

WAC 388-828-5720 What is the DDD interpersonal support acuity scale? The DDD interpersonal support acuity scale is an algorithm that measures your ability to interact with others in a variety of settings and determines your interpersonal support needs level.

(1) The DDD interpersonal support acuity scale does not affect service determination for the medicaid personal care or waiver personal care assessments; and

(2) The information is used for reporting purposes to the legislature and the department.

[Statutory Authority: RCW 71A.12.030 and Title 71A RCW. WSR 07-10-029, § 388-828-5720, filed 4/23/07, effective 6/1/07.]
