

**WAC 182-530-5100 Billing requirements—Unit dose.** (1) To be eligible for a unit dose dispensing fee from the medicaid agency, a pharmacy must:

(a) Notify the agency in writing of its intent to provide unit dose service;

(b) Identify the nursing facility or facilities to be served;

(c) Indicate the approximate date unit dose service to the facility or facilities will commence; and

(d) Follow agency requirements for unit dose payment.

(2) Under a unit dose delivery system, a pharmacy must bill only for the number of drug units actually used by the client in the nursing facility, except as provided in subsections (3), (4), and (5) of this section. It is the unit dose pharmacy provider's responsibility to coordinate with nursing facilities to ensure that the unused drugs the pharmacy dispensed to clients are returned to the pharmacy for credit.

(3) The pharmacy must submit an adjustment form or claims reversal of the charge to the agency for the cost of all unused drugs returned to the pharmacy from the nursing facility on or before the sixtieth day following the date the drug was dispensed, except as provided in subsection (5) of this section. Such adjustment must conform to the nursing facility's monthly log as described in subsection (7) of this section.

(4) The agency pays a unit dose provider a dispensing fee when a provider-packaged unit dose prescription is returned, in its entirety, to the pharmacy. A dispensing fee is not paid if the returned prescription is for a drug with a manufacturer-designated unit dose national drug code (NDC). In addition to the dispensing fee paid under this subsection, the provider may bill the agency one unit of the tablet or capsule but must credit the agency for the remainder of the ingredient costs for the returned prescription.

(5) Unit dose providers do not have to credit the agency for federally designated schedule two drugs which are returned to the pharmacy. These returned drugs must be disposed of according to federal regulations.

(6) Pharmacies must not charge clients or the agency a fee for repackaging a client's bulk medications in unit dose form. The costs of repackaging are the responsibility of the nursing facility when the repackaging is done:

(a) To conform with a nursing facility's drug delivery system; or

(b) For the nursing facility's convenience.

(7) The pharmacy must maintain detailed records of medications dispensed under unit dose delivery systems. The pharmacy must keep a monthly log for each nursing facility served including, but not limited to, the following information:

(a) Facility name and address;

(b) Client's name and patient identification code (PIC);

(c) Drug name/strength;

(d) National drug code (NDC);

(e) Quantity and date dispensed;

(f) Quantity and date returned;

(g) Value of returned drugs or amount credited;

(h) Explanation for no credit given or nonreusable returns; and

(i) Prescription number.

(8) Upon the agency's request, the pharmacy must submit copies of the logs referred to in subsection (7) of this section.

(9) When the pharmacy submits the completed annual prescription volume survey to the agency, it must include an updated list of all nursing facilities currently served under unit dose systems.
