

WAC 173-150-110 Saltwater intrusion and groundwater contamination. In addition to the procedures outlined in WAC 173-150-080, the department may regulate or control saltwater intrusion conditions caused by withdrawals from a freshwater aquifer or groundwater contamination caused by improper well construction techniques or other causes, through other means, including artificial recharge projects, the importation of additional water from other sources, or any other means deemed by the department to be reasonable, feasible and appropriate.

[Statutory Authority: Chapter 90.44 RCW. WSR 85-12-017 (Order 84-44), § 173-150-110, filed 5/29/85.]
