

WAC 173-224-050 Permit fee computation and payments. (1) The department shall charge permit fees based on the permit fee schedule contained in WAC 173-224-040. The department may charge fees at the beginning of the fiscal year to which they apply. The department shall notify permit holders of fee charges by sending an invoice to the permittee on record. The department must receive permit fee payments within forty-five days after the department sends a billing statement. The department may elect to bill permit holders a prorated portion of the annual fee on a monthly, quarterly, or other periodic basis.

(2) Permit fee computation shall begin on the first day of each fiscal year. In the case of facilities or activities not previously covered by permits, fee computation begins on the permit issuance date. In the case of applicants for state waste discharge permits who are deemed to have a temporary permit under RCW 90.48.200, computation shall begin on the sixty-first day after the department accepts a completed application. In the case of NPDES permit holders who submit a new, updated permit application containing information that could change their assigned permit fee, computation and permit fee category reassignment begins upon the date the department accepts the application. Any facility that obtains permit coverage but fails to operate will still be obligated to pay the annual permit fee assessment until the department terminates permit coverage. Permits terminated during the fiscal year will pay the annual fee assessment regardless of the permit termination date.

(3) Permit fees for sand and gravel general permit holders are assessed as in subsection (2) of this section and:

(a) Nonoperating sites. A facility conducting mining, screening, washing and/or crushing activities excluding portable rock crushing operations is considered nonoperating for fee purposes if they are conducting these activities for less than ninety cumulative days during a calendar year. A facility producing no asphalt and/or concrete during the calendar year is also considered nonoperating for fee purposes.

(b) Nonoperating sites that become active for only concrete and/or asphalt production are assessed a prorated fee for the actual time inactive. For the actual time a concrete and/or asphalt facility is active excluding asphalt portable batch plants and concrete portable batch plants, fees are based on total production of concrete and/or asphalt.

(c) Fees for continuously active sites that produce concrete and/or asphalt excluding asphalt portable batch plants and concrete portable batch plants, are based on the previous calendar year production totals. Existing facilities must provide the department with the production totals for concrete and/or asphalt produced during the previous calendar year. New facilities with no historical asphalt and/or concrete production data will have their first year fee based on the production levels reported on the application for coverage under the National Pollutant Discharge Elimination System and State Waste Discharge Permit for Process Water, Stormwater, and Mine Dewatering Water Discharges Associated with Sand and Gravel Operations, Rock Quarries and Similar Mining Facilities including Stockpiles of Mined Materials, Concrete Batch Operations and Asphalt Batch Operations general permit.

(4) Fees for fruit packer general permit holders are assessed as in subsection (2) of this section and are computed based on the three previous calendar years production totals. Existing facilities must provide the department with the production totals in the manner described in WAC 173-224-040 (2)(c). New facilities with no historical

production data will have their first year fee based on the estimated production level for that year. The second year fee is determined based on the actual production during the first year. Fee calculation for subsequent years will be based on the average production values of previous years.

(5) Facilities with construction and industrial stormwater general permit coverage will have their annual permit fees begin on the permit issuance date.

(6) Permit fee accrual will continue until the permit has been terminated by the department regardless if the activity covered under the permit has already ceased.

(7) Facilities with an existing NPDES and/or state wastewater discharge permit who also have obtained industrial and/or construction stormwater general permit coverage shall only pay an annual fee based on the permit with the highest permit fee category assessment.

(8) Computation of fees shall end on June 30th, the last day of the state's fiscal year regardless of the permit termination date.

(9) The applicable permit fee shall be paid using ecology's on-line payment software or by check or money order payable to the "Department of Ecology" and mailed to the Water Quality Permit Fee Program, P.O. Box 47611, Olympia, Washington 98504-7611.

(10) In the event a check is returned due to insufficient funds, the department shall consider the permit fee to be unpaid.

(11) Delinquent accounts. Permit holders are considered delinquent in the payment of fees if the fees are not received by the first invoice billing due date. Delinquent accounts are processed in the following manner:

(a) Municipal and government entities shall be notified by regular mail that they have forty-five days to bring the delinquent account up-to-date. Accounts that remain delinquent after forty-five days may receive a permit revocation letter for nonpayment of fees.

(b) Nonmunicipal or nongovernment permit holders shall be notified by the department by regular mail that they have forty-five days to bring the delinquent account up-to-date. Accounts that remain delinquent after forty-five days may be turned over for collection. In addition to the amount owed, the collection agent may add a fee to the delinquent amount owed as authorized by RCW 19.16.500. If the collection agency fails to recover the delinquent fees after twelve months, the permit holder may receive a permit revocation letter for nonpayment of fees.
