WAC 332-22-010 Promulgation. This chapter is promulgated by the board of natural resources pursuant to the authority granted by RCW 79.01.242 to establish procedures for the department's state land leasing program. The board of natural resources recognizes that in order to obtain a fair market return to the trust, certain of its lands should be retained and managed through leasing. These rules are designed to establish practical leasing procedures and achieve the best possible return to the designated trust beneficiary consistent with any other obligations imposed by law on such lands.

[Statutory Authority: RCW 79.01.242, 84-19-007 (Resolution No. 464), § 332-22-010, filed 9/10/84; 81-03-059 (Order 350, Resolution No. 321), § 332-22-010, filed 1/20/81.]

(5) "Fair market value for improvements" is as defined in RCW 79.01.136.

(6) "Highest and best use" means the legal use that will produce the highest return to the trust over an extended period of time, including interim use.

(12) "Commercially feasible geothermal resources" means that amount of geothermal steam, hot water, steam condensate, by-products thereof, minerals and chemicals which are used for:

(a) The generation of electricity, and

Such notice shall give the legal description, the date of expiration, the intended land use, the office to which application can be made, the final date to file a written request to lease, and such other information as deemed necessary.

(3) The existing lessee will be mailed the criteria for leasing on the same date as mailing to the newspaper the notice of intention to negotiate.

(4) A written request to lease from a new applicant must be received in the designated office on the specified date to be considered. It must describe the proposed terms and conditions and the contemplated use of the land and contain a certified check or money order payable to the department of natural resources for the amount of any bonus bid plus a \$100.00 deposit. The envelope must be marked "Sealed bid for lease . . . ; expiration date . . . , and give the applicant's name."

(2) Improvements which exist on the land at the time lease negotiation is completed or public auction is held shall be specifically described and, unless otherwise designated shall be considered as a part of the value of the land. Improvements may be required to be constructed as a condition of a lease. The department may require assurance of the performance capability of the proposed assignee by any feasible means, including the filing of an acceptable surety arrangement.

An assignment will not be considered to be a termination of the lease within the meaning of RCW 79.01.092.

Such security, if required, shall be submitted prior to issuance of the lease. The department may reduce or increase the amount of the security as a result of operational changes requiring different levels of performance. The department may allow a lessee to file a single security device acceptable to the state, in an amount set by the department covering all of the lessee's state leases.

[Statutory Authority: Chapter 79.12 RCW, as amended by ESB [EHB] 1277 and RCW 79.01.242. 92-06-003, § 332-22-160, filed 2/20/92, effective 3/22/92.]

WAC 332-22-190 Geothermal resources lease—Term. Geothermal resources leases shall be for a term of up to 55 years, subject every five years to approval by the department of the current plan of development. If the lessee fails to substantially comply with the plan of development, as determined by the department, the department may elect to terminate the lease.

WAC 332-22-210 Geothermal resources lease—Production royalty. Production royalty payments on geothermal resources leases shall be payable to the department for geothermal resources produced from the lease premises. The schedule of production royalty payments and method of calculating fair market value at either the well or point of shipment shall be detailed in the lease and plan of development: Provided That production royalty rates shall be not less than the cumulative amount of;

(a) Ten percent of the gross proceeds received from the sale of such geothermal resources which are derived, generated or manufactured from the premises sufficient for commercial sales, and

(b) Ten percent of the fair market value thereof of products utilized but not sold, and

(c) Ten percent of the gross proceeds for all by-products derived from the leasehold estate.

The department reserves the right to reassess the production royalty rate at year twenty of the lease and every ten years thereafter, and adjust the rate to the then fair market value, however in no case shall the adjusted production royalty be less than the 10 percent specified in this section.

Lessee shall have the right to commingle, for the purpose of utilizing, selling or processing the products produced from the leasehold estate with products produced from other land, provided that the lessee shall efficiently meter or gauge the production from the leasehold estate in a manner approved by the state, in order to compute royalty payable on the products or by-products produced from the leasehold estate. Minimum annual royalty payments shall be credited against production royalties for that year. Minimum royalties paid during the term of the lease are nonrefundable and nontransferable.

The department reserves the right to reassess the minimum annual royalty rate at year twenty of the lease and every ten years thereafter, and adjust the rate to the then fair market value, however in no case shall the adjusted minimum annual royalty be less than the ten dollars per acre, or \$2,000 specified in this section.

[Statutory Authority: Chapter 79.12 RCW, as amended by ESB [EHB] 1277 and RCW 79.01.242. 92-06-003, § 332-22-220, filed 2/20/92, effective 3/22/92.]

(1) The holder(s) of any geothermal resources lease may apply to the department to consolidate their leaseholding for geothermal resources with other entities, including lands not owned by the state, to collectively adopt and operate as a unit under a unit plan. Such consolidation will not serve to extend the term of the lease and all participants must agree to continue payment of royalties provided in the lease through the life of the unit and any extensions of the plan.

(2) When separate geothermal resource rights under lease cannot be developed and operated independently in accordance with an approved well-spacing or well-development program, the commissioner or the commissioner's delegate may require lessees to enter into a unit plan or drilling agreement with other entities when it is in the best interest of the state.

(3) As a condition for authorization to be part of a unit plan, the commissioner or the commissioner's delegate may alter the terms and conditions of the lease(s) so involved when it is in the best interest of the state to do so, and such authorization may be further conditioned upon, but not limited to the following:

(a) Department access to reports and documents it deems necessary, at the sole discretion of the department, to determine if consolidation of the proposed unit plan is in the best interest of the state.

(b) Leaseholds which are only partially included in the unit shall be segregated into separate leases as to the lands committed and not committed as of the effective date of the unitization. The annual rental or minimum annual royalty shall be paid on the leased acreage in the unit independently from other segregated lease areas.

(c) Any apportionment of production or royalties among the separate tracts of land comprising the unit shall include an accounting system, and the department shall have the right to audit such system to protect the interests of the state.

(d) None of the rights of the state as landholder shall be limited or subordinated.
