

WAC 388-101D-0675 What happens if a group training home employee receives a positive tuberculin test result? If a group training home employee receives a positive result to tuberculosis skin or blood testing, the group training home must:

- (1) Ensure the employee completes a chest X-ray within seven days;
- (2) Evaluate the employee for signs and symptoms of tuberculosis immediately and annually thereafter; and
- (3) Follow the recommendations of the employee's medical provider.
