

**WAC 246-803-310 Referral to primary health care provider. (1)**

When an East Asian medicine practitioner sees a patient with a potentially serious disorder, the East Asian medicine practitioner shall immediately request a consultation or written diagnosis from a primary health care provider.

(2) Potentially serious disorders include, but are not limited to:

- (a) Cardiac conditions including uncontrolled hypertension;
- (b) Acute abdominal symptoms;
- (c) Acute undiagnosed neurological changes;
- (d) Unexplained weight loss or gain in excess of fifteen percent body weight within a three-month period;
- (e) Suspected fracture or dislocation;
- (f) Suspected systemic infection;
- (g) Any serious undiagnosed hemorrhagic disorder; and
- (h) Acute respiratory distress without previous history or diagnosis.

(3) In the event a patient with a potentially serious disorder refuses to authorize such consultation or provide a recent diagnosis from a primary health care provider, East Asian medical treatments, including acupuncture, may only continue after the patient signs a written waiver acknowledging the risks associated with the failure to pursue treatment from a primary health care provider.

(4) The written waiver must include:

(a) A statement acknowledging that failure by the patient to pursue treatment from a primary health care provider may involve risks that such a condition can worsen without further warning and even become life threatening;

(b) An explanation of an East Asian medicine practitioner's scope of practice, to include the services and techniques East Asian medicine practitioners are authorized to provide; and

(c) A statement that the services and techniques that an East Asian medicine practitioner is authorized to provide will not resolve the patient's underlying potentially serious disorder.
