

WAC 296-17A-5002 Classification 5002.

5002-00 Booming and rafting logs

Applies to establishments engaged in booming and rafting logs on water. Booming involves making a barrier in the water usually with existing floating logs tied together with rope or chain to enclose other free floating logs. This type of barrier is referred to as a bundle. Rafting involves the use of a boom boat or tugboat to push the bundles together and tow the bundles to a particular destination. The destination may be a port where logs are loaded directly onto vessels, or to a sawmill, lumber mill or log sorting yard. This classification includes the loading of logs into or out of the water when performed by employees of the booming and rafting business.

Special note: Care should be exercised prior to assignment of this classification as the workers may be subject to federal laws covered by the Jones Act or by the U.S. Longshore and Harbor Workers Act.
