

WAC 468-600-722 State objection to subcontractors. (1) Prior to the execution of any contract with a proposer, the proposer must provide the department with a list of all major subcontractors who will perform work in the construction, operation or maintenance of the project. All subcontractors must be legally eligible to perform or work on public contracts under federal and Washington law and regulations. No subcontractor will be accepted who is ineligible to receive public works contracts in the state of Washington.

(2) If the department has reasonable objection to any proposed subcontractor, the department is authorized to require, before the execution of a contract, an apparently successful proposer to submit an acceptable substitute. In such case, the proposer must submit an acceptable substitute, and the contract may, at the department's discretion, be modified to equitably account for any difference in cost necessitated by the substitution. The department will set a maximum time period from the date of the department's written demand for substitution within which to make an acceptable substitution. A proposer's failure to make an acceptable substitution at the end of the time period will constitute sufficient grounds for the department to refuse to execute a contract, without incurring any liability for the refusal. In setting a maximum time period, the department shall consider the scope of the subcontract, availability of other subcontractors, and whether the disapproved subcontractor is identified in the proposal as an equity contributor or source of other financial support to the project relied on by the proposer. Following such identification, the proposer shall be granted an additional maximum time period as determined by the department to conclude negotiations of acceptable terms and conditions with that substitute major subcontractor.

(3) The department may not require any proposer to engage any subcontractor, supplier, other person or organization against whom the proposer has reasonable objection.
