

WAC 296-807-17020 Visually inspect jacks and keep them in good working order.

Note: There are two types of inspection, frequent or periodic, depending on how often they are done.

- (1) You must inspect jacks at appropriate intervals:
 - (a) Make sure frequent inspections are done by the operator or other designated person as follows:
 - (i) Before a jack is first placed in service;
 - (ii) Monthly for a jack used in normal service;
 - (iii) Daily or before each use for a jack used for other than normal service;
 - (iv) Before using a jack that has been altered, modified, or repaired;
 - (v) Before using a jack that has not been used in one year or more.
 - (b) Make sure a periodic inspection of the jack is done once a year.
 - (c) Inspect the jack using Table 4, Jack Inspection Requirements, during any frequent or periodic inspection.
- (2) You must make sure a jack that is out of order is:
 - (a) Tagged;
 - (b) Not used until repaired.
- (3) You must make sure a jack is properly lubricated at regular intervals.

Note: The jack should be lubricated following the manufacturer's instructions.
