

WAC 296-856-20070 Exposure records. (1) You must establish and keep complete and accurate records for all exposure monitoring conducted under this chapter. Make sure the record includes at least the following:

- (a) The name, unique identifier, and job classification of both:
 - (i) The employee sampled;

AND

- (ii) All other employees represented by the sampled employee.
- (b) An estimate of the exposure for each employee "represented" by this monitoring.

- (c) A description of the methods used to obtain exposure monitoring results and evidence of the method's accuracy.

- (d) Any environmental conditions that could affect exposure concentration measurements.

- (e) A description of the procedure used to obtain representative employee exposure monitoring results.

- (f) The operation being monitored.

- (g) The date, number, duration, location, and the result of each sample taken.

- (h) The type of protective devices worn.

- (2) You must maintain documentation that conclusively demonstrates that employee exposure for formaldehyde and the operation where it is used cannot exceed the action level or the 15-minute short-term exposure limit, during any reasonable anticipated conditions.

Such documentation can be based on observations, data, calculation, and previous air monitoring results.

- (3) You must keep exposure monitoring records for at least thirty years.
