PART III: NOTIFIABLE CONDITIONS—LABORATORIES AND LABORATORY DIRECTORS

WAC 246-101-200 Rapid screening testing. An individual or entity including, but not limited to, health care providers and health care facilities, that conduct an RST for any of the following conditions, meets the definition of a laboratory under this chapter, and shall comply with WAC 246-101-201 through 246-101-230:

- (1) Blood lead level testing;
- (2) Hepatitis C (acute infection);
- (3) Hepatitis C (chronic infection);
- (4) HIV infection; or
- (5) Novel coronavirus (COVID-19).

[Statutory Authority: RCW 43.20.050 and 70.24.130. WSR 21-11-040 and 22-01-175, § 246-101-200, filed 5/12/21 and 12/17/21, effective 1/1/23.]

WAC 246-101-201 Notifiable conditions—Laboratories. (1) For the purposes of Table Lab-1:

(a) "At least annually" means deidentified negative screening results may be submitted in a single report no less than once per year, but may be submitted more frequently as a single report or as individual screening results.

(b) "Deidentified negative screening result" means an initial test result that indicates the absence of disease, and that has personally identifiable information removed from it using the Health Insurance Portability and Accountability Act of 1996 Safe Harbor method defined in 45 C.F.R. 164.514. A deidentified negative screening result does not include a negative test result associated with a previous positive test result, such as a negative nucleic acid or viral load test that is performed after a positive antibody or antigen test.

(c) "LHJ" means where the patient resides, or, in the event that patient residence cannot be determined, the local health jurisdiction in which the ordering health care provider practices, or the local health jurisdiction in which the laboratory operates.

(d) "Within two business days" means specimens must be in transit to the Washington state public health laboratories within two business days of:

(i) Completing a test and the specimen being ready for packaging; or

(ii) Receiving a request from a local health jurisdiction or the department, provided the specimen is still available at the time of the request.

(2) This chapter does not require a laboratory to:

(a) Test for agents (conditions) or speculate if the laboratory does not perform the test as part of its normal work. A laboratory director shall only report a condition if it is identified as part of their normal testing protocols; or

(b) Retain specimens indefinitely in anticipation of a request from a local health jurisdiction or the department.

(3) The agents (conditions) in Table Lab-1 are notifiable by a laboratory director as indicated in Table Lab-1 and this chapter.
