

WAC 246-854-270 Patient evaluation and patient record. Prior to prescribing opioids for acute nonoperative pain or acute perioperative pain, the osteopathic physician assistant shall:

(1) Conduct and document an appropriate history and physical examination, including screening for risk factors for overdose and severe postoperative pain;

(2) Evaluate the nature and intensity of the pain or anticipated pain following surgery; and

(3) Inquire about any other medications the patient is prescribed or is taking, including date, type, dosage, and quantity prescribed.

[Statutory Authority: RCW 18.57.800, 18.57A.800 and 2017 c 297. WSR 18-20-087, § 246-854-270, filed 10/1/18, effective 11/1/18.]
