

WAC 16-488-006 Blueberry maggot—Establishing quarantine. Blueberry maggot (*Rhagoletis mendax*) is known to infest blueberries in various states situated in the eastern part of the United States, and blueberries produced in this state are susceptible to infestation by blueberry maggot (*Rhagoletis mendax*); therefore, a quarantine is established to prevent shipments or receipt of blueberries from such eastern states which may constitute a direct threat or hazard to blueberry production in Washington state.
