

WAC 315-34-030 Play for Lotto. (1) Type of play: A Lotto player must select six numbers in each play. A winning play is achieved only when 3, 4, 5, or 6 of the numbers selected by the player match, in any order, the six winning numbers drawn by the lottery.

(2) Method of play: The player will use play slips to make number selections. The lottery terminal will read the play slip and issue ticket(s) with corresponding plays. If a play slip is not available, the lottery retailer may enter the selected numbers via the keyboard. A player may choose to have the number selections made by the lottery terminal, a random number generator operated by the computer, commonly referred to as "quick pick."
