

WAC 173-446-300 Auctions of current and prior year allowances.

(1) Each year starting in 2023, ecology shall submit allowances for the purpose of auctions to be held on four separate occasions, each consisting of a single round of bidding.

(2) Only the following allowances shall be auctioned:

(a) Allowances reserved by ecology for the purpose of auctions;

(b) Allowances consigned to auction by electric utilities and natural gas utilities as follows:

(i) Electric utilities may choose at any time to consign up to 100 percent of their allowances to auction. During the first compliance period, electric utilities may choose whether or not to consign no cost allowances to auction, and if so, how many allowances to consign. All proceeds from the auction of allowances consigned by electric utilities will be used for the benefit of ratepayers, which, for investor-owned utilities, will be determined by the utilities and transportation commission, and with the first priority the mitigation of any rate impacts to low-income customers.

(ii) Natural gas utilities may choose at any time to consign up to 100 percent of their allowances to auction. Natural gas utilities must consign to auction:

(A) In 2023, at least 65 percent of the no cost allowances allocated to them for 2023;

(B) In 2024, at least 70 percent of the no cost allowances allocated to them for 2024;

(C) In 2025, at least 75 percent of the no cost allowances allocated to them for 2025;

(D) In 2026, at least 80 percent of the no cost allowances allocated to them for 2026;

(E) In 2027, at least 85 percent of the no cost allowances allocated to them for 2027;

(F) In 2028, at least 90 percent of the no cost allowances allocated to them for 2028;

(G) In 2029, at least 95 percent of the no cost allowances allocated to them for 2029;

(H) In 2030, and every year thereafter, 100 percent of the no cost allowances allocated to them for 2030 and subsequent years.

(iii) All proceeds from the auction of allowances consigned by natural gas utilities shall be used for the benefit of customers, as determined by the utilities and transportation commission for investor-owned natural gas utilities, including at a minimum eliminating any additional cost burden to low-income customers from the implementation of the Climate Commitment Act.

(A) Revenues from allowances consigned by natural gas utilities and sold at auction must be returned by providing nonvolumetric credits on ratepayer utility bills, prioritizing low-income customers, or used to minimize cost impacts on low-income, residential, and small business customers through actions that include, but are not limited to, weatherization, decarbonization, conservation and efficiency services, and bill assistance. Investor-owned utility compliance with this subsection will be determined by the utilities and transportation commission. Nothing in this subsection amends the utilities and transportation commission's jurisdiction over investor-owned utilities.

(B) The customer benefits provided from allowances consigned to auction by natural gas utilities under this section must be in addition to existing requirements in statute, rule, or other legal requirements, as determined for investor-owned utilities by the utilities and transportation commission. Nothing in this subsection amends

the utilities and transportation commission's jurisdiction over investor-owned utilities.

(C) Except for low-income customers, any customer bill credits under this subsection are reserved exclusively for customers at locations connected to a natural gas utility's system on July 25, 2021. Bill credits may not be provided to customers of the gas utility at a location connected to the system after July 25, 2021. Investor-owned utility compliance with this section will be determined by the utilities and transportation commission. Nothing in this subsection amends the utilities and transportation commission's jurisdiction over investor-owned utilities.

(3) At each auction, ecology shall submit the percentage of current and prior vintage allowances ecology considers appropriate after considering the allowances in the marketplace due to the marketing of no cost allowances issued to EITE facilities, electric utilities, and natural gas utilities.

(a) Ecology shall offer only such number of allowances at each auction as will enhance the likelihood of achieving the GHG emission reductions required in RCW 70A.45.020.

(b) By January 15th of 2024 and each succeeding year, ecology shall publish on its website the dates of the quarterly auctions for that year and the number of allowances of that year's vintage allowances that ecology will submit for each of those auctions.

(4) At each auction, consigned allowances shall be sold first. If at the end of an auction, any consigned allowances remain unsold, they shall be retained to be submitted for sale in the subsequent auction.

(5) If, at the end of an auction, any of the allowances submitted to auction by ecology have not yet been sold, ecology shall hold them to be auctioned in subsequent auctions but only after the settlement price for allowances has been above the auction floor price for two consecutive auctions. If the allowances are not sold within 24 months, ecology shall place them in the emissions containment reserve.

[Statutory Authority: RCW 70A.65.220. WSR 22-20-056 (Order 21-06), § 173-446-300, filed 9/29/22, effective 10/30/22.]
