

**WAC 246-274-400 Greywater reuse treatment technologies—Tier 3 greywater irrigation systems.** (1) This section applies to treatment technologies for Tier 3 greywater irrigation systems.

(2) All proprietary greywater treatment products used to treat light greywater shall meet the requirements of NSF/ANSI Standard 350-1, 2011, of the National Sanitation Foundation International (NSF), *"Onsite Residential and Commercial Graywater Treatment Systems for Subsurface Discharge."*

(3) All proprietary treatment products used to treat dark greywater shall meet the requirements of NSF/ANSI Standard 40, 2009.

(4) All proprietary treatment products shall bear the NSF seal of approval indicating that the product meets the requirements of NSF Standard 350-1 or NSF Standard 40 as applicable.

(5) Public domain treatment technologies may be used to treat greywater if the department has developed recommended standards and guidance for the technologies.

[Statutory Authority: RCW 90.46.015. WSR 11-02-011, § 246-274-400, filed 12/28/10, effective 7/31/11.]
