

WAC 246-918-920 Coprescribing of opioids with certain medications. (1) The physician assistant shall not knowingly prescribe opioids in combination with the following medications without documentation of medical decision making:

- (a) Benzodiazepines;
- (b) Barbiturates;
- (c) Sedatives;
- (d) Carisoprodol; or
- (e) Nonbenzodiazepine hypnotics.

(2) If, because of a prior prescription by another provider, a prescription written by a physician assistant results in a combination of opioids and medications described in subsection (1) of this section, the physician assistant issuing the new prescription shall consult with the other prescriber to establish a patient care plan surrounding these medications. This provision does not apply to emergency care.
