purpose. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-35009, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.	296-44-379	Line insulators—Electrical strength of insulators in strain position. [§ 27 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-35021	Scope. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-35021, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.	296-44-382	Line insulators—Ratio of flash-over to puncture voltage. [§ 27 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-352	Loading for Grades B, C, and D—General loading map. [§ 25 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-385	Line insulators—Test voltages. [§ 27 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-355	Loading for Grades B, C, and D—Conductor loading. [§ 25 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-386	Underground conduit systems. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-386, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.
296-44-358	Loading for Grades B, C, and D—Loads upon line supports. [§ 25 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-38609	Location. 296-44-472	Installation and maintenance of electric utilization equipment—Working spaces about electric equipment. [§ 30 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-520	Fuses, circuit-breakers, switches and controllers—Where switches are required. [§ 32 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17-040 and 49.17.050.
296-44-478	Installation and maintenance of electric utilization equipment—Guarding or isolating live parts. [§ 30 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-523	Fuses, circuit-breakers, switches and controllers—Character of switches and disconnectors. [§ 32 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-481	Installation and maintenance of electric utilization equipment—Hazardous locations. [§ 30 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-526	Fuses, circuit-breakers, switches and controllers—Disconnection of fuses and thermal cut-outs before handling. [§ 32 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-484	Installation and maintenance of electric utilization equipment—Protection by disconnection. [§ 30 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-529	Fuses, circuit-breakers, switches and controllers—Arcing or suddenly moving parts. [§ 32 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17-040 and 49.17.050.
296-44-487	Installation and maintenance of electric utilization equipment—Identification of equipment. [§ 30 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-532	Fuses, circuit-breakers, switches and controllers—Grounding noncurrent-carrying metal parts. [§ 32 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-490	Conductors—Electrical protection. [§ 31 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-535	Fuses, circuit-breakers, switches and controllers—Guarding live parts. [§ 32 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-491	Installation in tunnels. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-491, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].-060.	296-44-538	Fuses, circuit-breakers, switches and controllers—Inclosed air-break switches (not including snap switches). [§ 32 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-49109	General. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-49109, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.	296-44-541	Fuses, circuit-breakers, switches and controllers—Control equipment. [§ 32 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-49121	Environment. [Statutory Authority: RCW 49.17.040 and 49.17.050. 86-16-007 (Order 86-26), § 296-44-49121, filed 7/25/86.] Repealed by 98-07-009, filed 3/6/98, effective 5/6/98. Statutory Authority: RCW 49.17.010, [49.17].040, [49.17].050 and [49.17].060.	296-44-544	Switchboards and panelboards—Accessibility and convenient attendance. [§ 33 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-493	Conductors—Protective covering. [§ 31 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-547	Switchboards and panelboards—Location and illumination. [§ 33 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-496	Conductors—Identification of conductors and terminals. [§ 31 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-550	Switchboards and panelboards—Arrangement and identification. [§ 33 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-499	Conductors—Guarding and isolating conductors. [§ 31 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-553	Switchboards and panelboards—Spacing, barriers and covers. [§ 33 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-502	Conductors—Guarding in damp or hazardous locations. [§ 31 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-556	Switchboards and panelboards—Grounding frames. [§ 33 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-505	Conductors—Precautions against excessive inductance and eddy currents. [§ 31 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-559	Switchboards and panelboards—Guarding current-carrying parts. [§ 33 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-508	Conductors—Splicing and taping. [§ 31 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-562	Switchboards and panelboards—Fuses on switchboards. [§ 33 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-511	Conductors—Uninsulated conductors. [§ 31 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-565	Switchboards and panelboards—Panelboards. [§ 33 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.
296-44-514	Fuses, circuit-breakers, switches and controllers—General requirements for switches. [§ 32 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007	296-44-568	Motors and motor-driven machinery—Control devices. [§ 34 (part), filed 3/23/60, effective 12/1/58.] Repealed

	by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
296-44-571	Motors and motor-driven machinery—Hazardous locations. [§ 34 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-628
296-44-574	Motors and motor-driven machinery—Deteriorating agencies. [§ 34 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
296-44-577	Motors and motor-driven machinery—Guards for live parts. [§ 34 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-631
296-44-580	Motors and motor-driven machinery—Grounding machine frames. [§ 34 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-634
296-44-583	Motors and motor-driven machinery—Protecting moving parts. [§ 34 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-637
296-44-586	Electric furnaces, storage batteries, transformers, and lightning arresters—Protection from burns. [§ 35 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-640
296-44-589	Electric furnaces, storage batteries, transformers, and lightning arresters—Grounding of furnace frames. [§ 35 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-643
296-44-592	Electric furnaces, storage batteries, transformers, and lightning arresters—Guarding live parts. [§ 35 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-646
296-44-595	Electric furnaces, storage batteries, transformers, and lightning arresters—Storage batteries. [§ 35 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-649
296-44-598	Electric furnaces, storage batteries, transformers, and lightning arresters—Transformers. [§ 35 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-652
296-44-601	Electric furnaces, storage batteries, transformers, and lightning arresters—Lightning arresters. [§ 35 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-655
296-44-604	Lighting fixtures and signs—Fixtures. [§ 36 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-658
296-44-607	Lighting fixtures and signs—Receptacle for convenience outlet. [§ 36 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-661
296-44-610	Lighting fixtures and signs—Exposed live parts. [§ 36 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-664
296-44-613	Lighting fixtures and signs—Signs. [§ 36 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	296-44-667
296-44-616	Lighting fixtures and signs—Connectors for signs. [§ 36 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
296-44-619	Lighting fixtures and signs—Lamps in series circuits. [§ 36 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
296-44-622	Lighting fixtures and signs—Safe access to arc lamps. [§ 36 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
296-44-625	Portable appliances, cables and connectors, and insect eliminators (not including those for communication sys-	
	tems)—Insulation. [§ 37 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Portable appliances, cables and connectors, and insect eliminators (not including those for communication systems)—Grounding of frames. [§ 37 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Portable appliances, cables and connectors, and insect eliminators (not including those for communication systems)—Cable connectors. [§ 37 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Portable appliances, cables and connectors, and insect eliminators (not including those for communication systems)—Identified conductors, cords, and connectors. [§ 37 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Portable appliances, cables and connectors, and insect eliminators (not including those for communication systems)—Use of portables and pendants. [§ 37 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Portable appliances, cables and connectors, and insect eliminators (not including those for communication systems)—Portable outdoor equipment of more than 750 volts between conductors. [§ 37 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Portable appliances, cables and connectors, and insect eliminators (not including those for communication systems)—Insect eliminators. [§ 37 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Electrically operated industrial locomotives, cars, cranes, hoists, and elevators—Guarding live and moving parts. [§ 38 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Electrically operated industrial locomotives, cars, cranes, hoists, and elevators—Grounding noncurrent-carrying parts. [§ 38 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Electrically operated industrial locomotives, cars, cranes, hoists, and elevators—Control of energy supply to cars, cranes, and industrial locomotives. [§ 38 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Control of movement of industrial locomotives, cars, cranes, and elevators. [§ 38 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Control of movement of industrial locomotives, cars, cranes, and elevators—Subway and car lighting. [§ 38 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Telephone and other communication apparatus on circuits exposed to supply lines or lightning—Protective requirements. [§ 39 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.	
	Telephone and other communication apparatus on circuits exposed to supply lines or lightning—Guarding current-carrying parts. [§ 39 (part), filed 3/23/60, effective 12/1/58.] Repealed by 86-16-007 (Order 86-26), filed 7/25/86. Statutory Authority: RCW 49.17.040 and 49.17.050.

296-48-4055	Expandable or multiple vehicles. [Order 70-2, § 296-48-4055, filed 4/27/70; Order 68-4, § 296-48-4055, filed 5/31/68, effective 7/1/68.] Repealed by Order 76-26, filed 8/23/76.	296-48-6125	Design loads. [Order 70-10, § 296-48-6125, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
296-48-4061	Under chassis wiring (exposed to weather). [Order 70-2, § 296-48-4061, filed 4/27/70; Order 68-4, § 296-48-4060, filed 5/31/68, effective 7/1/68. Codified as WAC 296-48-4061.] Repealed by Order 76-26, filed 8/23/76.	296-48-6131	Wind loads. [Order 70-10, § 296-48-6131, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
296-48-4062	Conductors and outlet boxes. [Order 70-2, § 296-48-4062, filed 4/27/70.] Repealed by Order 76-26, filed 8/23/76.	296-48-6135	Roof loads. [Order 70-10, § 296-48-6135, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
296-48-4063	Painting of wiring. [Order 70-2, § 296-48-4063, filed 4/27/70.] Repealed by Order 76-26, filed 8/23/76.	296-48-6141	Walls. [Order 70-10, § 296-48-6141, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
296-48-4064	Connection of terminals and splices. [Order 70-2, § 296-48-4064, filed 4/27/70; Order 68-4, § 296-48-4065, filed 5/31/68, effective 7/1/68. Formerly WAC 296-48-4065 relating to splices in grounding. Conductor now codified as WAC 296-48-4064 (part).] Repealed by Order 76-26, filed 8/23/76.	296-48-6145	Firestopping. [Order 70-10, § 296-48-6145, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
296-48-4065	Wall switches. [Order 70-2, § 296-48-4065, filed 4/27/70. Formerly WAC 296-48-4065 relating to splices in grounding conductor see WAC 296-48-4064.] Repealed by Order 76-26, filed 8/23/76.	296-48-6151	Interior partition. [Order 70-10, § 296-48-6151, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
296-48-4066	Receptacles. [Order 70-2, § 296-48-4066, filed 4/27/70.] Repealed by Order 76-26, filed 8/23/76.	296-48-6155	Floors. [Order 70-10, § 296-48-6155, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
296-48-4075	Lighting fixtures. [Order 68-4, § 296-48-4075, filed 5/31/68, effective 7/1/68.] Repealed by Order 76-26, filed 8/23/76.	296-48-6161	Design load deflections. [Order 70-10, § 296-48-6161, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
296-48-4081	Shower fixtures. [Order 70-2, § 296-48-4081, filed 4/27/70; Order 68-4, § 296-48-4080, filed 5/31/68, effective 7/1/68. Codified as WAC 296-48-4081.] Repealed by Order 76-26, filed 8/23/76.	296-48-6165	Ultimate load tests. [Order 70-10, § 296-48-6165, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
296-48-4085	Equipment mounting. [Order 68-4, § 296-48-4085, filed 5/31/68, effective 7/1/68.] Repealed by Order 76-26, filed 8/23/76.	296-48-6171	Chassis assembly. [Order 70-10, § 296-48-6171, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
		296-48-6175	Basic structural integrity. [Order 70-10, § 296-48-6175, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
		296-48-6181	Roof rafter or truss test procedure. [Order 70-10, § 296-48-6181, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
		296-48-6185	Weather resistance. [Order 70-10, § 296-48-6185, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.
		296-48-6191	Interior walls, partitions and ceilings. [Order 73-17, § 296-48-6191, filed 10/12/73; Order 70-10, § 296-48-

6191, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.

296-48-6195 Rodent resistance. [Order 70-10, § 296-48-6195, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.

296-48-6201 Heat loss. [Order 73-17, § 296-48-6201, filed 10/12/73; Order 70-10, § 296-48-6201, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.

296-48-6205 Room and hallway sizes. [Order 73-17, § 296-48-6205, filed 10/12/73; Order 70-10, § 296-48-6205, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.

296-48-6211 Ceiling height. [Order 73-17, § 296-48-6211, filed 10/12/73; Order 70-10, § 296-48-6211, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.

296-48-6215 Light and ventilation. [Order 73-17, § 296-48-6215, filed 10/12/73; Order 71-11, § 296-48-6215, filed 10/8/71; Order 70-10, § 296-48-6215, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.

296-48-6221 Exit facilities. [Order 73-17, § 296-48-6221, filed 10/12/73; Order 71-11, § 296-48-6221, filed 10/8/71; Order 70-10, § 296-48-6221, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.

296-48-6222 Interior privacy. [Order 73-17, § 296-48-6222, filed 10/12/73.] Repealed by Order 76-26, filed 8/23/76.

296-48-6223 Interior passage. [Order 73-17, § 296-48-6223, filed 10/12/73.] Repealed by Order 76-26, filed 8/23/76.

296-48-6225 Windows. [Order 73-17, § 296-48-6225, filed 10/12/73; Order 70-10, § 296-48-6225, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.

296-48-6226 Mobile home fire warning equipment. [Order 73-17, § 296-48-6226, filed 10/12/73.] Repealed by Order 76-26, filed 8/23/76.

Appendix A Flexural rigidity chart. Figures 1, 2, 3, and 4. [Order 70-10, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.

Table 1 Accepted engineering practice standards. [Order 70-10, filed 9/17/70, effective 1/1/71.] Repealed by Order 76-26, filed 8/23/76.

Appendix B Heat loss. [Order 70-10, filed 9/17/70, effective 1/1/71.] Repealed by Order 73-17, filed 10/12/73.

Appendix C Table 1 maximum allowable areas of glass table 2 adjustment factors relative resistance to wind loads table 3 glass dimensional tolerances table 4 glazing relative to specific hazardous locations. [Order 70-10, filed 9/17/70, effective 1/1/71.] Repealed by Order 73-17, filed 10/12/73.

296-50-180 Batch nitrator. [Rules K-1 through K-6, filed 3/23/60, effective 8/15/57.] Repealed by 99-16-085, filed 8/3/99, effective 11/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.

296-50-190 Separator and prewash operation. [Rules K-7 through K-16, filed 3/23/60, effective 8/15/57.] Repealed by 99-16-085, filed 8/3/99, effective 11/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.

296-50-200 N.G. neutralizing house and store house. [Rules L-1 through L-10, filed 3/23/60, effective 8/15/57.] Repealed by 99-16-085, filed 8/3/99, effective 11/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.

296-50-210 Acid operations. [Rules M-1 through M-19, filed 3/23/60, effective 8/15/57.] Repealed by 99-16-085, filed 8/3/99, effective 11/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.

296-50-220 Spare parts houses. [Rules N-1 through N-4, filed 3/23/60, effective 8/15/57.] Repealed by 99-16-085, filed 8/3/99, effective 11/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.

296-50-230 Nitrocotton screening and drying houses. [Rules O-1 through O-27, filed 3/23/60, effective 8/15/57.] Repealed by 99-16-085, filed 8/3/99, effective 11/1/99. Statutory Authority: RCW 49.17.010, [49.17].040 and [49.17].050.

Chapter 296-51
AMMONIUM NITRATE PRECAUTIONS

296-51-010 Storage and handling of ammonium nitrate—Posting of caution placards. [Rule 1.010, effective 11/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-020 Storage and handling of ammonium nitrate—General precautions. [Rule 1.020, effective 11/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-030 Storage and handling of ammonium nitrate—Storage of bags. [Rule 1.030, effective 11/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-040 Storage and handling of ammonium nitrate—Storage in noncombustible type buildings. [Rule 1.040, effective 11/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-050 Storage and handling of ammonium nitrate—Open lights or flame. [Rule 1.050, effective 11/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-060 Storage and handling of ammonium nitrate—Bag handling. [Rule 1.060, effective 11/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-070 Storage and handling of ammonium nitrate—Loosening of caked ammonium nitrate. [Rule 1.070, effective 11/1/62; § 2, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-100 Processing plant for sensitizing ammonium nitrate operation and storage requirements—Mixing with sensitizing materials. [Rule 2.010, effective 11/1/62; § 6f1, filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-110 Processing plant for sensitizing ammonium nitrate operation and storage requirements—Marking of bags or containers. [Rule 2.020, effective 11/1/62; § 6f2, filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-120 Processing plant for sensitizing ammonium nitrate operation and storage requirements—Storage of raw ammonium nitrate. [Rule 2.030, effective 11/1/62; § 1b, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-130 Processing plant for sensitizing ammonium nitrate operation and storage requirements—Open drains and piping—Warehouse floors. [Rule 2.040, effective 11/1/62; § 3a, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-140 Processing plant for sensitizing ammonium nitrate operation and storage requirements—Floors in processing plant. [Rule 2.050, effective 11/1/62; § 3b, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-150 Processing plant for sensitizing ammonium nitrate operation and storage requirements—Fuel storage. [Rule 2.060, effective 11/1/62; § 1c and 3b, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-160 Processing plant for sensitizing ammonium nitrate operation and storage requirements—Heat. [Rule 2.070, effective 11/1/62; § 3d, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-170 Processing plant for sensitizing ammonium nitrate operation and storage requirements—Smoking. [Rule 2.080, effective 11/1/62; § 3j, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-180 Processing plant for sensitizing ammonium nitrate operation and storage requirements—One day's production. [Rule 2.090, effective 11/1/62; § 3f, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-200 General provisions—Unusual compositions. [Rule 3.010, effective 11/1/62; § 3e, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-210 General provisions—Mixing for above ground use at jobsite. [Rule 3.020, effective 11/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-220 General provisions—Ammonium nitrate bag accumulation prohibited. [Rule 3.030, effective 11/1/62; § 3k, filed 8/8/60 and 5/1/62; § 6e(3a), filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-230 General provisions—Cleanliness. [Rule 3.040, effective 11/1/62; Rule 3f, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-240 General provisions—Proper stacking. [Rule 3.050, effective 11/1/62; § 3m, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-250 General provisions—Mobile equipment. [Rule 3.060, effective 11/1/62; § 4a, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-260 General provisions—Volatile fuels. [Rule 3.070, effective 11/1/62.] Repealed by Order 76-28, filed 9/28/76.

296-51-270	General provisions—Crude oil and crankcase oil prohibited. [Rule 3.080, effective 11/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-240	Effective date. [Order 68-6, § 296-53-240, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-280	General provisions—Misfires (other than underground). [Rule 3.090, effective 11/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-250	Definitions. [Order 68-6, § 296-53-250, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-300	General storage requirements—Standard magazine construction. [Rule 4.010, effective 11/1/62; § 3h, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-260	Design requirements—High velocity tools. [Order 68-6, § 296-53-260, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-310	General storage requirements—Calculation of distance limitations. [Rule 4.020, effective 11/1/62; § 1a, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-270	Low velocity piston tools. [Order 68-6, § 296-53-270, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-320	General storage requirements—Storage of processed compositions. [Rule 4.030, effective 11/1/62; § 1d, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-280	Hammer-operated piston tools—Low velocity type. [Order 68-6, § 296-53-280, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-330	General storage requirements—Ventilation of storage areas. [Rule 4.040, effective 11/1/62; § 3c, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-290	Requirements for loads and fasteners. [Order 68-6, § 296-53-290, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-340	General storage requirements—Storage in vans. [Rule 4.050, effective 11/1/62; § 3g, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-300	Approvals. [Order 68-6, § 296-53-300, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-350	General storage requirements—Storage van requirements. [Rule 4.060, effective 11/1/62; § 3i, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-310	Operation. [Order 68-6, § 296-53-310, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-360	General storage requirements—Limitation of amount of fuel sensitized ammonium nite at blasting site. [Rule 4.070, effective 11/1/62; § 5a, filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-320	Servicing. [Order 68-6, § 296-53-320, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-400	Underground blasting operations—Permit required—Must be renewed annually—Posted on premises. [Rule 5.010, effective 11/1/62; § 6e, filed 8/8/60; § 6e, filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-330	Qualification and certification of operators. [Order 68-6, § 296-53-330, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-410	Underground blasting operations—Rating of blasting agents. [Rule 5.020, effective 11/1/62; § 6f, filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-340	Storage of explosive-actuated tools, instruction books, cleaning kits, and tools. [Order 68-6, § 296-53-340, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-420	Underground blasting operations—Loading of holes. [Rule 5.030, effective 11/1/62; § 6e(1a), filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-53-350	Use low velocity tools when possible. [Order 68-6, § 296-53-350, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.
296-51-430	Underground blasting operations—Priming. [Rule 5.040, effective 11/1/62; § 6a, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	Chapter 296-58 SAFETY STANDARDS—METALS INDUSTRY	
296-51-440	Underground blasting operations—Grounding. [Rule 5.050, effective 11/1/62; § 6e(2a), filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-58-001	Foreword. [Foreword, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-51-450	Underground blasting operations—Firing. [Rule 5.060, effective 11/1/62; § 6e(5a), filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-58-004	Practical application of standards. [Practical application paragraphs, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-51-460	Underground blasting operations—Misfire. [Rule 5.070, effective 11/1/62; § 6b & 6c, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-58-010	Safe place standards. [Standard 1, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-51-470	Underground blasting operations—Fumes. [Rule 5.080, effective 11/1/62; § 6d, filed 8/8/60 and 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-58-015	Safe practice standards. [Standard 2, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-51-480	Underground blasting operations—Wet holes. [Rule 5.090, effective 11/1/62; § 6e(4a), filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-58-020	Standard safeguard defined. [Standard 3, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-51-490	Underground blasting operations—Liners prohibited. [Rule 5.100, effective 11/1/62; § 6e(4a), filed 5/1/62.] Repealed by Order 76-28, filed 9/28/76.	296-58-025	Approved. [Standard 4, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
Chapter 296-53 SAFETY REQUIREMENTS FOR EXPLOSIVE-ACTUATED FASTENING TOOLS		296-58-030	Substantial. [Standard 5, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-53-010,	296-53-020, 296-53-030, 296-53-040, 296-53-050, 296-53-060, 296-53-070, 296-53-080, 296-53-090, 296-53-100, 296-53-110. [Paragraphs I through XI, effective 8/1/52, filed 3/23/60.] Repealed by Order 68-6, filed 10/24/68, effective 12/1/68.	296-58-035	Exposed to contact. [Standard 6, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-53-200	Scope. [Order 68-6, § 296-53-200, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.	296-58-040	Warning placards. [Standard 7, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-53-210	Purpose. [Order 68-6, § 296-53-210, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.	296-58-045	Wooden guards. [Standard 8, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-53-220	Exception. [Order 68-6, § 296-53-220, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.	296-58-050	Metal guards—Framework. [Standard 9, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-53-230	References to other codes. [Order 68-6, § 296-53-230, filed 10/24/68, effective 12/1/68.] Repealed by Order 75-12, filed 4/4/75.	296-58-055	Standard railings. [Standard 10, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
		296-58-060	Fillers. [Standard 11, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
		296-58-065	Filling material for metal guards. [Standard 12, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.

296-58-070	Safeguards must not admit rod or pipes. [Standard 13, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.	296-58-195	Vats and tanks guarded. [Standard 38, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-58-075	Lighting and illumination. [Standard 14, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.	296-58-200	Building—Floors. [Standard 39, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-58-080	Diffusion and distribution of artificial and natural light. [Standard 15, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.	296-58-205	Stairways. [Standard 40, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-58-085	Foundations. [Standard 16, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.	296-58-210	Fire escapes. [Standard 41, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-58-090	Housekeeping. [Standard 17, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.	296-58-215	Swinging doors—Windows required. [Standard 42, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-58-095	Plant location. [Standard 18, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.	296-58-220	Doorways near railroad tracks and roadways. [Standard 43, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-58-100	Power transmission equipment and machine parts. [Standard 19, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.	296-58-225	Platforms and runways. [Standard 44, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.
296-58-105	Saw guarding (metal and wood). [Standard 20, effective 6/1/55, filed 3/23/60.] Repealed by Order 76-7, filed 3/1/76. Later promulgation, see chapter 296-61 WAC.	296-58-230	Floor openings. - 296-306A-36209 What requirements apply to guarding live parts? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36209, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36212 What workspace must be provided? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36212, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36215 What general requirements apply to splices? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36215, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36218 What protection must be provided against combustible materials? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36218, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36221 How must electrical equipment be marked? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36221, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36224 How must disconnecting means be marked? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36224, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36227 What access and working space must be provided for electrical equipment of 600 volts, nominal, or less? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36227, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36230 What access and working space must be provided for electrical equipment over 600 volts, nominal? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36230, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-364 Electrical installation and maintenance. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-364, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36403 How must flexible cords and cables be installed and maintained? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36403, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36406 How must attachment plugs and receptacles be installed and maintained? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36406, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36409 What must employees do when equipment causes electrical shock? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36409, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36412 What grounding and bonding requirements apply to equipment installation and maintenance? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36412, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36415 What requirements apply to disconnecting means? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36415, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36418 What requirements apply to identification and load rating of electrical equipment? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36418, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36421 How must equipment be installed in wet locations? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36421, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.

- 296-306A-366 Wiring design and protection. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-366, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36603 How must grounded and grounding conductors be used and identified? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36603, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36606 What ampere rating must outlet devices have? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36606, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36609 What requirements apply to conductors? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36609, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36612 What design and protection requirements apply to service-entrances? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36612, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36615 What overcurrent protection must be provided? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36615, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36618 What premises wiring systems must be grounded? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36618, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36621 Must the conductor be grounded for AC premises wiring? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36621, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36624 What general requirements apply to grounding conductors? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36624, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36627 Must the path to ground be continuous? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36627, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36630 What supports, enclosures, and equipment must be grounded? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36630, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36633 How must fixed equipment be grounded? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36633, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36636 How must high voltage systems be grounded? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36636, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-368 Wiring methods, components, and equipment for general use. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-368, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36803 Does this section apply to factory-assembled equipment? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36803, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36806 What wiring methods must be used for temporary wiring? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36806, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36809 When may cable trays be used? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36809, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36812 What requirements apply to open wiring on insulators? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36812, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36815 What wiring requirements apply to cabinets, boxes, and fittings? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36815, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36818 What requirements apply to switches? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36818, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36821 Where must switchboards and panelboards be located? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36821, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36824 When must conductors be insulated? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36824, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36827 When may flexible cords and cables be used? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36827, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36830 How must flexible cords and cables be identified, spliced, and terminated? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36830, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36833 What requirements apply to multiconductor portable cable? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36833, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36836 When may fixture wires be used? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36836, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36839 What requirements apply to wiring for lighting fixtures, lampholders, lamps, and receptacles? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36839, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36842 What requirements apply to wiring for receptacles, cord connectors, and attachment plugs (caps)? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36842, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36845 What requirements apply to wiring for appliances? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36845, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36848 What requirements apply to wiring for motors, motor circuits, and controllers? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36848, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36851 What requirements apply to wiring for transformers? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36851, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36854 What requirements apply to wiring for capacitors? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36854, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-36857 How must storage batteries be ventilated? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36857, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.

- 296-306A-36860 What other miscellaneous requirements apply to wiring methods? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-36860, filed 10/31/96, effective 12/1/96.] Decoded by 97-09-013, filed 4/7/97, effective 4/7/97.

296-306A-38012	What electrical requirements apply to electrical protective devices? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-38012, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.	296-306A-40025	What requirements apply to safety-relief devices? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-40025, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
296-306A-38015	What workmanship and finish requirements apply to electrical protective devices? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-38015, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.	296-306A-40027	What emergency precautions are required when handling anhydrous ammonia? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-40027, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
296-306A-38018	How must electrical protective devices be maintained and used? [Statutory Authority: RCW 49.17.040,	296-306A-40029	What requirements apply to filling densities? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060.

060. 96-22-048, § 296-306A-40029, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-40031 What requirements apply to the transfer of liquids? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-40031, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-40033 What requirements apply to tank car unloading points and operations? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-40033, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-40035 What requirements apply to the liquid-level gauging device? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-40035, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-40037 How should aboveground uninsulated containers be maintained? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-40037, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-40039 What requirements apply to electrical equipment and wiring? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-40039, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-410 Storage and handling of liquefied petroleum gases. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-410, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41001 What does this part cover? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41001, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41003 Which LP-gas installations are not covered by this part? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41003, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41005 What definitions apply to this part? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41005, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41007 When must LP-gas be odorized? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41007, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41009 Must LP-gas containers and equipment be approved? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41009, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41011 What construction and test requirements must containers meet? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41011, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41013 How must containers be welded? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41013, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41015 How must containers be marked? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41015, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41017 Where must containers be located? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41017, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41019 What requirements apply to valves and accessories? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41019, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41021 What requirements apply to piping, tubing, and fittings? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41021, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41023 What specifications must hoses meet? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41023, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41025 What requirements apply to safety devices? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41025, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41027 How must indirect fired vaporizers be constructed and installed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41027, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41029 How must atmospheric vaporizers be constructed and installed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41029, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41031 How must direct gas-fired vaporizers be constructed and installed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41031, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41033 How must direct gas-fired tank heaters be constructed and installed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41033, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41035 How must dehydrators be constructed and installed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41035, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41037 What are the maximum filling densities? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41037, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41039 What requirements apply to LP-gas in buildings? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41039, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41041 What requirements apply to transfer of liquids? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41041, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41043 Must workers be trained? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41043, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41045 What fire protection must be provided for LP-gas installations? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41045, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41047 What electrical requirements apply to LP-gas installations? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41047, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41049 What requirements apply to liquid-level gauging devices? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41049, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-41051 What requirements apply to appliances? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-41051, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-415 Cylinder systems. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-415, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.

- 296-306A-45007 What requirements must ventilation systems meet? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45007, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45009 What general requirements apply to the construction of dip tanks? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45009, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45011 How must overflow pipes for dip tanks be constructed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45011, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45013 How must the bottom drains of dip tanks be constructed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45013, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45015 How must liquids used in dip tanks be stored and handled? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45015, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45017 What measures must an employer take to prevent hazards from electrical and other ignition sources? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45017, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45019 How must dip tanks be operated and maintained? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45019, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45021 What requirements must fire extinguishing systems meet? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45021, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45023 What requirements apply to hardening and tempering tanks? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45023, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45025 What requirements apply to flow coat applications? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45025, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45027 What requirements apply to electrostatic apparatus? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45027, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-45029 What requirements apply to roll coating applications? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-45029, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-475 Welding, cutting, and brazing. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-475, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-47501 What definitions apply to this part? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-47501, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-480 Installation and operation of oxygen fuel gas systems for welding and cutting. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-480, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48001 What general requirements apply to oxygen fuel gas systems? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48001, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48003 What requirements apply to portable cylinders? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48003, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48005 What general requirements apply to storing compressed gas cylinders? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48005, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48007 How must fuel-gas cylinders be stored? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48007, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48009 How must oxygen cylinders be stored? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48009, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48011 What general operating procedures apply to working with cylinders and containers? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48011, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48013 What requirements apply to safety devices on cylinders? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48013, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48015 How must cylinders be transported? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48015, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48017 How must cylinders be handled? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48017, filed 10/31/96, effective 12/1/96.] Decodedified by 97-09-013, filed 4/7/97, effective 4/7/97.

- 296-306A-48019 What requirements apply to cylinder valves? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48019, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48021 What requirements apply to cylinder regulators? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48021, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48023 What requirements apply to fuel-gas manifolds? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48023, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48025 What requirements apply to high pressure oxygen manifolds? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48025, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48027 What requirements apply to low pressure oxygen manifolds? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48027, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48029 What requirements apply to manifolding portable outlet headers? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48029, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48031 What operating procedures apply to cylinder manifolds? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48031, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48033 How must service piping systems be designed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48033, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48035 What requirements apply to piping joints? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48035, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48037 How must service piping systems be installed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48037, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48039 How must service piping systems be painted and marked? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48039, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48041 How must service piping systems be tested? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48041, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48043 How must equipment be installed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48043, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48045 How must service piping systems be protected? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48045, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48047 What requirements apply to piping protective equipment? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48047, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48049 What requirements apply to station outlet protective equipment? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48049, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48051 What requirements apply to hose and hose connections? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48051, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48053 What requirements apply to pressure-reducing regulators? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48053, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-485 Installation and operation of resistance welding equipment. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-485, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48501 What general requirements apply to resistance welding equipment? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48501, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48503 What requirements apply to portable welding machines? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48503, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48505 What requirements apply to flash welding equipment? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48505, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48507 Who must perform a job hazard analysis? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48507, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-48509 What maintenance requirements apply to resistance welding equipment? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-48509, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-490 Application, installation, and operation of arc welding and cutting equipment. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-490, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49001 What environmental conditions must be taken into account when selecting arc welding equipment? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49001, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49003 What voltages must arc welding equipment use? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49003, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49005 How must arc welding equipment be designed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49005, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49007 How must arc welding equipment be installed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49007, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49009 How must arc welding equipment be grounded? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49009, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49011 What requirements apply to supply connections and conductors? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49011, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49013 How must arc welding equipment be operated? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49013, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49015 How must arc welding equipment be maintained? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49015, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.

- 296-306A-495 Fire prevention and protection. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-495, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49501 What basic fire prevention precautions must be taken? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49501, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49503 What special fire prevention precautions must be taken? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49503, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49505 What precautions must be taken when welding or cutting containers? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49505, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-49507 What precautions must be taken when welding in confined spaces? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-49507, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-500 Protection of employees. [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-500, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50001 How must eye protection be selected? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50001, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50003 What specifications must eye protection meet? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50003, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50005 What protective clothing must welders wear? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50005, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50007 What other requirements apply to employee protection? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50007, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50009 What employee protection must be provided in confined spaces? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50009, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50011 What general requirements apply to welding ventilation? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50011, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50013 What ventilation must be provided for general welding and cutting? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50013, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50015 What requirements apply to local exhaust hoods and booths? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50015, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50017 What ventilation must be provided in confined spaces? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50017, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50019 What requirements apply to welding fluorine compounds? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50019, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50021 What requirements apply to welding zinc? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50021, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50023 What requirements apply to welding lead? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50023, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50025 What requirements apply to welding beryllium? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50025, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50027 What requirements apply to welding cadmium? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50027, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-50029 What requirements apply to welding mercury? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-50029, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-520 Powered industrial trucks (forklifts). [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-520, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52001 What does this section cover? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52001, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52003 What is a "powered industrial truck"? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52003, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52005 What manufacturers requirements apply to powered industrial trucks? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52005, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52007 What are the classifications of powered industrial trucks? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52007, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52009 What must a user consider before choosing a powered industrial truck? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52009, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52011 What requirements determine which trucks to use in specific hazardous environments? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52011, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52013 In what environments may converted trucks be used? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52013, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52015 What requirements apply to overhead safety guards? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52015, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52017 What requirements apply to load backrests? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52017, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52019 What requirements apply to fuel handling and storage? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52019, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52021 What requirements apply to lighting for operating areas? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52021, filed 10/31/96, effective 12/1/96.] Decodified by 97-09-013, filed 4/7/97, effective 4/7/97.
- 296-306A-52023 What level of carbon monoxide gas is allowed? [Statutory Authority: RCW 49.17.040, [49.17.]050 and [49.17.]060. 96-22-048, § 296-306A-52023, filed

WAC 296-05-001 Purpose, scope, and authority. (1)

The Washington State Apprenticeship and Training Act (chapter 49.04 RCW) establishes the Washington state apprenticeship and training council (WSATC) and designates as its administrative arm the apprenticeship section of the department of labor and industries. The WSATC, acting in

compliance with chapter 49.04 RCW, 29 CFR Part 29 and 29 CFR Part 30, has adopted these rules to:

- (a) Establish operating procedures for the WSATC;
 - (b) Establish standards for apprenticeship programs;
 - (c) Implement the intent and purpose of the Washington State Apprenticeship and Training Act;
 - (d) Perform other duties directed by the statute;
 - (e) Promote labor standards and the registration of approved programs to protect the welfare of the apprentice; and
 - (f) Encourage the establishment of apprenticeship programs and committees.
- (2) These rules are necessary to:
- (a) Strengthen apprenticeship and training in the state of Washington;
 - (b) Facilitate approval and registration of apprenticeship and training programs;
 - (c) Explain factors related to apprenticeship and training in Washington state and federal laws;
 - (d) Establish procedures for presenting matters to the WSATC;
 - (e) Govern the WSATC's operation and ability to carry out its statutory obligations;
 - (f) Establish a specific procedure to resolve an impasse if a tie vote occurs on the WSATC; and
 - (g) Regulate registered apprenticeship and training programs.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW 01-22-055, § 296-05-001, filed 10/31/01, effective 1/17/02.]

WAC 296-05-003 Definitions. The following definitions apply to this chapter:

Adjudicative proceeding: A proceeding before the WSATC in which an opportunity for a hearing before the WSATC is authorized by chapter 49.04 RCW or these rules before or after the entry of an order by the WSATC.

Apprentice: Is an individual who is employed to learn an apprenticeable occupation and is registered with a sponsor in an approved apprenticeship program according to chapter 49.04 RCW and these rules.

Apprenticeable occupation: Is a skilled trade(s) or craft(s) which has been recognized by the United States Department of Labor, Office of Apprenticeship, Training, Employer, and Labor Services or the WSATC and meets the criteria established in WAC 296-05-305.

Apprenticeship agreement: A written agreement between an apprentice and either the apprentice's employer(s), or an apprenticeship committee acting as agent for employer(s), containing the terms and conditions of the employment and training of the apprentice.

Apprenticeship committee: A quasi-public entity approved by the WSATC to perform apprenticeship and training services for employers and employees.

Apprenticeship program: A plan for administering an apprenticeship agreement(s). The plan must contain all terms and conditions for the qualification, recruitment, selection, employment and training of apprentices, including such matters as the requirement for a written apprenticeship agreement.

Approved: Approved by the WSATC or a person or entity authorized by the WSATC to do so.

CFR: The Code of Federal Regulations.

Cancellation: The termination of the registration or approval status of a program at the request of the supervisor or sponsor. Cancellation also refers to the termination of an apprenticeship agreement at the request of the apprentice, supervisor, or sponsor.

Certificate of completion: A record of the successful completion of a term of apprenticeship (see WAC 296-05-323).

Certification: Written approval by the WSATC of:

(1) A set of apprenticeship standards established by an apprenticeship program sponsor and substantially conforming to the standards established by the WSATC.

(2) An individual as eligible for probationary employment as an apprentice under a registered apprenticeship program.

Committee program: All apprenticeship programs as further described in WAC 296-05-309.

Competent instructor: An instructor who has demonstrated a satisfactory employment performance in his/her occupation or trade for a minimum of three years beyond the customary learning period for that trade or occupation.

Current instruction: The related/supplemental instructional content is and remains reasonably consistent with the latest trade practices, improvements, and technical advances.

Department: The department of labor and industries.

Employer: Any person or organization employing an apprentice whether or not such person or organization is a party to an apprenticeship agreement with the apprentice. "Employer" includes both union and open shop employers.

File: To send to:

Supervisor of Apprenticeship and Training
Department of Labor and Industries
Apprenticeship Section
Post Office Box 44530
Olympia, Washington 98504-4530

Or deliver to and receipt at:
Department of Labor and Industries
7273 Linderson Way SE
Tumwater, Washington 98501

Individual agreement: A written agreement between an apprentice and/or trainee and either the apprentice's employer or an apprenticeship committee acting as agent for the employer.

Industry wide standards: The current, acceptable trade practices, including technological advancements, that are being used in the different trades.

Journey level: An individual who has sufficient skills and knowledge of a trade, craft, or occupation, either through formal apprenticeship training or through practical on-the-job work experience, to be recognized by a state or federal registration agency and/or an industry as being fully qualified to perform the work of the trade, craft, or occupation. Practical experience must be equal to or greater than the term of apprenticeship.

On-the-job training program: A program that is set up in the same manner as an apprenticeship program with any exceptions authorized by the WSATC and as further described in WAC 296-05-311.

Notice: Where not otherwise specified, notice means posted in United States mail to the last known address of the person to be notified. Notice may be given by telefacsimile where copies are mailed simultaneously or by a commercial parcel delivery company.

Petitions, requests, and correspondence: Any written business brought before the WSATC (examples may include: (1) Requests for new committees; (2) Requests for revisions to the standards; and (3) Appeals).

Probation: (1) Initial: The period following the apprentice's acceptance into the program which is limited in time by these rules and during which the apprentice's appeal rights are impaired. (2) Disciplinary: A time assessed when the apprentice's progress is not satisfactory. During this time the program sponsor may withhold periodic wage advancements, suspend or cancel the apprenticeship agreement, or take further disciplinary action. A disciplinary probation may only be assessed after the initial probation is completed. During the disciplinary probation, the apprentice has the right to file an appeal of the committee's action with the WSATC (as described in WAC 296-05-009).

RCW: The Revised Code of Washington.

Registration: Maintaining the records of apprenticeship and training agreements and of training standards.

Regular quarterly meeting: A public meeting held quarterly by the WSATC as described in WAC 296-05-200.

Related/supplemental instruction: Is instruction approved by the program sponsor and taught by an instructor approved by the program sponsor. Instructors must be competent in his/her trade or occupation. A sponsor must review related/supplemental instruction annually to insure that it is relevant and current.

Relevant instruction: Is related/supplemental instructional content that is directly required in and applicable to the performance of the apprentice's work. Relevant does not mean academic course content taught by a solely academically qualified instructor except for courses approved by the committee or specified by state law.

Secretary: The individual appointed by the director of the department according to RCW 49.04.030.

Special meeting: A public meeting of the council as described in WAC 296-05-203.

Sponsor: Any person, firm, association, committee, or organization operating an apprenticeship and training program and in whose name the program is registered or is to be registered.

Standards: Is a written agreement containing specific provisions for operation and administration of the apprenticeship program and all terms and conditions for the qualifications, recruitment, selection, employment, and training of apprentices, as further defined in WAC 296-05-316.

Supervision: The necessary education, assistance, and control provided by a journey-level employee that is on the same job site at least seventy-five percent of each working day, unless otherwise approved by the WSATC.

Supervisor: The individual appointed by the director of the department according to RCW 49.04.030 who acts as the secretary of the WSATC. Where these rules indicate a duty of the supervisor or secretary of the WSATC, the supervisor may designate a department of labor and industries' employee

(2007 Ed.)

to assist in the performance of those duties subject to the supervisor's oversight and direction.

Trade: Any apprenticeable occupation defined by the apprenticeship, training, employer and labor services section of the United States Department of Labor and these rules.

Trainee: An individual registered with the supervisor according to WAC 296-05-311.

Training agent: Employer of registered apprentices approved by the program sponsor to furnish on-the-job training to satisfy the approved apprenticeship program standards who agrees to employ registered apprentices in that work process. The training agent shall use only registered apprentices to perform the work processes of the approved program standards.

Training agreement: A written agreement between a training agent and a program sponsor that contains the provisions of the apprenticeship program applicable to the training agent and the duties of the training agent in providing on-the-job training.

WAC: The Washington Administrative Code.

WSATC: The Washington state apprenticeship and training council.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-003, filed 10/31/01, effective 1/17/02.]

WAC 296-05-005 Rule development. (1) In developing and adopting rules, the WSATC:

(a) Seeks the cooperation and assistance of all interested persons, organizations, and agencies affected by its rules.

(b) Promotes the operation of apprenticeship programs to satisfy the needs of employers and employees for high quality training.

(c) Recognizes that rapid economic and technological changes require that workers must be trained to meet the demands of a changing marketplace.

(d) Recognizes employers will benefit if graduates of state approved apprenticeship programs are skilled workers trained to industry wide standards rather than the exclusive standards of an individual employer or group of employers.

(e) Acknowledges that approved apprenticeship programs should be organized and administered to assure the maximum protection of apprentices' rights.

(f) Recognizes that the number of apprentices in a trade or group of trades in any geographic area must be sufficient to meet the needs of all employers and not be so large as to create an oversupply of apprentices.

(g) Promotes comprehensive training and a variety of work experiences relevant to the occupations. Seeks to assure that during the approval process all apprenticeship standards are open to all employers on an equal and nondiscriminatory basis.

(h) Recognizes that quality training, equal treatment of apprentices, and efficient delivery of apprenticeship training are best provided by registered apprenticeship programs.

(2) All amendments to this chapter must be developed and adopted according to the provisions of chapter 49.04 RCW, Apprenticeship Act; chapter 34.05 RCW, Administrative Procedure Act; and Executive Order 97-02. All proposed amendments to these rules must be approved by a two-thirds majority vote of regular WSATC members before they are published for public hearing. All WSATC members, the

apprenticeship supervisor, committees and any other interested parties must be promptly notified, in writing, of any proposed rule amendments, public hearings on proposed rule amendments and new rule adoptions.

(3) The specific procedure(s) and form(s) for petitions requesting the making, amendment, or repeal of a rule are in chapter 34.05 RCW, as are the specific procedure and form for requesting declaratory rulings.

(4) Such petitions and requests must be addressed to:

The Washington State Apprenticeship and Training Council
Attention: Supervisor of Apprenticeship and Training
Department of Labor and Industries
Post Office Box 44530
Olympia, Washington 98504-4530

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-005, filed 10/31/01, effective 1/17/02.]

WAC 296-05-007 Rules of procedure. All hearings and adjudication, under chapter 49.04 RCW and these rules, shall be conducted according to chapter 34.05 RCW, the Administrative Procedure Act and chapter 10-08 WAC, Model Rules of Procedure. The chair (or designee) is the presiding officer for adjudicative proceedings, held before the WSATC. The WSATC may either adjudicate matter(s) itself, or refer matter(s) to the office of administrative hearings for initial adjudication.

If the initial adjudication is before the WSATC, the WSATC will enter a final order. If the initial adjudication has been held at the office of administrative hearings, the administrative hearings judge shall issue an initial order. The WSATC, upon review of the initial order shall enter the final order. An initial order shall become final without further WSATC action five working days after the next regular quarterly meeting unless:

(1) The WSATC upon its own motion determines that the initial order should be reviewed; or

(2) A party to the proceedings files a petition for review of the initial order.

The WSATC may appoint a person to review the initial order and prepare and enter the final WSATC order.

[Statutory Authority: RCW 49.04.010. 04-10-032, § 296-05-007, filed 4/28/04, effective 6/1/04. WAC 296-05-008 Process for objections to apprenticeship program standards. (1) Objections to apprenticeship program standards shall be submitted to the department with a copy to the program sponsor for WSATC consideration twenty days prior to the regular quarterly WSATC meeting on a form provided by the department and approved by the WSATC.

(2) The department shall notify the program sponsor no more than two business days after the department receives the objection.

(3) In accordance with WAC 296-05-007, the WSATC may either adjudicate matter(s) itself or refer matter(s) to the office of administrative hearings for initial adjudication.

(a) If the WSATC decides to adjudicate all or part of the objections to the apprenticeship program standards, the indi-

vidual(s) submitting the objections shall present the objections at the regular quarterly WSATC meeting or at the special WSATC meeting convened for purposes of hearing the objections. The department shall notify the competitor making the objections and the program sponsor that the objection is on the agenda for consideration and give their recommendation ten days prior to the WSATC meeting.

(b) If the WSATC decides to refer all or part of the objections to the office of administrative hearings, the WSATC shall identify the specific matters that the WSATC is requesting the office of administrative hearings to provide findings and conclusions for the initial order.

(4) The department may attempt to facilitate a resolution to any objections during the process identified in this section.

Note: Per WAC 296-05-207, the approval or disapproval of committee programs, plant programs or amendments to those programs can only occur at regular quarterly meetings.

[Statutory Authority: RCW 49.04.010. 04-10-032, § 296-05-008, filed 4/28/04, effective 6/1/04.]

WAC 296-05-009 Complaint review procedures. If a local committee or other organization administering the agreement cannot satisfactorily resolve a complaint, any apprentice who has completed his/her initial probationary period may submit the complaint to the apprenticeship program for resolution. Complaints that involve matters covered by a collective bargaining agreement are not subject to the complaint review procedures in this section. The investigation or review of any controversy by the supervisor or the WSATC will not affect any action taken or decision made by a committee or other organization until a final decision resolving the matter is issued.

(1) Within thirty days of the action leading to the complaint, the apprentice must request the local committee or other organization to reconsider action.

(2) The local committee or other organization must, within thirty days of the apprentice's request, provide written notification to the apprentice of its decision on the request for reconsideration. This notification shall be considered the final action of the committee.

(3) If the apprentice chooses to pursue the complaint further, the apprentice must submit a written complaint describing the controversy to the supervisor of the apprenticeship division within thirty days of the final action taken on the matter by the local committee or other organization. The written complaint must be specific and include all relevant facts and circumstances contributing to the complaint. Any documents or correspondence relevant to the complaint must be attached to the complaint. The apprentice must send a copy of the complaint to the interested local committee or other organization.

(4) The supervisor must investigate complaints received from an apprentice. The supervisor must complete the investigation within thirty working days. During the investigation, the supervisor must attempt to effect a settlement between the parties. During the investigation the apprentice and the committee or other organization must fully cooperate with the supervisor by providing any relevant information or documents requested. The supervisor may delegate the investigation to any employee in the apprenticeship division. If the controversy is not settled during the investigation, the super-

visor must issue a written decision resolving the controversy when the investigation is concluded.

(5) If the apprentice, committee or other organization is dissatisfied with the decision of the supervisor, they may request the WSATC to review the decision. The request must be in writing and made within thirty days of the supervisor's decision. It must specify the reasons supporting the request. The party requesting review must provide a copy of the request to the other parties involved in the controversy. The WSATC must conduct an informal hearing to consider the request for review of the supervisor's decision. Unless special circumstances dictate, the hearing must be held in conjunction with the regular quarterly meeting.

At the hearing, the WSATC must review the supervisor's decision and all records of the investigation. The WSATC may also accept testimony or documents from any person, including the supervisor and the supervisor's staff, who has knowledge relating to the controversy. Parties at the informal hearing may be represented by counsel and may, at the WSATC's discretion, present argument concerning the controversy. The WSATC must not apply formal rules of evidence.

(6) Within thirty days after the hearing, the WSATC must issue a written decision resolving the controversy. The WSATC's decision may be to affirm the decision of the supervisor. In that case, the supervisor's decision becomes the decision of the WSATC. All parties to the informal hearing must be sent a copy of the WSATC's decision. The chair may sign the decision for the WSATC.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-009, filed 10/31/01, effective 1/17/02.]

WAC 296-05-011 Compliance reviews. (1) The purpose of a compliance review is to systematically and periodically review apprenticeship programs to ensure that the sponsor is complying with the approved program standards and these rules. Compliance reviews consist of a comprehensive analysis and evaluations of each aspect of the apprenticeship program. They must include on-site investigations and audits.

(2) A compliance review may be required:

(a) For all existing programs on a regular and comprehensive basis.

(b) When the WSATC receives a complaint, which has not been referred to a private review body. (See WAC 296-05-009.)

(c) When a sponsor seeks to reregister a program.

(d) When a sponsor seeks to register a new program.

(3) If a compliance review indicates that the sponsor is not operating as required by these rules, the supervisor must notify the sponsor in writing of the results of the review. The supervisor must:

(a) Make a reasonable effort to secure voluntary compliance on the part of the program sponsor within a reasonable time before penalizing as authorized in WAC 296-05-013.

(b) Provide recommendations to the sponsor to assist in achieving compliance.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-011, filed 10/31/01, effective 1/17/02.]

(2007 Ed.)

WAC 296-05-013 Sanctions for noncompliance. The WSATC is responsible to take the necessary action to bring a noncomplying program into compliance with these rules.

When the apprenticeship supervisor, based upon a compliance review or other reason, concludes that an apprenticeship program is not in compliance with the rules of this chapter and that the sponsor will not take voluntary corrective action, the WSATC must:

(1) Institute proceedings to withdraw the program registration;

(2) Refer the matter to the equal employment opportunity commission;

(3) Refer the matter to the attorney general with recommendations for the institution of a court action under Title VII of the Civil Rights Act of 1964, as amended; or

(4) Refer the matter to the attorney general for other court action as authorized by law.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-013, filed 10/31/01, effective 1/17/02.]

PART A—WSATC MEMBERS—COMPOSITION, OFFICERS, AND DUTIES

WAC 296-05-100 WSATC composition. (1) The director of the department appoints three voting representatives each from employer and employee organizations, respectively. Each member shall be appointed for a three-year term.

(2) The governor shall appoint, subject to confirmation by the senate, a voting public member for a three-year term.

(3) The WSATC may also include ex officio members. These members have the right to participate in the discussion of any matter before the council but they may not vote.

(4) An appointed member shall remain on the council until replaced by a qualified successor. When a vacancy does occur, it shall be filled for the remaining portion of the vacated term.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-100, filed 10/31/01, effective 1/17/02.]

WAC 296-05-103 Officers. (1) To carry out the business of the WSATC and to conduct business efficiently the WSATC has three officers:

- Chair;
- Vice-chair; and
- Secretary.

(2) The chair and vice-chair shall be elected by majority vote of the WSATC members present. This election will take place in odd-numbered years at the April regular quarterly meeting. They shall hold office for a term of two years and until the successor(s) are elected, or until death, resignation, or incapacitation. The supervisor of apprenticeship shall be the secretary of the WSATC.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-103, filed 10/31/01, effective 1/17/02.]

WAC 296-05-105 Officer duties. (1) The chair shall preside over all meetings, conducting them in accordance with *Robert's Rules of Order* as modified by these rules and regulations. The chair may vote in all matters before the WSATC as a regular member and may participate in discus-

sion of all matters before the WSATC. The chair may also have other powers and duties that are provided in these rules; and are usual or necessary with the office of the chair; and as provided in *Robert's Rules of Order*.

(2) The vice-chair shall preside over all WSATC meetings in the absence of the chair. When presiding, the vice-chair shall have all of the powers and duties of the chair.

(3) The secretary, with the assistance of a recording secretary, must take and keep minutes of all special and regular meetings on file in the supervisor's office. The secretary must forward copies of minutes of all meetings to all regular and ex officio members of the WSATC. The secretary must also make copies of the minutes of all meetings available to the public upon written request. The secretary may also have other powers and duties that are provided in these rules or are usual or customary to the office of secretary; and as provided in *Robert's Rules of Order*.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-105, filed 10/31/01, effective 1/17/02.]

WAC 296-05-107 Additional duties for the supervisor-administrator of WSATC. (1) In addition to being the council secretary, the apprenticeship supervisor (supervisor) is the WSATC administrator. As WSATC administrator, the supervisor must:

(a) Perform the duties listed in RCW 49.04.030;

(b) Register all apprenticeship agreements that comply with the rules in this chapter;

(c) Review apprenticeship programs and recommend cancellation of any committee program, or plant program previously registered which is not operated in conformity with its apprenticeship standards; and

(d) Receive all documents concerning apprenticeship or training agreements (including revisions to) or any other matters affecting apprenticeship or training.

All written correspondence to the supervisor should be addressed to:

Supervisor of Apprenticeship and Training
Department of Labor and Industries
Apprenticeship Section
P.O. Box 44530
Olympia, Washington 98504-4530

(2) The supervisor and the supervisor's staff:

(a) May be consulted on any matters concerning apprenticeship and training and will provide on request, any information concerning apprenticeship and training available to them.

(b) Will conduct systematic reviews of the operation of all programs and investigate any discrepancies between the actual and required operations of any program. The supervisor will notify the noncompliant committee of any violation.

(c) May recommend sanctions including cancellation of a program not in compliance with its approved program standards.

(d) Assists in the resolution of any complaints against committees or other organizations administering apprenticeship agreements, which have been filed with the WSATC by apprentice(s) who have completed his/her initial probationary period.

(e) Must investigate any discrepancies of all complaints as specified in WAC 296-05-009.

(f) Conducts compliance reviews as specified in WAC 296-05-011.

WAC 296-05-109 Merit awards. The WSATC may issue awards when appropriate.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-109, filed 10/31/01, effective 1/17/02.]

PART B—WSATC MEETINGS—TYPES, PROCEDURES, AND CONDUCT

WAC 296-05-200 Regular meetings. (1) Each year, regular meetings of the WSATC shall be convened on the third Thursday of January, April, July, and October. These regular quarterly meetings shall be held at locations within the state of Washington. All meetings are open to the general public.

(2) Notice of each regular quarterly meeting shall be given to all:

- WSATC members;
- Ex officio members; and
- Approved program sponsors.

In addition, notices of meetings may be sent to all persons, organizations, agencies, or interested parties whose presence is desired and to any newspaper, news service, television, radio station, or other interested parties who have requested notices of WSATC meetings. The supervisor must distribute the notice of the regular meeting at least thirty days prior to the meeting date.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-200, filed 10/31/01, effective 1/17/02.]

WAC 296-05-203 Special meetings. (1) Special meetings of the WSATC may be called at the request of the chair or by a majority of the WSATC members. To call a special meeting, a written notice of the meeting must be personally delivered or mailed to:

- Each member of the WSATC;
- All approved program sponsors; and
- Each general circulation newspaper, television or radio station which has on file with the WSATC or the supervisor a written request to be notified of special meetings.

In addition, notices of meetings may be sent to all persons, organizations, agencies, or interested parties whose presence is desired.

(2) To be valid, the written notice must list the date, time and location of the meeting and specify the business to be transacted by the WSATC. The WSATC cannot take final action on any matter that is not specified in the written notice. Special meetings must be open to the general public and adhere to the same open meeting requirements that apply to the regular quarterly WSATC meetings.

(3) Notices of special meetings must be delivered personally or by mail at least twenty-four hours before the specified time of the meeting.

(4) The exception is when a special meeting is called to consider rule changes according to chapter 34.05 RCW. In

this case, the notice of the special meeting must be delivered at least twenty days before the time specified in the notice.

(5) If the notice requirements in this section are not followed, any action taken by the WSATC at the special meeting will be null and void. However, the notice requirements can be waived if each regular WSATC member signs a written waiver of notice, at or prior to the meeting, and files it with the supervisor. With this filing, the notice shall be considered waived by any WSATC member present when the meeting convenes. Rule changes may not be made at special meetings where the notice requirements have been waived unless the requirements of chapter 34.05 RCW have been satisfied.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-203, filed 10/31/01, effective 1/17/02.]

WAC 296-05-205 Petitions, requests, and correspondence submitted to the WSATC. (1) For the WSATC to act upon petitions or requests at a regular quarterly meeting, the petitions or requests must be submitted in writing to the supervisor at least forty-five days prior to the date of the regular quarterly meeting. Any petitions or requests not submitted forty-five days prior to a quarterly meeting must be deferred to the next regular quarterly meeting. If a petition or request is deferred, the supervisor must notify the petitioner.

(2) Generally, correspondence not related to apprenticeship and training agreements and meetings, petitions and requests, must be submitted in writing to the supervisor of apprenticeship at least fifteen working days before the quarterly meeting at which the WSATC's consideration is requested. However, if the WSATC determines that the correspondence is crucial to any deliberations regarding approval or disapproval of an apprenticeship agreement, the supervisor may waive this fifteen-day requirement.

(3) Noncrucial correspondence submitted less than fifteen working days before the quarterly meeting must be considered by the WSATC at the next quarterly meeting.

(4) When an apprenticeship committee petitions the council or the supervisor, only the signature of the elected chair and secretary of the committee shall be accepted as a valid signature unless the petitioning committee has asked the council to recognize and accept the signature of another person. A petition requesting the recognition of a signature other than that of the elected chair and secretary must be signed by a quorum of the members from the petitioning committee.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-205, filed 10/31/01, effective 1/17/02.]

WAC 296-05-207 Other regulations that apply to council meeting conduct. (1) All council meetings must be open to the general public. Members of the public cannot be required to register his/her name, give any information, or fulfill any condition prior to attending council meetings. All council meetings must be conducted according to the provisions of chapter 42.30 RCW, the Open Public Meetings Act and chapter 34.05 RCW, the Administrative Procedure Act. The following WSATC activities must take place in open public meetings:

- All transactions of official business;
- All commitments or promises;

(2007 Ed.)

- All collective discussions;
- All collective decisions; and
- All council actions.

(2) The approval or disapproval of committee programs, plant programs, or amendments to those programs can only occur at regular quarterly meetings.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-207, filed 10/31/01, effective 1/17/02.]

WAC 296-05-209 Voting. (1) A quorum is two-thirds of the WSATC members entitled to vote.

(2) All council members appointed by either the director or the governor are voting members of the council. Ex officio members may not vote on any issue.

(3) To resolve tie votes, the chair shall establish a standing tie-breaker committee. The committee shall be comprised of an employer representative, an employee representative, and the public member on the WSATC. In case of a tie vote on any proposed standards brought before the WSATC, the tie-breaker committee shall meet or confer, review the record, and render a decision within thirty days. The supervisor or a designee of the supervisor shall act as secretary to the committee and furnish all information necessary for a decision.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-209, filed 10/31/01, effective 1/17/02.]

WAC 296-05-211 Rules of order. *Robert's Rules of Order* shall prevail at all meetings unless otherwise provided for by these rules.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-211, filed 10/31/01, effective 1/17/02.]

WAC 296-05-213 Retroactivity. The WSATC may make any action or decision which it takes retroactive to the date of the previous business session.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-213, filed 10/31/01, effective 1/17/02.]

PART C—APPRENTICESHIP PROGRAMS— COMMITTEE, AGREEMENTS, TYPES, AND RECOGNITION

WAC 296-05-300 Apprenticeship and training programs—Approval. The WSATC is the body responsible for matters concerning apprenticeship and training in the state of Washington. The principal function of the WSATC is to approve, register, and regulate apprenticeship and training agreements. Persons or organizations desiring to institute an apprenticeship or training program must follow these steps:

(1) Organize an apprenticeship and training committee according to WAC 296-05-303 and file affidavits with the WSATC requesting that the committee be recognized.

(2) Once the committee is recognized, it must propose standards conforming to these rules and to chapter 49.04 RCW. In addition, the standards must include the composition of the committee and general rules that it will follow in administering the program. (The apprenticeship supervisor and department apprenticeship coordinators are available to give assistance drafting standards.)

[Title 296 WAC—p. 147]

(3) These standards must be presented to the supervisor at least forty-five days before the regular quarterly meeting at which the WSATC is requested to consider such proposed standards.

(4) At the regular quarterly meeting, the proposed standards will be considered by the WSATC. The WSATC will:

- (a) Approve;
- (b) Approve provided the sponsor accepts the changes recommended by the WSATC; or
- (c) Disapprove.

At the regular quarterly meeting, the WSATC will allow changes to correct clerical errors. The addition of standard language will be allowed if authorized representatives of the sponsor are present and authorized to accept changes. At the regular quarterly meeting, the WSATC will not accept changes to the format, language, or provisions of the submitted program standards which are not reasonably consistent with previously approved program standards.

If the WSATC disapproves the standards, it shall direct the department to inform the sponsor in writing the reason for disapproval.

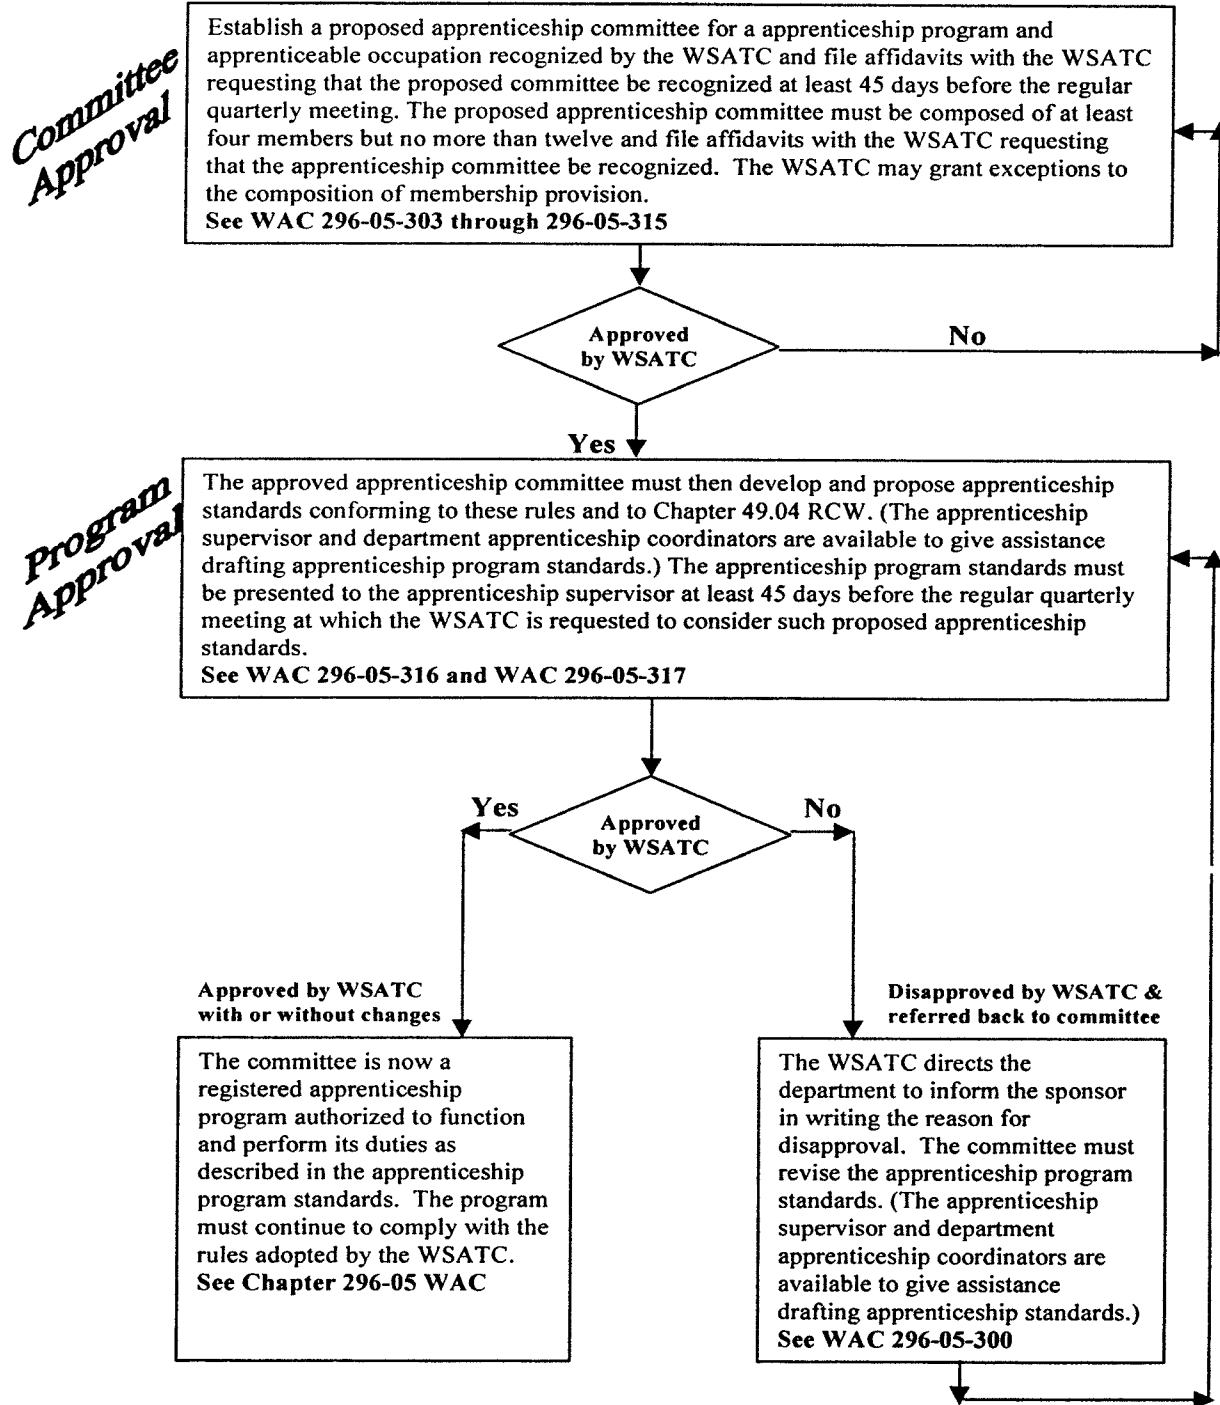

(5) Once the WSATC approves the program standards the committee is authorized to function and perform its duties as described in WAC 296-05-316.

(6) If a competitor objects to the proposed standards or proposed amendment(s) to existing standards, the WSATC may either adjudicate the objection(s) with the proposed standards or refer the objection(s) with the proposed standards or proposed amendment(s) to existing standards to an administrative hearing as described in WAC 296-05-007. For purposes of this subsection "competitor" means a competing apprenticeship program in a similar or subset of the trade, craft, or occupation within the geographic area served.

[Statutory Authority: RCW 49.04.010 and 2001 c 204 (SHB 1234). 02-10-083, § 296-05-300, filed 4/29/02, effective 6/1/02. Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-300, filed 10/31/01, effective 1/17/02.]

WAC 296-05-302 Apprenticeship committee/program approval process.

Apprenticeship Committee/Program Approval Process

Note: This flowchart represents the general process for apprenticeship committee/program approval and does not include exceptions and variations.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-302, filed 10/31/01, effective 1/17/02.]

WAC 296-05-303 Apprenticeship committees—Duties and responsibilities. (1) Apprenticeship committees are appointed according to the provisions of RCW 49.04.040 and are composed of at least four members but no more than

twelve. However, the WSATC may grant exceptions to this provision.

(2) Chapter 49.04 RCW, these rules, and the approved standards under which a committee operates define the duties

of an apprenticeship committee. Committees shall function, administer or relinquish authority only with the consent of the WSATC.

(3) A committee is responsible for:

- The day-to-day operations of the apprenticeship and training program;
- Operating the program according to WSATC approved standards;
- Accepting or rejecting applicants for apprenticeship or training;
- Registering approved applicants with the supervisor;
- Removing apprentices from the program as provided by the approved program standards;
- Informing the supervisor of any matters that affect the standing of individuals as apprentices; and
- Entering into agreements with other apprenticeship committees for the use of apprentices by training agents that are working outside their approved geographic area served.

The WSATC will only recognize apprentices registered with the supervisor.

(4) Committees approved by the WSATC must offer training opportunities on an equal basis to all employers and apprentices including all rights, appeals, and services available in the existing apprenticeship program. All existing committees that represent multiple employer or employer associations, except for committees that represent plant programs, are expected to provide access to apprenticeship and training opportunities to employers not currently participating in the program. Those opportunities must:

- Provide training at a cost equivalent to that incurred by currently participating employers and apprentices;
- Grant equal treatment and opportunity for all apprentices;
- Offer reasonable working and training conditions and apply those conditions to all apprentices uniformly and equally;
- Not require an employer to sign a collective bargaining agreement as a condition of participation in an apprenticeship program;
- Require all employers requesting "approved training agent" status to comply with an WSATC approved agreement and all federal and state apprenticeship rules and the appropriate apprenticeship standards. (The training agent shall employ only registered apprentices when training for that occupation or trade);
- Require sponsors, who approve "approved training agent" agreements, to furnish the department with a copy of the agreement and/or the list of approved training agents within thirty days of committee approval; and
- Require sponsors who rescind "approved training agent" agreements and/or the list of approved training agents to notify the department that they have done so within thirty days of said action.

(5) Apprenticeship program sponsors may send registered apprentices to limited training agents.

This shall be called a "limited training agent agreement," which is when an employer that is not currently a registered training agent to a set of apprenticeship standards, enters into a single public works project agreement with the program sponsor for the purposes of apprenticeship utilization. The limited training agent agreement must specify that:

- The program sponsor must ensure that all program requirements are being followed.
- Apprenticeship utilization requirements must be in the public works contract.
- The agreement is for a specific trade(s) or occupation(s).

The limited training agent must sign the training agent form.

This limited training agent agreement does not obligate the employer to use registered apprentices in any other type of work or trade or occupation other than the one for which the limited training agreement is entered into.

This is a pilot program lasting for two years (July 2004 - July 2006) in Spokane County only.

The department must conduct a study and provide a report back to the Washington state apprenticeship and training council on the effect of the rule. This report should contain vital information including the numbers of apprenticeship hours generated, any adverse impacts on apprenticeship programs and apprentices, any compliance problems, any health and safety problems, or other considerations requested by the council at a later date. This report is due to the WSATC by March 15, 2006.

(6) If an existing committee fails to or refuses to offer apprenticeship and training opportunities to all employers, the WSATC may take action to remove the restrictions to access in order to comply with the intent of chapter 49.04 RCW and these rules. Action may include, but is not limited to, the decertification of the existing committee and recognition of a new committee.

[Statutory Authority: RCW 49.04.010, 05-04-093, § 296-05-303, filed 2/2/05, effective 4/1/05. Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW, 01-22-055, § 296-05-303, filed 10/31/01, effective 1/17/02.]

WAC 296-05-305 Apprenticeable occupations. An apprenticeable occupation is a skilled trade which possesses all of the following characteristics:

- (1) It is customarily learned in a practical way through related instruction and on-the-job supervised training.
- (2) It is clearly identified and commonly recognized throughout an industry.
- (3) It is not part of an occupation previously recognized by the registering agency as apprenticeable, unless such part is practiced industry wide as an identifiable and distinct trade.
- (4) It involves manual, mechanical, or technical skills and knowledge which require a minimum of two thousand hours of on-the-job work experience.
- (5) It requires a minimum of one hundred forty-four hours of related instruction per year to supplement on-the-job work experience.
- (6) It involves skill sufficient to establish normal career sustaining employment for the length of the apprentice's work life. It entails technical and theoretical considerations which are susceptible to instruction within the period defined in the program standards.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW, 01-22-055, § 296-05-305, filed 10/31/01, effective 1/17/02.]

WAC 296-05-307 Types of apprenticeship agreements recognized by the WSATC. The WSATC acting according to RCW 49.04.060, recognizes the following types of written apprenticeship agreements (statements) that describe the apprenticeship training conditions:

- (1) Agreements between an association of employers and an organization of employees.
- (2) An agreement between an employer and an employee organization.
- (3) An employer's statement when there is no bona fide employee organization in the plant affected by the agreement.
- (4) An agreement between an apprenticeship program and an individual apprentice.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-307, filed 10/31/01, effective 1/17/02.]

WAC 296-05-309 Apprenticeship programs approved by the WSATC. The following apprenticeship programs may be approved by the WSATC. All the following programs with the exception of individual waiver programs must be administered by a committee.

(1) Group-joint, or area joint. A program where there is a labor organization. These programs are jointly sponsored by a group of employers and a labor organization. They are administered by employer and employee representatives from an apprenticeship and training committee composed equally from management and labor.

(2) Individual-joint. A program where there is a labor organization. These programs are jointly sponsored by an individual employer and a labor organization. They are administered by employer and employee representatives from an apprenticeship and training committee composed equally from management and labor.

(3) Group nonjoint, or area group. A program where there is no labor organization. These programs are sponsored by an employer association(s) administered by an apprenticeship committee.

(4) Individual nonjoint. A program where there is no labor organization. These programs are sponsored and administered by an individual employer.

(5) Group waiver. These programs involve an employer association(s) and a labor organization. Either the employer group or the labor organization voluntarily waives participation in the program by notifying the other party in writing.

(6) Individual waiver. These programs involve an individual person, company, plant, firm, and a labor organization. Either management or labor voluntarily waives participation by notifying the other party in writing.

(7) Plant. A program for a single physical location or a group of physical locations owned by the sponsor. The WSATC, based on the authority in RCW 49.04.040, assumes jurisdiction and serves as the committee. The apprenticeship agreement must specify the number of required hours for completion of the apprenticeship. The hours specified must represent at least two thousand hours of reasonably continuous employment. That agreement must conform to the applicable provisions of chapter 49.04 RCW and these rules.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-309, filed 10/31/01, effective 1/17/02.]

(2007 Ed.)

WAC 296-05-311 On-the-job training programs. On-the-job training programs may be set up in the same manner as apprenticeship programs with any exceptions authorized by the WSATC. However, no on-the-job training program must be established or authorized where there is a parallel apprenticeship program in existence. An on-the-job training program shall be any program that requires two thousand or less hours of employment for completion. All of the rules in this chapter that apply to apprenticeship agreements and programs also apply to on-the-job training programs except on-the-job training programs will be approved by the supervisor subject to the review of the WSATC.

A sample standard for an on-the-job training program is available from the supervisor.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-311, filed 10/31/01, effective 1/17/02.]

WAC 296-05-313 Apprenticeship committees—Composition. (1) Apprenticeship committees must be composed of an equal number of management and nonmanagement representatives.

(2) For apprenticeship committees that represent one occupation, at least fifty percent of the members of committees must be occupationally qualified by education and experience in the specific occupation for which the committee is responsible. The committee must be able to verify the occupational qualifications of the members.

(3) For apprenticeship committees that represent multiple occupations, the committee members must either:

- Be occupationally qualified by education and experience in the specific occupations for which the committee is responsible and must be able to verify the occupational qualifications of the members; or
- Be known to represent the interests of the multiple occupations served.

(4) All committee members must be knowledgeable in the process of apprenticeship and/or the application of chapter 49.04 RCW and these rules.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-313, filed 10/31/01, effective 1/17/02.]

WAC 296-05-315 Nonjoint and waiver committees—Additional requirements. (1) The WSATC shall only recognize nonjoint and waiver standards for a specific occupation or directly related occupations.

(2) When multiple related occupations are approved on a single standard, each occupation shall be considered as an individual standard.

(3) Unrelated occupations shall be submitted under separate standards.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-315, filed 10/31/01, effective 1/17/02.]

WAC 296-05-316 Apprenticeship agreements—Standards requirements. The WSATC shall have the authority to develop, administer, and enforce program standards for the operation and success of an apprenticeship and training program.

The sponsor's proposed program standards must include a list of duties and responsibilities of the program sponsor

[Title 296 WAC—p. 151]

reasonably consistent with other approved program standards.

All apprenticeship agreements must comply with the approved program standards, chapter 49.04 RCW, and these rules. The standards of apprenticeship agreements must include the following:

(1) A statement of the trade or craft to be taught and the required hours for completion of apprenticeship which must not be less than two thousand hours of reasonably continuous employment.

(2) A statement identifying the program sponsor, establishing the apprenticeship committee and enumerating the sponsor's and committee's duties and responsibilities. This statement must include provisions to:

(a) Elect a chair and a secretary from employer and employee representatives of the committee.

EXCEPTION: This provision is not necessary for a plant program.

(b) Convene at least three annual regular meetings of the program sponsor and apprenticeship committee. The meetings shall be at least three times per year, be attended by a quorum of committee members (as defined in the approved program standards), be documented with minutes which must be periodically submitted to the department and made available to the WSATC upon request. Conference call meetings may be conducted in lieu of regular meetings but must not exceed the number of attended meetings and no disciplinary action shall be taken at conference call meetings.

(c) Determine the program sponsor's need for apprentices in the area covered by the apprenticeship standards established under these rules.

The following are some examples of ways the program sponsor can demonstrate that the need for apprentices exists:

- Statistical analysis of workload projections;
- Demographics;
- Information relating to expected workload growth.

(d) Establish minimum standards of education and skilled occupational experience required of apprentices.

(e) Rotate apprentices in the various processes of the skilled occupation to assure a well-rounded, competent worker.

(f) Determine the adequacy of an employer to furnish proper on-the-job training in accordance with the provisions of the approved standards.

EXCEPTION: This does not apply to plant programs.

(g) Recommend competent instructors and related/supplemental instruction in accordance with local vocational requirements.

(h) Recommend a course outline for related/supplemental instruction, as well as coordinate related/supplemental instruction with on-the-job work experience.

(i) Hear and adjust all complaints of violations of apprenticeship agreements.

(j) Adopt, as necessary, program rules to administer the apprenticeship program in compliance with its standards, chapter 49.04 RCW, and these rules.

(k) Periodically review and evaluate apprentices before advancement to the apprentice's next wage progression period.

(l) Maintain apprenticeship records and records of the administrative program as may be required by the WSATC,

chapter 49.04 RCW, and these rules. (See WAC 296-05-318.)

(3) The following Equal Employment Opportunity Pledge:

"The recruitment, selection, employment and training of apprentices during their apprenticeship shall be without discrimination because of race, sex, color, religion, national origin, age, disability or as otherwise specified by law. The sponsor shall take positive action to provide equal opportunity in apprenticeship and will operate the apprenticeship program as required by the rules of the Washington State Apprenticeship and Training Council and Title 29, Part 30 of the Code of Federal Regulations."

(4) When applicable, an affirmative action plan and selection procedures.

(5) A numeric ratio of apprentices to journey-level workers may not exceed one apprentice per journey-level worker. It must be consistent with proper supervision, training, safety, continuity of employment, and applicable provisions in collective bargaining agreement, if any. The ratio must be described in the program standards and shall be specific and clear as to application in terms of job site, work group, department, or plant. An exception to this requirement may be granted by the WSATC.

(6) A statement of the related/supplemental instruction including content, format, hours of study per year (which shall be a minimum of one hundred forty-four hours per year).

(7) An attendance policy which includes a provision that if the apprentice fails to fulfill the related/supplemental instruction obligations, the sponsor may withhold the apprentice's periodic wage advancement, suspend or cancel the apprenticeship agreement. A provision that time spent in related/supplemental instruction classes shall not be considered as hours of work and the apprentice is not paid for the classroom time. A provision that the hours of actual attendance by the apprentice in related supplemental instruction classes must be reported to the department on a quarterly basis for industrial insurance purposes.

(8) A provision to ensure that the sponsor provides for instruction of the apprentice during the apprentice's related/supplemental instruction in safe and healthful work practices in compliance with the Washington Industrial Safety and Health Act, and applicable federal and state regulations.

(9) A provision for a formal agreement between the apprentice and the sponsor and for registering that agreement with the department.

(10) A provision for the timely notice to the department of all requests for disposition or modification of apprenticeship agreements including:

- Certificate of completion;
- Additional credit;
- Suspension;
- Military service;
- Reinstatement;
- Cancellation; and
- Corrections.

(11) A provision for advancing an apprentice's standing based on previous experience in the skilled trade or in some other related capacity.

(12) A provision for the transfer of an apprentice from one training agent to another training agent or the sponsor in order to provide as much as possible, continuous employment and diversity of training experiences for apprentices.

(13) A provision for the amendment of the standards or deregistration of the program. This provision must comply with chapter 49.04 RCW, these rules, and WSATC policies and procedures.

(14) An apprenticeship appeal procedure in compliance with chapters 49.04, 34.05 RCW, and these rules.

(15) A statement of the processes in the trade or craft divisions in which the apprentice is to be taught and the approximate amount of time to be spent at each process.

(16) A statement of the number of hours to be spent by the apprentice in work and the number of hours to be spent in related/supplemental instruction which instruction shall be not less than one hundred forty-four hours per year.

(17) A statement of the minimum qualifications for persons entering the apprenticeship program including the age of the apprentice which may not be less than sixteen years of age. All exceptions to minimum qualifications, if any, must be clearly stated and applied in a nondiscriminatory manner.

(18) Provision that the services of the supervisor and the WSATC may be utilized for consultation regarding the settlement of differences arising out of the apprenticeship agreement where such differences cannot be adjusted locally or as required by the established trade procedure.

(19) Provision that if an individual training agent is unable to fulfill its obligation under the apprenticeship agreement, it will transfer the obligation to the program sponsor.

(20) Such additional standards as may be prescribed in accordance with the provisions of this chapter.

(21) Disciplinary procedures and criteria for apprentices. The procedures may include a committee-imposed disciplinary probation during which the committee may according to expressed criteria:

- Withhold periodic wage advancements;
- Suspend or cancel the apprenticeship agreement;
- Take further disciplinary action; or
- The disciplinary procedures must include a notice to the apprentice that the apprentice has the right to file an appeal, of the committee's action, to the WSATC.

(22) A provision for an initial probation which the WSATC or the supervisor of apprenticeship may terminate an apprenticeship agreement at the written request by any affected party. The initial probation must not exceed twenty percent of the term of apprenticeship unless an exemption has been granted for longer probationary periods as specified by Civil Service or law. The initial probationary period must be expressed in hours of employment. During the initial probationary period, the apprenticeship agreement may be terminated by the sponsor or the apprentice without a hearing or stated cause. An appeal process is available to apprentices who have completed the initial probationary period.

(23) Provisions prohibiting discrimination on the race, sex, color, religion, national origin, age, disability or as otherwise specified by law during all phases of apprenticeship.

(24) Provisions to ensure adequate records of the selection process are kept for a period of at least five years and are available to the WSATC or its representative on request. ("Adequate records" means at least a brief summary of any

interviews and the conclusions reached on each of the specific factors which are part of the total judgment concerning each applicant.)

(25) Provisions to ensure that local committee rules and regulations be consistent with these rules and the applicable apprenticeship agreement.

(26) Provisions to ensure any proposed standards for apprenticeship are reasonably consistent with any standards for apprenticeship already approved by the WSATC for the industry, craft or trade in question taking into account the WSATC's determination of the apprenticeship needs of the trade and geographic area. (Statistical analysis of workload projections, demographics, and information relating to expected workload growth are examples of ways the sponsor may demonstrate that the need for apprentices exists.) The goal is to achieve general statewide uniformity of standards in each industry, trade or craft. Proposed standards for a new program shall be considered consistent if they are equal to or exceed the minimum number of hours approved by the United States Department of Labor for a trade, craft, or occupation. If the United States Department of Labor has not established a minimum number of hours for a trade, craft, or occupation, the WSATC may utilize its discretion to determine the minimum number of hours that must be achieved. In addition, the course content and delivery method must be designed to achieve the same levels of skills as existing standards within the state for that industry, trade, or craft.

(27) A provision to ensure that the progressively increasing wage scales based on specified percentages of journey-level wage, which must be submitted, at least annually, to the WSATC. These may be submitted on a form provided by the department.

A sample apprenticeship agreement and a standard form for program standards are available from the supervisor.

WAC 296-05-318 Records required by the WSATC.

Each sponsor must keep adequate records including, but not limited to, the following:

- (1) Selection of applicants:
 - (a) A summary of the qualifications of each applicant;
 - (b) The basis for evaluation and for selection or rejection of each applicant;
 - (c) The records pertaining to the interviews of applicants; and
 - (d) The original application for each applicant.
- (2) Operation of the apprenticeship program:
 - (a) On-the-job training assignments;
 - (b) Promotion, demotion, layoff, or termination;

(c) Rates of pay or other forms of compensation or conditions of work;

(d) Hours of training provided; and

(e) Any other records needed by WSATC to determine compliance with these rules.

(3) Affirmative action plans:

(a) A copy of the program's complete affirmative action plan. All data and analysis made to determine enrollment deficiencies;

(b) Evidence that affirmative action plans are reviewed on an annual basis; and

(c) Evidence that affirmative action plans, goals and timetables are updated when necessary.

(4) Documentation necessary to establish a sponsor's good faith effort in implementing its affirmative action plan:

(a) Who was contacted;

(b) When the contacts were made;

(c) Where the contacts occurred;

(d) How the contacts were made; and

(e) The content of each contact.

(5) Qualification standards: Evidence that the sponsor's qualification standards meet the requirements of WAC 296-05-316.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-318, filed 10/31/01, effective 1/17/02.]

WAC 296-05-319 Apprenticeship agreement—Individual registration. All individual agreements are subject to the approval of the supervisor and must be registered with the supervisor.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-319, filed 10/31/01, effective 1/17/02.]

WAC 296-05-321 Apprenticeship agreement—Cancellation. The supervisor may recommend that an agreement and program be canceled when a program does not comply with these rules or the program's standards. The procedures for cancellation are as follows:

(1) When any program is found to be operating inconsistently or contrary to these rules or its established program standards, the supervisor must notify the offending committee, person, firm or agency of the violation(s).

(2) The offending committee, firm, or agency has sixty days to correct the violation(s).

(3) If the supervisor does not receive notice, within sixty days, that action has been taken to correct the violations, the supervisor may recommend cancellation of the apprenticeship or training program and agreement to the WSATC.

(4) A recommendation to cancel a program must be in writing, addressed to each WSATC member, and detail the reasons for the recommendation.

(5) A copy of the recommendation, along with a notice that the WSATC will consider the recommendation, must be mailed to the last known address of each member of the committee administering said program, or to those persons responsible for the program.

(6) The WSATC must consider the recommendation at its next regularly scheduled quarterly meeting. However, at least thirty days must pass between the date of the recommendation and the date of the regular quarterly meeting. If thirty

days has not passed, the recommendation must be considered at the subsequent regular quarterly meeting.

(7) At the regular quarterly meeting, all interested person(s) may present evidence or testimony regarding the recommendation.

(8) The WSATC must act on the recommendation by a majority vote of the members present and voting.

(9) Once the WSATC has voted, it must give written notification of its decision to all interested parties along with the reasons supporting it.

(10) The cancellation of any program or agreement automatically cancels any agreement(s) registered under them. However, any organization or firm not responsible for the violations that caused the cancellation may petition the WSATC for approval of the canceled agreement or program as a new program.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-321, filed 10/31/01, effective 1/17/02.]

WAC 296-05-323 Certificate of completion. At the request of the apprenticeship committee, the WSATC shall issue certificates of completion. An affidavit of the secretary, chair, or authorized official of the committee concerned must accompany the request. The affidavit must state that the apprentice has been an active, registered participant of that committee's program for at least six months and has successfully completed his/her apprenticeship. These may be submitted on a form provided by the department.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-323, filed 10/31/01, effective 1/17/02.]

WAC 296-05-325 Union waiver. (1) When apprenticeship programs allowing for the substantive union participation are proposed for registration by an employer or employers' association and the union does participate, the proposal must be accompanied by a written statement from the union supporting the registration. Such a statement is referred to as a "no objection" statement.

(2) When there is no evidence of any union participation, the employer or employers' association must simultaneously furnish to the union that serves as the collective bargaining agent of the employees to be trained, copies of the registration application and the apprenticeship program. Before taking a final action on the application, the supervisor must give the union a reasonable time period to respond. (A "reasonable time" shall be at least thirty days but no more than sixty days.) If the union fails to comment within the allotted time period, it will have waived its right to participate in the program.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-325, filed 10/31/01, effective 1/17/02.]

WAC 296-05-327 Reciprocity. Reciprocity means that the WSATC will recognize and approve out-of-state apprenticeship programs and standards of employers and unions in other than the building and construction industry if certain conditions are met and the out-of-state sponsoring entity requests it. To qualify for reciprocity, the out-of-state sponsoring employers and unions must:

(1) Jointly form a sponsoring entity on a multistate basis;
and

(2) Register with any recognized state apprenticeship agency/council or with the United States Department of Labor, Apprenticeship Training and Employer Labor Services according to the requirements of 29 CFR Part 29, as adopted February 15, 1977.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-327, filed 10/31/01, effective 1/17/02.]

PART D—EQUAL EMPLOYMENT OPPORTUNITY IN APPRENTICESHIP

WAC 296-05-400 Equal employment opportunity plan—Purpose, scope and authority. The WSATC's affirmative action plan is based on the statutory authority granted in chapter 49.04 RCW and according to the provisions of 29 CFR Part 30. The purpose of the affirmative action plan is to promote equality of opportunity in apprenticeship by:

- Prohibiting discrimination in apprenticeship programs based on race, sex, color, religion, national origin, age disability or as otherwise specified by law;
- Requiring equal employment opportunities in apprenticeship programs through affirmative action; and
- Coordinating the WSATC's equal employment opportunity programs with affirmative action policies and procedures with other equal opportunity programs.

The following sections contain the policies and procedures to promote equality of opportunity and equity of treatment of apprentices in apprenticeship programs approved by the WSATC. These policies and procedures are to be used to:

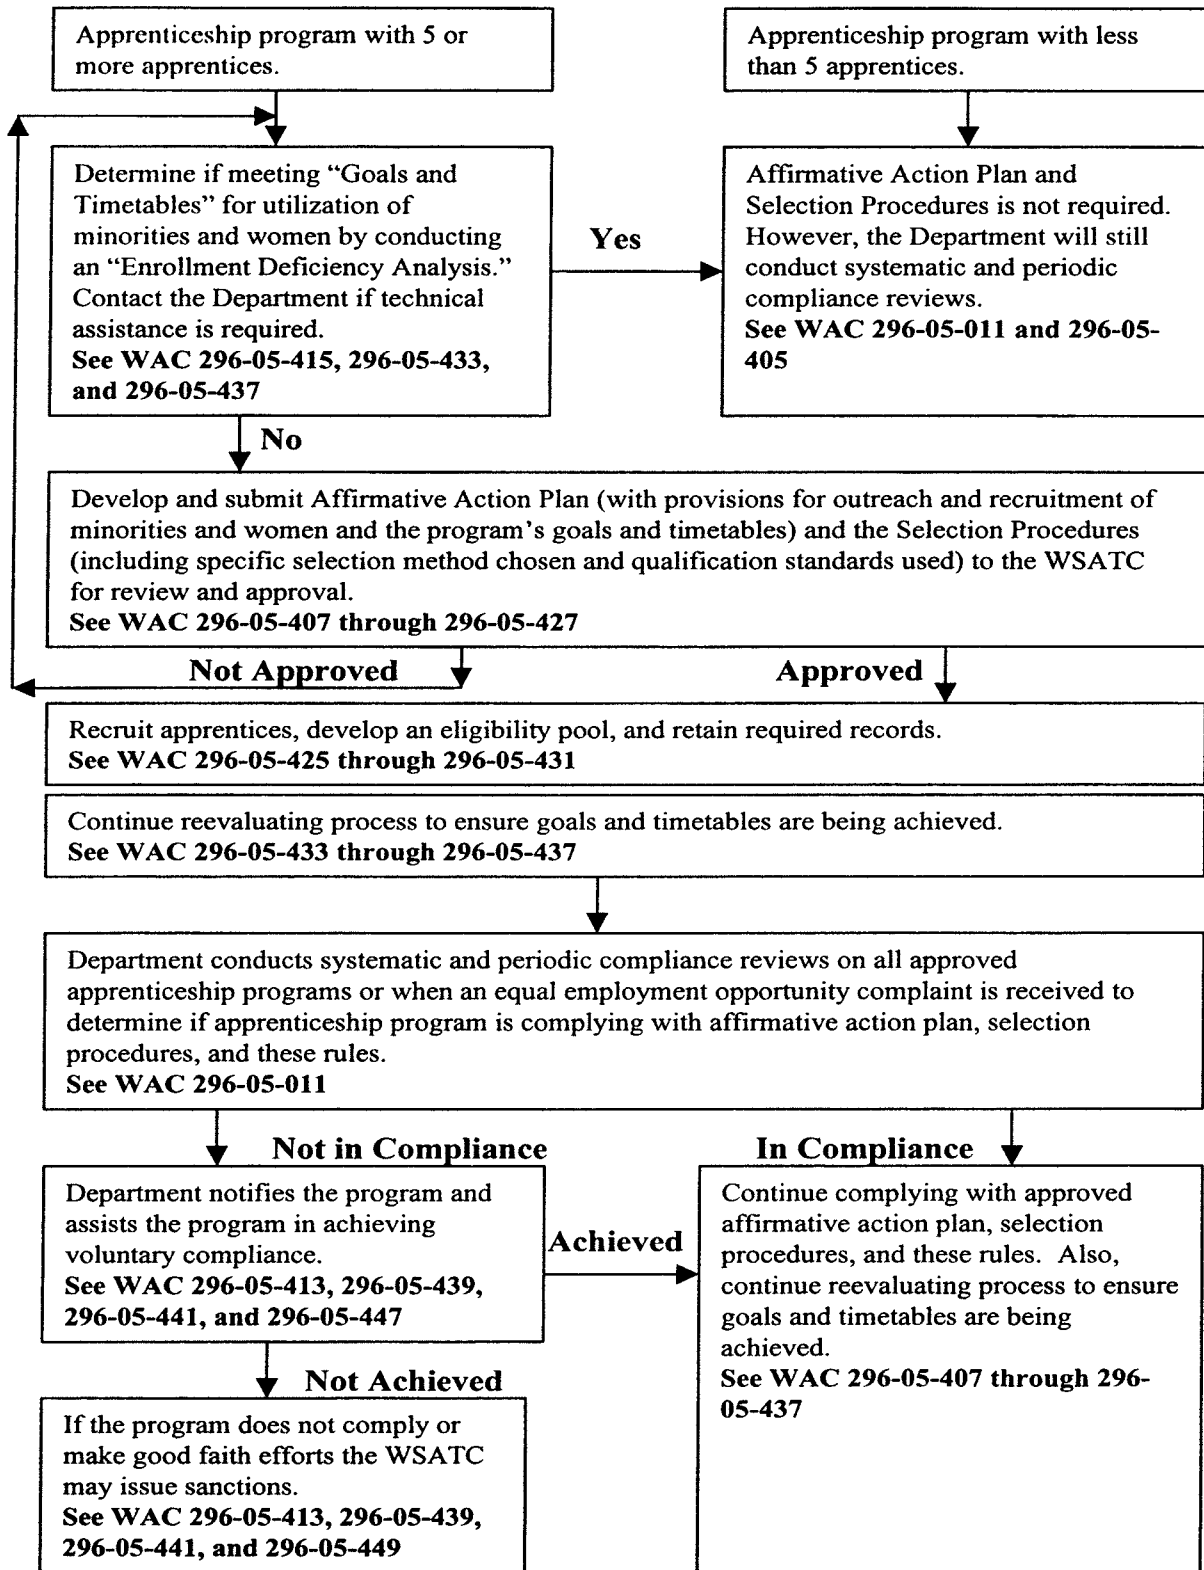

- Recruit and select apprentices;
 - Review and revise apprenticeship programs;
 - Process equal employment opportunity complaints;
 - Take corrective action when appropriate;
 - Deregister noncomplying apprenticeship programs;
- and
- Continue recognition or withdraw recognition of apprenticeship programs.

An affirmative action program must not be used to discriminate against any qualified applicant or apprentice on the basis of race, sex, color, religion, national origin, age, disability or as otherwise specified by law.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-400, filed 10/31/01, effective 1/17/02.]

WAC 296-05-402 Equal employment opportunity process.

Equal Employment Opportunity Process

[Statutory Authority: RCW 49.04.010 and 2001 c 204 (SHB 1234), 02-10-083, § 296-05-402, filed 4/29/02, effective 6/1/02. Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-402, filed 10/31/01, effective 1/17/02.]

WAC 296-05-403 Definitions for Part D. The following definitions are to be used with this part.

Underutilization: Enrolling minorities and women in a ratio not proportionate to the participation of minorities and women that is representative of the geographical region served.

Women or female: As used in Part D of this chapter refers to minority women and nonminority women.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-403, filed 10/31/01, effective 1/17/02.]

WAC 296-05-405 Exceptions to the requirement for adopting an affirmative action plan and a selection procedure. (1) A sponsor is not required to adopt an affirmative action plan or a selection procedure if:

- (a) It has fewer than five apprentices; or
- (b) The program is determined by the WSATC to be in compliance with an approved equal employment opportunity program. An approved program is one which:
 - (i) Provides for selection of apprentices;
 - (ii) Provides for affirmative action in apprenticeship;
 - (iii) Includes goals and timetables for participation of minorities and women in the labor force in apprenticeship which meet or exceed the requirements of WAC 296-05-415; and
 - (iv) Meets the requirements of the following laws:
 - Title VII of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000, et seq.);
 - The regulations implementing 42 U.S.C. 2000, et seq.;
 - Executive Order 11246 as amended; and
 - The regulations (41 CFR Part 60) implementing Executive Order 11246.

(2) A program sponsor must submit satisfactory evidence of its qualification for the exception to the WSATC. If the program sponsor designed the apprenticeship program or the equal opportunity program to circumvent the requirements of these rules, the program will not qualify for an exception.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-405, filed 10/31/01, effective 1/17/02.]

WAC 296-05-407 Apprenticeship program sponsor's obligations. (1) A sponsor of an approved apprenticeship program must:

- (a) Promote equal opportunity in its apprenticeship program; and
- (b) Recruit, select, employ and train apprentices without discrimination based on race, sex, color, religion, national origin, age, disability or as otherwise specified by law.

(2) A sponsor of an approved apprenticeship program with five or more apprentices must uniformly apply all rules related to apprentices. Such rules include, but are not limited to:

- Equality of wages;
- Periodic advancement;
- Promotion;
- Assignment of work;
- Job performance;
- Rotation among all work processes of the trade;
- Imposition of penalties or other disciplinary action; and

(2007 Ed.)

• All other aspects of the apprenticeship program administered by the program sponsors.

(3) Adopt and implement an affirmative action plan and selection procedure as required by chapter 49.04 RCW, 29 CFR Part 30, and these rules unless the approved apprenticeship program qualifies for an exception (see WAC 296-05-405).

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-407, filed 10/31/01, effective 1/17/02.]

WAC 296-05-409 Affirmative action information required by WSATC. In addition to the program standards required by WAC 296-05-316, program sponsors seeking new program registration and approval by the WSATC must submit the following:

- (1) The proposed affirmative action plan;
- (2) The proposed selection procedures; and
- (3) Any other information about the sponsor's equal employment opportunity plan required by the WSATC.

The affirmative action plan and additional information is considered in conjunction with the program standards in the WSATC's decision whether to approve or disapprove an apprenticeship program. If the WSATC disapproves the apprenticeship program, it shall direct the department to inform the sponsor in writing the reason for disapproval.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-409, filed 10/31/01, effective 1/17/02.]

WAC 296-05-411 Affirmative action plan. An approved affirmative action plan must:

- (1) Be in writing.
- (2) Be more than passive nondiscrimination.
- (3) Include procedures, methods and programs to:
 - (a) Clearly identify present and potential minority and female apprentices.
 - (b) Establish affirmative action goals and timetables.
 - (c) Equalize opportunity in apprenticeship to allow full utilization of the work potential of minorities and women.
 - (d) Assure equal opportunity in apprenticeship for all individuals participating in or seeking entrance into Washington's labor force.
- (4) Include provisions for outreach and positive recruitment to increase the participation of minorities and women in apprenticeship programs by expanding and promoting apprenticeship opportunities to minorities and women. (See WAC 296-05-413.)

Nothing in a sponsor's approved affirmative action plan may be used to discriminate against any qualified applicant or apprentice on the basis of race, sex, color, religion, national origin, age, disability or as otherwise specified by law.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-411, filed 10/31/01, effective 1/17/02.]

WAC 296-05-413 Outreach and recruitment requirements—Specific. To gain approval, an affirmative action plan must include the following specific provisions for outreach and recruitment criteria:

- (1) To increase minority and female participation in apprenticeship, program sponsors are expected to strengthen

[Title 296 WAC—p. 157]

program outreach and recruitment efforts. The affirmative action plan must specify the activities they will use to achieve this result.

(2) The program sponsor is not necessarily required to include all of the listed activities in its affirmative action program. The WSATC, when approving the sponsor's affirmative action plan, will determine the number of specific activities a sponsor must implement to satisfy this outreach and recruitment requirement. The WSATC will consider all circumstances including the size and type of the program and its resources. When special circumstances exist, the WSATC may provide financial or other assistance it deems necessary to implement the requirements of this section from any funds made available to it for such purpose.

(3) Examples of positive outreach and recruitment activities are:

(a) Distributing information about the nature of apprenticeship programs, program admission requirements, current apprenticeship opportunities, sources of apprenticeship applications, and the equal opportunity policy of the sponsor.

For programs only accepting applications at specific intervals, such information shall be disseminated at least thirty days in advance of each application date. For programs that accept applications throughout the year, this information must be distributed at least semiannually.

To be effective, the information described in this section must be given to the WSATC, local schools, employment service offices, women's centers, outreach programs and community organizations which effectively reach minorities and women. Also it must be published in newspapers which are circulated in the minority community and among women as well as the general areas in which the program sponsor operates.

(b) Participating in workshops conducted by employment service agencies, school districts, and community based organizations to increase apprenticeship program awareness of apprenticeship opportunities.

(c) Cooperating with local school districts, vocational education systems, and school employees to develop programs for preparing students to meet the standards and criteria required to qualify for entry into apprenticeship programs.

(d) Increasing awareness of a sponsor's equal opportunity policy within the sponsor's organization. The goal of this increased awareness within the sponsor's organization is to foster understanding, acceptance, and support among the sponsor's various officers, supervisors, employees, employers, and members. This is to encourage the necessary active assistance in achieving the program's obligations required by these rules.

(e) Participating in existing outreach programs whose focus is the recruitment and preparation of minority and female apprenticeship applicants. Whenever possible, these should provide applicants with pretesting experience and training.

(f) Developing outreach programs whose focus is the recruitment and preparation of minority and female apprenticeship applicants. If apprenticeship outreach programs do not exist, the sponsor should attempt to develop them. This effort may require working with other sponsors and appropriate community organizations. It may require obtaining financial assistance from the WSATC. Also, the sponsor shall ini-

tiate programs that prepare and encourage women to enter traditionally male dominated apprenticeship programs and trades.

(g) Encouraging the development and use of programs for preapprenticeship education, preparatory trade training, or other work related experiences that prepare candidates for apprenticeship.

(h) Granting to all applicants, without prejudice, advance standing or credit for previously acquired experience, training, skills, or aptitude.

(i) Engaging in other activities to ensure that the recruitment, selection, employment, and training of apprentices without discrimination based upon race, color, religion, national origin, sex, age, disability or as otherwise specified by law. Some examples of these activities include:

(i) General publication of advertisements, industry reports, articles on apprenticeship opportunities and advantages.

(ii) Use minority and female apprentices and journey-level workers as recruiters.

(iii) Provide career counseling to prospective applicants.

(iv) Periodically audit affirmative action programs to see if goals are being met.

(v) Develop monitoring procedures to ensure that employers are granting equal employment opportunities to apprentices (these procedures may include reporting systems, on-site reviews, or briefing sessions).

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-413, filed 10/31/01, effective 1/17/02.]

WAC 296-05-415 Affirmative action goals and timetables. (1) An affirmative action plan must include goals and timetables. The first step in deciding whether goals and timetables are necessary is the completion of an analysis of the sponsor's program to determine whether there is an underutilization of minorities and/or women in the trade(s) represented by the program. This analysis must be:

(a) Conducted by the sponsor with technical assistance provided by the department;

(b) In writing; and

(c) Included in the sponsor's affirmative action plan.

(2) If the sponsor's analysis demonstrates that minorities and females are underutilized in the program, the program has an enrollment deficiency that must be corrected. Enrollment goals and timetables to correct this deficiency must be established and they must be included in the sponsor's affirmative action plan. (See WAC 296-05-433.)

(3) If the sponsor's analysis demonstrates that no enrollment deficiencies exist, enrollment goals and timetables are not required. However, where no goals and timetables are established, the affirmative action plan must include a detailed explanation why no goals and timetables have been established.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-415, filed 10/31/01, effective 1/17/02.]

WAC 296-05-417 Selection of apprentices for approved apprenticeship programs. In addition to development of a written affirmative action plan, the sponsor must submit a written plan for the selection of apprentices. The selection plan must ensure that minorities and women have

an equal opportunity to be selected as apprentices and that full utilization and equal opportunity in apprenticeship is achieved promptly. The selection procedures must use one of the methods specified in this section.

(1) A sponsor may not implement any selection method until the WSATC approves the program's affirmative action plan. In the affirmative action plan, the sponsor must identify the approved selection method it has adopted. The WSATC allows the following selection methods to be used:

(a) **Selection on basis of rank from pool of eligible applicants.** With this method, a sponsor selects apprentices from a pool of eligible applicants based upon a rank ordering of applicant qualifying standard scores. A sponsor adopting this method must create a pool of eligible candidates who have either reached the minimum legal working age and meet the sponsor's minimum physical requirements or who have reached the minimum legal working age and meet the sponsor's qualification standards.

(b) **Random selection from pool of eligible applicants.** A pool of eligible applicants must be created from persons who have either reached the minimum legal working age and meet the sponsor's minimum physical requirements **or** who have reached the minimum legal working age and meet the sponsor's qualification standards. With WSATC approval, a sponsor may randomly select apprentices from a pool of eligible applicants. This method must be supervised by an impartial person(s) not associated with the administration of the apprenticeship program. The time and place of the selection, and the number of apprentices to be selected, must be publicly announced before the selection takes place. The selection process must be open to all applicants and the public. The names of apprentices drawn by this method shall be posted immediately following the selection at the program sponsor's place of business.

(c) **Selection from pool of current employees.** A sponsor may select apprentices from an eligibility pool of program employees. The actual selection process may be prescribed by a collective bargaining agreement where one exists, or by the sponsor's established promotion policy.

(d) **Alternative selection methods.** In addition to the above specified methods, the WSATC allows a sponsor to select apprentices by alternative methods, including its present selection method. However, the sponsor who adopts an alternative method of selection must submit the following information to the apprenticeship supervisor:

(i) A detailed discussion of the selection method it proposes to use;

(ii) A copy of its affirmative action plan;

(iii) A copy of its enrollment deficiency analysis; and

(iv) If necessary, its goals and timetables for increasing the number of minority and female applicants and apprentices in the program.

The sponsor may not implement any such alternative method until the WSATC has approved the method and the affirmative action program (including its goals and timetables).

When an alternative selection method is used and the training agent selects the apprentices, the employer must sign an agreement with the WSATC, agreeing to comply with the equal employment opportunity requirements of these rules and 29 CFR Part 30.

(2) Exceptions to selection procedures may be used if:

(a) An employee of an employer not qualifying as a journey-level worker becomes a training agent, he/she shall be evaluated by the apprenticeship program using constant standard nondiscriminatory means and registered at the appropriate period of apprenticeship based on previous work experience and related training.

(b) The individual who signs an authorization card during the organizing effort by an employer wherein fifty percent or more of the employees have signed whether or not the individual is approved as a training agent, an individual not qualifying as a journey-level worker shall be evaluated by the sponsor and registered at the appropriate period of apprenticeship based on previous work experience and related training.

(3) Organizing statements specified in subsection (2) of this section, that result in direct entry into the apprenticeship program, shall be properly placed within the program selection procedure as an exemption.

(4) If the WSATC or the department fails to act upon the sponsor's selection method and affirmative action program within thirty days of its submission to the department, the sponsor may implement the selection method until acted upon by the WSATC.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-417, filed 10/31/01, effective 1/17/02.]

WAC 296-05-419 Qualification standards. Qualification standards are the criteria, used by sponsors to select applicants into an eligibility pool. These qualification standards and the procedures used to determine the standards must be specified in detail in the sponsor's affirmative action plan and must:

- Identify the specific criteria and attributes used to evaluate applicants;

- Specify the acceptable scores required for each qualification standard;

- Demonstrate a direct relationship between each qualification standard, its required score and the expected job performance;

- Establish a significant statistical relationship between the score required for admission to the pool and the applicant's performance in the apprenticeship program. This statistical relationship must be based upon the procedures discussed in 41 CFR Part 60-3 (Guidelines on employee selection procedures); and

- Specify that the applicant has achieved an acceptable score on all the qualification. Unless an applicant achieves an acceptable score on all the qualification standards, the applicant will be ineligible for admission to the pool.

(1) **Aptitude test scores for use as qualification standards.** Aptitude tests may be used as qualification standards; however, any aptitude test score used as a qualification standard must be directly related to apprenticeship job performance. To demonstrate this relationship, there must be a significant statistical relationship between the aptitude test scores required for admission to the pool and performance in the apprenticeship program. In determining this relationship, the sponsor must follow the procedures discussed in 41 CFR Part 60-3. These requirements also apply to any aptitude tests used by a program sponsor and administered either by a

state employment agency or any person, agency or organization engaged in the selection or evaluation of personnel. If a national aptitude test is developed and administered by a national apprenticeship committee, it must meet these requirements before it will be approved by the United States Department of Labor.

(2) **Educational achievements for use as qualification standards.** Educational achievements can be used as qualification standards; however, all such achievements used to determine admission to a program pool must be directly related to apprenticeship job performance. This direct relationship must be demonstrated by a significant statistical relationship between the achievement scores required for admission and expected performance in the apprenticeship program. In demonstrating such a statistical relationship, the sponsor must meet the requirements of 41 CFR Part 60-3.

Official school records or a certified passing grade on a general educational development (GED) test recognized by state or local public instruction officials shall be evidence of educational achievement. These education achievement requirements must be uniformly applied to all applicants.

(3) **Role of the interview in the applicant selection process.** Interviews must not be used as a qualification standard for admission to an eligibility pool for programs using the selection methods described in WAC 296-05-417 (1) and (2). However, after an applicant is placed in a pool and before selections are made from that pool, an applicant can be interviewed. When interviews are conducted, they must:

(a) Consist only of objective questions relevant to the applicant's fitness for the apprenticeship program.

(b) Not include questions related to qualifications previously used to determine entrance to the pool.

(c) Require each interviewer to record the questions and the general nature of the applicant's answers.

(d) Require each interviewer to prepare a summary of any interview conclusions.

Adequate records of the interviews must be kept including a brief summary and conclusion and how the specific factors like applicant motivation, ambition, and willingness to accept direction affected the interviewer's final decision.

(4) **Examples of qualification standards include:**

- Standardized aptitude tests;
- School diplomas or the equivalent;
- Health requirements essential to the chosen occupation;
- Interviews conducted in a fair manner (see subsection (3) of this section);
 - School grades; and
 - Previous work experience.

In applying these standards, the sponsor must meet the requirements of 41 CFR Part 60-3.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-419, filed 10/31/01, effective 1/17/02.]

WAC 296-05-427 Notification requirements. All applicants who meet the program admission requirements must be notified that they have been placed in an eligibility pool. All program sponsors must give a written notice of rejection to each applicant who is not selected for either an eligibility pool or the apprenticeship program. This rejection notice must include the reasons for rejection, the admission

requirements for those admitted to the pool or program and the appeal procedures available.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-427, filed 10/31/01, effective 1/17/02.]

WAC 296-05-429 Existing lists of eligibles and public notice. (1) A sponsor who adopts a selection method under WAC 296-05-417 must conduct an enrollment deficiency analysis (see WAC 296-05-433). If, as a result of this analysis, the sponsor concludes that there are fewer minorities and/or women on its existing pools and lists than there should be, these pools and lists must be discarded.

(2) Once the existing pools and lists have been discarded, new eligibility pools must be established and lists must be posted at the sponsor's place of business. Sponsors must allow at least a two-week period for accepting applications for admission to the apprenticeship program. There must be at least thirty days of public notice in advance of the earliest date for application for admission to the apprenticeship program (see WAC 296-05-411).

(3) Once an applicant has been placed in an eligibility pool, they must be retained on the eligibility lists for two years unless they request, in writing, that they be removed or unless they fail to respond to an apprentice job opportunity mailed to applicant's last known address by certified mail, return receipt requested. It is the applicant's responsibility to keep the sponsor informed of the applicant's current mailing address. A sponsor, upon receiving a written request from a former applicant whose name was removed from an eligibility list, may restore the applicant's name to the list.

(4) Applicants who have been accepted in the program must be given a reasonable time in which to report for work. A "reasonable time" will be interpreted in light of the customs and practices of the industry for reporting for work. All applicants must be treated equally in the determination and application of "a reasonable time."

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-429, filed 10/31/01, effective 1/17/02.]

WAC 296-05-431 Affirmative action records of the WSATC retained by the department. The WSATC must keep the following types of records in the apprenticeship supervisor's office:

- (1) Registration requirements;
- (2) Individual program standards;
- (3) Registration records;
- (4) Program compliance reviews and investigations;
- (5) Any other records pertinent to the determination of compliance with these rules; and
- (6) Any records that must be reported to the United States Department of Labor.

The records required by these rules and any other information relevant to compliance with 29 CFR Part 30 must be maintained for five years. Also, these records and related information must be made available upon request to the United States Department of Labor or other authorized representatives.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-431, filed 10/31/01, effective 1/17/02.]

WAC 296-05-433 Enrollment deficiency analysis. (1)

In analyzing a program to determine whether a deficiency exists, the sponsor must consider at least the following factors:

(a) The percentage of the working age minority and female population in the program sponsor's labor market area;

(b) The percentage of the minority and female labor force in the program sponsor's labor market area;

(c) The percentage of the minority and female apprentices participating in a particular trade or craft compared to the percentage of minorities and women in the labor force in the program sponsor's labor market area;

(d) The percentage of minorities and women participating as journey-level employee(s) employed by the employer(s) participating in the program as compared with the percentage of minorities and women in the sponsor's labor market area and the extent to which the sponsor should be expected to correct any deficiencies through the achievement of goals and timetables for the selection of apprentices; and

(e) The general availability of minorities and women in the sponsor's labor market that have present or potential capacity for apprenticeship in the program sponsor's labor market area.

(2) To calculate the above percentage(s) or any other percentages for the analysis, the sponsor must use the following formula: Divide the number of minority individuals or females in a particular classification in the labor force or population by the total labor force or population.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-433, filed 10/31/01, effective 1/17/02.]

WAC 296-05-435 Data and information. (1) The apprenticeship supervisor must provide program sponsors with data and information on minorities and women labor force characteristics generated by the employment security department or the office of financial management. This information is available for standard metropolitan statistical areas as well as special statistical areas.

(2) The specific data used to calculate the percentages in WAC 296-05-433 must be obtained from records maintained by apprenticeship committees.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-435, filed 10/31/01, effective 1/17/02.]

WAC 296-05-437 Developing and evaluating enrollment goals and timetables. (1) Goals and timetables must be based upon the sponsor's enrollment analysis of its underutilization of minorities and women and its entire affirmative action program. Specific enrollment goals for minorities and a separate single goal for women may be acceptable unless a particular group is employed in a substantially disparate manner. In such a case, separate goals must be established for the disparate group. An example of such a situation would be where a specific minority group of women were underutilized even though the sponsor had achieved its enrollment goals for women generally. A separate, additional goal should be established to increase the enrollment of this specific group.

(2007 Ed.)

(2) In establishing the enrollment goals and timetables, the sponsor should establish reasonable goals that can be achieved through a good faith effort.

(3) In evaluating whether a sponsor has satisfied the affirmative action requirements of these rules, the WSATC must determine whether the sponsor has made a good faith effort to do so.

(4) The sponsor's good faith efforts shall be judged by whether the sponsor is following its affirmative action program and attempting to make it work. A specific example of a good faith effort by a sponsor would be when a sponsor conducts evaluations of its affirmative action program and makes the necessary changes to achieve success in the attainment of its goals.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-437, filed 10/31/01, effective 1/17/02.]

WAC 296-05-439 Failure to meet goals and timetables. (1) If a sponsor, despite its good faith efforts, fails to meet its goals and timetables within a reasonable period of time, the sponsor may be required to make appropriate changes in its affirmative action program in order to obtain maximum effectiveness toward the attainment of its goals.

(2) If the WSATC determines the failure of a sponsor to meet its goals and timetables is substantially a result of the enrollment selection method adopted, the sponsor may be required to develop and adopt a WSATC prescribed selection method.

(3) If a sponsor's failure to meet its goals is substantially a result of the qualification standard it used to select minorities and/or women, the sponsor may be required to show that the qualification standards directly relate to job performance. Specifically, the sponsor will be expected to demonstrate a significant statistical relationship between the qualification standards used and the required job performance. This statistical relationship must be based upon the procedures discussed in 41 CFR Part 60-3 (Guidelines on employee selection procedures).

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-439, filed 10/31/01, effective 1/17/02.]

WAC 296-05-441 Noncompliance with federal and state equal opportunity requirements. When a compliance review concludes that a sponsor is not operating according to the federal or state laws or regulations requiring equal opportunity, the apprenticeship supervisor must take action. Such action must include:

(1) Notifying the sponsor in writing of the review results;

(2) Making a reasonable effort to secure voluntary compliance from the program sponsor; and

(3) Giving the sponsor a reasonable amount of time to comply with the review recommendations before undertaking sanctions under WAC 296-05-013.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-441, filed 10/31/01, effective 1/17/02.]

WAC 296-05-443 Complaint filing. (1) Any apprentice or applicant for apprenticeship who believes they have been discriminated against may file a complaint. The basis of the complaint may be:

(a) Discrimination on the basis of race, sex, color, religion, national origin, age, disability or as otherwise specified by law by a sponsor or a sponsor's program;

(b) The equal opportunity standards have not been followed; or

(c) The sponsor's affirmative action plan does not comply with the requirements of this chapter.

(2) A complaint may be filed in person or through an authorized representative. The complainant may choose to file a complaint with the WSATC or with a private review panel as established in WAC 296-05-445.

(3) A complaint must be in writing and shall be signed by the complainant. The complaint must include the name, address, and telephone number of the person allegedly discriminated against, the program sponsor involved, and a brief description of the circumstances leading to the complaint.

(4) The complaint must be filed not later than one hundred eighty days from the date of the alleged discrimination or violation of the sponsor's affirmative action plan or the rules of this chapter. If a complaint is initially filed with the private review panel and the complainant later wishes to refer the complaint to the WSATC, the referral must occur within one hundred eighty days of the circumstances leading to the complaint or within thirty days of the private review panel's final decision, whichever is later. If good cause is shown, the WSATC may extend these time periods.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-443, filed 10/31/01, effective 1/17/02.]

WAC 296-05-445 Private review panels. Sponsors may establish private review panels to resolve affirmative action complaints. The WSATC encourages sponsors to establish, fair, speedy, and effective procedures for the operation of the private review panel. Private review panels should be comprised of three or more responsible persons from the community who will serve without compensation. They should not be directly associated with the administration of an apprenticeship program. If necessary, sponsors may join together to establish a private review panel.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-445, filed 10/31/01, effective 1/17/02.]

WAC 296-05-447 Processing of complaints. (1) All approved programs must establish procedures explaining the program's complaint review process. These procedures must comply with the requirements of this section. Each sponsor must give a copy of the complaint procedures to each apprenticeship applicant and to all enrolled apprentices.

(2) When the apprenticeship supervisor receives a complaint and the sponsor has a private review panel in place, the complaint must be referred to the panel unless the complainant chooses otherwise or unless the council concludes that the panel will not satisfactorily resolve the complaint.

(3) Once the complaint is referred to the private review panel, the panel has no more than thirty days to resolve it. At the end of the period, the supervisor will obtain the reports from the complainant and the review body as to the disposition of the complaint. If the complaint has been satisfactorily resolved and there is no other indication of failure to apply equal opportunity standards, the case shall be closed and the parties formally notified.

[Title 296 WAC—p. 162]

(4) If the private review panel has not satisfactorily resolved the complaint within ninety days, the WSATC may conduct a compliance review and take all necessary steps to resolve the complaint.

(5) If the review panel satisfactorily resolves the complaint but there is evidence that the equal opportunity practices of the sponsor's program are not in compliance with the requirements of this chapter, the council must conduct a compliance review and take all steps necessary to bring the program into compliance.

(6) When a private review panel does not exist, the WSATC may conduct a compliance review to determine the facts of the complaint and any other information necessary to resolve the dispute.

(7) If the WSATC believes that satisfactorily resolving a complaint requires a change in the time limits established in this section, it can modify the time constraints by adopting special processing procedures. However, special processing procedures must only be adopted when circumstances warrant them and only if they will not prejudice any person or party associated with the complaint.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-447, filed 10/31/01, effective 1/17/02.]

WAC 296-05-449 Program registration cancellation procedures. (1) If the WSATC decides to withdraw a program's registration, it must give written notice to the sponsor that there is reasonable cause, under WAC 296-05-013, to do so.

(2) If the sponsor requests a hearing, it must be a written request to the apprenticeship supervisor within fifteen days of the receipt of the WSATC's withdrawal notice. When the supervisor receives the sponsor's request, a hearing must be convened. The WSATC's final decision to withdraw a program's registration must be based on the compliance review file and other evidence presented at the hearing. The WSATC may allow the sponsor a reasonable time to achieve voluntary corrective action. If the WSATC decides that the apprenticeship program is not in compliance and that voluntary corrective action is not an option, the program's registration may be withdrawn. If the WSATC decides to withdraw the program's registration, it must make public notice of the order and give written notice to the sponsor. If the withdrawal was the result of complaint proceedings, the WSATC must give written notice of the withdrawal to the complainant as well.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-449, filed 10/31/01, effective 1/17/02.]

WAC 296-05-451 Reinstatement of program registration. Any apprenticeship program deregistered as authorized by these rules may be reinstated upon presentation of adequate evidence to the WSATC that the apprenticeship program is operating in compliance with these rules.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-451, filed 10/31/01, effective 1/17/02.]

WAC 296-05-453 Adoption of consistent state plans. All apprenticeship programs registered with the WSATC must comply with the requirements of these rules and 29 CFR Part 30. If a program fails to comply or is inconsistent with

(2007 Ed.)

the requirements of these rules and/or 29 CFR Part 30, the WSATC may disapprove or deregister the program. The WSATC must notify the United States Department of Labor of any state apprenticeship program disapproved and deregistered by it. The state apprenticeship program disapproved or deregistered by the WSATC for noncompliance with the requirements of these rules or 29 CFR Part 30 may, within fifteen days of the receipt of the notice of disapproval or deregistration, appeal to the United States Department of Labor to set aside the determination of the WSATC. The United States Department of Labor must make its determination on the basis of the record. The United States Department of Labor may grant the state program sponsor, the state apprenticeship and training, and the complainant, if any, the opportunity to present oral or written argument.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-453, filed 10/31/01, effective 1/17/02.]

WAC 296-05-455 Intimidatory or retaliatory acts.

(1) Any intimidation, threat, coercion, or retaliation by or with the approval of a sponsor, against a person who has exercised rights or privilege under Title VII of the Civil Rights Act of 1964 as amended or the amended Executive Order 11246 is a violation of the equal opportunity standards of these rules. Such acts may be investigated by the WSATC and, if appropriate, will be prosecuted.

(2) Identity of a complainant must be kept confidential except when it is necessary to carry out the intent of these rules, for example, the need to conduct an investigation, hearing, or judicial proceeding.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-455, filed 10/31/01, effective 1/17/02.]

WAC 296-05-457 Exemptions. A sponsor may request an exemption from Part D of these rules. The request may ask exemption from all of the section or from selected ones. The request must be in writing and must be addressed to the apprenticeship supervisor. It must explain why an exemption is needed. An exemption may be granted either by the WSATC or by the secretary of the United States Department of Labor, but can only be granted for good cause. If the WSATC approves an exemption that affects a substantial number of employers, it must notify the United States Department of Labor explaining why the exemption was allowed.

[Statutory Authority: RCW 49.04.010, 2001 c 204, and chapter 49.04 RCW. 01-22-055, § 296-05-457, filed 10/31/01, effective 1/17/02.]

WAC 296-06-010 Purpose. The department of labor and industries (L&I) is an agency of state government created by RCW 43.17.010. In this chapter it shall be referred to as the "department." Where appropriate, "department" also refers to its staff and employees. The purpose of this chapter is to ensure compliance with the public records provisions of chapter 42.17 RCW.

[Statutory Authority: Chapter 43.17 RCW, RCW 42.17.250, [42.17].251, 51.04.020, 51.04.030, and 2005 c 483. 05-13-151, § 296-06-010, filed 6/21/05, effective 7/22/05. WAC 296-06-020 Description of department organization. (1) **Central organization.** The chief executive officer of the department is the director of labor and industries, referred to here as "director." The director is appointed by the governor with the consent of the senate and serves at the pleasure of the governor. The department is organized in

[Title 296 WAC—p. 163]

six regions across five divisions: Insurance services, WISHA (Washington Industrial Safety and Health Act) services, specialty compliance services, operations, and field services. Each region and division is responsible to a deputy director or assistant director appointed by the director. Major policy decisions, rule-making, and the primary administrative functions of the department are carried out by the department's central organizations in Olympia.

(2) Field services.

The department maintains service locations, or major field offices, in many cities. These service locations are grouped into six regions throughout the state, each headed by a regional administrator.

[Statutory Authority: Chapter 43.17 RCW, RCW 42.17.250 (1)(a), 51.04.020, 51.04.030, and 2005 c 483. 05-13-151, § 296-06-020, filed 6/21/05, effective 7/22/05. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 90-07-004, § 296-06-020, filed 3/9/90, effective 4/9/90; Order 76-27, § 296-06-020, filed 9/28/76; Order 73-12, § 296-06-020, filed 7/31/73.]

WAC 296-06-030 Locations where information about the department may be obtained and the department public records inspected and copied. (1) Tumwater office.

The office of the director, the administrative office of the department, the main offices of the divisions, and the office of the public records officer are in the Labor and Industries headquarters building, Tumwater, Washington. General information about the department and its divisions may be obtained at this location, and on the internet at www.lni.wa.gov.

(2) Field offices.

(a) General information about the department may also be obtained at its service locations, or field offices, at the addresses listed on the internet at www.lni.wa.gov and/or found on the state government pages of local area telephone directories.

(b) Requests for public records containing confidential information will be processed only through the Tumwater office, unless the requestor is authorized to access them.

[Statutory Authority: Chapter 43.17 RCW, RCW 42.17.250, 42.17.290, 51.04.020, 51.04.030, and 2005 c 483. 05-13-151, § 296-06-030, filed 6/21/05, effective 7/22/05. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 90-07-004, § 296-06-030, filed 3/9/90, effective 4/9/90; Order 76-27, § 296-06-030, filed 9/28/76; Order 73-12, § 296-06-030, filed 7/31/73.]

WAC 296-06-040 Operations and procedures. The general operations and procedures of the department's five divisions are summarized below. For more information, go to: www.lni.wa.gov.

(1) Insurance services.

This division administers Washington's workers' compensation program—Medical care and disability benefits for workers who are injured on the job. Every business with employees must provide this coverage. L&I administers the "state fund," which covers the majority of the state's workers. Through its self-insurance program, it also monitors coverage offered by large companies that choose to self-insure and manage their own claims.

This division includes all of the workers' compensation programs that:

- Manage injured worker claims;

- Bill employers for their required quarterly premiums;
 - Pay health care (and other) providers for their services.
- The division also:

- Sets workers' compensation rates;
- Helps employers control their premiums through a variety of financial incentive, claims management, return-to-work and safety programs;
- Administers the department's crime victims compensation program, which covers those who are injured as a result of criminal acts.

(2) WISHA services.

This division administers the Washington Industrial Safety and Health Act (WISHA), under a state plan agreement with the federal Occupational Safety and Health Administration (OSHA). It aids in the prevention of job injuries and illnesses by adopting and enforcing safety and health standards and by training employers and employees in safe working procedures.

Through the RCW, the legislature has directed L&I to administer and enforce three additional programs. These programs are also handled by WISHA:

- Asbestos, including certifications and notifications of asbestos projects;
- Explosives, regulating the possession, handling, and use of explosives or explosive devices;
- Worker and community right to know, which provides a way of communicating information regarding hazardous substances in the workplace and the community.

Employer and employee procedures and responsibilities, and information about voluntary consultations to improve workplace safety can be found on the internet at www.lni.wa.gov/FormPublications. Information about reporting workplace accidents to OSHA can be found on the internet at <http://www.osha.gov/pls/publications/pubindex.list>.

(3) Specialty compliance services.

This division encompasses several diverse programs related to the construction trades, workplace rights, and apprenticeship. Its programs' duties include:

- Registering contractors to ensure they are bonded and insured.
- Licensing electrical contractors and elevator mechanics.
- Certifying plumbers and electricians.
- Regulating and inspecting:
 - Electrical installations.
 - Boilers and pressure vessels.
 - Factory assembled structures.
 - Elevators and other conveyances.

Employment standards program:

Develops and enforces rules regulating wages (including prevailing wages for public works projects) and hours, and working conditions, including those for teenagers.

Apprenticeship program:

Administers the state's apprenticeship training laws and policies.

(4) Operations.

This area includes several internal support divisions including administrative services, information services, the

office of human resources, and fraud prevention and compliance.

Fraud prevention and compliance:

This division encompasses several diverse programs related to the prevention of abuse in the workers' compensation system. Its programs include:

- Audit.
- Collections.
- Detection and tracking.
- Firm appeals.
- Investigations.
- Significant employer cases.

(5) Field services.

This division provides the agency with local department program service throughout its service locations in six geographic regions of Washington.

WAC 296-06-110 Requesting public records. (1) You can request an inspection or copy of the department's public records by either:

- Making a request at any of the department's service locations; or
- Sending a written request to the L&I public disclosure unit at:

Department of Labor & Industries
Public Disclosure Unit
Post Office Box 44632
Olympia, WA 98504-4632

Note: If you make an oral request, the department may put your request in writing and give or send a copy of it to you for confirmation or written correction.

(2) Written requests must include the following:

- The requestor's name.
- The date the request is being made.
- A description of the requested records, including the title, subject matter, date the records were made, and any other identifying information.
- A signed statement that the material will not be used for commercial purposes, if the requested material includes a list of individuals.

Note: Department staff will assist the requestor in identifying records if needed. If the request is not clear, the department will ask for clarification. If no clarification is received, the department will not respond. The department shall not deny a request for identifiable public records solely on the basis that the request is overbroad.

(3) Records that are protected by an individual's rights to privacy will not be released until the authorization described in WAC 296-06-080 is submitted, with the written request, to the department.

WAC 296-06-140 Appeal of denial of requests. After a request for inspection or copying of public records is denied, the requestor may ask the department to review the denial. The request for review must:

- Be made in writing.
- Be sent to the public records officer or his/her designee after receiving the denial.
- Specifically refer to the denial.
- Contain a brief statement that gives reasons for reconsideration of the denial.

WAC 296-06-150 Protection of public records. The department will protect its public records from damage or disorganization. Public records requests will not be allowed to interfere with essential functions of the department.

All inspections of public records will be supervised by a department staff member. Staff members will not allow records to be inspected or copied by anyone who is intoxicated, violent, abusive, threatening, or otherwise disruptive. Anyone who displays these characteristics during a records inspection may have the inspection terminated by department staff.

Staff members who are supervising the inspection or copying of public records will make sure of the following:

- Records are not torn, mutilated, marked, or otherwise harmed by the requestor.
- Inspection and copying activities do not disrupt the department's operations.
- Full, prompt, and courteous assistance is provided to the requestor.

[Statutory Authority: RCW 42.17.290 and 2005 c 483. 05-13-151, § 296-06-150, filed 6/21/05, effective 7/22/05. Statutory Authority: RCW 51.04.020(4) and 51.04.030. 90-07-004, § 296-06-150, filed 3/9/90, effective 4/9/90; Order 76-27, § 296-06-150, filed 9/28/76; Order 73-12, § 296-06-150, filed 7/31/73.]

WAC 296-06-175 Records index. The department of labor and industries will maintain a current index as required by RCW 42.17.260. The index will consist of record types and/or descriptions, their locations, and availabilities. These records will be made available according to public disclosure law. The agency records index is accessible online at www.lni.wa.gov. The index will be updated as needed. Copies of the index will be provided upon request by the public disclosure unit.

296-07-110	Consideration of economic values.

WAC 296-07-010 Use of abbreviations. In this chapter the department of labor and industries shall be referred to as the "department"; the director of labor and industries as the "director"; the State Environmental Policy Act, chapter 43.21C RCW, as "SEPA"; chapter 197-10 WAC effective January 16, 1976 as the "SEPA guidelines"; and environmental impact statement as "EIS."

[Order 76-16, § 296-07-010, filed 5/20/76.]

WAC 296-07-020 Purpose and scope. The rules contained in this chapter are to carry out the policy and procedures of SEPA and the SEPA guidelines, and shall govern the application of SEPA requirements to the department. These rules are adopted pursuant to the requirement of and authority provided by chapter 43.21C RCW and chapter 197-10 WAC.

From the effective date of this chapter the department in undertaking nonexempt actions shall conform to those relevant and applicable policies and procedures declared mandatory by the provisions of SEPA or the SEPA guidelines. Such pertinent and mandatory policy and procedures are hereby incorporated by reference and adopted as the policy and procedures of the department.

[Order 76-16, § 296-07-020, filed 5/20/76.]

WAC 296-07-030 Meaning of words and terms. The words and terms in this chapter and in all proceedings of the department in compliance with SEPA shall be deemed to conform to the mandatory definitions contained in the SEPA guidelines.

[Order 76-16, § 296-07-030, filed 5/20/76.]

WAC 296-07-040 Exemptions. All activities under programs administered by the department as of December 12, 1975 are hereby exempted, except the issuance of any license for the manufacture of explosives or the adoption or amendment by the department of any regulations incorporating general standards respecting the issuance of licenses authorizing the storage of explosives pursuant to chapter 70.74 RCW.

The adoption of any industrial health or safety regulations containing noise standards shall be considered a major action under this chapter. In addition all other exemptions provided by SEPA or the SEPA guidelines shall apply.

[Order 76-16, § 296-07-040, filed 5/20/76.]

WAC 296-07-050 Sufficiency of compliance with SEPA guidelines. Compliance with the applicable mandatory SEPA guidelines as supplemented by this chapter shall be deemed to constitute compliance with this chapter.

[Order 76-16, § 296-07-050, filed 5/20/76.]

WAC 296-07-060 Designation of responsible official. The assistant director of any department, division, or head of any independent department section with major responsibility for any nonexempt action shall be the responsible official for the purpose of complying with SEPA. In any other case the director shall be the responsible official or he shall designate another person to be the responsible official.

[Order 76-16, § 296-07-060, filed 5/20/76.]

WAC 296-07-070 Department's SEPA public information center. There is hereby established a department public information center to carry out the functions contemplated by the SEPA guidelines, WAC 197-10-830, to be located in the offices of the department at Olympia, Washington. The department's public records officer shall have charge thereof.

[Order 76-16, § 296-07-070, filed 5/20/76.]

WAC 296-07-080 Maintenance of EIS available register. The department shall maintain an EIS available register at its SEPA public information center. Said register shall be in the charge of the department's public records officer and it shall be available for public inspection and copying.

[Order 76-16, § 296-07-080, filed 5/20/76.]

WAC 296-07-090 Exemption for emergency actions. When actions are exempted from the requirements of SEPA or the SEPA guidelines because they are actions which must be taken immediately, or within a time too short to allow full compliance with SEPA or the SEPA guidelines to avoid an imminent danger to public or private property, or to prevent

(2007 Ed.)

an imminent threat of serious environmental degradation, the responsible official shall prepare a written statement showing the nature of the action and the reasons for immediate action. Such statement shall be filed in the department's SEPA public information center.

[Order 76-16, § 296-07-090, filed 5/20/76.]

WAC 296-07-100 Chapter to be amended when SEPA guidelines amended. When amendments are adopted to the SEPA guidelines the department shall adopt all amendments to this chapter within one hundred twenty days to bring this chapter into conformance with the SEPA guidelines as amended.

[Order 76-16, § 296-07-100, filed 5/20/76.]

WAC 296-07-110 Consideration of economic values. In promulgating rules in compliance with the SEPA guidelines and any environmental, social, health, safety, or other standards connected therewith, the department shall, pursuant to chapter 117, Laws of 1975-'76 2nd ex. sess., give appropriate consideration to economic values along with such other considerations.

[Order 76-16, § 296-07-110, filed 5/20/76.]

WAC 296-14-100 Definition of voluntary retirement.

(1) **What is voluntarily retired?** The worker is considered voluntarily retired if both of the following conditions are met:

(a) The worker is not receiving income, salary or wages from any gainful employment; and

(b) The worker has provided no evidence to show a bonafide attempt to return to work after retirement.

Time-loss compensation is not paid to workers who voluntarily retired from the work force.

(c) Payment of union dues or medical or life insurance premiums does not constitute attachment to the work force.

(2) **When is a worker determined not to be voluntarily retired?** A worker is not voluntarily retired when the industrial injury or occupational disease is a proximate cause for the retirement.

WAC 296-14-200 Waiver of recovery for worker compensation benefits overpayments. Whenever the director determines whether to exercise the discretion granted by RCW 51.32.240 (1), (2) or (3) or 51.32.220(6) the following shall apply:

(1) The decision of the director shall apply to the state fund or to the self-insurer, as the case may be.

(2) In the case of recoupment of an overpayment from any future payments, the director will entertain a request to exercise his or her discretion to waive recovery up to sixty days after communication of the order and/or notice to the recipient that benefits are being withheld to satisfy the previous overpayment.

(3) A finding by the director that recovery of an overpayment would be against equity and good conscience shall be required before the overpayment can be waived in whole or in part. The director shall consider the following factors and any other factors relevant to the particular case:

(a) Whether the claimant was without fault in applying for and accepting benefits which gave rise to the overpayment;

(b) Whether recovery of the overpayment, in whole or in part, would defeat the purposes of Title 51 RCW;

(c) Whether the claimant reasonably relied upon the benefits, or notice that such benefits would be paid and relinquished a valuable right or changed his or her position for the worse;

(d) Whether the claimant reasonably relied upon misinformation from an official source (i.e., a representative of the department or self-insurer, as the case may be) in accepting the benefit payment which gave rise to the overpayment.

(4) The claimant's application for waiver of an overpayment contemplated under RCW 51.32.240 (1), (2), or (3), or 51.32.220(6) shall clearly set forth the reason(s) that he or she believes that recovery of the overpayment in whole or in part, as the case may be, is against equity and good conscience.

WAC 296-14-300 Mental condition/mental disabilities. (1) Claims based on mental conditions or mental disabilities caused by stress do not fall within the definition of an occupational disease in RCW 51.08.140.

Examples of mental conditions or mental disabilities caused by stress that do not fall within occupational disease shall include, but are not limited to, those conditions and disabilities resulting from:

- (a) Change of employment duties;
- (b) Conflicts with a supervisor;
- (c) Actual or perceived threat of loss of a job, demotion, or disciplinary action;
- (d) Relationships with supervisors, coworkers, or the public;
- (e) Specific or general job dissatisfaction;
- (f) Work load pressures;
- (g) Subjective perceptions of employment conditions or environment;
- (h) Loss of job or demotion for whatever reason;
- (i) Fear of exposure to chemicals, radiation biohazards, or other perceived hazards;
- (j) Objective or subjective stresses of employment;
- (k) Personnel decisions;
- (l) Actual, perceived, or anticipated financial reversals or difficulties occurring to the businesses of self-employed individuals or corporate officers.

(2) Stress resulting from exposure to a single traumatic event will be adjudicated with reference to RCW 51.08.100.

[Statutory Authority: Chapters 51.08 and 51.32 RCW. 88-14-011 (Order 88-13), § 296-14-300, filed 6/24/88.]

WAC 296-14-310 When does a presumption of occupational disease for fire fighters apply? RCW 51.32.185 specifies a presumption that certain medical conditions are occupational diseases for fire fighters. Those conditions are heart problems experienced within seventy-two hours of exposure to smoke, fumes, or toxic substances; respiratory disease; specific cancers as defined by RCW 51.32.185; and infectious diseases as defined by RCW 51.32.185.

For claims filed on or after July 1, 2003, the presumption may not apply to heart or lung conditions if a fire fighter is a user of tobacco products.

When the presumption does not apply, the claim is not automatically denied. However, the burden is on the worker to prove that the condition is an occupational disease.

[Statutory Authority: RCW 51.04.020, 51.32.185. 03-12-046, § 296-14-310, filed 5/30/03, effective 7/1/03.]

WAC 296-14-315 Definitions. (1) **Tobacco products:** For purposes of this rule, tobacco products are limited to those that are smoked, including cigarettes, pipes and cigars.

(2) **User of tobacco products:** For the purposes of this rule, a user of tobacco products is a "smoker."

(3) **Current smoker:** A current smoker is a regular user of tobacco products, has smoked tobacco products at least one hundred times in his/her lifetime, and as of the date of manifestation did smoke tobacco products at least some days.

(4) **Former smoker:** A former smoker has a history of tobacco use, has smoked tobacco products at least one hundred times in his/her lifetime, but as of the date of manifestation did not smoke tobacco products.

[Statutory Authority: RCW 51.04.020, 51.32.185. 03-12-046, § 296-14-315, filed 5/30/03, effective 7/1/03.]

WAC 296-14-320 Does the presumption apply to current smokers with heart or lung conditions? No. The presumption never applies to current smokers with heart or lung conditions.

[Statutory Authority: RCW 51.04.020, 51.32.185. 03-12-046, § 296-14-320, filed 5/30/03, effective 7/1/03.]

WAC 296-14-325 When does the presumption apply to former smokers with heart or lung conditions? (1) Heart problems: The presumption for heart problems will apply if a fire fighter is a former smoker and last smoked two years or more prior to the cardiac event.

(2) **Lung conditions:** The presumption for lung conditions will apply:

(a) For **asthma** if the fire fighter is a former smoker who last smoked five years or more prior to the date of manifestation of the disease; or

(b) For **COPD/emphysema/chronic bronchitis** if the fire fighter is a former smoker who last smoked fifteen years or more prior to the date of manifestation of the disease; or

(c) For **lung cancer** if the fire fighter is a former smoker who last smoked fifteen years or more prior to the date of manifestation of the disease.

[Statutory Authority: RCW 51.04.020, 51.32.185. 03-12-046, § 296-14-325, filed 5/30/03, effective 7/1/03.]

WAC 296-14-330 What tobacco use shall exclude a fire fighter from a presumption of coverage? The following table summarizes the situations listed in WAC 296-14-310 through 296-14-325 under which a presumption of coverage shall or shall not apply for fire fighters due to tobacco use.

Medical condition	Presumptions shall not apply	Presumption shall apply
Heart problems experienced within seventy-two hours of exposure to smoke, fumes, or toxic substance	Current smoker	Fire fighters that never smoked tobacco
	Former smoker who last smoked less than two years prior to the cardiac event	Former smoker who last smoked two years or more prior to the cardiac event

Medical condition	Presumptions shall not apply	Presumption shall apply
Asthma	Current smoker	Fire fighters that never smoked tobacco
	Former smoker who last smoked less than five years before date of manifestation of the disease	Former smoker who last smoked five years or more before date of manifestation of the disease
COPD/emphysema/chronic bronchitis	Current smoker	Fire fighters that never smoked tobacco
	Former smoker who last smoked less than fifteen years before date of manifestation of the disease	Former smoker who last smoked fifteen years or more before date of manifestation of the disease
Lung cancer	Current smoker	Fire fighters that never smoked
	Former smoker who last smoked less than fifteen years before date of manifestation of the disease	Former smoker who last smoked fifteen years or more before date of manifestation of the disease

[Statutory Authority: RCW 51.04.020, 51.32.185, 03-12-046, § 296-14-330, filed 5/30/03, effective 7/1/03.]

WAC 296-14-350 Claim allowance and wage determination in occupational disease cases. (1) The liable insurer in occupational disease cases is the insurer on risk at the time of the last injurious exposure to the injurious substance or hazard of disease during employment within the coverage of Title 51 RCW which gave rise to the claim for compensation. Such Title 51 RCW insurer shall not be liable, however, if the worker has a claim arising from the occupational disease that is allowed for benefits under the maritime laws or Federal Employees' Compensation Act.

(2) The compensation schedules and wage base for claims shall be based on the schedule in effect on the date of disease manifestation. Compensation shall be based on the monthly wage of the worker as follows:

(a) If the worker was employed at the time the disease required medical treatment or became totally or partially disabling, whichever occurred first, compensation shall be based on the monthly wage paid on that date regardless of whether the worker is employed in the industry that gave rise to the disease or in an unrelated industry.

(b) If the worker was not employed, for causes other than voluntary retirement, at the time the disease required medical treatment or became totally or partially disabling, whichever occurred first, compensation shall be based upon the last monthly wage paid.

(3) Benefits shall be paid in accordance with the schedules in effect on the date of manifestation. Manifestation is the date the disease required medical treatment or became totally or partially disabling, whichever occurred first, with-

out regard to the date of the contraction of the disease or the date of filing the claim.

WAC 296-14-400 Reopenings for benefits. The director at any time may, upon the workers' application to reopen for aggravation or worsening of condition, provide proper and necessary medical and surgical services as authorized under RCW 51.36.010. This provision will not apply to total permanent disability cases, as provision of medical treatment in those cases is limited by RCW 51.36.010.

The seven-year reopening time limitation shall run from the date the first claim closure becomes final and shall apply to all claims regardless of the date of injury. In order for claim closure to become final on claims where closure occurred on or after July 1, 1981, the closure must include documentation of medical recommendation, advice or examination. Such documentation is not required for closing orders issued prior to July 1, 1981. First closing orders issued between July 1, 1981, and July 1, 1985, shall for the purposes of this section only, be deemed issued on July 1, 1985.

The director shall, in the exercise of his or her discretion, reopen a claim provided objective evidence of worsening is present and proximately caused by a previously accepted asbestos-related disease.

In order to support a final closure based on medical recommendation or advice the claim file must contain documented information from a doctor, or nurse consultant (departmental) or nurse practitioner. The doctor or nurse practitioner may be in private practice, acting as a member of a consultation group, employed by a firm, corporation, or state agency.

For the purpose of this section, a "doctor" is defined in WAC 296-20-01002.

When a claim has been closed by the department or self-insurer for sixty days or longer, the worker must file a written application to reopen the claim. An informal written request filed without accompanying medical substantiation of worsening of the condition will constitute a request to reopen, but the time for taking action on the request shall not commence until a formal application is filed with the department or self-insurer as the case may be.

A formal application occurs when the worker and doctor complete and file the application for reopening provided by the department. Upon receipt of an informal request without accompanying medical substantiation of worsening of the worker's condition, the department or self-insurer shall promptly provide the necessary application to the worker for completion.

If, within seven years from the date the first closing order became final, a formal application to reopen is filed which shows by "sufficient medical verification of such disability related to the accepted condition(s)" that benefits are payable, the department, or the self-insurer, pursuant to RCW 51.32.210 and 51.32.190, respectively shall mail the first payment within fourteen days of receiving the formal application to reopen. If the application does not contain sufficient medical verification of disability, the fourteen-day period

will begin upon receipt of such verification. If the application to reopen is granted, compensation will be paid pursuant to RCW 51.28.040. If the application to reopen is denied, the worker shall repay such compensation pursuant to RCW 51.32.240.

Applications for reopenings filed on or after July 1, 1988, must be acted upon by the department within ninety days of receipt of the application by the department or the self-insurer. The ninety-day limitation shall not apply if the worker files an appeal or request for reconsideration of the department's denial of the reopening application.

The department may, for good cause, extend the period in which the department must act for an additional sixty days. "Good cause" for such an extension may include, but not be limited to, the following:

- (1) Inability to schedule a necessary medical examination within the ninety-day time period;
- (2) Failure of the worker to appear for a medical examination;
- (3) Lack of clear or convincing evidence to support reopening or denial of the claim without an independent medical examination;
- (4) Examination scheduled timely but cannot be conducted and a report received in sufficient time to render a decision prior to the end of the ninety-day time period.

The department shall make a determination regarding "good cause" in a final order as provided in RCW 51.52.050.

The ninety-day limitation will not apply in instances where the previous closing order has not become final.

WAC 296-14-410 Reduction, suspension, or denial of compensation as a result of noncooperation. (1) **Can the department or self-insurer reduce, suspend or deny industrial insurance benefits from a worker?** The department or the self-insurer, after receiving the department's order, has the authority to reduce, suspend or deny benefits when a worker (or worker's representative) is noncooperative with the management of the claim.

(2) **What does noncooperative mean?** Noncooperation is behavior by the worker (or worker's representative) which obstructs and/or delays the department or self-insurer from reaching a timely resolution of the claim.

(a) Noncooperation can include any one of the following:

- (i) Not attending or cooperating with medical examinations or vocational evaluations requested by the department or self-insurer.
- (ii) Failure to keep scheduled appointments or evaluations with attending physician or vocational counselor.
- (iii) Engaging in unsanitary or harmful actions that jeopardize or slow recovery.
- (iv) Not accepting medical and/or surgical treatment that is considered reasonably essential for recovery from the industrial injury or occupational disease.

(2007 Ed.)

(3) **Are there ever exceptions to attending a scheduled examination or vocational evaluation?** The worker will not be considered uncooperative if refusal to attend a scheduled examination is for any one of the following reasons:

(a) The department or self-insurer did not mail notice to the worker and designated representative at least fourteen but no more than sixty days prior to the examination. The notice must contain the date, time and location of the examination.

(b) If the worker is thirty or less minutes late for the appointment.

(c) If the worker has not been examined or evaluated and leaves after waiting for more than one hour after the scheduled time.

(4) **What actions are taken before reducing, suspending or denying industrial insurance benefits?**

(a) The department or self-insurer must first send a letter to the worker (or the worker's representative) advising that benefits may be suspended and asking for an explanation for the noncooperation, obstruction and/or delay of the management of the claim.

(b) The worker has thirty days to respond in writing to the letter. This written response should include the reason(s) the worker has for not cooperating with the department or self-insurer.

(5) **What are the actions the department can take if a worker (or a worker's representative) is determined to be noncooperative?** If the worker does not respond in thirty days to the letter asking for justification for not cooperating or it is determined there is no good cause the department or self-insurer, after receiving the department's order, may take the following action:

(a) Reduce current or future time-loss compensation by the amount of the charge incurred by the department or self-insurer for any examination, evaluation, or treatment that the worker failed to attend.

(b) Reduce, suspend or deny all or part of the time-loss benefits.

(c) Suspend or deny medical benefits.

[Statutory Authority: RCW 51.04.020, 99-18-062, § 296-14-410, filed 8/30/99, effective 9/30/99. Statutory Authority: RCW 51.32.110 and 51.32.190(6), 90-19-028, § 296-14-410, filed 9/12/90, effective 10/13/90.]

WAC 296-14-4121 What does the term "willful misrepresentation" mean with regard to the receipt of workers' compensation benefits? This term is found in RCW 51.32.240(5) which provides a fifty percent penalty, in addition to any overpayment, whenever any payment of benefits has been induced by "willful misrepresentation." The law goes on to state that it is willful misrepresentation for a person to obtain payments or other benefits in an amount greater than that to which he or she would have otherwise been entitled. Willful misrepresentation includes making a willful false statement or the willful misrepresentation, omission, or concealment of any material fact.

(1) Willful means a conscious or deliberate false statement, misrepresentation, omission, or concealment of a material fact with the specific intent of obtaining, continuing, or increasing workers' compensation benefits. Failure to disclose a work-type activity must be willful in order for a misrepresentation to have occurred.

[Title 296 WAC—p. 171]

(2) The assessment of the fifty percent penalty does not apply to those instances where the misrepresentation is not willful, as defined above. For example, a worker receives wages at the time of injury of \$10.25 per hour, but he inadvertently indicates on the report of industrial injury or occupational disease that his pay is \$10.75 per hour. The state fund employer fails to submit a completed report form and the time-loss compensation benefit rate is based on wages of \$10.75 per hour. When this information is provided to the employer, worker, and medical provider by legal order, no interested party submits a protest within the statutory time frame, but further investigation later reveals the misinformation. An overpayment determination under RCW 51.32.240 (1) may be appropriate upon discovery of the correct hourly pay rate, but the worker has not engaged in willful misrepresentation with specific intent to obtain benefits to which he would have otherwise not been entitled.

[Statutory Authority: RCW 51.04.010, 51.04.020, and 2004 c 243. 04-20-024, § 296-14-4121, filed 9/28/04, effective 11/1/04.]

WAC 296-14-4122 For purposes of determining willful misrepresentation, what does the term "specific intent" mean? "Specific intent" means the commission of an act or the omission of information with the knowledge that such an act or omission will lead to wrongfully obtaining benefits. For example, a worker who completes a document knowingly misrepresenting that he/she is unable to perform work or work-type activities has committed an act. Submitting this document to the department or self-insurer in order to wrongfully receive workers' compensation benefits under Title 51 RCW represents specific intent.

Examples of the omission of information with the intent of obtaining benefits include, but are not limited to, failure of the worker to advise the department or self-insurer of a return to work or of self-employment; or failure to provide the department or self-insurer with complete information about skills and abilities that would have changed the outcome of a vocational assessment or the department's decision to provide vocational services. Not providing this information to the department or self-insurer represents specific intent because the omission of it can cause continued workers' compensation benefits to which the worker would not have been entitled had the information been provided.

The following is an example of a situation that does not represent "specific intent": An injured worker's wife is hired to manage the mobile home park where they live. Wages were paid to her for the management duties. The injured worker would occasionally answer the telephone when his wife was not available and he opened and closed the park gates each morning. He did not engage in the maintenance work of the park, provide tours of the park to prospective customers or perform any other park management duties. The worker did not report this activity to the department, his physician or his vocational counselor. The worker's omission of information is not considered "willful misrepresentation" with "specific intent" to receive benefits to which he would not be otherwise entitled.

[Statutory Authority: RCW 51.04.010, 51.04.020, and 2004 c 243. 04-20-024, § 296-14-4122, filed 9/28/04, effective 11/1/04.]

[Title 296 WAC—p. 172]

WAC 296-14-4123 What is meant by "work-type activity"? (1) Work-type activity means any activity for which a reasonable person would expect to be compensated or for which a reasonable employer would expect to pay compensation.

(2) Work-type activity does not mean exploration of a job for a short period of time to determine whether the worker can do the job so long as:

(a) The worker does not receive wages, income, or anything of value; and

(b) The worker or his/her family has no financial interest in or benefits from the worker's job exploration.

Activity done intermittently or as a hobby that does not generate income will not generally rise to the level of repeated work-type activity.

For example, a worker who is receiving wage replacement benefits volunteers two hours each day for a recognized charity greeting customers and operating the cash register. His treating physician is aware of this activity and encourages it to keep him more active, but does not release him to work or to perform this function more than two hours daily. The worker does not initially inform the department of his activity because he receives no compensation and would not expect to. The department learns of the volunteer work when the worker completes a worker verification form indicating the volunteer activity. No willful misrepresentation of a work-type activity has occurred in this case.

[Statutory Authority: RCW 51.04.010, 51.04.020, and 2004 c 243. 04-20-024, § 296-14-4123, filed 9/28/04, effective 11/1/04.]

WAC 296-14-4124 What are considered as "wage replacement benefits"? Wage replacement benefits include temporary total disability (time-loss compensation benefits), temporary partial disability (loss-of-earning power benefits), and total permanent disability or survivor benefits (pension).

[Statutory Authority: RCW 51.04.010, 51.04.020, and 2004 c 243. 04-20-024, § 296-14-4124, filed 9/28/04, effective 11/1/04.]

WAC 296-14-4125 How does the department calculate the amount of overpayment charged to a claimant when a determination of "willful misrepresentation" has been made in initial claim adjudication? Overpayments are assessed in cases where there has been willful misrepresentation.

When it is determined that a claim was initially accepted as an industrial injury or occupational disease based on willful misrepresentation, the overpayment calculation includes all wage replacement benefits, permanent partial disability benefits, medical benefits, vocational benefits, and other medical aid fund benefits paid on the claim.

[Statutory Authority: RCW 51.04.010, 51.04.020, and 2004 c 243. 04-20-024, § 296-14-4125, filed 9/28/04, effective 11/1/04.]

WAC 296-14-4126 How does the department calculate the amount of overpayment charged to a claimant when a determination of "willful misrepresentation" has been made after initial claim adjudication? (1) Overpayments are assessed in cases where there has been willful misrepresentation. The overpayment calculation in these claims includes all or part of wage replacement benefits and may include permanent partial disability benefits, vocational,

medical benefits, and/or other medical aid fund benefits paid on the claim for the period as described below.

(a) The period of overpayment will begin with either the first date of willful misrepresentation or the first date of the repeated pattern of work or work-type activities.

(b) Medical benefits: Medical benefits paid on a claim may be included when a treating physician's opinion of the need for further treatment related to the claim, or his/her opinion of a condition's maximum medical improvement was changed by the willful misrepresentation. Only those medical services to which the worker would not have been otherwise entitled are included in the overpayment.

(c) Vocational benefits: Vocational benefits may be included when it is determined, because of the willful misrepresentation, that the vocational services would not have been provided but for the misrepresentation.

(d) Permanent partial disability benefits: Permanent partial disability benefits will be included when the worker's willful misrepresentation results in the receipt of permanent partial disability benefits to which the worker would not otherwise have been entitled.

(e) Other medical aid fund benefits: Other medical aid fund benefits may be included such as travel and lodging.

(f) Wage replacement benefits:

(i) The overpayment will include all of the wage replacement benefits resulting from willful misrepresentation when the worker has:

(A) Misrepresented his/her physical restrictions or engaged in a repeated pattern of work or work-type activities; and

(B) The worker would have been released by a physician to return to the job of injury had the repeated pattern of work or work-type activities been disclosed. In cases where a treating physician is unwilling or unable to render an opinion in this situation, the opinion of a consulting physician or independent medical examiner may be used; or

(C) In the case of total permanent disability benefits, the work or work-type activity is such that the imputed wages are equivalent to gainful employment; or

(D) In the case of survivor benefits, the willful misrepresentation was such that the beneficiary would not have been entitled to benefits were it not for the misrepresentation.

(ii) The overpayment will include all or part of the wage replacement benefits to which the worker would not otherwise have been entitled were it not for the repeated pattern of work or work-type activities when the worker has:

(A) Misrepresented his/her physical restrictions or has engaged in a repeated pattern of work or work-type activities; and

(B) The department would have determined that the worker returned to work; or

(C) A vocational counselor would have determined that the worker was employable in accordance with department rules.

(2) In cases, other than pension, when the wages or imputed wages are less than the total wage at the time of injury, the wage replacement portion of the overpayment equals the wage replacement benefit paid less the entitled loss-of-earning power benefits. However, this reduction will cease either the date the department had evidence of or a physician would have determined the worker had reached maxi-

mum medical improvement (MMI) had the repeated pattern of work or work-type activity been disclosed. In cases where a treating physician is unwilling or unable to render an opinion in this situation, the opinion of a consulting physician or independent medical examiner may be used. From that date forward, the wage replacement portion of the overpayment includes all wage replacement benefits paid.

[Statutory Authority: RCW 51.04.010, 51.04.020, and 2004 c 243. 04-20-024, § 296-14-4126, filed 9/28/04, effective 11/1/04.]

WAC 296-14-4127 How are penalties determined?

As provided in RCW 51.32.240, the penalties equal fifty percent of the total overpayment amount.

[Statutory Authority: RCW 51.04.010, 51.04.020, and 2004 c 243. 04-20-024, § 296-14-4127, filed 9/28/04, effective 11/1/04.]

WAC 296-14-4128 When may the department impute wages in cases where willful misrepresentation has been determined? The department may impute wages when:

- The worker is self-employed; or
- Appropriate payroll records are not available; or
- The employer is paying the worker in cash or material without maintaining appropriate payroll records; or
- There is no employer but the worker has engaged in a repeated pattern of work-type activities or has willfully misrepresented his or her physical restrictions.

[Statutory Authority: RCW 51.04.010, 51.04.020, and 2004 c 243. 04-20-024, § 296-14-4128, filed 9/28/04, effective 11/1/04.]

WAC 296-14-4129 How will imputed wages be determined? (1) When the worker has performed work or work-type activities within the state of Washington, the department imputes wages based on information collected and reported by the department of employment security. This information may include wages for the same or similar jobs within the geographic area proximate to the worker and for the same or most proximate time period as the work or work-type activities performed.

(2) When the worker performed work or work-type activities outside the state of Washington for which wages are to be imputed, the department will use information collected and reported by the United States Department of Labor Statistics to determine the correct imputed wage.

(3) In no case shall the imputed wages equal less than the hourly minimum wage for the proximate time period and geographic area used.

(4) If the worker engaged in reduced work or work-type activities when compared to the employment at the time of injury, except in pension cases, the department shall calculate the loss-of-earning power benefits consistent with RCW 51.32.090(3) to which the worker would have been entitled based on the imputed wage.

Example of imputed wage: A worker received time-loss compensation benefits and contended he was unable to work in his regular job as a construction laborer. Investigation showed that he was working painting houses on a regular full-time basis. The work he performed was ongoing over an extended period of time. Payments for this work were reported on a cash basis and no records were kept.

Wages would be imputed based on the average wage of a painter in his local area as reported by the department of employment security.

Example of reduced work or work-type activity: A worker was receiving time-loss compensation benefits for a shoulder injury she suffered while working as a registered nurse. She contended she was unable to perform nursing duties. The department received evidence that she had in fact been working on a regular basis as a cashier in her husband's delicatessen. There were no wages reported for this work. The evidence also showed she had worked there for several months.

The medical and vocational providers were shown the investigative evidence and they determined the worker was able to work and had returned to work as a cashier.

The department would impute wages based on the average wage paid by the business owner to other employees in the same position. If there were no other employees, wages would be imputed based on the average wage of a cashier in the local area as reported by the department of employment security.

Example of release for work and no imputed wage: A worker, who was a carpenter on the date of injury, was receiving time-loss compensation benefits based on his alleged inability to return to work. He contended he had to use a wheelchair to get around.

Video evidence was obtained showing him performing extensive remodeling work on a rental home he owned. He did not use the wheelchair and there was no indication he had any difficulties performing the work. His activities included installing siding and windows, painting, and performing other activities inconsistent with his alleged level of disability. He received no wages as the work was done on his personal property.

The video was shown to his attending physician. The physician withdrew his certification of the worker's entitlement to time-loss compensation benefits and released him to return to work at his job of injury effective the first date of the video surveillance.

There is no need to impute wages because the release for work was to the job of injury.

[Statutory Authority: RCW 51.04.010, 51.04.020, and 2004 c 243. 04-20-024, § 296-14-4129, filed 9/28/04, effective 11/1/04.]

WAC 296-14-420 Payment of benefits—Aggravation reopening/new injury. (1) Whenever an application for benefits is filed where there is a substantial question whether benefits shall be paid pursuant to the reopening of an accepted claim or allowed as a claim for a new injury or occupational disease, the department shall make a determination in a single order. Where one of the claims is with a self-insured employer and another is with a state fund employer, such determination shall be made jointly by the program managers for claims administration and self insurance, or their respective designees.

(2) Pending entry of the order, benefits shall be paid promptly by the entity which would be responsible if the claim were determined to be a new injury or occupational disease.

(3) The department is required to act under this rule only if:

- (a) There is substantial evidence that the worker will be determined to be entitled to benefits on one of the claims; and
- (b) There is uncertainty regarding which of the entities is responsible.

(4) Time-loss compensation shall be paid at the lesser of the two entitlements that may apply to the claim until responsibility has been determined between state fund and self-insured employer, two self-insured employers, or two state fund employers.

(5) If, upon final determination of the responsible insurer, the entity that paid benefits under subsection (2) of this section is determined not to be responsible for payment of benefits, such entity shall be reimbursed by the responsible entity for all amounts paid.

[Statutory Authority: Chapters 51.04, 51.08, 51.12, 51.24 and 51.32 RCW and 117 Wn.2d 122 and 121 Wn.2d 304. 93-23-060, § 296-14-420, filed 11/15/93, effective 1/1/94. Statutory Authority: RCW 51.32.110 and 51.32.190(6). 90-19-028, § 296-14-420, filed 9/12/90, effective 10/13/90.]

WAC 296-14-520 Why is it important to establish the worker's monthly wage? The department or self-insurer is required to establish a monthly wage that fairly and reasonably reflects workers' lost wages from all employment at the time of injury or date of disease manifestation. This monthly wage, which is calculated using the formulas in RCW 51.08.178, represents the worker's lost earning capacity. This monthly wage is used to calculate the rate of the worker's total disability compensation or beneficiary's survivor benefits under Washington's Industrial Insurance Act.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 142 Wn.2d 801 (2001). 03-11-035, § 296-14-520, filed 5/15/03, effective 6/15/03.]

WAC 296-14-522 What does the term "wages" mean? The term "wages" is defined as:

(1) The gross cash wages paid by the employer for services performed. "Cash wages" means payment in cash, by check, by electronic transfer or by other means made directly to the worker before any mandatory deductions required by state or federal law. Tips are also considered wages but only to the extent they are reported to the employer for federal income tax purposes.

(2) Bonuses paid by the employer of record as part of the employment contract in the twelve months immediately preceding the injury or date of disease manifestation.

(3) The reasonable value of board, housing, fuel and other consideration of like nature received from the employer at the time of injury or on the date of disease manifestation that are part of the contract of hire.

Exception: Payments for items other than board, housing, fuel or other consideration of like nature made by the employer to a trust fund or other entity for fringe benefits do not constitute wages.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 142 Wn.2d 801 (2001). 03-11-035, § 296-14-522, filed 5/15/03, effective 6/15/03.]

WAC 296-14-524 How do I determine whether an employer provided benefit qualifies as "consideration of like nature" to board, housing and fuel? To qualify as "consideration of like nature" the employer provided benefit must meet all of the following elements:

(1) The benefit must be objectively critical to protecting the worker's basic health and survival at the time of injury or date of disease manifestation.

(a) The benefit must be one that provides a necessity of life at the time of injury or date of disease manifestation without which employees cannot survive a period of even temporary disability.

(b) This is not a subjective determination. The benefit must be one that virtually all employees in all employment typically use to protect their immediate health and survival while employed.

(c) The benefit itself must be critical to protecting the employee's immediate health and survival. The fact that a benefit has a cash value that can be assigned, transferred, or "cashed out" by an employee and used to meet one or more of the employee's basic needs is not sufficient to satisfy this element.

(2) The benefit must be readily identifiable. The general terms and extent of the benefit must be established through the employer's written policies, or the written or verbal employment contract between the employer and worker (for example, a collective bargaining agreement that requires the employer to pay a certain sum for the employee's health insurance).

(3) The monthly amount paid by the employer for the benefit must be reasonably calculable (for example, as part of the employment contract, the employer agrees to pay three dollars for each hour worked by the employee for that person's health insurance).

Examples of benefits that qualify as "consideration of like nature" are medical, dental and vision insurance provided by the employer.

Examples of benefits that do **not** qualify as "consideration of like nature" are retirement benefits or payments into a retirement plan or stock option, union dues and life insurance provided by the employer.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 142 Wn.2d 801 (2001). 03-11-035, § 296-14-524, filed 5/15/03, effective 6/15/03.]

WAC 296-14-526 Is the value of "consideration of like nature" always included in determining the worker's compensation? (1) No. The value of other consideration of like nature is only included in the worker's monthly wage if:

(a) The employer, through its full or partial payment, provided the benefit to the worker at the time of injury or on the date of disease manifestation;

(b) The worker received the benefit at the time of injury or on the date of disease manifestation.

This section is satisfied if, at the time of injury or on the date of disease manifestation:

(i) The employer made payments to a union trust fund or other entity for the identified benefit; and

(ii) The worker was actually eligible to receive the benefit.

Example: At the time of the worker's industrial injury, the employer paid two dollars and fifty cents for each hour worked by the employee to a union trust fund for medical insurance on behalf of the employee and her family. If the employee was able to use the medical insurance at the time of her injury, the employer's monthly payment for this benefit is included in the worker's monthly wage, in accordance with

(2007 Ed.)

(d) of this subsection. This is true even where the worker's eligibility for this medical insurance is based primarily or solely on payments to the trust fund from past employers.

(c) The worker or beneficiary no longer receives the benefit and the department or self-insurer has knowledge of this change.

If the worker continues to receive the benefit from a union trust fund or other entity for which the employer made a financial contribution at the time of injury or on the date of disease manifestation, the employer's monthly payment for the benefit is **not** included in the worker's monthly wage.

Example: An employer contributes two dollars and fifty cents for each hour an employee works into a union trust fund that provides the employee and her family with medical insurance. If the employer stops contributing to this fund, but the worker continues to receive this benefit, the employer's monthly payment for the medical insurance is not included in the worker's monthly wage.

(2) This rule does not permit the department or self-insurer to alter, change or modify a final order establishing the worker's monthly wage except as provided under RCW 51.28.040.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 142 Wn.2d 801 (2001). 03-11-035, § 296-14-526, filed 5/15/03, effective 6/15/03.]

WAC 296-14-528 How do I determine the value of a benefit that qualifies as "consideration of like nature"?

The amount paid by the employer for the benefit at the time of injury or on the date of disease manifestation represents the amount that may be included in the worker's monthly wage.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 142 Wn.2d 801 (2001). 03-11-035, § 296-14-528, filed 5/15/03, effective 6/15/03.]

WAC 296-14-530 Is overtime considered in calculating the worker's monthly wage? (1) When the worker's monthly wage is computed under RCW 51.08.178(1), only the overtime hours the worker normally works are taken into consideration.

(2) When the worker's monthly wage is computed under RCW 51.08.178(2), the overtime pay is included in determining the worker's wages.

(2) When the worker's monthly wage is computed under RCW 51.08.178(2), the overtime pay is included in determining the worker's wages.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 142 Wn.2d 801 (2001). 03-11-035, § 296-14-530, filed 5/15/03, effective 6/15/03.]

WAC 296-14-600 Payment of benefits on asbestos-related disease claims. The department shall furnish the benefits provided under Title 51 RCW to any worker or beneficiary who may have a right or claim for benefits under the maritime laws of the United States resulting from an asbestos-related disease if there are objective clinical findings to substantiate that the worker has an asbestos-related claim for occupational disease; and the worker's employment history has a prima facie indicia of injurious exposure to asbestos fibers while employed in the state of Washington in employment covered under Title 51 RCW.

(1) A worker's employment history will be deemed to have a prima facie indicia of injurious exposure to asbestos fibers if the employment history as contained in the department's file permits a reasonable conclusion that the worker

was exposed to asbestos fibers and that such exposure was of sufficient duration to be injurious. "Injurious" means impairing to either a partial or total extent, and may be either permanent or temporary.

(2) Whenever the department has determined to pay benefits pursuant to chapter 271, Laws of 1988, the department shall render a decision as to the liable insurer and shall continue to pay benefits until the liable insurer initiates payments or benefits are otherwise properly terminated.

The department shall render its decision in a final order as provided in RCW 51.52.050.

Initiation of payments by a liable insurer shall be deemed to occur on the date such insurer issues a check or warrant or otherwise remits to the worker, beneficiary, or any provider any payment of any benefits owed by such insurer on the claim for asbestos.

(3) Benefits shall be paid on all pending asbestos-related claims as of July 1, 1988. Pending claims are those which have not been finally adjudicated by order of the department or the board of industrial insurance appeals or by the entry of a judgment of a superior court or decision of the court of appeals or the supreme court.

If any order of the department granting such benefits is appealed, benefits shall continue, if otherwise available, until a final determination is made by the board of industrial insurance appeals or the courts, or upon initiation of payments by a liable insurer.

(4) If benefits are paid by the department from the medical aid fund on an asbestos-related claim, and it is determined by the department that such benefits are owed to the worker or beneficiary by an insurer under the maritime laws of the United States or by another federal program other than the Federal Social Security, Old Age Survivors and Disability Insurance Act, 42 U.S.C., the department shall pursue such insurer or program to recover such benefits as may have been paid by the department.

The determination by the department shall be expressed in a final order as provided by RCW 51.52.050.

(5) Whenever a self-insured employer is determined to be liable, the self-insured employer shall reimburse benefits to the department within ten days after the department order becomes final and binding. Failure to do so shall subject the employer to a penalty as authorized in RCW 51.48.080.

(6) The director's discretion to waive recovery of the benefits paid to the claimant or beneficiary shall be exercised in accordance with WAC 296-14-200 (3)(c).

(7) No information obtained under this section is subject to release by subpoena or other legal process. The department will release information only to those persons authorized access to claim files by RCW 51.28.070.

[Statutory Authority: Chapters 51.08 and 51.32 RCW. 88-14-011 (Order 88-13), § 296-14-600, filed 6/24/88.]

WAC 296-14-6200 What is a residence modification?

A residence modification is a permanent change to an existing residence or a repair of a modification previously approved and paid for by the department or self-insured employer, or a modification made when constructing a new residence.

Household appliances such as refrigerators, washers, and dryers, are generally not residence modifications and the

department or self-insured employer will approve them only under unique circumstances as approved by the supervisor.

Example: As part of an approved residence modification, the kitchen counters are lowered. To meet the needs of the worker, the department or self-insured employer may approve the purchase of a drop-in range or cooktop.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6200, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6202 What is the residence modification benefit? The residence modification benefit is a sum of money used to modify a worker's residence for purposes of safety, mobility and activities of daily living, when those modifications are made necessary by the nature of the worker's condition subsequent to a catastrophic injury. Activities of daily living are tasks required for self-care, communication and mobility and include, but are not limited to, bathing, bed mobility, dressing, eating, grooming, toileting and transfers.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6202, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6204 Which workers may be eligible to receive benefits for residence modifications? Residence modification benefits are only available to workers with an allowed catastrophic injury claim. Catastrophic injuries are the most serious of conditions and include, but are not limited to, head trauma, paralysis and amputation.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6204, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6206 Which residences may be eligible to be modified? Before the department or self-insured employer will consider an application for modification, the residence must meet the following criteria:

(1) The residence must be structurally sound and free of obvious structural defects. The department may request a safety inspection. The department or self-insured employer will not pay for a residence to be brought up to state and local code except as required to complete a necessary and approved modification.

(2) The residence can be adapted to be suitable for the worker's needs for purposes of daily living.

(3) In the opinion of the worker's health care providers, the worker can live in the residence after modification.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6206, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6208 When may the worker request residence modification benefits? The worker may request residence modification at any time when his or her allowed claim is either open or the worker has been determined to be permanently and totally disabled.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6208, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6210 What is the maximum amount of the residence modification benefit? The maximum amount of the benefit is the state's average annual wage at the time that each modification request is approved. The department

or self-insured employer will not pay for modifications that exceed the maximum amount. The department or self-insured employer may make several payments, so long as the total paid does not exceed the maximum benefit.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6210, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6212 Can the worker receive additional modification benefits for the same residence? The department can pay for additional or subsequent residence modifications so long as the cost does not exceed the maximum benefit in effect at the time that each modification request is approved.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6212, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6214 Can a worker receive residence modification benefits for more than one house? No. The department or self-insured employer will pay for residence modifications on only one residence for each catastrophically injured worker.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6214, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6216 How can a worker begin the process of requesting residence modification benefits? The worker may inquire about residence modification benefits by contacting his or her adjudicator. The department or self-insured employer will then refer the worker to a residence modification consultant for evaluation.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6216, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6218 How does the department or self-insured employer determine the worker's residence for purposes of residence modification? The department or self-insured employer will consider modifying a residence when the worker lives in and considers the residence to be his or her permanent residence. It is not required that the worker own or rent the residence.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6218, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6220 What type of residence may the department or self-insured employer modify? The department or self-insured employer may modify a standard house, a residential unit in a multiunit dwelling, or a manufactured/mobile residence.

The department or self-insured employer will only authorize modification of manufactured/mobile residences when the factory assembled structures division of the department reviews and approves the plans in advance.

The department or self-insured employer will not approve modification of commercial coaches.

The department or self-insured employer will not approve modification of recreational vehicles or recreational park trailers used as permanent residences, unless the local jurisdiction allows recreational vehicles or recreational park trailers to be used as a dwelling, and the factory assembled

structures division of the department reviews and approves the plans in advance.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6220, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6222 What is a residence modification consultant, and how are they involved in the process of residence modification? When the worker has notified the department or self-insured employer of his or her intention to request a residence modification, the department or self-insured employer will require an on-site evaluation by a residence modification consultant.

A residence modification consultant must be either a licensed physical or occupational therapist, or licensed nurse, and must be trained or experienced in both rehabilitation of catastrophic injuries and in modifying residences. The department or self-insured employer will pay for the services of the residence modification consultant pursuant to department provider rules.

The residence modification consultant will assist the worker, the contractor and the worker's health providers to determine what modifications will be requested and submit a written report to the department or self-insured employer and the worker. If modifications are approved, the residence modification consultant may assist the worker and the contractor if requested by the department or self-insured employer.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6222, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6223 Will the department pay for professional services needed to design a residence modification? Yes. However, the department or self-insured employer will not pay for professional services prior to approval of the residence modification.

If approved, the cost of architectural, engineering, pre-design and planning services will be included in the residential modification benefit. The cost for services should be included in the residence modification request.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6223, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6224 What must the worker submit to the department in a completed request for a residence modification? For the department to process a residence modification request, the worker must provide the adjudicator with at least the following information:

- (1) Documentation of residence ownership. If the worker does not own the residence, he or she must submit the actual owner's proof of ownership and written legal permission signed by the actual owner to modify the residence as indicated in the proposed plan; and
- (2) A report signed by the residence modification consultant for all necessary modifications; and
- (3) Competing and detailed bids from two licensed, registered and bonded contractors.

Exceptions: If it is not possible to obtain two bids, a written explanation of the circumstances must be provided. If family or friends will perform free labor, they need not be licensed, registered and bonded, but must still submit a bid for the cost of materials.

(4) A copy of the acknowledgment of responsibilities letter signed by both the worker and the contractor. A copy of this form can be obtained from the department.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6224, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6226 What other information must be submitted to the department in a completed application for a residence modification? (1) The attending health services provider may need to submit medical documentation verifying the worker's condition and the necessity for any residence modification.

(2) The residence modification consultant must submit an evaluation, based on an in-home inspection, of the worker's needs for safety, mobility and activities of daily living. This evaluation must be in the form of a written report with pictures or drawings.

(3) Any additional information requested by the department or self-insured employer that might be needed to evaluate a specific request.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6226, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6228 Who will approve or deny a request for residence modification? The department will pay the benefit only with the approval of the supervisor of industrial insurance. A self-insured employer may pay the benefit without the supervisor's approval, but may not deny the benefit. The supervisor of industrial insurance alone has the authority to deny a residence modification benefit.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6228, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6230 What will the supervisor consider when approving or denying a residence modification request? The supervisor will consider requests for residence modifications on a case-by-case basis. The supervisor may approve all or part of the requested modifications, based on what is reasonable and necessary for the individual worker.

In order to determine what is reasonable and necessary, the supervisor will review the completed application and will consider at least the following:

(1) Whether the worker is eligible to receive a residence modification benefit; and

(2) The needs and preferences of the individual worker, based on information provided by the injured worker; and

(3) Whether the proposed residence is appropriate for modification; and

(4) Whether the proposed modifications are appropriate for the style, nature and condition of the residence; and

(5) The attending health care provider's opinions of the medical condition, physical needs of the worker and whether the worker can reside in the residence after the modifications are complete; and

(6) The residence modification consultant's evaluation of whether the proposed modification is necessary to meet the worker's current need for safety, mobility and activities of daily living; and

(7) Whether the contractor's proposed plan will satisfy the necessary modification; and

[Title 296 WAC—p. 178]

(8) Whether the proposed plans submitted by the contractors are consistent with state guidelines for specially adapted residential housing, if any; and

(9) The contractor's proposed modification plan is consistent with the guidelines established by the United States Department of Veterans Affairs in their publication entitled "*Handbook for Design: Specially Adapted Housing*," or the recommendations published in "*The Accessible Housing Design File*" by Barrier Free Environments, Inc.; and

(10) Whether the proposed modifications are being provided at the least cost while maintaining quality.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6230, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6232 What happens if the residence modification costs exceed the maximum benefit? The department or self-insured employer may approve a payment of a portion of a residence modification request, not to exceed the maximum benefit. The department or self-insured employer will identify the portions of the residence modification for which payment will be approved based on the worker's current need for safety, mobility and activities of daily living.

If the costs of the proposed modifications of an existing residence exceed the benefit, the worker is responsible for payment of the balance of the costs. The worker must choose one of the following options:

(1) Adjust their request for modifications to remain within the benefit; or

(2) Obtain additional financing. If the worker chooses to obtain additional financing, he or she must submit to the department written verification of the additional financing from the funding source. The supervisor will deny the residence modification if the worker is unable to cover the additional costs.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6232, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6234 Can a worker apply the residence modification benefit to the cost of building a new residence? Yes. However, the benefit may be applied only to the cost difference between a standard residence structure and the modified structure.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6234, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6236 How is a worker advised that the supervisor has approved or denied the request for residence modification benefits? The department will notify the worker, contractors, homeowner (if not the worker), residence modification consultant, attending health services provider and employer of the supervisor's decision in writing.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6236, filed 2/28/06, effective 4/1/06.]

WAC 296-14-6238 Who receives payment from the department? The department will pay the contractor directly and/or reimburse the worker for any payment already made to the contractor for approved and completed residence modifications. In order to determine that modifications have been

(2007 Ed.)

satisfactorily completed, the department will require the following documents to be submitted before releasing final payment:

- (1) A signed letter of satisfaction from the worker; and
- (2) A positive report of a final inspection from the appropriate inspection authorities, if required; and
- (3) A report of an inspection from the residence modification consultant if requested by the department; and
- (4) A release of lien form signed by the contractors or subcontractors or both.

[Statutory Authority: RCW 51.04.010, 51.04.020, 51.32.240, and 2005 c 411. 06-06-065, § 296-14-6238, filed 2/28/06, effective 4/1/06.]

WAC 296-14-900 Authority to use special assistant attorneys general. WAC 296-14-900 through 296-14-940 implement RCW 51.12.102 and 51.24.110, which authorize the department to use private attorneys as special assistant attorneys general.

[Statutory Authority: RCW 51.24.110 and 51.12.102. 98-19-001, § 296-14-900, filed 9/2/98, effective 10/5/98. Statutory Authority: Chapters 51.04, 51.08, 51.12, 51.24 and 51.32 RCW and 117 Wn.2d 122 and 121 Wn.2d 304. 93-23-060, § 296-14-900, filed 11/15/93, effective 1/1/94. WAC 296-14-910 Lists of special assistant attorneys general. (1) The department must determine from the application and other sources if an attorney qualifies to be placed on the lists of attorneys eligible to represent the department as special assistant attorneys general. The department may consult with the Washington State Bar Association and the office of the attorney general to make the determination.

(2) The office of the attorney general must appoint qualified attorneys as special assistant attorneys general. Once appointed, these attorneys become eligible to represent the department. Appointed attorneys serve at the pleasure of the office of the attorney general, and the appointments may be canceled without cause.

(3) The department must compile and maintain lists of attorneys eligible to represent the department as special assistant attorneys general. Referrals may be made from the lists and contracts entered into.

(4) Once a year, the department must provide a current copy of its lists of attorneys to the office of the attorney general and to the Washington State Bar Association.

[Statutory Authority: RCW 51.24.110 and 51.12.102. 98-19-001, § 296-14-910, filed 9/2/98, effective 10/5/98. WAC 296-14-920 Qualifications of special assistant attorneys general. To be eligible for placement on the department's lists of attorneys, an attorney must:

- (1) Be an active member of the Washington State Bar Association;
- (2) Meet bar association requirements of the state the action is in, if other than Washington;
- (3) Maintain a trust account in compliance with the rules of professional conduct; and

(2007 Ed.)

- (4) Have and maintain in force professional liability insurance.

[Statutory Authority: RCW 51.24.110 and 51.12.102. 98-19-001, § 296-14-920, filed 9/2/98, effective 10/5/98. Statutory Authority: RCW 51.24.110. 88-08-026 (Order 88-03), § 296-14-920, filed 3/31/88.]

WAC 296-14-930 Applying for special assistant attorney general. (1) Application forms may be obtained from the office of the attorney general, the Washington State Bar Association, or the department.

- (2) The applicant must:
 - (a) Complete the form and send it to the department; and
 - (b) Inform the department and the office of the attorney general immediately of any changes in his or her qualifications.

[Statutory Authority: RCW 51.24.110 and 51.12.102. 98-19-001, § 296-14-930, filed 9/2/98, effective 10/5/98. Statutory Authority: RCW 51.24.110. 88-08-026 (Order 88-03), § 296-14-930, filed 3/31/88.]

WAC 296-14-940 Removal of special assistant attorneys general. (1) RCW 51.12.102 and 51.24.110 and WAC 296-14-900 through 296-14-940 do not give private attorneys on the special assistant attorneys general lists any right to expect employment.

(2) Private attorneys, unless representing the department in a specific case, must not:

- (a) Refer to themselves as "special assistant attorney general"; or
- (b) Include this designation on any correspondence or pleadings relating to services.

(3) The department, in conjunction with the office of the attorney general and the Washington State Bar Association, may remove an attorney for cause from the lists of attorneys eligible to represent the department. Cause includes, but is not limited to:

- (a) Misuse of the designation "special assistant attorney general";
- (b) Lapse of any qualification; or
- (c) Failure to meet performance requirements of the department contract.

(4) After one year an attorney may write to the department and request to be placed on the lists of attorneys eligible to represent the department again. The department in its discretion may place the attorney on its lists again.

(5) If the department removes an attorney from the lists a second time, or if the department decides not to place a removed attorney on its lists again, the department must notify the office of the attorney general to cancel the appointment. The department may refer the attorney to the Washington State Bar Association for consideration of disciplinary action. The attorney must reapply for appointment.

[Statutory Authority: RCW 51.24.110 and 51.12.102. 98-19-001, § 296-14-940, filed 9/2/98, effective 10/5/98. WAC 296-14-955 Attorney's fees. (1) The department of labor and industries (hereinafter department) shall fix a reasonable attorney fee to be paid by the worker, crime victim, or beneficiary for services rendered with the department if written application therefor is made by the attorney, worker, crime victim, or beneficiary, as provided in RCW 51.52.120.

(a) Fees will be set only for services rendered prior to the notice of appeal;

(b) On closed claims, fees will only be set if written application is received by the department within one year from the claim closure date as indicated on the department order.

(c) If such application for fixing of a fee is made by the attorney, it shall set forth therein the monetary amount which the attorney considers reasonable for all services rendered with the department, the reason such fee is considered to be reasonable, and a detailed breakdown of the time spent by the attorney in representing the injured worker.

(d) In all instances, the department shall afford to all parties affected a minimum of ten days in which to submit comment and material information which may be helpful to the department in setting a fair and reasonable fee.

(e) The department will provide copies of information sent to the department to the attorney, worker, crime victim, or beneficiary upon request.

(f) Informal contact may be made with the parties to determine the feasibility of reaching an agreement on the amount of the fees.

(g) Additional information necessary to reach a decision may be requested by the department.

(2) *Fee fixing criteria.* All attorney fees fixed by the department where application therefor has been made shall be established in accordance with the following general principles:

(a) Only one fee shall be fixed for legal services in any one claim regardless of the number of attorneys representing the worker, crime victim, or beneficiary, except that in cases of multiple beneficiaries represented by one or multiple attorneys the department has the discretion to set more than one attorney fee if so requested.

(b) The department shall defer fixing a fee until such time as information, which it deems sufficient upon which to base a fee, is available.

(c) A fee shall be fixed only in those cases where the attorney's services are instrumental in securing additional benefits to the worker, crime victim, or beneficiary.

(d) Where increased compensation is obtained, the fee may be fixed without regard to any medical benefits secured.

(e) In setting all fees, the following factors shall be carefully considered and weighed:

(i) Nature of the claim.

(ii) Novelty and complexity of the issues presented or other unusual circumstances.

(iii) Time and labor expended.

(iv) Skill and diligence in resolving the claim.

(v) Extent and nature of the relief.

(vi) The prevalent practice of charging contingency fees in the department.

(vii) The worker's or crime victim's circumstance and the remedial social purposes of the Industrial Insurance Act and

of the Crime Victims Compensation Act, which are intended to provide sure and adequate relief to injured workers and crime victims and their families.

(3) The manager of the claims consultant division of the department is the director's designee to process all petitions to set attorney's fees and to issue orders setting those fees for services rendered by attorneys in securing industrial insurance benefits. The supervisor of the crime victims section of the department is the director's designee to process all petitions to set attorney's fees and to issue orders setting those fees for services rendered by attorneys in securing crime victims benefits.

WAC 296-14-970 Worker's review of claim file. (1) Pursuant to RCW 51.28.070, workers may be allowed to review their claim file(s) upon written request to the department or self-insurer. The written request should contain the worker's name, claim number, signature, and the information requested. If the request is approved, the department or self-insurer shall provide a copy of the claim file to the worker.

(2) Reasons for denying release of a claim file, to a worker shall include, but not be limited to the following:

(a) Presence of psychological, mental health, or physical treatment records, investigative reports or other records, release of which may not be in the interest of the worker.

(b) Medical opinion or other documented information indicates the worker is a danger to himself or herself or others.

(3) If, pursuant to the criteria established under subsection (2) of this section, the self-insured employer determines that release of the claim file, in whole or in part, may not be in the worker's interest, the employer must submit a request for denial with explanations along with a copy of that portion of the claim file not previously submitted to the self-insurance section within twenty days after receipt of the request from the worker.

(4) If the request for the claim file is denied, in whole or in part, a written order of denial will be issued by the department and mailed to the worker. The worker may appeal the order to the board of industrial insurance appeals.

(5) The provisions of this rule will apply to all claims regardless of the date of injury.

[Statutory Authority: RCW 51.28.070. 90-18-002, § 296-14-970, filed 8/23/90, effective 9/23/90.]

WAC 296-15-001 Definitions. (1) "Substantially similar":

(a) The text of the department's document has not been altered or deleted; and

(b) The self-insurer's document has the text:

(i) In approximately the same font size;

(ii) With the same emphasis (bolding, italics, underlining, etc.); and

(iii) In approximately the same location on the page as the department's document.

(2) "Third-party administrator": An entity which contracts to administer workers' compensation claims for a self-insured employer.

(3) "Claims management entity": All individuals designated by the self-insured employer to administer workers' compensation claims, including self-administered organizations and third-party administrators.

WAC 296-15-021 Self-insurance certification requirements and application process. (1) **What requirements must an employer meet to apply for self-insurance certification?** An employer must meet all the following minimum criteria:

(a) Be in business for three years prior to applying for self-insurance.

(b) Have a written accident prevention program in place in Washington state for at least six months prior to making application.

(c) Have total assets worth at least twenty-five million dollars as verified by audited financial statements prepared by independent certified accountants.

(d) Demonstrate positive earnings in the current year and two out of the last three years. The overall earnings for the last three years must also be positive.

(e) Have a current liquidity ratio of at least 1.3 to 1, and a debt to net worth ratio of not greater than 4 to 1.

(2) **When are applications processed?** The department processes applications for certification the quarter after the application is accepted. Self-insurance certification for approved applicants will be effective the quarter following processing.

(3) **What documentation must be submitted with an application?** The following documentation must be submitted with each self-insurance application:

(a) A completed application form (Form F207-001-000) with a nonrefundable application fee. The application fee is reviewed annually by the department and is based on the administrative costs incurred in processing an application, but in no instance will it be less than two hundred fifty dollars.

(b) Three years of audited financial statements prepared by independent certified accountants. The audited financial statements must be in the name of the applicant.

(c) A list of all of the applicant's physical locations and addresses in Washington state, including all subsidiary operations.

(d) A copy of the written accident prevention program for each of the applicant's operations in Washington. If the applicant or any of its subsidiaries has multiple locations, more than one copy of the accident prevention program may be required.

(e) A completed Self-Insurance Certification Questionnaire (Form 207-176-000).

(4) What happens during the application review process? The department:

(a) Assesses the accident prevention program at department-selected sites.

(b) Analyzes the financial information supplied by the applicant. The department may also consider relevant information obtained from other sources to assess the applicant's financial strength.

(c) Reviews the completed Claims Administration Questionnaire and attachments. Additional information may be requested.

The department determines whether the application is denied or tentatively approved. The department notifies each applicant of its decision. If the department denies an application, it will state the reasons for the denial in its notification.

(5) If the application is denied, when may the applicant submit a new application? If an application is denied for deficiencies in its accident prevention program, the applicant may submit a new application for certification after the corrections to the program are made and have been in place for six months.

If the application is denied for financial reasons, the applicant may submit a new application for certification after the next annual audited financial statement is available.

If the application is denied because the claims administration organization is deficient, the applicant may submit a new application for certification after corrections to the program are made.

(6) What if the application is tentatively approved? The applicant must submit the following:

(a) Surety in the amount determined by the department and issued on the department form.

(b) A signed copy of the service agreement with a third-party administrator, if applicable.

(i) The contract copy may delete clauses(s) relating to payment of services.

(ii) However, if payment for services is based on the number of claims filed by the self-insurer's workers, this must be explained in detail.

(c) A copy of any excess insurance (reinsurance) policy including Washington state endorsements, if obtained.

(d) A signed copy of the Acknowledgement of Self-Insurance Responsibilities form.

(e) Payment of any outstanding premium of the applicant's state industrial insurance account.

(f) Payment of the applicant's estimated portion of the deficit, if a deficit condition in the state industrial insurance fund exists at the time of application.

If the required items are not received prior to the end of the quarter, the application may be denied. If the application

is denied, the applicant must reapply in order to be considered for self-insurance.

(7) How is the initial surety requirement established? The initial surety requirement is established at the highest of the following:

(a) The annual premiums the applicant pays (or would pay) into the state industrial insurance fund; or

(b) The annual average of the last five years of developed incurred costs to the state industrial insurance fund; or

(c) The minimum surety requirement as established annually by the department. The minimum surety requirement is equal to the average total cost of one permanent total disability award.

The applicant has the option of submitting an independent actuarial analysis of its projected liability. The department reserves the right to accept or reject this analysis. In no event will the surety requirement be established at less than the minimum surety in force at that time.

WAC 296-15-024 Additional certification requirements. **(1) What if the employer is a joint venture?** A joint venture is defined as two or more employers that have signed a contractual agreement to operate as a single unit for a specified period of time for the completion of a specific task. The department will consider a joint venture's application for self-insurance if the joint venture is sponsored by a current self-insurer.

In addition to the standard certification requirements found in WAC 296-15-021, an application from a joint venture must include:

(a) The name of a sponsoring party. The sponsoring party must be a certified self-insurer in good standing with the department and have a majority financial interest in the assets and profits of the joint venture.

(b) A list of named participants. Each named participant must also:

(i) Demonstrate that it has at least twenty percent interest in the joint venture.

(ii) Submit three years' worth of audited financial statements prepared by certified independent accountants.

(c) A written acknowledgement from each named participant of its joint and several liability for continuing compensation if any participant of the joint venture defaults. This responsibility continues until the department grants a written release to the joint venture or the remaining participant(s) of the joint venture. A written release from the department is granted only after the contract has been completed and a final settlement of the joint venture account has been made.

(d) A written description of the obligations of each participant for the industrial insurance program of the joint venture.

(e) A written acknowledgement of the sponsoring party's responsibilities for the management of all claims and payment of all compensation incurred during the period of the joint venture's self-insurance certification and after the joint venture is dissolved. This acknowledgement must include the

sponsor's continuation of benefits if the joint venture or any of the other parties of the joint venture defaults.

(2) **What if the employer is an employee stock ownership program (ESOP)?** An employee stock ownership program is defined as a firm in which the employees have purchased a majority of the financial interest.

If the employees purchase an existing self-insured company, that company would be required to return to the state industrial insurance fund for a minimum of one year before the department would consider its application for self-insurance.

(3) **What additional requirements exist if the employer is a group?** A group is defined as a group of employers authorized under chapter 51.14 RCW to form self-insurance groups.

(a) In addition to the standard certification requirements found in WAC 296-15-021, an application from a group must include:

- (i) A copy of the group's bylaws.
- (ii) Individual applications for each of its members along with the current audited financial information of each member.
- (iii) A current audited consolidated financial statement of the group (if the group exists at the time of the application).
- (iv) A listing of the estimated standard premium to be developed for each member individually and the estimated standard premium of the group as a whole.
- (v) An indemnity agreement jointly and severally binding the group and each member to comply with the provisions of Title 51 RCW.
- (vi) A detailed budget of all projected administrative revenues and expenses for the first year of operation.

(b) When the application for a group is tentatively approved, the applicant must submit the following:

- (i) Surety, established at one hundred twenty-five percent of the standard industrial insurance premiums.
- (ii) A copy of the aggregate excess insurance coverage policy.
- (iii) Documentation of a contingency reserve that is the greater of:
 - (A) Fifteen percent of the estimated claims liability; or
 - (B) Twenty-five percent of the standard industrial insurance premium.

[Statutory Authority: RCW 51.04.020, 51.14.020, 51.32.190, 51.14.090, and 51.14.095. 06-06-066, § 296-15-024, filed 2/28/06, effective 4/1/06.]

WAC 296-15-027 Additional requirements for subsidiaries and acquisitions. (1) What if an individual firm is a subsidiary of a corporation?

(a) If an individual self-insured firm has a parent (owner of fifty percent and/or having controlling financial interest), the parent must provide the department with its written guarantee, L&I form F207-040-000, to assume responsibility for all workers' compensation liabilities of the subsidiary if the subsidiary defaults on its liabilities.

(b) If a parent fails to provide a guarantee, the department will require the subsidiary to provide surety at one hundred twenty-five percent of its actual requirement. The subsidiary must continue to provide surety at the higher level as long as it has no parental guarantee.

(2007 Ed.)

(c) Certification of an individual self-insurer will include all of its subsidiaries (fifty percent owned and/or financial interest controlled by) or divisions doing business in Washington, as well as new acquisitions after certification becomes final. One certificate will be issued to an approved self-insurer. The subsidiaries or divisions will be considered one self-insurer for all industrial insurance purposes.

(2) **What if a certified self-insurer is acquired by another entity?**

(a) If it is an asset only acquisition, the certified self-insurer must surrender its certification and would retain the self-insurance liabilities and must continue to provide benefits. The new owner would be required to obtain industrial insurance coverage through the state fund. If the new owner wishes to become self-insured, it must meet the department's minimum requirements and submit an application according to the normal certification process.

(b) If the acquisition is a stock acquisition, the new owner must either provide a parental guarantee in accordance with WAC 296-15-024(4), or if it wishes to have the self-insurance certification transferred to the new parent organization, it must:

- (i) Provide proof of financial capabilities by furnishing three years of audited financial statements; and
- (ii) Furnish evidence of an acceptable claim administration program to oversee a self-insurance program; and
- (iii) Demonstrate the existence of an acceptable accident prevention program covering all of its operations in Washington.

[Statutory Authority: RCW 51.04.020, 51.14.020, 51.32.190, 51.14.090, and 51.14.095. 06-06-066, § 296-15-027, filed 2/28/06, effective 4/1/06.]

WAC 296-15-121 Surety for a self insurance program.

(1) **What is surety?** Surety is the legal financial guarantee each self insurer must provide to the department for its self insured workers' compensation program. Failure to provide surety in the amount required by the department will result in the withdrawal of the self insurer's certification. If a self insurer defaults on (stops payment of) benefits and assessments, the department will use its surety to cover these costs.

(a) Surety must be provided on the department's form. The original will be kept by the department. Surety must cover all past, present and future self insurance liabilities.

(b) Surety may not be used by a self insurer to:

- (i) Pay its workers' compensation benefits; or
- (ii) Serve as collateral for any other banking transactions.

(c) Surety is not an asset of the self insurer and will not be released by the department if the self insurer files a petition for dissolution or relief under bankruptcy laws.

(d) The department will determine the amount of surety each self insurer must provide. The surety level may be increased or decreased to maintain its adequacy when necessary.

(2) **What types of self insurance surety will the department accept?** The department will accept the following types of surety:

(a) Cash, corporate or governmental securities deposited with a department approved escrow agent and administered by a written agreement L&I form F207-039-000 between the

[Title 296 WAC—p. 185]

department, self insurer and escrow agent. Use L&I form F207-137-000 for any rider/amendment to the escrow account.

An escrow account may not be used by the self insurer to satisfy any other obligation to the bank which maintains the escrow account.

(b) A bond on L&I form F207-068-000 written by a company approved to transact surety business in Washington. Use L&I form F207-134-000 for any rider/amendment to the bond.

(c) An irrevocable standby letter of credit (LOC) on L&I form F207-112-000 if the self insurer has a net worth of at least 500 million dollars. Use L&I form F207-111-000 for any rider/amendment. LOCs are subject to acceptance by the department. Acceptance includes, but is not limited to, approval of the financial condition of the issuing or confirming bank.

(i) The issuing or confirming bank must have a location in Washington. The bank must provide the department with an audited financial statement or call report made to the banking regulatory agencies for the most recent fiscal year. An audited statement/call report is due at LOC issuance and annually while the LOC is in effect.

(ii) The self insurer must provide the department a memorandum of understanding on L&I form F207-113-000 showing the self insurer's agreement with the following conditions:

(A) The department will automatically extend an LOC for an additional year unless notified otherwise by registered mail at least sixty days prior to expiration.

(B) If the department is notified an LOC will not be replaced, and the self insurer fails to provide acceptable replacement surety within thirty days of notice:

(I) The department will draw the full value of the LOC. All proceeds of the LOC will be deposited with the department;

(II) Accrued interest in excess of the surety requirement will be returned semiannually to the self insurer; and

(III) If acceptable replacement surety is later provided, the proceeds of the LOC and accrued interest will be returned to the self insurer.

(C) If the self insurer defaults on the payment of workers' compensation benefits and has failed to provide acceptable replacement surety for an expired LOC:

(I) The title to the proceeds will be transferred to the department; and

(II) The proceeds and accrued interest will be used to pay the self insurer's workers' compensation benefits.

(D) If the self insurer defaults on the payment of workers' compensation benefits and has an LOC in force:

(I) The department will draw the full value of the LOC. All proceeds of the LOC will be deposited with the department; and

(II) The proceeds and accrued interest will be used to pay the self insurer's workers' compensation benefits.

(iii) If the self insurer provides another acceptable type of surety in the amount required by the department, the department's interest in the LOC will be released.

(iv) All legal proceedings regarding a self insurer's LOC will be subject to Washington laws and courts.

(3) **How often is each self insurer's surety requirement reviewed?** Each self insurer's surety requirement is reviewed annually based on the self insurer's annual report.

(4) **When could a self insurer's surety level change?**

(a) Surety will be maintained at the current level unless the department's estimate or an independent qualified actuary's estimate of the self insurer's outstanding claim liabilities changes by more than twenty-five thousand dollars.

(b) Surety changes are due by July 1 of each year.

(5) **How does the department determine the required surety level?** The department analyzes each self insurer's loss history using incurred development, paid development or other department approved actuarial methods of loss development. The following factors also may influence the surety determination:

(a) Pension claims.

(b) Reinsurance.

(c) Inconsistency in reserving practices.

(d) Independent qualified actuarial estimate.

(e) Surety cap.

(6) **What is considered reinsurance?** For the purposes of Title 51 RCW, excess insurance and reinsurance mean the same thing.

(7) **May a self insurer reinsure part of its liability?**

(a) A self insurer may reinsure up to eighty percent of its liability under Title 51 RCW.

(b) The reinsuring company and its personnel are prohibited from participating in the administration of the responsibilities of the self insurer.

(c) Reinsurance policies issued after July 1, 1975, must include endorsements which state (a) and (b) of this subsection.

(d) The self insurer must:

(i) Notify the department of the name of the insurance carrier, the extent and coverage period of the policy; and

(ii) Submit copies of all reinsurance policies in force including all modifications and renewal provisions.

(e) The department may accept a certificate of insurance on L&I form F207-095-000 in place of the policy if the certificate certifies all coverage conditions and exceptions and that the reinsurance company and its personnel do not participate in the administration of the responsibilities of the self insurer under Title 51 RCW.

(8) **What if a self insurer ends its self insured workers' compensation program?** If a self insurer voluntarily surrenders certification or has its certificate involuntarily withdrawn by the department, the former self insurer must continue to do all of the following:

(a) Pay benefits on claims incurred during its period of self insurance. Claim reopenings and new claims filed for occupational diseases incurred during the period of self insurance remain the obligation of the former self insurer.

(b) File quarterly and annual reports as long as quarterly reporting is required. A former self insurer may ask the department to release it from quarterly reporting after it has had no claim activity with the exception of pension or death benefits for a full year.

(c) Provide surety at the department required level. The department may require an increase in surety based on annual reports as they continue to be filed. Surety will not be reduced from the last required level (while self insured) until three full

calendar years after the certificate was terminated. A bond may be cancelled for future obligations, but it continues to provide surety for claims occurring prior to its cancellation.

(d) Pay insolvency trust assessments for three years after surrender or withdrawal of certificate.

(e) Pay all expenses for a final audit of its self insurance program.

(9) When could the department consider releasing surety to a former self insurer or its successor?

(a) The department may consider releasing surety to a former self insurer or its successor when all of the following have occurred:

(i) All claims against the self insurer are closed; and

(ii) The self insurer has been released from quarterly reporting for at least ten years.

(b) If the department releases surety, the former self insurer remains responsible for claim reopenings and new claims filed for occupational disease incurred during the period of self insurance.

WAC 296-15-123 Financial watch. (1) What is financial watch? Financial watch occurs when the department has concerns regarding a self-insured employer's ability to promptly provide benefits to its injured workers based on an analysis of the audited financial statements provided by that employer.

The purpose of financial watch is two-fold:

(a) It serves to alert the employer that the department is concerned with its ability to provide benefits to its injured workers; and

(b) It enforces the due diligence that the department must exercise in preserving the financial integrity of each self-insurer.

(2) What factors can lead to a firm being placed on financial watch? Contributing factors that can lead to a firm being placed on financial watch are negative changes in the following ratios and trends:

(a) Net losses;

(b) Ratio of debt to equity;

(c) Liquidity ratios;

(d) Ratios of debt and equity to total assets;

(e) Ratio of net income to revenue;

(f) Trends in earnings;

(g) Trends in liquidity;

(h) Trends in levels of debt;

(i) Ratio of tangible net worth to levels of debt.

To assess an employer's ability to promptly provide any and all required benefits to its injured workers, the department will utilize these and other analytical ratios. The department may also utilize industry standards and other relevant information in its analysis.

(3) What are the consequences of being placed on financial watch? At the department's discretion, the surety requirement for a firm being placed on financial watch may be increased by up to twenty-five percent. No reduction in surety will be allowed while an employer is on financial watch.

(2007 Ed.)

(4) How long can a firm remain on financial watch? The status of a firm on financial watch will be re-evaluated annually upon receipt of its audited financial statements. The department may request interim financial information in addition to the annual audited financial statement.

If significant improvement is not demonstrated to the department's satisfaction after three years of being placed on financial watch, the department may undertake action to withdraw the self-insurance certification of that employer.

WAC 296-15-125 Default by a self-insurer. (1) What is a default? A default occurs when a self-insured employer no longer provides benefits to its injured workers in accordance with Title 51 of the Revised Code of Washington. A default can be a voluntary action of the self-insured employer, or an action brought on by the employer's inability to pay the obligation.

(2) What happens when the department first learns a self-insured employer has defaulted on its obligation? The department first corresponds with the self-insured employer to determine if the self-insurer will resume the provision of benefits. If the self-insurer does not respond to the department and resume the provision of benefits within ten days, the self-insured employer is determined to have defaulted.

(3) What happens when the department confirms that a self-insurer has defaulted on its obligation? There are two actions that the department takes when a default by a self-insured employer is confirmed:

(a) First, the department assumes jurisdiction of the claims of the defaulting self-insurer and begins to provide benefits to those injured workers.

(b) Second, the department makes demand upon the surety provided by that self-insurer for the full amount of the surety. The proceeds of the surety are deposited with the department and accrue interest, which will be used to supplement the surety in providing benefits to those injured workers.

(4) What happens to a self-insured employer's certification when it defaults? The employer surrenders its self-insurance certification when it defaults. Any remaining employment in the state would need industrial insurance coverage through the state fund effective with the default by the employer.

WAC 296-15-140 Expense of out-of-state audit. (1) **When is a self-insurer charged for audit expenses?** The self-insurer must reimburse the department for all travel, per diem and documented expenses as related to the audit when the department representative travels outside the state of Washington.

(2) **How much will the self-insurer be charged?** The self-insured employer is billed the actual costs that the department incurred.

[Statutory Authority: RCW 51.04.020, 51.14.020, 51.32.190, 51.14.090, and 51.14.095. 06-06-066, § 296-15-140, filed 2/28/06, effective 4/1/06; Order 74-38, § 296-15-140, filed 11/18/74, effective 1/1/75.]

WAC 296-15-151 Surety for a public entity's self insurance program. (1) **How does the department determine the required surety level for a public entity?** The required surety level for a public entity will be its estimated claim costs for all claims during the upcoming fiscal year. The minimum surety amount will be determined annually by the department.

(2) **How does a public entity provide surety?** By July 1 of each year, each public entity must submit its public entity surety certification. A public entity's surety certification must demonstrate that it has sufficient revenues in its next budget to meet its estimated claim costs for the next fiscal year by documenting:

- (a) The estimated claim liabilities;
- (b) Source of revenues, detailing accounts identified for self insurance obligations; and
- (c) How the cumulative reserve (twenty-five percent of the required surety) is funded. Show the account balance.

(3) **What type of surety may a public entity use for its cumulative reserve?** A public entity may provide surety for its cumulative reserve using any of the surety types listed in WAC 296-15-221.

[Statutory Authority: RCW 51.14.077, 51.14.120(7), 51.14.150(4), 51.14.-160, 51.44.040(3), 51.44.070 and 51.44.150. 99-23-107, § 296-15-151, filed 11/17/99, effective 12/27/99.]

WAC 296-15-161 Surety for a group self insurance program. (1) **How does the department determine the required surety level for a group self insurer?** After the initial five years of certification, the department will annually calculate the surety requirement for a group self insurer by comparing its original liability estimate to its reserve fund. If the difference is:

- (a) Less than fifteen percent, the department will accept the stated reserves of the group as the required surety level.
- (b) Greater than fifteen percent, the department will establish the group's required surety level.

(2) **What type of surety is acceptable for a group self insurer's reserve fund?** A group self insurer's reserve fund must be cash.

(3) **May a group self insurer pay expenses from its reserve fund?** A group self insurer may pay only the following items from its cash reserve fund:

(a) Administrative expenses for operating the group self insurance program, including claims handling expenses, legal, investigative or administrative costs and department administrative assessments.

(b) Claim expenditures. Supplemental pension fund (SPRF) benefits may also be paid from the reserve fund if the group redeposits SPRF reimbursements into the reserve account. Interest earned by the reserve account must remain in the account while this method is in effect.

(c) Reinsurance premiums. All recoveries from these policies must be redeposited into the reserve fund. Within eighteen months of premium payment, the group must return the amount paid for premiums if reinsurance recoveries were not sufficient to return the account to its original amount.

(4) **How can a group self insurer assess its members for reserve fund costs?** A group self insurer may determine how it will assess members for required reserve fund costs.

The group's bylaws must describe the procedures it will use to collect these costs.

(5) **Must a group self insurer purchase reinsurance?** A group self insurer must obtain reinsurance for each year of operation to ensure adequate protection against catastrophic or unexpected loss.

(6) **What if a group self insurer collects excess premiums during a fund year and has a surplus?** A group self insurer may refund surplus money from a fund year if it retains sufficient money to fulfill all of its workers' compensation obligations. This includes maintaining the required reserve fund.

(7) **What if a group self insurer collects insufficient premiums during a fund year and has a deficit?** A group self insurer may cover a deficit by:

- (a) After receiving department approval, using:
 - (i) Unencumbered surplus from a different fund year;
 - (ii) An alternative method; or
- (b) Assessing the membership. The department may require the group to use this method.

WAC 296-15-171 Surety for a self insured pension or fatality claim. (1) **When must a self insurer provide funding for a permanent total disability (pension) or fatality claim?** Within sixty days of receipt of the department's order, the self insurer must fund the pension or fatality claim.

(2) **What types of funding may a self insurer use for a pension or fatality claim?** A self insurer may fund a pension or fatality claim with cash, a bond on L&I form F207-065-000, annuity on L&I form F207-129-000 or assignment of account on L&I form F207-058-000. If the pension benefit level increases, the self insurer must increase the surety level or provide additional surety to cover the deficiencies.

(3) **What is an annuity?** An annuity is a contract with an insurance company where the insurance company agrees to pay to the department a specific amount covering the lifetime of a claimant.

(4) **What is an assignment of account?** A self insurance assignment of account/certificate of deposit is a legal instrument executed by the self insurer and an approved commercial banking institution in Washington. The assignment of account must:

(a) Identify an existing account on deposit with the approved banking institution in the name of the self insurer. The existing assigned account must contain the amount determined necessary by the department to cover the pension benefits on the specific claim beyond all other assignments on that account. A separate assignment of account must be established for each pension.

(b) Bind the self insurer to maintain a balance in the assigned account at least equal to the current present cash value of the pension benefits on the claim and beyond all other assignments on the account for the life of the claim. Present cash values of the assigned account/certificate of deposit will be revised annually by the department. Quarterly pension payments made from the assigned account must not reduce the account balance below the present cash value of

the pension beyond all other assignments on the same account.

(c) Authorize the department, if the self insurer defaults, to immediately withdraw up to the entire amount assigned to the pension claim from the assigned account/certificate of deposit. The department will take this action without notifying the defaulting self insurer.

(d) If the bank holding the assignment of account/certificate of deposit fails, the self insurer is responsible for the entire amount of the pension or fatality obligation. Within thirty days, the self insurer must:

(i) Establish a new assignment of account/certificate of deposit, bond; or

(ii) Deposit cash into the reserve fund.

(e) If the self insurer ends its self insurance status, the assignment of account/certificate of deposit will be placed with the department. The department will determine the required reserve for the pension or fatality claim, and any excess will be returned to the former self insurer.

WAC 296-15-181 Funding the benefits of an insolvent self-insurer. (1) **What happens when a self-insurer defaults on (stops paying) workers' compensation benefits and assessments?** When a self-insurer stops paying workers' compensation benefits or assessments, and the default is not due to a claims administration decision, the department will take over its surety and claims.

(2) **If a defaulting self-insurer has multiple types of surety, who determines the order in which surety will be used?** The department has the sole authority to determine the order in which surety types will be used.

(3) **What happens if the defaulting self-insurer's surety is exhausted?** When surety is exhausted, the insolvency trust (all self-insurers except school districts, cities and counties) will be assessed quarterly to cover the claim costs paid on behalf of the defaulted self-insurer.

(4) **Who is on the insolvency trust board?** The insolvency trust board consists of the director or designee, three representatives of self-insured employers and one representative of workers. Representatives are nominated by the self-insured and labor communities and are appointed by the director for overlapping two year terms.

(5) **What does the insolvency trust board do?** The board advises the department on insolvency trust matters. The department makes all final decisions.

(6) **What annual report is provided on the insolvency trust fund?** The department provides an annual written status report on the insolvency trust fund as of the end of the previous calendar year to the workers' compensation advisory committee. The report is presented at the committee's first quarterly meeting no later than March 31.

WAC 296-15-200 Claims log—Evaluation. Beginning January 1, 1976, each self-insurer shall maintain a log of all claims filed by any worker injured in its employ or any worker having contracted an occupational disease as a result of his/her employment with the self-insurer.

The claims log shall contain the following minimum information: The injured worker's name, the date of the injury or first knowledge of an occupational disease, the claim number assigned by the department, the date the claim is closed, and whether the claim is compensable or treatment only. Additional information may be recorded at the discretion of the employer.

WAC 296-15-221 Self insurers' reporting requirements. (1) **What information must self insurers report to the department?** Each self insurer must provide the department:

(a) The name, title, address and phone number of the single contact person who is the liaison with the department in all self insurance matters. This contact will be sent all department correspondence and is responsible for forwarding information to appropriate parties for timely action.

(b) A copy of its current policy of applying sick leave, health and welfare benefits or any other compensation in conjunction with, or as a substitute for, time loss benefits.

(2) **When must self insurers notify the department of business status changes?** Self insurers must notify the department in writing:

(a) Immediately, of any plans to:

(i) Cease business entirely or cease business in Washington; or

(ii) Dispose of controlling financial interest of the original self insurer. The self insurer must surrender its certificate for cancellation if requested by the department.

(b) Within thirty days, of any:

(i) Amendment(s) or modification(s) to the self insurer's articles, charter or agreement of incorporation, association, copartnership or sole proprietorship which will materially change the business identity or structure originally certified.

(A) The department may require additional documentation.

(B) If the self insurer becomes a subsidiary to another firm, the parent must provide the department with its written guarantee on L&I form F207-040-001 to assume responsibility for all workers' compensation liabilities of the subsidiary if the subsidiary defaults on its liabilities. See WAC 296-15-021 for additional information.

(ii) Separation (for example, divestiture or spinoff) of any part of the original self insurer.

(A) The original self insurer remains responsible for claims liability of the separated part up to the date of separation unless the department approves an alternative.

(B) If the separating part wishes to continue self insurance, it must submit an application to the department at least thirty days before separation and requested certification.

[Title 296 WAC—p. 189]

(C) If certification cannot be granted before separation, industrial insurance coverage must be purchased from the state fund from the date of separation.

(iii) Relocating, adding or closing physical locations.

(3) **When must self insurers notify the department of administrative changes?** A self insurer must notify the department in writing within ten days, of any change to its:

(a) Single contact person who is the liaison with the department in all self insurance matters. Include the contact's title, address and phone number.

(b) Contract with a service organization/third party administrator independent of the self insurer which will participate in the self insurer's responsibilities. Submit a copy of the service contract. See WAC 296-15-021 for additional information.

(c) Administrator of its workers' compensation program.

(4) **What reports must self insurers submit to the department?** Each self insurer must submit:

(a) Complete and accurate quarterly reports summarizing worker hours and claim costs paid the previous quarter. Use a form substantially similar to the preprinted SIQTRR form sent by the department. Payment is due the 30th day after receiving the preprinted report from the department. This report is the basis for determining the administrative, second injury fund, supplemental pension, asbestosis and insolvency trust assessments.

(i) Administrative, second injury fund and insolvency trust assessments are based on a self insurer's total claim costs. Total claim costs during a quarter include, but are not limited to:

(A) Time loss compensation. Include the amount of time loss the worker would have been entitled to if kept on full salary.

(B) Permanent partial disability (PPD) awards.

(C) Medical bills.

(D) Prescriptions.

(E) Medical appliances.

(F) Independent medical examinations and/or consultations.

(G) Loss of earning power.

(H) Travel expenses for treatment or rehabilitation.

(I) Vocational rehabilitation expenses.

(J) Penalties paid to injured workers.

(K) Interest on board orders.

(ii) Supplemental pension (SPRF) and asbestosis fund assessments are based on a self insurer's worker hours. Worker hours must be reported as defined in chapter 296-17 WAC General reporting rules, classifications, audit and recordkeeping, rates and rating system for Washington workers' compensation insurance.

Note: Self insurers may request reimbursement quarterly from SPRF as authorized under Title 51 RCW. Use a form substantially similar to L&I form F207-011-000 or F207-011-222, if there is social security offset.

(iii) The administrative assessment covers department administrative costs, including expenses of other department divisions, the University of Washington environmental research facility, the board of industrial insurance appeals and other general administrative costs. The administrative assessment rate is applied to a self insurer's total claim costs.

(A) The administrative assessment rate is based on the actual costs of the previous fiscal year and the anticipated costs of the upcoming fiscal year. Employers certified after the fiscal year used for calculation will be assessed at a rate that does not include prior fiscal periods.

(B) Employers no longer self insured must pay an adjusted assessment rate until one year after all self insurance liabilities and responsibilities are terminated.

(C) The minimum quarterly assessment is twenty-five dollars.

(iv) The second injury fund rate will be based on anticipated second injury fund costs.

(A) Self insurers' contributions to the second injury fund will be recorded in the self insurers' account, separate from the state fund account.

(B) The self insurers' second injury fund must maintain a two hundred thousand dollar minimum balance.

(v) Insolvency trust members (all self insurers except school districts, cities and counties) are also assessed to cover claim payments made by the department on behalf of insolvent self insurers. School districts, cities and counties are exempt from and are not covered by this insolvency trust. Any interest earned on the assessment becomes part of the insolvency trust fund. The insolvency assessment rate is applied to a self insurer's total claim costs. Failure to pay an insolvency trust assessment is grounds for withdrawal of certification. Members who voluntarily surrender certification must continue to pay this assessment for three years after the date of surrender.

(b) Complete and accurate annual report of all claim costs paid for each year of liability with an estimate of future claim costs. Use a form substantially similar to SIF-7 L&I form F207-007-000. This report is due March 1 and is the basis for the department's annual determination of each self insurer's surety requirement.

(c) Fully audited financial statement within six months after the end of the self insurer's fiscal year. This report demonstrates the self insurer's continued ability to provide benefits and assessments as required. The department will consider a written request for filing time extension.

(i) This statement must be prepared by a certified public accountant.

(ii) A self insurer with a parental guarantee may submit the parent's fully audited financial statement if the parent's audited statement includes the financial condition of all subsidiaries, including the self insurer.

(iii) A political subdivision of the state may submit a state auditor's report if it includes the self insurer's audited financial statement. If the state auditor does not audit annually, political subdivisions must submit financial statements prepared internally for the years between reports by the state auditor.

WAC 296-15-255 Hearings for corrective action or withdrawal of certification. (1) This section applies only to proceedings to withdraw certification or for corrective action instituted by the director in response to a petition filed with the department pursuant to RCW 51.14.090. This section

shall not apply to actions instituted by the director to withdraw certification pursuant to RCW 51.14.080 nor to corrective action instituted by the director pursuant to RCW 51.14.095.

(2) When there is a petition for such action by any employee or union or association having a substantial number of employees in the employ of the self-insured, the director or the director's designee may, in the director's or designee's sole discretion, hold a hearing to determine whether or not there are grounds for action. In reviewing such a petition, the director or the designee may require additional information from a petitioner before deciding whether to hold a hearing under this section.

(3) Any such hearing shall be conducted in accordance with the department's rules governing administrative hearings. The director will notify all parties at least twenty days prior to the date of the hearing. The notice shall include the following:

- (a) Nature of proceedings;
- (b) Legal authority for holding the hearing;
- (c) Reference to the section of statutes and rules involved;
- (d) A description of matters asserted;
- (e) The date, time, and place of the hearing.

All parties will be allowed to respond and present evidence and arguments on the issues involved.

Within thirty days of the hearing date, the department will provide written notification of the proceedings, findings, and conclusions to all hearing participants.

(4) If, following the hearing, the decision is to withdraw certification or take corrective action, such action shall comply with the provisions of RCW 51.14.090 and/or 51.14.095.

[Statutory Authority: RCW 51.32.190 and 51.14.090. 96-21-145, § 296-15-255, filed 10/23/96, effective 11/25/96. Statutory Authority: RCW 51.04.020. 86-18-037 (Order 86-35), § 296-15-255, filed 8/28/86.]

WAC 296-15-260 Corrective action or withdrawal of certification. (1) Corrective action against a self-insured employer shall be by order and notice. A notice of corrective action shall include the nature and specifics of the findings and may include the following:

- (a) Probationary certification status for the self-insured employer for a period not to exceed one year;
- (b) Mandatory training to correct areas of program deficiencies to be approved by the department.

The subject matter to be covered shall be specified in the notice of corrective action. Personnel required to attend and the time period within which the training is to be conducted will also be identified.

(c) Monitoring activities of the self-insured employer for a specified period of time to determine progress regarding correction of program deficiencies may be required. The department may require submission of complete and accurate records and/or conduct an audit to verify program compliance.

(d) If there is a contract between the self-insured employer and a service organization which has been filed with the department (WAC 296-15-110), the corrective action order may specify and require that the service organization be subject to mandatory training and monitoring of activity provisions of the order.

(2007 Ed.)

(e) The corrective action order shall specify a time frame for submission of progress reports to the department's self-insurance section.

(f) During the first thirty days following the corrective action order, the self-insured employer shall submit a plan for the implementation of corrective action which shall include specific completion dates. If the plan is determined to be incomplete or inadequate, the department's self-insurance administrator shall notify the self-insurer of the necessary requirements or changes needed, and shall specify the date by which an amended plan shall be submitted.

(2) If sufficient grounds for decertification exist, an order and notice will be issued. The order and notice will include the following:

- (a) The grounds upon which the determination is based.
- (b) The period of time within which the grounds existed or arose.
- (c) The date, not less than ninety days after the self-insured employer's receipt of the order and notice, when certification will be withdrawn.
- (d) Provisions as stipulated by RCW 51.14.090.

(3) Upon conclusion of the probationary certification period in the case of corrective action, the program deficiencies requiring corrective action by the self-insured employer shall be evaluated by the department and a written report sent to affected parties. Program activities may be reaudited beyond the stated time period in order to assess continuing compliance with the objectives of the corrective action directives.

(4) If, at the conclusion of the probationary period, program deficiencies continue to exist, the department shall decide whether to extend the period of probation, require additional corrective action or proceed with decertification of the self-insured employer. An order and notice stating the decision shall be issued.

WAC 296-15-320 Reporting of injuries. What elements must a self-insurer have in place to ensure the reporting of injuries? Every self-insurer must:

(1) Establish procedures to assist injured workers in reporting and filing claims.

(2) Immediately provide a Self-Insurer Accident Report (SIF-2) form F207-002-000 to every worker who makes a request, or upon the self-insurer's first knowledge of the existence of an industrial injury or occupational disease, whichever occurs first. Only department provided SIF-2 forms may be used. Copies or reproductions are not acceptable.

(3) Establish procedures for ensuring the timely delivery of completed SIF-2s to the claims management entity.

(4) Designate individuals as resources to address employee questions. These resources must:

(a) Have sufficient knowledge to answer routine questions; and

(b) Have responsibility for seeking answers to more complex problems; and

(c) Have detailed knowledge of the self-insurer's claim filing process; and

(d) Be reasonably accessible to employees at every work location.

(5) Maintain a claims log of all workers' compensation claims filed.

(a) For each claim, the log must consist of only the following information:

(i) The complete first and last name of the injured worker (no initials or abbreviations).

(ii) The date of injury, or for an occupational disease, the date of manifestation.

(iii) The claim number found on the department's Self-Insurer Accident Report (SIF-2, form F207-002-000).

(iv) The date the claim is closed.

(v) Whether the claim is a time loss claim or medical only.

(b) The self-insurer must designate the location of the official claims log.

(i) The self-insurer may maintain the log on its premises; or

(ii) The self-insurer may elect to have its third-party administrator maintain the claims log on its behalf. If this option is selected, there must be a written agreement between the self-insurer and the third-party administrator acknowledging that the official claims log is maintained by the third-party administrator.

The self-insurer must notify the department in writing of the location of their official claims log. If the option in (b)(ii) of this subsection is selected, a copy of the written agreement between the self-insurer and the third-party administrator must be provided to the department.

WAC 296-15-330 Authorization of medical care. What are the requirements for authorization of medical care? Every self-insurer must:

(1) Authorize treatment and pay bills in accordance with Title 51 RCW and the medical aid rules and fee schedules of the state of Washington.

[Title 296 WAC—p. 192]

(2) Provide a written explanation of benefits (EOB) to the provider, with a copy to the worker if requested, for each bill adjustment. A written explanation is not required if the adjustment was made solely to conform to the maximum allowable fees as set by the department.

(3) Establish procedures to ensure prompt responses to inquiries regarding authorization decisions and bill adjustments.

WAC 296-15-340 Payment of compensation. What are the requirements for payment of compensation? Every self-insurer must:

(1) Pay time loss compensation in accordance with Title 51 RCW and the rules and regulations of the department.

(2) Select one method for payment of ongoing time loss compensation, either semimonthly or biweekly, and report the selected method to the department.

(3) Provide the department with a detailed written description of any practice of paying workers' regular wages in lieu of time loss compensation, or of paying workers any benefits including sick leave, health and welfare insurance benefits, or any other compensation in conjunction with time loss compensation.

WAC 296-15-350 Handling of claims. What elements must a self-insurer have in place to ensure appropriate handling of claims? Every self-insurer must:

(1) Establish procedures for securing the confidentiality of claim information.

(2) Have sufficient numbers of department-approved claims administrators to ensure uninterrupted administration of claims.

(a) There must be at least one department-approved claims administrator involved in the daily management of the employer's claims.

(b) If claims are administered in more than one location, there must be at least one department-approved claims administrator in each location where claims are managed.

(3) Designate one department-approved claims administrator as the department's primary contact person for claim issues.

(4) Designate one address for the mailing of all claims-related correspondence. The self-insurer is responsible for forwarding documents to the appropriate location if an employer's claims are managed by more than one organization.

(5) Establish procedures to answer questions and address concerns raised by workers, providers, or the department.

(6) Ensure claims management personnel are informed of new developments in workers' compensation due to changes in statute, case law, rule, or department policy.

(7) Include the department's claim number in all claim-related communications with workers, providers, and the department.

(8) Legibly date stamp incoming correspondence, identifying both the date received and the location or entity that received it.

(2007 Ed.)

(9) Ensure a means of communicating with all injured workers.

WAC 296-15-360 Qualifications of personnel. How does an individual become a department-approved claims administrator?

(1) An individual must pass the department's "self-insurance claims administrator" test to be accepted as a department-approved claims administrator. In order to be admitted to take this test, an individual must meet the following requirements:

(a) Submit a completed application form to the department (Form F207-177-000). The application must be received by the department no less than forty-five days prior to the scheduled examination date.

(b) Have a minimum of three years of experience in the administration of time loss claims under Title 51 RCW. The experience must have occurred within the five years immediately prior to the filing of the application.

The department will review the application and determine if the applicant meets the minimum requirements to take the examination. Notification will be mailed to the applicant no less than fourteen days prior to the scheduled examination date.

If an applicant fails the examination, he or she must submit another completed application requesting to take the examination again. An applicant must wait six months after a failed result before retaking the examination.

(2) The designation of department-approved claims administrator is valid for five years or until an individual retakes the examination, whichever occurs first. The most recent examination results will always reflect an individual's status as a claims administrator. To maintain approved status, an individual must:

(a) Make application as outlined in subsection (1) of this section; and

(b) Pass the "self-insurance claims administrator" examination again.

The department-approved claims administrator is responsible for notifying the department of any changes in his or her mailing address, work location, or employment status.

WAC 296-15-400 Self-insured workers' rights and obligations. How must a self-insurer notify its workers of their rights and obligations under the industrial insurance laws?

Self-insurers must notify workers of their industrial insurance rights and obligations at the following times:

(1) Within thirty days of hire, provide a form substantially similar to the one page Workers' Compensation Filing Information L&I form F207-155-000.

(2) When a worker files a claim, provide the following information in writing:

(a) The current edition of the department's pamphlet Employees of Self-Insured Businesses Guide to Industrial Insurance Benefits L&I pamphlet P207-085-000 or this same information in substantially similar format; and

(b) The name, address, and phone number of the person or organization handling the worker's claim.

WAC 296-15-405 Filing a self-insured claim. (1) What form is used to report a self-insured worker's industrial injury or occupational illness?

The reporting form for a self-insured worker's industrial injury or occupational illness is the Self-Insurer Accident Report (SIF-2) L&I form F207-002-000. Self-insurers must obtain these forms from the department and must report their workers' industrial injuries and illnesses to the department with SIF-2s. The department tracks the claim numbers assigned to self-insurers.

When notified of injury or illness, the self-insurer must provide the worker with this prenumbered form and assistance in filing a claim. The self-insurer must provide the worker the designated copy of the completed SIF-2 (which includes an explanation of the worker's rights and responsibilities) within five working days of completion.

(2) What form does a doctor use to report a self-insured worker's industrial accident or occupational illness?

Physicians should report a self-insured claim with a Physician's Initial Report (PIR) L&I form F207-028-000 when a self-insured worker has an industrial injury or is notified of an occupational illness. Replacements are acceptable.

[Statutory Authority: RCW 51.32.190(6), 51.32.055 (8)(a) and (9)(a). 98-24-121, § 296-15-405, filed 12/2/98, effective 1/2/99.]

Allow the claim UNLESS a request for interlocutory order (see subsection (2) of this section) or denial (see subsection (3) of this section) has been received.

¹ The SIF-5 is the Self-Insurer's Report on Occupational Injury or Disease. Use a form substantially similar to L&I form F207-005-000.

² The SIF-5A is the Time Loss Calculation Rate Notice. Use a form substantially similar to L&I form F207-156-000.

³ If the worker is kept on salary, report the amount of time loss the worker would have been entitled to on the SIF-5.

(2) How must a self-insurer request an interlocutory¹ order?

When requesting an interlocutory order from the department, a self-insurer must:

When	Send to the worker	Send to the department	The department will	And the self-insurer pays
Within 60 ² days of claim filing.	A complete and accurate SIF-5 and SIF-5A if TL was paid or if worker was kept on salary. Ongoing medical treatment and vocational services are NOT PAYABLE unless the claim is allowed.
			If it disagrees, issue an allowance order if the facts show the claim should be allowed.	TL if the worker is eligible, and other entitled benefits.

¹ An interlocutory order places a claim in provisional status while the self-insurer investigates the validity of the claim.

² When not specified, time is in calendar days.

(3) How must a self-insurer request claim denial from the department?

When requesting claim denial from the department, a self-insurer must:

When	Send to the worker	Send to the department	The department will	And the self-insurer pays
Within 60 days of claim filing.	SIF-4. ¹ Copy to the attending or treating doctor.	SIF-4 AND all records excluding bills.	If it agrees, issue a denial order. The denial order will restate the self-insurer's right to request reimbursement of provisional TL from the worker.	For all medical evaluations and diagnostic studies used to make the determination.
			If it finds insufficient information to make a decision, issue an interlocutory order AND direct the employer to obtain the necessary information.	Provisional TL if the worker is eligible and other benefits as entitled. Ongoing medical treatment and vocational services are NOT PAYABLE unless the claim is allowed.
			If it disagrees, issue an allowance order if the facts show the claim should be allowed.	TL if the worker is eligible AND other entitled benefits.

¹ The SIF-4 is the Self-Insured Employer's Notice of Denial of Claim. Use a form substantially similar to L&I form F207-163-000.

(4) What if a self-insurer does not request allowance, denial, or an interlocutory order for a claim within sixty days?

If a self-insurer does not request allowance, denial, or an interlocutory order within sixty days, the department will intervene and adjudicate the claim. The department may obtain additional medical information to make the determination. The claim remains in provisional status until the department makes the determination.

The exception to this requirement is the allowance of medical only claims. Self-insurers are not required to request allowance for medical only claims.

(5) Must a self-insurer submit an SIF-5 each time the department requests one?

Yes. A self-insurer must submit a complete and accurate SIF-5 within ten working days of receipt of a written request from the department.

(6) What must a self-insurer do when the department requests information on a claim by certified mail?

A self-insurer must submit all requested information concerning the claim within ten working days of receipt of the department's request by certified mail.

(7) How long does a self-insurer have to provide a copy of the claim file to the worker or worker's representative?

A self-insurer must provide a copy of the claim file within fifteen days of receiving a written request from the worker or worker's representative. Unless the worker or representative requests a particular portion of the file, the self-insurer must provide a copy of the entire file.

(8) When may a self-insurer charge a worker or his/her representative for a copy of the claim file?

A self-insurer must provide the first copy of a claim file free of charge. Upon receipt of a subsequent written request, the self-insurer must provide any material not previously supplied free of charge. The self-insurer may charge the worker or any representative a reasonable fee for any material previously supplied.

(9) What must a self-insurer do when it terminates time loss?

No later than the date of time loss termination, a self-insurer must notify the worker in writing of the reasons for time loss termination. If termination is based on a release to work not received directly from the worker, attach a copy of the release to the notice.

WAC 296-15-430 Vocational services. (1) When must a self-insurer submit an Employability Assessment Report (EAR) to the department?

(a) Within five working days of the date time loss benefits are terminated because the worker is not eligible for vocational services.

Note: An EAR is not required if the worker is not eligible for vocational services because they returned or were released to work at the job at time of injury.

(b) Within five working days of when the self-insurer finds the worker eligible for vocational services.

The self-insurer must use an Employability Assessment Report (EAR) substantially similar to L&I form F207-121-000.

(2) **When must a self-insurer submit a vocational rehabilitation plan to the department?** A self-insurer must submit a vocational plan to the department with a copy to the worker within ten calendar days after being signed by the worker, vocational rehabilitation provider, and the employer.

(3) What must the vocational rehabilitation plan include?

(a) An assessment of the worker's skills and abilities considering the worker's physical capacities and mental status, aptitudes and transferable skills gained through prior work experience, education, training and avocation;

(b) The services necessary to enable the worker to become employable in the labor market;

(c) Labor market survey supportive of the worker's employability upon plan completion;

(d) Documentation of the time and costs required for completion of the plan;

(e) A direct comparison of the worker's skills, both existing and those to be acquired through the plan, with potential types of employment to demonstrate a likelihood of plan success;

(f) A medically approved job analysis for the proposed retraining job goal;

(g) Any other information that may significantly affect the plan; and

(h) An agreement signed by the provider and worker that:

(i) Acknowledges that the provider and the worker have reviewed, understand and agree to the vocational rehabilitation plan; and

(ii) Sets forth the provider's and worker's responsibilities for the successful implementation and completion of the vocational rehabilitation plan.

The provider must use forms approved by, or substantially similar to forms used by, the department in order to document the agreement.

(4) **What is required for a formal review of the vocational rehabilitation plan?** The employer or the worker may request the department review the vocational rehabilitation plan. The reasons for the review must be stated in writing, and the request must be made prior to completion or termination of the plan.

(5) **What must the self-insurer do when the vocational rehabilitation plan is successfully completed?** The self-insurer must submit a closing report to the department within fifteen working days of terminating time loss benefits. The closing report shall contain at least the following:

(a) Documentation of the worker's successful completion of the vocational plan; and

(b) Documentation of whether or not the worker has returned to work at the time of the report.

(6) **What must the self-insurer do if the vocational rehabilitation plan is not successfully completed?** The self-insurer must either:

(a) Continue time loss benefits and submit a new or modified vocational rehabilitation plan to the department within ten calendar days after being signed by the worker, vocational rehabilitation provider, and the employer; or

(b) Within five working days of the date time loss benefits are terminated because the worker is not eligible for vocational services, submit an Eligibility Assessment Report (EAR) to the department with supporting documentation assessing the worker's employability status.

(4) What must a self-insurer do with a closing medical report, regardless of who is closing the claim?

A self-insurer must send the closing medical report to the attending or treating doctor. If the doctor responds that he/she does not concur with the results, the self-insurer must:

(a) Obtain a supplemental medical opinion from (an) examiner(s) listed on the department's approved examiner's list in order to do the closing action itself; OR

(b) Forward the claim to department for closure. The department may require additional medical examinations.

(5) When a self-insurer is closing a claim, what written notice must it provide to the worker and attending or treating doctor?

At claim closure, a self-insurer must send the closing order to the worker and attending or treating doctor.

(a) For a MO claim, use a Self-Insurer's Claim Closure Order and Notice substantially similar to F207-020-111.

The department has the authority to close all self-insured claims. Self-insurers have the authority to close certain claims.

Within two years of claim closure, the department may require a self-insurer to pay additional benefits on a claim the self-insurer closed if the self-insurer:

- (a) Made an error in benefits paid; or
- (b) Violated the conditions of claim closure.

(2) What claims may a self-insurer close?

(b) For a TL claim, use a Self-Insured Employers' Time Loss Claim Closure Order and Notice substantially similar to F207-070-000. Include a complete and accurate SIF-5 substantially similar to L&I form F207-005-000 with the worker's copy.

(c) For a PPD claim:

(i) When no TL or loss of earning power (LOEP) was paid, use a form substantially similar to L&I form F207-165-000 (MO with PPD). Include a complete and accurate SIF-5 with the worker's copy.

(ii) When TL or LOEP was paid, use a form substantially similar to L&I form F207-164-000 (TL with PPD). Include a complete and accurate SIF-5 with the worker's copy.

(6) When a self-insurer is closing a claim, what information must it submit to the department?

A self-insurer must submit to the department:

(a) MO claim closures by the end of the month following closure. These may be transferred electronically or reported by paper.

(i) Closures transferred electronically must be in the department's format.

(ii) Closures submitted in paper must include the SIF-2 L&I form F207-002-000 showing the date of closure and any vocational services provided.

(b) TL and PPD claim closures at the time of closure. Include copies of each of the following:

- (i) SIF-2 if not previously submitted.
- (ii) Closure order.

Note: If no one protests the self-insurer's closure order, it will become final and binding in sixty days, just like a department order.

(iii) A PPD Payment Schedule, if necessary, substantially similar to L&I form F207-162-000.

(A) A payment schedule is required when the amount of the award is more than three times the state's average monthly wage at the date of injury. At initial/down payment, send copies to the worker and the department.

(B) The first payment of the PPD award must be paid within five working days of claim closure. Continuing payments must be paid according to the established payment schedule.

(iv) A complete and accurate SIF-5 showing all requirements for closure have been met, any TL or LOEP paid, period of payment, and total amount paid.

(7) When the department is closing a claim, what must the self-insurer submit when requesting claim closure?

When a self-insurer is asking the department to close the claim, it must submit:

- (a) A complete and accurate SIF-5; and
- (b) All records not previously submitted to the department excluding bills.

(8) When the department has closed a PPD claim, when must the self-insurer create a payment schedule?

When the department has closed a PPD claim, the self-insurer must create a PPD Payment Schedule substantially similar to L&I form F207-162-000 when the amount of the award is more than three times the state's average monthly wage at the date of injury. At initial/down payment, send copies to the worker and the department.

(9) When the department has closed a PPD claim, when must the self-insurer make the first payment of the award?

When the department has closed a PPD claim, the self-insurer must make the first payment of the award without delay. Continuing payments must be paid according to the established payment schedule.

WAC 296-15-480 When a self-insured claim is protested. When must a self-insurer submit a worker's written protest or appeal to the department?

A self-insurer must submit a written protest by a worker to the department within five working days of receipt. The date the protest is received by the self-insurer is considered the date the protest is received by the department.

[Statutory Authority: RCW 51.04.020, 51.14.020, 51.32.190, 51.14.090, and 51.14.095. 06-06-066, § 296-15-480, filed 2/28/06, effective 4/1/06. Statutory Authority: RCW 51.32.190(6), 51.32.055 (8)(a) and (9)(a). 98-24-121, § 296-15-480, filed 12/2/98, effective 1/2/99.]

WAC 296-15-490 When a self-insured claim is on appeal. (1) When must a self-insurer submit a worker's written appeal to the department?

A self-insurer must submit to the department a written appeal by a worker within five working days of receipt. The date the appeal is received by the self-insurer is considered the date the appeal is received by the department.

(2) How may department orders be defended in self-insured appeals?

The department may ask the office of the attorney general to represent the department at the board of industrial insurance appeals.

(3) What must a self-insurer send to the department when any party appeals a claim to superior or appellate court?

When any party appeals a claim to superior or appellate court, the self-insurer must promptly send to the department copies of the notice of appeal, judgment, and all other relevant information.

[Statutory Authority: RCW 51.04.020, 51.14.020, 51.32.190, 51.14.090, and 51.14.095. 06-06-066, § 296-15-490, filed 2/28/06, effective 4/1/06. Statutory Authority: RCW 51.32.190(6), 51.32.055 (8)(a) and (9)(a). 98-24-121, § 296-15-490, filed 12/2/98, effective 1/2/99.]

WAC 296-15-495 Third party action on a self-insured claim. What must a self-insurer send to the department when there is a third party action?

When there is a third party action, in addition to fulfilling the statutory requirements, the self-insurer must send the department copies of:

When	What
Upon notification	Written indication of the worker's election.
After recovery of damages	1. Signed settlement agreement or court order; and 2. Total amount of attorney fees and costs; and 3. Total amount of benefits paid, including TL, PPD, and medical, excluding payments for IMEs.

[Statutory Authority: RCW 51.32.190(6), 51.32.055 (8)(a) and (9)(a). 98-24-121, § 296-15-495, filed 12/2/98, effective 1/2/99.]

WAC 296-15A-010 Definitions. For the purposes of this chapter, the following words shall have these meanings:

(1) "Director" shall mean the director of the department of labor and industries of the state of Washington.

(2) "Employee" shall have the same meaning as that defined in [RCW] 51.08.180 and 51.08.185.

(3) "Employer" shall have the same meaning as defined in RCW 51.08.070.

[Statutory Authority: 1985 c 347 § 8 and RCW 51.04.020. 86-01-016 (Order 85-35), § 296-15A-010, filed 12/9/85.]

WAC 296-15A-020 Filing a complaint of discrimination. (1) Any employee who believes that he or she has been discharged or otherwise discriminated against by an employer in violation of this section may file a complaint with the director alleging discrimination within ninety days of the date of the alleged violation. Upon receipt of such complaint, the director shall cause an investigation to be made as the director deems appropriate. Within ninety days of the receipt of the complaint filed under this section, the director shall notify the complainant of his or her determination. If upon investigation, it is determined that this section has been violated, the director shall bring an action in the superior court of the county in which the violation is alleged to have occurred.

(2) Who may file. A complaint of discrimination may be filed by the employee.

(3) Nature of filing. A complaint must be filed in writing; however, no particular form of complaint is required.

(4) Place of filing. The complaint should be filed with the director of the department of labor and industries. The complaint should be sent to the Director of the Department of Labor and Industries, Olympia, Washington 98504.

Statutory Authority: RCW 51.04.020(4), 51.04.030 and 51.16.120(3). 80-18-033 (Order 80-24), § 296-16-010, filed 12/1/80, effective 1/1/81.] Repealed by 05-01-105, filed 12/15/04, effective 1/15/05. Statutory Authority: RCW 51.04.010, 51.04.020 and 2004 c 258.

WAC 296-16-100 What is the department's "preferred worker" program? The department's "preferred worker" program provides eligible employers with financial incentives to hire certified "preferred workers," and to reemploy certified "preferred workers" with developmental disabilities.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 2004 c 258. 05-01-105, § 296-16-100, filed 12/15/04, effective 1/15/05.]

WAC 296-16-110 Who may be certified as a "preferred worker"? A worker may be certified as a "preferred worker" if he or she has an open claim for an industrial injury or occupational disease that:

(1) Prevents the worker from returning to work with the employer of record, and substantially impairs the likelihood of the worker's reemployment with a different employer; or

(2) Has resulted in payment of time-loss compensation benefits for a period of at least fourteen consecutive days, if the worker has a developmental disability as defined by RCW 71A.10.020.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 2004 c 258. 05-01-105, § 296-16-110, filed 12/15/04, effective 1/15/05.]

WAC 296-16-112 For purposes of the "preferred worker" program, who is the "employer of record"? When "preferred worker" certification is considered under a claim, the employer of record is any employer determined as responsible for all or part of that claim's costs in the department's final order establishing:

(1) Claim allowance, for injury claims; and

(2) Claim liability, for occupational disease claims.

[Statutory Authority: RCW 51.04.010, 51.04.020, and 51.16.120. 05-17-040, § 296-16-112, filed 8/9/05, effective 9/15/05.]

WAC 296-16-115 How does a worker apply for "preferred worker" certification? Any claim party may inquire about the "preferred worker" program by contacting the claim manager, vocational counselor, or the department's "preferred worker" section.

A worker who is unable to return to work with the employer of record must receive assistance applying for "preferred worker" certification from a registered vocational provider.

Exception: A worker with developmental disabilities, who will be reemployed by the employer of record, does not need to apply for "preferred worker" certification. Instead, the department will consider the worker's eligibility for certification after receiving the employer's *Intent to Hire Preferred Worker* form.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 2004 c 258. 05-01-105, § 296-16-115, filed 12/15/04, effective 1/15/05.]

WAC 296-16-120 Who certifies industrially injured or ill workers as "preferred workers"? Only a department

employee with authority to do so may certify a worker as a "preferred worker."

[Statutory Authority: RCW 51.04.010, 51.04.020 and 2004 c 258. 05-01-105, § 296-16-120, filed 12/15/04, effective 1/15/05.]

WAC 296-16-130 How long does a worker's "preferred worker" certification last? A worker's "preferred worker" certification lasts for thirty-six consecutive months, and will not be extended.

Exception: The department may interrupt the certification period if:

- (1) Medical documentation shows that the worker is unable to work or look for work, due to the industrial injury or occupational disease for which the "preferred worker" certification was granted; and
- (2) The worker's claim for the same injury or disease is still open.

When the worker is again able to work or look for work, the certification period will resume. The period of interruption does not count toward the thirty-six month total.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 2004 c 258. 05-01-105, § 296-16-130, filed 12/15/04, effective 1/15/05.]

WAC 296-16-135 Will the department grant a worker "preferred worker" certification under multiple open claims at the same time? No. While a worker may have multiple open claims at the same time, the department will not grant the worker "preferred worker" certification under more than one of these claims at the same time.

(1) If the worker still has "preferred worker" certification time remaining from a previous claim, and also applies for "preferred worker" certification under a subsequent claim, the department will not grant the worker additional certification. In order to seek employment as a certified "preferred worker," the worker must use the certification time remaining from the previous claim.

(2) If the worker received "preferred worker" certification under a prior claim, and the thirty-six months of that certification has ended, the worker may be eligible for "preferred worker" certification under a subsequent or new open claim.

[Statutory Authority: RCW 51.04.010, 51.04.020, and 51.16.120. 05-17-040, § 296-16-135, filed 8/9/05, effective 9/15/05.]

WAC 296-16-140 Which employers are eligible to benefit from the "preferred worker" program? When an employer offers the worker a medically appropriate job, the employer is eligible to benefit from the "preferred worker" program if:

(1) The employer is the employer of record who reemploys their own worker, and the worker:

(a) Has a developmental disability as defined by RCW 71A.10.020; and

(b) Under the open claim with that employer, has received payment of time-loss compensation for a period of at least fourteen consecutive days; or

(2) The employer is NOT the employer of record, and the employer hires a certified preferred worker.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 2004 c 258. 05-01-105, § 296-16-140, filed 12/15/04, effective 1/15/05.]

WAC 296-16-150 What benefits do eligible employers receive from the "preferred worker" program? (1) Eligible employers insured with the state fund who hire a cer-

(2007 Ed.)

tified "preferred worker," or who reemploy a certified "preferred worker" with developmental disabilities:

(a) Do not pay accident fund and medical aid fund premiums for that worker during the "preferred worker" certification period; and

(b) Will not have the cost of any new claim filed by that worker charged to their experience rating, if the claim is for a new injury sustained or an occupational disease diagnosed during the "preferred worker" certification period.

(2) Eligible self-insured employers who hire a certified "preferred worker," or who reemploy a certified "preferred worker" with developmental disabilities, will receive reimbursement from the second injury fund for all benefits paid on any new claim filed by that worker, if the claim is for a new injury sustained or an occupational disease diagnosed during the "preferred worker" certification period.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 2004 c 258. 05-01-105, § 296-16-150, filed 12/15/04, effective 1/15/05.]

WAC 296-16-160 What must an employer do to qualify for benefits when hiring or reemploying a "preferred worker"? An employer must complete an *Intent to Hire Preferred Worker* form. The employer must return the completed form to the department within sixty days from the "preferred worker's" first day of:

(1) Employment, if the employer is a subsequent or new employer. In these situations, the employer must also provide the department a description of the job offered to the worker.

(2) Reemployment, if the employer is the employer of record and the worker has a developmental disability as defined by RCW 71A.10.020. In these situations, if the doctor has released the worker without restrictions and the worker is returning to the job of record, a job description is not needed.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 2004 c 258. 05-01-105, § 296-16-160, filed 12/15/04, effective 1/15/05.]

WAC 296-16-170 Where may an employer obtain an *Intent to Hire Preferred Worker* form? Employers may obtain an *Intent to Hire Preferred Worker* form from the department's offices or web site.

[Statutory Authority: RCW 51.04.010, 51.04.020 and 2004 c 258. 05-01-105, § 296-16-170, filed 12/15/04, effective 1/15/05.]

WAC 296-17-31001 Introduction. WAC 296-17-31001 through 296-17-31029 provides rules applicable to workers' compensation insurance coverage (industrial insurance) that employers in the state of Washington must provide for their workers. We refer to these rules (WACs) as sections and the complete body of information as the *workers' compensation underwriting manual*. The workers' compensation underwriting manual contains sections (WACs) that define or explain:

- Words and phrases which we use
- Who the workers' compensation system applies to
- How to obtain workers' compensation coverage
- Why a classification system is necessary
- How our classification plan is designed
- How our classification approach compares to other states
- How we assign classifications to your business

- How we classify your business if a specific classification treatment is not referenced in our classification plan
- How employers report and pay premiums to us
- How we compute base rates
- Audit and recordkeeping requirements
- Experience rating plan
- Base rate tables.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-31001, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31002 General rule definitions. In developing the general reporting rules and classifications which govern Washington's workers' compensation classification plan, we have used certain words or phrases which could have several meanings. Many of these words or phrases are defined by law in the Revised Code of Washington (*Title 51 RCW*) and can be found in **Appendix A** of this manual. Some words, however, are not defined by law. To reduce the misunderstanding which can result by our use of certain words or phrases not defined in law (*Title 51 RCW*), we have developed definitions which will govern what these words and phrases mean for purposes of this chapter (*chapter 296-17 WAC*).

The following words or phrases mean:

Account: A unique numerical reference that we assign to you that identifies your business or businesses and allows us to track exposure that you report to us and losses (*claims*) which we pay on your behalf.

Account manager: An individual who works in the underwriting section of the department of labor and industries and manages an employer's workers' compensation insurance account. An account manager is also referred to as an underwriter.

Actual hours worked: A worker's composite work period beginning with the starting time of day that the employee's work day commenced, and includes the entire work period, excluding any nonpaid lunch period, and ending with the quitting time each day work was performed by an employee. The following example is provided to illustrate how work hours are to be reported. If you have questions on reporting please contact our underwriting section at 360-902-4817.

Example: *A carpet installer arrives at the employer's place of business at 8:00 a.m. to pick up supplies, carpet, and the job assignment. The carpet installer arrives at the job site at 9:00 a.m. and works until 12 noon. The installer takes a half hour nonpaid lunch period and resumes working from 12:30 p.m. until 4:00 p.m. The installer then returns to the employer's premise to drop off supplies and carpet waste. The installer leaves the employer's premise at 5:30 p.m. The employer is to report nine hours of work time regardless of whether the employee is paid by the hour or by the number of yards of carpet installed.*

All: When a classification contains a descriptive phrase beginning with "all" such as in "all employees," "all other employees," "all operations," or "all work to completion," it includes all operations and employments which are normally associated with the type of business covered by the classification. This condition applies even if the operations or employments are physically separated or conducted at a separate

location. Operations or employments are to be classified separately when the classification wording requires it, or when the operations or employments are not incidental to, and not usually associated with, the business described by the classification.

And: When this word is contained in any rule it is to be considered the same as the phrase "and/or."

Basic classification: A grouping of businesses or industries having common or similar exposure to loss without regard to the separate employments, occupations or operations which are normally associated with the business or industry. Basic classifications describe a specific type of business operation or industry such as mechanical logging, sawmills, aircraft manufacturing, or restaurants. In most business operations some workers are exposed to very little hazard, while others are exposed to greater hazard. Since a basic classification reflects the liability (*exposure to hazard*) of a given business or industry, all the operations and occupations that are common to an industry are blended together and included in the classification. The rate for a basic classification represents the average of the hazards within the classification. All classifications contained in this manual are considered basic classifications with the exception of classifications 4806, 4900, 4904, 5206, 6301, 6302, 6303, 7100, 7101, and temporary help classifications 7104 through 7122. Classification descriptions contained in WAC 296-17-501 through 296-17-779, establish the intended purpose or scope of each classification. These descriptions will routinely include types of businesses, operations, processes or employments which are either included or excluded from the classification. These references are not to be considered an all inclusive listing unless the classification wording so specifies.

But not limited to: When this phrase is used in any rule in this manual it is not to be interpreted as an all inclusive list. Such a list is meant to provide examples of operations, employments, processes, equipment or types of businesses which are either included or excluded from the scope of the classification.

Excludes or excluding: When a classification contains a descriptive phrase beginning with "excludes" or "excluding" such as "excluding drivers or delivery," "excluding second hand appliance stores," or "excludes construction operations," you must report those operations in a separate classification. If a business fails to keep the records required in the auditing recordkeeping section of this manual and we discover this, we will assign all workers hours for which records were not maintained to the highest rated classification applicable to the work which was performed.

Exposure: Worker hours, worker days, licenses, material, payroll or other measurement which we use to determine the extent to which an employer's workers have been exposed to the hazards found within a particular business or industry classification.

Governing classification: Is the basic classification assigned to a business that produces the largest number of worker hours during a calendar year (*twelve months*). The governing classification rule applies only to situations where a business has been assigned two or more basic classifications and is used for the sole purpose of determining what classification applies to employees and covered owners who

support two or more operations. The governing classification rule is not to be used to determine the basic classification of a business.

Includes or including: When a classification contains a descriptive phrase beginning with "includes" or "including" such as "including clerical office," "including meter readers," or "includes new construction or extension of lines," you must report these operations in that basic classification even though they may be specifically described by some other classification contained in this manual or may be conducted at a separate location.

Industrial insurance: Refer to the definition of "workers' compensation insurance."

N.O.C.: This abbreviation stands for not otherwise classified. Classifications are often worded in this way when there are many variations of the same general type of business and it would be nearly impossible to list all the variations. Before a classification designated with N.O.C. is used, all other related classifications must be reviewed to determine if the business or industry is specified in another classification.

Example: *You operate a retail store that sells greeting cards. In our search to classify your business we come across a classification that covers retail stores N.O.C. Before our underwriter assigns this classification to your business, they would look at other retail store classifications to see if a more precise classification could be found. In our review we note several classifications such as grocery and department stores where greeting cards are sold. None of these classifications, however, specify that they include stores that exclusively sell greeting cards. Classification 6406 "Retail stores, N.O.C.," on the other hand, contains language in its description that states it includes stores that sell items such as greeting cards, table top appliances, tropical fish and birds, and quick print shops. We would assign classification 6406 "Retail stores, N.O.C." to your business.*

Or: Refer to the definition of the word "and."

Premium: The total amount of money owed to the department of labor and industries as calculated by multiplying the assigned classification composite rate by the total units of exposure.

Rate: The amount of premium due for each unit of exposure. All rates are composite rates per worker hour except as otherwise provided for by other rules in this manual.

Risk: All insured operations of one employer within the state of Washington.

Temporary help: The term "temporary help" means the same as temporary service contractors defined in (*Title 19 RCW*) and applies to any person, firm, association or corporation conducting a business which consists of employing individuals directly for the purpose of furnishing such individuals on a part-time or temporary help basis to others.

Underwriter: Refer to the definition of an "account manager."

Work day: Any consecutive twenty-four hour period.

Work hour: Refer to the definition of "actual hours worked."

Workers' compensation insurance: The obligation imposed on an employer by the industrial insurance laws

(*Title 51 RCW*) of the state of Washington to insure the payment of benefits prescribed by such laws.

WAC 296-17-31003 No-fault insurance. What is a workers' compensation insurance program? Workers' compensation insurance is a no-fault insurance program that eliminates blame to either party for workplace injuries or illnesses. The principle features include:

- Wage and medical benefits to employees who suffer on-the-job injuries or illnesses; and
- Immunity from lawsuits for employers as a result of workplace injuries or illnesses suffered by their employees.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-31003, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31004 Coverage requirements. (1) I own a business. Am I required to have workers' compensation insurance coverage for my employees? Nearly every employer doing business in the state of Washington is required to have workers' compensation insurance for his/her employees. Washington law (*RCW 51.12.020*) does exempt certain types of employment from coverage. A copy of this law can be found in **Appendix A** of the workers' compensation manual. If you employ only individuals who are excluded from mandatory workers' compensation insurance coverage, you are not required to have workers' compensation insurance coverage.

(2) I hire contractors to perform work for me. Do I need to be concerned about premiums on their work? Yes. There are two ways you may be liable for premiums on the work they do.

First, they may be "workers" for whom you are required to report and pay premiums. The law defines worker to include both your employees and independent contractors you hire, when the essence of the contract is personal labor. See *RCW 51.08.070, 51.08.180 and 51.08.195* for more guidance about when independent contractors will be considered workers.

Second, the Industrial Insurance Act imposes premium liability on anyone who contracts with another to have work performed. Even if the contractor you hire is not your worker (for example, if the contractor uses one or more workers on the job), you could be liable for their premiums if they fail to pay.

(3) Is there any way for me to protect myself from being held liable for premiums owed by construction contractors I hire? Yes, if you are a registered construction contractor or licensed electrical contractor, and you hire a registered construction contractor or a licensed electrical contractor to do construction work that requires licensing or registration, you can protect yourself from being found liable for the premiums on the work that contractor does for you if:

- (a) They have a principal place of business eligible for IRS deduction;

(b) They keep books and records that reflect all items of income and all expenses of the business; and

(c) You have verified that they have an industrial insurance account in good standing, or are a self-insured employer approved by the department.

(4) **What does "in good standing" mean?** For someone's account to be in good standing, they must:

(a) Be registered with the department of labor and industries for industrial insurance coverage with the state fund;

(b) Have a certificate of coverage, also known as a liability certificate, that has not been revoked or canceled;

(c) Have submitted all reports and supplements required by the department within the past year; and

(d) Be current with all payments due to the state fund, or are current with an approved written payment agreement with the department regarding all unpaid amounts due the state fund.

(5) **How do I know that someone's account is considered to be "in good standing"?** You can find out whether someone's account is in good standing by visiting the department's web site or calling your account manager. If the account is in good standing, we will give you a confirmation number you can keep as proof that you verified their status.

(6) **I use the same subcontractors over and over. Do I have to verify that they have an industrial insurance account in good standing every time I use them?** No. In RCW 51.12.070 protection for construction contractors only requires that you have confirmed a subcontractor's account within a year prior to letting a contract. When you check out your subcontractors on the department's web site or by calling your account manager, a confirmation number will be provided as proof you checked them out. This confirmation number is valid for one year from the time it is issued.

If you are notified by the department of labor and industries that a subcontractor's account is no longer in good standing, you may be liable for their industrial insurance premiums from the date of notification forward.

(7) **Can I, as a construction contractor, be held liable if I verify that the accounts of construction contractors I hire are in good standing, but they fail to confirm the accounts of the construction subcontractors they hire?** No. If you make sure you and your construction subcontractors meet the requirements of RCW 51.12.070, you cannot be held liable if they fail to make sure their construction subcontractors meet the requirements.

WAC 296-17-31005 Employer/employee relationship. How do I determine if I am an employer? Chances are that if you employ one or more individuals to work for you, you are probably an employer. RCW 51.08.070, 51.08.-180 and 51.08.195 all define the employer/employee relationship. These laws present the conditions that must exist before an exception or an independent contractor status can be recognized. Copies of these laws can be found in **Appendix A** of the workers' compensation underwriting manual. You may call one of our offices and a representative will help you determine if you are an employer. We are listed in the

government pages of your local telephone directory, or you can call our underwriting section at (360) 902-4817 for assistance.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31005, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31006 Application process. (1) Where can I buy workers' compensation insurance? Washington law requires that you:

- Purchase your workers' compensation insurance through labor and industries; or
- Be certified as a self-insured employer by the self insurance section of the department of labor and industries.

Employers engaged exclusively in interstate or foreign commerce are permitted to purchase workers' compensation insurance from a private carrier in another state if they do business in that state. The workers' compensation laws of the other state must allow the Washington drivers to be covered in that state. You will need to complete a *master application* to obtain workers' compensation insurance from us. For more information on self insurance you can call (360) 902-6867 and one of our self insurance representatives will assist you.

(2) **Where can I get a master application?**

You can get a master application from any labor and industries, employment security, department of revenue office, the department of licensing master license service, or the corporations division of the office of the secretary of state. For your convenience you can call us at (360) 902-4817 and we will mail you one.

(3) **Where do I send my completed master application?**

You can mail your completed master application to the department of licensing address shown on the form, or you can return it to your local labor and industries, department of revenue, or employment security district tax office. Be sure to include the appropriate fees indicated on the form.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31006, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31007 Owner coverage. (1) As a business owner, can I buy workers' compensation insurance to cover myself?

Yes. If you are a sole proprietor, partner, corporate officer, or member of a limited liability company you may not be required to have industrial insurance coverage as provided in RCW 51.12.020. In these instances, you can still obtain workers' compensation coverage from us. We refer to this coverage as optional coverage since as the owner/officer, you are not required to have this insurance. Because owner insurance coverage is optional, you must meet certain conditions and requirements which are detailed on the *application for owner/officer optional coverage*. These requirements include:

- Completing an application for optional owner/officer coverage;
- Reporting owner/officer hours in the classification assigned to your business that is applicable to the work being performed by the owner/officer;

[Title 296 WAC—p. 235]

- Submitting a supplemental report which lists the name of each covered owner/officer; and
- Reporting four hundred eighty hours or actual hours worked each quarter for each covered owner/officer and in the applicable workers' compensation classification code.

(2) When will my owner/officer coverage become effective?

Your coverage will become effective upon receipt of your application in the department in writing or by fax unless you indicate a future date. However, no such person or beneficiaries thereof shall be entitled to benefits unless the date of injury were the next day or later after coverage was elected. We will not make coverage effective on a date prior to our receipt of your completed application for owner/officer coverage.

(3) Where can I obtain an application for owner/officer coverage?

To obtain a copy of this application, contact your local labor and industries office. We are listed in the government pages of your local directory or you can call our underwriting section at (360) 902-4817.

WAC 296-17-31008 Notification requirements. (1) Will you notify me when you have opened my workers' compensation insurance account?

Yes, we will notify you when we have opened your workers' compensation insurance account.

(2) Will you contact me if you need additional information about my business?

Yes, we will contact you if we need additional information to classify your business or establish your workers' compensation insurance account.

(3) Will you provide me with instructions on how to report and pay premiums to you?

Yes, we will send you a written notice describing the classification or classifications we have assigned to your business and how to report the worker hours or other exposure of your employees to us. You will receive a rate notice which will detail information about your premium rate and what portions of the rate you may deduct from your employees wages. You should keep these notices with your business records. A copy of a rate notice can be found in **Appendix B** of this manual.

(4) Will you notify me if you are going to change a classification assigned to my business?

Yes, if we need to change the classifications assigned to your business, we will send you a written notice describing the new classifications and when they become effective.

(5) How do I notify my employees that they are covered by workers' compensation insurance?

We will send you a certificate of coverage and a packet of information when we open your account. The packet will include some special notices which you are required to post in areas where employees frequently gather. Areas where

you might consider posting the special notices include employee break rooms, employee bulletin boards, or areas where time cards are kept. These notices will inform your employees that they are covered for workers' compensation insurance under the Washington state fund and will tell them what they must do if they suffer a workplace injury or illness. The certificate of coverage should be posted in a place visible to the public. This certificate provides confirmation that you have obtained workers' compensation insurance coverage for your employees.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31008, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31009 Reciprocal agreements. (1) Occasionally one of my Washington employees will do some work for me in another state. Do I need to buy workers' compensation insurance in the state where they are working?

In some cases, we can provide workers' compensation insurance coverage for your Washington based employees working for you on a temporary assignment in another state. We have formal written agreements with some states which detail coverage and jurisdiction issues. We refer to these formal agreements as "*reciprocal agreements*." If you have questions regarding temporary coverage in another state you should contact your account manager for assistance. The name and telephone number of your account manager can be found on your quarterly premium report or annual rate notice. For your convenience you can call us at 360-902-4817 for assistance and we will put you in contact with your assigned account manager.

(2) What is a reciprocal agreement?

A reciprocal agreement is a contract between the department of labor and industries acting on behalf of the state of Washington and another state. The primary purpose of the agreement is to identify which state will be responsible for paying benefits if one of your employees is injured. This also limits your insurance costs. If you employ only Washington workers you need to buy workers' compensation insurance only from us.

(3) You mentioned that there are circumstances when you can provide insurance coverage. What are the circumstances?

The actual circumstances will vary by state. In most cases we will look at:

- The work to be performed,
- The location where the work is to be performed,
- Where the employee was first hired to work,
- How long the employee will be working in the other state.

(4) Which states have reciprocal agreements with Washington? We currently have reciprocal agreements with the following states:

• **IDAHO**
RECIPROCITY AGREEMENT BETWEEN IDAHO INDUSTRIAL ACCIDENT BOARD AND WASHINGTON DEPARTMENT OF LABOR AND INDUSTRIES IN REGARD TO EXTRATERRITORIAL JURISDICTION

This agreement is made between the industrial accident board of the state of Idaho (herein, for convenience, abbrevi-

ated Idaho IAB) and the department of labor and industries of the state of Washington (DOLAI), as administrators of the worker's compensation (WC) laws of their respective states, each of said parties being authorized to enter into reciprocity agreements with other states in matters involving their respective extraterritorial jurisdictional powers and duties.

PREMISES:

1. Employers in each state on occasion find it necessary or expedient to have their workers perform services in the other state. The parties are desirous of entering into an agreement whereby the employers and workers of each of the respective states may continue to be entitled to the protection and benefits provided by the WC laws of their respective home states.

DEFINITIONS:

2. For the purposes of this agreement: Person whose employment is "principally localized" in Idaho shall be deemed to be an Idaho worker. A person's employment is "principally localized" in Idaho when:

(1) His/her employer has a place of business in Idaho and he/she regularly works (or it is contemplated that he/she shall regularly work) at or from such place of business; or

(2) If clause (1) foregoing is not applicable, he/she is domiciled and spends a substantial part of his/her working time in the service of his/her employer in Idaho.

A person whose employment is "principally localized" in Washington shall be deemed to be a Washington worker. A person's employment is "principally localized" in Washington when:

(1) His/her employer has a place of business in Washington and he/she regularly works (or it is contemplated that he/she shall regularly work) at or from such place of business; or

(2) If clause (1) foregoing is not applicable, he/she is domiciled and spends a substantial part of his/her working time in the service of his/her employer in Washington.

An employee whose duties require him/her to travel regularly in the service of his/her employer in more than one state may, by written agreement with his/her employer, designate the state in which his/her employment shall be "principally localized." Unless the state so designated refuses jurisdiction, such agreement shall be given effect under the instant agreement.

In cases where none of the foregoing tests can be made to apply, the person shall be deemed to be a worker of whichever jurisdiction in which his/her contract of hire was made.

3. This agreement shall not apply to Washington workers of an Idaho employer working in the state of Washington, nor to Idaho workers of a Washington employer working in the state of Idaho: Provided, however, That the right and remedies of both Idaho and Washington workers engaged in the construction and maintenance of interstate structures such as dams, bridges, trestles and similar structures between the two states, may be regulated by specific separate reciprocity agreements.

THE PARTIES AGREE:

4. The Idaho IAB in keeping with the provision of the Idaho WC law will assume and exercise extraterritorial jurisdiction of compensation claims on any Idaho worker injured in the state of Washington and of his/her dependents upon

any Idaho employer under its jurisdiction and the latter's surety or insurance carrier.

5. The Washington DOLAI in keeping with the provisions of the Washington WC law will provide protection of any Washington employer under its jurisdiction and benefits to any Washington worker injured in the course of his/her employment while working in the state of Idaho.

6. A Washington employer while performing work in the state of Idaho shall be subject to the safety codes of the state of Idaho, AND an Idaho employer working in the state of Washington shall be subject to the safety codes of the state of Washington.

7. Employers' premium payments on the out-of-state earnings of Idaho workers shall be due and payable to the respective employers' insurance carriers AND premium payments of the out-of-state earnings of Washington workers shall be made to the Washington DOLAI.

8. For the purpose of implementing the terms of the agreement, the parties agreed upon the following procedures:

The Idaho IAB will upon request and on behalf of an Idaho employer issue a certificate of extraterritorial coverage to the Washington DOLAI AND the latter upon request and on behalf of a Washington employer will issue a certificate of extraterritorial coverage to the Idaho IAB. Such certificates may be canceled or revoked at the discretion of the issuing agency. Due notice of issuance, modification and cancellation of any such certificate shall be given to the employer and to his/her insurance carrier, if any.

9. This agreement shall be effective January 1, 1971, and shall remain in full force and effect until superseded or modified by the parties hereto.

• MONTANA

THE WASHINGTON STATE DEPARTMENT OF LABOR AND INDUSTRIES AND THE DEPARTMENT OF LABOR OF THE STATE OF MONTANA, DESIRING TO RESOLVE JURISDICTIONAL ISSUES THAT ARISE WHEN WORKERS FROM ONE STATE TEMPORARILY WORK IN ANOTHER, ENTER INTO THE FOLLOWING AGREEMENT:

WHO IS AFFECTED BY THIS AGREEMENT?

This agreement affects the rights of workers and their employers when the contract of employment arises in one state and the worker is temporarily working in the other. To be covered by this agreement, an employer must be considered an employer under both Washington's and Montana's workers' compensation laws, and workers must be considered workers under both Washington's and Montana's workers' compensation laws.

BASIC RULE:

When a worker's contract of hire arises in one state and the worker is temporarily working in the other state:

Employers are required to secure the payment of workers' compensation benefits under the workers' compensation law of the state the contracts of employment arose in, and pay premiums if not self-insured for the work performed while in the other state; and

Workers' compensation benefits for injuries and occupational diseases arising out of the temporary employment in the other state are payable under the workers' compensation law of the state the contract of employment arose in, and that

state's workers' compensation law provides the exclusive remedy available to the injured worker.

Any Washington employer while performing work in the state of Montana will be subject to the safety codes of the state of Montana. Any Montana employer while performing work in the state of Washington will be subject to the safety codes of the state of Washington.

Washington and Montana both agree to notify the other state in writing of any changes to their law that may affect this agreement within thirty days of that law change.

EXCLUSIONS FROM THE BASIC RULE:

This agreement does not apply to Washington workers of Montana employers while working in the state of Washington nor to Montana workers of Washington employers while working in the state of Montana.

Washington employers engaged in the construction industry as defined in Section 39-71-116 MCA and working in Montana must obtain coverage for workers so employed in Montana under the provisions of Montana's Workers' Compensation Act.

Montana employers engaged in the construction industry and working in Washington must obtain coverage for workers so employed in Washington under the provisions of Washington's Industrial Insurance Act.

CERTIFICATES OF COVERAGE:

Upon request, each state will issue certificates of extraterritorial coverage to the other when appropriate. The issuing state may cancel these certificates at any time.

AGREEMENT:

This agreement retroactively supersedes the previous agreement between Washington and Montana in effect July 1, 1968. This agreement is effective November 1, 2000, and will remain in effect unless terminated, modified, or amended in writing between the parties. Either party may terminate the agreement, without cause, by giving written notice to the other party at least thirty days in advance of such termination.

This agreement creates no rights or remedies, causes of action, or claims on behalf of any third person or entity against Washington or Montana and is executed expressly and solely for the purpose of coordinating issues of workers' compensation coverage between the states.

Any communication between the parties hereto or notices to be given hereunder shall be given in writing by personal delivery, facsimile or mailing the same, postage prepaid, to the addresses or numbers set forth below on the signature pages or as subsequently modified in writing by the party to be noticed.

• NEVADA

RECIPROCITY AGREEMENT BETWEEN THE DEPARTMENT OF LABOR AND INDUSTRIES OF THE STATE OF WASHINGTON AND THE NEVADA INDUSTRIAL COMMISSIONS OF THE STATE OF NEVADA REGARDING EXTRATERRITORIAL RECIPROCITY

WHEREAS, The worker's compensation law of the state of Washington authorizes the director of labor and industries to enter into agreement of reciprocity for worker's compensation purposes with other states; and

WHEREAS, The worker's compensation law of the state of Nevada authorizes the Nevada industrial commission to enter into agreements of reciprocity for worker's compensation purposes with other states; and

WHEREAS, Employers who conduct operations in the state of Washington are required on occasion to have Washington workers perform services in the state of Nevada; and

WHEREAS, Employers who conduct operations in the state of Nevada are required on occasion to have Nevada workers perform services in the state of Washington; and

WHEREAS, The department of labor and industries of the state of Washington and the Nevada industrial commission of the state of Nevada are desirous of entering into an agreement whereby the employers and workers of each of the respective states may continue to be entitled to the protection and benefits provided by the worker's compensation laws of their respective home state.

IT IS HEREBY AGREED That for the purpose of this agreement of reciprocity, a Washington worker is a person hired to work in the state of Washington, and a Nevada worker is a person hired to work in the state of Nevada.

IT IS FURTHER AGREED BETWEEN The department of labor and industries of the state of Washington and the Nevada industrial commission of the state of Nevada.

That the department of labor and industries of the state of Washington in keeping with the provisions of the Washington worker's compensation law will provide protection for any Washington employer under its jurisdiction and benefits to any of the Washington workers who may be injured in the course of employment while working temporarily in the state of Nevada. In the event of an injury to one of these workers, his/her exclusive remedy would be that provided by the worker's compensation law of the state of Washington.

That the Nevada industrial commission of the state of Nevada in keeping with the provisions of the Nevada worker's compensation law will provide protection for any Nevada employer under its jurisdiction, and benefits to any of its workers who may be injured in the course of employment while working temporarily in the state of Washington. In the event of injury to one of these workers, his/her exclusive remedy would be that provided by the worker's compensation law of the state of Nevada.

That the department of labor and industries of the state of Washington will upon request and on behalf of the Washington employer issue a certificate of extraterritorial coverage to the Nevada industrial commission of the state of Nevada, and that the Nevada industrial commission of the state of Nevada will upon request and on behalf of the Nevada employer issue a certificate of extraterritorial coverage to the department of labor and industries of the state of Washington.

That these certificates of extraterritorial coverage shall be issued and/or canceled at the discretion of the Washington department of labor and industries or the Nevada industrial commission.

That the Nevada employer while performing work in the state of Washington will be subject to the safety codes of the state of Washington, and that the Washington employer while performing work in the state of Nevada will be subject to the safety codes of the state of Nevada.

IT IS MUTUALLY UNDERSTOOD, That this agreement will not apply to Nevada workers of the Washington employer working in the state of Nevada, nor to the Washington workers of the Nevada employer working in the state of Washington.

IT IS ALSO MUTUALLY UNDERSTOOD, That premium payments on the out-of-state earnings of Washington workers will be made to the Washington department of labor and industries, and that premium payments on the out-of-state earnings of Nevada workers will be made to the Nevada industrial commission of the state of Nevada.

IT IS FURTHER AGREED That this statement of extraterritorial reciprocity shall be effective April 1, 1970, and further that this agreement shall remain in full force and effect until superseded or modified by the parties to this agreement.

• **NORTH DAKOTA**

THE WASHINGTON STATE DEPARTMENT OF LABOR AND INDUSTRIES AND THE NORTH DAKOTA WORKERS COMPENSATION, DESIRING TO RESOLVE JURISDICTIONAL ISSUES THAT ARISE WHEN WORKERS FROM ONE STATE TEMPORARILY WORK IN ANOTHER, ENTER INTO THE FOLLOWING AGREEMENT:

WHO IS AFFECTED BY THIS AGREEMENT?

This agreement affects the rights of workers and their employers when the contract of employment arises in one state and the worker is temporarily working in the other. To be covered by this agreement, an employer must be considered an employer under both Washington's and North Dakota's workers' compensation laws, and workers must be considered workers under both Washington's and North Dakota's workers' compensation laws.

BASIC RULE:

When a worker's contract of hire arises in one state and the worker is temporarily working in the other state:

Employers are required to secure the payment of workers' compensation benefits under the workers' compensation law of the state the contracts of employment arose in, and pay premiums if not self-insured for the work performed while in the other state; and

Workers' compensation benefits for injuries and occupational diseases arising out of the temporary employment in the other state are payable under the workers' compensation law of the state the contract of employment arose in, and that state's workers' compensation law provides the exclusive remedy available to the injured worker.

Any Washington employer while performing work in the state of North Dakota will be subject to the safety codes of the state of North Dakota. Any North Dakota employer while performing work in the state of Washington will be subject to the safety codes of the state of Washington.

EXCLUSION FROM THE BASIC RULE:

This agreement does not apply to Washington workers of North Dakota employers while working in the state of Washington or to North Dakota workers of Washington employers while working in the state of North Dakota.

CERTIFICATES OF COVERAGE:

Upon request, each state will issue certificates of extraterritorial coverage to the other when appropriate. The issuing state may cancel these certificates at any time.

AGREEMENT:

This agreement is effective March 1, 2001, and will remain in effect unless terminated, modified, or amended in writing between the parties. Either party may terminate the agreement, without cause, by giving written notice to the other party at least thirty days in advance of such termination.

(2007 Ed.)

This agreement creates no rights or remedies, causes of action, or claims on behalf of any third person or entity against Washington or North Dakota, and is executed expressly and solely for the purpose of coordinating issues of workers' compensation coverage between the states.

Any communication between the parties hereto or notices to be given hereunder shall be given in writing by personal delivery, facsimile or mailing the same, postage prepaid, to the addresses or numbers set forth below on the signature pages or as subsequently modified in writing by the party to be noticed.

• **OREGON**

THE STATE OF WASHINGTON, ACTING BY AND THROUGH THE WASHINGTON STATE DEPARTMENT OF LABOR AND INDUSTRIES AND THE STATE OF OREGON, ACTING BY AND THROUGH ITS DEPARTMENT OF CONSUMER AND BUSINESS SERVICES, DESIRING TO RESOLVE JURISDICTIONAL ISSUES THAT ARISE WHEN WORKERS FROM ONE STATE TEMPORARILY WORK IN ANOTHER, ENTER INTO THE FOLLOWING AGREEMENT (THE "AGREEMENT"):

WHO IS AFFECTED BY THIS AGREEMENT?

This agreement affects the rights of workers and their employers when the contract of employment arises in Washington and the worker is temporarily working in Oregon, or when the contract of employment arises in Oregon and the worker is temporarily working in Washington. To be covered by this agreement, an employer must be considered an employer under both Washington's and Oregon's workers' compensation laws, and workers must be considered workers under both Washington's and Oregon's workers' compensation laws.

BASIC RULE:

When a contract of employment arises in Washington and the worker is temporarily working in Oregon or when the contract of employment arises in Oregon and the worker is temporarily working in Washington:

Employers shall be required to secure the payment of workers' compensation benefits under the workers' compensation law of the state the contract of employment arose in, and pay premiums or be self-insured in that state for the work performed while in the other state; and

Workers' compensation benefits for injuries and occupational diseases arising out of the temporary employment in the other state shall be payable under the workers' compensation law of the state the contract of employment arose in, and that state's workers' compensation law provides the exclusive remedy available to the injured worker.

In determining whether a worker is temporarily working in another state, Washington and Oregon agree to consider:

1. The extent to which the worker's work within the state is of a temporary duration;
2. The intent of the employer in regard to the worker's employment status;
3. The understanding of the worker in regard to the employment status with the employer;
4. The permanent location of the employer and its permanent facilities;
5. The extent to which the employer's contract in the state is of a temporary duration, established by a beginning date and expected ending date of the employer's contract;

6. The circumstances and directives surrounding the worker's work assignment;

7. The state laws and regulations to which the employer is otherwise subject;

8. The residence of the worker; and

9. Other information relevant to the determination.

- Washington and Oregon both agree to notify the other state of any changes to their law that may affect this agreement within thirty days of that law change.

- Any Washington employer while performing work in the state of Oregon will be subject to the safety codes of the state of Oregon. Any Oregon employer while performing work in the state of Washington will be subject to the safety codes of the state of Washington.

EXCLUSION FROM THE BASIC RULE:

This agreement does not apply to any Washington worker of an Oregon employer while working in the state of Washington nor to any Oregon worker of a Washington employer while working in the state of Oregon. It is understood that an employer from either Oregon or Washington may have a contract in the other state where they may have both Oregon and Washington workers which may require obtaining coverage in both states for that same contract.

This agreement does not apply to employees of an employer working for stevedoring or steamship companies.

This agreement does not supersede separate agreements made regarding workers employed in the construction or maintenance of interstate structures such as dams, bridges, trestles, etc. between Oregon and Washington.

CERTIFICATES OF COVERAGE:

Upon request, each state will issue certificates of extra-territorial coverage to the other when appropriate. The issuing state may cancel these certificates at any time.

MERGER:

This agreement replaces and supersedes the previous agreement on the same subject matter entered into between Washington and Oregon in effect since October 5, 1997.

EFFECTIVE DATE:

This agreement shall take effect immediately upon completion of all of the following requirements:

(1) Execution by both parties;

(2) Public notification in compliance with Oregon law; and

(3) Adoption as a rule in compliance with Washington law.

This agreement will remain in effect unless terminated, modified, amended or replaced in writing between the parties.

TERMINATION:

Either party may terminate the agreement, without cause, by giving written notice to the other party at least thirty days in advance of such termination.

NOTICE:

Any communication between the parties hereto or notices to be given hereunder shall be given in writing by personal delivery, facsimile or mailing the same, postage prepaid, to the addresses or numbers set forth below on the signature pages or as subsequently modified in writing by the party to be noticed.

• **WYOMING**

AGREEMENT BETWEEN THE DEPARTMENT OF LABOR AND INDUSTRIES OF THE STATE OF WASHINGTON AND THE WORKMEN'S COMPENSATION DEPARTMENT OF THE STATE OF WYOMING REGARDING EXTRATERRITORIAL RECIPROCITY

WHEREAS, The workmen's compensation law of the state of Washington authorized the director of labor and industries to enter into agreements of reciprocity for workmen's compensation purposes with other states; and

WHEREAS, The workmen's compensation law of the state of Wyoming authorizes the workmen's compensation department to enter into agreements of reciprocity for workmen's compensation purposes with other states; and

WHEREAS, Employers who conduct operations in the state of Washington are required on occasion to have Washington-hired workers perform services in the state of Wyoming; and

WHEREAS, Employers who conduct operations in the state of Wyoming are required on occasion to have Wyoming-hired workers perform services in the state of Washington; and

WHEREAS, The department of labor and industries of the state of Washington and the workmen's compensation department of the state of Wyoming are desirous of entering into an agreement whereby the employers and workers of each of the respective states may continue to be entitled to the protection and benefits provided by the workmen's compensation laws of their respective home states.

IT IS HEREBY AGREED BETWEEN The department of labor and industries of the state of Washington and the workmen's compensation department of the state of Wyoming:

That the department of labor and industries of the state of Washington in keeping with the provisions of the Washington workmen's compensation law will provide protection for any Washington employer under its jurisdiction and benefits to any of his/her workers who may be hired in the state of Washington and injured in the course of employment while working temporarily in the state of Wyoming. In the event of injury to one of these workers, his/her exclusive remedy would be that provided by the workmen's compensation law of the state of Washington.

That the workmen's compensation department of the state of Wyoming in keeping with the provision of the Wyoming workmen's compensation law will provide protection for any Wyoming employer under its jurisdiction, and benefits to any of his/her workers who may be hired in the state of Wyoming and injured in the course of employment while working temporarily in the state of Washington. In the event of injury to one of these workers, his/her exclusive remedy would be that provided by the workmen's compensation law of the state of Wyoming.

That for the purpose of this agreement "temporary" shall mean a period not to exceed six months.

That the department of labor and industries of the state of Washington will, upon request and on behalf of the Washington employer, issue a certificate of extraterritorial coverage to the workmen's compensation department of the state of Wyoming, and that the workmen's compensation department of

the state of Wyoming will, upon request and on behalf of the Wyoming employers, issue a certificate of extraterritorial coverage to the department of labor and industries of the state of Washington.

That these certificates of extraterritorial coverage shall be issued for a maximum period of six months subject to renewal upon request by the affected employers and at the discretion of the Washington department of labor and industries, or the Wyoming workmen's compensation department.

That the Wyoming employer and his/her workers while performing work in the state of Washington under this agreement will be subject to the safety codes of the state of Washington, and that the Washington employer and his/her workers while performing work in the state of Wyoming under this agreement will be subject to the safety codes of the state of Wyoming.

IT IS MUTUALLY UNDERSTOOD That this agreement will not apply to workers of the Washington employer who may be hired in the state of Wyoming, nor to the workers of the Wyoming employer who may be hired in the state of Washington.

IT IS ALSO MUTUALLY UNDERSTOOD That premium payments on the out-of-state earnings of Washington-hired workers will be made to the Washington department of labor and industries, and that premium payments on the out-of-state earning of Wyoming-hired workers will be made to the workmen's compensation department of the state of Wyoming.

IT IS FURTHER AGREED That this agreement of extraterritorial reciprocity shall become effective on July 15, 1963, and shall remain in full force and effect until superseded or modified by the parties to this agreement.

WAC 296-17-31010 Premium cost. How much will I pay for workers' compensation insurance? What you pay for workers' compensation insurance will vary by:

- The nature of the business you are conducting,
- The specific classifications applicable to your business,
- The unit of exposure applicable to your industry, and
- Your company's experience factor.

You may call our underwriting section at (360) 902-4817 and one of our representatives will help you estimate your premium cost per hour.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31010, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31011 Classification system and plan.
(1) What is a workers' compensation classification system?

A workers' compensation classification system is an objective method of collecting money (*premiums*) to pay the benefits of workers injured on the job. We believe the method used to spread this cost among the employers we insure should be fair and have some relationship to their hazard and potential for loss. Classifications are the tool used to achieve a fair method of distributing the risk among employers we

insure. Objective boundaries are established for each classification. These boundaries describe the types of businesses which are included in the classification, as well as the operations and employments routinely encountered. We refer to these objective boundaries as the scope of the classification. Once these boundaries have been defined, we can begin collecting information about the employers assigned to each classification. The information includes the exposure which is being covered (*risk*) and the losses (*claims*) which are related to these businesses. Next, we use this information to establish premium rates that employers in each industry will pay for their workers' compensation insurance. Our goal is to produce fair insurance rates which reflect the hazardous nature of each industry. We have tailored our classification system in Washington to reflect industries found in our state. This makes our system responsive to change and provides rate payer equity to the employers we insure. Employers engaged in more hazardous industries such as logging will pay higher insurance rates than employers engaged in less hazardous businesses such as retail store operations.

(2) Why is a classification system needed?

We need a classification system to provide fair premium rates. Washington law (*RCW 51.16.035*) also requires us to have a classification system.

(3) Is the classification system the same as the classification plan?

No, we refer to the body of rules (*WACs*) which establish the general parameters of how classifications are to be used as the "classification system." These rules speak to the requirements of workers' compensation insurance and to our general classification approach, such as classifying by nature of business in the state of Washington, not by occupation of worker. The "classification plan" refers to all of the various classification descriptions which describe different types of business or industry. The classification system rules (*general rules*) will apply to all businesses unless another treatment is specifically provided for in the classification plan rules (*special rules*).

(4) How is our classification plan designed?

We have designed a plan which is keyed to the nature of the businesses or industries of the employers we insure. Our plan has over three hundred business or industry classifications. Each classification carries a premium rate which reflects the hazards that workers are exposed to. Descriptions of our classifications can be found in *WAC 296-17-501* through *296-17-779*.

(5) Is your classification approach similar to the approach used by private insurance companies?

Yes, we are required by law (*RCW 51.16.035*) to use the same classification (*underwriting*) approach used by private carriers.

[Statutory Authority: RCW 51.16.035, 51.04.020. 00-14-052, § 296-17-31011, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31011, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31012 Classification assignment. (1) How are classifications assigned to my business?

We will assign a basic classification or classifications to your business based on the nature of your business operation(s) in the state of Washington. We will not assign classifications to your business based on the individual operations,

duties or occupations of individuals found within your business unless the basic classification assigned to your business either requires or permits a separate classification treatment for specified operations or employments. Exceptions to this approach are outlined in WAC 296-17-31017 and 296-17-31018.

(2) Does this same classification approach apply if I have several businesses?

This classification approach will apply to each separate legal entity. Each separate legal entity will be classified on its own merits.

(3) How do you decide what classification(s) to assign to my business?

To determine what classification(s) to assign to your business, we need enough information to give us a clear understanding of the precise nature of your business and the hazards your business poses to your workers. In some cases we will need to call you to obtain more detailed information about your business. Occasionally one of our field representatives may visit your business to gain a better understanding of the nature of your business. In most cases we will find a classification that specifically describes your business.

Example: You operate a company that sells baked goods to retail customers. Before we can classify your business we need to determine whether you bake the goods you are selling or are simply selling goods another business has baked. Once we have determined the precise nature of your business, we will review all of the available classifications to find the one that best describes the entire business. If the business has baked the products they are selling, we would consider a bakery classification or maybe a restaurant classification. If your business simply sells baked goods that another business made, we may look at a retail store classification. In most cases we will find a classification that specifically describes the business we are classifying.

[Statutory Authority: RCW 51.16.035, 51.04.020, 00-14-052, § 296-17-31012, filed 7/1/00, effective 7/1/00. Statutory Authority: RCW 51.16.035, 99-18-068, § 296-17-31012, filed 8/31/99, effective 10/1/99; 98-18-042, § 296-17-31012, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31013 Building construction. (1) Does this same classification approach apply to building and construction contractors?

Yes, but it may not appear that way without further explanation. We classify contractors by phase and type of construction since it is common for each contract to vary in scope.

Example: A contractor who builds and remodels private residences may frame the structure and work on no other phases of the project. On another job the same contractor may do only the interior finish carpentry. On still another job the contractor may install a wood deck or build a garden arbor. Each of these carpentry activities is covered by a different classification code. To ensure that contractor businesses receive the same treatment as other businesses, we assign classifications according to the phases and types of construction they contract to perform. Since some contractors specialize in one area of construction, such as plumbing, roofing, insulation, or electrical services, this classification approach mirrors that of nonbuilding contractor businesses. The policy of assigning several basic classifications to con-

*tractors engaged in multiple phases of construction may seem to be in conflict with the classification approach used for nonbuilding contractor businesses, but we have simply used the **multiple business** classification approach.*

If we have assigned multiple classifications to your construction business you should take special care in maintaining the records required in the auditing and recordkeeping section of this manual. If we discover that you have failed to keep the required records we will assign all worker hours for which the records were not maintained to the highest rated classification applicable to the work that was performed.

(2) Who does this rule apply to?

If you are a building, construction or erection contractor and we have assigned one or more of the following classifications to your business, this rule applies to you: 0101, 0103, 0104, 0105, 0107, 0108, 0201, 0202, 0210, 0212, 0214, 0217, 0219, 0301, 0302, 0303, 0306, 0307, 0403, 0502, 0504, 0507, 0508, 0509, 0510, 0511, 0512, 0513, 0514, 0516, 0517, 0518, 0519, 0521, 0540, 0541, 0550, 0551, 0601, 0602, 0603, 0607, 0608, and 0701.

(3) Can I have a single classification assigned to my business to cover a specific construction project?

Yes, to simplify recordkeeping and reporting requirements we will assign a single classification to cover an entire project.

(4) How do I request the single classification for one of my construction projects?

You should send your request to the attention of your account manager at the address below:

Department of Labor and Industries
P.O. Box 44144
Olympia, Washington 98504-4144

(5) If I have asked for a single classification on one of my construction projects, how do you determine which classification will apply?

You must supply us with a description of the project and a break down of the total number of hours of exposure by phase of construction that you are responsible for.

Example: You notify us that your company will be responsible for all plumbing and iron erection work on a commercial building site. You have requested a single classification for this project. In your request you tell us that you estimate that it will take one thousand work hours to perform all the plumbing work and five hundred work hours to do the steel erection work.

With this information we will estimate the premiums by classification.

Example: We determine that the plumbing work is covered under classification 0306 and the steel erection work is covered under classification 0518. Assume that classification 0306 has an hourly premium rate of \$1.50 and classification 0518 has an hourly premium rate of \$2.55. We estimate the total premium on this job to be \$2,775 (1,000 hours x \$1.50 = \$1,500 + 500 hours x \$2.55 = \$1,275).

Our next step in this process is to develop an average hourly rate for the project. We will use this information to select the single classification which will apply to this project.

Example: We will take the estimated premium (\$2,775) and divide this number by the estimated hours (1,500) and arrive at an average hourly rate of \$1.85.

To select the single classification that will apply to a construction project, we will compare the average hourly rate that we have computed to the rates of the classifications applicable to the project. We will select the classification whose hourly rate is the closest to the average hourly rate that we computed from the information you supplied us with.

Example: From the information you supplied, we have determined that the average hourly rate for this project is \$1.85. We also know that the rate for the plumbing classification (0306) is \$1.50 per hour and the rate for steel erection is \$2.55 per hour. We would assign classification 0306 as the single classification applicable to this project.

(6) How will I know what classification will apply to my construction project?

We will send you a written notice which will specify the basic classification and premium rate that will apply to this project.

(7) If I have asked for a single classification to cover one of my construction projects, am I required to use the single classification which you gave me?

No, but you should call your account manager to verify what other classifications would apply to the project. The name and phone number of your account manager can be found on your quarterly premium report or your annual rate notice. For your convenience you can call us at 360-902-4817 and we will put you in contact with your assigned account manager.

(8) I am a general construction or erection contractor, I subcontract all my work and have no employees of my own. Do I have to report to the department of labor and industries?

No, since you do not have employees, you do not need to report to the department of labor and industries. You should be aware that the workers' compensation insurance laws of Washington include certain independent contractors as workers. If we determine that an independent contractor that you used qualifies as a covered worker, you will be responsible for the premium due for their work time. You can also be held responsible for premiums due to labor and industries if you subcontract with an unregistered contractor and they fail to pay premiums on behalf of their employees. It is in your best interest to make sure that your subcontractors are registered contractors in good standing by confirming their status on the department's web site or contacting your account manager.

(9) Am I required to keep any special records of subcontractors that I use?

Yes, you are required to keep certain information about the subcontractors that you use. The information required is:

- Subcontractor's legal name;
- Contractor registration number and expiration date;
- UBI number (or labor and industries account ID number).

If you supply materials to a subcontractor, also keep a record of the:

- Amount of material supplied;
- Project name or location;
- Date material was supplied; and
- Completion date of contracted work.

Failure to maintain these records may result in the subcontractor being considered a covered worker for whom you must report hours.

(10) What classification should I use to report construction site cleanup by my employees? You should report the cleanup of construction debris in the same classification that applied to the work which generated the debris unless another classification treatment is provided for in other rules. For example, if you are a roofing contractor and you have an employee pick up roofing debris at the construction (project) site, you would report the employee involved in the site cleanup in the roofing classification (0507). If you are the general contractor at a construction site and have either classification 0510 "wood frame building construction" or classification 0518 "nonwood frame building construction" assigned to your business, you would report site cleanup in the classification applicable to the type of building you are constructing. For example, if you are a general contractor and you are engaged in building a single-family wood frame dwelling, you would report construction site cleanup by your employees in classification 0510 "wood frame building construction."

(11) I am a construction site clean-up contractor, my employees only pick up construction debris, we do no construction work, what classification do I report site cleanup in? If your employees are collecting and removing construction site debris, you would report in classification 4305-22. If your employees are collecting and removing non-construction debris such as household junk, garden waste, basement debris, furniture and appliances, you would also report in classification 4305-22.

(12) What classification should I use to report the work time of my employees when they are involved in the set up of scaffolding, hoists, cranes, towers or elevators at a construction site? We use the same classification treatment for this type of work as we do with construction site cleanup. For example, if you are a roofing contractor and you have an employee set up scaffolding at the construction (project) site, you would report the employee involved in the set up of scaffolding in the roofing classification (0507). If you are the general contractor at a construction site and have either classification 0510 "wood frame building construction" or classification 0518 "nonwood frame building construction" assigned to your business, you would report the set up of scaffolding at the construction in the classification applicable to the type of building you are constructing. For example, if you are a general contractor and you are engaged in building a single-family wood frame dwelling, you would report scaffolding set up by your employees in classification 0510 "wood frame building construction." Helicopter services that are engaged to assist in lifting beams, air conditioning units, statues and other objects onto buildings or structures are to be reported separately in classification 6803.

(13) Is preoccupancy cleanup of a building by my employees classified the same as debris cleanup at a construction site? Since your understanding of what preoccupancy clean-up work is may be different from ours, we need to share with you our understanding before we can answer this question. Our understanding in this area is that preoccupancy cleanup occurs after the building is finished. The clean-up work consists of washing paint and overspray from

windows, vacuuming carpets, washing floors and fixtures, and dusting woodwork, doors and cabinets. If you have employees whose duties are limited to this type of cleaning, we will allow you to report their work time in classification 6602 "janitors."

(14) If I have an employee who does some construction work, construction site cleanup and preoccupancy cleanup, can I divide their work time between the janitor and a construction classification? No, we will not permit you to divide the work time of an employee between the janitor classification and a construction classification. If you have an employee who does preoccupancy clean-up work for you, and that employee also performs other nonpreoccupancy clean-up work for you such as construction work, shop work or construction site debris clean-up work, then you must report all of their work time in the applicable construction or nonshop classification.

WAC 296-17-31014 Farming and agriculture. (1) Does this same classification approach apply to farming or agricultural operations?

Yes, but it may not appear so without further explanation. We classify farming and agricultural operations by type of crop or livestock raised. This is done because each type of grower will use different processes and grow or raise multiple crops and livestock which have different levels of hazards. It is common for farmers and ranchers to have several basic classifications assigned to their account covering various types of crops or livestock. If you fail to keep the records required in the auditing recordkeeping section of this manual, and we discover this, we will assign all worker hours for which records were not maintained to the highest rated classification applicable to the work performed.

(2) I am involved in diversified farming and have several basic classifications assigned to my business. Can I have one classification assigned to my account to cover the different types of farming I am involved in?

Yes, your account manager can assist you in determining the single classification that will apply to your business. The name and phone number of your account manager can be found on your quarterly premium report or your annual rate notice. For your convenience you can call us at 360-902-4817 and we will put you in contact with your assigned account manager.

(3) How do you determine what single farming classification will be assigned to my business?

The approach used to assign a single classification to a farming business is much the same as we use for construction or erection contractors. To do this, we will need a break down of exposure (*estimate of hours to be worked by your employees*) by type of crop or livestock being cared for (*classification*). This information will be used to estimate the premium

(2007 Ed.)

which would be paid using multiple classifications. The total premium is then divided by the total estimated hours to produce an average rate per hour. We will select the classification assigned to your business which carries the hourly premium rate which is the closest to the average rate that we produced from the estimated hours. Classification 4806 is not to be assigned to any grower as the single farming classification.

(4) How will I know what single farming classification you have assigned to my business?

We will send you a written notice of the basic classification that will apply to your business.

(5) If I requested a single classification for my farming operation can I change my mind and use multiple classifications?

Yes, but you will need to call your account manager to verify the applicable classifications.

The name and phone number of your account manager can be found on your quarterly premium report or your annual rate notice. For your convenience you can call us at 360-902-4817 and we will put you in contact with your assigned account manager.

(6) I am a farm labor contractor. How is my business classified?

If you are a farm labor contractor we will assign the basic classification that applies to the type of crop being grown, or livestock being cared for. If you contract to supply both machine operators and machinery on a project, all operations are to be assigned to classification 4808.

WAC 296-17-31015 General inclusions. When are certain operations like delivery drivers included in a basic classification and when are they excluded? There are certain operations, such as delivery of goods or merchandise, which are routinely found in the businesses we insure. We refer to these operations as *general inclusions* to a basic classification. Although these operations are sometimes covered by a specific basic classification, we will not assign separate basic classifications to a business to cover these operations unless it was, coincidentally, the nature of the employer's business. *General inclusion* operations are support functions or operations of a business and, as such, are usually included within the scope of each basic classification. The determination of whether or not these operations will be included within the scope of a basic classification is made when the basic classification is first developed. That is why some basic classifications will exclude certain operations and others will include them. Unless the wording of a basic classification specifically excludes any operation listed below, they are to be included. The more common general inclusion operations are:

- Aircraft travel by employees in connection with the business of the employer, other than members of the flying crew.
- Commissaries and restaurants for the employers' employees. However, such operations, when operated in connection with construction, erection, lumbering,

[Title 296 WAC—p. 245]

or mining, will be assigned classification 3905 - restaurants.

- Manufacture of containers, such as bags, barrels, bottles, boxes, cans, cartons, wooden pallets, or packing cases by employees of the employers for use in the employer's operations.
- Hospitals, medical facilities, or dispensaries operated by employers for their employees.
- Printing, lithography, or similar operations of the employer when used exclusively for their own products or needs.
- Maintenance or ordinary repair of the employer's building or equipment when performed by employees of the employer.
- Pick up and delivery when performed by employees of the employer in connection with the business of the employer.
- Sales of all products being manufactured by the employer.
- Warehousing, handling, packing, and shipping when performed by employees of the employer in connection with the business of the employer.
- Testing or analytical laboratories when operated by employees of the employer in connection with the business of the employer.

Example: *Picture the variety of delivery vans and trucks you encounter as you drive down a highway. In this example, there is a company-owned truck delivering grocery items, a van that delivers parcels and packages, a moving van transporting household furnishings for a customer, and a common carrier company hauling goods from one state to another. Even though the drivers of these vehicles are performing similar duties (hauling goods/driving on a freeway), we would not assign them to the same basic classification. Our classification policy requires us to assign classifications based on the type of the businesses they work for and to consider the overall operations of that business. We learn that the truck delivering grocery items was owned by a retail grocery store and they were transporting goods from a central warehouse to one of their stores. Since the employer is engaged in operating retail grocery stores we would begin our classification search by looking for a classification that covers retail grocery stores. Our search discloses classification 6402 which covers retail grocery stores. A review of the wording of that classification does not require drivers to be reported in another classification so the grocery store classification would include the driver. Now, assume that the driver of the van delivering parcels and packages is an employee of a drug store. Drug stores are covered in classification 6406. A review of that classification reveals that drivers are to be reported separately in classification 1101. Therefore the driver would be reported in classification 1101 and not classification 6406. Moving and storage companies are covered in classification 6907. Since this classification does not exclude drivers, the driver would be reported in classification 6907. And, finally, we would assign the interstate/intrastate trucking classification 1102 to the common carrier trucking operation.*

[Title 296 WAC—p. 246]

WAC 296-17-31016 Classification by analogy. How do you determine what classification(s) to assign to my business if a specific reference does not exist in the classification plan? You may operate a business which is not specifically referenced in our classification plan. This can simply be the result of differences in terminology. Classifications are constantly evolving as employers adopt new technology, employ more specialized employees, modernize equipment, and employ new processes. In rare instances our classification plan will not specifically reference a type of business. When we discover a type of business or industry for which a classification does not exist, we will follow the same general classification approach that we use to classify a business when a reference does exist. However, we need to go a step further by considering the processes used and the related hazards. We call this *classifying by analogy*.

Example: *You are the owner of a pen manufacturing business. Assume we have contacted you and learn the following:*

- *You purchase all the plastic components from another unrelated business;*
- *Some of your pens have plastic housings and others have metal housings;*
- *You manufacture all of the small metal components at your plant;*
- *Your metal manufacturing consists of metal stamping, using metal lighter than nine gauge, and extrusion processes;*
- *You also manufacture small boxes to package your pens;*
- *You operate a printing department for printing your company's logo and pen information on the boxes;*
- *As a special service to customers, you will deliver their pens if they are within a sixty mile radius of your plant.*

We have over three hundred classifications. To simplify the classification process, we have grouped our classification codes into about thirty-eight smaller groupings which we refer to as a schedule grouping. In the case of a pen manufacturer, we can narrow our search to the group which covers metal goods manufacturing. Within the metal goods manufacturing group we have classifications that cover the fabrication of structural iron or steel beams used in construction; classifications that cover the manufacture of wood stoves, storage tanks, and other products using plate metal; classifications that cover light weight sheet metal works such as heating and ventilating duct work; and a classification that covers the manufacture of light metal products. In our search for a classification we encounter classification 3602. Classification 3602 includes the manufacture of fishing tackle, scientific instruments, metal buttons, and jewelry. When we consider the weight of metal, other materials used in the manufacture of the product, the manufacturing processes, and the end product, we conclude that classification 3602 is the most applicable to the manufacture of writing pens and would assign this classification to your pen manufacturing business.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31016, filed 8/28/98, effective 10/1/98.]

(2007 Ed.)

WAC 296-17-31017 Multiple classifications. (1) Can I have more than one basic classification assigned to my account?

Yes, we will assign other classifications to your business when the assignment of another basic classification is required or permitted by the description(s) of the employer's other classification(s).

Example: *You operate a retail book store. We would assign classification 6406 to your retail book store. Assume that as a part of the book store business you have a separate lunch counter and espresso bar in one section of the book store. A review of classification 6406 reveals that lunch counters are to be reported separately in classification 3905. We would assign classification 3905 for your lunch counter and espresso bar operation. This classification (3905) would be in addition to the book store classification (6406). Remember to keep accurate records of the exposure of each employee by classification. If you do not keep accurate records we will assign the exposure of each employee to the highest rated classification applicable to the work they performed for you. A detailed explanation of payroll records you must keep can be found in WAC 296-17-35201.*

(2) Are there other circumstances when I can have more than one basic classification assigned to my account?

Yes, under certain circumstances we will assign more than one basic classification to your account. These circumstances include:

- The employer is operating a secondary business which includes operations that we do not consider a normal part of that employer's principal business in Washington, or
- The employer has multiple retail store locations.

In these instances we will assign additional basic classifications *only if all of the following conditions are met:*

- The employer maintains separate payroll records for each business,
- Different employees work in each business,
- Each business is separated by structural partitions if they share a common business location,
- Each business can exist independently of the other, and
- The classification language of the principal business does not prohibit the assignment of the secondary classification.

If all of the above *five* conditions are not met, then the operations of the secondary business will be reported in the highest rated classification that applies to the employer.

(3) What do you mean by the term "principal business?"

The principal business is represented by the basic classification assigned to an employer which produces the greatest amount of exposure. The principal business does not include standard exception or general exclusion classifications or operations.

(4) If I have more than one basic classification assigned to my business and I have employees who do work in more than one of these classifications, can I divide their hours between these classifications on my quarterly report?

Yes, you can divide the work hours of any one employee between two or more basic classifications provided the following conditions are met:

- The basic classification assigned to your business allows or requires a division of hours; and
- You keep detailed records of the actual time spent by each employee in each classification. Use of percentages, averages or estimates is not permitted. If you do not have original time card or time book entries to support your reporting, all worker hours in question will be assigned to the highest rated classification applicable to the work being performed.

Example: *In a previous rule (WAC 296-17-31017) we described a book store business that operated a lunch counter and espresso bar in connection with the book store. In that example, the book store business was assigned classification 6406. A review of classification 6406 revealed that the lunch counter operation was to be reported separately in classification 3905. Assume that you have one employee who, in addition to stocking and selling books, prepares sandwiches for customers on occasion. You must keep accurate time records by day for each employee. This time record must reflect the actual time the employee worked in the book store operation and the actual time worked preparing sandwiches. If you fail to keep these records all work hours in question would be assigned to the highest rated classification which, in this example, is classification 3905.*

(5) If my business is assigned a basic classification and a standard exception classification and I have an employee who works in both classifications, can I divide their exposure (hours) between the two classifications on my quarterly report?

No, you cannot divide an employee's exposure (*work hours*) between a basic classification and standard exception classification. An explanation of "standard exception classification" is discussed in the next section (*WAC 296-17-31018(2)*). If an employee performs work covered by a basic classification and a standard exception classification, all of their exposure (*hours*) must be reported in the basic classification applicable to your business. You cannot report the exposure (*hours*) of any employee in a standard exception classification if they perform duties covered by a basic classification assigned to your business. Refer to WAC 296-17-31018 for a list and explanation of the "*exception classifications*."

(6) I have more than one standard exception classification assigned to my business. One of my employees works in more than one of the standard exception classifications. Can I divide their exposure (hours) between two or more standard exception classifications on my quarterly report?

No, you cannot divide an employee's work hours between two standard exception classifications. You must report all exposure (*work hours*) in the highest rated standard exception classification applicable to the work being performed.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-31017, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31018 Exception classifications. (1) What are exception classifications?

In *WAC 296-17-31012* we discussed our classification policy. We described the process used to classify risk and stated that we assign the basic classification or basic classifications that best describe the nature of your company's business. While this policy is modeled after the policy used by private insurance carriers and is geared to administrative ease for you, we recognize that there are some duties or operations where your employees do not share the same general workplace hazards that your other employees are exposed to. To provide for those operations that are outside the scope of a basic classification, we have created three types of exception classifications listed below:

- Standard exception classifications,
- Special exception classifications, and
- General exclusion classifications.

(2) What are the standard exception classifications?

Standard exception classifications cover those employments that are administrative in nature and common to many industries. Employees covered by a standard exception classification cannot be exposed to any operative hazard of the business. If the language of the basic classification assigned to your business does not include these employments, you may be able to report them separately. The standard exception classifications are:

- Classification 4904 (*WAC 296-17-653*) "clerical office employment." This classification includes clerical, administrative, and drafting employees.
- Sales personnel classifications 6301 (*WAC 296-17-696*), 6302 (*WAC 296-17-697*), and 6303 (*WAC 296-17-698*) includes outside sales personnel and messengers.
- Classification 7101 (*WAC 296-17-754*) applies to corporate officers who have elected optional coverage. A corporate officer as used in these rules is a person who is an officer in the corporation, such as the president, who also serves on the corporation's board of directors and owns stock in the corporation.
- Classification 7100 (*WAC 296-17-75306*) applies to members of a limited liability company who have elected optional coverage.

Clerical office employees are defined as employees whose duties are limited to: Answering telephones; handling correspondence; creating or maintaining financial, employment, personnel, or payroll records; composing informational material on a computer; creating or maintaining computer software; and technical drafting. Their work must be performed in a clerical office which is restricted to:

- A work area which is physically separated by walls, partitions, or other physical barriers, from all other work areas of the employer, and
- Where only clerical office work as described in this rule is performed.

A clerical office does not include any work area where inventory is located, where products are displayed for sale, or area where the customer brings products for payment. Clerical office employees can perform cashiering and telephone sales work if they do not provide any retail or wholesale customer service that involves handling, showing, demonstrating, or delivering any product sold by the employer. Clerical office employees can make bank deposits, pick up and

deliver mail at the post office, or purchase office supplies, if their primary work duties are clerical office duties as defined in this rule.

Sales personnel are defined as employees whose duties are limited to: Soliciting new customers by telephone or in person; servicing existing customer accounts; showing, selling, or explaining products or services; completing correspondence; placing orders; performing public relations duties; and estimating. Although some of sales person's duties may be performed in a clerical office, most of their work is conducted away from the employer's physical business location or in showrooms. We refer to work that takes place away from the employer's premises as "*outside sales*." Sales personnel whose duties include customer service activities such as, but not limited to, the delivery of product, stocking shelves, handling inventory, or otherwise merchandising products sold to retail or wholesale customers are excluded from all standard exception classifications. Sales personnel with duties such as delivery and stocking of shelves are to be reported in the basic classification applicable to the business unless the basic classification assigned to the business requires another treatment.

Messengers are defined as employees whose duties are delivering interoffice mail, making deposits, and similar duties that are exclusively for the administration of the employer's business. Classification 6303 "messengers" does not include delivering mail or packages to the employer's customer or as a service to the public. If a messenger is engaged in delivering mail or packages as a service to the public they are to be assigned to the basic classification of the business or classification 1101 as applicable.

Corporate officers duties in classification 7101 must be limited to: Clerical duties; outside sales duties as described above; administrative duties such as hiring staff, attending meetings, negotiating contracts, and performing public relations work. To qualify for this classification, a corporate officer must:

- Be a shareholder in the corporation,
- Be elected as a corporate officer and empowered in accordance with the articles of incorporation or bylaws of the corporation,
- Serve on the corporation's board of directors,
- Not have any exposure to any operative hazard of the business, and
- Not directly supervise employees who have any exposure to any operative hazard of the business.

Members of a limited liability company (LLC) duties in classification 7100 must be limited to: Clerical duties; outside sales duties as described above; administrative duties such as hiring staff, attending meetings, negotiating contracts, and performing public relations work. This includes only those members who have duties and authority similar to the exemption criteria of corporate officers in RCW 51.12.020.

Classification 6303 may apply to a corporate officer or member of a limited liability company whose duties are limited to outside sales activities as described in the sales personnel section of this rule. Under no circumstance is classification 4904 to be assigned to any corporate officer or member of a limited liability company. You cannot divide the work hours of an employee between a standard exception classification and a basic classification unless it is permitted by

another rule. If an employee works part of their time in a standard exception classification and part of their time in your basic classification, then all exposure (hours) must be reported in the highest rated basic classification applicable to the work being performed.

(3) What are the special exception classifications?

Special exception classifications represent operations found within an employer's business that are allowed to be reported separately when certain conditions are met. Assuming the conditions noted under each exception below have been met, the following classifications may be used even if your basic classification includes the phrases "all operations" or "all employees." These special exceptions are subject to a division of worker hours in connection with all other basic classifications unless specifically prohibited in an individual classification WAC rule.

Security guards - classification 6601 (WAC 296-17-723) will apply if the security guard:

- Is an employee of an employer engaged in logging or construction,
- Is for the purpose of guarding the employer's logging or construction sites,
- Is employed at the site only during the hours the employer is not conducting any other operations at the site,
- Has no other duties during their work shift as a security guard.

If all of the above conditions are not met, the security guard is to be reported in the basic classification applicable to the construction or logging operation being conducted.

Janitors - classification 6602 (WAC 296-17-724) will apply if:

- The janitorial/cleaning activities being performed are limited to the employer's clerical office,
- The clerical office meets the criteria described earlier in this rule, and
- The employer's office employment is assigned to be reported in classification 4904.

Construction: Superintendent or project manager - classification 4900 (WAC 296-17-64999) will apply if the superintendent or project manager:

- Is an employee of a licensed contractor engaged in construction,
- Has no direct control over work crews,
- Performs no construction labor at the construction site or project location.

If all of the conditions are not met, the superintendent or project manager is to be reported in the basic classification applicable to the construction project.

Construction: Estimator - classification 4911 (WAC 296-17-65802) will apply if the estimator:

- Is the employee of a licensed contractor engaged in construction, and
- Has no duties other than estimating during their work shift.

If these conditions are not met, the estimator is to be reported in the basic classification applicable to their employer's business or the construction project.

Log truck drivers - classification 5003 (WAC 296-17-66001) will apply if the log truck driver has no other duties

(2007 Ed.)

during their work shift that are subject to the logging classification 5001 (WAC 296-17-659).

(4) What are the general exclusion classifications?

General exclusion classifications represent operations that are so exceptional or unusual that they are excluded from the scope of all basic classifications. If you have these operations, we will assign a separate classification to cover them. You must keep accurate records of the work hours your employees work in these classifications. If you do not keep accurate time records for each employee performing work covered by a general exclusion classification, we will assign the work hours in question to the highest rated classification applicable to those hours. The general exclusion classifications are:

- Aircraft operations: All operations of the flying crew.
- Racing operations: All operations of the drivers and pit crews.
- Diving operations: All operations of diving personnel and ship tenders who assist in diving operations.
- New construction or alterations of the business premises.
- Musicians and entertainers.

A division of work time is permitted between a standard exception classification and flight crew operations, racing operations, or diving operations. If you fail to keep original time records that clearly show the time spent in the office or in sales work, we will assign all work hours in question to the highest rated classification applicable to the work hours in question.

Example: Assume a corporate officer performs duties which are described in classification 7101. Occasionally, the officer flies a plane to attend a meeting. You would report the flying exposure (hours) of the corporate officer in classification 6803. The remainder of the corporate officer's time would continue to be reported in classification 7101.

[Statutory Authority: RCW 51.16.035, 51.16.100, 06-12-075, § 296-17-31018, filed 6/6/06, effective 1/1/07. WAC 296-17-31019 Standard exception classification describes business. What if the only classification that describes my business is a standard exception classification? How do you assign classifications to my business?

When this happens we will assign the standard exception classification that best fits your business. Any work performed by employees that is outside of the scope of the exception classification will be classified according to the type of work being performed.

Example: You operate an insurance company. Besides having office and sales employees you have a printing department where you produce office stationery, brochures, and insurance policies, and maintenance employees to clean the office. We would assign classification 4904 to your office employees, classification 6303 to your sales employees, classification 4101 for your printing operation and classification 6602 for your janitorial staff. Since classifications 4904 and

6303 are standard exceptions, they do not include printing or maintenance operations.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31019, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31020 Employee supporting multiple business operations. I have more than one basic classification assigned to my business. I have employees such as laundry workers whose duties never change but who support several operations. Can I divide their work hours on my quarterly report?

No, if we have assigned two or more basic classifications to your business and you have employees whose duties remain the same and are performed at the same location regardless of the operation they support, you would report these workers in the classification which carries the largest number of worker hours. To arrive at the classification that carries the largest number of worker hours, you must first eliminate the hours related to the employees who support two or more operations. Whichever basic classification carries largest number of worker hours after the supporting personnel have been segregated is the classification the supporting employees are to be reported in.

Example: You operate a motel and a restaurant which are located next to each other. You have a laundry operation that cleans the linens for the restaurant as well as doing the sheets and towels for the motel. The laundry employee's duties never change regardless of whether they are doing linens or sheets. The classification of the laundry workers would depend on which classification produces the largest amount of exposure. Let us assume for this illustration that the motel has a larger exposure (hours worked) because you have reported the laundry workers in that classification. When you remove the laundry workers hours from both classifications the restaurant classification has the larger volume of exposure (hours worked). You would report the laundry workers in the restaurant classification.

WAC 296-17-31021 Units of exposure. (1) What is a "unit of exposure?"

A unit of exposure is the measure which is used to help determine the premium you will pay. For most businesses the unit of exposure is the **hours** worked by their employees. Because not all employees are compensated based on the hours they work, we have developed reporting alternatives to make reporting to us easier. Those alternatives are outlined in subsection (2) of this section. In other cases, the department *may* authorize some other method in assuming workers hours for premium calculation purposes.

(2) What are the alternatives to actual hours worked?

The exceptions are:

- **Apartment house managers, caretakers, domestic, home care or similar employees:** To determine the number of hours you need to report to us, divide an employee's total compensation, including housing and utility allowances, by the average hourly wage for the classification. The total number of work hours to be reported for each employee is not to exceed 520 hours

per quarter. You will need to call us at (360) 902-4817 to obtain average hourly wage information.

- **Baseball, basketball, and soccer teams as defined in WAC 296-17-745 - including players, coaches, trainers, and officials:** Report each individual at 40 hours per week for each week in which they have duties.
- **Commission employees - outside (such as, but not limited to, real estate and insurance sales):** You must select one of the following methods to report your commission employees - outside:
 - Actual hours worked; or
 - Assumed hours of eight hours per day for part-time employees or one hundred-sixty hours per month for full-time employees.
- **All outside commission employees of an employer must be reported by the same method. You cannot report some outside commission employees based on the actual hours they work and others using the eight hours per day for part-time employees or one hundred-sixty hours per month for full-time employees method.**
- **Drywall - stocking, installation, scrapping, taping, and texturing:** Premiums are based on material installed/finished rather than the hours it took to install/finish the drywall.
- **Horse racing - excluding jockeys:** Employers in the horse racing industry pay premiums based on a type of license their employees hold rather than the hours the employees work. Premiums are collected by the Washington horse racing commission at the time of licensing.
- **Jockeys:** Report ten hours for each race/mount or for any day in which duties are reported.
- **Pilots and flight crew members:** Pilots and flight crew members having flight duties during a work shift including preflight time shall have premium calculated by utilizing daily readings logged per federal requirements of the aircraft tachometer time: Provided, That if the total tachometer time for any day includes a fraction of an hour, the reportable time will be increased to the next full hour: Provided further, That pilots and flight crew members who assume nonflying duties during a work shift will have premium calculated in accordance with the appropriate rules and classifications applicable to nonflight duties.
- **Race car drivers:** Report ten hours for each race/heat.
- **Salaried employees:** You must select one of the following methods to report your salaried employees:
 - Actual hours worked; or
 - Assumed hours of one hundred-sixty hours per month.

All salaried employees of an employer must be reported by the same method. You cannot report some salaried employees based on the actual hours they work and others using the one hundred sixty hours per month method. Provided further, as in the case of contract personnel employed by schools and/or school districts, the school or school district shall report actual hours worked for each employee, one hundred sixty hours per month for each employee, or the department *may* authorize some other method in assuming workers hours for premium calculation purposes.

(3) Can I use assumed work hours for piece workers?

No, if you employ piece workers you must report the actual hours these individuals work for you unless another unit of exposure is required.

Example: *If you have employees engaged in drywall work you would report and pay premiums on the basis of the square footage of the material they installed not the hours they worked.*

WAC 296-17-31022 Reporting exception classification employees. How do I report exception classification employees on my quarterly report? If the language of the basic classification assigned to your business does not include those occupations, operations or employments which we have defined by exception classifications and treatments, you may report them separately in the applicable exception classification. To report these employments, operations and occupations separately, you must meet all of the conditions specified in the exception classification rules which are applicable to the classification.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-31022, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31023 Premium reporting. How often will I need to report and pay premiums? Most employers will report and pay premiums once every three months. We refer to these three-month periods as quarters. For example, the months of January, February, and March represent the first quarter of a calendar year. In some cases employers report at more frequent intervals.

Example: *Reforestation contractors report on a contract basis for any project over ten thousand dollars. Since contracts may last only a few days, reforestation contractors may file reports daily, weekly, and monthly.*

If you do not have employees during a quarter, you must return your premium report by the due date and indicate "no payroll" or "no employees" across the face of the report. If you do not submit reports when required, we will estimate premiums and initiate legal action against you to collect premiums due.

WAC 296-17-31024 Classification premium rates.

(1) How do you determine what rate to charge me?

Each classification has corresponding base rates. The base rates assigned to your business will depend on the basic classification(s) assigned to your business.

(2) What do you mean by a base rate?

The base rate is a comparison of losses (*claims*) and exposure to produce a cost per unit of exposure. The base rate is an unmodified rate that all employers with an experience factor of 1.000 will pay in a specific classification.

(3) Do all employers in the same classification pay the base rate?

In practice, only a few employers pay the *base rate*. Most employers pay rates that are adjusted to take into account the employer's claims and premium reporting experi-

(2007 Ed.)

ence. We refer to those modified rates as *experience rates*. Your experience rate can be higher or lower than the *base rate*. This means that employers with fewer than expected losses will pay less than employers in the same classification who have more than expected losses. Experience rating encourages strong safety and accident prevention programs. Details of how experience rating affects your premium are found in *WAC 296-17-850 through 296-17-890*. Your account manager can also answer questions about your individual experience factor. The name and phone number of your account manager can be found on your quarterly premium report or your annual rate notice. For your convenience you can call us at 360-902-4817 and we will put you in contact with your assigned account manager.

WAC 296-17-31025 Change in business operations.

If I change the type of business I operate, or add a new operation, should I call you? Yes, we rely on you to update us about changes in your business operations. We provide a place on your quarterly premium reports to let us know about any changes you have made. If you need help determining if changes to your account are necessary, you can call your account manager. Depending on the type of change you are making, you may need to complete a new master application. The name and phone number of your account manager can be found on your quarterly premium report or annual rate notice. For your convenience you can call us at 360-902-4817 and we will put you in contact with your assigned account manager.

WAC 296-17-31026 Reporting multiple business operations. If I have more than one business, can I report them on the same account?

The way the businesses are organized will make a difference. Each separate "*ownership type*" must be classified and reported separately from any other much the same way you must keep each business' financial records separate from any other. Your master application must specify the "*ownership type*" of your business, such as, sole proprietor, partnership, corporation, etc. If that one ownership type registration is for more than one location of the same business or more than one type of business, you can choose to report all of them on the same account or on separate accounts. However, if you register each as a separate ownership type, you must report them on separate accounts.

[Statutory Authority: RCW 51.16.035, 98-18-042, § 296-17-31026, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31027 Temporary staffing services. (1) To whom does this rule apply? This rule applies to any temporary staffing business providing temporary employees to a client customer.

(2) Who pays the workers' compensation insurance premium for temporary staffing employees? RCW

51.16.060 requires the temporary staffing service provider to pay the required premiums for temporary employees assigned to a client customer.

Note: If the temporary staffing service provider fails to pay the required premium to labor and industries, the client customer is responsible for the unpaid premium.

(3) How are classifications determined for a temporary staffing business? We will assign the classification or classifications to your business based on the nature of your business.

Note: This process is identical to how classifications are assigned to a nontemporary staffing business.

(4) Are there special classifications that apply to temporary staffing businesses? Yes we have created a series of special classifications that only temporary staffing businesses use. They are found in WAC 296-17-757 through 296-17-76213.

Example: A temporary staffing business that specializes in providing nurses to medical facilities would be assigned the temporary staffing classification for health care facilities.

Example: A temporary staffing business that provides temporary employees to a variety of client customers would be assigned multiple temporary staffing classifications.

(5) Do other businesses have special classifications? All businesses have special classifications.

Example: A nontemporary service employer engaged exclusively in plumbing work would have a plumbing classification assigned to their business.

Example: A nontemporary service employer engaged in framing houses, land clearing and roofing would have a classification for framing, one for land clearing and a separate classification for the roof work. This is done because construction work is done by contract and each contract will be different.

(6) Why doesn't labor and industries just use nontemporary staffing classifications for temporary staffing businesses? Temporary staffing companies requested labor and industries to create special classifications for their industry. The alternative to special industry classifications would result in temporary staffing business to use the nontemporary staffing classification that their client customer uses. Labor and industries has over three hundred main classifications and twelve hundred subclassifications that employers report in. Requiring temporary staffing companies to use all of these classifications would result in an administrative burden for the temporary staffing businesses. Classifications unique to temporary staffing provide temporary staffing businesses the incentives to improve safety for their employees and control the cost of workers' compensation insurance.

WAC 296-17-31028 Closing accounts. What are my responsibilities when I close my business, or when I no longer have employees? You must notify us in writing when you close your business or when you no longer have employees. You may either send a letter, or include a note on your final quarterly report. We will not close your account from a telephone call.

WAC 296-17-31029 Insurance principles. (1) What insurance principles does the department of labor and industries use when a new classification is developed?

Those principles are broken down into four major components as follows:

- Administration
- Equity
- Homogeneity
- Safety

A detailed explanation of these principles can be found in subsection (2) of this section.

(2) What are these principles?

- **Administration:** Recordkeeping requirements must be simple and easy to follow. If our classification system imposed burdensome recordkeeping requirements, most employers would find it difficult to comply. Resolving complaints related to burdensome recordkeeping requirements would be in nobody's interest. The premium rate for your basic classification is based on the *average* exposure to hazard of all your workers. If our classification system were based upon individual occupations, you would pay a lower rate for your workers whose duties are considered low hazard, but you would pay a higher rate for your workers who have duties that expose them to a greater hazard. The total premium you pay would not be decreased; it would only be redistributed and would require more recordkeeping. Having one basic classification assigned to cover all the operations makes recordkeeping and reporting easier for you.
- **Statistical credibility or equity:** By monitoring our classification plan, we ensure that enough hours are reported in each classification to provide a meaningful statistical base. A large enough statistical base helps avoid sudden large increases or decreases in rates and keeps them at the lowest possible level. We refer to this as *statistical credibility*. Classifications must also be *responsive to change* if equity and fairness are to be achieved. Our classification plan is in a constant state of evolution. In the early 1970s we had approximately 45 classifications. Today we have over 300 main classifications and approximately 1,000 subclassification codes to track losses. In some industries, the evolution is gradual, and no change to the classification itself is needed. We recognize that the wording used to describe a classification may not have kept up with changes in an industry. However, as the industry conditions evolve because of modern equipment, new processes or materials, or changes in employment laws and safety standards, so does the experience upon which the rate is based. In other words, the changes in the experience which is used to develop premium rates *reflect* new developments in processes, equipment, and technology even though the wording in the classification is unchanged. We strive to keep our classification language current. Although it would be easy to just change the classification wording as we encounter changes in an industry, Washington law requires that we conduct public hearings before we make official changes to the rule. We do this as a public safeguard and to involve business in the change process. As technologies change or new industries develop, we receive

(2007 Ed.)

requests from industry representatives for new classifications or for determination of proper classification assignments for the new processes. We will evaluate the request and determine if there is a large enough group of employers to justify a new classification. Any classification must produce enough premium to cover losses. In addition, as specific industries become obsolete or certain processes are no longer in use we will discontinue the classifications that covered them.

- **Homogeneity:** Although it is rare that any two businesses are identical, our classification plan recognizes that similar businesses have similar exposures to occupational injury and disease. Employers with similar operations and exposures are grouped together so each classification includes common exposures and carries a rate that reflects those exposures. This method of grouping *homogenous* risks ensures that the overall cost of the workers' compensation system is distributed fairly among the businesses we insure. Classifications must also be *mutually exclusive*. Our classifications are clearly defined so that each type of business or industry fits in only one basic classification.
- **Workplace safety and accident prevention:** By classifying employers by the nature of their business, each industry can take responsibility for controlling its own workers' compensation costs. Employers may belong to a trade association, which usually offers safety or risk management services. If such services result in fewer and less costly accidents, that improved experience will tend to lower the base rates for that industry. If our classification system were based upon the occupations or duties of employees, the success of a single industry's safety or risk management program would have little impact on its premium costs.

Example: Many retail grocery stores employ meat cutters. If grocery stores wanted to reduce the frequency of injury to their meat cutters they could develop a safety plan that focused on proper meat handling, lifting, and cutting. Assuming the safety program was successful and reduced the cost associated with meat cutter claims, the rate for grocery stores would go down. If, on the other hand, all meat cutters, such as those who work for restaurants, grocery stores, or slaughter houses, reported in a single meat cutter classification, it is doubtful that the grocery stores' safety program would have any impact on the premium rates since grocery stores' meat cutters would represent only a small portion of a meat cutter classification.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-31029, filed 8/28/98, effective 10/1/98.]

WAC 296-17-31030 Successorship and other transfers of ownership. RCW 51.16.200 requires a taxpayer to make a return and pay the tax due to the department of labor and industries within ten days of quitting business, selling out, exchanging, or otherwise disposing of the employer's business or stock of goods. If this tax is not paid by the employer, any successor to the employer becomes liable for the full amount of the tax. RCW 51.08.177 defines the term "successor." Subsections (1) through (3) of this section provide an interpretation of successorship issues.

(1) **What does the term "a major part" mean as that term is used in RCW 51.08.177?** A major part refers to a significant or substantial portion of a business's property. Major does not mean more than half.

(2007 Ed.)

Example: A sand and gravel business owns several trucks and a gravel pit as its primary assets. Each may be considered "a major part" of the property of the taxpayer.

(2) **Can a taxpayer/employer have more than one successor?** Yes.

Example: Using the sand and gravel business in the example above, if the gravel pit were to be sold to one business (A) and the fleet of trucks to another business (B), both A and B would be considered successors.

(3) **What is intangible property?** Intangible property is property that has no physical existence, but may have value.

Example: The most common example is "goodwill." Goodwill is the value of a trade or business based on expected continued customer patronage due to its name, reputation, or any other factor. Other examples of intangible property include literary rights, bank accounts, customer lists, and internet domain names.

WAC 296-17-352 Audits. An audit of the employer's books, records and payrolls performed pursuant to the authority contained in RCW 51.48.040 may include but will not be limited to:

(1) An audit to determine whether an employer engaged in a business or trade has employment subject to the industrial insurance laws.

(2) A visual inspection of the employer's workplace or places for the purpose of determining appropriate classifications in accordance with the industrial insurance laws and rules as set forth in chapter 296-17 WAC.

(3) Audits containing a complete and detailed examination of the employer's books and records for a specific period to establish the reporting of the employer's payroll in accordance with the industrial insurance laws and the rules as set forth in chapter 296-17 WAC, and as well, chapter 296-15 WAC in the event the employer has been certified a self-insurer.

Except as otherwise provided in this rule any audit time period may be less than, but will not exceed, three years of the due dates of any payments from any employer where the department has requested submission of the employer's books, or three years of the due dates of any payments where the employer makes claim for adjustment, recomputation or alteration of any such payment: Provided, That an employer certified to self-insure pursuant to the authority contained in chapter 51.14 RCW, shall be subject to such audit as deemed necessary to guarantee its compliance with the industrial insurance laws and rules and regulations for self-insurers: Provided further, That an employer who fails to make any books and records, or certified copies thereof, available for audit in the state of Washington, will be charged for all costs incurred by the department in auditing any books and records maintained at other places: Provided further, That in any instance where fraud may be indicated with respect to underpayment or nonpayment of premiums the audit time period may be extended beyond that previously set forth.

WAC 296-17-35201 Recordkeeping and retention.

Washington law (RCW 51.48.030) requires every employer to make, keep, and preserve records which are adequate to facilitate the determination of premiums due to the state for workers' compensation insurance for their covered workers. In the administration of Title 51 RCW, the department of labor and industries has deemed the records and information required in the various subsections of this section to be essential in the determination of premiums due to the state fund. The records so specified and required, shall be provided at the time of audit to any authorized representative of the department who has requested them.

Failure to produce the requested records within thirty days of the request, or within an agreed upon time period shall constitute prima facie evidence of noncompliance with this rule and shall invoke the statutory bar to challenge found in RCW 51.48.030 and/or 51.48.040.

(1) Employment records. Every employer shall with respect to each worker, make, keep, and preserve original records containing all of the following information for three full calendar years following the calendar year in which employment occurred:

- (a) The name of each worker;
- (b) The Social Security number of each worker;
- (c) The beginning date of employment for each worker and, if applicable, the separation date of employment of each such worker;
- (d) The basis upon which wages are paid to each worker;
- (e) The number of units earned or produced for each worker paid on a piecework basis;
- (f) The risk classification applicable to each worker whenever the worker hours of any one employee are being divided between two or more classifications;
- (g) The number of actual hours worked (WAC 296-17-31002) by each worker, unless another basis of computing hours worked is prescribed in WAC 296-17-31021;
- (h) A summary time record for each worker showing the calendar day or days of the week work was performed and the actual number of hours worked each work day;
- (i) The workers' total gross pay period earnings;
- (j) The specific sums withheld from the earnings of each worker, and the purpose of each sum withheld;
- (k) The net pay earned by each such worker.

(2) Business, financial records, and record retention. Every employer is required to keep and preserve all original employment time records for three full calendar years following the calendar year in which employment occurred. The three-year period is specified in WAC 296-17-352 as the composite period from the date any such premium became due.

Employers who pay their workers by check are required to keep and preserve all check registers and bank statements. Employers who pay their workers by cash are required to keep and preserve records of these cash transactions which provide a detailed record of wages paid to each worker.

(3) Recordkeeping - Estimated premium computation. Any employer required by this section to make, keep, and preserve records containing the information as specified in

subsections (1) and (2) of this section, who fails to make, keep, and preserve such records, shall for the purpose of premium calculation assume worker hours using the average hourly wage rate for each classification, and also will be subject to penalties prescribed in subsection (4) of this section. The records compiled by the department shall be the basis for determining the average hourly wage rate: Provided, That the average hourly wage rate shall be no less than the state minimum wage existing at the time such assumed hours are worked. Notwithstanding any other provisions of this section, workers employed in a work activity center subject to Classification 7309 shall be reported on the basis of the average hourly wage.

(4) Failure to maintain records - Penalties. Any employer required by this section to make, keep, and preserve records containing the information as specified in subsections (1) and (2) of this section, who fails to make, keep, and preserve such record, shall be liable, subject to RCW 51.48.030, to a penalty in the amount of two hundred fifty dollars for each such offense. Failure to make, keep, and preserve records containing the information as specified in subsections (1) and (2) of this section, for a single employee shall constitute one offense, for two employees two offenses, and so forth.

WAC 296-17-35202 Definitions. For the purpose of interpretation of this manual, chapter 296-17 WAC, or administering Title 51 RCW, the following terms shall have the meanings given below:

(1) "Free from control or direction" shall mean that the contracted individual has the responsibility to deliver a finished product or service without the contracting firm or individual either exercising direct supervision over the work hours or the methods and details of performance or having the right to exercise that authority under the contract.

(2) "Principle place of business" shall be the physical location of the business from which the contract of service is directed and controlled.

(3) "Within a reasonable period" for establishing an account with state agencies shall be the time prior to the first date on which the individual begins performance of service toward the contract or the date upon which the individual is required to establish an account with a state agency, as otherwise required by law, whichever event shall last occur.

(4) "Bona fide officer" means any person empowered in good faith by stockholders or directors, in accordance with articles of incorporation or bylaws, to discharge the duties of such officer.

(5) "Related by blood within the third degree" means the degree of kinship as computed according to the rules of the civil law.

(6) "Related by marriage" means the union subject to legal recognition under the domestic relations laws of this state.

[Statutory Authority: RCW 51.16.035. 98-18-042, § 296-17-35202, filed 8/28/98, effective 10/1/98.]

WAC 296-17-35203 Special reporting instruction. (1) Professional and semiprofessional athletic teams. Athletes assigned to a Washington-domiciled sports team are mandatorily covered by Washington industrial insurance: Provided, That a professional athlete who is under contract with a parent team domiciled outside of the state of Washington while assigned to a team domiciled within Washington is subject to mandatory coverage by Washington industrial insurance unless the player and employer (parent team) have agreed in writing as to which state shall provide coverage in accordance with RCW 51.12.120 (6).

The following rules shall apply to the written agreement:

(a) Agreement must be in writing and signed by the employer and the individual athlete.

(b) Agreement must specify the state that is to provide coverage. The state agreed upon to provide coverage must be a state in which the player's team, during the course of the season, will engage in an athletic event. For example, if the Washington-based team is a part of a league with teams in only Washington, Oregon, and Idaho, the player and the employer can agree to any of those three states to provide coverage. However, they could not agree to have California provide the coverage as this would not qualify as a state in which the player regularly performs assigned duties.

(c) The state agreed upon accepts responsibility for providing coverage and acknowledges such to the department by certified mail.

(d) Agreement and certification by the other state must be received by this department's underwriting section prior to any injury incurred by the athlete.

(e) Agreement will be for one season only commencing with the assigning of the player to a particular team. A separate agreement and certification must be on file for each additional season.

Failure to meet all of these requirements will result in the athlete being considered a Washington worker for premium and benefit purposes until such time as all requirements have been met.

Professional sports teams who are domiciled outside the state of Washington and who participate in sporting events with Washington-domiciled teams are not subject to Washington industrial insurance for their team members while in this state. These out-of-state teams are not considered employers subject to Title 51 on the basis that they are not conducting a business within this state.

(2) **Excluded employments.** Any employer having any person in their employ excluded from industrial insurance whose application for coverage under the elective adoption provisions of RCW 51.12.110 or authority of RCW 51.12.-095 or 51.32.030 has been accepted by the director shall report and pay premium on the actual hours worked for each such person who is paid on an hourly, salaried-part time, percentage of profit or piece basis; or one hundred sixty hours per month for any such person paid on a salary basis employed full time. In the event records disclosing actual hours worked are not maintained by the employer for any person paid on an hourly, salaried-part time, percentage of profits or piece basis the worker hours of such person shall be determined by dividing the gross wages of such person by the state minimum wage for the purpose of premium calculation. However, when applying the state minimum wage the maxi-

mum number of hours assessed for a month will be one hundred sixty.

(3) **Special trucking industry rules.** The following subsection shall apply to all trucking industry employers as applicable.

(a) Insurance liability. Every trucking industry employer operating as an intrastate carrier or a combined intrastate and interstate carrier must insure their workers' compensation insurance liability through the Washington state fund or be self-insured with the state of Washington.

Washington employers operating exclusively in interstate or foreign commerce or any combination of interstate and foreign commerce must insure their workers' compensation insurance liability for their Washington employees with the Washington state fund, be self-insured with the state of Washington, or provide workers' compensation insurance for their Washington employees under the laws of another state when such other state law provides for such coverage.

Interstate or foreign commerce trucking employers who insure their workers' compensation insurance liability under the laws of another state must provide the department with copies of their current policy and applicable endorsements upon request.

Employers who elect to insure their workers' compensation insurance liability under the laws of another state and who fail to provide updated policy information when requested to do so will be declared an unregistered employer and subject to all the penalties contained in Title 51 RCW.

(b) Reporting. Trucking industry employers insuring their workers' compensation insurance liability with the Washington state fund shall keep and preserve all original time records/books including supporting information from drivers' logs for a period of three calendar years plus three months.

Employers are to report actual hours worked, including time spent loading and unloading trucks, for each driver in their employ. For purposes of this section, actual hours worked does not include time spent during lunch or rest periods or overnight lodging.

Failure of employers to keep accurate records of actual hours worked by their employees will result in the department estimating work hours by dividing gross payroll wages by the state minimum wage for each worker for whom records were not kept. However, in no case will the estimated or actual hours to be reported exceed five hundred twenty hours per calendar quarter for each worker.

(c) Exclusions. Trucking industry employers meeting all of the following conditions are exempted from mandatory coverage.

(i) Must be engaged exclusively in interstate or foreign commerce.

(ii) Must have elected to cover their Washington workers on a voluntary basis under the Washington state fund and must have elected such coverage in writing on forms provided by the department.

(iii) After having elected coverage, withdrew such coverage in writing to the department on or before January 2, 1987.

If all the conditions set forth in (i), (ii), and (iii) of this subsection have not been met, employers must insure their

workers' compensation insurance liability with the Washington state fund or under the laws of another state.

(d) Definitions. For purposes of interpretation of RCW 51.12.095(1) and administration of this section, the following terms shall have the meanings given below:

(i) "Agents" means individuals hired to perform services for the interstate or foreign commerce carrier that are intended to be carried out by the individual and not contracted out to others but does not include owner operators as defined in RCW 51.12.095(1).

(ii) "Contacts" means locations at which freight, merchandise, or goods are picked up or dropped off within the boundaries of this state.

(iii) "Doing business" means having any terminals, agents or contacts within the boundaries of this state.

(iv) "Employees" means the same as the term "worker" as contained in RCW 51.08.180.

(v) "Terminals" means a physical location wherein the business activities (operations) of the trucking company are conducted on a routine basis. Terminals will generally include loading or shipping docks, warehouse space, dispatch offices and may also include administrative offices.

(vi) "Washington" shall be used to limit the scope of the term "employees." When used with the term "employees" it will require the following test for benefit purposes (all conditions must be met).

- The individual must be hired in Washington or must have been transferred to Washington; and
- The individual must perform some work in Washington (i.e., driving, loading, or unloading trucks).

(4) **Forest, range, or timber land services—Industry rule.** Washington law (RCW 51.48.030) requires every employer to make, keep, and preserve records which are adequate to facilitate the determination of premiums (taxes) due to the state for workers' compensation insurance coverage for their covered workers. In the administration of Title 51 RCW, and as it pertains to the forest, range, or timber land services industry, the department of labor and industries has deemed the records and information required in the various subsections of this section to be essential in the determination of premiums (taxes) due to the state fund. The records so specified and required, shall be provided at the time of audit to any representative of the department who has requested them.

Failure to produce these required records within thirty days of the request, or within an agreed upon time period, shall constitute noncompliance of this rule and RCW 51.48.030 and 51.48.040. Employers whose premium computations are made by the department in accordance with (d) of this subsection are barred from questioning, in an appeal before the board of industrial insurance appeals or the courts, the correctness of any assessment by the department on any period for which such records have not been kept, preserved, or produced for inspection as provided by law.

(a) General definitions. For purpose of interpretation of this section, the following terms shall have the meanings given below:

(i) "Actual hours worked" means each workers' composite work period beginning with the starting time of day that the employees' work day commenced, and includes the entire work period, excluding any nonpaid lunch period, and ending

with the quitting time each day work was performed by the employee.

(ii) "Work day" shall mean any consecutive twenty-four-hour period.

(b) Employment records. Every employer shall with respect to each worker, make, keep, and preserve original records containing all of the following information for three full calendar years following the calendar year in which the employment occurred:

(i) The name of each worker;

(ii) The Social Security number of each worker;

(iii) The beginning date of employment for each worker and, if applicable, the separation date of employment for each such worker;

(iv) The basis upon which wages are paid to each worker;

(v) The number of units earned or produced for each worker paid on a piece-work basis;

(vi) The risk classification(s) applicable to each worker;

(vii) The number of actual hours worked by each worker, unless another basis of computing hours worked is prescribed in WAC 296-17-31021. For purposes of chapter 296-17 WAC, this record must clearly show, by work day, the time of day the employee commenced work, and the time of day work ended;

(viii) A summary time record for each worker showing the calendar day or days of the week work was performed and the actual number of hours worked each work day;

(ix) In the event a single worker's time is divided between two or more risk classifications, the summary contained in (b)(viii) of this subsection shall be further broken down to show the actual hours worked in each risk classification for the worker;

(x) The workers' total gross pay period earnings;

(xi) The specific sums withheld from the earnings of each worker, and the purpose of each sum withheld;

(xii) The net pay earned by each such worker.

(c) Business, financial records, and record retention. Every employer is required to keep and preserve all original time records completed by their employees for a three-year period. The three-year period is specified in WAC 296-17-352 as the composite period from the date any such premium became due.

Employers who pay their workers by check are required to keep and preserve a record of all check registers and cancelled checks; and employers who pay their workers by cash are required to keep and preserve records of these cash transactions which provide a detailed record of wages paid to each worker.

(d) Recordkeeping - estimated premium computation. Any employer required by this section to make, keep, and preserve records containing the information as specified in (b) and (c) of this subsection, who fails to make, keep, and preserve such records, shall have premiums calculated as follows:

(i) Estimated worker hours shall be computed by dividing the gross wages of each worker for whom records were not maintained and preserved, by the state's minimum wage, in effect at the time the wages were paid or would have been paid. However, the maximum number of hours to be assessed under this provision will not exceed five hundred twenty

hours for each worker, per quarter for the first audited period. Estimated worker hours computed on all subsequent audits of the same employer that disclose a continued failure to make, keep, or preserve the required payroll and employment records shall be subject to a maximum of seven hundred eighty hours for each worker, per quarter.

(ii) In the event an employer also has failed to make, keep, and preserve the records containing payroll information and wages paid to each worker, estimated average wages for each worker for whom a payroll and wage record was not maintained will be determined as follows: The employer's total gross income for the audit period (earned, received, or anticipated) shall be reduced by thirty-five percent to arrive at "total estimated wages." Total estimated wages will then be divided by the number of employees for whom a record of actual hours worked was not made, kept, or preserved to arrive at an "estimated average wage" per worker. Estimated hours for each worker will then be computed by dividing the estimated average wage by the state's minimum wage in effect at the time the wages were paid or would have been paid as described in (d)(i) of this subsection.

(e) Reporting requirements and premium payments.

(i) Every employer who is awarded a forest, range, or timber land services contract must report the contract to the department promptly when it is awarded, and prior to any work being commenced, except as provided in (e)(iii) of this subsection. Employers reporting under the provisions of (e)(iii) of this subsection shall submit the informational report with their quarterly report of premium. The report shall include the following information:

(I) The employers' unified business identification account number (UBI).

(II) Identification of the landowner, firm, or primary contractor who awarded the contract, including the name, address, and phone number of a contact person.

(III) The total contract award.

(IV) Description of the forest, range, or timber land services work to be performed under terms of the contract.

(V) Physical location/site where the work will be performed including legal description.

(VI) Number of acres covered by the contract.

(VII) Dates during which the work will be performed.

(VIII) Estimated payroll and hours to be worked by employees in performance of the contract.

(ii) Upon completion of every contract issued by a landowner or firm that exceeds a total of ten thousand dollars, the contractor primarily responsible for the overall project shall submit in addition to the required informational report described in (e)(i) of this subsection, report the payroll and hours worked under the contract, and payment for required industrial insurance premiums. In the event that the contracted work is not completed within a calendar quarter, interim quarterly reports and premium payments are required for each contract for all work done during the calendar quarter. The first such report and payment is due at the end of the first calendar quarter in which the contract work is begun. Additional interim reports and payments will be submitted each quarter thereafter until the contract is completed. This will be consistent with the quarterly reporting cycle used by other employers. Premiums for a calendar quarter, whether reported or not, shall become due and delinquent on the day

immediately following the last day of the month following the calendar quarter.

(iii) A contractor may group contracts issued by a landowner, firm, or other contractor that total less than ten thousand dollars together and submit a combined quarterly report of hours, payroll, and the required premium payment in the same manner and periods as nonforestation, range, or timber land services employers.

(f) Out-of-state employers. Forest, range, or timber land services contractors domiciled outside of Washington state must report on a contract basis regardless of contract size for all forest, range, or timber land services work done in Washington state. Out-of-state employers will not be permitted to have an active Washington state industrial insurance account for reporting forest, range, or timber land services work in the absence of an active Washington forest, range, or timber land services contract.

(g) Work done by subcontract. Any firm primarily responsible for work to be performed under the terms of a forest, range, or timber land services contract, that subcontracts out any work under a forest, range, or timber land services contract must send written notification to the department prior to any work being done by the subcontractor. This notification must include the name, address, Social Security number, farm labor contractor number, (UBI) of each subcontractor, and the amount and description of contract work to be done by subcontract.

(h) Forest, range, or timber land services contract release - verification of hours, payroll, and premium. The department may verify reporting of contractors by way of an on-site visit to an employers' work site. This on-site visit may include close monitoring of employees and employee work hours. Upon receipt of a premium report for a finished contract, the department may conduct an audit of the firm's payroll, employment, and financial records to validate reporting. The entity that awarded the contract can verify the status of the contractors' account online at the department's web site (www.lni.wa.gov) or by calling the account manager. The landowner, firm, or contractor will not be released from premium liability until the final report for the contract from the primary contractor and any subcontractors has been received and verified by the department.

(i) Premium liability - work done by contract. Washington law (RCW 51.12.070) places the responsibility for industrial insurance premium payments primarily and directly upon the person, firm, or corporation who lets a contract for all covered employment involved in the fulfillment of the contract terms. Any such person, firm, or corporation letting a contract is authorized to collect from the contractor the full amount payable in premiums. The contractor is in turn authorized to collect premiums from any subcontractor they may employ his or her proportionate amount of the premium payment.

To eliminate premium liability for work done by contract permitted by Title 51 RCW, any person, firm, or corporation who lets a contract for forest, range, or timber land services work must submit a copy of the contract they have let to the department and verify that all premiums due under the contract have been paid.

Each contract submitted to the department must include within its body, or on a separate addendum, all of the following items:

- (I) The name of the contractor who has been engaged to perform the work;
- (II) The contractor's UBI number;
- (III) The contractor's farm labor contractor number;
- (IV) The total contract award;
- (V) The date the work is to be commenced; a description of the work to be performed including any pertinent acreage information;
- (VI) Location where the work is to be performed;
- (VII) A contact name and phone number of the person, firm, or corporation who let the contract;
- (VIII) The total estimated wages to be paid by the contractor and any subcontractors;
- (IX) The amount to be subcontracted out if such subcontracting is permitted under the terms of the contract;
- (X) The total estimated number of worker hours anticipated by the contractor and his/her subcontractors in the fulfillment of the contract terms;
- (j) Reports to be mailed to the department. All contracts, reports, and information required by this section are to be sent to:

The Department of Labor and Industries
Reforestation Team 8
P.O. Box 44168
Tumwater, Washington 98504-4168

(k) Rule applicability. If any portion of this section is declared invalid, only that portion is repealed. The balance of the section shall remain in effect.

(5) Logging and/or tree thinning—Mechanized operations—Industry rule. The following subsection shall apply to all employers assigned to report worker hours in risk classification 5005, WAC 296-17-66003.

(a) Every employer having operations subject to risk classification 5005 "logging and/or tree thinning - mechanized operations" shall have their operations surveyed by labor and industries insurance services staff prior to the assignment of risk classification 5005 to their account. Annual surveys may be required after the initial survey to retain the risk classification assignment.

(b) Every employer assigned to report exposure (work hours) in risk classification 5005 shall supply an addendum report with their quarterly premium report which lists the name of each employee reported under this classification during the quarter, the Social Security number of such worker, the piece or pieces of equipment the employee operated during the quarter, the number of hours worked by the employee during the quarter, and the wages earned by the employee during the quarter.

(6) Special drywall industry rule.

(a) What is the unit of exposure for drywall reporting? Your premiums for workers installing and finishing drywall (reportable in risk classifications 0540, 0541, 0550, and 0551) are based on the amount of material installed and finished, not the number of hours worked.

The amount of material installed equals the amount of material purchased or taken from inventory for a job. No deduction can be made for material scrapped (debris). A

deduction is allowed for material returned to the supplier or inventory.

The amount of material finished for a job equals the amount of material installed. No deduction can be made for a portion of the job that is not finished (base layer of double-board application or unfinished rooms).

Example: Drywall installation firm purchases 96 4' x 8' sheets of material for a job which includes some double-wall installation. The firm hangs all or parts of 92 sheets, and returns 4 sheets to the supplier for credit. Drywall finishing firm tapes, primes and textures the same job. Both firms should report 2,944 square feet (4 x 8 x 92) for the job.

(b) I do some of the work myself. Can I deduct material I as an owner install or finish? Yes. Owners (sole proprietors, partners, and corporate officers) who have not elected coverage may deduct material they install or finish.

When you as an owner install (including scrap) or finish (including tape and prime or texture) only part of a job, you may deduct an amount of material proportional to the time you worked on the job, considering the total time you and your workers spent on the job.

To deduct material installed or finished by owners, you must report to the department by job, project, site or location the amount of material you are deducting for this reason. You must file this report at the same time you file your quarterly report:

$$\text{Total owners hours} \div (\text{owners hours} + \text{workers hours}) = \text{\% of owner discount.}$$

$$\text{\% of owner discount} \times (\text{total footage of job} - \text{subcontracted footage, if any}) = \text{Total owner deduction of footage.}$$

(c) Can I deduct material installed or finished by subcontractors? You may deduct material installed or taped by subcontractors you are not required to report as your workers. You may not deduct for material only scrapped or primed and textured by subcontractors.

To deduct material installed or taped by subcontractors, you must report to the department by job, project, site or location the amount of material being deducted. You must file this report at the same time you file your quarterly report. You must have and maintain business records that support the number of square feet worked by the subcontractor.

(d) I understand there are discounted rates available for the drywall industry. How do I qualify for them? To qualify for discounted drywall installation and finishing rates, you must:

(i) Have an owner attend two workshops the department offers (one workshop covers claims and risk management, the other covers premium reporting and recordkeeping);

(ii) Provide the department with a voluntary release authorizing the department to contact material suppliers directly about the firm's purchases;

(iii) Have and keep all your industrial insurance accounts in good standing (including the accounts of other businesses in which you have an ownership interest), which includes fully and accurately reporting and paying premiums as they come due, including reporting material deducted as owner or subcontractor work;

(iv) Provide the department with a supplemental report (filed with the firm's quarterly report) showing by employee the employee's name, Social Security number, the wages paid

them during the quarter, how they are paid (piece rate, hourly, etc.), their rate of pay, and what work they performed (installation, scrapping, taping, priming/texturing); and

(v) Maintain accurate records about work you subcontracted to others and materials provided to subcontractors (as required by WAC 296-17-31013), and about payroll and employment (as required by WAC 296-17-35201).

The discounted rates will be in effect beginning with the first quarter your business meets all the requirements for the discounted rates.

Note: If you are being audited by the department while your application for the discounted classifications is pending, the department will not make a final decision regarding your rates until the audit is completed.

(e) Can I be disqualified from using the discounted rates? Yes. You can be disqualified from using the discounted rates for three years if you:

(i) Do not file all reports, including supplemental reports, when due;

(ii) Do not pay premiums on time;

(iii) Underreport the amount of premium due; or

(iv) Fail to maintain the requirements for qualifying for the discounted rates.

Disqualification takes effect when a criterion for disqualification exists.

Example: A field audit in 2002 reveals that the drywall installation firm underreported the amount of premium due in the second quarter of 2001. The firm will be disqualified from the discounted rates beginning with the second quarter of 2001, and the premiums it owed for that quarter and subsequent quarters for three years will be calculated using the nondiscounted rates.

If the drywall underwriter learns that your business has failed to meet the conditions as required in this rule, your business will need to comply to retain using the discounted classifications. If your business does not comply promptly, the drywall underwriter may refer your business for an audit.

If, as a result of an audit, the department determines your business has not complied with the conditions in this rule, your business will be disqualified from using the discounted classifications for three years (thirty-six months) from the period of last noncompliance.

(f) If I discover I have made an error in reporting or paying premium, what should I do? If you discover you have made a mistake in reporting or paying premium, you should contact the department and correct the mistake. Firms not being audited by the department who find errors in their reporting and paying premiums, and who voluntarily report their errors and pay any required premiums, penalties and interest promptly, will not be disqualified from using the discounted rates unless the department determines they acted in bad faith.

(7) Safe patient handling rule. The following subsection will apply to all hospital industry employers as applicable.

(a) Definitions. For the purpose of interpretation of this section, the following terms shall have the meanings given below:

(i) "Hospital" means an "acute care hospital" as defined in (a)(ii) of this subsection, a "mental health hospital" as defined in (a)(iii) of this subsection, or a "hospital, N.O.C.

(not otherwise classified)" as defined in (a)(iv) of this subsection.

(ii) "Acute care hospital" means any institution, place, building, or agency providing accommodations, facilities, and services over a continuous period of twenty-four hours or more for observation, diagnosis, or care of two or more individuals not related to the operator who are suffering from illness, injury, deformity, or abnormality, or from any other condition for which obstetrical, medical, or surgical services would be appropriate for care or diagnosis. "Hospital" as used in this rule does not include:

Hotels, or similar places furnishing only food and lodging, or simply domiciliary care; nor does it include

Clinics, or physicians' offices where patients are not regularly kept as bed patients for twenty-four hours or more; nor does it include

Nursing homes, as defined and which come within the scope of chapter 18.51 RCW; nor does it include

Birthing centers, which come within the scope of chapter 18.46 RCW; nor does it include

Psychiatric or alcoholism hospitals, which come within the scope of chapter 71.12 RCW; nor

Any other hospital or institution specifically intended for use in the diagnosis and care of those suffering from mental illness, mental retardation, convulsive disorders, or other abnormal mental conditions.

Furthermore, nothing in this chapter will be construed as authorizing the supervision, regulation, or control of the remedial care or treatment of residents or patients in any hospital conducted for those who rely primarily upon treatment by prayer or spiritual means in accordance with the creed or tenets of any well-recognized church or religious denominations.

(iii) "Mental health hospital" means any hospital operated and maintained by the state of Washington for the care of the mentally ill.

(iv) "Hospitals, N.O.C." means health care facilities that do not qualify as acute care or mental health hospitals and may be privately owned facilities established for purposes such as, but not limited to, treating psychiatric disorders and chemical dependencies or providing physical rehabilitation.

(v) "Safe patient handling" means the use of engineering controls, lifting and transfer aids, or assistance devices, by lift teams or other staff, instead of manual lifting to perform the acts of lifting, transferring and repositioning health care patients.

(vi) "Lift team" means hospital employees specially trained to conduct patient lifts, transfers, and repositioning using lifting equipment when appropriate.

(vii) "Department" means the department of labor and industries.

(b) Hospitals will report worker hours in the risk classification that describes the nature of their operations and either their level of implementation of, or need for, the safe patient handling program.

(c) A fully implemented safe patient handling program must include:

(i) Acquisition of at least the minimum number of lifts and/or appropriate equipment for use by lift teams as specified in chapters 70.41 and 72.23 RCW.

(ii) An established safe patient handling committee with at least one-half of its membership being front line, nonmanagerial direct care staff to design and recommend the process for implementing a safe patient handling program.

(iii) Implementation of a safe patient handling policy for all shifts and units.

(iv) Conducting patient handling hazard assessments to include such variables as patient-handling tasks, types of nursing units, patient populations, and the physical environment of patient care areas.

(v) Developing a process to identify appropriate use of safe patient handling policy based on a patient's condition and availability of lifting equipment or lift teams.

(vi) Conducting an annual performance evaluation of the program to determine its effectiveness with results reported to the safe patient handling committee.

(vii) Consideration, when appropriate, to incorporate patient handling equipment or the physical space and construction design needed to incorporate that equipment at a later date during new construction or remodeling.

(viii) Development of procedures that allow employees to choose not to perform or participate in patient handling activities that the employee believes will pose a risk to him/herself or to the patient.

(d) Department staff will conduct an on-site survey of each acute care and mental health hospital before assigning a risk classification. Subsequent surveys may be conducted to confirm whether the assigned risk classification is still appropriate.

(e) To remain in classification 6120-00 or 7200-00, a hospital must submit a copy of the annual performance evaluation of their safe patient handling program, as required by chapters 70.41 and 72.23 RCW, to the Employer Services Program, Department of Labor and Industries, P.O. Box 44161, Olympia, Washington, 98504.

WAC 296-17-35204 Penalty assessments for employers who fail to register under Title 51 RCW. (1) Any employer who has failed to secure payment of compensation for their workers covered under this title will be liable, subject to RCW 51.48.010, to a maximum penalty in a sum of five hundred dollars or in a sum double the amount of premiums due for the four quarters prior to securing payment of compensation under this title, whichever is greater, for the benefit of the medical aid fund.

(2) If an injury or occupational disease is sustained by a worker of an employer who has failed to secure payment of compensation under this title that employer may also be liable for the cost of such an injury or occupational disease at the time the claim for benefits is accepted by the department.

For the purposes of this section only the cost of such claim will be determined as follows:

[Title 296 WAC—p. 260]

The case reserve value shall be determined by the nature of the injury or occupational disease, the part of the body affected and other factors which will impact the cost, including but not limited to, age, education and work experience. The case reserve value will include actual costs paid to date and estimated future claim costs. No further adjustments or evaluations of the cost of the claim will be made for the purposes of this subsection after assessment for the cost of an injury or occupational disease is made by the department.

WAC 296-17-850 Experience rating plan—Eligibility and experience period. (1) **Eligibility.** Effective January 1, 1991, and thereafter each employer who has reported experience during the "experience period" shall have his/her base rates multiplied by an "experience factor" calculated in accordance with the rules of this manual. The development of the "experience factor" as set forth in WAC 296-17-855 shall include losses and exposure reported in all risk classifications.

(2) **Experience period.** The "experience period" shall be the oldest three of the four fiscal years preceding the effective date of premium rates as set forth in WAC 296-17-895.

WAC 296-17-855 Experience modification. (1) The basis of the experience modification shall be a comparison of the actual losses charged to an employer during the experience period with the expected losses for an average employer reporting the same exposures in each classification. The comparison shall contain actuarial refinements designed to weigh the extent to which the actual experience is credible, due consideration being given to the volume of the employer's experience. Except for those employers who qualify for an adjusted experience modification as specified in WAC 296-17-860 or 296-17-865, the experience modification factor shall be calculated from the formula:

$$\begin{aligned} \text{EXPERIENCE MODIFICATION FACTOR} &= \frac{(\text{Credible Actual Primary Loss} + \text{Credible Actual Excess Loss}) / \text{Expected Loss}}{\text{Where}} \\ \text{Credible Actual Primary Loss} &= \text{Actual Primary Loss} \times \text{Primary Credibility} \\ &+ \text{Expected Primary Loss} \times (100\% - \text{Primary Credibility}) \\ \text{Credible Actual Excess Loss} &= \text{Actual Excess Loss} \times \text{Excess Credibility} \\ &+ \text{Expected Excess Loss} \times (100\% - \text{Excess Credibility}) \end{aligned}$$

The meaning and function of each term in the formula is specified below.

For each claim, the actual primary loss is the first dollar portion of the claim costs, which has been shown in actuarial studies, to have the greater credibility in predicting future experience. These amounts are summed over all claims. For each claim in excess of \$19,560 the actual primary loss shall be determined from the formula:

$$\text{ACTUAL PRIMARY LOSS} = \frac{48,900}{(\text{Total loss} + 29,340)} \times \text{total loss}$$

For each claim, less than \$19,560 the full value of the claim shall be considered a primary loss.

For each claim, the excess actual loss is the remaining portion of the claim costs, which have been shown in actuarial studies to have less credibility in predicting future experience. The excess actual loss for each claim shall be determined by subtracting the primary loss from the total loss. These amounts are summed over all claims.

For any claim without disability benefits (time loss, partial permanent disability, total permanent disability or death) either actually paid or estimated to be paid, the total actual losses for calculating the primary loss and excess loss shall first be reduced by the lesser of \$1,510 or the total cost of the claim. Here are some examples for these claims:

Total Loss	Total Loss (after deduction)	Primary Loss	Excess Loss
200	-	-	-
2,000	490	490	-
20,000	18,490	18,490	-
200,000	198,490	42,603	155,887
2,000,000	487,490	46,124	441,366

Note: The deduction, \$1,510, is twice the average case incurred cost of these types of claims occurring during the three-year period used for experience rating. On average this results in reducing the average actual loss about seventy percent for these types of claims adjusted. This is done to help make the transition between the two different experience rating methods better by helping make the change in experience factor reasonable for small changes to the actual losses. The \$2,000,000 loss is limited by the Maximum Claim Value before the reduction of \$1,510 is applied.

For each employer, the primary credibility and the excess credibility determines the percentage weight given to the corresponding actual primary losses and the actual excess losses, included in the calculation of the experience modification, based on the volume of expected losses. Primary credibility and excess credibility values are set forth in Table II.

An employer's expected losses shall be determined by summing the expected loss for each of the three years of the experience period, which are calculated by multiplying the reported exposure in each classification during the year by the corresponding classification expected loss rate and rounding the result to the nearest cent. Classification expected loss rates by year are set forth in Table III.

Expected losses in each classification shall be multiplied by the classification "Primary-Ratio" to obtain "expected primary losses" which shall be rounded to the nearest cent. Expected excess losses shall then be calculated by subtracting expected primary losses from expected total losses rounded to the nearest cent. Primary-Ratios are also set forth in Table III.

(2) Alternative experience modification calculation. The following experience modification factor calculation provides results similar to the experience rating calculation used in 2006. The experience modification factor shall be calculated in the manner identified in subsection (1) of this section with the following exceptions:

(a) The Expected Loss Rate and Primary Ratio Table IIIA shall be used instead of Table III.

(b) No medical only deduction (of \$1,510) shall be applied to claims without disability benefits during the three year experience period for purposes of calculating the primary and excess losses.

(c) The Primary and Excess Credibility Table IIA shall be used instead of Table II.

(3) Experience modification calculation for 2007. For calendar year 2007, if the calculated experience modification factor using the manner identified in subsection (1) of this section is greater than the experience modification factor calculated using subsection (2) of this section then the experience modification factor shall be the lower of the two calculations.

WAC 296-17-860 Transition adjustment. In the event that an employer has no compensable accidents during the experience period and the experience modification calculated in accordance with WAC 296-17-855 is greater than the experience modification shown in Table IV, WAC 296-17-890 then such modification shall be reduced to the value shown in Table IV. For the purpose of this rule, a compensable

able accident is defined as one which has resulted in, or is expected to result in, time loss compensation, permanent disability or death.

WAC 296-17-865 Experience modification limitations. (1) Notwithstanding the experience modification otherwise obtained in this manual, no employer's experience modification shall increase or decrease by more than 25% during any one year except as provided in subparagraph (2) below.

(2) The 25% limitation on the change in the experience modification shall not apply in the following cases:

(a) In cases where it would cause an employer with better than average experience during the experience period to receive an experience modification greater than 1.00.

(b) In cases where it would cause an employer with worse than average experience during the experience period to receive a modification less than 1.00.

In the above specified cases the employer's modification shall be allowed to decrease or to increase, as the case may be, to 1.00.

WAC 296-17-86502 Medical aid experience modification limitations. The medical aid fund premiums shall be experience rated beginning January 1, 1989, using the reported past experience of employers as provided for in the department's experience rating plan. However, the initial experience rating adjustment for each employer shall be made from a base modification of 1.0000, with adjustments limited to twenty-five percent annually until the actual experience rating developed by the department for each employer has been reached or four years from the effective date of this section, whichever comes first. Thereafter, adjustments will be made in accordance with the parameters established by the department's experience rating plan.

[Statutory Authority: RCW 51.16.035. 88-16-012 (Order 88-12), § 296-17-86502, filed 7/22/88, effective 1/1/89.]

WAC 296-17-870 Evaluation of actual losses. Except as provided in the following subsections of this paragraph, actual losses shall include all payments as of the "valuation date" for each claim arising from an accident occurring during the experience period. Losses for claims open as of the valuation date may also include a reserve for future payments. Actual losses on claims for accidents occurring outside of the experience period shall not be included.

(1) **Valuation date.** The valuation date shall be on and include December 31, one year and one day immediately preceding the effective date of premium rates as set forth in WAC 296-17-895. For experience modifications effective January 1, 1990, and thereafter, the valuation date shall be June 1, seven months immediately preceding the effective date of premium rates.

[Title 296 WAC—p. 262]

(2) **Retroactive adjustments - revision of losses between valuation dates.** No claim value shall be revised between valuation dates and no retroactive adjustment of an experience modification shall be made because of disputation concerning the judgment of the claims examiner or because of subsequent developments except as specifically provided in the following cases:

(a) In cases where loss values are included or excluded through mistake other than error of judgment.

(b) In cases where a third party recovery is made, subject to subsection (4)(a) of this section.

(c) In cases where the claim qualifies as a second injury claim under the provisions of RCW 51.16.120.

(d) In cases where a claim, which was previously evaluated as a compensable claim, is closed and is determined to be noncompensable (ineligible for benefits other than medical treatment).

(e) In cases where a claim is closed and is determined to be ineligible for any benefits.

In the above specified cases retroactive adjustment of the experience modification shall be made for each rating in which the claim was included. Retroactive adjustments will not be made for rating periods more than ten years prior to the date on which the claim status was changed.

(3) **Average death value.** Each fatality occurring to a worker included within the mandatory or elective coverage of Title 51 RCW shall be assigned the "average death value." The "average death value" shall be the average incurred cost for all such fatalities occurring during the experience period. The average death value is set forth in WAC 296-17-880 (Table II).

(4) **Third-party recovery - effect on experience modification.**

(a) For claims with injury dates prior to July 1, 1994, a potential claim cost recovery from action against a third party, either by the injured worker or by the department, shall not be considered in the evaluation of actual losses until such time as the third-party action has been completed. If a third-party recovery is made after a claim had previously been used in an experience modification calculation, the experience modification shall be retroactively adjusted. The department shall compute a percentage recovery by dividing the current valuation of the claim into the amount recovered or recoverable as of the recovery date, and shall reduce both primary and excess losses previously used in the experience modification calculation by that percentage.

(b) For claims with injury dates on or after July 1, 1994, if the department determines that there is a reasonable potential of recovery from an action against a third party, both primary and excess values of the claim shall be reduced by fifty percent for purposes of experience modification calculation, until such time as the third-party action has been completed. This calculation shall not be retroactively adjusted, regardless of the final outcome of the third-party action. After a third-party recovery is made, the actual percentage recovery shall be applied to future experience modification calculations.

(c) For third-party actions completed before July 1, 1996, the claim shall be credited with the department's net share of the recovery, after deducting attorney fees and costs. For third-party actions completed on or after July 1, 1996, the

(2007 Ed.)

claim shall be credited with the department's gross share of the recovery, before deducting attorney fees and costs.

(d) **Definitions:**

(i) As used in this section, "recovery date" means the date the money is received at the department or the date the order confirming the distribution of the recovery becomes final, whichever comes first.

(ii) As used in this section, "recoverable" means any amount due as of the recovery date and/or any amount available to offset case reserved future benefits.

(5) **Second injury claims.** The primary and excess values of any claim which becomes eligible for second injury relief under the provisions of RCW 51.16.120, as now or hereafter amended, shall be reduced by the percentage of relief granted.

(6) **Occupational disease claims.** When a claim results from an employee's exposure to an occupational disease hazard, the "date of injury," for the purpose of experience rating, will be the date the disability was diagnosed and that gave rise to the filing of a claim for benefits. The cost of any occupational disease claim, paid from the accident fund and medical aid fund and arising from exposure to the disease hazard under two or more employers, shall be prorated to each period of employment involving exposure to the hazard. Each insured employer who had employed the claimant during the experience period, and for at least ten percent of the claimant's exposure to the hazard, shall be charged for his/her share of the claim based upon the prorated costs.

(7) **Maximum claim value.** No claim shall enter an employer's experience record at a value greater than the "maximum claim value." The maximum claim value is set forth in WAC 296-17-880 (Table II).

(8) **Catastrophic losses.** Whenever a single accident results in the deaths or total permanent disability of three or more workers employed by the same employer, costs charged to the employer's experience shall be limited as required by RCW 51.16.130.

(9) **Acts of terrorism.** Whenever any worker insured with the state fund sustains an injury or occupational disease as a result of an incident certified to be an act of terrorism under the U.S. Terrorism Risk Insurance Act of 2002, the costs of the resulting claim shall be excluded from the experience rating computation of the worker's employer.

(10) **Claims filed by preferred workers.** The costs of subsequent claims filed by certified preferred workers will not be included in experience calculations, as provided in WAC 296-16-010.

(11) **Life and rescue phase of emergencies:** This provision applies to "emergency workers" of nongovernmental employers assigned to report in classification 7205 (WAC 296-17-76601) who assist in a life and rescue phase of a state or local emergency (disaster). The life and rescue phase of an emergency is defined in RCW 51.16.130(3) as being the first seventy-two hours after a natural or man-made disaster has occurred. For an employer to qualify for this special experience rating relief, a state or local official such as, but not limited to, the governor; a county executive; a mayor; a fire marshal; a sheriff or police chief must declare an emergency and must request help from private sector employers to assist in locating and rescuing survivors. This special relief is only applicable to nongovernmental employers during this initial

seventy-two hour phase of the declared emergency unless the emergency has been extended by the official who declared the emergency. The cost of injuries or occupational disease claims filed by employees of nongovernmental employers assisting in the life and rescue phase of a declared emergency will not be charged to the experience record of the nongovernmental state fund employer.

WAC 296-17-873 Responsibility for past experience.

WAC 296-17-87301 through 296-17-87306 shall be used to determine the assignment of past loss experience associated with a change in business ownership for experience rating purposes. It is the intent of these rules that every firm (business) shall be responsible for its past experience irrespective of ownership as long as the firm (business) continues to conduct operations which are subject to Washington Workers' Compensation Act. When a business or portion of a business is sold, the new owner or owners of such business or portion thereof shall also take over the past loss experience associated with the business unless another treatment is specified in these rules.

WAC 296-17-87301 Definitions. The definitions in this section shall apply throughout WAC 296-17-873 through 296-17-87308.

(1) "Entity" means an individual, partnership, corporation, unincorporated association, or fiduciary operation (e.g. trust, receivership, or estate of deceased individual).

(2) "Majority interest" means more than fifty percent ownership in the firm (business). If the owners of the firm (business) are a partnership, majority interest means more than fifty percent of the general partners' ownership in the firm (business). Majority interest in a partnership shall be determined in proportion to the general partners' ownership of the firm (business). For example, in a three-way partnership . . . partner A owns twenty percent of the business, partner B owns twenty percent of the business, and partner C owns sixty percent of the business . . . if partner A sold his/her share of the business, a majority interest still exists as partners B and C retain a majority interest (eighty percent) in

the firm (business). Limited partners shall not be considered to have an ownership interest for purpose of these rules.

(3) "Joint venture" means a combination of two or more entities, entered into for the purpose of carrying to completion a specified job of limited duration.

(4) "Employee leasing entity" means a firm (business) which provides workers on a long-term basis to another firm.

Statutory Authority: RCW 51.04.030 and 51.16.035. 79-12-086 (Order 79-18), § 296-17-87301, filed 11/30/79, effective 1/1/80.]

WAC 296-17-87304 Change in ownership with an accompanying change in business activities. When a majority change in the ownership of a firm (business) is accompanied by a change in the business activity of the firm (business) and this change is sufficient to result in a reclassification of the basic classification assigned to the firm (business), then the past experience, prior to the change, shall be excluded from future experience ratings of the acquiring entity. If the change in business activities is not sufficient to result in a reclassification of the basic classification assigned to the firm (business), the acquiring entity shall retain the past experience attributable to the firm (business) or portion thereof which was purchased. For purposes of this rule, the term "basic classification" shall mean the classification other than standard exception classifications as defined in WAC 296-17-31018(2) which produces the largest number of worker hours during the calendar year in which the change in business operations is noted. The basic classification of a business shall be determined in accordance with WAC 296-17-31012.

WAC 296-17-87305 Initial recalculation of experience factor. When an entity acquires the past experience of an existing firm (business) or portion thereof, the following treatment shall apply until the next date for the general calculation of all employers' experience factors. WAC 296-17-865, "Experience modification limitations" shall not apply in these situations. The purpose of this subsection is to produce the same premium level that would have been generated had no change in the ownership of a firm (business) occurred.

(1) Acquiring entity retains all rating experience associated with the firm (business), or portion thereof, being acquired. The selling entity shall revert to an experience factor of unity (1.0000) until such time as it may requalify for experience rating or unless another treatment is specified in these rules.

(2) If the acquiring entity already has an experience factor, it shall be assigned a weighted average of its existing experience factor and the acquired experience factor. Weights will be based on expected losses. In the event the acquiring entity does not have an existing experience factor, it shall be assigned an experience factor developed from the past experience of the firm (business) or portion thereof being acquired.

(3) If the past experience of the firm (business) cannot be segregated between the operations remaining with the selling entity and the operations being taken over by the acquiring entity, then the entire experience of the firm (business) shall remain with the selling entity. In the event that the past experience can be segregated, the following shall apply:

(a) Separate experience factors shall be calculated for each portion of the firm (business) being sold using the experience rating procedures in WAC 296-17-855 through 296-17-870.

(b) Both experience factors shall be increased or decreased in the same proportion, if necessary, so that their weighted average is the same as the selling entity's experience factor prior to the sale or change.

(c) The selling entity shall be assigned the experience factor for the experience it is retaining.

(d) The experience factor developed in (a) and (b) of this subsection shall be used in accordance with subsection (2) of this section.

WAC 296-17-87306 Combination of entities. Separate entities shall be combined for experience rating purposes when the same person or persons and/or a single corporation owns a majority interest in each of the entities.

Note: If two or more different combinations are possible in accordance with the provisions of this section, the combination producing the greatest amount of expected losses during the experience period shall be made. The experience of any entity used in such combinations may not be otherwise used in combination with any other entity. The experience used in a rating of combination shall be subject to the provisions of WAC 296-17-87305 (Initial recalculation of experience factor).

Exceptions:

(1) Individual trusts may not be combined for experience rating purposes with operations of the trustee nor with the operations of any other trusts. However, two or more trusts having identical trustees and also having identical beneficiaries shall be combined.

(2) Joint venture operations may not be combined with the operations of any other entity, even though the members of the joint venture are identically owned.

This subsection applies only where the entities are or have been operating and insured concurrently in Washington. It does not apply where concurrent operations are for a short period of time, not exceeding one year, if the operation of the original entity during the period both entities were operating, was restricted to the completion of projects entered into prior to the new entity commencing operations. Newly formed joint ventures shall be assigned an experience factor of unity (1.0000).

(3) Employee leasing firms (businesses) shall be required to establish a subaccount for each client for which they supply workers. This account will be a subaccount number of their client's account number. The client's account and the employee leasing firm's subaccount shall be combined to

produce a single experience factor which will be shared by both the client and employee leasing firm (business).

WAC 296-17-900 Premium discounts. (1) A premium discount is a reduction of premium, of a specified amount or percentage, which is earned by meeting certain requirements or conditions not required of all employers.

(2) The department may offer a specified group of employers a premium discount plan to encourage participation in a pilot project or other department program intended to evaluate or promote alternatives in premium reporting or loss control initiatives.

WAC 296-17-90401 Introduction. To implement retrospective rating (retro) provided for in RCW 51.18.010, labor and industries (L&I) has developed a series of rules that can be found in chapter 296-17 of the Washington Administrative Code (WAC). As required by law (chapter 51.18 RCW), the retrospective rating plan is based on recognized principles of insurance.

Note: WAC 296-17-90401 through 296-17-90497 contain the general and special rules applicable to retro and the retrospective rating plan.

What is retrospective rating? Retro is a voluntary financial incentive workers' compensation insurance program offered by L&I. Retro is designed to reward employers participating in the program that are able to keep their claim costs below the preselected level they have chosen. Reductions in claim costs are the result of improvements in workplace safety and injured worker outcomes.

Note: L&I received legislative authority to offer retro in 1980 (SSB 3169, chapter 129, Laws of 1980) and have offered retro options since 1981. In 1999, the legislature formalized the program in its own section of law (chapter 51.18 RCW) and made retrospective rating a mandatory offering of L&I. (SB 6048, chapter 7, Laws of 1999.)

What is the reward? Participating employers who are successful may be refunded a portion of the premiums they paid to L&I.

Note: Retro is not for everyone. An employer may be assessed additional premium if they are not committed to improving workplace safety and accident prevention and/or do not take appropriate action to reduce the frequency and severity of accidents to their employees.

Are there any fees involved? L&I does not charge fees for this program.

Note: Organizations that sponsor retro groups can and often do charge their members fees for their services. These fees are not a requirement of L&I nor are they regulated by L&I.

Who can participate? Any employer that insures their workers' compensation insurance obligations with L&I and meets the requirements contained in the retro rules can participate in retro.

WAC 296-17-90402 Definitions. To reduce misunderstandings that can result by our use of certain words or phrases, we have developed definitions that govern what these words or phrases will mean for retro purposes.

Account: An individual employer's industrial insurance account and related subaccounts, or in the case of a retro group it means the sponsoring organization's industrial insurance account.

Account in good standing: A phrase we use when an employer and/or sponsoring organization is current with all payments due L&I and in compliance with L&I laws, rules and regulations at the time of enrollment or reenrollment. For an account to be in good standing you must:

- Have an active L&I industrial insurance account.
- Submit all reports required by L&I when they were due.
- Pay all industrial insurance premium payments, assessments, penalties and interest when due.

Note: This requirement also includes the payment of other fees, fines, penalties and assessments established by the department such as safety violations and computer access fees. An account may be deemed to be in good standing if the employer or group (sponsoring organization) is current with an L&I approved written repayment agreement.

- Not participate in the activities described in WAC 296-17-90428 concerning the direct payment of medical services.

Note: Organizations that sponsor a group must also file the safety plan when applicable (WAC 296-17-90409) and the annual safety report required in WAC 296-17-90411 to be in good standing.

Adjustment: The process of calculating retrospective premium, and any resulting refund or assessment.

Note: For the first adjustment of a coverage period, retrospective premium is compared to the standard premium due. The difference will be refunded if the retrospective premium is lower than the standard premium due. You will be assessed the difference if the retrospective premium is higher than the standard premium due. In subsequent adjustments of the coverage period, the new retrospective premium is compared to the prior net retrospective premium to determine the amount of refund or assessment.

Basic premium ratio (BPR): A component of the retrospective rating premium formula. The BPR represents a charge for administrative costs (except claims handling) and an insurance charge that covers the cost of having retrospective premium limited by the selected maximum premium ratio.

Case reserve: L&I's estimate of the cost associated with a specific claim.

Coverage period: A twelve-month period beginning January 1 and ending December 31, or April 1 through March 31, or July 1 through June 30, or October 1 through Septem-

ber 30. Only claims with a date-of-injury within the selected coverage period and the standard premium due for the same coverage period are used to calculate retrospective premium. Effective with the October 1, 2000, coverage period and all subsequent coverage periods thereafter, each coverage period will have three mandatory adjustments and no optional adjustments. The first adjustment will occur nine months after the coverage period has ended. Each subsequent valuation will take place in twelve-month intervals.

Note: The coverage period for a retro group is selected by the sponsoring organization and the coverage period of an individual enrollment is selected by the employer.

Date of enrollment or reenrollment: A phrase used by L&I to establish when participation in retro begins. The date of enrollment or reenrollment is the first day of the coverage period.

Note: A sponsoring organization can add new group members each quarter during the coverage period. We refer to this as "staggered enrollment." Employers seeking to participate in an organization's group after the coverage period has begun must meet all of the application requirements found in WAC 296-17-90413. Staggered enrollment applications must be received in our Tumwater office by the 15th calendar day of the month prior to the selected quarter (i.e., December 15 for January 1; March 15 for April 1; June 15 for July 1; or September 15 for October 1). If the due date falls on a weekend or holiday, the application will be due on the next business day. Employers that participate in a retro group on a staggered enrollment basis are required to participate for the remainder of the coverage period unless they sell or close the enrolled business or become self-insured.

Developed losses, a.k.a. total incurred losses (developed): A component of the retrospective rating premium formula. Based on historical trends we know that the total incurred losses for claims in a coverage period tend to increase over time. This can be the result of claim reopenings, changes in time loss duration, increased medical utilization, etc. The developed losses computation anticipates and distributes these increases among all the participants in a coverage period.

Note: Developed losses for pension claims are determined by multiplying their incurred losses by the applicable performance adjustment factor. For nonpension claims, developed losses are determined by multiplying their incurred losses by the applicable loss development factors.

Freeze date: See valuation date.

Group: Employer members of an organization who have agreed to have their retrospective premium calculated using the combined applicable standard premium and related developed loss data of the participants as a whole.

Homogeneity: A word used to convey the requirement that retro groups be made up of like businesses.

Incurred losses: A cost measure of a claim. For open claims, incurred losses are the total of costs paid-to-date which have been assigned to a given employer account, or the case reserve established by the department, whichever is greater. For closed claims, incurred losses are the total of costs paid-to-date which have been assigned to a given employer account, regardless of any case reserve that may have been established.

Loss conversion factor (LCF): A component of the retrospective premium formula, the LCF represents an expense charge for claims handling and the present value of developed losses.

Note: LCFs can be found in WAC 296-17-90493 through 296-17-90497.

Loss development factor (LDF): These are actuarially determined factors that are multiplied by incurred losses of nonpension retro claims to produce developed losses. LDFs are unique to each coverage period, but are the same for every nonpension retro claim in the coverage period.

Note: LDFs are periodically recalculated. LDFs shown on retro reports have already been adjusted by the applicable performance adjustment factor.

Loss ratio: The numerical result of dividing developed losses by standard premium.

Note: The retrospective premium calculation will generate a net refund if the basic premium ratio (BPR) + (Loss Ratio x the Loss conversion factor (LCF)) is less than 1. The BPR and LCF are determined by the plan selected by the individual enrollee, or in the case of a group by the sponsoring organization and the premium size of the individual enrollee or the group. Once these have been selected the retro group can only influence the loss ratio to determine the amount of refund. L&I suggests an evaluation of each claim to determine if there are trends and patterns and that the sponsoring organization implement workplace safety measures to eliminate or reduce loss regardless of the loss ratio.

Maximum premium ratio (MPR): A factor preselected by the organization (group) or individually enrolled employer. The MPR is multiplied by the standard premium (SP) to determine the maximum retrospective premium requirement for a given coverage period.

Note: MPRs can be found in WAC 296-17-90493 through 296-17-90497.

Member of a group: These are the individual employers that participate in a group plan of a sponsoring organization.

Minimum premium ratio (MnPR): An actuarially determined factor applicable to plans A1, A2 and A3. The MnPR is multiplied by the standard premium (SP) to determine the minimum retrospective premium requirement for a given coverage period.

Note: MnPRs can be found in WAC 296-17-90494 through 296-17-90496.

Pension claim: A claim designated as a fatality or total permanent disability.

Performance adjustment factor (PAF): An actuarially determined factor unique to each retro coverage period that ensures that aggregate refunds reflect the relative performance of retro versus nonretro state fund employers.

Plan: A numeric table developed by L&I used to calculate the retrospective premium requirement of a group or individually enrolled employer.

Note: A group or individually enrolled employer preselects from one of five plans (A, A1, A2, A3 or B). The selected plan (along with the MPR and standard premium volume) determines the minimum premium, basic premium and the loss conversion factor that is applied to the developed losses used in the retrospective premium calculation.

Premium: Money paid (due) from an employer for workers' compensation insurance. It does not include money paid as fees, fines, penalties or deposits.

Qualified employer: A phrase used by L&I to describe an employer that has an industrial insurance account and that the account is in good standing at the time of enrollment or reenrollment.

Retrospective premium: The net premium for a group or individually enrolled employer after an adjustment for a given coverage period. The retrospective premium is determined using the formulas and provisions found in WAC 296-17-90446.

Standard premium: A phrase used by L&I to denote the total accident fund and medical aid fund premiums paid (due) by a group or individually enrolled employer for a given coverage period.

Note: The supplemental pension assessment portion of total premiums due (paid) is not included. If the group includes employers subject to the staggered enrollment provision of the retro rules, the standard premium is the total accident fund and medical aid fund premiums due (paid) for the calendar months in which they have been accepted into a group.

Valuation date: The date selected by L&I in which incurred losses for applicable claims are measured and captured for the purpose of calculating retrospective premium.

Note: Changes in incurred losses that occur after the valuation date will not be considered until the next applicable valuation date. The first valuation date is nine months after the coverage period ends. All subsequent valuations will occur in twelve-month intervals.

WAC 296-17-90404 Employer options. A qualified employer can participate in retro either as an individual or as a member of a retro group.

Note: Organizations that sponsor retro groups can establish enrollment requirements beyond those required by L&I. Employers interested in participating in a group should contact the organization that sponsors the group they are interested in directly for their requirements. WAC 296-17-90405 Individual retro—Enrollment.

Your responsibility:

To enroll in an individual retro:

You must:

- Have an active L&I industrial insurance account.
- Keep your L&I industrial insurance account in good standing.
- Enroll all similar businesses that you own or have a controlling interest in.

Note: A controlling interest means that you or a common set of owners own more than fifty percent of each business. If you acquire, purchase or start a new or existing business that you report in a separate L&I subaccount during the current coverage period that is of a similar business nature as the business enrolled in retro, the new business or businesses must be enrolled in retro for the remainder of the coverage period.

Example: You operate a chain of ten grocery stores. Each store is operated at a different location. You have requested that each store be assigned a special account (sub-account). You must enroll all ten stores in a retro plan. In addition, your company also has a separate administrative office. This office reports under the clerical office classification. You may elect to include your administrative office.

- Participate in retro for the entire coverage period unless you become a self-insured employer, sell or close your business and close your industrial insurance account.

Note: This requirement also applies to an employer's participation in a retro group. L&I will use the reported exposure (standard premium and developed losses) of the employer for the portion of the coverage period the business operated in the retrospective premium calculation for the group.

- Have at least a minimum annual standard premium of \$3,202.
- Select the maximum premium ratio and plan (A, A1, A2, A3 or B) that you wish to participate in. You should consider the benefits and risk of each plan and maximum premium ratio in making this selection.

Note: Plan and maximum premium ratio choices cannot be changed after the coverage period begins.

- Obey L&I's laws, rules and regulations.

- Complete, sign and return a copy of the "Individual Retrospective Rating Plan Agreement" form to L&I by the due date indicated on the form.

Note: Most employers participating in retro do so as a member of a group. If you are interested in participating in a group, you should contact the organization that sponsors the group you are interested in. They can tell you what their requirements are. Some organizations require a minimum standard premium for participation in their group. Any requirements other than those listed above are requirements of the organization that sponsors the retro group and not those of L&I.

WAC 296-17-90407 Reenrollment—Individual retro.

Your responsibility:

To reenroll in an individual retro:

You must:

- If before April 1, 2003, complete, sign and send L&I a new "Individual Retrospective Rating Plan Agreement" form by the due date indicated on the form.

Note: Beginning with the April 1, 2003, coverage period, and for each subsequent coverage period thereafter, L&I will automatically reenroll you in the same plan and maximum premium ratio that you previously selected provided your L&I industrial insurance account is in good standing at the time of reenrollment and you are in compliance with the requirements and conditions found in WAC 296-17-90405.

- For coverage periods beginning on or after April 1, 2003, complete, sign and send L&I a new Individual Retrospective Rating Plan Agreement form only if you want to change plans, coverage periods or the maximum premium ratio by the due date.

Note: If you contact us we will send you a copy of the agreement form. A copy of the form can also be found at the retro web site (www.lni.wa.gov/retro/).

WAC 296-17-90409 New group—Requirements.

Your responsibility:

To sponsor a new retro group after July 25, 1999:

You must:

- Have an L&I industrial insurance account and the account must be in good standing at the time of enrollment.

- Be an organization with dues paying members.

Note: This requirement is intended to provide a distinction between a business enterprise with clients not permitted to sponsor a retro group and an organization with members that can sponsor one or more retro groups. We recognize that some organizations may be funded through member donations and not dues. If your members do not pay dues, you must provide L&I a written confirmation of this fact when you send in your signed and completed group application.

- Provide L&I with copies of your organization's articles of incorporation, bylaws and marketing/membership applications or similar material.

Note: This information is to be submitted with your completed group application.

- Be formed for purposes other than:

- Obtaining or offering insurance coverage or insurance related services.

Note: In addition to these prohibitions, an insurer, insurance broker, insurance agent or insurance solicitor may not participate in the formation of a retrospective rating group; or sponsor a retrospective rating group. Since enhancement of workplace safety for the group is a principal requirement of retro, an organization that offers services primarily related to risk management, safety, loss control or claims administration will be deemed to be set up for the sole purpose of participating in retro and will not qualify to sponsor a retro group.

- Sponsoring a retro group and participating in L&I's retrospective rating program.

Note: We will verify the purpose(s) of the organization from the information contained in the articles of incorporation, bylaws, contracts and/or advertising material of the organization and contacts with other state agencies.

- Have been in existence for at least four years prior to sponsoring a retro group.

- Submit a written workplace safety and accident prevention plan to L&I.

Note: The written safety plan must demonstrate to L&I's satisfaction that formation of the group will substantially improve workplace safety and accident prevention for the group members. The safety plan must be tailored to the business/industry of the group members and include an evaluation of the group members' past claims.

- Cooperate with L&I's claims management activities.

- Obey L&I laws, rules and regulations.

- Complete an Application for Group form and send it to L&I.

Note: When you complete this application, you will need to select the single industry or business category that will be applicable to your group, the maximum premium ratio and plan (A, A1, A2, A3 or B) that will apply to the group for the coverage period. You should consider the benefits and risk of each plan and maximum premium ratio in making this selection. Plan and maximum premium ratio choices cannot be changed after the deadline listed below.

- Our organization will represent all members of the retrospective rating group, if approved, in all matters pertaining to their participation in the above selected retrospective rating group for the selected coverage period and subsequent adjustment periods.
- As the legal representative, the sponsoring organization is responsible for communicating L&I decisions to the members of the group.

NOTE: This agreement cannot be changed without the express written consent of L&I and is in effect through the coverage period selected by the sponsoring organization.

As a part of the application process our organization has selected the following plan, maximum premium ratio and coverage period:

Plan	Maximum Premium Ratio	Coverage Period

NOTE: If this application is for a new group you must send a copy of the articles of incorporation, by-laws, or other information to establish the organization's purpose and which validates membership requirements, and a copy of your Safety Plan.

Upon receipt of this application, L&I will send the sponsoring organization the following documents and/or information:

- Group Retrospective Rating Agreement Form.
- Application for Group Membership for each group member.
- Notice of any surety bond or other security deposit, if needed.

All information given in this application and attachments is true and complete.

WAC 296-17-90410 New group—Agreement finalized.

Our responsibility:

If we determine that your organization is qualified to sponsor a new retro group:

We will:

- Send you a "Group Retrospective Rating Agreement" form that must be signed, completed and returned by the date indicated on the form.
- Send you a blank Application for Group Membership and Authorization for Release of Insurance Data form.

Note: You should make copies of the application form and give a copy to each proposed group member. L&I requires an application for each proposed member.

Your responsibility:

When you receive the application forms:

You must:

- Send L&I a signed and completed Application for Group Membership and Authorization for Release of Insurance Data form for each proposed group member.

Note: An owner, partner or corporate officer of each business must sign the Application for Group Membership form.

- Provide L&I with documentation to establish that at least fifty percent of the proposed group members have been members of the sponsoring organization for at least one year prior to the first day of the selected coverage period.

Note: The documentation must include the name of the employer member and the date they became a member of the organization.

- Supply L&I with a surety bond if requested to do so.

Note: If required the surety bond will be in an amount equal to the difference of the projected standard premium of the retro group and the maximum premium under the plan selected rounded to the nearest thousand dollar increment. If a bond is required it is to be in effect until the coverage period has been finalized. This includes the period related to the annual adjustments of the coverage period and periods covered by any appeal of that coverage period.

- Complete, sign and return to L&I by the due date indicated on the agreement a "Group Retrospective Rating Agreement" form.

Note: The "Application for Group Retrospective Rating" form required in WAC 296-17-90409 and the "group retrospective rating agreement" required by this rule are separate forms. Both forms are required of a new group.

GROUP RETROSPECTIVE RATING AGREEMENT

This Agreement is between the Washington State Department of Labor and Industries (L&I) and _____ (sponsoring organization) for the twelve month coverage period beginning _____ and the related subsequent adjustments.

Terms of this Agreement are as follows:

- The sponsoring organization agrees that the words “organization” and “association” shall have the same meaning.
- The sponsoring organization will represent participating group members in all matters pertaining to their participation in retrospective rating for the period covered by this agreement.
- The sponsoring organization is responsible for notifying participating members of any decision made by L&I that involves the member’s industrial insurance account relative to their participation in retro during the period covered by this agreement.
- Each approved group member who by separate application has agreed to participate in this Group Retrospective Rating Agreement will:
 - Remain a party to this agreement for the above selected coverage period and all subsequent related adjustments.
 - Maintain an industrial insurance account with L&I and will keep the account in good standing.
 - Will earn and retain their individual experience rating based upon their own experience.
- The sponsoring organization will comply with all L&I laws, rules and regulations.
- The sponsoring organization is directly responsible to L&I for any additional retrospective premium arising from this agreement.
- A security deposit or surety bond equivalent to the maximum premium assessment may be required from the sponsoring organization as a condition of participation; to be in effect until the final premium adjustment has occurred and subsequent appeal period has ended.
- L&I may withhold any member’s pro-rata share of the group’s retrospective rating refund to satisfy the member’s industrial insurance account balance when premiums, penalties or assessments are past due.
- This Agreement cannot be changed without the express written consent of L&I.

NOTE: L&I must receive this completed Agreement no later than the 15th day of the month preceding the selected coverage period.

• Send these required documents to L&I by the date indicated on the Group Retrospective Rating Agreement form.

Our responsibility:

Upon receipt of required information:

We will:

• Verify that the sponsoring organization has an active L&I industrial insurance account and that the account is in good standing at the time of enrollment.

• Verify that each proposed member has an active L&I industrial insurance account and that the account is in good standing at the time of enrollment.

Note: An employer with multiple L&I accounts must enroll all businesses that are of a similar business nature in retrospective rating. If we discover that an employer has multiple L&I accounts, we will notify the sponsoring organization of this fact. The sponsoring organization is required to obtain an application from the remaining accounts within thirty

days of our notice or none of the employer's accounts will be enrolled in the group.

- Verify that the nature of business of each proposed member falls appropriately within the business/industry category selected by the organization.

- Verify that the proposed new group has a total group standard premium of at least \$1.5 million for the initial coverage period.

Note: The group standard premium will be based on the standard premiums of the proposed group members' most current fiscal year (four quarters) of reporting.

- Verify that at least fifty percent of the proposed group members have been members of the sponsoring organization for at least one year prior to group sponsorship.

Note: All employers of the proposed retro group must be members of the sponsoring organization.

- Notify you of our decision in writing.

[Statutory Authority: RCW 51.18.010(1), 02-23-089, § 296-17-90410, filed 11/20/02, effective 1/1/03.]

WAC 296-17-90411 Existing group.

Your responsibility:

To continue to sponsor an existing retrospective rating group:

You must:

- Complete, sign and return the Group Retrospective Rating Agreement form by the date indicated on the agreement form.

Note: If you do not want to change plans, maximum premium ratio or coverage periods, you do not need to send in a new

application for group retrospective rating for each new coverage period. L&I will assume the same plan, maximum premium ratio and coverage period. If your organization wants to change plans, maximum premium ratio or coverage period, you will need to submit a new application for group retrospective rating by the due date indicated on the application form. In the event that a sponsoring organization wants to change their business or industry category, they must notify L&I either by letter or by completing a new application for group retrospective rating by the due date indicated on the application form.

- Submit a completed and signed "Application for Group Membership and Authorization for Release of Insurance Data" form for each new proposed member.

Note: These applications can be submitted throughout the coverage period. See employer group member requirements for detail of when enrollment begins. If the sponsoring organization changes plans, maximum premium ratios or coverage period, they must secure new applications from each member or get preapproval from L&I if a different method will be used to serve notice to members of the change.

- Provide L&I an annual written report that highlights workplace safety accomplishments of the group during the past coverage year and identifies areas that the group has targeted for improvement during the next coverage period.

Note: The written annual safety report is due in the Tumwater office no later than the last day of the month prior to the beginning of the coverage period. If the due date falls on a weekend or holiday, the safety report will be due on the next business day. If you fail to submit the required written report when due, it will result in disqualification of the group. If this occurs, the sponsoring organization can requalify to sponsor the group but must satisfy the requirements applicable to new groups found in WAC 296-17-90409 and 296-17-90410.

Example of an Association Annual Safety Report

Past years accomplishments:

During the past year the association identified a leading cause of injury for our members was related to the lifting of resident clients.

The association working with professionals and manufacturers in the field identified equipment that eliminates most of the hazards associated with lifting clients.

Working with the Department of Labor and Industries, our association initiated a pilot program at a number of member facilities using the newly identified equipment.

Comprehensive training on equipment use and safety was given to all employees at these facilities. Although the program is experimental at this time and only been in place for five months, we have seen a reduction in back injuries of 20 percent.

Projected plans:

The members will implement a zero lift program at each facility in the next twelve months. We anticipate that this will reduce the number of back injuries for our members by 50 percent.

The association will further evaluate member losses associated with back sprains and strains and work with industry experts to further reduce these types of injuries.

- Supply L&I with a surety bond or assignment of savings if requested to do so.

Our responsibility:

Upon receipt of the required forms and the annual safety report:

We will:

- Verify that the sponsoring organization's L&I industrial insurance account is in good standing at the time of reenrollment.

- Verify that the individual employer member L&I industrial insurance accounts are in good standing at the time of reenrollment.

- Provide written feedback on the sponsoring organization's annual safety report and if applicable request revisions to the report.

Note: The department will notify the sponsoring organization of any concerns or needed changes to the safety report within thirty days of submission of the plan. The sponsoring organization is to submit a response and/or revised safety report

as applicable within sixty days of our notification to them of our concerns or needed changes or as otherwise agreed upon by the department.

- Notify the sponsoring organization in writing of our decision to reenroll the group and the group members.
- Notify the sponsoring organization in writing of our decision to deny reenrollment to the group or group members.

We may:

- Request the sponsoring organization to post a surety bond or assignment of savings in the amount of the difference between the projected standard premium of the group and the maximum premium under the plan selected.

Our responsibility:

If we require a surety bond or assignment of savings:

We will:

- Notify you in writing of this decision.

WAC 296-17-90413 Individual employer group member requirements—Initial enrollment.

Employer's responsibility:

To initially enroll in a retro group:

You must:

- Be a dues paying member of the organization that sponsors the retro group you wish to join.
- Complete an "Application for Group Membership and Authorization for Release of Insurance Data" form supplied to you by the sponsoring organization.

Note: You must send this application to the sponsoring organization by the date requested. Do not send it directly to L&I.

Account ID _____

Include sub accounts

Application Deadline _____

Coverage Year Beginning _____

If you have more than one L&I industrial insurance account you must list all accounts that are of a similar business nature on the reverse side of this form and check the sub account box above. If you have questions about this requirement please contact the business association listed above or L&I at (360) 902-4851.

As a member of the sponsoring organization listed above, this employer applies for enrollment in the retrospective rating group sponsored by the organization. L&I will notify the sponsoring organization of acceptance or denial of your application to participate in the group. It is the responsibility of the sponsoring organization to notify you of this acceptance or denial. As a pre-requisite of enrollment each of your industrial insurance accounts must be in good standing at the time of enrollment or you will not be allowed to participate in retrospective rating.

By signing this application, the employer named above agrees with all of the following conditions:

- L&I will automatically re-enroll the employer as a member of the group in future coverage periods provided the employer's industrial insurance account is in good standing at the time of re-enrollment. If the employer does not want to participate in future coverage periods the employer or sponsoring organization must notify L&I in writing prior to the beginning of the respective coverage period.
- The employer authorizes L&I to furnish the sponsoring organization or their designee with data and information obtained from the employer's industrial insurance account(s).
- The sponsoring organization will represent the employer in all matters applicable to retrospective rating participation and the employer's industrial insurance account(s).
- The employer agrees to comply with L&I rules, regulations and laws and is bound by the terms of the agreement between the sponsoring organization and L&I.
- The employer will cooperate with L&I claims management activities and will participate in the sponsoring organization's claims management and workplace safety initiatives.
- All retrospective rating adjustments that may be earned by the employer will be given to the sponsoring organization. L&I is not involved in the distribution of a group refund to the individual group members except in the case of defunct group.

These conditions are in effect immediately and will remain in effect through the term of any agreement between the sponsoring organization and L&I.

NOTE: L&I disclaims any interest in any other contract you may enter into with the sponsoring organization as their pre-requisite of your participation in the retrospective rating group that they sponsor, and L&I neither approves or disapproves of any language or provision contained in these other contracts.

RETURN this application directly to the above organization.

DO NOT send this application directly to L&I.

Signature of an owner, partner or corporate officer of the employer named above is required to participate in this retrospective rating group.

- Have an active L&I industrial insurance account and the account must be in good standing at the time of enrollment.

- Comply with L&I laws, rules and regulations.
- Enroll all businesses that you (the employer member) own or have a controlling interest in and whose nature of business is substantially the same.

Note: For purposes of retro, a controlling interest means more than fifty percent ownership in one or more business by the same owner or owners.

Example: You operate a chain of ten grocery stores. Each store is operated at a different location. You have requested that each store be assigned a special account. In addition to the ten stores, your company also has a separate administrative office. This office reports under the clerical classification. You must enroll all of your store locations if

you are to participate in retro. The sponsoring organization may allow you to include your administrative office in the retro group.

- Authorize the sponsoring organization to represent you in all matters pertaining to your participation in their retro group for the requested coverage period and all subsequent adjustment periods.

Sponsoring organization's responsibilities:

To enroll new members:

You must:

- Forward to L&I any application for your retro group that you want L&I to consider by the due date for the selected coverage period or staggered enrollment quarter.

- Represent all proposed and approved group members in all matters pertaining to their participation in your retro group for the requested coverage period and subsequent adjustment periods.

- Communicate L&I decisions directly to the members affected by the decision.

Our responsibilities:

Upon receipt of an "application for group membership and authorization for release of insurance data":

We will:

- Verify that the proposed members' business operations consist of substantially similar services and activities of other approved members and are within the business/industry category selected by the sponsoring organization.

- Verify that each proposed member has an active L&I industrial insurance account and that the account is in good standing at the time of enrollment.

- Notify the sponsoring organization in writing of our decision to allow or deny enrollment to any proposed member.

[Statutory Authority: RCW 51.18.010(1). 02-23-089, § 296-17-90413, filed 11/20/02, effective 1/1/03.]

WAC 296-17-90414 Individual employer group member requirements—Reenrollment.

Employer's responsibility:

To reenroll in the same retro group:

You must:

- Maintain your L&I industrial insurance account so that it is in good standing at the time of reenrollment.

Note: You do not need to complete a new application for group membership to reenroll in future coverage period and the same retro group. L&I will automatically reenroll you in the existing retro group if your account is in good standing at the time of reenrollment. If you want to discontinue participating in the current retro group, you will need to notify L&I and the sponsoring organization of the retro group that you are leaving us in writing prior to the first day of the new coverage period. If you want to change to a different retro group, you will need to contact the organization that sponsors the group you are interested in and notify L&I in writing of your decision to change retro groups before the applicable enrollment deadline. Failure of an employer to notify L&I of a decision to change groups may result in the employer being enrolled in the former group and not the new group.

- Participate for the entire coverage period unless you sell or close your business.

Sponsoring organization's responsibility:

To reenroll existing members in your retro group for the next coverage period:

(2007 Ed.)

You must:

- Secure authorization annually from members that want to continue to participate in your retro group.

- Keep these authorizations on file for the selected coverage year and subsequent adjustment periods. These records are to be made available for department inspection upon request.

- Notify L&I in writing of any changes (deletion) of participating members before the first day of the new coverage period.

Our responsibility:

Unless the participating employer member of a retro group or the sponsoring organization notifies L&I in writing:

We will:

- Automatically reenroll the employer member in the retro group for each subsequent coverage period provided the employer's L&I industrial insurance account is in good standing at the time of reenrollment.

Note: This procedure is intended to reduce the administrative burden on employers associated with the reenrollment process. A sponsoring organization can adopt a similar procedure to eliminate the need of the annual authorization by members. To do this the sponsoring organization must send L&I a letter outlining this intent and then send written notice to all affected members with a copy of the notice to L&I. This notice must indicate the method that a participating member must follow should they wish to not participate in the retro group in the future.

- Provide the organization with a list of businesses that are seeking to withdraw from the retro group they sponsor prior to the beginning date of the coverage period.

Note: The organization should contact members to verify the change. Often the member is not seeking to change plans but is simply confused by marketing material of another group. If we do not hear from the employer or the sponsoring organization, we will enroll the employer's business in the new group.

[Statutory Authority: RCW 51.18.010(1). 02-23-089, § 296-17-90414, filed 11/20/02, effective 1/1/03.]

WAC 296-17-90421 Sponsoring organization—Retro group business and industry selection. Washington law (RCW 51.18.040) requires retro groups to be made up of employer members who are engaged in substantially similar business operations when the nature of their services or work activities of employees is considered.

Your responsibility:

To ensure that this requirement is met at the time you submit the application for group to L&I:

You must:

- Select the single business or industry category that will apply to the retro group you seek to sponsor from the categories listed below:

- Agriculture and related services, including services related to the care and breeding of animals, and all agricultural related activities including growing, harvesting, packing, and processing for shipment.

- Automotive, truck and boat, manufacturing, sales, repair and related services.

- Construction and related services.

- Distillation, chemicals, food and related services.

- Entertainment, hospitality and related services.

- Facilities, property management, maintenance and related services.

[Title 296 WAC—p. 293]

- Government, utilities, schools, health care and related services.
- Grocery stores, grocery distribution centers, bakeries, milk and dairy products processing, delivery to customers and related services.
- Health care, pharmaceutical, laboratories and related services.
- Logging and wood products manufacturing and related services.
- Manufacturing, processing, mining, quarrying, and related services.
- Retail and wholesale stores and professional services such as banks and law firms and related services.
- Temporary help and related services.
- Transportation, recycle, warehousing, facility maintenance and related services.

Example: An organization that was formed to advance the interests of apple growers would select the agriculture and related services business/industry group plan. This organization could sponsor a single group for all its grower members or could offer different performance groups for its grower members.

Our responsibility:

Upon receipt of your application for group:

We will:

- Update our records to reflect the category selected by the sponsoring organization.
- Screen prospective group members to ensure that their business operations fit appropriately in the category selected.
- Send you a list of the businesses that we determine fit appropriately in the category selected and those that do not.

Note: Only those members whose business undertakings are substantially similar to the industry/business group selected by the organization will be permitted to participate. This grouping technique is fundamental to workers' compensation insurance and is referred to as "homogeneity of risk." Once an employer has been approved for a group, they remain approved provided their industrial insurance account is in good standing during the enrollment or reenrollment process.

Example: Having selected the agriculture and related services business/industry grouping, the department would verify that the employer members of the apple grower organization were either apple growers or were involved in a related service such as an apple processing operation owned by the grower.

[Statutory Authority: RCW 51.18.010(1). 02-23-089, § 296-17-90421, filed 11/20/02, effective 1/1/03. Statutory Authority: RCW 51.18.010(2). 01-23-058, § 296-17-90421, filed 11/20/01, effective 1/1/02. Statutory Authority: RCW 51.18.010. 00-11-060, § 296-17-90421, filed 5/12/00, effective 7/1/00.]

WAC 296-17-90422 Retro group—Classification assignments.

- Since retro does not use a unique classification scheme (RCW 51.18.040(5)) and because a classification may fall appropriately into multiple business or industry categories (RCW 51.18.040(4)) L&I does not assign classifications to retro groups.
- L&I approves employers to participate in a retro group by considering the activities and services being provided by employees of the employer. This ensures that the activities

and services of the employer's business are substantially similar to the activities and services of the retro group.

Note: In the event that a retro group does not exist for an employer seeking to participate in a retro group, L&I will use an analogy approach to identify a possible group or groups that an employer may participate in. This procedure is intended to encourage the broad participation goals of chapter 51.18 RCW.

[Statutory Authority: RCW 51.18.010(1). 02-23-089, § 296-17-90422, filed 11/20/02, effective 1/1/03.]

WAC 296-17-90425 Additional groups.

- Organizations that sponsored a retro group prior to July 25, 1999, can sponsor an additional group after January 1, 2003.

Note: A sponsoring organization can propose to sponsor one additional group every five years. Each new group must meet the requirements found in WAC 296-17-90409.

- Organizations that sponsored a retro group after July 25, 1999, must wait five years after their last group was approved before they can sponsor a new retro group.

Note: A sponsoring organization can propose to sponsor one additional group every five years. Each new group must meet the requirements found in WAC 296-17-90409.

- An organization may:

- Divide an existing retrospective rating group into two or more groups provided that the proposed new groups fall within the same business or industry category as the group that is proposed to be divided; or

- Merge existing retrospective rating groups into one business or industry category provided that the proposed merged groups fall within the same business or industry category.

Note: Under no circumstance may a sponsoring organization propose more than one retro group or multiple business or industry categories in the same application to L&I.

[Statutory Authority: RCW 51.18.010(1). 02-23-089, § 296-17-90425, filed 11/20/02, effective 1/1/03.]

WAC 296-17-90428 Disqualification of a retro group. A sponsoring organization will forfeit the right to sponsor a retro group if:

- The retro group is required to pay additional net premium assessments in three consecutive coverage periods.

Note: The retro group will be placed in probationary status if they are required to pay additional net premium in two consecutive coverage periods. Once a group is placed on probationary status, the department will review the group's workplace safety and accident prevention plan and its methods for cooperation with department claims management activities. Following the review, the department will make recommendations for corrective steps that may be taken to improve the group's performance. In the event that the group's performance is not improved and the same retrospective rating group is required to pay an additional net premium assessment in the third consecutive coverage period, that group shall be denied future enrollment in the state's retrospective rating plan at the next enrollment. In addition, the sponsoring entity of the failed group may not sponsor another group in the same business or industry category for five coverage periods (sixty months) from the ending date of the failed group's last coverage.

- The organization encourages a participating member to pay a medical service provider directly for treatment of participating members' employees.

Note: Upon discovery of this violation, L&I will disqualify the retro group affected from further participation in the program and will issue an order and notice of decision to the

sponsoring organization outlining the alleged violation. A sponsoring organization found to have participated in this activity will lose their right to ever sponsor a retro group in the future. All refunds earned by a retro group disqualified for this activity and not yet distributed by L&I will be forfeited.

[Statutory Authority: RCW 51.18.010(1). 02-23-089, § 296-17-90428, filed 11/20/02, effective 1/1/03.]

WAC 296-17-90431 Change of ownership.

Your responsibility:

If you change the legal structure of your business or sell your business:

You must:

- Notify us promptly in writing of this change.

Note: If the change in ownership is limited to a change in legal structure, we may allow the new entity to continue to be a member of the group without a new application. If on the other hand the change results in new ownership, the new owner(s) will need to reapply if they want to participate in the group plan.

Example: A business operated as a sole proprietorship changes their legal structure to a corporation. Assuming the sole proprietor owner owns more than fifty percent of the stock in the corporation, we would allow this business to continue to be a member of the group without a new application.

Our responsibility:

Upon receipt of your notification:

We will:

- Determine if you need to complete a new application form to continue participation in the retro group.
- Notify the sponsoring organization of the change in the legal structure of your business and whether or not a new application will be needed for the member.

Sponsoring organization's responsibility:

If L&I requires a new application for a member:

You must:

- Secure the new application from the member and forward it to L&I by the date indicated on the application.

Note: If we do not receive the application by the due date, the employer will not be enrolled in your retro group.

[Statutory Authority: RCW 51.18.010(1). 02-23-089, § 296-17-90431, filed 11/20/02, effective 1/1/03.]

WAC 296-17-90437 Faxed, e-mail and machine-copied agreements and applications. L&I may, on a case-by-case basis, accept a faxed copy of the completed application form or an imaged copy via e-mail.

Your responsibility:

If for any reason you are unable to return the original signed copy of an application or agreement to L&I by the due date:

You must:

- Call L&I at 360-902-4851 during regular business hours (Monday through Friday 8:00 a.m. - 5:00 p.m. Pacific time) to let us know that you are unable to mail the application by the due date.
- Make this call to L&I prior to 5:00 p.m. (Pacific time) on the due date.

Our responsibility:

Upon receipt of your call:

We will:

- Document your phone call in our files.

(2007 Ed.)

- Discuss with you other options such as a faxed or e-mailed copy of the required documents.

Your responsibility:

If we agree to accept a copy of the application, agreement form or other documents:

You must:

- Fax or e-mail the completed application or agreement form to our Tumwater office by the due date indicated on the original application.
- Maintain the original signed application form in your business files so that we may obtain the original from you in the event an issue of authenticity arises.

[Statutory Authority: RCW 51.18.010(1). 02-23-089, § 296-17-90437, filed 11/20/02, effective 1/1/03.]

WAC 296-17-90440 Cancellation of participation.

Your responsibility:

If you want to discontinue participating in retrospective rating:

You must:

- Provide L&I written notification of withdrawal.

Note: This notification must be received at our Tumwater office by the close of business (5:00 p.m. Pacific time) the day before the new coverage period begins. If the due date falls on a weekend or holiday the signed letter is due on the next business day. You can only withdraw from retro prior to the beginning of a new coverage period. You cannot withdraw from retro during a coverage period except as provided in WAC 296-17-90405 "sale or closure of business," WAC 296-17-90402 "date of enrollment or reenrollment" for staggered enrollment requirements and WAC 296-17-90414.

Our responsibility:

Upon receipt of your notification to withdraw from retro:

We will:

- Notify you in writing when your participation in retro will end.

Note: This same procedure applies to an organization that sponsors a retro group. The sponsoring organization must notify L&I of members they wish to remove from the retro group.

[Statutory Authority: RCW 51.18.010(1). 02-23-089, § 296-17-90440, filed 11/20/02, effective 1/1/03.]

WAC 296-17-90445 Valuation of coverage period.

Our responsibility:

- Nine months after the coverage period has ended, we will do an initial valuation of the losses for each employer and group participating in retrospective rating.

Note: Effective with the October 1, 2000, coverage period and all subsequent coverage periods thereafter, each retrospective rating plan has three mandatory valuations and no optional valuations. The first valuation takes place roughly nine months from the last day of the coverage period. Each subsequent valuation will occur at twelve-month intervals from the initial evaluation date.

Example: Assume that your coverage period began July 1, 2001, and ended June 30, 2002 (twelve calendar months). Our first valuation date would occur the end of March 2003. This is roughly nine months from the last day of the coverage period.

WAC 296-17-90446 Retrospective premium calculation. Retrospective premium is calculated using the following formula:

Retrospective premium = (basic premium ratio x standard premium) + (loss conversion factor x developed losses).

(2007 Ed.)

- On the valuation date, all claims with injury dates that fall within the coverage period are valued and the incurred losses that have been established for these claims are "captured" or "frozen."

Note: Our valuation is limited to the open or closed status of a claim on the evaluation date. We do not consider adjudicative decisions (i.e., claim allowance, case reserve, wage determination and dependent status) surrounding a claim in our valuation.

- During the adjustment process we convert the captured incurred loss of each claim into developed losses using the appropriate loss development and performance adjustment factors. Retrospective premium is then calculated using the applicable formulas and tables in the retrospective rating manual.

- Prior to the application of the performance adjustment factor, we will cap the loss value for any one claim or group of claims arising from a single accident that has collective developed losses in excess of five hundred thousand dollars at a maximum of five hundred thousand dollars.

- Since the standard premium used in the retro calculation is based on premiums reported but not necessarily paid, we will deduct from the standard premium calculation any unpaid member premiums.

Note: A sponsoring organization and L&I can enter into an agreement for an alternate debt recovery method.

- Approximately twenty days after the valuation date, if entitled, we will send you your premium refund.

Note: If you participate in an individual plan or retro group, we will not issue a refund check if it is less than ten dollars. If a refund is less than ten dollars, we will credit the amount to your industrial insurance account and you can deduct the amount from your next premium payment. All retro group refunds are paid directly to the sponsoring organization. It is the responsibility of the sponsoring organization to distribute any refund to the group members. L&I does not regulate how refunds are distributed to group members. Employers that participate in retro are not required to share any of their retro refund with employees nor can they charge employees in the event of an additional assessment.

- We will send you a bill if you owe us additional premium.

Note: If you owe additional premium, it is due thirty days after we communicate the decision to you. We will charge penalties on any additional premium not paid when it is due (RCW 51.48.210). If you (employer in an individual plan or sponsoring organization of a retro group) are entitled to a refund for one coverage period and owe additional premiums for another coverage period, we will deduct the additional premiums due L&I from the refund. We will refund the difference to you. In the event that this adjustment still leaves a premium balance due, we will send you a bill for the balance. If an organization sponsors multiple retro groups and one group earns a refund and the other owes additional premium from a retro adjustment, we will deduct the additional premium from the refund due and issue a net refund to the organization for the difference or bill them for the remaining additional premium as applicable.

[Title 296 WAC—p. 297]

Note: You can find the basic premium ratios and loss conversion factors in WAC 296-17-90493 through 296-17-90497. Remember to use the preselected plan, maximum premium ratio and standard premium for the coverage period.

Maximum retrospective premium is calculated using the following formula:

Maximum premium ratio (mpr) x standard premium (sp)

Note: If the retrospective premium formula produces a value greater than the maximum retrospective premium, the retrospective premium is reduced to the maximum retrospective premium.

Minimum retrospective premium is calculated using the following formula:

Minimum premium ratio (mnpr) x standard premium (sp)

Note: The MnPR only applies to plans A1, A2, and A3. If the retrospective premium formula produces a value less than the minimum retrospective premium, the retrospective premium is increased to the minimum retrospective premium.

An employer enrolled in plan A as an individual or an organization sponsoring a group may elect to forego the protection of a maximum premium ratio (MPR).

Note: To forego the protection of the MPR, the financial conditions of the employer or sponsoring organization must be such that they could qualify as a self-insurer under the department's certification guidelines. The basic premium ratio will be .058 if the employer/group selects and qualifies for an unlimited maximum retrospective premium.

[Statutory Authority: RCW 51.18.010(1), 02-23-089, § 296-17-90446, filed 11/20/02, effective 1/1/03.]

WAC 296-17-90447 Adjustments to standard premiums after the last mandatory adjustment—Individual employer. Our responsibility:

If you are audited or your business is reclassified the result of which changes the amount of premium you paid during a coverage period that you participated in retrospective rating:

We will:

- Adjust your standard premium to conform to the audit or reclassification results.
- Use your recomputed standard premium to determine your retrospective premium and modify the audit results to reflect the recomputed standard premium.

Note: An audit or reclassification of your business can result in a change in refund or assessment.

- Notify you of the results of our decision to recompute your standard premium and the audit results.
- Refund the additional premium as applicable or send you a bill for additional premium based on the revised standard premium.

Note: If you owe additional premium, it is due thirty days after we communicate the decision to you. We will charge penalties on any additional premium not paid when it is due (RCW 51.48.210).

Your responsibility:

If you disagree with the revised refund or assessment:

You must:

- Protest or appeal the decision.

Note: Make sure you do this in writing within thirty days of the date we communicate the decision to you. If you fail to do so, our decision is final and binding on you. For any other disputes regarding an action concerning the retro program, you must notify L&I that you are disputing our action within sixty days of the time that you receive written notification of such action.

[Statutory Authority: RCW 51.18.010(1), 02-23-089, § 296-17-90447, filed 11/20/02, effective 1/1/03. Statutory Authority: RCW 51.18.010(2), 01-23-058, § 296-17-90447, filed 11/20/01, effective 1/1/02.]

WAC 296-17-90453 Disputes, protests and appeals.

Your responsibility:

If you disagree with L&I over an adjudicative or reserving issue:

You must:

- File a written protest or appeal within sixty days after you receive the decision you disagree with.
- File a written protest or appeal as applicable to the retro adjustment order and notice within thirty days after you receive this order. This will preserve your right to a relief if you prevail in your claim protest or appeal.

Note: We cannot provide relief in the computation of the retrospective premium even if your claim protest or appeal produces relief, unless you have also protested or appealed the retro refund/assessment notice and order.

- Send your protest to the address indicated in the order that you are protesting or appealing.

Note: Be sure that you file your protest or appeal within the time frame indicated in the order.

- Work cooperatively with L&I and the medical caregivers treating your injured employee(s) so that they can recover from the injury and return to work as soon as possible.

Our responsibility:

When we receive notification of your written protest or appeal:

We will:

- Monitor the protest or appeal for resolution.
- Recalculate the retrospective premium requirement if the relief you requested is granted and you preserved your rights by protesting the retro order and notice.
- Notify you in writing of our decision.

Your responsibility:

If you disagree with L&I over the open status of a claim:

You must:

- Notify us in writing immediately when you discover an open claim that you believe should be closed.

Note: Every month we will send you a report that details the claims activity related to your individual account if you are in an individual plan. If you discover a claim that you believe should have been closed and is not reflected as such on the report or you believe the information needed to close the claim is available to L&I, you should bring it to our attention immediately. For retro groups we will notify the sponsoring organization that a report is ready to download and the organization can download the report at their leisure. If you discover a claim that you believe should have been closed and is not reflected as such on the report or you believe the information needed to close the claim is available to L&I, you should bring it to our attention immediately. If an employer or sponsoring organization uses a third party administrator, it is the responsibility of the employer or sponsoring organization to forward the reports to the third party administrator. L&I does not distribute retro performance reports to any party other than the employer if an individual plan or organization that sponsors the retro group for group reports.

- Protest or appeal in writing as applicable and within the time specified in the retro adjustment order and notice the claim status you are in disagreement with to preserve your right to the relief you are seeking.

Note: Approximately one year after the coverage period has ended, we will notify you of the amount of refund or additional assessment. This notification will be in a legal document referred to as an "order and notice." You should

receive an adjustment report that details the status of each claim and their related cost prior to the order and notice.

- Send your written request for reconsideration to:
Labor and Industries
Attention: Retrospective Rating
P.O. Box 44180
Olympia, Washington 98504-4180.

Our responsibility:

Upon receipt of your request for reconsideration:

We will:

- Review the open status of the claims you specified in your inquiry, protest or appeal.
- Recalculate the retrospective premium requirement if we determine that all of the information necessary to close the claim was in the department's possession at the time of the valuation date.
- Notify you in writing of our decision.
- Provide you instructions on how to request reconsideration or appeal our decision.
- Refund the additional premium or reduce the assessment as applicable.

Your responsibility:

If you disagree with L&I's decision:

You must:

- Protest or appeal the assessment in writing within the time specified in the retro adjustment order and notice.
- Pay the amount in dispute, or provide a surety bond or an assignment of savings in lieu of the payment pending the outcome of the disagreement and by the due date indicated in the order.

Note: You cannot participate in the retrospective rating program unless you pay the assessment, provide a surety bond or assignment of savings. If you have paid the amount covered by the disagreement and it is resolved in your favor, we will refund this money. We will not pay interest on this money. If you owe additional premium, it is due thirty days after we communicate the decision to you. We will charge penalties on any additional premium not paid when it is due (RCW 51.48.210).

- Send your written protest or appeal to:
Labor and Industries
Attention: Retrospective Rating
P.O. Box 44180
Olympia, Washington 98504-4180.

Our responsibility:

Upon receipt of your protest:

We will:

- Review the issues outlined in your protest or appeal.
- Notify you in writing of our decision.

WAC 296-17-90484 Direct pay of medical bills—

Prohibited. Payment of medical services on behalf of state fund insured employers is the sole responsibility of labor and industries. Employers insured by the state fund are prohibited from paying a medical service provider directly for treatment of any work-related injury or illness sustained by one or more of their workers.

Our responsibility:

If we discover that you have paid a medical service provider directly for medical services related to an industrial injury or work related illness:

(2007 Ed.)

We will:

- Remove you from the retrospective rating program effective the date of our notification to you.

Note:

Any employer that has been removed because of this practice will be barred from ever participating in the retro program. If the employer was entitled to a retro refund for any coverage period, it will be forfeited. If an organization that sponsors a retro group participates in this activity or encourages members to pay a medical service provider directly for a work related injury or illness sustained by one or more of their workers, the organization will be barred from ever sponsoring a retro group and will forfeit all retro group refunds not yet distributed by L&I.

WAC 296-17-90490 Limitation of liability—Indemnification. With exception noted below, L&I disclaims any interest in any contracts executed between a sponsoring organization and their participating group members. L&I neither approves nor disapproves of any language contained therein and shall be held harmless for misrepresentation of fact(s) or errors of omission or commission stated in the terms of said contract. L&I is released and exempt from liability for any dispute or cause of action between a sponsoring organization and their participating group members or amongst participating group members arising under the contract.

Note:

A sponsoring organization cannot require a participating group member to reenroll in the group's future coverage period as a condition for receiving a refund in a past coverage period.

WAC 296-17-905 Dividends. Periodically, the department shall determine the total liability existing against the accident fund. If, after such determination, the department finds the accident fund, aside from the reserves deemed actuarially necessary according to recognized insurance principles, contains a surplus, the director, in his/her discretion may declare a dividend to be paid to, or credited to the accounts of, employers who were insured with the depart-

ment during all or part of the period for which the dividend is declared, according to a uniform formula to be promulgated by the department. Any dividends so declared shall give due consideration to the solvency of the accident fund, not be unfairly discriminatory, and not be promised in advance of such declaration. An employer in default when the dividend is declared shall not be eligible to receive payment as pro-

vided by this section but credit will be made towards reducing the employer's obligation to the department.

WAC 296-17-920 Assessment for supplemental pension fund. The amount of 33.4 mils (\$0.0334) shall be retained by each employer from the earnings of each worker for each hour or fraction thereof the worker is employed. The amount of money so retained from the employee shall be matched in an equal amount by each employer, except as otherwise provided in these rules, all such moneys shall be remitted to the department on or before the last day of January, April, July and October of each year for the preceding calendar quarter, provided self-insured employers shall remit to the department as provided under WAC 296-15-060. All such moneys shall be deposited in the supplemental pension fund.

WAC 296-17A-0101 Classification 0101.

0101-00 Land clearing: Highway, street and road construction, N.O.C.

Applies to contractors engaged in clearing right of ways for subsurface construction on a new or existing highway, street, or roadway project that is not covered by another classification (N.O.C.). The subsurface is the roadbed foundation consisting of dirt, sand, gravel and/or ballast which has been leveled and compressed. Unless the finished project is a compressed gravel road, the subsurface or sub base is constructed prior to any asphalt or concrete paving activities. Work contemplated by this classification involves the excavation of rocks and boulders, removal of tree stumps, clearing or scraping land of vegetation, grubbing, earth excavation, cut and fill work, and bringing the roadbed to grade. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as, but not limited to, shovels, scrapers, bulldozers, graders, rollers, and dump trucks.

This classification excludes asphalt surfacing or resurfacing on roadways which is to be reported separately in classification 0210; construction specialty services such as the installation of guardrails, lighting standards and striping which is to be reported separately in classification 0219; bridge or tunnel construction including the abutments and approaches which is to be reported separately in classifica-

tion 0201; felling of trees which is to be reported separately in the applicable logging classification; and logging road construction which is to be reported separately in classification 6902.

0101-01 Land clearing: Airport landing strips, runways and taxi ways; alleys and parking lots

Applies to contractors primarily engaged in clearing right of ways for subsurface construction on a new or existing airport landing strip, runway, and taxi way. This classification also includes clearing of right of ways for alley and parking lot projects. The subsurface is the foundation consisting of dirt, sand, gravel and/or ballast which has been leveled and compressed. Unless the finished project is compressed gravel, the subsurface or sub base is constructed prior to any asphalt or concrete paving activities. Work contemplated by this classification involves the excavation of rocks and boulders, removal of tree stumps, clearing or scraping land of vegetation, grubbing, earth excavation, cut and fill work, and bringing the roadbed or project site to grade. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as, but not limited to, shovels, scrapers, bulldozers, graders, rollers, and dump trucks.

This classification excludes asphalt surfacing or resurfacing on roadways which is to be reported separately in classification 0210; construction specialty services such as the installation of guardrails, lighting standards and striping which is to be reported separately in classification 0219; and felling of trees which is to be reported separately in the applicable logging classification.

0101-02 Excavation work, N.O.C.

Applies to contractors engaged in general excavation work for others that is not covered by another classification (N.O.C.). Work contemplated by this classification involves excavating or digging of earth to form the foundation hole such as for a wood-frame or nonwood-frame building and side sewer hookups (street to house) when performed as part of the excavation contract. Activities include, but are not limited to, excavation of rocks and boulders, removal of tree stumps, clearing or scraping land of vegetation, grubbing, piling or pushing of earth, earth excavation, cut and fill work, backfilling, etc. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as, but not limited to, shovels, scrapers, bulldozers, graders and dump trucks.

This classification excludes asphalt surfacing or resurfacing on roadways which is to be reported separately in classification 0210 and felling of trees which is to be reported separately in the applicable logging classification.

0101-03 Grading work, N.O.C.

Applies to contractors engaged in various forms of grading work for others that are not covered by another classification (N.O.C.). Typical equipment used is a grader, but other equipment such as a bulldozer and a front end loader may also be used. Work contemplated by this classification includes, but is not limited to, leveling and grading lands, spreading dirt, sand, gravel and/or ballast to desired contour on farm lands or other tracts of land.

0101-04 Land clearing, N.O.C.

Applies to contractors engaged in general land clearing work that is not covered by another classification (N.O.C.). This classification includes, but is not limited to, excavation of rocks and boulders, removal of tree stumps, clearing or scraping land of vegetation, grubbing, piling or pushing of earth to rearrange the terrain, earth excavation, cut and fill work, backfilling, and slope grooming. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as, but not limited to, shovels, scrapers, bulldozers, graders and dump trucks.

This classification excludes felling of trees which is to be reported separately in the applicable logging classification.

0101-16 Railroad line: Construction, maintenance and repair, N.O.C.

Applies to contractors engaged in the construction, maintenance and repair of railroad tracks not covered by another classification (N.O.C.), including the dismantling of track and the sale of salvaged track metal and ties. Work contemplated by this classification includes all operations on new or existing main lines, side tracks and spurs to industrial properties. This classification includes, but is not limited to, the laying of rock or ballast, laying of ties and track, installation of crossover frogs and switches, erection of switch stands and switch mechanism, erection of cattle guards, the placing of grade crossing planks, and similar activities related to the laying or relaying of railroad lines and also includes the dismantling of railroad main lines, side tracks and spurs to include track, ties, etc., and the subsequent storage and sale of salvaged material after the railroad line is dismantled.

This classification excludes asphalt surfacing/resurfacing and all concrete construction work which is to be reported separately in the applicable asphalt or concrete construction classification; logging railroad construction which is to be reported separately in classification 6902; and the construction, maintenance, or repair of an elevated railway which is to be reported separately in classification 0508.

0101-17 Retaining wall: Construction or repair when done in connection with road, street and highway construction, N.O.C.

Applies to contractors engaged in the construction or repair of retaining walls in connection with highway, street, or roadway projects that are not covered by another classification (N.O.C.). Retaining walls are often constructed to protect against potential problems such as earth slides or erosion of banks alongside a roadway or overpass. Work contemplated by this classification involves large scale excavation to contour a specific area of earth serving as a retaining wall. Activities include, but are not limited to, excavation, clearing, cut and fill work, backfilling, grading and slope grooming. Fill material used may include dirt, sand, stone or boulder. Equipment used by contractors subject to this classification includes, but is not limited to, scrapers, bulldozers, graders, backhoes and dump trucks.

This classification excludes asphalt surfacing or resurfacing on roadways which is to be reported separately in classification 0210; concrete construction which is to be reported separately in the applicable concrete construction classification; construction specialty services such as the installation of

guardrails, lighting standards and striping which is to be reported separately in classification 0219; bridge or tunnel construction including the abutments and approaches which is to be reported separately in classification 0201; felling of trees by chain saw which is to be reported separately in classification 5001; logging road construction which is to be reported separately in classification 6902; and tunnels and approaches including lining, cofferdam work, shaft sinking and well digging with caissons which is to be reported separately in classification 0201.

0101-36 Tree care and pruning services, N.O.C.

Applies to specialist contractors engaged in providing a variety of tree care services such as tree topping and tree pruning that are not covered by another classification (N.O.C.). Work contemplated by this classification generally takes place in residential areas, parking lots, business parks, shopping malls, or settings adjacent to nonforestry or timberland roadways. A primary purpose of this work is to remove tree or branch hazards from power lines, structures, or buildings. This classification includes, but is not limited to, incidental ground operations such as picking up branches and limbs, operating mobile chip machines used in connection with a tree care service, spraying or fumigating of trees, debris removal and stump removal when conducted by employees of an employer subject to this classification.

This classification excludes tree care services done in connection with an orchard operation which is to be reported separately in classification 4803 when performed by orchard employees; tree care services done in connection with a nursery operation which is to be reported separately in classification 4805; tree care services done in connection with a public or private forest or timberland which is to be reported separately in classification 5004; tree care services done in connection with a Christmas tree farm operation which is to be reported separately in classification 7307; and felling trees which is to be reported separately in classification 5001.

0101-37 Soil remediation

Applies to establishments engaged in various types of remediation of soil contaminated with hazardous or toxic materials. Soil remediation can take place at the site of the contamination, or the contaminated soil may be hauled to another area for remediation. This classification also includes oil spill cleanup on land. Equipment used will include backhoes and front end loaders, as well as other types of dirt moving equipment.

The methods used for soil remediation include, but are not limited to:

- Bio-remediation: Contaminated soil is mixed with nutrients, sawdust, and various other additives. Naturally occurring bacteria in the soil break down the pollutants.

- Encapsulation: Contaminated soil is enclosed in some type of protective material to prevent drainage into surrounding soil.

- Excavation and hauling to an approved disposal site.

- Hot air vapor extraction: A burner unit is mounted on a trailer. Contaminated soil is arranged in layers on which an aluminum perforated pipe system is placed at 2' intervals, with a return pipe on the top layer. The soil stack is enclosed in visqueen, then hot air is pumped into the piping system which creates the steam that is recycled through the system

and carries the contaminants back through the catalytic burner. Because of the catalytic action there are virtually no contaminants exhausted into the atmosphere.

- Soil vapor extraction: A series of holes are bored in the ground and vacuum pumps are used to suck the trapped gases which are drawn through carbon filters for decontamination.

- In situ vitrification: Graphite electrodes are fed into contaminated soil at a specified rate, where high voltage "melts" the organic and inorganic materials in the soil and forms a solid, glasslike substance.

- Land farming: Contaminated soil is deposited and spread out by a farm type spreader on an area of ground dedicated for this purpose. Chemical or manure fertilizer is added to provide a medium for naturally occurring bacteria to thrive. (This part is similar to bio-remediation.) The soil is turned frequently by tillers or rototillers to assist in the aeration of the soil and in the growth of the bacteria. It may take anywhere from a month to two years to cleanse the soil, depending on the volatility of the contaminants. This method is used particularly with soil that is heavily contaminated with oil.

- Mobile incineration: Contaminated soil is loaded onto a conveyor belt which carries it into the hopper of a mobile unit mounted on a lowboy trailer. The unit is heated to burn off the contaminants in the soil. The mobile unit contains a type of dust-collecting mechanism which filters out gases and other nondesirable elements so only clean air enters the atmosphere as the refreshed soil is produced. There are various methods of mobile incineration, but the general process and the end result are similar.

- Thermal disabsorption: A process similar to mobile incineration.

- Stabilization: Concrete landfill cells are created by mixing cement with refuse or other contaminated soil to stabilize the material and reduce the seepage into the surrounding soil.

This classification excludes oil spill cleanup involving diking or ditching work which is to be reported separately in classification 0201.

0101-39 Pool or pond excavation

Placement of pool or pond liners

Applies to contractors engaged in the excavation of pools or ponds. Work contemplated by this classification involves excavating or digging of earth to form the hole such as for a swimming pool or pond. Work contemplated by this classification includes excavation of rocks and boulders, removal of tree stumps, clearing or scraping land of vegetation, grubbing, piling or pushing of earth, earth excavation, cutting, filling or backfilling, etc. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as, but not limited to, shovels, bulldozers, backhoes and dump trucks. This classification includes the placement of plastic pool and pond liners provided it is not in connection with concrete work.

This classification excludes concrete construction which is to be reported separately in the applicable concrete construction classification.

0101-40 Mowing or chemical spraying of roadway median strips, roadsides, and/or power line right of ways

Applies to contractors engaged in mowing, grooming, picking up litter, and chemical spraying of roadway median strips and edges, roadsides, and power line right of ways. Work contemplated by this classification includes spraying chemicals to control weeds and unwanted vegetation, tall grass, brush, brambles and tree seedlings as part of a roadway, roadside or right of way maintenance contract. Equipment used by contractors subject to this classification includes, but is not limited to, a variety of equipment such as backhoes, tractors, push mowers, brush mowers, weed eaters, as well as hand tools such as machetes, sickles, and pruners.

This classification excludes mowing and/or grooming of roadway median strips, roadsides, and power line right of ways when performed by employees of cities, counties, state agencies, or other municipalities which is to be reported in the classification applicable to the type of municipality performing the work; forest, timber or range land contract work which is to be reported separately in the classification applicable to the work being performed; and the felling and removal of trees by chain saw which is to be reported separately in classification 5001.

Special note: Classification 0301, "landscape construction," and classification 0308, "landscape maintenance," are not to be assigned to mowing and/or grooming of roadway median strips, roadsides, and power line right of ways.

0101-41 Logging machine operators

This classification applies to employees of a logging company that does not qualify as a mechanized operation but operates equipment such as a feller buncher, processor, forwarder, skidder, log loader, or tower and who are in a protective cab. This classification also applies to firms who contract with logging firms to provide such equipment and operators to a logging site. The operator does not leave the cab to perform duties as part of the logging operation. Equipment used by employers subject to this classification are required to meet WISHA guidelines for roll over protection standards (ROPS) and falling object protection standards (FOPS).

This classification does not allow a division of an employee's work hours between this classification and any other classification during a work shift.

This classification excludes all logging activities being performed on the ground which are to be reported separately in classification 5001.

Special note: This classification does not apply to classification 5005 "logging and/or tree thinning - mechanical operations" whereby logging activities are performed exclusively by machine and no employees are on the ground.

WAC 296-17A-0103 Classification 0103.**0103-09 Drilling or blasting: N.O.C.**

Applies to contractors engaged in drilling operations for others not covered by another classification (N.O.C.). Work contemplated by this classification includes, but is not limited to, well drilling for oil, gas or water; exploratory well drilling; and drilling of holes in rock for shot holes. Such drilling generally contemplates the digging of a hole using a rotating or pounding type tool. Equipment used by drilling contractors includes earth auger drills, jackhammers, drilling rigs, and bits which will vary in size depending upon the terrain or material to be drilled and the depth and size of holes to be drilled. This classification also includes blasting operations not covered by another classification (such as the blasting of rock in connection with highway, street or road construction).

This classification excludes drilling operations performed in connection with concrete or building construction which is to be reported separately in the construction classification applicable for the work being performed; drilling done in connection with all types of underground or surface mining and quarry operations which is to be reported separately in the applicable mining classification; and blasting performed as part of building demolition which is to be reported separately in classification 0518.

0103-10 Geophysical exploration: Seismic detection of the mechanical properties of the earth

Applies to establishments engaged in geophysical exploration, by seismic detection, of the earth's subsurface. Work contemplated by this classification involves a seismograph work crew consisting of a party chief, a permit person, a surveyor, drillers, shooters, observers and a computer analyst. The seismic method utilizes a dynamite blast that simulates a miniature earthquake. The recorder of the vibrations is the sensitive earthquake detector which records the intense vibrations on a rapidly moving tape. The data collected from the tapes and photographic records are interpreted and a contour map of the rocks and their foundation to depths of several thousand feet is developed.

This classification excludes geophysical exploration without seismic detection which is to be reported separately in classification 1007.

WAC 296-17A-0104 Classification 0104.**0104-12 Dredging, N.O.C.**

Applies to contractors engaged in providing dredging services to others that are not covered by another classification (N.O.C.). Work contemplated by this classification includes cleaning, deepening or widening a body of water such as a harbor or other waterway. Scooping or suction machinery is generally employed in the dredging process to remove sand, clay, mud or other material from the body of water that is being dredged.

This classification excludes diving operations which are to be reported separately in classification 0202; underground mining operations which are to be reported separately in classification 1702; and dredging for the production of sand, gravel, or shale which is to be reported separately in classification 0112.

Special note: Dredging projects could occur on or adjacent to navigable waters (a harbor, river, canal) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform the work activities from a vessel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick or dredge, or type of pontoon which is a flat bottom boat or portable float. Workers who perform the work activities from the shoreline or from adjacent areas such as an existing dock or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Usually, dredging projects involve a variety of types of work crews such as those working from a floating derrick or dredge, a pontoon, a shoreline dredge, workers who are on shore distributing the discharged material, as well as the maintenance and repair of the dredge and equipment. Care should be exercised prior to assignment of this classification as the workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

WAC 296-17A-0105 Classification 0105.**0105-13 Fence erection or repair: N.O.C.; parking meter installation; and placement of wire mesh on slopes for slope protection**

Applies to contractors engaged in the erection and repair of all types of metal, wood, plastic, or vinyl fences not covered by another classification (N.O.C.). Work contemplated by this classification includes the use of a tractor with a propelled auger, or a mechanical or manual post hole digger. The poles or posts are set in the ground with small quantities of sand, gravel or concrete. Occasionally, a fence contractor

(2007 Ed.)

may pour a concrete footing around the perimeter of the fence to be constructed. Work of this nature, when done in connection with a fence construction project, is included within the scope of this classification. This classification also includes the installation or removal of entire parking meter units, and the placement of wire mesh on slopes for slope protection.

This classification excludes contractors engaged in the erection or repair of brick, masonry or stone fences or planters which are to be reported separately in classification 0302; erection or repair of concrete fences or planters which are to be reported separately in classification 0217; and service or repair of parking meters which is to be reported separately in classification 0606.

Special note: It is common for contractors subject to this classification to sell kennel kits, fence repair parts and fencing materials. Sales of fencing materials by a fence contractor are included in classification 0105. Classifications 2009, 6309 or similar store classifications are not to be assigned to a contracting business.

WAC 296-17A-0107 Classification 0107.**0107-00 Utility line construction: Underground, N.O.C.**

Applies to contractors engaged in underground utility line or cable construction that is not covered by another classification (N.O.C.). Work contemplated by this classification includes the installation and maintenance of underground television cable, power, and telephone line including main, extension, and outside service connection lines. Installation of these types of utilities usually occurs at a depth of 3' or less. This classification includes digging narrow trenches, laying pipe or conduit, laying line or cable, and filling or backfilling trenches. In some instances automatic equipment is used which in one operation opens the trench, lays the line and backfills. Equipment used by contractors subject to this classification includes backhoes, mechanical or manual trench diggers, automatic equipment and dump trucks.

This classification excludes land or road clearing and excavation which is to be reported separately in classification 0101; overhead television, power, or telephone lines including poles or towers which are to be reported separately in classification 0509 or the applicable utility company classification; asphalt surfacing/resurfacing which is to be reported separately in classification 0210 or 0212; concrete construction which is to be reported separately in the applicable concrete construction classification(s); and construction specialty services including the installation of guardrails, lighting standards and striping which is to be reported separately in classification 0219.

[Title 296 WAC—p. 317]

0107-01 Pipelaying, N.O.C.

Applies to contractors engaged in underground pipelaying or pipeline construction not covered by another classification (N.O.C.). Work contemplated by this classification includes the installation and maintenance of underground gas, oil or water main construction, and other pipelines such as those extending cross country. Installation of these types of pipes usually occurs at a depth of approximately 3'. This classification includes digging narrow trenches, laying pipe, making connections, and filling or backfilling trenches. This classification includes machinery and equipment such as backhoes, mechanical or manual trench diggers, and dump trucks.

This classification excludes land or road clearing and excavation which is to be reported separately in classification 0101; construction of sewer lines and drainage systems, canals, ditches, underground tanks generally occurring at a depth greater than 3' which are to be reported separately in classification 0108; asphalt surfacing/resurfacing which is to be reported separately in classification 0210 or 0212 as applicable; concrete construction which is to be reported separately in the applicable concrete construction classification(s); and construction specialty services such as the installation of guardrails, lighting standards and striping which is to be reported separately in classification 0219.

WAC 296-17A-0108 Classification 0108.**0108-00 Ditches and canals, N.O.C.**

Applies to contractors engaged in the construction of ditches and canals not covered by another classification (N.O.C.). A ditch or canal consists of a long trench dug in the ground that will remain uncovered to serve as an artificial waterway or artificially improved river such as for irrigation, drainage, or a boundary line. Work contemplated by this classification includes digging of main irrigation canals or drainage ditches and all laterals extending from the canal or ditch, installation of pipe, making connections as needed, and filling or backfilling as needed. Equipment used by contractors subject to this classification includes a variety of machinery and equipment such as power shovels, backhoes, bulldozers, dump trucks, and mechanical or hand tool trench diggers.

This classification excludes asphalt surfacing/resurfacing which is to be reported separately in classification 0210 or 0212, and concrete construction which is to be reported separately in the applicable concrete construction classification(s).

0108-01 Sewer construction; septic tank installation

Applies to contractors engaged in the construction or repair of new or existing sewer lines and systems. This includes, but is not limited to, sewers, cesspools, drainpools,

storm drains, and septic tanks including the drainfield construction. Work contemplated by this classification includes the installation and maintenance of all types of storm, sanitary or sewage lines and systems. Installation of these types of pipelines and systems occur entirely, or in part, at a depth greater than 3'. This classification includes such activities as excavation, trench digging, leveling trench with fill material such as sand or gravel, filling or backfilling, installation of force main type sewage work, the installation of storm sewer lines including the outfall construction of drain concrete boxes, catch basins, manholes, handling and laying of pipe (regardless of the size of pipe or depth below the ground), making connections, etc. Equipment used by contractors subject to this classification includes a variety of machinery and equipment such as power shovels, backhoes, bulldozers, dump trucks, and mechanical or manual trench diggers.

This classification excludes side sewer hookups (street to house) when performed by a plumbing contractor as part of a plumbing contract which is to be reported separately in classification 0306; and sewer pipe cleaning including services engaged in line cleaning and unplugging of waste lines which is to be reported separately in classification 0306.

0108-02 Tanks, N.O.C. - underground: Installation, repair, or removal

Applies to contractors engaged in the installation, repair or removal of underground tanks not covered by another classification (N.O.C.) such as those used to store gas or oil. Activities include excavating or digging of holes, placement or removal of tank, and filling or backfilling. This classification makes no distinction as to the size of tank being placed or removed. Usually, the actual lifting into or out of the ground occurs with the use of a power shovel, front end loader or backhoe. Equipment used by contractors subject to this classification includes a variety of earth moving equipment such as power shovels, front end loaders, backhoes, bulldozers, and dump trucks.

WAC 296-17A-0112 Classification 0112.**0112-00 Commercial production of sand, gravel, clay and stone products**

Applies to establishments engaged in the production of sand, gravel, clay and stone products. Material may be excavated in an open or surface type pit at the production site, or from a mine or quarry operation. Sand, gravel and stone is washed, crushed, sorted, graded and screened. Sand or gravel in its natural state usually requires only screening with the larger stones being removed. The larger stones are crushed and rescreened. Clay is screened and graded. Refined products are stored in bins, hoppers, piles or yards prior to delivery by truck or rail to customers. This classification includes

dealers who stockpile or store products in a yard type of environment prior to delivery to the customers when done in connection with the production of such products. Equipment includes, but is not limited to, scrapers, shovels, front end loaders, trucks, conveyors, jaw crushers, gyrators, roll crushers, and shaking tables.

This classification excludes establishments engaged in selling custom soil mixes, bark, decorative rock, sand, or gravel purchased from others which are to be reported separately in classification 1103.

Special note: Classifications 0112 and 1103 are not to be assigned to the same business unless all the conditions of the general reporting rule covering the operation of a secondary business have been met.

0112-01 Humus or peat digging

Applies to establishments engaged in the digging or stripping of humus or peat. Humus is a brown or black organic substance consisting of decayed vegetable matter that provides nutrients for plants and increases the water retention of soil. Peat is a partially carbonized vegetable matter found in bogs and used as fertilizer and fuel. Work contemplated by this classification involves stripping material from the surface or bogs with mechanical equipment such as, but not limited to, power shovels, scrapers, drag lines, clamshell diggers or cranes, and hydraulic dredges. The material is conveyed from the pit or bog to hoppers by trucks or belt conveyors. At times it is necessary to grade, screen and dry the material prior to storage or delivery to customers. This classification includes dealers who stockpile or store material in a yard type of environment prior to delivery to customers when done in connection with the digging or stripping of such products.

Special note: Classifications 0112 and 1103 are not to be assigned to the same business unless all of the conditions of the general reporting rule covering the operation of a secondary business have been met.

0112-02 Pit, crusher and bunker operations in connection with road, street and highway construction

Applies to establishments engaged in pit, crusher and bunker operations in connection with highway, street or roadway construction projects. Generally, this type of operation is located in close proximity to the project site and is only set up for the duration of the project. Work contemplated by this classification includes excavating open or surface pits, scraping or stripping the surface, crushing, and bunker (storage) of material. Products extracted from the pit or surface include boulders, stone, rock, gravel, aggregate, sand, dirt or clay. These products can be used directly without any further refinements or could be washed, sorted, crushed and/or screened. Products are stored in bunkers or piles until needed. These products are used in a variety of ways as part of the roadway project such as, but not limited to, making preliminary roads into an area, filling in low or uneven areas, use as natural barriers, and bringing the roadbed and surrounding areas to grade. Equipment includes, but is not limited to, power shovels, scrapers, bulldozers, front end loaders and other earth moving equipment, trucks, conveyors, jaw crushers, gyrators, roll crushers, shaking tables, etc.

Special note: This classification excludes contractors that maintain a temporary pit, crusher or bunker operation when performed by a contractor engaged in additional phases

(2007 Ed.)

of the same road, street or highway construction project which is to be reported separately in classification 0101.

0112-03 Sand, gravel, or shale: Digging, N.O.C.

Applies to establishments engaged in the digging or dredging of sand, gravel or shale that is not covered by another classification (N.O.C.). The material is excavated from surface pits with mechanical equipment such as power shovels, drag lines, clamshell diggers or cranes, or obtained from nonnavigable waters by means of hydraulic dredges, clamshell dredges, etc. The material is conveyed from the bank, pit or dredge to hoppers by trucks, belt conveyors, narrow gauge railroads or pipelines. It is then washed, graded, screened and stored in bins, hoppers, or piles prior to delivery by truck or rail to customers. Sand or gravel in its natural state usually requires only screening with the larger stones being removed. In some instances, the larger stones may be crushed and rescreened which is included in this classification. This classification includes dealers who stockpile or store material in a yard type of environment prior to delivery to customers when done in connection with the digging or stripping of such products.

This classification excludes underground mining operations which are to be reported separately in classification 1702.

Special note: Classifications 0112 and 1103 are not to be assigned to the same account unless all the conditions of the general reporting rule covering the operation of a secondary business have been met.

WAC 296-17A-0201 Classification 0201.

0201-01 Bridge, trestle, overhead crossing and viaduct: Construction, maintenance and repair

Applies to contractors engaged in the construction, maintenance or repair of bridges, trestles, overhead crossings and viaducts including the foundations and approaches. These types of structures provide a series of spans or arches, or a type of vertical and horizontal framework for a road or railroad passage over an obstacle such as a waterway, wide valley, other roads, or railroads. Work contemplated by this classification includes the construction of approaches, abutments, foundation supports, framework, and includes all concrete, iron or steel, timber, or carpentry work to completion of the project. The approach is the area of ground or roadway built up just before entering onto a structure such as a bridge or trestle. The abutments are the reinforced foundation supports at the end of the approach which will bear much of the weight for the structure. The erection of the structure usually begins at both ends of the approaches and abutments and gradually continues toward the center of the structure. This classification includes activities such as, but not limited to, the placement and securing of piles, beams and members by way of boom or crane, forming columns, piers and supports, tying reinforcing steel, set-up and tear down of forms, pouring and finishing of concrete, installing precast deck supports, decking slabs and nonstructural members, constructing the retaining walls, erecting iron railings, and the installation

[Title 296 WAC—p. 319]

of suspension cables and cable clamps. This classification also includes shaft sinking, pile driving, caisson and cofferdam work as it is considered an integral part of the structure's foundation and support.

This classification excludes asphalt surfacing/resurfacing on roadways which is to be reported separately in classification 0210 and concrete paving which is to be reported separately in classification 0214.

Special note: Care should be exercised prior to assignment of this classification as the workers could be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act. A detailed description of these acts can be found in classifications 0104 or 0202.

0201-04 Breakwater, jetty, levee: Construction, maintenance and repair

Applies to contractors engaged in the construction, maintenance or repair of a jetty, levee or breakwater. These types of barriers or embankments are very similar to a dike, but involve substantially more construction in that they usually begin away from the water and extend into a body of water and are sometimes used as protection for a harbor to prevent adverse currents from interfering with shipping. Work contemplated by this classification involves building, protecting and/or filling in an embankment or barrier of a river, harbor or other body of water. The predominant activity involves earth moving or placing of fill or other material. This classification includes, but is not limited to, clearing of land, excavation, filling, and grading and involves earth moving equipment such as, but not limited to, drag lines, graders, scrapers, bulldozers, and dump trucks. Materials include, but are not limited to, dirt, sand, stones or boulders, concrete piles, timber or heavy timber cribbing filled with stones or boulders. Often, the barrier or embankment being built is seeded or paved in part with asphalt, concrete, soil, or cement to assist in strengthening the structure.

This classification excludes pile driving operations in connection with jetty, levee and breakwater operations which are to be reported separately in classification 0202, and asphalt surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed.

Special note: Care should be exercised prior to assignment of this classification as the workers could be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act. A detailed description of these acts can be found in classifications 0104 or 0202.

0201-05 Bulkhead retaining walls: Construction, maintenance and repair, riprapping - all water hazard

Applies to contractors engaged in the construction, maintenance or repair of a bulkhead. A bulkhead is a wall or embankment constructed to protect against potential problems such as earth slides, erosion of banks alongside water, or excessive increases in the water level. Work contemplated by this classification involves building, protecting and/or filling in a wall or embankment of a river, harbor or other body of water, or other areas of land. The predominant activity involves earth moving or placing of fill or other material. This classification includes, but is not limited to, clearing of land, excavation, filling, and grading. Equipment used by contractors subject to this classification includes, but is not

limited to, drag lines, graders, scrapers, bulldozers, and dump trucks. Materials include, but are not limited to, dirt, sand, stones, boulders, concrete piles, timber or heavy timber cribbing filled with stones or boulders. Often, the wall or embankment being built, or if it already exists, is seeded or paved in part with asphalt, concrete, cement, or soil to assist in strengthening the structure. This classification includes riprapping work which is a loose assemblage of broken stones erected in water or on soft ground. Such stone serves as a fill-in material to assist with the building of a dike, levee, or bulkhead.

This classification excludes pile driving operations in connection with bulkhead construction operations which is to be reported separately in classification 0202, and asphalt surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed.

Special note: Care should be exercised prior to assignment of this classification as the workers could be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act. A detailed description of these acts can be found in classifications 0104 or 0202.

0201-06 Concrete culverts; aluminum, steel, or other types of culverts over 12 feet

Applies to contractors engaged in the construction or placement of concrete culverts or other types of culverts greater than twelve feet in diameter. A culvert is a sewer or drain running under a road, embankment, or structure such as a bridge. Culverts can be made of material such as, but not limited to, concrete, aluminum, and galvanized steel. Their primary purpose is to channel excess water away from the road, embankment, or structure to assist in preventing water damage or flooding. Work contemplated by this classification includes excavation, laying of sand or gravel, placement of culverts, and filling in the site.

0201-08 Tunnels and approaches

Applies to contractors engaged in the construction of tunnels and approaches including the lining, cofferdam work, shaft sinking, and well digging with caissons. A tunnel is a passage through or under a barrier to be used as a roadway, railway or pedestrian walkway. The approach is the area of ground built up before the entrance of a tunnel or similar type of structure. Work contemplated by this classification includes, but is not limited to, the construction of approaches, shaft sinking, caisson and cofferdam work, boring, the framework or lining, and all concrete, iron or steel, timber, and carpentry work to completion of the project. In some instances, the initial phase of a tunnel project may require that the approaches and abutments be put in place. This may involve extensive excavation and fill work depending on how uneven the terrain is with the proposed tunnel entrances. The abutments are the reinforced foundation supports at the end of the approach and will bear much of the weight at the tunnel entrances. Most often, the abutments will consist of metal beams or concrete with reinforced steel, that are placed vertically, horizontally or at an angle into the ground. The boring of the tunnel may include the removal of earth, rock and water with mechanical equipment, drilling and boring machines, rock drills and chippers, explosives, well drilling with caissons, and the need for pumps and drains piped to the outside of the bore. Occasionally, a cofferdam is erected

which is a temporary structure from which water can be pumped or sucked to provide a dry work area during construction of the structure. Once the structural support is complete, the cofferdam is taken apart and removed. As the bore progresses steel I-beams are placed and horizontal beams or solid bar stock are bolted or welded for support. Shielding the bore between the I-beams requires bolting or welding steel plates to the beams. This is followed by filling the gaps between the face of the bore and the shielding with sand or concrete grout. Some tunnels will then be lined with concrete, steel or tile, and lighting, ventilation and drains may be installed.

This classification excludes underground mining operations which are to be reported separately in classification 1702, and asphalt surfacing/resurfacing or concrete paving which is to be reported separately in the classification applicable to the work being performed.

0201-09 Diking, N.O.C.

Applies to contractors engaged in the construction of dikes not covered by another classification (N.O.C.). A dike is a type of protective barrier or embankment which keeps a body of water such as a river in its proper channel and prevents the erosion of banks. Work contemplated by this classification involves building up and/or protecting the embankment. This classification includes, but is not limited to, earth moving work, assemblage of loose stone or rock, placement of sandbags or concrete piles, fill dirt or broken pieces of concrete, or building of crib work which may be filled in with stone or other types of fill. This classification also applies to diking or ditching work in connection with oil spill clean-up such as alongside a river bank or other shoreline.

This classification excludes pile driving operations which are to be reported separately in classification 0202.

Special note: Care should be exercised prior to assignment of this classification as the workers could be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act. A detailed description of these acts can be found in classifications 0104 or 0202.

WAC 296-17A-0202 Classification 0202.

0202-02 Pile driving - wood or concrete piling construction

Applies to contractors engaged in pile driving and piling construction. Pile driving involves long sturdy posts or columns of timber, steel, or concrete being driven into the earth as a foundation or support for a structure such as a building, pier or wharf. This type of activity usually occurs when a portion of the structure is going to be under water, in mud, at a site where the ground is soft or unstable, or when the structure is expected to be of extraordinary weight. Work contemplated by this classification includes driving wood or steel beams, driving concrete columns, shaft sinking or caisson work, stacking of concrete piles, erection of a cofferdam, and includes all cross beaming, decking, and similar carpentry

(2007 Ed.)

incidental to, and connected with, pile driving operations as part of the foundation construction project. Shaft sinking is removal of earth from a hole with a relatively small diameter and usually at a considerable depth. The cofferdam is a temporary structure from which water can be pumped or sucked to provide a dry work area during construction of the foundation or substructure. Once the foundation support is complete, the cofferdam is taken apart and removed.

This classification excludes diving operations or activities which are to be reported separately in classification 0202-04.

Special note: Pile driving projects could occur on or adjacent to navigable waters (harbors, rivers, canals) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform the work activities from on board a vessel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick, pile driver or dredge, a barge, or a pontoon (which is a flat bottom boat) or portable float. Workers who perform the work activities from the shoreline or from adjacent areas such as an existing dock, pier, or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Usually, pile driving projects involve a variety of types of work crews such as those working from a floating derrick or pile driver, a barge, a pontoon, a shoreline pile crew, workers inside the cofferdam, as well as the maintenance and repair of the construction material or equipment. Care should be exercised prior to assignment of this classification as the workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

0202-03 Wharf, pier, dock and marine railway: Construction, maintenance and repair

Applies to contractors engaged in the construction, maintenance or repair of piers, wharves, docks and marine railways. A pier or wharf is a platform extending from a shore over water and supported by piles or pillars. A dock is the area between two piers or alongside a pier or wharf. These types of platforms are for vessels to tie up and provide an area for loading, unloading, or repairing vessels. Most often, the construction of such platforms will include the foundation or substructure being under water or mud, and the remainder of the platform being exposed above the water or mud. Work contemplated by this classification includes, but is not limited to, construction of the foundation or substructure which consists of shaft sinking, pile driving, stacking of piles and/or erection of a cofferdam, and includes all concrete, steel or carpentry work after the foundation or substructure is built to completion of the project. Shaft sinking involves the removal of earth from a hole with a relatively small diameter and usually at a considerable depth. Pile driving involves long sturdy posts or columns of timber, steel, or concrete being driven into the earth as a foundation or support for the structure. The cofferdam is a temporary structure from which water can be

pumped or sucked to provide a dry work area during construction of the foundation or substructure. Once the foundation support is complete, the cofferdam is taken apart and removed. This classification also includes caisson work as part of the construction for the foundation or substructure support.

This classification excludes diving operations or activities which are to be reported separately in classification 0202-04.

Special note: The construction of piers, wharves, docks and marine railways could occur on or adjacent to navigable waters (harbors, rivers, canals) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform the work activities from on board a vessel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick, floating barge, a pontoon (which is a flat bottom boat) or portable float. Workers who perform the work activities from the shoreline or from adjacent areas such as an existing dock, pier, or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Usually, these types of projects involve a variety of work crews such as those working from a floating derrick or barge, a pontoon, a shoreline pile crew, workers inside the cofferdam, as well as the maintenance and repair of the construction material or equipment. Care should be exercised prior to assignment of this classification as the workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

0202-04 Diving operations and subaqueous work, N.O.C.

Applies to establishments engaged in diving operations not covered by another classification (N.O.C.). Diving operations such as underwater diving, skin diving or scuba diving are performed in numerous types of uncontrolled environments such as the ocean, harbors, bays, dams, lakes, as well as controlled environments such as swimming pools or aquarium tanks. Work contemplated by this classification includes, but is not limited to, marine salvage and wreckage, underwater mining and sweeping, underwater construction or demolition, installation, repair and/or inspection of wharves, piers, and docks, inspection of ships, barges, and other vessels, subaqueous harvesting of geoduck, sea cucumbers, or similar marine life, underwater exploration, as well as diving instruction. Classification 0202 includes all diving activities with the following exception: Diving instructors who provide instructional lessons in a controlled environment such as a swimming pool may be reported separately in classification 6209 provided accurate time records are maintained for the instructional lesson hours. Failure to maintain accurate time records will result in the hours in question being assigned to classification 0202 without a division of hours between the two classifications.

Special note: Many diving operations and activities occur on or adjacent to navigable waters (a harbor, river, canal, dam, lake) which is defined as those which form a continuous highway for interstate or international commerce. Workers who perform diving activities (to include divers, deck hands, or "diving tenders" who are support personnel such as line handlers and pump persons) from on board a vessel could be subject to the Admiralty Law which recognizes such work crews and workers as a master or member of a vessel, and subject to federal law known as the Jones Act. Every person on board a vessel is deemed a seaman if connected with the operation while on navigable water. The term vessel has been interpreted by the courts to include any type of man-made floating object such as a floating derrick or dredge, a boat or ship, a barge, or type of pontoon (which is a flat bottom boat) or portable float. Workers who perform diving activities (to include divers, deck hands, or "diving tenders" who are support personnel such as line handlers and pump persons) from the shoreline or from adjacent areas such as an existing dock, pier or bridge may or may not be subject to federal law covered under the U.S. Longshore and Harbor Workers Act. Care should be exercised prior to assignment of this classification as the workers could be subject to either or both of these acts. The criteria used in determining federal law and coverage is based on the most current federal court decisions and case law.

WAC 296-17A-0210 Classification 0210.

0210-00 Asphalt paving or surfacing: Highway, street or roadway

Applies to contractors engaged in forms of asphalt paving or surfacing, resurfacing, scraping, sawing, cutting or patching operations performed on or in connection with new or existing highway, street, or roadway projects including approaches and bridges. The process begins after the roadbed or roadside grade has already been established and the sub-surface or sub base has been prepared. Work contemplated by this classification is limited to laying crushed stone, placement of expansion joints, application of oil or other adhesive bonding materials, and the surface spreading and rolling of crushed aggregate. Equipment used by a contractor subject to this classification includes, but is not limited to, scrapers, graders, rollers, paving machinery, oil trucks and dump trucks.

This classification excludes preliminary roadbed or roadside construction such as clearing of right of ways, establishing grades, subsurfaces or sub bases which is to be reported separately in classification 0101; asphalt surfacing/resurfacing not in connection with highway, street or roadway projects which is to be reported separately in classification 0212; construction specialty services such as the installation of guardrails, lighting standards and striping

which is to be reported separately in classification 0219; and concrete construction which is to be reported separately in the classification applicable to the work being performed.

WAC 296-17A-0212 Classification 0212.

0212-00 Asphalt paving or surfacing, N.O.C.

Applies to contractors engaged in asphalt paving or surfacing not in connection with highway, street, or roadway projects not covered by another classification (N.O.C.). This classification covers all forms of asphalt paving or surfacing, resurfacing, scraping, sawing, cutting or patching operations not in connection with highway, street, or roadway projects such as, but not limited to, parking lots, airport runways and landing strips, driveways, walking paths, bicycle trails, tennis courts, playgrounds, and golf cart paths. The process begins after the land grade has already been established and the subsurface or sub base has been prepared. Work contemplated by this classification includes the laying of crushed stone, placement of expansion joints, application of oil or other adhesive bonding materials, and the surface spreading and rolling of crushed aggregate. Equipment used by a contractor subject to this classification includes, but is not limited to, scrapers, graders, rollers, paving machinery, oil trucks and dump trucks. This classification also applies to the application of various types of cushion surfaces for playgrounds.

This classification excludes the preliminary clearing of land, establishing grades, subsurfaces or sub bases which are to be reported separately in classification 0101; asphalt surfacing/resurfacing in connection with highway, street, or roadway projects which is to be reported separately in classification 0210; application of asphalt sealant to roadways and parking lots which is to be reported separately in classification 0219; application of asphalt sealant to driveways which is to be reported separately in classification 0504-06; construction specialty services such as the installation of guardrails, lighting standards and striping which are to be reported separately in classification 0219; and concrete construction which is to be reported separately in the classification applicable to the work being performed.

WAC 296-17A-0214 Classification 0214.

0214-00 Concrete paving and repaving: Highways, streets or roadways

Applies to contractors engaged in concrete paving and repaving of highways, streets, or roadways including approaches and bridges. This classification covers all forms of concrete paving, repaving, scraping, sawing, drilling or cutting operations in connection with a highway, street or roadway project, including the construction of curbs, gutters, sidewalks, median walls and retaining walls when performed as part of the roadway paving or repaving project. The process begins after the roadbed or roadside grade has already

been established and the subsurface or sub base has been prepared. Work contemplated by this classification includes the laying of crushed stone, placement of reinforcing steel or expansion joints, grading or rolling stone base, set-up and tear down of forms, pouring, and finishing of concrete. Equipment used by a contractor subject to this classification includes, but is not limited to, scrapers, graders, rollers, paving machinery, water trucks and dump trucks.

This classification excludes preliminary roadbed or roadside construction such as clearing right of ways, establishing grades, subsurfaces or sub bases which are to be reported separately in classification 0101; asphalt paving, surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed; concrete flatwork not in connection with highway, street, or roadway projects which is to be reported separately in classification 0217; and construction specialty services such as the installation of guardrails, lighting standards and striping which are to be reported separately in classification 0219.

0214-01 Concrete curbs, gutters, and sidewalks: Construction and repair in connection with highways, streets or roadways

Applies to contractors engaged in the construction or repair of concrete curbs, gutters, and sidewalks in connection with highways, streets, or roadways including approaches and bridges. The process begins after the roadbed or roadside grade has already been established and the subsurface or sub base has been prepared. Work contemplated by this classification includes the set-up and tear down of forms, placement of reinforcing steel or expansion joints, and the pouring and finishing of concrete.

This classification excludes preliminary roadbed or roadside construction such as clearing right of ways, establishing grades, subsurfaces or sub bases which are to be reported separately in classification 0101; asphalt paving, surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed; concrete flatwork not in connection with highway, street, or roadway projects which is to be reported separately in classification 0217; and construction specialty services such as the installation of guardrails, lighting standards and striping which are to be reported separately in classification 0219.

0214-02 Concrete median walls and retaining walls: Construction and repair in connection with highways, streets or roadways

Applies to contractors engaged in the construction or repair of concrete median (divider) walls and retaining walls in connection with highway, street, or roadway projects including approaches and overpasses. The process begins after the roadbed or roadside grade has already been established and the subsurface or sub base has been prepared. Work contemplated by this classification includes the set-up and tear down of forms, placement of reinforcing steel or expansion joints, and the pouring and finishing of concrete to form median or divider walls, median strips, or retaining walls alongside the roadway.

This classification excludes the preliminary land excavation of a retaining wall area, as well as roadbed or roadside construction such as clearing right of ways, establishing grades, subsurfaces or sub bases which are to be reported sep-

arately in classification 0101; asphalt paving, surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed; concrete flatwork not in connection with highway, street, or roadway projects which is to be reported separately in classification 0217; and construction specialty services such as the installation of guardrails, lighting standards and striping which are to be reported separately in classification 0219.

0214-03 Concrete sawing, drilling, and cutting: In connection with highways, streets or roadways

Applies to contractors engaged in concrete sawing, drilling and cutting in connection with concrete highway, street, or roadway projects including concrete curbs, gutters, sidewalks, median walls and retaining walls. These activities occur on new or existing roadway and related projects such as, but not limited to, the sawing, cutting and drilling for manholes, drainage grates, poles or posts, exposing underground utility lines and systems, and repairing defective areas.

This classification excludes preliminary roadbed or roadside construction such as clearing right of ways, establishing grades, subsurfaces or sub bases which is to be reported separately in classification 0101; asphalt paving, or surfacing/resurfacing which is to be reported separately in the classification applicable to the work being performed; concrete flatwork not in connection with highway, street, or roadway projects which is to be reported separately in classification 0217; and construction specialty services such as the installation of guardrails, lighting standards and striping which are to be reported separately in classification 0219.

WAC 296-17A-0217 Classification 0217.

0217-00 Concrete flatwork - construction and/or repair: N.O.C.

Applies to contractors engaged in the construction and/or repair of concrete flatwork not covered by another classification (N.O.C.) such as, but not limited to, walkways, pathways, fences, and curbing. Work in this classification includes the set-up and tear down of forms, placement of reinforcing steel and wire mesh, and the pouring and finishing of concrete.

This classification excludes land clearing and excavation which is to be reported separately in classification 0101; concrete work performed on or in connection with highway, street, or roadway projects including sidewalks, curbs, gutters, median or retaining walls, sawing, drilling, or cutting operations which is to be reported separately in classification 0214; and concrete work contained within a concrete, masonry, iron or steel frame building or structure such as the foundation, floor slabs, precast or poured in place bearing floors or wall panels, columns, pillars, metal erection or any other portion of the building or structure itself which is to be reported separately in classification 0518.

[Title 296 WAC—p. 324]

0217-01 Concrete foundation and flatwork construction and repair: Wood structural buildings

Applies to contractors engaged in the construction and/or repair of concrete foundation and flatwork for wood structural buildings not to exceed three stories in height. This classification includes the set-up and tear down of forms, placement of reinforcing steel and wire mesh, pouring, and finishing of concrete footings, stem walls, floor pads, cellar or basement floors, garage floors, swimming pools and ponds. This includes incidental concrete work such as walkways or driveways when performed by a foundation contractor.

This classification excludes land clearing and excavation which is to be reported separately in classification 0101; concrete work performed on or in connection with highway, street, or roadway projects including sidewalks, curbs, gutters, median or retaining walls, sawing, drilling, or cutting operations as part of the roadway which is to be reported separately in classification 0214; and concrete work contained within a concrete, masonry, iron or steel frame building or structure such as the foundation, floor slabs, precast or poured in place bearing floors or wall panels, columns, pillars, metal erection or any other portion of the building or structure itself which is to be reported separately in classification 0518.

0217-02 Concrete sawing, drilling and cutting, N.O.C.

Applies to contractors engaged in concrete sawing, drilling and cutting not covered by another classification (N.O.C.), including repairs. Work contemplated by this classification includes concrete sawing, drilling and cutting operations in connection with wood frame and nonwood frame buildings or structures, including flatwork such as, but not limited to, foundations, walkways, driveways, patios and swimming pools which may or may not be part of the building or structure. Activities include, but are not limited to, the sawing, cutting and drilling for ventilation boxes in the footings or stem walls, cut outs for windows or door ways, preparation to mount brackets for stairways or interior bearing walls, cutting interior walls as part of a building renovation project, cut outs for electrical and switch boxes, and repairing defective areas.

This classification excludes concrete sawing, drilling, and cutting operations performed on or in connection with highway, street, or roadway projects including sidewalks, curbs, gutters, median or retaining walls as part of roadways which are to be reported separately in classification 0214; bridge construction which is to be reported separately in classification 0201; and new dam construction which is to be reported separately in classification 0701.

WAC 296-17A-0219 Classification 0219.

0219-00 Construction specialty services, N.O.C.

Applies to contractors engaged in the installation or removal of highway, street, or roadway lighting, signs, guardrails, roadside reflectors, lane buttons or turtles, or lane markers not covered by another classification (N.O.C.). Us-

(2007 Ed.)

ally, these activities occur as finishing touches after new or existing roadways are paved or surfaced. Roadway lighting includes traffic signal lights, and halogen or mercury vapor lights mounted to metal standards erected alongside the roadway. Signs (such as speed limit, road condition, city and town mile destination) are mounted on overpasses or on wood or metal poles erected alongside the roadway. Guardrails include metal barriers mounted on wood or metal poles driven into the roadside shoulder. Lane markers, lane buttons or turtles consist of small reflectors, or chips of plastic or concrete attached to the road with an adhesive bonding material. This classification includes the related hook-up of power to the light standard.

This classification excludes the installation of power lines that feed into power poles which is to be reported separately in the applicable construction classification for the work being performed.

Special note: This classification excludes exterior sign erection, repair, or removal not in connection with displaying highway, street, or roadway information or conditions even though such signs may be erected or placed alongside roadways (such as advertisement bill boards, business, or personal property signs) which is to be reported separately in classification 0403.

0219-01 Construction specialty services

Applies to contractors engaged in specialty services such as the painting or striping of highways, streets, roadways, or parking lots not covered by another classification (N.O.C.). This classification includes painting, striping, numbering, or lettering highways, streets, roadways, parking lots, parking garages, airport runways, taxi ways, curbs, roadway dividers or median strips, and special traffic areas such as fire, bus, handicap, and no parking zones. The paint or other material used for these markings is usually applied to the surface using a mechanical device, either self-propelled or towed by a truck or other motor vehicle. In some instances, the paint will be applied manually with brush or roller which is included in this classification. This classification includes the application of asphalt sealants to roadways or parking lots. This classification also includes concrete barrier installation, in connection with road construction, by a concrete barrier rental business or by a flagging contractor who also supplies the concrete barriers. This includes the flaggers who are necessary during the installation of the barriers as well as any flaggers the company supplies to the road construction project itself.

This classification excludes the interior painting of buildings which is to be reported separately in classification 0521, the exterior painting of buildings or structures which is to be reported separately in classification 0504; application of asphalt sealant to driveways which is to be reported separately in classification 0504-06; the rental of the concrete barriers and other flagging equipment which is to be reported separately in classification 6409; and flaggers who are not employed by a concrete barrier rental business or by a flagging contractor who also supplies the concrete barriers which are to be reported separately in classification 7116 or 7118 as appropriate.

WAC 296-17A-0301 Classification 0301.

0301-04 Lawn type sprinkler systems: Installation, service or repair

Applies to contractors engaged in the installation, service or repair of lawn type sprinkler systems. This type of activity is performed by landscaping contractors, plumbing contractors, and irrigation specialist contractors. Generally, lawn type sprinkler systems are installed at private residences or commercial businesses. The process involves identifying the area of land to be covered to determine the size and amount of pipe and sprinkler heads needed for the job. The installation involves cutting a trench in the ground (12" to 18" deep and wide enough to accommodate the pipe) with a vibrating plow or pipe pulling machine. Next, pipe is laid in the trench, glued, or otherwise joined, heads and canisters are installed, and the timer is hooked up. The system is checked for leaks, needed adjustments are made, and the pipe and heads are buried.

This classification excludes open canal type irrigation systems which are to be reported separately in classification 0108; the installation, service or repair of above or below ground agricultural/irrigation systems which is to be reported separately in classification 0301-06; and maintenance and cleaning of lawn sprinkler system pipes and heads done in connection with a landscape maintenance contract which is to be reported separately in classification 0308.

0301-06 Agricultural sprinkler/irrigation systems, N.O.C.: Installation, service or repair

Applies to contractors engaged in the installation, service or repair of above or below ground agricultural sprinkler and irrigation systems not covered by another classification (N.O.C.). The more common types of systems include below ground, fixed or movable, and wheel or impulse. Generally, these types differ from lawn sprinkler systems in that the size of pipes and pumps installed are much larger to produce the water pressure needed to irrigate large areas of land. Installation of below ground systems involves the use of trenching equipment to dig trenches, which are usually more than two feet deep to lay pipe. The above ground systems are laid out and assembled based on the need of the land area.

This classification excludes open canal type irrigation systems which are to be reported separately in classification 0108, and the installation, service or repair of lawn type sprinkler systems which is to be reported separately in classification 0301-04.

0301-08 Landscape construction operations, N.O.C.

Applies to landscape contractors engaged in new landscape construction or renovation projects not covered by another classification (N.O.C.). This classification also applies to specialist contractors engaged in the installation of invisible fences which are usually used to confine animals within a given area. Landscape construction work contemplated by this classification includes producing a preliminary drawing of the landscape or renovation project, preparing the ground (which may include tilling and spreading top soils or custom mix soils), installing sprinkler systems, planting trees, plants or shrubs, planting or replanting grass from seed or sod, installing ground cover material or plastic to retard weeds, placement of concrete borders, and the incidental con-

struction of rockery, fences, ponds, paths, walkways, arbors, trellis and gazebos when performed by employees of a landscape contractor as part of a landscape contract. Such activities conducted separately from a landscape contract and not part of the landscape project are to be reported separately in the classification applicable to the work being performed. Equipment used by contractors subject to this classification includes, but is not limited to, tractors with till attachments, small front end loaders, trenchers, mowers, fertilizer spreaders, wheelbarrows, and electric power tools.

Invisible fence construction work contemplated by this classification includes identifying the land area to be fenced, sketching a preliminary drawing, burying the wire in a narrow trench (about 1" wide by 2" to 6" deep) that has been dug along the field perimeter (or just securing the wire onto the ground around the perimeter), and connecting end of wire to a low voltage transmitter box (usually about the size of a hand-held calculator) that plugs into a 110 volt electrical outlet. This classification includes training sessions for the animal and related maintenance and repair at the customer's location. Equipment used to install invisible fences includes, but is not limited to, rakes or other hand tools, and small trench diggers.

This classification excludes all grading, clearing, or contouring of land which is to be reported separately in classification 0101; bulkheads not adjacent to water, or similar structures built of rock, which are to be reported separately in classification 0302; and lawn care maintenance or chemical spraying or fumigating which is to be reported separately in classification 0308.

WAC 296-17A-0302 Classification 0302.

0302-01 Brick, block, rock and slate work, N.O.C.

Applies to contractors engaged in interior or exterior brick, block, rock and slate work not covered by another classification (N.O.C.). Included in this classification are projects related to sidewalks, walkways, driveways, patios, steps, pads for wood stoves, flower or planting boxes, fences, inlay for fireplaces, countertops, buffets, full or partial interior or exterior walls, and includes the construction of entire buildings or structures with brick, block or rock products. Work contemplated by this classification includes, but is not limited to, laying and cutting and/or polishing brick, block, rock, slate, marble, granite, and adhering with mortar or tuck pointing (filling and/or finishing brickwork or stonework joints with cement or mortar).

This classification excludes plastering, stuccoing or lathing work which is to be reported separately in classification 0303; tile setting which is to be reported separately in classification

0502; and concrete work which is to be reported separately in the classification applicable to the work being performed.

0302-02 Masonry, N.O.C.

Applies to contractors engaged in interior or exterior masonry work not covered by another classification (N.O.C.), including chimney and fireplace construction. This classification includes lining or relining fireplace walls or boxes, chimneys, blast furnaces, ovens, firepits, and setting tombstones. Work contemplated by this classification includes, but is not limited to, laying and cutting brick or stone, and tuck pointing (filling and/or finishing brickwork or stonework joints with cement or mortar).

This classification excludes plastering, stuccoing or lathing work which is to be reported separately in classification 0303; tile setting which is to be reported separately in classification 0502; and concrete work which is to be reported separately in the classification applicable to the work being performed.

WAC 296-17A-0303 Classification 0303.

0303-00 Plastering, stuccoing and lathing buildings, N.O.C.

Applies to contractors engaged in interior and exterior plastering, stuccoing and lathing work on buildings or structures not covered by another classification (N.O.C.). Work contemplated by this classification includes the lathing work which involves nailing thin wood or metal strips and wire mesh or Styrofoam panels to studs or joists to support the application of plaster or stucco, mixing of plaster or cement with water, and applying the mixture by hand trowel or low pressure spray apparatus to the lathing material.

This classification excludes masonry or brick work which is to be reported separately in classification 0302; interior painting which is to be reported separately in classification 0521; exterior painting which is to be reported separately in classification 0504; and concrete work which is to be reported separately in the classification applicable to the work being performed.

WAC 296-17A-0306 Classification 0306.

0306-00 Plumbing, N.O.C

Applies to contractors engaged in plumbing work not covered by another classification (N.O.C.). Work contemplated by this classification includes activities such as, but not limited to, rough-in plumbing work as part of new or remodel projects, placement of pipe (plastic, copper or galva-

nized), cutting and/or threading pipe, soldering, welding or gluing all types of pipe, fittings or valves, installation of fixtures (sinks, showers and tubs, faucets), installation of appliances (dishwashers, hot water tanks, refrigerators with ice and water dispensers), and other necessary plumbing activities in connection with water supplies, water carrying, dispensing, or drainage systems. This classification includes incidental side sewer hook ups (street to house) when performed by a plumbing contractor subject to this classification, and only when it is performed as a part of a plumbing contract which includes installation of waste lines and waste carry systems within a building; and sewer pipe cleaning including services provided by service providers engaged in cleaning or unplugging waste lines.

This classification excludes side sewer hook ups performed as part of an excavation contract which are to be reported separately in classification 0101, and underground water line or water main construction which is to be reported separately in classification 0107.

Special note: This classification includes the installation of display areas or showrooms which provide prospective customers an opportunity to inspect the quality of workmanship and products carried by the contractor. Generally, displays or showrooms are installed where the contractor stores his materials. It is common for contractors subject to this classification to sell plumbing fixtures and supplies, but the intent of these areas is not to sell products to walk-in customers. Sale of these products by a plumbing contractor is included in classification 0306. Classifications 2009, 6309, or similar store classifications are not to be assigned to a contractor's business. Employees engaged exclusively in showing the display areas or showrooms to customers are to be assigned classification 6303 provided the conditions of the standard exception general reporting rule have been met.

0306-02 Automatic sprinkler systems or fire extinguishing systems: Installation, service or repair within buildings

Applies to contractors engaged in the installation, service or repair of automatic sprinkler or fire extinguishing systems within buildings. Work contemplated by this classification includes installation of pipe, fittings, couplings, valves, hangers, regulators, and alarms in ceilings, walls and floors, and cutting and/or threading pipe. These systems are usually equipped to release dry chemicals or water automatically when the surrounding temperature exceeds a predetermined limit.

This classification excludes contractors engaged in the installation, service or repair of outside lawn type and agricultural/irrigation sprinkler systems who are to be reported separately in classification 0301, and contractors engaged in all types of general plumbing installation or repair work who are to be reported separately in classification 0306-00.

0306-03 Boilers, steam pipes, water pipes, heating ducts: Installation of covering insulation

Applies to contractors engaged in the installation of insulated covering on boilers, steam pipes, water pipes and heating ducts to help them retain heat. A boiler is a type of enclosed storage tank erected within a building which heats and circulates extremely hot water or converts hot water into

steam. Contractors subject to this classification may also install water jets inside the tanks.

This classification excludes contractors primarily engaged in the erection of boiler tanks who are to be reported separately in classification 0306-04, and the removal of asbestos from boilers which is to be reported separately in classification 0512.

0306-04 Boilers, N.O.C.: Installation, service or repair

Applies to contractors engaged in the installation, service or repair of boilers not covered by another classification (N.O.C.), including boiler scaling and tank erection within buildings. A boiler is a type of enclosed storage tank erected within a building which heats and circulates extremely hot water or converts hot water into steam. Work contemplated by this classification includes the erection and/or installation of the boiler or tank (which is above ground), pipes, tubing, ducts, heating units, valves, headers, jets and insulation coverings. Also included is the process of boiler scaling which is the removal of scales or residue from the tank or pipes using chemicals, steam or mechanical methods.

This classification excludes contractors primarily engaged in covering a boiler and pipes with insulation covering who are to be reported separately in classification 0306-03, and the erection of exterior tanks which is to be reported separately in classification 0508.

0306-05 Pump installation, service or repair, N.O.C.

Applies to contractors engaged in the installation, service or repair of pumps related to water or waste carrying systems, and which are not covered by another classification (N.O.C.). Work contemplated by this classification applies to all types of water or sump pumps in connection with residential or commercial settings, water wells, and irrigation and drainage systems. A pump is a device that siphons or transfers material from one source or container to another. Activities include pump installation or repair services related to a building's water lines and water carrying systems, plumbing fixtures, dispensers, swimming pools and hot tubs, water wells, and agricultural or irrigation systems.

This classification excludes the installation of water pumps in connection with drilling operations which is to be reported separately in classification 0103; the installation or repair of service station pumps which is to be reported separately in classification 0603; and contractors engaged in all types of general plumbing installation or repair work who are to be reported separately in classification 0306-00.

0306-06 Water softening or treatment systems - installation of new equipment systems

Applies to establishments engaged in the installation of plumbing lines for new water conditioning, purifying or softening systems. Establishments providing this type of service are not required to be a "licensed plumber" to do the installation; however, it does involve plumbing work. The installation involves cutting the water line between the water source and the building or home. The line is cut with a hacksaw, reciprocating saw, or copper tube cutter, depending on the type of pipe involved. After the line is cut, the water source is connected to the intake of the system and the building or home is connected to the outlet of the system with supply and return lines. The bypass unit will allow the water to remain

hard for the outside faucet. A small rubber hose is installed under the house into the drain. Occasionally, a sump pump is needed. For plastic pipes, glue is used to seal the connections. On copper pipes, soldering equipment is used to secure the connections. Water softening is a process by which the water passes through a resin tank where calcium ions are exchanged for sodium ions, resulting in "soft" water. Periodically, the resin is recharged by "back flushing" with a saturated salt solution from another tank. Installations of this type include the two tanks, pressure regulators, valves, and in new facilities an automatic timer.

Special note: This classification allows for the service or repair of water softening or treatment systems to be reported separately in classification 0607 provided accurate time records are maintained which distinguishes new installation contract work from service or repair contract work.

0306-07 Hot water heater: Installation, service or repair

Applies to contractors engaged exclusively in the installation, service or repair of hot water heater units. Work contemplated by this classification includes removal of old units and the installation of new or replacement units. This includes activities such as disconnecting hot heater units, removal of plastic, copper or galvanized water pipes, installing or setting up new or replacement units, installing new pipes, cutting and/or threading pipe, soldering, welding or gluing all types of pipe, fittings or valves, filling and testing the new or replacement units, and wrapping hot water heaters with insulation blankets.

This classification excludes contractors engaged in all types of general plumbing work, or when the installation, service or repair of a hot water heater unit is performed as part of a general plumbing contract which is to be reported separately in classification 0306-00.

WAC 296-17A-0307 Classification 0307.

0307-01 Furnaces and heating systems: Installation, service or repair

Applies to contractors engaged in the installation, service, or repair of furnaces and heating systems, including duct work, in all types of residential and commercial settings. These services are generally performed by furnace contractors, heating and ventilation contractors, or sheet metal contractors. Work contemplated by this classification includes the fabrication, erection, installation and duct work performed at the job site. Materials include, but are not limited to, gas or electric furnace units, heater units, heat pumps, air purification systems, fireplace inserts or units, hot water tanks, thermostats, flat sheets of metal, vents, preformed or

bent venting duct and pipe, vent collars and reels, fittings, galvanized pipe, insulation wrap, concrete pads and gas logs. Contractors who operate a sheet metal fabrication shop or who prefabricate the duct systems in a shop away from the construction site are to be assigned classification 3402 for the shop fabrication work. When a contractor's business is assigned classification 3402 for shop operations, then classification 5206, "Permanent yard or shop," is no longer applicable to the contractor's business for the storage of materials or repair to equipment.

This classification excludes sheet metal fabrication shops which are to be reported separately in classification 3402; duct cleaning work which is to be reported separately in classification 1105; installation or repair of ventilation, air conditioning and refrigeration systems which is to be reported separately in classification 0307-04; or the installation of wood stoves which is to be reported separately in classification 0307-05.

Special note: This classification includes the installation of display areas or showrooms which provide prospective customers an opportunity to inspect the quality of workmanship and products carried by the contractor. Generally, displays or showrooms are installed where the contractors store their materials. It is common for contractors subject to this classification to sell furnace and heating system materials and accessories, but the intent of these areas is not to sell products to walk-in customers. Sales of these products by a furnace and heating systems contractor are included in classification 0307. Classification 2009, 6309, or similar store classifications, are not to be assigned to a contracting business. Employees engaged exclusively in showing the display areas or showrooms to customers are to be assigned classification 6303 provided the conditions of the standard exception general reporting rule have been met.

0307-04 Ventilating, air conditioning and refrigeration systems: Installation, service or repair, N.O.C.

Applies to contractors engaged in the installation, service, or repair of ventilating, air conditioning and refrigeration systems not covered by another classification (N.O.C.), including duct work at the job site in all types of residential and commercial settings. These services are generally performed by heating and ventilation contractors, refrigeration contractors, or sheet metal contractors. Work contemplated by this classification includes the fabrication, erection, installation and duct work performed at the job site. Materials include, but are not limited to, air conditioning units, refrigeration systems, air purification systems, hoods and protective metal covers, hot water tanks, flat sheets of metal, vents, preformed or bent duct portions, vent collars and reels, thermostats, fittings, galvanized pipe, insulation wrap, and concrete pads. This classification includes the installation or repair of built-in vacuum systems and air (pneumatic) tube systems, such as those at drive-up teller windows. Contractors who operate a sheet metal fabrication shop or who prefabricate the duct systems in a shop away from the construction site are to be assigned classification 3402 for the shop fabrication work. When a contractor's business is assigned classification 3402 for shop operations, then classification 5206 "Permanent yard or shop" is no longer applicable to the contractor's business for the storage of materials or repair to equipment.

This classification excludes sheet metal fabrication shops which are to be reported separately in classification 3402; installation or repair of furnace or heating systems which is to be reported separately in classification 0307-01; and the installation of wood stoves which is to be reported separately in classification 0307-05.

Special note: This classification includes the installation of display areas or showrooms which provide prospective customers an opportunity to inspect the quality of workmanship and products carried by the contractor. Generally, displays or showrooms are installed where the contractors store their materials. It is common for contractors subject to this classification to sell ventilating and air conditioning equipment and materials, but the intent of these areas is not to sell products to walk-in customers. Sales of these products by a ventilating and air conditioning contractor are included in classification 0307. Classification 2009, 6309, or similar store classifications, are not to be assigned to a contracting business. Employees engaged exclusively in showing the display areas or showrooms to customers are to be assigned classification 6303 provided the conditions of the standard exception general reporting rule have been met.

0307-05 Wood, pellet, or gas stove: Installation, service or repair

Applies to contractors engaged in the installation, service or repair of wood, pellet or gas stoves in all types of residential and commercial settings. Work contemplated by this classification includes the fabrication, installation and duct work performed at the job site. Materials include, but are not limited to, wood, gas or pellet stoves, inserts, heater units, protective metal covers or hoods, gas fireplace logs, preformed or bent venting duct and pipe, or vents and vent collars. Contractors who operate a sheet metal fabrication shop or who prefabricate the duct systems in a shop away from the installation site are to be assigned classification 3402 for the shop fabrication work. When a contractor's business is assigned classification 3402 for the shop operations, then classification 5206, "Permanent yard or shop," is no longer applicable to the contractor's business for the storage of materials or repair to equipment.

This classification excludes wood stove and accessory stores which are to be reported separately in classification 6309; stove manufacturing which is to be reported separately in classification 5209; sheet metal fabrication shops which are to be reported separately in classification 3402; brick or masonry work which is to be reported separately in classification 0302; and the installation or repair of furnace or heating systems which is to be reported separately in classification 0307-01.

Special note: This classification includes the installation of display areas or showrooms which provide prospective customers an opportunity to inspect the quality of workmanship and products carried by the contractor. Generally, displays or showrooms are installed where the contractors store their materials. It is common for contractors subject to this classification to sell wood stove installation materials and accessories, but the intent of these areas is not to sell products to walk-in customers. Sales of these products by a wood stove installation contractor are included in classification 0307. Classifications 2009, 6309, or similar store classi-

fications, are not to be assigned to a contracting business. Employees engaged exclusively in showing the display areas or showrooms to customers are to be assigned classification 6303 provided the conditions of the standard exception general reporting rule have been met.

WAC 296-17A-0308 Classification 0308.

0308-00 Chemical spraying and fumigating

Applies to establishments engaged in providing chemical spraying and fumigating services only to established residential landscaping and commercial properties. Work contemplated by this classification includes, but is not limited to, the application of various liquid and granular chemicals (fertilizers, herbicides, pesticides, insecticides, iron, nitrogen, slow release food stakes) for use on grass, plants, shrubs, flowers, trees, moss, ivy or weeds. Employees of establishments subject to this classification arrive at the location site in a tank truck equipped with a premixed solution that is dispensed with a spray hose, or by fertilizer spreaders, injection guns, and back pack dispensers.

This classification excludes chemical spraying of roadway median strips by nonmunicipal employees adjacent to state, city or town roadways which is to be reported separately in classification 0101; chemical spraying done in connection with forest roads or reforestation projects which is to be reported in the applicable forestry classification; pest and termite control which is to be reported separately in classification 6602; chemical spraying and fumigating by employees of cities, counties, state agencies, or other municipalities which is to be reported in the classification applicable to the type of municipality performing the work; chemical spraying of agricultural farms or orchards which *may* be reported separately in classification 4808 or in the agricultural classification applicable to the employer's operation; and crop dusting by aircraft which is to be reported separately in classification 6903.

0308-01 Lawn care maintenance

Applies to contractors engaged in maintenance of established lawns and gardens. Work contemplated by this classification includes, but is not limited to, mowing and thatching lawns, edging, weeding flower beds, raking, rototilling gardens, application of fertilizers, and spraying and trimming of shrubs. Also included is minor landscape renovation and/or restoration activities incidental to, and performed as part of, the lawn care maintenance contract for an existing lawn or landscape such as the removal and replacement of plants, turf repair or reseeded of grass, and the spreading of decorative rock, topsoil, or bark. This classification includes replacement of sprinkler heads and cleaning of lawn type sprinkler systems only when performed in connection with and incidental to the lawn care maintenance contract. Equipment used by contractors subject to this classification includes, but is not limited to, riding or power lawn mowers, power sweep-

ers, edgers, thatchers, weed eaters, grass blowers, fertilizer spreaders, sprayers, gas or electric power tools, and hand tools.

This classification excludes new landscape construction which is to be reported separately in classification 0301; tree care and pruning services which are to be reported separately in classification 0101; grading, clearing, or contouring of land which is to be reported separately in classification 0101; installation, service or repair of lawn type sprinkler systems which is to be reported separately in classification 0301; and the installation, service or repair of above or below ground agricultural irrigation systems which is to be reported separately in classification 0301.

Special notes: Classifications 0308 and 0301 may be assigned to the same business provided that the conditions of the general reporting rule covering the operation of a secondary business have been met.

Care should be exercised in the assignment of this classification when tree services are included. Tree care service contracts generally call for the radical topping, pruning or cutting of tree limbs to remove or eliminate a hazard to buildings, property, or power lines. Tree trimming as part of this classification is only for the purpose of shaping and maintaining healthy trees and to control size for the visual relationship to other landscape material.

WAC 296-17A-0403 Classification 0403.

0403-00 Sign: Erection, repair, and/or removal, including related painting and maintenance

Applies to contractors engaged in the erection, repair, and/or removal of signs, including related painting and maintenance. Signs include, but are not limited to, commercial business or personal property signs, advertisement billboards, poster panels erected at commercial or residential properties, private properties, buildings or structures, or open spaces. Signs may be made of wood, metal, plastic, glass, or neon tube. Free standing sign erection process begins with digging or drilling holes in which to stand or set poles or posts. The sign is attached to the pole or post prior to standing or is lifted with a boom or crane to be mounted and secured. Other signs are mounted and secured directly to buildings or structures. This classification includes the related electrical hook-up work to install neon and digital signs such as those located at banks and stores including the maintenance, repair, and painting of signs at the customer's location or at the contractor's shop.

This classification excludes the installation or removal of highway, street, or roadway signs that specify roadway information (such as speed limits, road conditions, city and town mile destinations) which are mounted on overpasses or erected alongside the roadway which are to be reported separately in classification 0219; the placement of temporary signs which is to be reported separately in classification 4910; or the manufacturing of signs which is to be reported separately in the applicable classification.

[Title 296 WAC—p. 330]

0403-10 Sign painting or lettering outside buildings or structures, N.O.C.

Applies to contractors engaged in sign painting or lettering outside buildings or structures not covered by another classification (N.O.C.), and includes all contractor's shop operations. Generally, this classification involves specialty lettering or painting such as, but not limited to, business logos, addresses, business hours or phone numbers, murals or other artwork.

This classification excludes contractors engaged in the installation or removal of highway, street, or roadway signs that specify roadway information (such as speed limits, road conditions, city and town mile destinations) which are mounted on overpasses or erected alongside the roadway which are to be reported separately in classification 0219; striping parking lots and painting curbs (and numbering on curbs) which is to be reported separately in classification 0219; sign painting or lettering inside of buildings, including inside murals or other artwork, which is to be reported separately in classification 4109; exterior painting of buildings or structures which are to be reported separately in classification 0504; painting or lettering in connection with an automotive body shop which is to be reported separately in classification 3412; and the erection, repair or removal of outdoor signs which is to be reported separately in classification 0403-00.

WAC 296-17A-0502 Classification 0502.

0502-04 Carpet, vinyl, tile and other floor or counter top covering: Installation or removal

Applies to contractors engaged in the installation or removal of floor or counter top coverings such as, but not limited to, wall to wall carpet, vinyl, laminate, tile, or artificial turf in residential or commercial settings. Work contemplated by this classification includes, but is not limited to, the installation and/or removal of foam or rubber padding, floor coverings such as rugs or carpet, tack strips, door strips, sub-flooring (particle board or plywood), linoleum, vinyl, base board or door strips, and hauling existing floor covering debris away. This classification also includes the installation of clay or ceramic tiles on counter tops and backsplashes.

This classification excludes contractors engaged in the installation of counter tops as part of an interior finish carpentry or cabinetry contract which is to be reported separately in classification 0513; the installation of hardwood floors which is to be reported separately in classification 0513; the installation of brick, slate, marble or granite which is to be reported separately in classification 0302; installation of roofing tiles which is to be reported separately in classification 0507; and floor covering stores which are to be reported separately in the applicable classification.

(2007 Ed.)

0502-99 Carpet, vinyl, tile and other floor or counter top covering: Installation or removal (only to be assigned by the floor covering specialist)

Applies to floor covering contractors who consider themselves to be independent contractors, have no employees, and have not elected owner coverage for themselves.

The purpose of assigning this classification is to allow the independent contractor the opportunity to be checked for "account in good standing" status for prime contractor liability.

Special note: Any contractor who hires employees or elects owner coverage is required to report in the applicable construction classification.

WAC 296-17A-0504 Classification 0504.

0504-06 Waterproofing, N.O.C.: Buildings or structures

Applies to contractors engaged in waterproofing buildings or structures not covered by another classification (N.O.C.). This classification includes the application and repair services of waterproofing material to all types of buildings or structures, regardless of height, including, but not limited to, foundations and foundation walls, floors, decks, fences, walkways and driveways. Waterproof material is applied to a variety of surfaces such as wood, concrete, asphalt, steel, metal, plaster, or stone. There are several types of waterproof processes: Membrane, which adheres long strips of rubber and pumice to exterior walls or foundations with the use of primer; pressure injection, which uses a long wand inserted into the ground to fill cracks; epoxy injection, which is performed on the interior or exterior with use of a caulk gun to inject a silicon material into cracks; or application with use of a brush, roller or spray directly onto the surface. This classification includes the application of asphalt sealant to driveways.

This classification excludes excavation work performed in conjunction with a waterproofing contract which is to be reported separately in classification 0101; waterproofing operations performed in connection with roofing or subaqueous work which is to be reported separately in the classification applicable to the work being performed; the application of asphalt sealant or waterproof materials to roadways and parking lots which is to be reported separately in classification 0219; and the application of waterproof materials performed by a concrete contractor as part of the concrete construction project which is to be reported separately in the classification applicable to the work being performed.

Special note: Classification 0101 applies when excavation work is performed (to remove dirt away from a foundation wall or to push it against the wall after the waterproofing

material is applied) regardless of the type of contractor performing the excavation work.

0504-18 Pressure washing services or sandblasting, N.O.C.: Buildings or structures

Applies to contractors engaged in pressure washing or sandblasting buildings or structures, not covered by another classification (N.O.C.). This classification includes cleaning, washing, pressure washing or sandblasting buildings or structures. These services are performed to remove dirt, moss, rust or old paint from buildings or structures. Pressure washing involves a forced spray of air and water to remove unwanted surface materials, whereas, sandblasting, or abrasive blasting, involves a forced spray of sand, steel, or glass. This classification includes the cleaning of roofs, gutters, and downspouts, and the removal of moss or snow from multiple story buildings. Pressure washing and sandblasting systems include portable blast and pressure cleaning machines, hand-operated, cabinet-type sandblasting or pressure washing machines, automatic blast or pressure cleaning machines and wet-blast cleaning machines.

This classification excludes contractors engaged in multimedia blasting in shop which is to be reported separately in classification 3402; pressure washing or sandblasting by a painting contractor as a part of the preparation for painting exterior buildings, structures, or the interior/exterior of tanks which is to be reported separately in the classification 0504-21; pressure washing as a part of interior building painting contracts which is to be reported separately in classification 0521; cleaning or washing roofs, or removing snow from, single story buildings (provided the cleaning or washing is not part of a painting or roofing contract) which is to be reported separately in classification 6602; waterproofing buildings or structures, N.O.C. which is to be reported separately in classification 0504-06; and pressure washing or sandblasting operations performed in conjunction with and as a part of another type of business such as a foundry, metal goods manufacturer, auto body repair shop, etc., which is to be reported separately in the applicable classification.

0504-20 Lead abatement

Applies to contractors engaged in lead abatement which is performed on structures where there are significant amounts of lead-based paint and lead dust. Contractors must comply with various governmental regulations. The first step in all lead abatement projects is the preliminary testing of the site to determine the presence of lead and the extent of the contamination. If the ground surrounding the proposed work-site is contaminated, it will require remediation, which is done by a soil remediation contractor who is to be reported separately in the appropriate classification. The next step is deciding which abatement procedure is right for the project such as: Encapsulation which is used on interior surfaces to seal the lead-based paint with a bonding material; enclosure which is used on interior and exterior surfaces and involves constructing special airtight enclosures made out of gypsum wallboard, plywood paneling, aluminum, vinyl or wood exterior sidings; component replacement which involves removing building components such as paneling, moldings, windows and doors which are coated with lead-based paint and replacing them with new components; and chemical removal, abrasive removal or handscraping which are methods to

physically remove the lead paint. This classification includes all preparation work and all cleanup work.

This classification excludes soil remediation work which is to be reported separately in classification 0101; asbestos abatement which is to be reported separately in classification 0512; and lead abatement as part of a painting contract for interior/exterior of buildings or structures, or the interior/exterior of tanks which is to be reported separately in the applicable classification.

0504-21 Painting: Exterior buildings or structures, N.O.C.; Cleaning: Interior/exterior of oil or gas storage tanks, beer vats, and sewage treatment tanks

Applies to contractors engaged in painting the exterior of all types of buildings or structures not covered by another classification (N.O.C.), regardless of height. Buildings and structures include, but are not limited to, bridges, towers, smokestacks, stadiums, factories, warehouses, stores, churches, and residential or commercial single or multiple story buildings. Paint is applied by brush, roller or spray to a variety of surfaces such as wood, concrete, steel, metal, plaster, stone, or other types of exterior surfaces. This classification includes all preparation work such as the set up of scaffolding or power lifts, pressure washing, removal of old paint or asbestos, sandblasting, taping or masking, and cleanup work. This classification also applies to cleaning, coating, or painting the interior/exterior of oil or gas storage tanks, beer vats, or sewage treatment tanks.

This classification excludes contractors engaged in waterproofing buildings or structures, N.O.C. which are to be reported separately in classification 0504-06; pressure washing services or sandblasting of buildings or structures which are to be reported separately in classification 0504-18; interior painting of buildings which is to be reported separately in classification 0521; painting of murals or other artwork on the interior of buildings which is to be reported separately in classification 4109; and painting of murals or other artwork on the exterior of buildings which is to be reported separately in classification 0403.

WAC 296-17A-0507 Classification 0507.

0507-05 Roofwork construction and repair

Applies to contractors engaged in the installation or repair of roofing material on all types of new or existing buildings or structures. Roofing materials include, but are not limited to, felt roofing paper, rolled composition, wood, fiberglass or composition shingles or shakes, aluminum or sheet metal, masonry or ceramic tile, tar, and polyurethane

foam. Installation of roofing materials varies with the product. Wood, fiberglass and composition shingles are nailed; masonry, slate or ceramic tiles require drilling, nailing or cementing; polyurethane foam is applied by spray then coated with a protective layer of paint-like material; hot tar requires melting in tanks, usually at ground level, then it is pumped or raised by bucket to the roof top and applied by spray or mop; cold apply uses an adhesive to bond roofing membranes to form a roofing system; cold tar is applied by brush, spray or mop; single ply involves large sheets of roofing material which are unrolled on the roof with edges overlapping and seamed; and metal roofing is seam welded or nailed. For purposes of this classification the term "roofwork" includes repairs to the subroof such as the replacement of trusses, rafters, supports, and sheathing, but excludes the placement of trusses, rafters, supports or sheathing on new building construction. Essentially, when removing the existing roof material from an existing building or structure it is not uncommon to find dry rot or deterioration to parts of the subroof. The repair of the subroof is part of the roof repair or replacement project and is included in this classification. By contrast, when a subroof is constructed on new buildings or structures, this activity is to be reported separately in the classification applicable to the work being performed such as 0510 for wood frame construction or 0518 for nonwood frame construction.

This classification excludes roof cleaning, moss or snow removal on single story buildings not incidental to, or part of, a roofing contract which is to be reported separately in classification 6602; roof cleaning or moss removal of multiple story buildings not incidental to, or part of, a roofing contract which is to be reported separately in classification 0504; the installation of gutters and downspouts which is to be reported separately in classification 0519; waterproofing parts of buildings other than roofs which is to be reported separately in classification 0504 and/or 0101; placing roof trusses, rafters, supports and sheathing on new wood frame buildings which is to be reported separately in classification 0510; the application of polystyrene strips used as insulation on mobile homes which is to be reported separately in classification 0512; and placing roof trusses, rafters, supports and sheathing on new buildings, N.O.C. which is to be reported separately in classification 0518.

0507-99 Roofwork construction and repair (only to be assigned by the roofing specialist)

Applies to roofing contractors who consider themselves to be independent contractors, have no employees, and have not elected owner coverage for themselves.

The purpose of assigning this classification is to allow the independent contractor the opportunity to be checked for "account in good standing" for prime contractor liability.

Special note: Any contractor who hires employees or elects owner coverage is required to report in the applicable construction classification.

WAC 296-17A-0508 Classification 0508.

0508-00 Radio, television, cellular or water towers, poles and towers, N.O.C.: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of iron, steel, or wood radio, television, cellular or water towers, poles, towers and those towers which are not covered by another classification (N.O.C.). Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the foundation/excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, raising structural members by crane and welding or bolting them into place, and the installation, removal, service and/or repair of antennas, dish units and/or other transmitting/receiving apparatus to the structure. This classification also includes the delivery of material and supplies to the job site when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of a control building or installation of a modular control building which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow the separate reporting of excavation or foundation work irrespective of who performs the work. This classification includes specialty contractors who install, remove, service or repair antennas, dish units and/or other transmitting/receiving apparatus to a structure covered by this classification.

0508-01 Smokestack: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of iron, steel or concrete smokestacks. These structures are part of an industrial complex and facilitate the discharge of combustion vapors, gases, or smoke. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, installation of scaffolding, raising segments into place with a crane and welding or bolting them into place. This classification includes the delivery of material and supplies to the job site and installation of any apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

(2007 Ed.)

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; preliminary clearing of land by a contractor who is not also excavating the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of a control building or installation of a modular control building which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow separate reporting of excavation or foundation work irrespective of who performs the work.

0508-02 Windmill and silo: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of iron, steel or wood windmills or silos. Windmills use the force of wind passing around the rotor blades to turn turbines and produce electric power. These may be built individually or in groups known as "wind farms." Additional apparatus and storage batteries are housed in separate buildings nearby. Silos are large cylindrical structures used to store grain or fodder (silage). They are filled through the top by means of a conveyor. Within the structure, augers and pumps can move the grain to blend, aerate, or feed it out the chute. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, raising structural members by crane and welding or bolting them into place. This classification includes the delivery of material and supplies to the job site and the installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of a control building or installation of a modular control building which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow the separate reporting of excavation or foundation work irrespective of who performs the work.

0508-03 Oil still or refinery: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of oil stills or refineries. These facilities are basically composed of multi-story storage tanks, chimneys, pipelines, separating apparatus

[Title 296 WAC—p. 333]

and steam generating systems. They receive unprocessed petroleum (crude oil) and convert it into usable products such as gasoline, kerosene, wax, grease and chemical feed stocks. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation and other concrete, on-site fabrication and assembly of parts, erecting framework, installation of scaffolding, raising structural members by crane and welding or bolting them into place. This classification includes the delivery of material and supplies to the job site and the installation of apparatus in an oil still or refinery when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery or apparatus by a specialty contractor which is to be reported separately in classification 0603; plant maintenance contract work as described in classification 0603; preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of control or pump houses and other buildings not part of the main processing plant which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow separate reporting of excavation or foundation work irrespective of who performs the work.

0508-04 Blast furnace and metal burners: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of blast furnaces and metal burners. These are tall, very heavy gauge, cylindrical steel structures in which heated air and combustible fuels are combined to produce the heat necessary to separate the usable material in metal ores from the waste products. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, installation of a brick lining, raising structural members by crane and welding or bolting into place. This classification includes the delivery of material and supplies to the job site and the installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported sep-

arately in the applicable classification; and the construction of additional buildings as part of an ore reduction or metal producing facility which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow separate reporting of excavation or foundation contractors irrespective of who performs the work.

0508-08 Elevated railway, tram, lift or similar conveyances: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of elevated railways, trams, lifts or similar conveyances. An elevated railway can be a full scale railroad or a smaller scale system such as a recreational monorail. For the purposes of this classification, trams are overhead cable cars, and lifts are similar to the typical ski lift. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting frames and supports (metal or concrete), installation of scaffolding, raising structural members by crane and welding or bolting them into place, and installing and securing tracks, cables or pulley systems. This classification includes the delivery of material and supplies to the job site and the installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; or the construction of a control building or installation of a modular control building which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow separate reporting of excavation or foundation contractors irrespective of who performs the work.

0508-09 Exterior tanks, N.O.C.: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of all types of exterior tanks not covered by another classification (N.O.C.). These tanks may be part of water storage and distribution systems, chemical or petroleum processing and storage operations, or other industrial applications. This classification includes the erection or construction of tanks that are elevated on structural piers and those that rest on the ground. These tanks may be constructed singly or in groups known as "tank farms" which are common to the petroleum industry. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing

the foundation, on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, and raising structural members by crane and welding or bolting them into place. This classification includes the delivery of material and supplies to the job site and installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of a control building or installation of a modular control building which is to be reported separately in the applicable construction classification.

Special note: This classification does not allow separate reporting of excavation or foundation contractors irrespective of who performs the work.

0508-11 Crane or derrick: Installation, construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the installation, construction or erection, dismantling, maintenance or repair of nonmobile cranes and derricks for commerce and industrial use. Cranes and derricks can be very similar in that they are both defined as machines for hoisting and moving heavy objects through the use of stationary or movable booms equipped with cables. An object, sometimes weighing many tons, can be secured to the cables and moved into position along the length of a stationary boom or to another location within the reach of a movable boom. A derrick, however, can also be a permanent framework over an opening, such as an oil-drilling operation, to support boring equipment. The cranes included in this classification are those that are permanently installed at a marine port, cargo handling facility or an industrial facility to move supplies, cargo containers, or heavy objects (vertically or horizontally) that are being assembled and must pass through the length of a building to complete the process. Work contemplated by this classification includes, but is not limited to, the placement of forms and reinforcing steel for a foundation (in the case of some structures described above, the additional reinforcing required to support the crane is usually contemplated in the plan for the building's foundation where the crane is being anchored), on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, raising structural members by hoist and welding or bolting them into place. This classification includes the delivery of material and supplies to the job site and installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the operation of mobile cranes which is to be reported in classification 3506, the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is

to be reported separately in classification 0101; and delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification.

Special note: This classification does not allow separate reporting of excavation or foundation contractors irrespective of who performs the work.

0508-12 Water cooling towers or structures - metal or wood: Construction or erection, dismantling, maintenance or repair

Applies to contractors engaged in the construction or erection, dismantling, maintenance or repair of metal or wood water cooling towers or vertical structures. These structures are usually part of an industrial complex in which water is used as a cooling element in a manufacturing process. The water, which absorbs heat from the machinery being cooled, can be circulated and reused after it has been channeled through a cooling tower to be chilled sufficiently. A common design allows the hot water to tumble down numerous open louvers or steps to lower its temperature. These towers are often composed of prefabricated parts which are delivered to the site and then assembled by bolting or welding together, then the necessary motors, pipes, fans and pumps are installed. Work contemplated by this classification includes, but is not limited to, clearing of land (if done by the excavation contractor), excavating for the foundation, the placement of forms, installation of reinforcing steel, pouring and finishing the foundation, on-site fabrication and assembly of parts, erecting the frame, installation of scaffolding, raising structural members by crane and welding, bolting or otherwise fastening them into place. This classification includes the delivery of material and supplies to the job site and installation of apparatus onto a structure covered by this classification when done by employees of an employer having operations subject to this classification.

This classification excludes the felling of timber which is to be reported separately in the applicable logging classification; the installation of machinery which is to be reported separately in classification 0603; the preliminary clearing of land by a contractor who is not also excavating for the foundation which is to be reported separately in classification 0101; delivery of material to the site by employees of a material supplier or a common carrier which is to be reported separately in the applicable classification; and the construction of other related buildings at the project site which is to be reported separately in the applicable construction classification.

Special notes: This classification does not allow separate reporting of excavation or foundation irrespective of who performs the work. Construction of a water cooling structure that uses a horizontal rather than tower-like design is to be reported separately in classification 0518.

WAC 296-17A-0509 Classification 0509.

0509-00 Overhead telephone or telegraph lines: New construction or extension of lines - including poles or towers; erection, maintenance or repair by contractor

Applies to contractors engaged in the construction, maintenance or repair of overhead telephone or telegraph lines, poles and towers. Work contemplated by this classification includes, but is not limited to, clearing a right of way (excluding logging-type operations), boring holes for poles to be set in, installing cross arms, insulators and brackets on poles (which may be wood or metal), setting poles or towers into position, installing guy wires if necessary, stringing the lines, incidental tree topping, tying into the low-voltage power source, and making service connections when done by employees of an employer having operations subject to this classification. Towers may be of a solid wall, cylindrical steel construction or of a fabricated steel cross member design reaching a height of about 50 feet, and are secured to a concrete pad or set into the ground. They may be used to elevate the lines to cross long distances or to support microwave antennae or receivers.

This classification excludes specialty contractors engaged in any single phase of the work described above: Land clearing and grading operations which are to be reported separately in classification 0101; erection of poles or towers which is to be reported separately in classification 0508; drilling holes which is to be reported separately in classification 0103; tree topping which is to be reported separately in classification 0101; service connections which are to be reported separately in classification 0608; underground telephone line installation which is to be reported separately in classification 0107; and the felling of timber which is to be reported separately in the applicable logging classification.

Special note: If done by a telephone or telegraph company the work described above is included in classification 1303. A contractor engaged in the installation of electric and/or cable television overhead lines in addition to telephone and telegraph lines is to be reported in classification 0509-03. If a specialty contractor is only stringing telephone or telegraph lines, and not erecting poles or towers, classification 0509-00 is still applicable.

0509-01 Overhead television lines: New construction or extension of lines - including poles or towers; erection, maintenance or repair by contractor

Applies to contractors engaged in the construction, maintenance or repair of overhead television lines, poles and towers. Work contemplated by this classification includes, but is not limited to, clearing a right of way (excluding logging-type operations), boring holes for poles to be set in, installing cross arms, insulators and brackets on poles (which may be wood or metal), setting poles or towers into position, installing guy wires if necessary, stringing the lines, incidental tree topping, tying into the low-voltage power source, and

making service connections when done by employees of an employer having operations subject to this classification. Towers may be of a solid wall, cylindrical steel construction or of a fabricated steel cross member design reaching a height of about 50 feet, and are secured to a concrete pad or set into the ground. They may be used to elevate the lines over long distances or to support microwave antennae or receivers.

This classification excludes specialty contractors engaged in any single phase of the work described above: Land clearing and grading operations which are to be reported separately in classification 0101; erection of poles or towers which is to be reported separately in classification 0508; drilling holes which is to be reported separately in classification 0103; tree topping which is to be reported separately in classification 0101; service connections which are to be reported separately in classification 0601; underground television line installation which is to be reported separately in classification 0107; and the felling of timber which is to be reported separately in the applicable logging classification.

Special note: If done by a cable television company the work described above is included in classification 1305. A contractor engaged in the installation of overhead electric and/or telephone or telegraph lines in addition to overhead television lines is to be reported in classification 0509-03. If a specialty contractor is only stringing overhead television lines, and not erecting poles or towers, classification 0509-01 is still applicable.

0509-02 Overhead electric transmission lines: New construction or extension of lines - including poles, or towers; erection, maintenance or repair by contractor

Applies to contractors engaged in the construction, maintenance or repair of overhead electric transmission lines, poles and towers. Work contemplated by this classification includes, but is not limited to, clearing a right of way (excluding logging-type operations), boring holes for poles to be set in, installing cross arms, insulators and brackets on poles (which may be wood or metal), setting poles or towers into position, installing guy wires if necessary, stringing the lines, installing circuit breakers and transformers, incidental tree topping, tying into the high-voltage power source, and making service connections when done by employees of an employer having operations subject to this classification. Towers may be of a solid wall, cylindrical steel construction or of a fabricated steel cross member design reaching a height of about 50 feet, and are secured to a concrete pad or set into the ground. They may be used to elevate the lines over long distances or to support electric power distribution apparatus.

This classification excludes specialty contractors engaged in any single phase of the work described above: Land clearing and grading operations which are to be reported separately in classification 0101; erection of poles or towers which is to be reported separately in classification 0508; drilling holes which is to be reported separately in classification 0103; tree topping which is to be reported separately in classification 0101; underground electric line installation which is to be reported separately in classification 0107; and the felling of timber which is to be reported separately in the applicable logging classification.

Special note: If done by an electric power company the work described above is included in classification 1301. A

contractor engaged in the installation of overhead telephone or telegraph lines and/or television lines in addition to overhead electric lines is to be reported in classification 0509-03. If a specialty contractor is only stringing overhead electric lines, and not erecting poles or towers, classification 0509-02 is still applicable.

0509-03 Overhead transmission lines, N.O.C.: New construction or extension of lines - including poles or towers; erection, maintenance or repair by contractor

Applies to contractors engaged in the construction, maintenance or repair of more than one type of overhead transmission line, including poles and towers which are not covered by another classification (N.O.C.). If the contractor specializes in either telephone, telegraph, television or electric lines, they can be specifically defined elsewhere within classification 0509. Work contemplated by this classification includes, but is not limited to, clearing a right of way (excluding logging-type operations), boring holes for poles to be set in, installing cross arms, insulators and brackets on poles (which may be wood or metal), setting poles or towers into position, installing guy wires if necessary, stringing the lines, incidental tree topping, installing circuit breakers and transformers, tying into the power source, and making service connections when done by employees of an employer having operations subject to this classification. Towers may be of a solid wall cylindrical steel construction or of a fabricated steel cross member design reaching a height of about 50 feet, and are secured to a concrete pad or set into the ground. They may be used to elevate the lines over long distances or to support microwave antennae, receivers or electric power distribution apparatus.

This classification excludes specialty contractors engaged in any single phase of the work described above: Land clearing and grading operations which are to be reported separately in classification 0101; erection of poles or towers which is to be reported separately in classification 0508; drilling holes which is to be reported separately in classification 0103; tree topping which is to be reported separately in classification 0101; service connections for cable television lines which is to be reported separately in classification 0601; underground line installation which is to be reported separately in classification 0107; and the felling of timber which is to be reported separately in the applicable logging classification.

Special note: If done by a telephone or telegraph company, the work described above is included in classification 1303; if done by a cable television company it is included in classification 1305; if done by an electric utility company it is included in classification 1301. If a specialty contractor is only stringing a combination of types of overhead lines, and not erecting poles or towers, classification 0509-03 is still applicable.

WAC 296-17A-0510 Classification 0510.

0510-00 Wood frame building: Construction or alterations, N.O.C.

Applies to contractors engaged in wood frame building construction or alterations not covered by another classification (N.O.C.). For the purposes of this classification, wood frame building construction means buildings erected exclusively of wood or wood products. This classification includes all building framing activities done in connection with wood frame building construction including the placement of roof trusses, sheathing roofs, installation of exterior building siding, and the installation of exterior doors and door frames. This classification also includes the installation of windows, window frames, and skylights when performed by framing workers as part of the framing contract on a wood frame building.

This classification excludes all other phases of wood frame building construction not listed as part of the framing activities above such as, but not limited to, site preparation and excavation (0101); overhead or underground utilities, asphalt work, or concrete work which is to be reported separately in the applicable classification; new landscape work (0301); brick work (0302); stucco work (0303); plumbing work (0306); HVAC work (0307); carpet and tile work (0502); exterior painting (0504); roof work (0507); insulation work (0512); interior finish carpentry - interior doors, cabinets, fixtures or molding (0513); installation of garage doors (0514); installation of sheet metal siding, gutters, and non-structural sheet metal patio covers/carports (0519); interior painting (0521); electrical work (0601) or wallboard installation, taping or texturing which are to be reported separately in the applicable classifications. For a more thorough description of the activities included and excluded from wood frame building construction, review the Construction Industry Guide.

Special note: Classification 0510 also includes wood frame building alterations or remodel work when the activity involves building new additions. The term "new additions" is defined as adding on to an existing wood frame building (upwards or outwards) in which the use of structural supports and main bearing beams is required. This is distinguishable from classification 0516 - building repair or carpentry work that typically does not require the placement of structural supports or main bearing beams. The purpose of classification 0516 is to build or rebuild with nonstructural or bearing beams, or to replace an existing portion (including existing structural and bearing beams) of a wood frame building for appearances or as a result of deterioration to make it appear new again. Care should be exercised as the terminology to build, rebuild, remodel, construct or reconstruct is irrelevant to assignment of classification which should recognize what the project actually involves.

Guidelines:

Constructing a new wood frame building that never existed - 0510

Altering all or part of an existing wood frame building by adding on new additions - 0510

Remodeling all or part of an existing wood frame building *without* adding on new additions - 0516

Installation of wood or vinyl siding on a new or existing wood frame building - 0510

Constructing a new wood garage that never existed - 0510

Altering all or part of an existing wood garage by adding on new additions - 0510

Remodeling all or part of an existing wood garage without adding on new additions - 0516

Constructing a new wood carport or wood shed that never existed - 0510

Rebuilding an existing wood carport or wood shed (all or part) with or without new additions - 0516

Construction of a new wood deck by the framing contractor when a new wood house is being built - 0510

Constructing or replacing a wood deck on an existing wood house - 0516

Constructing or replacing a wood deck for any type of nonwood building - 0516

Altering the existing interior of a wood frame building by adding exterior additions - 0510

Remodeling the existing interior of a wood frame building without adding exterior additions - 0516

Constructing, altering, or remodeling the interiors of nonwood frame buildings - 0516

Installation of windows, window frames, and skylights when performed by framing workers as part of the framing contract of a wood frame building - 0510.

0510-99 Wood frame building: Construction or alteration, N.O.C. (only to be assigned by the wood framing specialist)

Applies to framing contractors, who consider themselves to be independent contractors, have no employees, and have not elected owner coverage for themselves.

The purpose of assigning this classification is to allow the independent contractor the opportunity to be checked for "account in good standing" status for prime contractor liability.

Special note: Any contractor who hires employees or elects owner coverage is required to report in the applicable construction classification.

WAC 296-17A-0511 Classification 0511.

0511-00 Glass installation in buildings

Applies to contractors and glass merchants engaged in the installation and/or removal of glass in buildings and residences. This type of work is generally performed by a "glazier" who installs, removes, and/or boards up broken or dam-

aged window or door glass. This classification includes a variety of glass, plastic and similar materials in buildings and residences, including exterior glass curtain walls on multi-story buildings, skylights, mirrors, storm windows, window sashes and window/door glass. This classification also includes glass tinting or the application of tinted plastic film to glass windows and doors in buildings or residences.

This classification excludes glass merchants which are to be reported separately in classification 1108; the installation of auto glass which is to be reported separately in classification 1108 when performed at or away from the glass merchant's shop; glass frosting, etching or beveling which is to be reported separately in classification 1108; tinting or the application of tinted plastic film to auto glass by an auto detailer which is to be reported separately in classification 3406; glass manufacturing which is to be reported separately in classification 3503; and the installation of windows, window frames and skylights when performed as part of a framing contract on a wood frame building by the framing workers which is to be reported separately in classification 0510.

Special note: Care should be exercised when determining if the business is a glass installation contractor or a glass merchant. A glass merchant in classifications 1108 and 0511, does not qualify for classification 5206 "Permanent yard or shop." However, if the business is engaged exclusively as a glass installation contractor, and not as a glass merchant, the contractor's business *may* qualify for classification 5206 for the storage of materials.

WAC 296-17A-0512 Classification 0512.

0512-00 Insulation or sound proofing materials: Installation, N.O.C.

Applies to contractors engaged in installing insulation or sound proofing materials not covered by another classification (N.O.C.). This classification includes the installation or removal of insulation material for all types of residential or commercial buildings or structures. Insulation materials include, but are not limited to, flexible types in the form of blankets, rolls or quilts, loose fills or mineral substances in granulated, powder, cellulose or fibrous wood forms, pads and bats of mineral wool, slabs of cork board or wood fiber, rigid types such as wood and sugarcane fiberboard or panels, and the reflective type often consisting of aluminum foil encased in paper. The methods of installation include hand, blower, nailing, or cementing with special adhesive. This classification includes the installation of suspended or acoustical grid ceilings. This classification includes installation of weather strip and caulking, roof or soffit ventilators, energy efficient doors and related carpentry work done in connection with the weatherization or retrofitting of buildings and residences. This classification also includes the application of polystyrene strips placed as insulation on the tops of mobile homes.

This classification excludes the installation of glass windows in buildings which is to be reported separately in classification 0511; energy auditors with no installation or delivery

duties who may be reported separately in classification 6303 provided all the conditions of the general reporting rules covering standard exception employees have been met; asbestos abatement which is to be reported separately in classification 0512-01; lead abatement which is to be reported separately in classification 0504; and the installation of insulated covering on boilers or steam pipes which is to be reported separately in classification 0306.

0512-01 Asbestos abatement

Applies to contractors engaged in the removal of asbestos. Work contemplated by this classification includes all operations such as, but not limited to, the removal of damaged, deteriorated or unwanted existing asbestos coverings and material from buildings and other structures such as, but not limited to, ceilings, walls, partitions, floors, and from around air conditioning and heating ducts. Also included in this classification is the removal of asbestos insulated covering around boilers and steam pipes, asbestos used as insulation, fireproofing, and in various building materials such as floor coverings, ceiling tiles, cement sheeting, granular and corrugated wrap, and acoustical and decorative treatment for walls and ceilings.

This classification excludes contractors engaged in the installation of boiler and steam pipe insulation coverings who are to be reported separately in classification 0306; lead abatement which is to be reported separately in classification 0504; asbestos abatement as a part of painting the interior or exterior of buildings or structures or the interior/exterior of tanks which is to be reported separately in the applicable classification.

WAC 296-17A-0513 Classification 0513.

0513-00 Interior finish carpentry

Applies to contractors engaged in interior finish carpentry work for all types of buildings. Generally, the interior finish carpentry work begins after the drywall, taping, texturing, and painting and/or wallpapering is complete. This classification includes a variety of interior finish or trim carpentry work to include, but not be limited to, the installation of wood paneling and wainscoting, wood fireplace mantels, stair railings, posts and banisters, interior doors and door frames, wood molding on windows, baseboards, interior fixtures such as towel bars and tissue holders, closet organizers, installation and/or finishing of hardwood flooring, and cabinets such as kitchen, medicine, laundry and storage. Contractors who operate a wood cabinet manufacturing or assembly shop away from the construction site, are to be assigned classification 2907 for the shop manufacturing work. When a contractor's business is assigned classification 2907 for the shop operation, then classification 5206, "Permanent yard or shop," is no longer applicable to the contractor's business for the storage of materials or repair of equipment. This classification includes the installation of counter tops as part of a

(2007 Ed.)

contract which includes the installation of cabinets or other interior finish or carpentry work. Contractors engaged exclusively in the installation of counter tops or as part of a floor covering contract are to be reported separately in classification 0502.

This classification excludes all carpentry work on the exterior of a building, or interior work such as framing interior walls, installing wallboard, taping and texturing walls, plastering, painting, masonry, glazing, insulation, installing overhead garage or exterior doors, concrete, electrical and plumbing work which is to be reported separately in the applicable classification.

Special note: This classification includes the installation of cabinet display areas or showrooms which provide prospective customers an opportunity to inspect the quality of workmanship and products carried by the contractor. Generally, displays or showrooms are installed where the contractors store their materials. It is common for contractors subject to this classification to sell some interior finish-related products, but the intent of these areas is not to sell products to walk-in customers. Sale of these products by an interior finish contractor is included in classification 0513. Classifications 2009, 6309, or similar store classifications, are not to be assigned to a contracting business. Employees engaged exclusively in showing the display areas or showrooms to customers are to be assigned classification 6303 provided all the conditions of the general reporting rule covering standard exception employees have been met.

WAC 296-17A-0514 Classification 0514.

0514-00 Garage or overhead door: Installation, service or repair

Applies to contractors engaged in the installation, service or repair of garage or overhead doors made of wood or metal. As part of a new construction project, the installation usually occurs before the building or structure is painted. Garage or overhead door installation can also occur as a replacement to an existing door or as an alteration or addition to a building or structure. The process involves installing door tracks on both sides of the doorway, inserting the door, which usually consists of panels or sections, into the tracks, and attaching panels or sections to one another. This classification also includes the installation of automatic door openers when performed as a part of the garage or overhead door installation contract, and by the same contractor installing the doors.

This classification excludes the installation, service or repair of commercial automatic door openers when it is not performed as a part of the garage or overhead door installation contract which is to be reported separately in classification 0603; the installation, service or repair of residential automatic door openers when it is not performed as a part of the garage or overhead door installation contract which is to be reported separately in classification 0607; the installation of exterior glass doors and door frames such as nonautomatic and automatic opening doors at retail establishments or com-

mercial buildings which are to be reported separately in classification 0511; the installation of interior or exterior doors and door frames when performed by a framing contractor as part of framing a wood frame building which is to be reported separately in classification 0510; the installation of interior doors and door frames which is to be reported separately in classification 0513; the installation of wood, fiberglass or metal exterior doors as part of a nonwood frame building when performed by employees of the general contractor which is to be reported separately in classification 0518; and the repair or replacement of wood, fiberglass or metal doors on an existing building which is to be reported separately in classification 0516.

0514-01 Nonstructural additions to buildings or structures: Installation, removal, alteration, and/or repair

Applies to contractors engaged in the installation, removal, alteration, and/or repair of nonstructural additions to buildings or structures. Nonstructural metal additions include, but are not limited to, fire escapes, staircases, balconies, railings, roll down shutters, window or door lintels, protective window or door gratings, bank cages, decorative elevator entrances or doors, permanent stadium seating, and wall facades and facings. Generally, the process involves bolting, screwing, riveting, or welding these additions to the interior or exterior of buildings or structures. Contractors who operate a shop to prefabricate the additions are to be assigned the classification applicable for the shop manufacturing work being performed. When a contractor's business is assigned a manufacturing classification for shop operations, classification 5206, "Permanent yard or shop," is no longer applicable to the contractor's business for the storage of materials or repair of equipment.

This classification excludes sheet metal installation such as siding, gutters and downspouts, and nonstructural sheet metal patio covers/carports which are to be reported separately in classification 0519; the installation, repair or dismantling of portable bleachers or stages which is to be reported separately in classification 0603; and the erection of commercial metal carports, service station canopies, and structural iron or steel work as part of a building or structure which is to be reported separately in classification 0518.

WAC 296-17A-0516 Classification 0516.

0516-00 Building repair and carpentry, N.O.C.

Applies to contractors engaged in building repair and carpentry work, not covered by another classification (N.O.C.). This classification applies to carpentry-related framing work on concrete, brick and steel buildings, and to wood framed building renovation and remodeling projects where the structure is not being modified or altered. Typical projects include, but are not limited to: Interior building

demolition ("strip outs") involving only the removal of interior walls, partitions and related construction materials; converting a room from one use to another, such as a bedroom to a study, or a garage to a family room; enlarging or changing the configuration of a room by removing or adding an interior wall; upgrading a kitchen or bathroom; or adding structures such as a wooden deck to an existing building, screening a porch, installing a wood patio cover, or assembling sheet metal tool or garden sheds. Contractors subject to this classification use a variety of dimensional lumber and wood products as well as metal fasteners (nails, screws and bolts), and metal reinforcing or support straps such as joist hangers and post brackets. Technological changes have produced new materials which are replacing wood and wood products. These materials include, but are not limited to, light weight metal studs and plastic and fiber reinforced boards. This classification includes the framing of private residences with light weight metal studs and the installation of earthquake tie downs on residential buildings. This classification also includes specialty service providers or contractors engaged in providing general repair services (handyman) on buildings and dwellings. Classification 0516-00 can be used for these businesses to simplify recordkeeping and reporting if they provide general carpentry work and at least two of the following types of *repair* work; electrical, plumbing, cabinet, interior alteration, painting, drywall, masonry, carpet/lino-leum/laminate, glazing, or appliance repair.

This classification excludes roofing or roof work which is to be reported separately in classification 0507.

0516-01 Wood playground equipment: Installation and/or repair

Applies to contractors engaged in the installation and/or repair of wood playground equipment. Work contemplated by this classification begins after the area of land has been excavated and/or cleared and includes installing wood playground equipment at private residences and in public settings such as, but not limited to, schools, parks, day care centers, churches, and hotels. This classification usually includes a variety of playground equipment comprised of treated wood beams, poles, posts, and a variety of dimensional lumber used in building swings, forts, stationary and swinging bridges, balance beams, climbing towers, slides, and rope and tire walks. Generally, the process involves setting poles or posts with use of a post hole digger, backhoe or tractor equipped with an auger. The poles or posts may be set in concrete. Depending on the piece of equipment being built, use of beams, planks, dimensional lumber, rope, chains, tires, and metal bars or rings, are securely attached with nails, screws, bolts or eye hooks. This classification includes the building of borders surrounding the playground equipment area with beams or railroad ties and the spreading of pea gravel, sand or wood chips underneath the equipment.

This classification excludes the installation of metal playground equipment which is to be reported separately in classification 0603, and the excavation or clearing of land which is to be reported separately in classification 0101.

WAC 296-17A-0517 Classification 0517.

0517-00 Factory built housing units: Set up by contractor or by employees of the manufacturer

Applies to the set up of factory built housing units such as mobile/manufactured homes, modular homes, or prefab cedar homes by contractors who work independently from a sales dealership or by employees of the manufacturer. This classification includes, but is not limited to, delivery of the factory built unit when performed by the set up contractor. The set up process includes placement of the unit or unit sections on blocks or foundations; joining the interior and exterior sections which may involve incidental placement of ridge cap, siding, trim boards, moldings, and interior seams; plumbing and electrical connections; and the installation of skirting, awnings or decks.

This classification excludes mobile home or factory built housing sales dealerships who set up and/or deliver the unit to a sales location or customer's site which are to be reported separately in classification 3415; the delivery of a mobile home or other factory built housing unit by a trucking service which is to be reported separately in classification 1102; the pouring of foundations; and/or the construction of nonstructural sheet metal patio covers/carports, garages or storage sheds regardless if performed by employees of the set up contractor or by another contractor which is to be reported separately in the applicable classification.

0517-01 Building raising, moving and underpinning

Applies to contractors engaged in raising, moving and underpinning buildings. Work contemplated by this classification includes a variety of services involving the change of a building's elevation, location or support structure including incidental shoring and removal or rebuilding of walls, foundations, columns or piers. Employees of the contractor responsible for the overall completion of the project are to be reported in this classification. *Underpinning* is a process to correct wall cracks, foundation settling or collapse of a building or structure. Generally, underpinning involves one of two methods. In the first method, earth around a foundation is removed to permit construction of a new foundation to replace the old one or to allow for the installation of subfoundations to support the existing earth. This would include masonry or concrete work, blasting (when required) and shoring of surrounding ground and building or structure to prevent cave-ins while foundation work is being performed. The second method deals with steel or wooden beams being inserted through a lower point of the building or structure. The beams are raised and supported by jacks until the foundation is relieved of some or all of its ground pressure. *Building raising or moving* is a process to change a building's position, either raised to a new elevation in place or moved to a new site, or both. Workers, subcontractors or utility companies will first disconnect all utilities from the building or structure to be moved. Workers will remove all detachable items and open foundation walls to allow metal or wood beams to be placed under the floor structure. Once beams are

placed, hydraulic jacks are used to lift the building or structure clear of the old foundation high enough for a new foundation to be constructed, or high enough to allow the carrying vehicle (trailer) to be placed under the beams if it is to be moved. The trailer is moved along a previously graded and cleared path to the new location. The building or structure is then set down on a new foundation which is usually constructed by a separate contractor. Miscellaneous repair work is performed and utilities are reconnected.

This classification excludes contractors engaged in clearing paths, grading and excavation work who are to be reported separately in classification 0101; contractors who disconnect or hook-up underground gas, water or power lines who are to be reported separately in classification 0107; contractors who construct concrete foundations for wood frame or nonwood frame buildings who are to be reported separately in classification 0217, or in classification 0518 as applicable; and contractors engaged in the delivery and set up of factory built housing units who are to be reported separately in classification 0517.

WAC 296-17A-0518 Classification 0518.

0518-00 Building construction, N.O.C.: Alterations and concrete construction, N.O.C.

Applies to contractors engaged in building construction, not covered by another classification (N.O.C.), including alterations. Work contemplated by this classification includes nonwood frame buildings and structures such as, but not limited to, waste treatment and waste disposal plants, fish hatcheries and stadiums in which the superstructure, skeleton framework, or building shell consists of concrete, iron or steel, or a combination of concrete, iron, steel and/or wood. This classification makes no distinction to the size of the structure or number of stories within the building and includes all concrete tilt-up buildings. Activities include, but are not limited to, the set up and tear down of forms, placement of reinforcing steel, rebar, or wire mesh, pouring and finishing concrete within the building or structure such as foundations, monolithic slabs, ground supported floor pads, precast or poured in place bearing floors or wall panels, columns, pillars, balconies, stairways, including the raising and/or standing of concrete tilt-up walls or precast floors and wall portions, and raising and securing metal frames or members into place using a crane or boom and securing by bolt, rivet or weld.

This classification excludes all other phases of construction which are not in connection with building the superstructure, skeleton framework, or building shell such as, but not limited to, site preparation and excavation which is to be reported separately in classification 0101; bridge or tunnel construction which is to be reported separately in classification 0201; pile driving which is to be reported separately in classification 0202; underground utilities and systems which is to be reported separately in the classification applicable to

the work being performed; asphalt work which is to be reported separately in the classification applicable to the work being performed; concrete paving or flatwork not contained within the building which is to be reported separately in the classification applicable to the work being performed; new landscape construction which is to be reported separately in classification 0301; brick, block, granite, marble, slate or masonry work which is to be reported separately in classification 0302; plastering, stuccoing and lathing work which is to be reported separately in classification 0303; plumbing work which is to be reported separately in classification 0306; HVAC work which is to be reported separately in classification 0307; carpet and tile work which is to be reported separately in classification 0502; exterior painting which is to be reported separately in classification 0504; roof work which is to be reported separately in classification 0507; installation of glass panels, curtain walls or windows which is to be reported separately in classification 0511; installation of insulation, sound proofing or suspended acoustical ceilings which is to be reported separately in classification 0512; interior finish carpentry such as the installation of interior doors, cabinets, fixtures or molding which is to be reported separately in classification 0513; installation of overhead doors, garage doors which is to be reported separately in classification 0514; installation of exterior doors and door frames, interior framing and carpentry work which is to be reported separately in classification 0516; installation of sheet metal siding or gutter work which is to be reported separately in classification 0519; interior building painting which is to be reported separately in classification 0521; electrical work which is to be reported separately in classification 0601; the installation of elevators and elevator door bucks which is to be reported separately in classification 0602; new dam construction projects which are to be reported separately in classification 0701; wood frame buildings which are to be reported separately in classification 0510; sheet metal tool sheds which are to be reported separately in classification 0516; brick or block buildings which are to be reported separately in classification 0302 and wallboard installation, taping or texturing which are to be reported separately in the applicable classifications.

0518-01 Metal carport: Erection

Applies to contractors engaged in the erection of metal carports such as those used for commercial parking lots. This classification includes raising and securing metal frames, members, or I-beams into place with a boom or crane and securing by bolt, rivet or weld.

This classification excludes the erection of nonstructural sheet metal patio cover/carports which is to be reported separately in classification 0519, and the erection of a wood carport which is to be reported separately in the applicable carpentry classification (see classification 0510 for additional information).

0518-02 Metal service station canopy: Erection

Applies to contractors engaged in the erection of metal service station canopies. Work contemplated by this classification includes, but is not limited to, raising and securing metal frames, members, or I-beams into place with a boom or crane and securing by bolt, rivet or weld.

This classification excludes the removal or installation of underground tanks which is to be reported separately in classification 0108, and the removal or installation of service station pumps which is to be reported separately in classification 0603.

0518-03 Building wrecking or demolition - iron, steel, concrete, or wood

Applies to contractors engaged in wrecking or demolishing iron, steel, concrete, or wood buildings or structures not covered by another classification. Work contemplated by this classification includes incidental sales of materials, burning or hauling away of debris, and incidental ground clearing activities at the site to permit other use of land. Wrecking and demolition involves barricading the site and walkways to keep nonconstruction workers out of the area to prevent possible injury to them. Guards, watchmen, and traffic controllers (flaggers) are on-site and in adjacent areas to keep work areas secure. Salvage of materials is usually done by hand. Loading of trucks with debris is by chute or front end loaders. Actual demolition of a building or structure is performed in a variety of ways, including dismantling board by board, by crane (pulling sections to the ground), by crane equipped with a steel ball which is swung from the boom of the crane, or by explosives. Employees of the contractor responsible for the overall completion of the project are to be reported in this classification.

This classification excludes security guards employed by contractors to guard the job site before or after the construction work activity hours who are to be reported separately in classification 6601; establishments primarily engaged in selling salvaged building materials which are to be reported separately in classification 2009; interior building demolition ("strip outs") which is to be reported separately in classification 0516; and all iron, steel, concrete, or wood building construction which is to be reported separately in the applicable classification.

WAC 296-17A-0519 Classification 0519.

0519-00 Building construction sheet metal work, N.O.C.

Applies to contractors engaged in the installation or repair of sheet metal work in building construction, not covered by another classification (N.O.C.). Work contemplated by this classification applies to interior and exterior sheet metal work for residential or commercial buildings and includes wood frame, pole buildings, and nonwood frame buildings. This classification includes the installation of metal siding, gutters and downspouts, nonstructural sheet metal patio covers/carports, metal industrial shelving, stainless steel counter tops, and interior wall panels (such as the back splash behind stoves or sinks). Contractors who operate a sheet metal fabrication shop or prefabricate the gutters, downspouts and posts in a shop away from the construction

site are to be assigned classification 3404 for the shop operations. When a contractor's business is assigned classification 3404 for shop operations then classification 5206 "Permanent yard or shop" is no longer applicable to the contractor's business for the storage of materials or repair to equipment.

This classification excludes sheet metal work as part of heating ventilation and air conditioning systems installation which is to be reported separately in classification 0307; the installation of aluminum or sheet metal as part of roof work which is to be reported separately in classification 0507; the installation of light weight sheet metal tool sheds which is to be reported separately in classification 0516; and the installation of commercial metal carports and service station canopies which is to be reported separately in classification 0518.

WAC 296-17A-0521 Classification 0521.

0521-00 Painting building interiors; wallpaper hanging/removal

Applies to contractors engaged in painting building interiors regardless of the height inside the building. This classification includes building interiors such as, but not limited to, single and multiple story residential houses and commercial buildings, warehouses, factories, coliseums, theaters, stores and churches. The following structures are examples which would *not meet* the definition of a building or qualify as interior painting: Bridges, refineries, grain silos, water towers, service station canopies, or tanks. Paint is applied by brush, roller or spray to a variety of surfaces such as wood, wallboard, plaster, stucco, metal, concrete, or other types of surfaces found within the interior of a building. This classification includes all preparation work such as the set up of scaffolding, sanding, removal of old paint or asbestos, taping or masking, and clean up work. This classification also includes the hanging or removal of wallpaper. The process of hanging wallpaper includes cleaning or scraping walls to ensure the wallpaper will adhere to the surface. Depending on the type of wallpaper, adhesive is applied to the wall surface, the wallpaper, or both. Patterns are matched and the strip is applied to the surface and brushed smooth to remove the air pockets. This process is repeated until the entire job is complete. This classification also includes refinishing or resurfacing of tubs, sinks, appliances and countertops.

This classification excludes exterior painting of buildings or structures which is to be reported separately in classification 0504. Classifications 0521 and 0504 may be assigned to the same employer provided accurate records are maintained which distinguish interior building painting contracts from exterior building or structure painting contracts. This classification also excludes contractors engaged in waterproofing buildings or structures N.O.C., pressure washing services or sandblasting of buildings or structures, lead paint abatement, and the exterior painting of buildings or structures, including interior/exterior tanks which are all to be reported separately in classification 0504; painting of murals or other artwork on the interior of buildings which is to be reported separately in classification 4109; and painting of

murals or other artwork on the exterior of buildings which is to be reported separately in classification 0403.

0540-00 Wallboard installation, including scrapping - discounted rate (to be assigned only by the drywall underwriter)

Applies to contractors engaged in the installation or repair of wallboard. This classification includes the installation of wallboard, drywall, or sheetrock in all types of residential or commercial buildings or structures. The process consists of cutting wallboard with a utility knife, hacksaw, or power saw to the desired size and then butting material into place and nailing or screw fastening to wood or metal wall studs. Electrical box, window, or door openings are cut out where needed. Installation may require the use of scaffolding, ladders, specialty lifts, or stilts when working at heights, including the use of T holders or hydraulic lifts to hold material being installed on ceilings. This classification also includes wallboard scrapping (picking up and discarding unused portions of wallboard remnants or scraps) at the construction site when performed by employees of the wallboard contractor.

This classification excludes delivery of materials to the construction site by material dealer employees which is to be reported separately in the applicable delivery classification; delivery and stocking of materials to the construction site when performed by employees of the wallboard contractor which is to be reported separately in classification 1101; wallboard taping (including priming and texturing when performed by employees of the wallboard contractor) which is to be reported separately in classification 0541 or 0551; wallboard scrapping by nonwallboard contractor employees which is to be reported separately in the applicable construction debris cleanup classification; plastering, stuccoing or lathing work which is to be reported separately in classification 0303; and the framing of nonbearing walls when performed by the drywall contractor which is to be reported separately in classification 0516.

0541-00 Wallboard taping, including texturing and priming -discounted rate (to be assigned only by the drywall underwriter)

Applies to contractors engaged in taping wallboard in residential or commercial buildings or structures. The process of taping occurs after wallboard, drywall, or sheetrock has been installed and involves taping the seams, and spreading joint compound over the seams and nail or screw heads. When dry, the seams are sanded to remove any rough edges. This classification includes the following activities when per-

formed by employees of a wallboard contractor and part of the taping process which includes wallboard texturing (a putty-like material that is sprayed over the prepared wallboard in a clump-like application and smoothed with a trowel or putty knife), and wallboard priming (the application of an undercoating that may be applied either directly to the wallboard or after it has been textured). This classification also includes incidental painting when performed by employees of a wallboard contractor and part of the taping process.

This classification excludes wallboard installation which is to be reported separately in classification 0540 or 0550; wallboard priming and texturing not performed by employees of the wallboard contractor and part of the taping process which is to be reported separately in classification 0521; interior painting which is to be reported separately in classification 0521; and wallboard scrapping by nonmaterial dealer employees which is to be reported separately in classification 0540 or 0550.

[Title 296 WAC—p. 344]

0550-99 Wallboard installation (only to be assigned by the drywall specialist)

Applies to drywall contractors who consider themselves to be independent contractors, have no employees, and have not elected owner coverage for themselves.

The purpose of assigning this classification is to allow the independent contractor the opportunity to be checked for account in good standing for prime contractor liability.

Special note: Any contractor who hires employees or elects owner coverage is required to report in the applicable construction classification.

WAC 296-17A-0601 Classification 0601.

0601-00 Electrical wiring in buildings; electrical wiring, N.O.C.; Permanent flood lighting: Installation

Applies to contractors engaged in the electrical wiring of buildings, or in electrical wiring not covered by another classification (N.O.C.). Work contemplated by this classification is characterized as general electrical work, including installation, service or repair at residential and commercial settings.

(2007 Ed.)

This classification includes electrical work which generally begins at the power meter and extends to the inside or outside of the building or its exterior setting, including, but not limited to, the installation of the breaker panel, fuses, plugs and snap switches, rough-in electrical work to include the stringing of insulated or encased wiring and mounting of plug-in or switch housing boxes, installation of plug-in, dimmer and switch units; installation of light fixtures, recessed canister and fluorescent lighting, track lighting, and other interior and exterior lighting fixtures, installation of ceiling fans, and the installation of residential and commercial appliances such as built-in microwaves, dishwashers, electric ovens and oven hoods. This classification also includes the installation of permanent flood lighting at stadiums and parks. Generally, flood lighting fixtures are mounted onto poles, buildings, or other structures; the erection or construction of those structures is not included in this classification.

This classification excludes the installation of overhead or underground power lines and poles by an electric utility company which is to be reported separately in classification 1301; the installation of overhead power lines by a nonelectric utility contractor which is to be reported separately in classification 0509; and the installation of underground power lines by a nonelectric utility contractor which is to be reported separately in classification 0107.

0601-07 Electrical machinery and auxiliary apparatus: Installation and repair

Applies to contractors engaged in the installation and repair of electrical machinery and auxiliary apparatus such as, but not limited to, heavy motors, generators, converters, transformers, compressors and power switchboard equipment. Generally, this type of work occurs at industrial or commercial plants, power plants, or sites where large machinery is to be installed. Work contemplated by this classification includes extending insulator or encased wiring or cable from the power meter, breaker or control panel to the physical location where the machinery is to be installed, and incidental wiring of the machinery or auxiliary apparatus.

0601-08 Temporary floodlights or search lights: Erection

Applies to contractors engaged in the erection or set up of temporary floodlights away from the contractor's premises. Usually, these lights are mounted on a truck or trailer, then transported to the customer site or location where they are operated with use of a generator. Uses of temporary floodlights and searchlights include, but are not limited to, advertising grand openings or special sales at shopping malls, auto dealers, grocery and outlet stores, marking the location of special events such as carnivals or concerts, or at construction project sites.

This classification excludes the erection of permanent floodlight fixtures to poles, buildings or structures which is to be reported separately in classification 0601-00.

0601-15 Television cable: Installation service or repair in buildings by contractor

Applies to contractors engaged in the installation, service or repair of television cable in buildings. This classification includes the installation of television cable lines in residential and commercial buildings and includes the dropping of lines from the pole to the house, mounting of cable control

panel boxes to the exterior of buildings, extending cable, mounting multiple line adapter units and relay switches, and affixing the cable end for hook-up to televisions and other stereo components.

This classification excludes the installation of underground or overhead television cable lines when performed by a television cable company which is to be reported separately in classification 1305; installation of underground television cable lines when performed by a nontelevision cable company contractor which is to be reported separately in classification 0107; and installation of overhead television cable lines from pole to pole by a nontelevision cable company contractor which is to be reported separately in classification 0509.

WAC 296-17A-0602 Classification 0602.

0602-03 Elevators or elevator door bucks: Installation, service and/or repair

Applies to contractors engaged in the installation, service and/or repair of freight or passenger elevators and elevator door bucks in private residences and commercial buildings or structures. Generally, the process begins after the elevator shaft has been erected, to include, but not be limited to, the installation of elevator units, doors, door bucks, cables and hoisting systems, motors, and electrical apparatus and wiring in connection with operation of the elevator.

This classification excludes the installation or repair of escalators and industrial machinery which is to be reported separately in classification 0603, and the erection of temporary construction elevators as part of a construction project which is to be reported separately in the classification applicable to the phase of construction being supported.

WAC 296-17A-0603 Classification 0603.

0603-00 Machinery: Installation, service and/or repair, N.O.C.; Millwright work, N.O.C.

Applies to contractors engaged in the installation, service and/or repair of heavy machinery or equipment at a customer's location which is not covered by another classification (N.O.C.). Millwright work and the service or repair of engines and gas machines is also included. A millwright is a technician who specializes in installing and repairing industrial machinery. Typical customers include, but are not limited to, wood, metal and plastic manufacturing plants, fuel refineries, and mills. Types of machinery installed and repaired includes, but is not limited to, escalators, conveyor

systems, printing presses, lathes, mill saws, dairy equipment and wind machines. (Store operations of dairy equipment/supply dealers or wind machine dealers are to be reported separately in classification 6407.) Work contemplated by this classification includes, but is not limited to, the pouring of a concrete pad on which the machinery will be installed, cutting and welding of brackets and mountings, assembling component parts, any incidental electrical connections needed to complete the installation, and calibrating the controls and testing the machinery's operation when done by employees of an employer having operations subject to this classification. Placement of heavy machinery must often be done with cranes or by rigging hoists. This classification also includes the dismantling and removal of machinery and equipment covered by this classification.

0603-05 Dynamos, electrical generators and turbines: Installation, service and/or repair

Applies to contractors engaged in the installation, service and/or repair of dynamos, electrical generators and turbines at a customer's location. A dynamo is a generator of direct electrical current; a turbine is a mechanism that converts moving fluid into mechanical power. Customers include, but are not limited to, electrical utilities, manufacturing plants, mills, and telecommunications companies. Work contemplated by this classification includes, but is not limited to, preparation of a concrete pad on which the machinery will be installed, cutting and welding of brackets and mountings, assembly of component parts if necessary, any incidental electrical connections needed to complete the installation, and calibrating and testing the machinery's operation when done by employees of an employer having operations subject to this classification. Placement of heavy machinery must often be done with cranes or by rigging hoists. Also included is the dismantling and removal of dynamos, generators and turbines.

This classification excludes the installation of underground overhead power lines and poles by an electric utility company which is to be reported separately in classification 1301; the installation of overhead power lines by a nonelectric utility contractor which is to be reported separately in classification 0509; and the installation of underground power lines by a nonelectric utility contractor which is to be reported separately in classification 0107.

0603-07 Industrial plant maintenance by contractor

Applies to contractors engaged in maintaining, repairing and installing machinery on a long-term contract basis for customers at the customers' location. Customers include, but are not limited to, manufacturing or chemical plants, petroleum refineries, food processing plants and mills. Work contemplated by this classification includes all routine maintenance and repair of a customer's equipment such as, but not limited to, cleaning, oiling and regularly scheduled maintenance and replacement of machinery or machinery parts, equipment and other mechanical installations that are part of the customer's building when done by employees of an employer having operations subject to this classification.

0603-08 Metal playground equipment, portable bleachers or stages, above ground swimming pools: Installation, dismantling, and/or repair

Applies to contractors engaged in the installation, dismantling, and/or repair of metal playground equipment, portable bleachers or stages, and above ground swimming pools. Playground equipment includes, but is not limited to, swings, monkey bars, merry-go-rounds, and slides. Work contemplated by this classification includes all operations necessary for the erection of metal playground equipment including, but not limited to, boring holes in the ground (usually with an auger) into which the various pieces of equipment will be set in concrete, any incidental cutting, welding, drilling and bolting of the tubular steel components which are usually from one to four inches in diameter, and fastening on the chains, swings, handlebars, sliding surface, platforms, bench seats, or other components. This classification also includes the application of any finish material or paint when done by employees of an employer having operations subject to this classification.

This classification excludes the installation of wood playground equipment which is to be reported separately in classification 0516.

0603-09 Commercial equipment: Installation, dismantling, service, and/or repair

Applies to contractors engaged in the installation, dismantling, service, and/or repair of commercial equipment such as, but not limited to, commercial dishwashing units, bakery and restaurant ovens, stoves, grills, sanitizers, steam tables, car washing equipment, commercial laundry equipment, electric entry doors, dry cleaning equipment, gas pumps, or parimutuel totalizer equipment at horse racing facilities. Work contemplated by this classification includes, but is not limited to, placing and leveling the equipment, any assembly of component parts if necessary, connecting or bolting to the wall or floor, making any necessary incidental plumbing or electrical connections, and calibrating and testing the equipment when done by employees of an employer having operations subject to this classification. Some pieces of equipment in this classification may be large enough that they must be moved and positioned with hoists or cranes. Also included is the dismantling and removal of commercial equipment.

WAC 296-17A-0604 Classification 0604.

0604-04 Scrap metal dealers or processors: Collecting, sorting and reduction of scrap metal

Applies to establishments engaged as dealers or processors of ferrous and nonferrous scrap metals for resale. Fer-

rous metals are primarily composed of iron or steel. Nonferrous metals include, but are not limited to, aluminum, brass, bronze, copper, lead, magnesium, pewter, tin, and zinc. If the dealer collects scrap metals from mills, foundries, refineries, or fabricators, they usually leave dumpster containers with the "customer" and pick up the full containers with their own trucks. If they buy scrap from independent collectors, the collectors bring the metals to the dealer's yard. In either case, the metal is weighed, graded, and sorted by type at the dealer's yard. It may be resold as is to customers who occasionally come to the yard; however, it is usually further processed and prepared for shipping to industrial customers. Shipping is done by rail, ship, or common carrier. As an incidental service, scrap dealers may also buy back recyclable goods such as, but not limited to, aluminum cans, glass, and batteries; this activity is included within the scope of this classification when performed by employees of employers subject to this classification. Processing includes one or more of the following operations: Cutting off impure metals or plastic parts with acetylene cutting torches; cutting scraps into smaller pieces with alligator shears or cutting torches; slicing heavier scrap metals or flattened automobiles with hydraulic guillotine shears; crushing auto bodies with crushers; ripping apart large pieces of scrap with shredders; separating metal from rubber, plastic, wood, dirt, and other materials with magnetic separators; removing insulated coverings from copper wire with wire choppers, and compressing scraps into bales with balers. Additional machinery includes, but is not limited to, conveyors, scales, forklifts, tractor-trailer trucks, cranes, electromagnets or grapples, front end loaders, and grinders. Because of recent EPA regulations, instead of melting down metals in their own furnaces, scrap dealers usually ship it to foundries or steel mills that conform with the regulations. However, reduction of metals is included within the scope of this classification if performed by an establishment subject to this classification.

This classification excludes dealers that sell new iron, steel, wire or cable which are to be reported separately in classification 2004; automobile or truck wrecking or dismantling establishments which are to be reported separately in classification 1104; and recycle, collection, and receiving stations (known as buy-back stations) for rags, bottles, paper, and metal containers which are to be reported separately in classification 2102.

Special note: Scrap metal dealers vary widely in the type of metals or usable items they buy and sell. Often the term "junk yards" is used to describe dealers who carry a sizable inventory of used goods, such as, but not limited to, bottles, rags, paper, appliances, nails, rubber, in addition to scrap metal in varying amounts. It is the activity of the business that must be considered when determining the classification, rather than how the business refers to its activities. Receiving/buy-back stations for recyclable items in classification 2102 are different from dealers in classification 0604. Receiving stations buy back only recyclable items which they do not process, other than condensing the materials into bales, and selling it to others.

WAC 296-17A-0606 Classification 0606.

0606-01 Vending, coin-, or token-operated machines: Installation service and/or repair

Applies to establishments engaged in the installation, service and/or repair of vending, coin- or token-operated machines. Operations contemplated by this classification include, but are not limited to, delivering machines to desired location, unloading and setting up machines, servicing machines, collecting money, repairing machines, and restocking product into machines. Coin-operated machines include pay telephone booths, weight machines, juke boxes, change makers, pull tabs, slot machines, and similar gaming devices. Vending machine products include, but are not limited to, soft drinks, candies, sandwiches, stamps, cigarettes, frozen desserts, coffee, and personal hygiene products. This classification also includes the preparation of products such as, but not limited to, salads, sandwiches, cookies, and desserts, and honor snack food services when performed by employees of an employer subject to this classification.

This classification excludes honor snack services operated independently from, and not in connection with, coin-operated vending machine services which are to be reported separately in classification 1101; and the installation of parking meter units which is to be reported separately in classification 0105.

0606-02 Fire extinguisher and fire safety equipment: Sales and service

Applies to establishments engaged in the sales and servicing of fire extinguishers and related safety equipment. Operations contemplated by this classification include, but are not limited to, retail and wholesale store operations, field testing services, recharging services, and related safety training. Establishments subject to this classification routinely sell a variety of home and commercial type fire extinguishers, protective clothing, gloves, and hats, specialty shoes, smoke and fire alarms, and first-aid kits. Fire extinguisher sales and service companies may also carry other safety items such as traffic cones, construction and speed signs.

0606-03 Money collecting service of coin-operated and vending machines

Applies to establishments engaged in the removal and/or replacement of money into coin-operated machines. Operations contemplated by this classification are limited to the collection and replenishing of coins in coin-operated or vending machines. This classification also applies to replenishing currency in automated teller machines (cash machines) and removal of coins from parking meters and pay telephones.

This classification excludes the servicing of machines, placement of products into machines for sale, installation of machines, or any product preparation, which is to be reported separately in the applicable classification; installation of free standing automated teller machines which is to be reported separately in classification 0607; establishments engaged in the construction of structures which house automated teller machines, such as those found in parking lots of shopping

centers, which are to be reported separately in the applicable construction classifications.

0606-12 Coin- or token-operated amusement devices in stores or shopping malls, N.O.C.: Installation, removal, service and/or repair

Applies to establishments engaged in the placement and servicing of coin- or token-operated amusement devices, not covered by another classification (N.O.C.), within stores and shopping malls for use by the general public. Operations contemplated by this classification include, but are not limited to, the installation, service, repair, or removal of the devices, such as, but not limited to, video games, pinball machines, carousels and small amusement rides for children. Establishments subject to this classification generally are not involved in the operations of arcades or amusement rides. If an establishment subject to this classification also operates a video or amusement arcade, such operations may be reported separately in classification 6406 provided all the conditions of the general reporting rules covering the operation of a secondary business have been met.

WAC 296-17A-0607 Classification 0607.

0607-11 Household appliances: Installation, service and/or repair by nonstore service or repair company; dealers of used household appliances

Applies to establishments engaged in the installation, service and/or repair of electrical or gas household appliances and to dealers of used electrical or gas household appliances. Many establishments covered by this classification have small retail store operations where they offer reconditioned or second hand appliances for sale, a parts department, and an area where appliances brought into the shop are repaired. Although this classification deals primarily with service away from the shop, the store, parts department and shop operations are included within the scope of this classification. The term "household appliances" includes, but is not limited to, stoves, ovens, ranges, dishwashers, refrigerators, trash compactors, television sets, residential type garage door openers, washing machines, and clothes dryers. This classification also applies to the installation, service or repair of automated teller machines. Repair services provided by establishments subject to this classification may also include related smaller appliances such as video players, portable television sets, stereo systems, microwave and toaster ovens, blenders, coffee makers and mixers. The *servicing* of water softening systems, coffee and juice machines, and beer taps is also included in this classification.

This classification excludes dealers of new household appliances who are to be reported separately in classification 6306; installation, service, and/or repair of commercial appli-

ances such as those used in laundries, bakeries, and restaurants which is to be reported separately in classification 0603; installation, service, and repair of commercial garage doors and openers which is to be reported separately in classification 0603; installation of water softening systems which is to be reported separately in classification 0306; and small table top or counter top appliance stores which are to be reported separately in classification 6406.

Special note: Classification 0607 is distinguishable from classification 6306-02 operations in that appliance stores covered in classification 6306-02 are engaged primarily in the sales of new appliances. Although classification 6306 includes repair of appliances, most repairs are related to warranty work and represent a minor part of the business. By contrast, the repair of appliances in classification 0607 is the primary activity of the business.

0607-16 Television antenna or satellite dish: Installation, removal, service and/or repair

Applies to establishments engaged in the installation, removal, service and/or repair of television antennas or satellite dish receiving units. Operations contemplated by this classification are limited to rooftop installation of television antennas or ground or rooftop-mounted satellite dish reception units. Establishments covered by this classification will generally employ technicians and installers to install systems and trouble shoot reception problems. Equipment is limited primarily to delivery trucks, vans, ladders, and small power and/or hand tools.

This classification excludes specialty contractors who install, remove, service or repair antennas, dish units, and/or other transmitting/receiving apparatus to a structure covered by classification 0508, who are to be reported separately in classification 0508; and establishments engaged in the sale of new console type and big screen televisions who also sell and install antennas which are to be reported separately in classification 6306.

0607-17 Safes or vaults: Installation, removal, service and/or repair.

Lock sets and/or dead bolt locks: New installation

Applies to contractors engaged in the installation, removal, service and/or repair of all types of safes or vaults regardless of size or application, private mail or postal boxes, or safe deposit box units within buildings. Safes and vaults are found in businesses such as, but not limited to, banks, jewelry stores, rare coin and stamp stores, grocery stores, and gasoline service stations, as well as in private residences. Services contemplated by this classification include, but are not limited to, safe opening services.

New installation of lock sets and/or dead bolt locks on buildings or structures by contractor or by employees of a locksmith also applies to this classification. The term new installation applies to installing a lock set (locking doorknob) or a dead bolt where none previously existed. The process consists of measuring and marking where the unit is to be placed on the door, boring holes into the door to accept the lock set or dead bolt lock, and installing the lock set unit using a power drill and basic hand tools.

This classification excludes the installation of a *replacement* lock set or dead bolt lock unit by employees of a lock-

smith, and locksmith store operations which are to be reported separately in classification 6309.

0607-18 Window/door blinds, shades, curtains and drapes: Installation

Applies to contractors and employees of store operations who are engaged in the installation of indoor or outdoor window coverings, such as, but not limited to, blinds, shades, screens, exterior roll shutters and draperies or curtains, but does not include awnings. The process consists of marking the location of covering on the frame or opening, securing brackets or hardware, rods and poles, and installing the covering.

This classification excludes the installation of window and door awnings which is to be reported separately in the applicable classification, and the manufacture of coverings which is to be reported in the applicable classification.

Special note: Care should be taken when considering the assignment of a store classification to an establishment engaged in the installation of coverings to verify that a store exists. It is common for establishments subject to this classification to have show rooms to help customers visualize covering products available for sale. These establishments have little or no product available for immediate sale, as most items are special order from the manufacturer. A bona fide window/door covering store will have a large assortment of coverings, as well as related home interior products such as, but not limited to, pillows, small rugs, and accent pieces, readily available for sale to customers.

0607-19 Advertising or merchandise display: Set up or removal within buildings by nonstore employees

Applies to contractors engaged in the set up or removal of advertising or merchandise displays within buildings for retail or wholesale store customers. Operations contemplated by this classification will vary from seasonal panoramas with extensive carpentry, painting, and art work to dressing mannequins to be displayed in store windows.

This classification also applies to establishments engaged in providing merchandising services, not covered by another classification, (N.O.C.), without the responsibility of delivering products to the customer's place of business. Merchandising services contemplated by this classification include, but are not limited to, taking inventory of goods on hand, restocking, reordering, removing outdated or damaged merchandise from shelves, and/or assembling temporary displays.

This classification excludes employees of store operations engaged in setting up displays who are to be reported separately in the applicable store classification as this is a common store activity, and merchandising establishments or employees who deliver products to their customer's place of business, and may also perform related merchandising functions, who are to be reported separately in classification 1101.

0607-21 Meat slicer or grinder: Installation, service and/or repair

Applies to contractors and employees of equipment manufacturers engaged in the installation service and/or repair of meat cutting, slicing, or grinding equipment within stores, restaurants, or processing plants. Repair may be per-

formed at the customer's location or in a shop operated by an employer subject to this classification. This classification includes repair shops, field technicians, installers, and warehouse or parts department employees.

Special note: Establishments subject to this classification generally do not have store operations. Equipment is generally ordered from the manufacturer or distributor and shipped to the customer's location where it will be installed. In the event that an establishment subject to this classification has a store operation it is included within classification 0607.

0607-22 Protective bumpers: Installation

Applies to contractors engaged in the installation of protective bumpers on structures such as, but not limited to, store loading docks for freight or cargo. Operations contemplated by this classification are limited to measuring the dock to be fitted with a rubber bumper, finish cutting or otherwise fabricating the rubber pieces to fit the required application, and fastening the dock bumper with the use of hand tools. Dock bumpers are made of rubber from recycled tires or similar pliable materials.

This classification excludes the manufacture of loading dock bumpers which is to be reported separately in the applicable manufacturing classification.

0607-23 Cellular phone systems or audio components: Installation in vehicles, service and repair

Applies to establishments engaged in the installation of cellular phone systems and/or audio components in vehicles. Audio components include, but are not limited to, radios and stereo systems, speakers and amplifiers, alarm systems, television units, antennas, two-way radio systems. This classification applies to installation employees of stores that sell products as well as to auto service centers that specialize in the installation of products covered by this classification.

This classification excludes retail and wholesale store operations which are to be reported separately in the applicable store classification.

WAC 296-17A-0608 Classification 0608.

0608-01 Electrical alarm systems: Installation, service, and/or repair

Applies to contractors engaged in the installation, service, and/or repair of electrical alarm systems such as, but not limited to, burglar, smoke, security, and fire, within buildings. Operations contemplated by this classification include, but are not limited to, installing low voltage wiring for secu-

rity units, connecting control panels, installing motion or magnetic sensors on doors, windows, and hallways, installing security cameras and recording equipment, and installing smoke and fire alarm units on walls or ceilings. This classification includes both field and shop operations.

0608-02 Intercom or audio call box: Installation, service, and/or repair

Applies to contractors engaged in the installation, service, and/or repair of all types of building or plant audio communication systems such as, but not limited to, intercoms, sound and paging systems in stores and shopping malls, and call box units in factories and refineries. Operations contemplated by this classification include, but are not limited to, installation of low voltage wiring, installation of audio and speaker units and connecting control units. This classification includes both field and shop operations.

0608-04 Telephone and/or telephonic equipment - prewire by contractor: Installation, service, and/or repair

Applies to contractors engaged in the installation, service, and/or repair of all types of telephone and/or telephonic equipment within residences, office buildings, stores and shopping malls, factories, refineries or other types of buildings. Operations contemplated by this classification include, but are not limited to, installation of low voltage wiring, installation of telephone units, and connecting control units. This classification includes both field and shop operations, as well as contractors engaged only in prewiring buildings for telephone and computer systems, but who do not install equipment.

0701-00 New dam construction: All operations in dam site area

Applies to contractors engaged in the construction of new dams only, and includes all operations in the dam site area. A dam is a barrier built across a waterway to control the flow or level of water. Work contemplated by this classification includes the construction of the foundation and substructure such as, but not limited to, earth and rock excavation; boring or tunneling; pile driving or shaft sinking; caisson work; erection of cofferdams; placement of reinforcing steel and rebar; setting and stripping of forms, false work (temporary forms and support structures), concrete distributing apparatus; erection of scaffolds; pouring and finishing concrete; and the placement of gates, turbines, control towers and electrical wiring apparatus. This classification also includes the incidental construction of fish ladders as part of the new dam construction project.

This classification excludes all other construction, service, or repair work done as part of an existing dam which is

to be reported separately in the classification applicable to the phase of construction work being performed. For example, the inspection of the foundation by divers is to be reported separately in classification 0202; the patching of cracks in the dam is to be reported separately in classification 0518.

0803-00 Cities and towns - all other employees

Applies to employees of cities or towns who perform manual labor, or who supervise a work crew performing manual labor such as custodial or maintenance, and machinery or equipment operators including transit bus drivers. This classification includes administrative personnel such as engineers, safety inspectors, and biologists, who have field exposure, and also includes store and stock clerks. For purposes of this classification, field exposure is defined as any exposure other than the normal travel to a work assignment, such as an auditor or social worker would encounter.

This classification excludes municipal power districts which are to be reported separately in classification 1301; privately owned and operated bus or transit systems which are to be reported separately in classification 1407; irrigation and waterworks operations which are to be reported separately in classification 1507; law enforcement officers who are to be reported separately in classifications 6905 and 6906, as appropriate; fire fighters who are to be reported separately in classification 6904; volunteers who are to be reported separately in classification 6901; and clerical office and administrative employees who are to be reported separately in classification 5305.

0901-00 Ship building and/or repair, N.O.C. (to be assigned only by the maritime underwriter)

Applies to establishments engaged in the building and/or repair of ships not covered by another classification (N.O.C.) and to the dismantling of hulls. Ships contemplated by this classification are recreational vessels under sixty-five feet and some commercial vessels such as, but not limited to, military vessels, tugs, scows, and barges. This classification may also include vessels over sixty-five feet that do not meet the situs and status provisions of the United States Longshore

and Harbor Workers Compensation Act. This classification includes shop operations.

This classification excludes wood boat building and repair which is to be reported separately in classification 2903; sheet aluminum boat building which is to be reported separately in classification 3404; fiberglass boat building which is to be reported separately in classification 3511; plate aluminum boat building which is to be reported separately in classification 5209; and boat dealers, marinas, and boat house operations including repair centers which are to be reported separately in classification 3414.

Special note: This classification is seldom assigned as most work would be covered by LHWCA. Commercial vessels included in this classification are required to have a Small Vessel Exception Certificate issued by the U.S. Department of Labor.

WAC 296-17A-1002 Classification 1002.

1002-00 Sawmills: Operation and maintenance

Applies to establishments engaged in the operation and maintenance of a sawmill. Sawmills receive raw logs which they usually store temporarily in their yard before cutting them into rough and finished lumber. This classification includes operations such as, but not limited to, loading raw logs onto the conveyor or log slip; sawing logs with a variety of head, cut-off, circular or band saws; grading and sorting lumber; drying green (wet) lumber; and the stacking and storing of lumber. The raw logs are cut into rough lumber, such as cants and blocks, or into finished lumber, such as posts, planks or boards.

This classification excludes all operations conducted in the woods, such as logging or use of a portable sawmill, which is to be reported separately in classification 5001, and establishments engaged *only* in the manufacturing of wood, veneer, veneer products, or lumber remanufacturing which is to be reported separately in the classification applicable to the manufacturing being performed.

1002-08 Shake and shingle mills - automated process

Applies to establishments operating an automated shake and shingle mill which manufacture shakes, shingles and/or ridge caps using automated processes. For purposes of this classification, automated processes refers to shake and shingle mills equipped with automatic feeders on all saws, adjustable packing and cutting stations, and fully automatic systems for conveying material to work stations. All equipment must be equipped with automatic shut off switches. Within a shingle mill the operation of a trim saw must be performed by an individual as a separate function from that of the shingle saw operator (shingle sawyer is not to perform both functions). Shake splitters must be equipped with a gauge control mechanism which permits the operator to automatically set

the thickness of the cut. Conveyor systems must have dual controls to allow the deck man and sawyer the ability to control incoming material to the work station.

Block mills must be equipped with an automated pallet dump to eliminate the handling of material to the sawyer work station or an adjustable scissor lift adjacent to the shingle saw or shake splitter. Blocked wood purchased by mills must be contained in pallets prior to entering the mill yard or premises. Log mills must be equipped with a fully mechanized log slip (used to move logs into the deck area), log levelers, stabilizers, and lifters must be present in the deck area, automatic deck cut-off saw, live deck for moving material from the deck to the splitting area and overhead mounted splitters. Trim saws, also referred to as clipper saws, must be equipped with a laser guide or quartz light. This lighting reveals to the operator where its saw blade is in relationship to the material being processed.

For purposes of this classification, the following terms or words shall be given the meanings below:

Automatic deck or cut-off saw: A large saw, usually circular, used to trim logs to a specified length (rounds) before they enter a manufacturing plant.

Clipper saw: A machine used to make shingle edges parallel.

Shingle: Roofing or siding material having sawn faces and backs, are of a standard thickness at the butt end and tapered finish at the other end.

Shake: Roofing or siding material having at least one surface with a natural grain textured split surface.

Live deck: A chain driven platform located in the same proximity as the deck saw and is used to convey cut rounds from the cutting area to the splitting area.

Log stabilizer: A levered device adjacent to the deck saw used to hold the log steady while it is being cut.

Log slip: A chain driven conveyor used to move logs into the deck area.

Laser or quartz guide light: An overhead mounted light above a saw that illuminates that portion of a work surface where the saw blade will pass or make a cut.

Log leveler: A levered device adjacent to the deck saw used to level a log automatically.

Overhead splitter: A ceiling mounted hydraulic, air, or electrically operated apparatus with wedge shaped end that is used to split log rounds into block wood when activated by the splitterman.

Shingle saw: A machine used to make shingles.

Shake splitter: A machine used to split blocks into shake blanks.

Shake saw: A machine used to saw shake blanks into a finished wedged shaped product.

This classification excludes all operations conducted in the woods, such as logging or the cutting and splitting of shake or shingle bolts, which are to be reported separately in classification 5001.

Special notes: Shake and shingle mills not meeting all the conditions as set forth above shall be reported separately in classification 1005 "shake and shingle mills, N.O.C."

WAC 296-17A-1003 Classification 1003.

1003-02 Dry kiln operations

Applies to establishments engaged in kiln drying of wood as a service for customers in the wood products industry. They may also purchase and dry wood themselves for later sale to a wood product manufacturer. Operations contemplated by this classification include, but are not limited to, receiving green lumber or logs, peeling (mechanized or manual), any incidental machining or turning, layering on a trolley (with spacers in between to allow for air circulation), drying in the heated kiln, and the incidental application of preservative, fire retardant, or insecticide treatments, storing, and delivery. Preservatives may be oil or water based and may be applied through a heated, pressurized vacuum process in an autoclave, by surface application (spraying, brushing, dipping) or by soaking in tanks. Machinery and equipment includes, but is not limited to, log handling and trimming machinery, kilns, boilers that heat the kilns, autoclaves, storage tanks, trolley cars, fork lifts, hand tools and delivery trucks.

This classification excludes dry kiln operations that are part of a wood, veneer or lumber product manufacturing or remanufacturing operation which are to be reported separately in the classification applicable for the operation being performed; all operations conducted in the woods, such as the felling of timber, which are to be reported separately in the applicable logging classification, and work conducted away from the shop or yard, except delivery, which is to be reported separately in the classification applicable for the work being performed.

1003-03 Creosote works; pile and pole treating

Applies to establishments engaged in treating wood poles with creosote or other chemicals to inhibit deterioration. Poles produced by this type of business are intended for use as utility line poles, supports for bridges and trestles, or piles to be driven into the ground as part of the support for a pier or other structure. Operations contemplated by this classification include, but are not limited to, receiving logs, storing, seasoning (either by air or kiln drying), peeling (mechanized or manual), any incidental machining and turning (which may include cutting material into ties or cross arms), the application of creosote or other chemical preservative, and pick up and delivery. Preservative may be applied to seasoned wood through a heated, pressurized vacuum process in an autoclave, by surface application (spraying, brushing, dipping), or soaking in tanks. Machinery and equipment includes, but is not limited to, log handling/trimming/cutting machinery, kilns, boilers that heat the kiln, autoclaves, storage tanks, trolley cars for use in the kiln, fork lifts, hand tools, and trucks.

This classification excludes all operations conducted in the woods, such as the felling of timber, which are to be reported separately in the applicable logging classification, and work conducted away from the shop or yard, except delivery, which is to be reported separately in the classification applicable for the work being performed.

1003-04 Pole yards

Applies to establishments engaged in producing wood poles to a customer's specifications or for their own resale. These poles are intended for a variety of uses and are finished to varying requirements. Work contemplated by this classification includes, but is not limited to, receiving logs, storing, seasoning (either by air or kiln drying), peeling (mechanized or manual), incidental machining or turning (which may include cutting some material into cross arms, cutting and boring), the application of creosote or other chemical preservative, and pick up and delivery. Preservative may be applied to seasoned wood through a heated, pressurized vacuum process in an autoclave, by surface application (spraying, brushing, dipping), or soaking in tanks. Machinery and equipment includes, but is not limited to, log handling/trimming/cutting machinery, kilns, boilers that heat the kiln, autoclaves, storage tanks, trolley cars for use in the kiln, fork lifts, hand tools, and trucks.

This classification excludes all operations conducted in the woods, such as the felling of timber, which are to be reported separately in the applicable logging classification, and work conducted away from the shop or yard, except delivery, which is to be reported separately in the classification applicable for the work being performed.

1003-05 Masts and spars yards

Applies to establishments engaged in producing wood masts and spars. Masts and spars are the main and secondary supports, respectively, for sails and running rigging on sailing vessels. These businesses may also produce poles for other uses which may need to be more precisely shaped and finished than those produced in 1003-04. Work contemplated by this classification includes, but is not limited to, receiving logs, storing, seasoning (either by air or kiln drying), peeling the logs (mechanized or manual), machining and turning to size (which may include cutting and boring holes), application of chemical preservative, sanding if necessary, and pick up and delivery. The application of wood finish is also included when performed by employees of an employer having operations subject to this classification. Preservative may be applied to seasoned wood through a heated, pressurized vacuum process in an autoclave, by surface application (spraying, brushing, dipping), or soaking in tanks. Machinery and equipment includes, but is not limited to, log handling/trimming/cutting machinery, kilns, boilers that heat the kiln, autoclaves, storage tanks, trolley cars for use in the kiln, fork lifts, wood finishing equipment, hand tools, and trucks. This classification includes the production of finished logs that will be used in the manufacture of log houses or cabins.

This classification excludes all operations conducted in the woods, such as the felling of timber, which are to be reported separately in the applicable logging classification, and work conducted away from the shop or yard, except delivery, which is to be reported separately in the classification applicable for the work being performed.

1004-00 Log storage and log sorting yards

Applies to establishments engaged in the operation of log storage or sorting yards. The logs may be owned by the yard, for later sale, or stored for others. Operations contemplated by this classification include, but are not limited to, loading/unloading log trucks, grading logs by type or size, stacking logs, recordkeeping, security and routine maintenance of grounds and equipment.

This classification excludes all trucking outside of the yard which is to be reported separately in classification 1102; log storage or sorting yards operated by a logging company at a side or a remote location, which are considered an inclusion and are to be reported separately in classifications 5001 or 5005 as applicable; and log storage yards operated in conjunction with a pole yard, log drying, or wood products manufacturing business which are to be reported separately in the classification applicable to the business.

WAC 296-17A-1005 Classification 1005.

1005-02 Shake and/or shingle mills

Applies to establishments engaged in the operation and maintenance of a shake and/or shingle mill. Work contemplated by this classification includes receiving raw logs which they cut and split into shakes, shingles and ridge caps. A shake is a roofing or siding material having at least one surface with a natural grain textured split surface. A shingle is a roofing or siding material having sawn faces and backs and are of a standard thickness at the butt end and tapered finish at the other end. A ridge cap is produced from two pieces nailed together to form a "v" shape placed on the center line of a roof. Raw logs are temporarily stored in the yard. This classification may include operations such as, but not limited to, loading raw logs onto a conveyor or log slip, cutting the log into rounds, splitting the rounds into blocks, feeding the blocks through a shake or shingle saw, grading and sorting, bundling, stacking and storing of finished shakes, shingles and/or ridge caps. Machinery and equipment includes, but is not limited to, log loaders, conveyors, log slips, overhead splitters, cut-off saws, shake saws, shingle saws, taper saws, head saws, pallet presses, and forklifts.

This classification excludes establishments engaged exclusively in the manufacturing of ridge caps or shims which are to be reported separately in classification 2903; automated shake and shingle mills which are to be reported separately in classification 1002 provided the entire process to produce shakes and shingles uses automated processes at

(2007 Ed.)

the mill site, meets the requirements defined in WAC 296-17-534; and all operations conducted in the woods, such as logging or the cutting and splitting of shake or shingle bolts, which are to be reported separately in the applicable logging classification.

WAC 296-17A-1007 Classification 1007.

1007-08 Geophysical exploration, N.O.C.

Applies to contractors engaged in geophysical exploration, with no core drilling, and without seismic detection, who are not covered by another classification (N.O.C.). The more common methods of geophysical exploration are gravitational, electric and magnetic. In the gravitational method, delicate pendulums and torsion balances capable of detecting differences in the gravitational pull of the earth at various places enable the geologist to tell where oil is likely to be found. There are two electrical methods, resistivity and inductive. In the resistivity method, measurements are taken on an ohmmeter, which indicate the resistivity of the subsurface. The inductive method is somewhat comparable, but instead of determining the resistivity of the subsurface formations, the conductivity is measured enabling the geologist to determine the character of the subsurface being studied. The magnetic method is accomplished by means of a highly developed form of magnetic dipping needle with a telescope magnifier. The magnetic attraction exerted by magnetic rocks and formations causes the needle to deflect from its horizontal plane, thereby enabling a geologist to develop contour maps with lines of equal magnetic attraction. This classification includes prospectors who may specialize in particular instrumentation such as electrical, gravity, magnetic or seismic. The prospector studies structure of subsurface rock formations to locate petroleum deposits; conducts research using geophysical instruments such as seismograph, gravimeter, torsion balance, and magnetometer, pendulum devices, and electrical resistivity apparatus to measure characteristics of the earth; computes variations in physical forces existing at different locations and interprets data to reveal subsurface structures likely to contain petroleum deposits; and determines desirable locations for drilling operations. This classification includes prospecting for mineral ores and the testing of soil for percolation when performed by employees of an employer subject to this classification.

This classification excludes core drilling and seismic geophysical exploration which are to be reported separately in classification 0103, and geophysical crews employed by oil companies who are to be reported in the classification applicable to the business.

Special note: When assigning classifications 1007-08, 4901-16 - Geologists, and 0103-10 - Seismic geophysical exploration, care must be taken to look beyond the word "geologist" to determine the actual nature of the activities being performed.

1007-09 Testing and inspecting of pipelines using radiographic or X-ray analysis process by contractor at industrial plants or construction sites

Applies to establishments engaged in the testing or inspecting of pipelines or conduits for others, provided the testing or inspecting is not performed in conjunction with the construction of the pipeline. This classification includes testing or inspecting involving radiographic or X-ray analysis processes such as the X raying of containers, inspecting of utility lines, and the drawing of oil samples on-site when performed by employees of an employer subject to this classification. Classification 1007-09 is assigned primarily to field activities.

This classification excludes testing or inspecting done in conjunction with construction which is to be reported separately in the appropriate construction classification.

1007-15 Inspection and grading bureaus, N.O.C.; log scaling and grading bureaus; lumber inspection services; weigh scale attendants, N.O.C.; weather stations; rain-making - no aircraft

Applies to establishments operating as *inspection and grading bureaus*, not covered by another classification (N.O.C.), including, but not limited to, those involved in inspecting and grading commodities such as logs, lumber, shingles, shakes, poles, and railroad ties. The commodity is examined and stamped with a grademark which indicates the grade, species, producer's name or number and other pertinent data. A certificate of inspection may be issued in lieu of a grademark. The purpose of the inspection is to grade, tally, and stamp only those products which meet certain required specifications and to cull those products which do not meet the established standards. *Log scaling and grading bureaus* measure the logs, and by applying log rule formulas, determine the net yield, usually expressed in board feet. A scale ticket containing descriptive data is attached to the end of the log. This classification also applies to *weigh scale attendants* not covered by another classification (N.O.C.), when the service is available to the general public, otherwise the weigh scale attendants are to be included in the basic classification of the business. This classification includes establishments engaged exclusively in such services as auto emission control testing, air flow balancing and testing, the balancing and testing of heating, ventilating and air conditioning systems, hydrostatic testing of such objects as boilers, tanks, pipes and fittings using compressed air or water pressure to detect leaks, the strength testing of building material such as, but not limited to, asphalt, concrete and steel; and the testing or inspecting of steel weldments. This classification also includes *weather stations* which observe and record weather conditions for use in forecasting, and which read weather instruments, including thermometers, barometers, and hygrometers to ascertain elements such as temperature, barometric pressure, humidity, wind velocity, and precipitation. Weather data is transmitted and received also from other stations. A fully automated (computerized) weather station can be reported under classification 4904. This classification also covers rainmaking without the use of aircraft.

Special note: Classification 1007, classification 5001, and classification 5004, shall not be assigned to the same business unless the operations described by these classifica-

tions are conducted as separate and distinct businesses and the conditions set forth in the general reporting rules covering the operation of a secondary business have been met.

1007-16 Foresters (to be assigned only by reforestation underwriter)

Applies to foresters engaged in forest management. Foresters may plan and direct forestation or reforestation projects, map forest areas, estimate standing timber and future growth, or manage timber sales. Foresters also may plan cutting programs to assure continuous production of timber, and determine methods of cutting and removing timber with a minimum of waste and environmental damage. They may plan and design forest fire suppression and fire-prevention programs, plan and design construction of fire towers, trails, roads and fire breaks and may also plan and design projects for control of floods, soil erosion, tree diseases, and insect pests in forests. Foresters may specialize in one aspect of forest management.

This classification excludes manual labor or direct supervision of manual labor.

1007-18 Foresters and timber cruisers - scientific tree, forestry, and watershed studies (to be assigned only by reforestation underwriter)

Applies to establishments engaged in scientific tree studies for others. Scientific tree studies are research oriented; random sample plots are measured and data such as the size of trees, species, disease and insect or animal damage, and seedling mortality, are recorded. Plots are maintained where each tree is tagged, its genealogy recorded, and growth statistics entered. A scion (a detached living shoot or twig) may be grafted onto a root stock and detailed records maintained of its genealogy and growth. Other data, such as fertilizers used, also may be maintained. These test plots are sometimes referred to as progeny plots or progeny studies. This classification includes scientific studies of watersheds or watershed restoration which involves the evaluation of slopes, road systems, streams and the entire ecosystem (an ecological community with its physical environment, regarded as a unit). This classification also includes precommercial thinning layouts or pruning inspections to determine if an area is ready for thinning or pruning.

This classification excludes manual labor or direct supervision of manual labor.

Special note: Classification 1007, classification 5001, and classification 5004 shall not be assigned to the same business unless the operations described by these classifications are conducted as separate and distinct businesses and the conditions set forth in the general reporting rules covering the operation of a secondary business have been met.

1007-19 Timber cruisers (to be assigned only by reforestation underwriter)

Applies to timber cruisers engaged in cruising timber land to estimate the volume and quality of a timber stand through an on-site visual inspection. A timber cruiser collects data concerning forest conditions for appraisal, sales, administration, logging, land use, and forest management planning. A forest area is traversed on foot in an established pattern and sampling techniques applied. The height and diameter of each tree in a test site is recorded as are defects such as rot

and bends, to estimate the useable wood in each tree. From the data collected a summary report is prepared giving the timber types, sizes, condition and outstanding features of an area, such as existing roads, streams, and communication facilities. Trees may be marked with spray paint to denote trail, boundary, or for cutting.

This classification excludes manual labor or direct supervision of manual labor.

1007-20 Foresters and timber cruisers - tree auditing (to be assigned only by reforestation underwriter)

Applies to establishments engaged in tree auditing for others. This service is generally associated with new plantations and is the process of evaluating the quality and the rate of planting of new trees, as well as surveying newly planted sites on a periodic schedule to determine the survival rate.

This classification excludes tree auditing services when planting is in process, which is to be reported separately in classification 5004, and manual labor or direct supervision of manual labor.

Special note: Classification 1007, classification 5001, and classification 5004 shall not be assigned to the same business unless the operations described by these classifications are conducted as separate and distinct businesses and the conditions set forth in the general reporting rules covering the operation of a secondary business have been met.

1007-21 Environmental and ecological surveyor services, N.O.C.

Applies to establishments engaged in providing environmental and ecological surveying services not covered by another classification (N.O.C.) for others. Environmental or ecological surveying firms typically serve as consultants to industrial or commercial enterprises, governmental agencies or private citizens. Environmental engineer is a term applied to engineering personnel who apply knowledge of chemical, civil, mechanical, or other engineering disciplines to preserve the quality of life by correcting and improving various areas of environmental concern, such as air, soil, or water pollution. Services include identifying and projecting potential environmental impact resulting from proposed projects, assessing the source, severity and extent of environmental damage resulting from human or natural causes, and recommending solutions to protect or regain the natural balance between organisms and their environment. Activities of environmental surveying/consulting establishments include, but are not limited to, locating archaeological sites for preservation, researching and collecting field data on birds and insects, preparing impact statement for landowners and developers, stream and fish monitoring, botanical surveys, wetland surveys, soil and ground water testing for contamination, air monitoring including industrial hygiene services, monitoring and testing at hazardous waste sites, providing advice on pollution control at its source, and developing a plan for cleaning up already recognized problems such as waste disposal sites, radon or asbestos contamination. Other services provided may include helping clients develop a system for complying with various governmental regulations. This classification includes employees of the environmental surveying service who conduct field work as well as those who are assigned to act as project managers or project superintendents to oversee the work of remediation contractors.

(2007 Ed.)

This classification excludes all types of remediation work which is to be reported separately in the classification applicable to the type of remediation work being performed, and surveyors employed by construction companies or other types of businesses who are to be reported separately in the applicable classifications.

Special note: When assigning classifications 1007 or 4901, care must be taken to look beyond the words "consulting" or "engineering" to determine the actual nature of the activities being performed.

WAC 296-17A-1101 Classification 1101.

1101-04 Automobile delivery or repossessing

Applies to establishments engaged in delivering or repossessing individual automobiles for others. Generally, a client will contact the service company and arrange for a car to be delivered to a specific destination or request that a car of which they (client) is the legal owner, be repossessed and delivered to a specific location. In either case, a driver, not a motorized transportation service, does the delivery. Duties of employees subject to this classification are generally limited to unlocking vehicles and driving. It is common on long distance deliveries for the service company to use more than one driver. This classification also applies to drivers of sound trucks.

This classification excludes operation of tractor/trailer combinations to transport vehicles which is to be reported separately in classification 1102 or classification 1109, depending on the method of transporting.

1101-06 Delivery by retail and wholesale stores and distributors, N.O.C.

Applies to employees of retail and wholesale stores engaged in inter-store delivery, customer merchandise delivery when excluded from the store classification, and delivery not covered by another classification (N.O.C.). Employees subject to this classification are generally involved in loading and unloading delivery vans or trucks and driving from store to store, or from a store to a customer's location. Drivers may or may not have designated routes or delivery areas. This classification is not applicable to establishments engaged in general trucking services which are to be reported separately in classification 1102. Classification 1101 is distinguishable from delivery operations reported in classification 1102 in that businesses covered by classification 1102 generally do not own the merchandise they are transporting.

1101-09 Parcel delivery companies for delivery of small parcels

Applies to establishments engaged in the delivery of small parcels for others. Establishments subject to this classification may offer overnight express services, but usually do not deliver packages that exceed 150 pounds. Work contem-

plated by this classification includes, but is not limited to, driving, loading and unloading delivery vehicles. This classification also applies to contract mail delivery route drivers and contract hauling of mail between post offices.

This classification excludes the delivery of bulk freight such as that delivered by trucking companies which are to be reported separately in classification 1102.

1101-14 News agents or distributors of magazines, periodicals and telephone books - no retail dealers

Applies to establishments engaged in the distribution of newspapers, periodicals, and telephone books. Work contemplated by this classification includes, but is not limited to, driving, loading and unloading the vehicles, stocking shelves, and removing old periodicals from shelves.

1101-17 Driver delivery sales, N.O.C.

Applies to establishments engaged in route sales of a wide variety of merchandise not covered by another classification (N.O.C.), including, but not limited to, hand tools, automotive supply, and household items. Sales personnel deliver products, show samples and solicit further orders. They may also call on new customers along their route. The classification also applies to establishments or employees known as merchandisers who deliver products to their customer's place of business then perform related merchandising functions such as taking inventory of goods on hand, restocking, reordering, removing outdated or damaged merchandise from shelves or the premises, and/or assembling temporary displays which are usually made of lightweight material such as cardboard or plastic and used for promotional or seasonal goods. These merchandisers often deal in products such as, but not limited to, greeting cards, over-the-counter medications, and grooming products.

This classification excludes employees of establishments who provide merchandising services, but who do not deliver products to the customer's place of business, who may be reported separately in classification 0607; and establishments engaged in the set up or removal of advertising or merchandise displays that involve more than incidental assembly of seasonal or promotional exhibits which are to be reported separately in classification 0607.

Special note: The distinguishing factor between merchandising employees who are to be reported in classification 1101-17 and those who may be reported in classification 0607 is the delivery of products to the customer's place of business. Any employee who delivers merchandise to the customer's place of business is to be reported in classification 1101.

1101-19 Route food services

Applies to establishments engaged in route food services where prepackaged, prepared food is sold, or where food may be prepared in the mobile unit for immediate sale by employees of the route food service. Duties include, but are not limited to, driving, food preparation, loading and unloading the vehicle, and cashiering. Typical route food services include, but are not limited to, traveling coaches that sell beverages and prepared pastries or snack items at various locations during a given work day, ice cream wagons, refrigerated trucks that sell specialty prepackaged foods to route customers, or mobile "short-order" food services that sell fast foods at spe-

cial events or at locations where hot food may not be available.

This classification excludes food preparation at a fixed location for the route food vehicles which may be reported separately in classification 3905 or as applicable, food vendors operating from a push cart or mobile stand and food vendors who operate from a truck or van but who do not move from place to place throughout the day who are to be reported separately in classification 3905.

1101-20 Computer tape or accounting records delivery service

Applies to establishments engaged in picking up and delivering computer tape, accounting records, or similar financial records to or from storage centers to customer locations. Delivery drivers in this classification often work in metropolitan areas and drive small cars or bicycles.

1101-21 Errand service

Applies to establishments engaged in providing errand services for others. Types of errands include, but are not limited to, shopping services, delivery of food, beverages or other commodities, and delivery of body fluid samples to laboratories. Vehicles used by these services are typically small cars or bicycles. This classification also applies to the distribution of sample merchandise by vehicle.

WAC 296-17A-1102 Classification 1102.

1102-02 Interstate trucking

Applies to establishments engaged in interstate trucking. Interstate trucking is the hauling of goods that either originate out-of-state or have an out-of-state destination. Duties include driving, mechanical repair, and in some cases loading/unloading vehicles. The loading and unloading may be done with forklifts, pallet jacks, hand trucks, or by hand. The drivers may have an assigned route, or they may be assigned a different destination each trip.

Special notes: Effective July 1, 1993, trucking establishments are allowed to have both the trucking classification 1102 and the freight handling classification 2002. However, hours cannot be split for a worker who works in both classes. If an employee has any driving duties, *all* their hours are to be reported in classification 1102. Establishments subject to this classification are to report actual hours worked for each driver. However, the hours are to be capped at 520 hours per

driver per quarter. Detailed information can be found in the general audit rule covering the trucking industry and in RCW 51.12.095.

1102-03 Intrastate trucking

Applies to establishments engaged in intrastate trucking. Intrastate trucking is the hauling of goods *only* within the boundaries of a state. In other words, the goods must have both an origin and destination in the same state. Duties include driving, mechanical repair and, in some cases, loading and unloading the vehicles. The loading and unloading may be done with forklifts, pallet jacks, hand trucks, or by hand. The drivers are usually assigned routes or a territory. Businesses in this classification usually have terminals or storage depots where merchandise is stored awaiting transfer.

Special notes: Effective July 1, 1993, trucking establishments are allowed to have both the trucking classification 1102 and the freight handling classification 2002. However, hours cannot be split for a worker who works in both classes. If an employee has any driving duties, *all* their hours are to be reported in classification 1102. Establishments subject to this classification are to report actual hours worked for each driver. However, the hours are to be capped at 520 hours per driver per quarter. Detailed information can be found in the general audit rule covering the trucking industry and in RCW 51.12.095.

1102-04 Combined interstate/intrastate trucking

Applies to establishments engaged in a combination of interstate/intrastate trucking activities. Businesses assigned to this classification generally do not produce, manufacture, or legally own the goods they are hauling. Interstate trucking is the hauling of goods which either originate out-of-state or have an out-of-state destination. Intrastate trucking is the hauling of goods *only* within the boundaries of a state. In other words, the goods have both an origin and destination in the same state. Duties include driving, mechanical repair and, in some cases, loading and unloading the vehicles. The loading and unloading may be done with forklifts, pallet jacks, hand trucks, or by hand. The drivers are usually assigned routes or a territory. Establishments in this classification usually have terminals or storage depots where merchandise is stored awaiting transfer.

Special notes: Effective July 1, 1993, trucking establishments are allowed to have both the trucking classification 1102 and the freight handling classification 2002. WAC 296-17A-1103 Classification 1103.

1103-00 Coal and solid fuel dealers - yard operations

Applies to establishments engaged in the sale and delivery of coal, pressed wood fiber logs (fire logs), wood stove pellets, wood chips, and sawdust. Operations contemplated by this classification include all related store, yard and delivery operations when conducted by employees of employers having operations subject to this classification.

This classification excludes all manufacturing operations which are to be reported separately in the classification applicable to the material and process used, and all mining operations which are to be reported separately in the applicable classification.

1103-02 Firewood dealers - yard operations

Applies to establishments engaged in the sale of firewood. This classification is limited to establishments operating a firewood sales lot where customers either pick up firewood or the dealer will make deliveries from. Operations contemplated by this classification are limited to yard and delivery operations.

This classification excludes firewood cutting operations conducted in timber or forest lands and firewood sales lots conducted from a logging landing which are both to be reported separately in the applicable logging classification.

Special note: Establishments subject to this classification may purchase precut firewood from other nonrelated businesses or may have a cutting crew. The only cutting operations allowed in classification 1103 are those conducted in the sales lot.

1103-04 Composting

Applies to establishments engaged in composting yard waste or other materials. Depending on the type of yard waste accepted, grinders may be used to reduce the size of the material for faster composting. Once the material is an acceptable size for composting, it may be placed in static curing piles, turned periodically to aerate until it is adequately decomposed, then sometimes screened. Another method of curing is to place the waste material in long rows, called "windrows" which are turned periodically. Other establishments, either operated privately or by municipalities, may use processed and dewatered sludge which is mixed with other materials such as shredded yard waste, sawdust, or other wood waste. The mixture must be designed to have the right degree of moisture and air to maintain a temperature of between 130 and 160 degrees Fahrenheit. The end product, in either instance, is a "Class A" pathogen product, meaning it can be used in soil for raising vegetables and is referred to as "manufactured" soil. This classification includes delivery when performed by employees of an employer having operations subject to this classification.

1103-06 Top soil, humus, peat and beauty bark dealers - yard operations

Applies to establishments engaged in the sale of soils, humus, peat, and beauty bark to others. Operations contemplated by this classification are limited to the receipt of soils, peat, humus, bark and compost in bulk and the subsequent load out of bark, soil and related organic matter into customer vehicles. This classification includes custom mixing soils, incidental sales of landscaping rock, sand, gravel, and

crushed rock, and delivery when performed by employees of an employer subject to this classification.

This classification excludes contract delivery by non-dealer employees who are to be reported separately in classification 1102, and digging of soils/humus/peat/gravel or grinding of bark which are to be reported separately in the applicable classification.

WAC 296-17A-1104 Classification 1104.

1104-00 Auto or truck wrecking or dismantling

Applies to establishments engaged in salvaging, dismantling and parting out motorized vehicles, motorcycles, and aircraft. Parts may be removed and inventoried or removed when there is a special request for them. Afterwards, hulls are stripped and may be crushed. Operations contemplated by this classification includes removal of salable parts with the use of hand tools and discarding frames and bodies for future sale to scrap dealers and metal manufacturers. Any subsequent breaking up of stripped chassis and bodies with torches or shears to be sold as iron or steel scrap is also included within the scope of this classification as is the reconditioning of the yard's own autos and trucks for resale. In addition to the yard work, salvaged parts will be reconditioned or repaired and sold over the counter. New parts may also be sold. A dismantler may locate and obtain parts from another yard for a customer. Dismantlers may haul cars and trucks to the yard by tow truck, flatbed, or multicar carrier or the owner may bring the vehicle to the yard. Tow truck operations related to the hauling of vehicles purchased by the wrecking yard for sale by the yard are included within the scope of this classification.

This classification excludes establishments engaged in tow truck services to the public which are to be reported separately in classification 1109, and establishments engaged in salvaging, collecting, sorting and reducing scrap metal which are to be reported separately in classification 0604.

WAC 296-17A-1105 Classification 1105.

1105-00 Septic tank pumping

Applies to establishments engaged in septic tank pumping services. Operations contemplated by this classification include driving, locating the septic tank and digging as necessary to uncover it, connecting the pumping hose to the septic

tank, pumping out the sludge, and disposing of the waste products.

This classification excludes installation and repair of septic tanks or systems which are to be reported separately in classification 0108, and cleaning of sewage treatment tanks which is to be reported separately in classification 0504.

1105-01 Street sweeping; parking lot sweeping; and portable chemical toilet servicing

Applies to establishments that perform street sweeping and parking lot sweeping services for others. Trucks used for sweeping are equipped with rotating or nonrotating brushes and vacuum/suction devices. In addition to driving duties, the drivers may adjust/unclog the brushes, and clean the holding tanks contained on the sweeping or pumping vehicle. This classification also includes snow removal by plowing, delivery of portable toilets and the related servicing and disposal of waste products which are recovered by establishments subject to this classification.

1105-02 Vacuum truck services

Applies to establishments engaged in vacuum truck services for others. Services include, but are not limited to, cleaning of duct work, picking up waste oils, lubricants, anti-freeze, bilge water, and similar waste products. Establishments subject to this classification may offer a regular service, one-time or occasional pick-up service. The driver has kits for testing the materials and, if there is a question, a sample is taken to a laboratory for further analysis. If the waste material is acceptable, it is pumped into the tanker truck. The waste material may be consolidated with similar products and "bulked" in storage tanks, then taken to appropriate treatment or disposal facilities, or it may be taken directly to appropriate facilities. If it is to be "bulked" with other products, it will be filtered as it is pumped into the storage tanks and allowed to sit for a few days for any water to settle to the bottom of the tank and be drained off. Bulked materials may be hauled away by the establishment's own trucks or by common carrier. Establishments subject to this classification may pick up containers of used oil filters and bring them into their plant where they are sorted into crushed and uncrushed filters, and gaskets removed. This activity is included within the scope of this classification if it is an incidental service. This classification includes the related disposal of waste products which are recovered by establishments subject to this classification.

This classification excludes septic tank pumping which is to be reported separately in classification 1105-00.

1106-00 Rental stores, N.O.C.; Truck canopy sales

Applies to establishments engaged in the rental of items, not covered by another classification (N.O.C.), such as hand tools, air compressors, automotive tools, baby equipment, convalescent equipment, exercise equipment, floor care equipment, pressure washers, party and banquet equipment, light construction tools or equipment such as saws, drills, and sanders, and lawn and garden equipment, as opposed to

machinery or larger commercial or industrial equipment. The tools and equipment are generally rented to homeowners for use on their property. Rental stores within this classification rent a variety of tools and equipment unlike specialty rental stores that specialize in one type of product. This classification includes clerical office personnel, sales personnel, as well as the maintenance and repair of rented goods when performed by employees of the rental store. This classification also applies to establishments engaged in the sale and installation of truck canopies and related accessories, but who do not sell other types of vehicles or trailers.

This classification excludes establishments engaged in the rental of commercial or industrial equipment and/or machinery such as, but not limited to, bulldozers, tractors, and backhoes which are to be reported separately in classification 6409; establishments engaged in the rental of farm machinery equipment which are to be reported separately in classification 6408; establishments engaged in the rental of vehicles which are to be reported separately in the applicable classification; establishments engaged in the rental of sporting goods which are to be reported separately in classification 6309; establishments engaged in the rental of clothing or costumes which are to be reported separately in classification 6305; and establishments engaged in the rental of furniture which are to be reported separately in classification 6306.

WAC 296-17A-1108 Classification 1108.

1108-02 Glass tempering

Applies to establishments engaged in glass tempering services for others. Operations contemplated by this classification include glass cutting, bending, grinding, beveling, and silvering. Tools and equipment include metal and wood cutting tools and machinery, grinders, sanders, drills, saws, knives, suction cups, putty, caulking, cleaning solvents, forklifts, packing materials, delivery and service vehicles and tempering ovens. The process of glass tempering consists of taking auto or sheet glass which has been purchased from a glass manufacturer or distributor and placing it in a tempering oven. The oven heat realigns the molecular structure of the glass creating added strength, however, the appearance of the glass remains unchanged. This classification includes the sale of accessories for flat glass such as sealants, screening, aluminum frames for storm windows and doors, mirror backings, frames and glass cleaners.

This classification excludes establishments engaged in the installation of glass, mirrors, aluminum or wood window sashes or similar products away from the shop which are to be reported separately in classification 0511; establishments engaged in the manufacture of glass which is to be reported separately in classification 3503; merchants who specialize in selling or installing auto glass which is to be reported separately in classification 1108-04; glass merchants engaged exclusively in flat glass sales which are to be reported separately

in classification 1108-03; and combined auto/flat glass merchants with no tempering which are to be reported separately in classification 1108-05.

1108-03 Flat glass merchants - no tempering

Applies to establishments engaged in receiving, storing and selling all types of fabricated glass and plexiglas. Glass products include, but are not limited to, window glass, plate glass, safety glass for automobiles, and mirrors. Work contemplated by this classification includes cutting of glass to customers specified dimensions, beveling, buffing, grinding, polishing, silvering of plate glass, and the installation of glass into frames within the shop or adjacent yard. Some dealers may specialize in cutting, selling or installing fabricated flat glass or they may also sell and install plate, laminated, window, cathedral, stained, bullet proof, opalescent flat, picture, skylight and tempered glass. Most glass dealers will cut glass to order. Tools and equipment include metal and wood cutting tools and machinery, grinders, sanders, drills, saws, knives, suction cups, putty, caulking, cleaning solvents, forklifts, packing materials, delivery and service vehicles. This classification includes the sale of accessories for flat glass such as sealants, screening, aluminum frames for storm windows and doors, mirror backings, frames and glass cleaners.

This classification excludes establishments engaged in the installation of glass, mirrors, aluminum or wood window sashes or similar products away from the shop which are to be reported separately in classification 0511; manufacturing of glass which is to be reported separately in classification 3503; glass merchants who perform glass tempering which are to be reported separately in classification 1108-02; and merchants who specialize in selling or installing auto glass which are to be reported separately in classification 1108-04.

1108-04 Auto glass merchants

Applies to establishments engaged in selling and installing automobile glass in vehicles. In addition to selling and installing new or replacement auto glass, merchants typically repair auto windshield cracks, scratches, bullseyes and breaks. Tools and equipment include metal and wood cutting tools, grinders, sanders, drills, saws, knives, windshield sticks, suction cups, putty, caulking, cleaning solvents, delivery and service vehicles. Solar tinting of auto glass with film to reduce heat and glare may also be performed, as well as selling and installing sun roofs. Auto glass merchants may offer 24-hour emergency service or pickup and delivery. Installation of auto glass, truck glass or boat tops performed in or away from the shop is included within the scope of this classification.

This classification excludes establishments engaged in the manufacturing of glass which are to be reported separately in classification 3503; tinting or the application of tinted plastic film to auto glass by an auto detailer which is to be reported separately in classification 3406; glass merchants who perform glass tempering which are to be reported separately in classification 1108-02; glass merchants exclusively dealing in flat glass which are to be reported in classification 1108-03; and combined auto/flat glass merchants with no tempering which are to be reported in classification 1108-05.

1108-05 Combined auto and flat glass merchants - no tempering

Applies to establishments engaged in receiving, storing and selling all types of fabricated glass and plexiglas as window glass, plate glass, safety glass for automobiles, mirrors and other types of glass at a permanent shop location or adjacent yard. Work contemplated by this classification includes cutting of glass to customers' specified dimensions, beveling, buffing, grinding, polishing, silvering of plate glass and the installation of glass into frames. Tools and equipment include metal and wood cutting tools and machinery, grinders, sanders, drills, saws, knives, suction cups, windshield sticks, putty, caulking, cleaning solvents, forklifts, packing materials, and delivery and service vehicles. A glass merchant performing the installation of glass in automobiles is also included within the scope of this classification; as are related services such as, but not limited to, repair of auto windshield cracks, scratches, bullseyes and breaks; in vehicle tinting of auto glass to reduce heat and glare; and installing sun roofs. Other dealers may specialize in cutting, selling or installing fabricated flat glass or they may also sell and install plate, laminated, window, cathedral, stained, bullet proof, opalescent flat, picture, skylight and tempered glass. Included within the scope of this classification is the sale of accessories for flat glass such as sealants, screening, aluminum frames for storm windows and doors, mirror backings, frames and glass cleaners.

This classification excludes establishments engaged in the installation of glass, aluminum or wood window sashes or similar products away from the shop which are to be reported separately in classification 0511; manufacturing of glass which is to be reported separately in classification 3503; tinting or the application of tinted plastic film to auto glass by an auto detailer which is to be reported separately in classification 3406; glass merchants who perform glass tempering which are to be reported separately in classification 1108-02; and flat glass merchants who do not sell or install auto glass which are to be reported separately in classification 1108-03.

1108-06 Glass frosting, etching, beveling or grinding

Applies to establishments engaged in shaping and finishing solid glass by cutting, frosting, etching, beveling, grinding, sandblasting, carving, glue chipping, decorating or grooving. Custom items manufactured in this classification include, but are not limited to, video game tops, glass signs, glass used in the assembly of electrical appliances such as microwave ovens, electronically controlled cabinets and display panels, and mirrors of all sizes. Machinery includes diamond or glass cutting saws, diamond or glass grinding wheels and discs, drills, polishing laps, etching tools and other hand tools. In the manufacture of mirrors, metallic solutions (usually silver), shellacs or varnishes, paints, and plate glass are received from outside sources. The glass is cut to size, ground, smoothed, and the edges may be beveled. Hole drilling, chemical etching, drying, buffing and polishing may be performed. Reflective surfaces are generally produced by pouring or spraying metallic solutions over prepared glass. Heavier coats are obtained by successive applications of the plating solution. After applying the plating solution, the mirrors are sprayed or hand brushed with shellac or varnish, then with paint. Frames, handles or similar finishings may be

attached. Production manufacturing of insulated glass by sealing together two or more sheets of glass with an air space between them is also included when performed by employees of an employer subject to this classification.

This classification excludes the mining, digging or quarrying of raw materials which is to be reported separately in the applicable classification; glass merchants who do incidental grinding, beveling, silvering and cutting of glass who are to be reported separately in the classification applicable to the type of glass they specialize in; establishments manufacturing optical goods or telescopes, or perform precision grinding of blank or rough lenses which are to be reported separately in classification 6604; and establishments engaged in manufacturing stained or leaded glassware, or in melting or blowing glass which are to be reported separately in classification 3503.

WAC 296-17A-1109 Classification 1109.**1109-00 Automobile or truck towing services, N.O.C.**

Applies to establishments engaged in providing towing services to others which are not covered by another classification (N.O.C.). Operations contemplated by this classification are limited to tow truck drivers and their assistants who are engaged in towing services for hire. For purposes of this classification "towing services for hire" means, but is not limited to, the towing of disabled vehicles to a shop (that is unrelated to the towing service) for repair; the recovery of repossessed vehicles for others by tow truck; roadside assistance during snow, ice or flooding to recover or free stuck vehicles; and the towing in of disabled vehicles to a secured yard for insurance or law enforcement agencies. It is common for towing companies to also operate a vehicle repair garage or service center in conjunction with the towing service. Auto service centers and repair garages, auto body shops and wrecking yard operations are to be reported separately in the applicable service or repair classification provided that the conditions of the general reporting rules covering the operation of a secondary business and the division of worker hours have been met. Tow truck dispatchers who have no other duties may be reported separately in classification 4904 provided that the conditions of the standard exception general reporting rules have been met.

Special note: Towing is common to many classifications. Employers offering towing services should be contacted to verify whether the towing service they provide is only in connection with their auto repair, auto body or wrecking yard (*towing service not for hire*), or provided as a general service unrelated to their repair garage (*towing services for hire*). Only towing services for hire are to be assigned to classification 1109. If a business provides both towing services for hire and not for hire, worker hours for drivers and their assistants may be divided between this classification and the applicable repair garage classification provided that the

conditions of the general reporting rule covering the division of worker hours has been met. Otherwise, all driver and assistant hours are to be assigned to the highest rated classification applicable to the business.

WAC 296-17A-1301 Classification 1301.

1301-00 Electric light and power plants operated by cities, towns, or counties

Applies to establishments, operated by a city, town, or county, engaged in generating and distributing electricity to their residents. These may be hydroelectric, fossil fuel steam or turbo-generator plants. This classification includes the regular installation, maintenance and repair of power plant machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), the installation and maintenance of circuit breakers and transformers on poles, pole-to-house hook-ups (service connections), meter installation and meter readers when done by employees of an employer having operations subject to this classification. Machinery and equipment may include, but not be limited to, boilers, turbines, generators, cables, transformers, switchgears, circuit breakers, control panels, substations, poles, lines, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, meters and hand tools. Clerical office and administrative personnel are to be reported separately in classification 5305 for a city or town, or 5306 for a county.

This classification excludes contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings who are to be reported separately in classification 0601; contractors engaged in the installation of machinery or equipment who are to be reported separately in classification 0601 or 0603 as applicable; and the construction of any buildings which is to be reported separately in the applicable construction classification.

1301-01 Electric light and power cooperatives

Applies to establishments, in the form of cooperatives, engaged in generating and distributing electricity to their customers. A cooperative is formed by, and owned jointly by, those who make use of the service being provided. The power may be generated by a hydroelectric, fossil fuel steam or turbo-generator plant. This classification is appropriate whether a cooperative owns a power plant or is distributing power purchased from another utility company. Work contemplated by this classification includes the regular installation, maintenance and repair of power plant machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), the installation and maintenance of circuit breakers and transformers on poles, pole-to-house hook-ups (service connections), meter installa-

tion and meter readers when done by employees of an employer having operations subject to this classification. Machinery and equipment may include, but not be limited to, boilers, turbines, generators, cables, transformers, switchgears, circuit breakers, control panels, substations, poles, lines, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, meters and hand tools. Clerical office and administrative personnel are to be reported separately as appropriate for the ownership of the cooperative; 5305 for cities and towns; 5306 for counties; or 4904 and 6303 for nonmunicipal.

This classification excludes contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings who are to be reported separately in classification 0601; contractors engaged in the installation of machinery or equipment who are to be reported separately in classification 0601 or 0603 as applicable; and the construction of any buildings which is to be reported separately in the applicable construction classification.

1301-02 Electric light and power plants operated by public utility districts

Applies to establishments, in the form of a public utility district (P.U.D.), engaged in generating and distributing electric power to a part of a county. This classification applies whether a P.U.D. owns a power plant or is distributing power purchased from another utility. Work contemplated by this classification includes the regular installation, maintenance and repair of power plant machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), the installation and maintenance of circuit breakers and transformers on poles, pole-to-house hook-ups (service connections), meter installation and meter readers when done by employees of an employer having operations subject to this classification. Machinery and equipment may include, but not be limited to, boilers, turbines, generators, cables, transformers, switchgears, circuit breakers, control panels, substations, poles, lines, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, meters and hand tools. Clerical office and administrative personnel are to be reported separately in 5306.

This classification excludes contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings who are to be reported separately in classification 0601; contractors engaged in the installation of machinery or equipment who are to be reported separately in classification 0601 or 0603 as applicable; and the construction of any buildings which is to be reported separately in the applicable construction classification.

1301-05 Steam heat power plants

Applies to establishments engaged in the operation of a steam heat power plant. These businesses use coal, oil, natural gases or electric power to produce steam which is distributed through a network of under or overground pipes to customers (the plant must be very near the purchaser). The initial process of producing the steam is the same as the process used in a steam powered electric generating plant, but the steam is channeled out to the purchaser instead of being used to turn turbines. The purchasers use the steam for heating buildings, operating saunas, as a heat source for cooking or processing in food processing plants, breweries or restaurants, producing the heat needed for wood drying kilns, or to convert back to hot water. Work contemplated by this classification includes, but is not limited to, the regular installation, maintenance or repair of plant machinery and equipment, the extension and maintenance of over or underground pipes, main-to-user hook-ups, meter installation and meter readers. Clerical office and administrative personnel are to be reported separately as appropriate for the ownership of the steam plant; 5305 for cities and towns; 5306 for counties; or 4904 and 6303 for nonmunicipal.

This classification excludes contractors engaged in over or underground pipeline construction, maintenance or repair, main-to-house line extensions and hook-ups, who are to be reported separately in classification 0107; contractors engaged in the installation or contract maintenance of machinery or equipment who are to be reported separately in classification 0603; and the construction of any buildings which is to be reported separately in the applicable construction classification.

WAC 296-17A-1303 Classification 1303.**1303-00 Telephone companies - all other employees**

Applies to establishments engaged in providing telecommunications services which enable subscribers to converse or transmit coded data. Work contemplated by this classification includes, but is not limited to, the regular installation, maintenance and repair of machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), clearing right of ways, installing telephones and wiring in buildings, and making service connections when done by employees of an employer having operations subject to this classification. Machinery and equipment includes, but is not limited to, central control and switching center equipment, relays, computers, antennae, cranes, forklifts, vehicles and garages, warehouse equipment, and hand tools.

This classification excludes clerical office, exchange operators and administrative personnel who are to be reported separately in classification 1304; contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification

0107; contractors engaged in overhead line, pole, and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings and making pole-to-house hook-ups who are to be reported separately in classification 0608; contractors engaged in the installation or contract maintenance of machinery or equipment who are to be reported separately in classification 0603; and establishments primarily engaged in selling telephone equipment retail which are to be reported separately in classification 6406.

1303-01 Telegraph companies - all other employees

Applies to establishments engaged in providing telecommunication services which enable printed messages (telegrams) to be transmitted from one agent to another for receipt by, or delivery to, a designated party. Telegraph companies also provide a "moneygram" service which allows an agent to receive a sum of money at one location and transmit a message to another agent to pay out the same amount of money to a designated party at another location. Work contemplated by this classification includes the regular installation, maintenance and repair of machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), installing transmission and receiving equipment, the clearing of right of ways, and delivery work when done by employees of an employer having operations subject to this classification. Machinery and equipment includes, but is not limited to, cables, control panels, poles, lines, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, and hand tools.

This classification excludes clerical office and administrative personnel who are to be reported separately in classification 1304; contractors engaged in underground line construction maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line, pole, and tower construction, maintenance or repair, who are to be reported separately in classification 0509; contractors engaged in wiring within buildings who are to be reported separately in classification 0608; and contractors engaged in the installation or contract maintenance of machinery or equipment who are to be reported separately in classification 0603.

WAC 296-17A-1304 Classification 1304.**1304-00 Telephone companies - exchange operators, clerical office and sales personnel**

Applies to the administrative and clerical office personnel of establishments engaged in providing telecommunication services which enable two or more parties to converse or transmit coded data. For purposes of this classification, administrative personnel includes clerical office, sales, data processing, exchange operators, customer service, marketing, and retail telephone store (when operated by the telephone company) sales personnel.

This classification excludes all other telephone company employees who are to be reported separately in classification 1303.

1304-01 Telegraph companies - clerical office and sales personnel

Applies to administrative and clerical office personnel of establishments engaged in providing telecommunication services which enable printed messages (telegrams) or moneygrams to be transmitted from one agent to another for receipt by a designated party. For purposes of this classification, administrative personnel includes clerical office, sales, data processing, customer service, marketing, cashiers and operators of telegraph, teletype or other transmitting and receiving equipment.

This classification excludes all other telegraph company employees who are to be reported separately in classification 1303.

WAC 296-17A-1305 Classification 1305.

1305-00 Television cable companies - all other employees

Applies to establishments engaged in providing point-to-point subscription cable communications services. This classification is restricted to companies that provide the total spectrum of cable services for a fee or rental charge. These companies will normally operate and maintain antenna and control centers where they receive signals from broadcasting stations and transmit them through a cable system to local customers. This classification also includes homeowner associations and co-ops that operate a central system for residential users. Work contemplated by this classification includes, but is not limited to, the regular installation, maintenance and repair of machinery and equipment, the extension and maintenance of lines (including poles, towers and underground lines), installation of antennae, the clearing of right of ways, erections of poles, crossarms and insulators, and subscriber service connections when done by employees of an employer having operations subject to this classification. Machinery and equipment includes, but is not limited to, cables, transformers, control panels, poles, lines, antennae, relays, computers, cranes, forklifts, vehicles and garages, warehouse equipment, and hand tools.

This classification excludes contractors engaged in underground line construction, maintenance or repair who are to be reported separately in classification 0107; contractors engaged in overhead line installation who are to be reported separately in classification 0509; contractors engaged in pole and tower construction, maintenance or repair who are to be reported separately in classification 0508; contractors engaged in wiring within buildings and making pole-to-house service connections who are to be reported separately in classification 0601; and clerical office employees of television cable companies who are to be reported separately in classification 4502.

WAC 296-17A-1401 Classification 1401.

1401-01 Taxicab companies

Applies to establishments engaged in furnishing passenger transportation to others. Work contemplated by this classification includes, but is not limited to, operation of the vehicle, loading/unloading passengers' luggage, assisting passengers in and out of the vehicle, incidental "cabulance" services which may be offered in conjunction with the taxi service, and maintenance/repair of the vehicle when performed by employees of an employer subject to this classification. Businesses that operate pedicab and horse-drawn carriage services are included in this classification.

This classification excludes: Establishments that operate ambulance services which are to be reported separately in classification 1405; establishments that operate cabulance and paratransit services exclusively which are to be reported separately in classification 1404; and dispatchers with no other job duties who may be reported separately in classification 4904.

Special note: Establishments that furnish only a dispatch service for taxicab drivers who own or lease their own vehicles may be reported separately in classification 4904 provided all the conditions of the general reporting rules covering standard exception employees have been met. Employees of a taxicab dispatch service who perform maintenance/repair are to be reported separately in classification 3411. See RCW 51.08.180 for the definition of "worker" to aid in determining if drivers are employees. Please also refer to the special note in classification 1404-12.

WAC 296-17A-1404 Classification 1404.

1404-06 Vessels, ferries, tugs, and steamboats, N.O.C.

Applies to employees not covered under federal jurisdiction, or another classification (N.O.C.), who provide services for seaworthy vessels such as ferries, tugs, or steamboats at the docking site or on adjacent land. Vessels may operate seasonal or year-round. Employments include, but are not limited to, dock workers, maintenance workers, traffic control personnel, and night security personnel.

Special note: Care should be exercised prior to assignment of this classification as the workers could be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act. A detailed description of these acts can be found in classifications 0104 or 0202.

[Title 296 WAC—p. 363]

1404-07 Train rides

Applies to establishments engaged in the operation of passenger excursion train rides for scenic or amusement purposes on an intrastate basis only. Excursion train rides are typically operated from a mountain, lake or similar site. The trains may operate on a seasonal basis in direct relation to the volume of tourists, weather conditions, or dates of local celebration. Employments in this classification include, but are not limited to, drivers/engineers, guides, lecturers, hostesses, and maintenance personnel. Ticket sellers may be reported separately in classification 4904 provided that they do not handle baggage and that the conditions of the standard exception general reporting rules have been met. On-board food service personnel may be reported separately in classification 3905 as long as their duties are limited to food service and they do not facilitate the train ride or train ride operation in any way.

1404-11 Escort and pilot cars

Applies to establishments that provide escort or pilot car services for others. The duties include driving ahead of, or behind, various types of vehicles.

This classification excludes employees of an employer assigned to drive escort or pilot cars in connection with the delivery of equipment, buildings, goods, or similar items which the employer sells or contracts to deliver. Such employment is to be reported separately in the classification applicable to sales or delivery of such items. For example, an escort driver employed by a common carrier transporting a modular home to a customer's site is to be reported separately in classification 1102.

1404-12 Cabulance and paratransit

Applies exclusively to establishments that provide on-demand, nonemergency transportation services to passengers with special needs. Vehicles used are usually vans that are equipped for accessibility to accommodate passengers with mobility limitations including passengers in wheelchairs or gurneys. Work contemplated by this classification includes, but is not limited to, operation of the vehicle, assisting passengers in and out of the vehicle, and maintenance/repair of the vehicle when performed by employees of an employer subject to this classification.

This classification excludes: Cabulance services offered in conjunction with a taxi service which are to be reported separately in classification 1401, cabulance services offered in conjunction with an ambulance service which are to be reported separately in classification 1405, paratransit services offered in conjunction with a municipal bus or transit system which are to be included in classification 0803 or 1501 as appropriate, ambulance services which are to be reported separately in classification 1405, limousine drivers who are to be reported separately in classification 6301, and dispatchers with no other duties who are to be reported separately in classification 4904.

Special note: Care should be exercised in determining what type of cabulance service is being provided. This classification *is not to be* assigned when provided as an incidental part of a taxi cab service subject to classification 1401. A cabulance service as defined in this rule will need a specialized van or bus to transport passengers as opposed to a passenger automobile that is not equipped to accommodate special

mobility needs, and whereby the transportation service has been prearranged.

WAC 296-17A-1405 Classification 1405.**1405-00 Ambulance services**

Applies to establishments engaged in prehospital emergency care and transportation of ill or injured persons to or from medical facilities. The services provided by any one ambulance company will vary to some degree, however, normal operations for ambulance companies include, but are not limited to, the following: Prehospital care, responding to calls where the injury or accident does not require medical treatment other than that provided by Emergency Medical Technicians (paramedics) who work for the ambulance company, standby at events, assisting in providing prehospital care and patient transport services of injured players or spectators at games, concerts, and fairs, public education/training, teaching CPR, first aid, and related courses to the public, and cabulance service (transporting patients who do not require prehospital care to and from medical facilities).

This classification excludes: Cabulance services offered in conjunction with a taxi service which are to be reported separately in classification 1401; companies engaged exclusively in cabulance and paratransit services which are to be reported separately in classification 1404; and similar emergency services provided by a municipality which are to be reported separately in classification 6904.

Special notes: Special care must be taken in classifying *cabulance services* which may also be included in classifications 1401 or 1404. In order to qualify for classification 1405, a company must be primarily in business as an ambulance company. For premium reporting purposes, ambulance companies are to report all employees on an hourly basis, provided the maximum will not exceed eight hours during any twenty-four hour period. If verifiable records disclosing actual time worked are unavailable, employees are to be reported at eight hours per day for each day they had duties. If records do not disclose hours or days worked by individual employees, an assessment of forty hours per week is to be made for each week in which an employee had duties, or one hundred and sixty hours per month. For *air ambulance services*, flight time is to be reported separately in classification 6803, and ground operations are to be reported separately in classification 1405.

WAC 296-17A-1407 Classification 1407.**1407-00 Bus companies**

Applies to establishments engaged in providing transportation services such as, but not limited to, charter and tour bus, contract school bus, shuttle van, and nonmunicipal, scheduled bus systems. Work contemplated by this classification includes operation of the vehicle and related loading/unloading duties, cleaning, maintenance and ordinary repair of all facilities, equipment, and vehicles, all bus terminal employment except for office personnel. Ticket sellers and dispatchers may be reported separately in classification 4904 provided that they do not handle baggage and that all of the conditions of the standard exception general reporting rules have been met.

This classification excludes: Municipal transit and bus service provided by a county or taxing district which is to be reported separately in classification 1501; municipal transit and bus service provided by a city or town which is to be reported separately in classification 0803; taxicab companies which are to be reported separately in classification 1401; cabulance and paratransit companies which are to be reported separately in classification 1404; and drivers employed by a limousine company who are to be reported separately in classification 6301.

WAC 296-17A-1501 Classification 1501.**1501-00 Counties and taxing districts, N.O.C. - all other employees**

Applies to employees of counties and taxing districts, not covered by another classification (N.O.C.), who perform manual labor, or who supervise a work crew performing manual labor such as custodial or maintenance, and machinery or equipment operators including transit bus drivers. This classification includes administrative personnel such as engineers, safety inspectors, and biologists who have field exposure, and internal inventory and supply clerks. For purposes of this classification, field exposure is defined as any exposure other than the normal travel to or from a work assignment.

This classification excludes electric light and power public utility districts which are to be reported separately in classification 1301; privately owned and operated bus or transit systems which are to be reported separately in classification 1407; water distribution or purification system public utility districts which are to be reported separately in classification 1507; irrigation system public utility districts which are to be reported separately in classification 1507; port districts which are to be reported separately in classification 4201; school districts, library districts or museum districts which are to be reported separately in classifications 6103 or 6104; hospital districts which are to be reported separately in classification 6105; fire fighters who are to be reported separately in classification 6904; law enforcement officers who are to be reported separately in classification 6905 and 6906, as appropriate; clerical office and administrative employees who are to be reported separately in classification 5306, and volun-

teers who are to be reported separately in classifications 6901 or 6906, as appropriate.

1501-01 Housing authorities, N.O.C. - all other employees

Applies to employees of housing authorities, not covered by another classification, who perform manual labor, or who supervise a work crew performing manual labor such as custodial or maintenance, and machinery or equipment operators. This classification includes all functional operations of a housing authority such as inspection, maintenance and repairs, including minor structural repairs, janitorial service, and building and grounds maintenance. Also included in this classification are meter readers, security personnel, other than those with law enforcement powers, administrative personnel such as engineers and safety inspectors who have field exposure, and internal inventory and supply clerks. For purposes of this classification, housing authorities are defined as nonprofit, public and political entities which serve the needs of a specific city, county or Indian tribe. The nature and objectives of some of the projects undertaken by housing authorities include providing decent, safe and sanitary living accommodations for low income persons, or providing group homes or halfway houses to serve developmentally or otherwise disabled persons or juveniles released from correctional facilities. A housing authority has the power to prepare, carry out, lease and operate housing facilities; to provide for the construction, reconstruction, improvement, alteration or repair of any housing project; to sell or rent dwellings forming part of the project to or for persons of low income; to acquire, lease, rent or sell or otherwise dispose of any commercial space located in buildings or structures containing a housing project; to arrange or contract for the furnishing of the units; and to investigate into the means and methods of improving such conditions where there is a shortage of suitable, safe and sanitary dwelling accommodations for persons of low income.

This classification excludes new construction or major alteration activities which are to be reported separately in the appropriate construction classifications; clerical office and administrative employees who are to be reported separately in classification 5306; security personnel with law enforcement powers who are to be reported separately in classification 6905; and volunteers who are to be reported separately in classifications 6901 or 6906, as appropriate.

1501-08 Native American tribal councils - all other employees

Applies to employees of Native American tribal councils who perform manual labor, or who supervise a work crew performing manual labor such as custodial or maintenance, and machinery or equipment operators. This classification includes administrative personnel such as engineers, safety inspectors, and biologists who have field exposure, and internal inventory and supply clerks of the tribal council. For purposes of this classification, field exposure is defined as any exposure other than the normal travel to and from a work assignment.

This classification excludes electric light and power public utility districts which are to be reported separately in classification 1301; water distribution or purification system public utility districts which are to be reported separately in classification 1507; irrigation system public utility districts

which are to be reported separately in classification 1507; school districts, library districts or museum districts which are to be reported separately in classifications 6103 or 6104; hospital districts which are to be reported separately in classification 6105; fire fighters who are to be reported separately in classification 6904; law enforcement officers who are to be reported separately in classifications 6905 and 6906; new construction or reconstruction activities which are to be reported separately in the appropriate construction classification; clerical office and administrative employees who are to be reported separately in classification 5306.

Special notes: Housing authorities operating under the name of, and for the benefit of, a particular tribe are not exempt from mandatory coverage. These housing authorities are federally funded and are not owned or controlled by a tribe.

Only those tribal operations which are also provided by county governments are subject to classification 1501. The following activities, such as but not limited to, visiting nurses and home health care, grounds keepers, building maintenance, park maintenance, road maintenance, and garbage and sewer works, are considered to be normal operations to be included in this classification. All other tribal council operations which are not normally performed by a county government shall be assigned the appropriate classification for the activities being performed. The following operations, such as but not limited to, meals on wheels, bingo parlors, casinos, liquor stores, tobacco stores, grocery stores, food banks, gift shops, restaurants, motels/hotels, Head Start programs, fish/shellfish hatcheries, logging, and tree planting/reforestation are outside the scope of classification 1501 and are to be reported separately in the applicable classifications.

1501-09 Military base maintenance, N.O.C.

Applies to establishments, not covered by another classification (N.O.C.), engaged in providing all support operations and services on a military base on a contract basis. Such services include, but are not limited to, data processing, photography, mail delivery (on post and to other military facilities), hotel/motel services, mess halls, recreational facilities, grounds and building maintenance, vehicle maintenance, and may also include the maintenance of such facilities as water works, sewer treatment plants and roads.

This classification excludes new construction or construction repair projects which are to be reported separately in the applicable construction classification for the work being performed; contracts for specific activities on a military base such as, but not limited to, building maintenance, club or mess hall operations, or vehicle maintenance, which are to be reported separately in the applicable classification for the work being performed; firefighters who are to be reported separately in classification 6904; law enforcement officers who are to be reported separately in classification 6905; and clerical office and administrative employees who are to be reported separately in classification 5306.

Special note: Classification 1501-09 is to be assigned to an establishment only when *all* support services on a military base are being provided by the contractor.

WAC 296-17A-1507 Classification 1507.

1507-01 Irrigation ditches operation, repair and maintenance

Applies to establishments engaged in providing water for agricultural irrigation through a network of ditches, canals and/or pipelines. Irrigation system operations may be owned by individuals, a private company, cooperatives or a municipality. Water for irrigation can come from a natural above or below ground source or a reservoir and is kept flowing by means of pumping plants. Irrigation water usage is monitored at the "turn-out" which must be manually opened by an employee of the irrigation company and is located between the ditch/pipeline and the user's field. Work contemplated by this classification includes, but is not limited to, digging and maintaining ditches or canals, installing underground pipe, installation or maintenance of control gates and pumps, cleaning of ditches, spraying to control insects, and regular maintenance of vehicles and equipment when done by employees of an employer having operations subject to this classification. Machinery and equipment includes, but is not limited to, water pumps, ditch digging/pipe laying equipment, control gates, pumps, vehicles, spraying equipment and hand tools. This classification includes the operation of drainage systems by a private company or a municipal special purpose district.

This classification excludes: Contractors engaged in the digging of ditches or canals who are to be reported separately in classification 0108 or 0201 as applicable; contractors engaged in underground pipe laying which is to be reported separately in classification 0107; contractors engaged in the installation of agricultural sprinkler systems which is to be reported separately in classification 0301; contractors engaged in the installation or repair of irrigation/drainage pumps which is to be reported separately in classification 0306; the routine irrigation of individual agricultural acreage with the owner's own system which is to be reported separately in the classification applicable to the establishment; the construction of any new buildings which is to be reported separately in the construction classification applicable to the work being performed; and clerical office and administrative personnel who are to be reported separately as appropriate, classification 5305 for cities and towns, classification 5306 for counties, or classifications 4904 and 6303 for nonmunicipal ownership.

Special note: Many water supply operations in Washington may have "irrigation district" as part of their name because of their original purpose, but they are actually functioning as a waterworks supplying residential users and are to be reported separately in classification 1507-02.

1507-02 Waterworks operations, repair and maintenance

Applies to establishments engaged in the operation of water purification and distribution systems known as waterworks. Water is obtained from natural sources of surface or ground water, piped to filtration plants, filtered, treated with chemicals, then pumped to holding facilities for eventual distribution to the user through underground pipes. Waterworks may be owned by cooperatives, such as homeowners' associations, a private company, or a municipality (as a P.U.D.). Work contemplated by this classification includes, but is not limited to, erection of towers and tanks, underground waterline construction, maintenance of purification and filtration facilities, installation of fire hydrants, operating a laboratory, main-to-house hook-ups and the installation and reading of meters when done by employees of an employer having operations subject to this classification. Machinery and equipment includes, but is not limited to, excavating, pipe laying, erecting and welding equipment, vehicles, machine shop equipment, pumps and gauges, meters and hand tools. This classification includes the operation of sewerage treatment plants by owner or contract.

This classification excludes: Contractors engaged in underground waterline construction, maintenance or repair, including main-to-house hook-ups, who are to be reported separately in classification 0107; plumbing contractors engaged in waterline main-to-house hook-ups as part of an all-inclusive plumbing installation contract which is to be reported separately in classification 0306; the erection of water towers and tanks by a contractor which is to be reported separately in classification 0508; contractors engaged in industrial plant maintenance who are to be reported separately in classification 0603; the construction of dams which is to be reported separately in classification 0701; the construction of any new buildings which is to be reported separately in the construction classification applicable to the work being performed; and clerical office and administrative personnel who are to be reported separately as appropriate, classification 5305 for cities and towns, classification 5306 for counties, or classifications 4904 and 6303 for nonmunicipal.

WAC 296-17A-1701 Classification 1701.**1701-02 Ore reduction, by wet or dry process without application of heat at mine**

Applies to establishments engaged in the reduction of coarse ores by a wet or dry process at a mine site. Work contemplated by this classification involves a variety of ore milling activities. The process begins by crushing, screening and washing the ores. Next, ores are placed in a rotating cylindrical mill which contains steel balls, flint pebbles, rods or rock for further grinding. Then with the use of amalgamation (introduction of a chemical such as mercury to break down the ores) or flotation (uses water to separate by buoyancy and

(2007 Ed.)

densities), the ore material is broken down and dried to obtain concentrated ores of metals. The milling of ores to recover some nonmetallic minerals which do not require amalgamation or flotation are also included within this classification.

This classification excludes underground mining operations which are to be reported separately in classification 1702, and open cut mining operations which are to be reported separately in classification 1703.

WAC 296-17A-1702 Classification 1702.**1702-01 Coal mines and mines N.O.C., underground; coke ovens**

Applies to establishments engaged in underground mining, not covered by another classification (N.O.C.), involving the extraction of coal, ores, stone, clay or other minerals. Operations contemplated by this classification include excavation and tunneling below ground as well as the incidental activities occurring above ground. Underground mining may involve shaft sinking, slope sinking, rock tunneling, and the building of drifts and shafts with heavy timbers or steel beams. Material is broken loose within the tunnel or shaft with explosives, drilling machines, rock drills, chippers, power hand drills and picks. After the material is broken loose it is removed from underground by way of hoist, conveyor, or some type of haulage car on steel track. On the surface, some of the extracted material is further refined such as coal which is crushed, screened, washed and graded before being hauled away. Additional equipment includes elevators, ventilation and communication systems, water pipes, lighting systems, as well as front end loaders, bulldozers and trucks. This classification also applies to establishments engaged in the manufacture of coke which is a solid carbonaceous residue obtained from bituminous coal after the removal of volatile materials by a distillation process. The method usually consists of a beehive or by-product oven process. Coal is fed into crushers which breaks oversized pieces into smaller pieces which are then conveyed to bunkers serving the ovens. This classification also applies to ore reduction involving heat processes.

This classification excludes ore reduction operations which do not require the use of heat which are to be reported separately in classification 1701, and open cut mining which is to be reported separately in classification 1703.

WAC 296-17A-1703 Classification 1703.**1703-01 Open cut mining - all types; placer or hydraulic mining**

Applies to establishments engaged in open cut mining to extract all types of ore including certain minerals such as, but

[Title 296 WAC—p. 367]

not limited to, phosphate rock, graphite, talc, chalk, mica, asphalt, asbestos and gypsum. The process of open cut mining is also commonly referred to as surface mining, open pit mining or strip mining whereby such ores and minerals are extracted from a large hole or pit on the surface. Operations contemplated by this classification involve excavating and stripping the surface material with use of drag lines, power shovels or earth moving equipment. The products are loaded onto dump trucks or belt conveyors for movement to railroad sidings and loading into ore cars for shipment to processing plants. The equipment generally involves compressors, pneumatic drilling rigs, conveyors, trucks, drag lines, shovels, scrapers and bulldozers. This classification also applies to establishments engaged in hydraulic mining in which material is excavated by moving a stream of high pressure water over the mining face, and placer mining which obtains minerals from placers by use of running water such as on a stream or the shoreline.

This classification excludes underground mining which is to be reported separately in classification 1702, and quarrying which is to be reported separately in classification 1704.

WAC 296-17A-1704 Classification 1704.

1704-02 Quarries, N.O.C.

Applies to establishments engaged in quarrying, not covered by another classification (N.O.C.), to extract large solid stone such as, but not limited to, limestone, sandstone, granite, marble, slate, hard shale rock, ballast rock, cement rock, coral rock, etc., from hillsides or open pits. Operations contemplated by this classification involve exposing stone with use of drag lines, power shovels, scrapers or other earth moving equipment. In some instances, blasting with explosives is performed on large stone masses to break portions loose. The stone is separated into large blocks, sometimes called loafs. There are several methods to cut a loaf - line drilling, wire sawing, diamond wire sawing or chiseling. The loafs are removed from the quarry pit and taken to the surface. This classification includes all other activities occurring on the surface of the quarry site which could involve the further cutting of the loafs or the crushing of stone into smaller pieces.

This classification excludes open pit mining operations which are to be reported separately in classification 1703, and underground mining which is to be reported separately in classification 1702.

WAC 296-17A-1801 Classification 1801.

1801-01 Lead smelting, sintering, or refining; calcium carbide manufacturing

Applies to establishments primarily engaged in the smelting, sintering, or refining of lead, including the manufacturing of calcium carbide. The lead ore most commonly

mined is galena which is the sulfide of lead. The ore is mixed with other metalliferous minerals, such as sphalerite, copper pyrites and iron pyrites. The smelting process consists of fusing or separating the metallic elements. After ore has been received, the process begins by crushing, washing and screening the ore. There may be various steps of milling, concentration or amalgamation (floatation) to separate the galena from the sphalerite and other minerals. The roasting or sintering process takes place in rotary kilns or other types of furnaces. In this way the material is sintered or converted into lumps (called sinter) which are mixed with coke and placed into a shaft furnace. The material is then desilvertized which is achieved by adding metallic zinc and raising the temperature sufficiently to dissolve it. The molten metal is then cast into ingots. The ingots may go through further refining processes or may be considered a finished product. This classification also includes the manufacturing of calcium carbide which is a crystalline material produced by heating pulverized limestone or quicklime with carbon and used to generate acetylene gas, as a dehydrating agent, and in making graphite and hydrogen.

This classification excludes aluminum smelting operations which are to be reported separately in classification 1802; the smelting, sintering or refining of ores not covered by another classification, (N.O.C.) which is to be reported separately in classification 1801-08; the recovering, refining or reprocessing of metals which is to be reported separately in classification 1801-09; ore reduction which is to be reported separately in classification 1701; and open pit or underground mining operations which are to be reported separately in the classification applicable to the mining being performed.

1801-03 Steel or iron rolling mills; rolling mills, N.O.C.

Applies to establishments engaged in operating iron or steel rolling mills. In a rolling mill ingots and/or slabs of steel are rolled (i.e., they are passed between rollers whereby they undergo an increase in length and a corresponding reduction in depth). The rollers used by the rolling mills vary widely in size and shape, depending on the type of rolled section(s) to be produced. Depending upon the thickness of the metal to start and the desired thickness when finished, a single piece of metal may pass through the same or a different set of rollers several times.

Rolling mills for pipes may be divided into two categories - welded pipes and seamed pipes. Welded pipes are produced from a steel strip which is bent to a tubular shape and whose edges are then joined by welding. Seamed pipes are produced from cast or rolled billets at rolling temperature. There are different processes for both kinds of manufacturing. Whatever method is used the metals are somehow heated to temperatures up to 1400 degrees Fahrenheit. The equipment may include, but is not limited to, rakes, ladle, forklifts and front loaders.

This classification excludes aluminum smelting plant operations which are to be reported separately in classification 1802, and establishments engaged in the manufacture of pipe or tube from iron or steel by drawing or bending which are to be reported separately in classification 5101.

1801-08 Ore smelting, sintering or refining, N.O.C.

Applies to establishments engaged in the smelting, sintering, or refining of ores not covered by another classification (N.O.C.). Smelting and sintering are refining processes which use different properties of heat which may or may not reduce the ore to molten form. Temperatures are usually lower than 1400 degrees Fahrenheit. Ore is received direct from the mine or in a variety of forms such as, but not limited to, pellets, particles, molds and briquettes. The process begins by crushing, washing and screening; there may be various steps of milling, concentration or amalgamation. The roasting or sintering process takes place in rotary kilns or other types of furnaces. In this way the material is sintered or converted into lumps (called sinter) which may be mixed with other materials and placed into a shaft furnace. The molten metal ore is then cast or recast into ingots. The ingots may go through further refining processes or may be considered a finished product.

This classification excludes aluminum smelting operations which are to be reported separately in classification 1802; the smelting, sintering or refining of lead which is to be reported separately in classification 1801-01; the recovering, refining or reprocessing of metals which is to be reported separately in classification 1801-09; ore reduction which is to be reported separately in classification 1701; and open pit or underground mining operations which are to be reported separately in the classification applicable to the mining being performed.

1801-09 Metal recovering, refining or reprocessing

Applies to establishments engaged in the recovering, refining, or reprocessing of metals. These establishments are considered secondary processors or reprocessors to primary metal producers. The primary producer uses ore to manufacture metal, whereas, the secondary processors or reprocessors will recover, refine, or reproduce refined metals from coarse metal. Types of metal include, but are not limited to, gold, aluminum, silver, lead, and zinc. Metal comes in various forms to include cast ingots, dross, and scrap material. The scrap material and dross are recycled to extract reusable metallic elements. Other metals are reprocessed and may include adding alloys and/or other elements, or recasting the metals into different shapes and sizes. An example may include adding magnesium to zinc as part of the recycling process in which zinc oxide is produced and sold to rubber companies for manufacturing tires and other rubber products. Metals are weighed, sorted and/or sifted through a variety of screens and includes crushing as needed. Next, the materials are placed in an oven or furnace and chemicals and/or alloys are added. At this point the metal may be placed in molds and cooled by air or water. Finished products are inspected, graded, weighed, packaged and shipped. To assist in the processing function, ladles, rakes, conveyers, scales, hoist, front end loaders and forklifts may be used. This classification also includes the incidental buying and selling of scrap metal.

This classification excludes aluminum smelting operations which are to be reported separately in classification 1802; the smelting, sintering or refining of lead which is to be reported separately in classification 1801-01; the smelting, sintering or refining ores not covered by another classification N.O.C., which is to be reported separately in classification 1801-08; ore reduction which is to be reported separately

(2007 Ed.)

in classification 1701; scrap metal dealers which are to be reported separately in classification 0604; and establishments which compact or recycle metal containers such as aluminum or tin cans which are to be reported separately in classification 2102.

WAC 296-17A-1802 Classification 1802.

1802-00 Aluminum smelting

Applies to establishments engaged in the primary smelting of aluminum from alumina using an electrolytic reduction process. This classification includes the alloying and casting of sheet ingots, T-ingots, rolling ingots, notched ingots, sows, pigs, extrusion logs, extrusion billets and other primary production shapes when performed by a primary producer subject to this classification. Aluminum is produced from alumina. Alumina is extracted from bauxite which is an ore found in the earth's crust. Bauxite contains approximately 50% aluminum oxide (alumina) together with iron oxide, silica, and titanium oxide. The aluminum smelting process is two-fold; first, pure aluminum oxide is produced, then the aluminum is decomposed from the oxygen by an electrolytic treatment. The process is complex, labor intensive and power intensive. The use of an electric current causes pure aluminum to go to the cathode (part of the smelting structure) and accumulates as a layer floating on the molten salt in a large vat. This aluminum has a purity of 99.99% and is removed from time to time and cast into suitable shapes from molds.

This classification excludes secondary processors who do not reduce aluminum from alumina, but whose principle business is casting, rolling, extruding, foiling or recycling aluminum alloys from molten aluminum, primary production shapes or used scrap and dross which are to be reported separately in the applicable classification; ore reduction which is to be reported separately in classification 1701; and open pit or underground mining operations which are to be reported separately in the classification applicable to the mining being performed.

WAC 296-17A-2002 Classification 2002.

2002-13 Freight handler services, N.O.C.

Applies to establishments engaged in packing, handling, shipping, or repackaging merchandise or freight which is owned by others and is not covered by another classification, (N.O.C.). General cargo is usually in boxes, cartons, crates, bales, or bags. Other cargo includes, but is not limited to, lumber, logs, steel, pipe, grains, produce, machinery, and vehicles. These establishments are generally located at railroad yards, airports, or warehouses not located on piers or areas adjoining piers. This classification includes the repackaging of goods from damaged containers. Employees of freight handler services perform duties such as, but not lim-

ited to, unloading, checking in and weighing goods, sorting and repackaging goods, tiering (placing in a series of rows one above the other), and reloading goods for shipment. Employments include, but are not limited to, superintendents, checkers, tally men, and lumpers. Machinery and equipment includes, but is not limited to, pallet jacks, hand trucks, forklifts, boom trucks, mobile cranes or overhead track cranes, and hand tools. This classification also includes moving or uncrating, and assembly of modular work stations or other types of office furniture.

This classification excludes drivers and freight handling employees with driving duties who are to be reported separately in classification 1102 without a division of work hours; establishments engaged in loading, unloading, or icing refrigerator cars which are to be reported separately in classification 2002-31; and establishments engaged in warehousing operations for general merchandise which are to be reported separately in classification 2102.

Special notes: Establishments engaged as freight handlers have the hazard of the continual movement of goods, in contrast to warehousing operations in classification 2102-00 that usually store goods for long periods of time. In addition, freight handling services providers do not operate warehouses and storage facilities as a general rule. Freight handling operations performed in connection with the loading or unloading of vessels or rail lines on piers or adjoining areas may be subject to coverage under the U.S. Longshore and Harbor Workers Act. Care should be exercised prior to the assignment of this classification to determine proper jurisdiction.

2002-31 Refrigeration car - loading, unloading or icing

Applies to establishments engaged in loading, unloading, or icing refrigeration cars at railroad yards, airports, or warehouses not located on piers or in areas adjoining piers. This classification includes the repackaging of goods from damaged containers. Establishments in this classification have no equity or ownership in the merchandise being handled. They may contract with customers such as, but not limited to, grocery distributors, meat packers, or pharmaceutical suppliers to pick up and deliver frozen goods. Goods are loaded into refrigerated containers and shipped by common carrier or into refrigerated railcars. Icing the refrigeration systems by adding water, ammonia, or other additives is done to maintain the cold temperatures. Machinery and equipment includes, but is not limited to, pallet jacks, hand trucks, forklifts, compressors, and hand tools.

This classification excludes drivers and freight handling employees with driving duties who are to be reported separately in classification 1102 without a division of work hours; establishments engaged in freight handler services not covered by another classification (N.O.C.) which are to be reported separately in classification 2002-13; and establishments engaged in warehousing operations for general merchandise which are to be reported separately in classification 2102.

Special notes: Establishments engaged as freight handlers have the hazard of the continual movement of goods, in contrast to warehousing operations in classification 2102-00 that usually store goods for long periods of time. In addition, freight handling services providers do not operate ware-

houses and storage facilities as a general rule. *Freight handling* operations performed in connection with the loading or unloading of vessels or rail lines on piers or adjoining areas may be subject to coverage under the U.S. Longshore and Harbor Workers Act. Care should be exercised prior to the assignment of this classification to determine proper jurisdiction.

WAC 296-17A-2004 Classification 2004.

2004-21 Iron or steel merchants; wire rope and cable dealers

Applies to establishments engaged as iron or steel merchants or as dealers of wire rope, cable, or metal conduit. This classification includes the merchandising of nonferrous metals such as, but not limited to, copper, brass, or aluminum. This classification is distinguished from scrap metal dealers in classification 0604 who deal primarily in used metal as opposed to merchants in classification 2004 who sell new goods. Iron or steel merchants receive metal in the form of beams, sheets, plates, bars, rods, pipe, rounds, channels, angles, tubes, or coils from the mills which they unload with overhead cranes, and store them in their shop or yard. Using power equipment such as shearers, hacksaws, drills, benders, and cutting torches, they are cut, sheared, and formed to customer specifications. Wire rope and cable dealers use coilers to wind the wire rope or cable from large spools onto smaller spools, and use saws or other cutting tools to cut it to length and large hydraulic presses to attach sockets, pulleys and other hardware to wire rope to form rigging used by the fishing, logging, and construction industry.

This classification excludes scrap metal and junk dealers which are to be reported separately in classification 0604, and rebar fabricators which are to be reported separately in classification 3402.

WAC 296-17A-2007 Classification 2007.

2007-02 Grain elevator or warehouse

Applies to establishments engaged in providing grain elevator or warehouse facilities. These facilities may range from hundred thousand bushel country elevators to multimillion bushel terminal elevators, the latter of which are located near railroad lines or seaports. Grain may be stored in elevators for years, depending on market conditions. Grain elevators operate year round or seasonally and may offer a variety

of services ranging from storage only to grain milling (see exclusions below). Typical operations in this classification include weighing, grading, cleaning and drying of the grain, and conveyance to the storage lofts. Most grain elevators also provide a brokerage service for their customers.

This classification excludes grain milling which is to be reported separately in classification 2101 and bean or pea elevators which are to be reported separately in classification 2007-03.

2007-03 Bean or pea elevator or warehouse

Applies to establishments engaged in providing bean or pea elevator or warehouse facilities. Bean or pea elevators run all year round or seasonally and may offer a variety of services ranging from storage only to brokerage services. Typical operations in this classification include weighing, grading, cleaning and drying of the bean or pea, and conveyance to the storage lofts.

This classification excludes seed merchants who are to be reported separately in classification 2101; grain elevators which are to be reported separately in classification 2007-02; and vegetable cannery or processing operations and pea vining by cannery employees which are to be reported separately in classification 3902.

WAC 296-17A-2008 Classification 2008.

2008-01 Warehouses - field bonded

Applies to establishments engaged in providing bonded warehouse services at the customers location. Field bonding involves appropriating a warehouse (or portion of one), that is owned by the customer, for the purpose of segregating and securing a portion of that customer's merchandise to be used as collateral for a bank loan. The field bonding company will catalog the merchandise that is involved in the transaction, issue a receipt (the receipt is presented as collateral for the loan), and ensure its security and value for the length of the contract. The field bonding company is not responsible for the maintenance of the facility and doesn't become involved in handling, moving or shipping the goods. Work contemplated by this classification is limited to employees who catalog the goods being held, security guards, and clerical help employed at the secured location.

This classification excludes drivers who are to be reported separately in classification 1102.

Special note: Traditional warehousing establishments (such as those described in classification 2102) may be "bonded" in that they can assure their customers that goods regulated by the Bureau of Alcohol, Tobacco and Firearms, or goods awaiting inspection by U.S. Customs, will remain secured. This type of bonding is similar in that it is an assurance of value and safekeeping, but differs from classification 2008 in that the goods are delivered to, and held at, the warehouse company's own facility.

WAC 296-17A-2009 Classification 2009.

2009-00 Building material dealers and lumber yards

Applies to establishments engaged as building material dealers or lumber yards. For purposes of this classification the term "building materials" includes, but is not limited to, such items as wallboard, roofing, insulation, sheet metal, bricks, blocks, windows, fixtures, cabinets, doors, linoleum, tile, paneling, interior wood and plastic trim and molding, concrete mix, pipe, plumbing, and electrical supplies. In addition, such establishments often carry a variety of paints and accessories, garden tools and accessories, and hardware items such as nails, nuts and bolts, tools, hinges, doorknobs, locks, and more. It is not uncommon for a building material dealer to specialize and sell only one of the above types of items. Establishments engaged as lumber yards carry a diverse line of wood and lumber products and usually with sufficient quantity to build an entire wood structure. This line of wood and lumber products could include beams, planks, boards, plywood, an array of dimensional lumber (1x2, 2x4, 2x12, etc.), fence posts, railroad ties, shakes and shingles, siding, wood paneling, as well as interior wood trim and molding. Such establishments often carry a variety of other building materials such as electrical supplies, pipe and plumbing supplies, fixtures, cabinets, doors, windows, wallboard, insulation, linoleum, tile, paneling, bricks, blocks, concrete mix, roofing materials, sheet metal and more. These establishments often utilize one or more covered sheds to protect less durable materials from the outside climate, and will also utilize an uncovered open yard type of environment for storage of more durable wood, lumber, and building materials. In addition, such establishments could also have an inside store operation to include a variety of items such as hand and power tools, table saws, paints and varnishes, caulking, and a variety of hardware type items such as nails, nuts and bolts, hinges, doorknobs, locks, and more. This classification also includes retail/wholesale fence material dealers. This classification includes all store and yard operations and the transfer of materials or inventory between related stores.

This classification excludes delivery drivers (other than those involved in intrastore or intrayard transfers mentioned above) who are to be reported separately in classification 1101; nondelivery activities conducted away from the store or yard; hardware stores with building materials or lumber which are to be reported separately in classification 2009-03; and warehouse centers which are to be reported separately in classification 2009-05.

2009-01 Electrical supply dealers

Applies to establishments engaged as electrical hardware and supply dealers who primarily sell electrical hardware and supplies in bulk to the contractor trades, such as electrical and construction, although sales also may be made to individuals for their own use. Supplies are typically received in bulk quantity and may include, but are not limited to, spools of electrical wiring and cable, wiring harnesses, plastic and flex hosing, panel boxes, brackets, electrical outlet boxes, fuses, switches, plates, and residential and commercial canisters

and light fixtures. This classification includes all store and yard operations and the transfer of materials or inventory between related stores.

This classification excludes delivery drivers (other than those involved in intrastore or intrayard transfers mentioned above) who are to be reported separately in classification 1101; nondelivery activities conducted away from the store or yard; all service or repair work which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location; retail lighting fixture stores which demonstrate lights and fixtures to walk-in customers which are to be reported separately in classification 6406; and establishments engaged as wholesale lighting fixture and light bulb dealers who buy direct from manufacturers and who sell wholesale to retail lighting fixture stores or other such stores or institutions who are to be reported separately in classification 6407.

2009-02 Farm supply stores

Applies to establishments primarily engaged in operating farm supply or farm cooperative stores. These establishments carry a diverse line of farm feeds, products, and accessories. Typical items may include, but are not limited to, bulk quantities of mixed and unmixed feeds, seeds, oats and grains; bales of alfalfa or hay; bag feed for dogs, cats, chickens, birds, and other animals; bulk and bag fertilizers; pesticides and other garden items including peat moss and bark; animal grooming and care accessories; horse tack; specialty clothing; feed and water bins; metal fencing and grates for livestock; fence posts; barbed wire; pumps and piping; hardware and tools; automotive and tractor parts and accessories; and miscellaneous homeowner or yard equipment such as mowers, rototillers, and a variety of small tractors and accessories. This classification includes all store and yard operations and the transfer of materials or inventory between related stores.

This classification excludes delivery drivers (other than those involved in transferring materials or inventory between related stores) who are to be reported separately in classification 1101; all other nondelivery activities conducted away from the store or yard; all service or repair work which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location; and establishments primarily engaged in the sale, service and/or repair of farm machinery and implements which are to be reported separately in classification 6408.

Special note: Farm supply or farm cooperative stores may conduct additional operations which are to be reported separately. These activities may occur at a single location operated by the business or at separate locations and may include an oil or gas dealership which is to be reported separately in classification 3407; self-service gas or diesel stations which are to be reported separately in classification 3409; or agricultural fertilizer dealers (not including the manufacture of raw materials) which are to be reported separately in classification 2106.

2009-03 Hardware stores with lumber or building material supplies

Applies to establishments engaged in operating hardware stores that also sell building material supplies. For purposes of this classification the term "building materials"

includes, but is not limited to, such items as wallboard, roofing, insulation, sheet metal, bricks, blocks, and windows, cabinets, doors, windows, sheet metal, roofing materials, concrete mix, boards, plywood, dimensional lumber (1x2, 2x4, 2x12, etc.), fence posts, railroad ties, siding, and wood paneling, as well as interior wood trim and molding. The merchandise carried will vary from store to store. For the purposes of this classification, hardware includes items such as, but not limited to, nails, nuts, bolts, screws, door fixtures, hinges, locks, power and hand tools, garden tools and accessories, electrical and plumbing supplies, and paint and automobile supplies. Depending on their location and customer base, hardware stores may also sell a limited selection of giftware, housewares, sporting goods, athletic equipment, games or similar items. Other services provided could include making keys, threading pipe, mixing paint, and the sale of fishing or hunting licenses. This classification includes all store and yard operations and the transfer of materials or inventory between related stores.

This classification excludes delivery drivers (other than those involved in transferring materials or inventory between related stores) who are to be reported separately in classification 1101; all other nondelivery activities conducted away from the store or yard operation; and all service or repair work which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location.

Special note: Hardware stores with lumber or building material supplies are smaller and offer a smaller product selection than warehouse centers which are reported separately in classification 2009-05. Establishments primarily engaged as building material dealers and lumber yards are to be reported separately in classification 2009-00.

2009-04 Pump, plumbing, irrigation, and pipe supply dealers

Applies to establishments engaged as pump, plumbing, irrigation, and pipe supply dealers. Merchandise includes, but is not limited to, pumps, above and below ground irrigation systems and supplies, pipe, fittings, elbows, adapters, connectors, hoses, valves, water softeners, filters, disposals, hot water tanks, heaters, sinks, tubs, toilets, and shower units. Merchandise is typically received in bulk quantity by the pallet, sling, crate or box. Merchandise is sold primarily to plumbing and irrigation contractors. This classification includes all store and yard operations, including showrooms or display areas and in-shop services such as the rebuilding or repair of pumps, and cutting and threading pipe. Also included in this classification is the transfer of product or material inventory between related stores.

This classification excludes delivery drivers who are to be reported separately in classification 1101; all other nondelivery activities conducted away from the store or yard; and all service or repair work not described above which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location.

2009-05 Warehouse centers

Applies to establishments engaged in operating warehouse centers with lumber or building material supplies. For purposes of this classification a warehouse center is an enclosed building or structure which serves to protect the

majority of the items or products contained within the warehouse environment. Warehouse centers are larger than traditional hardware stores and offer a wider product selection. A dominant characteristic of a warehouse center is that excess stock is stacked up to 25 feet high throughout the building. The term "building materials" as used in this classification includes, but is not limited to, such items as wallboard, roofing, insulation, sheet metal, bricks, blocks, and windows. Merchandise carried by warehouse centers may include hardware, variety items, building materials, as well as wood or lumber. Hardware items may include such items as nails, nuts, bolts, door fixtures, hinges, locks, hand or power tools, garden tools, garden supplies and accessories, lawn mowers, electrical supplies, plumbing supplies, paint, and auto supplies. Variety items may include giftware, housewares, sporting goods, athletic equipment, games, rugs, and lawn chairs. Wood and lumber products may include beams, planks, boards, plywood, dimensional lumber (1x2, 2x4, 2x12, etc.), fence posts, railroad ties, shakes and shingles, siding, and wood paneling. This classification includes all store and yard operations and the transfer of materials or inventory between related stores.

This classification excludes delivery drivers (other than those involved in transferring materials or inventory between related stores) who are to be reported separately in classification 1101; all other nondelivery activities conducted away from the store or yard; and all service or repair work which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location.

Special note: Hardware stores with lumber or building material supplies are smaller and offer a smaller product selection than warehouse centers and are reported separately in classification 2009-03. Establishments primarily engaged as building material dealers and lumber yards are to be reported separately in classification 2009-00.

2009-06 HVAC supply dealers

Applies to establishments engaged as heating, ventilation, and air conditioning product and supply dealers. Merchandise includes, but is not limited to, furnace units, gas fireplaces, air conditioning and heater units, hot water tanks, thermostats, vents, venting duct and pipe, vent collars and reels, registers, fittings, adapters, galvanized pipe, insulation wrap, preformed or bent duct portions, flat sheets of metal, concrete pads and gas logs. Merchandise is typically received in bulk quantity by the pallet, sling, crate or box. Merchandise is primarily sold to heating and ventilation contractors, furnace contractors and sheet metal contractors. This classification includes all store and yard operations and the transfer of product or material inventory between related stores.

This classification excludes sheet metal fabrication shops which are to be reported separately in classification 3404; delivery drivers (other than those involved in intrastore or intrayard transfers) who are to be reported separately in classification 1101; all other nondelivery activities conducted away from the store or yard; and all service or repair work which is to be reported separately in the applicable classification whether it is conducted at the store or a customer's location.

WAC 296-17A-2101 Classification 2101.

2101-00 Grain milling; flour mills; feed mills; feed manufacturing

Applies to establishments engaged in milling grain into flour or meal or in the manufacture of dry (powdered, granule or pellet) feed. Operations contemplated by this classification include the receipt of grain (wheat, barley, oats, corn) in bulk or bag which is purchased from others, grinding or milling the grain to either a coarse or a fine powder, adding binder (molasses), adding and mixing ingredients (depending on product being made), and packaging. This classification includes delivery of products in packaged or bulk form to customers.

This classification excludes establishments engaged in the further processing of flour or meal to manufacture food products which are to be reported separately in the applicable food manufacturing classification, and establishments engaged in the manufacture of canned or frozen animal food which are to be reported separately in classification 3902.

2101-01 Hay, grain or feed dealers

Applies to establishments engaged in the sale of grain, feed, and hay to others. Operations contemplated by this classification are limited to the purchase of hay, grain, or feed in bulk from others and the subsequent resale of these items in bulk to others. Establishments subject to this classification may have a small store operation, a substantial storage facility, or they may haul product from location to location all of which are included within the scope of this classification when done by employees of employers subject to this classification.

This classification excludes the sale of hay by farm operations which is to be reported separately in classification 4808, and establishments engaged in the manufacture of animal feed which are to be reported separately in classification 2101-00.

2101-02 Seed processing

Applies to establishments engaged in the processing of agricultural seeds for wholesale or retail sales. These establishments receive produce such as wheat, barley, alfalfa, lentils, vegetables, fruit or flowers from farmers the seed company has contracted with, or in the case of larger seed companies, they may have their own fields for raising the seed crop. Work contemplated by this classification includes, but is not limited to, cleaning, grading, crushing, separating, and packaging of the product (either by hand or by machine). Machinery includes, but is not limited to, screening machines, air gravity separators, clippers, tumbling drums for polishing, and bagging machines. This classification also includes trial plots or lab research facilities used to develop new seed hybrids and improve existing varieties, consultation services provided to the farmers during planting and harvesting seasons, and custom milling work conducted at the farmer's premises. Also included in this classification are establishments engaged exclusively in providing grain or seed drying services.

This classification excludes growing of seeds, other than on a trial plot, which is to be reported separately in the appropriate agricultural classification; merchants engaged in hand packaging seeds that have been processed by others who are to be reported separately in classification 6309-06; grain milling which is to be reported separately in classification 2101-00; hay/grain/feed dealers which are to be reported separately in classification 2101-01; and grain or bean/pea elevators which are to be reported separately in classification 2007.

2101-05 Hop pellet manufacturing

Applies to establishments engaged in the manufacture of hop pellets. Hop pellets are one of several ingredients used by breweries in the manufacture of beer and ale. Operations contemplated by this classification include, but are not limited to, cold storage room operations where bales of hops are kept, bale breaking and grinding of hops into powder, blending of powders and additives, testing of hops, pelletizing, packaging, and shipping. Establishments subject to this classification may own the hops or do custom blending for others.

This classification excludes establishments engaged in the manufacture of hop extract which are to be reported separately in classification 3701.

Special note: Hop pellets are often referred to as a flavoring so care should be taken, when another classification is being considered, to determine the process used.

WAC 296-17A-2102 Classification 2102.

2102-00 Warehouses - general merchandise

Applies to establishments operating as warehouses for general merchandise. This merchandise belongs to a customer and is usually stored for long periods of time. Products typically involved are bulk, nonperishable materials which might include, but not be limited to, rice, coffee, potatoes, or dry cement. Work contemplated by this classification includes, but is not limited to, unloading deliveries, moving merchandise within the facility, recordkeeping, security, and maintaining the facility. Equipment and machinery used includes pallet jacks, forklifts, routine maintenance, cleaning and recordkeeping supplies, and shop vehicles.

This classification excludes delivery drivers who are to be reported separately in classification 1102; wholesale dealers who operate a warehouse for storage of their own product which is to be reported separately in the classification applicable to the product being sold; warehousing of household furnishings by a moving and storage company which is to be reported separately in classification 6907; cold storage plants which are to be reported separately in classification 4401; ministorage warehousing which is to be reported separately in classification 4910; field bonded warehouses which are to be reported separately in classification 2008; and the ware-

housing of a manufacturer's own product which is to be reported separately in the manufacturing classification applicable to the work being performed.

Special note: Even though this type of operation may handle some "grocery" products, it differs from 2102-11 in that the products being handled in 2102-00 are in bulk packaging (not cases of consumer-size packages), do not belong to the business that is warehousing them, and are not intended for sale to a wholesaler/retailer.

2102-04 Recycle, collection and receiving stations; rags, bottles, paper and metal container dealers, N.O.C.

Applies to establishments engaged in the collection of used paper, aluminum, tin, glass, and plastic for the purpose of selling the material to another business that will recycle/remanufacture it into new products. These facilities normally acquire material by placing collection bins at various remote locations, operating a drop-off center (this phase of the business is known in the trade as a "buy back center"), and employing drivers to pick up from businesses. Work contemplated by this classification includes, but is not limited to, sorting material, operating various pieces of equipment used to crush, reduce, wash, and bale material, weighing containers, paying customers for receipt of items that have a redemption value by the pound or piece ("buying back"), and operating shop or yard vehicles. Machinery and equipment includes, but is not limited to, shredders, balers, can crushers, weigh scales, forklifts, collection bins, shop or yard vehicles, and rolloff trucks to handle the collection bins. This classification includes dealers of rags, bottles, paper and metal containers not covered by another classification (N.O.C.)

This classification excludes drivers who are to be reported separately in classification 1102 and establishments engaged in collecting, sorting and reducing scrap metal such as junk dealers, scrap metal dealers or processors, which also receives glass, paper, plastic, etc., which are to be reported separately in classification 0604.

Special note: Classification 2102-04 should not be assigned to an employer who also operates a business subject to classification 4305-18 (Garbage, refuse or ashes collecting) without careful review and an on-site survey. Most garbage collecting businesses have some type of "recycle" program as part of their normal operations in an effort to sort and reduce the amount of waste that goes to landfills and this is considered an inclusion.

2102-11 Grocery, fruit or produce distributors - wholesale or combined wholesale and retail

Applies to establishments engaged in the wholesale, or wholesale/retail, distribution of a variety of grocery items, fruit and produce. A business in this classification buys products from the manufacturer and sells to retail grocery stores, restaurants, and similar businesses. Grocery items may include, but not be limited to, packaged foods, frozen foods, household cleaning supplies, paper products, personal care items, beer, soda, and dairy products. Work contemplated by this classification includes, but is not limited to, unloading deliveries, moving merchandise within the facility, incidental repackaging, breakdown of merchandise into smaller lots, recordkeeping, security, and maintaining the facility. Equipment and machinery includes, but is not limited to, pallet

jacks, forklifts, strapping and shrink wrapping equipment, and vehicles.

This classification excludes delivery drivers who are to be reported separately in classification 1101; any general merchandise warehouse operations in which the operator of the warehouse does not own the merchandise being handled and it is in bulk quantities, which is to be reported separately in classification 2102-00; cold storage plants handling food products which are to be reported separately in classification 4401; operations specializing in vegetable/fruit packing for wholesale distribution which are to be reported separately in classification 2104; operations specializing in wholesale distribution of beer, wine, ale or soft drinks which is to be reported separately in classification 2105; field bonded warehouses which are to be reported separately in classification 2008; and the warehousing of a manufacturer's own product which is to be reported separately in the manufacturing classification applicable to the work being performed.

2102-28 Wool or cotton merchants

Applies to establishments operating as wool or cotton merchants. Merchants subject to this classification buy raw wool or cotton from others, do incidental sorting, grading and repackaging, and sell the product to another business for use as a raw material to make products such as yarn, thread or fabric. Work contemplated by this classification includes, but is not limited to, unloading deliveries, moving merchandise within the facility, hand sorting the product by grade (quality), repackaging, recordkeeping, security, and maintaining the facility. Equipment and machinery includes, but is not limited to, pallet jacks, forklifts, repackaging equipment and vehicles.

This classification excludes drivers who are to be reported separately in classification 1102; wholesale dealers of a finished wool or cotton product which are to be reported separately in the classification applicable to the product; and the warehousing of a manufacturer's own product which is to be reported separately in the manufacturing classification applicable to the work being performed.

WAC 296-17A-2104 Classification 2104.

2104-01 Vegetable packing - fresh

Applies to establishments engaged in the packing of fresh vegetables. These operations are usually located in produce growing areas and are generally seasonal. The vegetables are generally brought to the packing plant by the farmer or co-op drivers, but some packing plants may employ their own drivers to pick up the product from the local farms or co-op. Typical activities of the packing operation include, but are not limited to, sorting, grading, cleaning, trimming, pack-

ing and shipping of the vegetables. Various packing containers such as plastic bags, boxes, barrels, crates, and baskets may be used. The packing may be done by hand for fragile vegetables or by machine for the more sturdy produce. This classification includes cold storage operations if it is used solely for the storage of their own produce. Drivers employed by these establishments who pick up the vegetables from the suppliers or deliver the packaged product to the market are included in this classification. A farm operation that grows and packs their own fresh vegetables or packs other farms' fresh vegetables in addition to their own is to be assigned this classification (2104) for the packing operation. However, if the farmer only sorts and stores the fresh vegetables, the appropriate agricultural classification is applicable to both the growing and sorting/storage operations. This classification also includes establishments engaged in processing potatoes into seed potatoes. Processing plants receive whole potatoes from their suppliers. At the plant the potatoes are moved along on a conveyor belt, cleaned as appropriate, cut into small pieces (usually quarters), and treated with a fumigant powder or other sterilizer. The smaller pieces, referred to as "seed potatoes," are delivered to farmers who plant them for future crops.

This classification excludes fresh fruit packing which is to be reported separately in classification 2104-02; cannery or freezing operations and/or any processing of the vegetables which are to be reported separately in classification 3902; and cold storage operations not exclusively part of a packing operation which are to be reported separately in either classification 4401 or 4404.

2104-02 Fruit packing - fresh

Applies to establishments engaged in the packing of fresh fruit. These operations are usually located in produce growing areas and generally are seasonal. The fruit may be brought to the packing plant by the farmer or co-op drivers, but some packing plants may employ their own drivers to pick up the product from the local farms or co-op. Typical activities of the packing operation include, but are not limited to, sorting, grading, cleaning, trimming, packing and shipping the fruit. Various packing containers such as plastic bags, boxes, barrels, crates and baskets may be used. The packing may be done by hand for fragile fruit or by machine for the more sturdy produce. This classification includes any cold storage operations if it is used solely for the storage of their own produce. Drivers employed by these establishments who pick up the fruit from the farmer or deliver the packaged product to the market are included in this classification. A farm operation that grows and packs their own fresh fruit, or packs other farms' fresh fruit in addition to their own, is to be assigned this classification (2104) for the packing operation. However, if the farmer only sorts and stores the fresh fruit the appropriate agricultural classification is applicable to both the growing and sorting/storage operations.

This classification excludes fresh vegetable packing which is reported separately in classification 2104-01; cannery or freezing operations and/or any processing of the fruit which are to be reported separately in classification 3902; and cold storage operations not exclusively part of a packing operation which is reported separately in either classification 4401 or 4404.

WAC 296-17A-2105 Classification 2105.

2105-00 Beer, ale, wine and soft drink importers, exporters and distributors - wholesale or combined wholesale and retail

Applies to establishments engaged in wholesale, or combined wholesale and retail, distribution of beer, ale, wine and soft drinks. These establishments carry a wide selection of soft drinks, domestic and import beers, ales, and wine, as well as beer pumps and ice. Product stock is received directly from the breweries, wineries, manufacturers or larger distributors, and stored in warehouses or refrigerated storerooms on pallets, in crates, boxes, cases, cartons, kegs or canisters. Stock is then distributed to customers such as, but not limited to, restaurants, lounges and bars, hotels, grocery stores, or other commercial businesses. This classification includes route drivers and driver's assistants.

This classification excludes establishments engaged in the installation, service and repair of vending machines which are to be reported separately in classification 0606, and breweries, wineries, and beverage bottlers, N.O.C. which are to be reported separately in classification 3702.

Special notes: Classifications 2105 and 3702 shall not be assigned to the same account unless each operation is conducted as a separate and distinct business and the conditions set forth in the general reporting rule covering the operation of a secondary business have been met.

2105-01 Beer, ale and wine importers, exporters and distributors - wholesale or combined wholesale and retail

Applies to establishments engaged in wholesale, or combined wholesale and retail, distribution of beer, ale and wine, but not in soft drink beverages. These establishments carry a wide selection of domestic and import beers, ales or wines, as well as beer pumps and ice. Product stock is received directly from the breweries, wineries, manufacturers, or larger distributors and stored in warehouses or refrigerated storerooms on pallets, in crates, boxes, cases, cartons, kegs or canisters. Stock is then distributed to customers such as, but not limited to, restaurants, lounges and bars, hotels, grocery stores, or other commercial businesses. This classification includes route drivers and driver's assistants.

This classification excludes establishments engaged in the installation, service and repair of vending machines which are to be reported separately in classification 0606, and breweries, wineries and beverage bottlers, N.O.C. which are to be reported separately in classification 3702.

Special notes: Classifications 2105 and 3702 shall not be assigned to the same account unless each operation is conducted as a separate and distinct business and the conditions set forth in the general reporting rule covering the operation of a secondary business have been met.

[Title 296 WAC—p. 376]

2105-02 Soft drink importers, exporters and distributors - wholesale or combined wholesale and retail

Applies to establishments engaged in wholesale, or combined wholesale and retail, distribution of soft drink beverages but not alcoholic beverages. Product stock is received directly from the manufacturers or larger distributors and stored in warehouses or refrigerated storerooms on pallets, in crates, boxes, cases, cartons, or canisters. Stock is then distributed to customers such as, but not limited to, restaurants, lounges and bars, hotels, grocery stores, or other commercial beverages. This classification includes route drivers and driver's assistants.

This classification excludes establishments engaged in the installation, service and repair of vending machines which are to be reported separately in classification 0606, and establishments that bottle beverages which are to be reported separately in classification 3702.

Special note: Classifications 2105 and 3702 shall not be assigned to the same account unless each operation is conducted as a separate and distinct business and the conditions set forth in the general reporting rule covering the operation of a secondary business have been met.

WAC 296-17A-2106 Classification 2106.

2106-00 Fertilizer, anhydrous ammonia and agricultural chemical dealers

Applies to establishments engaged in the sale of fertilizer, anhydrous ammonia, and agricultural chemicals. This classification includes the mixing of wet or dry chemical fertilizers all of which fall into one of three categories: Nitrogen, phosphate or potassium. Fertilizer dealers may use a chemical or mechanical process to mix one or more of the basic fertilizers or combine portions of each per customer specifications. Included in this classification is the manufacture, distribution, and application of anhydrous ammonia which is dry ammonia gas compressed into a liquid and used as a fertilizer. Also included in this classification are establishments that sell and distribute "natural" fertilizers (manure). Typical establishments in this classification include, but are not limited to, commercial fertilizer dealers, farmer co-ops, and grange supply dealers which may do some chemical mixing but are more predominately involved in the sales and delivery of the fertilizer.

This classification excludes the mining of raw ores (phosphate and potassium) used in *manufacturing* the fertilizer which is to be reported separately in classification 1701; the manufacture of ammonia and nitric acid which is to be reported separately in classification 3701; and the application of fertilizer by a custom farm services contractor which is to be reported separately in classification 4808.

WAC 296-17A-2201 Classification 2201.**2201-01 Laundry, dry cleaning and dyeing establishments**

Applies to establishments engaged in laundry, dry cleaning, or dyeing services. This classification is limited to establishments providing services primarily to retail walk-in customers who leave the items to be laundered, dry cleaned, or dyed at the laundry facility. This classification covers all operations including, but not limited to, dry cleaning, dyeing, the washing, drying, and pressing of clothing or household furnishings such as, but not limited to, curtains, bedding, linens, and sleeping bags, repairing or altering the items left for cleaning, pick up and delivery services, and drop off stations. These establishments generally employ counter staff to wait on customers as well as employees who engage in laundering and/or dry cleaning operations (although some employees may perform both activities). This classification also includes waterproofing or mothproofing garments, or providing cold storage for fur goods for retail customers. Materials and machinery include, but are not limited to, detergents, bleaches, cleaning solvents, deodorizers, dyes, clothes hangers, plastic bags, automatic or steam operated washing machines, dryers, dry cleaning chambers, dyeing vats, pressing and ironing boards, sewing machines, and delivery vans.

This classification excludes self-service, coin-operated laundry or dry cleaning establishments which are to be reported separately in classification 2204; commercial or industrial laundries not covered by another classification, including linen, uniform and diaper services which are to be reported separately in classification 2203; and carpet, rug and upholstery cleaning establishments which are to be reported separately in classification 2202.

Special note: It is common for establishments subject to this classification to have satellite locations where customers drop off and pick up cleaning, but where no actual laundering occurs. Drop off centers are included in this classification.

WAC 296-17A-2202 Classification 2202.**2202-03 Carpet, rug, and upholstery cleaning**

Applies to establishments engaged in cleaning rugs, carpets, or upholstery for commercial, institutional or residential customers. This classification contemplates work done either at the customer's location or in their own shop or plant. In-shop cleaners usually clean area rugs, and may occasionally clean furniture upholstery. Items are picked up by employees or delivered to the shop, where they are measured and inspected for tears, worn areas, stains or other damage. Rugs may be cleaned with vibrating machines, vacuum cleaners, or shampooing machines. Cleaned rugs are suspended from poles and conveyed into the drying room where large fans propel heated air to dry them. Once dry, the rugs are inspected, rolled, wrapped, and returned to the customer or stored until the customer requests delivery. Services at customers' location may use truck-mounted or portable cleaning equipment. Carpet and upholstery cleaning services may

(2007 Ed.)

offer incidental, related services such as, but not limited to, carpet dyeing and tinting, repairs, carpet maintenance consultations, rug decontamination, on-site dry cleaning of draperies, floor or wall cleaning, the rental of cleaning equipment, or the sale of cleaning solutions. These incidental activities are included in this classification when done by employees of employers subject to this classification.

This classification excludes janitorial establishments that provide general interior cleaning services to the public which are to be reported separately in classification 6602, and laundry and dry cleaning establishments providing services primarily to retail walk-in customers which are to be reported separately in classification 2201.

Special note: Restoration work (as a result of smoke or water damage) such as drying and/or cleaning carpets and upholstered furniture, washing and polishing furniture, washing walls, washing and waxing floors, and cleaning the personal contents of a home is included in classification 6602-03. Refer to classification 6602-03 for more detailed information on restorations.

WAC 296-17A-2203 Classification 2203.**2203-00 Laundries - commercial or industrial: N.O.C.**

Applies to establishments engaged in laundering operations which are not covered by another classification (N.O.C.). In addition to linen, uniform or diaper services, these establishments may launder other goods such as, but not limited to, protective apparel (flame, heat, or chemical resistant), dust control items (treated mops, rugs, mats, dust cloths), and wiping towels. These items may belong to the commercial or industrial laundry and rented to users, or they may be the customers' own goods. Operations include, but are not limited to, soliciting new customers by route supervisors or drivers, collecting and delivering, marking, weighing and sorting laundry, washing, extracting, tumbling, starching, drying, machine or hand ironing, making repairs or alterations, folding and wrapping. This classification also contemplates employees such as counter personnel, receiving clerks, sorters and markers at collection or distribution stores operated on the premises where laundering is performed.

This classification excludes laundry and dry cleaning establishments providing services primarily to retail walk-in customers which are to be reported separately in classification 2201; self-service, coin-operated laundry or dry cleaning establishments which are to be reported separately in classification 2204; and carpet, rug and upholstery cleaning establishments which are to be reported separately in classification 2202.

Special note: This classification also covers establishments specializing in stone washing jeans or "contract dyeing" for commercial or industrial businesses and the cleaning of nonfabric items, such as venetian blinds, plastic goods or computer parts when done at the laundry facility.

WAC 296-17A-2204 Classification 2204.

2204-00 Laundry or dry cleaning - coin-operated, self-service operations

Applies to establishments engaged in the operation of coin (or card) operated self-service laundry and dry cleaning equipment for customers' use on the premises. Most facilities have an attendant(s) on duty at all times; others may have only periodic surveillance by the owner or employees. Attendants generally ensure there are no problems with the equipment or with vandalism; they may perform minor repair or adjustments on the machines, assist patrons by carrying laundry or explaining the operation of the machines. There is usually a small waiting area which may include benches and chairs, change-making machines, vending machines with food and laundry supplies. Materials include, but are not limited to, detergents, bleaches, fabric softeners, dry cleaning solvents, spot-removing fluids, plastic bags, and hangers. Machinery includes, but is not limited to, residential or commercial sized washers and dryers, dry cleaning machines, pressing machines, irons, coin changing machines, tables for folding clothing, chairs, hanger racks, water heating and storage system, solvent reclaiming units, and solvent storage tanks.

This classification excludes laundry and dry cleaning establishments providing services primarily to retail walk-in customers which are to be reported separately in classification 2201, and commercial or industrial laundries not covered by another classification, including linen, uniform and diaper service which are to be reported separately in classification 2203.

Special note: This classification includes self-service/coin-operated cleaning facilities that offer dry cleaning services where the customers leave their clothing with the attendant and it is sent elsewhere for professional dry cleaning. This classification does not apply to any self-service/coin-operated cleaning facilities where the attendant performs any washing, drying, dry cleaning, hanging, or folding services on the premises which are to be reported separately in classification 2201.

WAC 296-17A-2401 Classification 2401.

2401-00 Paper, pulp, or wood fiber: Manufacturing

Applies to establishments engaged in making paper from raw materials such as, but not limited to, wood chips, cotton fiber, water, kraft paper, recycled paper, bleach and dye purchased from outside sources. This classification includes the mashing of wood chips into fiber. Paper manufacturers may make finished products from the paper they manufacture which is included in this classification when done by employees of employers subject to this classification. Equipment includes, but is not limited to, large vats and tanks, spraying systems, choppers, paper-making machines, conveyor sys-

tems, forklifts, scales, winders, rewinders, and cutting machinery. Modern automated paper mills are monitored from computerized control rooms; many of the employees are electricians and control technicians. Wood chips are heated, washed, drained, impregnated with chemicals to separate natural binder fibers from the cellulose fibers, then chopped into tiny particles and further cleansed. Bleach and water are added again and the fibrous mixture is held in tanks to relax and fluff it to a natural state before going to a filtering process where the water is removed, allowing it to coagulate. More ingredients are added to increase strength, then the mixture is sprayed onto the paper-making machinery where it winds through the various sections at high speed. During the first stage the pulp is mostly water; as it spins on the wire mesh, the water is suctioned out and the paper winds around felt-covered rollers. The machine moves the paper through an enclosed, heated room (oven) and dried. The dried paper is rolled from the oven, smoothed on rollers, then rewound into smaller rolls and cut into desired lengths and widths.

This classification excludes establishments engaged in the manufacture of wood chips which are to be reported separately in classification 2903 and establishments engaged in the manufacture of abrasive cloth or paper (emery cloth/sandpaper) which are to be reported separately in classification 3708.

2401-03 Corrugated and fiber board container: Manufacturing

Applies to establishments engaged in the manufacture of boxes and cartons made of corrugated cardboard. Manufacturers subject to this classification may either corrugate cardboard for use in their own products or purchase corrugated cardboard from others. Applying coatings or laminating their own products is included in this classification when done by employees of employers subject to this classification. Raw materials include, but are not limited to, corrugated cardboard, glue, staples, tape, ink, and coating resins. Machinery includes, but is not limited to, sheeters, slitters, slotters, winders or rewinders, printing presses, box-making machinery, die cutters or other cutting machines, laminators, corrugators, balers and shredders, and forklifts. Cardboard is cut to size and shape, printed, scored or creased, corners cut or slotted, sides folded and bottom pieces taped together. Box manufacturers may cut Styrofoam into packing pieces if their customers want them as a packaging unit. This incidental activity is included within the scope of this classification when done by employees of an employer subject to this classification.

This classification excludes establishments engaged in corrugating, laminating, oiling or coating paper which are to be reported separately in classification 2401-04 and establishments engaged in the manufacture of abrasive cloth or paper (emery cloth/sandpaper) which are to be reported separately in classification 3708.

2401-04 Paper coating, corrugating, laminating, oiling, or embossing

Applies to establishments engaged in manufacturing corrugated cardboard, or in coating, laminating, oiling, embossing paper or cardboard (chipboard) for others. To make *corrugated* cardboard, three (or more) rolls of kraft paper are simultaneously fed into a corrugating machine. Steam is sprayed onto the middle sheet as it winds around grooved

rollers, forming grooves. Glue is applied to the tips of the grooves and the middle sheet is run between the other two sheets to form corrugated cardboard. The rest of the process involves heating, drying and curing, scoring and cutting the cardboard. *Coating* involves mixing coating materials, pouring the mixture into troughs of coating machines; the paper passes over rollers through the coating mixtures. *Oiling or waxing* processes are similar, but the oils or waxes are heated prior to being applied to the paper. After saturation, paper is dried, then finished by calendering (smoothed by being pressed through large rollers), slitting to desired widths, and rewinding or sheeting to size. *Laminated* paper is produced by feeding a paste or glue between layers of paper, pressing them together, drying and finishing by winding into rolls, or cutting, slitting or die cutting to size and shape. Paper is *embossed* by winding it on embossing rollers that perforate designs in it. Raw materials include, but are not limited to, kraft paper, chipboard, glues, waxes, resins and other coating liquids. Machinery for all these processes moves paper through glue baths, finishing applications, squeeze rollers, corrugating or embossing rollers, drying ovens, cutting devices, laminators, and/or stacking equipment. Other machinery includes, but is not limited to, forklifts, balers and shredders.

This classification excludes establishments engaged in the manufacture of paper, pulp or wood fiber which are to be reported separately in classification 2401-00; establishments engaged in the manufacture of corrugated and fiber board containers which are to be reported separately in classification 2401-03; and establishments engaged in the manufacture of abrasive cloth or paper (emery cloth/sandpaper) which are to be reported separately in classification 3708.

Special note: This classification differs from classification 2401-03 in that making corrugated cardboard or laminating, oiling, or coating cardboard products made by others is the main activity in classification 2401-04 while such supporting operations in classification 2401-03 are incidental to the manufacture of the product.

2401-08 Paper goods, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of heavy-grade, paper-based products, which are not covered by another classification (N.O.C.). Products range widely and include, but are not limited to, panels, paper-mache items, milk cartons, display boards, commercial air filters, and spiral tubes. Spiral tubes range in size from small cores for paper towels to large tubes used by the construction industry to form concrete. Materials include, but are not limited to, paper, chipboard, glue, inks and dyes, chemicals; materials such as lightweight wire, or small parts made of plastic, Styrofoam, or textiles could be used as auxiliary pieces of the finished product. Machinery includes, but is not limited to, sheeters, slitters, slotters, winders, rewinders, printing presses, cutting, drilling or punching machines, ovens, heated presses, vats and beaters, grinders, laminators, embossers, gluers, vacuum machines, heat-sealing machines, wire-bending equipment, packaging equipment, conveyors, shredders, and balers. Depending on the product being made, processes are similar to one or more of those described in the other paper products manufacturing classifications.

(2007 Ed.)

This classification excludes establishments engaged in the manufacture of paper, pulp or wood fiber which are to be reported separately in classification 2401-00.

WAC 296-17A-2903 Classification 2903.

2903-00 Wood chip, hog fuel, bark, bark flour, fire log and lath: Manufacturing

Applies to establishments engaged in the production of products such as, but not limited to, wood chips, hog fuel, bark, bark flour, fire logs, kindling, excelsior, particleboard, and similar wood by-products.

Wood chips are small pieces of wood, generally uniform in size and larger and coarser than sawdust, commonly used to make pulp, particleboard, stuffing for products such as animal bedding, and as smoker/barbecue fuel;

Hog fuel is made by grinding waste wood in a hog machine, is larger and coarser than wood chips, and is used to fire boilers or furnaces, often at the mill or plant at which the fuel was processed;

Bark is the outermost covering of a tree which is chopped into pieces of varying sizes, and is commonly used for landscaping;

Bark flour is finely ground bark used as a filler or extender in adhesives;

Fire logs are made by forming sawdust into a log about 15 inches long and are used for fuel;

Lath is a narrow strip of wood commonly used to support shingle, slate or tile roofing, and as a fencing material;

Excelsior is the curled shreds of wood used as a packing and stuffing material, or as a raw material in making various board products;

Particleboard is a panel made from discrete particles of wood which are mixed with resins and formed into a solid board under heat and pressure.

The degree of manual labor required to make these products varies depending upon the size of the operation and sophistication of the equipment. Raw materials include, but are not limited to, logs, mill waste, bark, sawdust, or chips. Machinery includes, but is not limited to, rip saws, cut-off saws, loaders, debarkers, hog chippers, hammer mills, conveyors, sorting screens, and storage bunkers. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. The operation of portable chipping or debarking mills is included in this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; general manufacturing which is to be reported separately in classification

cation 2904; and sawmill operations which are to be reported separately in classification 1002.

2903-06 Wood furniture stock: Manufacturing

Applies to establishments engaged in the manufacture of wood furniture stock such as, but not limited to, tabletops, table or chair legs, chair backs or seats, panels for beds, turning squares (bolts of wood which are shaped on lathes into furniture legs) and furniture squares (standard sized - usually 2" x 2" - pieces of wood used in constructing frames of upholstered furniture). Stock may be mass produced or custom. Raw material includes dimensional lumber from hardwoods such as, but not limited to, ash or alder. If the lumber is not presurfaced, it is sanded and/or planed. It is cut to desired width and thickness with a rip saw; and cut to desired length with a cut-off saw. Pieces may be beveled with a table saw, bored with a horizontal boring machine, molded or shaped, and joints formed using a mortise, tenon or jointer. Finished stock is banded and/or palletized and usually shipped unfinished and unassembled to furniture manufacturing plants. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; manufacture of wood furniture and caskets which is to be reported separately in classification 2905; lumber remanufacturing which is to be reported separately in classification 2903-26; veneer manufacturing which is to be reported separately in classification 2904; and sawmill operations which are to be reported separately in classification 1002.

2903-08 Wood door, jamb, window, sash, stair, molding and miscellaneous millwork: Manufacturing, prehang-ing or assembly

Applies to establishments engaged in the manufacture, prehang-ing or assembly of wooden doors, door components, jambs, windows, sashes, stairs, mantels, moldings, turnings, and miscellaneous millwork such as, but not limited to, shut-ters, door and window grilles, skylights, pillars, wainscot, and similar architectural ornaments. Doors manufactured in this classification may be for residential or commercial use, such as, but not limited to, garage, closet, warehouse, interior and exterior; they may be odd-size or standard, panel, solid, louver, hollow core, sliding, bifold and overhead. Component parts for stairs include, but are not limited to, risers, tread, balusters, hand rails, and newel posts. Fireplace mantels include both the shelf and the complete ornamental facing surrounding the firebox. Moldings include, but are not limited to, picture moldings, chair rails, quarter round, coves, and architectural molding and base. Raw materials include, but are not limited to, cut stock lumber, plywood, veneer, particleboard, cardboard, plastic laminates, glue, hardware, glass, and metal. Cutting and fitting of glass and metal components for doors and windows is an integral phase of the manufacturing process and is included within the scope of this classification. Machinery includes, but is not limited to, various types of saws (table, panel, rip, cut-off, radial arm, trim, circular, band, jig, and miter), molders, shapers, routers, planers, finger jointers, mortises, tenons, lathes, presses, various types of sanders, drill presses, hand drills, boring

machines, pneumatic nail, screw and staple guns, spray guns, chisels, air compressors, glue spreaders, drying ovens, over-head vacuum lifts, conveyor systems, fork lifts, and pallet jacks. Some door manufacturers have "door machines" which route impressions in jambs and blanks for hinge placement, and bores holes in the blank for knobs and locks; some have computerized overhead vacuum lights, electronic gluers, hydraulic lift pits, or electronically controlled saws. Prehang-ing doors involves boring holes in door blanks for knobs and locks, routing impressions into the blanks and jambs for hinge replacement, mounting hinges, trimming door and jamb replacements to exact size. Finishing the products with stain, paint, oil, or lacquer is included in this classification when done by employees of employers subject to this classification. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; the manufacture of wood furniture and caskets which is to be reported separately in classification 2905; the manufacture of wood cabinets, countertops, and fixtures which is to be reported separately in classification 2907; lumber remanufacturing which is to be reported separately in classification 2903-26; veneer manufacturing which is to be reported separately in classification 2904; the manufacture of metal doors, jambs, windows, and sashes which is to be reported separately in classification 3402; and sawmill operations which are to be reported separately in classification 1002.

Special note: Lumber yards and building materials centers subject to classification 2009 are to be assigned classification 2903-08 in addition to their basic classification if they prehang door blanks.

2903-10 Wood box, shook, pallet, bin: Manufacturing, assembly, or repair

Wood pallet dealer/recycle operations: Including repairs of pallets

Applies to establishments engaged in the manufacture, assembly, or repair of wood pallets, boxes, bins, shook, shipping crates, and storage containers. A shook is a set of unassembled sawn wood components for assembling a packing box or barrel. Shooks are usually sold to box assembly plants. Pallets may be constructed out of vertical and horizontal runners of dimensional lumber to form a slatted pallet or by attaching three evenly spaced rows of wooden blocks between two sheets of solid plywood to form a lid-block pallet. Usually, the manufacturer subject to this classification picks up pallets, boxes or shipping crates from the customer, brings them to the plant for repair, reconditioning, or rebuilding, then returns them to the customer. However, the *assembly or repair* of bins is often done at the customer's location, which is still to be reported in classification 2903-10 when performed by employees of the bin manufacturer. Raw materials include, but are not limited to, dimensional lumber, plywood, nails, staples, screws, glue, and paint. Machinery includes, but is not limited to, a variety of saws (table, rip, radial arms, cut-off, band or trim), planers, molders, drills, boring machines, notchers, nailing machines, pneumatic stapler, screw and nail guns, conveyors, roll cases, sorting

tables, pallet jacks, and fork lifts. Incoming lumber is cut to specified lengths, widths, and thicknesses with saws, then planed, bored, tongued, and grooved. Pieces are nailed, stapled or glued together to form finished products. Cut ends of pallets, bins, and boxes may be painted for design or for color identification purposes. Customer's name may be imprinted on the product using stencils and paint or wood burning tools. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes lumber remanufacturing which is to be reported separately in classification 2903-26; and sawmill operations which are to be reported separately in classification 1002. Nonwood pallet/bin dealers are to be reported in the appropriate metal, fiberglass, or plastics classification.

2903-12 Wood products, N.O.C.: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of miscellaneous wood products which are not covered by another classification (N.O.C.), including, but not limited to, ladders, utility pole crossarms, beams, barricades, cable spools, slugs or ends for paper rolls, attic vents, prefabricated wall panels, gazebos, saunas, solariums, lattice panels, mall and park furnishings, playground equipment, docks and floats, parade floats, boat trailer bunks, cattle feeders, tree spreaders, tack strip, exhibit booths, weaving looms, and pottery wheels. Finishing of the product with stains or other lacquers is included in this classification when done by employees of employers subject to this classification. Raw materials include, but are not limited to, dimensional lumber, plywood, particleboard, lath, logs, glue, staples, screws, nails, stains, paints, oils, and lacquers. Operations require substantial amounts of machine work, as well as hand assembly. Machinery includes, but is not limited to, saws (table, panel, cut-off, band, jig, miter, or chain), sanders, planers, routers, shapers, molders, jointers, drill presses, boring machines, hydraulic presses, pneumatic nail, screw and staple guns. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; the manufacture of wood household and sporting goods which is to be reported separately in classification 2909; the manufacture of wood furniture and caskets which is to be reported separately in classification 2905; the manufacture of wood cabinets, countertops and fixtures which is to be reported separately in classification 2907; lumber remanufacturing which is to be reported separately in classification 2903-26; veneer manufacturing which is to be reported separately in classification 2904; and sawmill operations which are to be reported separately in classification 1002.

2903-13 Veneer products: Manufacturing

Applies to establishments engaged in the manufacture of veneer products by laminating rough veneer to plywood or particleboard and applying plastic or polyester overlays. Laminated veneer sheets are generally sold to other manufac-

urers and used in the construction of items such as, but not limited to, cabinets, countertops, furniture, wall board, flooring, and shelving. Veneer products generally require no pre-finishing with paint, stain or lacquer. Raw materials include, but are not limited to, plywood, particleboard, polyester, paper, polyethylene, fiberglass, plastic laminates and glue. To make veneer products, sheets of rough veneer are individually fed through glue spreader machines which apply glue to both sides. Veneer sheets may be laminated to other veneer or to plywood or particleboard, cut to size with saws, then plastic or polyester overlays applied. Laminated sheets are fed through either hydraulic cold or hot presses to be bonded and cured. More sophisticated presses automatically feed the sheets through, and shear the laminated panels to standard 4' x 8' or 4' x 10' dimensions, or to specified lengths and widths for custom orders. Forklifts are used to move materials. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; the manufacture of household and sporting goods wooden ware which is to be reported separately in classification 2909; the manufacture of wood products not covered by another classification (N.O.C.) which is to be reported separately in classification 2903-12; the manufacture of wood furniture and caskets which is to be reported separately in classification 2905; the manufacture of wood cabinets, countertops and fixtures which is to be reported separately in classification 2907; the manufacture of rough veneer which is to be reported separately in classification 2904-00; lumber remanufacturing which is to be reported separately in classification 2903-26; and sawmill operations which are to be reported separately in classification 1002.

2903-20 Wood sign: Manufacturing

Applies to establishments engaged in the manufacture of interior or exterior signs made of wood or wood products. Raw materials include, but are not limited to, dimensional lumber, plywood, molding, acrylic, paint, stain, lacquer and hardware. When additional sizing is required, saws, such as table, panel, cut-off, or radial arm, are used to cut material to desired dimensions. Pieces may be further sized, shaped, and smoothed with routers, saws, planers, or sanders. Stain, paint, or other finishes may be applied as background colors, borders or designs, with pneumatic spray guns, airbrushes, or by hand. Lettering or designs can be painted directly on the sign, cut from separate stock and glued or screwed on, or carved, routed or sandblasted. Computer-cut vinyl lettering may also be applied. Sign painting and lettering is included in this classification when done by employees of the sign manufacturer. Hand drills or drill presses are used to mount wood lettering or designs, bore holes and attach hardware used in the subsequent installation of the sign. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes the installation or removal of signs outside of buildings which is to be reported separately in classification 0403; the installation or removal of

signs inside of buildings which is to be reported separately in classification 0513; sign painting or lettering on the inside of buildings which is to be reported separately in classification 4109; establishments that paint on or apply lettering to sign "backings" that are manufactured by others which is to be reported separately in classification 4109; the manufacture of metal or plastic signs which is to be reported separately in the classification applicable to the manufacturing process; and sawmill operations which are to be reported separately in classification 1002.

Special note: The majority of sign manufacturers also install their signs. Installation and removal of signs is to be reported separately.

2903-21 Wood truss: Manufacturing

Applies to establishments engaged in the manufacture of structural roof trusses, and/or ceiling and floor joists from wood or wood products. These products usually do not require a high degree of finishing work. Raw materials include, but are not limited to, dimensional lumber (usually 2" x 4", 2" x 6", and 2" x 8", which is kiln dried, machine stressed, and presurfaced), plywood, metal gussets, and hardware. Dimensional lumber is cut with gang, table, resaw, or radial arm saws. Cut stock is placed in a hydraulic jig assembly which holds the unassembled components in the properly aligned configuration. Pneumatic nailers are used to embed the nail clips which connect each joint of the truss. A gantry, which is an overhead crane traveling along a bridge-like frame, is used to relocate the truss along the assembly line. The assembled truss is placed in a stationary or moveable press which attaches reinforcing triangular shaped metal plates called gussets at each joint or angle. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all installation activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; the manufacture of door jambs, windows, sashes, stairs, molding and miscellaneous millwork which is to be reported separately in classification 2903-08; lumber remanufacturing which is to be reported separately in classification 2903-26; and sawmill operations which are to be reported separately in classification 1002.

Special note: Truss manufacturers, whose primary customers are building contractors and building supply dealers, usually deliver their product. Delivery to the construction site often entails placing trusses onto the roof top, using boom lifts mounted on the delivery truck, which is included in this classification when performed by employees of employers subject to this classification.

2903-26 Lumber: Remanufacturing

Applies to establishments engaged in lumber remanufacturing, which is the process of converting cants, plywood, or lumber into a more specialized or higher grade product. Cants are large slabs of wood, usually having one or more rounded edges, which have been cut from logs. The incoming stock is generally green, rough-cut, and may be owned by the customer or by the remanufacturer. Machinery includes, but is not limited to, a variety of saws, (chop, resaw, trim, rip, table, radial arm, and cut-off), planers, surfacers, sanders, molders,

groovers, finger jointers, tenoners, gluers, kiln dryers, fork lifts, and trolley cars. Stock is kiln dried, resawed, planed, grooved, or otherwise treated, according to customer specification if the customer owns it, or to standard cuts if it is for resale. Remanufacturers sell lumber to construction contractors or manufacturers that use it in the construction of products such as, but not limited to, paneling, countertops, framing studs, siding, decking, fencing, railroad ties, or molding. Remanufacturers generally do not finish the material with stain, paint, or lacquer. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; the manufacture of roof trusses and ceiling and floor joints which is to be reported separately in classification 2903-21; veneer manufacturing which is to be reported separately in classification 2904; establishments that exclusively kiln dry and/or treat lumber with preservatives, fire retardants, or insecticides, and that do not perform any remanufacturing operations which are to be reported separately in classification 1003; and sawmill operations which are to be reported separately in classification 1002.

2903-27 Ridge cap and/or shim: Manufacturing

Applies to establishments engaged in the production of shims and ridge caps. Shims are thin wedges of wood used for filling spaces or leveling. Ridge caps are shingles which are used as a covering for roof peaks. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; veneer manufacturing which is to be reported separately in classification 2904; and sawmill operations which are to be reported separately in classification 1002.

Special note: This classification must be assigned only by Classification Services after a field inspection of the business has been performed. If a classification must be assigned prior to the field inspection, assign classification 1005-02.

2903-28 Wood boat: Manufacturing, repair, or refinish

Applies to establishments engaged in manufacturing, repairing, or refinishing wooden boats. Raw materials include, but are not limited to, dimensional lumber, plywood, glue, staples, screws, nails, stains, paints, oils, and lacquers. Machinery includes, but is not limited to, band saws, lathes, drill presses, jointers, planers and sanders. Other than pleasure craft, very few wooden boats have been manufactured over the last fifty years. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes the manufacture of fiberglass boats which is to be reported separately in classification 3511, and the manufacture of metal boats which is to be

reported separately in the classification applicable to the materials used and work being performed.

WAC 296-17A-2904 Classification 2904.

2904-00 Veneer: Commercial production

Applies to establishments engaged in all types of commercial production of rough veneer. Veneer is a thin layer of material, usually made of wood or plastic, which is used to cover the surface of another material. In most instances, finished veneer will have a superior appearance or quality than the surface it covers. Rough veneer made of wood generally involves sawing logs, bolts (lengthwise strips), or blocks, softening them in vats of hot water or steam rooms to remove the bark and make the fiber pliable for cutting or turning. The pieces are further shaped by turning, slicing or sawing, cutting the single-ply veneer sheets to various sizes of length and thickness, then drying them in kilns. Rough veneer manufactured in this classification is generally sold to manufacturers of veneer products made by laminating rough veneer to plywood or particleboard. Machinery includes, but is not limited to, band saws, table saws, stationary knife machines, rotary lathes, conveyor systems, kilns, forklifts.

This classification excludes sawmill operations which are to be reported separately in classification 1002; the manufacture of plywood which is to be reported separately in classification 2904-01; the manufacture of veneer products which is to be reported separately in classification 2903; and the manufacture of other products made from wood or plastic which are to be reported separately in the classification applicable to the work being performed. The production of veneer by employees of employers engaged in the manufacture of other products is to be included in the classification covering the manufacture of those products.

2904-01 Plywood: Manufacturing

Applies to establishments engaged in the manufacture of plywood. Plywood is a structural material made of layers of wood (veneer) glued tightly together, usually with the grains of adjoining layers at right angles to each other. (In this application the word "ply" means one of the sheets of veneer.) The production of veneer is included in the scope of this classification when done by employees of employers engaged in the manufacture of plywood. To form plywood, it may be necessary to join less-than-full-size sheets of veneer into full-size sheets. In the joining process, veneer jointers, taping machines, tapeless splicers, or other methods of joining veneer, such as stringing and stitching are used. Next, a glue

spreader coats the cross banding and core veneers (front and back) with liquid glue. Once glued, the veneer is conveyed to a hot press that bonds the veneers into plywood. The panels are removed from the presses, placed in a storage pile (referred to as a "hot stack") to cool and cure, then trimmed, sanded, and stacked for conditioning. Plywood may be impregnated with chemicals to develop wood-plastic combinations that are harder and denser than ordinary plywood. After they are inspected and graded according to thickness and quality, plywood panels are moved by forklift to the warehouse portion of the plant where they are stacked in tiers which are separated by a piece of lumber to prevent sagging or distortion. Pieces are bundled with metal straps, either manually or with automatic strapping equipment.

This classification excludes sawmill operations which are to be reported separately in classification 1002; establishments that manufacture rough veneer as a product which are to be reported separately in classification 2904-00; and the manufacture of other products made from wood or plastic which are to be reported separately in the classification applicable to the work being performed.

WAC 296-17A-2905 Classification 2905.

2905-00 Wood furniture and casket: Manufacturing, assembling, or repairing; Furniture refinishing

Applies to establishments primarily engaged in manufacturing, assembling or repairing furniture or caskets made of wood. Products may be custom-made or stock, for residential or commercial use. This classification includes establishments that repair and refinish wood furniture that is new, used, antique, or furniture with factory defects or damages from shipping. Furniture includes, but is not limited to, sofas, love seats, chairs, tables, beds, dressers, chests, stools, hutches, pool tables, credenzas, desks, bookcases, pews, altars, pulpits, baptisteries, and benches. Materials include, but are not limited to, dimensional lumber, furniture stock, plywood, veneer, particleboard, plastic laminates, polyfoam, upholstery materials (fabric, stuffing, cardboard, metal springs), hardware, glue, paint, stain, oils or lacquer. Machinery includes, but is not limited to, various types of saws (table, panel, rip, cut-off, radial arm, trim, circular, band, jig and miter), molders, shapers, routers, jointers, mortises, tenons, lathes, planers, various types of sanders, drill presses, hand drills, boring machines, pneumatic nail, screw and staple guns, spray guns, air compressors, glue spreaders, dust collectors, drying ovens, sewing machines, steam irons, fork lifts, and pallet jacks. Operations range from processing rough or surfaced lumber, plywood or fiberboard, to the assembly of frame parts into finished products. For classification purposes, repair includes fabricating replacement parts, reinforcing structural weak points, disassembling, regluing and reassembling, recaning chairs, and similar activities, and refinishing includes stripping, sanding, filling, priming, and finishing with stain, oil, paint, or lacquer. Manufacturers in

this classification may upholster their furniture, sell it unfinished, or finish it with various lacquers by spraying, dipping, or applying by hand. To make caskets, wood is cut to size, planed, and sanded. Sections are joined to form the shell, finished with lacquer, oil, or stain, and hardware added. Interior upholstery is usually stapled in place; exterior upholstery is usually glued on. This classification also contemplates the assembly of caskets from purchased components. Manufacturers of wood caskets often purchase ready-made fiberglass or metal casket shells, refinish them if necessary, mount the hardware, and upholster them. This is considered incidental to the main operation and is included in this classification. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. Physically separated upholstery departments of establishments engaged in furniture or casket manufacturing, assembly, or finishing may be reported separately in classification 3808 provided that the conditions of the general reporting rules covering the division of employee hours have been met.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; establishments engaged in stripping and refinishing furniture, but do not otherwise repair it, which are to be reported separately in classification 3603; establishments engaged in the manufacture of wood cabinets, countertops or fixtures which are to be reported separately in classification 2907; and establishments engaged in the manufacture of furniture or caskets from metal or plastic which are to be reported separately in the classification applicable to the work being performed.

Special note: Establishments primarily engaged in the manufacture of furniture or caskets may make other wood products such as cabinets, countertops and fixtures as an incidental activity. The incidental manufacture of these products can be included within the scope of this classification. Furniture is generally moveable and unsecured. Fixtures are usually secured, stationary, or permanently built-in objects. Even though some fixtures may not be secured to a wall or floor, they are not intended to be relocated, unlike furniture which is frequently and more easily arranged.

WAC 296-17A-2906 Classification 2906.

2906-01 Pattern or model - metal, plastic or wood: Manufacturing

Applies to establishments engaged in making metal, plastic, or wood patterns or models. Patterns or models produced may include industrial, aircraft, foundry, architectural scale and mechanical models. Use of this classification is limited to the fabrication of individual or prototype pieces. Work contemplated is limited to fabricating the pattern or model using woodworking and metal cutting tools, sanding and filling voids with fillers (wood or plastic); and extensive

hand finishing of all these mediums when performed by employees of an employer subject to this classification.

This classification excludes pattern or model making by other manufacturers unless specifically allowed for in the manufacturing classification, and establishments engaged in the manufacture of plastic or wood model kits (assembly of a scale model of a car, boat, or plane) which is to be reported separately in the applicable classification.

2906-14 Wood piano or musical instrument: Manufacturing

Applies to establishments engaged in the manufacture of wood musical instruments including, but not limited to, pianos, organs, violins, harps, and guitars. Work contemplated by this classification includes various phases of wood-working techniques required to manufacture cases, sounding boards, pedals and action boards, metal working techniques required to produce components such as pipes, frames, switches, magnets, wind reservoirs and blower systems, and incidental tanning of skins for drums and banjos when done by employees of an employer having operations subject to this classification. This classification applies whether the company is producing all component parts or assembling a wooden musical instrument from purchased parts. This classification includes the reconditioning and subsequent sale of reconditioned pianos, organs, and wooden musical instruments.

This classification excludes the manufacture of metal musical instruments which is to be reported separately in classification 3404; tuning or repair of pianos which is to be reported separately in classification 4107; and the sale of new piano and organs or wooden musical instruments which is to be reported separately in classification 6306 or 6406 as applicable.

WAC 296-17A-2907 Classification 2907.

2907-00 Wood cabinet, countertop, and fixture: Manufacturing, modifying or assembly

Applies to establishments engaged in the manufacture, modification, or assembly of wood cabinets, countertops, and fixtures. Cabinetry work contemplated by this classification includes, but is not limited to, manufacturing custom or modular cabinets, assembling prefabricated modular cabinet components, refacing existing cabinets and replacing hardware, and modifying the dimension or design of modular cabinets. Manufacturing countertops includes fabricating the core or sub top in addition to laying the plastic laminate, polyester overlay or tile when performed in the shop by employees of employers subject to this classification. Finishing that is subcontracted out to a prefinishing contractor or performed by the general or specialty construction contractor at the job site is to be reported in the classification applicable to the work being performed. Finish work, including staining, lamination, and the attachment of hardware, is included in classification 2907-00 when performed by employees of an employer subject to this classification. Fixture manufacturing

includes built-in store, office, restaurant, bank and residential fixtures such as, but not limited to, showcases, display cases, end aisles, display pedestals, shelving, partitions, racks, closet organizers, bookshelves, work stations, credenzas, podiums, wall units, china hutches, entertainment centers, cashier cubicles, check-out counters, and curio cabinets. The wiring of fixtures for electrical fittings, and the cutting and fitting of plastic laminates, glass, mirrors, or metal trim, when performed in the shop, is included as an integral function of the manufacturing process encompassed within this classification. Raw materials include, but are not limited to, dimensional lumber, plywood, veneer, particleboard, plastic laminates, polyester overlays, sheet rock, slot wall dowels, hardware, mirrors, metal trim, electrical hardware, carpet, upholstery fabric, stain, paint, lacquer or glue. Machinery includes, but is not limited to, table, panel, radial arm, cut-off, chop, rip, band, and miter saws, wide belt sanders, edge sanders, hand finish jointers, mortises, tenoners, drill presses, hand drills, boring machines, edge banders, dowel machines, glue spreaders, face framing machines, pneumatic nail, screw and staple guns, air compressors, spray guns, forklifts, pallet jackets, and dust collectors. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. Lumber yards, building material dealers, or general construction contractors that maintain a separate woodworking shop for manufacturing, assembling cabinets, and fixtures are subject to this classification for the woodworking operations, in addition to any other basic classification applicable to their business.

This classification excludes the installation of countertops only which is to be reported separately in classification 0502, the installation of cabinets, countertops, and fixtures which is to be reported separately in classification 0513; the manufacture of wood furniture and caskets which is to be reported separately in classification 2905; the manufacture of metal cabinets which is to be reported separately in classification 3402; lumber remanufacturing which is to be reported separately in classification 2903; veneer manufacturing which is to be reported separately in classification 2904; and sawmill operations which are to be reported separately in classification 1002.

Special note: Establishments primarily engaged in the manufacture of cabinets, countertops and fixtures, may make other wood products such as doors, windows, moldings, and/or furniture as an incidental activity to the main business. The manufacture of these incidental products is included within the scope of classification 2907-00. Furniture is generally moveable and unsecured. Fixtures are usually secured, stationary, permanently built-in objects. Even though some fixtures may be secured to a wall or floor, they are not intended to be relocated, unlike furniture which is frequently and more easily arranged.

2908-00 Factory built housing: Manufacturing or assembly

Applies to establishments engaged in the assembly line production of factory built (manufactured) housing such as wood prefab and modular homes, log home kits, mobile homes and prefab cedar homes when manufactured at a shop or adjacent yard. Sections vary in size up to 80 feet long and 28 or more feet wide. Manufactured homes are built on an assembly line with materials such as plywood, rolls of aluminum, steel I beams, insulation, electric wire, particleboard, lumber, pipes, plumbing fixtures, electrical fixtures, appliances, carpeting, paint and hardware. Assembly may be single line or on a side by side line. After the chassis is built, it is placed on a conveyor where workers lay joists and heating and plumbing lines. Floors are then installed, interior walls are raised and cabinets are installed. Preassembled exterior walls are fastened, the roof is placed, covered, and tie down straps are attached. These homes may be sided with aluminum, vinyl, hardwood fiberboard or natural wood. While the chassis and some other steel parts are welded, the majority of the work is performed with stamping and forming equipment, hand and air tools, joiners, jig clamps, planers, hoists, forklifts and rail conveyors. Other parts may be nailed, riveted, stapled or glued. Furniture and blinds or curtains may then be installed and specialty items such as fireplaces may be added. Units are inspected, then moved to the yard until sold or delivered. Individual work stations may include a mill room, cabinet mill room, sheet metal department or paint and finish departments. Some plants may also have sewing departments where they make curtains, blinds and drapes. This classification includes transporting of the factory built home to the customer's site or a dealer's sales lot when performed by employees of an employer subject to this classification, but excludes set up which is to be reported separately in classification 0517.

This classification excludes establishments engaged in the manufacture of campers and travel trailers which are to be reported separately in classification 2908-02; establishments engaged exclusively in the manufacture of truck canopies which are to be reported separately in classification 2908-03; establishments engaged in the manufacture of fiberglass canopies which are to be reported separately in classification 3511; and delivery and set up performed by an independent contractor which is to be reported separately in classification 0517.

2908-02 Campers and travel trailers: Manufacturing

Applies to establishments engaged in the manufacture of factory built campers or travel trailers which are generally not more than 35 feet long and 8 feet wide. This process includes cutting steel I-beams, placing them on a jig and welding the pieces together. Hitches, running gear, and side frames are installed. Subflooring is assembled on a jig and fastened with lag bolts to the frame. Shears, stamping equipment, drill presses and jig clamps are used to perform the work as the pieces are moved by conveyor. Interior and exterior metal

panels and trim are spray painted in spray booths or dipped in tanks, using enamel and then hardened by using drying ovens or heat lamps. All electrical wiring, flooring, carpets, heating units, and plumbing fixtures are installed with the use of electrical hand tools, pneumatic wrenches, staplers, and air compressors. Partition walls are then nailed in place with nail guns. Side walls are framed up on a jig and placed on the trailer. Afterwards, the ceiling is nailed in place and the insulation and cabinets are put in place. Sheet metal sides are stapled on and the top is installed. All systems are checked and the trailer or camper is delivered to the distributor's lot. The process of manufacturing a camper is similar except there are no frame rails, axles or hitch involved as a camper has no chassis. Campers are mounted on pickup trucks; travel trailers are fitted with a hitch for towing behind a motor vehicle.

This classification excludes establishments engaged in the manufacture of factory built housing which are to be reported separately in classification 2908-00; establishments engaged in the manufacture of truck canopies which are to be reported separately in classification 2908-03; establishments engaged in fiberglass canopy manufacturing which are to be reported separately in classification 3511; and camper and travel trailer rental/sales agencies which are to be reported separately in classification 3411.

2908-03 Wood or metal truck canopy: Manufacturing

Applies to establishments engaged in the manufacture of wood or metal truck canopies. After the framework is assembled, insulation is cut to size and inserted, electrical wiring is strung, exterior aluminum sheeting or "skin" is cut to size and attached, interior paneling and decorative trim is fitted, doors and windows are installed and electrical clearance lights are attached. Machinery includes, but is not limited to, saws, electrical hand tools, metal cutting and welding equipment, shears, stamping equipment, drill presses, jig clamps, spray booths, pneumatic wrenches, staple and nail guns, air compressors and miscellaneous hand tools. Direct sales to retail consumers or to wholesale dealers by a canopy manufacturer are included in this classification.

This classification excludes dealers who sell and/or install canopies who are reported separately in classification 1106; establishments engaged in the manufacture of campers and travel trailers which are to be reported separately in classification 2908-02; establishments engaged in the manufacture of factory built housing which are to be reported in classification 2908-00; and establishments engaged in the manufacture of fiberglass canopies which are to be reported separately in classification 3511.

2909-00 Woodenware - household and sporting goods N.O.C.: Manufacturing or assembly

Applies to establishments engaged in light woodworking, not covered by another classification (N.O.C.), for the

manufacture of woodenware household goods, sporting goods and a wide range of decorative woodenware items that require a minimal amount of cutting, shaping, drilling, sanding, assembling and finishing. Items produced in this classification include, but are not limited to, towel bars, tissue holders, magazine racks, spice racks, knife holders, recipe boxes, cutting boards, rolling pins, salad forks, bowls, picture and mirror frames, candle holders, speaker shells, bases for turntables, trophy and plaque bases, house numbers, window blinds and shades, drapery woodenware (rods, brackets, supports, rings), broom and brush handles, bobbins and spools, crutches, hat blocks, pegs, coat hangers, toothpicks, gift boxes, tobacco pipes, toys, games, basketball backboards, baseball bats, boomerangs, pool or shuffleboard cues, hockey sticks, oars, paddles, archery bows and arrow shafts. Establishments in this classification generally purchase ready-made components which they assemble with pneumatic or hand tools such as, but not limited to, nail or glue guns, spray or paint guns, staple guns, screw guns, drills, shaping tools, and brushes. Products may be left natural, or finished by applying paint, stain, lacquer or varnish, or hand dipping or rubbing. A limited assortment of basic wood shop machinery such as, but not limited to, table saws, circular saws, band saws, miter saws, jig saws, routers, shapers, belt sanders, edge sanders, drill presses, boring machines, and finger jointer may be used for the occasionally cutting of a piece of wood. Other materials include, but are not limited to, molding stock, dowels, plywood, glue, staples, screws, and small nails. In most cases, products are small and the manufacturers do not provide installation. This is a shop or plant only classification. It does, however, include work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant which are to be reported separately in the classification applicable to the work being performed; and the manufacture or assembly of wood products such as, but not limited to, molding stock, outdoor playground equipment, marine floats and docks, gazebos, solariums, saunas, ladders, or cable spools from dimension lumber which is to be reported separately in the applicable classifications.

3101-05 Ready mix concrete dealers

Applies to establishments engaged in the mixing and delivery of ready mix concrete for all types of residential and commercial projects such as, but not limited to, foundations, walls, slabs, roadways, driveways, walkways, dams, bridges and swimming pools. Usually, these establishments operate a plant location with a supply of sand, gravel, pebbles, broken stones or slag, and various ingredients to produce bonding adhesives such as cement. The concrete is premixed at the plant location and loaded into a delivery truck, or the raw unmixed ingredients such as cement, sand, gravel, pebbles,

broken stones and water are loaded into a concrete truck and mixed in a revolving or rotating drum in transit to the project site. The concrete is discharged from the drum with use of a metal shoot or is transferred into the bed of a concrete pump truck for pumping. This classification includes ready mix dealers who operate concrete ready mix trucks and/or concrete pump trucks as part of the delivery service. This classification also includes the related sale of tools, equipment, and building materials such as bricks or concrete blocks, and pit and crusher operations provided all sand and gravel produced is used by the dealer to manufacture concrete mix.

This classification excludes establishments engaged in the commercial production and/or digging of sand, gravel or stone not in connection with a ready mix dealer which is to be reported separately in classification 0112, and concrete pump truck services not in connection with a ready mix dealer which is to be reported separately in classification 3506.

3102-04 Rock wool insulation: Manufacturing

Applies to establishments engaged in the manufacture of mineral wool insulation from siliceous materials such as, but not limited to, rock, slag, and glass, or combinations thereof. In a special furnace, hot air or steam is blown through molten rock or slag, shredding the material into a mass of fine intertwined fibers to form the wool. To produce fiberglass insulation material, molten glass is drawn at high speeds through orifices, then subjected to jets of high pressure steam which break the glass filaments into fine fibers. The final product, regardless of raw material, may be shipped in granules which are bagged, or formed into flat sheets, cut to size, enclosed in paper or foil, and packaged. Incidental rock, slag, and glass crushing operations are contemplated by this classification.

This classification excludes the digging or quarrying of raw materials which is to be reported separately in the classification appropriate to the work being performed, and the manufacture of asbestos products which is to be reported separately in classification 3104.

WAC 296-17A-3103 Classification 3103.

3103-01 Cement or lime: Manufacturing

Applies to establishments engaged in the manufacture of cement or lime. Cement is a mixture of various granulated raw materials which may include limestone, shale, clay, slate, alumina, silica sand, iron ore and gypsum. The manufacturing process involves crushing and grinding the raw materials

(2007 Ed.)

into a powder state. Materials are then blended with water to create a slurry, then kiln burned at high temperatures which chemically changes the mixture. This mixture is then combined with gypsum and ground into the final product. Cement may be sold as is or mixed with water and coarse aggregate to make concrete. Lime production involves a similar process using crushing and blending machinery and large kilns. Cement and lime manufacturers may own a limestone quarry as it is the major component of both products.

This classification excludes the quarrying of raw material which is to be reported separately in classification 1704; ready mix concrete dealers who are to be reported separately in classification 3101; and the manufacturing of concrete products which is to be reported separately in classification 3105.

3103-02 Lightweight aggregate building or insulation material: Manufacturing

Applies to establishments engaged in the manufacture of lightweight aggregate building material or insulation material. Types of products covered by this classification include, but are not be limited to, vermiculite, perlite, pozzolan, magnesite, expanded shale aggregate and fiberglass. The manufacturing process contemplates crushing of raw materials and blending and heating of materials in large furnaces.

This classification excludes the quarrying of raw material which is to be reported separately in classification 1704, and the manufacture of fiberglass products which is to be reported separately in the appropriate manufacturing classification.

WAC 296-17A-3104 Classification 3104.

3104-08 Plaster, whiting, talc, emery powder: Manufacturing

Applies to establishments engaged in the manufacture of plaster, whiting, talc or emery powder. Plaster is a mixture of lime, sand, water, and may include hair or other fibers, that hardens to a smooth solid and is used for coating walls and ceilings. Plaster can also be manufactured in dry form and sold in bags. Whiting is a pure white grade of chalk that has been ground and washed for use in paints, ink, and as an extender in pigments, putty or whitewash. Talc is a fine-grained white, greenish, or gray mineral with a soft soapy texture, which is used in the manufacture of talcum and face powder, as a paper coating, and as a filler for paint and plastics. Emery is a fine-grained mineral used for grinding and polishing. This classification is for the production of the powders only. Machinery includes, but is not limited to, crushing, mixing, grinding, milling and washing and cooking machinery, conveyors and forklifts.

This classification excludes establishments engaged in the manufacture of plaster statuary or ornaments which are to be reported separately in classification 3509; establishments engaged in the manufacture of plasterboard or plaster block which are to be reported separately in classification 3104-55; interior and exterior plastering and stucco work which is to be

reported separately in classification 0303; and quarrying operations which are to be reported separately in classification 1704.

3104-52 Asbestos products or mica goods: Manufacturing

Applies to establishments engaged in the manufacture of asbestos products and mica goods. Asbestos products include, but are not limited to, fireproofing, electrical insulation, building materials, brake linings, clutch facings, valve packings, dryer felt, and chemical filters. Asbestos is a fibrous mineral form combined with impure magnesium silicate. Flake asbestos can be mixed, spun and woven into cloth; or the flakes can be used as an ingredient in the processing or treatment of paper. To make molded asbestos products, asbestos is mixed with other ingredients, molded, baked, cut to size, and ground. Mica is also a mineral form; it is split to desired thickness using hand knives or knives mounted on tables. The split mica is sent to punch presses which stamp out the various products usually used by the electrical trades. Mica that is too small to be processed on punch presses may be placed in burling machines, mixed with liquids, then pressed into sheets. Removal of imperfections is usually done by hand; the sheets are dried, baked in ovens and run through sanders prior to crating and shipping.

This classification excludes establishments engaged in the manufacture of plasterboard or plaster block which are to be reported separately in classification 3104-55; contractors engaged in the installation or removal of asbestos or mica products at the customer's site which are to be reported separately in the classification applicable to the phase of construction being performed; and quarrying operations which are to be reported separately in classification 1704.

3104-53 Soapstone or soapstone products: Manufacturing; marble cutting and polishing; slate milling; stone cutting or polishing, N.O.C.

Applies to establishments engaged in the manufacture of soapstone products, and the cutting, milling, and polishing of marble, slate, or stone such as grindstone, limestone, millstone and lithographic stone (usually sheet zinc), not covered by another classification (N.O.C.). Soapstone (also called steatite) is a massive white-to-green talc found in extensive mine beds and is used in products such as, but not limited to, insulation, paints, ceramics, decorative accessories, and ornamental objects. The manufacturing process requires turning, shaping, carving and polishing of the soapstone with a variety of milling equipment. Finished products of marble, slate or stone include, but are not limited to, decorative accessories, tops for furniture, countertops, floor tiles and other building materials. Machinery and materials include, but are not limited to, saws, milling machines, grinders and abrasives.

This classification excludes installation of tile, marble or slate building materials which is to be reported separately in the classification applicable to the phase of construction being performed and quarry operations which are to be reported separately in classification 1704.

3104-55 Plasterboard or plaster block: Manufacturing

Applies to establishments engaged in the manufacture of plasterboard (wallboard) or plaster block which are used as building materials. Raw materials include, but are not limited

to, plaster, fiberboard, and rolls of paper. Plasterboard is made by bonding plaster to a thin rigid board or to layers of fiberboard or paper to form a flat board or a block. Product is dried in ovens, cut to size with slitters or other cutting machinery, and packed for shipment. This classification includes the mixing of the plaster when done by employees of employers subject to this classification.

This classification excludes establishments operating as plaster mills which are to be reported separately in classification 3104-08; interior and exterior plastering and stucco work which is to be reported separately in classification 0303; and quarrying operations which are to be reported separately in classification 1704.

3104-57 Coating of building materials, N.O.C.

Applies to establishments engaged in the coating of building materials, not covered by another classification (N.O.C.), with preservatives to keep them from decaying when placed into the ground. These materials include, but are not limited to, dimensional lumber, deck materials, fence posts, landscaping beams, and lattice work. The coating process may include immersing the lumber in vats of preservative, or cutting or drilling small holes into the lumber and applying preservatives that soak in. Machinery and materials include, but are not limited to, immersion vats, drills, brushes, or machines to drill holes and apply preservatives.

This classification excludes installation of these products which is to be reported separately in the classification applicable to the work being performed.

3104-58 Monument dealers

Applies to establishments engaged in selling monuments, statues, cornerstones, and grave markers to others. This classification includes the finish cutting, grinding, polishing, engraving, and sandblasting of the stone when done by employees of employers subject to this classification. Wholesale monument dealers generally receive split, rough cut stone from the mine or quarry. Materials such as granite and marble are cut to block size, and precast bronze markers may be attached to the stone. Some blocks are sold without further processing while others are finished with stone polishers and abrasives, then cut into monuments prior to shipment to retail monument dealers. Retail monument dealers may provide engraving, artwork, lettering, and dates, according to customer specifications, that is usually done with a sandblasting technique. This classification includes installation of monuments when performed by employees of the monument dealer.

This classification excludes installation of monuments by employees of cemeteries which is to be reported separately in classification 6202; contractors engaged in the installation of monuments which are to be reported separately in the classification applicable to the work being performed; and establishments engaged in providing specialized services, such as, but not limited to, sandblasting which are to be reported separately in the classification applicable to the work being performed.

WAC 296-17A-3105 Classification 3105.

3105-06 Concrete blocks, bricks, poles, piles, tiles and beams manufacturing

Applies to establishments engaged in the manufacture of concrete blocks, bricks, poles, tiles, and beams. Sand, gravel, cement, cinders, aggregates, mesh wire, rods, and, in some cases, plastics are received from others. Raw materials are mixed with water and fed into molds or forming machines. Heavy mesh wire or rods may be inserted into the molds for strength. The formed products are usually steam dried and placed in the yard for curing prior to shipping. This classification does not apply to the manufacture of these products when done by construction contractors at a construction site for use in the construction project.

This classification excludes the production of raw materials which is to be reported separately in the applicable mining, quarrying, or excavation classification; the installation or erection of products manufactured under this classification which is to be reported separately in the classification applicable to the work being performed; the manufacture of concrete sewer and irrigation pipes, septic tanks and concrete products not classified elsewhere which is to be reported separately in classification 3105-07; the manufacture of statuary and ornamental items from plaster or concrete which is to be reported separately in classification 3509; and the manufacture of brick or clay products which is to be reported separately in classification 3501.

Special note: This classification differs from classification 3509 "statuary or ornament manufacturing" in that products manufactured in classification 3105 are rough, do not require perfect finishes, and are generally for construction use; products manufactured in classification 3509 are for decorative purposes, are usually lighter weight, and have smoother or more perfect finishes than the concrete products manufactured in classification 3105.

3105-07 Concrete sewer and irrigation pipes, concrete septic tanks and concrete products, N.O.C. manufacturing

Applies to establishments engaged in the manufacture of concrete sewer and irrigation pipes, septic tanks and other concrete products not covered by another classification (N.O.C.), such as, but not limited to, panels, tubs, catch basin covers, chimney caps, columns, incinerators, manhole covers, pier footings, monuments, coffins, caskets, and burial vaults. Sand, gravel, cement, cinders, aggregates, mesh wire, rods, and, in some cases, plastics are received from others. Raw materials are mixed with water and fed into molds or forming machines. Heavy mesh wire or rods may be inserted into the molds for strength. The formed products are usually steam dried and placed in the yard for curing prior to shipping. The manufacture of concrete panels generally involves the cutting and welding of metal to form a frame to which concrete fiberboard is attached. Additional steps may involve the application of an adhesive to the frame and the attachment of decorative material such as crushed rock, gravel, ceramic tile or brick. The fabrication of the metal framing is included

within the scope of this classification when performed by employees of an employer engaged in manufacturing concrete panels. This classification does not apply to the manufacture of these products when done by construction contractors at a construction site for use in the construction project.

This classification excludes the production of raw materials which is to be reported separately in the applicable mining, quarrying, or excavation classification; the installation or erection of products manufactured under this classification which is to be reported separately in the applicable classification; the manufacture of concrete blocks, bricks, poles, piles, tiles and beams which is to be reported separately in classification 3105-06; the manufacture of statuary and ornamental items from plaster or concrete which is to be reported separately in classification 3509; and the manufacture of brick or clay products which is to be reported separately in classification 3501.

Special note: This classification differs from classification 3509 "statuary and ornament manufacturing" in that products manufactured in classification 3105 are rough, do not require perfect finishes, and are generally for construction use; products manufactured in classification 3509 are for decorative purposes, are usually lighter weight, and have smoother or more perfect finishes than the concrete products manufactured in classification 3105.

WAC 296-17A-3303 Classification 3303.

3303-07 Fish dealers - retail

Applies to establishments engaged in the retail sale of fresh fish and shellfish over the counter. Refrigerated show cases display the fresh fish available for sale by the pound. Retail fish dealers typically purchase a supply of fish and shellfish, such as finfish, bottomfish, shrimp, crabs, oysters and clams, from wholesale seafood processing, packing or repackaging dealers, and clean, cut, trim, portion, shuck, package, and weigh the products for consumer use. This classification includes the packaging of whole herring, minnow and anchovy which are used primarily as bait fish. The packaging operation involves placing whole fresh fish side by side on a tray which is then sealed in clear plastic, weighed and placed in cold storage until delivery. Bait may be sold retail or wholesale. The incidental sale of items such as seasonings, spices, snack foods, and condiments is also included in this classification.

This classification excludes establishments engaged in fish processing, packing and repackaging operations on a wholesale or combined wholesale/retail basis which are to be reported separately in classification 3304; establishments engaged in the raising, harvesting and subsequent processing and packing of shellfish which are to be reported separately in the appropriate classifications; and establishments engaged in the cold storage or locker operations of products owned by others which are to be reported separately in classifications 4401 or 4404 as applicable.

3303-08 Meat and poultry dealers - retail

Applies to establishments engaged in the retail sale of fresh, frozen or cured meat and poultry over the counter. Refrigerated show cases display fresh meat and poultry for sale by the pound. Retail meat and poultry dealers typically purchase their supply of meat or poultry from wholesale dealers, and cut, trim, portion, package, weigh and label the products for consumer use. The incidental sale of items such as seasonings, spices, condiments, milk, and bread is also included in this classification. The retail meat and poultry market may be located in a single building, a grocery store, or other multipurpose building, but independently owned and operated by the meat and poultry dealer.

This classification excludes custom meat cutting operations, including farm kill, which are to be reported separately in classification 4302; cold storage or locker operations which are to be reported separately in classifications 4401 or 4404 as applicable when conducted as a separate and distinct business; and wholesale or combined wholesale/retail meat, fish and poultry dealers who are to be reported separately in classification 3304.

WAC 296-17A-3304 Classification 3304.**3304-00 Fish processors, packers and repackagers - wholesale or combined wholesale/retail**

Applies to establishments engaged in processing, packaging, and repackaging fish such as salmon, cod, whitefish, halibut, tuna, and/or shellfish when conducted by a wholesale or combined wholesale/retail operation. Typically, fish will arrive at a port via a commercial fishing vessel. Before the load of fish is accepted the wholesaler will inspect the commercial fishing vessel's records to ensure that the fish were caught, handled and stored in accordance with all applicable laws. The fish is then unloaded, identified, inspected for quality, weighed and stored in a refrigerated area or a freezer to await further disposition. Fish are processed, packed and repackaged as requested by the customers. Processing may include, but is not limited to, cutting, filleting, cooking, and/or canning. The fish may be sold to fish and meat markets, supermarkets, grocery stores, restaurants, or other wholesale dealers. This classification includes fishing activities that are not covered by another classification (N.O.C.) and the harvesting, planting or packaging of aquatic plants or shellfish obtained from natural areas where the husbandry of the resource is not an integral part of the operation.

This classification excludes establishments engaged in the cold storage or locker operations of products owned by others which are to be reported separately in classifications 4401 or 4404 as applicable; establishments engaged in the raising, harvesting and subsequent processing and packing of shellfish which are to be reported separately in the appropriate classifications; and establishments engaged exclusively in

retail fish activities, or the packaging of whole minnow, herring, or anchovy (not processed), which are to be reported separately in classification 3303.

3304-01 Meat and/or poultry dealers - wholesale or combined wholesale/retail

Applies to establishments engaged in the wholesale or combined wholesale/retail distribution of fresh, frozen, cured, or smoked meat or poultry. Wholesale dealers generally purchase meat (whole, half, or quarter carcasses) from slaughterhouses, and poultry from poultry processing plants. The meat or poultry is cut into steaks, chops, roasts, fillets or poultry parts, for sale to commercial or institutional customers such as restaurants, hotels, grocery stores, meat and poultry markets, hospitals, and prisons. Wholesale dealers typically do not have display cases for the meat or poultry and receive orders by telephone or by mail. This classification includes the processing and butchering of poultry.

This classification excludes meat products manufacturing, canning or dehydrating, and packing house or slaughterhouse operations, which are to be reported separately in classification 4301; custom meat cutting operations, including farm kill, which are to be reported separately in classification 4302; cold storage or locker operations which are to be reported separately in classifications 4401 or 4404 as applicable, when conducted as a separate and distinct business; establishments engaged in processing, packaging, and repackaging fish which are to be reported separately in classification 3304-00; and retail meat, fish and poultry dealers who are to be reported separately in classification 3303.

WAC 296-17A-3309 Classification 3309.**3309-02 Golf cart sales/rental agencies**

Applies to establishments engaged in the sale and/or rental of new, used golf carts and go carts, and related items such as, but not limited to, golf cart trailers, canopies, protective outerwear, helmets, and replacements parts for the above products. The sale of boats and canoes can be included in this classification if they are incidental to the sale of golf carts and go carts. This classification includes outside lots, and full product line parts and service departments. Regional service representatives who provide factory training to local dealer shop mechanics are included in this classification.

This classification excludes establishments primarily engaged in the sale of boats, boat trailers and motors, which are to be reported separately in classification 3414, and the repair of lawn and garden equipment and small engines which is to be reported separately in classification 3402.

3309-03 Motorcycle, moped, motor scooter, snowmobile, jet ski, all-terrain vehicles sales/rental agencies

Applies to establishments engaged in the sale of new and used motorcycles, mopeds, motor scooters, snowmobiles, jet skis, three wheel and four wheel all-terrain vehicles. These establishments may also sell related items such as, but not limited to, portable generators, lawn and garden equipment,

chain saws, water pumps, snow blowers, small gasoline engines, boat motors, protective outerwear, helmets, and replacement parts for the above products. The sale of boats and canoes can be included in this classification if they are incidental to the sale of motorcycles, mopeds, or other primary merchandise. This classification includes outside lots, and full product line parts and service departments. Also included are motorcycle service and repair shops, motorcycle dismantlers (wrecking yards), regional service representatives who provide factory training to local dealer shop mechanics, and establishments engaged in the sale/rental *and service (repair)* of motorized mobility aids, such as motorized wheelchairs and 3-wheel scooters.

This classification excludes establishments primarily engaged in the sale of boats, boat trailers and motors, which are to be reported separately in classification 3414; establishments primarily engaged in the sale of lawn and garden equipment which is reported separately in classification 6309; and the repair of lawn and garden equipment and small engines which is to be reported separately in classification 3402.

WAC 296-17A-3402 Classification 3402.

3402-00 Air compressor: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of air compressors. This includes air or gas compressors used for paint sprayers, air tools, tire inflation, and general industrial purposes. Operations contemplated include, but are not limited to, welding, machining, general mechanical and electrical work. Machinery and equipment includes, but is not limited to, hand and air tools, welders, punches, shears, and compression equipment. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-01 Printing or bookbinding machinery: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of printing or bookbinding machinery. The outside casings of the machines may be made of plate metal that varies between 1" to 2 1/2" in thickness. The machines used to make the presses and binding machinery may include both Computer Numeric Controlled (CNC) and manual mills and lathes. Other machinery used in the manufacturing process includes, but is not limited to, welders or cutters, grinders, and drill presses. This classification includes the repair of items being manufactured or assembled when done by

employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; and the set up, installation and repair of printing or bookbinding machinery which is to be reported separately in classification 0603.

3402-02 Pump, safe, scale, auto jack, and water meter: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of pumps, safes, scales, auto jacks, and water meters. Materials range from brass screws and rubber washers used to rebuild water meters to plate metal and steel castings used for safe and pump manufacturing. Machinery includes, but is not limited to, hand tools used for repairs, lathes, welders, and pressure testers. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; the installation and repair of safes which is to be reported separately in classification 0607; and the installation of pumps which is to be reported separately in the applicable classification.

3402-03 Shoe or textile machinery: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of shoe machinery or textile machinery. Metal materials used vary in size, shape and dimension. Machinery includes, but is not limited to, drills, mills, lathes, saws, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the installation and repair of shoe or textile machinery which is to be reported separately in classification 0603.

3402-04 Confectioners or food processing machinery: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of food processing or confectioners machinery. Metal materials used vary in size, shape and weight. These establishments often have an assembly line operation and a separate electronic assembly area. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations

subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the installation and repair of confectioners and food processing machinery which is to be reported separately in classification 0603.

3402-05 Machine shops, N.O.C.

Applies to establishments engaged in general machine shop operations not covered by another classification (N.O.C.), tool sharpening, and mobile welding shops. Many of the establishments in this classification are "job shops." Size and shape of materials vary with steel and aluminum being the most common. Plastics, light weight aluminum, and alloyed metals are becoming increasingly popular in the manufacture of equipment for some industries. These establishments often have welding shops along with machine shops. Machinery and equipment includes, but is not limited to, mills, lathes, grinders, saws, welding equipment, inspection equipment, and material handling equipment. Machinery is both manual and Computer Numeric Controlled (CNC). This classification also includes "mobile shops" which are used *exclusively* to repair machinery or equipment. A "mobile shop" in this classification usually means a van or pick up pulling a utility trailer equipped with hand tools, specialty tools, air tools, a compressor, and a portable welding unit. The machinery or equipment is usually repaired at the customer's location, however, sometimes the broken part is removed and taken back to the shop for repair.

This classification excludes repairs to buildings and structures which are to be reported separately in the appropriate construction classification, and mechanical repairs which are to be reported separately in the classification applicable to the work being performed.

Special note: The term "job shop" is an industry term that means the shop will produce products to customer specifications.

3402-06 Power saw, lawn and garden equipment, small motor, N.O.C.: Repair

Applies to establishments engaged in repairing small power tools, small motors powered by gas or diesel, outboard marine engines, and lawn and garden equipment not covered by another classification (N.O.C.). The largest piece of equipment repaired in this classification is generally a riding lawn mower. Classification 3402-06 is assigned in conjunction with a store classification for establishments that have a store operation and also repair the type of items they sell. Classification 3402-06 may also be assigned to a manufacturer's representative who performs warranty repairs. Tools used in this type of repair are mainly hand and air tools. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the repair of electrical motors which is to be reported separately in classification 5201.

3402-07 Gear: Manufacturing or grinding

Applies to establishments engaged in the manufacture or grinding of gears. Establishments in this classification may also cut key slots and broaches. Establishments that cut stock to manufacture the gear are often not the same ones that perform the final grinding process. Gears may go through two, three, or four different grinding, slotting, and/or keying establishments and then go to another establishment for electroplating or galvanizing before they are ready for sale or use. Precision machine shops may grind gears to the ten thousandths of an inch. Materials used are usually stainless steel, aluminum, or plastic. Machinery includes, but is not limited to, gear shapers, drill presses, mill, hobbers, grinders, some of which might be Computer Numeric Controlled (CNC). This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-08 Elevator: Manufacturing

Applies to establishments engaged in the manufacture of elevators and associated electronic components. Machinery includes, but is not limited to, mills, drills, lathes, saws, and grinders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and the installation, service, and repair of elevators which is to be reported separately in classification 0602.

3402-11 Metal goods: Manufacturing and shop services (temporary classification)

Applies temporarily to all establishments assigned any classification within WAC 296-17-580. When the metal goods study is complete, the establishments within this classification will be assigned to the appropriate classifications. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation.

This classification excludes all activities away from the shop or plant.

3402-12 Multimedia blasting

Applies to establishments engaged in multimedia (such as, but not limited to, glass, plastic and sand) blasting operations which strip paint or other coatings from metal or fiberglass. Most of the blasting operations in this classification are done on automobiles, but it also applies to establishments that perform blasting on items such as, but not limited to, barbe-

cue grills, and cast iron pieces. Multimedia blasting processes in this classification are performed in a shop, use less air pressure and media with softer finishes than other blasting operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and sandblasting of buildings or structures which is to be reported separately in classification 0504.

3402-14 Furnace, heater, radiator, wood, propane, or pellet stoves: Manufacturing

Applies to establishments engaged in the manufacture of furnaces, radiators, wood, propane, or pellet burning stoves or similar heating fixtures. Materials include, but are not limited to, metal cast parts, sheet metal, plate metal, aluminum, or stainless steel. Machinery includes, but is not limited to, hand tools, solder guns, punches, lathes, and saws. Establishments in this classification may have separate areas for electronic assembly and/or painting. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of radiators for automobiles or trucks which are to be reported separately in classification 3402-48; and establishments engaged in the manufacture of baseboard heaters which are to be reported separately in classification 3404.

3402-16 Die casting

Applies to establishments engaged in the manufacture of products by die casting. Die casting is a manufacturing process for producing accurately-dimensioned, sharply-defined metal products which are referred to as "die castings." "Dies" are the steel molds used to mass produce the product. The process begins when ingots of various metal alloys are melted in die casting machines. The machine forces the metal into the die under hydraulic or pneumatic pressure. The casting quickly solidifies in the die, and is automatically ejected by the machine, and the cycle starts again. The castings are cleaned by grinding or sanding, which also removes any excess metal "flash." Many die casting manufacturers maintain their own machine shop for making the dies. Die making, when done as a part of die casting operations, is included within the scope of this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; and establishments engaged in making dies for others which are to be reported separately in classification 3402-74.

(2007 Ed.)

3402-26 Saw blade: Manufacturing, assembly, or sharpening

Applies to establishments engaged in the manufacture, assembly, or sharpening of saw blades such as, but not limited to, those used in circular saws, band saws, rip saws, key-hole saws, and handsaws such as hacksaws or meat saws. This classification also includes sharpening services for items such as, but not limited to, tools, scissors, and knives. Materials include, but are not limited to, high tensile steel and carbide tipped blades. Machinery includes, but is not limited to, saws, mills, drills, and hand tools. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the repair or sharpening of chain saws which are to be reported separately in classification 3402-06; and establishments engaged in the manufacture or repair of electrical saws which are to be reported separately in classification 5201.

3402-28 Heat treating metal

Applies to establishments engaged in heat treating metal. The heat treating process may use computer numeric controlled ovens or furnaces. The oven may heat up to 1200 degrees Fahrenheit and a furnace may heat up to 2000 degrees Fahrenheit. The metal(s) is placed on a platform; the platform is hydraulically moved into the first chamber and the door is automatically closed. At this time, the oxygen is burned from the chamber. Then the second chamber door is opened and the metal enters the oven/furnace. Depending upon the specifications, the heat treating process usually takes six to sixteen hours. When the metal is finished in the heating chamber it returns automatically to the first chamber. Then the platform lowers and the metals are dipped into a cooling agent. Once the metals are cooled to room temperature the platform rises, the door opens, and the materials are removed. The process is essentially the same using noncomputer numeric controlled heat treating equipment except that, rather than being hydraulically operated, the machine operators move the metals through the system. Many establishments do not produce a product, but heat treat a variety of products to customer specifications. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-29 Nut, bolt, screw, nail, tack, rivet, eyelet spike, needle, N.O.C.: Manufacturing Sprinkler head, speedometer, carburetor: Manufacturing or assembly

Applies to establishments engaged in the manufacture of nuts, bolts, screws, nails, tacks, rivets, eyelets, spikes, and needles not covered by another classification (N.O.C.). This classification also applies to establishments engaged in the manufacture or assembly of sprinkler heads, speedometers,

[Title 296 WAC—p. 393]

or carburetors. Materials include, but are not limited to, steel or iron rods which may be pressed or formed, and small component parts. Machinery includes, but is not limited to, saws, shears, presses, chucks, threading and tapping machines, some of which may be Computer Numeric Controlled (CNC). Establishments may have separate areas for deburring, inspecting, packing and shipping. The carburetor rebuilding may be performed on vehicles that are driven or towed into the shop, or on carburetors that have been already removed from the vehicles. In either case the repairs are made exclusively with hand and air tools and sometimes a diagnostic scope and a drill press. A speedometer is usually embodied with a mileage recording mechanism. The central feature of the device is a permanent magnet. There are gears, spindles, and a drive shaft present in most speedometers. There is also a unit counting disc and a spiral spring calibrator. Hand tools are used almost exclusively in the repair of this kind of speedometer. Today many speedometers are computer controlled. Basically, if this kind of speedometer is in need of repair, a computer chip(s) is replaced, using hand tools. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of hardware that is not covered under another classification, such as handles, latches, and hinges which are to be reported separately in classification 3404, and the repair of speedometers or carburetors in a vehicle which is to be reported separately in the appropriate vehicle repair classification.

3402-32 Abrasive wheel: Manufacturing

Applies to establishments engaged in the manufacture of abrasive wheels. Manufacturing operations often include a laboratory where carbon and other materials are mixed together to form the abrasive edge of the mainly high tensile steel wheels. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-40 Welding or cutting, N.O.C. (*mobile operations limited to repair of equipment and machinery*)

Applies to establishments engaged in welding or cutting operations not covered by another classification (N.O.C.) either in the shop or at the customer's site. Steel is the predominant material along with some aluminum alloys. Machinery is predominantly welding equipment, but may include tools such as, but not limited to, grinders, saws, drills, and material handling equipment. This classification also includes "mobile shops" which are used *exclusively* to repair

machinery or equipment. A "mobile shop" in this classification usually means a van or pick up pulling a utility trailer equipped with hand tools, specialty tools, air tools, a compressor, and a portable welding unit. The machinery or equipment is usually repaired at the customer's location, sometimes with the use of the customer's equipment; however, broken parts may be removed and taken back to the shop for repair.

This classification excludes repairs to buildings or structures which are to be reported separately in the appropriate construction classification and mechanical repairs which are to be reported separately in the classification applicable to the work being performed.

3402-48 Automobile or truck, radiator and heater core: Manufacturing and repair shops

Applies to establishments engaged in the manufacture and/or repair of automobile or truck radiator and heater cores. Manufacturers in this classification may have a die casting area and a separate electronic assembly area. Tools and equipment include, but are not limited to, hand tools, solder guns, and punches. Shops that repair radiators may work on the radiators in the vehicles, but usually the radiators have been removed from the vehicle. The radiator is examined and the core may be removed. Next the radiator is cleaned, air pressurized, and dipped in a water tank to check it for leaks. Once the leaks are found they can generally be repaired by welding the holes shut. The radiator is dipped again to ensure the repair has been made properly. Cleaning the radiator may be done by sandblasting, ultra sound baths or by "rodding" the radiator to remove corrosion. Repair equipment includes, but is not limited to, welders, air and hand tools, dipping tanks, hoists, and forklifts. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-60 Office machinery, N.O.C.: Manufacturing or assembly; Cash register or sewing machines: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of cash registers, sewing machines and office machinery not covered by another classification (N.O.C.) such as, but not limited to, copiers, collators, mail/postage machines, calculators and automatic letter openers. Component parts may be metal, plastic, or wood. Operations include, but are not limited to, cutting, shaping, forming, drilling, riveting, clamping, and bolting; there may be a separate electronic assembly area. Machinery and tools vary within this classification; some establishments use hand and air tools only, others use additional equipment such as, but not limited to, saws, lathes, mills, drills, or water jets, some of which may be Computer Numeric Controlled (CNC). This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is

done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-61 Small arms: Manufacturing, assembly, or rebuild

Applies to establishments engaged in the manufacture, assembly, or rebuild of small arms. For the purpose of this classification, small arms means .50 caliber or less, such as pistols, rifles, shotguns, and light machine guns. Operations include, but are not limited to, metal stamping of casings, machining, assembling, and a high proportion of inspecting. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of ammunition which is to be reported separately in classification 4601; the manufacture or repair of heavy arms which is to be reported separately in classification 5109; and gun stores which are to be reported separately in classification 6309.

3402-74 Tool: Manufacturing, not hot forming or stamping; Die: Manufacturing - ferrous

Applies to establishments engaged in tool manufacturing or die manufacturing, for others, from ferrous materials. Tools manufactured in this classification are usually cutting tools used in lathes, mills, rotors, and saws. Machinery includes, but is not limited to, sharpeners, grinders, lathes and mills, which are both manual or Computer Numeric Controlled (CNC). The die manufacturing included in this classification includes those made exclusively of ferrous materials including, but not limited to, jigs, fixtures, and dies for metal work in general. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of machine-finished tools which are to be reported separately in classification 3402-83.

3402-77 Auto, truck, semi-trailer and bus body: Manufacturing;

Travel trailer body: Manufacturing or repair

Applies to establishments engaged in the manufacture of auto, truck, and bus bodies, and in the manufacture or repair of travel trailer bodies or cargo containers. Repairs are usu-

ally made with the use of welders or cutting torches and air or hand tools. These establishments will also repair or replace hydraulic units. Material used in the manufacture of goods in this classification is usually steel and aluminum, varying in thickness from 16 gauge to plate metal up to one inch thick. Shapes include, but are not limited to, sheet metal, tubes, solid rod or I-beams. Equipment includes, but is not limited to, shears, breaks, hydraulic presses, iron workers, drill presses, grinders, welders, hoist, cranes, and forklifts. Shops may have a finish sanding area as well as a paint area where the vehicle bodies are sprayed with primer, a body bonding material, or a finish coat of paint. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-83 Tool: Manufacturing and machine finishing

Applies to establishments engaged in manufacturing and machine finishing tools. Tools manufactured in this classification are usually hand held instruments such as, but not limited to, wrenches, screw drivers, hammers, torque wrenches, pliers, and sockets. Machinery includes, but is not limited to, air and hand tools, polishers, grinders, inspection equipment, mills, lathes, shapers, and drill presses, some of which may be Computer Numeric Control (CNC). Establishments may have a galvanizing and/or electroplating area for the finish work which is included when performed by employees of employers subject to this classification. Other establishments in this classification send the finish work out. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of tools from ferrous materials which are to be reported separately in classification 3402-74; and establishments engaged in tool forging which are to be reported separately in classification 5106.

3402-85 Auto or truck parts: Machining or rebuild not in vehicle

Applies to establishments engaged in machining or rebuilding auto or truck parts such as, but not limited to, water pumps, fuel pumps, transmissions, heads, brake drums, ball joints, and rear ends, which are not in the vehicle. Work contemplated in this classification may also include manufacturing sockets, pulleys, shafts, fittings, flywheels, and/or bearings. Machinery includes, but is not limited to, mills, lathes, grinders, sanders, presses, welders, and balancing equipment. This is a shop or plant only classification; it includes work being performed in an adjacent yard when

operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in manufacturing or rebuilding auto, truck, or aircraft engines which are to be reported separately in classification 3402-86.

3402-86 Auto, truck or aircraft engine, N.O.C.: Manufacturing or rebuilding

Applies to establishments engaged in manufacturing or rebuilding auto, truck, or aircraft engines not covered by another classification (N.O.C.), including manufacturing the component parts. Establishments in this classification often specialize in the type of engines they make or rebuild. The basic difference between automobile, truck, and aircraft engines is the size and weight of the parts being worked on. Engine rebuild shops use many specialized machines and air tools to tear the core down to an engine block; then rebuild the engine. After the engine is stripped down to the engine block, it is placed in a machine called a baker which heats to approximately 600 degrees and bakes away the grease. After baking, the engine block is placed in a sand blaster where the surface is cleaned with very fine steel shot. The engine block is then placed in a large pressure washer which removes the steel shot. Next, the crank and cam shafts are ground and turned on machinery similar to lathes. There is usually a separate room or area which is called the "head shop" where the heads and valves are machined on valve grinders, valve facers, and head grinders. Engine rebuild shops that do not have the equipment to grind the crank and cam shafts will contract work out to other shops, or buy new crank shafts and cam shafts. Other machinery includes, but is not limited to, boring bars and hones to polish cylinder walls, small pressure washers for oil pans and other smaller parts, solvent tanks, and hoists or forklifts for lifting the engines or engine parts. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in machining or rebuilding auto or truck parts, other than engines, which are to be reported separately in classification 3402-85.

3402-91 Bed spring or wire mattress: Manufacturing

Applies to establishments engaged in the manufacture of bed springs or wire mattresses. The wire stock is coiled and cut to length on a coiling machine, then tempered in an oven to produce the spring. The coils are fastened to the frame either by hand or by machine. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of stuffed mattresses which are to be reported separately in classification 3708.

3402-93 Valve: Manufacturing

Applies to establishments engaged in the manufacture of valves. Valves regulate the flow of air, gases, liquids, or loose material through structures by opening, closing, or obstructing passageways. They are operated manually, electrically, with compressed air, or hydraulic pressure. Valves are usually cut from aluminum, steel, or stainless steel either by a Computer Numeric Controlled machine (CNC) or water jet machine. Depending upon the complexity of the valve, they are assembled in one or several stages. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of valves made in a die mold which are to be reported separately in classification 3402-74.

3402-94 Precision machined parts, N.O.C.: Manufacturing

Applies to establishments engaged in manufacturing precision machined parts not covered by another classification (N.O.C.). Most of these establishments are "job shops." Job shops make component parts for other businesses according to customer specifications, rather than manufacturing a specific product. Many establishments in this classification manufacture precision parts for the aerospace industry. Machining usually begins with solid blocks of material such as, but not limited to, steel, aluminum, titanium, inconel, or plastic, although some hollow tube, flat bar, and angle stock may also be used. The "rough cuts" are often made on manual machines, and the finish cuts on Computer Numeric Controlled (CNC) machines. Depending on the establishment and the job specifications, a specific part may be sent to one or more additional shops to be tempered, milled, or inspected before the original establishment is through with the manufacturing process. Some parts are so sensitive that climate controlled conditions are necessary. Both manual and CNC mills and lathes are the most common types of machines used. Others include, but are not limited to, saws, drills, and grinding machines. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-95 Storage battery: Manufacturing, assembly or repair

Applies to establishments engaged in the manufacture, assembly, or repair of storage batteries. Lead ingots, weighing 20-25 pounds, are melted and poured into a mold or casting machine. After the grids are cooled lead oxide is then pumped onto each side of a grid and cured by baking in an oven of about 300 - 400 degrees F. The plates are then assembled by placing a negative separator (zinc) between a positive separator (copper), and so forth until there are enough of these cells to form the battery. Next, they are sent to a burning machine that cures the paste and plates. After the burning process, the plates are placed into a plastic or hard rubber box-like container and cured for two or three days. The plates are welded together and the top is attached to the body of the battery case with an epoxy glue. Diluted sulfuric acid is added to the battery and then it is put on a charger. The battery is then cleaned and packed for shipping. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in the manufacture of dry cell (flashlight type) batteries which are to be reported separately in classification 3602; and establishments engaged in battery sales and installation which are to be reported separately in the applicable automotive services classification.

3402-96 Automobile or motorcycle: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of automobiles or motorcycles. Most of the manufacturing operations, such as cutting, milling, and turning, are performed with Computer Numerically Controlled (CNC) machinery. Most of the assembly operations are performed with air and hand tools. Other machinery includes but is not limited to saws, grinders, and drill presses. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged only in the manufacture of auto bodies which are to be reported separately in classification 3402-77.

3402-98 Machinery, N.O.C.: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of machinery not covered by another classification (N.O.C.). For purposes of this classification, machinery means any combination of mechanical parts constructed primarily with metal. Finished products vary widely and range from hand held machines to those weighing thousands of

pounds; products include, but are not limited to, grinding machines, boring machines, conveyer systems, and wood chippers. Machinery used to manufacture these items includes, but is not limited to, lathes, mills, press, breaks, shears, and welders, some of which may be Computer Numerically Controlled (CNC). This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3402-99 Photo processing machinery: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of photo processing machinery such as, but not limited to, photo processors or film enlargers. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification when the repair is done as a part of and in connection with the manufacturing or assembly operation. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

WAC 296-17A-3403 Classification 3403.**3403-00 Aircraft: Manufacturing**

Applies to establishments engaged in the manufacture of aircraft. For the purposes of this classification "aircraft manufacturing" means the original manufacture of such aircraft as distinguished from rebuilding, modifying, or converting existing aircraft and applies *only* to the production of units that, when completed, are capable of in-air flight as distinguished from aircraft kits to be assembled by the purchaser that are not capable of air flight when sold. This classification includes aircraft operations incidental to the manufacture, such as test flights.

This classification excludes establishments engaged in the original manufacture of aircraft parts which are to be reported separately in classification 3405 or as otherwise provided for in WAC 296-17-58201; the manufacture of aircraft kits which is to be reported separately in the classification applicable to the work being performed; modification, repair or conversions made to an existing aircraft which are to be reported separately in classification 6804; and the *assembly of aircraft kits into an airplane* which is to be reported separately in classification 6804.

WAC 296-17A-3404 Classification 3404.

3404-01 Can: Manufacturing - aluminum or galvanized

Applies to establishments engaged in the manufacture of cans from aluminum or galvanized metals lighter than 9 gauge. Products include, but are not limited to, soda cans, food cans, and garbage cans. The galvanizing process includes dipping the tin/metal into liquid zinc. The manufacturing process involves cutting, forming, stamping, and soldering/welding. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-02 Galvanized iron works: Manufacturing - non-structural

Applies to establishments engaged in the manufacture of nonstructural galvanized iron from sheet metal lighter than 9 gauge. Processes include cutting, forming, welding, riveting, punching, and drilling. The equipment used includes, but is not limited to, drills, presses, punches, shears, and press breaks. Establishments in this classification may paint, powder coat, or silk screen their products; which is included when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of employers subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

[Title 296 WAC—p. 398]

3404-03 Hardware, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of hardware that is not covered by another classification (N.O.C.), such as, but not limited to, handles, latches, hinges, and buckles. Operations include, but are not limited to, stamping and assembly, electroplating and/or other types of finishing. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of nuts, bolts, screws, nails, tacks, rivets, eyelets, spikes, and needles which are to be reported separately in classification 3402.

3404-04 Metal stamping

Applies to establishments engaged in the mass production of products by metal stamping techniques which impress, cut out, or shape something to a desired size. Products produced by this technique include, but are not limited to, license plates, pie plates, pots, and waste baskets. This classification includes any finish work when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-06 Metal sign: Manufacturing

Applies to establishments engaged in the manufacture of signs from metals lighter than 9 gauge. Materials may be cut, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, water jets and welders. All operations necessary to make a sign operative, such as, but not limited to, adding electrical wiring or circuitry, painting, powder coating, or silk screening are included within the scope of this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; the installation or removal of signs outside of buildings which is to be reported separately in classification 0403; the installation or removal of signs inside of buildings which is to be reported separately in classification 0513; sign

(2007 Ed.)

painting or lettering on the inside of buildings, or establishments that paint on or apply lettering to sign "backings" that are manufactured by others, which is to be reported separately in classification 4109; and establishments engaged in the manufacture of wood or plastic signs which are to be reported separately in the classification applicable to the manufacturing process and materials.

3404-07 Metal goods, N.O.C.: Manufacturing or assembly from materials lighter than 9 gauge

Applies to establishments engaged in the manufacture or assembly of metal goods from materials lighter than 9 gauge which are not covered by another classification (N.O.C.) including water heaters, electric baseboard heaters, electric furnaces and bicycles. Materials may be cut, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-12 Aluminum ware: Manufacturing from sheet aluminum

Applies to establishments engaged in the manufacture of aluminum ware such as, but not limited to, mail boxes, buckets, gutters, and down spouts, from sheet aluminum. Materials may be cut, bent, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-18 Metal coffin/casket: Manufacturing or assembly

Applies to establishments engaged in the manufacture of coffins or caskets out of metal. Materials may be cut, bent, punched, drilled, riveted, and welded. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. Physically separated upholstery departments of establishments engaged in furniture, coffin, casket manufacturing, assembly, or finishing

may be reported separately in classification 3808 provided all the conditions in the general reporting rule covering the division of an employees hours have been met.

This classification excludes all activities away from the shop or plant, and establishments engaged in the manufacture of caskets from wood or plastic which are to be reported separately in the classification applicable to the manufacturing process and materials.

3404-19 Metal awnings: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of awnings from metals lighter than 9 gauge. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant, and establishments engaged in the manufacture of awnings from canvas or other textiles which is to be reported separately in classification 3802.

3404-20 Metal furniture, shower door, showcases: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of furniture, shower doors, or showcases made with metals lighter than 9 gauge. Other items manufactured in this classification include, but are not limited to, file cabinets, desks, and stands. Material may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification. Physically separated upholstery departments of establishments engaged in furniture, coffin, casket manufacturing, assembly, or finishing may be reported separately in classification 3808, provided all the conditions of the general reporting rule covering the division of an employee's hours have been met.

This classification excludes all activities away from the shop or plant and establishments engaged in the manufacture of wood furniture which are to be reported separately in classification 2905.

3404-21 Stove: Manufacturing from metals lighter than 9 gauge

Applies to establishments engaged in the manufacture of stoves from metals *lighter than 9 gauge*. Types of stoves include, but are not limited to, electric or gas cook stoves. Accessory materials such as, but not limited to, electrical assembly units, glass, plastic, or wood may be used in the

manufacture of stoves. Materials may be cut, punched, drilled, riveted, and bent. Establishments in this classification may paint or powder coat their products which is included when performed by employees of employers subject to this classification. Machinery includes, but is not limited to, punches, presses, drills, shears, brake presses, grinders and welders. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant, and establishments engaged in the manufacture of wood stoves or other stoves made of metals 9 gauge or heavier which are to be reported separately in classification 3402.

3404-24 Metal electric or gas lighting fixtures, lampshades or lantern: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of metal fixtures, lampshades, or lanterns from materials lighter than 9 gauge. The metal fixtures may be equipped with electrical or gas lighting and used as signs or other display mediums. Metal may be cut, punched, drilled, riveted, and bent. Depending on the item being made, electrical or gas-filled tubes or bulbs may be attached. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, grinders, welders, and solders. Establishments in this classification may make a finished product or only component pieces. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes establishments engaged in the manufacture of neon tube signs or displays that are not attached to metal backings which are to be reported separately in classification 3602, and all activities away from the shop or plant.

3404-25 Brass or copper goods: Manufacturing

Applies to establishments engaged in the manufacture of brass or copper goods such as, but not limited to, belt buckles, lamp stands, cooking utensils, and flower pots. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, water jets, grinders, welders/solders and brazing guns. Establishments in this classification may make a finished product or a component part. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard

when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-26 Aluminum window, sash or door: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of windows, sashes or doors from aluminum. Accessory materials such as, but not limited to, glass, wood or plastic may also be used in the assembly process. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, shears, break presses, grinders, and welders/solders. Establishments in this classification may make a finished product or only component parts. Manufacturers may paint, enamel, or bake a finish onto products, which is included when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant; establishments engaged in manufacturing vinyl window sashes which are to be reported separately in classification 3512; and establishments engaged in manufacturing wooden window sashes and doors which are to be reported separately in classification 2903.

3404-27 Auto or truck parts, N.O.C.: Manufacturing or assembly; miscellaneous stamped parts

Applies to establishments engaged in the manufacture or assembly of auto or truck parts not covered by another classification (N.O.C.), and of miscellaneous stamped parts, such as, but not limited to, hub caps, fenders, and trim. Galvanizing or electroplating is included in this classification when performed by employees of employers subject to this classification. This classification includes the repair of items being manufactured or assembled when done by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3404-29 Metal ski and toboggan: Manufacturing

Applies to establishments engaged in the manufacture of skies or toboggans primarily from metal although wood or plastic component parts may also be used. Materials may be cut, punched, drilled, riveted, and bent. Machinery includes, but is not limited to, punches, presses, drills, water jets, shears, break presses, grinders, and welders/solders. Establishments in this classification may make a finished product or only a component part. This classification includes the repair of items being manufactured or assembled when done

by employees of an employer having operations subject to this classification and when the repair work is done as a part of, and in connection with, the manufacturing or assembly operations. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes all activities away from the shop or plant.

3405-02 Precision machined parts and products, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of parts and products not otherwise classified (N.O.C.) of various sizes and metal compositions which are primarily produced with computer numeric controlled machinery and equipment and are frequently used by aerospace, aircraft, automotive, medical, and scientific industries.

This classification excludes establishments engaged in the manufacture of hand tools, hardware, or similar parts or products, N.O.C. which are not produced with computer numeric controlled machinery and equipment. This classification excludes all foundry operations involving the preparation of castings, the pouring of metal, and shake out operations which are to be reported separately in classification 5103.

WAC 296-17A-3406 Classification 3406.

3406-00 Automotive or truck gas service stations, N.O.C.: Lube and oil change specialists, and mobile lube and oil services

Applies to establishments operating full service gasoline or diesel service stations not covered by another classification (N.O.C.). Full service includes, but is not limited to, pumping gas for customers, replacing wiper blades, checking and/or filling the fluid levels (oil, transmission, wiper wash and antifreeze), and adding air to the tires. The repairs included in this classification are oil and filter changes, tune-ups, replacement of brakes, front end alignments and the repair or replacement of tires. This classification includes cashiers.

This also applies to establishments engaged exclusively in preventive automotive maintenance, such as, but not limited to, changing oil and oil filters, lubing chassis, checking and/or filling fluid levels, replacing wiper blades, adding air

to tires, and checking and/or replacing belts, hoses, and filters.

This classification excludes portable automobile or truck car washes which are to be reported separately in classification 6602; establishments engaged in automobile or truck repair services and tune up specialists which are to be reported separately in classification 3411; establishments engaged in the service or repair of machinery or equipment N.O.C. which are to be reported separately in classification 6409; self-service gas stations which are to be reported separately in classification 3409; and convenience grocery stores or mini-markets with self-service gasoline operations which are to be reported separately in classification 3410.

3406-01 Automobile or truck storage garages

Applies to establishments operating automobile or truck storage garages. Generally, these types of storage garages consist of an enclosed structure and usually with more than one level of parking. Storage garages may provide additional incidental services such as, but not limited to, gasoline, tune-ups, washing and waxing services, as well as cashiers and full time attendants or security personnel.

This classification excludes portable automobile or truck car washes which are to be reported separately in classification 6602; establishments providing parking lot services which are to be reported separately in classification 6704; automobile or truck repair services which are to be reported separately in classification 3411; establishments engaged in the service or repair of machinery or equipment N.O.C. which are to be reported separately in classification 6409; self-service gas stations which are to be reported separately in classification 3409; and full service gas station services which are to be reported separately in classification 3406-00.

Special note: Storage garages applicable to this classification are distinguishable from parking lots in classification 6704 in that parking lots usually are not an enclosed structure, and they do not provide service to automobiles.

3406-04 Automobile or truck - detailing by contractor; glass tinting

Applies to establishments engaged in providing automobile or truck detailing services and to establishments engaged solely in tinting glass in automobiles. Detailing services involve complete, in-depth cleaning of exteriors and interiors such as, but not limited to, washing, waxing, polishing, buffing, vacuuming or otherwise cleaning the auto bodies, chrome work, tires, hub caps, windows, mirrors, carpets and seats and may also involve tinting glass. This classification includes cashiers.

This classification excludes portable automobile or truck car washes which are to be reported separately in classification 6602; tinting of automobile or truck window glass performed by a glass dealer which is to be reported separately in classification 1108; glass tinting or the application of tinted plastic film to glass windows and doors in buildings which are to be reported separately in classification 0511; detailing performed in connection with automobile or truck dealers, service centers or repair garages which are to be reported separately in classification 3411; detailing performed in connection with automobile or truck body and fender repair shops which are to be reported separately in classification 3412; detailing performed in connection with establishments

engaged in the service or repair of machinery or equipment, N.O.C. which is to be reported separately in classification 6409; and detailing performed in connection with full service gas stations which are to be reported separately in classification 3406-00.

3406-05 Automobile or truck car washes

Applies to establishments providing automobile or truck washing services. This classification includes the exterior washing, waxing, polishing or buffing, cleaning of chrome and tires, and the interior cleaning of windows, carpets, dash and seats. These services may be performed at a coin operated self-service unit, or at a full service automatic unit where the vehicle is conveyed through the line assisted by attendants. This classification includes cashiers and the sale of accessory items such as, but not limited to, bottled car care products, air fresheners, floor mats, beverages and snack foods.

This classification excludes portable automobile or truck car washes which are to be reported separately in classification 6602; washing services performed in connection with automobile or truck dealers, services centers or repair garages which are to be reported separately in classification 3411; washing services performed in connection with automobile or truck body and fender repair shops which are to be reported separately in classification 3412; washing services performed in connection with establishments engaged in the service or repair of machinery or equipment, N.O.C. which are to be reported separately in classification 6409; washing services performed in connection with full service gas stations which are to be reported separately in classification 3406; washing services performed in connection with self-service gasoline operations which are to be reported separately in classification 3409; and washing services performed in connection with convenience stores that have self-service gasoline operations which are to be reported separately in classification 3410.

WAC 296-17A-3407 Classification 3407.

3407-00 Gas or oil dealers, wholesale or retail, including fuel oil, propane or butane

Applies to establishments engaged in the distribution of fuel oil, liquefied petroleum gases (propane and butane) and gasoline on a retail or wholesale basis. Dealers may maintain their own storage tanks on their premises and receive gas or oil through a pipeline from a refinery, by rail or tanker truck, or they may receive their supplies from a separate distribution facility. Gas dealers will deliver gasoline and lubricating

oils directly to retail gas stations in large tank trucks. Fuel oil is delivered to customers by pump trucks and pumped into the customer's tank. Liquefied petroleum gases (LPG) is delivered to customers by pump truck or in prefilled cylinders. Some dealers may also provide, through sale or lease, the installation and maintenance of gas appliances which is included in this classification when done by employees of an employer subject to this classification. This classification includes the incidental mixing or blending of oil or gas with additives, the draining, repair, installation or removal of customer's oil tanks, maintenance contracts and emergency repairs.

This classification excludes the repair, installation or removal of underground oil storage tanks by a contractor which is to be reported separately in classification 0108; the installation or repair of furnaces by a contractor which is to be reported separately in classification 0307; and the construction or repair of exterior commercial storage tanks by a contractor which is to be reported separately in classification 0508.

3407-01 Asphalt, bitumen dealers

Applies to establishments engaged as *dealers* of asphalt and bitumen which can be either a by-product of petroleum refining or found in naturally occurring deposits. Dealers may grind and mix the raw asphalt and bitumen with sand, gravel or limestone to produce a mixture which can be suitable for some paving applications or sold to an asphalt paving material manufacturer for further processing. The product is usually not packaged, but sold by the truckload. When this mixing process is conducted in connection with an oil/petroleum refining operation, it is to be reported in classification 3407-03.

This classification excludes the mining or quarrying of raw materials which is to be reported separately as applicable; establishments engaged in the manufacture of asphalt mixtures for road paving which is to be reported separately in classification 3407-18; and the paving of roads or other surfaces which is to be reported separately in classification 0210 or 0212.

3407-02 Processing waste oils, solvents, antifreeze, paints, and similar materials

Applies to establishments engaged in processing waste oils, used solvents, antifreeze, paints, and similar hazardous materials. Mobile recycling units engaged in similar activities are included in this classification. The processes used by establishments in this classification are similar in that a sample of the waste material usually has been laboratory tested so the composition of the substance is known prior to either being picked up by the establishment's own trucks, or delivered by the customer. Depending on the material and quantity, it may arrive in drums or by tanker trucks. Incoming oil is pumped into waste oil storage tanks where water settles out. After the settling process, the oil goes to treatment tanks where it is heated to boil off remaining water and vaporize gases. There are other methods of recycling the oil, using chemicals, which are also included in this classification. The end product can be used in industrial burners or for cutter fuel. Solvents and antifreeze can be recycled through a distilling process, and used again.

This classification excludes establishments engaged in hazardous/toxic material processing or handling, not described above, such as processing of medical or septic tank waste, drug lab or hazardous spill cleanup (excluding oil spill cleanup on land - classification 0101), and reprocessing or handling of low-level radioactive materials which are to be reported separately in classification 4305.

3407-03 Oil refining - petroleum, including manufacture of products from oil; gasohol - distilling or refining

Applies to establishments engaged in the operation of oil refineries. Oil refineries receive crude oil by pipeline, truck or tanker ship, process it into products such as, but not limited to, gasoline, natural gas, kerosene, fuel oil, lubricating oils and asphalt, and distribute it to their customers. Current refining processes involve four basic steps; separation, conversion, treating and blending. These processes are highly automated and involve the use of receiving tanks, processing units, distillation towers, intermediate storage and pipelines. Included within the scope of this classification are any additional processing methods used to produce the finished secondary products. This classification includes the production of gasohol and the preliminary separation of crude oil (called "topping") at a well site by a contractor.

This classification excludes oil refinery maintenance by a contractor which is to be reported separately in classification 0603; construction of an oil refinery or storage tanks which is to be reported separately in classification 0508; cleaning of storage tanks by a contractor which is to be reported separately in classification 0504; operation of an oil well and incidental preliminary separation of crude oil ("topping") at the well site which is to be reported separately in classification 3407-05; and operation of an oil pipeline only which is to be reported separately in classification 3407-12.

3407-04 Asphalt or tar - distilling or refining

Applies to establishments engaged in the production of commercial asphalt or tar. Products produced in this classification differ from those in 3407-01 in that products in 3407-04 are refined to, and sold as, a liquid or semiliquid. Low grade crude oil, petroleum distillate (by-product of oil refining operations) and coal-tar oil must be treated in a heat exchange system and still before undergoing a final processing in a fractioning tower (a process also used in oil refining) to separate the asphalt or tar. Finished products and by-products include, but are not limited to, asphalt roofing compound, asphalt for use in manufacturing felt roofing paper, trinidad asphalt used in road paving, tar to be used in various paving and waterproofing applications and coal tar which is used in drugs and waterproofing products. When this process is conducted in connection with an oil/petroleum refining operation, it is to be reported in classification 3407-03.

This classification excludes contractors engaged in distillery/refinery maintenance which is to be reported separately in classification 0603; contractors engaged in cleaning of storage tanks which is to be reported separately in classification 0504; and construction of refineries and storage tanks which is to be reported separately in classification 0508.

3407-05 Gas or oil well operation

Applies to establishments or contractors engaged in the routine operation of producing oil or gas wells. Work con-

templated by this classification includes, but is not limited to, all routine operation and maintenance required such as, but not limited to, land clearing and excavation to create slush pits, fire walls, pipe laying, machinery and equipment (such as oil, gas or water pumps) installation and operation, preliminary separation of crude oil, and monitoring of oil or gas production when performed by employees of an employer having operations subject to this classification.

This classification excludes derrick or storage tank erection which is to be reported separately in classification 0508; oil well drilling which is to be reported separately in classification 0103; excavation by a contractor which is to be reported separately in classification 0101; pipe laying by a contractor which is to be reported separately in classification 0107; cleaning of storage tanks by a contractor which is to be reported separately in classification 0504; machinery or equipment maintenance by a contractor which is to be reported separately in classification 0603; and the operation of an oil or gas pipeline only which is to be reported separately in classification 3407-12.

3407-07 Oil or gas wells - cementing

Applies to establishments engaged in providing cementing services to oil and gas well drilling operations. Cementing is required to fill the space between the outer edge of the hole being drilled and the metal casing which is being installed in segments to line the hole. The mixed cement is pumped, under pressure, down into the casing. When it reaches the bottom of the existing hole, the continuing pressure forces it upward around the outside of the casing to the top of the hole or to where it will meet the last segment to have been cemented. This will serve to keep the casing stable and also to prevent any leakage of oil or gas from the casing into the surrounding soil when the well is operational. Cementing contractors can use the drilling derrick already in place to support their machinery. This classification also includes filling the entire well hole with cement, after the casing is disassembled and removed, when the well is no longer operational.

This classification excludes oil or gas well cementing done by employees of an oil well drilling contractor which is to be reported separately in classification 0103.

3407-12 Oil or gas pipeline operation

Applies to establishments engaged in operating an oil or gas pipeline. The pipeline may be used to transport crude oil from a well to a refinery or processed oil from a refinery to a remote storage facility or customer. Work contemplated by this classification includes, but is not limited to, operating and maintaining above or below-ground pipelines, feeder and distribution lines, pumping stations to maintain flow, storage facilities, and meters and monitoring equipment. This classification is appropriate whether the pipeline is being operated by the owner or a contractor.

This classification excludes oil or gas pipeline operations done in connection with an oil refinery which are to be reported in classification 3407-03; oil or gas pipeline operations done in connection with the operation of an oil or gas well which are to be reported in classification 3407-05; contractors engaged in above or below ground pipe installation which is to be reported separately in classification 0107; construction of oil refineries and/or storage tanks which is to be

reported separately in classification 0508; and the installation of pumps or monitoring equipment which is to be reported separately in classification 0603.

3407-17 Asphalt roofing material - manufacturing

Applies to establishments engaged in the manufacture of asphalt mixtures used in the preparation of building or roofing papers and shingles from raw materials purchased from others. The operations may include the incidental distillation of the asphalt flux.

Asphalt Roofing Materials - Some plants are fully automated, with controls, gauges, and valves housed in a separate room. Liquid asphalt flux, purchased from refineries, is hauled in by tanker trucks owned either by the refineries or the manufacturer, and is pumped directly into "air stills" or into holding tanks. An oxidation process takes place in the air stills. The asphalt flux is heated, then pumped into cooling tanks before it is pumped through pipes to a bulk loading/delivery station or to another area for further use. The processed hot asphalt may also be pumped into a blending tank where it can be blended with mineral spirits or naphtha to produce "cut-back" asphalt which is used in "cold asphalt" applications, or mixed with water to obtain an emulsified asphalt which "sets up" when it cools.

Asphalt Impregnated Felt Roofing Paper - Large rolls of felt paper are unrolled and automatically fed into a saturation tank where the paper is impregnated with the hot asphalt mixture. The paper then goes through several large rollers for cooling and smoothing, and is finally cut to size and rolled to produce rolls of asphalt coated felt roofing paper ready for use.

Asphalt Fiberglass Shingles - Limestone is delivered in bulk by suppliers' trucks and blown pneumatically into storage tanks. In the production processes it goes through a heater and is then mixed with the liquid asphalt. The production line starts with huge rolls of fiberglass which are fed continuously (roll ends spliced together automatically) into the process. The asphalt mixture is crushed into both sides of the fiberglass by large rollers and the excess asphalt scraped off. Granules are applied to the top side and sand is applied to the back side of the asphalt coated fiberglass. The coated fiberglass is then run through coolers. Granules are pressed into the coating and the material is fed/hung into "loopers" for additional cooling. After cooling, the coated material is automatically cut into strips, cut to specified width and length, "dragon teeth" (notches) cut, asphalt applied to the back of the "dragon teeth," then the "teeth" applied to the shims, and the asphalt shingle is complete.

This classification excludes asphalt or bitumen dealers who are to be reported separately in classification 3407-01, asphalt or tar distilling or refining operations which are to be reported separately in classification 3407-04, and asphalt paving material manufacturers who are to be reported separately in classification 3407-18.

3407-18 Asphalt paving material - manufacturing

Applies to establishments engaged in the manufacture of asphalt mixtures used for road paving operations from raw materials purchased from others. This classification applies only to the operation of the asphalt plant which usually consists of a loader, a control operator, and a maintenance worker. (To qualify for classification 3407-18 the maintenance worker's duties must relate *only* to the asphalt plant.)

This classification does not apply to workers involved in pit, crusher and bunker operations. The operations may include the incidental distillation of the asphalt flux which is included in this classification. Asphalt paving mixture plants are usually fully automated and controlled from a central control room overlooking the production area. Sand and gravel may be obtained from the producer's own gravel pit or purchased from independent suppliers. Liquid asphalt is obtained directly from either the refineries or from an asphalt dealer. Suppliers usually deliver raw materials to the manufacturing plant.

In a *batch plant*, each batch is made separately. The stored aggregate is loaded into hoppers, then carried by conveyor through a dust collecting system prior to entering the dryer drum. In the dryer drum the aggregate is dried and heated to specified temperatures before being conveyed to the "batcher" where it is screened, then stored in bins. Heated liquid asphalt is weighed to precise specifications required for that batch. Measured amounts of aggregate and liquid asphalt are in a pug mill to desired state, then discharge into trucks to be delivered to customers or stored in a silo.

In a *drum plant* the mix is continuous with several of the processing steps being combined in the drum. The measured cold aggregate is fed directly into the burner end of the drum for drying and heating. A measured amount of hot oil asphalt is dumped into the drum and mixed with the heated aggregate. The mixed product is conveyed into storage silos where it is held until pumped into delivery trucks.

This classification excludes workers involved in pit, crusher and bunker operations who are to be reported separately in classification 0112; paving contractors who manufacture asphalt paving material for their own use who are to be reported separately in the appropriate construction classifications; asphalt or bitumen dealers who are to be reported separately in classification 3407-01; asphalt or tar distilling or refining operations which are to be reported separately in classification 3407-04; and establishments engaged in the manufacture of asphalt roofing material which are to be reported separately in classification 3407-17.

Special note: If the product is manufactured by paving contractors for sale to the general public, as well as for their own use, and if the employees operating the asphalt plant have no other duties, classification 3407-18 would apply to the asphalt plant employees.

3407-19 Dewatering sludge; advanced recycling of plastics and tires; On-site oil filtering

Applies to establishments engaged in providing mobile dewatering services to waste sludge producers through the use of mobile decanter centrifuges. The centrifuges and control instrumentation is highly specialized equipment designed specifically for the dewatering of sludge to concise quality specifications as determined by the client. Mobile decanter centrifuge installations include dredging and pumping equipment, flocculation systems, and portable electrical supply, as well as trucks for transferring the dewatered sludge. The ultimate disposal of the dewatered sludge is provided by either a subcontractor or by the client. The dewatered sludge can be used in a wide variety of applications such as composting and land reclamation. This classification also applies to establish-

ments engaged in advanced recycling of plastics and tires. The process is similar to a small refinery. Either pelletized or shredded plastic material made from used consumer materials, or shredded used tire material may be used. The plastic or tire material is fed into a retort which decomposes the material using heat without oxygen, so the material is not burned. As the hot vapor gas cools, it is condensed into oil. Oil from the plastic processing is shipped to refineries where it will be refined further into plastic base material. Oil from the chipped tires is usually sold to oil blending companies. This classification also applies to on-site oil filtering. The usual process is filtering the oil through a filtering mechanism and then back into its original tank. This service may be performed on ships, in industrial plants, or at gas or oil storage facilities.

This classification excludes the "rig up/down" process (unloading and setting up the equipment at a new job site, and tearing it down and loading it on trucks to haul it to the next job site) which is to be reported separately in classification 0603.

3408-00 Natural gas companies

Applies to establishments engaged in the operation of natural gas companies which distribute gas through gas mains or pipes to local consumers. Employments covered in this classification include clerical office and sales personnel, store employees, meter readers, and drivers. This classification also includes local gas main connection, new construction and extension of lines, maintenance and operation of plant equipment, installation and repair of plant pressure regulators, and installation and repair of meters, appliances, furnaces and gas regulators on piping within a customers' premises when performed by employees of an employer subject to this classification.

This classification excludes contractors engaged in gas line construction, maintenance or repair who are to be reported separately in classification 0107; contractors engaged in the installation of heating systems who are to be reported separately in classification 0307; contractors engaged in the installation of gas appliances who are to be reported separately in classification 0607; and contractors engaged in the installation of hot water tanks who are to be reported separately in classification 0306.

WAC 296-17A-3409 Classification 3409.

3409-00 Self-service gas stations

Applies to establishments engaged in self-service gas operations. A self-service station is a facility where the customers pump gas into their own vehicles with no assistance from any of the establishment's employees. Typically, the only employee involved in the operation is a cashier who monitors the pumps from inside a booth and collects the payment from the customer. Sales of cigarettes and limited snack items are allowed in this classification.

This classification excludes full service stations, establishments with both self-serve and full or limited service operations at the same location, or any type of service stations with gasoline operations that offer any repair or direct services to the customer's vehicle, regardless of the percentage of the activities, at the same location, which are to be reported separately in classification 3406; and establishments who operate a self-service gas station with a convenience store or mini-mart operations which are to be reported separately in classification 3410.

Special note: The extent and type of the groceries available for sale at a self-service only establishment must be determined to assign the appropriate classifications. Generally, if only convenience items such as oil, gas additives, cigarettes and snack foods such as candy, gum, chips, and soft drinks are available, classification 3409 would be allowed. However, if more than the items listed above are available such as milk, bread, canned food, or fast food service, classification 3410 would apply. Establishments with multiple locations are to be classified in accordance with the general reporting rule covering the operation of a secondary business.

WAC 296-17A-3410 Classification 3410.

3410-00 Convenience grocery stores or minimarkets with self-service gasoline operations

Applies to establishments engaged in operating convenience grocery stores or mini-markets with self-service gasoline operations. These establishments provide retail sale of convenience grocery items, not just snack items, in addition to self-service gasoline. Gasoline operations are limited to self-service only where the store employee is a cashier who monitors the pumps and collects the payments inside the store. Self-service/convenience store operations in classification 3410 differ from self-service gas stations in classification 3409 in that establishments in classification 3410 provide a more extensive line of grocery items. In addition to snack foods, staples such as bread, milk, and canned foods are available for sale. They may also prepare food such as sandwiches, chicken, jo jos, or hot dogs, and occasionally fill a customer's propane tank, and offer automobile or truck washing services, all of which is included within the scope of this classification.

This classification excludes establishments which provide any full service or limited services in addition to self-

service operations at the same location which are to be reported separately in classification 3406; establishments which provide only self-service gasoline operations and whose grocery items are limited to prepared snack foods such as chips and candy, and cigarettes which are to be reported separately in classification 3409; and convenience stores with no gasoline services which are to be reported separately in classification 6403.

WAC 296-17A-3411 Classification 3411.

3411-00 Automobile: Dealers, rental or leasing agencies, including service repair garages;
Recreational vehicle: Dealers, rental/leasing agencies, or service/repair garages

Applies to establishments engaged in selling, renting, or leasing automobiles, including service/repair centers operated by dealers. This classification also applies to establishments engaged in selling, renting, leasing *or* servicing/repairing recreational vehicles. For purposes of this classification, the term "automobile" includes standard sized passenger cars, pick up trucks, and sport utility vehicles. The term "recreational vehicle" includes motor homes, travel trailers, campers, and also includes sport and utility trailers. Work contemplated by this classification includes, but is not limited to, all phases of automotive mechanical service and repair work, washing, vacuuming, and waxing vehicles, and detailing such as striping, window tinting, vinyl repair, installing molding and electronic accessories when performed by employees of an employer subject to this classification. This classification includes service managers, parts department employees who have shop exposure, towing service for in-shop repairs, lot personnel, and customer courtesy van or car drivers.

This classification excludes: Dealers or service/repair centers for semi-trucks, diesel tractor-trailers, buses, and other heavy equipment or machinery which are to be reported separately in classification 6409; recreational vehicle dealers who also sell factory built housing units such as modular and mobile homes who are to be reported separately in classification 3415; parts department employees who are not exposed to any hazards of the service/repair shop who may be reported separately in classification 6309; auto body shop employees or auto body specialty shops who are to be reported separately in classification 3412; dealers who sell truck canopies and related accessories, but do not sell the other vehicles/trailers included in this classification who are to be reported separately in classification 1106; establishments engaged in welding or cutting repairs and/or hydraulic installation which are to be reported separately in classification 3402; and sales employees who may be reported separately in classification 6301 provided all the conditions of the general reporting rule covering standard exception employees have been met.

Special notes: Used automobile dealers will not normally have service/repair garages or parts departments but will have lot personnel and detailers. Automobile rental and

leasing agencies will normally have all the operations described above with the exception of parts department employees. New automobile dealers will routinely have all of the operations described above.

Establishments engaged in providing towing service for hire are to be reported separately in classification 1109. For purposes of this classification "towing for hire" means a towing service not performed in connection with repairs to be done by the service/repair shop.

3411-01 Automobile: Service centers, repair shops or garages

Applies to establishments engaged in servicing and repairing automobiles for others. For purposes of this classification, the term "automobile" includes standard sized passenger cars, pick up trucks, and sport utility vehicles. Work contemplated by this classification includes, but is not limited to, all phases of automotive mechanical service such as engine overhauls and rebuilding, resurfacing heads, valve grinding, transmission overhauls or rebuilding, electrical repairs, brake service, engine tune ups, fuel injection service, carburetor repair, and engine diagnostic service when performed by employees of an employer subject to this classification. This classification includes service managers, parts department employees who have shop exposure, incidental sales of reconditioned cars, towing service for in-shop repairs, and customer courtesy van or car drivers. Parts department employees who are not exposed to any hazards of the repair shop may be reported separately in classification 6309.

This classification excludes auto body shop employees who are to be reported separately in classification 3412.

Special note: While most businesses assigned to this classification have an inventory of parts which they use in the service and repair of customer vehicles, some employers have full line auto parts stores. Care needs to be taken when considering assignment of classification 6309 for auto part sales. Only those businesses that have a full line auto parts store which is physically separated from the repair shop and whose sales of auto parts are primarily for off-premises repair (do it yourself repair) should be considered for classification 6309. *This classification does not apply to auto repair shops that also sell and install tires on customer vehicles. See classification 6405 for auto repair shops that also sell and install tires.* Establishment engaged in providing towing service for hire are to be reported separately in classification 1109. For purposes of this classification "towing for hire" means a towing service not performed in connection with repairs to be done by the repair shop.

3411-02 Automobile: Service specialty shops

Applies to establishments engaged in providing specialized automobile repair services such as air conditioning systems, muffler repair, cruise controls and electrical systems. For purposes of this classification, the term "automobile" includes standard sized passenger cars, pick up trucks, and sport utility vehicles. Work contemplated by this classification includes, but is not limited to, inspection of vehicle components for wear, diagnostic analysis, and repair of various components such as brakes and cooling systems, after-market installation of components such as cruise control, air conditioning systems, and sun roofs; and specialized repair ser-

vices such as mufflers and transmissions. This classification includes service managers, part sales, towing service for in-shop repairs, and customer courtesy van or car drivers.

Special note: Businesses assigned to this classification will generally have an inventory of supplies and parts which they use in the service and repair of customer vehicles although some sales of parts and components may occur. *This classification does not apply to any shop that sells and installs tires on customer vehicles. See classification 6405 for auto repair shops that also sell and install tires.* Establishment engaged in providing towing service for hire are to be reported separately in classification 1109. For purposes of this classification "towing for hire" means a towing service not performed in connection with repairs to be done by the repair shop.

WAC 296-17A-3412 Classification 3412.

3412-00 Automobile and truck: Body and fender repair shops

Applies to establishments engaged in repairing and refinishing automobile and truck body panel components for others. Work contemplated by this classification includes, but is not limited to, all phases of auto body repair work and panel replacement, finish removal, sandblasting or plastic medium blasting, painting, washing, vacuuming, and waxing vehicles, glass repair, upholstery work, and automobile and truck detailing such as striping, vinyl repair, window tinting (applying film to windows), installation of body and wheel molding and sunroofs, incidental glass repair or mechanical repair associated with a collision repair or car restoration, and installation of electronic accessories when performed by employees of an employer subject to this classification. The repair of fiberglass or sheet metal boat bodies and spray-on pickup truck bedliners is also included in this classification. This classification includes shop managers, parts and paint mixing department employees, towing service for in-shop repairs, incidental sales of rebuilt cars and trucks, and customer courtesy van or car drivers. Estimators may be reported separately in classification 6303 provided all the conditions of the general reporting rule covering standard exception employees have been met.

This classification excludes the *routine* servicing or repair of automobiles or trucks *not done* in conjunction with collision repair or car restoration which is to be reported separately in classification 3411; the servicing or repair of mechanical or electrical systems in boats which is to be reported separately in classification 3414; and the repair of wooden boats which is to be reported separately in classification 2903.

Special notes: Auto body shops will routinely have a physically separate area where they store and mix paints. The separate paint storage and mixing area is generally a requirement of local fire codes and insurance policies. This separate area does not constitute a separate operation subject to a different classification. Some shops may also carry an inventory of repair panels, trim pieces and molding. Regardless of the

volume of parts and supplies it is included within the basic scope of classification 3412. Establishment engaged in providing towing service for hire are to be reported separately in classification 1109. For purposes of this classification "towing for hire" means a towing service not performed in connection with repairs to be done by the repair shop.

Care must be taken in assigning classification 3411-01 to an establishment engaged in body and fender repair. An establishment *could* have both classifications 3411 and 3412 if they also provide *routine* mechanical or electrical repair services *not* in conjunction with collision repair or car restoration.

WAC 296-17A-3414 Classification 3414.

3414-00 Boat dealers

Applies to establishments engaged in the sales, service, and/or repair of boats. Work contemplated by this classification includes, but is not limited to, mechanical and electrical system repairs, vinyl and glass repairs, engine rebuilding and reconditioning, detailing boats, reconditioning seat pads and other accessories, sales and installation of boat accessories, and sales of boat trailers, specialty apparel and fishing gear when performed by employees of an employer subject to this classification. This classification also includes parts department employees, sales employees who also assist in duties described in this classification, and lot personnel.

This classification excludes boat sales personnel who may be reported separately in classification 6301 provided all the conditions of the general reporting rule covering standard exception employees have been met; repairs done in connection with manufacturing operations which are to be reported separately as applicable; and establishments engaged in the repair of fiberglass or sheet metal boat bodies which are to be reported separately in classification 3412.

3414-01 Marinas and boat house operations: Boat storage facilities

Applies to establishments engaged in providing a variety of boat-related services and facilities, and to service or repair centers. Boat storage facilities may be located in waterways adjacent to the marina or on dry land and may be operated by a marina or by a separate business. Both types of storage facilities are included within the scope of this classification. Work contemplated by this classification includes, but is not limited to, fuel service, mechanical and electrical repair service, parts departments, boat storage, moorage, sales of fishing gear, wearing apparel, groceries and bait, boat rentals and sales, and boat launching facilities when performed by employees of an employer assigned to this classification. This classification also includes other incidental services and facilities such as, but not limited to, self-service laundry facilities, public showers, holding tank pump out stations, passenger car or truck parking, and dockside electricity.

This classification excludes repairs done in connection with manufacturing operations which are to be reported separately as applicable; establishments engaged in the repair of fiberglass or sheet metal boat bodies which are to be reported

separately in classification 3412; seafood or fish processing facilities operated in connection with a marina operation which are to be reported separately in classification 3304; and boat sales personnel who may be reported separately in classification 6301 provided all the conditions of the general reporting rule covering standard exception employees have been met. Overnight lodging facilities and restaurant services provided to customers by a marina operator may be reported separately provided all the conditions of the general reporting rule covering a secondary business have been met.

Special note: Some marina operators will offer boating instructions and charter boat services. Care should be taken in this area as certain boating and charter fishing excursions are not covered by state workers' compensation coverage.

WAC 296-17A-3415 Classification 3415.

3415-00 Factory built housing dealers

Applies to establishments engaged in the sales and service of factory built housing units such as mobile/manufactured homes or modular homes. Work contemplated by this classification includes pick up of units from housing factory, set up of units at sales lot or customer locations, installation of skirting, aligning cabinets and doors, and touch up painting when performed by employees of an employer subject to this classification. This classification also includes parts department employees, sales employees who assist in duties described in this classification, and lot employees engaged in the maintenance of grounds or in the maintenance of factory built home units on display at the lot.

This classification excludes delivery of factory built home units and set up by contractor which is to be reported separately in classification 0517; employees involved in work such as, but not limited to, concrete work, electrical, plumbing, landscaping, and fence construction who are to be reported separately in the construction classification applicable to the work they are performing; and modular or mobile home sales personnel who may be reported separately in classification 6301 provided all the conditions of the general reporting rule covering standard exception employees have been met.

Special note: Construction of separate out-buildings such as garages, carports, well houses and storage sheds which may be constructed in connection with a modular or mobile set up are excluded from this classification and are to be reported separately in the applicable construction classifications. Establishments engaged exclusively in the delivery of modular or mobile homes, but who are not involved in any aspect of the set-up of the structure, are to be reported separately in classification 1102.

WAC 296-17A-3501 Classification 3501.

3501-00 Brick or clay products, N.O.C: Manufacturing

Applies to establishments engaged in the manufacture of brick or clay products not covered by another classification (N.O.C.), such as, but not limited to, drainage or roofing tiles, building or paving bricks, wall copings, glazed or unglazed sewer or drain pipes or conduits, or similar products which are generally for industrial or construction use. Clay, which is any earth that forms a paste when added to water and hardens when heated, is widely used in making bricks and other products as described above. Brick is a molded rectangular block of clay, baked by the sun or in a kiln until hard. Similar products made of earthenware, which is a variety of coarse, porous baked clay, are included in this classification. To make bricks, clay is broken up by dry-pan grinders. After grinding, the particles pass through any one of several types of screens used for separating and grading. The mixture is fed through a pug mill to be cut and mixed then mixed with water to the desired consistency. After tempering, the pug mill extrudes a column of clay through a die, which shapes and determines the dimensions of the brick. A rotating wire cutter slices the column into proper thicknesses. Bricks are either machine molded or hand molded. The "green" bricks must be dried by sun and air, or in natural gas or electric-fired regulated kilns prior to firing. Firing dehydrates, oxidizes, and vitrifies the bricks. To make other products, clay is mixed with sand or shale, ground in a mixing machine and water is added. The liquid substance is mechanically poured into standard or specially shaped molds. All products are dried by natural warm air or steam heat. After removal from the molds, products are baked in kilns. If glazing is desired, salt is added to the kiln; the salt vaporizes and coats the products. To produce a greater degree of concentration, pressing or repressing operations may be performed, usually with hydraulic presses, subsequent to the actual formation of the products.

This classification excludes the production of raw materials which is to be reported separately in the applicable mining, quarrying or excavation classification; installation or erection of any products manufactured by establishments in this classification which is to be reported separately in the classification applicable to the type of construction or installation work being performed; the manufacture of household or decorative pottery items, including tile, which is to be reported separately in classification 3503; and the manufacture of statuary and ornamental items from concrete or plaster which is to be reported separately in classification 3509.

Special note: Clays are generally mined by the open-pit method. After clay has been extracted, it may be stockpiled inside for use during inclement weather. In most cases, the manufacturing of brick takes place alongside the extraction site. Clay is delivered to the manufacturing site only when clay of a different characteristic is needed to blend with the "home" clay.

3501-01 Refractory products: Manufacturing

Applies to establishments engaged in the manufacture of refractory products such as, but not limited to, fireproofing tile or bricks, roofing tile, flue lining, boiler or stoker tiles, enameled bricks, retorts, kiln parts, or crucibles from refractory clays with or without other refractory materials. Refrac-

tory clays are resistant to heat. Refractory materials, such as alumina, silica, and magnesite, dolomite, bauxite, do not significantly deform or change chemically in high temperatures. Usually all types of refractory products are produced in the same plant. Clay and other materials are ground, screened and mixed with water in a mixing machine. The partly fluid substance is poured into molds to form the product. After removal of the forms, items are kiln dried. The enamels are vitreous coatings produced from solutions of chemicals, salt, lead oxide or tin, into which the brick is dipped. Enameled brick requires two or three kiln burns.

This classification excludes the production of raw materials which is to be reported separately in the applicable mining, quarrying or excavation classification; installation or erection of any products manufactured by establishments in this classification which is to be reported separately in the classification applicable to the type of construction or installation work being performed; the manufacture of household or decorative pottery items, including tile, which is to be reported separately in classification 3503; and manufacture of statuary and ornamental items from plaster or concrete which is to be reported separately in classification 3509.

WAC 296-17A-3503 Classification 3503.

3503-17 Pottery, earthenware, ceramics, porcelain or china: Manufacturing

Applies to establishments engaged in the manufacture of a wide variety of household or decorative items such as earthenware, pottery, ceramics, porcelain or china. Casting and throwing are the most common techniques. Other techniques include pressing, extrusion and sculpturing. Finished products include, but are not limited to, pots, bowls, dishes, plates, cups, cookie jars, vases, dolls, tobacco pipes, and novelty items. Materials include clay, sand, fluxing agents, paints, and glazing compounds. Machinery includes, but is not limited to, hand tools, potter's wheels, kilns, and plaster molds. In the casting method, clay is mixed with water and other additives until it is about the consistency of thick cream (called slip). The molds are closed shut and secured; then the slip is poured into them through a small hole at the top, and left in the mold to dry for a short time then poured out, leaving a hollow product to fire. In the throwing method, the clay mixture is placed on a potter's wheel and molded by hand as the wheel slowly turns. The pressing technique forces relatively dry clay into molds under substantial hydraulic pressure, which makes it hold its shape until fired. Extrusion forces a ribbon of clay through specially shaped dies, then it is cut with wire to create the final form. Sculpturing is hand carving wet clay to the desired dimensions. The resulting greenware from any method may be sanded, then further dried and fired in a small kiln. Most of the items will be glazed and refired several more times, depending on the desired end result. Prior to glazing, products may be decorated by hand painting designs on them. Most of the estab-

lishments in this classification are small shops that make the products they sell, either at their shop or occasionally at craft fairs. The teaching of classes and the incidental sale of ceramic and pottery making supplies or tools to home crafters is included within the scope of classification 3503-17. This classification includes establishments that only make molds by casting shapes in plaster, most of which they sell to ceramic shops for use in casting greenware.

This classification excludes the mining, digging or quarrying of raw materials which is to be reported separately in the applicable classification; manufacture of decorative tile which is to be reported separately in classification 3503-19; manufacture of brick or concrete products such as, but not limited to, brick or clay pipe and concrete tile which is to be reported separately in the classification applicable to the work being performed; and establishments whose primary business is the sale of supplies used for crafts or hobbies which are to be reported separately in classification 6309.

Special note: Care must be taken when considering classifications 6309 or 3503. Classification 6309 is to be assigned to establishments whose primary business is the sale of supplies such as, but not limited to, ceramic and pottery making materials or tools. Classification 6309 does not cover the manufacture, fabrication or assembly of craft or hobby items for sale, but includes the teaching of classes and the assembly of an individual piece or two for display.

3503-19 Decorative tile: Manufacturing

Applies to establishments engaged in the manufacture of decorative tile from cement or various clay mixtures. Raw materials include clay, sawdust, straw, coal dust, sand, and glazing compounds. Machinery includes, but is not limited to, hand tools, hydraulic presses, automatic grinding and polishing machines, hand grinding and polishing stones and laps, batch mixers, molds, hand trucks, kiln ovens and steam curing rooms. Cement tiles are usually pressed on hydraulic presses, kept wet until cured, then ground to size with a diamond wheel and polished. To make cast clay tiles, clay is mixed with water and other ingredients, ground to desired fineness, screened, then poured into molds to dry. After drying, tiles are removed from molds and fired in a kiln oven, then glazed. Tile glaziers apply designs to bisque tile by hand or with a silk screen process, then glaze and fire it in a kiln one or more times. This classification includes the manufacture of decorative artificial rock or brick used as trimming around fireplaces, stoves, or on walls. To make artificial rock or brick, coloring is added to a mixture of cement and aggregate; the mixture is poured into molds. After the mixture has set, the piece is removed from the mold and cured.

This classification excludes the mining, digging or quarrying of the raw materials which is to be reported separately in the applicable classification; the manufacture of pottery, earthenware, ceramics, porcelain or china which is to be reported separately in classification 3503-17; and the manufacture of brick or concrete products such as brick or clay pipe and concrete blocks or stepping stones, drain tile, beams which is to be reported separately in the classification applicable to the work being performed.

3503-20 Stained or leaded glassware, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of stained or leaded glassware not covered by another classification (N.O.C.) including, but not limited to, windows, tiffany style or plain glass lamp shades, terrariums, or decorative items such as aquariums, shadow boxes, mirror picture frames or figurines. Much artistic hand labor is involved in making stained glass items. Pattern paper, masking tape, kerosene, wire solder, putty, and H-lead comes (slender, grooved bars) are received from others. Individual pieces of a design are cut to pattern out of stained glass; pieces may be ground for a precision fit on an emery or diamond wheel. Individual segments are pressed into the channels of the lead came; joints are fluxed, soldered and putty is pushed into any open spaces between the glass and the comes. The finished piece is smoothed and cleaned with kerosene. While lead comes are more widely used, copper foil may be used instead of lead. Manufacturers may also paint on glass and fire it in a kiln; this is most often done for stained glass window insets. Employers subject to this classification may repair items such as stained glass windows. If the repair requires bent or shaped glass, they make a mold and heat the replacement glass in a kiln oven until it "slumps" or bends to the shape of the mold. Most manufacturers in this state purchase their stained glass from others; however, the manufacture of stained glass is contemplated within the scope of this classification. Raw materials such as, but not limited to, sand, soda ash, and metal oxides are melted in a furnace and the molten glass is either rolled into sheets by machine or blown into long balloon shapes that are slit open and flattened by reheating. Color may be added to the surface while it is still molten. Some incidental manufacturing of insulated glass, such as sandwiching leaded glass between two sheets of clear glass, is included within the scope of this classification, but production line manufacturing of insulated glass is to be reported separately in classification 1108. Most of the establishments in this classification are small shops that make the products they sell, either at their shop or occasionally at craft fairs. The teaching of classes and the incidental sale of supplies or tools used to make glassware items to home crafters is included within the scope of this classification.

This classification excludes the mining, digging or quarrying of raw materials which is to be reported separately in the applicable classification; establishments that manufacture optical goods or telescopes, or perform precision grinding of blank or rough lenses, which are to be reported separately in classification 6604; establishments engaged in etching, frosting, sandblasting, carving, grinding, and beveling glass which are to be reported separately in classification 1108; establishments engaged in melting or blowing glass which are to be reported separately in classification 3503-21; and establishments whose primary business is the sale of supplies used for crafts or hobbies which are to be reported separately in classification 6309.

Special note: Care must be taken when considering classifications 6309 or 3503. Classification 6309 is to be assigned to establishments whose primary business is the sale of supplies such as, but not limited to, materials or tools used to make glassware items. Classification 6309 does not cover the manufacture, fabrication or assembly of craft or hobby

items for sale, but includes teaching of classes and the assembly of an individual piece or two for display.

3503-21 Glassware, N.O.C.: Manufacturing; Melting, blowing, and forming hot glass

Applies to establishments engaged in manufacturing housewares, decorative and specialty items not covered by another classification (N.O.C.) from hot glass using methods that include melting, blowing, or forming. Items include, but are not limited to, tableware, bakeware, perfume bottles, candlestick holders, kerosene lamp chimneys, auto headlight lenses, radio insulators, doorknobs, paperweights, and ashtrays. Machinery includes, but is not limited to, hand tools, glass melting furnaces, annealing ovens, mixing machines, ball mills, glass cutting diamond saws, glass grinding wheels and discs, glass polishing laps, drill presses, steel cutting saws, arc and gas welders, forklifts, overhead cranes or hoists. Some shops make their glass from raw materials including oxides, volcanic ash, soda ash, silica sand, lime, phosphate, or borax which are received from outside sources. Others will heat glass chips (frit) in a furnace, and work the molten glass into decorative or functional shapes by molding or blowing. The molten glass is poured into molds to make products such as, but not limited to, heavy glass for special purpose windows up to about eight inches thick. Molten glass may also be poured into cold water to make "frit" which is either sold or used for further processing. The molten glass can also be formed in a mouth-blowing process or by semiautomatic blowing machines. A glass blowing process will usually have a helper working with each glass blower. The helper's duties include preliminary glass gathering and blowing, adding colored glass "ribbons" to the item being blown as the glassblower turns it, shaping items being blown with wooden or metal tools, and placing the blown object in an annealing oven to be reheated and cooled slowly to relieve internal stress in the glass. When glass reaches room temperature, it is often cut on diamond wheels or ground down and polished on a series of wheels, stones, and laps. This work is normally done under a continuous water bath which may include grinding or polishing compounds.

This classification excludes the mining, digging or quarrying of raw materials which is to be reported separately in the applicable classification; establishments engaged in manufacturing stained or leaded glassware which are to be reported separately in classification 3503-20; establishments that manufacture optical goods or telescopes, or perform precision grinding of blank or rough lenses, which are to be reported separately in classification 6604; and establishments engaged in etching, frosting, sandblasting, carving, grinding, and beveling glass which are to be reported separately in classification 1108.

3503-23 Agate or enamel ware: Manufacturing

Applies to establishments engaged in enameling or porcelainizing products they have made or products made by others. Enamel is defined as a vitreous, usually opaque, protective or decorative coating baked on metal. Enameled products vary widely, including but not limited to, signs, cookware, items made from ceramics or clay, stove parts, or small parts for automobiles, to sewer pipe, automobile manifolds, or irrigation water gauges. Machinery includes, but is not limited to, ball mills, silk screen equipment, blenders or mix-

ers, scales, kilns, degreasing and acid etching tanks, spray guns, heaters, conveyors, and fork lifts. The enameling process is essentially the same regardless of the product. Ceramic balls and frit (small glass chips) are placed in the ball mill. (A ball mill is a metal drum lined with rubber.) As the drum rotates, the balls roll over the frit, gradually grinding it into powder. Some enameling shops purchase the powder ready-made. To obtain desired colors, various mixes of glaze powders are prepared and placed on 1" to 2" square metal chips and baked in a small kiln. When the formulas are ready for all colors required, the job goes to the production line. The object to be glazed is cleaned, degreased, and given an acid bath if necessary, then rinsed and dried. The enamel (or porcelain) glaze may be applied by hand, silk screened on, or sprayed on with a spray gun. After the coating has air-dried, the piece heated in a kiln to melt the ceramic powder and fuse it to the surface; then cooled. Items may require repeated coatings and firings.

This classification excludes the manufacture of enamelled brick which is to be reported separately in classification 3501.

WAC 296-17A-3506 Classification 3506.

3506-02 Mobile crane and hoisting services; Rigging contractors, N.O.C.

Applies to establishments engaged in mobile crane and hoisting services and rigging contractors not covered by another classification (N.O.C.). There are many types of cranes and derricks, both stationary and nonstationary. A mobile crane is a tire-mounted machine for hoisting and moving heavy objects by cables attached to a moveable boom. Rigging consists of a system of ropes, chains, cables, or tackle used for support. Generally, these types of establishments respond to and service customer requests such as righting an overturned tractor trailer, hoisting a large bell, or placement of a satellite dish on top of a building. In addition, mobile crane businesses often maintain a variety of nonmobile cranes and derricks such as those used for construction of tall buildings or structures. This classification includes transporting of a nonmobile crane or derrick to and from a customer site, but excludes the set up or erection, operating, and disassembling of the unit.

This classification excludes the construction or erection of permanent nonmobile cranes (such as those permanently mounted at a manufacturing plant or seaport to load cargo) which are to be reported separately in classification 0508; and the set up, erection, operating, and disassembling of cranes, hoisting devices or rigging in connection with work covered under a construction classification which are to be reported separately in the construction classification applicable for the work being performed.

(2007 Ed.)

Special note: This classification includes mobile crane and hoisting businesses when providing a service at a construction site such as lifting an air conditioning unit to a building top, and provided the crane operator is an employee of the crane and hoisting business.

3506-03 Concrete pump truck service

Applies to establishments engaged in concrete pump truck services, including the pump truck control box operator. A concrete pump truck is a large vehicle equipped with an adjustable boom spanning approximately 65' in length equipped with a flexible 4" hose running alongside the boom. This type of vehicle is different from a concrete ready mix truck which mixes the concrete in a rotating or revolving drum prior to arriving at the project site and discharges the mix with use of a metal shoot. A concrete pump truck is designed to pump concrete into areas which are difficult for a concrete ready mix truck to reach such as a tall retaining wall, the foundation of a building or structure many feet below ground level, or into an area with limited access. Concrete is fed into the bed of the pump truck (usually by a ready mix concrete truck). The driver of the pump truck also operates the control box which adjusts the boom and amount of concrete mix to discharge. The control box operator receives instructions from a construction worker overseeing the concrete pour.

This classification excludes ready mix concrete dealers who deliver concrete who are to be reported separately in classification 3101 and all other concrete construction activities occurring at the project site which are to be reported separately in the classification applicable to the construction work being performed.

Special note: This classification is limited to the concrete pump truck driver and operation of the control box. Construction workers at the project site, such as workers who are positioning and repositioning the end of the boom which discharges concrete, or workers who provide instructions with use of a headset to the control box operator, or workers who are spreading the concrete as it is poured, are to be reported separately in the classification applicable to the construction work being performed.

3509-01 Statuary and ornament: Manufacturing

Applies to establishments engaged in the manufacture of decorative statuary, and other ornamental items including, but not limited to, planters and fountains, lawn and garden furniture, patio blocks and stepping stones, grills, and cornices. Materials such as, but not limited to, plaster, concrete, hair, wood fiber, powdered lime, sand, gravel, cinders, aggregates, mesh wire and reinforcing rods, and certain plastics are received from outside sources. Depending on the item being made, various ingredients are mixed together and cast in metal or rubber molds or in forming machines. After being

[Title 296 WAC—p. 411]

removed from the molds or forms, they are dried and stored until cured. After curing, items may be sanded and smoothed with grinders, or carved by hand; some may be painted or coated with a clear finish, or designs hand painted on. Such finishing work is included within the scope of the classification when performed by employees of employers subject to this classification.

This classification excludes the mining, digging, quarrying, or manufacturing of raw materials which are to be reported separately in the applicable classification; the manufacture of decorative tile which is to be reported separately in classification 3503; and the manufacture of concrete blocks, bricks, poles, piles, tile, beams, sewer and irrigation pipe, and septic tanks which is to be reported separately in classification 3105.

Special note: This classification differs from classification 3105 "concrete blocks, sewer pipes" in that products manufactured in classification 3509 are for decorative purposes, are usually lighter weight, and have smoother or more perfect finishes than the concrete products manufactured in classification 3105 which are rough, do not require perfect finishes, and are generally for construction use.

WAC 296-17A-3510 Classification 3510.

3510-02 Plastics: Artificial marble manufacturing

Applies to establishments engaged in the manufacture of plastic articles by molding a calcium carbonate material mixed with feed stock, a catalyst and dyes which are purchased from outside sources. When this material solidifies it resembles marble, and is used to make counter tops, sinks, novelty items such as, but not limited to, soap dishes, clock cases, and statues. Raw materials are mixed in large mixers until it has the consistency of bread dough. A release agent is sprayed onto empty molds so the finished items can be easily removed after they are set; then the mixture is poured directly into molds, placed into molds by hand, or forced into molds under pressure. The materials are cured at room temperature or with moderate heat (up to 140 degrees F). When the material has hardened, items are removed from the molds and trimmed, sanded or otherwise finished. Sanding may be done with power rotary sanders which create clouds of dust and require the use of respirators.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which are to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and the manufacture of fiberglass goods which are to be reported separately in classification 3511.

3510-03 Plastics: Extrusion, blow molding

Applies to establishments engaged in the manufacture of plastic articles by blow molding or extruding. Processes vary, but all usually require the heating and melting of feed stock and mixing of other additives purchased from outside

sources. Extrusion involves forcing material through dies; blow molding blows a bubble of plastic into the air and processes it through machinery, or forms an object in a mold by blowing air and material into it. Plastic items such as containers for milk, motor oil, bleach, or other liquids are typically made with a blow molding process, which is a fast, high volume operation. A bubble of molten plastic is blown into a mold and expanded to the shape of the mold with compressed air. The mold is kept cool with a liquid coolant that circulates through its cavities; when hot plastic is pressed against the mold, it cools and hardens in seconds. Sheets of plastic film are usually made by extruding a tube of hot plastic, expanding it with air pressure, then passing it through a series of rollers and cutters which roll it flat and cut it into two separate sheets. Plastic film is used for making plastic bags and other products. This classification includes the manufacture of plastic bags when the extrusion of plastic sheets is performed by employees of the plastic bag manufacturer. Other extrusion processes are used in the manufacture of window frame molding, gutters, pipe, and similar items.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which are to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and the manufacture fiberglass goods which are to be reported separately in classification 3511.

3510-04 Plastics: Vacuum forming

Applies to establishments engaged in the manufacture of plastic goods through a vacuum forming process. Articles manufactured by this method include, but are not limited to, signs, display stands, windshields for boats and motorcycles, boat paddles, skylight windows, trays for packaging food or other items. Sheet goods are heated in an oven or in the molding area, and a vacuum is pulled on the mold, sucking the plastic in to conform to the shape of the mold. Items produced by this method harden and cool in a few minutes. In other techniques, liquid plastic is poured into a mold, a seal of mylar plastic is placed over it, then a vacuum is pulled on the mold forming the liquid to the mold. This method produces a smooth, glossy surface similar to those produced by injection molding, but without the high-cost machinery. For either method, once the plastic material hardens, the "flashing" (excess plastic) is trimmed from the formed article. This is called "deflashing" and may be done with a hand-held knife, a router, or a lathe. There is some assembly in certain manufacturing operations such as attaching components with screws, rivets, bolts, or glue, which is incidental to the manufacturing process and is included in the classification.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which are to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and establishments engaged in the manufacture of fiberglass goods which are to be reported separately in classification 3511.

Special note: The painting or lettering of signs is included in the plastic goods manufacturing classification

when done by employees of an employer making signs. Establishments that purchase premanufactured plastic "mediums" from others, then paint lettering or designs or attach vinyl lettering to them in their own shops are to be reported separately in classification 4109.

3510-05 Plastics: Foam molding, rotary molding, liquid molding

Applies to establishments engaged in the manufacture of plastic goods through foam molding, rotary molding or liquid molding processes. Raw materials, which may be received in barrels, drums, or rail cars, include, but are not limited to, small plastic beads, powder, pellets or liquids, and foaming agents. Establishments in this classification will frequently employ laboratory employees such as chemists or chemical engineers to formulate their own plastic compounds to meet specifications as to rigidity, flexibility, or fire retardation. Liquid polymer is mixed with one or more ingredients, in some cases including a foaming agent, then heated to control the foaming action. It may be forced through pipes or hoses from a dispensing machine into the mold, or workers may carry it in buckets from the mixing pot and pour it into the molds. The top of the mold is put in place and secured. Heat and air pressure is applied inside the mold, which causes the foam to rise and form the shape of the object being made. Workers may wear respirator masks during this phase. The mold may be lined with vinyl or other fabric, or wire frames may be placed inside the molds when making items such as armrests, cushions, dashboards for vehicles, boats, or aircraft. Goods usually set overnight, then the flashing (excess plastic) is trimmed off. Liquid plastic, such as urethane, without a foaming agent, is also used to make products that are extremely tough. Products made from this type of liquid mixture include, but are not limited to, parts for aircraft or industrial machinery. Liquid mixtures are poured into molds and cured in ovens. Styrofoam products such as, but not limited to cups or plates, packaging materials are made from small styrofoam beads that are expanded by heating, then forced or blown into a mold and heat-expanded to form the product. Logos or brand names may be printed onto the products with a special offset press. Rotary molding is used for large hollow items like garbage cans or buckets. Plastic powder, mixed with color, is poured into molds; molds are closed and moved on a rotating arm through a large oven in a tumbling action while the mold heats. The plastic powder sticks to the inside of the mold and melts. The mold is removed from the oven while still tumbling, and air and/or water cooled. Finished products are then removed from the molds.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which is to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and the manufacture of fiberglass goods which are to be reported separately in classification 3511.

3510-06 Plastics: Injection molding

Applies to establishments engaged in the manufacture of plastic goods through an injection molding process. Articles made by injection molding range widely; they include, but are not limited to, key chain holders, writing pens, combs,

medicine bottles, novelty items, sporting goods, and cargo baskets for industrial use. The size of injection molding machines ranges widely, depending on the products being made. Raw materials, which are usually in the form of tiny plastic beads, are received from outside sources in barrels, drums or rail cars. The pellets are placed in a dryer to remove any moisture, then fed through a hopper on the injection molding machine into an air-free chamber where they are melted at high temperatures, then forced with an auger-type screw, ram piston or similar device, into the mold. The mold is cooled by a coolant to allow the plastic to solidify rapidly. When solidified, the item is ejected from the mold by air pressure, hydraulics, or a mechanical ram. Items may be trimmed, polished, assembled, plated, or otherwise finished. Establishments in this classification may make molds for their own use, or the customer brings molds for specific items they order. The manufacture or repair of their own or their customer's molds is included within the scope of this classification when done by employees of an employer subject to this classification.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which are to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and the manufacture of fiberglass goods which are to be reported separately in classification 3511.

3510-07 Plastics: Manufacture, N.O.C.

Applies to establishments engaged in the manufacture of plastic goods not covered by another classification (N.O.C.) using several of the operations described in the other plastics manufacturing classifications, but not having one predominate process. This classification *could* include the application of fiberglass resins with a brushing or spreading technique (sometimes referred to as "lay-up"). In the lay-up method, fabric is fitted over molds, then layers of fiberglass resins, hardeners, and fillers are applied over the fabric with a brush or trowel. In some applications, a thin foam material is fitted into a mold, then covered with fiberglass resins and hardeners; when the product is removed from the mold, the other side is coated, producing an exceptionally strong, lightweight product. Once removed from the molds, items are heated in ovens to harden and set. This classification also includes establishments that make pellets (feed stock) from recyclable plastic goods. Scraps or recyclable goods are ground or pulverized, then formed into pellets which can be used again in manufacturing processes, or further processed into oil by other manufacturers.

This classification excludes establishments engaged in the manufacture of a plastic product by any other method which are to be reported separately in the appropriate classification; establishments engaged in the manufacture of graphite composite goods which are to be reported separately in classification 3510-08; and establishments engaged in the manufacture of fiberglass goods which are to be reported separately in classification 3511.

Special notes: When the manufacture of plastic goods includes *any* fiberglass work using the spraying technique with a hopper gun, the entire operation is to be reported sep-

arately in classification 3511. Incidental hand brushing or troweling of fiberglass resins or epoxy over a fabric or foam material, is sometimes an integral part of manufacturing processes covered under other manufacturing classifications. A review of the manufacturing process must be made to determine the proper classification applicable to that manufacturing process.

3510-08 Graphite composite goods: Manufacturing

Applies to establishments engaged in the manufacture of fiber reinforced plastic goods. Products manufactured by establishments subject to this classification include, but are not limited to, golf club shafts, fishing poles and rod blanks, garden carts, hose reels, wind board sail masts, bicycle frames, tennis racquets, snow skis and auto parts. While the classification specifies graphite composite goods, other fiber reinforced plastics are used to make similar products and are covered by this classification. Graphite composites are also known as carbon reinforced composites. Irrespective of the product made, the processes used to produce the end products are similar. For example, the making of tube-like products such as, but not limited to, golf shafts, wind board sail masts, and fishing poles, consists of cutting a fabric-like material which is purchased from others to the specified dimension needed to make the product; rolling the material onto a mandrel (rod) or wrapping the material around a mold; securing the fabric material with a plastic (cellophane) tape; curing the product in an oven; removing the cellophane wrap; removing the mandrel or mold; sanding the product to remove the lines left by the cello wrap; and applying the finish.

This classification excludes the manufacture of nonfiber reinforced plastic goods or products which are to be reported separately in classification 3510 as applicable; fiberglass reinforced goods or products which are to be reported separately in classification 3511; and plastic goods manufacturing from premanufactured components including the cutting, bending and milling of plastic which are to be reported separately in classification 3512.

Special note: Care should be taken when encountering the term "graphite composite." Graphite is a material common to many products such as, but not limited to, lead pencils, paints, lubricants and protective coatings, none of which are covered by classification 3510.

WAC 296-17A-3511 Classification 3511.

3511-02 Fiberglass goods: Manufacturing, N.O.C.

Applies to establishments engaged in the manufacture of a wide variety of fiberglass goods not covered by another classification (N.O.C.) including, but not limited to, hot tubs, swimming or wading pools, boat hulls, chair frames, doors, fish tanks, satellite dishes, tanks, display carts, signs, industrial equipment, pick up canopies, and auto body parts such as fenders, hoods, or visors. "Fiberglass" is a composite material consisting of glass fibers in resin; it is applied over or into molds by spraying, brushing, or spreading. Materials include,

but are not limited to, resin (usually received in barrels), liquid hardeners, fiberglass ribbon, and molds. Before a mold is used it is sprayed with a release agent so the item is more easily removed. In the spraying technique, resin is sprayed with compressed air gun through a "chopper gun" into the mold, while a "ribbon" of fiberglass is simultaneously fed through a razor cutter which chops it into short lengths and blows it into the mold. Because the hardeners cause the material to "set" in a short period of time, the spraying is done rapidly. Once the desired thickness is attained, the material is left in the mold until completely set and cured, then removed. Spraying and chopping the fiberglass in this method causes a substantial amount of debris in the air, so workers usually wear respirator masks. There are many finishing techniques, such as smoothing the sprayed fiberglass with a hand-held rubber roller, applying various materials such as "gel" or "vinyl" to produce a glossy surface, joining parts to make very large items, attaching hardware, all of which are included within the scope of this classification when done by employees of an employer having operations subject to this classification.

This classification excludes establishments engaged in the manufacture of plastic items by blow molding or extrusion, vacuum forming, foam, rotary, or liquid molding, or injection molding, and establishments engaged in the manufacture of artificial marble items or graphite composite goods, which are to be reported separately in classification 3510; establishments engaged in the cutting, milling, bending, heating and shaping of hard plastic goods which are to be reported separately in classification 3512; and establishments engaged in the manufacture of auto body parts from materials other than fiberglass which are to be reported separately in the classification applicable to the materials and the processes being used.

Special note: Mold making for their own production is included within the scope of this classification when done by employees of an employer subject to this classification. Molds are usually made of wood; they are smoothed and shaped with a filler, like auto body putty, then coated with fiberglass.

WAC 296-17A-3512 Classification 3512.

3512-02 Plastic goods: Manufacturing - cutting, milling or bending

Applies to establishments engaged in the manufacture of a variety of plastic goods from premanufactured components such as sheets, rods, or tubes by cutting, milling, or bending. Products include, but are not limited to, display stands, racks, dispensers for snack food items, vinyl window sashes, fiberglass panels used for aircraft or recreational vehicle interiors, and signs. Essentially anything that can be done with wood can be done with plastic, so shops in this classification usually resemble a cabinet or woodworking shop. They use the same type of tools such as, but not limited to, saws, routers, planers, and grinders, to cut or mill the plastic goods. To bend plastic material, it is first heated in an oven or with a torch, then bent to shape. Buffers are used for polishing, or the

pieces may be flame polished (heated with a gas torch). Products may be formed by joining pieces with glue, hardware or other fasteners.

This classification excludes establishments engaged in the manufacture of plastic items by blow molding, extrusion, vacuum forming, foam, rotary, or liquid molding, or injection molding, and establishments engaged in the manufacture of artificial marble items or graphite composite goods, which are to be reported separately in classification 3510; establishments engaged in the manufacture of fiberglass goods which are to be reported separately in classification 3511; and sign manufacturers that purchase precut plastic backings from others, then paint lettering or designs or attach vinyl lettering to them in their own shops which are to be reported separately in classification 4109.

Special note: The cutting, milling, or bending of plastic goods incidental to the manufacturing process for products made from wood, metal or other materials is included in the classification applicable to those manufacturing processes.

WAC 296-17A-3513 Classification 3513.

3513-00 Rubber goods, N.O.C.: Manufacturing

Applies to establishments engaged in manufacturing rubber goods not covered by another classification (N.O.C.) from natural or synthetic rubber which may be hard, soft, or liquid. Products manufactured in this classification include a wide variety of items such as, but not limited to, gaskets, seals, floor tiles, O-rings, hoses, belts, rubber bands, foam rubber cushions or pads, sponge rubber novelties, shoe parts, floor mats, interior pieces for computer circuit boards, and latex rubber goods such as gloves. Establishments in this classification also mix and compound rubber for sale to tire dealers that recap or retread tires. This classification includes establishments that manufacture rubber tires, or that shred used tires or other rubber products. Used rubber is run through granulators or rotary shearers that shred it to small pieces. Shredded material can be used as filler for asphalt for running tracks, or mixed with coal for fuel in industrial plants or further processed into oil. This classification also includes establishments that use heavy machinery to cut used tires into large pieces which are then formed into bumpers for boats, loading docks or similar items. Manufacturing processes include washing, mixing, rolling, extruding, calendaring, molding, and curing, all of which cause chemical reactions to the rubber until it reaches the desired "property or state". Vulcanization, which improves the strength, resiliency and odor of rubber by combining it with sulfur or other additives in the presence of heat and pressure, occurs in various stages of manufacturing processes. Machinery includes but is not limited to: *Shearer*: Cuts bulk rubber into strips or chunks. *Extruder*: Mixes and heats pieces of rubber to high temperature, then forces the mixture out through dies, forming it into "ropes." (O-rings are made with extruded ropes.) *Rubber mill*: Has two heavy rollers (each about 1 foot diameter) that spin towards each other; the friction of the spinning rollers causes heat. Strips of raw rubber and dry chemicals are fed

into the rollers where they are mashed and pressed, forming it into different grades or densities. The rubber emerges from the mill in flat, pliable strips, ready for further treatments. *Calendar*: Passes rubber through more rollers which work it to a smooth, even, glossy finish. *Hydraulic steam press*: There are several types of molding which involve placing strips of the rubber after it has been milled and rolled into cast iron molds. The molds are inserted into a press where heat and pressure are applied until the rubber is molded to desired shape, then removed and cooled. *Injection mold press*: Rubber is shot into the cavity of the molds, and the press heats it to an almost liquid form, then it becomes stable. A vacuum pump sucks air from the molds to form the product. *Deflasher machine*: Resembles a clothes dryer with a basket inside; used to remove flashing (the excess rubber that has squeezed out of the mold during forming). Molded items are placed in the basket; nylon pellets are added to the machine. As the machine spins, the pellets beat the flashing from the molded pieces. Flashing is sometimes trimmed by hand with exacto knives or smoothed on grinders. *Curing oven*: The final step for most processes which dries and sets the rubber. Establishments subject to this classification may also make some products by cutting and gluing premanufactured materials. If any rubber molding is performed, the entire operation is to be covered under this classification.

This classification excludes establishments engaged in the manufacture of rubber goods by cutting and gluing premanufactured rubber or composite sheets (*no molding*) which are to be reported separately in classification 3802; tire dump operations which are to be reported separately in classification 4305; and the manufacture of synthetic rubber and the "advanced recycling" of shredded tires or rubber which is to be reported separately in classification 3407.

WAC 296-17A-3602 Classification 3602.

3602-01 Electrical, telegraph or radio component, telephone set: Manufacture, assembly, or repair

Applies to establishments engaged in the manufacture, assembly, or repair of components related to the telegraph, electrical, radio or telephone industry. Component parts may be for items such as, but not limited to, radio or television sets, hearing aids, transformers, coils, condensers, switches, antennae, phones, speaker units, dials, rheostats, plugs, arrestors, resistors, and electrical control relays, circuit breakers, or other parts necessary to accomplish radio, electrical, telegraph or telephone communication. Materials include, but are not limited to, metal, plastic, and wood used for the outside casings, and component parts. Some establishments in this classification manufacture the casings and the internal components. Other establishments in this classification assemble the ready-made parts with air and hand tools such as, but not limited to, drill presses, solder guns, or saws. Internal parts are usually assembled simply by clamping circuit boards in place, then soldering small pieces together. This classification includes engineers, research and laboratory personnel employed by establishments having operations subject to this

classification. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification; and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-02 Instrument - scientific, medical, or professional: Manufacturing; magnetic tape: Manufacturing

Applies to establishments engaged in the manufacture of instruments used in medical, scientific, or professional applications. This classification also applies to establishments engaged in the manufacture of magnetic tapes. Instruments in this classification range widely in shape and size; they include, but are not limited to, dental or surgical instruments, microscopes or other scientific testing or research instruments, surveyors' instruments, and electrical testing instruments. Materials include, but are not limited to, metal, glass, plastic, or wood for casings, and component parts. Processes vary depending upon the product being produced, and could involve some stamping, machining, and heat-treating. However, component parts are usually manufactured by others, and establishments in this classification perform a substantial amount of hand assembling, inspecting, testing, and packaging operations. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-03 Sound recording equipment: Manufacturing

Applies to establishments engaged in the manufacture of sound recording equipment. Establishments in this classification may manufacture all or some equipment such as instruments for measuring sounds, and generators (for producing sounds), filters or modulators (for processing sounds), magnetic or tape recorders (for storing sounds), and speakers (for reproducing sounds). Materials include, but are not limited to, metal, glass, plastic, or wood for casings, clamps, glue or epoxy, and component parts. Components may be produced by the manufacturer or purchased from others and assembled. The assembly may be partially or wholly automated. Machinery includes, but is not limited to, shears, drill presses, grinders, soldering guns, welding equipment, and air or hand tools. There may be inspection areas and sound testing rooms. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-04 Thermometer and steam gauge: Manufacturing

Applies to establishments engaged in the manufacture of thermometers and/or steam gauges. The most common type of thermometer is a mercury thermometer which consists of a capillary tube that is sealed at its upper end and is enlarged into a spherical or cylindrical bulb at its lower end. This bulb is filled with mercury and mounted on a thin metal or plastic sheet. The manufacturers of steam gauges may simply assemble component parts with hand tools, test, and package them. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-05 Dental laboratories

Applies to establishments engaged in the manufacture of dentures, artificial teeth, braces, and retainers. These types of establishments are generally referred to as dental laboratories. The manufacture of these items involves precision work with castings, plastic or vinyl molding, and light wire forming. In the state of Washington dental laboratories can fit patients for dentures, in addition to making the denture which is included when performed by employees of employers subject to this classification. This is a shop only classification. Repair work when specified is limited to work performed at the shop.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-06 Jewelry: Manufacturing or engraving; trophy assembly or engraving

Applies to establishments engaged in the manufacture or engraving of jewelry, such as, but not limited to, rings, bracelets, necklaces, earrings, watchbands, pins, broaches, and cigarette lighters. Jewelry manufacturing or engraving involves working with precious metal and/or stones. Operations usually include polishing, buffing, drilling, and assembly, mixing and melting alloys and metals, then pouring the mixture into small casts. This classification also applies to establishments engaged in assembling or engraving trophies on a production basis. For purposes of this classification, assembly means making trophies from premanufactured components purchased from others. The engraving may be done by "etching" or by computer. In the etching method, patterns or lettering is cut into a metal strip that is coated with a solution resistant to etching acids. The metal strip is treated with etching acids that "melt away" the uncoated portion of metal, leaving an impression of the design. Computerized engraving is done by keying the designs or letters into the computer; the designs are transmitted to an "arm" on the computer which "draws" (engraves) them onto the metal plate. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification; the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used; and establishments engaged in the manufacture of watches which are to be reported separately in classification 3602-09.

Special note: This classification is for manufacturers engaged in the mass production of jewelry items and is distinguishable from jewelry stores reported in classification 6308 who produce custom, one-of-a-kind pieces on a special order basis. Trophy stores in classification 6308 may assemble components to make custom trophies, or engrave plaques for the trophies they sell. Assembly and engraving that is incidental to their retail sales operation is included in their store classification.

3602-07 Electronic parts: Assembly

Applies to establishments engaged in the assembly of electronic parts which are usually sold to other manufacturers. They may have automated/robotics assembly lines for all or part of the processes. In manual operations, small parts are soldered, chipped, riveted, or screwed into place with hand tools such as, but not limited to, soldering guns, riveters, drills, screw drivers, or water jets. This classification also applies to establishments engaged in the manufacture or assembly of computers and the manufacture of dry cell (flashlight type) batteries. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-08 Electrical/electronic ignition assembly, cord set, or radio set: Assembly

Applies to establishments engaged in the assembly of electrical/electronic ignition assemblies, cord sets, and radio set components. An ignition assembly is a switching component that allows an electrical circuit to be completed in order to start a piece of machinery or equipment. Electrical cord sets are the portion of wiring found on appliances and tools that plug into electrical power sources. A radio set is comprised of an input circuit for tuning in to the frequencies of the various transmitters to be received, the demodulation circuit for separating the audio-frequency from the high-frequency carrier, a low-frequency amplifier stage, and the loudspeaker. The amplifier elements are transistors supplied with the necessary operating voltages. Establishments in this classification usually assemble radio component parts and circuit boards that are manufactured by others. The assembly is accomplished by soldering, clipping, riveting, and welding the parts into place. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the

manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-09 Watch: Manufacturing

Applies to establishments engaged in the manufacture of watches. The component parts are usually mass produced on an assembly line. Watch cases are usually made from sheet metal or plastic; watch faces are made from plastic or glass. The internal works are very small gears or springs and/or computer chips. The face may have hands and a dial, or may consist of a light emitting diode (LED). This classification includes the manufacture of internal works of clocks. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes establishments engaged in the manufacture of jewelry which are to be reported separately in classification 3602-06; establishments engaged in the manufacture of wooden housings or casings for clocks such as grandfather and mantle types which are to be reported separately in classification 2905; all outside repair work which is to be reported separately in the applicable services classification; and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-10 Camera, video camcorder, motion picture projectors: Manufacturing, assembly, or repair

Applies to establishments engaged in the manufacture, assembly, or repair of cameras, video camcorders, and motion picture projectors. Materials include, but are not limited to, metals, plastics, glass and internal components. Machinery includes, but is not limited to, punch presses, drill presses, and soldering guns. Establishments in this classification often assemble products from internal components manufactured by others. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

Special note: When an establishment subject to this classification has a retail store, then both classifications 6406 and 3602-10 may be assigned, provided all the conditions of the general reporting covering the operation of a secondary business have been met. Otherwise, all operations are to be reported in the highest rated classification of the two.

3602-11 Fishing tackle: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of fishing tackle. For purposes of this classification, the term fishing tackle is limited to lures, spinners, spoons, flies, plugs, sinkers, artificial bait and similar items. Work contemplated by this classification includes the receipt of supplies such as wire, hooks, spoons, swivels, beads and feathers, and other components from unrelated manufacturers and distributors, hand assembly of components into finished fishing tackle, painting spoons and plug bodies, packaging

and shipping. This classification also contemplates testing of products and research and development of new products. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes the manufacture of items such as, but not limited to, reels, poles, nets, tackle boxes, knives, melting pots, plastic beads, wooden or plastic plug bodies, hand tools (pliers, bench vise) molds, specialty clothing or protective gear which are to be reported separately in the classification applicable to the material and process used to produce the product; and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

Special note: Care should be taken when assigning this classification to verify that the product being manufactured is compatible with the manufacturing and assembly processes contemplated within this classification. Most fishing tackle subject to this classification is hand assembled from small component parts.

3602-12 Incandescent lamp or electric tube: Manufacturing

Applies to establishments engaged in the manufacture of electrical or gas-filled bulbs or tubes such as, but not limited to, incandescent lamps, photoflash lamps, flood lamps, fluorescent tubes, X-ray tubes, cathode-ray tubes, neon tubes or artistic style neon tube signs that are not attached to metal backings. The processes and equipment will vary somewhat depending on the type of electrical bulb, tube, or lamp being made, but the basic operation is the same. Component parts such as, but not limited to, glass bulbs, globes, or tubes, tungsten wire, metal bases, shellac, and nitrogen and argon gas are purchased from outside sources. Using flange machines, the bottom of the glass tubing is fused to the flange to produce the base that is used within the bulb or globe. Metal bases may be milled, then coated with a sealing compound such as shellac. Mounts are assembled and inserted into the flange on stem machines. The assemblies are seared together, then the tungsten filaments are fixed between support wires forming the stem. The bulbs or globes are flushed with nitrogen to expel any moisture before the stems are inserted into them. These units are inserted into the metal bases and cemented. Air is evacuated and argon gas is pumped into the bases, after which they are heat sealed and trimmed. Neon tube signs or displays are made by heating a thin tube of glass over a ribbon flame until the tube becomes flexible, blowing air into the tube to keep the glass from collapsing, then, while it is still hot, bending it to shape. Because the glass cools rapidly, the heating and bending is repeated until the desired shape is achieved, then the tube is filled with neon or argon gas and the ends sealed.

This classification excludes establishments engaged in the manufacture of metal fixtures equipped with electrical or gas lighting which are to be reported separately in classification 3402; all outside repair work which is to be reported separately in the applicable services classification; and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-14 Musical instrument - metal: Repair

Applies to establishments engaged in the repair of metal musical instruments which include, but are not limited to, trumpets, trombones, French horns, and tubas. The operations involve primarily hand work such as, but not limited to, brazing and soldering, as well as fitting, testing, and polishing the instruments. Tools include, but are not limited to, solder or brazing guns, lathes, drill presses, and various types of saws. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification; the repair of wood musical instruments which is to be reported separately in classification 2906; and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-23 Electronics products - resistors, capacitors, chips and relays, transistors: Manufacturing

Applies to establishments engaged in the manufacture of resistors, capacitors, chips, relays, and transistors which are usually tiny and delicate. Products manufactured in this classification are usually mass produced with little human intervention during the production process, which is often done in a vacuum or a nitrogen filled room. Materials include, but are not limited to, silicon, wires, and plastics. In addition to the automated equipment, hand-held tools include, but are limited to, pliers, wrenches, and soldering guns. Finished products are inspected, usually through powerful microscopes, then packaged and shipped. This is a shop or plant only classification. Repair work, when specified, is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-24 Stamped metal goods: Manufacturing

Applies to establishments engaged in the manufacture of small, stamped, metal goods such as, but not limited to, metal tags, buttons, zippers, bottle caps, fasteners, snaps, clasps, buckles, and curtain fasteners. Materials, which come in coils or strips, are run through presses. Most of the stamping is done on automatic stamping presses. Products are cut, stamped, formed, trimmed, and cleaned, then usually finished by plating or lacquering. This is a shop or plant only classification. Repair work, when specified, is limited to work performed at the shop or plant.

This classification excludes the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-27 Electronic circuit board, N.O.C.: Assembly

Applies to establishments engaged in the assembly of electronic circuit boards not covered by another classification (N.O.C.) which are used in a wide variety of electronic and automotive products. The process usually begins by cutting

boards to size with power saws, then drilling or punching holes in them with automated drills or punches. Depending upon the original materials used, the boards used for the base may be coated or dipped. Then the chips, transistors, resistors, and/or condensers are installed, usually as part of an assembly line process. Next, the circuit boards are dipped and coated with a thin metal. Finished products are inspected, tested, packaged and shipped. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

3602-28 Stereo components: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of stereo components such as, but not limited to, record changers, disc or video players, receivers and amplifiers. Materials include, but are not limited to, circuit boards, resistors, drivers, baffle plates, chambers, trim/rings, and grills. Equipment includes, but is not limited to, hot glue guns, electric drills, electric screw drivers, and automated assembly or manufacturing equipment. Finished products are inspected, tested, packaged and shipped. This is a shop or plant only classification. Repair work when specified is limited to work performed at the shop or plant.

This classification excludes all outside repair work which is to be reported separately in the applicable services classification, and the production of raw materials used in the manufacturing of the above articles which is to be reported separately in the classification applicable to the production process used.

WAC 296-17A-3603 Classification 3603.

3603-10 Furniture stripping and refinishing; metal plating or polishing, rustproofing, N.O.C.

Applies to establishments engaged in stripping and refinishing wood or metal furniture, or metal plating (a coating of metal on an object), polishing, and rustproofing that is not covered by another classification (N.O.C.). Furniture refinishing contemplated by this classification includes, but is not limited to, preparing articles for finishing or refinishing by

dipping in chemical solutions/acid baths to remove the old finish or dirt, sanding and wire brushing as needed, thoroughly removing all residues, applying new finish by brushing, rolling, spraying or dipping, air or oven drying, and any appropriate finish work such as waxing, polishing and buffing when done by employees of an employer having operations subject to this classification. *Metal plating* contemplated by this classification may be done by dipping in hot solution or spraying with a very high pressure, heated gun. *Electroless plating* is another type of dipping process which can be used to plate metals, plastics, and other materials by first preparing the surface with a chemical to ensure adhesion of the metal plating material. *Rustproofing*, as contemplated by this classification, is usually applied by dipping or spraying. Plated items may be finished by lacquering and polishing. *Polishing* may also be conducted as a separate contract on metal and nonmetal items.

This classification excludes furniture finishing/refinishing done in conjunction with manufacturing or repair which is to be reported separately in classification 2905; metal plating, polishing, rustproofing and finishing done in conjunction with manufacturing of metal or a metal product which is to be reported separately as applicable to the product; undercoating of automobiles or other vehicles which is to be reported separately in classification 3411; metal plating done by an *electrolytic method* and rustproofing by *anodizing method* which are to be reported separately in classification 3603-11.

3603-11 Electroplating and detinning, N.O.C.

Applies to establishments engaged in providing electroplating or detinning services that are not covered by another classification (N.O.C.). Work contemplated by this classification includes, but is not limited to, preparing items by dipping in chemical solution/acid baths to remove old finish or dirt, sanding and wire brushing as needed, removing all residues thoroughly, electroplating to create the new finish, air or oven drying, any appropriate finish work such as polishing and buffing, and electrolytic or chemical baths for detinning processes, when done by employees of an employer having operations subject to this classification. *Electroplating* (including galvanizing and tinning) to achieve a protective or decorative coating is done by immersing the metal object in a solution which contains the desired metallic particles (metals commonly used are gold, silver, nickel, zinc and chromium) and passing an electric charge through the solution which causes the metal particles to adhere to the object being plated. Typical items plated include, but are not limited to, jewelry, plumbing hardware and components, silverware, eyeglass frames, medical instruments, and various specialized industrial components of any size. Plated items may be polished and lacquered as part of the finishing process. This classification includes *anodizing* to rustproof aluminum and some aluminum alloys by immersion in an acid bath and applying an electric charge to the metal which causes the finish to form on it. *Detinning* is the process of recovering tin from tin plated scrap. The "chemical process" involves using caustics and an oxidizing agent which causes the tin to separate from the metal it was plated to. A variation of this method introduces electrolysis to achieve a purer reclamation. The "chlorine process" uses chlorine applied under pressure to dissolve the tin and separate it from the tin plated scrap.

This classification excludes any electroplating or rust-proofing by electrolytic methods done in conjunction with the manufacturing of metal or a metal product which is to be reported separately as applicable to the product; metal plating, polishing or rustproofing not using electrolytic methods which is to be reported separately in classification 3603-10; galvanizing or tinning done by hot dip process which is to be reported separately in classification 3604; and any detinning not done by a specialty shop as described above.

3603-12 Painting in shop, N.O.C.

Applies to establishments engaged in providing painting services at their shop, that are not covered by another classification (N.O.C.). This includes painting wood, metal, plastic, glass or other items. Customers include manufacturers, cabinetmakers or millwork manufacturers who do not do their own finish painting/staining/varnishing, or individuals who need only one item painted. Work contemplated by this classification includes, but is not limited to, preparing items for finishing by cleaning, sanding and wire brushing as needed, applying new finish by brushing, rolling, spraying or dipping, air or oven drying, and any appropriate finish work such as waxing, polishing and buffing when done by employees of an employer having operations subject to this classification. This classification includes application of nonmetallic coatings by dipping (such as nonstick surfaces) and painting with an electrostatic paint gun.

This classification excludes *sign painting* when done by establishments who do not manufacture the sign, which is to be reported separately in classification 4109; any painting done in conjunction with the manufacture of a sign which is to be reported separately in classification 2903, 3402, 3503 or 3510 as applicable; painting done in conjunction with the repair of an exterior sign which is to be reported separately in classification 0403; furniture stripping and refinishing services which are to be reported in classification 3603-10; furniture finishing done in conjunction with manufacturing or repair which is to be reported separately in classification 2905; automobile painting which is to be reported separately in classification 3412; the permanent yard or shop of a painting contractor which is to be reported separately in classification 5206 provided the conditions set forth in WAC 296-17-675 have been met; and the painting/staining/varnishing of any item done in conjunction with the manufacturing of that item which is to be reported separately as applicable to the product.

WAC 296-17A-3604 Classification 3604.

3604-16 Galvanizing or tinning - not electrolytic, N.O.C.

Applies to establishments engaged in providing galvanizing or tinning services, *not using an electrolytic method*, that are not covered by another classification (N.O.C.). This process uses molten zinc or tin dip to coat metals to deter corrosion (galvanizing) and tarnish (tinning). The process is

used on all types of metal products from hand tools to automobile body parts and pieces of machinery. Work contemplated by this classification includes, but is not limited to, preparing metal by cleaning and washing in an acid solution, flushing with clean water, dipping in a metallic solution, immersion in the molten zinc or tin, and draining and/or blowing away the excess to achieve a smooth finish before cooling.

This classification excludes galvanizing or tinning using an electrolytic process which is to be reported separately in classification 3603-11 and any galvanizing or tinning operations conducted in conjunction with a metal or metal product manufacturing operation which is to be reported separately as appropriate to the product.

WAC 296-17A-3605 Classification 3605.

3605-28 Truck: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of complete trucks. Truck manufacturers subject to this classification are the nonpassenger type vehicles such as semi-trucks. These establishments may manufacture the chassis, body and other truck components or they may purchase any of these items from other manufacturers and simply assemble the trucks. Usually they will purchase the axle assemblies, transmissions, electrical and cooling systems, and steering gears from others. The determining factor to assign this classification is that they do the final assembly of the various components to make the truck operational.

This classification excludes auto or passenger vehicle manufacturing including pick-up trucks which is to be reported separately in classification 3402; truck component manufacturing which is to be reported separately in the appropriate manufacturing classification; and semi-truck repair and service centers which are to be reported separately in classification 6409.

WAC 296-17A-3701 Classification 3701.

3701-03 Ammonia, nitrogen and ammonium nitrate: Manufacturing

Applies to establishments engaged in the manufacture of ammonia, nitrogen and ammonium nitrate. Ammonia is a colorless gas used as a component in fertilizer, medicines and cleaning compounds manufacturing. The manufacturing process involves combining hydrogen and nitrogen gases with a catalyst which causes a reaction between the two gases when heated in a generator. Ammonium nitrate is a crystalline compound used mainly in fertilizers, explosives and propellants. The manufacturing process involves combining ammonia and nitric acid in a reactor. Nitrogen is a colorless gas that

is obtained from the air and processed by compressing air in a pressurized tank, removing impurities, and separating nitrogen and oxygen through heating.

3701-04 Nitrate recovery from X-ray and photo films

Applies to establishments engaged in recovering nitrate or silver from X-ray and photo films. The recovery process involves placing the films in developing solutions, ionizing the solution and separating the elements.

3701-05 Dye and chemicals: Manufacturing

Applies to establishments engaged in the manufacture of all types of dyes and in the manufacture of dyes and chemicals that are used exclusively for tinting candles. Organic and inorganic compounds such as, but not limited to, phenols, alcohols, caustics, acids, salts and gases are used in the manufacturing process. Manufacturing methods include, but are not limited to, weighing raw materials to specifications and pumping them into vats where they are heated, agitated and cooled. They are then filtered through presses, dried in ovens, ground into a powder, and then packaged. Liquid or paste forms of dye go through the same process with the exception of the drying and grinding operations.

3701-06 Chemicals, N.O.C.: Manufacturing by nitration, alkylation and oxidation processes

Applies to establishments engaged in the manufacture of chemicals not covered by another classification (N.O.C.) using a nitration, alkylation or oxidation process. Nitration involves the combining of nitrate with an organic compound to produce nitrobenzenes used in solvents, fertilizers and acids. Alkylation involves combining alkyls with other substances to form products used in the production of paper pulp, hard soap and petroleum products. Oxidation involves the combining of oxygen with other substances to produce products such as, but not limited to, hydrogen peroxide, protective metal coatings, and pharmaceutical preparations.

This classification excludes the manufacture of ammonia or nitrogen which is to be reported separately in classification 3701-03 and the manufacture of oxygen, hydrogen, acetylene gas, carbonic acid gas, or acids which is to be reported separately in classification 3701-10.

3701-07 Chemical mixing, blending and repackaging only

Applies to establishments engaged exclusively in mixing, blending or repackaging chemicals; it does *not* apply to the manufacture of ingredients for the mixing operation. The product may be mixed by hand or through a mechanical process. The equipment used by establishments covered by this classification is limited to storage tanks, mixing or blending vats, filling and packaging machines and miscellaneous equipment such as fork lifts and trucks.

This classification excludes establishments involved in more than a mixing, blending or repackaging operation which are to be reported separately in the appropriate chemical manufacturing classification.

3701-08 Cosmetics: Manufacturing

Applies to establishments engaged in the manufacture of cosmetics such as, but not limited to, soap, shampoo, hair conditioners, skin moisturizers, baby powder, lipstick, nail polish, bath oil, bath salts, and various personal care creams, gels or lotions. The process involves the mixing of premanu-

factured ingredients, using equipment such as storage tanks, mixers, heating devices, bottling/packaging/labeling equipment, and laboratory equipment for product development and quality control.

This classification excludes the manufacturing of the ingredients used in the mixing of the cosmetics.

3701-09 Drug, medicine, or pharmaceutical preparation: Manufacturing

Applies to establishments engaged in the manufacture of pharmaceuticals including drugs, medicines, and preparations such as, but not limited to, tablets, pills, ointments, liquids, and powders. Processes contemplated by this classification include mixing or blending of the base medicinal ingredients and additives such as, but not limited to, sugars, starches, flavorings, and waxes used for coating tablets. Compounds are then pulverized, distilled, heated and/or dried.

This classification excludes the manufacture or harvest of the ingredients used in the manufacture of the pharmaceuticals.

3701-10 Oxygen, hydrogen, acetylene gas, carbonic acid gas: Manufacturing

Applies to establishments engaged in the manufacture of oxygen, hydrogen, acetylene gas, carbonic acid gas, dry ice, or acid. The manufacture of oxygen and hydrogen involves the recovery of these gaseous elements from the air by compression, expansion and cooling operations until it liquefies. The liquid air then goes to a fractionator where the oxygen is separated from the hydrogen along with other gases such as neon and helium. Acetylene is a highly flammable but non-toxic gas that is manufactured by reacting calcium carbide with water in a pressure generator which combines carbon and lime to form the end product. Carbonic acid gas, also known as phenol, is a caustic poisonous gas used in manufacturing resins, plastics, and disinfectants. The manufacture of phenol involves a compression and refrigeration process.

3701-11 Alcohol: Manufacturing, distilling, N.O.C.

Applies to establishments engaged in manufacturing or distilling nonspirituous alcohol not covered by another classification (N.O.C.). Types of alcohol include, but are not limited to, methanol (wood alcohol), ethanol (grain alcohol) or denatured alcohol (combination of methanol and ethanol). Products produced include, but are not limited to, solvents, processing materials, germicides, antiseptics, or materials intended to be used as an ingredient in other products such as varnish and shellac. The processes for the production are varied depending on the type of alcohol and end product but all use a distillation process which involves the heating of liquids and subsequent condensation of vapors to purify or separate a substance contained in the original wood or grain product.

This classification excludes the manufacture of spirituous liquor which is to be reported separately in classification 3702 and gasohol distilling or refining which is to be reported separately in classification 3407.

3701-13 Polish, dressing, or ink: Manufacturing

Applies to establishments engaged in the manufacture of polish, dressings, or ink. Polish and dressing products include, but are not limited to, polish or dressings for shoes,

leather, furniture, automobiles or metal. The ingredients and processes for polish and dressing manufacturing vary, depending on the end product. Typical ingredients include but are not limited to oils, waxes, resins, detergents, methanol, solvents, water and coloring. The process may involve a simple mixing operation or a more involved process involving heating or cooking and molding into a cake or stick form. Typical equipment includes, but is not limited to, weighing and measuring scales, mixers, stoves, molding apparatus, automatic filling, labeling, wrapping and packaging machines. Ink manufacturing covers all types of ink including, but not limited to, newspaper, book, magazine, and writing ink. The process involves the cooking of oils and resins which produces a resin. Pigments and dyes are blended into the resin mixture and diluted to proper consistency.

This classification excludes the manufacture of candles, crayons, and adhesives which is to be reported separately in classification 3701-25.

3701-14 Extract: Manufacturing, including distillation of essential oils

Applies to establishments engaged in the manufacture of extract including the distillation of essential oils. Extracts are concentrated forms of an essential component of a food or a plant. Extracts include, but are not limited to, flavorings, perfume oils, sachet powders, ingredients for skin conditioners and hop extracts used in the brewing of beer. The process involves extracting flavorings or oils from various plants, herbs or fruit peelings by pressing, cooking, steaming or distillation. The extracts may be mixed or blended with other extracts for strength, consistency or color and are then bottled or canned. Typical equipment includes, but is not limited to, steam cookers, presses, distillation apparatus, filters, grinders, tanks, vats and filling, packaging and labeling machines.

This classification excludes perfume manufacturing which is to be reported separately in classification 3701-15; mint distilling which is to be reported separately in classification 3701-17; and hop pellet manufacturing which is to be reported separately in classification 2101.

3701-15 Perfume: Manufacturing, including distillation of essential oils

Applies to establishments engaged in the manufacture of perfumes including the distillation of essential oils. Perfumes may be used as a personal fragrance or by other manufacturers such as in the making of scented candles. The process typically involves the distillation, cooking, grinding, compounding, drying, blending, or liquidizing of ingredients. These ingredients may include, but not be limited to, extracts, oils, colors and binders.

This classification excludes the manufacture of candles which is to be reported separately in classification 3701-25.

3701-17 Mint distilling

Applies to establishments engaged in the distillation of mint. The process may begin with mint oil that is purchased from others or with the distillation of the mint leaves into mint oil. The mint leaves are chopped and blown into a mint steamer which lifts the moisture and oils from the mint. The resultant steam then goes through a series of condensation lines. Water is added to force the oil to the top of the liquid. The mint oil is heated for purification and to lessen the fra-

grance. Various mint oils may then be blended together to produce different types such as spearmint and peppermint. The product is then packaged in stainless steel or epoxy lined barrels.

This classification excludes the raising and harvesting of mint which is to be reported separately in classification 4811.

3701-20 Salt, borax or potash producing or refining

Applies to establishments engaged in the production of or refining of salt, borax or potash. This classification includes the manufacture of common salt used in chemical and food processing, borax which is used in the manufacture of glass, glazes, soap, and boric acid, and potash which is used in fertilizer. Salt ores received from others are dissolved in water to produce a brine of the desired concentration. It is refined into common salt by adding caustic soda and soda ash. Potash is refined by adding an amine to the brine which causes the salts to float to the surface where they are skimmed off. Borax is made by separating it from the potash by a rapid cooling process. All three of these products are then fully evaporated by heating in a partial vacuum to produce crystals or granules which are then dried.

This classification excludes the production of raw materials used in the manufacture of these products.

3701-21 Serum, antitoxin or virus: Manufacturing

Applies to establishments engaged in the manufacture of serums, antitoxins, or viruses. The process involves considerable microscopic laboratory work as well as working with animals. The animals are injected with bacteria and viruses, periodically bled and eventually killed. The killing of the animals is included in this classification as it is incidental and necessary to perform the operation to extract the serum from the glands and to separate the red blood cells from the blood.

This classification excludes the manufacture of other drugs or medicines which are to be reported separately in classification 3701-09.

3701-22 Paint, varnish or lacquer: Manufacturing

Applies to establishments engaged in the manufacture of paint, varnish, lacquer, enamel, shellac, paint removers and thinners. The paint manufacturing process involves a series of mixing and grinding operations. The pigments (solids) are then blended with oils or resins (liquids). A paint extender may also be added at this point. The paint is then pumped into filling machines where various sized containers are filled and then labeled. Lacquer, varnish, enamel, shellac and paint removers and thinners vary in the ingredients used but the process is similar to that of paint manufacturing in that it is mainly a mixing operation. Varnishes involve a cooking process which is generally not used in the manufacture of the other products included in this classification.

This classification excludes the production of raw materials used in the manufacture of these products.

3701-23 Putty or synthetic resin: Manufacturing

Applies to establishments engaged in the manufacture of putty or synthetic resin. Putty is a finely powdered chalk mixed with linseed oil. The main ingredients for both putty and synthetic resins are ground chalk, limestone and/or calcite. The process for both products involves grinding and mixing operations.

This classification excludes the production of the raw materials used in the manufacture of these products.

3701-25 Candle, crayon, and paste or glue: Manufacturing

Applies to establishments engaged in the manufacture of candles, crayons, and synthetic adhesives such as paste or glue. Raw materials used for making candles include, but are not limited to, beeswax, paraffin, stearin, wicks and colors which are received from others. The wax is heated in kettles or similar devices into which the wicks are dipped either by hand or by dipping equipment which can be either manual or automated. A fragrance may be added to the melted wax for scented candles. When the wax has attained the desired shape and size it is hung on lines to dry. The wicks are then cut and the candles are placed in molds to shape the base of the candle. Color is then added by dipping either by hand for specialized designs or by machine for solid colors. The candles are then inspected, wrapped, packaged and labeled. Crayons use the same ingredients that are used in making candles with the exception of the wicks. The type of wax used in making crayons determines the hardness. The wax is melted in a kettle or similar device and poured into molds for shaping and cooling. The crayons are then inspected, packaged and labeled. Synthetic paste or glue is made from powder or granule arabic gum or modified starch which is received from others along with preservatives and the containers and caps. The process involves mixing and cooking the ingredients in steel tanks and pumping the product to a filling area where it is packaged, labeled and capped.

This classification excludes the manufacture of polish, dressing, or ink which is to be reported separately in classification 3701-13; the manufacture of glue from animal substances which is to be reported separately in classification 4301; and the production of raw materials used in the manufacture of these products.

3701-27 Hazardous/toxic material: Repackaging for disposal

Applies to establishments engaged in *identifying and repackaging* hazardous/toxic materials for disposal. This classification is distinguished from classification 4305-20, in that classification 3701-27 applies to the *identifying and repackaging for disposal* of such materials as drugs, pesticides, chemicals, and toners that contain toxic or hazardous materials, while classification 4305-20 includes the *processing or handling* of such materials as medical or septic tank waste, drug lab or hazardous spill *cleanup*, and *reprocessing or handling* of low-level radioactive materials. For handling hazardous or toxic materials, the workers are equipped with protective clothing such as long sleeved shirts, depending on the material to which they will be exposed. They may also be equipped with steel toed boots, protective gloves, safety glasses and various types of respirator equipment. On a typical project, the first step is to visually inspect the materials to see if they appear to be the materials described on a job order. If there is a question of identity, a sample of the material is sent to a lab for analysis. The establishment may have its own lab facilities or the sample may be sent to an outside lab, or the customer may have it analyzed. Every component of the sample must be identified. Once the material has been identified, and all containers labeled, the containers are separated

(2007 Ed.)

into appropriate groupings. Smaller containers of similar types of materials are packed into 55 gallon drums with plastic or other cushioning protective material to prevent breakage. All necessary paper work and forms required by various government agencies must be completed before the material can be transported to a disposal site.

This classification excludes hazardous/toxic material *processing or handling*, including processing of medical or septic tank waste, drug lab or hazardous spill cleanup; reprocessing or handling of low-level radioactive materials which is to be reported separately in classification 4305-20; and the replacement of nontoxic toner in cartridges used in business machines which is to be reported separately in classification 4107.

WAC 296-17A-3702 Classification 3702.

3702-01 Breweries or malt houses

Yeast: Manufacturing

Applies to establishments engaged in operating breweries, micro breweries, or malt houses, and includes all operations involved in the making of malt, beer, or ale as well as packaging into kegs, bottles or cans. Beer is produced from water, hops, barley malt and corn or rice; this mixture is cooked, filtered, cooled and then fermented. After the fermentation is complete, the beer is usually pasteurized and filtered, then sealed in kegs or packaged in individual bottles or cans. The exact process varies from brewery to brewery. Some breweries produce their own malt while others obtain the barley malt from an independent malting company. This classification includes warehouses and distributing stations maintained by the breweries at the brewery or at separate locations. This classification also includes tour guides, tasting room and gift shop employees. This classification also applies to establishments engaged in the manufacture of yeast.

This classification excludes establishments engaged exclusively as wholesale or combined wholesale/retail distributors of beverages which are to be reported separately in classification 2105.

3702-03 Bottling: Beverages, N.O.C.

Applies to establishments engaged in the production, bottling, and distribution of beverages not covered by another classification (N.O.C.) such as, but not limited to, carbonated and noncarbonated soft drinks, seltzers, fruit juices, lemonades, iced teas, and bottled waters. These bottling establishments purchase syrup or concentrate from the franchiser or concentrate manufacturer to produce a variety of products. Containers such as, but not limited to, aluminum or steel cans, plastic or glass bottles, are sanitized, filled with beverages, and sealed. Typically, bottlers will operate a single production facility and have multiple distribution warehouses.

This classification excludes establishments engaged exclusively as wholesale or combined wholesale/retail distributors of beverages which are to be reported separately in classification 2105 and manufacturers of syrup/concentrate for soft drinks which are to be rated separately in classification 3902.

3702-05 Wine making or wineries

Spirituos liquor: Manufacturing

Applies to establishment engaged in making wine from fruits or flavoring products such as, but not limited to, grapes, berries, peaches, or dandelions. The ingredients are crushed and the juice extracted; yeast is added to the juice; then the mixture is stored in a cool, temperature-controlled environment (such as a cellar) for fermentation to begin. During the natural fermentation, the sugar from the fruit is converted into alcohol. Additional processing includes clarification, filtration, pasteurization, centrifugation, and blending. The wine is bottled under vacuum and corked, labeled, and cased. This classification also applies to establishments engaged in the manufacture of spirituous liquor such as whiskey, gin, rum, and vodka. Operations involve preparing the mash from various grains, potatoes or molasses received from others, and fermenting, distilling and barreling of the products. This classification includes tour guides, tasting room and gift shop employees.

This classification excludes establishments engaged exclusively as a wholesale or combined wholesale/retail distributor of beverages which are to be reported separately in classification 2105; wine/liquor stores which are to be reported separately in classification 6403; and vineyard operations which are to be reported separately in classification 4813.

WAC 296-17A-3708 Classification 3708.

3708-14 Hide or leather dealers

Applies to establishments engaged in the sale of dressed animal hides, reptile skins and tanned leather. Dealers in this classification receive raw hides from others, sort and grade them, "salt" them (by soaking in a salt solution) to help their preservation, and ship them to tanneries for processing. After the tanneries have processed them, the dressed and finished hides, skins and leather are returned to the hide dealers where they are again graded, measured, trimmed by hand as necessary, then stored until they are shipped to their customers. Customers are primarily manufacturers of garments or other items.

This classification excludes establishments who process raw hides, skins, and fur into tanned leather, or dressed fur, which are to be reported separately in classification 4301.

3708-15 Linoleum, oil cloth or imitation leather: Manufacturing; Coating, impregnating, laminating or waterproofing textiles, N.O.C.

Applies to establishments engaged in the coating, impregnating, laminating, or waterproofing of crude fabric whose operations are not covered by another classification (N.O.C.). Textiles or fabrics may be treated with coatings or finishes such as, but not limited to, oils, varnishes, lacquers, or plastic and rubber finishes. Woven or felt cloth (loose, in rolls or mounted on forms) can be coated with spreading devices, rollers, or by dipping in solvents, drained to allow solvents to evaporate, then cured in drying ovens. Impregnating involves placing fabrics in vacuum tanks with solutions of rubber or lacquer and solvents and subjecting them to various pressures. Solutions are drained, contents removed, dried, baked in curing ovens and rough spots removed by grinding. Laminating is a process of cementing fabric and coating materials together and running them through heated pressure rollers, then curing them in drying ovens. Fabric embossing, which is raising designs in a surface, is included in this classification. These processes are also used in the manufacture of linoleum, oil cloth, imitation leather, and similar waterproofed or laminated fabrics.

This classification excludes establishments engaged in the bleaching, dyeing, or finishing textiles which are to be reported separately in classification 3708-16 and coating or other finishing operations performed by employees of manufacturers of textiles or textile goods which are included in the manufacturing classification as applicable.

3708-16 Bleaching, dyeing or finishing textiles: N.O.C.

Applies to establishments engaged in the bleaching, dyeing, or mercerizing of crude fabric whose operations are not covered by another classification (N.O.C.). The fabric is first treated with bleaches, dyes, and other solutions, then singed and calendered prior to shipping to other manufacturers to be made into textile goods. Mercerizing is the treatment of fabric with sodium hydroxide to shrink the fiber and increase its color absorption and luster. Singeing is the burning of the fiber ends to seal them; calendering is pressing the cloth through heavy rollers to smooth and gloss it. The above operations require the use of large manufacturing machinery such as, but not limited to, calenders and large vats.

This classification excludes establishments engaged in coating, impregnating, laminating or waterproofing textiles which are to be reported separately in classification 3708-15; establishments engaged in the washing and drying, or dyeing of individual garments for others which are to be reported separately in classification 2201; and coating or other finishing operations performed by employees of manufacturers of textiles or textile goods which are included in the manufacturing classification as applicable.

3708-18 Broom or brush: Manufacturing or assembly, N.O.C.

Applies to establishments engaged in the manufacture or assembly of all types of household and industrial brooms, brushes, and mops not covered by another classification (N.O.C.), including, but not limited to, paint brushes and rollers, whisk brooms, scrub mops, dust mops, brushes for vacuum cleaners, street sweeping or other rotary machines. Animal hair, synthetic fibers, handles and backings made of

wood, plastic or metal, screws, rivets or other hardware, metal springs and wire, yarn, and dust-attracting additives are purchased from outside sources. Tools and equipment include, but are not limited to, manually operated or computerized brush making machinery. Brush making machinery drills holes in the brush base, fills holes with hair or other fibers, and staples them in place. Other types of brush making machines make metal-back strip brushes which are mounted in straight or spiraled rows around cores (tubing or shafts), and used in rotary machines. These machines loop bristles around an anchor wire, then crimp a metal channel around the anchor wire, forming the base. The bristles are trimmed to precise lengths on trimming machines.

This classification excludes establishments engaged in the manufacture of metal, wood or plastic handles or backings which are to be reported separately in the classification applicable to the manufacturing process, and establishments that make only mop heads by sewing yarn or other strands to a cloth base which are to be reported separately in classification 3802.

3708-19 Cordage, rope, or twine: Manufacturing

Applies to establishments engaged in the manufacture of cord or cordage, rope, twine, or string from both natural and synthetic fibers such as cotton, manila, sisal, flax, jute, hemp, and rayon. Finished products, which range widely, include, but are not limited to, fish lines, shade or awning cords, mountain climbing ropes or riggings on boats. This classification includes the extrusion of polyethylene or similar pellets to form fibers when done by manufacturers for use in their own products only. This classification also includes establishments that pick, card, and comb fibers prior to twisting the resulting strands into twine or lightweight cord which they may further twist or braid together to produce heavier cordage or rope. "Picking" removes debris from the raw fibers; "carding" untangles and straightens the fibers; "combing" separates long fibers from shorter ones and forms them into thick strands (which are referred to as "slivers"). Other manufacturers in this classification start with spools of cordage or rope. Manufacturers may dye their products, coat them with latex to prevent deterioration, or steam and dry them. The above operations are included in the classification when performed by employees of employers engaged in manufacturing rope or cordage. Machinery includes bale breaking, picking, carding, spinning, twisting, braiding, winding machines, dipping vats, and dryer ovens.

This classification excludes establishments engaged in the manufacture of net, thread, webbing, or yarn which are to be reported separately in classification 3708-26 and establishments engaged in the manufacture of plush, velvet, felt, or other fabric produced by spinning or weaving which are to be reported separately in classification 3708-27.

3708-22 Pelting

Applies to establishments engaged in animal hide pelting operations. A pelt is an untanned animal hide or skin with the hair or fur still on it. For classification purposes, pelting is defined as the initial cleaning and drying of animal skins or hides, but does not involve the removal of hair or fur, or tanning operations. Frozen pelts are thawed by flushing them in water. Fat and tissues are removed from the skin on fleshing

machines. Fleshing machines resemble a band saw with a small blade over which the skin is moved to remove fat and tissue. Then skins are placed in tumblers or drums with cornmeal or sawdust to clean the excess moisture, dirt, and oils from them. They are usually transferred to another drum or shaker to remove the cornmeal or sawdust. The cleaned pelts are stretched on drying boards or metal frames, stapled to the frames with hand staplers, and placed in drying rooms until dry. Pelts are sold to tanneries or furriers where they are further processed into tanned hides or dressed furs.

This classification excludes establishments engaged in the tanning of leather and the dressing of fur which are to be reported separately in classification 4301; establishments engaged as taxidermists which are to be reported separately in classification 3708-23; and establishments engaged in raising fur bearing animals which are to be reported separately in classification 4804.

Special note: Pelting of fur bearing animals, when performed by the animal raiser, is considered incidental to the raising and is included within the scope of classification 4804. Raisers of fur bearing animals are entitled to classification 3708-22 only if their hide pelting operation involves the pelting of animals which have been raised by others.

3708-23 Taxidermists

Applies to establishments engaged in taxidermy which is the preparation, stuffing, and mounting of skins of dead animals for exhibition in a lifelike state. This classification includes all operations, including tanning of hides and making animal forms, when performed by employees of the taxidermist. Hunters and fishermen are the primary customers of taxidermists; pet owners may have a pet preserved, all of whom provide the skins or animals. Other customers include museums who use animal likenesses for decorating or exhibit. For these customers, the taxidermist usually purchases tanned hides from other sources. Small animals, such as birds, cats, or fish are usually mounted whole. Large animals may be mounted whole, although generally only the head and neck are mounted. Whole animals are posed and sometimes placed in natural-looking settings. The taxidermist may receive the skin, or the whole animal, in which case the skin is carefully removed in one piece. To remove fat and tissue, the fleshy side of the hide is pulled back and forth across the spinning blade of a fleshing machine. Fleshing machines resemble a band saw with a blade about a foot in diameter which is mounted on a worktable. Hides usually require "finer fleshing" which is done by scraping with a hand knife. Holes or tears in the skin are hand sewn. The taxidermist may finish preparing the skins, or they may send them to a tannery. Other preparations involve tumbling the skins in drums (which resemble clothes dryers) with sawdust or cornmeal to remove excess moisture, dirt, oils, then washing them in solutions of sodas, borax or alum to further clean, soften, and preserve them. Antlers are soaked in brine to remove blood and other waste. Prepared skins of smaller animals are usually stuffed; skins of larger animals are usually stretched over an animal form, sewn together, then glued onto the form. Taxidermists may make their own animal forms from fiberglass or other plastic materials, or they may purchase them elsewhere. Antlers, artificial eyeballs, teeth, tongues, toe nails, and hooves are attached. Finishing work

requires touches of paint to eyelashes or mouths (applied with artist's brushes), sprays, or whatever make-up or sculpturing techniques are needed to make the animal look lifelike. Additional materials and equipment includes plaster, cotton or other stuffings, styrofoam, cleaning agents or waxes, hand tools for cutting, scraping, and sculpturing, rasps, sewing needles, hammers, saws, freezers, dryers and tumblers, and sewing machines.

This classification excludes establishments engaged in hide pelting which are to be reported separately in classification 3708-22 and establishments engaged in tanning operations and fur dressing which are to be reported separately in classification 4301.

3708-26 Net, thread, webbing, yarn: Manufacturing

Applies to establishments engaged in the manufacture of webbing, thread, or yarn by spinning, weaving or knitting processes from natural or synthetic fibers such as, but not limited to, cotton, rayon, silk, wool. This classification also includes the manufacture of nets which are woven from cording or twine. Initial operations include the removal of debris from fibers by picking; and untangling, straightening, and stretching of fibers by carding. A combing operation separates long fibers from shorter ones and forms them into thick strands (referred to as slivers). Slivers are placed on creels and fed into spinning machines to be further stretched, spun and twisted onto bobbins (also called packages). The thread or yarn go through further winding, rewinding, doubling, or reeling, depending on the ply being produced. At some point prior to the final winding onto a cone, the threads are rinsed in vats of hot water for several hours to set the ply; dyes may be added to the rinse. Threads are then spun dry and placed in dehydrators until all moisture is removed. Yarn/thread is packaged and sold to fabric weavers. Elastic or nonelastic webbing is woven from yarns or threads on narrow-shuttle looms or knitting machines. The finished lengths are coated, laminated, or dyed prior to winding onto skeins or spools for sale to others. Nets manufactured in this classification range from batting nets or hoop nets for sports, to nets used for commercial purposes. Styles are also widely varied; mesh nets woven on net looms, other types knitted on net-knitting machines; some are hand knotted. Manufacturers may sell "net systems" which include traps, hooks, hinges, lines and other fishing paraphernalia, to the marine industry. Those companies usually sell several styles of nets, some of which are made from ready-made netting they purchase elsewhere and sew bindings and hardware onto them. Hand-knotted netting is often used to catch salmon or herring. Lengths of rope are unwound with winches and winders, and stretched across a waist-high loom that usually extends the length of the factory and includes overhead bars from which rope hangs. Workers stand at the loom and knot the lengths of rope to form nets. Hand knotting is considered an art and takes some time and skill to learn. There are different ways of finishing the nets. Some are pulled and stretched with winches through a heating-drying system (these can be up to 100 feet or so in length). The top of the unit is lowered over the stretched net and steam heat is applied. The stretching tightens the knots, which strengthens them; drying shrinks and cures the net, also adding strength. Another method is to soak nets in vats of hot water to which dyes may be added. Nets

may also be dipped in latex coatings and dried in dryer-ovens.

This classification excludes establishments engaged in the manufacture of cordage, rope, or twine which are to be reported separately in classification 3708-19.

3708-27 Spinning or weaving, N.O.C. Plush, velvet, felt: Manufacturing

Applies to establishments engaged in spinning or weaving operations to manufacture woven or nonwoven fabric and which are not covered by another classification (N.O.C.). Raw materials include natural or synthetic filaments (also called thread) such as, but not limited to, cotton, wool, rayon, acetate, or spun fiberglass. Some manufacturers spin their own yarn prior to weaving it into cloth; others purchase the yarn from outside sources. To make woven cloth, creels hold spools (or beams) of yarn; the yarn feeds into the weaving machinery and is woven into cloth. The resultant cloth may be washed, dried, bleached, dyed or otherwise finished by the same manufacturer, or sent elsewhere for finishing. The dyeing, bleaching, or coating of fabric is included within the scope of this classification when performed by employees of an employer engaged in the manufacture of fabric. Nonwoven fabric (also called spunbonded) is lightweight and can be either absorbent or repellent. Uses for this type fabric include, but are not limited to, inner-lining of diapers, surgical/medical masks, handwipes, mattress pads, pillow coverings. Process for making spunbonded fabric starts with the extrusion of polyethylene pellets into taffy-like substance which is eventually spun into continuous threads with the use of suction, electricity, cold air, and blowing. Once the substance is formed into threads, the threads move through the machinery at high speeds where air guns or nozzles suction several threads into one "visual strand." These transparent strands move along and are blown onto a fast-moving wire conveyor of a sheet-making machine where they are criss-crossed to form a nonwoven mass; the mass passes through the machine's large rollers as heat is applied to it. The heat and the pressure of the rollers bonds the webbed mass into the nonwoven fabric. The fabric passes through more rollers and winders, is wound onto paper cores, cut, and packaged for shipment. This classification includes the manufacture of plush, velvet or felt. Plush and velvet manufacturing contemplates similar operations and machinery as those for other woven fabrics. With velvet, the pile is almost always silk while the pile for plush may be of silk, wool, or mohair. Backings for both may be one or more of silk, artificial silk, wool, or cotton. After leaving the looms, the material goes through coloring, embossing, printing, brushing, shearing and inspecting processes. Felt is a mat-like material which is made by pressing raw materials, such as raw wool, cotton, nylon, textile scraps, into desired dimensions. The materials are first mixed in required proportions and, after picking and dusting, passed through breakers, carders, then laid in layers to form the felt. The felt is pressed and hardened by a hardening machine and, after fulling, is washed, dyed, then dried. (Fulling increases the weight and bulk by shrinking, beating, or pressing.) Once dry, the felt is pressed and trimmed in shearing machines and folded or rolled for shipping.

3708-29 Mattress or box springs: Manufacturing

Applies to establishments engaged in the manufacture of stuffed mattresses, spring mattresses, or box springs. The manufacture of batting, wadding, waste is included in this classification when performed by employees of employers engaged in manufacturing mattresses. Materials include, but are not limited to, wool or cotton stuffing materials, foam for padding, decorative fabric for mattress covers, upholsterer's tape and sewing notions, glue, wire coils or springs, wire grid racks, and wood frames. Machinery includes, but is not limited to, hand tools, staple guns, glue spray guns, nail guns, band saws, sewing machines, eyelet punches, quilting machines, and tape edgers. *Mattresses:* Mattress pieces are cut to desired size, edging sewn on, eyelets and cord handles attached to the side pieces. Quilting of the covering fabric is done on large quilting machines. To assemble mattresses, batting and foam padding, or other cushioning material, is laid out over the springs, then glued and stapled onto the springs, then ticking (covering) placed on both sides. Borders are sewn to the top and bottom pieces with a hand-held "tape edger" machine. *Box Springs:* Springs, grid racks, wood frames are received from outside sources. Wood frames are laid out on work surfaces, wire grids set on them, then the springs are stapled to the grids and frames at both ends, forming the box. Layers of batting and covering materials are secured in place; then lightweight cloth is stapled to the bottom of the boxed spring, and plastic reinforcement corner pieces tacked on.

This classification excludes establishments engaged in the manufacture of wire springs which are to be reported separately in classification 3402 and establishments engaged in the manufacture of batting, wadding, or waste which are to be reported separately in classification 3708-34.

3708-32 Carpet or rug: Manufacturing

Applies to establishments engaged in tufting carpets from textile fiber, or weaving carpets and rugs from textile yarn on weaving machinery. Tufted products are sold as wall-to-wall carpets, area rugs, art squares, bath mats or scatter rugs. Woven products are sold as aircraft or automobile floor coverings, mats or matting. Materials include, but are not limited to, pile yarn, jute backing, liquid latex, binding, and sewing notions. Machinery and equipment includes, but is not limited to, tufting machines, looms, vats, electric infrared dryers, electric cutting knives, and sewing machines. For tufted carpets or rugs, pile yarn is sewn to a prewoven jute backing by a high speed machine using hundreds of needles. Rollers move the carpet over vats of rubberized liquid latex while the liquid is applied to the backing to secure the tufting. The carpet then passes through a dryer to dry the latex. Bindings are sewn on with a sewing machine.

This classification excludes establishments engaged in making hand carved or inlaid carpets or rugs from premanufactured carpeting which are to be reported separately in classification 3802.

3708-34 Batting, wadding or waste: Manufacturing; Wool combing or scouring

Applies to establishments engaged in the manufacture of batting, wadding or waste which is sold to distributors or other manufacturers for use in their products. The terms batting and wadding are interchangeable and refer to cotton or

wool fibers wadded together to form a soft layer used for padding or stuffing. Batting/wadding is used to stuff mattresses, automobile tops, bed pillows and comforters, sleeping bags, futons, crating pads, stuffed animals, and similar items, or to upholster furniture. Raw materials such as raw or waste cotton, wool, and synthetic fibers are received from others and treated by processes that include shredding, willowing, picking, dusting, carding, blending, rolling, drying and curing. These processes require the use of considerable manufacturing machinery which includes, but is not limited to, choppers, shredders, blowers, conveyor systems, rollers, ovens, winders, and cutters. The terms willowing, picking, and dusting refer to opening and cleaning unprocessed wool or cotton; carding or combing untangles and separates fibers. Fibers are fed into garnetting machines where they are picked, pressure-blown and blended, then blown out onto a long, flat, surface that rotates as the fibers build up to a specified thickness. Once the desired thickness is reached, the mass moves through the machine's rollers, winders, and conveyors; it may be treated lightly with resins or linseed oil. The conveyors move the continuous rolled mass through enclosed ovens where it is cured and dried. The roll of batting may pass through a quilting machine to be bound together in a web structure of strong thread. Finally, it is wound onto cores, cut and prepared for shipping. Shoddy or waste manufacturing is the processing of rags or textile mill waste until the materials are reduced to fibers. Processes may include, but not be limited to, sorting, classifying, carbonizing (exposing rags to hydrochloric acid fumes), baking, dusting, washing, drying, batching, picking, garnetting, and baling. Wool separating operations may include soaking rags in diluted sulfuric acid or carbonizing to remove cotton and other foreign matter. The rags are then dried and processed to remove dust, washed in alkali to neutralize the remaining acid, then dried. This classification also applies to establishments engaged in wool combing or scouring operations. Wool is processed in dusters which remove dirt. The wool then passes to scouring tanks. Several washers may be combined in a unit, the wool passing from one to the other by automatic conveyors. The last tank of clear water rinses the wool and it is then dried. Sometimes it is picked and carded again prior to being dried, then bagged or baled for sale. This classification also includes the treating and twisting of animal hair for upholsterers' use.

3708-39 Textile goods: Manufacturing N.O.C.

Applies to establishments engaged in the manufacture of a wide variety of textile goods not covered by another classification (N.O.C.), and those which incorporate textiles with other types of raw materials. In addition to those described below, raw materials include, but are not limited to, metal or plastic rods and edging strips, glue, epoxy, cork, adhesive tape, nuts, bolts and other small hardware. In addition to that described below, machinery includes, but is not limited to, die cutters, rotary press cutters, band saws, hot wire cutters, reciprocating blade cutters, slitters, balers, thermoweld presses, laminators, rivetors, punch presses, shredding machinery such as hammer mills, and hand tools such as glue sprayers, staple guns, and rivet guns. Sewing machines are often used in the manufacture of products contemplated in this classification; however, sewing is an auxiliary function performed in addition to other fabrication processes. Prod-

ucts contemplated in this classification include, but are not limited to:

Abrasive cloth made by running the backing material (cloth, paper, or combinations of these) through a making machine which is usually a grouping of three units. The printer unit imprints the backside of the backing material with a trademark or grade number; in the next unit an adhesive bond is applied in varying concentrations and quantities; a grain dispenser applies grains or minerals such as flint, emery, crocus, garnet, aluminum oxide or silicone carbide, either by a mechanical or an electrostatic method.

Absorbent booms or sheets designed to lift oil from water, made by shredding paper with an absorbent finish, then blowing it into a sock of netting or a sheet sewn from nonwoven fabric.

Bug screens for automobiles made by cutting wire screen mesh to size with either scissors or a small shearer, sewing vinyl bindings around them.

Conveyor belts made by joining the ends of premanufactured belting made of natural or synthetic rubber to form a continuous belt. Ends may be joined by a mechanical splice or a vulcanized splice. A mechanical splice joins the ends with lacings (metal strips into which wire rods are threaded); a vulcanized splice joins the ends by applying heat under pressure. This type of bonding is also called thermo-welding.

Fishing rod wrappings added to blank poles made by others. Cork handles are glued onto the poles individually in a hand operation. Poles are positioned on a lathe-like device powered by small motor. Next, guides are placed onto the pole and secured by winding thread around the pole as the lathe slowly turns it. Epoxy is brushed on by hand, or the pole is dipped in epoxy, then placed on a revolving wheel or hung to air dry. If the company that makes the poles also applies the wrappings (finishings), the entire operation is to be reported separately in the classification applicable to the manufacture of the poles.

Hard side luggage or carrying cases for items such as, but not limited to, video cameras, computers, telescopes, made by cutting plywood or premanufactured plastic sheets to pattern, lining the inside and outside of the pattern pieces with materials such as embossed paper or imitation leather, forming the case by riveting metal or plastic edging and corner pieces onto the pattern pieces, and attaching hardware such as handles, hinges, and locks. Polyester foam padding is glued to the inside of the specialized carrying cases to protect the contents.

Hot tub covers made by cutting styrofoam to pattern, joining the two pieces with metal hinges and enclosing the unit in a vinyl covering.

Insulating products made by cutting materials such as premanufactured fiberglass cloth to specified shapes, then stapling together, or by laminating vinyl or other covering fabrics to premanufactured fiberglass cloth.

Office divider panels made by cutting premanufactured materials similar to polyfoam, laminating fabric onto foam, and attaching light weight metal or wood edging pieces.

Rigging for boats such as rope ladders made from heavy-duty rope, slings made by sewing bindings onto premanufactured netting.

This classification also includes the *cutting and laminating* of styrofoam, polyethylene foam and other flexible "foam

rubber" materials to make products such as, but not limited to, mattress pads, cushions, contour pillows, automobile seats, packaging materials, padding and pads for sports equipment. Other products *could be* contemplated in this classification as long as the materials, machinery and processes used in the manufacture of those products are similar to those of employers subject to this classification.

This classification excludes establishments engaged in the manufacture of miscellaneous textile soft goods which are to be reported separately in classification 3802 and establishments engaged in the molding and mixing of rubber, plastic or graphite goods, which are to be reported separately in the classification applicable to the work being performed.

3708-40 Bag or sack-industrial size, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of industrial size bags or sacks which are not covered by another classification (N.O.C.). These types of bags are used for packaging items in bulk, such as, but not limited to, flour, sugar, salt, meat products, fruits and vegetables, fertilizer, building materials, or coal. Raw materials include ink, strong thread, rope drawstrings, and fabric such as, but not limited to, cotton, nylon, woven polypropylene, burlap, or gunny which is generally received in bales. Baled fabric is opened on baler machinery, sewn into continuous lengths, then wound onto cores on a roll-up machine. The fabric is fed through a winder which pulls it straight, then may be run through print presses where logos, brand names, or designs are applied. The lengths are stacked on long cutting tables and cut with hand or power cutters to desired bag size. The sides and bottoms are sewn together inside out, then hem the open end. The bags are turned right side out on turning machines and drawstrings may be inserted in the hemmed edge. Finished bags are bundled into bales with strapping machines and prepared for shipping.

This classification excludes establishments engaged in the manufacture of small bags, packs, picnic bags or others generally carried on the person, which are to be reported separately in classification 3802; establishments engaged in the manufacture of plastic bags which are to be reported separately in classification 3510; and establishments engaged in the manufacture of paper bags which are to be reported separately in classification 6908.

WAC 296-17A-3802 Classification 3802.

3802-13 Handbag or pack: Manufacturing

Applies to establishments engaged in the manufacture of a variety of bags on a mass production or quantity basis. Types of bags include, but are not limited to, handbags, backpacks, fanny packs, picnic bags, softside luggage, and other

bags normally carried on the person, and such items as literature or document pockets used in airplanes or automobiles. The screen printing or embroidering of the manufacturers' own products is included in this classification when performed by employees of an employer having operations subject to this classification. Materials include, but are not limited to, natural or synthetic fabric, leather, webbing or strapping for handles, buttons, hooks, buckles, Velcro, and other sewing notions purchased from outside sources. Operations include cutting to size or pattern, hand or machine sewing, finishing, labeling, pressing. Tools and equipment include hand or power cutting tools, clicker die cutters, sewing machines that perform a variety of functions, eyelet punchers, and household irons.

This classification excludes establishments engaged in the manufacture of industrial bags from natural or synthetic cloth used to package commodities such as bulk flour, sugar, produce, fertilizer, building materials, which are to be reported separately in classification 3708; establishments engaged in the manufacture of paper bags which are to be reported separately in classification 6908; establishments engaged in the manufacture of plastic bags which are to be reported separately in classification 3510; and establishments engaged in the manufacture of hard sided luggage or carrying cases which are to be reported separately in classification 3708.

3802-28 Millinery: Manufacturing; Artificial feather or flower, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of hats made of felt, wool, or other textiles, fur, or leather received from outside sources. Other materials received from outside sources include woven hat bodies, braided straw, sweatbands, linings, rims or brims, ribbons, artificial flowers, feathers, or other trimmings. For fabric hats, fabric is cut to standard hat sizes, sewn, steamed on molds or blocked in hydraulic presses, and trimmings attached. For straw hats, straw stripping is roughly sewn into crowns and brims and stitched to the woven straw body. Finishing operations involve sizing, hand blocking, iron and machine blocking in hydraulic presses, then hand sewing bands and trimming onto them. For felt hats, bodies are steamed, sized, shaped, ironed or press blocked under hydraulic presses; trims are usually sewn on by hand. This classification also applies to establishments engaged in the manufacture of artificial feathers or flowers whose operations are not covered by another classification. Crepe paper, fabric, covered paper stakes, glue, and wire are received from outside sources. Paper or fabric is cut, hand rolled and assembled with wire to form the product.

This classification excludes establishments engaged in the manufacture of hats knitted to form on knitting machines which are to be reported separately in classification 3802-42 and establishments engaged in the dressing of fur or the tanning of leather which are to be reported separately in classification 4301.

3802-29 Wig: Manufacturing

Applies to establishments engaged in the manufacture of wigs and hair pieces made from real hair or synthetic hair. Human hair is usually purchased from beauty shops. After being washed in hot disinfectant, hair is dried in ovens. The strands are bleached in peroxide or ammonia, then colored

with dyes to desired shades. Strands are secured to webbed caps with sewing machines or woven into the cap and cemented by hand. The final steps include clipping, curling, and styling. Materials include human hair, synthetic hair, disinfectants, adhesives and webbing fabrics. Tools and equipment include, but are not limited to, scissors, combs, brushes, curling irons, washing, bleaching and dyeing vats, drying ovens, and sewing machines.

3802-34 Screen printing of cloth or garments

Applies to establishments that provide screen printing services to others on cloth items such as, but not limited to, shirts, jackets, caps, and aprons. Most screen printing establishments display a limited quantity of garments as samples from which customers can order to outfit a team, club, or other group. The screen print shop may order the garments from their suppliers, perform the screen printing, and sell the garments to their customers, or the customers may provide their own garments. However, the principal business operation is the *service of screen printing*. Screen printing of individual garments may be done by hand or with a machine. Screen printing businesses will create designs in their art department, or customers can furnish their own design. The process begins with the transfer of a design onto a framed silk screen. A light-sensitive material is coated over the silk screen, then exposed to light. The screens are placed on a multiport machine with a number of press boards onto which garments, such as shirts, jackets, hats, aprons are loaded at one time. One color of ink is squeezed over the screen and as the machine revolves, the color for that portion of the design is applied to each garment. When the first color of the design is applied, garments move on a conveyor through a dryer oven to set the ink. This process is repeated with other colors until the complete design is reproduced on each garment. Screens are washed and cleaned so they can be reused. To screen print designs on lengths of cloth, the process is similar, but machinery for this type of application resembles commercial printing presses used in print shops. Materials include art supplies, colored ink, paint thinners, cleaning solvents. Tools and equipment include, but are not limited to, ink dispensers and squeegees, hand cutting tools, frames and screens, manual and automatic presses, dryer ovens with conveyors, drying racks, pressure spray washer units or sinks, and work tables.

Special notes: The screen printing of a manufacturer's product, when done as part of the manufacturing process by employees of the manufacturer, is included in the classification applicable to the product being produced.

Establishments in classification 6305 that are primarily engaged in the retail sale of clothing such as tee shirts, athletic sweat suits, or hats, may custom screen print or apply iron-on transfers on individual garments sold. Individualized printing or application of transfers is an incidental part of the sales operation and is included in the store classification.

Wholesale distributors of clothing or cloth goods who perform *incidental* screen printing on a small portion of their own product are to be reported separately in classification 6407. Care must be taken when considering classification 6407 to ensure that the nature of the business is the wholesale operation, not a screen print service, and that screen printing is only incidental to the sales operation.

3802-37 Hand carved or inlaid rug: Manufacturing

Applies to establishments engaged in the manufacture of custom-designed inlaid or hand carved rugs or carpets from carpeting purchased from outside sources. These are usually small businesses whose primary customers are interior designers or architects who want one-of-a-kind rugs to complement the design of a room. The designer pieces can be installed as wall-to-wall carpets or used as area rugs or wall hangings. Materials include, but are not limited to, pattern paper, netting, monk cloth, binding or fusing tape, fringed edging, carpet rolls, latex glue, and thread. Tools and equipment include small cutting tools such as hot knives, tracing wheels, rulers, glue guns, air spray guns, seamers for attaching the metallic tape, carpet carvers, and sewing machines. Carpet carvers resemble a household canister vacuum cleaner. A suction hose joins the carving blades to the canister so the fibers are vacuumed as they are cut.

Inlaid: First, a design is drawn onto pattern paper, then traced onto a piece of carpet with a tracing wheel. Powder rubbed across the paper goes through the perforations to form the design on the carpet. This step is repeated for each different colored piece in the design. The complete design is also cut out of the main carpet piece. The pattern pieces are cut out with a hot knife and placed into the main carpet backing piece which will become the finished rug. The pieces are glued to the backing with fusing tape or joined with metallic seaming tape. (Carpet designers refer to this as quilting.) Hand carving (clipping around the edges of the design with the carpet carver) adds dimension. Netting is attached with latex to the back side of the design to secure it. Monk cloth or similar fabric is applied as a backing.

Hand Carved: The pattern is transferred directly onto the main carpet piece and carved along the edges of the design to give it dimension.

This classification excludes establishments engaged in the manufacture of carpets or rugs by tufting or weaving which are to be reported separately in classification 3708 and establishments engaged in the installation of carpets which are to be reported separately in classification 0502.

3802-38 Embroidery services; lace: Manufacturing

Applies to establishments that provide embroidery services to others on cloth items such as, but not limited to, shirts, jackets, caps, aprons, and patches. Most embroidery establishments display a limited quantity of garments as samples from which customers can order to outfit a team, club, or other group. The embroidery shop may order the garments from their suppliers, perform the embroidery, and sell the garments to their customers, or the customers may provide their own garments. Their principal business operation, however, is the embroidery service. Paper templates, computer tapes, natural or synthetic thread, backing materials, fabrics for patches, are received from outside sources. Designs or logos are punched onto paper strips. The strips are fed through the embroidery machines which simultaneously stitch the design onto numerous garments or cloth items which have been positioned on the machine. In computerized machines, the design is programmed onto paper computer tapes which are placed in the embroidery machine instead of the paper strips. The rest of the operations are the same. To make patches, the design is embroidered numerous times on

a length of fabric. Individual patches are cut out and the edges finished on a serger sewing machine. This classification also applies to establishments engaged in the manufacture of lace. Natural or synthetic threads are received in skeins from outside sources. The thread is wound upon spools and bobbins which are placed onto the shuttles of the looms. The designs in the lace are created by various harness and shuttle movements of the loom, controlled electronically or by perforated pattern cards. After removal from the loom, the lace is inspected, mended by hand or sewing machine if needed, washed, bleached, dried, trimmed, starched, and ironed.

Special notes: The embroidery of a manufacturer's own product, when done as part of the manufacturing process by employees of the manufacturer, is to be included in the classification applicable to the garment or product being made.

Establishments in classification 6305 who are primarily engaged in the retail sale of clothing such as tee shirts, athletic sweat suits, hats, may embroider designs or lettering on individual garments sold. Individualized embroidery is an incidental part of the sales operation and is included in the store classification.

Wholesale distributors of clothing or cloth goods who perform *incidental* embroidery on a small portion of their own product are to be reported separately in classification 6407. Care must be taken when considering classification 6407 to ensure that the nature of the business is the wholesale operation, not an embroidery service, and that embroidery is only incidental to the sales operation.

3802-39 Household furnishings: Manufacturing

Applies to establishments engaged in the manufacture of household furnishings such as, but not limited to, draperies, pillows and cushions, futons, sleeping bags or comforters. Businesses that make draperies may make other window treatments such as swags, valances, cornice boards, pull-down roller shades (window blinds) and other accessory items such as, but not limited to, throw pillows, and slip covers. If the window coverings are custom made, the shop usually includes a showroom displaying samples of drapery fabric, drapery rods, window coverings, accessories, floor coverings, wall paper or other household furnishings. These accessory items are not usually stocked, but are obtained from suppliers or manufacturers as customers order them. The sale of these items by establishments engaged in the manufacture of household furnishings is included in this classification. A separate store classification is not applicable in these situations. Draperies and curtains are cut to size, pleated, sewn, and finished by steaming or ironing. Vinyl pull-down shades or blinds are cut to size; one end is stapled to a wooden roller, then the shade is wound around the roller. The other end is creased and stitched to form a hem into which a wood slat is placed to give the blind a solid edge. Pulls, tassels, fringes, or other trims are attached. Sleeping bags, comforters, futons, and pillows are cut, sewn, and stuffed with padding materials purchased elsewhere. This classification also includes the manufacture of lamp shades. Plain or pleated fabric or laminated parchment and metal frames are purchased from outside sources. Material is cut to pattern, then attached to frames by gluing or sewing bindings around the frame and fabric. Materials include, but are not

limited to, various fabrics, vinyl-coated cloth, transparent vinyl, parchment, linings, stuffings, trims, drapery hooks, rods, wooden rollers and slats, pulls or handles, hinges, wire frames for lamp shades, and sewing notions which are purchased from outside sources. Tools and machinery include scissors or other hand or power cutting tools, irons, sewing machines that perform a variety of functions such as straight stitching, hemming, serging, pleating, or tacking, drapery-folding devices, lighted surface to inspect cloth for flaws prior to cutting draperies, work tables for cutting or with a padded surface for ironing, pressing machines or irons. Drapery manufacturers may have a jig saw, saber saw or miter saw for the incidental cutting of cornice boards which is included in this classification.

This classification excludes establishments engaged in the manufacture of batting, wadding, or waste which are to be reported separately in classification 3708 and establishments engaged in the installation of draperies which are to be reported separately in classification 0607.

3802-40 Garments, slippers, accessories, miscellaneous soft goods, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of garments, wet suits, accessories, slippers, and miscellaneous soft goods not covered by another classification (N.O.C.), including, but not limited to, tie downs or animal restraints made from fabric strapping, art and craft or novelty items, stuffed toys, award ribbons, medical supports, umbrellas, and parachutes on a mass production or quantity basis. The production involves cutting to size or pattern, sewing, gluing, fabric welding, inserting stuffing materials, labeling, pressing, inspecting and packaging. Screen printing or embroidering of the manufacturer's own products, and finishing processes such as dyeing or bleaching is included in this classification when performed by employees of an employer having operations subject to this classification. Manufacture of these items often includes primarily hand work or hand work incidental to machine operations. Items are produced from all types of natural or synthetic cloth or fibers; some of the trims or patches may be leather or other pliable materials. Materials include, but are not limited to, natural fabrics, synthetic fabrics such as neoprene, fur, leather, strapping or webbing, yarn, sewing notions, glue, decorative trims, ribbons or patches, imitation eyes for toys, stuffing materials, buttons, buckles, hooks, or handles which are purchased from outside sources. Tools include household irons, scissors or cutting wheels, measuring tapes, tracing wheels, brushes, power cutting tools (some types have hot blades or wires to seal frayed edges of cut pieces), glue guns, staplers, and clamps. Machinery includes, but is not limited to, cutting tables, sewing machines that perform a variety of functions such as straight or zigzag stitching, pleating, tacking or serging, clicker die cutters, iron presses, packaging equipment and various table-top or foot operated devices such as eyelet punchers, button covering machines, and hot-stamping foil presses.

This classification excludes establishments engaged in the manufacture of batting, wadding, or waste which are to be reported separately in classification 3708; establishments engaged in manufacturing operations using large factory machinery that performs functions such as, but not limited to, winding/rewinding, blowing, spinning, twisting, braiding,

weaving, picking, tufting, quilting, shredding, or grinding, which are to be reported separately in classification 3708; and establishments engaged in the tanning of leather or dressing of fur which are to be reported separately in classification 4301.

3802-41 Gloves, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of gloves not covered by another classification (N.O.C.) made of fabric or leather on a mass production or quantity basis. Fabric, leather, and sewing notions are purchased from outside sources. Manufacturers may quilt lining materials to the glove fabric on quilting machines. Glove pieces are cut from numerous layers of fabric or leather with a die cutter; printing of a logo or brand name may be applied to pieces prior to stitching. Seamstresses sew the pieces together inside out, adding cuffs or trims. After stitching, each finger is individually turned right-side out on a turner which is a table-mounted device with a vertically moving rod. Gloves are then placed onto heated, hand-shaped molds for steaming and shaping.

This classification excludes establishments engaged in the manufacture of gloves knitted to form on knitting machines which are to be reported separately in classification 3802-42; establishments engaged in the manufacture of rubber gloves made by molding or mixing rubber which are to be reported separately in classification 3513; and establishments engaged in the tanning of leather which are to be reported separately in classification 4301.

3802-42 Knitted fabric or garments or hosiery: Manufacturing

Applies to establishments engaged in the fabrication of knitted cloth, the subsequent manufacture of garments from the knitted cloth, and the manufacture of gloves, mittens, and hats knitted to form on knitting machines on a mass production or quantity basis. Natural or synthetic yarn (also referred to as thread), buttons or other fasteners are received from outside sources. The knit cloth is produced on looms either mechanically or electronically controlled. Circular or flat knitting machines (some of which resemble sewing machines) are also used. The manufacturer of the knitted cloth may make wearing apparel from it, or may sell the knitted cloth to other manufacturers. Garments, such as sweaters, may be knitted to form, or pieces may be cut from the cloth and sewn together. Gloves or mittens are knitted to basic shapes on special machines. Tips of fingers are sewn closed, the glove is turned right side out, then shaped and steamed on electrically heated forms. This classification also applies to the manufacture of hosiery on a mass production or quantity basis. Skeins of natural or synthetic yarn, generally dyed, are received from outside sources. The yarn is unwound onto bobbins or cones, then placed in small circular automatic knitting machines which form the leg and heel. The leg/heel pieces are sewn into a continuous piece, then toes and tops added with looper machines. Hosiery is then washed, dried, shaped. This classification also applies to establishments that perform finishing operations on hosiery that is manufactured by others.

Special note: The looms and knitting machines used to make knitted cloth are generally smaller than the weaving and spinning machines used for the manufacture of woven

textile fabrics which are formed into long, continuous lengths and sold in large bolts to cloth goods manufacturers.

3802-43 Leather goods, N.O.C.: Manufacture or repair

Applies to establishments engaged in the manufacture or repair of leather goods not covered by another classification (N.O.C.) including, but not limited to, belts, tack, holsters and other gun carrying accessories, knife sheaths, sports balls, or belts. Products manufactured in this classification can usually be worn or carried on the person and are often made individually. Tanned leather or imitation leather, glue, buckles, hooks, snaps and other fasteners, are purchased from outside sources. Leather may be skived (split) to desired thickness. Items are cut out on small die cutters or by hand, and the edges sanded and smoothed. Depending on the item being made, the leather is bent into shape, glued or sewn either by machine or hand. Imitation leather or vinyl products are sometimes joined by heat sealing instead of gluing or sewing. Items may be dyed, which involves dipping in vats of dye for about 15 or 20 minutes, hanging until dry, then rubbing with rags. Guns are placed inside custom-made holsters and laid in a forming press to form the leather around the gun for a precise fit. Next, items are placed in dryers to dry and cure; then snaps, grommets or other finishing pieces are attached with hand tools. Tools and equipment include cutting blades, edge beveling tools, mallets, snap setters, and other hand tools, die cutters, sanders, sewing machines, forming presses, and small dryers. This classification also applies to establishments engaged in the manufacture and repair of sports balls such as footballs, soccer balls, and basketballs. Leather or vinyl, lining material, bladders (deflated balloon shapes made of synthetic rubber material with valves inserted), twine, thread, foil ribbon, paint, spray cleaners are received from outside sources. Pieces are cut from leather or vinyl on die cutters, sewn together inside out forming a shell, then eyelets are inserted with eyelet punches. Logos or names may be stamped on with a hot foil stamping machine. The seams are pounded out with mallets to smooth them, then the shell is turned right side out on table-mounted turners. The shells are placed onto table-mounted, ball-shaped molds, the bladders inserted, and air blown into the bladders with air compressors, forming the balls. The balls are placed onto holders, laced and closed with twine. Further designs may be applied with paint; balls are cleaned with a spray cleaner before packaging.

This classification excludes the tanning of leather which is to be reported separately in classification 4301 and the manufacture of bladders by rubber mixing or molding which is to be reported separately in classification 3513.

3802-44 Shoe or boot: Manufacturing or repair

Applies to establishments engaged in the manufacture of boots or shoes from raw materials such as leather, imitation leather, lining materials, rubber heels and soles, padding, thread and string, eyelets, tacks, buckles, rubber cement, dyes, waxes and polishes purchased from outside sources. Shoe or boot manufacturers may purchase shoe parts already cut to pattern, or may cut out their own patterns either by hand or on small dies. There are only a few shoemakers in Washington, most of whom make custom, hand-crafted boots or shoes. Operations include measuring feet to make molds or patterns, sewing by hand or machine, gluing, attaching

eyelets or studs, tacking the upper pieces to the soles and heels, smoothing edges with grinders, dyeing, waxing, buffing, brushing and cleaning. Tools and equipment include tack hammers, awls, lasts (foot forms), hand cutting and punching tools, sewing machines, shoe jacks, foot-operated eyelet punching presses, sole stitchers (to stitch soles onto upper pieces), belt sanders and brush finishers. This classification also applies to shoe repair shops which use the same type of materials, tools and equipment used to make shoes and boots. Most shoe repair shops sell shoe accessories such as laces, insoles, polishes, which are usually displayed at the front of the shop; the sale of those items is included within the scope of this classification. The shops usually employ only one or two persons and are often located in malls or strip malls.

This classification excludes the manufacture of molded rubber shoe parts such as heels, soles, which is to be reported separately in classification 3513; establishments engaged in tanning leather which are to be reported separately in classification 4301; and the manufacture of any other materials used in making shoes or boots which is to be reported separately as applicable.

3802-45 Rubber or pliable goods: Manufacturing by cutting or gluing

Applies to establishments engaged in the manufacture of rubber or pliable goods from premanufactured materials by hand cutting, die cutting, gluing, or heat bonding. Items manufactured in this classification include, but are not limited to, gaskets, seals, bindings for skis, grips for pens or handle bars on bicycles or motorcycles. Raw materials which are lightweight, flexible and generally do not exceed about 3/8" thickness or 1" in diameter, include, but are not limited to, neoprene (a man-made rubber), cork, or other compressed sheets made of materials such as felt, paper, foam, plastic, graphite, Teflon, strips of extruded rubber. Many of the products are made simply by die cutting flat materials into the desired shapes. Other products, such as O-rings, are made by cutting lengths of extruded rubber and joining the ends by gluing or heat-bonding them together to form a circle. Grips for pens or handle bars can be made by cutting rubber tubing to length and grinding the ends for a smooth finish.

This classification excludes establishments engaged in the manufacture of rubber products by molding processes which are to be reported separately in classification 3513.

3802-46 Tent, tarp, awning or shade, boat cover or sail: Manufacturing

Applies to establishments engaged in the manufacture or repair of tents, awnings or outside window shades, boat or automobile tops and covers, sails, fruit picking bags, or similar items made from canvas, duck and synthetic water resistant fabrics. Other materials purchased from outside sources include grommets, hooks, tie rope, netting, binding, trimmings, strapping, pipe or tubing, and metal tops for fruit picking bags. Operations include cutting, sewing or fabric welding which joins pieces by heat-sealing the edges, attaching grommets, and bending pipe or rods for frames. Tools and equipment include hand cutting or punching tools, powered material cutters, sewing machines, grommet punchers, pipe cutters and benders, and staplers.

This classification excludes establishments engaged in the welding of metal awning frames or supports and estab-

lishments engaged in the manufacture of metal awnings which are to be reported separately in the applicable metal goods classification; and the installation of any product manufactured in this classification which is to be reported separately in the classification applicable to the work being performed.

WAC 296-17A-3808 Classification 3808.

3808-00 Upholstery work, N.O.C.

Applies to establishments engaged in upholstery work not covered by another classification (N.O.C.). Upholstery work is the custom finishing of furniture and vehicle interiors with stuffing, cushioning, springs, and covering material. Some sewing is usually necessary. Items upholstered include, but are not limited to, chairs, sofas, foot stools, caskets, and seats for aircraft, automobiles, boats or other recreational vehicles (RVs). Upholstery work becomes part of the furniture or vehicle as opposed to removable pillows or cushions which are not permanently attached to the structure. Upholstery shops also perform refurbishing or renovation work which involves removing the old materials, replacing springs, stuffing or cushioning as necessary, and covering with new material. They might replace a vinyl top, trim molding, stripping tape, or door edge guards on a car or boat which is included in this classification when done by employees of an employer subject to this classification. Customers usually bring the furniture or vehicle to the shop for upholstery work. Upholstery shops in this classification may sell some fabric as an incidental part of their operation; however, if any upholstery work is done at the shop, the entire operation is to be reported separately in classification 3808. This classification includes businesses which produce furniture entirely from foam rubber or other cushioning or stuffing, springs, and a covering material.

This classification excludes establishments engaged in the manufacture of mattresses which are to be reported separately in classification 3708; establishments engaged in making "throw pillows or cushions" which are to be reported separately in classification 3802; and establishments engaged in selling upholstery materials (but do no upholstery work) which are to be reported separately in classification 6406.

Special note: Classification 3808-00 may be assigned to physically separated upholstery departments of furniture or casket manufacturers, and automobile, aircraft, or RV manufacturers provided the conditions set forth in the general reporting rule covering the division of worker hours have been met.

WAC 296-17A-3901 Classification 3901.

3901-00 Bakeries - retail

Applies to establishments engaged in the baking of assorted goods such as, but not limited to, breads, cakes, pies, and pastries for retail sales. This classification includes "deli" sections in retail bakeries where bakery products, and items such as soups, salads, sandwiches and beverages, are available for on-premises consumption.

This classification excludes commercial wholesale bakeries that bake products for sale to trade customers such as supermarkets, restaurants, and distributors which are to be reported separately in classification 3906, and specialty bake shops that produce single product lines such as cookies and donuts, which are to be reported separately in classification 3901-01.

3901-01 Bakeries - retail - specialty shops

Applies to establishments engaged in operating specialty bake shops where products are sold to retail customers. A specialty bake shop is an establishment that makes and sells a single product line such as cookies, donuts, pies, or bagels to customers for consumption on or away from the premises. This classification includes related sales of beverages.

This classification excludes commercial wholesale bakeries that bake products for sale to trade customers such as supermarkets, restaurants, and distributors which are to be reported separately in classification 3906, and retail bakeries engaged in the baking of assorted goods such as breads, cakes, pies, and pastries, for retail sales which are to be reported separately in classification 3901-00.

WAC 296-17A-3902 Classification 3902.

3902-00 Fruit and vegetable: Cannery and freezer operations

Applies to establishments engaged in fruit and vegetable canning or freezing operations for wholesale customers. Operations contemplated by this classification include the receipt of fruit and vegetables directly from growers or dealers, preparing produce for canning by removing foreign materials such as leaves or weeds, washing, sterilizing, grading, peeling, slicing, coring, blanching, scalding and pre-cooking, premeasuring, mixing them in a hopper with sugar or other ingredients, and further processing into canned or frozen products. Pea vining, when performed by employees of a cannery, is also included in this classification.

This classification excludes establishments engaged in evaporating, preserving or dehydrating fruits and vegetables which are to be reported separately in classification 3902-01;

establishments engaged in manufacturing fruit juice, cider, jam or jelly which are to be reported separately in classification 3902-02; establishments engaged in packing *fresh* vegetables and fruits which are to be reported separately in classification 2104; and pea vining when done by employees of farm operations or farm labor contractors which is to be reported separately in the applicable farm classification.

3902-01 Fruit and vegetable: Evaporating, preserving or dehydrating

Applies to establishments engaged in evaporating, preserving, or dehydrating fruits and vegetables for wholesale customers. Operations contemplated by this classification include the receipt of fruit and vegetables directly from growers or dealers, washing, peeling, cooking, pressing fruits and vegetables by machine, adding preservatives and congealants, pasteurizing, then dehydrating, drying, or evaporating to remove the moisture which preserves the fruits and vegetables and leaves only the dry, solid portion. Finished products are packaged in cans, plastic bags, or boxes for shipping.

This classification excludes establishments engaged in canning or freezing of fruits and vegetables which are to be reported separately in classification 3902-00; establishments engaged in manufacturing fruit juice, cider, jam or jelly which are to be reported separately in classification 3902-02; establishments engaged in packing fresh vegetables and fruits which are to be reported separately in classification 2104; and farm operations which are to be reported separately in the applicable farm classification.

3902-02 Fruit syrup or juice, cider, jam or jelly: Manufacturing

Applies to establishments engaged in the manufacture of fruit syrup, juice, cider, jam, or jelly. Operations contemplated by this classification include the receipt of fruit directly from growers or dealers, washing, peeling, and cooking the fruit, extracting juice and separating seeds from pulp with fruit presses or separators, adding sugars, congealants and preservatives, pasteurizing, blending juices to produce a variety of flavors, and further processing to produce bottled, canned, or concentrate products.

This classification excludes establishments engaged in canning or freezing of fruits and vegetables which are to be reported separately in classification 3902-00; establishments engaged in evaporating, preserving or dehydrating fruits and vegetables which are to be reported separately in classification 3902-01; and farm operations which are to be reported separately in the applicable farm classification.

3902-11 Chocolate, cocoa, corn products: Manufacturing

Applies to establishments engaged in the manufacture of cocoa or chocolate such as Dutch or sweet chocolate or of corn products such as, but not limited to, tortillas. Operations contemplated by this classification include receipt of corn and cocoa beans from growers or dealers, processing operations, testing, packaging and shipping. Foreign matter is removed from the cocoa beans and they are sorted, divided, cleaned, and roasted in ovens. Shells are cracked, usually by machines, and the beans examined to ensure quality. Depending on the products being manufactured, beans may be pasteurized, ground, further dried, mixed with chocolate liquor, sugar, powdered milk, cocoa butter, or potassium solutions to

make into finished products. Depending on the corn product being made, ingredients are pressed, kneaded, cut, shaped or flattened, and baked or cooked.

This classification excludes establishments engaged in the manufacture of crackers, potato chips, ravioli, tamale, and pasta, or chocolate candy and confections which are to be reported separately in classification 3906, and farm operations which are to be reported separately in the applicable farm classification.

3902-12 Baking powder, dextrine, glucose and starch: Manufacturing

Applies to establishments engaged in the manufacture of baking powder, dextrine, glucose and starch. Operations contemplated by this classification include the receipt of vegetables and grains, such as, but not limited to, potatoes, corn, and wheat from growers or dealers, processing operations, testing, storing finished products in storage tanks, packaging into drums or cans, and shipping. Vegetables or grains are cleaned, sorted, and foreign matter removed. They are dumped onto conveyors and transported to grinding machines where they are ground into a starch paste. Water may be added to make liquid starch or starch milk or dryers may remove excess moisture. Starch blends may be made from raw starch suspensions using chemical solutions. Shakers remove bran, gluten or other particles from the starch suspension. Dextrine is made by further mixing the starch with dextrine paste, adding chemicals, cooking and stirring until the starch is converted to dextrine. Baking powder is made by mixing baking soda, starch, and an acid compound such as cream of tartar.

This classification excludes establishments engaged in the manufacture of food sundries not covered by another classification which are to be reported separately in classification 3902-14 and farm operations which are to be reported separately in the applicable farm classification.

3902-13 Nut shelling, egg breaking, coconut shredding and peanut handling

Applies to establishments engaged in nut shelling, egg breaking, coconut shredding, and peanut handling. Nuts are received from suppliers in bulk and placed into machinery which cracks shells and separates broken shells from the nut meat. Another machine sorts whole nut meats from those that are chipped, broken, or contaminated. At each machine, nuts are examined for rejects, and foreign matter is removed with a vacuum hose or by hand. They may be chopped, sliced, or left whole, then poured from the machines into sacks or containers. The meats of certain nuts, such as almonds, may be ground into meal, then canned for shipment. This classification also includes the grading and polishing of nuts, and shredding of coconuts. Egg breaking machines break eggs and separate the yolk from the white. They are observed for color, quantity, and clarity; inferior yolks or whites are discarded prior to being automatically dropped onto separator trays with individual cups. Eggs may then be mixed with water, pasteurized or dried prior to packaging.

This classification excludes establishments engaged in the manufacture of oils which are to be reported separately in classification 3902-27 and establishments engaged in the

manufacture of food sundries which are to be reported separately in classification 3902-14.

3902-14 Food sundries, N.O.C.: Manufacturing or processing

Applies to establishments engaged in the manufacture of a variety of miscellaneous food products not covered by another classification (N.O.C.). Products include, but are not limited to, imitation crab, spices, peanut butter, condiments, salsa, salad dressings, mayonnaise, soups, tofu, instant potatoes, salads and certain ready-to-eat dishes that are usually sold to wholesale distributors. This classification also applies to the grinding and roasting of coffee beans. Operations contemplated by this classification include the receipt of raw ingredients from growers or dealers, processing operations, testing, quality control, laboratory operations, packaging and shipping. Individual processes, which vary depending on the product being manufactured, include, but are not limited to, cleaning, dividing, grinding, mixing, blending with other ingredients, cooking, cooling, dividing again into desired portions, and packaging. The products are packaged in plastic bags, bottles, or cans, usually by machine. Some products require vacuum sealing, pasteurizing, or freezing.

This classification excludes establishments engaged in the manufacture of crackers, potato chips, ravioli, tamale, pasta, cough drops, confectionery, and chewing gum which are to be reported separately in classification 3906 and farm operations which are to be reported separately in the applicable farm classification.

3902-15 Pickles and sauerkraut: Manufacturing

Applies to establishments engaged in the manufacture of pickles and sauerkraut. Operations contemplated by this classification include the receipt of produce from growers or dealers, processing operations, testing, laboratory operations, packaging and shipping. Produce, such as cucumbers and cabbage, is cleaned, cut, chopped and placed in barrels, vats, or tanks of brine (a mixture of salt, sugar, spices, vinegar) until cured. At the end of curing period, product may be packed into glass jars, plastic bags, or cans. This classification also applies to the pickling of fruits or vegetables such as, but not limited to, tomatoes, peppers, and asparagus.

This classification excludes establishments engaged in canning or freezing of fruits and vegetables which are to be reported separately in classification 3902-00; establishments engaged in evaporating, preserving or dehydrating fruits and vegetables which are to be reported separately in classification 3902-01; establishments engaged in packing fresh vegetables and fruits which are to be reported separately in classification 2104; and farm operations which are to be reported separately in the applicable farm classification.

3902-17 Pet food: Manufacturing

Applies to establishments engaged in the manufacture of frozen or canned pet foods. Operations contemplated by this classification include the receipt of raw ingredients, processing operations, packaging and shipping. After bones and foreign matter are removed, raw ingredients are cleaned and ground. Depending on the product, various ingredients such as, but not limited to, animal meat and fat, fish by-products, cornmeal, soybean meal, ground wheat, rice, poultry, yeast, whey, salt, acids, chemicals, minerals, vitamins, water, or oil

are mixed in large vats either by machine or by hand. Mixture is frozen or baked, dried, and packed into cans.

This classification excludes establishments engaged in the manufacture of dry pet food using a milling process which is to be reported separately in classification 2101 and farm operations which are to be reported separately in the applicable farm classification.

3902-24 Breakfast food: Manufacturing

Applies to establishments engaged in the manufacture of breakfast foods such as cereals or breakfast bars. Operations contemplated by this classification include the receipt of ingredients, processing operations, quality control, laboratory operations, packaging, and shipping. Flour, meal, or milled grains such as, but not limited to, corn, oats, barley, wheat, and nuts are mixed with other ingredients, formed into a dough, rolled out and extruded into flakes or other shapes. Pressure cylinders may be used to expand or puff whole grains. Cereals may be sifted through screens to check for size, color, and uniformity or otherwise tested for quality, then baked or dried in bulk prior to packaging.

This classification excludes establishments engaged in the manufacture of wholesale bakery goods which are to be reported separately in classification 3906; establishments engaged in milling or grinding operations which are to be reported separately in classification 2101; and farm operations which are to be reported separately in the applicable farm classification.

3902-26 Poultry canning and canneries, N.O.C.

Applies to establishments engaged in canning poultry or canning operations not covered by another classification (N.O.C.). Operations contemplated by this classification include the receipt of poultry or other products, processing operations, quality control, laboratory operations, packaging, and shipping. The process includes, but is not limited to, washing, cutting or chopping, and cooking poultry or other foods items. Preservatives or flavorings may be added before product is sealed in cans or jars.

This classification excludes establishments engaged in canning or freezing fruits or vegetables which are to be reported separately in classification 3902-00 and establishments engaged in canning or dehydrating meat products which are to be reported separately in classification 4301.

3902-27 Vegetable oil or butter substitutes: Manufacturing

Applies to establishments engaged in the manufacture of salad or vegetable oils, shortening, margarine or other butter substitutes. Operations contemplated by this classification include the receipt of seeds or beans from growers or through dealers, processing operations, quality control, laboratory operations, packaging and shipping. To make oils, soybeans, cottonseeds, safflower seeds, or shelled corn is cracked, ground, milled, steam cooked, and pressed to extract the oil. Depending on the product being made, other ingredients such as water, milk, powdered milk or salt may be blended with the oil, then heated, filtered, and filled into cans or bottles. To make shortening or butter substitutes, flavoring, catalytic agents, and chemicals are added to harden the oils; some products are kneaded to spread the coloring uniformly; then they are packaged in cans, plastic containers, or wrapped in

plastic or foil. Machinery includes, but is not limited to, grinders, screens, presses, extractors, dryers, and conveyors.

This classification excludes establishments engaged in the manufacture of "real" butter which are to be reported separately in classification 4002 and farm operations which are to be reported separately in the applicable farm classification.

WAC 296-17A-3903 Classification 3903.

3903-08 Sugar refining; molasses and syrup, N.O.C.: Manufacturing

Applies to establishments engaged in processing (milling) sugar cane and sugar beets into various forms of powdered and granulated sugar, and the manufacture of molasses and sugar syrups not covered by another classification (N.O.C.). Operations contemplated by this classification include the receipt of sugar cane or sugar beets directly from growers or dealers, crushing or rolling cane to obtain the juice or washing, slicing, and cooking the beets to obtain the juice, evaporating the juice to produce a crystallized substance, and further processing to produce the final product such as granular sugar, white powdered sugar, and brown sugar. Common by-products of a sugar refining operation are molasses and sugar syrups. In some cases an establishment may produce only the sugar syrup and/or molasses, not the crystallized forms of sugar. This classification applies to all of the above operations as the processes to produce sugar syrup and molasses products are similar to those used to produce crystallized sugar.

This classification excludes establishments engaged in the manufacture of fruit syrup, juice, cider, jam or jelly which are to be reported separately in classification 3902.

WAC 296-17A-3905 Classification 3905.

3905-00 Restaurants, N.O.C.

Applies to establishments engaged in restaurant operations not covered by another classification (N.O.C.). These establishments are "traditional, family or full service" restaurants that provide sit-down services, or cafeteria or buffet style meals. This classification includes the preparation and service of food and beverages. Establishments in this classification may serve beer and wine; however, they are prohibited from selling spirits or hard liquor. Typical occupations include, but are not limited to, hostesses, waiters, waitresses, cooks, busboys, dishwashers, cashiers, and managerial staff. This classification also includes the preparation of "take-out food" that customers pick up directly from the restaurant for

consumption away from the premises and the operation of a card room in conjunction with the restaurant.

This classification excludes establishments engaged in operating restaurants or lounges that sell spirits or hard liquor which are to be reported separately in classification 3905-07, and catering services that are not part of the restaurant operation which are to be reported separately in classification 3909.

Special note: Traditional, family or full service restaurants are establishments where wait persons bring customers a menu, take orders, and deliver prepared meals to the customer's table or where customers choose from a variety of food items from a buffet or cafeteria style service. Such establishments will generally use nondisposable eating utensils and plates to serve food as opposed to throw away paper plates and plastic eating utensils. Includes establishments where orders are placed at the counter, and the food or drink is delivered to your table. Care should be exercised when dealing with establishments that provide entertainment such as musicians, entertainers, disc jockeys or piano players who may be exempt from coverage as an independent contractor. Musicians or entertainers who are considered to be employees of a restaurant are to be reported separately in classification 6605.

3905-01 Food, drink, and candy vendors or concessionaires

Applies to street vendors and businesses engaged in operating food, drink or candy concessions at places such as, but not limited to, ball parks, race tracks, theaters and exhibitions. This classification is applicable only to concession operations which are operated independent from the facility or event at which the concession service is being provided. These independent vendors selling food items are not employees of the facility or site where the event or exhibition is taking place. Vendors subject to this classification sell a variety of food, snack and beverage items from booths, mobile push carts, mobile stands, carrying boxes, or trays.

This classification excludes food and beverage operations (concession stands) operated in connection with an event or facility by employees of the event sponsor or facility operator which are to be reported separately in the classification applicable to the event or exhibition; vendors and route food services, operating in a truck or van moving from place to place throughout the day, which are to be reported separately in classification 1101; vendors of nonfood items which are to be reported separately in the applicable classification; and vending machine service companies that replenish food, snack and beverage products which are to be reported separately in classification 0606.

3905-03 Commissaries and restaurants with construction, erection, logging or mine operations

Applies to commissary or restaurant operations conducted *exclusively* in connection with a construction, erection, logging or mining camp operation. This classification is limited to food preparation services provided at a camp site or at a mess hall used to feed employees of the construction, logging, erection, or mining company. The foods prepared and served are not intended for, or offered to, the general public.

Special note: The purpose of this classification is to provide employees engaged in the food preparation activity with

a classification representative of the work being performed, even though such activities may be occurring at or adjacent to the construction, logging, erection or mining site as provided for in the general reporting rule covering general inclusions.

3905-04 Eating establishments, N.O.C. such as public lunch counters in stores

Applies to establishments not covered by another classification (N.O.C.) engaged in operating lunch counters and restaurants within a retail store location. Use of this classification is limited to employees of an employer who also operates the retail store where the food service is located.

3905-06 Taverns

Applies to establishments engaged in the operation of a tavern. A tavern is primarily engaged in the sale of beer, wine, and alcoholic beverages for on-premises consumption, and may also provide a variety of foods ranging from peanuts and pretzels to hot food dishes. Typical occupations include, but are not limited to, bartenders, waiters, waitresses, cooks, busboys, dishwashers, and managerial staff. Beer may also be sold by the keg with the rental of necessary taps and pumps. This classification includes the operation of a "beer garden" at special events such as, but not limited to, fairs or race meets, and the operation of a card room in connection with the tavern.

Special note: Care should be exercised when dealing with establishments that provide entertainment such as musicians, entertainers, disc jockeys or piano players who may be exempt from coverage as an independent contractor. Musicians or entertainers who are considered to be employees of a tavern are to be reported separately in classification 6605.

3905-07 Restaurants serving spirits or hard liquor

Applies to establishments engaged in the operation of a restaurant having a license to sell spirits or hard liquor, beer and wine in connection with their food preparation and service. This classification includes the preparation and service of food and beverages at sit down restaurants and lounges. Such establishments have extensive cooking facilities and equipment to prepare full meals. Typical occupations covered by this classification include, but are not limited to, bartenders, hostesses, waiters, waitresses, valet parking attendants, cooks, busboys, dishwashers, cashiers, and managerial staff. This classification also includes the preparation of "take-out food" that customers pick up directly from the restaurant for consumption away from the premises and the operation of a card room in connection with the restaurant.

This classification excludes establishments engaged as a restaurant without a license to sell spirits or hard liquor which are to be reported separately in classification 3905-00; taverns which are to be reported separately in classification 3905-06; catering services which are not part of a restaurant operation which are to be reported separately in classification 3909; musicians who are to be reported separately in classification 6605; and entertainers such as dancers who are to be reported separately in classification 6620.

Special note: Care should be exercised when dealing with establishments that provide entertainment such as musicians, entertainers, disc jockeys or piano players who may be exempt from coverage as an independent contractor. Musi-

cians or entertainers who are considered to be employees of a restaurant are to be reported separately in classification 6605.

3905-08 Pizza parlors

Applies to establishments engaged in operating a pizza parlor or restaurant. Establishments subject to this classification specialize in the preparation and sales of pizza (but may also provide other foods) and beverages such as wine, beer, alcoholic beverages, or soft drinks for on-premises consumption. Typical occupations include, but are not limited to, hostesses, waiters, waitresses, cooks, busboys, dishwasher, cashiers, and managerial staff. This classification also includes establishments that deliver pizza to customers, or where customers can pick up already prepared pizza at the shop, but where no customer seating is provided.

This classification excludes U-bake pizza operations which are to be reported separately in classification 6403.

Special note: Care should be exercised when dealing with establishments that provide entertainment such as musicians, entertainers, disc jockeys or piano players who may be exempt from coverage as an independent contractor. Musicians or entertainers who are considered to be employees of a pizza parlor are to be reported separately in classification 6605.

3905-09 Fast food drive-ins, N.O.C.

Applies to establishments engaged in the operation of fast food drive-ins or restaurants. These establishments serve easily prepared foods quickly and nonalcoholic beverages which can be eaten on the premises or picked up by customers at a counter or a drive through window. Fast food establishments offer a variety of menu items such as, but not limited to, hamburgers, french fries, tacos, sandwiches, fried chicken, hot dogs, fish and chips. Such establishments will generally use disposable eating utensils and throw away plates.

This classification excludes street vendors and/or route food services which are to be reported separately in classification 1101 and full service restaurants which are to be reported separately in classification 3905-00.

3905-11 Soft drink lounges

Applies to establishments engaged in operating soft drink lounges. These types of establishments may provide entertainment such as dancing for an adult audience or a place where youths under the age of 21 can dance or listen to music. These lounges do not sell alcoholic beverages. This classification includes the preparation and service of light snacks and hors d'oeuvres, such as chips, peanuts, pretzels or finger sandwiches.

This classification excludes entertainers such as exotic dancers who are to be reported separately in classification 6620 and musicians who are to be reported separately in classification 6605.

Special note: Care should be exercised when dealing with establishments that provide entertainment such as musicians, entertainers, disc jockeys or piano players who may be exempt from coverage as an independent contractor. Musicians or entertainers who are considered to be employees of a lounge are to be reported separately in classification 6605 or 6620 as applicable.

3905-12 Ice cream parlors

Applies to establishments engaged in the operation of an ice cream parlor or frozen yogurt shop. These specialty shops offer a limited menu, usually confined to ice cream and frozen yogurt offered in individual servings, various size containers, and specialty items. Special occasion ice cream cakes may be ordered and picked up at a later date by the customer. These establishments usually provide customer seating.

This classification excludes vendors and/or route food services, operating in a truck or van moving from place to place throughout the day, which are to be reported separately in classification 1101, and vendors selling ice cream from a booth, push cart, mobile stand or tray which are to be reported separately in classification 3905-01.

3905-13 Candy, nut, and popcorn retail stores with on-premises manufacturing

Applies to establishments engaged in operating candy, nut or popcorn stores where some or all the products sold are manufactured on the premises. Establishments in this classification may sell a variety of candies, nuts, or popcorn, or may specialize in one or two products. They may also sell their products in gift wrapped packages.

This classification excludes establishments engaged in selling candy, nuts, or popcorn, *that do not manufacture* any product on the premises, which are to be reported separately in classification 6406, and establishments primarily engaged in the wholesale manufacturing of candy which is to be reported separately in classification 3906.

3905-14 Espresso/coffee stands and carts

Applies to vendors operating espresso or coffee stands or carts. Products sold include, but are not limited to, coffee, espresso, lattes, Italian sodas, soft drinks, pastries and pre-packaged items. These types of vendors *do not prepare food*. This classification is distinguishable from retail coffee, tea or spice stores in that coffee stands or carts in classification 3905 sell only ready-to-serve products; they do not sell packaged coffee, tea or spice items.

This classification excludes street vendors and/or route food services which are to be reported separately in classification 1101.

WAC 296-17A-3906 Classification 3906.**3906-00 Bakeries, N.O.C.**

Applies to establishments engaged in the manufacture of baked goods not covered by another classification (N.O.C.) such as, but not limited to, bread, rolls, tarts, pies, cakes,

cookies, bread stuffing and bread crumbs, for sale to supermarkets, restaurants, distributors, and other wholesale customers. Processes for making baked goods vary somewhat, but most are similar to that of baking bread. To make bread, ingredients such as, but not limited to, flour, water, salt, leavening, eggs, milk, sugar, shortening, and preservatives are mixed by machine or by hand and formed into dough. The dough is fed into a hopper which further kneads it and shapes it into a ball. Molders shape the dough balls into cylinders that are ready to be placed in pans. Automatic loaders move the pans through tunnel ovens. After baking, products are mechanically sliced and wrapped, then shipped to customers as quickly as possible due to the relatively short shelf life of baked goods. Machinery includes, but is not limited to, dough troughs, cake depositors, filler and icing machines, conveyors, deep fryers, bun machines, molders, ovens, mixers, flour dust collectors, and racks.

This classification excludes retail bakeries which are to be reported separately in classification 3901; route delivery drivers who are not employees of the bakery who are to be reported separately in classification 1101; and establishments engaged in the manufacture of other foods which are to be reported separately as applicable.

3906-01 Cracker: Manufacturing N.O.C.

Applies to establishments engaged in the manufacture of crackers, and other "dry" bakery products not covered by another classification (N.O.C.) such as, but not limited to, biscuits, wafers, and pretzels for sale to supermarkets, restaurants, distributors and other wholesale customers. Depending on the specific product being made, ingredients such as, but not limited to, flour, sugar, water, salt, soda, yeast, flavorings, and additives are mixed together and formed into dough. The dough is fed through a hopper into a roller, then shaped into product and baked in ovens. Machinery includes, but is not limited to, mixers, ovens, conveyors, packaging and package-handling equipment.

This classification excludes retail bakeries which are to be reported separately in classification 3901 and route delivery drivers who are not employees of the dry bakery goods manufacturer who are to be reported separately in classification 1101.

3906-02 Potato chip: Manufacturing N.O.C.

Applies to establishments engaged in the manufacture of potato chips and similar snack foods not covered by another classification (N.O.C.) such as, but not limited to, fried corn or cheese chips for sale to wholesale customers. To make potato chips, potatoes are washed, sliced, salted, and fried in cooking vats. Automatic rakes stir the potato slices to ensure uniform cooking. As chips emerge from the vats onto conveyors, they are inspected for color and quality. Burned, discolored, or broken chips are discarded; the rest are packaged for sale. Other types of fried chips are made by mixing dry ingredients which are then deep fried, inspected and packaged. Machinery includes, but is not limited to, slicing equipment, mixers, deep fryers or cooking vats, pan greasers, ovens, conveyors, packaging and package-handling equipment. This classification includes delivery of the product when done by employees of an employer subject to this classification.

This classification excludes route drivers who are not employees of the chip manufacturer who are to be reported separately in classification 1101.

3906-03 Ravioli and tamale: Manufacturing

Applies to establishments engaged in the manufacture of ravioli, tamales, tortellini or similar frozen or ready-to-cook foods, for sale to wholesale customers. Ingredients include, but are not limited to, cornmeal, flour, ground meats, cheeses, seasonings, tomatoes or tomato paste, sauces, and corn husks. Depending on the specific product being made, ingredients are mixed together, placed in shells, pasta or corn husks, or otherwise prepared, cooked, inspected, wrapped, packaged and, in some cases, frozen. Machinery includes, but is not limited to, mixing or blending machines, deep fryers or cooking vats, ovens, conveyors, packaging and package-handling equipment, and freezers.

This classification excludes route drivers who are not employees of the food product manufacturer who are to be reported separately in classification 1101.

3906-04 Pasta: Manufacturing

Applies to establishments engaged in the manufacture of pasta products such as, but not limited to, macaroni, spaghetti, or noodles for sale to supermarkets, restaurants, distributors and other wholesale customers. Ingredients such as, but not limited to, flour, sugar, salt, seasonings, preservatives, oils, and water are mixed in mixing machines to form the dough. The dough is further mixed and kneaded, pressed through rollers to regulate thickness, cut with machinery or by hand to desired size and shape, then wrapped in cellophane or packaged in cartons. Machinery includes, but is not limited to, dough mixers, dough kneaders, rollers, cutting and slitting machines, hydraulic presses, ovens, conveyors, and packaging and package-handling equipment.

This classification excludes route drivers who are not employees of the manufacturer who are to be reported separately in classification 1101.

3906-05 Confectionery, chewing gum or cough drop: Manufacturing

Applies to establishments engaged in the manufacture of confectionery products, chewing gum or cough drops for sale to wholesale customers. Confections include, but are not limited to, candies such as creams, caramels, mints, hard candies, gum drops, glazed fruits, nut brittle, a wide variety of chocolate candy, and molded sugar cake decorations, such as, but not limited to, rosettes, candle holders, and colorful edible images used to decorate cakes or cookies. This classification includes both cooked and uncooked confection products. Because of the variety of candies and confections included in this classification, preparation and finishing processes which individualize the product may vary widely. Ingredients include, but are not limited to, sugar, flour, starch, nuts, milk, water, flavorings, cocoa, and coloring. Depending on specific product being made, ingredients are weighed, mixed or beat. Further processing may include heating, pressure cooking, baking, or forming uncooked mixtures (referred to as "paste" or frosting) into products by twirling, pressing, molding, or otherwise shaping. Confection products may be individually wrapped or packed in boxes, cans, trays, or other containers. Machinery includes, but is not limited to, ranges, burners,

various sized kettles, pots, pressure cookers, trays, mixing, cutting, or filling machines, hoppers, conveyors, die cutters, presses, coolers, and packaging and package-handling equipment. The manufacture of chewing gum and cough drops is similar although ingredients vary somewhat.

This classification excludes route drivers who are not employees of the confection manufacturer who are to be reported separately in classification 1101; candy store operations with on-premise manufacturing which are to be reported separately in classification 3905-13; and candy store operations with no manufacturing which are to be reported separately in classification 6406.

3906-07 Pizza: Manufacturing, N.O.C.

Applies to establishments engaged in the manufacture of frozen or ready-to-bake pizza not covered by another classification (N.O.C.) for sale to wholesale customers. Dough is mixed and rolled out to form the crust; sauce and a variety of toppings such as meats, cheese, vegetables are arranged on top of the crust. Pizzas are wrapped in plastic wrap, packaged, and stored in freezers prior to delivery. Machinery includes, but is not limited to, mixers, rolling devices, ovens, conveyors, packaging and package-handling equipment, and freezers.

This classification excludes route drivers who are not employees of the pizza manufacturer who are to be reported separately in classification 1101; pizza parlors which are to be reported separately in classification 3905; and U-bake pizza stores which are to be reported separately in classification 6403.

WAC 296-17A-3909 Classification 3909.

3909-00 Caterers

Applies to establishments engaged in catering operations. This classification includes the preparation and serving of food and beverages for customers who have arranged for their services for social and business events such as weddings, parties, bar mitzvahs, meetings or banquets. Foods prepared and served range from deli trays, sandwiches, box lunches, and buffets, to full meals. The food may be prepared at the caterer's own facility and delivered to the customer's location or may be prepared at the customer's location. Catering services include, but are not limited to, event planning, arranging tables, decorations, supplying utensils and dishes, bartending, waiting and busing tables, and taking care of left-over food and related clean-up after the event. This classification also includes catering to airlines which involves preparing various foods and direct delivery to the airline with special trucks that maintain hot or cold foods. This classification also applies to food services provided by communities or civic/social organizations to local residents who, because of physical disability or age, are unable to prepare their own food. The food is prepared and delivered to the client's home.

This classification excludes street vendors or route food services which are to be reported separately in classification 1101.

WAC 296-17A-4002 Classification 4002.

4002-00 Dairy products, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of dairy products not covered by another classification (N.O.C.) such as, but not limited to, whole, low fat, skim, powdered, flavored and condensed milk, buttermilk, cream, half-and-half, and eggnog. Raw milk may be purchased from others or furnished by the manufacturer's own dairy operation. Other ingredients usually purchased elsewhere include, but are not limited to, flavorings, sweeteners, nutrients, bacteria and yogurt cultures, and paper, glass or plastic containers for packaging finished products. Raw milk is delivered by insulated tanker trucks after it is tested for antibiotics, bacteria and microorganism counts, temperature, and fat content. The raw milk is pumped from the trucks into refrigerated silos or tanks; the cream is skimmed from the top and pumped into separate storage tanks for further blending to ensure the correct fat and nutrient content. The remaining milk may be evaporated, homogenized, pasteurized, cooled, tested for quality, and further processed into various milk products which are filled into gallons, half gallons, quarts, pints and half-pint containers and packaged for shipping. This classification includes the incidental manufacture of butter, ice cream, or cheese products when done by employees of an employer subject to this classification.

This classification excludes establishments primarily engaged in the manufacture of butter, cheese, ice cream and ice cream mixes which are to be reported separately in classification 4002-01 and dairy farming operations which are to be reported separately in classification 7301.

4002-01 Butter, cheese, ice cream and ice cream mix: Manufacturing

Applies to establishments engaged in the manufacture of dairy products such as, but not limited to, butter, natural or processed cheeses, cottage cheese, cheese dips or spreads, custards, whipped topping, ice cream, milkshake or ice cream mixes, ice milk, sherbet. Raw milk may be purchased from others or furnished by the manufacturer's own dairy operation. Other raw materials usually purchased elsewhere include, but are not limited to, flavoring, coloring agents, salts, additives and preservatives, plastic or oiled wrappings, and paper, glass or plastic containers for packaging finished product. Raw milk is delivered by insulated tanker trucks and pumped from the trucks into refrigerated silos or tanks. Initial processes are similar for products manufactured in this classification, but end processes vary, depending on the product being made. To make cheese, raw milk is heat treated and pasteurized, cooled, moved through separators which adjust fat composition by skimming the milk or adding cream, then pumped into vessels or cheese vats. Lactic acid and enzymes

are added to purify and clot the milk and form a gel which is cut into tiny cubes. Other additives, preservatives, or flavorings may be added at this point. The mixture of curds and whey (the liquid by-product lost from curds after cutting) is heated by allowing steam to enter the outer jacket of the vat. The mixture is stirred, whey is drained from curds and transported to evaporators and spray dryers which condense the whey into a powder form. Aside from salting, little more is done to curds to make unripened cheeses such as cream cheese or cottage cheese. When making firmer cheeses, the next step involves knitting or stretching the drained curds for texture. This process will vary according to the type of cheese being produced, but activities commonly involve preliminary packing, pressing or pulling of the curds in hot water, or turning curd blocks (called "cheddaring"). The curd blocks are milled (cut into finger-sized pieces) and moved through a trough or air block through tubing to other vats for further processing. In other processes, curds are collected in hoops (metal containers lined with cloth or plastic) and pressed into blocks or molds, or barrels. Hydraulic presses are used to press cheese, and vacuum chambers may be used to remove air. Cured cheese blocks may be packaged in corrugated cartons, or cut into smaller blocks, vacuum sealed in plastic, then packaged in boxes, or cut or shredded prior to packaging.

This classification excludes establishments primarily engaged in the manufacture of milk and other related dairy products not covered by another classification which are to be reported separately in classification 4002-00; establishments engaged in the manufacture of cheese-based salad dressings which are to be reported separately in classification 3902; and dairy farming operations which are to be reported separately in classification 7301.

WAC 296-17A-4101 Classification 4101.

4101-00 Printing, lithography, engraving, map printing and silk screening, N.O.C.

Applies to establishments engaged in providing a variety of printing services not covered by another classification (N.O.C.) to others. Operations contemplated include, but are not limited to, the press room, assembly and staging areas, shipping departments, and delivery. *Printing*: This category covers many types of printing including offset cold press and letterpress printing. *Lithography*: This category of printing is similar to letterpress printing with the process used to transfer images to paper (stock) being the distinction. In letterpress printing the image is transferred directly from plate to stock. In lithography an additional cylinder containing a rubber blanket is used. The process is plate to blanket to stock. *Engraving*: This applies to a process wherein designs or images are incised into the surface of a material from which printing impressions can be made. *Map printing*: This applies to an end product produced by a printer rather than a

specialty form of printing. *Silk screening (or screen printing)*: This applies to a specialty type of printing wherein a silk, nylon or metal screen contains the desired image and ink is forced through the screen to form the design on paper or other medium. Products produced by establishments subject to this classification include, but are not limited to, catalogs, booklets, pamphlets, brochures, books, letterhead, paper signs, and specialty invitation and business cards.

This classification excludes photographic composition or prepress work such as, but not limited to, photographic or computerized typesetting, layout, paste up, editing, proofreading, camera work and automated plate making which are to be reported separately in classification 4904. *Employees of an employer subject to this classification who have both photographic composition/prepress work duties and duties which are subject to this classification (4101) are to be reported separately in classification 4101 without a division of work hours.* This classification also excludes newspaper publishers who are to be reported separately in classification 4103 and establishments engaged in cloth printing operations which are to be reported separately in classification 3802.

4101-02 Rubber stamp: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of all types of rubber or synthetic rubber stamps or marking devices for others. Products produced by establishments subject to this classification include, but are not limited to, date, character, name and address stamps. Stamps may be produced by hand or machine and can be made from a variety of natural or synthetic materials. Finished stamps are attached to handles or coverings purchased from others.

4101-03 Bookbinding

Applies to establishments engaged in bookbinding and/or the restoration of old or damaged books using methods similar to those employed by bookbinders described by this classification. One definition of bookbinding is all further treatment of stock after printing which may include cutting, folding, trimming, gathering, stitching, gluing and casing. There are two general types of binding: Pamphlet binding and bookbinding. Pamphlet binding is used for such material as folders, booklets, catalogs and magazines. An automatic feeder carries the sheets to a folding machine. After folding, the sheets can be collated either by hand or by machine and either saddle-wire or side-wire stitched, depending on the thickness of the material being bound. There are a number of ways to bind a book, the most common being "edition" binding, also known as hard cover or cases binding, where the papers are sewn together by specialized sewing machines. This process is used when permanence is desired. "Perfect" binding is a less expensive type of binding as it requires no sewing or stitching and uses a pliable adhesive for binding.

This classification excludes photographic composition or prepress work such as photographic or computerized typesetting, layout, paste up, editing and proofreading, camera work and automated plate making which is to be reported separately in classification 4904. *Employees of an employer subject to this classification who have both photographic composition and/or prepress duties and duties which are subject to this classification (4101) are to be reported in classification 4101 without a division of work hours.*

WAC 296-17A-4103 Classification 4103.

4103-01 Newspaper publishing

Applies to establishments engaged in publishing daily or periodic newspapers. This classification includes the printing, distribution and general maintenance activities of the newspaper. The printing operation usually consists of one of three processes: Offset lithography, letterpress, or flexography. After the papers are printed, they are cut, folded and stacked either manually or by computer-operated machinery. Route managers then distribute the papers to door-to-door carriers or independent route delivery drivers. Typical occupations covered by this classification include bindery workers, press operators, freight handlers, machine feeders, production helpers, maintenance workers and drivers.

This classification excludes photo composition or prepress work such as photographic or computerized typesetting, layout, paste up, editing, proofreading, camera work and automated platemaking which is to be reported separately in classification 4904; outside reporters, photographers, sales personnel, advertising staff and circulation solicitors who are to be reported separately in classification 6303; and establishments engaged in printing operations for newspapers published by other firms which are to be reported separately in classification 4101.

Special note: Employees of an employer subject to this classification who have both photographic composition/prepress work duties and duties which are subject to this classification (4103) are to be reported separately in classification 4103 without a division of work hours.

Newspapers without any printing operations are governed by the general reporting rule covering businesses described by a standard exception classification.

4107-04 Business machine: Service, adjustment, repair, and installation, N.O.C.

Applies to establishments engaged in the adjustment, service, or repair of business machines not covered by another classification (N.O.C.). Types of business machines include, but are not limited to, typewriters, copy, postage

[Title 296 WAC—p. 441]

meters, keypunch, fax machines, computer components, X-ray and other medical-related electronic equipment. Work contemplated by this classification includes low voltage prewiring to the point of connecting to the live circuit. This classification includes all work performed on the customer's premises as well as in the employer's shop. This classification also includes service or repair of depth finders, radar, computerized or noncomputerized embroidery machines and the replacement or refilling of *nontoxic* toner in printer cartridges which is sometimes referred to as *remanufacturing*. The plate is removed from used cartridges, residuals of old toner is removed with hand-held vacuums, and the cartridge is wiped clean. After pouring new toner into the cartridge, the plate is replaced and the cartridge is considered new. Used toner is wrapped in plastic and discarded.

This classification excludes electrical work with a live power source which is to be reported separately in classification 0601.

4107-20 Piano tuning

Applies to establishments engaged in tuning services for pianos, organs, and other keyboard musical instruments. Establishments in this classification will tune, clean, replace the felt, and provide minor repair service such as, but not limited to, the removal and replacement of bad cords, regluing broken keys, or replacing faulty foot pedals. This classification includes all work performed on the customer's premises as well as in the shop.

This classification excludes establishments engaged in the sale of pianos and organs which are to be reported separately in classification 6306; establishments engaged in the sale of other types of musical instruments such as string, wind and percussion instruments, which are to be reported separately in classification 6406; and establishments engaged in the reconditioning of pianos and organs (and the related sales of reconditioned pianos and organs) which are to be reported separately in classification 2906.

WAC 296-17A-4108 Classification 4108.

4108-15 Letter service shops and mailing or addressing companies

Applies to establishments engaged in providing large volume mailing and addressing services. This could be the routine mailing of periodicals or advertising brochures or a one-time letter to a particular list of recipients. Work contemplated by this classification includes, but is not limited to, folding, sorting, labeling and stuffing envelopes (either by hand or machine), clerical support, outside sales work, pick up of preprinted material from a client's location and delivery of completed work to the client or post office when done by employees of an employer having operations subject to this classification. Companies in this classification may also research and compile mailing lists as an additional service for

their clients who are involved in direct mail advertising. This classification includes contracting of complete mail room services at a client's location.

This classification excludes printing of advertising material which is to be reported separately in classification 4101 and photocopying or duplicating of printed material, private mail box services (receipt and mailing of routine ready-to-mail letters and packages) for box renters, and package wrapping/mailing services, all of which are to be reported separately in classification 6406.

WAC 296-17A-4109 Classification 4109.

4109-10 Sign painting or lettering inside buildings

Applies to establishments engaged in sign painting or lettering inside a customer's building. This type of painting includes, but is not limited to, names, addresses and office hours on a door or window, and signs in the form of lettering/illustrations on an interior wall. Work contemplated by this classification includes preparing the surface by cleaning, sanding, etc., applying the lettering/illustrations by appropriate method (brushing, rolling, spraying, etc.), and applying a protective finish. This classification includes the painting of scenery, by a contractor, in a shop or theater (if done by the employees of a theater or television broadcasting station it would be an inclusion in classification 4504 or 4502 as applicable), and the painting of an interior mural.

This classification excludes sign painting shops that paint on, or apply vinyl lettering to, precut backings which are to be reported separately in classification 4109-18; painting in a shop that is not covered by another classification which is to be reported separately in classification 3603-12; and the painting, repair or erection of signs or murals on any part of the exterior of a building which is to be reported separately in classification 0403.

4109-18 Sign painting in shop

Applies to establishments engaged in providing sign painting services in their shop. The use of this classification is limited to painting on, or applying vinyl lettering to, precut mediums (sign backings) provided by the customer or purchased elsewhere; it does not contemplate the manufacture of the sign backing. (Vinyl lettering or designs are usually computerized. Lettering or designs are entered into a computer; a plotter/cutter attached to the computer cuts the programmed design or lettering from rolls of vinyl.) Work contemplated by this classification includes preparing the surface by cleaning, sanding, etc., applying the lettering/illustrations by appropriate method (such as brushing, rolling, spraying, applying vinyl designs), and applying a protective finish. This classification includes making and applying vinyl lettering in place of painted lettering and lettering/illustrating on vehicles not in connection with auto body repair or painting.

This classification excludes the painting or lettering of signs in buildings which is to be reported separately in classification

fication 4109-10; painting in a shop which is to be reported separately in classification 3603 (unless the painting is included in another classification); the painting, repair or erection of signs on any part of the exterior of a building which is to be reported separately in classification 0403; and sign painting in connection with sign manufacturing operations which is to be reported separately in the applicable manufacturing classification.

WAC 296-17A-4201 Classification 4201.

4201-00 Longshoring and stevedoring

Applies to establishments engaged in longshoring (stevedoring) operations which involve the transfer, loading, and unloading of ships' cargo and storage of such on docks or in nearby warehouses. This classification includes stevedoring by hand or hand truck and containerized stevedoring which involves the use of a cross deck crane for lifting the trailer body container onto or off of the ships deck or hold. This classification also includes wharf and pier operations, coal dock operations, cargo checkers, tallymen and the repackaging or mending of damaged containers in connection with stevedoring activities.

This classification excludes stevedores employed directly by a port district who are reported separately in classification 4201-02.

Special note: Stevedoring activities are almost always covered by the Longshore Harbor Workers Compensation Act (LHWCA) except when conducted by a port district or other political subdivision.

4201-02 Port districts

Applies to the operation of port districts by a municipality. Port districts have separate taxing authority and although they may receive tax dollars from levies most of their operating costs are funded through rental and use fees on the property and facilities they operate. Port districts are authorized by state law for the purpose of acquiring, developing, maintaining and operating various transportation-related properties and facilities. In addition to marine and airports, the district may also develop and maintain facilities used for the transfer, handling, storage and terminal operations of commercial enterprises. This classification includes sales personnel and any stevedoring operations conducted by port district employees.

This classification excludes clerical office employees of a county who are to be reported separately in classification 5306 and stevedoring operations not conducted by port district employees which are to be reported separately in classification 4201-00.

(2007 Ed.)

WAC 296-17A-4301 Classification 4301.

4301-05 Glue, lard, or tallow: Manufacturing

Applies to establishments engaged in the manufacturing of products from animal substances such as glue, lard and tallow. Glue manufacturing begins by boiling animal substances, including skins and hoofs, in water until the materials are diluted and melted. The material dries as a residue and forms as a hard pure protein gelatin. Incidental operations include bone crushing, grinding and bagging of bone meal, the filling of solidified grease into drums from the oil settling tanks and the pressing, drying, pulverizing and bagging of tankage for fertilizer manufacturers. The traditional "hot" animal glue which is produced in flake form, requires a heated glue pot to keep it at a usable consistency. More modern forms are ready to use liquids. Glues come in three general forms: Ready-to-use, water mixed form, and waterproof types that are often two-part and must be sold in two separate container units. These come with directions to mix to specified proportions just before use. Ready-to-use types retail in bottles, cans and tubes. Tools and equipment used include, but are not limited to, boiling pots, scrapers and razors. This classification includes making or refining lard, which is the white solid or semisolid rendered fat from a hog, and tallow making. This process includes taking the hard fat from parts of the bodies of cattle, sheep or horses, separating it by melting from the fibrous and membranous matter and mixing the whitish solids for use in making candles, leather dressing, soap and lubricants.

This classification excludes establishments that manufacture synthetic glues such as acrylic base, contact cement, polyester, latex combination, epoxy sticks, polyethylene, polyvinyl, or cellulose nitrate or rubber base which are to be reported separately in classification 3701.

4301-10 Sausage: Manufacturing

Applies to establishments engaged in manufacturing sausage. This process includes grinding, mixing, and blending cuts of meat with seasonings, spices, and fillers using grinders, mixers, pots, cooking tanks and meat cutting instruments. The mixture is stuffed into synthetic or natural casings or packed into forms. The product is often cooked in pressurized cooking tanks. The sausage is then cured by either pumping or injecting a curing solution into the meat or dry rubbing a curing substance into the meat and immersing the meat in a brine solution. Curing solutions usually contain one or more chemicals, such as sodium or potassium nitrate, ascorbate, or erythorbate, and water. The meats are then allowed to cure for up to 40 days. Curing may be followed by a period of several hours to several days in a temperature controlled smokehouse. The final product may be packaged, canned, placed in jars, or frozen.

This classification excludes dealers of natural sausage casings which are to be reported separately in classification 4301-19; meat products manufacturing which is to be reported separately in classification 4301-12; retail meat and poultry dealers which are to be reported separately in classification 3303; and the handling of livestock which is to be reported separately in the applicable classification.

[Title 296 WAC—p. 443]

4301-11 Packing house

Applies to establishments engaged in packing house operations which include the handling and slaughtering of livestock and the preparation of fresh meat and meat products. Animals are moved through a system of chutes to a conveyor system which takes them through a stunning machine and then into the slaughtering area. Work is performed with the use of hoists, knives, scissors, razors, scrapers, meat chippers, cleavers and hydraulic dropper/spreaders. After slaughtering, the blood is drained, collected and stored. The carcasses are then dipped into a scald tank and conveyed to dehairer machines and the hides are removed. After carcasses have been inspected and weighed, they are placed in blast freezers for several hours and then moved to a cooler. Carcasses are sawed or cut into portions and specific cuts of meat including those that will be used in other products such as cold cuts, sausages, and hot dogs. The products are then placed in cardboard boxes and loaded onto pallets. This classification includes incidental rendering, lard refining, butter substitutes manufacturing, washing of casings, sausage manufacturing, salting of hides, cooking of offal (waste), processing of the viscera manually or by machine, and fertilizer manufacturing when done by employees of an employer subject to this classification. Some of the prepared meats are packed in cans, bottles, or jars, sealed and cooked in vats. Meat packing and processing operations may be consolidated or may be in different locations.

This classification excludes establishments primarily engaged in sausage manufacturing which are to be reported separately in classification 4301-10; dealers of natural sausage casings which are to be reported separately in classification 4301-19; meat products manufacturing which is to be reported separately in classification 4301-12; slaughterhouse only operations which are to be reported separately in classification 4301-22; custom meat cutting which is to be reported separately in classification 4302; retail meat and poultry dealers which are to be reported separately in classification 3303; and wholesale meat and poultry processors/dealers which are to be reported separately in classification 3304.

4301-12 Meat products: Manufacturing

Applies to establishments engaged in meat products manufacturing, including canning or dehydrating. Products include, but are not limited to, frankfurters, bologna, head cheese and meat loaf. No handling or slaughtering of livestock is performed by employers subject to this classification. Meats are received in halves, quarters or individual fresh cuts. Cuts of meat are washed, soaked in brine, smoked, pickled, corned, and/or otherwise cooked. Meat products are bottled in jars, bottles, or cans and sealed. Meat trimmings may be chopped, ground, mixed, smoked, boiled, or stuffed in sausage casings. Machinery and equipment includes, but is not limited to, mixing, cutting, and bottling equipment or tools.

This classification excludes establishments primarily engaged in sausage manufacturing which are to be reported separately in classification 4301-10; dealers of natural sausage casings which are to be reported separately in classification 4301-19; glue, tallow or lard manufacturing which is to be reported separately in classification 4301-05; packing house operations which are to be reported separately in clas-

sification 4301-11; slaughterhouse operations which are to be reported separately in classification 4301-22; custom meat cutting which is to be reported separately in classification 4302; the retail sale of meat and poultry which is to be reported separately in classification 3303; and wholesale meat dealers and wholesale poultry processors/dealers which are to be reported separately in classification 3304.

4301-13 Peat moss: Shredding and baling

Applies to establishments engaged in the shredding and baling of peat moss. This includes the cleaning, sorting and packaging of peat moss to be used as mulch, plant food (fertilizer), soil amendment, fuel or decorative uses such as in floral arrangements.

This classification excludes establishments engaged in the digging or stripping of peat from the surface of bogs with use of mechanical equipment which are to be reported separately in classification 0112 and the picking of moss by hand in a forest which is to be reported separately in classification 4802.

4301-17 Tanneries, fur manufacturing

Applies to establishments engaged in tannery operations which involve tanning and dressing raw hides for sale to dealers or manufacturers of leather or fur products. (Taxidermists often send hides to a tannery rather than treating them at their own shops.) Hides are received from outside sources, washed in caustic soda, borax and soda to clean, soften and preserve them. Excess flesh and tissue is removed from hides by fleshing machines which resemble a band saw mounted on a table. Any additional fleshing is done by scraping with a hand knife. Hides are then softened by agitating in a lime solution to remove all or part of the hair or fur, softened by agitating paddles using a variety of chemicals mixed with cornmeal and treated with a solution of sulfuric acid. Tanning is then done in revolving drums containing a mixture of water, salt, sodium bicarbonate and chromium sulfate. Drying may be done using a gas fired oven depending on the type of hide. Shredded hide may be baled and sold to glue makers. Tanned hides are split, dyed and finished. Tears in the hide are hand sewn.

This classification excludes hide or leather dealers, establishments engaged in hide pelting, and taxidermists which are all to be reported separately in classification 3708.

4301-19 Sausage casing dealers

Applies to establishments engaged in the sales and distribution of natural sausage casings to others. Casings are animal intestines received from packing houses or rendering plants. Wholesale dealers wash, dry, sort and package casings for distribution.

This classification excludes establishments engaged in the manufacture of sausage which are to be reported separately in classification 4301-10.

4301-21 Rendering works, N.O.C.

Applies to establishments engaged in rendering operations not covered by another classification (N.O.C.). Rendering is the act of reducing or melting down fat by heating. The raw animal materials such as, but not limited to, discarded fat, bone trimmings, meat scraps, blood, grease and feathers are collected from farms, stockyards, slaughterhouses, butcher shops, supermarkets, restaurants, meat and poultry

stores, ranches, feed lots or animal shelters and brought to the rendering plant. The hides are removed and stored for shipment to hide dealers and tanneries. Carcasses are cut into workable sizes and placed into tanks. Steam passes directly into the materials being cooked. The grease is drawn off and meat and bones drop into a slush box. The slush is then pressed to remove more water and grease before going to steam pressure dryers. In some plants this is all performed with one piece of equipment. Tools and equipment may also include crushers, hashers, grinders, hoggers, prebreakers, blow tanks, conveyors, bucket elevators, pumps, steam-heater batch cokers, dryers, screw presses and waste water treatment equipment. In addition, other products such as cod liver oil may be produced, depending on the basic material being rendered. Regardless of the type of rendering system being used, all fish oils and animal grease or tallow are pumped into receiving or settling tanks. Barrels, drums or tank cars are filled for shipment to manufacturers of assorted products such as soap, and fatty acid products such as cosmetics, lubricants, paints and plastics. Edible tallow is used in margarine and other foods as regulated by the USDA. This classification includes the crushing, grinding, pressing, drying, pulverizing, and bagging of dried slush or tankage to produce fish or bonemeal, and feed concentrates for livestock and poultry and fertilizer.

This classification excludes establishments engaged as packing houses which are to be reported separately in classification 4301-11 and establishments engaged as slaughterhouses which are to be reported separately in classification 4301-22.

4301-22 Slaughterhouses

Applies to establishments engaged in the slaughter of animals and the initial processing of meat. This includes purchasing livestock from individuals or feedlots, handling the livestock, maintaining pens, and butchering. The process requires the preparation of the animal carcass, washing of casings and the salting of hides or cooking of offal (waste). Tools and equipment used include hydraulic dropper/spreaders, stunning machines, hoists, knives, scissors, razors, scrapers, meat chippers and cleavers. The meat is then sold by hanging weight and distributed to buyers using box freezer or container trucks. This classification excludes establishments engaged in packing house operations which are to be reported separately in classification 4301-11; establishments engaged in manufacturing meat products which are to be reported separately in classification 4301-12; custom meat cutting which is to be reported separately in classification 4302; retail meat and poultry dealers which are to be reported separately in classification 3303; wholesale meat dealers and wholesale poultry processors/dealers which are to be reported separately in classification 3304.

WAC 296-17A-4302 Classification 4302.

4302-14 Custom meat cutting

Applies to establishments engaged in operating custom meat cutting shops. This classification primarily caters to customers who bring in an animal carcass (usually from a farm or hunt) for processing. Customers generally fill out a cut and wrap list which indicates how they want the meat cut such as steaks, flank, roasts, ribs, fillets, or hamburger, and how they want the product wrapped such as 3 steaks to a package, 5 pound roasts, 2 pound packages of hamburger, etc. Once the order has been filled to a customer's specifications, meat is stored in a freezer locker until the customer picks up the product. Custom meat cutting shops may also smoke meats and offer custom cut inspected meats (meaning inspected by USDA officials) for sale as locker packages or by the pound. It is also common for these establishments to sell related grocery items such as butter, eggs or milk. Tools and equipment include, but are not limited to, knives, razors, meat chippers, cleavers and hand carts.

This classification excludes establishments primarily engaged in custom meat cutting *including farm kill operations* which are to be reported separately in classification 4302-15; establishments engaged in farm kill operations *only* which are to be reported separately in classification 4302-16; packing house operations and slaughterhouse operations which are to be reported separately in classification 4301; establishments engaged in the retail sale of meat and poultry dealers which are to be reported separately in classification 3303; and wholesale meat dealers which are to be reported separately in classification 3304.

4302-15 Custom meat cutting and farm kill

Applies to establishments engaged in operating custom meat cutting shops *which also provide farm kill operations away from the custom meat shop*. This classification primarily caters to customers who bring in an animal carcass (usually from a farm or hunted) for processing. Customers generally fill out a cut and wrap list which indicates how they want the meat cut such as steaks, flank, roasts, ribs, fillets, hamburger, etc., and how they want the product wrapped such as 3 steaks to a package, 5 pound roasts, and 2 pound packages of hamburger. Once the order has been filled to a customer's specifications, meat is stored in a refrigerated locker until the customer picks up the product. Custom meat cutting shops may also smoke meats and offer custom cut inspected meats (meaning inspected by USDA officials) for sale as locker packages or by the pound. It is also common for these establishments to sell related grocery items such as butter, eggs or milk. Tools and equipment include, but are not limited to, knives, razors, meat chippers, cleavers and hand carts. *Farm kill operations* are usually performed with the use of a mobile kill truck. The animal is killed, placed on a hook hoist attached to the mobile unit, skinned, and dressed. The meat is then processed, according to the customer's order, usually at the shop.

This classification excludes establishments engaged in custom meat cutting-in shop *only (no farm kill)* which are to be reported separately in classification 4302-14 and farm kill *only operations (mobile butchering)* which are to be reported separately in classification 4302-16.

4302-16 Farm kill

Applies to establishments engaged *exclusively* in mobile butchering or farm kill operations which are usually performed with the use of a mobile kill truck. The animal is killed, placed on a hook hoist attached to the mobile unit, skinned, and dressed. Establishments in this classification are engaged in farm kill operations *only*; they are not engaged in the further processing of meat or meat cutting.

This classification excludes establishments engaged in operating custom meat cutting shops *only* (*no farm kill*) which are to be reported separately in classification 4302-14 and custom meat cutting shop *including farm kill* which are to be reported separately in classification 4302-15.

WAC 296-17A-4304 Classification 4304.**4304-00 Feedlots or stockyards**

Applies to establishments engaged in operating feedlots or stockyards. Feedlots are large, enclosed yards usually with pens or stables where livestock, such as cattle, horses, sheep or pigs, are temporarily held for the sole purpose of supplying with feed and nourishment. Feed (such as corn or hay) is brought in bulk. Feed may be mixed in choppers and blown into feeder troughs. The livestock are raised until they reach certain weights, then sold to packing houses or slaughterhouses. Stockyards are holding areas (large, enclosed yards) where livestock are kept until they are sent for slaughter, sold or dispersed elsewhere.

This classification excludes packing houses or slaughterhouses which are to be reported separately in classification 4301 and livestock auction and sales yards or livestock buyers houses which are to be reported separately in classification 4304-02.

4304-02 Livestock auction and sales yards; livestock buyers

Applies to establishments engaged in operating livestock auction and sales yards and to livestock buyers. Operation of an auction and sales yard involves the exhibition and sale of cattle, horses, mules, sheep, hogs and goats. The premises usually consists of an arena, a grandstand for customers (both buyers and sellers), and outside pens or stalls for livestock. The livestock are usually dropped off by customers (farmers, ranchers, etc.), are tagged, recorded, checked by brand inspectors and veterinarians, and inspected by employees of the yard. If the animals are left prior to the day of the sale, the employees will feed the livestock and maintain the pens. When the auction begins, yard employees bring the livestock to the arena, parade them around for show, then take them back to the pens to be weighed. A recordkeeper usually assists the auctioneer during this activity. Recordkeepers engaged directly in the business of auctioning are subject to the auction classification. Livestock buyers view the livestock from an overhead viewing area or by walking through the pen area.

WAC 296-17A-4305 Classification 4305.**4305-06 Garbage works or landfill: Reduction or incineration**

Applies to establishments engaged in the disposal of refuse by processing or destruction, or in the operation of incinerators, landfills or other sites for disposal of such materials. Sanitary landfilling involves spreading typical household waste, in thin layers, compacting them to the smallest practical volume, and covering them with soil each working day in a manner that minimizes environmental impact. Sanitary landfills must have permits issued by a state regulatory program. Also included in this classification are solid waste landfills which are designed to accept construction debris such as plasterboard, cement, dirt, wood, and brush. Compactors may be used to compact the trash before it is discarded in the landfill. Incinerator operations reduce the volume of refuse with the remaining material and ashes being discarded in a landfill. Front end loaders are frequently used to feed the refuse into the incinerator. This classification includes cashiers collecting fees from customers, incidental recycling or sorting operations conducted in connection with a landfill or garbage works operation by employees of an employer subject to this classification, and establishments that only sort refuse. (Refuse sorting centers are distinguished from "buy back centers" in that "buy back centers" collect recyclable materials which they sell to others while refuse sorting centers collect and dispose of materials.)

This classification excludes establishments engaged in solid waste, refuse or ashes collecting, including curbside recycle services which are to be reported separately in classification 4305-18; cities or towns engaged in solid waste, refuse or ashes collecting, including curbside recycle services which are to be reported separately in classification 0803; counties and taxing districts engaged in operating garbage works, landfill, reduction or incineration operations which are to be reported separately in classification 1501; establishments engaged in hazardous waste and toxic material processing or handling, including processing of medical or septic tank waste, drug lab or hazardous spill cleanup (excluding oil spill cleanup on land), and reprocessing or handling of low-level radioactive materials, which are to be reported separately in classification 4305-20; establishments engaged in tire dumps or collection centers which are to be reported separately in classification 4305-21; and buy back (recycle) center operations that include the collecting, buying from customers, sorting and the baling and sales of materials which are to be reported separately in classification 2102.

4305-18 Solid waste, refuse or ashes collecting

Applies to establishments engaged in collecting and removing waste from private homes, commercial establishments, industrial facilities, and other sites. Refuse may be picked up on a daily, weekly, or other regular basis. Drivers are usually assigned designated routes to collect curbside garbage or transport metal dumpsters for commercial busi-

(2007 Ed.)

nesses. This classification also includes the curbside collection of recyclable material when performed by employees of an employer subject to this classification. Garbage collection companies have contracts to dump refuse at landfills or local transfer stations where refuse is compacted and later transferred to a landfill. Independent owners may also contract to run the services for a county or city. This classification also includes establishments engaged in mobile paper shredding services. A truck, similar to a small moving van, is outfitted with a paper shredder. Empty bins or cans are left at establishments such as banks and law offices which need to have documents shredded, the filled containers are picked up either on a regular basis or on call, and the paper shredded on-site. The shredded paper is delivered to recyclers or other businesses who use shredded paper.

This classification excludes establishments engaged in garbage works, landfill, reduction or incineration operations which are to be reported separately in classification 4305-06; counties or taxing districts engaged in garbage works, landfill, reduction or incineration operations which are to be reported separately in classification 1501; cities or towns engaged in solid waste, refuse or ashes collecting, including curbside recycling services which are to be reported separately in classification 0803; establishments engaged in hazardous waste and toxic material processing or handling, including processing of medical or septic tank waste, drug lab or hazardous spill cleanup (excluding oil spill cleanup on land), and reprocessing or handling of low-level radioactive materials, which are to be reported separately in classification 4305-20; establishments engaged in tire dumps or collection centers which are to be reported separately in classification 4305-21; and recycle ("buy-back") center operations that include the collecting, buying from customers, sorting, and the baling of materials which are to be reported separately in classification 2102.

4305-20 Hazardous waste and toxic material processing or handling, N.O.C.

Applies to establishments engaged in the *processing or handling* of hazardous/toxic materials not covered by another classification (N.O.C.), including the *processing* of medical or septic tank waste, drug lab or hazardous spill *cleanup* (excluding oil spill cleanup on land), and *reprocessing or handling* of low-level radioactive materials. This classification is distinguished from classification 3701-27, in that 4305-20 applies to the *processing or cleanup* of hazardous/toxic materials while 3701-27 includes the *identifying and repackaging for disposal* of such materials as drugs, pesticides, chemicals, and toners. Hazardous waste can be defined as any material that contains hazardous elements in amounts high enough to pose a significant threat to human health and the environment and therefore should be isolated. Hazardous characteristics include the ability to bioconcentrate, ignite, corrode, react with water or other materials, or show toxicity such as toxic metals including lead, cadmium and mercury; organic solvents such as benzene and trichloroethylene; and toxic materials such as asbestos.

This classification excludes establishments engaged in garbage works, landfill, reduction or incineration operations which are to be reported separately in classification 4305-06; establishments engaged in solid waste and refuse or ashes

collecting, including curbside recycle services and mobile paper shredding operations, which are to be reported separately in classification 4305-18; establishments engaged in tire dumps or collection centers which are to be reported separately in classification 4305-21; soil remediation, including oil spill cleanup on land, which is to be reported separately in classification 0101; asbestos abatement, all operations, which is to be reported separately in classification 0512; processing of waste oils, solvents, antifreeze, paints, and other hazardous materials, which is to be reported separately in classification 3407; and hazardous/toxic material repackaging for disposal, including drugs, pesticides, chemicals, and toners, which is to be reported separately in classification 3701.

4305-21 Tire dumps or collection centers

Applies to establishments engaged in operating tire dumps or collection centers. The primary source of used vehicle tires are tire retailers who remove the tires from their customers' vehicles when replacement tires are sold. Occasionally community or charitable groups will hold a fund raising event where the public can drop off their used tires for a fee. Operations include, but are not limited to, picking up and hauling the used tires to a location where the tires can be stored or manually sorted into those with enough tread to be used on the highways; those casings suitable for retreading (either of which have a resale value); and those with no resale value which are hauled to an appropriate disposal site. This classification includes drivers as well as workers involved in the sorting operations.

4305-22 Debris removal: Construction sites or nonconstruction debris N.O.C.

Applies to establishments engaged in the collecting and removing of construction site debris left by construction crews. The debris may consist of scrap lumber, metal, wire, drywall, carpet and any other materials used in the construction of residential or commercial projects. This classification also includes the collecting and removal of nonconstruction debris. This includes but is not limited to, basement debris, household junk, garden waste, furniture and appliances. The debris is loaded into dump trucks, utility trucks, dump trailers, or roll off dumpsters then transferred to a landfill or local transfer station.

This classification excludes establishments engaged in residential or commercial construction that remove and haul their own debris which is to be reported in the construction classification applicable to the work being performed; establishments engaged in garbage works, landfill reduction or incineration operations which are to be reported separately in classification 4305-06; establishments engaged in solid waste and refuse or ashes collecting, including curbside recycle services and mobile paper shredding operations which are to be reported separately in classification 4305-18; establishments engaged in hazardous waste and toxic material processing or handling, including processing of medical or septic tank waste, drug lab or hazardous spill cleanup (excluding oil spill cleanup on land), and reprocessing or handling of low-level radioactive materials which are to be reported separately in classification 4305-20; establishments engaged in tire dumps or collection centers which are to be reported separately in classification 4305-21; and establishments engaged in preoccupation cleanup of newly constructed residential or commercial

cial structures which includes washing windows, vacuuming carpets, dusting woodwork, doors, cabinets, washing floors and fixtures which are to be reported separately in classification 6602-03.

WAC 296-17A-4401 Classification 4401.

4401-00 Cold storage lockers

Applies to establishments that rent cold storage lockers to the public. These establishments do not own equity in the merchandise that is stored. Other than being cold storage facilities they are similar to mini-warehouse storage operations. Typically these operations will be a part of a retail or wholesale food or beverage establishment such as meat markets or wine stores. Typical activities contemplated by this classification include maintenance and security of the facility.

This classification excludes establishments engaged in fruit/vegetable freezer operations which are to be reported separately in classification 3902; establishments engaged in cold storage warehouse operations which are to be reported separately in classification 4404; general merchandise warehouses (not cold storage) which are to be reported separately in classification 2102; mini-storage warehouses which are to be reported separately in classification 4910; and field bonded warehouses which are to be reported in classification 2008.

Special note: The distinction between this classification (4401) and cold storage warehouse operations (4404) is that classification 4404 contemplates a warehouse type facility which stores general merchandise of commercial enterprises such as manufacturers and wholesalers as opposed to classification 4401 which rents lockers out to individuals for storage of personal items.

WAC 296-17A-4402 Classification 4402.

4402-00 Ice: Manufacturing or harvesting

Applies to establishments engaged in the manufacture of ice or the harvesting of naturally occurring ice from frozen bodies of water such as lakes or ponds. Ice is made by treating, forming, and freezing water in refrigeration compressor systems. The ice blocks may be scored, cut or sawed, then left in blocks or crushed and bagged. Refrigeration systems are generally freezer coils or pipes running through or around tanks, or refrigerated vaults. Other equipment includes, but is

not limited to, tanks, tin molds of various pound sizes or shapes, filtering systems, ice cube making systems which consist of water tanks, tubing and cutting blades, conveyors, incline screws, holding bins, bagging machines, winches, and forklifts. Ice harvesting is the cutting of natural ice from lakes, ponds, or other bodies of water that have frozen over to a suitable thickness and storing it in refrigerated warehouses. Ice manufacturers and harvesters either deliver their ice directly to their customers or sell it to ice dealers.

This classification excludes ice dealers who are to be reported separately in classification 4402-02 and manufacturers of "dry ice" who are to be reported separately in classification 3701.

4402-02 Ice dealers

Applies to establishments engaged as dealers of ice manufactured or harvested by others. Ice dealers either pick up ice directly from manufacturers and deliver it, or store it in their own refrigerated warehouses or ice stations prior to delivery to their customers. Refrigerated, insulated trucks and trailers are used to deliver ice. Customers may include, but not be limited to, restaurants, lounges, service stations, grocery and convenience stores. Ice dealers may also own coin-operated dispensing machines, at various locations, which they refill.

This classification excludes establishments engaged in the manufacture of ice in refrigerated systems and the harvesting of natural ice which are to be reported separately in classification 4402-00 and establishments engaged in the manufacture of "dry ice" which are to be reported separately in classification 3701.

WAC 296-17A-4404 Classification 4404.

4404-05 Cold storage warehouse

Applies to establishments engaged in providing a cold storage facility for general merchandise. These establishments do not own equity in the merchandise they store. The cold storage facility, which is maintained through a mechanical refrigeration process, typically stores items such as, but not limited to, food products, furs, and pharmaceuticals. Work contemplated by this classification includes maintenance and security of the facility, incidental repackaging, and loading and unloading of the warehoused items when performed by employees of an employer having operations subject to this classification.

This classification excludes establishments engaged in fruit/vegetable freezer operations which are to be reported separately in classification 3902; establishments engaged in cold storage locker operations which are to be reported separately in classification 4401; general merchandise warehouses (not cold storage) which are to be reported separately in classification 2102; mini-storage warehouses which are to be reported separately in classification 4910; and field bonded warehouses which are to be reported separately in classification 2008.

Special note: The distinction between this classification (4404) and cold storage locker operations (4401) is that classification 4404 contemplates a warehouse type facility which stores general merchandise of commercial enterprises such as manufacturers and wholesalers as opposed to classification 4401 which rents lockers out to individuals for storing of their personal items.

4501-00 Radio or television broadcasting companies: Transmitter or field employees outside, N.O.C.

Applies to the field employees, not covered by another classification (N.O.C.), of establishments engaged in the operation of radio or television broadcasting companies. This classification is limited to outside employees engaged in technical and engineering work such as the installation/testing/repair of lines, antennas (including tower mounted), satellite dishes, and field transmitting equipment.

This classification excludes radio or television broadcasting station employees confined to the studio or office such as, but not limited to, control operators/engineers, announcers, camera operators, players, entertainers, musicians, clerical office and sales personnel, who are to be reported separately in classification 4502; establishments engaged in providing television cable service to subscribers which are to be reported separately in classification 1305; contractors engaged in underground line construction, maintenance, or repair who are to be reported separately in classification 0107; contractors engaged in overhead line construction, maintenance or repair who are to be reported separately in classification 0509; and contractors engaged in wiring within buildings and antenna hookups within buildings who are to be reported separately in classification 0601.

WAC 296-17A-4502 Classification 4502.

4502-00 Radio broadcasting stations: All other employment

Applies to establishments engaged in the operation of radio broadcasting stations. This classification is limited to those employees who are confined to the studio or office such as, but not limited to, control operators, producers, engineers, announcers, reporters, disc jockeys, players, entertainers, musicians, clerical office and sales personnel. This classification includes occasional outside exposure when broadcasting from a remote location.

This classification excludes radio broadcasting station field employees engaged in technical and engineering work such as, but not limited to, the installation/testing/repair of lines, antennas, and satellite dishes who are to be reported separately in classification 4501.

(2007 Ed.)

4502-01 Television broadcasting stations and video production: All other employment

Applies to establishments engaged in the operation of television broadcasting stations and the production of videos. This classification is limited to those employees who are confined to the studio or office such as, but not limited to, control operators, producers, directors, announcers, camera operators, reporters, players, entertainers, musicians, clerical office and sales personnel. This classification includes occasional outside exposure when broadcasting from a remote location.

This classification excludes television broadcasting station field employees engaged in technical and engineering work such as, but not limited to, installation/testing/repair of lines, antennas, and satellite dishes who are to be reported separately in classification 4501; studio or office employees of television cable companies who are to be reported separately in classification 4502-03; and large-scale theatrical/movie production which is to be reported separately in classification 6608.

4502-02 Recording companies, studio

Applies to establishments engaged in the operation of studio recording companies. This classification is limited to those employees who are confined to the studio or office such as, but not limited to, control operators, engineers, announcers, players, entertainers, musicians, clerical office and sales personnel. This classification includes occasional outside exposure when recording at a remote location.

4502-03 Television cable companies: Control room and clerical personnel

Applies to control room and office employees of establishments engaged in providing point-to-point cable television service to subscribers. Television cable companies receive commercially produced programming from others through satellite and antennae, which they distribute to their subscribers through the local cable lines they install and maintain. They may also become involved in producing original programming and making channels available for public access broadcasts. Work contemplated by this classification is limited to those employees who are confined to a control center, studio or office such as, but not limited to, control operators, players, announcers, entertainers, musicians, clerical office and sales personnel. This classification includes occasional outside exposure for broadcasting from a remote location. Also included are homeowners' associations and cops who operate a central system for residential users.

This classification excludes television cable company field employees engaged in operation, maintenance and extension of lines and subscriber hook-ups who are to be reported separately in classification 1305 and studio or office employees of noncable television broadcasting companies who are to be reported separately in classification 4502-01.

WAC 296-17A-4504 Classification 4504.**4504-00 Theatres**

Applies to establishments engaged in the operation of indoor motion picture theatres, drive-in theatres, and live production theatres. This classification includes, but is not limited to, managers, stage hands, box office employees, projectionists, ushers, snack bar employees, parking lot attendants, security guards, sound system and lighting engineers, set builders, clerical office employees, and sales personnel. This classification includes the organization and management of nontheatrical events on theatre-owned property, such as a "swap meet" on the grounds of an outdoor theatre, when done by employees of an employer having operations subject to this classification.

This classification excludes performers in live theatre such as, but not limited to, actors, entertainers, and musicians who are to be reported separately in 6605 or 6620 as applicable; nontheater employees engaged in setting up stage lighting and sound systems who are to be reported separately in classification 0601 or 0608 as applicable; and nontheater employees engaged in building and setting up props and sets who are to be reported separately in classification 0516.

Special note: Theatrical productions often involve independent contractors. The independent contractor tests found in RCW 51.08.180 and 51.08.195 should be applied when reviewing the status of individuals such as, but not limited to, the playwright, composer, set designer, costume designer, lighting and sound designers, and videographer.

WAC 296-17A-4601 Classification 4601.**4601-01 Fireworks: Manufacturing**

Applies to establishments engaged in the manufacture of fireworks such as, but not limited to, flares, star shells, rockets, firecrackers, and signals used to generate colored lights, smoke, and noise. Incendiary powders, metal salts, components such as metal and cardboard tubes, aluminum cylinders, parachutes, umbrellas, sheet steel carrying shells, glue and wax are received from others. The process involves mixing, repeated screening, drying, blending and aging. The chemicals mixed include an oxidizer which produces the oxygen needed to make it burn fast and hot, a fuel which combines with the oxygen and causes the burning, coloring agents which produce the color, and a binding material which binds all the ingredients together. The composition is weighed and pressed into containers such as, but not limited to, aluminum caps or cardboard shells. The pyrotechnic (or shell) pellet then passes to be assembled with the remainder of the device being manufactured where the fuses are also added. Most processes are done with hand tools such as knives, mallets, and scissors due to the dangers of operating machinery around explosives. Fireworks are classified as either Class B or Class C according to their complexity and

amount of explosives; however, they all contain an oxidizer, a fuel and a binder and are extensively regulated by federal agencies.

This classification excludes establishments engaged in the manufacture of explosive powder which are to be reported separately in classification 4601-02; establishments engaged in the manufacture of combined chemicals and explosives which are to be reported separately in classification 4601-03; and the exhibition of fireworks which is to be reported separately in classification 6207.

4601-02 Explosive powder: Manufacturing

Applies to establishments engaged in the manufacture of pyrotechnic, explosive, and incendiary powders from ingredients such as, but not limited to, nitrates, electrolytic copper dust, potassium perchlorate, powdered magnesium, sulfur, charcoal and linseed oil which are received from other sources. According to product being made, specific ingredients are mixed, then ground, screened and blended into powder of varying grains. Powder is filled into kegs, tin cans, or special fiber containers.

This classification excludes establishments involved in the manufacture of fireworks which are to be reported separately in classification 4601-01; establishments involved in the manufacture of combined chemicals and explosives which are to be reported separately in classification 4601-03; establishments engaged in chemical manufacturing which are to be reported separately in classification 3701; and establishments involved in blasting operations which are to be reported separately in the applicable classification.

4601-03 Combined chemicals and explosives: Manufacturing

Applies to establishments engaged in the manufacture of combined chemical and explosive products such as, but not limited to, bullets, shotgun shells, caps, fuses, pellets, dynamite, grenades, or other munitions. Raw materials include, but are not limited to, ammonia, nitrates and other chemicals, fertilizer, powders, shell casings, projectiles, and boosters. The process includes screening, grinding, mixing, blending, loading into casings, and packaging for shipment according to product being made. The manufacturing of the casings and loading of the explosives are included in this classification when performed by employees of an employer subject to this classification.

This classification excludes establishments engaged in the manufacture of fireworks which are to be reported separately in classification 4601-01; establishments engaged in the manufacture of explosive powder which are to be reported separately in classification 4601-02; and establishments engaged exclusively in chemical manufacturing which are to be reported separately in classification 3701.

WAC 296-17A-4802 Classification 4802.**4802-02 Farms: Berry**

Applies to establishments engaged in raising berries of all types. Work contemplated by this classification includes,

but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, pruning canes, cutting runners, installing posts and wire supports, tying vines, machine harvesting of berries, and installing or maintaining sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes roadside fruit stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately in classification 6403 provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes fresh fruit packing operations which are to be reported separately in classification 2104; fruit cannery or freezer operations which are to be reported separately in classification 3902; winery operations which are to be reported separately in classification 3702; hand harvesting of berries which is to be reported separately in classification 4806; and any contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as, but not limited to, weeding, planting, irrigating, or fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4802-03 Farms: Bulb raising

Applies to establishments engaged in raising flowers and plants for bulbs. Work contemplated by this classification may take place in an open field or a greenhouse. Farming activities include, but are not limited to, preparing soil for new plants; planting, fertilizing, weeding, dead heading or cutting flowers, maintaining or installing sprinkler or irrigation systems, and machine digging and harvesting bulbs when performed by employees of an employer subject to this classification. Any subsequent grading, sorting, packing and shipping of bulbs is included within the scope of this classification as are roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes establishments engaged exclusively in the sale of fresh cut flowers and potted plants who are not involved in the cultivation of plants or flowers

(2007 Ed.)

which are to be reported separately in classification 6404; hand picking of bulbs which is to be reported separately in classification 4806; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as, but not limited to, weeding, planting, irrigating, or fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4802-06 Picking of forest products, N.O.C.

Applies to establishments engaged exclusively in picking forest products that are not covered by another classification (N.O.C.) such as, but not limited to, holly, ferns, cones, cedar boughs, mushrooms, wild flowers, wild berries, moss, and tree bark. Work contemplated by this classification is limited to hand picking operations and is often accomplished through the aid of hand held cutting devices such as pruning shears or saws. Properties from which products are harvested from may be owned or leased. Operations not described above are to be reported separately in the classification applicable to the work being performed.

Special note: The farm labor contractor provision, as described in the general reporting rules, is not applicable to this classification as such establishments are not engaged in a farming operation.

4802-11 Farms: Flower or vegetable seeds

Applies to establishments engaged in raising flowers, flowering plants or vegetable plants for seed. Work contemplated by this classification may take place in an open field or a greenhouse. Farming activities include, but are not limited to, preparing soil for new plants, planting, fertilizing, weeding, machine harvesting seeds, cutting fresh flowers, harvesting incidental fresh vegetables, maintaining or installing sprinkler or irrigation systems, and drying of the seed. Any subsequent grading, sorting, packing and shipping of seeds is included within the scope of this classification as is the incidental sale of fresh cut flowers or vegetables from roadside stands located at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes fresh vegetable packing operations which are to be reported separately in classification 2104; cannery or freezer operations which are to be reported separately in classification 3902; establishments engaged exclusively in the sale of fresh cut flowers and potted plants who are not involved in the cultivation of plants or

flowers which are to be reported separately in classification 6404; hand gathering of seeds where no hand held cutting device is used which is to be reported separately in classification 4806; establishments engaged exclusively in the sale of fresh vegetables but are not involved in the cultivation of plants which are to be reported separately in classification 6403; and any contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4802-12 Farms: Field vegetable crops - mechanically harvested

Applies to establishments engaged in raising field vegetable crops *which are mechanically harvested*. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, pruning, machine harvest of vegetables, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met. Typical crops include the following:

Beans, Green	Parsnips	Squash
Beets, Table	Potatoes	Tomatoes
Carrots	Radishes	Turnips
Corn, Sweet	Rhubarb	
Cucumbers	Rutabagas	

This classification excludes fresh vegetable packing operations which are to be reported separately in classification 2104; cannery or freezer operations which are to be reported separately in classification 3902; and any contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported in the classification applicable to the work being performed.

Special note: This classification differs from classification 4808 "diversified field crops" in that vegetable crops grown subject to classification 4808 generally have a long growing season and are harvested upon reaching maturity at the end of the season. Vegetable crops grown in classification 4802 are generally planted so that harvesting will occur continuously over the season and in smaller quantities. Although

corn is technically a grain crop, it is widely accepted as a vegetable crop when harvested for fresh market as opposed to being left in the field to dry and used as feed, flour, or cereal grain. Corn grown subject to classification 4802 is for a fresh market, cannery or frozen food while the corn grown in classification 4808 is for grain, flour and feed.

The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4802-13 Farms: Flowers - field growing Farms: Florists - cultivating or gardening

Applies to establishments engaged in raising flowers and flowering plants for sale. Work contemplated by this classification may take place in an open field or a greenhouse. Farming activities include, but are not limited to, preparing soil for new plants, planting, fertilizing, weeding, cutting fresh flowers, and maintaining or installing sprinkler or irrigation systems. Any subsequent grading, sorting, packing and shipping of flowers is included within the scope of this classification as is the incidental collection of flower seed for use in future crops. This classification includes roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes establishments engaged exclusively in the sale of fresh cut flowers and potted plants who are not involved in the cultivation of plants or flowers which are to be reported separately in classification 6404 and any contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808-11 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

WAC 296-17A-4803 Classification 4803.

4803-02 Farms: Orchards - fruit tree crops

Applies to establishments engaged in operating fruit orchards of all types. Work contemplated by this classification includes, but is not limited to, preparing soil for new trees, planting trees, fertilizing, spraying, fumigating, weeding, pruning, harvesting tree fruit, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes fresh fruit packing operations which are to be reported separately in classification 2104; fruit cannery or freezer operations which are to be reported separately in classification 3902; winery operations which are to be reported separately in classification 3702; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: Prune harvesting is often accomplished by a person laying a canvas cover around the base and surrounding area of the tree. The tree is then shaken by hand causing the fruit to dislodge and fall to the canvas cover where it is picked by hand. Harvesting done by this method is subject to classification 4806 provided that the conditions set forth in classification 4806 have been met. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

(2007 Ed.)

4803-04 Farms: Orchards - nut tree crops

Applies to establishments engaged in operating nut producing orchards of all types. Work contemplated by this classification includes, but is not limited to, preparing soil for new trees, planting trees, fertilizing, spraying, fumigating, weeding, pruning, machine harvesting of nuts, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes the incidental sale of bulk or packaged nuts at roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes nut shelling and packaging operations which are to be reported separately in classification 3902; ground hand picking of nuts which is to be reported separately in classification 4806; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: Nut harvesting is often accomplished by a person laying a canvas cover around the base and surrounding area of the tree. The tree is then shaken by hand causing the nuts to dislodge and fall to the canvas cover where they are picked by hand. Harvesting done by this method is subject to classification 4806 provided that the conditions set forth in classification 4806 have been met. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4803-16 Farms, N.O.C.

Applies to establishments engaged in operating farms not covered by another classification (N.O.C.). Establishments in this classification include holly farms and the raising of sheep, goats, alpacas and llamas. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, pruning and otherwise maintaining trees, tending and feeding animals, raising crops for feed, erecting or mending fences, breeding animals, transporting animals to market, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification also covers artificial insemination and veterinary care when performed by employees of an employer subject to this classification.

This classification excludes businesses primarily engaged in holly packing or wreath making who are to be reported separately in classification 6404 (florists), and con-

tractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

WAC 296-17A-4804 Classification 4804.

4804-00 Farms: Poultry

Applies to establishments engaged in operating poultry farms of all types. Poultry farms covered by this classification may be engaged in breeding and raising birds for human consumption or for sale to research laboratories or egg production farms. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, tending, feeding and watering birds, raising crops for feed, erecting or mending fences, cages and pens, breeding birds, cleaning pens and cages, transporting animals to market, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification.

This classification excludes feed milling operations which are to be reported separately in classification 2101; the butchering and processing of poultry which is to be reported separately in classification 3304; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4804-03 Farms: Egg production

Applies to establishments engaged in operating egg production farms. Farms covered by this classification may also be engaged in raising brood stock for future egg production or sale to other farms. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, tending, feeding and watering birds, raising crops for feed, erecting or mending fences, cages and pens, breeding birds, cleaning pens and cages, transporting eggs to market, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification also includes any related packing or grading of eggs by farm employees, farm stand operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations may qualify to have those activities reported separately if the conditions as a multiple business is met.

This classification excludes feed milling operations which are to be reported separately in classification 2101; the butchering and processing of poultry which is to be reported separately in classification 3304; and contractors hired to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4804-05 Farms: Fur bearing animals

Applies to establishments engaged in raising fur bearing animals such as mink, fox and chinchilla for pelts (skins) or for sale. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, tending and breeding, feeding and killing animals, fleshing and drying skins, erecting or mending fences, erecting or maintaining kennels or cages, cleaning cages and kennels, and veterinary care when performed by employees of an employer subject to this classification.

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as feeding animals, grooming, and cleaning kennels. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machin-

ery is the same irrespective of the type of farm they are providing service to.

4804-06 Farms: Worm

Applies to establishments engaged in raising worms. Work contemplated by this classification includes, but is not limited to, the preparation of soils and soil mixes, maintaining proper soil moisture to encourage worm growth and reproduction, digging worms, sorting and packaging.

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, preparing soils, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to.

4804-07 Farms: Apiaries (bees)

Applies to establishments engaged in raising honey bees for making honey or for sale to growers or farmers who use them as pollinators or to laboratories or research centers. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, building structures to accommodate bee hives, collecting honey from hives, and growing vegetation and plants to support the production of honey or population of bees. This classification also includes the incidental processing and packaging of honey, honey comb and bees wax and the sale of honey at roadside stands located at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations may qualify to have those activities reported separately if the conditions in the multiple enterprise section of the general reporting rules are met. The raising of insects such as crickets has also been assigned to this classification as is the collection of bees and bee hives from unrelated properties.

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as collecting hives or bees, preparing soils for crops, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to.

(2007 Ed.)

4804-08 Farms: Aviaries (birds)

Applies to establishments engaged in raising all varieties of birds including game birds and exotics such as, but not limited to, emu and ostrich for sale to pet dealers, other aviaries, retail customers, and laboratories or research centers. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, tending, feeding and watering, raising crops for feed or protective covering, erecting or mending fences, cages, coops and pens, breeding birds, cleaning pens, cages and coops, transporting birds to market, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification also includes any store operations.

This classification excludes feed milling operations which are to be reported separately in classification 2101 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as collecting hives or bees, preparing soils for crops, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to.

4804-09 Egg grading, candling and packing

Applies to establishments engaged in grading, candling, and packing eggs for either retail or wholesale markets. Work contemplated by this classification includes, but is not limited to, sorting, grading, washing, candling, packing eggs into cartons or crates, and transporting eggs to market. Establishments assigned to this classification are not engaged in raising poultry or operating egg production farms. This classification includes store operations located at or near the packaging facility.

This classification excludes establishments engaged in egg breaking which are to be reported separately in classification 3902.

Special note: The farm labor contractor provision is not applicable to this classification as such establishments are not engaged in a farming operation.

WAC 296-17A-4805 Classification 4805.

4805-00 Nurseries, N.O.C.

Applies to establishments not covered by another classification (N.O.C.) that are engaged in the propagation and/or care of trees, shrubs, plants, and flowers pending sales to other

ers. Nurseries can be categorized into two general groups in that some nurseries are actively engaged in the propagation of trees, plants, and shrubs from seed, grafting or cuttings, while others simply buy stock from growers and resell to the public or to commercial customers. Work contemplated by this classification includes, but is not limited to, preparing soil for new trees, shrubs or plants, propagating trees, shrubs or plants, fertilizing, spraying, fumigating, watering and weeding plants, trees and shrubs, pruning trees and shrubs, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes incidental greenhouses which are typically maintained for the purpose of starting new plants, shrubs or trees and protecting plants from weather conditions. Greenhouses may also serve as holding areas for garden supplies, fertilizer, planting containers, and tools which are available for sale to the public. This classification also includes the incidental sale of bark, soils, decorative or crushed rock, and store operations. This classification does not apply to establishments engaged in propagating trees in connection with an orchard operation or Christmas tree farm which are to be reported separately in classification 4803 or classification 7307 as applicable, or to landscaping contractors who may raise plants, trees or shrubs to be used in connection with their own landscaping jobs who are to be reported separately in classification 0301 or 0308 as applicable.

This classification excludes establishments engaged in growing and harvesting flowers for sale to others which are to be reported separately in classification 4802 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4805-05 Nurseries: Tree

Applies to establishments engaged in the propagation and/or care of trees for sale. Nurseries can be categorized into two general groups in that some nurseries are actively engaged in the propagation of trees from seed and grafting while others simply buy stock from growers and resell to the public or commercial customers. Work contemplated by this classification includes, but is not limited to, preparing soil for new trees, propagating trees, fertilizing, spraying, fumigating, watering, weeding, and pruning trees, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes incidental greenhouses which are typically maintained for the purpose of starting new trees and protecting them from weather conditions. Greenhouses may

also serve as holding areas for garden supplies, fertilizer, planting containers, and tools which are available for sale to the public. This classification also includes the incidental sale of beauty bark, soils, decorative or crushed rock, and store operations.

This classification excludes establishments engaged in propagating trees in connection with an orchard operation or Christmas tree farm which are to be reported separately in classification 4803 or classification 7307 as applicable; landscaping contractors who may raise trees to be used in connection with their landscaping jobs who are to be reported separately in 0301 or 0308 as applicable; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4805-06 Farms: Sod growing

Applies to establishments engaged in raising lawn sod for sale. Work contemplated by this classification includes, but is not limited to, preparing soil for new grass, planting grass seed, fertilizing, spraying, fumigating, watering, weeding, mowing grass, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. Sod farms may sell directly to the public from the farm or through landscape dealers and contractors.

This classification excludes the installation of sod at a customer's location; landscaping contractors who may raise sod to be used in connection with their landscaping jobs; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported in separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4805-07 Farms: Aquatic plants

Applies to establishments engaged in the propagation of aquatic plants for sale. Work contemplated by this classification includes, but is not limited to, preparing aquatic tanks,

fresh water ponds or salt water growing areas for new plants, care of aquatic growing beds including chemical treatments of beds to eliminate undesirable vegetation, and harvesting and packaging plants when performed by employees of an employer subject to this classification. Aquatic farms may sell plants directly to the public from the farm or through dealers and unrelated stores. This classification includes farm store operations.

This classification excludes establishments engaged in the harvesting, processing, or packaging of aquatic plants obtained from natural areas, where the husbandry of the resource is not an integral part of the operation, which are to be reported separately in classification 3304 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4805-08 Farms: Shellfish

Applies to establishments engaged in the propagation, and harvesting, of shellfish for sale. Work contemplated by this classification includes, but is not limited to, preparing aquatic tanks or salt water growing areas for shellfish; care of aquatic growing beds including chemical treatments of beds to eliminate undesirable vegetation; and harvesting, shucking and packaging shellfish when performed by employees of an employer subject to this classification. Shellfish farms may sell directly to the public from a farm stand or store, located at or near the farm, or to dealers and unrelated stores.

This classification excludes establishments engaged in the harvesting, processing or packaging of shellfish obtained from natural areas of nonnavigable waters where the husbandry of the resource is not an integral part of the operation which are to be reported separately in classification 3304, employees working on or from a vessel, as a captain or member of that vessel's crew, who are to be insured under the federal Jones Act according to the provisions of maritime law, and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special notes: The distinction between risks assigned to this classification (4805-08) and those which are subject to the federal Jones Act is in the location of the work activity. Risks subject to classification 4805 are engaged in hand harvesting activities which includes the use of hand held tools or mechanical harvesting operations not on navigable waters, while those subject to the Jones Act are engaged in activities on a vessel while on navigable waters. The term "farm labor contractor" applies to specialty contractors who supply labor-

ers to a farm operation for specified services such as seeding of larvae to mother shells and planting shells to natural waters. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to.

4805-09 Christmas tree sales from U-cut or retail sales lots

Applies to establishments engaged in retail sales of Christmas trees. Work contemplated by this classification is limited to placing trees in stands or on racks for display purposes, showing trees to retail customers, cashiering, monitoring and directing traffic in the sales lot area, and loading trees into customer vehicles. Tree sales may be conducted at a farm location as in the case of a U-cut tree operation or at a seasonal sales lot.

This classification excludes all farming operations such as, but not limited to, preparation of soil for new trees, propagating and planting trees, fertilizing, spraying, fumigating, watering, weeding, pruning, and harvesting of trees, maintaining or installing sprinkler or irrigation systems which are to be reported separately in classification 7307; Christmas tree wholesalers and Christmas tree baling and packing operations which are to be reported separately in classification 7307; and contractors hired to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special notes: Establishments assigned to this classification (4805-09) should report hours in this classification *only during the fourth quarter of each year* since these sales are confined to the Christmas season. The farm labor contractor provision is not applicable to this classification as such establishments are not engaged in a farming operation.

WAC 296-17A-4806 Classification 4806.

4806-01 Farms: Nuts, berries, prunes, or field flowers and bulbs - hand harvesting

Applies to those employees of an employer who are engaged *exclusively* in hand harvesting nuts, berries, prunes, or field flowers or bulbs. This classification is limited to the harvest of crops which are picked from trees or from the ground, by hand and by a worker either sitting, kneeling, bending, stooping, or standing on the ground. This classification excludes any operation where ladders, stools, or other

climbing devices are used; all operations where harvesting is accomplished or aided with hand held cutting devices or tools, and any mechanical picking or harvesting equipment including incidental workers who may or may not follow behind such machinery and collect the harvested crops by hand; the picking of wild berries or other products in forests or other lands not associated with farming operations; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: Classification 4806 is not to be assigned to any grower as the single farming classification. Refer to classification 4802 for berry or flower and bulb raising operations and to classification 4803 for orchard operations.

[07-01-014, recodified as § 296-17A-4806, filed 12/8/06, effective 12/8/06. WAC 296-17A-4808 Classification 4808.

4808-01 Farms: Diversified field crops

Applies to establishments engaged in growing a variety of grain, vegetable, or grass crops during a single season. Work contemplated by this classification includes, but is not limited to, preparing the soil for new crops, planting, fertilizing, weeding, harvesting, and maintaining or installing sprinkler or irrigation systems. Any subsequent grading, sorting, packing and shipping of farm products grown subject to this classification is included within the scope of this classification. This classification includes roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met. Typical crops include the following:

Alfalfa	Garlic	Rye
Barley	Grain	Sugar Beets
Beans, Dry	Grass Seed	Timothy
Clover	Hay	Wheat
Corn	Peas, Dry	

This classification excludes fresh vegetable packing operations which are to be reported separately in classification 2104; cannery or freezer operations which are to be reported separately in classification 3902; establishments engaged exclusively in the sale of fresh vegetables who are not involved in the cultivation of plants which are to be reported separately in classification 6403; and contractors hired by a farm operator to install, repair or build any farm

equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: This classification differs from classification 4802 "vegetable farm operations" in that vegetable crops grown subject to classification 4808 generally have a long growing season and are harvested upon reaching maturity at the end of the season. Vegetable crops grown in classification 4802 are generally planted so that harvesting will occur continuously over the season and in smaller quantities. See classification 4802-12 for additional information. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4808-02 Farms: Alfalfa, clover and grass seed

Applies to establishments engaged exclusively in raising alfalfa, clover, and grass crops for seed. Work contemplated by this classification includes, but is not limited to, preparing soil for crops, planting, fertilizing, machine harvesting, maintaining or installing sprinkler or irrigation systems, and drying of seed. Any subsequent grading, sorting, packing and shipping of seeds is included within the scope of this classification. Also included is the incidental sale of farm products from roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale.

This classification excludes establishments engaged in grading, sorting, and packaging seeds; or selling baled alfalfa or clover who are not engaged in growing operations which are to be reported separately in classification 2101; establishments engaged exclusively in grain or seed storage who are not engaged in growing operations which are to be reported separately in classification 2007; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4808-04 Farms: Hay

Applies to establishments engaged exclusively in raising hay or straw grass for sale, and includes the raising of such crops for seed. Work contemplated by this classification

includes, but is not limited to, preparing soil for crops, planting, fertilizing, machine harvesting, maintaining or installing sprinkler or irrigation systems, and drying of seed. Any subsequent grading, sorting, packing and shipping of seeds is included within the scope of this classification. Also included is the incidental sale of farm products from roadside stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale.

This classification excludes establishments engaged in grading, sorting, and packaging seeds, or selling baled hay who are not engaged in growing operations which are to be reported separately in classification 2101 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4808-06 Farms: Cereal grain

Applies to establishments engaged in growing cereal grain crops. Work contemplated by this classification includes, but is not limited to, preparing the soil for new crops, planting, fertilizing, weeding, harvesting, and maintaining or installing sprinkler or irrigation systems. Any subsequent grading, sorting, packing and shipping of farm products grown subject to this classification is included within the scope of this classification. Also included is the incidental sale of farm products from roadside stands or operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Typical cereal grain crops include the following:

- | | |
|--------|-------|
| Barley | Rye |
| Corn | Wheat |

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special notes: See classification 4802-12 for additional information relative to corn. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machin-

ery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4808-07 Potato sorting and storage

Applies to establishments engaged in storing potatoes in storage warehouses or cellars. Work contemplated by this classification is limited to sorting the good potatoes from damaged ones or from debris such as vines or rocks, piling them into the storage area by size, and storing them until they are taken to processing or packing plants. Sorting may be done either in the field or at a storage warehouse. This classification also includes potato digging and piling when performed by employees of an employer engaged in storing potatoes but who is not engaged in growing potatoes.

This classification excludes fresh vegetable packing operations which are to be reported separately in classification 2104; cannery or freezer operations which are to be reported separately in classification 3902; potato chip manufacturing which is to be reported separately in classification 3906; establishments engaged exclusively in the sale of fresh vegetables who are not involved in the cultivation of plants which are to be reported separately in classification 6403; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The farm labor contractor provision is not applicable to this classification as such establishments are not engaged in a farming operation.

4808-08 Custom hay baling

Applies exclusively to a specialist farm labor contractor engaged in mowing, turning, and baling hay owned by others. This classification also includes the incidental loading of hay onto trucks and stacking of hay in a barn or warehouse when performed by employees of a specialist farm labor contractor engaged in mowing, turning, and baling hay for others.

Special note: The farm labor contractor provision is not applicable to this classification as such establishments are not engaged in a farming operation.

4808-11 Custom farm services by contractor

Applies exclusively to contractors engaged in supplying and operating agricultural machinery and equipment at their customer's locations. Work contemplated by this classification involves preparing fields for crops, planting and cultivating crops, fertilizing, and harvesting operations using machinery and equipment such as, but not limited to, tractors, plows, fertilizer spreaders, combines, reapers, potato diggers, boom loaders and pickers. Contractors subject to this classification are generally not responsible for the overall care of the crops, but are merely hired to provide specified services, which involve the use of machinery and employee equipment operators. This classification also includes seasonal agricultural produce hauling from the field to a processing or storage plant when performed by employees of an employer not engaged in the related farming operations associated with the crop being hauled.

WAC 296-17A-4809 Classification 4809.

4809-01 Greenhouses, N.O.C.

Applies to establishments engaged in raising plants exclusively within greenhouses not covered by another classification (N.O.C.). Such establishments may specialize in growing only indoor, outdoor, or vegetable plants, while others will grow all types. The primary distinction between classification 4809 and other classifications where similar plants are grown is the exclusive use of greenhouses for the growing operations. Establishments subject to this classification will not have outdoor growing fields. All growing areas are confined to greenhouse operations. Work contemplated by this classification includes, but is not limited to, preparation of soils, planting seeds or cuttings into pots and trays, and watering and fertilizing plants. This classification includes related sales of plants and store operations.

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4809-04 Farms: Mushrooms

Applies to establishments engaged in the raising and harvesting of mushrooms for sale. Work contemplated by this classification includes, but is not limited to, preparation and sterilization of compost material, seeding composted trays, monitoring humidity and temperature controlled growing rooms, moving trays from growing rooms, harvesting mushrooms, and grading and sorting mushrooms. This classification also includes fresh packing of mushrooms for sale to others.

This classification excludes all cannery or freezer operations which are to be reported separately in classification 3902 and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigat-

ing and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported separately in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4809-05 Farms: Sprouts

Applies to establishments engaged in the raising and harvesting of bean and alfalfa sprouts using hydroponic growing methods. Hydroponics growing is a method whereby vegetable crops are raised in trays and tanks within a temperature controlled building in a water solution containing inorganic nutrients. Work contemplated by this classification includes, but is not limited to, preparation and cleaning of tanks and trays, preparation of water solutions, planting of seed into water solution, harvesting, and packaging of crops.

This classification excludes contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors that supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

WAC 296-17A-4810 Classification 4810.

4810-00 Farms: Field vegetables and herbs, N.O.C. - hand harvesting

Applies to establishments engaged in raising vegetables and herbs *which are harvested by hand* for sale and which are not covered by another classification (N.O.C.). Harvesting by hand could include the use of a hand-held cutting tool. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, pruning, hand harvest of vegetables, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes the incidental sale of fresh vegetables from roadside stands operated at or near the farm and farm store operations where a small stock of products not

produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately provided all the conditions of the general reporting rules covering the operation of a secondary business are met. Typical crops include the following:

Asparagus	Carrots	Lettuce	Rutabagas
Beans, Green	Cauliflower	Onions, Green	Spinach
Beets, Table	Celery	Parsnips	Squash
Broccoli	Corn, Sweet	Peppers	Tomatoes
Brussels Sprouts	Cucumbers	Radishes	Turnips
Cabbage	Kale	Rhubarb	

This classification excludes fresh vegetable packing operations which are to be reported separately in classification 2104; cannery or freezer operations which are to be reported separately in classification 3902; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special notes: This classification differs from classification 4802 "field vegetable crops" in that vegetable crops grown subject to classification 4802 are machine harvested or harvested using a combination of machine and hand labor while vegetable crops covered in classification 4810 are harvested exclusively by hand. See classification 4802-12 for additional information. The term "farm labor contractor" applies to specialty contractors that supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

WAC 296-17A-4811 Classification 4811.

4811-00 Farms: Hops

Applies to establishments engaged in raising hops for sale. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, installing poles and wires, maintaining or installing sprinkler or irrigation systems, harvesting hops, the initial drying and baling, and all other operations incidental to the activity described above when done by employees of an employer subject to this classification. Any further processing of hops after the initial drying and baling is excluded.

This classification excludes establishments engaged in the production of hop pellets which are to be reported separately in classification 2101; establishments engaged in the

manufacture of a liquid hop extract which are to be reported separately in classification 3701; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special notes: Hops is one of several ingredients used to flavor beer. Extra care should be taken when dealing with hop farms and processing plants to verify the operation and applicable classification. The term "and all other operations incidental to the activity described above" refers only to maintenance type work like mending fences, fixing or servicing kiln dryers, and working on tractors and equipment. The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

4811-01 Farms: Mint

Applies to establishments engaged in raising mint for sale. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, maintaining or installing sprinkler or irrigation systems, harvesting mint, and mint distillation when performed by employees of an employer subject to this classification.

This classification excludes establishments engaged exclusively in the distillation of mint leaves to obtain a mint extract or mint oil who are not engaged in the raising of mint crops, which are to be reported separately in classification 3701, and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

WAC 296-17A-4812 Classification 4812.**4812-00 Farms: Fin fish and shell fish hatcheries**

Applies to establishments engaged in hatchery operations for the raising of fin or shellfish, or their eggs. Work contemplated by this classification includes, but is not limited to, spawning of larvae, growing and testing algae (food for shellfish in larvae stage), seeding of shells in tanks, loading of seeded shells for shipment or transportation to natural waters, spawning fin fish, harvesting, and management of water flow temperature and exchange rate, and laboratory work when performed by employees of an employer subject to this classification. The term "harvest" includes the sale of seeded shells, larvae, fish eggs, and whole fish.

This classification excludes the placement of seeded shells or larvae into natural waters, harvesting of mature shellfish or the related processing and packaging of shellfish which are to be reported separately in classification 3304 or 4805 as applicable, and contractors hired by a farm operator to install, repair or build any hatchery equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: See classifications 4805 for related information. The farm labor contractor provision is not applicable to this classification.

WAC 296-17A-4813 Classification 4813.**4813-00 Vineyards**

Applies to establishments engaged in the planting, cultivating, pruning, and harvesting of grapes. Work contemplated by this classification includes, but is not limited to, preparing soil for new plants, planting, fertilizing, weeding, pruning vines, installing posts and wire supports, tying vines, machine or hand harvest of grapes, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification includes roadside fruit stands operated at or near the farm and farm store operations where a small stock of products not produced by the operation subject to this classification may also be offered for sale. Farms operating multiple retail locations, such as those found in parking lots of shopping centers or at farmer's markets, may qualify to have those activities reported separately in classification 6403 provided all the conditions of the general reporting rules covering the operation of a secondary business are met.

This classification excludes fresh fruit packing operations which are to be reported separately in classification 2104; fruit cannery or freezer operations and jam or syrup manufacturing which are to be reported separately in classification 3902; winery operations which are to be reported separately in classification 3702; and contractors hired by a farm operator to install, repair or build any farm equipment or structures who are to be reported separately in the classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors that supply laborers to a farm operation for specified services such as weeding, planting, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. These farm labor contractors are to be reported in the classification that applies to the farm they are contracting with. WAC 296-17A-4900 Classification 4900.**4900-00 Construction: Superintendent or project manager**

Applies to those employees, of general or specialty construction contractors, whose job duties are exclusively that of construction superintendents or project managers. Construction superintendents spend some time in an office and spend the remainder of time visiting various job sites to confer with construction foreman to keep track of the progress occurring at each construction site or project location. Project managers are generally stationed at the construction site or project location and confined to a temporary type of office to schedule activities and arrival of supplies such as the delivery of iron, steel, rebar, lumber, concrete ready mix, concrete pump truck services, and cranes.

This classification excludes construction superintendents or project managers who are employed by a business that specializes in offering construction management and consulting services. These businesses do not do any of the actual construction or erection activities and are to be reported separately in classification 4901.

Special notes: This classification is a special exception classification and as such is not treated as nor subject to normal rules of the construction classifications. This classification is applicable *only* to construction superintendents or project managers who have no direct control over work crews and do not perform construction labor at the construction site or project location. A superintendent or project manager performing duties subject to this classification who also is engaged in operating equipment, performing manual labor, or who directly supervises a work crew at the construction site or project location is excluded from this classification. They are to be reported separately in the applicable construction or erection classification assigned to their employer without any division of hours. *A division of hours is not permitted between classification 4900 and any other classification.* Under no circumstances can this be the only classification assigned to a contractor, as a basic construction classification must also be assigned.

WAC 296-17A-4901 Classification 4901.

4901-00 Consulting engineering Architectural services, N.O.C.

Applies to establishments engaged in providing consulting engineering services, construction management or consulting services, or architectural services not covered by another classification (N.O.C.). Engineers consult with and give technical advice to clients through the use of plans, maps, charts, specifications or other media. They may specialize in particular fields of endeavor such as aeronautical, chemical, civil, electrical, industrial, marine, mechanical or structural engineering. Engineers may research, design and develop a plan, a part, a piece of equipment, or a structure and may also build prototypes and models. Architects research, plan and design building projects for clients, applying knowledge of design, construction procedures, zoning and building codes, and building materials. They may enlist the services of engineers to provide specialized technical services or to solve specific problems. Architects may specialize in certain types of facilities such as hotels, hospitals, or industrial plants, or in the restoration of older structures, or may confine their practice to residential work. They also may be involved in the design of transportation facilities, public assembly complexes, marine or public utility projects. This classification includes employees of engineering or architectural services who perform surveys or who act as project managers or project superintendents for their employer's engineering or architectural projects. Businesses which specialize in offering construction management and/or consulting services, which are not involved in designing, engineering, or any of the actual construction activities, are also included in this classification.

This classification excludes draftsmen whose duties are limited to office work, who may be reported separately in classification 4904 provided the conditions set forth in the standard exception rule have been met, and the engineering and architectural staff of construction companies or other types of businesses who are to be reported in the classifications applicable for those businesses.

Special note: When assigning classifications 4901 or 1007, care must be taken to look beyond the words "consulting" or "engineering" to determine the actual nature of the activities being performed.

4901-16 Geologists, N.O.C.

Applies to establishments engaged in providing geological services, including oil or gas geologists or scouts and lease buyers performing work similar to oil geologists, not covered by another classification. Geologists study the composition, structure, and history of the earth's crust to identify and determine the sequence of processes affecting the development of the earth. By applying knowledge of chemistry, physics, biology and mathematics to explain these phenomena, they help locate mineral, geothermal, petroleum, and underground water resources. They will consult with and give technical advice to clients based on their findings. Projects may include, but are not limited to, landslide analy-

sis and correction, rock slope design, rock fall mitigation and control, and soil cut and embankment design. They also prepare geologic reports and maps, interpret research data, recommend further study or action, and may participate in environmental studies. Duties of oil or gas geologists or scouts and lease buyers include, but are not limited to, reviewing court records, interviewing lease holders, securing data for prospective oil or gas producing land, as well as procuring core or shale samples at drilling locations for analyzing. The oil or gas geologist also may explore and chart stratigraphic arrangement and structure of the earth to locate gas and oil deposits, evaluate results of geophysical prospecting, prepare maps and diagrams indicating probable deposits of gas and oil, as well as estimate oil reserves in proven or prospective fields and visit drilling sites. Scouts keep the client company informed of events in their region, attend local meetings, and report the findings on work.

This classification excludes geophysical exploration which is to be reported separately in classification 1007; seismic geophysical exploration which is to be reported separately in classification 0103; and geologists or scouts of a drilling or construction contractor who are to be reported separately in the classification applicable to the employer's business.

Special note: When assigning classifications 4901-16, geologists, 1007-08, geophysical exploration, and 0103, seismic geophysical exploration, care must be taken to look beyond the word "geologist" to determine the actual nature of the activities being performed.

4901-17 Land surveying services, N.O.C.

Applies to establishments engaged in providing professional land surveying services not covered by another classification (N.O.C.). Land surveyors measure the size and physical characteristics of earth surfaces to determine precise location and measurements of points, elevations, lines, areas, contours and boundaries for private, public, and commercial applications. Some firms also perform marine, mine, forestry, geological and photogrammetric surveys which utilize sophisticated instruments and techniques, including aerial photography. The field data collected by surveyors may be used to produce maps and architectural and civil engineering plans and drawings. Maps and drawings may be produced by drafters who plot out the field data by hand or by using computer-aided drafting programs.

This classification excludes draftsmen whose duties are limited to office work, who may be reported separately in classification 4904 provided all the conditions of the general reporting rules covering standard exception employees have been met, and surveyors employed by construction companies or other types of businesses who are to be reported separately in the applicable classifications for those businesses.

WAC 296-17A-4902 Classification 4902.**4902-00 State government clerical and administrative office personnel**

Applies to state employees who are assigned to work in an office environment in a clerical or administrative capacity, with no field duties. The work performed in this classification normally includes working with telephones, correspondence, creating financial, employment, personnel or payroll records, research, composing informational material at a computer, creating or maintaining computer software, or library work, but may include other administrative work performed in an office location. For the purpose of this classification, employees reported in 4902 would have no field work or routine travel outside of the office, other than occasional errands, a trip to the bank or post office, attendance at training, meetings or a conference in support of their normal duties. This classification may include, but is not limited to, jobs such as office support, secretary, administrative assistant, customer service representative, accountant, fiscal analyst, information systems, when normal job duties do not require travel and are completed in an office environment.

This classification excludes: Employees whose duties include field exposure, employees who may be called upon to restrain individuals or participate in recreational activities in state hospitals, schools, homes, detention or correctional facilities, who are to be reported separately in the appropriate classification (5307, 7103, or 7201); administrative field employees who are to be reported separately in risk classification 5300; law enforcement officers in any capacity who are to be reported separately in risk classification 7103; employees who provide patient or health care at state-operated mental health or acute care hospitals with a fully implemented safe patient handling program who are to be reported in classification 7200; employees who provide patient or health care at state-operated mental health or acute care hospitals that do not have a fully implemented safe patient handling program who are to be reported separately in classification 7400; employees who provide patient or health care and work in state hospitals, homes, schools, detention or correctional facilities who are not otherwise classified who are to be reported separately in risk classification 7201. Volunteers are to be reported in classification 6901, and law enforcement volunteers in classification 6906.

This classification may be assigned to all departments, agencies, boards, commissions and committees of either the executive, legislative or judicial branches of state government.

Special notes: A division of hours is not permitted between classification 4902 and any other classification. For purposes of this classification the term "clerical and administrative office personnel" shall have the same meaning as "clerical office employees" defined in the standard exception provision of the general reporting rule.

WAC 296-17A-4903 Classification 4903.**4903-06 Marine appraising**

Applies to establishments engaged in providing marine appraisal services. Type of property appraised includes, but is not limited to, boats, yachts, marinas, wharves, and dry-docks. This service may be provided to a prospective buyer or to insurance companies for determining the value of a piece of property or for evaluating damage.

This classification excludes maritime appraisers who provide their service exclusively to insurance companies who are to be reported separately in classification 4903-09, and nonmaritime building appraisers who are to be reported separately in the classification applicable to the employer's business.

4903-07 Boiler inspecting, N.O.C.

Applies to establishments engaged in providing boiler inspection services not covered by another classification (N.O.C.). These establishments inspect pressurized vessels, including air tanks and liquefied gas tanks, in addition to boilers. The inspections involve determining if a vessel conforms to safety standards in regard to their design, fabrication, installation, repair and operation. The inspections may take place at a manufacturer's plant or where the vessel has been installed. These inspections will generally be conducted at the request of a manufacturer or an insurance company. Activities of the inspectors include, but are not limited to, inspecting the safety devices and welding, performing tests to verify the condition, calculating allowable limits of pressure, recommending changes to correct unsafe conditions, and investigating accidents involving pressurized vessels.

This classification excludes boiler inspectors employed by a state agency or municipality who are to be reported separately in the appropriate state agency or municipality classification; boiler manufacturing, repair or installation which is to be reported separately in the appropriate manufacturing, repair or installation classification; inspectors of the manufacturing company who are to be reported separately in the classification applicable to the employer's business; and establishments who provide inspections exclusively for insurance companies who are to be reported separately in classification 4903-09.

4903-08 Elevator inspecting

Applies to establishments engaged in providing elevator inspection services. Types of devices inspected include, but are not limited to, elevators, escalators, ski lifts, amusement rides and moving sidewalks. The inspections involve determining if the device conforms to safety standards in connection with their design, fabrication, installation, repair and operation. The inspections may take place at the manufacturing plant or where the conveyance device has been installed. These inspections are usually conducted at the request of a manufacturer or an insurance company. Activities of the inspectors include, but are not limited to, reviewing the design, inspecting the mechanical and electrical features, inspecting the cables and guide rails, conducting time tests for speed, computing allowable load, observing running and

drop tests to determine if brakes and safety devices are working properly, recommending changes to correct unsafe conditions, and investigating accidents involving conveyance devices.

This classification excludes elevator inspectors employed by a state agency or municipality who are to be reported separately in the appropriate state agency or municipality classification; repair or service to the elevator or conveyance device which is to be reported separately in the appropriate repair classification assigned to the type of conveyance device; inspectors employed by the manufacturer who are to be reported in the appropriate manufacturing classification; and establishments who provide inspection exclusively for insurance companies who are to be reported separately in classification 4903-09.

4903-09 Inspection for insurance or valuation

Applies to establishments engaged in providing inspection and valuation services exclusively for insurance companies. These establishments inspect damaged goods or property for loss valuation or to determine the value of an article or property the insurance company is underwriting. The property inspected includes, but is not limited to, personal property, real estate, and manufactured goods.

This classification excludes inspectors employed by a state agency or municipality who are to be reported separately in the appropriate state agency or municipality classification and boiler, elevator, or building inspectors or maritime appraisers who do not provide the service to insurance companies exclusively who are to be reported separately in classifications 4903-07, 4903-08, 4903-10 or 4903-06 as applicable and employees of insurance companies who are to be reported separately in the applicable classifications.

4903-10 Inspection of buildings

Applies to establishments engaged in providing building inspection services. These establishments inspect all types of buildings including new or existing residential, commercial, industrial, multifamily, and temporary structures. The inspections may be provided for prospective buyers to determine the condition of the building, for contractors to assist in interpreting legal requirements and recommending procedures for compliance, or for insurance companies in assessing damages. Activities of the inspectors include, but are not limited to, inspecting all components of a building for structural soundness, dry rot, pest problems, energy efficiency, and compliance with grading, zoning and safety laws.

This classification excludes building inspectors employed by a state agency or municipality who are to be reported separately in the appropriate state agency or municipality classification and establishments who provide inspections exclusively for insurance companies who are to be reported separately in classification 4903-09.

(2007 Ed.)

WAC 296-17A-4904 Classification 4904.

4904-00 Clerical office, N.O.C.

Applies to those employees whose job duties and work environment meet *all* the conditions of the general reporting rules covering clerical office standard exception employees who are not covered by another classification (N.O.C.) assigned to their employer's account. Duties of clerical office personnel contemplated by this classification are limited to answering telephones, handling correspondence, creating or maintaining financial, employment, personnel or payroll records, composing informational material on a computer, creating or maintaining computer software, and technical drafting.

Special note: When considering this classification, care must be taken to look beyond titles of employees. Employees with occupational titles such as, but not limited to, cashiers, clerks, or ticket sellers, may or may not qualify for this classification. This is a restrictive classification; the qualifying factor is that all the conditions of the general reporting rules covering standard exception employees have been met.

4904-13 Clerical office: Insurance companies, agents or brokers

Applies to clerical office employees of insurance companies, including insurance agents or brokers who perform duties exclusively of clerical nature and without an interchange of labor between clerical and nonclerical duties. This classification is limited to duties defined as responding to telephone inquiries, assisting walk-in customers, handling correspondence such as the preparation of insurance policies and billing, receiving and processing payments and invoices, maintaining personnel and payroll records, and performing the necessary computer work.

Special note: Individuals performing duties as an agent, broker, or solicitor (and hold a license as issued by the office of the insurance commissioner) are exempt from coverage as specified in RCW 51.12.020(11) and 48.17.010, 48.17.020, and 48.17.030. To elect voluntary coverage these individuals must submit a completed optional coverage form to the department. In addition, care should be exercised to determine if the insurance company employs individuals such as receptionists, bookkeepers, or claims clerks who perform clerical duties which may include the incidental taking of insurance applications and receiving premiums in the office of an agent or broker. Such individuals may or may not hold a license as issued by the office of the insurance commissioner, and are not deemed to be a solicitor, agent or broker when compensation is not related to the volume of such applications, insurance, or premiums. In these instances, the clerical individuals fall under mandatory workers' compensation coverage, and do not meet the requirements to be exempt from coverage as specified in RCW 51.12.020(11).

4904-17 Clerical office: Employee leasing companies

Applies to clerical office employees of employee leasing companies. This classification requires that clerical office employees perform duties exclusively of a clerical nature, without an interchange of labor between clerical and nonclerical duties, and that these duties be performed in an area or areas separated from the operative hazards of the business. This classification is limited to duties defined as responding

to telephone inquiries, receptionist and administrative duties, handling correspondence such as preparing and processing billing statements and forms, maintaining personnel and payroll records, and performing the necessary computer entry work.

Special note: This is a standard exception classification and is not to be assigned unless all the conditions of the general reporting rule covering clerical office standard exception employees have been met.

WAC 296-17A-4905 Classification 4905.

4905-04 Hotels or motels

Applies to establishments engaged in providing lodging and associated services to others. Accommodations included in this classification vary from a single room in a "bed & breakfast," to individual cabins, to luxury suites in a multi-story hotel. Hotel and motel operations may include a wide range of activities which are within the scope of this classification such as, but not limited to, housekeeping, laundry, bellhops, valets, shuttle service, maintenance personnel, and continental breakfast (if not in connection with a separate restaurant operation). Hotel and motel desk clerks with no other duties can be reported separately in classification 4904. Multiple classifications may be allowed for operations such as, but not limited to, shops, beauty salons, grocery stores, drug stores, newsstands, and service stations, provided no interchange of labor exists between operations. When an interchange of labor exists, the operations are to be assigned to classification 4905-04 without a division of hours.

This classification excludes restaurant and lounge employees which are to be reported separately in classification 3905 and other operations conducted by independent concessionaires which are to be reported separately in the applicable services or store classification.

WAC 296-17A-4906 Classification 4906.

4906-01 Institutions of higher education - public

Applies to *public* institutions of higher education such as universities, colleges, and junior colleges that have obtained state accreditation and are supported at least in part by public funds. Work contemplated by this classification includes, but is not limited to, administrative staff, professors/teachers, advisors, librarians, athletic coaches, medical staff at a hospital or research center run as part of the institution, restau-

rant/snack shop staff, campus security, janitorial/maintenance staff, clerical office and sales personnel.

This classification excludes private institutions of higher education which are to be reported separately in classification 4906-02 and secondary technical or vocational schools which are to be reported separately in classifications 6103 and 6104.

4906-02 Institutions of higher education - private

Applies to *private* institutions of higher education such as universities and colleges that have obtained state accreditation. These private institutions include any institution of higher education that is not supported by public funds. Work contemplated by this classification includes, but is not limited to, administrative staff, professors/teachers, advisors, librarians, athletic coaches, medical staff at a hospital or research center run as part of the institution, restaurant/snack shop staff, campus security, janitorial/maintenance staff, and clerical office.

This classification excludes public institutions of higher education which are to be reported separately in classification 4906-01 and secondary technical or vocational schools which are to be reported separately in classifications 6103 and 6104.

WAC 296-17A-4907 Classification 4907.

4907-00 Inmate work opportunity - state

Applies to state prisoners who are employed by the state prison in a tax reduction industry to provide goods or services only (regardless of the type) to tax-supported entities or non-profit organizations. Tax reduction industries provide basic work training and experience which qualify the inmates for better work within the prison or in the public community. Work is performed at the prison or at a separate location and the goods produced are property of the state.

This classification excludes work done by state prisoners under a free venture enterprise contract with a private business (profit or nonprofit) which is to be reported separately in the classification applicable to the work being performed.

4907-01 Inmate work opportunity - city

Applies to inmates of city jails who are employed by the city jail in a tax reduction industry to provide goods or services only (regardless of the type) to tax-supported entities or nonprofit organizations. Tax reduction industries provide basic work training and experience which qualify the inmates for better work within the jail or in the public community. Work is performed at the jail or at a separate location.

This classification excludes work done by city prisoners under a free venture enterprise contract with a private business (profit or nonprofit) which is to be reported separately in the classification applicable to the work being performed.

4907-02 Inmate work opportunity - county

Applies to inmates of county jails who are employed by the county jail in a tax reduction industry to provide goods or services only (regardless of the type) to tax-supported entities

or nonprofit organizations. Tax reduction industries provide basic work training and experience which qualify the inmates for better work within the jail or in the public community. Work is performed at the jail or at a separate location.

This classification excludes work done by county prisoners under a free venture enterprise contract with a private business (profit or nonprofit) which is to be reported separately in the classification applicable to the work being performed.

WAC 296-17A-4910 Classification 4910.

4910-00 Property management services

Applies to establishments engaged in managing their own rental property or properties owned by others. Properties include, but are not limited to, privately owned or commercial buildings, malls, apartment or condominium complexes, mobile home parks, halls, and conference rooms. Typical operations contemplated by this classification include, but are not limited to, management or clerical duties, advertising, showing vacant units to prospective tenants, collecting rent, providing security, and normal maintenance and repair when conducted by employees of employers subject to this classification.

(2007 Ed.)

Normal maintenance and repair contemplated by this classification includes replacing parts on existing fixtures or equipment, repairing existing structures, normal cleaning or janitorial activities, maintaining existing landscaping, and shoveling snow from driveways or walkways. Construction, alteration, or improvements to the properties are *not* considered normal maintenance and are *not* contemplated by this classification. Major repair work is usually performed by contractors who are not employees of the property management business. *Apartment or condominium complexes and mobile home parks* may have common areas such as, but not limited to, laundry facilities, community rooms, tennis courts, exercise rooms, swimming pools, saunas or hot tubs, and playgrounds or small park areas. Common areas are maintained by employees of the complex or park owner or by the property management service. Residents of mobile home parks are usually responsible for maintaining their own mobile homes and their immediate space.

This classification includes homeowners' associations where residents in a housing development pay annual fees which cover the maintenance of lawns, paths, sprinkler systems, and common areas such as pools, activity centers, and tennis courts by employees of the homeowners' association.

This classification excludes employees engaged exclusively in clerical duties who are to be reported separately in classification 4904; employees engaged exclusively in sales duties such as collecting rents, showing and advertising the facility, conducting auctions, or in a combination of clerical and sales duties who are to be reported separately in classification 6303; establishments providing janitorial services exclusively which are to be reported separately in classification 6602; contractors engaged in mobile home set up or removal who are to be reported separately in classification 0517; any new construction or alteration work performed by employees of employers subject to this classification which is to be reported separately in the applicable construction classification; establishments that contract to perform maintenance or repair, but have no responsibilities in the management of the property, which are to be reported separately in the applicable classification; and lodging or food serving operations which are to be reported separately in the applicable classification.

4910-01 Chimney cleaning - residential buildings

Applies to establishments engaged in providing chimney cleaning services to residential customers. Workers who perform chimney cleaning services are commonly referred to as "chimney sweeps" and usually work alone or as a two-person team. When working as a team, one "sweep" works inside the house and the other works on the roof. The methods of cleaning vary. To protect the floors and furniture, drop cloths are placed in front of the fireplace and taped over the opening. The vertical drop cloth may have a "boot" or slit in it which allows rods to be pushed through. Various brushes, usually wire, are attached to extension rods and worked up and down the flue to dislodge the soot and creosote. Creosote deposits may be removed also with a chimney bar, which is a pipe-like instrument with a chisel end, or by using metal scrapers. Where the chimney top is protected from the rain by a hood or cap, it may not be possible to insert the brushes into the opening; a chain or weight may be lowered and swung back

[Title 296 WAC—p. 467]

and forth inside the chimney. Some sweeps have custom-made vacuum trucks with large collection chambers to collect the soot. In addition to cleaning the chimney flue and fireplace, some sweeps clean oil, gas and coal burning furnaces, repair chimney and flue linings, remove animals from chimneys, and offer other related services. Repairs included in this classification are limited to such activities as caulking around the flashing and sealing brickwork.

This classification excludes establishments engaged in industrial or commercial chimney or smokestack cleaning services which are to be reported separately in classification 0508; contractors engaged in chimney reconstruction or new construction made of masonry or brick who are to be reported separately in classification 0302; contractors engaged in the installation of sheet metal stove pipe who are to be reported separately in classification 0307; and the installation of a new lining in the chimney which is to be reported separately in the applicable classification.

4910-02 Mini-storage warehouse

Applies to establishments engaged in operating mini-storage facilities. Mini-storage facilities are usually fenced and entry is through a locking gate through which owners and renters of units are provided access. The units range from lockers to rooms of various sizes; once the unit is rented, the tenant or owner has sole access to it. Typical operations include, but are not limited to, management or clerical duties, renting or selling storage units to others, providing security, and normal maintenance and repair when performed by employees of employers subject to this classification. Normal maintenance and repair contemplated by this classification includes replacing parts on existing fixtures or equipment, repairing existing structures, normal cleaning of public areas, controlling rodents and other pests, maintaining existing landscaping, and shoveling snow from driveways or walkways. Construction, alteration, or improvements to the properties are *not* considered normal maintenance and are *not* contemplated by this classification. Major repair work is usually performed by contractors who are not employees of the storage facilities.

This classification excludes employees engaged exclusively in clerical duties who are to be reported separately in classification 4904; employees engaged exclusively in sales duties or in a combination of clerical and sales duties who are to be reported separately in classification 6303; and new construction or alteration work which is to be reported separately in the applicable construction classification.

4910-03 Temporary signs - placement or removal

Applies to establishments engaged in placing or removing temporary yard signs such as, but not limited to, real estate signs for real estate offices or property management firms and campaign signs. The smaller signs are usually mounted on a metal rod which is pounded into the ground to a depth of about 18". A post hole digger may be used to dig holes for larger signs that require a more sturdy post.

This classification excludes all other types of sign installation, painting or repair which are to be reported separately in the applicable classification.

4911-00 Construction estimators

Applies to employees of construction or erection contractors who work as cost and materials estimators preparing bids for contracts away from their employer's business offices. Employees covered by this rule may have exposure to the hazards of job sites, customer's premises, and/or undeveloped land. This classification is restricted in that employees reported in it cannot have any other duties other than construction estimating during their work shift or work day. Any employee working as an estimator and having any construction-related duties during the same work shift or day is to be reported separately in the applicable construction or erection classification for that entire work shift.

WAC 296-17A-5001 Classification 5001.

5001-03 Logging, N.O.C.

Applies to establishments engaged in various logging operations not covered by another classification (N.O.C.). Typical work contemplated by this classification includes, but is not limited to, high lead or tower logging, ground logging, and team logging with horses. For purposes of this rule, logging is the complete operation of felling, skidding, yarding, delimiting, and bucking of trees into logs or block wood and loading them onto trucks or rail cars.

Definitions:

High Lead or Tower Logging - usually occurs in steep terrain where a metal tower is set-up on a hilltop with a system of heavy cables running down the hillside and fastened to a stump or tree and has other smaller cables with chokers hanging from it. A choker is wrapped around each fallen tree and pulled back to the landing site.

Helicopter logging - includes ground crews that work with the use of helicopters to hoist fallen trees or bucked log lengths to the landing sight.

Chokers - chains or cables which are attached to the fallen trees for skidding to the landing site.

Ground logging - usually occurs on relatively flat land; fallen trees are moved to a landing by a skidder, cat or shovel.

Bucking - stripping or delimiting tree of branches and cutting the tree to desired log lengths.

Skidding - process of dragging the fallen logs to the landing site.

Landing - place where the fallen logs are brought for sorting and loading onto log trucks.

Yarding - usually performed at the landing site with use of a log loader to sort the logs by species, length and diameter, prior to loading onto log trucks.

This classification excludes flight crews of helicopters used in helicopter logging which are to be reported separately in classification 6803; log hauling which is to be reported separately in classification 5003; logging road construction which is to be reported separately in classification 6902; logging machine operators which are to be reported separately in

classification 0101; and mechanical or mechanized logging operations which are to be reported separately in classification 5005 provided the classification has been approved by the classification services section.

5001-04 Shake, shingle bolt, and post cutting

Applies to establishments engaged in the cutting of shakes, shingle bolts (blocks), and fence posts in the woods. For the purposes of this rule, this classification includes all operations performed in the woods such as, but not limited to, the felling of trees, stripping or delimiting of branches, and all further cutting or splitting of trees/logs to produce shakes, shingle bolts or fence posts. This classification includes all transporting of shakes, shingle bolts or fence posts from the cutting site when conducted by employees of employers subject to this classification.

5001-05 Firewood cutting

Applies to establishments engaged in the cutting of firewood in the woods. For the purposes of this rule, this classification includes all operations performed in the woods such as, but not limited to, the felling of trees, stripping or delimiting of branches, and all further cutting or splitting of trees/logs to produce firewood. This classification includes all transporting of log lengths, rounds or split wood from the cutting site when conducted by employees of employers subject to this classification.

5001-06 Sawmill operations conducted in the woods in connection with logging operations

Applies to establishments operating a temporary or portable sawmill operation in the woods. This type of work is usually performed on privately owned land. A portable sawmill and saw tables, similar to those at a permanent sawmill location, are transported directly to the logging site. Log lengths are fed through a circular saw that is capable of producing various sized rough cut timber, blocks, boards and planks. This classification includes all transporting of rough cut timber, blocks, boards and planks from the cutting and/or sawing site when conducted by employees of employers subject to this classification.

This classification excludes sawmill operations which are not conducted in the woods in connection with a logging operation which is to be reported separately in the applicable sawmill classification.

WAC 296-17A-5002 Classification 5002.

5002-00 Booming and rafting logs

Applies to establishments engaged in booming and rafting logs on water. Booming involves making a barrier in the

(2007 Ed.)

water usually with existing floating logs tied together with rope or chain to enclose other free floating logs. This type of barrier is referred to as a bundle. Rafting involves the use of a boom boat or tugboat to push the bundles together and tow the bundles to a particular destination. The destination may be a port where logs are loaded directly onto vessels, or to a sawmill, lumber mill or log sorting yard. This classification includes the loading of logs into or out of the water when performed by employees of the booming and rafting business.

Special note: Care should be exercised prior to assignment of this classification as the workers may be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act.

5003-01 Log hauling by contractor

Applies to contractors engaged in hauling logs for others from a logging side to a mill or storage yard. The loading and unloading of the truck is included in this classification when performed by the truck driver.

This classification excludes the hauling of logs from a log storage yard to a shipping destination which is to be reported separately in classification 1102 and log hauling by employees of a logging company which is to be reported separately in classification 5003-02.

5003-02 Log truck drivers, N.O.C.

Applies to employees of a logging company who are hauling the company's own logs from the logging side to a mill or storage yard.

This classification excludes the hauling of logs from a log storage yard to a shipping destination which is to be reported separately in classification 1102 and log hauling by a log hauling contractor which is to be reported separately in classification 5003-01.

WAC 296-17A-5004 Classification 5004.

This classification applies to establishments engaged in forestry and timberland management services. It applies to employees of contractors or of land owners. This classification includes all field crew supervisors and foremen assigned to oversee work covered by this classification including internal quality control audits regardless of whether their assigned duties include manual labor. Classification 5004, and related classification 1007 and 5006, cover various activities associated with the management of forests, range or timberland. These classifications have also been assigned to establishments engaged in erosion control projects and fish and wildlife habitat enhancement projects. *The industry covered by*

this series of classifications has special reporting requirements. Reforestation establishments assigned to classifications 1007, 5004, and 5006 report work on a contract basis. These contracts may last a quarter or several quarters. Refer to WAC 296-17-35203(4) for specific reporting requirements. Classification 1007 applies to technical services such as identifying volume and species of trees in a section of timberland or a forest, auditing parcels planted by a tree planting contractor for quality control purposes, conducting environmental studies, testing growing techniques and similar activities. Classification 5004 covers various forms of work conducted in the forest or timberland generally associated with the overall care of these lands. Classification 5004 is used to report manual crew labor. Classification 5006 covers machinery operations on these lands such as clearing, slashing, hydro seeding, chemical spraying and forest fire fighting. It will be common in the case of a forest fire to have employees reporting in both classification 5004 and 5006 for forest fire fighting since some employees will operate bulldozers, loaders and tanker trucks while others will use chain saws and shovels. In some cases establishments subject to classification 5004 will use multiple subclassification codes on a single contract and premium report.

This classification excludes forestry related machine work used in connection with trail construction, slash burning, fire watch/patrol and forest fire fighting, slashing, pile burning, roadside brushing, roadway dust/mud control which is to be reported separately in classification 5006 "forestry related machine work"; logging operations which are to be reported separately in classification 5001; logging road construction which is to be reported separately in classification 6902; and technical survey work which is to be reported separately in classification 1007.

5004-04 Animal damage control

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry and timberland services. Use of this classification is limited to services related to animal damage control such as placing salt blocks and hay for wildlife. This is done to provide food and nutritional supplements to forest wildlife as an alternative and preventative measure to reduce destruction to newly planted seedlings (trees) caused by feeding animals.

5004-05 Beaver trapping

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to services related to trapping mountain beaver. This is done to prevent damage to trees caused by mountain beaver when feeding and building nests for rearing their young.

5004-06 Chemical spraying

Fertilizing services

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to services related to chemical spraying. This is done to kill competing vegetation growing around

young seedlings (chemical conifer release) and keep the brush on roadsides down.

This classification excludes manual conifer release which is to be reported separately in classification 5004-14.

5004-07 Cone picking

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to services related to cone picking which is done to obtain seed for new trees. Cone picking may occur on the ground or in the trees. All forms of cone picking are included within the scope of this classification.

5004-09 Hydro seeding services

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to hydro seeding abandoned roads and roadsides which is done primarily for erosion control and habitat development. This classification also includes manual labor associated with erosion control or habitat development projects.

5004-11 Pruning services

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to pruning lower tree branches. This is being done on an experimental basis on certain plots to aid in the production of clear wood (knot free) for future plywood and furniture demands.

5004-12 Tree netting services

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to placing netting or paper sleeves over new tree growth to discourage animals from eating the growth. This is also referred to as bud capping.

5004-13 Tree planting services

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to planting trees in a forest (reforestation) or in privately owned timbered land. This is done to re-establish a tree population after logging or a fire.

5004-14 Tree thinning services including forest trail construction and brush clearing, N.O.C.

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in the removal of unmarketable trees with a chain saw, machete, or pruning loppers, brush clearing, manual tree slashing and constructing walking paths or trails. This is done to reduce competition of the remaining trees for water and nutrients, eliminate fire hazard and provide trails for management and recreational use. This classification includes manual conifer release.

This classification excludes chemical conifer release which is to be reported separately in classification 5004-06.

5004-18 Miscellaneous forestry services, N.O.C.

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry and timberland services not covered by another classification (N.O.C.). This classification is for miscellaneous manual labor on forest or timberland such as, but not limited to, manual forest fire fighting.

WAC 296-17A-5005 Classification 5005.

5005-00 Logging and/or tree thinning - mechanized operations

(to be assigned only by classification services staff)

Applies to establishments engaged in mechanized logging or tree thinning operations. For purposes of this classification, mechanized logging is defined as the entire process of felling, removal (skidding), yarding, processing, delimiting, bucking and loading of trees/logs by machine. This classification can be used by a logging contractor only if the entire side is being logged using methods and equipment described in this rule. If any portion of the side is being logged by conventional methods the entire operation must be reported in classification 5001 - Logging, N.O.C. or 0101 Logging Machine Operators. *For example*, an employer that subcontracts to fell trees with a feller/buncher or processor but is not involved in the removal (skidding) of the trees, the processing (delimiting and bucking) of the trees and the loading of trees is excluded from classification 5005 and is to be reported in classification 5001 - Logging, N.O.C. or 0101 Logging Machine Operators. Any employer whose operation includes any manual felling, removal, processing, or loading of trees is excluded from classification 5005 and is to be reported in classification 5001 - Logging, N.O.C. Work contemplated by this classification includes the falling of trees with a machine such as a feller buncher or processor; skidding logs to the landing with use of a grapple skidder or forwarder; delimiting logs with a mechanized delimitter such as a stroke delimitter, processor, CTR or harvester; and loading logs onto log trucks with a mechanical loader or shovel. Equipment used by employers subject to this classification will consist of the following:

Feller/buncher - used to fell trees and place felled trees into stacks (bunches) for removal to the log landing for further processing. The operator of this machine does not leave the cab of the machine in the performance of duties in the logging operation.

Processor - used to fell trees, delimit them, buck tree to desired log length and stack the bunches for removal to the landing where they will be segregated by general grade and

(2007 Ed.)

loaded onto log trucks. A processor is sometimes used at the landing to delimit trees and buck them to log length, especially when the trees are felled by a feller/buncher. The operator of this machine does not leave the cab of the machine in the performance of duties in the logging operation.

Grapple skidder - is used to remove (ground skid) stacks (bunches) of felled trees from the woods to the landing. The industry refers to both the skidder and the bulldozers as a tractor. The two are distinguished from one another in that the skidder is a tire-driven tractor and the bulldozer is a track-driven tractor. A bulldozer equipped with a grapple is an acceptable piece of equipment to be used in the removal of trees. The operator of either the grapple skidder or bulldozer equipped with grapple does not leave the cab of the machine in the performance of duties in the logging operation.

Forwarder - is used to remove logs as cut by a processor from the woods to an awaiting log truck or to be stacked in piles for a future pick up by a log truck. This is a small specialized tractor equipped with a self-loader and a log bunk. The operator of this machine does not leave the machine in the performance of duties in the logging operation.

Harvester - is used at the landing of the logging side to delimit trees and buck trees to desired log length. This machine can also be used to load logs onto log trucks. The operator of this machine does not leave the cab of the machine in the performance of duties in the logging operation.

Loader - is used at the landing to load logs onto log trucks. The operator of this machine does not leave the cab of the machine in the performance of duties in the logging operation.

This classification excludes log hauling which is to be reported separately in classification 5003, logging road construction which is to be reported separately in classification 6902, logging machine operators which are to be reported separately in classification 0101, and logging operations which are to be reported separately in classification 5001.

Special notes: If any portion of the logging contract is performed manually or by hand, the establishment does not qualify for this classification. If any portion of the logging contract is subcontracted out to another business and is performed manually or by hand, then none of the businesses involved in the logging contract will qualify for this classification and are to be reported separately in classification 5001 or 0101.

All equipment used by employers subject to this classification must meet WISHA guidelines for Roll Over Protection Standards (ROPS) and Falling Object Protection Standards (FOPS).

See classification 5206 (WAC 296-17-675) for permanent shop/yard operations.

WAC 296-17A-5006 Classification 5006.

This classification applies to establishments engaged in forestry and timberland management services. It applies to employees of contractors and of landowners. Classification 5006 and related classifications 1007 and 5004 cover various activities associated with the management of forests, range and timberland. These classifications have also been assigned to establishments engaged in erosion control projects and fish and wildlife habitat enhancement projects. *The industry covered by this series of classifications has special reporting requirements.* Establishments assigned to classifications 1007, 5004 and 5006 report work on a contract basis. These contracts may span a quarter or several quarters. Refer to WAC 296-17-35203(4) for specific reporting requirements. Classification 1007 applies to technical services such as identifying volume and species of trees in a section of timberland or a forest, auditing parcels planted by a tree planting contractor for quality control purposes, conducting environmental studies, testing growing techniques and similar activities. Classification 5004 covers various forms of work conducted in the forest or timberland generally associated with the overall care of these lands. Classification 5004 is used to report manual crew labor. Classification 5006 covers machinery operations on these lands such as, but not limited to, clearing, slashing, hydro seeding, chemical spraying and forest fire fighting. It will be common in the case of a forest fire to have employees reporting in both classification 5004 and 5006 for forest fire fighting since some employees will operate bulldozers, loaders and tanker trucks while others will use chain saws and shovels. In some cases establishments subject to classification 5006 will use multiple subclassification codes on a single contract and premium report.

5006-00 Forestry machine work - brush clearing and chemical spraying

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in brush clearing using specialized tractors and chemical spraying.

5006-01 Forestry machine work - dust control

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in spraying water on logging roads to reduce dust caused by log hauling trucks, logging equipment and other passenger traffic. Equipment consists of a water tanker truck equipped with a spray apparatus controlled from within the cab of the vehicle.

5006-02 Forestry machine work - forest fire fighting

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in forest fire fighting using equipment such as, but not limited to, water tanker trucks, bulldozers and loaders.

5006-03 Forestry machine work - forest trail construction
(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in forest trail construction using equipment such as, but not limited to, bulldozers and loaders.

5006-04 Forestry machine work - scarifying

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in scarifying work using equipment such as, but not limited to, bulldozers and loaders.

5006-05 Forestry machine work - slash burning

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in slash burning leftover vegetation and tree debris using equipment such as, but not limited to, bulldozers, loaders and water tanker trucks.

5006-06 Forestry machine work - slash piling

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in piling leftover vegetation and tree debris (slash) using equipment such as, but not limited to, bulldozers and loaders.

5006-07 Forestry machine work - slope grooming

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry or timberland services. Use of this classification is limited to employees of an employer subject to this classification engaged in removing vegetation and grading (leveling and smoothing) land using equipment such as, but not limited to, bulldozers and loaders.

5006-08 Miscellaneous forestry services, N.O.C.

(to be assigned only by the reforestation underwriter)

Applies to contractors and employees of landowners engaged in forestry and timberland services not covered by another classification (N.O.C.). This classification is for miscellaneous machine work on forest or timberland such as, but not limited to, hydro seeding and erosion control.

WAC 296-17A-5101 Classification 5101.**5101-31 Pipe or tube: Manufacturing - iron or steel; Metal ejection molding**

Applies to establishments engaged in the manufacture of pipe or tubes from iron or steel. This classification contemplates both seamed and seamless pipe and tubing involving either a hot or cold drawing process or roll forming and machine welding processes, as well as flexible steel tubing

used for products such as, but not limited to, automotive exhaust systems, water lines, and oil lines. In the drawing process, metals are melted to a molten state in furnaces, then rolled or spun in rolling machines and a pipe or tube is drawn. Tubing may be annealed (fed through a furnace then slowly cooled to strengthen and reduce brittleness). In the roll forming method flat sheets of iron or steel are bent in brake presses or other rolling or bending machinery, then the edges are welded together to form the pipe or tube. This classification also includes metal ejection molding in which raw scrap and pig iron is melted, forced into casting machines, and cast in high speed revolving flasks of various shapes depending on the product being produced. When finished, products are ejected from the molds. They may be further processed by annealing, tumbling, deburring and grinding, and cleaned in acid baths.

This classification excludes pipe dealers which are to be reported separately in classification 2009; the installation of any product manufactured in this classification which is to be reported separately in the classification applicable to the work being performed; and foundry operations which are to be reported separately in classification 5103.

WAC 296-17A-5103 Classification 5103.

5103-00 Foundries, N.O.C.

Applies to establishments engaged in operating foundries that manufacture castings from ferrous and/or nonferrous metals. To form castings, metal is melted in furnaces, then poured or ladled into molds. After they are cooled and solidified, castings are removed from molds with shake out machines, or tools such as torches, electric arcs, abrasive saws, or sledgehammers. Depending on the product and the carbon or alloy content of the metal, further repair or refining such as welding, annealing, tempering, flame hardening or other heat treatments may be needed. Cleaning and finishing processes include, but are not limited to, machining, chip-ping, grinding, shot or sandblasting, tumbling, and acid pickling to remove surface defects, inspection (sometimes by radiation or chemical analysis) and painting or powder coating. Foundries may make their own patterns and mold, and/or perform their own finishing processes, or they may contract these activities out to pattern-making shops or to machine shops.

This classification excludes establishments that perform only pattern making functions which are to be reported separately in classification 2906 and establishments engaged exclusively in machine shop services which are to be reported separately in classification 3402.

Special note: Foundries that make their own patterns and/or perform their own machine finishing may report those operations separately in the classifications applicable to the work being performed provided all of the conditions of the general reporting rule covering the operation of a secondary business activity have been met.

WAC 296-17A-5106 Classification 5106.

5106-08 Blacksmithing; vehicle spring or auto bumper: Manufacturing

Applies to establishments engaged in blacksmithing, or in manufacturing leaf springs or bumpers for vehicles. Blacksmithing is the hammering of metal heated in a forge to shape either with hand tools or with a steam or air hammer. The force of the blow is controlled by the operator and the desired size or shape is produced between flat dies like a hammer and anvil. Incidental welding, grinding, tempering and sharpening may also be involved. Spring manufacturing contemplated by this classification are known as leaf springs and are used in vehicles. To make leaf springs or bumpers, steel is rolled, sheared or stamped to size, bent to shape and then tempered to produce the required degree of elasticity.

This classification excludes the manufacture of wire springs, such as for wire mattresses or bed springs, which is to be reported separately in classification 3402.

5106-09 Tool forging: Hot forming or stamping

Applies to establishments engaged in the manufacture of products such as, but not limited to, forging tools, hand tools such as wrenches or levels, and small machine tools such as twist drills, chisel bits, dies, or jigs, by hot forming or stamping. Tool forging by hot forming or stamping involves heating metal in a furnace or hearth, then beating or hammering the heated metal into desired shapes with large drop hammers or rams. After forging is completed, goods are finished with typical machine shop equipment. Finishing processes may involve cutting, turning, shaping, heat-treating, drilling, milling, grinding, tapping and finishing by assembling, polishing, buffing, painting or plating.

This classification excludes establishments engaged in the manufacture of tools by machining operations which are to be reported separately in the applicable machining classification.

5106-10 Forging works; drop or machine

Applies to establishments engaged in the manufacture of products such as, but not limited to, engine parts, hooks, and chains by drop or machine forging. Forgings are produced by drop or trip hammers or forming presses. Drop or machine forging differs from blacksmithing or hammer forging in that closed impression dies are used. The forgings are produced by impact or pressure which forces the metal to conform to the shape of the die, one half of which is carried by the ram while the other half is held stationary on the anvil block. Trimming is done by the trimmer dies in a separate press which removes the surplus metal that squeezes out between the two sections of the forging die.

WAC 296-17A-5108 Classification 5108.

5108-55 Cable or wire rope: Drawing and manufacturing

Applies to establishments engaged in wire drawing including wire rope or cable manufacturing from iron or steel. Establishments may be engaged in the further manufacturing of products made from wire such as, but not limited to, baling wire, barbed wire, spikes, galvanized wire and nails. The process involves the forming of metal on a swage block into a shape that will eventually be drawn through a series of dies to reduce it in size. Some wire may be heat-treated to allow for continual drawing. Secondary and final drawing machines with progressively smaller dies are used to reduce the wire to the desired fineness. Incidental galvanizing is considered normal to iron or steel wire when performed as a subsequent treatment of drawn wire. The finished wire is automatically wound onto reels for shipment or may be further processed into wire rope or cables. Stranding and braiding is done on automatic machines and the wire or cable stored on shipping reels.

5108-56 Cable or wire rope: Manufacturing with no drawing

Applies to establishments engaged exclusively in stranding iron or steel wire rope or cable. Reeled iron or steel coils of drawn wire and core material are received from others. The wires are mechanically wound together to form a multi-wire strand which are then wound helically around a metal or fiber core to form wire rope. The finished rope or cable is pulled through a compression die, measured by power driven drums and stored on shipping reels.

5108-57 Cable or wire insulation or covering: Manufacturing

Applies to establishments engaged in manufacturing insulated or covered electrical cable. These establishments receive the drawn wire and the insulation material from outside sources. Commonly used insulation materials are enamel or lacquer, rubber, plastic, paper, cambric and cotton thread. Enamel or nylon insulation is applied by running the wire through heated tanks of either mix. The wire is then dried in ovens and the cycle is repeated several times. This classification applies also to the placing of various protective coverings on insulated wire. These protective coverings are generally cotton braid, metallic armor or lead sheathing. This classification includes incidental wire stranding when performed by employees of employers subject to this classification.

WAC 296-17A-5109 Classification 5109.

5109-46 Heavy machinery & equipment including locomotive engines: Manufacture or repair; Press roller recoating/resurfacing

Applies to establishments engaged in the manufacture, assembly, and repair of heavy equipment. Machinery and equipment subject to this classification are usually made of steel and steel/iron castings and include, but are not limited to, bulldozers, dump trucks, graders, skidders, forklifts and logging towers. The component parts may weigh several hundred to thousands of pounds. Overhead cranes are commonly used in the assembly process. Machinery used in the manufacturing, assembly, and repair includes, but is not limited to, boring mills, lathes, iron workers, welders/cutters, cut saws, and drills. Some establishments use CNC (computer numeric controlled) machinery; however, most establishments in this classification primarily use manual machinery and conventional welders/cutters. Other common operations covered by this classification include paint, welding, and electronic assembly areas. This classification also includes establishments that repair, recoat or resurface press rollers such as, but not limited to, the type rollers used by printing and paper making mills. Operations include repairing the interior shafts of the rollers, then grinding fiberglass or ceramic finishes until they are smooth. For rubber-coated surfaces, they remove the old rubber from the metal surface, sandblast the roller, then recoat it with new rubber. Most establishments that recoat the surface with rubber will mix and extrude their own rubber which is included in this classification when performed by employees of employers subject to this classification.

Special note: Field work as well as shop work is contemplated as an integral part of this classification. A vehicle may be equipped with welding equipment and other tools used for field repair. The broken part may be replaced in the field or returned to the shop, repaired if feasible, or a new part is ordered. The part is then loaded onto the field vehicle taken to the job site and reconnected. Some establishments perform this type of field work almost exclusively.

5109-47 Heavy arms: Manufacturing or repair

Applies to establishments engaged in the manufacture or repair of heavy arms including large munitions. This classification applies to all types of guns 20 MM and larger including, but not limited to, aircraft guns, tank guns, naval guns, torpedoes and aircraft gun turrets.

Special note: Field work as well as shop work is contemplated as an integral part of this classification. A vehicle may be equipped with welding equipment and other tools used for field repair. The broken part may be replaced in the field or returned to the shop, repaired if feasible, or a new part is ordered. The part is then loaded onto the field vehicle taken to the job site and reconnected. Some establishments perform this type of field work almost exclusively.

WAC 296-17A-5201 Classification 5201.**5201-75 Electric power or transmission equipment: Manufacturing or assembly**

Applies to establishments engaged in the manufacture or assembly of electrical power or transmission equipment, most of which is industrial and is used by public utilities for the transmission of electrical power. Equipment manufactured includes, but is not limited to, transformers, switchboards, circuit breakers, switches or switchboard apparatus, power switching devices or systems, and power invertors. Transformers step down voltage from very high to a lower voltage. Switching equipment is normally used to switch the electricity from an incoming line to outgoing lines. Transformers are usually made from sheet metal which is approximately 14 gauge. Machinery used to manufacture transformers is similar to that used in a sheet metal shop. Winding machines are also used to wind wire to form a coil which is placed inside the transformer. This is a shop or plant only classification.

This classification excludes the installation, service or repair away from shop of products manufactured which are to be reported separately in the applicable classification; the installation, removal, and repair of electric power or transmission equipment or machinery by a contractor which is to be reported separately in the classification applicable to the work being performed.

Special note: Switchboards, current breakers and switches subject to this classification are distinguishable from switchboards, current breakers and switches covered in classification 3602. Classification 3602 switches are those found on personal computers, household light switches, and small electrical appliances compared to switches manufactured in classification 5201 which are large metal bars used in power plants and substations. Circuit breakers covered in classification 3602 are of the size found in household breaker panels compared to circuit breakers covered in classification 5201 which appear more like large round cylinders with flat metal bars extruding from the cylinders. Switchboards covered in classification 3602 are computerized systems such as telephone systems compared to industrial switchboards such as those used in rail systems for switching trains on tracks.

5201-76 Electric toasters, frying pans, wire harnesses, vacuum cleaners, electrical appliances, N.O.C.: Manufacturing or assembly

Applies to establishments engaged in the manufacture or assembly of electric toasters, frying pans, wire harnesses, vacuum cleaners (including central vacuum systems), table top or counter top electrical appliances which are not covered by another classification (N.O.C.) including, but not limited to, electric shavers, steam and dry irons, waffle irons, can openers, mixers and blenders. *Wire harnesses* are the configuration of wires making up the electrical circuit inside an appliance or vehicle that does not include the cord set which will connect the appliance to the power source. The manufacturing process contemplated by this classification is the assembly of component parts and casings, purchased from other manufacturers, with small hand tools such as, but not limited to, drills, screwdrivers, rivet guns, and soldering or brazing tools. This is a shop or plant only classification; all

(2007 Ed.)

activities away from the shop or plant are to be reported separately.

This classification excludes establishments engaged in the repair of household appliances for others which are to be reported separately in classification 0607; establishments engaged in the manufacture of larger household appliances such as electric ranges, washing machines and refrigerators which are to be reported separately in classification 3402; establishments engaged in the assembly of electric cordset radio and ignitions which are to be reported separately in classification 3602; and the service or repair away from shop of products manufactured in this classification which are to be reported separately in the applicable classification.

5201-78 Electric motors, generators, alternators, starters, convertors, solenoids and servomotors: Manufacturing or assembly including repair

Applies to establishments engaged in the manufacture or assembly of electric motors, generators, alternators, starters, convertors, solenoids and servomotors of all sizes and horsepower. *Convertors* convert electricity from one voltage to another; *solenoids* are switches used to control the flow of electrical current; *servomotors* are electrical motors used to help control a mechanical device. This is a shop or plant only classification; all activities away from the shop or plant are to be reported separately.

This classification excludes the installation, service, or repair away from shop of products manufactured in this classification which are to be reported separately in the applicable classification and the installation, removal, and repair of electric power or transmission equipment in machinery by contractor which is to be reported separately in classification 0601.

WAC 296-17A-5204 Classification 5204.**5204-58 Railroad car: Manufacturing or repair
Railroad car wheel: Manufacturing or repair**

Applies to establishments engaged in the manufacture or repair of railroad cars and/or railroad car wheels. This classification includes the repair or rebuilding of freight cars, repair of railroad rolling stock tank cars or passenger cars. Inspections of railroad cars are usually conducted prior to making the repairs. Types of repair include, but are not limited to, electrical, mechanical (such as for brakes), or welding (such as on handrails and steps).

[Title 296 WAC—p. 475]

WAC 296-17A-5206 Classification 5206.**5206-78 Permanent yard or shop operations; logging or log hauling contractor**

Applies to a permanent yard or shop of logging or log hauling contractors. This classification is limited to contractor yards and shops which are maintained exclusively for the storage of materials and maintenance of equipment used in their logging and/or log hauling business. This classification does not contemplate any manufacturing operations. Only employees of a logging or log hauling contractor who are assigned to the shop or yard are to be reported in this classification. This classification is further restricted in that employees reported in classification 5206-78 cannot have any other duties other than those related to the storage of materials and/or the maintenance of equipment during their work shift or work day. Any employee having any other duties during their assigned work shift or day are to be reported separately in the applicable logging or log hauling classification.

Special note: Under no circumstances can this be the only classification assigned to an employer.

5206-79 Permanent yard or shop operations; Construction or erection contractor

Applies to a permanent yard or shop of construction or erection contractors. This classification is limited to contractor yards and shops which are maintained exclusively for the storage of materials and maintenance of equipment used in their construction business. This classification does not contemplate any manufacturing operations. For example, a contractor engaged in cabinet manufacturing and installation is to report the shop and yard operation in classification 2907 and is not entitled to classification 5206. Only employees of a construction or erection contractor who are assigned to the shop or yard are to be reported in this classification. This classification is further restricted in that employees reported in classification 5206-79 cannot have any duties other than those related to the storage of materials and/or the maintenance of equipment during their work shift or work day. Any employee having any other duties during their assigned work shift or day are to be reported separately in the applicable construction classification.

Special note: Under no circumstances can this be the only classification assigned to an employer.

5206-80 Permanent yard or shop operations; interstate and/or intrastate trucking

Applies to a permanent yard or shop of interstate and/or intrastate trucking establishments. This classification is limited to yards and shops which are maintained exclusively for the storage or maintenance of transportation equipment or related equipment used in their trucking operation. This classification does not contemplate any driving duties, or the handling or storage of freight. Only employees of a trucking operation who are assigned to the shop or yard are to be reported in this classification. This classification is further restricted in that employees reported in classification 5206-80 cannot have any other duties other than those related to the storage or maintenance of equipment during their work shift or work day. Any employee having any other duties during their assigned work shift or day are to be reported separately in the applicable trucking classification.

Special note: Under no circumstances can this be the only classification assigned to an employer. *And*, this classification is not to be assigned to any business assigned classification 1101 for delivery services.

WAC 296-17A-5207 Classification 5207.**5207-00 Bowling centers**

Applies to establishments engaged in operating bowling centers. Duties include, but are not limited to, renting bowling shoes, collecting fees, distributing score sheets, designating and activating lanes, organizing league competitions, repairing and maintaining scoring equipment, automatic pin setting equipment, ball return machinery or automatic ball cleaning units, refinishing pins and cleaning, waxing, polishing, or buffing the lanes. This classification includes food and beverage operations, pro shop and billiard room operations when conducted as part of the bowling center by employees of the bowling center.

This classification excludes contractors who refinish or replace the hardwood flooring of the lanes which are to be reported separately in classification 0513; food services operated by concessionaires independent of the bowling center which are to be reported separately in classification 3905; and amusement parks that include bowling lanes as part of their operation which are to be reported separately in classification 6208.

5207-01 Skating rinks; Skateboard facilities

Applies to establishments engaged in the general operation of roller or ice skating rinks. Duties include, but are not limited to, renting roller or ice skates or rollerblades, collecting fees, assigning lockers, renting the rinks, playing music, organizing groups or competitions, performing as rink guards, repairing and maintaining sound, communication or lighting equipment, cleaning, polishing, or dusting roller skating rink floors, and maintaining the ice on the ice rinks. This classification includes food and beverage services and skate shop operations when conducted as part of the rinks by employees of the rinks. Skate shops may sell skates, clothing and related accessories, and perform minor adjustments on skates with hand tools, sharpeners, grinders, or wheel lathes. This classification also includes the operation of skateboard facilities.

This classification excludes contractors who refinish or replace the hardwood flooring of the rink which are to be reported separately in classification 0513 and food services operated by concessionaires independent of the skating rink which are to be reported separately in classification 3905.

WAC 296-17A-5208 Classification 5208.

5208-00 Iron or steel works: Fabrication or assembly - structural iron or steel

Applies to establishments engaged in the fabrication or assembly of structural iron or steel. Structural in this classification will mean when fabricated for and used in the frame or grid work of a building, tower, bridge, or similar construction. Fabrication means the laying out of the pieces, the marking, cutting, sawing, drilling, punching, bolting, welding, assembling and finishing of the structural steel products. Raw materials include, but are not limited to, steel I-beams, tube steel, angle steel, and flat steel. Machinery includes overhead cranes, horizontal and vertical band saws, shears, punches, drill press, brake presses, and welding equipment. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes the erection of structural iron or steel in connection with towers, refineries, elevated railways, and buildings which is to be reported separately in the applicable iron or steel construction classification; contractors engaged in building construction who are to be reported separately in the applicable iron or steel construction class; bridge construction, including structural iron or steel erection, which is to be reported separately in the classification applicable to the work being performed; and manufacturing of rebar for construction which is to be reported separately in classification 5209.

5208-01 Brass, bronze, iron - ornamental: Shop fabrication, assembly or manufacture

Applies to establishments engaged in the manufacture, fabrication, or assembly of ornamental items from brass, bronze and/or iron. Products include, but are not limited to, railings, guards, staircases, fire escapes, and art items. Products are often light and do not require cranes or hoists to move them. The processes vary depending on the product being produced. The equipment includes, but is not limited to, iron workers, shears, drill presses, band saws, forklifts, welders, and grinders. The painting of products manufactured is included in this classification when performed by employees of employers subject to this classification. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes installation which is to be reported separately in the classification applicable to the work being performed.

5208-02 Iron works: Fabrication, assembly, or manufacture; nonstructural iron or steel

Applies to establishments engaged in the manufacture, fabrication or assembly of nonstructural iron or steel. Fabrication means the laying out of the pieces, the marking, cutting, sawing, drilling, punching, bolting, welding, assembling

(2007 Ed.)

and finishing operations including painting. Products include, but are not limited to, cattle crossing grates, window gratings, grill pieces, and storage racks used by warehouses. Equipment includes, but is not limited to, cut saws, welders, drill presses, grinders, band saws, and hoists. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes installation which is to be reported separately in the classification applicable to the work being performed.

WAC 296-17A-5209 Classification 5209.

5209-00 Boiler or tank construction

Applies to establishments engaged in the construction of boilers or steel tanks. Boilers are tanks used to either store hot water or make steam. Tanks may be used to hold products such as, but not limited to, sand and gravel, water, solid waste or fuels. The product is constructed from steel plate and may use I-beams for structural support. The materials may be purchased in bulk, if the business has the brake presses and rollers to cut and shape the metals to the appropriate dimensions, or as fabricated components. These establishments may also use cutting torches and other welding equipment in the manufacture of their products. They usually have a large shop area in one or more buildings that is equipped with overhead cranes. There is usually a yard to store raw materials, work-in-process, and finished goods. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes installation of boilers or tanks which is to be reported separately in the classification applicable to the work being performed.

5209-01 Metal goods, N.O.C. from 9 gauge or heavier metals

Applies to establishments engaged in the manufacture of goods using ferrous and nonferrous metal of 9 gauge or heavier. 9 gauge metals are approximately 1/8" thick. Items manufactured include, but are not limited to, crab pots, gaff hooks, firewood boxes, rims for basketball hoops, and rebar. Raw material is cut to desired size with saws, shears, brake presses, punches, and flame cutters. Parts may be joined by welding, riveting, screwing, or bolting. The parts may be handled by overhead cranes, hoists, and forklifts. The products may be finished in a variety of ways including, but not limited to, sanding, grinding, cleaning with solvents and applying paint or lacquer. Finish work is included in this classification when performed by employees of employers subject to this classification. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

This classification excludes establishments primarily engaged in structural iron or steel manufacturing which are to be reported separately in classification 5208; establishments primarily engaged in welding and machine shop activities

[Title 296 WAC—p. 477]

which are to be reported separately in classification 3402; and establishments primarily engaged in manufacturing products from metal lighter than 9 gauge which are to be reported separately in classification 3404.

5209-02 Wood or pellet burning stove: Manufacturing
(to be assigned only by classification services staff)

Applies to establishments engaged in the manufacture of wood or pellet burning stoves. Sheet steel or plate metal is sheared, formed, punched, baked and decreased. Parts are assembled by spot welding, then enameled or painted. Grey iron parts are foundry cast, chipped, and ground. Heating elements, insulation, wiring and control assemblies, glass panels and grey iron parts are assembled into stove shells on the production assembly line. The stoves are then packed for shipment. Materials include, but are not limited to, sheet steel, grey iron or ferrous castings, insulation materials, glass, aluminum and brass tubing control assemblies, chrome trim and hardware, and paints and enamels. Equipment includes, but is not limited to, power presses, shears, brake presses, welding equipment, spray painting equipment, baking oven, pneumatic and electric grinders and chippers, and pneumatic tools. This is a shop or plant only classification; it includes work being performed in an adjacent yard when operated by an employer having operations subject to this classification.

WAC 296-17A-5300 Classification 5300.

5300-00 State government - administrative field personnel

Applies to state employees whose duties require them to travel to an alternative work location but their work assignment is administrative in nature. Workers reported in this classification have duties which routinely involve travel to meetings or appointments with clients, customers, or businesses. Typical work includes, but is not limited to, field auditor, collector, social worker, attorney, public relations or consulting staff with no hazardous exposures. Supervisors who occasionally travel to accompany field staff for purposes such as observation or information gathering, but who do not typically perform any work other than administrative, are also included in this classification. Employees in this classification may also have follow-up work that is completed in the office such as writing reports, correspondence, etc.

This classification excludes employees with duties outside of the office which are more than administrative in nature such as, but not limited to, engineers, inspectors, and biologists who may have some field exposure, and are to be reported in 5307. For purposes of this classification, field exposure is defined as any work period, other than the normal travel to or from a work environment, which involves "hands on" work.

This classification excludes: Employees whose duties include field or hazardous exposure, employees who perform work with inmates, residents, patients or potentially violent persons in state hospitals, schools, homes, detention or correctional facilities which may involve security, recreation, or staff who may be called upon to restrain individuals, who are

to be reported separately in the appropriate classification (5307, 7103, 7201); clerical and administrative office personnel who are to be reported separately in classification 4902; law enforcement officers in any capacity who are to be reported separately in classification 7103; employees who provide patient or health care at state-operated mental health or acute care hospitals with a fully implemented safe patient handling program who are to be reported in classification 7200; employees who provide patient or health care at state-operated mental health or acute care hospitals that do not have a fully implemented safe patient handling program who are to be reported in classification 7400; and employees who provide patient or health care and work in state hospitals, homes, schools, detention or correctional facilities who are not otherwise classified who are to be reported separately in classification 7201. Volunteers are to be reported in classification 6901, and law enforcement volunteers in classification 6906.

This classification may be assigned to all departments, agencies, boards, commissions and committees of either the executive, legislative or judicial branches of state government.

Special notes: A division of hours is not permitted between classification 5300 and any other classification.

For purposes of this classification, the term "administrative field personnel" shall have the same meaning as "sales personnel" defined in the standard exception provision of the general reporting rule.

WAC 296-17A-5301 Classification 5301.

5301-10 Accounting or bookkeeping services

Applies to establishments engaged in providing general accounting or bookkeeping services to others. Types of services contemplated by establishments subject to this classification include, but are not limited to, auditing, tax preparation, medical or dental claims processing and billing, and/or advisory services. This classification includes all employments such as, but not limited to, clerical office, outside sales, and personnel who travel from one office to another.

This classification excludes establishments engaged primarily in management consultant services that are not otherwise classified, which are to be reported separately in classification 5301-12.

Special note: This classification is limited to employers engaged in such services being provided to the general public. This is a services only classification and does not include retailing or store operations, nor is this classification to be assigned to employers setting up separate business operations to manage other commonly owned or operated business undertakings unless coincidentally the other operations are also subject to this classification.

5301-11 Law firms

Applies to establishments engaged in providing legal services to others. Law firms may specialize in one or more areas of law. This classification includes clerical office and

outside sales personnel who travel from one office environment to another.

Special note: This is a services only classification and does not include retailing or store operations, nor is this classification to be assigned to employers setting up separate business operations to manage other commonly owned or operated business undertakings unless coincidentally the other operations are also subject to this classification.

5301-12 Management consultant services, N.O.C.

Applies to establishments engaged in providing management consulting services not covered by another classification (N.O.C.). Management consultants typically will observe and analyze organizational structures, work processes or work flows, mail distribution, computer or communication systems, and planning or development of related business needs. After a thorough analysis, consultants usually prepare a written report for the customer which identifies problem areas and/or recommends improvements to processes or equipment. Consultants may remain to oversee the implementation of the recommended improvements. Consultants subject to this classification do not sell any product they have recommended although they may act as an agent for their client in purchasing the product. Consulting projects vary from client to client depending upon the contract. Included within this classification are businesses that provide similar consultative services such as, but not limited to, advertising agencies, employer representative organizations, public relations companies, mortgage brokers and financial advisers who do not make purchases on behalf of their clients. This classification includes clerical office staff, outside sales personnel and other staff who travel from one office to another.

Special note: This classification is limited to employers engaged in such services being provided to the general public. This is a services only classification and does not include retailing or store operations, nor is this classification to be assigned to employers setting up separate business operations to manage other commonly owned or operated business undertakings unless coincidentally the other operations are also subject to this classification.

5301-13 Credit bureaus; collection agencies

Applies to establishments that are licensed to provide collection and/or credit investigation services to others. Services include, but are not limited to, the collection of NSF checks or delinquent debts owed to clients of the collection agency and checking the credit backgrounds of their client's potential customers. If debts are not collected, the service agency may initiate legal proceedings against the debtor. This classification includes clerical office and outside sales personnel, other staff who travel from one office to another, and process servers, although collection agencies subject to this classification generally employ process servers of other businesses to deliver legal documents.

This classification excludes establishments engaged in providing process serving services which may be reported separately in classification 6303 provided all the conditions of the general reporting rules covering standard exception employees have been met.

5301-14 Employment agencies

(2007 Ed.)

Applies to establishments that are licensed to provide employment services for others. Clients of employment agencies may be persons seeking employment or companies looking for employees. Employment agencies usually conduct preliminary interviews with candidates for positions prior to referring them to their client companies for interviews. Generally, establishments subject to this classification place people in permanent positions. This classification includes clerical office and outside sales personnel, and staff who travel from one office to another.

This classification excludes employees of a temporary help agency who are assigned to work in the administrative or branch offices of the agency who are to be reported separately in classification 7104 and employees of a temporary help agency who are assigned on a temporary basis to its customers who are to be reported separately in the appropriate temporary help classification.

5301-15 Court reporting services

Applies to establishments engaged in providing court reporting services to others. Court reporters record verbatim testimony presented in court proceedings, depositions, public hearings or meetings. The most frequently used method to record testimony is by stenotype machine, although it may be recorded by voice recording on audio tape, or by manual shorthand. Transcription of the recorded material may be performed by the court reporter or by "note readers" or typists. The majority of court reporters today use computer-aided transcription systems. Court reporters may also offer notary public services for their clients. This classification includes clerical office and staff who travel from one office to another.

5301-16 Service and professional organizations

Applies to establishments engaged in protecting or furthering the interest of their members and/or the general public. Many of these operate as nonprofit organizations. Service and professional organizations may perform one or many of the following activities: Maintain a membership directory; collect membership dues; publish a newsletter; sponsor educational training programs; administer certification tests; provide job placement assistance; award scholarships; offer insurance programs; research and interpret local, state, and federal regulations and apprise members of the results; manage promotional marketing programs; organize fund raising campaigns; perform charitable community services; sponsor athletic leagues and tournaments; host conventions; disburse funds; perform collective bargaining; arbitrate disputes; provide counseling, adoption, and advocacy services; lobby the legislature; compile, review, and disseminate informational data; operate a tourist information center; issue vehicle license registrations, plates, decals, and certificates of title. Also included in this classification are Economic Development Councils, Boards, or Associations. These nonprofit organizations provide economic consulting services and related statistics to government and industry in the promotion of economic stability, and recruit businesses who will create jobs and provide loans from the grant funds they manage. This classification includes clerical office and outside sales personnel who travel from one office environment to another.

This classification excludes labor unions and employee representative associations which are to be reported separately in classification 6503, and the collection of donated

items by truck which is to be reported separately in classification 1101.

Special note: If a charitable organization subject to classification 5301 operates a retail store for the sale of donated items, the collection of those items by truck, and all store operations, are to be reported separately in classification 6504.

5301-18 Telephone answering services

Applies to establishments engaged in providing telephone answering services for others. Customers include, but are not limited to, medical professionals, attorneys, private businesses, and individuals. Most answering services today use computerized communications systems to identify company names when answering calls for various companies, obtain correct information about the company to respond to questions, record and relay accurate messages in a timely manner. Related services often offered by telephone answering service companies include, but are not limited to, voice mail or paging, rental of office space, telemarketing, dispatching, monitoring alarm systems, placing reminder calls, and scheduling appointments for customers. This classification includes clerical office personnel and staff who travel from one office to another.

5301-19 Travel agencies

Applies to establishments engaged in providing travel arrangement services for others. Travel agencies coordinate all types of travel arrangements for their clients through air, cruise, train, or bus lines, hotels, motels, or resorts, car rental agencies, travel insurance companies, and related travel providers. Services vary and could include delivery of tickets and itineraries to clients, booking reservations and selling tickets for tours, excursions, or other entertainment events, or arrangement of special needs for disabled or elderly travelers. This classification includes clerical office and sales staff who travel from one office to another.

5301-21 Word processing or secretarial services

Applies to establishments engaged in providing word processing or secretarial services to others. Services include, but are not limited to, desktop publishing, dictation and transcription services, typing/compiling reports, proposals, resumes, or correspondence, sending faxes, and making copies of documents. A pickup and delivery service may be offered. This classification includes clerical office and outside sales personnel who travel from one office environment to another.

Special note: This classification is limited to employers engaged in such services being provided to the general public. This is a services only classification and does not include retailing or store operations, nor is this classification to be assigned to employers setting up separate business operations to manage other commonly owned or operated business undertakings unless coincidentally the other operations are also subject to this classification.

WAC 296-17A-5302 Classification 5302.

5302-00 Computer consulting, programming, software and web site development, and internet service providers (ISPs), N.O.C.

Applies to establishments engaged in providing computer consulting - primarily recommending and designing hardware systems and/or software for the needs of the contracting entity. Consultants may provide training on software programs and hardware systems. Programming may include creating or maintaining programs using computer language code. Activities include product conceptualization, design of the blueprint, creating flowcharts, coding the program, beta testing, etc. Included is web site development.

Software development firms design and develop "packaged" software for sale in retail stores for mainframe systems or PCs, or they may develop general application programs, educational, entertainment or games software. Additional program aspects could include musical and sound code applications, visual representation and animation artists.

Internet service providers offer business and commercial computer users access to the internet by various telephony, digital and wireless means. Most ISPs charge subscribers a monthly or annual fee. Some may offer a variety of free web-related services as part of a total package—i.e., search engines, e-mail address, personal web page, quick links to popular web sites, twenty-four hour customer service and technical support and instant messaging. Tech support is generally engaged in troubleshooting and will frequently walk users through whatever steps are needed to correct a computer problem. Some ISPs have technical professionals who assist clients by designing, upgrading, and/or maintaining their business web site or home page. This classification includes clerical office and outside sales personnel who travel from one office environment to another.

This classification excludes adjustments, service, or repairs and hardware installations to business machines for others which are to be reported separately in classification 4107; computer technical support staff for firms not in the computer industry are inclusive within that firm's primary class, i.e., a law firm's computer support staff are inclusive within class 5301-11; retail and internet store activities are to be reported separately in classification 6406; CD copy/write scanning are to be reported separately in classification 6506; electrical prewiring when performed by a specialty contractor not in the business to install computer equipment is to be reported separately in classification 0608; assembly and repair of premanufactured parts into operative computer components, shop only, is to be reported separately in classification 3602; business that has instructors/trainers (only) is

to be reported in either 4904 or 6303 depending on training room location.

5306-07 Clerical office, administrative employees, and elected officials of counties, public utility districts and taxing districts, N.O.C.

Applies to clerical office, administrative employees, and elected officials of counties, public utility districts and taxing districts, not otherwise classified (N.O.C.). Clerical duties include, but are not limited to, answering telephones, handling correspondence, computer work, and maintaining financial, personnel and payroll records. A clerical office is a work area which is physically separated from all other work areas by walls, partitions or other physical barriers. Administrative duties may be conducted in or out of the county, public utility district or taxing district facilities, but are conducted in an atmosphere free from the operative hazards of work environments such as, but not limited to, jails, law enforcement and road works. In addition to management activities, this classification also includes field auditors, social workers, alcohol and drug abuse programs, senior health and nutrition programs, medical and dental clinics or similar activities professionals would perform.

See classifications 1301, 1501, 1507, 4201, 6103, 6104, 6901, 6904, 6905, and 6906 for other county, public utility districts and taxing districts operations.

(2007 Ed.)

5306-25 Clerical office and administrative employees of Native American tribal councils

Applies to clerical office and administrative employees of Native American tribal councils. Clerical duties include, but are not limited to, answering telephones, handling correspondence, computer work, and maintaining financial, personnel and payroll records. A clerical office is a work area which is physically separated from all other work areas by walls, partitions or other physical barriers. Administrative duties may be conducted in or out of the tribal council facilities, but are conducted in an atmosphere free from the operative hazards of work environments such as, but not limited to, jails, law enforcement and road works. In addition to management activities, this classification also includes field auditors, social workers, alcohol and drug abuse programs, senior health and nutrition programs, youth services, counselors, courts, medical and dental clinics or similar activities professionals would perform.

See classifications 1501 and 6905 for other Native American tribal council operations.

Special note: Tribal operations unrelated to the business of governing such as liquor and tobacco stores, casinos, logging, fisheries and bingo parlors are to be reported separately in the classification applicable to the operation.

5306-26 Clerical office and administrative employees of local public housing authorities

Applies to clerical office and administrative employees of local public housing authorities. Clerical duties include, but are not limited to, answering telephones, handling correspondence, computer work, and maintaining financial, personnel and payroll records. A clerical office is a work area which is physically separated from all other work areas by walls, partitions or other physical barriers. Administrative duties may be conducted in or out of the housing authority facilities, but are conducted in an atmosphere free from the operative hazards of work environments such as, but not limited to, jails, law enforcement and road works. In addition to management activities, this classification also includes field auditors, social workers or similar activities professionals would perform.

This classification excludes all other employees including meter readers who are to be reported separately in classification 1501 and volunteers who are to be reported separately in classifications 6901 or 6906 as appropriate.

5307-00 State government employees - N.O.C.

Applies to state government employees not covered by another classification (N.O.C. - not otherwise classified). This is the basic state agency classification which covers employees who have duties that support the mission of the agency and have field or hazardous exposure. For purposes of this classification field or hazardous exposure is defined as any work which involves "hands on" work. Employees reported in this classification may have jobs that include, but are not limited to, performing manual labor or supervising a work crew performing manual labor, work in the trades, construction-type work or maintenance/repair work, operating machinery or equipment, stores/stock clerks, warehouse, supplies, deliveries, food services, facilities, recreational, or general security staff with no law enforcement duties. This classification also includes, but is not limited to, personnel such as engineers, inspectors, and biologists, who have field exposure. This classification includes supervisors who work at a field site and routinely perform supervision duties in the field. This classification includes nonpatient care employees in state operated homes, schools, detention or correctional facilities not described in another classification.

This classification excludes: Employees who have law enforcement power in any capacity, who are to be reported separately in classification 7103; employees who work in state hospitals, homes, schools, detention or correctional facilities who are not otherwise classified who provide patient or health care, who are to be reported separately in classification 7201; employees who provide patient or health care at state-operated mental health or acute care hospitals with a fully implemented safe patient handling program who are to be reported in classification 7200; employees who provide patient or health care at state-operated mental health or acute care hospitals that do not have a fully implemented safe patient handling program who are to be reported in classification 7400; administrative field employees, who are to be reported separately in classification 5300; and clerical and administrative office personnel, who are to be reported separately in classification 4902. Volunteers are to be reported in classification 6901, and law enforcement volunteers in classification 6906.

This classification may be assigned to all departments, agencies, boards, commissions and committees of either the executive, legislative or judicial branches of state government.

(2007 Ed.)

WAC 296-17A-6108 Classification 6108.

6108-00 Convalescent or nursing homes, rest homes, and homes for the aged

Applies to establishments engaged in providing various levels of health care, depending on a patient's needs. Convalescent or nursing homes are state-licensed institutions. The extent of professional or medical services provided ranges from complete medical care for postoperative patients and patients requiring extensive nursing care due to illnesses such as terminal cancer, kidney disorders, and heart disease, to only minimal medical or professional care for other patients. Rest homes provide daily living assistance care to the aged or those with some limits on ability for self-care, but where medical care is not yet a major element. Homes for the aged provide care for people who, due to illness, physical infirmity, or advanced age, are unable to care for themselves and who need nursing and/or health-related care, but do not require the degree of care and treatment that a skilled or intermediate care facility is designed to provide. Patients in homes for the aged, because of their mental or physical condition, require some nursing care, including the administering of medications and treatments, or the supervision of self-administered medications in accordance with a physician's orders. Generally these homes will employ therapists, registered nurses, practical nurses, nurses aides and orderlies to provide the necessary medical care to their patients. The homes also may employ cooks, waitresses, maids, maintenance personnel, social workers and recreational directors, but usually do not employ a resident physician, although they may have arrangements with physicians who are on call for emergencies.

This classification excludes boarding houses which are to be reported separately in classification 6509.

WAC 296-17A-6109 Classification 6109.

6109-00 Physicians, surgeons, and medical clinics, N.O.C.

Applies to establishments of licensed practitioners such as physicians and surgeons, and to medical clinics not covered by another classification (N.O.C.) engaged in the practice of general or specialized medicine and surgery. Physicians diagnose and treat a variety of diseases and injuries, order or execute various tests, analyses, and diagnostic images to provide information on a patient's condition, analyze reports and findings of tests and of examination, diagnose conditions, and administer or prescribe treatments and drugs. Physicians may also inoculate and vaccinate patients to immunize them from communicable diseases, or refer patients to a medical specialist or other practitioners for specialized treatment. They may also make house and emergency calls to attend to patients unable to visit the office. Surgeons examine patients to verify necessity of surgery, review reports of patient's general physical condition and medical

history, reactions to medications, estimate possible risk to patient, and determine best operational procedure. Surgeons may specialize in a particular type of surgery. This classification includes licensed ophthalmologists who specialize in the diagnosis and treatment of diseases and injuries of the eyes, and examine patients for symptoms indicative of organic or congenital ocular disorders. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the physician's or surgeon's office or in a medical clinic, such as laboratory or X-ray technicians, and nurses.

This classification excludes psychologists and psychiatrists who are to be reported separately in classification 6109-10; optometrists who are to be reported separately in classification 6109-09; radiology and MRI referral clinics which are to be reported separately in classification 6109-17; orthotic referral clinics which are to be reported separately in classification 6109-14; and nutrition, diet, or weight loss clinics which are to be reported separately in classification 6109-12.

6109-01 Dentists and dental clinics

Applies to establishments of licensed dental practitioners and dental clinics engaged in the practice of general or specialized dentistry. Services provided by dental offices or clinics include, but are not limited to, examination of teeth and gums to determine condition, diagnosis of disease, injuries, or malformation, extractions, fillings, root canals, oral surgery, tooth replacement, cleaning, instruction on oral and dental hygiene and preventative care. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the dentist's office such as hygienists, and dental assistants or technicians.

6109-02 Chiropractors, N.O.C.

Applies to establishments of licensed practitioners not covered by another classification (N.O.C.) who are engaged in the practice of chiropractic medicine. Chiropractors diagnose and treat musculoskeletal conditions of the spinal column and extremities to prevent disease and correct abnormalities of the body believed to be caused by interference with the nervous system. They manipulate the spinal column and other extremities to adjust, align, or correct abnormalities caused by neurologic and kinetic articular dysfunction. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the chiropractor's office.

6109-04 Naturopaths, N.O.C.

Applies to establishments of health practitioners not covered by another classification (N.O.C.) who diagnose, treat, and care for patients, using a system of practice that bases treatment of physiological functions and abnormal conditions on natural laws governing the human body, relying on natural remedies such as, but not limited to, acupuncture, sunlight supplemented with diet, and naturopathic corrections and manipulations to treat the sick. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the naturopath's office.

6109-08 Physical therapists, N.O.C.

Applies to establishments of health practitioners not covered by another classification (N.O.C.) who are engaged in the practice of physical therapy, occupational therapy, respi-

ratory therapy, or speech therapy. Therapists treat and rehabilitate people with physical or mental disabilities or disorders, to develop or restore functions, prevent loss of physical capacities, and maintain optimum performance. Includes occupations utilizing means such as exercise, massage, heat, light, water, electricity, and specific therapeutic apparatus, usually as prescribed by a physician; or participation in medically oriented rehabilitative programs, including educational, occupational, and recreational activities. *Physical therapists* plan and administer medically prescribed physical therapy treatment for patients suffering from injuries, or muscle, nerve, joint and bone diseases, to restore function, relieve pain, and prevent disability. *Occupational therapists* plan, organize, and conduct occupational therapy programs to facilitate development and rehabilitation of the mentally, physically, or emotionally handicapped. *Respiratory therapists* administer respiratory therapy care and life support to patients with deficiencies and abnormalities of the cardiopulmonary system, under the supervision of physicians and by prescription. *Speech therapists* specialize in diagnosis and treatment of speech and language problems, and engage in scientific study of human communication. This classification includes clerical office and sales personnel, as well as other employees engaged in therapy services and also includes travel to health facilities or other locations to administer therapy services.

6109-09 Optometrists, N.O.C.

Applies to establishments of optometrists not covered by another classification (N.O.C.). Optometrists are licensed practitioners, but do not hold a medical degree. An optometrist in general practice examines patients' eyes to determine the nature and degree of vision problems or eye diseases and prescribes corrective lenses or procedures, performs various tests to determine visual acuity and perception and to diagnose diseases and other abnormalities, such as glaucoma and color blindness. An optometrist may specialize in the type of services provided, such as contact lenses, low vision aids, or vision therapy, or in the treatment of specific groups such as children or elderly patients. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the optometrist's office.

This classification excludes optometrists employed by optical goods stores who are to be reported separately in classification 6308, and ophthalmologists who are to be reported separately in classification 6109-00.

6109-10 Psychologists and psychiatrists, N.O.C.

Applies to establishments of licensed practitioners not covered by another classification (N.O.C.) who are engaged in the diagnoses and treatment of patients with mental, emotional, or behavioral disorders. *Psychologists* are licensed practitioners who diagnose or evaluate mental and emotional disorders of individuals and administer programs of treatment. They interview patients in clinics, hospitals, prisons, and other institutions, and study medical and social case histories. *Psychiatrists* are licensed practitioners who diagnose and treat patients with mental, emotional, and behavioral disorders. They organize data obtained from the patient, relatives, and other sources, concerning the patient's family, medical history, and the onset of symptoms, and determine the nature and extent of mental disorder and formulate a treat-

ment program utilizing a variety of psychotherapeutic methods and medications. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the doctor's office.

6109-12 Nutrition, diet, or weight loss clinics, N.O.C.

Applies to establishments engaged as nutrition, diet, or weight loss clinics not covered by another classification (N.O.C.) which provide programs whereby clients may achieve a healthy and permanent weight loss. The programs vary in approaches but most are based on the behavior modification theory, utilizing private counseling or group support meetings and seminars to educate individuals about their eating habits and proper eating patterns. Some programs may sell vitamin supplements or a line of food products to be used by their clients and may publish newsletters or other forms of literature for the benefit of their clients. This classification includes clerical office and sales personnel.

This classification excludes exercise programs which are to be reported separately in the appropriate classification.

6109-13 Childbirth classes

Applies to establishments providing childbirth education for expectant parents. Topics include, but are not limited to, expectations during pregnancy, breathing and relaxing techniques, and massage therapy. Literature and/or movies may be provided in addition to oral instruction. This classification includes clerical office and sales personnel.

6109-14 Orthotic referral clinics

Applies to establishments operating as clinics to provide care to patients with disabling conditions of the limbs and spine by fitting and preparing orthopedic braces under the direction of and in consultation with physicians. Orthotists examine and evaluate the patient's needs in relation to disease and functional loss, and assist in the design of an orthopedic brace. Orthotist select materials, makes cast measurements, model modifications and layouts. When the brace is finished, they evaluate it on the patient, make adjustments to ensure correct fit, and instruct the patient in the use of the orthopedic brace. This classification also includes clinics of prosthetists who provides care to patients with partial or total absence of a limb by planning fabrication of, writing specifications for, and fitting the prosthesis under the guidance of and in consultation with a physician. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the referral clinics.

This classification excludes the manufacture of orthopedic braces, splints or prostheses which is to be reported separately in the applicable classification.

6109-15 Midwife services

Applies to establishments engaged in the practice of midwifery. Midwives provide care for women undergoing medically uncomplicated pregnancy and low risk labor and delivery. The delivery may take place in a clinic setting or in the expectant mother's home. This classification includes clerical office and sales personnel.

6109-16 Licensed massage therapy services

Applies to establishments of licensed practitioners who are engaged in the practice of massage therapy. Some massage therapists work in conjunction with physicians or sports

teams, or at hospitals, rehabilitation facilities or convalescent homes. If a client is referred by a physician, the therapist will review the medical report and in conjunction with the client, will determine the nature of the massage (whether it is for relaxation or to correct or relieve a medical problem) and the modality to be used, such as deep-muscle work, trigger-point therapy, or joint rotation. This classification includes clerical office and sales personnel as well as other employees engaged in licensed massage therapy services.

This classification excludes massage therapists employed by a health club, gymnasium, sauna, or bath house who are to be reported separately in classification 6204.

6109-17 Radiology and MRI referral clinics

Applies to establishments of licensed practitioners who are engaged in the practice of radiology and/or magnetic resonance imaging. Radiologists diagnose and treat diseases of the human body using X-ray and radioactive substances. They examine the internal structures and functions of the organ systems and make diagnoses after correlating the X-ray findings with other examinations and tests. They administer radiopaque substances by injection, orally, or as enemas, to render internal structures and organs visible on X-ray films or fluoroscopic screens. Radiologists may employ magnetic resonance imaging technologists to operate magnetic resonance imaging equipment which produces cross-sectional images (photographs) of a patient's body for diagnostic purposes. This classification includes clerical office and sales personnel, as well as other employees engaged in service in the clinics, such as nurses or technologists.

WAC 296-17A-6110 Classification 6110.

6110-00 Home health services and nursing care, N.O.C.

Applies to establishments engaged in providing skilled and semiskilled nursing and home health care services to individuals who do not need the continuous care and supervision that hospitals and nursing facilities can provide. Patients frequently are referred to home health agencies by physicians, hospital discharge planners or other medical professionals. Typically, a home health care provider will come to the patient's home to assess the individual's situation, recommend a plan of treatment and coordinate the plan. A nurse may function as the "case manager" for the patient and will coordinate the case plan. Usually a physician must authorize the plan of treatment for home care services. The services offered will vary according to each client's needs and can range from personal care for the patients such as bathing and grooming, cooking, housecleaning; to laboratory services; to

skilled nursing services. Home health services may offer therapy services such as physical, occupational, speech, and respiratory. Care may be intermittent or long-term. This classification includes home health nursing visits or care made on a private-duty basis.

This classification excludes home health care social workers and dietitians with no cooking duties who may be reported separately in classification 6303 provided all the conditions of the general reporting rules covering standard exception employees have been met; private households which employ workers who serve on or about the premises in occupations usually considered as domestic service which are to be reported separately in classification 6510; and establishments engaged in providing chore workers/home care assistants to private individuals who are to be reported separately in classification 6511.

WAC 296-17A-6202 Classification 6202.

6202-00 Cemeteries

Applies to establishments engaged in providing cemetery and funeral services at one location. Cemeteries are communal burial places and range in size from small churchyards to private facilities with hundreds of acres of land. Cemeteries sell burial plots, excavate graves, prepare grave sites for interment, carry out interment services and maintain the cemetery grounds. Grounds work includes, but is not limited to, maintaining markers, and the usual maintenance work on lawns, roadways, trees, hedges and flowers. Maintenance personnel also set up tents, chairs and other burial service equipment. A grave burial involves placing caskets in the ground within a burial vault; a lawn crypt burial involves placing the casket in a prefabricated, preplaced crypt. A burial vault is a cement structure used to line graves and prevent settling. Crypts can be placed in the ground, above the ground or within private and public mausoleums. A niche houses urns which contain the cremated remains of decedents. Cemeteries may provide funeral services at the cemetery, operate a chapel, and/or offer cremation services, all of which are included in this classification when conducted in connection with a cemetery operation. This classification includes pet cemeteries.

This classification excludes establishments engaged as mortuaries, funeral homes, or crematoriums which are to be reported separately in classification 6201.

WAC 296-17A-6206 Classification 6206.

6206-06 Golf courses, N.O.C.

Applies to establishments engaged in operating public or private golf courses. Pro shops, miniature golf courses, and driving ranges operated in connection with the golf course are included in this classification. Typical operations of a pro shop include, but are not limited to, selling golf clubs, golf balls, specialty clothing, and related golfing items, renting carts, arranging tee times, and collecting green fees. Also included in this classification are snack bars operated at the golf course when limited to the same hours as the golf course is open. Typical employees include golf pros, greens keepers, caddies, and snack bar employees.

This classification excludes establishments operating miniature golf courses and driving ranges which are to be reported separately in classification 6208 and "bona fide" restaurant operations which may be reported separately in classification 3905. For purposes of this classification a "bona fide" restaurant at a golf course is operated independent of the course and is open to the public even when the golf course is closed.

Special note: A pro shop operated by an independent concessionaire may qualify for classification 6309, provided the pro shop does not operate the course, collect green fees, or perform other functions of managing a golf course.

WAC 296-17A-6301 Classification 6301.

6301-00 Sales personnel: Vehicles and marine pleasure craft

Applies to sales employees of establishments engaged in selling and/or leasing new and/or used automobiles, trucks, campers, recreational vehicles, mobile homes, motorcycles or other all-terrain vehicles, or boats and other marine pleasure craft and who are not covered by another classification assigned to the employer's account. Duties contemplated by this classification are limited to sales training, test driving, showing and demonstrating vehicles, completing paper work, and arranging for delivery of purchased vehicles.

Special note: This is a restrictive classification; the qualifying factor is that all the conditions of the general reporting rules covering standard exception employees have been met.

6301-06 Instructors of driving schools

Applies to instructors of driving schools. Instructors duties include, but are not limited to, demonstrating driving techniques, and observing student drivers.

This classification excludes administrative staff and classroom instructors of driving schools who are to be reported separately in classification 6103; vehicle repair or maintenance staff who are to be reported separately in classification 3411; and high school driving instructors who are to be reported separately in classification 6104.

6301-07 Limousine drivers

Applies to drivers of establishments engaged in providing limousine services to others. Limousine services provide luxury transportation for special occasions such as, but not limited to, birthday parties, weddings, dances, sporting events, concerts, and corporate business functions. Clients usually travel in groups from two to ten. Drivers are professionally trained chauffeurs; they generally provide services by appointment from specific locations to set destinations, and often wait with the vehicle while clients attend events. Depending on the occasion, the limousine service may also provide beverages, snacks, balloons, or flowers. Since the service is intended for luxury as opposed to meeting deadlines, the hazards of driving differ from most other professional drivers.

This classification excludes employees who repair and/or service the company's limousines who are to be reported separately in classification 3411.

Special note: Clerical office employees may be reported separately in classification 4904 provided all the conditions of the general reporting rule covering standard exception employees have been met.

WAC 296-17A-6303 Classification 6303.

6303-00 Outside sales personnel, N.O.C.; messengers

Applies to those employees whose job duties and work environment meet *all* the conditions of the general reporting rules covering outside sales personnel, and who are not covered by another classification (N.O.C.) assigned to the employer's account. Duties of outside sales personnel contemplated by this classification are limited to soliciting new customers by telephone or in person, showing, selling, and explaining products or services, servicing existing accounts, completing correspondence, placing orders, performing public relations duties, and estimating. Duties of messengers are limited to delivering interoffice mail, making deposits, and similar duties that are exclusively for the administration of the employer's business.

This classification excludes the delivery of products or merchandise or the stocking of shelves which is to be reported separately as applicable; the demonstration or delivery of machinery or equipment which are to be reported separately as applicable, establishments engaged as collection agencies or public relations agencies which are to be reported separately in classification 5301; establishments engaged in providing inspection and valuations exclusively for insurance companies which are to be reported separately in classification 4903.

Special note: When considering this classification care must be taken to look beyond titles of employees. Employees with occupational titles such as, but not limited to, collectors, counselors, consultants, or appraisers may or may not qualify for this classification. This is a restrictive classification; the qualifying factor is that all the conditions of the general reporting rules covering standard exception employees have been met.

6303-03 Insurance sales personnel and claims adjusters

Applies to insurance sales personnel and claims adjusters with outside duties. Duties of employees subject to this classification are limited to selling insurance policies at their place of business or at the client's home, or going to the scene of an accident or catastrophe to assess damage. Work may be performed within an office or away from the employer's premises.

Special note: Individuals performing duties as an agent, broker, or solicitor (and hold a license as issued by the office of the insurance commissioner) are exempt from coverage as specified in RCW 51.12.020(11) and 48.17.010, 48.17.020, and 48.17.030. To elect voluntary coverage these individuals must submit a completed optional coverage form to the department.

6303-21 Home health care services: Social workers and dietitians

Applies to social workers and dietitians employed by home health care service establishments who provide care for handicapped individuals. Duties of these employees include teaching physically or developmentally disabled individuals in their own home to manage daily living skills such as caring for themselves, dressing, cooking, shopping, and going to the

doctor. This classification also includes dietitians, sometimes called nutritionists, who usually are referred to patients by their physicians. The dietitian assesses the patient's current nutritional status, including current food intake, medical background, family history, currently prescribed medications, and social and psychological needs, then develops, a food plan to meet the patient's needs. Employees subject to this classification do no cooking.

This classification excludes nursing and home health care services which are to be reported separately in classification 6110; therapy services which are to be reported separately in classification 6109; domestic servants who are to be reported separately in classification 6510; and chore workers who are to be reported separately in classification 6511.

Special note: This is a restrictive classification; the qualifying factor is that all the conditions of the general reporting rules covering standard exception employees have been met. *This classification is not to be assigned to any account that does not also have classification 6110 and/or 6511.*

WAC 296-17A-6304 Classification 6304.

6304-00 Stores: Department - retail

Applies to establishments engaged in operating large retail stores which are characterized by specialized departments such as, but not limited to, wearing apparel, jewelry, luggage, housewares, cosmetics and furniture. For purposes of this classification, a department store will include all of the following departments: Wearing apparel, shoes and household furnishings (such as, but not limited to, window coverings, bedding, linens, lamps). A department store will also have at least two of the following departments: Furniture, jewelry, audio equipment, luggage, hardware, giftware, china, or sporting goods. This classification includes employees of specialty services such as alteration personnel, and delivery drivers. This classification is distinguishable from clothing stores in classification 6305, or retail variety stores in classification 6406, in the number of specialized departments and the variety of nonclothing or giftware merchandise for sale. This classification also includes the placement or installation of furniture items such as, but not limited to, couches, china cabinets, end tables, dining tables, bedding such as mattresses and box springs, curtains, draperies, and mirrors in customer's locations.

This classification excludes automotive service centers which are to be reported separately in the applicable service classification and the installation of carpet, floor vinyl, tile, cabinets, exterior siding, painting, fencing, roofing or similar construction related activities which are to be reported separately

in the classification applicable to the construction work being performed.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6304-01 Antique variety stores - retail

Applies to establishments engaged in the retail sale of a variety of used or antique merchandise. While the majority of merchandise is used, some of the items may be new. Merchandise includes, but is not limited to, glassware, jewelry, clothing, pictures, tools, floor coverings, and silverware and could include a limited amount of furniture.

This classification excludes antique or specialty stores engaged primarily in the sale of furniture which are to be reported separately in classification 6306; antique specialty stores engaged primarily in the sale of glassware, china or silverware which are to be reported separately in classification 6406; and antique specialty stores engaged primarily in the sale of wearing apparel and/or shoes which are to be reported separately in classification 6305.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

WAC 296-17A-6305 Classification 6305.

6305-00 Stores: Clothing - retail

Applies to establishments engaged in the retail sale of new or used clothing. Merchandise varies, but generally includes shoes, jewelry, giftware, or accessories in addition to wearing apparel. Some establishments will specialize in certain types of clothing such as, but not limited to, athletic wear, T-shirts, coats, socks, or vintage clothing. This classification also applies to stores that rent clothing such as, but not limited to, costumes, tuxedos, or wedding apparel. This classification includes all store employees including specialty services such as alterations personnel and delivery drivers.

This classification is distinguishable from department stores in classification 6304 or retail variety stores in classification 6406 in the limited number of specialized departments and the variety of nonclothing or giftware merchandise for sale.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6305-01 Stores: Dry goods - retail

Applies to establishments engaged in the retail sale of a variety of new or used dry goods. For purposes of this classification dry goods include, but are not limited to, fabric,

embroideries, veiling, laces, textile trimmings, curtains, draperies, blankets, bedspreads, sheets, pillowcases, tablecloths, napkins, and towels. This classification includes all store employees.

This classification is distinguishable from retail fabric stores in classification 6406 in that dry good stores will carry primarily finished piece goods for sale while fabric stores will carry primarily fabric, sewing notions and a limited supply of finished goods.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6305-02 Stores: Shoe - retail

Shoe shine stands

Applies to establishments engaged in the retail sale of new or used shoes. Establishments may sell a full line of shoes or they may specialize in certain types such as athletic shoes, safety shoes, work boots, women's, men's, or children's shoes. It is customary for shoe stores to sell some related products such as, but not limited to, handbags, socks, belts, or shoe care products. This classification includes all store employees. This classification also applies to shoe shine stands.

This classification excludes establishments engaged in the manufacture or repair of shoes or boots which are to be reported separately in classification 3802.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6305-04 Stores: Western wear, including tack - retail

Applies to establishments engaged in the retail sale of new or used western style clothing. Merchandise varies, but may also include western style shoes and boots, jewelry, giftware, or horse tack. This classification includes all store employees including specialty services such as alterations personnel and delivery drivers.

This classification is distinguishable from department stores in classification 6304 in that classification 6305 businesses are not comprised of specialized departments and do not carry furniture, housewares, and similar items required as part of the department store classification.

This classification excludes establishments engaged exclusively in the sale of horse tack and related animal grooming and care products which are to be reported separately in classification 2009 "farm supply stores."

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6305-05 Stores: Wig or hat - retail

Applies to establishments engaged in the retail sale of new or used wigs or hats. Merchandise varies, but generally these establishments will also sell related hair care products, hat pins, broaches or similar accessory items. This classification includes all store employees.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of

the general reporting rules covering standard exception employees have been met.

6305-06 Custom dressmaking, tailoring, alterations

Applies to establishments who provide custom dressmaking, tailoring, or alterations services to others. Activities include the showing of sketches and fabrics, modeling samples, taking individual orders and measurements, cutting, basting and fitting. Employees use sewing machines, but much of the work is hand sewing, steaming or pressing. Materials include fabrics, buttons, zippers, and sewing notions. Tools and machinery include, but are not limited to, scissors, steam presses and irons, dress forms, and sewing machines with attachments to perform a variety of sewing functions. Custom dressmakers and tailors may sell fabrics and sewing notions, or limited supply ready-made apparel. The sale of these items by establishments engaged in custom dressmaking or tailoring is included in this classification. This classification is distinguishable from clothing manufacturers in classification 3802 in that establishments subject to classification 6305 make custom clothing for individuals rather than making garments on a quantity basis. However, customers of a 6305 business may order several items of a kind such as for a wedding party or small theater group.

This classification excludes the mass production of wearing apparel which is to be reported separately in classification 3802.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

WAC 296-17A-6306 Classification 6306.

6306-00 Stores: Furniture - wholesale or retail

Stores: Billiard or pool table - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of new, used, or antique household furniture. This classification also includes the sale of related items such as, but not limited to, lamps, bedding, pillows, floor and window coverings, framed pictures, art pieces and sculptures when sold in connection with a furniture store operation. This classification includes the delivery and the incidental repair of merchandise sold. Incidental repair in this classification is limited to such activities as the repair or cleaning of upholstery or fixing a small scratch on a table. The installation of carpet and window coverings may be included in this classification if such merchandise is part of the store's inventory and is readily available for sale and delivery to the customer. The contract installation of any merchandise which must be ordered from a factory or distributor to fulfill the terms of contract is to be reported separately in the classification

applicable to the work being performed. For example, a furniture store could bid on a job to carpet all units of an apartment complex. If the carpet is ordered from the factory as opposed to carpet carried at the store and in the stores inventory, then the installation is to be reported separately in classification 0502. This classification also applies to stores that sell billiard or pool tables.

Special note: Care should be exercised when considering this classification for antique or used furniture stores since such establishments may actually be a furniture refinishing business or an upholstery shop which are to be reported separately in the appropriate classification. Repair work covered by this classification (6306) is limited to such activities as fixing a small scratch on a table, replacing a piece of glass or mirror in a china or curio cabinet, sewing on a button or adjusting a reclining chair mechanism. Classification 6306 should not be assigned to an establishment that is engaged in furniture refinishing, or upholstery work which are to be reported separately in the applicable service or repair classification.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6306-01 Stores: Furniture - rental

Applies to establishments engaged in the rental of new, used, or antique household furniture. This classification also includes the sales of related items such as, but not limited to, lamps, bedding, pillows, framed pictures, art pieces and sculptures when sold in connection with a furniture rental store operation. This classification includes the delivery and the incidental repair of merchandise rented. Incidental repair in this classification is limited to such activities as the repair or cleaning of upholstery or fixing a small scratch on a table. This classification also applies to establishments that provide rent-to-own purchasing options, and to establishments engaged in the sale or rental of hospital beds, motorized wheelchairs and similar patient appliances.

Special note: Care should be exercised when considering this classification for an antique or used furniture store since such establishments may actually be a furniture refinishing business or an upholstery shop which are to be reported separately in the appropriate classification. Repair work covered by this classification (6306) is limited to such activities as fixing a small scratch on a table, replacing a piece of glass or mirror in a china or curio cabinet, sewing on a button or adjusting a reclining chair mechanism. Classification 6306 should not be assigned to an establishment that is engaged in furniture refinishing, or upholstery work which are to be reported separately in the applicable service or repair classification.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6306-02 Stores: Appliance - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of gas, electric, or propane household appliances. Household appliances include, but are not limited to, refrigerators, freezers, stoves, range tops, trash compactors, washing

machines, clothes dryers, television consoles, big screen televisions, and television antennas or satellite dish receiving units. Appliance stores will routinely carry smaller appliances which are generally referred to as counter top units which include, but are not limited to, mixers, blenders, microwave ovens, toasters and espresso machines and are included in this classification when sold in connection with the appliance store operation. This classification covers the sale of primarily new appliances although establishments subject to this classification accept trade-ins and sell some used appliances. Also included is the incidental repair of appliances sold by the appliance store, parts departments employees, and the delivery of products sold. The contract installation of any merchandise which must be ordered from a factory or distributor to fulfill the terms of contract is to be reported separately in the classification applicable to the work being performed. For example, an appliance store could bid on a job to supply appliances for all units of an apartment complex. If the appliances are ordered from the factory as opposed to items carried at the store and in the stores inventory then the installation is to be reported separately in classification 0607. Establishments engaged in the sale of commercial appliances may be assigned to this classification provided such establishments operate a bonafide store operation. Generally, however, commercial appliances such as those used to equip bakeries and restaurants are factory ordered items which are made to a customer's specifications from a manufacturer's representative.

Special note: Care should be taken when considering this classification for an antique or used appliance store since such establishments are primarily engaged in reconditioning appliances (service and repair) for resale and are to be reported separately in classification 0607.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6306-03 Stores: Piano or organ - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of new pianos and organs. This classification includes all operations associated with the store including service, repair, and delivery. It is common for stores subject to this classification to carry other musical instruments such as, but not limited to, guitars, drums and wind instruments as well as provide instructions on the use of instruments.

This classification excludes establishments engaged exclusively in piano tuning which are to be reported separately in classification 4107; stores that sell musical instruments other than pianos or organs which are to be reported separately in classification 6406; and establishments engaged in the reconditioning of organs and pianos accompanied by the related sales of reconditioned pianos and organs which are to be reported separately in classification 2906.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6306-06 Stores: Office furniture - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of new, used, or antique office furniture. This clas-

sification also includes the sales of related items such as, but not limited to, lamps, floor and window coverings, framed pictures, art pieces and sculptures when sold in connection with an office furniture store operation. This classification includes the delivery of furniture and related items, and the incidental repair of office furniture items sold by the office furniture store such as upholstery repair and cleaning. The installation of carpet and window coverings may be included in this classification if such merchandise is part of the store's inventory and readily available for sale and delivery to the customer. The contract installation of any merchandise that must be ordered from a factory or distributor to fulfill the terms of contract is to be reported separately in the classification applicable to the work being performed. For example, an office furniture store could bid on a job to supply modular desk units for a large office complex. If the desk units are ordered from the factory as opposed to units carried at the store and in the stores inventory, then the installation is to be reported separately in classification 2002.

Special note: Care should be exercised when considering this classification for an antique or used office furniture store since such establishments may actually be a furniture refinishing business or an upholstery shop which are to be reported separately in the appropriate classification. Repair work covered by this classification (6306) is limited to such activities as fixing a small scratch on a table, replacing a piece of glass or mirror in a china or curio cabinet, sewing on a button or adjusting a reclining chair mechanism. Classification 6306 should not be assigned to an establishment that is engaged in furniture refinishing or upholstery work.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

WAC 296-17A-6308 Classification 6308.

6308-00 Stores: Jewelry - wholesale or retail

Applies to establishments engaged in the sale of premanufactured jewelry. Jewelry sales may be retail to consumers or on a wholesale basis to other stores and dealers. It is common for jewelry stores to employ a goldsmith who will size rings on premises, mount gem stones into settings, or make custom jewelry. Jewelry stores could also be engaged in watch repair and engraving and may offer these services as a part of the jewelry store business. Repair of watches and engraving is included in this classification when performed by jewelry store employees. Custom jewelry making subject to classification 6308-00 is distinguishable from jewelry manufacturing subject to classification 3602 in that businesses in classification 3602 are engaged primarily in the manufacture of jewelry in mass quantities, while jewelry

stores in classification 6308 are primarily in the business of selling jewelry purchased from a manufacturer or dealer, and may also make custom or one-of-a-kind pieces.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6308-01 Stores: Hearing-aid - wholesale or retail

Applies to establishments engaged in the sale of hearing aids. Hearing aids are purchased directly from the manufacturer or a distributor and resold to retail consumers, or at wholesale to other hearing-aid stores. Stores subject to this classification routinely offer free hearing tests to customers. Classification 6308-01 is distinguishable from medical services rendered by a physician subject to classification 6109 in that technicians employed by hearing-aid stores subject to classification 6308 rely on sound testing equipment to conduct examinations. They can provide hearing-aid appliances to customers, but do not perform medical procedures and do not need medical certification. This classification includes technicians employed by the store who conduct hearing tests. Medical doctors, on the other hand, perform a number of medical tests including X ray and may recommend or perform hearing corrections through surgical procedures.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6308-02 Stores: Optical - wholesale or retail

Applies to establishments engaged in the sale of optical goods such as, but not limited to, eye glasses and contact lenses. Optical stores purchase eye glass frames and premade lenses from other sources and sell them to retail customers, or wholesale to other optical stores. Stores subject to this classification routinely offer free eye exams to customers. The eye examinations are performed by optometrists or by technicians. These technicians do not need medical certification in order to conduct tests. This classification includes optometrists or technicians employed by optical stores. Classification 6308-02 is distinguishable from medical services rendered by a physician (ophthalmologist) subject to classification 6109 in that optical stores in classification 6308 rely on testing equipment and can only provide eye glass appliances to customers. Medical doctors, on the other hand, perform a number of medical tests including X ray and may recommend or perform vision corrections through surgical procedures.

This classification excludes establishments engaged in grinding operations as part of the manufacture of optical lenses which are to be reported separately in classification 6604 and establishments engaged in the manufacture of eye glass frames which are to be reported separately in the classification applicable to the materials and processes used.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6308-03 Stores: Clock and watch - wholesale or retail

Applies to establishments engaged in the sale of clocks and watches, including related repair. Stores subject to this classification carry an assortment of clocks and watches such as, but not limited to, cuckoo clocks, grandfather clocks, anniversary clocks, and an assortment of heirloom quality pocket or wrist watches. Establishments assigned to this classification are not engaged in the manufacture or assembly of clocks or clock kits. Clocks are purchased directly from the manufacturer or a distributor and resold to retail consumers, or at wholesale to other stores. Classification 6308-03 is distinguishable from clock or watch manufacturing subject to classification 3602 in that clock stores subject to classification 6308 are engaged exclusively in the sale of items manufactured by others and businesses in classification 3602 are engaged primarily in the manufacture of clock mechanisms.

This classification excludes establishments engaged in the manufacture of wooden components or cabinets such as those for grandfather or cuckoo clocks which are to be reported separately in classification 2905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6308-04 Stores: Trophy or awards - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of trophies, plaques, awards and related items such as, but not limited to, banners, name badges, certificates, buttons, pins, ribbons, pens, advertising or specialty items. As a convenience to their customers, trophy stores may also sell small signs or similar items which they purchase from others. Establishments subject to this classification purchase component parts from other unrelated businesses, then assemble and engrave or letter them per customer specifications. Component pieces include, but are not limited to, plastic, marble, metal, or wood bases and backings, decorative mounts, small hardware, vinyl fabric, and ready made banners. They use hand tools, table top punching or bending devices and engraving equipment. While stores may still use old style engraving machines for some custom orders, most of today's engraving or lettering is done on computerized equipment.

This classification excludes the manufacture of component pieces or signs which is to be reported separately in the classification applicable to the work being performed.

Special note: Producing "computerized vinyl lettering or designs" is a normal activity in several types of businesses such as, but not limited to, trophy stores, manufacturers of textile banners, or sign painting services in a shop. Computerized lettering or designs are made on a plotter/cutter that is attached to a computer. A roll of vinyl fabric is placed on the plotter/cutter. Designs are created on the computer, then transferred electronically to the plotter/cutter that punches them out in the vinyl material. Designs are transferred onto the backing with the use of transfer paper. One must look beyond the producing of computerized vinyl applications when determining the nature of the business being classified. An employee whose *only* duties are generating vinyl lettering or designs on computerized equipment in an office environment could qualify for classification 4904 provided all the

conditions of the general reporting rule covering standard exception employees have been met.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

WAC 296-17A-6309 Classification 6309.**6309-02 Stores: Gun - wholesale or retail**

Applies to establishments engaged in the wholesale or retail sale of hand guns and rifles. Gun stores subject to this classification will routinely sell related goods such as, but not limited to, knives, archery supplies, ammunition, cleaning kits, targets, target launchers, ammunition belts and specialty clothing. It is common for gun stores to repair guns for their customers. This generally consists of replacing worn or malfunctioning parts that they have in inventory, or that are special ordered from the manufacturer. Gun stores are not generally involved in machining operations although some light machine work is contemplated by this classification. Gun stores in this classification can also make custom ordered guns. This term may be misleading in that a custom gun made by a gun store is simply the assembly of various components to produce the desired gun. Depending on the size and location of the store a related shooting range may be found on the premise. Whether the shooting range is operated in connection with the store operation or by an independent business unrelated to the gun store, it is to be reported separately in classification 6208. Establishments in classification 6309-02 are distinguishable from operations covered in classification 3402, in that gun stores subject to classification 6309 are not engaged in the manufacture of guns, which includes such operations as machining barrels, fabricating triggers, springs, bolts, levers, clips and handles, or in the mass assembly of gun components into finished goods.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-03 Stores: Bicycle - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of all types of bicycles. Bicycle stores subject to this classification will sell related goods such as, but not limited to, helmets, pumps, carrier racks, water bottles, shoes, trailers, child carriers, and specialty clothing. It is common for bicycle stores to assemble new bicycles as well as tune and repair bicycles for their customers. This generally consists of replacing worn or malfunctioning parts that they have in inventory or that are special ordered from the manufacturer. Bicycle stores subject to this classification will occasionally make a custom bicycle. This term may be misleading in that a custom bicycle may be nothing more than the assem-

bly of various components to produce the desired bicycle, or it could be the actual cutting, bending, and welding of tube metal, or the cutting, rolling and heating of graphite reinforced plastic material. *Only* those custom bicycles that are assembled from components *manufactured by others* are to be reported in classification 6309 and *only* if such custom work is incidental to the primary sales of off-the-rack bicycles manufactured by others.

This classification excludes machining operations, frame welding, and establishments engaged in custom manufacturing or mass producing bicycles from nonfinished goods which are to be reported separately in the classification applicable to the bicycle frame material and process used to manufacture the finished units.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-06 Stores: Garden supply - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of homeowner type yard and garden tools, equipment, and supplies. Establishments subject to this classification will carry in their inventory and have available for immediate sale various garden tools and gloves, equipment, and supplies such as, but not limited to, rakes, shovels, post hole diggers (nonpower), hoes, wheel barrows, garden carts, edgers, weed wackers, lawn sprinklers, garden hose, lawn mowers, and chain saws. On a seasonal basis these establishments will routinely stock bags of various types of lawn, shrub and plant fertilizer, lawn seed, bags of potting soil, bags of beauty bark, flower bulbs, vegetable and flower seeds, and some bedding plants and small shrubs. This classification is distinguishable from nurseries in that nurseries sell plants, shrubs and trees that they have purchased from others or raised from seeds or cuttings, most of which are available for sale all year round. Nurseries typically sell soils and bark in bulk, but seldom sell lawn mowers, lawn tractors, edgers and similar items. Nurseries are further distinguishable from garden supply stores in that garden supply stores have a limited outside yard and are primarily composed of a store operation. Nurseries, on the other hand, have limited store operations and extensive yards where plants, shrubs, and trees are displayed and cared for, as well as extensive greenhouse operations. This classification also includes merchants who are engaged in the sale and/or hand packaging of agricultural seeds that have been processed by others.

This classification excludes the repair of tools and equipment sold which is to be reported separately in the classification applicable to the work being performed.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-07 Locksmiths

Applies to establishments engaged in servicing or repairing locksets. Establishments subject to this classification will have a small retail store where they sell new door locksets, repair customer locksets, rekey locksets, make duplicate keys, and sell home security items such as safes and alarm systems. In addition to store operations, this classification

includes locksmith field work such as unlocking a car, removing a broken key from an ignition or door, and installing a replacement lockset in a door.

This classification excludes the installation of safes, new locksets, or dead bolt locks which is to be reported separately in classification 0607 and the installation of home security systems which is to be reported separately in classification 0608.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-08 Stores: Automobile, truck, motorcycle, or aircraft accessories or replacement parts - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of automobile, truck, motorcycle, or aircraft accessories or replacement parts. Most establishments subject to this classification carry a full line of parts ranging from batteries, wiper blades, ignition components, to engines, tires, and transmissions. However, this classification also applies to establishments that sell specialized product lines such as, but not limited to, batteries, electrical systems, or transmission parts. This classification covers only the store operation. Any vehicle, tire, or machine shop service is to be reported separately in the applicable repair or service classification. Care should be exercised when considering the assignment of this classification to an establishment engaged in vehicle service or repair as parts departments may be included in the service or repair classification. *Only* those vehicle service or repair establishments that have "full line" replacement parts stores are to be assigned to this classification and *only* when the classification that governs the repair or service permits, the parts department to be reported separately.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-09 Stores: Architectural and surveyor supplies - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of professional and technical measurement equipment used primarily by architects and surveyors. Products sold by establishments subject to this classification include, but are not limited to, plan holders, plotters, lettering systems, engineering software, CAD supplies, copiers and computer paper and films. This classification includes the *in-shop* servicing or repair of products sold, such as replacing or adjusting parts.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-11 Stores: Stained art glass - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of stained art glass supplies. Operations contemplated by this classification include the receipt of merchandise purchased from unrelated businesses, dealers, or manufacturers, warehousing, stocking of shelves, cashiering,

offering craft classes to customers, and delivery of merchandise to customers. Items sold by establishments subject to this classification include, but are not limited to, lead and leaded glass, crafts, light fixtures, terrarium parts, lamp shade parts, kits for picture frames, mirrors, books on stained glass, small grinders, glass cutters and other tools for making stained glass items.

This classification excludes the manufacture of stained glass and the fabrication and assembly of stained art goods which is to be reported separately in classification 3503 and stores that sell craft-making goods or hobby supplies which are to be reported separately in classification 6309-21.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-12 Stores: Wood stove and accessories - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of wood stoves, pellet stoves, fireplace inserts, and accessories. The majority of stoves today are produced from cast iron or steel plate and may be finished with enamel or paint. Stove stores subject to this classification will sell related accessories such as, but not limited to, noncombustible hearths and irons, wood holders, pellet scoops, stovepipes, metal chimneys, decorative brass legs and brass handles and bags of pellets. Some wood stove dealers may sell both stoves and spas as their main product lines. Stores that sell both are to be reported separately in classification 6309-14. This classification includes the set-up of wood stoves and heaters which can be operated as part of a display area or showroom in the store when performed by employees of this business.

This classification excludes the installation and repair of wood stoves, furnaces, air conditioning units and vacuum cleaner systems which is to be reported separately in classification 0307; masonry work which is to be reported separately in classification 0302; and chimney cleaning which is to be reported separately in classification 4910.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-13 Stores: Hardware variety, N.O.C., specialty hardware or marine hardware - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of hardware related items. Operations contemplated by this classification include the receipt of merchandise purchased from unrelated business dealers or manufacturers, warehousing of inventory, stocking of shelves, cashiering, customer load out, assistance and delivery. Establishments subject to this classification cater to homeowners and, therefore, do not carry contractor quantities of products for sale. Hardware variety stores applicable to this classification are generally small retail stores (3,000 square feet or less). Hardware variety stores will have a wide assortment of products for sale ranging from paint and painting supplies, electrical and plumbing supplies, to hand or power tools, garden supplies, housewares, and hardware. For purposes of this classification the term "hardware" applies to

nails, screws, bolts, hinges, staples, chain, and similar items. Classification 6309-13 is distinguishable from classification 2009 in that the quantity of products sold by hardware variety stores subject to classification 6309-13 is limited to homeowner quantities, the selection of product is limited, and they carry only a limited selection of lumber, if at all. Hardware variety stores may also carry seasonal plants. This classification also applies to specialty hardware or marine hardware stores.

This classification excludes hardware stores that sell lumber or building materials which are to be reported separately in classification 2009.

Special notes: Care should be exercised when assigning classification 6309-13 to a business. All other store and nursery classifications are to be considered before this classification is assigned. It is common for a nursery to have a substantial inventory of hardware and tools, just as it is common for farm supply stores to sell similar products, yet these types of businesses are covered in alternative classifications.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-14 Stores: Hot tub or spa - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of hot tubs and spas. Most dealers subject to this classification have small store operations where a limited supply of spas and hot tubs are displayed. Some may have distribution centers where spas are shipped from the manufacturer and stored until delivered to a showroom or directly to a customer. The majority of spa units are portable and self-contained, which means the plumbing, pump, wiring, and controls are already in place and enclosed in the siding surrounding the tub. They are ready to use once the electricity is hooked up at the customer's site. The other type of spas are referred to as "shells," which are usually set in place in the ground, then the pump, plumbing, electrical wiring, and any surrounding rockery or structures built around it. Stores that sell spas and hot tubs also stock related items such as, but not limited to, spa or swimming pool chemicals and cleaners, brushes, replacement pumps and parts, filters, and spa accessories such as fragrances. Some may also sell other product lines such as swimming pool shells, wood or pellet stoves and related items such as, but not limited to, lawn furniture, barbecues, or water sports equipment. Operations contemplated by this classification include the receipt of tubs, spas, pools, pool liners, chemicals and other products from manufacturers or unrelated companies, stocking shelves, setting up displays, cashiering, delivery of products to customer locations, instruction on testing and maintaining pool waters, and incidental pump repair in the store; it does not contemplate the repair or service of pumps or pools at customer's location. Establishments that sell both wood stoves and spas are to be reported in this classification. This classification also applies to establishments that rent hot tubs and deliver them to, and pick them up from, the customer's location.

This classification excludes establishments that sell only accessories for tubs or pools which are to be reported separately in classification 6406; establishments engaged in the sale of wood or pellet stoves, but do not sell spas, which are

to be reported separately in classification 6309-12; and establishments engaged in the manufacture or installation of hot tubs which are to be reported separately in the classification applicable to the work being performed.

Special notes: Spa and hot tub dealers may be licensed contractors who build swimming or wading pools, in addition to the spas and hot tubs sold. Except for the in-store pump repair, all other electrical or plumbing installation or repair work, pump repair, landscaping, building of structures, pouring of concrete, and servicing of the pool waters are excluded from this classification and are to be reported separately in the classification applicable to the work being performed.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-15 Stores: Floor covering - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of floor coverings. Establishments subject to this classification sell a variety of floor coverings and related items such as, but not limited to, sheet vinyl, floor tile, ceramic wall or countertop tile, wood parquet, floor or area rugs, carpeting, window coverings, bathroom and kitchen accessories, and supplies to install products. Other stores may specialize in only one or a few of these products. Floor covering stores generally consist of a store operation where samples of all product types are displayed. Merchandise is usually ordered from the factory or distributor per customer specifications; however some goods are kept in stock and are available for immediate sale. Operations contemplated by this classification include the receipt of merchandise purchased from unrelated businesses and manufacturers, stocking shelves, cashiering, estimating floor covering needs from plans, blue prints and customer measurements, ordering special floor coverings from distributors or manufacturers, and delivering the product to customers.

This classification excludes all installation work and the manufacture of any product sold by floor covering stores, which is to be reported separately in the applicable construction, installation, or manufacturing classification.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-16 Pawn shops

Applies to establishments engaged in loaning money to others in exchange for collateral of new or used merchandise such as, but not limited to, jewelry, video equipment, and computers. It is common for pawn shops to sell new and used merchandise they have taken as collateral for defaulted loans. Operations contemplated by this classification include receiving merchandise from others, stocking of shelves, and cashiering.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-17 Stores: Sporting goods - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of a variety of sporting goods. Operations contemplated by this classification include the receipt of merchandise purchased from other unrelated businesses, dealers, or manufacturers, warehousing, stocking of shelves, cashiering, and delivery. For purposes of this classification the term "sporting goods" includes, but is not limited to, baseball gloves, bats, balls, fishing poles, tackle, reels, tennis racquets, bicycle helmets, exercise equipment, and specialty clothing and shoes. A store may carry equipment and related items for a number of sports, or specialize in a particular sport such as skiing or fishing.

This classification excludes stores that specialize in selling bicycles and related items such as tire pumps, water bottles, locks, shoes and clothing, which are to be reported separately in classification 6309-03, and stores that specialize in selling guns and related items such as ammunition, hunting supplies, archery equipment, targets, knives, and clothing which are to be reported separately in classification 6309-02.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-18 Stores: Paint and wallpaper - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of paint and wallpaper supplies. Operations contemplated by this classification include the receipt of merchandise purchased from other unrelated businesses, dealers, or manufacturers, mixing paints and stains, warehousing, stocking of shelves, cashiering, and delivery of merchandise to customers. Establishments subject to this classification routinely offer pressure washer and spray units, and ladders for rent or sale which is included in this classification when such sales and rentals are conducted in connection with a paint and wallpaper store. This classification excludes establishments engaged in the rental of spray paint and pressure washer units which are to be reported separately in classification 1106.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-19 Stores: Sewing machines or vacuum cleaners - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of new or reconditioned sewing machines or vacuum cleaners. Operations contemplated by this classification include the receipt of merchandise purchased from other unrelated businesses, dealers, or manufacturers, warehousing, stocking of shelves, cashiering, demonstrating merchandise, providing instructions or sewing classes to customers, and in-store repair. This classification includes delivery of merchandise to customers and door-to-door sales personnel employed by the store. Sewing machine repair is generally limited and consists mainly of adjusting thread and stitch tensioners, aligning components (needle and foot), replacing electrical motor, lights and belts. Types of sewing machines include sergers, button holers, embroidery machines, and commercial machines such as those used by a tailor or an

upholstery shop, but does not include industrial machines such as those used in feed and carpet mills.

This classification excludes fabric stores that may also sell sewing machines which are to be reported separately in classification 6406; and establishments engaged in the repair of industrial sewing machines which are to be reported separately in classification 3402 for shop operations and classification 0603 for field repairs. This classification excludes firms who employ only door-to-door sales personnel in this state which are to be reported in classification 6309-22.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-20 Stores: Custom framed art or U-frame - wholesale or retail; Art galleries

Applies to establishments engaged in the wholesale or retail sale of custom framed art such as, but not limited to, posters and pictures. Operations contemplated by this classification include the receipt of merchandise purchased from other unrelated businesses, dealers, or manufacturers, warehousing, stocking of shelves, cashiering, cutting matte board, glass and frame material, assembling frames, mounting art, posters or pictures into custom made or premade frames and delivery of merchandise to customers. Custom frame manufacturing covered by this classification is distinguishable from other frame manufacturing covered in classifications 3404, 2909, and 3512 in that custom frame making contemplated in classification 6309-20 consists of cutting frame material purchased from others with a specialized saw and fastening the pieces together with a small air nailer or finish screws. Frame manufacturing operations in other classifications consist of extruding metal or plastic through dies to produce the desired frame material, or planing and molding the dimensional lumber to the desired appearance, cutting material in mass quantities, fastening frames together (mass production oriented) and boxing for shipment. U-frame operations consist of selling the various components such as, but not limited to, premade frames or precut unassembled frame kits, matte board, glass and prints to customers for customer assembly. This classification also includes establishments that operate art galleries, as the framing activities are similar.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-21 Stores: Hobby and craft - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of hobby and craft supplies. Operations contemplated by this classification include the receipt of merchandise purchased from other unrelated businesses, dealers, or manufacturers, warehousing, stocking of shelves, cashiering, offering craft classes to customers, and delivery of merchandise to customers. Items sold by establishments subject to this classification include, but are not limited to, floral arrangement supplies, pottery supplies, art glass supplies, doll making supplies, jewelry components such as beads and wire, and artist supplies. It is common for establishments subject to this classification to also be involved in custom picture framing in connection with hobby or craft store operation.

This classification excludes the manufacture of hobby and craft goods which is to be reported separately in the classification applicable to the materials and processes and stores that specialize in the sale of stained art goods which are to be reported separately in classification 6309-11.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6309-22 Sales personnel: Door-to-door

Applies to sales personnel engaged in door-to-door sales of merchandise. Typically these sales are done in the homes of the customer, often by individual appointment or at a party given by the host in the home. Types of merchandise include, but are not limited to, coffee, tea, or other grocery items, mops, brushes, carpets or other household furnishings, candles, vacuum cleaners, books and magazines. Duties contemplated by this classification include showing samples or brochures describing items for sale, demonstrating merchandise, completing paperwork for orders, and driving. Sales persons usually have the products shipped directly from a distributor to the consumer. This classification also contemplates door-to-door sales employees who may deliver the sold products or who sell directly from stock kept in their vehicle. Door-to-door sales personnel are considered workers of the company employing them unless they meet the criteria as specified in RCW 51.08.195.

This classification excludes establishments engaged in motor route distribution of telephone books, periodicals, or newspapers which are to be reported separately in classification 1101-14.

Special note: Clerical and office employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

WAC 296-17A-6402 Classification 6402.

6402-00 Stores: Grocery, N.O.C. - retail

Applies to establishments engaged in providing retail sale of a full line of grocery items. To qualify for this classification an establishment must provide for retail sale all of the following items: Canned goods, dairy products, a full line of fresh meats, frozen meats, vegetables and fruits, baked goods, carbonated and alcoholic beverages, juices, household cleaners, laundry and health care products. These stores will generally be of the supermarket size but there may be some

smaller stores which are also to be included in this classification if all of the items listed above are in their inventory. Also included in this classification, when performed by employees of the store, are in-store departments or services that are provided for the customer's convenience such as in-store bakeries, delis, video rental, film developing, florists, and wine departments.

This classification excludes in-store pharmacies which are to be reported separately in classification 6406, espresso street carts or stands and lunch counter/restaurant operations which are to be reported separately in classification 3905; convenience store or mini-markets that do not sell all of the above mentioned items which are to be reported separately in classification 6403; grocery or convenience stores with self-service gasoline operations which are to be reported separately without division of hours in classification 3410; and specialty retail stores that sell only dairy products, fruits and vegetables, soft drinks or wine and/or liquor which are to be reported separately in classification 6403.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

WAC 296-17A-6403 Classification 6403.

6403-01 Stores: Coffee, tea, or spice - retail

Applies to establishments engaged in the retail sale of specialty coffees, teas, or spices. They may sell coffee/tea in packaged and/or ready to drink forms and may offer a small selection of pastries or cookies for the customers convenience.

This classification excludes espresso street carts or stands and lunch counter/restaurant operations which are to be reported separately in classification 3905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6403-02 Stores: Dairy products - retail

Applies to establishments engaged in the retail sale of dairy products such as, but not limited to, milk, eggs, cheese, and ice cream. As a convenience to their customers, these establishments may offer a limited supply of related foods such as bread. This classification is distinguishable from other 6403 store operations in that the primary products available for sale are dairy products.

This classification excludes espresso street carts or stands and lunch counter/restaurant operations which are to be reported separately in classification 3905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6403-04 Stores: Fruit or vegetable - retail

Applies to establishments primarily engaged in the retail sale of fresh fruits and/or vegetables. These stores are usually found in individual stands at public or municipal street markets, or at roadside stands not located on the farm which may range from a small booth to a store-like operation. Sales at roadside stands away from the farm location or public markets are to be reported in this classification even if vendors grow all their own produce.

This classification excludes establishments that grow their own fruits and vegetables and sell them at their farm location which are to be reported separately in the appropriate agricultural classification as required by the general inclusion provision of the general rules, espresso street carts or stands and lunch counter/restaurant operations which are reported separately in classification 3905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6403-05 Stores: Specialty grocery - retail

Applies to establishments engaged in retail sale of specialty grocery items. Establishments subject to this classification have a limited selection of grocery items which are generally related to ethnic foods and cuisine, gourmet meats, cheeses, or condiments, health food or pet food. This classification also applies to stores that sell U-bake pizza.

This classification excludes establishments engaged in the sale of nutritional supplements such as, but not limited to, vitamins, herbal compounds, protein powders, or energy bars, which are to be reported separately in classification 6406; espresso street carts or stands and lunch counter/restaurant operations which are reported separately in classification 3905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6403-06 Stores: Mini-markets or convenience grocery, N.O.C. - retail

Applies to establishments engaged as retail convenience grocery stores or mini-marts. Generally these stores sell convenience items such as, but not limited to, soft drinks, beer/wine, snack foods, candy and a limited selection of canned or boxed foods. They may also prepare foods such as sandwiches, chicken, jo jos and hot dogs. While these stores may sell a variety of grocery items they are distinguished from stores in classification 6402 in that they do not sell all of the items specified for retail grocery store operations. Generally the difference can be established by determining if the store cuts and sells fresh meat. This classification also applies to food bank operations.

This classification excludes establishments engaged as convenience grocery stores or mini-markets with self-service gasoline operations which are to be reported separately in

classification 3410 and espresso street carts or stands and lunch counter/restaurant operations which are to be reported separately in classification 3905.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6403-07 Stores: Wine, liquor, or soft drinks - retail

Applies to establishments engaged primarily in the retail sale of wine, liquor, or soft drinks and an assortment of pre-packaged mixed drinks, and related gift items. Establishments in this classification are not operated in connection with a manufacturing, bottling, restaurant, or tavern operation. This classification also applies to liquor stores operated by Native American tribes and to contract state liquor stores operated by nonstate employees. This classification contemplates a minimal amount of mail order sales and locker rentals in a wine cellar operated by a wine store.

This classification excludes state operated liquor stores which are reported separately in classification 5307; establishments engaged in the distillation, brewing, or bottling of alcohol, beer or wine, which often have tasting rooms and gift shops, which are reported separately in classification 3702; and establishments engaged primarily in selling wine-making or beer-making kits and supplies which are reported separately in classification 6406.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

WAC 296-17A-6404 Classification 6404.

6404-00 Stores: Florists - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of fresh-cut flower arrangements, potted plants, balloon arrangements, or arrangements of artificial or dried flowers and foliage. These shops typically carry related gift items, such as, but not limited to, terrariums, vases, and gift cards. Operations contemplated by this classification include the receipt of flowers, plants, and other merchandise from unrelated businesses, making the arrangements, storing fresh-cut flowers in refrigerated cases, caring for potted plants in a greenhouse, and delivering items sold. Also included in this classification is the assembly and/or decoration of Christmas wreaths. Wreaths may be assembled from fresh greens and decorations added, or decorations may be attached to grapevine wreath bases or metal rings. Establishments in this classification work with hand cutting tools, glue guns, small wires and wooden stakes, floral foam or clay, greenery, wreath bases, and decorative trimmings. This clas-

sification also applies to "cottage industries" that make similar items, and to establishments primarily engaged in packing holly that was grown by others.

This classification excludes establishments engaged in the planting, cultivating, and/or harvesting of flowers, plants, shrubbery, trees, florist greens, holly, baby's breath or florist greens which are to be reported separately in the classification applicable to the work being performed.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6404-02 Stores: Potted plants or aquariums - wholesale or retail: Sale, lease, or care of

Applies to establishments engaged in the wholesale or retail sale, lease, or care of potted plants or aquariums. Establishments subject to this classification will deliver, set up, service, and maintain plants or aquariums at the customer's location. The plants or aquariums are usually located inside, but may also be placed on extended living areas such as, but not limited to, porches, patios, or decks. Maintenance/care includes, but is not limited to, watering, trimming, pruning, fertilizing, and cleaning. Such establishments will frequently have a small greenhouse facility for caring and storing plants.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6404-03 Stores: Candy or cookie arrangement - wholesale or retail

Applies to establishments engaged in the wholesale or retail sale of candy or cookie arrangements in containers such as, but not limited to, mugs, vases, booklets, and novelty items. Typical occupations include, but are not limited to, making arrangements, answering telephones, selling to walk-in customers, cashiering, and delivering the bouquets. This classification does not include any on-premise manufacturing of candies or cookies.

This classification excludes establishments engaged in retail candy sales with on-premise manufacturing which are to be reported separately in classification 3905, and establishments engaged in specialty bake shops which are to be reported separately in classification 3901.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

WAC 296-17A-6405 Classification 6405.**6405-01 Tire sales and service centers, including automobile or truck care service centers or repair garages operated in connection with a tire service or repair center**

Applies to establishments engaged in the sale, installation, and repair of vehicle tires for others. This classification includes, but is not limited to, tire store employees, service managers, and auto care service employees. Services provided include, but are not limited to, tire mounting and balancing, in-shop or mobile service flat repair, alignments, brake service, muffler repair, tune-ups, and oil changes. It is common for tire centers to offer other automotive services such as wiper replacement, radiator flush, battery replacement and even major engine and transmission work which are also included in this classification. This classification is distinguishable from classification 3411 in that classification 6405 applies to any business that installs and services tires regardless of the number of tires sold. Establishments assigned to classification 3411 do not install or service tires. *Classification 3411 is not to be assigned to an establishment assigned classification 6405.*

This classification excludes towing services for hire which are to be reported separately in classification 1109 and tire sales and services centers which are also engaged in tire retreading operations which are to be reported separately in classification 6405-06.

6405-06 Tire rebuilding, retreading and/or recapping

Applies to establishments engaged in rubber tire rebuilding, retreading and/or recapping either at their tire dealership location, or at a location physically separate from the tire store. Rebuilding tires differs from the manufacture of tires in that rebuilding, recapping, or retreading simply restores used tires to a usable condition by bonding new rubber onto the existing work tread and lateral surface. First, tires are inspected for separations and penetrations. To remove the tread pattern, the casing is mounted on a wheel, inflated, and smoothed with a buffer or abrasive file. Any rocks, nail heads, etc., are pulled out with air tools, and the holes repaired with a rubber patch or a strip of rubber applied with an extruder gun. In the hot process, the buffed tire is put on a spinning wheel and unvulcanized tread rubber is wrapped around the tread area of the tire body either manually or mechanically. The tire is then placed inside a curing mold which has a tread design, and heated at 320 degrees for several hours so the rubber expands into the design and forms the tread. After the tire is removed from the vulcanizing mold, it is inflated to high pressure and cooled. In the cold process, commonly referred to as bandage, the new tread is a pre-cured strip or rubber compound with the tread design already molded into it. Only enough old rubber is removed to true the tire and provide a bonding surface. Air hoses or solvents are used to remove contaminants which would interfere with the adhesion process. The tire is inflated to its normal running pressure and a rubber cement is applied over the buffed surface by spray gun or brush. When the cement dries the pre-cured tread is wrapped around the casing. The strip is bonded to the tire casing under pressure and heated at 210 degrees in a curing chamber. This classification excludes tire dealers that do not perform rebuilding, recapping or retreading which are to be reported separately in classification 6405-01 and the

manufacture of tires which is to be reported separately in classification 3513.

WAC 296-17A-6406 Classification 6406.

This classification applies to specialty retail store operations engaged primarily in the sale of a wide variety of products ranging from collectibles such as stamps, coins, sports cards, and dolls to table top appliances such as portable televisions, blenders, mixers and toasters. This classification is comprised of subclassifications that cover a specific type of retail store operation. One of the subclassifications applies to the sale of products which are not covered by another classification. Although the products sold by establishments subject to this classification will vary by each subclassification, the overall operational activities are similar. Each business covered by this classification will generally employ cashiers and merchandise stockers, as well as other occupations of workers.

Special note: This classification excludes all repair operations unless it is specifically included in the classification, delivery service, outside installation work, and lunch counters and restaurants which are to be reported separately in the classification applicable to the work or service being performed.

Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6406-00 Retail stores, N.O.C.

Applies to establishments engaged in the retail sale of merchandise or services not covered by another classification (N.O.C.). Merchandise includes, but is not limited to, greeting cards, costume jewelry, scarves, tropical fish and birds and related fish or bird supplies, table top appliances such as mixers, blenders, microwave ovens, or table top satellite receiving units, quick print copy or fax services and related specialty items or services. This classification also applies to establishments that provide inventory services for other businesses.

This classification excludes pet stores that sell dogs or cats and establishments engaged in pet grooming services which are to be reported separately in classification 7308; pet food stores which are to be reported separately in classification 6403; and offset, cold press and similar printing operations which are to be reported separately in classification 4101.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-01 Stores: Camera or photography supply - retail

Applies to establishments engaged in the retail sale of cameras and photography and dark room supplies such as, but not limited to, batteries, film, processing trays, chemicals, print paper, enlargers, and timers. It is common for these establishments to offer film developing services which may be either a one-hour service or an overnight process. Both types of film developing services are included in this classification when conducted in connection with a camera and photography supply store. This classification is distinguishable from classification 6506 in that establishments covered in classification 6506 are not engaged in the sale of cameras or photo developing equipment.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-03 News and magazine stands - retail

Applies to establishments engaged in the retail sale of newspapers and magazines. Establishments subject to this classification may sell newspapers or magazines from various locations such as, but not limited to, stands at public markets, store operations in malls, or from a street corner.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-09 Arcades: Coin or token operated

Applies to establishments engaged in operating coin- or token-operated arcades. This classification covers attendants, change makers, and security personnel who monitor the game rooms and make change. Attendants may remove tokens and money from machines and may perform minor adjustments such as resetting a jarred machine.

This classification excludes the installation, removal or repair of machines which is to be reported separately in classification 0606.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-11 Stores: Office stationery and machinery - retail

Applies to establishments engaged in the retail sale of office stationery, supplies, and/or machinery. For purposes of this classification "office stationery and supplies" includes, but is not limited to, paper, writing tablets, computer software, pens, pencils, markers, staples, staplers, scissors, paper clips, and binders. "Office machinery or business machinery" includes, but is not limited to, calculators, typewriters, various types of copy machines, fax machines, and desk top and lap top computers.

This classification excludes service and repair of office/business machines which is to be reported separately in classification 4107 and establishments engaged in sale of office furniture which are to be reported separately in classification 6306.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-12 Stores: Fabric, yardage, yarn and needlework supplies - retail

Applies to establishments engaged in the retail sale of fabric, yardage, yarn and needlework supplies. It is common for establishments subject to this classification to have a small inventory of noncommercial/industrial sewing machines and sergers for sale in addition to fabric, sewing notions, patterns, and related supplies. Fabric and yarn stores may also offer sewing and craft classes which are included in this classification when taught by employees of an employer subject to this classification. This classification is distinguishable from sewing machine stores in classification 6309 in that the principle products sold in classification 6406 are fabric and sewing notions while sewing machine stores are not engaged in the sale of fabric or yardage.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-14 Stores: Wind or string musical instruments - retail

Applies to establishments engaged in the retail sale of musical instruments such as, but not limited to, drums, wind instruments, guitars, and banjos. This classification includes music lessons when provided by employees of an employer subject to this classification and includes minor adjustment services such as replacing a drum skin or a broken string on a guitar.

This classification excludes the repair of wind and string musical instruments which is to be reported separately in the applicable repair classification; establishments engaged in the repair of pianos which are to be reported separately in classification 2906; and establishments engaged in the sale of pianos and organs which are to be reported separately in classification 6306.

Special notes: Classification 6406 does not apply to any establishments that sells pianos or organs in addition to wind or string instruments. Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-16 Stores: Drug - retail

Applies to establishments engaged in the retail sale of prescription and nonprescription drugs and/or nutritional supplements such as, but not limited to, vitamins, herbal compounds, and energy bars. Drug stores subject to this classification may also carry a variety of personal care and grooming products and may rent crutches, canes, wheel chairs, and walkers.

This classification excludes establishments engaged in the sale and/or rental of hospital beds, motorized wheel chairs, and other patient appliances which are to be reported separately in classification 6306, and establishments engaged in the sale/rental and service (repair) of motorized mobility aids such as wheelchairs and 3-wheel scooters which are to be reported separately in classification 3309.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-17 Stores: Variety - retail

Applies to establishments engaged in the retail sale of a variety of consumer goods such as, but not limited to, housewares, linens, clothing, toys, and candy. In earlier years establishments subject to this classification were often referred to as "5 and 10 cent stores." Although these stores carry much of the same merchandise as a department store, they are distinguishable in that variety stores are not comprised of specialized departments and do not generally carry the quantity/assortment of products that department stores do.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-18 Private mail box; safety deposit box; computer tape storage facilities - rent or lease

Applies to establishments engaged in renting or leasing private mail boxes, safety deposit boxes, or computer and financial record storage facilities. Establishments subject to this classification will operate a secured facility where they receive and sort their customers' mail, parcels and packages from the U.S. Post Office or other parcel/package delivery companies, and package articles for shipment for their customers. They also provide a secured storage facility equipped with safety deposit boxes which they rent out on a short or long term basis. It is common for these establishments to offer additional services such as fax, and copying services.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-19 Stores: Coins, stamps, baseball cards, and comic books - retail

Applies to establishments engaged in the retail sale of coins, stamps, baseball cards, comic books, and similar collectibles. Establishments subject to this classification may be engaged exclusively in mail order sales, sell from browse tables at collectible or trade shows, through specialty auctions, or may sell from a store location. Coin and stamp stores routinely sell magazines, periodicals, and supplies that cater to collections or hobbies. Card shops routinely sell other sports memorabilia such as autographed baseballs, footballs and basketballs, framed pictures, POGS and buttons.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-20 Stores: Book, record, cassette, compact disc, and video - retail

Applies to establishments engaged in the retail sale or rental of new or used books, records, cassettes, compact discs or videos. Establishments subject to this classification may be engaged exclusively in mail order sales, sell from browse tables or trade shows, through specialty auctions or may sell from a store location.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-23 Stores: Candy - retail

Applies to establishments engaged in the retail sale of packaged and un packaged candy they have purchased from others.

This classification excludes establishments engaged in the on-premise manufacture of candy and the subsequent retail sale of these products which are to be reported separately in classification 3905; and establishments engaged in the manufacture of candy or confections for wholesale to retail establishments or distributors which are to be reported separately in classification 3906.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-24 Stores: Cigarette and tobacco - retail

Applies to establishments engaged in the retail sale of cigarettes, tobacco, and related products such as, but not limited to, pipes, pipe cleaning supplies, rolling machines, cigarette papers, lighters, lighter fluid, and cigarette cases.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-25 Stores: Telephones - retail

Applies to establishments engaged in the retail sale of telephones, pagers, and cell phones. Establishments subject to this classification are not a utility company in that they do not operate telephone exchanges and are not regulated by the utilities and transportation commission of Washington. Their operations are limited to the sale of communication hardware. Stores subject to this classification may arrange activation and service for their customer, or the customer may contact the service provider directly.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-27 Stores: Stereo components - retail

Applies to establishments engaged in the retail sale of stereo components. Establishments subject to this classification will sell a variety of audio and video appliances such as, but not limited to, video players, stereos and portable televisions. These establishments may also sell and install automobile stereo speaker systems and car phone systems; however, the installation is not covered in classification 6406-27.

This classification excludes the installation, service or repair of home or car stereos and car phone systems which are to be reported separately in classification 0607, and establishments engaged in the sale of stereo and television console sets, big screen televisions, or other major appliances which are to be reported separately in classification 6306.

Special note: Classification 6306 applies to any establishment that sells TV console sets or big screen TVs, even if the majority of their inventory is stereo components and/or portable TVs. Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-29 Stores: Toys - retail

Applies to establishments engaged in the retail sale of a variety of toys, games, and related items for persons of all ages. Merchandise includes, but is not limited to, video

games, tricycles or bicycles, books, dolls and stuffed animals, outdoor play equipment, and specialty clothing.

This classification excludes establishments engaged in the retail sale of sporting goods and bicycles which are to be reported separately in classification 6309. This classification is distinguishable from businesses in classification 6309 in that the principle products of stores subject to classification 6406 are toys and games, as compared to stores in classification 6309 which are primarily engaged in the sales of sporting goods and bicycles.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-30 Stores: Cosmetics - retail

Applies to establishments engaged in the retail sale of cosmetics and fragrances. Related services usually offered by these types of stores include consultations with clients regarding make-up techniques, styles, and colors.

This classification excludes hair and nail salons which are to be reported separately in classification 6501.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-31 Stores: Housewares - retail

Applies to establishments engaged in the retail sale of housewares such as, but not limited to, pots and pans, flatware, dishes, towels, canister sets, soap dishes, towel bars, waste baskets, plant stands, and curtains or draperies.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

6406-33 Stores: Gift shops, N.O.C. - retail

Applies to establishments engaged in the retail sale of gift items not covered by another classification (N.O.C.) such as, but not limited to, crystal and silver serving pieces, china, cut glass, picture frames, wedding and shower books and invitations, special occasion cards, decorative statues, boxed candy, and ornaments. This merchandise tends to be of a finer selection than the everyday wares common in variety shops.

Special note: Refer to classification 6406 general description at the beginning of this rule for operations excluded from this classification.

[Title 296 WAC—p. 508]

WAC 296-17A-6407 Classification 6407.

6407-00 Wholesale stores, N.O.C. - including combined wholesale and retail store operations

Applies to establishments engaged in the wholesale, or combined wholesale and retail sales of merchandise that is not covered by another classification (N.O.C.). Establishments subject to classification 6407 usually own the merchandise they sell, but may also be marketing goods on consignment, in which case classification 6407 still applies because the exposure and processes are the same. This classification is primarily the wholesale counterpart (supplier) for establishments assigned to retail store classification 6304, 6305 and 6406. Work contemplated by classification 6407 includes, but is not limited to, maintaining warehouse inventories, sorting and grading goods, and breaking down bulk quantities to repack into smaller lots. Equipment typically used includes, but is not limited to, balers to bind merchandise into bundles, strapping equipment to secure palletized goods, forklifts, and hand tools.

This classification excludes delivery which is to be reported separately in classification 1101.

Special notes: When assigning classification 6407, care must be exercised to look beyond the words "wholesale" or "retail." The manufacturer of a product will also "wholesale" their merchandise (or a combination of their own merchandise and finished products bought from other manufacturers) to a customer. These sales are an integral part of the manufacturing/marketing process and is an inclusion in the manufacturing classification. Establishments that buy goods, such as clothing or cloth goods, in wholesale quantities, then screen print or embroider them for resale are performing manufacturing operations and are to be reported separately in the appropriate manufacturing classification.

Warehouse operations in classification 2102, with the exception of grocery dealers, do not own the product they are warehousing and are not in the business of selling the goods they store. Businesses in classification 6407 may operate a warehouse, but only as an integral part of the wholesaling/distribution process, which is included in classification 6407.

[07-01-014, recodified as § 296-17A-6407, filed 12/8/06, effective 12/8/06. 6408-03 Dealers: Farm machinery/implement

Applies to establishments engaged in the sale, lease, and/or rental, of new or used farm machinery and implements. This classification also applies to the service, repair and/or demonstration of those items by the dealer either on their premises or at the customer's site. For purposes of this classification the term farm machinery refers to engine-powered machinery such as, but not limited to, tractors, combines, and swathers, riding mowers, sprayers, pumps, and generators. Implements include, but are not limited to, plows, discs, balers, or rakes which are attached to and/or powered

(2007 Ed.)

by farm machinery. The variety of merchandise varies with the needs of the geographical area and may be displayed in inside showrooms and/or outside yards. In addition to parts for the machinery or implements, establishments in this classification may carry some automobile parts, hardware items, and supplies such as oil, filters, and belts. This classification includes lot sales and lot personnel, service managers and employees, parts department employees who have exposure to the service/repair shop or duties related to the sale of farm machinery or implements, towing service for in-shop repairs, delivery of merchandise to the customer, and regional sales and/or service representatives who provide factory service or training to local dealers and other customers. Parts department employees who are not exposed to any hazards of the service/repair shop or have no duties related to the sale of farm machinery or implements may be reported separately in classification 6309.

This classification excludes establishments that repair and/or service farm type tractors, *but who are not involved in the sale of them*, which are to be reported separately in classification 6409; store operations of dairy equipment and supply dealers which are to be reported separately in classification 6407; the installation, service, or repair of dairy machinery or equipment which is to be reported separately in classification 0603; all field installation, service, or repair work of wind machine dealers which is to be reported separately in classification 0603; and the manufacture or structural repair of heavy machinery or equipment which is to be reported separately in classification 3402.

Special note: Care needs to be taken when considering the assignment of classification 6309 for the sale of parts. Most businesses assigned to classification 6408-03 have an inventory of parts or accessories which they use in the service or repair of farm machinery or implements, or maintain as a convenience to their customers. *Only* those businesses that maintain a complete line of replacement parts that is physically separated from the service/repair shop should be considered for classification 6309.

WAC 296-17A-6409 Classification 6409.

6409-00 Dealers: Machinery/equipment, N.O.C.;

Service/repair garages: Machinery/equipment, N.O.C.

Applies to establishments engaged in the sale, lease, rental, service, and/or repair of new or used machinery and equipment not covered by another classification (N.O.C.). For purposes of this classification the terms machinery or equipment includes, but are not limited to, semi trucks, diesel tractors, buses, construction equipment, concrete barriers and other flagging equipment used in construction projects, logging equipment, transportation equipment, freight hauling equipment, well drilling equipment, power generators, and

industrial or manufacturing machinery. Operations of dealers include, but are not limited to, the sale, lease, rental, demonstration, service, or repair of their equipment, either on their premises or at the customer's site, and delivery to customer. The variety of merchandise carried by a machinery and equipment dealer varies with the needs of the geographical area and may be displayed in inside showrooms and/or outside yards. Operations of service centers include diagnostic services, all phases of mechanical service such as, but not limited to, tuning, overhauling and/or rebuilding engines, motors, or transmissions, resurfacing heads, repairing carburetors or fuel injection systems and grinding valves or brakes on equipment or machinery owned by others. In addition to parts for the machinery and equipment, establishments in this classification may carry some automobile parts, hardware items, and supplies such as oil, filters, and belts. This classification includes lot sales and lot personnel, service managers and employees, parts department employees who have exposure to the service/repair shop or duties related to the sale of machinery/equipment, towing service for in-shop repairs, and regional sales and/or service representatives who provide factory service or training to local dealers and other customers. Parts department employees who are not exposed to any hazards of the service/repair shop or have no duties related to the sale of machinery/equipment may be reported separately in classification 6309. This classification also includes the rental and installation of temporary fences.

This classification excludes farm machinery and equipment dealers who are to be reported separately in classification 6408; store operations of dairy equipment and supply dealers which is to be reported separately in classification 6407; the installation of industrial plant equipment which is to be reported separately in classification 0603; the installation, service, or repair of dairy machinery or equipment which is to be reported separately in classification 0603; all field installation, service, or repair work of wind machine dealers which is to be reported separately in classification 0603; and the manufacture or structural repair of heavy machinery or equipment which is to be reported separately in classification 3402.

Special note: Care needs to be taken when considering the assignment of classification 6309 for the sale of parts. Most businesses assigned to classification 6409-00 have an inventory of parts or accessories which they use in the service or repair of machinery or equipment, or maintain as a convenience to their customers. *Only* those businesses that maintain a complete line of replacement parts that is physically separated from the service/repair shop should be considered for classification 6309.

WAC 296-17A-6501 Classification 6501.**6501-00 Barber shops**

Applies to establishments engaged in providing barber and hair cutting services which may be performed in the shop, at the customer's home, or in hospitals. Barber services contemplated by this classification include, but are not limited to, shampooing and cutting hair, shaving or trimming mustaches or beards, and facials. Unique to this industry is the "booth renter." A booth renter performs cosmetology, barbering, or manicuring services in a shop, but is not an employee of the shop owner. They pay a fee for the use of the shop's booth and facilities. Classification 6501-00 applies to booth renters who elect optional coverage. This classification includes clerical office and sales personnel.

6501-01 Beauty parlors; sun tanning parlors

Applies to establishments engaged in providing beauty parlor or sun tanning parlor services which may be performed at the shop, at the customer's home, or in hospitals. Beauty parlor services contemplated by this classification include, but are not limited to, shampooing, cutting, styling or dyeing hair, manicures, pedicures, facials, and the use of body toning equipment. Indoor sun tanning booths may be operated as part of a beauty shop or conducted as a separate business. Unique to this industry is the "booth renter." A booth renter performs cosmetology, barbering, or manicuring services in a salon, but is not an employee of the salon owner. They pay a fee for the use of the salon's booth and facilities. Classification 6501-01 applies to booth renters who elect optional coverage. This classification includes clerical office and sales personnel.

This classification excludes establishments engaged exclusively as nail salons which are to be reported separately in classification 6501-02.

6501-02 Cosmetologists and electrolysis studios; tattoo parlors; nail salons

Applies to establishments engaged in cosmetology and electrolysis services and to tattoo parlors or nail salons. Cos-

metologists provide personalized instructions on the application of cosmetics. Some offer "permanent cosmetic" services such as, but not limited to, application of permanent eyeliner or restructuring eyebrows. Electrolysis involves the removal of facial or body hair by destroying hair roots with an electrified needle. Nail salons may specialize in the application of artificial fingernails. This classification includes clerical office and sales personnel.

WAC 296-17A-6502 Classification 6502.**6502-00 Banks; credit unions; savings and loan associations**

Applies to establishments engaged in providing banking and related financial services. Services include, but are not limited to, establishing and servicing checking and savings accounts, telephone, computer and in-person fund transfers, lending, vending certificates of deposit and savings bonds, providing financial consulting services and estate planning, and providing supplemental services such as automatic teller machines (ATMs) and credit cards, currency exchange, cashier and travelers checks, notary public services, and safe deposit box rentals. This classification includes clerical office and sales personnel.

This classification excludes establishments engaged in providing armored car or on-premises security which are to be reported separately in the applicable services classification.

6502-05 Mortgage companies; financial or investment companies, N.O.C.

Applies to establishments engaged in providing financial or investment services not covered by another classification (N.O.C.). This classification also applies to establishments engaged in extending credit in the form of mortgage loans by originating mortgage or real estate construction loans, selling mortgage loans to permanent investors, and servicing the loans, and to establishments that offer check cashing services. This classification includes clerical office and sales personnel and staff inspectors who authorize release of funds on construction loans.

This classification excludes mortgage brokers who are to be reported separately in classification 5301. Mortgage brokers provide the service of finding lenders for people who need loans.

6502-06 Stock brokers

Applies to establishments engaged in brokering stocks and other related securities. Establishments subject to this classification act as agents in the buying, selling, or exchanging of securities such as, but not limited to, stocks, mutual funds, annuities, bonds and commodity contracts for their clients. Their "full-service" usually extends to financial planning advice, arranging for IRA and KEOGH accounts, money market accounts, tax free bonds, and related financial investments. This classification also includes "investment

bankers" who are primarily engaged in originating, underwriting, and distributing securities, buying and selling commodity contracts for their own account or for the account of others, and buying, selling, or trading in stocks, stocks options, bonds, or commodity contracts. This classification includes clerical office and sales personnel.

6502-07 Escrow companies

Applies to establishments engaged in providing escrow and/or title search services to the general public. They may be known either as "escrow companies" or "title companies." An escrow company is a third party who holds in custody a written agreement such as a deed or bond (escrow) which does not become effective until certain conditions are fulfilled by the grantee. Title companies conduct title searches to ensure there are no liens against property; if there are no liens, they issue a title insurance policy; if there are liens they make them known to potential buyers. Establishments subject to this classification typically provide both escrow and title search services which include the issuance of title insurance, collection and disbursement of funds for which they are custodians, providing closing of documents for the purchase of real estate, and preparing and filing the documents at the appropriate municipal offices. This classification includes clerical office and sales personnel.

WAC 296-17A-6503 Classification 6503.

6503-00 Labor unions or employee representative associations

Applies to establishments engaged as labor unions or employee representative associations. This classification applies to the employees of the union or association itself as opposed to the members that they represent, who are employees of other businesses. These establishments act as bargaining agents for others; they maintain membership records, collect dues, and negotiate contracts. This classification includes labor union officials, business agents, organizers and other employees with combined inside and outside duties.

This classification excludes clerical office employees who may be reported separately in 4904 if the conditions of the standard exception general reporting rule are met.

6504-00 Stores: Charitable or welfare

Applies to those employees of a charitable or welfare organization who are engaged in operating a store. Stores of this type usually deal in used merchandise such as, but not limited to, clothing, household appliances, toys, housewares, furniture, and garden tools that has been donated to the organization. Work contemplated by this classification includes, but is not limited to, the collection of donated items from locations away from the store, conditioning donated items, stocking and cleaning the store, and cashiering. Conditioning is limited to cleaning, reupholstery work, and minor repairs; it does not include major mechanical repairs or refinishing furniture.

This classification excludes establishments engaged in repairing and selling used appliances which are to be reported separately in classification 0607; and all other employees of the charitable or welfare organization not employed in the store who are to be reported separately in the classification applicable to the work performed.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6505-00 Welfare special works program

Applies to certain "employees" of nonprofit establishments engaged in finding work experience for individuals who are in need of job training or skill enhancement to make them employable or more competitive in the job market. Establishments that qualify for this classification will solicit the participation of other businesses by offering the services of one of these individuals cost-free for a limited length of time, usually less than six months. During that period the business person who has agreed to participate will supply the opportunity for work experience and the supervision of the work being performed while wages will be paid by the sponsoring organization (the establishment that qualifies for this classification). These wages come from training block grant moneys (usually a government grant) which have been provided for this purpose. State agencies, such as the employment security department, and nonprofit job counselors are typical sponsors of these programs. Work contemplated by this classification may be found in any type of work environment.

This classification excludes the permanent administrative and clerical employees of the sponsoring organization who are to be reported separately as applicable.

WAC 296-17A-6506 Classification 6506.

6506-00 Photography studios

Applies to establishments engaged in the operation of photography studios. Photographers use a wide range of still and motion cameras; services include both sitting portraits and motion pictures of special events, and are photographed in the studio or at outside locations. Photographers may develop and print photographs in their own studio darkrooms, or they may contract out to an independent photo finishing shop. Studios may also offer services such as retouching negatives, restoration work, mounting and framing pictures, and enlarging photographs. This classification includes glamour and boudoir photography studios which often have a salon where clients have their hair styled and make-up applied. This classification also includes booths, usually located in malls, that will produce photography novelty items such as, but not limited to, cups, shirts and calendars from photographs. Photographs may be taken on location or the customer may bring a picture or negative in to have the image applied to the particular item. Video taping services performed in connection with photography studios is included in this classification.

This classification excludes delivery drivers who are to be reported separately in classification 1101; and establishments engaged in video taping services not in connection with photography studio operations which are to be reported separately in classification 6303.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6506-01 Film processing shops

Applies to establishments engaged in processing film. Operations include, but are not limited to, processing film, reproducing negatives, prints or slides, enlarging pictures, mounting and finishing, storing and mixing chemicals, and inspecting and packaging finished products. Finishing processes may be manual or automated. These shops may offer retail type film developing services to commercial laboratories that provide mass film developing and/or one-hour processing services.

This classification excludes delivery drivers who are to be reported separately in classification 1101.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6506-02 Motion picture film exchanges

Applies to establishments engaged in the operation of motion picture film exchanges. These exchanges receive fully processed movie films from producers, which they catalogue and store for subsequent rental or sale to commercial movie theaters, television networks, or other groups. Film exchanges have a projection room where customers may view the film before they book it. When rented films are returned, they are inspected and repaired as necessary. Repair

usually consists of cutting out damaged section and splicing the film with special adhesive and pressure.

This classification excludes delivery drivers who are to be reported separately in classification 1101 and video rental stores which are to be reported separately in classification 6406.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

6506-03 Microfilming

Applies to establishments engaged in providing microfilming services for others. Microfilming reproduces and preserves documents onto film in greatly reduced sizes to allow the storage of information in less space. Documents are photographed; the film is developed in automatic processing units, then stored on reels or cartridges or cut into microfiche. Establishments subject to this classification usually offer related services such as, but not limited to, advice on setting up micrographic systems, the sale or rental of supplies or equipment, storage facilities, keypunch services, film restoration, and/or the destruction of source materials.

This classification excludes drivers who are to be reported separately in classification 1101.

Special note: Clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

WAC 296-17A-6509 Classification 6509.

6509-04 Boarding homes and centers, N.O.C., adult family homes, rooming houses, foster homes, and orphanages

Applies to establishments engaged in providing residential and social care for children, aged, and special categories of persons who are ambulatory and for whom medical care is not a major element. This classification includes, but is not limited to, alcohol and drug rehabilitation centers, shelters for the homeless, safe houses for abused women and children, orphanages, homes for mentally, emotionally, physically, and developmentally disabled individuals, adult family homes, and group homes as well as halfway homes for delinquents and offenders. Alzheimer care facilities are also included in this classification. Work contemplated by this classification includes meal service, linen service, house-keeping and transportation. Medical care includes only the administration of drugs.

This classification excludes convalescent, assisted living, and nursing homes which are to be reported separately in classification 6108.

6509-05 Fraternity or sorority houses

Applies to establishments providing living accommodations to *only* those college and university students who are members of the fraternity or sorority. Fraternities and sororities operate as independent political, economic and social organizations within the guidelines of the college. Fraternity and sorority houses normally have all the amenities of a home-kitchen, living room, dining room, bedrooms and bathrooms. Chapter houses may also have a party room with floor space for social functions and a Chapter room which are a combination library, study, meeting and trophy room. Employments contemplated by this classification includes house directors who supervise and manage facility, cooks, helpers and facilities maintenance.

6509-07 Retirement centers

Applies to establishments engaged in operating retirement centers which cater to the elderly by offering an independent life style in a communal environment. Differing from a boarding home, a retirement center will usually offer a studio, one bedroom or two bedroom apartments as opposed to a single room. Most offer a full service dining area for all meals, exercise programs for individuals or groups, a hairdresser, gift shop, housekeeping/laundry service, a full social/activity program, security, as well as assisted living services. Assisted living services, if offered, include, but are not limited to, assistance in maintaining the resident's schedule for prescription medication, transportation for medical appointments, and 24 hour on-call emergency assistance. On-call emergency services may be provided by a full-time nurse who can assess situations and summon a doctor or ambulance as necessary.

Special note: Residents of a retirement center are capable of an independent lifestyle and do not require an on-site physician or personal care services. Businesses engaged in providing temporary or permanent residences which provide various levels of medical and *personal care services such as feeding, bathing, and personal hygiene* are to be reported separately in classification 6108.

WAC 296-17A-6605 Classification 6605.

6605-00 Actors and performers, N.O.C.

Applies to establishments or individuals providing performances that are not of a physical or strenuous nature, and who are not specifically covered by another classification (N.O.C.). For purposes of this classification, entertainment that is not physical or strenuous includes, but is not limited to, comedians, magicians or clowns at parties, or nightclubs. Physical or strenuous activities which are not covered by this classification include, but are not limited to, ballet, dancing, skating, gymnastics, or performing stunts.

This classification excludes actors, players, performers, entertainers, or musicians whose routines or performances are of a physical or strenuous nature who are to be reported separately in classification 6620; players, entertainers or musicians N.O.C., hired by theatres, who perform nonstrenuous routines or performances who are to be reported separately in classification 6605-03; musicians performing nonstrenuous routines or performances at dance halls who are to be reported separately in classification 6605-04; musicians, N.O.C. performing nonstrenuous routines or performances who are to be reported separately in classification 6605-01; entertainers engaged in television or radio company operations who are to be reported separately in classification 4502; and entertainers engaged in motion picture production company operations who are to be reported separately in classification 6608.

Special note: Classifications 6620 and 6605 may be assigned to a single establishment provided the establishment maintains accurate records which distinguishes actors and performers whose routines are of a physical and strenuous nature, from the routines which are not physical or strenuous. Care should be exercised when assigning this classification as the actors and performers may be exempt from coverage as specified in RCW 51.12.020(9).

(2007 Ed.)

6605-01 Musicians, N.O.C.

Applies to establishments or individuals engaged as musicians whose entertainment is not of a physical or strenuous nature, and who are not specifically covered by another classification (N.O.C.). For purposes of this classification, entertainment that is not physical or strenuous includes disk jockeys or members of a musical band playing at nightclubs, concerts, or other events, as well as members of the entertainer's road crew who set up or disassemble musical equipment or sound systems. Physical or strenuous activities which are not covered by this classification include, but are not limited to, ballet, dancing, skating, gymnastics or performing stunts.

This classification excludes actors, players, performers, entertainers or musicians whose routines or performances are of a physical or strenuous nature who are to be reported separately in classification 6620; players, entertainers or musicians hired by theatres performing nonstrenuous routines or performances who are to be reported separately in classification 6605-03; actors or performers performing nonstrenuous routines or performances who are to be reported separately in classification 6605-00; musicians performing nonstrenuous routines or performances at dance halls who are to be reported separately in classification 6605-04; entertainers engaged in television or radio company operations who are to be reported separately in classification 4502 and entertainers engaged in motion picture production company operations who are to be reported separately in classification 6608.

Special note: Classifications 6620 and 6605 may be assigned to a single establishment provided the establishment maintains accurate records which distinguishes musicians whose routines are of a physical and strenuous nature, from the routines which are not physical or strenuous. Care should be exercised when assigning this classification as the musician may be exempt from coverage as specified in RCW 51.12.020(9).

6605-03 Players, entertainers and musicians hired by a theatre, N.O.C.

Applies to establishments or individuals engaged as players, entertainers, and musicians who are hired by theatres to provide entertainment of a nonphysical or strenuous nature, and who are not covered by another classification (N.O.C.). For purposes of this classification, entertainment that is not physical or strenuous includes players, entertainers, and musicians in theatrical productions such as plays, programs, or operas. Physical or strenuous activities which are not covered by this classification include, but are not limited to, ballet, dancing, skating, gymnastics, or performing stunts.

This classification excludes actors, players, performers, entertainers or musicians whose routines or performances are of a physical or strenuous nature who are to be reported separately in classification 6620; actors and performers performing nonstrenuous routines or performances who are to be reported separately in classification 6605-00; musicians, N.O.C. performing nonstrenuous routines or performances who are to be reported separately in classification 6605-01; entertainers engaged in television or radio company operations who are to be reported separately in classification 4502; and entertainers engaged in motion picture production com-

pany operations who are to be reported separately in classification 6608.

Special note: Classifications 6620 and 6605 may be assigned to a single establishment provided the establishment maintains accurate records which distinguishes players, entertainers and musicians whose routines are of a physical and strenuous nature, from the routines which are not physical or strenuous. Care should be exercised when assigning this classification as the players, entertainers and musician hired by a theatre may be exempt from coverage as specified in RCW 51.12.020(9).

6605-04 Dance halls, N.O.C.

Applies to establishments engaged in operating dance halls that are not covered by another classification (N.O.C.). Establishments contemplated by this classification may provide only the dance hall facility, or may also provide disc jockey services or live musicians, singers, and/or dancers. Some charge a cover charge; some will allow customers to bring their own beverages and/or snacks. This classification applies to all employees including, but not limited to, bouncers, security personnel, attendants, and food and beverage servers.

This classification excludes entertainers or musicians whose routines or performances are of a physical or strenuous nature who are to be reported separately in classification 6620; and lounges or restaurants that provide entertainment for customers which are to be reported separately in classification 3905.

Special note: Care should be exercised when assigning this classification as the entertainers or musicians may be exempt from coverage as specified in RCW 51.12.020(9).

WAC 296-17A-6607 Classification 6607.

6607-00 Card rooms; bingo parlors or casinos

Applies to establishments engaged in operating card rooms, bingo parlors, or casinos. To qualify for this classification, card rooms must be run as a separate operation when located in a tavern or restaurant that has a license to sell spirits or hard liquor. This classification includes employments such as, but not limited to, dealers, security floor managers, janitorial and maintenance staff, and food and beverage operations. Bingo parlors and casinos are usually operated by Native American tribal organizations or by nonprofit organizations to raise funds for charity. This classification applies to any workers these organizations employ to operate bingo or casino games. Typical employments include, but are not limited to, game attendants and helpers, money collectors, callers, card dealers, janitorial and maintenance staff, and food and beverage operations.

Special note: Coverage for Native American tribes conducting a bingo operation is subject to jurisdictional policy.

6607-01 Billiard or pool halls

Applies to establishments engaged in operating billiard or pool halls. This classification *could* apply to the operation of a billiard or pool hall in connection with another enterprise, such as a bowling alley or skating rink, but *only* if it is conducted as a separate and distinct operation. This classification includes, but is not limited to, counter personnel who collect money for the rental of billiard and pool equipment, rackers, food and beverage operations, and janitorial and maintenance staff.

This classification excludes clerical office and outside sales personnel who may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met; billiard or pool tables that are provided as part of a bowling center, tavern, or restaurant operation which are to be reported separately in the applicable classification.

6607-02 Recreational, social or community centers, N.O.C.

Applies to establishments engaged in operating recreational, social or community centers not covered by another classification (N.O.C.) such as, but not limited to, senior centers, community centers for minors, and adult social establishments. These organizations may target a particular age or cultural group. Organizations may provide educational workshops, social interaction, drug prevention programs, crafts and limited physical recreational activities. This classification includes food or beverage operations provided by the center. Organizations in classification 6607 do not require membership fees as opposed to clubs in classification 6205 that charge a fee for membership.

This classification excludes YMCA's and boy/girls clubs which are to be reported separately in classification 6203; health clubs and gymnasiums which are to be reported separately in classification 6204; clubs, N.O.C. such as fraternal organizations which are to be reported separately in classification 6205, and municipal community centers which are to be reported separately in the applicable classification.

6607-03 Indoor playgrounds

Applies to establishments that provide indoor entertainment centers for children. Generally these operations include a playground area consisting of interconnecting tubes, ladders, slides, ball bins, roller slides, and water and/or air beds. The equipment is typically made of plastic, rubber, and/or plexi-glass. Video games may also be available on the premises but generally they are maintained by the game vendor. Typical duties of the employees include, but are not limited to, selling tickets, supervising the playground area, facilitating parties, snack bar operations and light cleaning such as dusting the tubes, vacuuming and cleaning the snack area. The more involved janitorial duties are usually contracted out to a private janitorial firm. Included in this classification is child day care service whereby parents can leave children at the playground for a specific period of time. This service usually places limitations on the time a child may be left at the center.

This classification excludes child day care services not part of an indoor playground operations which are to be reported separately in classifications 6103 and 6104; amusement parks, permanently located kiddie rides, and establish-

ments which provide adult or family sports entertainment, which may include batting cages and miniature golf, which are to be reported separately in classification 6208; and establishments engaged in providing gymnastic training to children which are to be reported separately in classification 6204.

Special note: Normally establishments in this classification do not employ workers who are engaged exclusively in clerical office or sales. However, separate classifications could be assigned provided all the conditions of the general reporting rules covering standard exception employees have been met.

6607-04 Indoor simulated golfing

Applies to establishments engaged in providing computer simulated indoor golf facilities to the public. The operation consists of separate cubicles which house a computer simulated screen and a play area. Customers select a particular course from a list of available courses which are generally exact replicas of famous courses throughout the world. The player hits a golf ball against a canvas screen inside the cubicle; a computer measures the speed and direction of the ball and simulates the shot so the player can view the results on the screen. Facilities may provide a small putting area, a snack area with limited seating, and/or the sale of golf shirts and memorabilia. Typical duties of the workers include monitoring facilities, setting up computers and collecting the admission price, selling memorabilia, food and beverage operations, and light janitorial work.

This classification excludes miniature golf courses and driving ranges which are reported separately in classification 6208.

WAC 296-17A-6901 Classification 6901.

6901-00 Volunteers

Applies to the medical aid coverage for volunteers of state agencies, municipal corporations, political subdivisions, or private nonprofit charitable organizations. Medical aid coverage is *mandatory* for volunteers of state agencies. Medical aid coverage is *optional* for volunteers of city, county, town, special district, municipal corporations, political subdivisions, or nonprofit charitable organizations.

This classification excludes student volunteers of private sector employers who are to be reported separately in classification 6901-01; volunteer law enforcement officers of cities, towns, counties and taxing districts for whom medical aid only coverage has been elected who are to be reported separately in classification 6906; and volunteer law enforcement officers of cities, towns, counties, or Native American tribal councils for whom full coverage has been elected who are to be reported separately in classification 6905.

Special note: To elect coverage for volunteers, employers or charitable organizations must submit a completed Application for Optional Coverage to the department. Conditions of coverage are outlined on the application. State Fund workers' compensation is not provided to volunteer firemen covered by chapter 41.24 RCW and emergency services workers covered by chapter 38.52 RCW.

6901-01 Student volunteers

Applies to the medical aid coverage for student volunteers. Medical aid coverage is *optional* for student volunteers. A student volunteer is defined as a student who is enrolled in a public school (kindergarten level through grade 12), is participating as a volunteer in a program authorized or sponsored by the public school to provide work-based learning experiences, and who receives no wages for their volunteer services. Maintenance and reimbursement for actual expenses incurred in performing assigned duties are not considered wages.

This classification excludes volunteer workers for state agencies, local government agencies and private nonprofit charitable organizations who are to be reported separately in classification 6901-00; volunteer law enforcement officers of cities, towns, counties and taxing districts for whom medical aid only coverage has been elected who are to be reported separately in classification 6906; and volunteer law enforce-

ment officers of cities, towns, counties, or Native American tribal councils for whom full coverage has been elected who are to be reported separately in classification 6905.

Special note: To elect coverage for student volunteers, employers or charitable organizations must submit a completed Application for Optional Coverage to the department. Conditions of coverage are outlined on the application. State Fund workers' compensation is not provided to volunteer firemen covered by chapter 41.24 RCW and emergency services workers covered by chapter 38.52 RCW.

WAC 296-17A-6902 Classification 6902.

6902-02 Logging road: Construction or maintenance

Applies to the construction or maintenance of logging roads. For purposes of this classification logging roads are roads for which the basic use is to provide access into a timber or forest area and for the transporting of logs out of the area by truck. This classification includes roads constructed on public or private land in connection with timber sales or logging, such as roads being constructed in accordance with the State Department of Natural Resources or the United States Forest Service timber sales. Logging roads contemplated by this classification are typically cleared and graded with a bulldozer and then paved with gravel, crushed rock, or large stones. Logging roads are generally engineered to support the weight of logging equipment and trucks but not necessarily to handle speeds and volume of nonlogging traffic. As a rule, these roads are not surfaced with asphalt or paved with concrete. Classification 6902 includes log road maintenance which is limited to keeping the road bed in good repair such as regrading and fill to repair washouts and ruts.

This classification excludes the felling of timber, bucking and delimiting of all trees in the proposed roadway or adjacent shoulder and all other logging activities which are to be reported separately in classification 5001; all excavation, land clearing or grading as a part of roadway construction not in connection with a logging road which is to be reported separately in classification 0101; construction of asphalt roads which is to be reported separately in classification 0210; construction of concrete roads which is to be reported separately in classification 0214; mechanical roadside brushing or machine application of chemicals which is to be reported separately in classification 5006; and permanent shop or yard operations which are to be reported separately in classification 5206 provided the conditions of WAC 296-17-675 have been met.

6902-03 Logging railroad: Construction or maintenance

Applies to the construction or maintenance of logging railroads. For purposes of this classification logging railroads are side tracks and spurs which feed into existing railroad main lines. Log trucks haul logs from the cutting site to the logging railroad where they are loaded onto the logging railroad cars and transported to the main line. This classification

includes railroads constructed on public or private land in connection with timber sales or logging, such as roads being constructed in accordance with the State Department of Natural Resources or the United States Forest Service timber sales. The construction includes clearing and grading with use of a bulldozer; laying dirt, rock and ballast; laying ties and track; and installing crossover frogs, switches, switch stands, switch mechanisms and crossing planks as needed. This classification also includes log railroad maintenance which is limited to keeping the railroad line operational.

This classification excludes the falling of timber, bucking and delimiting of all trees in the proposed roadway or adjacent shoulder, and all other logging activities which are to be reported separately in classification 5001; the construction of railroad lines not in connection with a logging railroad which is to be reported separately in classification 0101; construction of logging roads which is to be reported separately in classification 6902-02; and maintenance and storage of equipment and material at a permanent yard or shop which is to be reported separately in classification 5206 provided the conditions of WAC 296-17-675 have been met.

6907-01 Household furnishings moving and storage

Applies to establishments engaged in interstate and/or intrastate moving and/or storage of household furnishings. Work contemplated by this classification includes packing and unpacking, loading and unloading of household goods, transportation from one residence to another, and temporary storage of household goods in a warehouse. This classification includes the moving van drivers, packing personnel, laborers who assist in the loading and unloading operations, warehouse employees and truck mechanics.

This classification excludes intrastate and/or interstate delivery of nonhousehold furnishings which are to be reported separately in either classification 1101 or 1102, as applicable, and nonhousehold furnishing warehouses, which are to be reported separately in the appropriate warehouse classification.

Special note: Establishments subject to this classification are to report actual hours worked for each driver. However, the hours are to be capped at 520 hours per driver per quarter. Detailed information can be found in the general audit rule covering the trucking industry and in RCW 51.12.095.

WAC 296-17A-6908 Classification 6908.

6908-02 Lightweight paper products, N.O.C.: Manufacturing

Applies to establishments engaged in the manufacture of lightweight paper products not otherwise classified (N.O.C.), such as, but not limited to, carbon paper, crepe paper, blue print paper, computer paper, calculation tape, note pad, file folder, envelope, stationery, and typewriter ribbon. Materials include, but are not limited to, file folder or stationery-weight paper, glue, string, clasps, coating liquids and ink. Machinery includes, but is not limited to, sheeters, slitters, die cutters or other cutting equipment, printing presses, folding, punching and drilling machines, glue applicators, trimmers,

winders/rewinders, embossers, packaging machinery, balers, shredders and forklifts.

This classification excludes establishments engaged in the manufacture of paper, which are to be reported separately in classification 2401.

Special note: This classification includes establishments engaged as "paper rewinders or paper converters." These businesses purchase large rolls of premanufactured paper from outside sources, then cut, rewind, or "remanufacture" them into smaller or narrower rolls. They sometimes refer to themselves as "paper wholesalers," but they are performing more "manufacturing" work than what is allowed in classification 6407 for wholesale stores. The machinery used for this type of cutting and rewinding is the same as that used by manufacturers of the types of goods mentioned above, who also cut, wind and rewind paper from large rolls onto smaller rolls.

6908-03 Paper bag, movers packing pads, and wallpaper: Manufacturing

Applies to establishments engaged in the manufacture of paper products such as, but not limited to, paper bags of all sizes, movers packing pads, wrapping paper and wallpaper. Raw materials include, but are not limited to, paper, glue, string, ink, foam or bubble plastic, plastic wrap and tape. Machinery includes, but is not limited to, bag making machines, slitters, die cutters or other cutting machinery, perforating or embossing machines, glue applicators, printing presses, winders/rewinders, packaging machines, shredders, balers, forklifts and sewing machines which are used to sew tape across the tops of bags that package bulk goods.

This classification excludes establishments engaged in the manufacture of paper, pulp or wood fiber, corrugated boxes or other heavy-grade paper products, or corrugating, laminating, oiling or coating paper, which are to be reported separately in classification 2401; establishments engaged in the manufacture of plastic bags which are to be reported separately in classification 3510 and establishments engaged in the manufacture of abrasive cloth or paper (emery cloth/sandpaper) and textile bags or sacks, which are to be reported separately in classifications 3708 or 3802 as applicable.

6908-05 Paper box - noncorrugated: Manufacturing

Applies to establishments engaged in the manufacture of boxes, or partitions for boxes, from lightweight, noncorrugated cardboard. Boxes contemplated by classification package goods such as, but not limited to, clothing or other soft goods, prepared foods, wine, cigars, stationery and games. Materials include, but are not limited to, cardboard (chipboard), glue, staples, tape, resins, ink and plastic film. Machinery includes, but is not limited to, box-making machines, sheeters, slitters, slotters, winders and rewinders, printing presses, cutting machines, laminators, bundlers, unitizers, balers, shredders and forklifts.

This classification excludes establishments engaged in the manufacture of paper, pulp or wood fiber, corrugated boxes or other heavy-grade paper products, or corrugating, laminating, oiling or coating paper, which are to be reported separately in classification 2401.

6908-06 Single or double-ply paper products: Manufacturing

Applies to establishments engaged in the manufacture of single or double-ply paper products such as, but not limited to, surgical gowns, towels, napkins, table or shelf covers, florist papers, tissue and shredded or crimped packing material. Some of the items made in this classification are primarily hand-made. Raw materials include, but are not limited to, single or double-ply paper, tape, glue, plastic or cellophane lining. Machinery includes, but is not limited to, winders and rewinders, folding machines, cutting tables, paper-crimping machinery, gluing machines and forklifts.

This classification excludes establishments engaged in the manufacture of paper, which are to be reported separately in classification 2401.

6909-00 Laboratories - analytical, testing, or quality control for others

Applies to establishments engaged in operating laboratories which provide analytical, testing, and quality control services. This classification includes laboratories that experiment and provide a variety of tests and analysis for other customers' products and/or materials. Generally, the employees include chemists, engineers and other scientists and research aides who use a variety of chemicals and sophisticated scientific equipment and machinery for the testing and analysis process. This classification includes the quality control inspection of fish and agricultural products. Work may be performed at the laboratory or at the customer's location.

This classification excludes outside X raying and drilling which is to be reported separately in the classification applicable to the X raying or drilling being performed.

Special note: This classification does not apply to establishments that operate a laboratory in connection with testing or inspecting their own products/materials, which is to be included in the basic classification applicable to the business. For example, a laboratory to test and analyze the assembled fly rod or the composition of the graphite rod when operated by a fly rod manufacturer, is included within classification 3510.

6909-02 Laboratories: Medical

Applies to establishments engaged in operating medical laboratories. Services include, but are not limited to, providing data on which to base decisions concerning the detection, diagnosis and treatment of disease and to evaluate a patient's response to treatment. Laboratory personnel perform analytical tests on the tissues and fluids of the human body, detect parasites, bacteria, viruses, drugs, and poisons; and interpret cell and tissue abnormalities. This classification includes employment-related drug testing for others.

Special note: This classification does not apply to establishments that operate a laboratory in connection with testing

(2007 Ed.)

or analyzing services, which is to be included in the basic classification applicable to the business. For example, a hospital which also operates a laboratory as part of their medical facility to provide an analysis of patient tests and samples is included within classification 6105.

6909-03 Blood banks

Applies to establishments engaged in operating blood banks. Generally, these types of facilities allow individuals to come in and donate, save, or sell their blood for a fee. Medical and laboratory personnel perform routine laboratory tasks including extracting blood from individuals, testing and analyzing blood, processing whole blood and blood components, and storing blood in refrigerated storage rooms. This classification also includes services offered by bloodmobiles.

Special note: This classification does not apply to establishments that operate a laboratory in connection with testing or analyzing services which is to be included in the basic classification applicable to the business. For example, a hospital which also operates a laboratory as part of their medical facility to provide an analysis of patient tests and samples is included within classification 6105.

6909-22 Laboratories: Assaying

Applies to establishments engaged in operating assaying laboratories which examine, test, and analyze the quantitative or qualitative substance of material such as a metal, ore or drug. This classification includes a variety of laboratories who experiment and provide tests and analysis of products and/or materials including specialty laboratories such as, but not limited to, chemical, drugs, food products, rock formation and minerals, fossils and bones, and soil and toxic materials. Generally, the employees include chemists, engineers, and other scientists and research aides who use a variety of chemical and sophisticated equipment and machinery for the testing and analysis process.

Special note: This classification does not apply to establishments that operate a laboratory in connection with testing or inspecting their own products/materials which is to be assigned to the basic classification applicable to the business. For example, a mining operation which also operates a laboratory to determine the composition of rock and minerals excavated from the mine is included as part of the mining classification.

WAC 296-17A-7002 Classification 7002.

7002-00 Department of Energy contract

Applies to establishments that have contracted with the department of energy at DOE's nuclear facilities within the state of Washington to operate, construct or service the nuclear site. At present, the only site covered by this contract is at Richland. These contractors can be identified by the assignment of account number 000,100-xx with each contractor given a separate subaccount. The coverage provided by this classification is usually for the possibility of workers being exposed to nuclear radiation although the coverage

applies to any type of on-the-job injury. Benefits for injured workers covered under this contract are paid from a special fund which DOE pays into to cover all industrial insurance and medical aid payments made to or in behalf of the injured workers and/or their beneficiaries. The premium paid by the contractors to labor and industries is limited to the supplemental pension premium assessment.

Special note: This classification is used to administer the DOE contract and collect supplemental pension fund premiums.

WAC 296-17A-7201 Classification 7201.**7201-00 State government - patient or health care personnel, N.O.C. (to be assigned only by the hospital underwriter)**

Applies to state employees who are not otherwise classified who provide any type of patient or health care at state-operated hospitals, schools, homes, camps, detention or correctional facilities, that are not operated as mental health or acute care hospitals as defined in WAC 296-17-35203(7) and that do not have routine patient lifting and moving exposure. All employees who have responsibility for physical or mental health care of patients in these facilities are included in this classification. Types of employment contemplated by this classification include, but are not limited to, doctors, nurses, therapists, attendants, or training and counseling staff who work with patients and may be called upon to restrain or attend to patients who are potentially aggressive or violent.

This classification excludes: Employees who provide patient or health care at state-operated mental health or acute care hospitals with a fully implemented safe patient handling program who are to be reported separately in classification 7200; employees who provide patient or health care at state-operated mental health or acute care hospitals that do not have a fully implemented safe patient handling program who are to be reported separately in classification 7400; law enforcement officers in any capacity who are to be separately reported in classification 7103; employees who work in state hospitals, schools or prisons, who do not work directly in patient care such as food service, laundry, and janitorial, who are to be separately reported in classification 5307; administrative field employees who are to be separately reported in classification 5300; or clerical and administrative office personnel who are to be separately reported in classification 4902. Volunteers are to be reported in classification 6901, and law enforcement volunteers in classification 6906.

WAC 296-17A-7202 Classification 7202.**7202-00 Real estate agencies**

Applies to establishments engaged in buying, selling, renting, and appraising real estate for others. A real estate licensee will study property listings, accompany clients to property sites to show the property, and assist in the completion of real estate documents such as real estate contracts, leases, and seller's disclosure documents. They will also hold open houses, conduct negotiations, and assist at the closing. This classification includes clerical office and sales personnel. Real estate sales personnel, including agents, are considered to be workers of the broker or real estate agency employing them.

[Title 296 WAC—p. 536]

This classification excludes building and/or property management services which are to be reported separately in classification 4910.

WAC 296-17A-7203 Classification 7203.**7203-00 Community service workers**

Applies to individuals who are sentenced to perform community service work for a state agency, county, city, town or nonprofit organization as the result of a court order. The "workers" perform various services for benefit of the agency or organization. These services may range from clerical office or counseling duties to maintenance or construction work. The type of work performed has no bearing on the assignment of this classification. The workers are not compensated for their work; instead, they are allowed to perform these services in lieu of imprisonment.

Special note: This classification is assigned only if the agency or organization for whom the service is being provided elects to cover their community service workers (RCW 51.12.045).

WAC 296-17A-7204 Classification 7204.**7204-00 Preferred workers**

Applies to "preferred workers" as certified by the department of labor and industries. Preferred workers are workers who, because of a work-related injury or occupational disease, are unable to return to work with the same employer or, because of substantial impairment, unable to return to the same type of work. Before this classification can be assigned to an employer's account, the department must receive a completed "intent to hire" form from that employer within sixty days from the first date of employment. A worker may be certified as a preferred worker for a period of thirty-six months. A qualified employer who hires a preferred worker will receive up to thirty-six months of premium relief provided the preferred worker is in their employment during the same period of time. The only cost to the preferred worker and the employer will be the supplemental pension premium. If an injured worker sustains an injury within three years of the hiring date, all claims will be paid by the department through the second injury fund with no costs to the employer. The type of work performed by the preferred worker has no bearing on the assignment of this classification.

WAC 296-17A-7205 Classification 7205.

Life and rescue - Emergency workers

Applies to employees of nongovernmental employers provided in response to a request for assistance by a state or local official in the "life and rescue phase" of a declared emergency. This classification is only applicable for reporting the exposures (worker hours and claims) of nongovernmental employees occurring during this phase of the declared emergency. The phrase "life and rescue phase" is defined in RCW 51.16.130(3) as being the first seventy-two hours after a natural or man-made disaster has occurred. To qualify for this special classification, a state or local official such as, but not limited to, the governor; a county executive; a mayor; a fire marshal; a sheriff or police chief must declare an emergency and must request help from private sector employers to assist in locating and rescuing disaster survivors.

WAC 296-17A-7301 Classification 7301.

7301-00 Farms: Dairy

Applies to establishments engaged in the raising of dairy cattle for the purpose of milk production. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, tending and feeding animals, raising crops for feed, erecting or mending fences, breeding animals, milking animals, transporting animals to or from market, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification also covers artificial insemination and veterinary care when performed by employees of an employer subject to this classification.

This classification excludes contractors engaged exclusively in the installation of sprinkler or irrigation systems who are to be reported separately in classification 0301 and contractors hired by a farm operator to build or repair fences or structures who are to be reported separately in the appropriate construction classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as cleaning stalls or barns, weeding or planting crops, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. Farm labor contractors will be reported in the classification applicable to the farm with which they are contracting. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

7302-00 Farms: Livestock Animal stud service

Applies to establishments engaged in the raising of cattle, pigs, and horses for sale to others. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, tending and feeding animals, raising crops for feed, erecting or mending fences, breeding animals, transporting animals to or from market, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification also covers artificial insemination and veterinary care when performed by employees of an employer subject to this classification. This classification also applies to establishments that provide animal stud services for others.

This classification excludes contractors engaged exclusively in the installation of sprinkler or irrigation systems who are to be reported separately in classification 0301 and contractors hired by a farm operator to build or repair fences or structures who are to be reported separately in the appropriate construction classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as cleaning stalls, grooming or caring for animals, weeding or planting crops, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. Farm labor contractors will be reported in the classification applicable to the farm with which they are contracting. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

7302-02 Riding academies

Applies to establishments engaged as riding academies which offer services such as, but not limited to, instruction on riding horses or on the care of animals and the rental of horses. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, tending and feeding animals, training animals, cleaning stalls and barn areas, raising crops for feed, erecting or mending fences, breeding animals, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification also covers artificial insemination and veterinary care when performed by employees of an employer subject to this classification.

This classification excludes contractors engaged exclusively in the installation of sprinkler or irrigation systems who are to be reported separately in classification 0301 and contractors hired by a farm operator to build or repair fences or structures who are to be reported separately in the appropriate

7302-03 Boarding and/or training stables for pleasure or show horses

Applies to establishments that board and/or train pleasure or show horses for others. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, tending and feeding animals, cleaning stalls and barn areas, training animals, raising crops for feed, erecting or mending fences, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification.

This classification excludes contractors engaged exclusively in the installation of sprinkler or irrigation systems who are to be reported separately in classification 0301 and contractors hired by a farm operator to build or repair fences or structures who are to be reported separately in the appropriate construction classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as cleaning stalls, grooming or caring for animals, weeding or planting crops, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. Farm labor contractors will be reported in the classification applicable to the farm with which they are contracting. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

7302-04 Centers or trainers for race horses - unlicensed by WHRC

Applies to establishments or individuals who train race horses for others, but who are not licensed as trainers or training centers by the Washington horse racing commission. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, tending and feeding animals, cleaning stalls and barn areas, training animals, raising crops for feed, erecting or mending fences, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification.

This classification excludes individuals or centers that train nonrace horses which are to be reported separately in classification 7302-03; contractors engaged exclusively in

the installation of sprinkler or irrigation systems who are to be reported separately in classification 0301; and contractors hired by a farm operator to build or repair fences or structures who are to be reported separately in the appropriate construction classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as cleaning stalls, grooming or caring for animals, weeding or planting crops, irrigating and fertilizing. Generally the work involves manual labor tasks as opposed to machine operations. Farm labor contractors will be reported in the classification applicable to the farm with which they are contracting. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

7302-05 Parimutuel horse racing: Licensed employments, N.O.C.

Applies to employments licensed by the Washington horse racing commission who are not mandatorily covered under Washington workers' compensation insurance laws and are not covered by another classification. This classification is *only* for individuals such as, but not limited to, horse owners, trainers, farriers, and veterinarians, who hold specialty licenses issued by the commission. These individuals are generally owners of a business such as that of a farrier or training services. The business entity could be a proprietorship, partnership, joint venture, or corporation and may or may not have employees. The qualifying factor for this classification is that these individuals are licensed by the horse racing commission, are *not* mandatorily covered under Washington workers' compensation insurance laws, and are *not* included or covered by another classification. For example, a veterinarian who operates a veterinary clinic away from a race track and treats various animals such as dogs, cats, cows, and horses would report owner coverage (*if elected*) in classification 6107, not in classification 7302.

WAC 296-17A-7307 Classification 7307.

7307-00 Farms: Christmas tree

Applies to establishments engaged in operating Christmas tree farms. Work contemplated by this classification includes, but is not limited to, preparing soil for new trees, planting trees, fertilizing, spraying, fumigating, weeding, pruning, harvesting, baling, packing, delivering trees, and maintaining or installing sprinkler or irrigation systems when performed by employees of an employer subject to this classification. This classification also applies to wholesale Christmas tree operations. Retail tree sales conducted at a farm location, as in the case of a U-cut tree operation, or at a

seasonal sales lot away from the farm *may* be reported separately provided the conditions in classification 4805-09 have been met.

This classification excludes contractors engaged exclusively in the installation of sprinkler or irrigation systems who are to be reported separately in classification 0301 and contractors hired by a farm operator to build or repair fences or structures who are to be reported separately in the appropriate construction classification applicable to the work being performed.

Special notes: Establishments assigned to classification 4805-09 should report hours in this classification *only* during the fourth quarter of each year since these sales are confined to the Christmas season. Special care should be exercised when assigning this classification as work covered by classification 5004 is similar in nature.

The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as planting trees, pruning, or harvesting. Generally the work involves manual labor tasks as opposed to machine operations. Farm labor contractors will be reported in the classification applicable to the farm with which they are contracting. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

7307-01 Tree farms, N.O.C.

Applies to establishments engaged in operating tree farms not covered by another classification, (N.O.C.) such as, but not limited to, cottonwood tree farms. Operations contemplated by this classification include, but are not limited to, preparing soil for new trees, planting trees, fertilizing, spraying, fumigating, weeding, pruning trees, and maintaining or installing sprinkler systems when performed by employees of an employer subject to this classification.

This classification excludes harvesting of trees which is to be reported separately in the appropriated logging classification based on the method of harvest; contractors engaged in the installation of sprinkler or irrigation systems who are to be reported separately in classification 0301; and contractors hired by a tree farm operator to build or repair fences or structures who are to be reported separately in the appropriate construction classification applicable to the work being performed.

Special note: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as planting trees, pruning, or harvesting. Generally the work involves manual labor tasks as opposed to machine operations. Farm labor contractors will be reported in the classification applicable to the farm with which they are contracting. Contractors who provide both equipment or machinery and the machine operators are to be reported in classification 4808 "custom farm services" as the process involved in operating machinery is the same irrespective of the type of farm they are providing service to or the type of crop involved.

WAC 296-17A-7308 Classification 7308.

7308-02 Animal shelters or services, dog pounds and humane societies

Applies to establishments engaged in operating animal shelters/services, dog pounds, or humane societies which care for lost or unwanted animals or animals that have been placed for adoption. The title "animal services" has replaced the title "animal shelter" or "dog pound" in most establishments. While the activities are the same under all of these titles, the main difference is the funding. Animal services are tax-base funded; humane societies are privately funded. Activities include, but are not limited to, feeding, cleaning, or grooming animals, veterinary care, euthanasia, catching or controlling animals, and investigating incidents such as animal bites and animal abuse. This classification also applies to dog obedience classes that are not in connection with kennels or pet breeding establishments.

This classification excludes pet grooming parlors which are to be reported separately in classification 7308-03; pet stores which are to be reported separately in classification 7308-04; and pet breeding/boarding kennels which are to be reported separately in classification 7308-05.

Special note: Effective July 1, 1996, clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

7308-03 Pet grooming parlors

Applies to establishments engaged in providing pet grooming services either at the groomer's or the customer's location. Services may be provided in a shop or at the customer's location with the use of a vehicle equipped with the necessary supplies. Although most of the animals groomed are dogs, parlors may also groom cats. Activities include, but are not limited to, bathing, dipping to control fleas, cutting, brushing, combing and drying hair, clipping nails, and the incidental sale of pet products such as collars, shampoos and pet clothing. Depending on the length of their stay, animals may also be fed, watered, and placed in kennels until their owners pick them up.

This classification excludes animal shelters, dog pounds, and humane societies which are to be reported separately in classification 7308-02; pet stores, N.O.C. which are to be reported separately in classification 7308-04; and pet breeding/boarding kennels which are to be reported separately in classification 7308-05.

Special note: Effective July 1, 1996, clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

7308-04 Pet stores, N.O.C.

Applies to establishments engaged as pet stores not covered by another classification (N.O.C.). Stores in this classi-

fication sell *cats and dogs*. In addition to cats and dogs, they may also sell other animals such as birds, snakes, fish, reptiles or turtles, and related items such as, but not limited to, pet food, cages, travel carriers, pet toys, collars, shampoos, flea, tick and worm treatments, vaccination equipment, aquariums, and supplies aquariums. This classification also includes any incidental pet grooming performed by employees of employers subject to this classification.

This classification excludes stores which sell pets such as tropical fish, birds or reptiles, *but do not sell cats and dogs*, which are to be reported separately in classification 6406; pet grooming parlors which are to be reported separately in classification 7308-03; animal shelters, dog pounds and humane societies which are to be reported separately in classification 7308-02; pet breeding/boarding kennels which are to be reported separately in classification 7308-05 and stores which sell pet food only, but do not sell pets, which are to be reported separately in classification 6403.

Special note: Effective July 1, 1996, clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

7308-05 Pet breeding and boarding kennels

Applies to establishments primarily engaged in boarding pets while their owners are away from home, or in boarding pets for others in connection with a breeding service. Work contemplated by this classification is of a custodial nature that includes, but is not limited to, sheltering, tending, breeding, grooming and feeding animals, erecting or mending fences, erecting or maintaining kennels, cleaning kennels, and veterinary services and the incidental sale of animals, animal grooming or care supplies when performed by employees of an employer subject to this classification.

This classification excludes pet grooming parlors which are to be reported separately in classification 7308-03 and contractors hired by a farm operator to build or repair fences or structures who are to be reported separately in the applicable construction classification.

Special notes: The term "farm labor contractor" applies to specialty contractors who supply laborers to a farm operation for specified services such as feeding animals, grooming, and cleaning kennels. Generally the work involves manual labor tasks as opposed to machine operations. Farm labor contractors will be reported in the classification applicable to the farm or business with which they are contracting.

Effective July 1, 1996, clerical office and outside sales employees may be reported separately provided all the conditions of the general reporting rules covering standard exception employees have been met.

WAC 296-17A-7309 Classification 7309.

7309-00 Work activity centers

Applies only to the most severely disabled persons, and to developmentally disabled persons whose handicaps are so

severe as to make their productivity inconsequential, and who are included on the center's certificate for special minimum wage issued by the U.S. Department of Labor.

This classification excludes *all* staff who operate work activity centers and *all* staff who operate sheltered workshops, even if the sheltered workshop also operates a work activity center, who are to be reported separately in classification 6709, and disabled persons and developmentally disabled persons enrolled in sheltered workshops who are to be reported separately in classification 6709.

Special note: Work activity centers differ from sheltered workshops in the severity of the impairments of the participants.

While the workers' compensation rates for classifications 7309 and 6709 are identical, the premiums for classification 7309 are calculated on a piece rate basis to reflect the limited productivity of the workers covered by this classification.
