CLAMS AND OYSTERS

WAC 220-340-100 Commercial clam fishery—Gear. It is unlawful to take, dig for, or possess clams, geoducks, or mussels taken for commercial purposes from any of the tidelands in the state of Washington except with a pick, mattock, fork or shovel operated by hand, except:

(1) Permits for the use of mechanical clam digging devices to take clams other than geoducks may be obtained from the director of the department of fish and wildlife (DFW), subject to the following conditions:

(a) All mechanical devices used to take or harvest shellfish must be approved by the director of DFW.

(b) A separate permit is required for each device used to take or harvest shellfish, and the permit must be attached to the specific unit the permit applies to at all times.

(c) All clams taken for commercial use must be of legal size and in season during the proposed operations unless otherwise provided in specially authorized permits for the transplanting of seed to growing areas or for research purposes.

(d) The holder of a permit to take shellfish from tidelands by mechanical means must limit operations to privately owned or leased land.

(e) Taking clams that lie in or on the substrate under navigable water below the level of mean lower low water by any mechanical device is prohibited except as authorized by the director of DFW.

(i) Within the enclosed bays and channels of Puget Sound, Strait of Juan de Fuca, Grays Harbor and Willapa Harbor, the operators of all mechanical devices must confine their operations to substrate-leased from the Washington department of natural resources, subject to the approval of the director of DFW.

(ii) It is unlawful to harvest shellfish that lie in or on the substrate of the Pacific Ocean westward from the western shores of the state in waters less than two fathoms deep at mean lower low water. The director of DFW may reserve all or portions of the substrate in waters more than two fathoms deep and prevent the taking of shellfish in any quantity from those reserves.

(f) Noncompliance with any part of this section or with special requirements of individual permits results in immediate cancellation and/or subsequent nonrenewal of all permits held by the operator.

(g) Applications for permits to use mechanical clam digging devices must be made on the forms provided by DFW, and permits must be in the operator's possession before digging commences.

(h) All permits to take or harvest shellfish by mechanical means expire on December 31 of the year of issue.

(i) All mechanical clam harvesting machines must have approved instrumentation that provides deck readout of water pressure.

(j) All clam harvest machines operating on intertidal grounds where less than 10 percent of the substrate material is above 500 microns in size must be equipped with a propeller guard suitable for reducing the average propeller wash velocity at the end of the guard to approximately 25 percent of the average propeller wash velocity at the propeller. The propeller guard must also be positioned to provide an upward deflection to propeller wash.

(k) Clam harvest machines operating in fine substrate material where less than 10 percent of the substrate material is above 500 microns in size, must have a maximum harvest head width of three feet (overall) and the maximum pump volume as specified by DFW, commensurate with the basic hydraulic relationship of 828 gpm at 30 pounds per square inch, pressure to be measured at the pump discharge.

(l) Clam harvest machines operating in coarser substrate material where more than 10 percent of the substrate material is above 500 microns in size, must have a maximum harvest head width of four feet (overall) and a maximum pump volume as specified by DFW, commensurate with a basic hydraulic relationship of 1,252 gpm at 45 pounds per square inch, pressure to be measured at the pump discharge.

(m) All clam harvest machine operators must submit accurate performance data showing revolutions per minute, gallons per minute, and output pressure for the water pump on their machine. In addition, they must furnish the number and sizes of the hydraulic jets on the machines. If needed, the operator will thereafter modify the machine (install a sealed pressure relief valve) as specified by DFW to conform with values set forth in this section. Thereafter, it is illegal to make unauthorized changes to the clam harvester water pump or the hydraulic jets. Exact description of the pump volume, maximum pressure and number and size of the hydraulic jet for each harvester machine must be included in the DFW's clam harvest permit.

(n) All clam harvest machines must be equipped with a 3/4-inch pipe thread tap and valve that will allow rapid coupling of a pressure gauge for periodic testing by enforcement officers.

(o) Each mechanical clam harvester must have controls arranged and situated near the operator to allow the operator to immediately cut off the flow of water to the jet manifold without affecting the capability of the vessel to maneuver.

(p) Licensing: A hardshell clam mechanical harvester fishery license is required to operate the mechanical harvester gear provided for in this section. For more information on or to apply for a hardshell clam mechanical harvester fishery license, visit department offices, call the WDFW license division at 360-902-2500, or visit the department website at www.wdfw.wa.gov.

(2) Aquatic farmers may harvest geoducks that are private sector cultured aquatic product by means of water pumps and nozzles.

(3) Persons may harvest nonstate tideland wild geoducks under a nonstate lands commercial wild clam, mussel and oyster trial fishery permit by means of water pumps and nozzles.

(4) It is unlawful to take, dig for and possess razor clams taken for commercial purposes from any of the tidelands in the state of Washington except by hand, shovels, cylindrical cans, tubes or hinged digging devices operated by hand. The opening of tubes or cans must be either circular or elliptical with the circular can/tube having a min-

imum outside diameter of four inches and the elliptical can/tube having a minimum dimension of four inches long and three inches wide outside diameter. The hinged digging device when opened in a cylindrical position, must have a minimum outside diameter of four inches at the bottom.

Part 1910, Subpart T, adopted under the Occupational Safety and Health Act of 1970. The procedures of chapter 34.05 RCW apply to these suspensions or revocations.

(b) If there is a substantial probability that a violation of commercial diving safety regulations could result in death or serious physical harm to a person harvesting geoducks, the director may immediately suspend the license until the violation is corrected. If the violator fails to correct the violation within ten days of notice of the violation, the director may revoke the violator's geoduck fishery license. The director may not revoke a geoduck fishery license if the holder of the harvesting agreement corrects the violation within ten days of receiving written notice of the violation.

WAC 220-340-430 Commercial crab fishery—Gear requirements. (1)
Buoy tag and pot tag required.

(a) It is unlawful to place in the water, pull from the water, possess on the water, or transport on the water any crab buoy or crab pot without an attached buoy tag and pot tag that meet the requirements of this section, except as provided by (b) and (c) of this subsection. A violation of this subsection is punishable under RCW 77.15.520 Commercial fishing—Unlawful gear or methods—Penalty.

(b) Persons operating under a valid coastal gear recovery permit as provided in WAC 220-340-440 may possess crab pots or buoys missing tags or bearing the tags of another license holder, provided the permittee adheres to provisions of the permit. Failure to adhere to the provisions of the permit is a gross misdemeanor, punishable under RCW 77.15.750 Unlawful use of a department permit—Penalty.

(c) Persons operating under a valid coastal gear transport permit as provided in WAC 220-340-440 may possess crab pots or buoys bearing the tags issued by another state, provided the permittee adheres to provisions of the permit. Failure to adhere to the provisions of the permit is a gross misdemeanor, punishable under RCW 77.15.750 Unlawful use of a department permit—Penalty.

(2) **Commercial crab fishery pot tag requirements:** Each shellfish pot used in the commercial crab fishery must have a durable, nonbiodegradable tag securely attached to the pot that is permanently and legibly marked with the license owner's name or license number and telephone number. If the tag information is illegible, or the tag is

lost for any reason, the pot is not in compliance with state law. A violation of this subsection is punishable under RCW 77.15.520 Commercial fishing—Unlawful gear or methods—Penalty.

(3) Commercial crab fishery buoy tag requirements.

(a) The department issues crab pot buoy tags to the owner of each commercial crab fishery license upon payment of an annual buoy tag fee per crab pot buoy tag. Prior to setting gear, each Puget Sound crab license holder must purchase 100 tags, and each coastal crab fisher must purchase 300 or 500 tags, depending on the crab pot limit assigned to the license.

(b) In coastal waters, except if authorized by permit issued by the director, each crab pot must have the department-issued buoy tag securely attached to the first buoy on the crab pot buoy line (the buoy closest to the crab pot), and the buoy tag must be attached to the end of the first buoy, at the end away from the crab pot buoy line.

(c) In Puget Sound, all crab buoys must have the department-issued buoy tag attached to the outermost end of the buoy line.

(d) If there is more than one buoy attached to a pot, only one buoy tag is required.

(e) All remaining, undeployed buoy tags per license per region must be onboard the designated vessel and available for immediate inspection by the department.

(f) Replacement crab buoy tags.

(i) Puget Sound: The department only issues additional tags to replace lost tags to owners of Puget Sound commercial crab fishery licenses who obtain, complete, and sign a declaration, under penalty of perjury, in the presence of an authorized department employee. The declaration must state the number of buoy tags lost, the location and date where the licensee last observed lost gear or tags, and the presumed cause of the loss.

(ii) Coastal: The department only issues replacement buoy tags for the coastal crab fishery in the case of extraordinary loss or on a case-by-case basis. Replacement buoy tags will not be issued in excess of the license holder's permanent pot limit.

(4) A violation of subsection (3) of this section is a gross misdemeanor, punishable under RCW 77.15.520 Commercial fishing—Unlawful gear or methods—Penalty.

(5) Commercial crab fishery buoy requirements.

(a) All buoys attached to commercial crab gear must consist of a durable material and remain floating on the water's surface when 5 pounds of weight is attached, unless otherwise authorized by permit issued by the director.

(b) It is unlawful to use bleach, antifreeze or detergent bottles, paint cans, or any other container as a buoy. The line attaching a buoy to shellfish gear must be weighted sufficiently to prevent the excess line from floating on the water's surface.

(c) No buoys attached to commercial crab gear in Puget Sound may be both red and white in color unless a minimum of 30 percent of the surface of each buoy is also prominently marked with an additional color or colors other than red or white. Red and white colors are reserved for personal use crab gear as described in WAC 220-330-020.

(d) It is unlawful for any coastal Dungeness crab fishery license holder to fish for crab unless the license holder has registered the buoy brand and buoy color(s) to be used with the license. A license holder may register only one unique buoy brand and one buoy color

scheme with the department per license. Persons holding more than one state license must register buoy color(s) for each license that are distinctly different. The buoy color(s) will be shown in a color photograph.

(i) All buoys fished under a single license must be marked in a uniform manner with one buoy brand number registered by the license holder with the department and be of identical color or color combinations, unless otherwise authorized by permit issued from the director.

(ii) It is unlawful for a coastal Dungeness crab fishery license holder to fish for crab using any other buoy brand or color(s) than those registered with and assigned to the license by the department.

(6) Coastal commercial crab fishery line requirements.

(a) All crab pots used in the coastal Dungeness crab fishery shall be set up to use only the amount of line reasonably necessary to compensate for tides, currents, and weather.

(b)(i) It is unlawful for a coastal Dungeness crab fishery license holder to use line that connects the main buoy to the crab pot that is not marked sufficiently to identify it as gear used in the Washington coastal Dungeness crab fishery.

(ii) For each shellfish pot used in the Washington coastal commercial Dungeness crab fishery and rigged with line, that line must be marked with 12 inches of red in at least two places. At a minimum, 12 inches of line must be marked in red, no more than one fathom from the main buoy and no more than one fathom from the pot.

(7) Violation of subsection (5) of this section is a gross misdemeanor, punishable under RCW 77.15.520 Commercial fishing—Unlawful gear or methods—Penalty.

(3) **Determination of permanent coastal crab pot limits.**

(a) The number of crab pots assigned to a Washington Dungeness crab coastal fishery license, or to an equivalent Oregon or California Dungeness crab fishery license is based on documented landings of Dungeness crab taken from waters of the Pacific Ocean south of the United States/Canada border and west of the Bonilla-Tatoosh line, and from coastal estuaries in the states of Washington, Oregon, and California. Documented landings may be evidenced only by valid Washington state shellfish receiving tickets, or equivalent valid documents from the states of Oregon and California, which show Dungeness crab were taken between December 1, 1996, and September 16, 1999. Such documents must have been received by the respective states no later than October 15, 1999.

(b) The following criteria is used to determine and assign a crab pot limit to a Dungeness crab coastal fishery license, or to an equivalent Oregon or California Dungeness crab fishery license:

(i) The three "qualifying coastal Dungeness crab seasons" are from December 1, 1996, through September 15, 1997; from December 1, 1997, through September 15, 1998; and from December 1, 1998, through September 15, 1999. Of the three qualifying seasons, the one with the most poundage of Dungeness crab landed on a license determines the crab pot limit for that license. A crab pot limit of 300 will be assigned to a license with landings totaling up to 35,999 pounds and a

crab pot limit of 500 will be assigned to a license with landings totaling 36,000 pounds of crab or more.

(ii) Landings of Dungeness crab made in the states of Oregon or California on valid Dungeness crab fisheries licenses during a qualifying season may be used for purposes of assigning a crab pot limit to a Dungeness crab fishery license, provided that documentation of the landings is provided to the department by the Oregon department of fish and wildlife and/or the California department of fish and game.

(iii) Landings of Dungeness crab made in Washington, Oregon, and California on valid Dungeness crab fishery licenses during a qualifying season may be combined for purposes of assigning a crab pot limit, provided that the same vessel was named on the licenses, and the same person held the licenses. A crab pot limit assigned as a result of combined landings is invalidated by any subsequent split in ownership of the licenses. No vessel named on a Dungeness crab fishery license will be assigned more than one coastal crab pot limit.

(4) **Appeals of coastal crab pot limits.** An appeal of a crab pot limit by a coastal commercial license holder must be filed with the department on or before October 18, 2001. The shellfish pot limit assigned to a license by the department will remain in effect until such time as the appeal process is concluded.

(5) **Summer management period - Pot limits.** Beginning May 1 through September 15, it is unlawful for a person to deploy or fish more than the specified reduced pot limit assigned to each license, unless otherwise authorized by permit issued by the director. Each pot deployed during the summer management period must possess a summer buoy tag, unless authorized by permit issued by the director.

(a) Licenses with a permanent pot limit of 500 will be assigned a reduced pot limit of 330 pots.

(b) Licenses with a permanent pot limit of 300 will be assigned a reduced pot limit of 200 pots.

(c) It is unlawful to deploy gear that includes tags other than the summer buoy tag, unless authorized by permit issued by the director.

WAC 220-340-490 Commercial crab fishery—Coastal gear recovery permits.

(1) **Emergency coastal crab gear recovery permit.** Emergency permits are granted on a case-by-case basis to allow crab fishers to recover shellfish pots that were irretrievable at the end of the lawful season opening due to extreme weather conditions. The director or director's designee may grant an emergency coastal crab gear permit once a commercial crab season is closed. Crab fishers must notify and

apply to the department's enforcement program for such emergency permits within 24 hours prior to the close of the commercial crab season.

(2) **Coastal crab gear recovery permit.** After the September 15 close of the primary coastal commercial crab season and from May 1 through September 15, the director or director's designee may grant a coastal crab gear recovery permit for licensed coastal Dungeness crab fishers to recover crab pots that remain in the ocean and belong to state licensed fishers.

(3) It is unlawful to fail to follow the provisions of a coastal crab gear recovery permit. Violation of this section is a misdemeanor, punishable under RCW 77.15.750 Unlawful use of a department permit—Penalty.

WAC 220-340-520 Commercial shrimp pot fishery—Puget Sound.

License

(1) It is unlawful to take, fish for, land, or deliver shrimp taken for commercial purposes with pot gear from Puget Sound waters without a valid Puget Sound shrimp pot license.

A Puget Sound shrimp pot license will only be issued to an individual who is a natural person, and this person shall be the primary operator. Holders of Puget Sound shrimp pot licenses may designate a single alternate operator per license.

Pot Gear and area

(2) It is unlawful to fish for shrimp for commercial purposes in Puget Sound using shellfish pot gear except during seasons opened by emergency rule.

(3) Gear restrictions in all areas, maximum 100 pots per fisher except for dual licensees as provided for in RCW 77.70.410.

(4) Buoy requirements, in all areas:

(a) Buoys must be orange in color and consist of durable material that will remain floating on the surface with five pounds attached; bleach or antifreeze bottles or other containers may not be used as floats.

(b) Buoys must be marked with the clear identification of the license holder and the vessel designated on the Puget Sound shrimp pot license.

(c) When two or more shrimp pots are attached to a common ground line, the number and type of pots (spot shrimp or nonspot shrimp pot) so attached must be clearly labeled on the required buoy.

(d) The line attaching the pot to the buoy must be weighted sufficiently to prevent the line from floating on the surface.

(5) Pot requirements, in all areas:

(a) A shrimp pot may not exceed a maximum of 153-inch bottom perimeter and a maximum of 24-inch height.

(b) The entire top, bottom, and sides of the shrimp pot must be constructed of mesh material. Use of liners is prohibited.

(c) Entrance tunnels to shrimp pots may be constructed of any size mesh material. All entrance tunnels must open into the pot from the side. The sum of the maximum widths of all entrance tunnel openings must not exceed half of the perimeter of the bottom of the pot.

(d) Spot shrimp may only be harvested using pots with a minimum mesh size of one inch. Mesh size of one inch is defined as a mesh opening that a 7/8-inch square peg will pass through, excluding the entrance tunnels, except for flexible (web) mesh pots, where the mesh must be a minimum of 1 3/4 inch stretch measure. Stretch measure is defined as the distance between the inside of one knot to the outside

of the opposite vertical knot of one mesh, when the mesh is stretched vertically.

(e) Nonspot shrimp may only be harvested using pots with a minimum mesh size 1/2 inch. Mesh of 1/2 inch is defined as a mesh that a 3/8 inch square peg will pass through, excluding the entrance tunnels, except for flexible (web) mesh pots, where the mesh must be at a minimum 1 1/8 inch stretch measure. Stretch measure is defined as the distance between the inside of one knot to the outside of the opposite vertical knot of one mesh, when the mesh is stretched vertically.

(6) Harvest restrictions, all areas:

(ii) Nonspot pots may be deployed within Sequim Bay CSMA (WAC 220-320-120) concurrently with spot shrimp pots deployed in the remaining portion of Catch Area 25A outside of Sequim Bay CSMA.

(iii) All shrimp harvested must be landed and recorded on a shellfish receiving ticket before subsequent harvest may occur.

(c) Each fisher or alternate operator is required to report their intended catch area of harvest, target species (spot or nonspot), and an estimate of total pounds that are being targeted prior to the deployment of any shrimp gear by email or text message to shrimp.report@dfw.wa.gov, or by using the Puget Sound commercial shrimp reporting website.

(d) It is unlawful to harvest nonspot and spot shrimp in the same day.

(e) It is unlawful to harvest shrimp in more than one catch area per day, except for concurrent pot deployment described in (b) of this subsection.

(f) Nonspot shrimp pot harvest restrictions:

(i) Harvest of nonspot shrimp is not permitted deeper than 175 feet in Shrimp Management Area 2E.

(ii) Harvest of nonspot shrimp is not permitted deeper than 150 feet in Region 2W.

Reporting

(7) All shrimp taken in the Puget Sound commercial shrimp fishery must be landed and recorded on Washington state fish receiving tickets within 24 hours of harvest. No fisher may land shrimp without immediate delivery to a wholesale fish buyer, or if transferred at sea, without transfer to a wholesale fish buyer. A fisher who is a wholesale fish buyer or a limited fish seller may complete and return a fish receiving ticket to satisfy the requirements of this subsection.

Dip bag net and brail may not exceed 10 feet in diameter nor have a mesh less than one inch stretch measure. Stretch measure is defined as the distance between the inside of one knot to the outside of the opposite vertical knot of one mesh, when the mesh is stretched vertically. Other gear may be used to fish for squid commercially if authorized by a permit issued by the director.

(2) Food fish, other shellfish except octopus, and squid eggs caught while fishing for squid must be returned to the water immediately. It is lawful to retain for commercial purposes squid taken incidental to another commercial fishery.

(3) Each vessel fishing for squid may use a lighting system with a combined power of not more than 10 kilowatts (10,000 watts), or equivalent when measured in lumens. Lights of 200 watts (or equivalent when measured in lumens) or greater must be shielded and may not be directed to any point more than 100 feet from the vessel while fishing for or attracting squid.

(4) It is unlawful to fish for squid for commercial purposes within 1/4 mile of the shoreline.
